

Oracle® Retail Markdown Optimization Release 13.1.2

Release Notes

January 2010

Welcome to Oracle® Retail Markdown Optimization (MDO) Release 13.1.2.

This document contains the release notes for the MDO v13.1.2 and highlights the enhancements and fixed defects for this release.

Note: Installation media files for an Enterprise release (13.x) are available on the *Oracle Electronic Delivery* Web site (<http://edelivery.oracle.com>) and Patch releases (13.1.x) and Hot Fixes (13.1.x.y) are available on the *My Oracle Support* Web site (<https://support.oracle.com>).

MDO 13.1.2 Build IDs:

Table 1 Package Matrix Build IDs

Component Name	Version Number
MDO 13.1.2	Price-13.1.2-221-201001170300-248276
Framework 3.1.2	Framework-3.1.2-119-201001142100-248200
Installer 3.1.2	Installer-3.1.2-121-201001142150-248200
Suite 3.1.2	Suite-3.1.2-120-201001142115-248200
Enginepkg 5.4.2	Enginepkg-5.4.2-205-201001151025-248200
APC-MDO 13.1.2	APC_MDO-13.1.2-152-200912220200-247175

Overview

The following enhancement has been included in MDO Release 13.1.2:

Archive Table Retention Period

As part of the MDO weekly batch process, certain archive tables are updated. These tables are:

- like forecast_activities_arch
- forecast_summaries_arch
- item_data_arch
- markdown_activities_arch
- rtm_history_arch

- rtm_status_arch
- rtm_status_arguments_arch

A new partition is created every week for these archive tables. Over time, these tables will increase in size. In order to manage the size of the archive tables, MDO now provides a means of configuring the length of retention period for archive table.

As part of this feature, a script is provided to set the number of retention weeks for each archive table. A purging step has been added to the weekly batch process.

This retention period defaults to null so that no archive is truncated by default. The recommended retention period is two years.

Retention Script

Use the following script, available under <install_base>/modules/tools/bin, to set the retention period for the archive tables.

plsetarchiveretention.sh <config_root> [archive_table_name [NULL] | nn] [DEFAULT [NULL] | nn]]

Arguments:

<config_root>	path to configuration files
archive_table_name [NULL nn]	archive_table_name is the name of the archive table followed by the word NULL or <a positive number representing the number of retention weeks>.
DEFAULT [NULL nn]	DEFAULT represents all other tables not listed followed by the word NULL or <a positive number representing the number of retention weeks>.

Example: plsetarchiveretention.sh \$INSTALL_DIR/config TABLE1_NAME 50
TABLE2_NAME NULL DEFAULT 100

Weekly Batch Process

A purging procedure is called as part of FELOAD and before the archiving process. This procedure drops all expired partitions and logs the purge data into ARCHIVE_STATUS_TBL.

Database Changes

The following changes have been made to the database for this feature.

New table for defining retention periods of archive partitions: ARCHIVE_RETENTION_TBL.

New column in ARCHIVE_STATUS_TBL: PURGE_DATE (data type of DATE).

New view: EXPIRED_ARCHIVE_PARTNS_VW

Purging Logic

1. Retrieve 'CurrentWeek' value from p4p_params.
2. Retrieve retention details of archive tables from ARCHIVE_RETENTION_TBL.
3. Retrieve records from ARCHIVE_STATUS_TBL. A partition record here is deemed expired if the number of weeks between its corresponding run_id's FORECAST_

RUNS.LAST_ACTUAL_DT value and 'CurrentWeek' is greater than it's respective ARCHIVE_RETENTION_TBL.retain_weeks.

4. Drop expired partition of actual archive table and update PURGE_DATE of its ARCHIVE_STATUS_TBL record.

Noteworthy Bug Fixes in this Release

The following bugs have been fixed in MDO Release 13.1.2:

13838 – The Save, Close and Clear buttons in the <Add Comments> link from Worksheet Summaries and from within a Worksheet are now translated.

14420 – The weekly batch process now only gathers statistics on newly created archive partitions.

14462 – The email field on the Reports page now supports the use of hyphens (-).

14484 –In p4p-column-list.xml, for the metrics INT_RECOMMENDED_ITEM_FLAG and INT_REC_COLLECTION_FLAG column definitions, the aggregation function P4P_SUM is added.

14493 – Calculation for Worksheet Summary metric 'taken_dollars' has been changed in p4pgui-config.xml as follows:

```
<metric-items name="taken_dollars" column-ref="INT_TAKEN_MD_COST"
aggregationType="SUM"/>
```

14588 – The report xml now supports <column-group>s and nested <column-group>s.

14647 – The IR_WIF_PROJ_OH_UNITS_EFF_DT view has been corrected. The view take into account the fact that calendar_dt in forecast_activities always falls on the last day of a week.

14722 – Price ladder drop-down lists are made non-filterable and non-sortable out of the box by changing the properties (filterable="false" and sortable="false") for INT_LADDER_IT metrics in p4p-column-list.xml.

Known Issues

The following is a known issue for MDO 13.1.2:

14999 –In the MDO 13.1.1 Release Notes, the Flexible Clustering Section states that ASH_CLUSTER_MAPPING_TBL has been deprecated. This is not correct. Only the ASH_CLUSTER_LOAD_TBL interface has been deprecated.

Oracle Retail Documentation on the Oracle Technology Network

In addition to being packaged with each product release (on the base or patch level), all Oracle Retail documentation is available on the following Web site:

http://www.oracle.com/technology/documentation/oracle_retail.html

Documentation should be available on this Web site within a month after a product release. Note that documentation is always available with the packaged code on the release date.

Customer Support

<https://support.oracle.com>

When contacting Customer Support, please provide:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to recreate
- Exact error message received
- Screen shots of each step you take

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

- (i) the software component known as **ACUMATE** developed and licensed by Lucent Technologies Inc. of Murray Hill, New Jersey, to Oracle and imbedded in the Oracle Retail Predictive Application Server - Enterprise Engine, Oracle Retail Category Management, Oracle Retail Item Planning, Oracle Retail Merchandise Financial Planning, Oracle Retail Advanced Inventory Planning, Oracle Retail Demand Forecasting, Oracle Retail Regular Price Optimization, Oracle Retail Size Profile Optimization, Oracle Retail Replenishment Optimization applications.
- (ii) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.
- (iii) the **SeeBeyond** component developed and licensed by Sun Microsystems, Inc. (Sun) of Santa Clara, California, to Oracle and imbedded in the Oracle Retail Integration Bus application.
- (iv) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.
- (v) the software component known as **Crystal Enterprise Professional and/or Crystal Reports Professional** licensed by SAP and imbedded in Oracle Retail Store Inventory Management.
- (vi) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.
- (vii) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.
- (viii) the software component known as **Style Report™** developed and licensed by InetSoft Technology Corp. of Piscataway, New Jersey, to Oracle and imbedded in the Oracle Retail Value Chain Collaboration application.
- (ix) the software component known as **DataBeacon™** developed and licensed by Cognos Incorporated of Ottawa, Ontario, Canada, to Oracle and imbedded in the Oracle Retail Value Chain Collaboration application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right

to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
