Version 9.2.0.0.0

Part number: 16287_01

December 2009

Copyright © 2009, Oracle and/or its affiliates. All rights reserved.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS

Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are “commercial computer software” or “commercial technical data” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

Oracle is a registered trademark of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Where an Oracle offering includes third party content or software, we may be required to include related notices. For information on third party notices and the software and related documentation in connection with which they need to be included, please contact the attorney from the Development and Strategic Initiatives Legal Group that supports the development team for the Oracle offering. Contact information can be found on the Attorney Contact Chart.

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your beta trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described in this document remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Software License and Service Agreement, which has been executed and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Oracle Insurance Rules Palette Release Notes

The Oracle Insurance Rules Palette is a standalone application that can be used in conjunction with Oracle Insurance Policy Administration. The Rules Palette provides straightforward functionality that assists with configuration tasks. The Rules Palette mitigates the need to know XML and features user-friendly visual configuration tools.

These release notes contain the enhancements that were made to the Oracle Insurance Rules Palette release 9.2.0.0.0, 2009.

Enhancements in the Oracle Insurance Rules Palette

This section describes enhancements that were made to the Oracle Insurance Rules Palette release 9.2.0.0.0.

Error Catalog

- The Error Catalog in the Admin Explorer was revised to make it consistent in appearance with other Administration Editors.

Internationalization

- Currency displays can now be set at the Activity level, Plan level or Company level. You can also specify a default currency at the Fund level.
- Math supports a look-up of the currency code of a particular field.
- A calendar offset was added to allow OIPA to calculate the correct price dates on money movement in international unit based funds. Each calendar code will have a different offset based on the time zones associated to the exchange markets and the designated timing of the trade report.

Transactions

- The second step of the New Transaction Wizard has a new combo box called NAV Correction. Financial transactions need this indicator to be set to YES in order to participate in price corrections in OIPA.
- The Transaction Fields pane now has a vertical scroll bar to make it easier for the user to view fields when multiple fields are added.

Version History

- The version history node under a transaction or business rule now displays the version number of the rule, the date the version was saved and the user who saved the modification.

Web Services

- The PAS Properties Web Service is exposed to allow an external application to retrieve all property values from the PAS.properties configuration file.
