

Oracle® Primavera P6™ Tested Configurations

Release Version: 7.0

Date: November 2014

Revision: 7.0.0.0.16

This document lists the configurations that have been tested for the Oracle Primavera P6 version 7.0 release.

Notes

P6 Suite, as listed in this document, refers to the following components offered in the Primavera P6 Enterprise Project Portfolio Management media pack:

- Project Management module
- Methodology Management module
- P6 Web Access
- P6 Progress Reporter
- P6 Integration API
- P6 Web Services
- P6 Reporting Database R1 and R2 (R1 applies to all platforms except HP-UX)
- P6 Analytics R1

The P6 product suite is supported on VMware.

In general, the P6 product suite is compatible with configurations supported by third party vendors.

The Business edition of Windows Vista and the Professional edition of Windows 7 were used during testing. Other editions were not tested but should be fully compatible with P6, with the exception of the Home edition.

For all Java Application Servers, a 64-bit JDK/JVM (Java Virtual Machine) is required for all 64-bit Platforms.

Except where noted, all configurations were tested with English as the operating system locale and input language.

For information on tested configurations for Contract Management, see the Contract Management Tested Configurations document (Tested_Configurations.htm in the Documentation folder of the Contract Management physical media or download).

For more information on tested configurations for the Primavera Integration API, see the *Oracle Primavera P6 Integration API Administrator's Guide* (located in \Documentation\<language>\Primavera Documentation Center.pdf of the P6 physical media or download).

* P6 now supports JRE 1.6.0_35 using Patch 15910202 or the latest patch available for P6.
