The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Oracle and MetaSolv are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

About this guide

The Huawei Cartridge Guide provides detailed technical information about the IP Service Activator Huawei cartridge, including supported features, device configuration information and a sample device configuration.

Audience

This guide is intended for network managers and technical consultants responsible for implementing Oracle Communications IP Service Activator within a network using Huawei routers.

Before contacting Oracle Global Customer Support (GCS)

If you have an issue or question, Oracle recommends reviewing the product documentation and articles on MetaLink in the Top Technical Documents section to see if you can find a solution. MetaLink is located at <http://metalink.oracle.com>.

In addition to MetaLink, product documentation can also be found on the product CDs and in the product set on Oracle E-Delivery.

Within the product documentation, the following publications may contain problem resolutions, work-arounds and troubleshooting information:

- Release Notes
- Oracle Installation and User's Guide
- README files

Contacting Oracle Global Customer Support (GCS)

You can submit, update, and review service requests (SRs) of all severities on MetaLink, which is available 24 hours a day, 7 days a week. For technical issues of an urgent nature, you may call Oracle Global Customer Support (GCS) directly.

Oracle prefers that you use MetaLink to log your SR electronically, but if you need to contact GCS by telephone regarding a new SR, a support engineer will take down the information about your technical issue and then assign the SR to a technical engineer. A technical support representative for the Oracle and/or former Oracle Communications products will then contact you.

Note that logging a new SR in a language other than English is only supported during your local country business hours. Outside of your local country business hours, technical issues are

supported in English only. All SRs not logged in English outside of your local country business hours will be received the next business day. In order to obtain the broadest access to skilled technical support, Oracle advises you to log new SRs in English.

Oracle GCS can be reached locally in each country. Refer to the Oracle website for the support contact information in your country. The Oracle support website is located at <http://www.oracle.com/support/contact.html>.

Accessing Oracle products

This section contains information on downloading Oracle products and documentation.

Downloading products and documentation

To download the Oracle and/or former MetaSolv products and documentation, go to the Oracle eDelivery site, located at:

<http://edelivery.oracle.com>

You can purchase a hard copy of Oracle product documentation on the Oracle store site, located at:

<http://oraclestore.oracle.com>

For a complete selection of Oracle documentation, go to the Oracle documentation site, located at:

<http://www.oracle.com/technology/documentation>

Downloading a media pack

To download a media pack from the Oracle E-Delivery website

1. Go to <http://edelivery.oracle.com>
2. Select the appropriate language and click **Continue**.
3. Enter the appropriate **Export Validation information**, accept the license agreements and click **Continue**.
4. For Product Pack, select **Oracle Communications Applications**.
5. For Platform, select the appropriate platform for your installation.
6. Click **Go**.
7. Select the appropriate media pack and click **Continue**.
8. Click **Download** for the items you wish to download.
9. Follow the installation documentation for each component you wish to install.

IP Service Activator publications

The IP Service Activator documentation suite includes a full range of publications. Refer to *IP Service Activator Release Notes* for more information.

Cartridge Overview

Oracle Communications IP Service Activator cartridges enable you to quickly, cost-effectively, and seamlessly support your existing services, and also continuously evolve to support emerging services and business needs. The cartridges operate in conjunction with IP Service Activator core product. These cartridges offer the following benefits:

- **Reduced Time to Market**—time to market of new services is reduced through simplified development, implementation, and extension of cartridges on customer sites.
- **Extendable**—cartridges can be extended to include additional services and components that deliver business value, without requiring changes to the original cartridge.
- **Simplified Effort**—the effort and technical knowledge that is required to perform customizations is reduced.
- **Ease of Installation**—cartridges can be installed without interfering with the existing IP Service Activator install base.

Features

This chapter outlines IP Service Activator support of Huawei devices. The IP Service Activator supported features are listed in the following tables.

Legend

Feature support is indicated in each table, according to the following legend:

Icon	Definition
●	Supported
◐	Partially supported
○	Not supported

General IP Service Activator features

IP Service Activator Feature	Huawei VRP Cartridge - CU1	Huawei VRP Cartridge - CU2	Huawei VRP Cartridge - CU3
Configuration Protocol Support			
Telnet	●	●	●
SSH	●	●	●
SNMP	○	○	○
Vendor Proprietary	○	○	○
Device Discovery

Unsupported features

The following features are not currently supported with the IP Service Activator Huawei Cartridge:

- VLAN
- VPLS
- Layer 2 QoS
- Service Assurance
- Netflow
- DU VPN
- VRF-aware IPSec

- VRF and IP Multicast
- VRF Route Maps
- Interface Configuration Management
- Base Configuration Policies

Huawei hardware and software

Refer to the IP Service Activator *Release Notes* for complete information on the Huawei platforms supported with the Huawei cartridge.

Operating systems

Refer to the *Release Notes* for complete information about supported operating systems for the Huawei cartridge.

Installing the Cartridge

Refer to the Oracle Communications IP Service Activator *Setup Guide* for the cartridge installation and uninstallation procedures.

Device Configuration

Supported authentication methods

The supported authentication methods are listed in the following table as an example.

Device Access		All Devices
Telnet	TACACS+	✓
	None	
SSH	SSH	

Manual pre-configuration

To configure the necessary functionality on the device, refer to Huawei documentation – go to <http://support.huawei.com/support/> and click on the **Documentation** link.

Sample configuration

The following is a sample Huawei cartridge configuration.

```
#
ip vpn-instance IPSA_1:1242
