Browser Plug-in Installation Guide

Contents

1. Welcome

2. Installation and Configuration

Index

Welcome

This book describes how to install and configure the BEA AquaLogic Pathways Browser Plug-in 1.5.

How to Use This Book

This guide has been designed provide detailed instructions for users installing and configuring the Pathways Browser Plug-in for the first time.

Audience

This guide is written for users responsible for installing and configuring the Pathways Browser Plug-in.

Organization

This guide includes the following chapters:

- This chapter provides information on how to use this guide and describes other resources available to help you install, configure, and use the Pathways Browser Plug-in.

- Chapter 2, "Installation and Configuration" provides software requirements and detailed instructions for installing and configuring the Pathways Browser Plug-in.

Typographical Conventions

This book uses the following typographical conventions.

Table 1-1 Typographical Conventions

Convention	Typeface	Examples/Notes
• Items you need to take action on (such as files or screen elements)	**bold**	• Upload **Procedures.doc** to the portal. • To save your changes, click **Apply Changes**.
• User-defined variables • New terms • Emphasis • Object example names	*italic*	• The migration package file is located in *install_dir*\serverpackages. • *Portlets* are Web tools embedded in your portal. • The URI *must* be a unique number. • The example Knowledge Directory displayed in Figure 5 shows the *Human Resources* folder.

• Text you enter
• Computer generated text (such as error messages)
• Code samples
	`computer`	• Type `Marketing` as the name of your community.
		• This script may generate the following error:
		`ORA-00942 table or view does not exist`
		• Example:
		`<setting name="SSOCookieIsSecure">`
		`    <value`
		`    xsi:type="xsd:integer">0</value>`
		`</setting>`

• Environment variables	ALL_CAPS	• The default location of BEA_HOME is C:\bea.

BEA Documentation and Resources

This section describes other documentation and resources provided by BEA.

Table 1-2 BEA Documentation and Resources

Resource	Description
Release Notes	The release notes provide information about new features, issues addressed, and known issues in the release.
	They are available on edocs.bea.com/pathways/docs15 and on any physical media provided for delivering the application.

Table 1-2 BEA Documentation and Resources

Resource	Description
AquaLogic User Interaction (ALUI) and AquaLogic Business Process Management (ALBPM) Support Center	The ALUI and ALBPM Support Center is a comprehensive repository for technical information on ALUI and ALBPM products. From the Support Center, you can access products and documentation, search knowledge base articles, read the latest news and information, participate in a support community, get training, and find tools to meet most of your ALUI and ALBPM-related needs. The Support Center encompasses the following communities: **Technical Support** Submit online service requests, check the status of your requests, search the knowledge base, access documentation, and download maintenance packs and hotfixes. **User Group** Participate in user groups; view webinars, presentations, the CustomerConnection newsletter, and the Upcoming Events calendar. **Product Center** Download product updates, maintenance packs, and patches; view the Product Interoperability matrix (supported third-party products and interoperability between products). **Developer Center** Download developer tools, view code samples, access technical articles, and participate in discussions. **Education Services** Review the available education options, then choose courses by role and delivery method (Live Studio, Public Classroom Training, Remote Classroom, Private Training, or Self-Paced eLearning). **Profile Center** Manage your implementation details, local user accounts, subscriptions, and more. If you do not see the Support Center when you log in to one.bea.com/support, contact ALUISupport@bea.com or ALBPMSupport@bea.com for the appropriate access privileges.

Welcome

Installation and Configuration

This document is written for users who want to add the BEA AquaLogic Pathways Browser Plug-in to their Web browsers. After installation, users can use the Pathways Browser Plug-in to perform Pathways searches. Search results are displayed in the Pathways Enhanced UI.

This chapter includes the following sections:

- Installation Prerequisites
- Installing the Pathways Browser Plug-in
- Changing the Default Configuration of the Pathways Browser Plug-in

Installation Prerequisites

The following table summarizes the operating systems and software requirements for Pathways Browser Plug-in.

Table 2-1 Hardware and Software Requirements

Component	Requirements
Operating System	Windows XP and Windows Server 2003 SP2, SP1 or R2 (on x86)
Browser	• Internet Explorer 6.0 SP2 and above, 7.0 • Firefox 2.0
Pathways	BEA AquaLogic Pathways 1. 0, 1.0 MP1, and 1.5

Installing the Pathways Browser Plug-in

To install the Pathways Browser Plug-in:

1. **(Pathways Browser Plug-in Beta customers only)** Uninstall the Beta version of the Pathways Browser Plug-in.

2. Ensure that you have a compatible browser installed before continuing the installation of the Pathways Browser Plug-in.

3. Obtain the URL to the Pathways Enhanced UI Search page by performing the following (you will paste the URL into the Pathways Browser Plug-in installer in step 6):

   a. Log in to your BEA AquaLogic Interaction portal.

   b. Access the Pathways Browser Plug-in Enhanced UI Search page.

      If you do not know how to access this page, ask your portal administrator.

   c. In your browser's address bar, highlight then copy the entire URL of the Pathways Browser Plug-in Enhanced UI search page.

      The URL should end with *enhanced.xhtml*.

4. Double-click one of the following installer files:

   – **(Firefox)** PathwaysFirefoxPlug-in_v1-5.msi

   – **(Internet Explorer)** PathwaysIEPlug-in_v1-5.msi

   The Pathways Browser Plug-in installer wizard's Welcome wizard page appears.

5. Click **Next**.

6. Agree to the License Agreement, then click **Next**

   The Pathways Browser Plug-in Configuration wizard page appears.

7. Paste the URL that you copied in Step 2 into the Pathways Browser Plug-in URL field, then click **Next**.

   Performing this step configures the Pathways Browser Plug-in to point to the Pathways Browser Plug-in Enhanced UI search page on the Pathways Browser Plug-in server.

   The Confirm Installation screen appears.

8. Click **Next**.

   The installer installs the Pathways Browser Plug-in.

9. When the installation is complete, click **Close** to exit the installer wizard.

10. From your browser's View, Toolbars menu, enable the **BEA AquaLogic Pathways Browser Plug-in**.

    The plug-in is added to your browser.

Changing the Default Configuration of the Pathways Browser Plug-in

During installation, you configure the Pathways Browser Plug-in to point to the Pathways Enhanced UI search page, creating the Pathways Browser Plug-in's default configuration. If the URL to your Pathways Enhanced UI search page has changed after installation, you should change the default configuration of the plug-in to point to the updated URL of the Pathways Enhanced UI search page.

This section contains the following sections:

- Changing the Default Configuration (Internet Explorer)

- Changing the Default Configuration (Firefox)

Changing the Default Configuration (Internet Explorer)

To change the default configuration of the Pathways Browser Plug-in on Internet Explorer:

1. Obtain the new URL to the Pathways Browser Plug-in Enhanced UI search page by performing the following:

    a. Log in to your BEA AquaLogic Interaction portal.

    b. Access the Pathways Browser Plug-in Enhanced UI search page.

        If you do not know how to access this page, ask your portal administrator.

    c. In your browser's address bar, highlight then copy the entire URL of the Pathways Browser Plug-in Enhanced UI search page.

        The URL should end with *enhanced.xhtml*.

2. Click **Preferences** in your browser's Pathways Browser Plug-in.

    The Preferences dialog box appears. It displays the information required for the Pathways Browser Plug-in to point to the Pathways server.

3. Click **Edit**.

The Edit Server Settings dialog box appears. It displays the URL of the Pathways Browser Plug-in Enhanced UI Search page.

4. Paste the URL that you copied in Step 1 into the Pathways URL field, then click **Next**.

5. Click **OK**.

The Preferences dialog box displays the updated information required for the Pathways Browser Plug-in to point to the changed updated URL of the Pathways server.

6. Click **OK**.

You are returned to your browser.

Changing the Default Configuration (Firefox)

To change the default configuration of the Pathways Browser Plug-in on Firefox:

1. Obtain the new URL to the Pathways Browser Plug-in Enhanced UI search page by performing the following:

   a. Log in to your BEA AquaLogic Interaction portal.

   b. Access the Pathways Browser Plug-in Enhanced UI search page.

      If you do not know how to access this page, ask your portal administrator.

   c. In your browser's address bar, highlight then copy the entire URL of the Pathways Browser Plug-in Enhanced UI search page.

      The URL should end with *enhanced.xhtml*.

2. Click **Preferences** in your browser's Pathways Browser Plug-in.

The Edit Server Settings dialog box appears. It displays the URL of the Pathways Browser Plug-in Enhanced UI Search page.

3. Paste the URL that you copied in Step 1 into the Pathways URL field, then click **Next**.

4. Click **OK**.

You are returned to your browser.
