License Restrictions & Warranty Disclaimer

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

Restricted Rights Notice

U.S. GOVERNMENT RIGHTS

Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Third Party Web Sites, Content, Products, and Services Disclaimer

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

Trademark Notice

Oracle, JD Edwards, and PeopleSoft are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

Oracle Insurance Rules Palette Release Notes

The Oracle Insurance Rules Palette is a standalone application that can be used in conjunction with Oracle Insurance Policy Administration. The Rules Palette provides straightforward functionality that assists with configuration tasks. The Rules Palette mitigates the need to know XML and features user-friendly visual configuration tools.

These release notes contain the enhancements and fixes that were made to the Oracle Insurance Rules Palette Release 9.0.1.0.0, 2009.

Customer Support

Fixes in the Oracle Insurance Rules Palette

This section describes fixes that were made to the Oracle Insurance Rules Palette Release 9.0.1.0.0.

Events

- When XML is deleted for Action and Events pane it is now also removed from the XML Source.
- When the Global check box is checked in the New Math Section wizard, the XML is written as GLOBAL="Yes" rather than GLOBAL="YES".
- Updates to the ScreenMath MathVariable Name, DataType and Value are now saving correctly to the XML Source.

Explorer Tabs

- The "AS" was removed from all explorer tab names. The names display as Admin Explorer, XML Navigator, Main Explorer and Global Explorer.

Log-in

- User can access the Admin Explorer when logging into a non-IVS environment.

Market Maker

- Validation was added to ensure that each Market Maker name is unique.
- The error messages are now clearing. These messages appear when a user fails to enter a Market Maker name during creation.

Release Management

- Users can create empty configuration packages for non-IVS palette items.
- Release packages and migration sets are organized by status in the Admin Explorer.
- Configuration Packages now can include updated Segments.
- TransactionBusinessRulePacket is now automatically added to configuration package in Release Management. It is also versioned.
- Progress bar when deploying a Release Package is now functional.

Memory Management

- Enhancement to improve memory management.

Security

- Asterisks will display in the password field in Security Administration instead of a blank field. This allows the user to see that a password has been entered and allows the user to verify the password length.
- When a security role with assigned users is deleted, the users assigned to that role will have Read Only access the next time they log-in.

Segments

- Users can visually edit Onload and Onchange in segments, plan rules and copybooks.

Transactions

- The right-click menu is functional on the Assignment tab.
- The status in the New Transaction wizard has a default value of Active.

Uncommitted Rules Wizard

- Uncommitted Rules Wizard now includes Admin Items and Security Groups.

Web Application Utility

- Entry fields were updated so that fields match the database type chosen by the user. Oracle database entry requires SID. DB2 database entry requires database and schema name. SQL database requires database name.
