

Oracle® Retail Store Inventory Management

Release Notes

Release 13.2.1.2

April 2011

Oracle Retail Store Inventory Management (SIM) Release 13.2.1.2 is a bundled hot fix release for SIM 13.2. SIM 13.2.1.2 includes selected defect fixes for SIM 13.2 code.

Oracle Customer Support investigates submitted issues assuming that all released updates have been applied. It is the customer's decision when to apply a new release; however, delays in applying updates can complicate the support process.

About Bundled Hot Fix Releases

Oracle Retail bundled hot fix releases are the most frequent releases to update Oracle Retail applications. These releases typically contain only defect fixes; they may also include enhancements that address application performance or other issues. Bundled hot fix releases are of smaller scope than less-frequent patch releases, and they are intended to be easier and faster for the customer to install than major patch updates.

Each SIM bundled hot fix release introduces a new set of defect fixes or enhancements. The complete Java application code also includes all defect fixes from bundled hot fix releases since the last patch release. Database changes and scripts, if any, are unique to each bundled hot fix release; previously released database changes and scripts are not also included in later bundled hot fix releases.

Bundled hot fix releases must be applied in sequential order. Before you can apply a new bundled hot fix release, you must first apply all previous bundled hot fix releases since the last patch release. The Release Notes for each Oracle Retail release identify whether a release is a bundled hot fix release or a patch release.

Periodic patch releases include all defect fixes that have been released through bundled hot fix releases since the last patch release. Patch releases may also include new defect fixes and enhancements that have not previously been included in any bundled hot fix release.

Applying Source Code

Before applying the fixes included in the SIM 13.2.1.2 bundled hot fix release, be sure that:

- SIM 13.2 has been installed
- The SIM 13.2.1 patch release has been applied

Note: The SIM 13.2.1.1 release was a documentation-only release that did not include any code.

Before applying the source files over your code:

- Note whether any modules have been customized. If so, the customizations must be reapplied to the new version of the module, or the fix may need to be applied to the custom version of the code.
- Copy the original files to a different directory before you copy over them, in case you need to refer to them at a later date.

Defect Fixes and Documentation

A defect fix is a modification to the base Oracle Retail code (for example, a bug fix, a performance enhancement, or a functional enhancement). Each defect fix that is included in this bundled hot fix release has a corresponding defect report titled <defect-number>.PDF (for example, 12345678.PDF).

Review each defect report carefully before implementing the defect fixes. Please note that scripts do not preserve data. Make sure that all data is backed up before you run any script.

Defect Fixes

The following defect fixes and enhancements are included in SIM 13.2.1.2.

Defect Number	Summary
10314284	Keyboard shortcuts (Alt key combinations) do not work.
10394252	POS transactions do not update the identifier in UIN_DETAIL.
10399102	Price changes with activation date of today and generated by RPM today are not effective in SIM.
10403632	When a transfer is closed in RMS, a transfer/sohdrmod message is sent to SIM, but SIM does not remove the record from the RK_ALLOCATIONS table after the transfer is closed.
10422623	When an attempt is made to sell some complex packs in ORPOS, the inventory is not updated in SIM and an exception occurs.
10431347	Item Basket does not print the item basket ticket automatically on saving basket details when the item basket printing is set to Automatic.
10632424	SIM does not update inventory using decimal places for a sale that occurs in ORPOS.

Defect Number	Summary
11061914	If an item has no supplier information, sales transactions are being rejected at POS_TRANSACTION.
11670024	When an accepted transfer has been deleted, the sending location's inventory buckets still show quantities for the UNAVAILABLE and TRANSFER RESERVED buckets of the item.
11792181	Deleting a transaction in SIM with UINs attached does not update the previous status.
11807398	When a merchandise hierarchy is deleted in RMS, it is not deleted in SIM.
11816861	The ordered quantity field in the item lookup screen does not show the correct value and is dependent on the 'not before date' and the 'not after date' of the purchase order
11936875	On the handheld, when using item basket functionality, the quantity is not increased on scanning an item multiple times.

Installing the Bundled Hot Fix Release

To install this SIM hot fix release, follow these steps:

1. Shut down your server and any clients connected to it.
2. Unzip the .ZIP file to a new directory named **SIM_HOTFIX**.
3. Open a SQL*Plus session as the SIM database user and run the following files in this order:
 - 0001_tran_inv_rec.sql**
 - bulk_price_processingb.pls**
 - sale_return_txn_processorb.pls**
4. Follow the instructions in the *Oracle Retail Store Inventory Management Installation Guide* for Release 13.2.1, starting at the "Run the SIM Application Installer" section in the "Application Installation" chapter.

Documentation Update

The following updated document is provided with the SIM 13.2.1.2 release.

Oracle Retail Store Inventory Management Implementation Guide, Volume 1

The instructions for configuring the Internal Security Setup have been altered, and now include an executable SQL script. This information is also included in the Security FAQ information.

Related Documentation

If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
