

Oracle® Retail Store Inventory Management

Release Notes

Release 14.1.1

May 2015

Oracle Retail Store Inventory Management (SIM) Release 14.1.1 is a patch release for SIM 14.1. SIM 14.1.1 includes selected defect fixes and an enhancement for SIM 14.1 code.

Oracle Customer Support investigates submitted issues assuming that all released updates have been applied. It is the customer's decision when to apply a new release; however, delays in applying updates can complicate the support process.

About Patch Releases

Oracle Retail patch releases are periodic releases that can include the following:

- New defect fixes
- Product enhancements
- Technology upgrades
- Performance fixes

Documentation for patch releases includes new and updated guides (for example, Operations Guides, User Guides, and so on) that apply to the patch release level. These documents include applicable updates made since the last patch release. Documents revised for this patch release supersede and replace all previous document versions. See "[Related Documentation](#)" for a list of the documents published for SIM 14.1.1.

Note: Customers must apply the entire patch release to update their installation to the currently supported level.

Hardware and Software Requirements

See the *Oracle Retail Store Inventory Management Installation Guide*, Release 14.1.1 for information about the following:

- Hardware and software requirements
- Oracle Retail application software compatibility

Applying the Patch Release

Before applying the SIM 14.1.1 patch release, be sure that:

- SIM 14.1 has been installed.

ORACLE®

You can apply all the fixes by applying the SIM 14.1.1 patch release. See "[About Patch Releases](#)."

Before applying the release over your files:

- Note whether any modules have been customized. If so, the customizations must be reapplied to the new version of the module, or the fix may need to be applied to the custom version of the code.
- Copy the original files to a different directory before you copy over them, in case you need to refer to them at a later date.

Running Scripts

Back up data before running any script, because the scripts provided *do not* preserve data. See defect reports for details.

Check with your database administrator to determine whether your database should be analyzed after a script is run. In many cases, analysis of the database is necessary to take advantage of new or modified indexes intended to improve performance of the application.

Functional Enhancement

The following functional enhancement is included in this release:

Dynamic Refresh of On Order and Expected Quantities in Direct Store Deliveries

In SIM, On Order represents the remaining quantity on the order at a given point in time. There have been issues when one person is creating a Direct Store Delivery (DSD) for an order and a second person starts to create another DSD for the same order. The On Order field was not getting updated. SIM is modified to have the On Order and Expected Quantities fields refreshed upon confirmation of the DSD. SIM also prompts the user if the received quantity exceeds the on-order quantity.

Technical Enhancements

This section addresses the technical enhancements included in Oracle Retail Store Inventory Management Release 14.1.1.

Note: The list below announces the addition of Oracle Retail support for the technology described. See the Installation Guide requirements section for critical information, such as whether the enhancement below replaces previous versions or is supported in addition to already existing versions.

Java Support

The client of Oracle Retail Store Inventory Management Release 14.1.1 is supported for use with the following Java version:

- Oracle Java 7 update 75

Browser Support

Oracle Retail Store Inventory Management Release 14.1.1 is supported for use with the following browser:

- Mozilla Firefox 31+

Noteworthy Defect Fixes

The following noteworthy defect fixes are included in this release. The following is not a complete list. See **DEFECT MODULE XREF SIM 14.1.1.XLSX** for a complete list of the defect fixes for SIM 14.1.1.

| Defect Number | Summary |
|---------------|--|
| 20428882 | The Assign to All button and item selector need to be removed from the Rejected Items screen. |
| 20453699 | The VendorCRE message does not populate the supplier organization unit details in the SUPPLIER_ORGANIZATION table. |
| 20502921 | The VendorOUDel message removes all the supplier data from the SIM tables. |
| 20523644 | The PODTLCRE and PODTLMOD messages are failing in SIM. |
| 20565788 | The clearance details are incorrectly updated in SIM when changed in RPM. |
| 20760464 | SIM needs to populate the from and to location types in the SHIPINFO message. |

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

- (i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.
- (ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.
- (iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.
- (iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
