# BEA WebLogic JRockit 7.0 Limited Availability for Red Hat Linux AS 2.1 - IPF Release Notes

---

This document contains important details for the BEA WebLogic JRockit 7.0 Limited Availability for Red Hat Linux Advanced Server 2.1 - IPF release. It contains information on the following subjects:

- Scope
- Installation
- Important Information About this Release
- Documentation
- Note About OS Support

## Scope

This is a limited availability version of BEA WebLogic JRockit 7.0 and is designed expressly for use with 64-bit Red Hat Advanced Server 2.1 - IPF.

---

# Installation

For installation instructions, please refer to the *BEA WebLogic JRockit 7.0 Limited Availability for Red Hat Advanced Server-IPF Installation and Migration Guide*.

## Important Information About this Release

The JRockit Management Console can occasionally throw an exception with a stack trace starting with the line `sun.dc.pr.PRException: endPath: bad path`. This is due to a known bug in the Sun AWT classes and is reported on <http://java.sun.com/> as bug 4485298.

## Documentation

In addition to these release notes, the BEA WebLogic JRockit 7.0 Limited Availability for Red Hat Linux Advanced Server 2.1 - IPF documentation set is comprised of these documents:

- *Installation and Migration Guide*
- *User Guide*

These documents are available only as part of this release kit.

# Note About OS Support

BEA will support WebLogic JRockit 7.0 Limited Availability for Red Hat Linux Advanced Server 2.1 - IPF and provide bug fixes on only those operating system distributions that have been certified by BEA. While it may be possible to run JRockit on other non-certified distributions, BEA makes no such guarantees. In addition, BEA will not be responsible for providing any bug fixes for non-certified distributions.
