- Unused and unnecessary files have been removed.

- Message box handling has been reworked.
- The regular expression libraries have been modified to align with Oracle release guidelines.
- Data encryption has been modified to align with Oracle release guidelines.

Installation Instructions

Note: These releases are MSIs and are the base installations for all products in Oracle Enterprise Single Sign-on Suite Plus version 11.1.1.2.0. To upgrade to future versions of Oracle Enterprise Single Sign-on Suite Plus, you must install these MSIs first.

To help ensure a satisfactory installation of these releases:

1. Review the hardware and software requirements, listed in the Gold version Release Notes of each product, available [in the Oracle documentation center](#).
2. Read these release notes entirely.
3. If this is an upgrade installation, back up all data. Oracle strongly recommends that you back up data prior to the installation of any software.
4. Close all Oracle software.
5. Download and run the product's MSI.

Refer to each Oracle Enterprise Single Sign-on Suite Plus product's *Installation and Setup Guide* for complete installation instructions. The full document suite for each product is available in the Documentation folder [in the Oracle documentation center](#).
