

Oracle® Retail Store Inventory Management

Release Notes

Release 15.0.3.1NT

F40574-02

April 2021

Oracle Retail Store Inventory Management (SIM) Release 15.0.3.1NT is a patch release for SIM 15.0. SIM 15.0.3.1NT includes selected defect fixes, functional enhancements, and technical enhancements for SIM 15.0 code.

Oracle Customer Support investigates submitted issues assuming that all released updates have been applied. It is the customer's decision when to apply a new release; however, delays in applying updates can complicate the support process.

Note: Please note that the NT or New-Technology release will be functionally maintained with the same fixes as the 15.0.3.4 release without the upgraded technology stack.

Due to the significant technical changes involved with the technology certifications outlined in the Technical Enhancements sections in this document below, the NT version is being maintained as a separate code line.

About Patch Releases

Oracle Retail patch releases are periodic releases that can include the following:

- New defect fixes
- Product enhancements
- Technology upgrades
- Performance fixes

Documentation for patch releases includes new and updated guides (for example, Operations Guides, User Guides, and so on) that apply to the patch release level. These documents include applicable updates made since the last patch release. Documents revised for this patch release supersede and replace all previous document versions. See "[Related Documentation](#)" for a list of the documents published for SIM 15.0.3.1NT.

Note: Customers must apply the entire patch release to update their installation to the currently supported level.

Hardware and Software Requirements

See the *Oracle Retail Store Inventory Management Installation Guide*, Release 15.0.3.1NT for information about the following:

- Hardware and software requirements
- Oracle Retail application software compatibility

Applying Source Code

SIM 15.0.3.1NT source code contains all the changes from all the patch releases for SIM 15.0. Patch releases are cumulative. There is no need to access source code from previous SIM 15.0 patch releases for fixes in those patch releases. You can apply all the fixes by applying the SIM 15.0.3.1NT patch release. See "[About Patch Releases](#)."

Before applying the source files over your files:

- Note whether any modules have been customized. If so, the customizations must be reapplied to the new version of the module, or the fix may need to be applied to the custom version of the code.
- Copy the original files to a different directory before you copy over them, in case you need to refer to them at a later date.

Running Scripts

Back up data before running any script, because the scripts provided *do not* preserve data. Client customization to the base schema is not addressed by these scripts.

Check with your database administrator to determine whether your database should be analyzed after a script is run. In many cases, analysis of the database is necessary to take advantage of new or modified indexes intended to improve performance of the application.

Technical Enhancements

This section addresses the technical enhancements included in Oracle Retail Store Inventory Management Release 15.0.3.1NT.

Note: The list below announces the addition of Oracle Retail support for the technology described. See the Installation Guide requirements section for critical information, such as whether the enhancement below replaces previous versions or is supported in addition to already existing versions.

Application Server

Oracle Retail Store Inventory Management Release 15.0.3.1NT is supported for use with the following application server technology:

- Oracle WebLogic version 12.2.1.4
- Oracle HTTP Server version 12.2.1.4
- OAM/WebGate version 12.2.1.4

BI Publisher for SIM

Oracle Retail Store Inventory Management Release 15.0.3.1NT is supported for use with Oracle BI Publisher on OAS 5.5.0.

Oracle Identity Management

Oracle Retail Store Inventory Management Release 15.0.3.1NT is supported for use with Oracle Identity Management version 12.2.1.4.

Browser Support

Oracle Retail Store Inventory Management Release 15.0.3.1NT is supported for use with the following browsers:

- Mozilla Firefox ESR 60+
- Chrome (Desktop) 73+
- Internet Explorer 11
- Microsoft Edge 44+

Database Server Support

Oracle Retail Store Inventory Management Release 15.0.3.1NT is supported for use with the following database servers:

- Oracle Database Server 12c (12.1.0.2)
- Oracle Database Server 19c (19.3.0.0.0)

Related Documentation

For more information, see the following documents in the Oracle Retail Store Inventory Management Release 15.0.3.1NT documentation set:

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as **Access Via**™ licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as **Adobe Flex**™ licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
