

Oracle® Retail Item Planning

User Guide for the RPAS Classic Client

Release 15.0

E65499-01

December 2015

Copyright © 2015, Oracle and/or its affiliates. All rights reserved.

Primary Author: Nirmala Suryaprakasha

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

- (i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.
- (ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.
- (iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.
- (iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all

reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.

Send Us Your Comments

Oracle Retail Item Planning User Guide for the RPAS Classic Client, Release 15.0

Oracle welcomes customers' comments and suggestions on the quality and usefulness of this document.

Your feedback is important, and helps us to best meet your needs as a user of our products. For example:

- Are the implementation steps correct and complete?
- Did you understand the context of the procedures?
- Did you find any errors in the information?
- Does the structure of the information help you with your tasks?
- Do you need different information or graphics? If so, where, and in what format?
- Are the examples correct? Do you need more examples?

If you find any errors or have any other suggestions for improvement, then please tell us your name, the name of the company who has licensed our products, the title and part number of the documentation and the chapter, section, and page number (if available).

Note: Before sending us your comments, you might like to check that you have the latest version of the document and if any concerns are already addressed. To do this, access the Online Documentation available on the Oracle Technology Network Web site. It contains the most current Documentation Library plus all documents revised or released recently.

Send your comments to us using the electronic mail address: retail-doc_us@oracle.com

Please give your name, address, electronic mail address, and telephone number (optional).

If you need assistance with Oracle software, then please contact your support representative or Oracle Support Services.

If you require training or instruction in using Oracle software, then please contact your Oracle local office and inquire about our Oracle University offerings. A list of Oracle offices is available on our Web site at <http://www.oracle.com>.

Preface

This guide describes the Oracle Retail Item Planning user interface. It provides step-by-step instructions to complete most tasks that can be performed through the user interface.

Audience

This User Guide is for users and administrators of Oracle Retail Item Planning. This includes merchandisers, buyers, business analysts, and administrative personnel.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Related Documents

For more information, see the following documents in the Oracle Retail Item Planning Release 15.0 documentation set:

- *Oracle Retail Batch Script Architecture Implementation Guide*
- *Oracle Retail Item Planning Installation Guide*
- *Oracle Retail Item Planning Operations Guide*
- *Oracle Retail Item Planning Release Notes*
- *Oracle Retail Item Planning User Guide for the RPAS Fusion Client*
- Oracle Retail Predictive Application Server documentation

For more information about the Fashion Planning Bundle applications see the following documentation sets:

- Oracle Retail Item Planning Configured for COE documentation
- Oracle Retail Merchandise Financial Planning documentation
- Oracle Retail Assortment Planning documentation
- Oracle Retail Size Profile Optimization documentation

For more information about the RPAS and Fusion Client, see the documents in the Oracle Retail Predictive Application Server Release 15.0 documentation set.

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

<https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Review Patch Documentation

When you install the application for the first time, you install either a base release (for example, 15.0) or a later patch release (for example, 15.0.1). If you are installing the base release or additional patch releases, read the documentation for all releases that have occurred since the base release before you begin installation. Documentation for patch releases can contain critical information related to the base release, as well as information about code changes since the base release.

Improved Process for Oracle Retail Documentation Corrections

To more quickly address critical corrections to Oracle Retail documentation content, Oracle Retail documentation may be republished whenever a critical correction is needed. For critical corrections, the republication of an Oracle Retail document may at times not be attached to a numbered software release; instead, the Oracle Retail document will simply be replaced on the Oracle Technology Network Web site, or, in the case of Data Models, to the applicable My Oracle Support Documentation container where they reside.

This process will prevent delays in making critical corrections available to customers. For the customer, it means that before you begin installation, you must verify that you have the most recent version of the Oracle Retail documentation set. Oracle Retail documentation is available on the Oracle Technology Network at the following URL:

<http://www.oracle.com/technetwork/documentation/oracle-retail-100266.html>

An updated version of the applicable Oracle Retail document is indicated by Oracle part number, as well as print date (month and year). An updated version uses the same part number, with a higher-numbered suffix. For example, part number E123456-02 is an updated version of a document with part number E123456-01.

If a more recent version of a document is available, that version supersedes all previous versions.

Oracle Retail Documentation on the Oracle Technology Network

Oracle Retail product documentation is available on the following web site:

<http://www.oracle.com/technetwork/documentation/oracle-retail-100266.html>

(Data Model documents are not available through Oracle Technology Network. You can obtain them through My Oracle Support.)

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Introduction

Oracle Retail Item Planning (IP) facilitates the translation of merchandise financial plans into execution level, item driven strategies to be followed throughout the life of a product. It represents the bottom-up planning process, complementing, and working in concert with the top-down financial plans. By providing weekly visibility into item performance and financial targets, the item planning process increases the likelihood that merchandising strategies are successfully executed within the financial plan parameters.

Item Planning Process

Item Planning is part of an overall planning process that involves planning at multiple levels of the product hierarchy. The planning process can be thought of as a continual process where each workbook enhances the following, and prior performance affects plans for future performance. Planning takes input from multiple parties, and communication enhances the process to help drive a financial road map for success. Multiple versions of the plan are created to benchmark success as well as provide insight to opportunities and risk for the in-season period.

Item Planning Benefits

Item level planning provides the following benefits:

- Quantified financial plans
- Unified financial and item strategies
- A proactive approach towards business trends as opposed to reactive
- More efficient use of inventory
- Reduced markdowns
- Increased profits
- Increased return on investment

Item Planning Features

Item Planning provides the following features:

- Item/channel/week planning
- Multichannel support
- Unit plans converted into values
- Reconciliation to financial targets
- Preseason and in-season workflow process support
- Item demand forecast
- Promotional sales planning
- Like item functionality
- Placeholder functionality
- Worksheet-to-weekly marketing strategy for each item
- Self approval process
- Robust planning and assessment measure set

Preseason Planning

Prior to the beginning of the style/color's lifecycle, the preseason planning takes place. The process begins with the planner reviewing external and internal data, such as MFP targets, and input from their merchant partners. The planner then maps history where needed for their items that are new, or perhaps have been included in a hierarchy reclassification, and for which the planner would like to specify which history should be utilized by specified items.

Best practices show that planning the reductions measures first, and within that, planning the sales units first, allows for a logical and smooth item planning process. The sales units set the tone by which the remainder of the planned measures are driven.

On the Item Plan Parameters worksheet, the planner selects parameters that initiate an item plan.

First, the planner defines sales and price based parameters such as Start Sell Week and Out of Stock Week, along with the number of stores to be planned and the Rate of Sale as well as Regular Price and Regular Cost. Then the planner selects the baseline curve to spread the sales units over the regular and promotional lifecycle of the item plan.

Next, the planner plans markdowns, first promotional markdowns by assigning style colors to pre defined promotions. Then the planner selects the clearance cadence to define their clearance sell off.

After the total sales units and values have been planned, the planner then defines the receipt parameters such as initial allocation percentage, presentation minimum, receipt frequency, and safety stock.

After receipts have been flowed, the planner can then review the item plan in total.

The planner then reconciles back to the MFP plans; if the plan is reconciled, the planner self-approves the plan.

If the plan does not reconcile back to the MFP plans, the planner returns to the plan's unit sales and reduction planning, and adjusts areas of the plan that are required to select reconciliation back to the MFP plans.

Because this is an iterative process, clear communication to the planner's superior is integral to the efficiency and effectiveness of this process.

Plan Versions

The following are versions of the plan:

- Original Plan (Op): The benchmark against which to measure in-season performance.
- Current Plan (Cp): The updated in-season plan to reflect actual and projected performance.
- Working Plan (Wp): The item planner's plan version to use while creating the Cp.

In-Season Management

Once the plan period process has begun, in-season planning begins. The planner now uses the plan created in the preseason planning process as the benchmark for successful in-season planning. To begin the in-season planning process, the planner first manually reviews the factors that affect sales.

The planner begins by reviewing the Dashboard worksheet, which highlights the style/colors that are performing differently from the Original Plan. The style/colors that have the largest variance from the plan are likely to need the most attention. By using the exception measures in the Dashboard, the planner can quickly identify the style/colors that needs replanning.

The planner determines whether these events are going, or whether they behave the way they were originally planned. If these special trends does not persist, the planner determines the differences and how they affect the performance of the item. After this process is complete, the planner updates the unit sales, if required. As in the preseason planning process, in which planning sales first is the best way to approach a new plan, sales is the first measure that should be updated for in-season planning. All remaining measures are affected by sales.

Next, the planner adjusts future receipts as needed. The planner also reviews how the new sales and receipts affect the resulting inventory. Then the exit strategy is updated. Once the exit strategy is updated, the planner reviews the result in their plans. Then the planner reconciles to MFP, and if the plans are reconciled, the planner self-approves the plan to the current plan. If the plan is not reconciled, the planner goes back to unit sales and performs adjustments as necessary. This process continues until the item plan is reconciled to the MFP plan.

Figure 1-1 Item Planning Process Diagram

Week Mapping

The Week Mapping workbook is used only by the administrator to adjust historical sales to accommodate calendar shifts. The adjusted sales then appear in the Item Planning workbook for reference while planning. This functionality is helpful when events shift from one week to another, or when there are different numbers of weeks from one calendar year to another.

The Week Mapping workbook contains one tab: [Week Mapping Tab](#).

Building the Week Mapping Workbook

To build a Week Mapping workbook:

1. Click the **New** icon in the toolbar.
2. The New Workbook dialog box appears. On the Item Planning Administration tab, select **Week Mapping** and click **OK**.

Figure 2–1 New Workbook Dialog Box

3. The Week Mapping wizard appears at the calendar step. Select the weeks you want to map and click **Finish**.

Figure 2–2 Week Mapping Wizard

The workbook is built.

Week Mapping Tab

This tab contains a single worksheet called Set LY Mappings.

Set LY Mappings Worksheet

Use this worksheet to set the mappings for last year and adjusted last year.

The week indicated in the Adj Ly Lag measure is where the performance data is retrieved when you look at Ly data.

Figure 2–3 Set LY Mappings Worksheet

The screenshot shows a software window titled "Set LY Mappings". It contains a table with three columns: a date column, a "Ly Lag" column, and an "Adj Ly Lag" column. The table is populated with data for the first five weeks of 2011, where the "Ly Lag" and "Adj Ly Lag" values are both "W49_2010", "W50_2010", "W51_2010", and "W52_2010" respectively. The remaining weeks are empty. A "Calendar" button is visible at the bottom left, and a "Measure" dropdown is at the top right.

	Ly Lag	Adj Ly Lag
1/1/2011	W49_2010	W49_2010
1/8/2011	W50_2010	W50_2010
1/15/2011	W51_2010	W51_2010
1/22/2011	W52_2010	W52_2010
1/29/2011		
2/5/2011		
2/12/2011		
2/19/2011		
2/26/2011		
3/5/2011		
3/12/2011		
3/19/2011		
3/26/2011		
4/2/2011		
4/9/2011		
4/16/2011		
4/23/2011		
4/30/2011		
5/7/2011		

Table 2–1 Set LY Mappings Worksheet Measures

Measure	Description
Ly Lag	Identifies the week used for mapping as last year.
Adj Ly Lag	Identifies the week used for mapping as adjusted last year.

Next Steps

After you have mapped the weeks, build the [Reference Curves](#) workbook to create reference curves.

Reference Curves

The Reference Curves workbook is used to create reference curves, which are used to spread unit sales to week in the [Item Planning](#) workbook. Reference curves are based on percent-to-total sales, and they shrink or stretch to fit the defined regular or promotional sales period. In Item Planning, reference curves are used only for regular and promotional sales periods, unlike Assortment Planning which uses them for the entire Lifecycle of an item.

Building the Reference Curves Workbook

To build a Reference Curves workbook, perform the following steps:

1. Click the **New** icon in the toolbar.
2. The New Workbook dialog box appears. On the Item Planning Administration tab, select **Reference Curves** and click **OK**.

Figure 3–1 New Workbook Dialog Box

3. The Reference Curves Wizard appears at the Select Products step. Select the products you want to create curves for and click **Finish**.

Figure 3–2 Reference Curves Wizard: Select Products

The Reference Curves workbook is built and opens at the [Maintain Curve Profiles Worksheet](#).

Maintain Curve Profiles Worksheet

The Reference Curves workbook has one worksheet, Maintain Curve Profiles. Use this worksheet to create sales curves to be used in the Item Planning workbook. These curve profiles are based on a percent-to-total sales. Regardless of weeks in the curve, the curves can shrink or stretch to fit the defined regular and promotional sales period.

Figure 3–3 Maintain Curve Profiles Worksheet

		all [Calendar]	Week 01	Week 02	Week 03
Lifecycle Curve 01	Sales Curve Label	Early Ramp-Up			
	Sales Curve %	1.9 %	2.8 %	2.8 %	6.9 %
Lifecycle Curve 02	Sales Curve Label	Basic Style-Color			
	Sales Curve %	1.9 %	10.0 %	10.0 %	10.0 %
Lifecycle Curve 03	Sales Curve Label				
	Sales Curve %	0.0 %	0.0 %	0.0 %	0.0 %

Perform the following steps to create curve profiles.

1. Ensure that **all[Calendar]** is shown in the Calendar hierarchy.
2. In the intersection of the Sales Curve Label measure and the **all[Calendar]** dimension, enter the label of the curve profile. This label is displayed in the Item Planning workbook.
3. Starting in Week 01, enter the percent-to-total sales percentage in the weeks of the curve profile. The number of defined weeks is up to you.

Note: You must start the curve in Week 01 for the curve to be able to shrink or stretch to fit the defined regular and promotional sales period.

4. Click **Calculate**. The **all[Calendar]** percentage is calculated based on the percentages in the defined weeks.
5. Repeat steps 1 through 4 for additional curve profiles.
6. When finished, save and commit the workbook.

Table 3–1 lists the measures in this worksheet.

Table 3–1 Maintain Curve Profiles Worksheet Measures

Measure	Description
Sales Curve Label	Enter a label for the Lifecycle Curve. This label is displayed in the Item Planning workbook.
Sales Curve %	Enter percent-to-total sales percentage in the weeks of the curve.

Use the graph view to see how the curves look over the sales period ([Figure 3–4](#)).

Figure 3–4 Reference Curves

Next Steps

After you have created reference curves, build the [Markdown Parameters](#) workbook to create promotions and clearance cadences.

Markdown Parameters

The Markdown Parameters workbook is used to define the promotions and clearance cadences for corporate, store-wide, or planner-specific promotions. After these are created, you assign them to style/colors in the [Item Planning](#) workbook.

This workbook contains the following tabs:

- [Promotions Definition Tab](#)
- [Markdown Cadence Tab](#)

Building the Markdown Parameters Workbook

To build a Markdown Parameters workbook, perform the following steps:

1. Click the **New** icon in the toolbar.
2. The New Workbook dialog box appears. On the Item Planning Administration tab, select **Markdown Parameters** and click **OK**.

Figure 4–1 New Workbook Dialog Box

3. The Markdown Parameters Wizard appears at the Select Promotions step. If you have not previously set up promotions, placeholder promotions are available for selection. Select the number of promotions you want to create and click **Next**.

Figure 4–2 Markdown Parameters Wizard: Select Promotions

If you have created promotions previously, those promotions are available for selection as shown in [Figure 4–3](#).

Figure 4–3 Markdown Parameters Wizard: Select Promotions (Option 2)

4. The Calendar step appears. Select the time periods you want and click **Finish**.

Figure 4–4 Markdown Parameters Wizard: Select Calendar

The Markdown Parameters workbook is built and opens at the [Promotions Definition Tab](#).

Promotions Definition Tab

The Promotions Definition tab contains two worksheets: [Promotions Weeks Worksheet](#) and [Markdown Cadence Worksheet](#). Use these two worksheets to set the discount rate, lift, lift override, and lifecycle of promotions.

Promotions Definition Worksheet

Use this worksheet to define the lift for the entire promotion. Remember that you are not defining the lift for specific weeks of the promotions but for the entire promotion in general.

Figure 4–5 Promotions Definition Worksheet

	Reference Price Promo Disc R%	Sls Promo Lift U%	Sls Promo Lift U% Override
Back to School	10.0 %	111.1 %	120.0 %
Fall Sales	15.0 %	117.6 %	125.0 %
Holiday	30.0 %	142.9 %	140.0 %

Perform the following steps to define the promotional lifts.

1. (Optional): Use DPM to change the promotion label to one that represents the event.
2. In the Reference Price Promo Disc R% measure, enter the discount percentage of the promotion.
3. Click **Calculate**. This automatically calculates the Promo Lift U% measure for the promotion. This is the percent of increased sales that must occur to overcome the decrease in price to sell the same dollar amount.
4. (Optional): To use a different promotional lift than the one calculated in Sls Promo Lift U%, enter it in the Sls Promo Lift U% Override measure.

Note: If you want the override lift to be 20%, enter 120.

If an override lift exists for a promotion, that lift is used in the [Item Planning](#) workbook. Otherwise, the lift created by the Promo Lift U% measure is used. The lift used is the same for every week in the promotion.

[Table 4–1](#) lists the measures in this worksheet.

Table 4–1 Promotions Definition Worksheet Measures

Measure	Description
Reference Price Promo Disc R%	The discount percentage of the promotion.
Sls Promo Lift U%	The promotional lift. This is the percent of increased sales that must occur to overcome the decrease in price to sell the same dollar amount. The lift in this measure is automatically calculated from the Reference Price Promo Disc R% measure when the user clicks Calculate .
Sls Promo Lift U% Override	Use this measure to manually enter the promotional lift. The lift entered in this measure overrides the lift calculated in the Sls Promo Lift U% measure.

Promotions Weeks Worksheet

Use this worksheet to define the promotional period for each promotion. The promotional periods uses the lift or lift override defined in the [Promotions Definition Worksheet](#).

Figure 4–6 Promotions Weeks Worksheet

	8/6/2011	8/13/2011	8/20/2011	8/27/2011	9/3/2011	9/10/2011	9/17/2011	9/24/2011
Back to School	✓	✓	✓	✓				
Fall Sales				✓	✓	✓	✓	✓
Holiday								

In this worksheet, select the weeks that make up each promotion. This worksheet contains one measure, as described in [Table 4–2](#).

Table 4–2 Promotions Definition Worksheet Measure

Measure	Description
Weeks Active	Use this measure to select the weeks of the promotion. Promotions in Item Planning are applied for an entire week. You can also define promotions that are active in non-consecutive weeks. If you have a promotion that is active on the first week of every month, you need to set up only one promotion that is active at each of the selected weeks.

After you have defined the promotional period and lift for each promotion, continue to the [Markdown Cadence Tab](#).

Markdown Cadence Tab

The Markdown Cadence tab contains one worksheet: Markdown Cadence.

Markdown Cadence Worksheet

Use the Markdown Cadence worksheet to define clearance cadences. Clearance Cadences are used when style/colors are ready to be put on hard clearance markdown. These cadences can be selected in the [Item Plan Parameters Worksheet](#) of the [Item Planning](#) workbook.

Perform the following steps to define clearance cadences:

1. Ensure that **all[Calendar]** is shown in the Calendar hierarchy.
2. In the intersection of the Basis (Year/Item) measure and the **all[Calendar]** dimension, select what the cadence is based on. There are two options:
 - **Year:** Based on the absolute year. If the cadence is defined as starting on Week 36/10, it starts on Week 36 of the fiscal year.
 - **Item:** Based on the lifecycle of the item. If the cadence is defined as starting on Week 36/10, it starts on the first week of the item lifecycle.

Figure 4–7 Markdown Cadence: Basis (Year/Item) Selection

3. Define the markdown percentages in specific weeks of the cadence, as shown in [Figure 4–8](#) and [Figure 4–9](#).

Figure 4–8 Markdown Cadence Worksheet: Cadence 01

Figure 4–9 Markdown Cadence Worksheet: Cadence 02

4. Click **Calculate**. The markdown percentage for all[Calendar] is calculated.
5. Save and commit the workbook.

[Table 4–3](#) lists the measures in this worksheet.

Table 4–3 Markdown Cadence Worksheet Measures

Measure	Description
Basis (Year/Item)	The basis of the cadence. Options are year and item. ■ Year: Based on the absolute year. If the cadence is defined as starting on Week 36/10, it starts on Week 36 of the fiscal year. ■ Item: Based on the lifecycle of the item. If the cadence is defined as starting on Week 36/10, it starts on the tenth week of the item lifecycle.
MD Clr U%	The markdown clearance percentage. This is applicable from the selected week onwards.

Next Steps

After you have created markdown curves, build the [Item and Store Maintenance](#) workbook to map like items.

Item and Store Maintenance

The Item and Store Maintenance workbook allows you to map history and validate the results of mapping the history of a single item to a new item. This action provides a regular unit sales curve and quantity for reference when seeding and planning regular sales units.

The Item and Store Maintenance workbook contains two tabs:

- [Map Items Tab](#)
- [Validate Mapping Tab](#)

Building the Item and Store Maintenance Workbook

To build a Item and Store Maintenance workbook, perform the following steps:

1. Click the **New** icon in the toolbar.
2. The New Workbook dialog box appears. On the Item Planning Administration tab, select **Item and Store Maintenance** and click **OK**.

Figure 5–1 New Workbook Dialog Box

- The Item and Store Maintenance wizard appears at the Available Products step. Select the products you want to map and click **Next**.

Figure 5–2 Item and Store Maintenance Wizard: Select Products

- The Available Locations step appears. Select the locations you want to map and click **Finish**. The workbook is built.

Figure 5–3 Item and Store Maintenance Workbook Wizard: Select Channel

Map Items Tab

The Map Items tab contains three worksheets:

- [Map Items Worksheet](#)
- [Review and Define Item Attributes Worksheet](#)
- [Review and Define Store Attributes Worksheet](#)

Map Items Worksheet

Use this worksheet to map an item to a like item. This item uses the history of the like item. This is useful for new items that do not have sales history and are expected to have similar sales as the like item. After you have mapped the items, specify the start and end weeks for the mapped history. This selected date range is used for seeding the new item's history.

In order to map an item to a like item, you must build the workbook so that it contains both items.

Figure 5–4 Map Items Worksheet

	Like Item	Wp Start Week	Item Mapping End Week
	all [Location] Brick & Mor	all [Location] Brick & Mor	all [Location] Brick & Mor
ACME SNOW CREW JACKET/ACTIVE ORANGE	ACME SNOW CREW JACKET/PUTTY	9/24/2011	1/28/2012
ACME SNOW CREW JACKET/OLYMPIC YELLOW	ACME SNOW CREW JACKET/PUTTY	9/24/2011	1/28/2012
ACME SNOW CREW JACKET/PLACID BLUE	ACME SNOW CREW JACKET/PUTTY	9/24/2011	1/28/2012
ACME SNOW CREW JACKET/PUTTY			

To map items, perform the following steps:

1. Ensure that **all[Location]** is visible in the calendar hierarchy. Like item mapping applies to all channels, it can only be selected at the **all[Location]** level.
2. In the Like Item measure, select the item whose history you want to use for the new item.
3. In the Wp Start Week measure, select the starting date for the mapped history.
4. In the Item Mapping End Week measure, select the ending date for the mapped history. Only the data within the date range that you have created is mapped to the new item.
5. When finished mapping items, select **Map Like Items** in the Planning Actions menu.

Figure 5–5 Map Like Item Command

Table 5–1 describes the measures in this worksheet.

Table 5–1 Map Items Worksheet Measures

Measure	Description
Like Item	Use this measure to select an item to use as the source to generate historical values for another item.
Wp Start Week	The working plan starting week. This is the first week of the like item history that should be assigned to the item.
Item Mapping End Week	The last week of mapping. This is the last week of the like item history that should be assigned to the item.

Review and Define Item Attributes Worksheet

Use this worksheet to view the item attributes that were created in the Assortment Planning application. If you do not use Assortment Planning, use this worksheet to enter item attributes and create placeholders for new items.

Figure 5–6 Review and Define Item Attributes Worksheet

	Color	Fabric	Subclass	Class	Vendor	Seasonality	Price Tier	Size Range
ACME MOUNTAIN TEAM JACKET/PUTTY	Putty	Misc	SNOWBOARD JACKETS-SUB	SNOWBOARD JACKETS	Acme	Seasonal Basic	1 Good	SML
ACME SNOW CREW JACKET/ACTIVE	Orange	Misc	SNOWBOARD JACKETS-SUB	SNOWBOARD JACKETS	Acme	Seasonal Basic	3 Best	SML
ACME SNOW CREW JACKET/OLYMPIC	Yellow	Misc	SNOWBOARD JACKETS-SUB	SNOWBOARD JACKETS	Acme	Seasonal Basic	3 Best	SML
ACME SNOW CREW JACKET/PLACID BLUE	Blue	Misc	SNOWBOARD JACKETS-SUB	SNOWBOARD JACKETS	Acme	Seasonal Basic	3 Best	SML
ACME SNOW CREW JACKET/PUTTY	Putty	Misc	SNOWBOARD JACKETS-SUB	SNOWBOARD JACKETS	Acme	Seasonal Basic	3 Best	SML

Table 5–2 describes the measures in this worksheet.

Table 5–2 Review and Define Item Attributes Measures

Measure	Description
Color	Display attributes of the item. This is read-only.
Fabric	Describes the fabric of the item. This is a user-defined string.
Subclass	Display attributes of the item. This is read-only.
Class	Display attributes of the item. This is read-only.
Vendor	Defines the vendor. This is a user-defined string.
Seasonality	Defines the seasonality of the item. The available options are loaded through the batch process.
Price Tier	Defines the price tier of the item. The available options are loaded through the batch process.
Size Range	Defines the kind of size range used for the item. The available options are loaded through the batch process.

Review and Define Store Attributes Worksheet

Use this worksheet to view the performance groups and size groups that were assigned to the store in the Assortment Planning application.

In Assortment Planning, the assortment planner creates a performance group and a size group for each class and buying period. This is why the calendar and product hierarchies are shown in this worksheet instead of just location. Because buying periods are not taken into account for performance groups in Item Planning, item planners typically use the performance group information for all weeks in the buying period. However, because performance groups are created at the class level in Assortment Planning, you can view the stores across classes. This is useful because a store can belong to different clusters for different classes.

Figure 5–7 Review and Define Store Attributes Worksheet

Table 5–3 describes the measures in this worksheet.

Table 5–3 Review and Define Store Attributes Measures

Measure	Description
Ap Cp Performance Group	The performance group that the store was assigned to in Assortment Planning. Assortment planners assign a performance level or grade to a store to denote how well that store sells a particular class of products. The form of measure used to denote performance is determined by the assortment planner. Typical performance group formats: A, B, C; 1, 2, 3, and so on.
Ap Cp Size Group	The size group that the store was assigned to in Assortment Planning. Size groups are based on the floor space of the store. The form of measure used to denote the store size is determined by the assortment planner. Typical size group formats: small, medium, large; S, M, L; 1, 2, 3, and so on.
Ap Cp Item Assigned to Store	Denotes whether the product (class, subclass, style/color) is assigned to the store.

Validate Mapping Tab

The Validate Mapping tab contains a single worksheet called Review Mapped Sales.

Use this worksheet to review the items and item histories of the items that you mapped in the [Map Items Worksheet](#).

Figure 5–8 Review Mapped Sales

The screenshot shows a software window titled "Review Mapped Sales". At the top, there is a "Location" dropdown menu set to "Brick & Mortar" and a "Calendar" button. Below this is a table with columns for dates: 9/10/2011, 9/17/2011, 9/24/2011, and 10/1/2011. The table lists 16 rows of product data, each with two measures: "Mapped Sls Reg U" and "Wp Sls Reg U". All values in the table are 0. At the bottom, there are tabs for "Product" and "Measure", and navigation buttons.

		9/10/2011	9/17/2011	9/24/2011	10/1/2011
ACME HELI-SKI FLEECE JACKET/BLACK	Mapped Sls Reg U	0	0	0	0
	Wp Sls Reg U	0	0	0	0
ACME HELI-SKI FLEECE JACKET/RED	Mapped Sls Reg U	0	0	0	0
	Wp Sls Reg U	0	0	0	0
ACME MOUNTAIN TEAM JACKET/AVIATOR BLUE	Mapped Sls Reg U	0	0	0	0
	Wp Sls Reg U	0	0	0	0
ACME MOUNTAIN TEAM JACKET/PUTTY	Mapped Sls Reg U	0	0	0	0
	Wp Sls Reg U	0	0	0	0
ACME SNOW CREW JACKET/ACTIVE	Mapped Sls Reg U	0	0	0	0
	Wp Sls Reg U	0	0	0	0
ACME SNOW CREW JACKET/OLYMPIC	Mapped Sls Reg U	0	0	0	0
	Wp Sls Reg U	0	0	0	0
ACME SNOW CREW JACKET/PLACID BLUE	Mapped Sls Reg U	0	0	0	0
	Wp Sls Reg U	0	0	0	0
ACME SNOW CREW JACKET/PUTTY	Mapped Sls Reg U	0	0	0	0
	Wp Sls Reg U	0	0	0	0

Table 5–4 describes the measures in this worksheet.

Table 5–4 Review Mapped Sales Worksheet Measures

Measure	Description
Mapped Sls Reg U	Mapped history for regular sales units.
Wp Sls Reg U	Working plan for regular sales units.

Next Steps

After you have mapped items and maintained store attributes, continue to the [Item Planning](#) workbook.

Item Planning

During the preseason planning period, the Item Planning workbook allows you to create item plans at the style/color level. During the in-season planning period, you can use this workbook to adjust the item plan.

This workbook has six tabs:

- [Dashboard Tab](#)
- [Assortment Plan Tab](#)
- [Item Planning Parameters Tab](#)
- [Pricing Tab](#)
- [Item Plan Tab](#)
- [Review and Approval Tab](#)

Note: The Dashboard tab is only used for in-season planning.

Below is the general process of creating an item plan:

1. Optional: Consult the assortment plan created in the Assortment Planning application in the [Assortment Plan Tab](#).
2. Create a sales and markdown plan in the [Item Planning Parameters Tab](#)
3. Assign promotions to style/colors and review their promotional impact in the [Pricing Tab](#).
4. Seed the plan in the [Item Planning Parameters Tab](#).
5. Review the sales and markdowns plan in the [Item Plan Tab](#).
6. Create a receipts and inventory plan and calculate the receipt flow in the [Item Plan Parameters Tab: Receipt and Inventory Plan](#).
7. Review the receipts and inventory plan in the [Item Plan Tab: Receipt and Inventory Plan](#).
8. Review the entire plan for all key items in the class. Compare it to the MFP targets, and then approve the plan in the [Review and Approval Tab](#).

This process is described in detail throughout this chapter.

Building the Item Planning Workbook

To build the Item Planning workbook, perform the following steps:

1. Click the **New** icon in the toolbar.
2. The New Workbook dialog box appears. On the Item Planning tab, select **Item Planning** and click **OK**.

Figure 6–1 New Workbook Dialog Box

3. The workbook wizard opens at the Calendar Selection step. Select the weeks that you want to plan. Click **Next**.

Note: When choosing the weeks to include in the workbook, ensure that you accommodate for the receipt arrival week, not just the start sell week. For instance, if the start sell week is 1/15/2011, and the receipt time is two weeks, the workbook should start from 1/1/2011.

Figure 6–2 Workbook Wizard: Calendar Selection

4. The Product Selection step of the workbook wizard appears. Select the styles you want to plan. Click **Next**.

Figure 6–3 Workbook Wizard: Product Selection

5. The Location Selection workbook of the workbook wizard appears. Select the channels you want to plan. Click **Finish**.

Figure 6–4 Workbook Wizard: Location Selection

The Item Planning workbook is built. Begin at the [Assortment Plan Tab](#).

Assortment Plan Tab

Review the worksheets in the Assortment Plan tab if you have loaded data from the Assortment Planning application. If you do not use Assortment Planning, continue to the [Item Planning Parameters Tab](#).

Assortment Plan Parameters Worksheet

Use the Review Assortment Plan Parameters worksheet to reference the parameters that the Assortment Planning user set for the same style/color you are planning. When seeding your working plan in the [Item Plan Parameters Worksheet](#), you can choose to seed with this Assortment Plan data.

Figure 6–5 Assortment Plan Parameters Worksheet

	Start Sales Date	Number of weeks at Clearance Price	Number of Weeks at Regular Price	Product Cost	Product Original Ticket Price	Exit Date	Ap Cp Clearance Price Retail	Ap Cp Clearance Cost
1000000 Suede Loafer	7/25/2012	0	13	18	40	0/17/2013	12	0
1000001 Suede Loafer	7/25/2012	0	13	20	45	0/17/2013	0	9
1000002 Suede Loafer	7/25/2012	4	8	18	40	0/17/2013	0	0
1000003 Leather	7/25/2012	0	13	23	50	0/17/2013	0	0
1000004 Leather	7/25/2012	0	13	25	55	0/17/2013	0	0
1000005 Leather	7/25/2012	0	13	23	50	0/17/2013	0	0
1000006 Leather	7/25/2012	0	13	27	60	0/17/2013	0	0

Table 6–1 Assortment Plan Parameters Worksheet Measures

Measure	Description
Start Sales Date	The date the product is expected to start selling.
Number of weeks at Clearance Price	Number of weeks the item is expected to sell at Clearance Price.
Number of Weeks at Regular Price	Number of weeks the item is expected to sell at Regular Price.
Product Cost	The cost of the product.
Product Original Ticket Price	Initial retail of product.
Exit Date	The date that the product should be removed from the sales floor.
Ap Cp Clearance Price Retail	The clearance price set up in Assortment Planning.
Ap Cp Clearance Cost	The clearance cost set up in Assortment Planning.

Assortment Plan Details Worksheet

Use the Review Assortment Plan Details worksheet to see the plan that was created in the Assortment Planning application for the same style/color you are planning.

Figure 6–6 Assortment Plan Details Worksheet

Location	Calendar	Product	
Brick & Mortar	1/1/2011	ACME WORKWEAR JACKET/BROWN	ACME WORKWEAR JACKET/KHAKI
Ap Cp Store Count		300	200
Ap Cp Clearance Sales Units		2,700	1,200
Ap Cp Clearance Sales Retail		43,200	24,000
AP Cp Ttl Sls U		21,600	9,600
AP Cp Ttl Sls R		756,000	336,000
AP Cp Gross Margin		302,400	151,200
AP Cp GM R%		40.0 %	45.0 %
Ap Cp First Markdown % Off		40.0 %	50.0 %
Ap Cp Promo Price Retail		36	36
Ap Cp Perm Price Retail		40	40
Ap Cp Clearance Price Retail		16	20
Ap Cp Receipts Units		22,000	10,000
Ap Cp Receipts Retail		880,000	400,000
AP Cp Average Recpts Per Str		73	50
AP Cp Receipts AUR		40.0	40.0
Ap Cp BOP Inv Units		1,000	0
Ap Cp BOP Inv Retail		40,000	0
Ap Cp EOP Inv Units		0	400
Ap Cp EOP Inv Retail		0	8,000
AP Cp EopPerStr U%		0.0 %	200.0 %

Table 6–2 lists the measures available on this worksheet.

Table 6–2 Assortment Plan Details Worksheet Measures

Measure	Description
Ap Cp Store Count	The number of stores for which this style/color is planned for in the approved plan from the Assortment Planning application.
Ap Cp Clearance Sales Units	Assortment Planning Current Plan Clearance Sales Units.
Ap Cp Clearance Sales Retail	Assortment Planning Current Plan Clearance Sales Retail.
Ap Cp Ttl Sls U	Assortment Planning Current Plan Total Sales Units.

Table 6–2 (Cont.) Assortment Plan Details Worksheet Measures

Measure	Description
Ap Cp Ttl Sls R	Assortment Planning Current Plan Total Sales Retail.
AP Cp Gross Margin	Assortment Planning Current Plan Gross Margin.
Ap Cp GM R%	Assortment Planning Current Plan Gross Margin Rate.
Ap Cp First Markdown % Off	Initial Markdown Taken expressed as a rate.
Ap Cp Promo Price Change %	Assortment Planning Current Plan Promotional Price Change %.
Ap Cp Perm Price Change %	Permanent Price Change expressed as a rate.
Ap Cp Clearance Price Retail	Assortment Planning Current Plan Clearance Price Change %.
Ap Cp Receipts Units	Receipts expressed as Units.
Ap Cp Receipts Retail	Assortment Planning Current Plan Receipts Retail.
AP Cp Average Recpts Per Str	Assortment Planning Current Plan Average Receipts per store.
AP Cp Receipts AUR	Assortment Planning Current Plan Receipts Average Unit Retail.
Ap Cp BOP Inv Units	The Beginning of Period inventory units from Assortment Planning's current plan.
Ap Cp BOP Inv Retail	The Beginning of Period inventory retail from Assortment Planning's current plan.
Ap Cp EOP Inv Retail	The End of Period inventory retail.
Ap Cp EOP Inv Units	The End of Period inventory units.
AP Cp EopPerStr U%	Assortment Planning Current Plan End of Period Per Store Unit %.

After you have reviewed the parameters from the Assortment Planning application, continue to the [Item Plan Parameters Worksheet](#) to set your own parameters.

Item Planning Parameters Tab

Use the worksheets in the Item Planning Parameters tab to create a weekly plan for the style/colors. This tab has three worksheets:

- [Reference Curves Worksheet](#)
- [Item Plan Parameters Worksheet](#)
- [Seed Worksheet](#)

Reference Curves Worksheet

Use this worksheet to review the reference curves you created in the [Reference Curves](#) workbook. This worksheet is for reference only. It is provided to help you assign these curves to the style/colors being planned. To edit the curves, return to the [Maintain Curve Profiles Worksheet](#).

Note: To view the data in the Sales Curve Label and Sales Curve (Default) % measures, ensure that the calendar hierarchy includes the all[Calendar] dimension and that the location hierarchy displays only the all[Location] dimension.

Figure 6–7 Reference Curves Worksheet

Table 6–3 lists the measures available on this worksheet.

Table 6–3 Reference Curves Worksheet Measures

Measure	Description
Sales Curve Label	Displays the label for the lifecycle curve. This label is created in the Reference Curves workbook.
Sales Curve (Default)%	Displays percent-to-total sales percentage in the weeks of the curve. This is set in the Reference Curves workbook.
Item Lifecycle Curve	Displays the sales curve for the item.

Next, continue to the [Item Plan Parameters Worksheet](#).

Item Plan Parameters Worksheet

Use this worksheet to set the parameters of the item plan. This creates the weekly sales unit plan.

Figure 6–8 Item Plan Parameters - Sales Parameters Measure Profile

The screenshot shows the 'Item Plan Parameters' window with the 'Product' tab selected. The 'Location' is set to 'all [Location]' and the 'Product' is 'ACME LEATHER'. The window displays a list of parameters and their values, organized into sections separated by black bars.

Parameter	Value
Wp BOS C	20
Wp BOS R	50
Wp BOS U	100
# Stores	100
Start Sell Week	8/13/2011
Out of Stock Week	1/21/2012
Clearance Cadence	Cadence 01
Weeks on Sale (Reg + Promo)	14
Rate of Sale (APS per wk Reg & Promo)	5
Baseline Sales U	7,000
Baseline Sales Curve Selection	Early Ramp-Up
Shrink Target %	2.0 %
Wp Sls Reg U	3,535
Wp Sls Promo U	4,361
Wp Sls Clr U	0
Wp Ttl Sls U	7,896
Reg Sales %	44.8 %
Promotional Sales %	55.2 %
Clearance Sls %	0.0 %
Regular Price	\$50.00
Regular Cost	\$20.00
Clearance Cost	\$20.00
Wp Ttl Sls R	349,996
Salvage U	0
Salvage %	0.0 %
Salvage Value	5
Wp Sales Net VAT R	349,996
Wp GM	289,247
Wp GM %	82.6 %

The window also includes a 'Measure' tab at the bottom left and navigation buttons at the bottom right.

To set the item plan parameters, perform the following steps for each channel:

1. Ensure that the following measures are shown in the worksheet:
 - Wp BOS C
 - Wp BOS R
 - Wp BOS U
 - Wp Sales Net VAT R
2. Set the Wp BOS C, Wp BOS R, and WP BOS U measures with the beginning of season inventory cost, retail, and units data. (Perform this step only if the style/color is a carryover item or one that is planned to be received before the start of the planning period).
3. In the # Stores measure, enter the number of stores.
4. Define the start sell and out of stock weeks in the Start Sell Week and Out of Stock Week measures.
5. In the Clearance Cadence measure, select the cadence to be applied to the style/color. These cadences are created in the [Markdown Parameters](#) workbook.
6. In the Rate of Sale measure, enter the average units of the style/color that are sold per store, per week. (This is used for baseline sales calculation. It is useful when seeding dales to weeks).
7. Click **Calculate**. The Baseline Sales U measure is calculated. This measure displays the baseline sales units for the regular and promotional period.
8. In the Baseline Sales Curve Selection measure, select the reference curve to apply to the style/color. These reference curves are created in the [Reference Curves](#) workbook.
9. In the Shrink Target %, enter the planned shrink for the style/color. Each week is a planned shrink that is based on a certain percentage of sales for the week.
10. In the Regular Price, Regular Cost, and Clearance Cost measures, enter the price, cost, and clearance cost of the style/color.
11. Click **Calculate**.
12. In the Salvage Value measure, enter the amount that the style/color is worth in the last week of the salvage period. The salvage period is when the style/color has reached the end of its life. Therefore, the salvage value is the price you can recover by selling this item to a clearance channel.
13. If you are computing value added tax, edit the Wp Sales Net VAT R measure if needed.

After you have set the parameters, continue to the [Seed Worksheet](#) to seed these parameters into the item plan for the style/color.

Note: If the style/color belongs to a promotion, you should map the promotions to the style/color in the [Pricing Tab](#) before seeding.

Seed Worksheet

Use this worksheet to seed the item plan with data. This creates a demand curve on which to spread the initial targets of the item plan. You can seed with any of the following options:

- LY: Last year's data.
- Adj LY: Adjusted last year's data.
- AP: Data from the Assortment Planning (AP) application. If you use AP and you have loaded the AP data into Item Planning, you can review this data in the [Assortment Plan Tab](#).
- Parameters: The parameters that you have created in the [Item Plan Parameters Worksheet](#).
- Accepted Price Plan: This option is used only in the Item Planning Configured for COE application.

Or, you can instead choose to not seed the plan, which allows you to create a plan manually by keying in sales at a weekly level.

Figure 6–9 Seed Worksheet

Location	Product	Calendar
Brick & Mortar	ACME LEATHER JACKET/BLACK	
	FY2011	
Ly Sls Reg U		3,535
Adj Ly Sls Reg U		3,535

Measure < >

Table 6–4 lists the measures available on this worksheet.

Table 6–4 Seed Worksheet Measures

Measure	Description
Ly Sls Reg U	The regular units from last year's sales.
Adj Ly Sls Reg U	The adjusted regular units from last year's sales.
Like Item	The style/color that you mapped the current style/color to in the Item and Store Maintenance workbook.
Use History Map	Select this option to use the history of the style that you mapped the current style to in the Item and Store Maintenance workbook.
Mapped Ly Sls Reg U	The regular units from last year's sales of the like item.
Mapped Adj Ly Sls Reg U	The adjusted regular units from last year's sales of the like item.
Wp BOS U	The planned Beginning of Season total units.
Wp Seed	The source used to seed the working plan. Use the dropdown to select the source to use for seeding.

Seeding the Plan

Perform the following steps to seed the plan.

1. Roll the calendar hierarchy up to a year.
2. Select the style/color you want to seed in the product hierarchy.
3. In the Wp Seed measure, choose the seed option.
4. Select **Use Hist Map** if you want to use the data of the like item shown in the Like Item measure.
5. When you have selected all the data you want to seed, click **Seed** in the Planning Actions menu.

Figure 6–10 Seed Option in the Planning Actions Menu

6. A confirmation message appears, stating that the data has been successfully seeded. Click **OK**.

Figure 6–11 Seeding Success Message

After you have seeded, continue to the [Plan Approval Worksheet](#) to approve the plan.

Pricing Tab

The Pricing tab contains four worksheets that help you map style/colors to promotions:

- [Promotions Definition Worksheet](#)
- [Promotions Weeks Worksheet](#)
- [Promo Mapping Worksheet](#)
- [Markdown Cadence Worksheet](#)

Use the [Promo Mapping Worksheet](#) to map the style/colors and promotions. Use the other worksheets as references about the promotions and markdown cadences.

Promotions Definition Worksheet

Use this workbook to review the lift and the lift override for the promotions. This worksheet is read-only.

Figure 6–12 Promotions Definition Worksheet

	Sls Promo Lift U%	Sls Promo Lift U% Override
Back to School	111.1 %	120.0 %
Fall Sales	117.6 %	125.0 %
Holiday	142.9 %	140.0 %
Promotion 04	100.0 %	0.0 %
Promotion 05	100.0 %	0.0 %
Promotion 06	100.0 %	0.0 %
Promotion 07	100.0 %	0.0 %
Promotion 08	100.0 %	0.0 %
Promotion 09	100.0 %	0.0 %
Promotion 10	100.0 %	0.0 %
Promotion 11	100.0 %	0.0 %
Promotion 12	100.0 %	0.0 %

Table 6–5 lists the measures available on this worksheet.

Table 6–5 Promotions Definition Worksheet Measures

Measure	Description
Sls Promo Lift U%	The promotional lift. This is the percent of increased sales that must occur to overcome the decrease in price to sell the same dollar amount.
Sls Promo Lift U% Override	The lift entered in this measure overrides the lift calculated in the Sls Promo Lift U% measure.

Promotions Weeks Worksheet

Use this worksheet to review the promotion periods. This worksheet is read-only.

Figure 6–13 Promotions Weeks Worksheet

	8/6/2011	8/13/2011	8/20/2011	8/27/2011	9/3/2011	9/10/2011

Promotion 05	☐	
Promotion 06	☐	
Promotion 07	☐	
Promotion 08	☐	
Promotion 09	☐	
Promotion 10	☐	
Promotion 11	☐	
Promotion 12	☐	

To map a style/color to a promotion, click the check box. You may select more than one promotion for a style/color.

Markdown Cadence Worksheet

Use this worksheet to review the markdown cadences you created in the [Markdown Parameters](#) workbook. This worksheet is read-only.

Note: To see the Basis (Year/Item) measure data, ensure that all[Calendar] is displayed in the calendar hierarchy.

Figure 6–15 Markdown Cadence Worksheet

		all [Calendar]	Week 27	Week 28	Week 29
Cadence 01	MD Clr U%		66.7 %	0.0 %	0.0 %
Cadence 02	Basis (Year / Item)				
	MD Clr U%		50.0 %	0.0 %	0.0 %
Cadence 03	Basis (Year / Item)				
	MD Clr U%		0.0 %	0.0 %	0.0 %

Table 6–6 lists the measures available on this worksheet.

Table 6–6 Markdown Cadence Worksheet Measures

Measure	Description
MD Clr U%	The markdown clearance percentage starting from the week of the year or the style/color's lifecycle.
Basis (Year/Item)	The basis that the cadence is based on. Options are year and item.

Item Plan Tab

The worksheets in this tab display the weekly plan for the sales and markdowns that was created by the parameters you have set so far. Use these worksheets to review the plan.

- [Item Plan Worksheet](#)
- [Promo Details Worksheet](#)

Item Plan Worksheet

Use this worksheet to review the weekly plan for the sales and markdowns that has been created by all of the parameters and promotions you have created so far. If you need to adjust the plan, return to the [Item Plan Parameters Worksheet](#) to adjust the parameters, seed from parameters in the [Seed Worksheet](#) worksheet, and then return to this worksheet to review the results. Continue this process until you are satisfied with the sales and markdown plan.

Promo Details Worksheet

This worksheet displays the baseline sales and promotional lift units for the style/color. The baseline sales units measure, Wp Baseline Sales U, displays the number of units that would be sold if no promotions existed. The promotional lift units measure, Wp Promo Lift U, displays the number of additional units that would be sold with the promotion. The Wp Sls Promo U measure is the total units that would be sold. It combines the baseline sales units and the promotional lift units.

Wp Sls Promo U											

Table 6–7 Promo Details Worksheet Measures

Measure	Description
Wp Sls Promo Eligibility	By selecting this boolean, the promotion is being associated to the style/color. You must seed from parameters to apply the promotional details to their style/color plan after selecting this boolean.
Wp Promo Lift U	Displays the number of additional units sold with the promotion.
Wp Baseline Sales U	Displays the number of units sold if no promotions existed.
Wp Sls Promo U	Displays the total units sold. This measure combines the baseline sales units and the promotional lift units.

Once you are satisfied with the sales plan, return to the [Item Plan Parameters Worksheet](#) to create the receipt and inventory plan.

Item Plan Parameters Tab: Receipt and Inventory Plan

After you have developed the sales and inventory plan, use the Item Plan Parameters worksheet to create the receipt and inventory plan.

Item Plan Parameters Worksheet: Receipt Parameters Measure Profile

Use the receipt parameters measure profile in this worksheet to develop the receipt and inventory plan.

Figure 6–18 *Item Plan Parameters Worksheet: Receipt Parameters Measure Profile*

The screenshot shows a software window titled "Item Plan Parameters" with a blue border and standard Windows window controls. Inside, there are tabs for "Location" and "Product". The "Location" tab is selected, showing "Brick & Mortar". The "Product" tab is also selected, showing "ACME LEATHER JACKET/BLACK". Below these tabs is a table of parameters and their values. The parameters are listed in the left column, and their values are in the right column. Some rows have a black background, indicating they are not applicable or hidden. At the bottom, there is a "Measure" button and a set of navigation arrows.

Measure < [] >

To create a receipt and inventory plan, perform the following steps:

1. Change the measure profile to Receipt Parameters.
2. In the Receipt Lead Time measure, enter the number of weeks before the start sell week that you want to schedule receipts.
3. In the Receipt Frequency measure, enter the number of weeks between each receipt. For example, 1 means that receipts arrive every week. 2 means that receipts arrive every other week.
4. In the Initial Receipt % measure, enter the percentage of total receipts to be included the first receipt drop.

5. In the Presentation Min measure, enter the minimum amount of inventory on the sales floor per store. This is used only in the initial receipt and can be thought of as a fixture fill.
6. In the Safety Stock (Weeks) measure, enter the number of weeks of sales in the future that each receipt drop can fulfill. This safety stock setting applies to all receipt drops except the initial receipt drop. It is based on a future week of sales, not an average week of sales.
7. In the Sell Thru Reg % measure, enter the target percentage of sales to be reached during the regular and promotional periods. This number is used as a guideline for calculating receipts. For instance, if set to 85%, this means that 85% of the style/color is sold during the regular and promotional periods, and 15% is left to be sold during the clearance period.
8. Select the **Flow Receipts** check box.
9. In the Planning Actions menu, click **Calculate Receipt Flow**.

Figure 6–19 Planning Actions: Calculate Receipt Flow

The Wp Receipts U and Receipt Start Week measures are populated. After you have calculated the receipt flow, continue to the [Item Plan Worksheet: Receipts and Inventory Measure Profile](#) to view the receipt and inventory plan.

Table 6–8 Item Plan Parameters Worksheet - Receipt Parameters Measure Profile

Measure	Description
# Stores	The number of stores that sell the style/color.
Start Sell Week	The first week that the style/color is sold.
Wp Sls Reg + Pro U	The combined total of the planned regular and promotional units. This is a calculated measure.
Sell Thru Reg %	The target percentage of sales to be reached during the regular and promotional periods.
Wp BOS U	The planned beginning of season units.
Wp BOS R	The planned beginning of season retail.
Wp BOS C	The planned beginning of season cost.
Receipt Frequency	The number of weeks between each receipt drop.
Initial Receipt %	The percentage of total receipts to be included in the first receipt drop.
Presentation Min	The minimum amount of inventory on the sales floor per store. This is used only in the initial receipt and can be thought of as a fixture fill.
Safety Stock (weeks)	The number of weeks of sales in the future that each receipt drop can fulfill. This applies to all receipt drops except the initial one. It is based on a future week of sales, not an average week of sales.

Table 6–8 (Cont.) Item Plan Parameters Worksheet - Receipt Parameters Measure Profile

Measure	Description
Receipt Lead Time	The number of weeks before the start sell week that the initial receipt drop arrives.
Flow Receipts	Check this measure to calculate the receipt flow based on the parameters in this worksheet.
Wp Receipt Start Week	The week that initial receipt drop occurs.
Wp EOP U	The planned end of period units. This is a calculated measure.
Wp EOP R	The planned end of period retail. This is a calculated measure.
Wp EOP C	The planned end of period cost. This is a calculated measure.
Wp Cum Avg Inv U	The planned cumulative average inventory units. This is a calculated measure.
Wp Cum Avg Inv R	The planned cumulative average inventory retail. This is a calculated measure.
Wp Cum Avg Inv C	The planned cumulative average inventory cost. This is a calculated measure.
Wp Cum Turn U	The planned cumulative turn units. This is a calculated measure.
Wp Cum Turn R	The planned cumulative turn retail. This is a calculated measure.
Wp Cum Turn C	The planned cumulative turn cost. This is a calculated measure.

Item Plan Tab: Receipt and Inventory Plan

After you have developed the receipt flow, review the receipt and inventory plan in the Item Plan worksheet.

Item Plan Worksheet: Receipts and Inventory Measure Profile

Use this worksheet to review the receipt and inventory plan you created in the Item Plan Parameters worksheet.

1. Change the measure profile of the Item Plan worksheet to **Receipts and Inventory**.
2. Review the receipt units in the Wp Receipt U measure.

If you are satisfied with the receipts and inventory plan, continue to the [Review and Approval Tab](#). If not, return to the [Item Plan Parameters Worksheet: Receipt Parameters Measure Profile](#) to adjust the plan.

Review and Approval Tab

After you have developed the sales and margin and receipts and inventory plans, compare them to the plans created in the Merchandise Financial Planning (MFP) application. Once you have reviewed the plans, approve them in the Plan Approval worksheet.

This tab contains three worksheets: [Plan Review Worksheet](#), [All Measures](#), and [Plan Approval Worksheet](#).

Plan Review Worksheet

Use this worksheet to compare the plan to the plans created in MFP. Several measure profiles are available for comparison:

- Compare to MFP Cost Cp Plan
- Compare to MFP Cost Op Plan
- Compare to MFP Retail Cp Plan
- Compare to MFP Retail Op Plan
- Compare to MFP Unit Plan

Figure 6–22 Plan Review Worksheet: Compare to MFP Cost Cp Plan

All Measures

The All Measures worksheet contains all the measures in the workbook; however, only the Wp Ttl Sls U measure is visible in the default measure profile. The purpose of this worksheet allows to create a view of workbook measures that you may not be able to view all at once in other worksheets.

Figure 6–23 All Measures Worksheet

Location	Product	Calendar
Brick & Mortar	ACME LEATHER JACKET/BLACK	
		Fall FY 2011 August FY 2011 September FY 2011 October FY 2011 November FY 2011 December FY 2011 January FY 2011
Wp Ttl Sls U		8,866 620 2,711 3,825 1,025 415 270

To see the other measures in this worksheet, perform the following steps:

1. Right-click the **Measure** dimension tile and click **Select Display and Sort Attributes**. The All Measures - Measure window appears.
2. The Tree Options window appears. Click the **Show/Hide** tab.
3. Move measures you want to see in the worksheet from the Hidden Measures box to the Visible Measures box.
4. When finished, click **OK**.

For more information about hidden and visible measures, see the *Oracle Retail Predictive Application Server User Guide for the Classic Client*.

Plan Approval Worksheet

After you have reviewed the plans, approve them in this worksheet.

The approval process is self-approved and executed by the item planner. The versions to be updated are determined during the approval process. During preseason, it is recommended that Op and Cp are updated together to ensure synchronization. When in-season planning begins, only the Cp version is updated. If for some reason the Op needs to be updated after in-season planning has begun, you have the option to approve to the Op version only. Note that in this case, only unelapsed time periods are approved from Wp to Op.

By default, all quarters are disabled for Op approval. If the administrator allows users to approve to Op, you can approve the Op.

To approve the plans, perform the following steps:

1. Use the Wp Approve measure to approve the plan. You can approve just the current plan, just the original plan, or both plans.
2. Optional: Enter comments in the Wp Approval Comments measure.

Figure 6–24 Plan Approval Worksheet

	Quarter 3 FY 2011	Quarter 4 FY 2011
Wp Approve	Approve Op and Cp	Approve Op and Cp
Wp Last Approval Action		
Wp Approval Comments	Rec-d by BLG	Rec-d by BLG
Op Last Approved Date		
Op Last Approved By		
Op Last Approved Comments		
Cp Last Approved Date		
Cp Last Approved By		
Cp Last Approved Comments		

- When ready to approve, click **Approve Item Plans** in the Planning Actions menu.

Figure 6–25 Approve Item Plans Option in the Planning Actions Menu

- A success message appears, informing you that the plan was successfully approved. Click **OK** to close it.

Figure 6–26 Plan Approved Message

The worksheet refreshes and the Wp Approve and Wp Approval Comments measures are cleared. The Wp Last Approval Action measure along with the associated Op and Cp measures are populated (Figure 6–27).

Figure 6–27 Approved Plans

The screenshot shows a window titled "Plan Approval" with a blue border. At the top, there are tabs for "Location" and "Product", and a "Calendar" button. Below these, the "Location" is "Brick & Mortar" and the "Product" is "ACME LEATHER JACKET/BLACK". There are navigation arrows to the right. The main area is a table with two columns: "Quarter 3 FY 2011" and "Quarter 4 FY 2011". The rows are as follows:

	Quarter 3 FY 2011	Quarter 4 FY 2011
Wp Approve		
Wp Last Approval Action	Approve Op and Cp	Approve Op and Cp
Wp Approval Comments		
Op Last Approved Date	10/7/2010	10/7/2010
Op Last Approved By	adm	adm
Op Last Approved Comments	Rec-d by BLG	Rec-d by BLG
Cp Last Approved Date	10/7/2010	10/7/2010
Cp Last Approved By	adm	adm
Cp Last Approved Comments	Rec-d by BLG	Rec-d by BLG

At the bottom left, there is a "Measure" button and a small icon. At the bottom right, there is a right arrow button.

Table 6–9 lists the measures available on this worksheet.

Table 6–9 Approval Worksheet Measures

Measure	Description
Wp Approve	Use this measure to approve the plan to the current plan, original plan, or both.
Wp Last Approval Action	Displays the last type of approval for the time period. The choices are Approve Op and Cp, Approve Op Only, and Approve Cp Only.
Wp Approval Comments	Use this measure to enter comments about the plan.
Op Last Approved Date	The date that the last original plan was approved.
Op Last Approved By	The username of the person who last approved the original plan.
Op Last Approved Comments	The comments about the original plan approval made by the user.
Cp Last Approved Date	The date that the last current plan was approved.
Cp Last Approved By	The username of the person who last approved the current plan.
Cp Last Approved Comments	The comments about the current plan approval made by the user.

Committing Targets

To commit your plan, perform the following steps:

1. Approve your plans using the instructions in [Plan Approval Worksheet](#) section.
2. In the workbook that you have approved the plans, click **Commit Now** or **Commit ASAP** in the File menu.

Figure 6–28 Commit a Workbook

Once the commit has occurred, the commit status changes to Committed.

Dashboard Tab

Once in-season planning begins, use the worksheets in this tab to review the overall status of each style/color. Until you create and submit an item plan, the dashboard worksheets are empty.

The Dashboard tab has two worksheets: [Dashboard Worksheet](#) and [Bounds Worksheet](#).

Dashboard Worksheet

Use the Dashboard worksheet for a quick overview of each style's data.

The exception measures in this worksheet highlight data that falls within or outside of the bounds set in the next worksheet.

Figure 6–29 Dashboard Worksheet

The screenshot shows a software window titled "Dashboard" with a blue border. Inside, there are tabs for "Location" and "Product". The "Location" tab is selected, showing "Brick & Mortar". The "Product" tab is also selected, showing "ACME LEATHER JACKET/BLACK". To the right of these tabs is a "Measure_Status" button. Below the tabs is a table with 7 columns: "01. Total Plan", "02. Total Act/Proj", "03. Total Act/Proj diff to Total Plan", "04. Total Act/Proj var to Total Plan", "05. LTD Plan", and "06. LTD Actual". The table lists 14 measures: Sales Retail, Sales Exception, Markdown, Markdown Exception, Gross Margin, Gross Margin Exception, Gross Margin %, Gross Margin % Exception, Sell Thru %, Sell Thru % Exception, Turn Retail, Turn Exception, and two more measures that are partially obscured. The values for the measures are: Sales Retail (349,996), Sales Exception (349,996), Markdown (-205,123), Markdown Exception (-205,123), Gross Margin (289,247), Gross Margin Exception (289,247), Gross Margin % (83), Gross Margin % Exception (83), Sell Thru % (316), Sell Thru % Exception (316), Turn Retail (-5), Turn Exception (-5), and two more measures (0, 0). At the bottom of the window is a "Measure" button and a set of navigation arrows.

	01. Total Plan	02. Total Act/Proj	03. Total Act/Proj diff to Total Plan	04. Total Act/Proj var to Total Plan	05. LTD Plan	06. LTD Actual
Sales Retail	349,996	349,996	0	0	0	0
Sales Exception						
Markdown	-205,123	-205,123	0	0	0	0
Markdown Exception						
Gross Margin	289,247	289,247	0	0	0	0
Gross Margin Exception						
Gross Margin %	83	83	0	0	0	0
Gross Margin % Exception						
Sell Thru %	316	316	0	0	0	0
Sell Thru % Exception						
Turn Retail	-5	-5	0	0	0	0
Turn Exception						

Table 6–10 lists the measures available on this worksheet.

Table 6–10 Dashboard Worksheet Measures

Measure	Description
Sales Retail	The Retail value of Sales.
Sales Exception	The Sales exception that is highlighted per the user-defined upper and lower bound limits.
Markdown	Total Markdowns Retail.
Markdown Exception	The Markdown exception that is highlighted per the user-defined upper and lower bound limits.
Gross Profit	Gross Profit Retail.
Gross Profit Exception	The Gross profit result that is highlighted per the user-defined upper and lower bound limits.
Gross Profit %	Gross Profit Rate.
Gross Profit Exception	The Gross profit % result that is highlighted per the user-defined upper and lower bound limits.
Sell Thru %	The rate at which sales units are moved through beginning of period inventory.
Sell Thru % Exception	The Sell through % exception that is highlighted per the user-defined upper and lower bound limits.
Turn Retail	Cumulative Turnover representing the frequency which Inventory is sold and replaced over a stated time period Retail.
Turn Exception	The turn exception that is highlighted per the user-defined upper and lower bound limits.

After you have reviewed the dashboard, continue to the [Bounds Worksheet](#).

Bounds Worksheet

The Bounds worksheet allows you to set the upper and lower bounds for sales, markdown, gross profit, sell through, and turn.

Figure 6–30 *Bounds Worksheet*

Location	Product	Measure_Status
ACME-CHL	ACME LEATHER JACKET/BLACK	
	01. Total Plan	02. Total Act/Proj
	03. Total Act/Proj diff to Total Plan	04. Total Act/Proj var to Total Plan
Sales Lower Boundary	0.00	0.00
Sales Upper Boundary	0.00	0.00
Markdown Lower Boundary	0.00	0.00
Markdown Upper Boundary	0.00	0.00
Gross Margin Lower Boundary	0.00	0.00
Gross Margin Upper Boundary	0.00	0.00
Gross Margin % Lower Boundary	0.0 %	0.0 %
Gross Margin % Upper Boundary	0.0 %	0.0 %
Sell Thru % Lower Boundary	0.0 %	0.0 %
Sell Thru % Upper Boundary	0.0 %	0.0 %
Turn Lower Boundary	0.00	0.00
Turn Upper Boundary	0.00	0.00

Table 6–11 lists the measures available on this worksheet.

Table 6–11 *Bounds Worksheet Measures*

Measure	Description
Sales Lower Bound	User-defined sales lower limit. If the sales of any style/color is below this threshold, it is highlighted in the Dashboard worksheet as an exception.
Sales Upper Bound	User-defined sales upper limit. If the sales of any style/color is above this threshold, it is highlighted in the Dashboard worksheet as an exception.
Markdown Lower Bound	User-defined markdown lower limit. If the markdown of any style/color is below this threshold, it is highlighted in the Dashboard worksheet as an exception.
Markdown Upper Bound	User-defined markdown upper limit. If the markdown of any style/color is above this threshold, it is highlighted in the Dashboard worksheet as an exception.
Gross Profit Lower Bound	User-defined gross profit lower limit. If the gross profit of any style/color is below this threshold, it is highlighted in the Dashboard worksheet as an exception.
Gross Profit Upper Bound	User-defined gross profit upper limit. If the gross profit of any style/color is above this threshold, it is highlighted in the Dashboard worksheet as an exception.

Table 6–11 (Cont.) Bounds Worksheet Measures

Measure	Description
Gross Profit % Lower Bound	User-defined gross profit percentage lower limit. If the gross profit percentage of any style/color is below this threshold, it is highlighted in the Dashboard worksheet as an exception.
Gross Profit % Upper Bound	User-defined gross profit percentage upper limit. If the gross profit percentage of any style/color is above this threshold, it is highlighted in the Dashboard worksheet as an exception.
Sell Thru % Lower Bound	User-defined sell through percentage lower limit. If the sell through percentage of any style/color is below this threshold, it is highlighted in the Dashboard worksheet as an exception.
Sell Thru % Upper Bound	User-defined sell through percentage upper limit. If the sell through percentage of any style/color is above this threshold, it is highlighted in the Dashboard worksheet as an exception.
Turn Lower Bound	User-defined turn percentage lower limit. If the turn of any style/color is below this threshold, it is highlighted in the Dashboard worksheet as an exception.
Turn Upper Bound	User-defined turn percentage upper limit. If the turn of any style/color is above this threshold, it is highlighted in the Dashboard worksheet as an exception.

Enable Op Approval Workbook

The Enable Op Approval workbook is used by planning administrators only. They use the workbook to enable and disable the ability of users to approve a quarterly original plan (Op). If the planning administrator disables the Op approval, users cannot approve plans to Op status.

By default, the Op approval is set to enabled.

Building the Enable Op Approval Workbook

To build a new Enable Op Approval workbook, perform the following steps:

1. Click the **New** icon in the toolbar.
2. The New Workbook dialog box appears. On the Item Planning Administration tab, select **Enable Op Approval** and click **OK**.

Figure 7–1 New Workbook Dialog Box

3. The Enable Op Approval Wizard appears at the Select Calendar step. Select the quarters you want to enable and click **Finish**.

Figure 7–2 Enable Op Approval Wizard: Select Calendar

The Enable Op Approval workbook is built and opens at the [Allow Op Approval Tab](#).

Allow Op Approval Tab

The Allow Op Approval tab has one worksheet: Allow OP Approval.

Select the quarters that you want to enable users to approve plans to the original plan.

Figure 7–3 Allow OP Approval Worksheet

	Op Approval Enabled	Measure
Quarter 1, FY 2011	☒	
Quarter 2, FY 2011	☒	
Quarter 3, FY 2011	☒	
Quarter 4, FY 2011	☒	

Table 7–1 lists the measures available on this worksheet.

Table 7–1 Allow Op Approval Worksheet Measures

Measure	Description
Op Approval Enabled	Select this measure to enable users to approve plans to the original plan for the quarter.

Data Validation

The Data Validation workbook contains all measures that are either loaded or touched during the batch calculation process. This template is used by the administrator only to verify the results of data loads and batch processes.

The Data Load Validation workbook contains the following tabs:

- [Building the Data Load Validation Workbook](#)
- [Item Planning Measures Worksheet](#)
- [MFP Measures Worksheet](#)
- [Default Measures Worksheet](#)
- [Assortment Planning Measures Worksheet](#)

Building the Data Load Validation Workbook

To build a Data Load Validation workbook, perform the following steps:

1. Click the **New** icon in the toolbar.
2. The New Workbook dialog box appears. On the Item Planning Administration tab, select **Data Validation** and click **OK**.

Figure 8–1 New Workbook Dialog Box

3. The Data Validation Wizard appears at the Select Calendar step. Select the weeks you want to validate and click **Next**.

Figure 8–2 Data Validation Wizard: Select Calendar

4. The Select Product step appears. Select the products you want to validate and click **Next**.

Figure 8–3 Data Validation Wizard: Select Product

5. The Select Location step appears. Select the channels you want to validate and click **Finish**.

Figure 8–4 Data Validation Wizard: Select Location

The Data Load Validation workbook is built.

Item Planning Measures Worksheet

Use the Item Planning Measures worksheet to validate that the Item Planning data was updated in the batch process.

Figure 8–5 *Item Planning Worksheet*
