# Novell SUSE LINUX Enterprise Server 8 on IBM zSeries/S390 with WebLogic Server 8.1 SP1

**Product Components Supported on this Configuration**

	WebLogic Server	WebLogic Workshop	WebLogic Integration	WebLogic Portal
Run-time	✓	✗	✗	✗
Design/Dev Tools*	✓	✗	✗	✗

\* For design and development tools support, see the "Configuration Requirements" section below.

✓ Supported

✗ Not supported

This section provides the following information:

- [Configuration Requirements](#)
- [Known Issues](#)
- [Download and Installation Instructions](#)

## Related Information

- For information about supported database configurations, Web servers, and browsers, plus support for interoperability tools and WebLogic Platform product support information, see [WebLogic Platform 8.1 Supported Configurations](#).
- For information about running Novell's SUSE LINUX Enterprise Server (SLES) 8 for IBM zSeries/S390, see:
  - <http://www.novell.com/linux/suse/index.html>
  - <http://www-1.ibm.com/servers/eserver/zseries/os/linux>

## Configuration Requirements

**Table 1-1 Requirements for WebLogic Server 8.1 SP1 on Novell SUSE LINUX Enterprise Server 8 on IBM zSeries/S390**

<b>Operating System Version and Patches</b>	Novell SUSE LINUX Enterprise Server (SLES) 8 for IBM zSeries/S390 31-bit with Kernel 2.4.19 or later, with SLES 8 SP2	
<b>Chip Architecture and Minimum Processor Speed</b>	IBM S/390 G5 or later models	
<b>SDK</b>	IBM JDK 1.4.1 SR1 Java™ 2 Runtime Environment, Standard Edition (build 1.4.1) Classic VM (build 1.4.1, J2RE 1.4.1 IBM build cx3901411-20030930 (JIT enabled: jtc))	
<b>Design and Development Tools</b>	Supports WebLogic Server development tools.	
<b>RAM</b>	512 MB required; 1 GB recommended	
<b>Performance Pack</b>	Included	lib/linux/s390/libmuxer.so
<b>Node Manager</b>	Included	Native
<b>BEA jDrivers for Oracle</b>	None	

## Known Issues

- The `setuid` function does not work with this SDK due to the way the current Linux thread model works. When you use ports lower than 1024, you cannot switch from root to a non-privileged user ID with the `setuid` function.
- The IIOP thin client is not supported due to dependencies on the JVM. Only thin-client applications are affected by this issue. To work around this limitation, use two configurations:

- Run WebLogic Server on SLES 8 for IBM zSeries/S390.
- Run your thin client on a different operating system configuration.

For more information about known issues with any components of this release, see the appropriate *Release Notes* document. For a complete list of *Release Notes* supporting WebLogic Platform 8.1, see:

<http://e-docs.bea.com/platform/docs70/interm/relnotes.html>

## Download and Installation Instructions

This section provides instructions for the following tasks:

- [Downloading and Installing the IBM Developer Kit for 31-bit zSeries \(S/390\)](#)
- [Downloading the WebLogic Server 8.1 SP1 Installer](#)
- [Installing WebLogic Server 8.1 SP1](#)

### Downloading and Installing the IBM Developer Kit for 31-bit zSeries (S/390)

Before you can install and run WebLogic Server 8.1 SP1 on your SuSE Linux ES 8 configuration, you must obtain an IBM Developer Kit for 31-bit zSeries (S/390) from IBM. To download this kit, complete the following procedure:

1. Go to the following IBM download registration site:  
<https://www6.software.ibm.com/dl/lxdk/lxdk-p>
2. Select “IBM SDK for 31-bit zSeries (S/390)...1.4.1 SR1.”
3. Register and accept the license agreement.  
The IBM Developer Kit for Linux, Java 2 Technology Edition for 31-bit zSeries (S/390) download page is displayed.
4. Follow the instructions displayed to download and install the SDK.
5. Set the `JAVA_HOME` environment variable to the directory in which IBM SDK 1.4.1 SR1 is installed, and export `JAVA_HOME`. For example:  

```
export JAVA_HOME=/opt/IBMJava2-s390-141
```
6. Make sure that your `PATH` variable includes `$JAVA_HOME/bin`. For example:  

```
export PATH=$JAVA_HOME/bin:$PATH:.
```

## Downloading the WebLogic Server 8.1 SP1 Installer

1. Go to the BEA download site:  
<http://commerce.bea.com/index.jsp>
1. Find your WebLogic Server release and Service Pack on the download page.
2. Select **SuSE Linux for IBM zSeries/S390**.
3. Download the WebLogic Server installer: `pj_server811_generic.jar`.
4. Download the supplemental JAR file called `zLinux811_supplemental.zip`.

## Installing WebLogic Server 8.1 SP1

1. Install WebLogic Server 8.1 SP1 by completing the console-mode installation procedure for `.jar` files available in *Installing WebLogic Platform at*  
<http://e-docs.bea.com/platform/docs81/install/console.html>:  

```
$ java -jar pj_server811_generic.jar -mode=console
```
2. Copy the `zLinux811_supplemental.zip` file to `$WL_HOME/server/lib`.
3. Change to the directory `$WL_HOME/server/lib`  

```
$ cd $WL_HOME/server/lib
```
4. Extract the `zLinux811_supplemental.jar` file and `zLinux811_libraries.jar` from the `zLinux811_supplemental.zip` to `$WL_HOME/server/lib`.  

```
$ jar -xvf zLinux811_supplemental.zip
```
5. Remove old plug-in objects from the `$WL_HOME/server/lib/linux/s390` library:  

```
$ rm linux/s390/*
```
6. Extract the `zLinux811_libraries.jar` file to `$WL_HOME/server/lib`:  

```
$ jar -xvf zLinux811_libraries.jar
```
7. Open the `$WL_HOME/common/bin/commEnv.sh` script in a text editor, and prepend the `zLinux811_supplemental.jar` to the classpath by doing the following:
  - a. Find the following text:  

```
WEBLOGIC_CLASSPATH="{JAVA_HOME}/lib/tools.jar{CLASSPATHSEP} \  
{WL_HOME}/server/lib/weblogic_sp.jar{CLASSPATHSEP} \  
"
```

## Download and Installation Instructions

```
${WL_HOME}/server/lib/weblogic.jar${CLASSPATHSEP} \  
${WL_HOME}/server/lib/ojdbc14.jar"
```

- b. Replace it with:

```
WEBLOGIC_CLASSPATH="${JAVA_HOME}/lib/tools.jar \  
${WL_HOME}/server/lib/zLinux811_supplemental.jar ${CLASSPATHSEP} \  
${WL_HOME}/server/lib/weblogic_sp.jar${CLASSPATHSEP} \  
${WL_HOME}/server/lib/weblogic.jar${CLASSPATHSEP} \  
${WL_HOME}/server/lib/ojdbc14.jar"
```
