- *Oracle® Retail WMS Installation Guide*
- *Oracle® Retail WMS Operations Guide*
- *Oracle® Retail WMS Data Model*
- *Oracle® Retail WMS Online Help*

Fixed Defects

RF Device

- 512
In the Capture weight screen, when the user enters data to capture the container weight, the value that is entered/calculated for the container weight and receipt weight should also be assigned to the catch weight receiving process of the item. This has been resolved.
- 573
In Replenishment, after the user enters the data in the Conatiner picking screen and selects F9, the screens opens up blank with no data and the user cannot enter data or navigate. This has been resolved.
- 581
After pressing F1 (Clear) for four times a DMS error is thrown and the user cannot enter san appointment id. This has been resolved.
- 601
In the Container Checking screen, when the user enters the expected weight for the container, the expected weight is not matching with the weight adjustment made for the original receipt weight. This has been resolved.
- 602
In Container checking screen, the container weight, receipt and item are not updated with the new container weight that the user just entered. This has been resolved.

- 603
In Forward Case picking, the user after picking the containers is prompted to enter the To_location (which is the overflow location). The unit quantity in the pick from location has been increased by the container amount and the inbound quantity has been decreased by that container amount and finally the container should be deleted from the system. This has been resolved.
- 607
In the Cycle Count for a reserve location screen, when the user enters the container quantity and the weight, only the weight adjustments are being recorded. This has been resolved.
- 615
In the Container Checking screen, when changing the receipt weight, a warning message should be displayed to the user. This has been resolved.

User Interface

- 513
On the Container Checking screen, after deleting an item from a multi sku container if we change the status in container.unload_check_flag='Y', the quantity record was not getting created in the inv_adjustment_to_upload for the deletion.
- 555
User when trying to create an ASN of type C, is unable to reassign a partially received asn that was closed without receiving quantity. This has been resolved.
- 556
In the Pick Package screen, when you want to print pick packages for multiple waves, printing the pick package for the first wave works as expected, but printing the pick wave for the second wave, gives an error. This has been resolved.
- 559
The 'Invalid Exceptions Location' message is still being displayed when the user attempts to load a master container_id onto a trailer. This has been resolved.
- 563
In Receiving, while creating an appointment for a catch weight simple pack item, the APPOINTCRE message published from RWMS has incorrect unit quantity. This has been resolved.
- 567
In GUI Reports, the user is unable to print gui reports in any other format other than html. This has been resolved.
- 576
In Distribution planning, on the Select Order screen, after the user enters all the values and clicks on the Distribute button to execute the distribution, in

all the Forward pick locations across all facilities, the static location status is set to N. This has been resolved.

■ 604

In ASN Receiving, while performing a partial receipt of an ASN, the records in the ASN item have a receipt weight getting updated for items that have not yet been received, which actually be received on a different appointment. The user should be prompted to enter line weight for this different appointment. This has been resolved.

■ 618

In the Stock Order creation form, after the user enters all the details and clicks on the 'Inv By Item' button, the data is not displayed even though there is inventory for that item. This has been resolved.

■ 621

The Minimize Stops method is not working properly, the results that are coming up are for receiving are for Maximized Pallets method and not Minimize Stops method. This has been resolved.

■ 622

User when clicks on the Help button, the help file is not opening even though there is information for the respective form. This has been resolved.
