

# Oracle® Retail Merchandise Financial Planning

Release Notes

Release 14.0

E50574-01

December 2013

---

Oracle Retail Merchandise Financial Planning (MFP) provides strategic and financial product planning functions. These functions support industry planning standards for preseason and in-season processes. MFP facilitates the creation of financial plans in a structured method through the following processes:

- Setting and passing targets to lower levels
- Plan reconciliation among top down, middle out, and bottom up levels
- Approval of bottom up plans
- Plan monitoring and maintenance at all levels
- Re-planning at all levels

---

**Note:** Because MFP uses the Oracle Retail Predictive Application Server (RPAS) platform, Oracle Retail recommends that you review the *Oracle Retail Predictive Application Server Release Notes* for fixed and known issues that may affect MFP.

In addition, RPAS 13.3. and later releases have significant technical enhancements related to hierarchy management (such as integer indexing) that have an effect on the configuration and maintenance of MFP. You must upgrade to key RPAS versions and complete the upgrade process as described in the chapter, "Patch Installation," in the *Oracle Retail Merchandising Financial Planning Installation Guide* before upgrading to a 14.0 MFP domain.

---

## Overview of the Fashion Planning Bundle

The Fashion Planning Bundle is the integration of Item Planning (IP), Item Planning configured for Clearance Optimization Engine (IP-COE), Assortment Planning (AP), Merchandise Financial Planning (MFP), and Size Profile Optimization (SPO) as a full-suite planning solution for fashion retailers.

## Hardware and Software Requirements

See the *MFP Cost Installation Guide* and *MFP Retail Installation Guide* for information about the following:

- Hardware and software requirements
- Oracle Retail application software compatibility information

## Upgrade Note

While not directly related to Merchandise Financial Planning, the 13.3 release of Oracle Retail Predictive Application Server (RPAS) has undergone a major change to simplify hierarchy administration. Full details of these changes are outlined in the 13.3 *Oracle Retail Predictive Application Server Release Notes*. Due to these changes, configuration updates have been made to Merchandise Financial Planning, and you will need to perform additional steps to upgrade your Merchandise Financial Planning domain, such as setting dimension sizes. The upgrade to RPAS 13.3 or later for this application includes a conversion process in addition to the normal upgrade process. Details are provided in the chapter, "Patch Installation," in the *Oracle Retail Merchandise Financial Planning Installation Guide*.

## Functional Enhancements

MFP Release 14.0 includes the following functional enhancement:

### Purchase Order View

A new way of communicating with the RPAS Platform, called the RPAS Extension Framework, is introduced in Release 14.0. This framework enables the RPAS Platform and Fusion Client to access data from RPAS or non-RPAS data sources in real-time by developing Solution Plug-ins. The Purchase Order (PO) View is a Solution Plug-in for MFP. It provides users with an interface to look up the currently open or partially received purchase orders in Oracle Retail Merchandising System (RMS) based on the product, location, and time intersection of the selection. The selection contexts for PO View are configurable through the manifest file. With this knowledge, an MFP user can better plan their Open to Buy (OTB) budgeting and enhance their merchandise plans.

For more information, see the *Oracle Retail Merchandise Financial Planning Cost User Guide for the RPAS Fusion Client* and *Oracle Retail Merchandise Financial Planning Retail User Guide for the RPAS Fusion Client*.

## Noteworthy Defect Fixes

The following noteworthy defect fixes are included in MFP 14.0:

Fixed Issue/Defect	Defect Number
In the Top Down and Middle Out workbooks, Wp VAT R was not being recalculated after changing WP Sales R. This is resolved.	10118732
Measure modyappopnewb was not getting cleared in the export process (script resetExportFlags.ksh) in both MFP Cost and MFP Retail. This was due to a typo in the script. The resetExportFlags.ksh script is fixed. It now clears the measure.	14618130
The conversion of files from RMS format to MFP Cost or MFP Retail format using the RMS to MFP integration scripts would, under certain conditions, include non-escaped double quotes. This would cause an error when the loading the file. This is resolved by properly escaping the double quotes.	16948507

<b>Fixed Issue/Defect</b>	<b>Defect Number</b>
In the Planning Workbook, the user ID (such as, uid1) was shown instead of the user label if the user name contained an invalid special character such as a period. This is resolved by displaying the user name rather than the user ID in these measures. This applies to both MFP Cost and MFP Retail.	17375282, 17423937, 17436914
Importing data from IP into MFP Cost using loadactuals.ksh and the IP_MFP_transferList.txt would fail due to a blank line in the text file. This is resolved by removing the blank line.	17444643
When running the MFP to IP transfer using the exportToIP.ksh script, errors were seen. The MFP to IP transfer list file contained measures that are not in the configuration. This is resolved by removing the invalid measure names. This applies to both MFP Cost and MFP Retail.	17457496, 17549188

## Related Documentation

For more information, see the following documents in the Oracle Retail Merchandise Financial Planning Release 14.0 documentation set:

**Licensing Note:** This media pack includes a Restricted Use license for Oracle Retail Predictive Application Server (RPAS) - Enterprise Engine to support Oracle® Retail Merchandise Financial Planning only.

### Value-Added Reseller (VAR) Language

#### Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
