This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications which may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

Oracle is a registered trademark of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Preface

This document, which is part of the Program Documentation under the terms of your Oracle licensing agreement, is intended to help you understand the features, functionality, and options available for Oracle Programs. If you have a question about your licensing needs, please contact your Oracle sales representative or refer to the resources listed in [Related Documents](#) on page -vi for more information.

Audience

This book is intended for all purchasers of Oracle Audit Vault.

Documentation Accessibility

Our goal is to make Oracle products, services, and supporting documentation accessible to all users, including users that are disabled. To that end, our documentation includes features that make information available to users of assistive technology. This documentation is available in HTML format, and contains markup to facilitate access by the disabled community. Accessibility standards will continue to evolve over time, and Oracle is actively engaged with other market-leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers. For more information, visit the Oracle Accessibility Program Web site at <http://www.oracle.com/accessibility/>.

Accessibility of Code Examples in Documentation

Screen readers may not always correctly read the code examples in this document. The conventions for writing code require that closing braces should appear on an otherwise empty line; however, some screen readers may not always read a line of text that consists solely of a bracket or brace.

Accessibility of Links to External Web Sites in Documentation

This documentation may contain links to Web sites of other companies or organizations that Oracle does not own or control. Oracle neither evaluates nor makes any representations regarding the accessibility of these Web sites.

TTY Access to Oracle Support Services

To reach AT&T Customer Assistants, dial 711 or 1.800.855.2880. An AT&T Customer Assistant will relay information between the customer and Oracle Support Services at 1.800.223.1711. Complete instructions for using the AT&T relay services are available at <http://www.consumer.att.com/relay/tty/standard2.html>. After the AT&T Customer Assistant contacts Oracle Support Services, an Oracle Support

Services engineer will handle technical issues and provide customer support according to the Oracle service request process.

Related Documents

For more information, see the following documents in the Oracle Audit Vault Release 10.2.2 documentation set (see also the platform specific Audit Vault Server installation guides) or in the Oracle Database Release 10g (10.2) documentation set:

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>monospace</code>	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Oracle Audit Vault

Auditing plays an increasingly important role in the areas of compliance, privacy, and security. Satisfying compliance regulations such as Sarbanes-Oxley and mitigating the risks associated with the insider threat are among the top security challenges businesses face today. The use of audit data as a security resource remains very much a manual process, requiring IT security and audit personnel to first collect the audit data, and then sift through enormous amounts of dispersed audit data using custom scripts and other methods.

Oracle Audit Vault is a powerful enterprisewide solution that efficiently consolidates, detects, monitors, alerts, and reports on audit data for security auditing and compliance. Oracle Audit Vault provides the mechanisms to collect audit data generated by Oracle9i Database Release 2, Oracle Database 10g Release 1, Oracle Database 10g Release 2, Oracle Database 11g Release 1, and forward.

1.1 Introducing Oracle Audit Vault

Oracle Audit Vault is comprised of two components that are licensed separately. They are:

- Oracle Audit Vault Server – The Audit Vault Server is comprised of a repository, Oracle Audit Vault Console, and the Oracle Audit Vault application that consolidates and secures the audit trail data for centralized reporting and alerting.
- Oracle Audit Vault collection agent – The Audit Vault collection agent manages the movement of audit trail data from audit sources to the Audit Vault Server.

1.2 Special-Use Licensing

Oracle Audit Vault is a complete stacked application. As part of the Oracle Audit Vault installation, Oracle Database 10g Release 2 (10.2.0.3) with the Database partitioning, Oracle Advanced Security, and Oracle Database Vault options is installed. The stacked application, database, installed options, and Oracle Audit Vault components may not be used or deployed for other purposes.

Oracle Application Server Containers for J2EE (OC4J) is included with Oracle Audit Vault. This embedded version is provided solely to support Oracle Enterprise Manager (Database), Advanced Queuing Servlet, Audit Vault Console, and may not be used or deployed for other purposes.

The Oracle Audit Vault home software use is restricted to support the Oracle Audit Vault database repository and no other databases created using the Oracle Audit Vault executables are supported.

Oracle Real Application Clusters and Oracle Data Guard may be licensed separately to use in conjunction with Oracle Audit Vault.

Third-Party Licenses

See *Oracle Database Licensing Information* for third-party licensing information. Oracle Audit Vault Release 10.2.3 licensing information is identical with this third-party licensing information for Oracle Database 10g Release 2 (10.2).
