

Oracle® Retail Store Inventory Management

Release Notes

Release 13.1.9

October 2014

Oracle Retail Store Inventory Management (SIM) Release 13.1.9 is a patch release for SIM 13.1. SIM 13.1.9 includes selected defect fixes and enhancements for SIM 13.1 code.

Oracle Customer Support investigates submitted issues assuming that all released updates have been applied. It is the customer's decision when to apply a new release; however, delays in applying updates can complicate the support process.

About Patch Releases

Oracle Retail patch releases are periodic releases that can include the following:

- New defect fixes
- Product enhancements
- Technology upgrades
- Performance fixes

Documentation for patch releases includes new and updated guides (for example, Operations Guides, User Guides, and so on) that apply to the patch release level. These documents include applicable updates made since the last patch release. Documents revised for this patch release supersede and replace all previous document versions. See "[Related Documentation](#)" for a list of the documents published for SIM 13.1.9.

Note: Customers must apply the entire patch release to update their installation to the currently supported level.

Hardware and Software Requirements

See the *Oracle Retail Store Inventory Management Installation Guide* for information about the following:

- Hardware and software requirements
- Oracle Retail application software compatibility

Applying the Patch Release

Before applying the SIM 13.1.9 patch release, be sure that:

- SIM 13.1 has been installed
- Patch releases SIM 13.1.1 through SIM 13.1.8 have been applied

Before applying the new files over your code:

- Note whether any modules have been customized. If so, the customizations must be reapplied to the new version of the module, or the fix may need to be applied to the custom version of the code.
- Copy the original files to a different directory before you copy over them, in case you need to refer to them at a later date.

Running Scripts

Back up data before running any script, because the scripts provided *do not* preserve data. See defect reports for details.

Check with your database administrator to determine whether your database should be analyzed after a script is run. In many cases, analysis of the database is necessary to take advantage of new or modified indexes intended to improve performance of the application.

Technical Enhancements

This section addresses the technical enhancements included in Oracle Retail Store Inventory Management, Release 13.1.9.

Note: The following list announces the addition of Oracle Retail support for the technology described. See the Installation Guide requirements section for critical information, such as whether the enhancement below replaces previous versions or is supported in addition to already existing versions.

- Oracle Database 11gR2 Enterprise Edition version 11.2.0.4
Oracle Retail Store Inventory Management Release 13.1.9 is supported for use with Oracle Database 11gR2 Enterprise Edition version 11.2.0.4.
- Oracle Java 6 update 75
Oracle Retail Store Inventory Management Release 13.1.9 is supported for use with Oracle Java 6 update 75.
- Oracle Application Server 10.1.3.5
Oracle Retail Store Inventory Management Release 13.1.9 is supported for use with Oracle Application Server 10.1.3.5.
- Oracle Linux 6/Red Hat Enterprise Linux 6
Oracle Retail Store Inventory Management Release 13.1.9 is supported for use with Oracle Linux 6/Red Hat Enterprise Linux 6.

Defect Fixes and Documentation

A defect fix is a modification to the base Oracle Retail code (for example, a bug fix, a performance enhancement, or a functional enhancement). Each defect fix that is included in this release has a corresponding defect report titled <defect-number>.PDF (for example, 12345678.PDF).

The file **DEFECT MODULE XREF SIM 13.1.9.XLS** lists the defect fixes for Release 13.1.9. Review each defect report carefully before implementing the defect fixes. Note that scripts do not preserve data. Make sure that all data is backed up before you run any script.

Noteworthy Defect Fixes

The following noteworthy defect fixes are included in this release. The following is not a complete list. See **DEFECT MODULE XREF SIM 13.1.9.XLS** for a complete list of the defect fixes for SIM 13.1.9.

Defect Number	Summary
16719603	For a third-party stock count, stock counts that are partially or fully authorized cannot be deleted.
16908031	In SIM sequencing, there is no warning that two users are changing the same item at the same time.
17588732	If an item is shipped in one container which includes two transfers and the user tries to un-receive it after it has been received in SIM, a severe system error is thrown.
17620532	On the handheld, the sequence of the in-store locations (macro locations) is not considered when selecting a child count.
17824437	The PurgePriceHistories job hangs and times out.
18027404	Discrepant behavior occurs when adding inactive items to a store order.
18419633	The SOHdrMod message fails with a null pointer exception in SIM integration staging.
18709042	In supplier lookup, if the specified search limit is greater than 300, only 300 suppliers are retrieved.
18763996	The RIB/SOStatus message fails in RIB_MESSAGE.
19434492	When selecting search in supplier lookup, a severe system error occurs.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

- (i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.
- (ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.
- (iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.
- (iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
