Action: Ensure that the connection exists and is still valid.

OCI-21523: functionality not supported by the server (object mode only)

Cause: User attempted to use a functionality that the server does not support.

Action: Upgrade the server.

OCI-21524: object type mismatch

Cause: The object type of the object is different from what is specified.

Action: Check the type of the object and correct it.

OCI-21525: attribute number (or collection element at index) string violated its constraints

Cause: Attribute value or collection element value violated its constraint.

Action: Change the value of the attribute or collection element such that it meets its constraints. The constraints are specified as part of the attribute or collection element's schema information.

OCI-21526: initialization failed

Cause: The initialization sequence failed. This can happen, for example, if an environment variable such as NLS_DATE_FORMAT is set to an invalid value.
Action: Check that all NLS environment variables are well-formed.

OCI-21527: internal OMS driver error
Cause: A process has encountered an exceptional condition. This is the generic internal error number for Oracle object management services exceptions.
Action: Report this as a bug to Oracle Support Services.

OCI-21560: argument string is null, invalid, or out of range
Cause: The argument is expecting a non-null, valid value but the argument value passed in is null, invalid, or out of range. Examples include when the LOB/FILE positional or size argument has a value outside the range 1 through (4GB - 1), or when an invalid open mode is used to open a file, etc.
Action: Check your program and correct the caller of the routine to not pass a null, invalid or out-of-range argument value.

OCI-21562: column string has unsupported data type string
Cause: A data type was specified which is currently unsupported.
Action: Choose another data type which is supported.

OCI-21563: Error string while calling string for column string with datatype string
Cause: OCI Error encountered while performing data type conversion.
Action: Check the OCI Error code

OCI-21570: current string LCR has unreceived chunk data
Cause: The client did not receive all the chunk data for the current LCR.
Action: If OCIXStreamOutLCRCallbackReceive is used in your program then modify your callback functions to return OCI_CONTINUE while OCI_XSTREAM_MORE_ROW_DATA flag is set; otherwise, modify your program to call OCIXStreamOutChunkReceive until all the chunks are received (that is, the flag returned by OCIXStreamOutChunkReceive API does not have OCI_XSTREAM_MORE_ROW_DATA bit set).

OCI-21571: must provide a LOB WRITE, LOB TRIM or LOB ERASE LCR in string call (input LCR=string)
Cause: An attempt was made to invoke the specified function without providing a piece-wise LOB LCR (for example, LOB WRITE, LOB TRIM or LOB ERASE LCR).
Action: Correct the ‘row_lcrp’ argument in the call.

OCI-21573: Invalid command type (string) when sending a chunk.
Cause: An attempt was made to send a chunk when the command type for the current LCR was not INSERT, UPDATE, or LOB WRITE.
Action: Check your program and provide an LCR with a valid command type to OCIXStreamInChunkSend call or to OCICallbackXStreamInChunkCreate callback.

OCI-21574: Invalid data type (string) specified for LOB chunk.
Cause: Invalid data type specified for LOB chunk in OCIXStreamInChunkSend call.
Action: Check your program and provide either SQLT_CHR or SQLT_BIN for ‘coldty’ argument to OCIXStreamInChunkSend call.

OCI-21577: Input string LCR has no LOB column.
Cause: An attempt was made to invoke OCILCRLobInfoGet call with an LCR that had no LOB column.
Action: Replace the input LCR to OCILCRLobInfoGet call.

OCI-21578: Only one LOB column allowed per string LCR.
Cause: An attempt was made to set multiple LOB columns on a piece-wise LOB LCR.
Action: Check your program and make sure OCIXStreamInChunkSend is called for only one column per piece-wise LOB LCR.

OCI-21579: Input LCR must have at least one old or new column.
Cause: An attempt was made to call OCIXStreamInChunkSend with an LCR that had empty column lists.
Action: Use OCILCRRowColumnInfoSet to add one or more columns to the input LCR before calling OCIXStreamInChunkSend.

OCI-21580: The LOB operation length (value=string) for column (string) must be an even number of bytes.
Cause: An attempt was made to call OCIXStreamInChunkSend with an odd number of bytes for a column flagged as AL16UTF16 or NCLOB.
Action: Correct either the LOB column length or 'column_flag' argument to OCIXStreamInChunkSend call.

OCI-21583: invalid XStream server name 'string'
Cause: An attempt was made to attach to an XStream server with a nonexistent server name.
Action: Correct the server name in the attach call.

OCI-21600: path expression too long
Cause: The path expression that is supplied by the user is too long. The path expression is used to specify the position of an attribute in an object. This error occurs when one of the intermediate elements in the path expression refers to an attribute of a built-in type. Thus, the OCI function cannot proceed on to process the rest of the elements in the path expression.
Action: User should pass in the correct path expression to locate the attribute.

OCI-21601: attribute is not an object
Cause: The user attempts to perform an operation (that is valid only for an object) to an attribute of a built-in type. An example of such an illegal operation is to dynamically set a null structure to an attribute of a built-in type.
Action: User should avoid performing such operation to an attribute of built-in type.

OCI-21602: operation does not support the specified typecode
Cause: The user attempts to perform an operation that does not support the specified typecode.
Action: User should use the range of valid typecodes that are supported by this operation.

OCI-21603: property id [string] is invalid
Cause: The specified property id is invalid.
Action: User should specify a valid property id. Valid property ids are enumerated by OCIObjectPropId.

OCI-21604: property [string] is not a property of transient or value instances
Cause: Trying to get a property which applies only to persistent objects.
Action: User should check the lifetime and only get this property for persistent objects.

OCI-21605: property [string] is not a property of value instances
Cause: Trying to get a property which applies only to persistent and transient objects.
Action: User should check the lifetime and only get this property for persistent and transient objects.

OCI-21606: can not free this object
Cause: Trying to free an object that is persistent and dirty and the OCI_OBJECTFREE_FORCE flag is not specified.
Action: Either flush the persistent object or set the flag to OCI_OBJECTFREE_FORCE

OCI-21607: memory cartridge service handle not initialized
Cause: Attempt to use the handle without initializing it.
Action: Initialize the memory cartridge service handle.

OCI-21608: duration is invalid for this function
Cause: Attempt to use a duration not valid for this function.
Action: Use a valid duration - a previously created user duration or OCI_DURATION_STATEMENT or OCI_DURATION_SESSION. For callout duration or external procedure duration, use OCIExtProcAllocCallMemory.

OCI-21609: memory being resized without being allocated first
Cause: Attempt to resize memory without allocating it first.
Action: Allocate the memory first before resizing it.

OCI-21610: size [string] is invalid
Cause: Attempt to resize memory with invalid size.
Action: Pass in a valid size (must be a positive integer).

OCI-21611: key length [string] is invalid
Cause: Attempt to use an invalid key length.
Action: Key length is invalid and valid range is 0 to 64

OCI-21612: key is already being used
Cause: Attempt to use a key that is already used.
Action: Use a new key that is not yet being used.

OCI-21613: key does not exist
Cause: Attempt to use a non-existent key
Action: Use a key that already exists.

OCI-21700: object does not exist or is marked for delete
Cause: User attempted to perform an inappropriate operation to an object that is non-existent or marked for delete. Operations such as pinning, deleting and updating cannot be applied to an object that is non-existent or marked for delete.

Action: User needs to re-initialize the reference to reference an existent object or the user needs to unmark the object.

OCI-21701: attempt to flush objects to different servers

Cause: User attempted to flush objects to different servers in one function call. These objects are obtained by calling a callback functions provided by the program.

Action: User should avoid performing such operation.

OCI-21702: object is not instantiated or has been de-instantiated in cache

Cause: User attempted to perform an inappropriate operation to a transient object that is not instantiated in the object cache. Operations that cannot be applied to a not-instantiated transient object include deleting or pinning such an object.

Action: User should check their code to see if they are performing such an operation without instantiating the object first, or performing such an operation after the allocation duration of the object has expired.

OCI-21703: cannot flush an object that is not modified

Cause: See the error message.

Action: The object should not be flushed.

OCI-21704: cannot terminate cache or connection without flushing first

Cause: See the error message.

Action: The transaction should be aborted or committed before terminating the cache or connection.

OCI-21705: service context is invalid

Cause: The service context that is supplied by the user is not valid.

Action: User needs to establish the service context.

OCI-21706: duration does not exist or is invalid

Cause: The duration number that is supplied by the user is not valid.

Action: User needs to establish the duration or use a correct predefined duration.

OCI-21707: pin duration is longer than allocation duration

Cause: The pin duration supplied by the user is longer than the allocation duration. This affects operations such as pinning and setting default parameters.

Action: User should use a shorter pin duration or use the null duration.

OCI-21708: inappropriate operation on a transient object

Cause: User attempted to perform an inappropriate operation on a transient object. Operations that cannot be applied to a transient object include flushing and locking.

Action: User should avoid performing such operation on a transient object.

OCI-21709: cannot refresh an object that has been modified

Cause: User attempted to refresh an object that has been marked for delete, update or insert (new).

Action: User should unmark the object before refreshing it.
OCI-21710: argument is expecting a valid memory address of an object
  Cause: The object memory address that is supplied by the user is invalid. The user may have passed in a bad memory address to a function that is expecting a valid memory address of an object.
  Action: User should pass in a valid memory address of an object to the function.

OCI-21779: duration not active
  Cause: User is trying to use a duration that has been terminated.
  Action: User should avoid performing such operation.

OCI-22053: overflow error
  Cause: This operation's result is above the range of Oracle number.
  Action: Decrease the input value(s) so that the result is in the range of Oracle number.

OCI-22054: underflow error
  Cause: This operation's result is below the range of Oracle number.
  Action: Increase the input value(s) so that the result is in the range of Oracle number.

OCI-22055: unknown sign flag value [string]
  Cause: Signed flag used is not OCI_NUMBER_SIGNED or OCI_NUMBER_UNSIGNED.
  Action: Use either OCI_NUMBER_SIGNED or OCI_NUMBER_UNSIGNED as sign flag.

OCI-22056: value [string] is divided by zero
  Cause: Given value is divided by zero.
  Action: Modify divisor value to be non-zero.

OCI-22057: bad integer length [string]
  Cause: The length of the integer (ie number of bytes) to be converted to or from an Oracle number is invalid.
  Action: Use integer length 1, 2, 4 or 8 bytes only.

OCI-22059: buffer size [string] is too small - [string] is needed
  Cause: The buffer to hold the resulting text string is too small.
  Action: Provide a buffer of the required size.

OCI-22060: argument [string] is an invalid or uninitialized number
  Cause: An invalid or uninitialized number is passed in.
  Action: Use a valid number. To initialize number call OCINumberSetZero().

OCI-22061: invalid format text [string]
  Cause: The numeric format string for converting characters to or from an Oracle number is invalid.
  Action: Use valid format string as documented in OCI Programmer's Guide.

OCI-22062: invalid input string [string]
  Cause: The text string for converting to numbers is invalid.
  Action: Use a valid input string as documented in OCI Programmer's Guide.
OCI-22063: reading negative value [string] as unsigned
  Cause: Attempt to convert a negative number to an unsigned integer.
  Action: Use the sign flag ORLTSB to convert a signed number.

OCI-22064: invalid NLS parameter string [string]
  Cause: The NLS parameter string for converting characters to or from an Oracle number is invalid.
  Action: Use valid format string as documented in OCI Programmer's Guide.

OCI-22065: number to text translation for the given format causes overflow
  Cause: Rounding done due to the given string format causes overflow.
  Action: Change the format such that overflow does not occur.

OCI-22130: buffer size [string] is less than the required size [string]
  Cause: The size of the buffer into which the hexadecimal REF string is to be written is too small.
  Action: Provide a buffer of the required size.

OCI-22131: hexadecimal string length is zero
  Cause: The given hexadecimal string length must be greater than zero.
  Action: Specify a length greater than zero.

OCI-22132: hexadecimal string does not correspond to a valid REF
  Cause: The given hexadecimal string is invalid.
  Action: Provide a valid hexadecimal string which was previously returned by a call to OCIRefToHex().

OCI-22140: given size [string] must be in the range of 0 to [string]
  Cause: The given resize size is invalid.
  Action: Ensure that the given size is in the required range.

OCI-22141: given size [string] must be even in UTF-16 environment
  Cause: The given resize size is odd. In a UTF-16 environment, all characters are 2 bytes in length.
  Action: Ensure that the given size is even.

OCI-22150: variable-length array has not been initialized
  Cause: An un-initialized variable-length array is being operated upon.
  Action: Initialize the variable-length array prior to calling this function.

OCI-22151: cannot resize non-zero variable-length array to zero elements
  Cause: Trying to resize a non-zero variable-length array to 0 elements.
  Action: Specify a non-zero size.

OCI-22152: destination variable-length array is not initialized
  Cause: The variable-length array on the right-hand-side of an assignment or the destination array of an append is not initialized.
  Action: Initialize the destination variable-length array prior to calling this function.

OCI-22153: source variable-length array is not initialized
Cause: The variable-length array on the left-hand-side of an assignment or the source array of an append is not initialized.
Action: Initialize the destination variable-length array prior to calling this function.

OCI-22160: element at index [string] does not exist
Cause: Collection element at the given index does not exist.
Action: Specify the index of an element which exists.

OCI-22161: type code [string] is not valid
Cause: Given type code is not valid.
Action: Use one of the typecodes enumerated in OCITypeCode.

OCI-22162: element at index [string] has been previously deleted
Cause: Trying to delete a non-existent collection element.
Action: Check for the existence of the element prior to calling this function.

OCI-22163: left hand and right hand side collections are not of same type
Cause: Left hand and right side collections are not of same type.
Action: Ensure that the same collection type is passed for both left hand and right hand side of this function.

OCI-22164: delete element operation is not allowed for variable-length array
Cause: Trying to delete an element of a variable-length array.
Action: Ensure that the collection is not a variable-length array prior to calling this function.

OCI-22165: given index [string] must be in the range of [string] to [string]
Cause: Given index is not in the required range.
Action: Ensure that the given index is in the required range.

OCI-22166: collection is empty
Cause: Given collection is empty.
Action: Test if collection is empty prior to invoking this function.

OCI-22167: given trim size [string] must be less than or equal to [string]
Cause: Given trim size is greater than the current collection size.
Action: Ensure that the given size is less than or equal to the collection size prior to calling this function.

OCI-22275: invalid LOB locator specified
Cause: There are several causes: (1) the LOB locator was never initialized; (2) the locator is for a BFILE and the routine expects a BLOB/CLOB/NCLOB locator; (3) the locator is for a BLOB/CLOB/NCLOB and the routine expects a BFILE locator; (4) trying to update the LOB in a trigger body -- LOBs in trigger bodies are read only.
Action: For (1), initialize the LOB locator by selecting into the locator variable or by setting the LOB locator to empty. For (2) and (3), pass the correct type of locator into the routine. For (4), remove the trigger body code that updates the LOB value.

OCI-22276: invalid locator for LOB buffering
Cause: There are several causes: (1) the locator was never enabled for buffering (2) it is not an updated locator but is being used for a write/flush operation

Action: For (1) enable the locator for buffering; (2) ensure that only an updated locator is used for a LOB update operation

OCI-22277: cannot use two different locators to modify the same LOB

Cause: LOB buffering is enabled and an attempt was made to modify the LOB using two different LOB locators.

Action: When using LOB buffering, modify the LOB through one LOB locator only.

OCI-22278: must update the LOB only through the LOB buffers

Cause: LOB buffering is enabled for this LOB and there are buffers for this LOB in the buffer pool. Thus, updating the LOB through means other than the LOB buffers is not allowed.

Action: Update the LOB through the LOB buffers using the locator that has LOB buffering enabled. If this operation is required, buffers associated with this LOB should either be flushed as necessary or buffering should be disabled. Once this is done, reissue the command.

OCI-22279: cannot perform operation with LOB buffering enabled

Cause: The operation attempted is not allowed when LOB buffering is enabled.

Action: If the operation is required, LOB buffering should not be used. In this case, flush buffers associated with the input LOB locator as necessary, disable buffering on the input LOB locator and reissue the command.

OCI-22280: no more buffers available for operation

Cause: There are two causes: (1) All buffers in the buffer pool have been used up by previous operations (2) Attempt to flush a LOB without any previous buffered update operations.

Action: For (1), flush the LOB(s) through the locator that is being used to update the LOB. For (2), write to the LOB through a locator enabled for buffering before attempting to flush buffers.

OCI-22281: cannot perform operation with an updated locator

Cause: The input locator has buffering enabled and was used to update the LOB value through the LOB buffering subsystem. The modified buffer has not been flushed since the write that was performed by the input locator; thus, the input locator is considered an updated locator. Updated locators cannot be the source of a copy operation. Only one locator per LOB may be used to modify the LOB value through the LOB buffering subsystem.

Action: Depending on whether the modifications made through the input locator to the LOB buffering subsystem should be written to the server, either flush the buffer to write the modifications, or, disable buffering on the locator to discard the modifications. Then, reissue the command.

OCI-22282: non-contiguous append to a buffering enabled LOB not allowed

Cause: The buffered write operation has an input offset value more than one byte or character past the end of the LOB.

Action: Specify an input offset value which is exactly one character or byte greater than the length of the LOB that you are attempting to update through a buffered write operation.
OCI-22285: non-existent directory or file for *string* operation
  
  **Cause:** Attempted to access a directory that does not exist, or attempted to access a file in a directory that does not exist.
  
  **Action:** Ensure that a system object corresponding to the specified directory exists in the database dictionary, or make sure the name is correct.

OCI-22286: insufficient privileges on directory or file to perform *string* operation
  
  **Cause:** The user does not have the necessary access privileges on the directory alias and/or the file for the operation.
  
  **Action:** Ask the database/system administrator to grant the required privileges on the directory alias and/or the file.

OCI-22287: invalid or modified directory occurred during *string* operation
  
  **Cause:** The directory alias used for the current operation is not valid if being accessed for the first time, or has been modified by the DBA since the last access.
  
  **Action:** If you are accessing this directory for the first time, provide a valid directory name. If you have been already successful in opening a file under this directory before this error occurred, then close the file and retry the operation with a valid directory alias as modified by your DBA. Oracle recommends that directories should be modified only during quiescent periods.

OCI-22288: file operation *string* failed *string*
  
  **Cause:** The operation attempted on the file failed.
  
  **Action:** See the next error message for more detailed information. Also, verify that the file exists and that the necessary privileges are set for the specified operation. If the error still persists, report the error to the DBA.

OCI-22289: cannot perform *string* operation on an unopened file
  
  **Cause:** The file is not open for the required operation to be performed.
  
  **Action:** Check that the current operation is preceded by a successful file open operation.

OCI-22290: operation would exceed the maximum number of opened files
  
  **Cause:** The number of open files has reached the maximum limit.
  
  **Action:** Close some of the opened files and retry the operation.

OCI-22303: type "*string*"."*string*" not found
  
  **Cause:** The user is trying to obtain information for a type that cannot be found.
  
  **Action:** Check that the schema is correct and that the type has been created correctly.

OCI-22305: attribute/method/parameter "*string*" not found
  
  **Cause:** Type element with the given name is not found in the type.
  
  **Action:** Check to make sure that the type element exists.

OCI-22306: type "*string*"."*string*" already exists
  
  **Cause:** The user is trying to create a type that already exists.
  
  **Action:** Check to make sure that the type has not been created prior to this.

OCI-22307: type to alter is not a user-defined type
  
  **Cause:** The user is trying to alter a built-in type.
  
  **Action:** Check to make sure that only user-defined types are being altered.
OCI-22309: attribute with name "string" already exists
   Cause: The user is attempting to create an object type where more than one
   attributes have the same name.
   Action: Check to make sure that all attribute names are unique.

OCI-22311: type for attribute "string" does not exist
   Cause: The type of the attribute does not exist.
   Action: No types were created/modified for this DDL transaction. Redo the DDL
   transaction and add the creation of the attribute's type in the DDL transaction.

OCI-22313: cannot use two versions of the same type "string"
   Cause: The version of this type conflicts with the version of this type used by
   another library that was linked in with the application. An application may only
   use one version of a type.
   Action: Check that the libraries being linked with this application and use the
   same versions of the type.

OCI-22314: method information mismatch in ALTER TYPE
   Cause: The number of methods or the method signature do not match that of the
   original type declaration. This is not supported.
   Action: Make sure the method signature stay identical for the previously declared
   method. Do not drop existing methods.

OCI-22315: type "string" does not contain a map or order function
   Cause: The input type does not contain a map or order function so one cannot be
   returned.
   Action: Add a map or order function to the type or catch this error.

OCI-22316: input type is not a collection type
   Cause: The user is trying to obtain information for collection types on a
   non-named collection type.
   Action: Use a named collection type for the function.

OCI-22317: typecode number is not legal as a number type
   Cause: The user is trying to use a number typecode that is not valid.
   Action: Use only OCI_TYPECODE_SMALLINT, OCI_TYPECODE_INTEGER,
   OCI_TYPECODE_REAL, OCI_TYPECODE_DOUBLE, OCI_TYPECODE_FLOAT,
   OCI_TYPECODE_NUMBER, or OCI_TYPECODE_DECIMAL.

OCI-22318: input type is not an array type
   Cause: The user is trying to obtain the number of elements for a non-array type.
   Action: Pass in only a named collection type which is an array.

OCI-22319: type attribute information altered in ALTER TYPE
   Cause: The type attribute information does not match that of the original type
   declaration when altering type. Attributes cannot be altered during ALTER TYPE.
   Only new methods can be added.
   Action: Check that all type alterations are legal.

OCI-22321: method does not return any result
   Cause: OCITypeResult() was called on a method that does not return any results.
**Action:** Check that you are passing in the correct method descriptor, or that your method creation was done correctly.

**OCI-22337: the type of accessed object has been evolved**
**Cause:** The type of the accessed object has been altered and the client's object is based on an earlier type definition.
**Action:** The user needs to exit application and modify application to accommodate the type change. From SQL/PLUS, reconnect and resubmit statement.

**OCI-22369: invalid parameter encountered in method string**
**Cause:** An invalid parameter is being passed to this method of SYS.RowType or SYS.RowSet.
**Action:** Check the parameters being passed to this method and make sure that the parameters are allowed.

**OCI-22370: incorrect usage of method string**
**Cause:** This method of SYS.RowType or SYS.RowSet is being used inappropriately.
**Action:** Check the documentation for correct usage.

**OCI-22600: encountered 8.0.2 (Beta) VARRAY data that cannot be processed**
**Cause:** Production Oracle8 (8.0.3 and beyond) encounters some VARRAY data which was created and stored by Oracle8 8.0.2 (Beta 2). Production Oracle8 cannot understand or process such VARRAY data.
**Action:** Delete the VARRAY data from the table by dropping the table, deleting the rows, or nulling out the VARRAY columns, and then re-insert the VARRAY data. There is no provided script or tool to help automate this conversion.

**OCI-22601: pickler TDS context [string] is not initialized**
**Cause:** Attempt to use the pickler TDS context without initializing it.
**Action:** Use OCIPicklerTdsCtxInit to initialize the context.

**OCI-22602: pickler TDS handle [string] is not well-formed**
**Cause:** Attempt to use the pickler TDS handle without initializing/constructing it.
**Action:** Use OCIPicklerTdsInit to initialize the handle before it is constructed. Use OCIPicklerTdsGenerate to generate the TDS before its attributes can be accessed.

**OCI-22603: cannot add an attribute to the already generated TDS handle**
**Cause:** Attempt to add an attribute to the already constructed TDS.
**Action:** Use a TDS handle that is initialized but not yet constructed.

**OCI-22604: TDS handle already generated**
**Cause:** Attempt to generate TDS that is already generated.
**Action:** Use a TDS handle that is initialized but not yet generated.

**OCI-22605: FDO handle [string] is not initialized**
**Cause:** Attempt to use an uninitialized FDO handle.
**Action:** Use OCIPicklerFdoInit to initialize FDO handle.

**OCI-22606: pickler image handle [string] is not well-formed**
Cause: Attempt to use the image handle without initializing/constructing it.
Action: Use OCIPicklerImageInit to initialize the handle before it is constructed.
Use OCIPicklerImageGenerate to generate the image before its attributes can be accessed.

OCI-22607: image handle already generated
Cause: Attempt to generate image that is already generated.
Action: Use a image handle that is initialized but not yet generated.

OCI-22608: cannot add an attribute to the already generated image handle
Cause: Attempt to add an attribute to the already constructed image.
Action: Use an image handle that is initialized but not yet constructed.

OCI-22609: error string during initialization of FDO
Cause: Error during FDO initialization.
Action: Take an action based on the specified error.

OCI-22626: Type Mismatch while constructing or accessing OCIAnyData
Cause: Type supplied is not matching the type of the AnyData. If piece wise construction or access is being attempted, the type supplied is not matching the type of the current attribute.
Action: Make sure the type supplied matches the type of object to be constructed or accessed.

OCI-22975: cannot create a PRIMARY KEY-based REF to this object view
Cause: The object view specified in the MAKE_REF function does not have a PRIMARY KEY-based object identifier. A PRIMARY KEY-based REF cannot be created for such a view.
Action: Specify an object view that has a PRIMARY KEY-based object identifier in the MAKE_REF function.

OCI-22976: incorrect number of arguments to MAKE_REF
Cause: Number of arguments for MAKE_REF is different from the number of PRIMARY KEY attributes of the object view.
Action: Specify all the necessary arguments for MAKE_REF.

OCI-30100: internal error [number]
Cause: An internal error has occurred.
Action: Contact Oracle Worldwide Support and report the error.

OCI-30101: unknown parameter name 'string'
Cause: You have misspelled the parameter name.
Action: Spell the parameter name correctly.

OCI-30102: 'string' is not in the legal range for 'string'
Cause: The value of the parameter is not within the legal range.
Action: Refer to the manual for the allowable values for this parameter.

OCI-30103: 'string' contains an illegal integer radix for 'string'
Cause: An illegal integer radix specification was found.
Action: Only 'd', 'h', 'D', and 'H' may be used as radix specifications.
OCI-30104: 'string' is not a legal integer for 'string'
  Cause: The value is not a valid integer.
  Action: Specify only valid integers for this parameter.

OCI-30105: 'string' is not a legal boolean for 'string'
  Cause: The value is not a valid boolean.
  Action: Refer to the manual for allowable boolean values.

OCI-30107: parameter name abbreviation 'string' is not unique
  Cause: The abbreviation given was not unique.
  Action: Use a longer abbreviation to make the parameter name unique.

OCI-30108: invalid positional parameter value 'string'
  Cause: An invalid positional parameter value has been entered.
  Action: Remove the invalid positional parameter.

OCI-30109: could not open parameter file 'string'
  Cause: The parameter file does not exist.
  Action: Create an appropriate parameter file.

OCI-30110: syntax error at 'string'
  Cause: A syntax error was detected.
  Action: Change the input so that the correct syntax is used.

OCI-30111: no closing quote for value 'string'
  Cause: A quoted string was begun but not finished.
  Action: Put a closing quote in the proper location.

OCI-30112: multiple values not allowed for parameter 'string'
  Cause: You attempted to specify multiple values for a parameter which can take only one value.
  Action: Do not specify more than one value for this parameter.

OCI-30113: error when processing file 'string'
  Cause: A problem occurred when processing this file.
  Action: Examine the additional error messages and correct the problem.

OCI-30114: error when processing from command line
  Cause: A problem occurred when processing the command line.
  Action: Examine the additional error messages and correct the problem.

OCI-30115: error when processing an environment variable
  Cause: A problem occurred when processing an environment variable.
  Action: Examine the additional error messages and correct the problem.

OCI-30116: syntax error at 'string' following 'string'
  Cause: A syntax error was detected.
  Action: Change the input so that the correct syntax is used.

OCI-30117: syntax error at 'string' at the start of input
  Cause: A syntax error was detected.
Action: Change the input so that the correct syntax is used.

OCI-30118: syntax error at 'string' at the end of input
Cause: A syntax error was detected.
Action: Change the input so that the correct syntax is used.

OCI-30119: unable to obtain a valid value for 'string'
Cause: No valid value was obtained for this parameter.
Action: Rerun the application and enter a valid value.

OCI-30120: 'string' is not a legal oracle number for 'string'
Cause: The value is not a valid oracle number.
Action: Refer to the manual for allowable oracle number values.

OCI-30121: 'string' is not an allowable value for 'string'
Cause: The value is not a legal value for this parameter.
Action: Refer to the manual for allowable values.

OCI-30122: value 'string' for 'string' must be between 'number' and 'number'
Cause: The value of the parameter is not within the legal range.
Action: Specify a value that is within the legal range.

OCI-30129: invalid function argument received
Cause: A function received an invalid argument
Action: Check function calls, make sure correct arguments are being passed.

OCI-30130: invalid parameter key type received
Cause: A function received an invalid parameter key type
Action: Check parameter key types in function calls

OCI-30131: number of keys being set exceeds allocation
Cause: Number of parameter keys being set exceeds allocation
Action: Reduce the number of keys being set or increase allocation

OCI-30132: invalid key index supplied
Cause: The key index specified was not within bounds
Action: Change key index to ensure it lies within bounds

OCI-30135: OCI Thread operation fails
Cause: An OCI Thread function call has failed.
Action: Check the function call to make sure that the correct parameters are being passed and take the appropriate action.

OCI-30150: Invalid argument passed to OCIFile function
Cause: An invalid argument is passed to the OCIFile function. The most common cause is that a NULL pointer is passed where a non-NULL pointer is expected.
Action: Make sure that the values passed as arguments are valid. Esp check for NULL pointers.

OCI-30151: File already exists
Cause: Tried to open a file with OCI_FILE_EXCL flag and the file already exists.
Action: OCIFile is supposed throw this exception in this case.

OCI-30152: File does not exist
Cause: The OCIFile function requires the file to exist, but it does not.
Action: Make sure that the file exists.

OCI-30153: An invalid File Object is passed to the OCIFile function
Cause: An invalid File Object is passed to the OCIFile function.
Action: Make sure that the file object is a valid one. Create a new file object by calling OCIFileOpen if needed.

OCI-30154: The memory address given as buffer for OCIFileRead/Write is invalid
Cause: An invalid memory address is given as the buffer pointer for OCIFileRead/Write.
Action: Make sure that the required memory is allocated and pass a valid memory address as buffer pointer.

OCI-30155: An I/O Error occurred during an OCIFile function call
Cause: An I/O error occurred at the system level.
Action: This is a system error and the action will depend on the error.

OCI-30156: Out of disk space
Cause: The disks associated with the underlying file system are full.
Action: Create more disk space.

OCI-30157: An invalid argument was given to operating system call
Cause: The OS call was called with an invalid argument.
Action: Check the values passed. If unsuccessful to solve the problem contact ORACLE support.

OCI-30158: The OCIFileWrite causes the file to exceed the maximum allowed size
Cause: There is no space to write to the file. Its size is at the maximum limit.
Action: Up to the user.

OCI-30159: OCIFileOpen: Cannot create the file or cannot open in the requested mode
Cause: The create flag was specified in OCIFileOpen such that the file was to be created. But unable to do so. Or the file already exists and the permissions on it doesn’t allow the file to be opened in in the requested open mode
Action: Check whether the user has permissions to create the specified file or if the file exists whether the permissions on it allow the requested open mode.

OCI-30160: Unable to access the file
Cause: The function was unable to access the existing the file.
Action: Check if the user has the required permissions on the file.

OCI-30161: A system error occurred during the OCIFile function call
Cause: A system error occurred while executing the OCIFile function.
Action: Depend on the error.

OCI-30162: The OCIFile context is not initialized
Cause: The function OCIFileInit need to be called before calling any other OCIFile function to initialize the OCIFile context.

Action: Call the function OCIFileInit need to be called before calling any other OCIFile function.

OCI-30163: The thread safety initialization failed
Cause: The call to SlgInit failed in OCIFileInit.
Action: Contact support

OCI-30175: invalid type given for an argument
Cause: There is an argument with an invalid type in the argument list.
Action: Use the correct type wrapper for the argument.

OCI-30176: invalid format code used in the format string
Cause: There is an invalid format code in the format string.
Action: Replace the invalid format code with a valid one.

OCI-30177: invalid flag used in a format specification
Cause: There is an invalid flag in a format specification.
Action: Replace the invalid flag with a valid one.

OCI-30178: duplicate flag used in a format specification
Cause: There is a duplicate flag in a format specification.
Action: Remove the duplicate flag.

OCI-30179: invalid argument index used in a format code
Cause: Zero or negative argument index or index not following (.
Action: Replace the invalid argument index with a valid one.

OCI-30180: argument index is too large
Cause: An argument index exceeds actual number of arguments supplied.
Action: Fix format string or pass additional arguments.

OCI-30181: integer in argument index is not immediately followed by )
Cause: Missing closing parenthesis in argument index.
Action: Fix the format specification.

OCI-30182: invalid precision specifier
Cause: Period in format specification not followed by valid format.
Action: Replace the invalid precision specifier with a valid one.

OCI-30183: invalid field width specifier
Cause: Invalid field width supplied.
Action: Replace the invalid field width with a valid one.

OCI-30184: argument type not compatible with a format code
Cause: Bad argument type given for a format code.
Action: Make format and arguments be compatible.

OCI-30185: output too large to fit in the buffer
Cause: The buffer is not large enough to hold the entire output string.
Action: Fix the buffer size and length passed in.

OCI-30191: missing argument list
Cause: No argument list supplied.
Action: Modify the argument list to have at least OCIFormatEnd in it.

OCI-30930: XML node 'string' (type=string) does not support this operation
Cause: The given node's type is not supported for this operation. For example, trying to add children to an attribute node, or passing in a document node as a child, are unsupported operations.
Action: Use a valid node type for the operation.

OCI-30931: Element 'string' cannot contain mixed text
Cause: XML elements must be declared mixed to contain multiple text nodes
Action: Declare this element type as mixed in its schema

OCI-30932: Reference node 'string' not contained in specified parent node 'string'
Cause: When using a reference node, it must have the specified parent node
Action: Use a node in the specified parent as the reference

OCI-30933: Element 'string' may not appear at this point within parent 'string'
Cause: The ordering specified by the content model of the parent does not allow for this element to occur at this position.
Action: Reorder the child elements to conform with the content model of the parent element

OCI-30934: 'string' (string node) cannot be inserted in parent 'string' (string node)
Cause: The schema does not allow a child node of this type to be inserted into a parent node of this type. For example, only element nodes may only be inserted into a document
Action: Do not attempt to add more than the maximum number of elements to XML documents.

OCI-30935: XML maxoccurs value (string) exceeded
Cause: An attempt was made to insert more than maxoccurs values into a schema-based XML document.
Action: Do not insert more than maxoccurs values into the document.

OCI-30936: Maximum number (string) of 'string' XML node elements exceeded
Cause: An attempt was made to insert more than the allowed number of elements (specified by the maxoccurs facet) into an XML document.
Action: Do not attempt to add more than the maximum number of elements to XML documents.

OCI-30937: No schema definition for 'string' (namespace 'string') in parent 'string'
Cause: The schema definition for the parent node being processed does not allow for the specified child node in its content model. Note that any typecasting via xsi:type must occur before the schema definitions for the new type can be used.
Action: Only insert elements and attributes declared in the schema. Check to make sure that xsi:type (if used) is specified first.

OCI-30938: No prefix defined for namespace 'string' (particle string)
Cause: An XML namespace mapping (xmlns:<prefix>=<namespace URL>) must be defined for each particle (element or attribute) stored in an schema-constrained XMLType document.
Action: Add an xmlns attribute definition (attribute name="xmlns:prefix" and value="namespace URL") to the current XMLType document. The safest place to add this attribute is in the root node of the document to ensure that the mapping will be in scope.

OCI-30939: Order violation: Element 'string' may not follow element 'string'
Cause: The XML schema specifies a content model that is sequential, where the order of nodes in the instance must follow the order specified by the schema, and this instance relies on the schema validity to avoid maintaining instance order information
Action: Insert elements only in the order specified in the schema

OCI-30940: Cannot resolve prefix 'string' for QName node 'string'
Cause: An attempt was made to store a QName value without having a valid namespace in scope for that prefix.
Action: Declare the namespace for the prefix used

OCI-30941: Cannot specify empty URI for non-default namespace 'string'
Cause: An attempt was made to insert a namespace declaration for a non-default namespace using an empty URI string.
Action: Specify a non-empty URI for namespace declarations other than the default namespace.

OCI-30942: XML Schema Evolution error for schema 'string' table string column 'string'
Cause: The given XMLType table/column which conforms to the given schema had errors during evolution. For more information, see the more specific error below this one
Action: Based on the schema, table and column information in this error and the more specific error below, take corrective action

OCI-30943: XML Schema 'string' is dependent on XML schema 'string'
Cause: Not all dependent schemas were specified and/or the schemas were not specified in dependency order, i.e., if schema S1 is dependent on schema S, S must appear before S1.
Action: Include the previously unspecified schema in the list of schemas and/or correct the order in which the schemas are specified. Then retry the operation.

OCI-30944: Error during rollback for XML schema 'string' table string column 'string'
Cause: The given XMLType table/column which conforms to the given schema had errors during a rollback of XML schema evolution. For more information, see the more specific error below this one
Action: Based on the schema, table and column information in this error and the more specific error below, take corrective action

OCI-30945: Could not create mapping table 'string'
Cause: A mapping table could not be created during XML schema evolution. For more information, see the more specific error below this one
**Action:** Ensure that a table with the given name does not exist and retry the operation

**OCI-30946: XML Schema Evolution warning: temporary tables not cleaned up**
**Cause:** An error occurred after the schema was evolved while cleaning up temporary tables. The schema evolution was successful.
**Action:** If the user needs to remove the temporary tables, use the mapping table to get the temporary table names and drop them.

**OCI-30951: Element or attribute at Xpath `string` exceeds maximum length**
**Cause:** An attempt was made to insert a node of length exceeding the maximum length (specified by the maxLength facet) into an XML document.
**Action:** Do not attempt to add a node exceeding the maximum length to XML documents.

**OCI-30990: insufficient privileges to change owner of resource `string`**
**Cause:** An attempt was made to change the `<Owner>` field of an XML DB resource without sufficient privileges to do so.
**Action:** Switch to SYS before performing the ownership change, or have the intended recipient of the resource perform the transfer.

**OCI-30991: cannot use DOM to add special attribute to schema-based parent**
**Cause:** An attempt was made to add or remove an `xsi:schemaLocation`, `xsi:noNamespaceSchemaLocation`, `xsi:type`, or `xsi:nil` attribute to or from a schema-based XML node using DOM.
**Action:** Use the `updateXML` operator instead of DOM.

**OCI-31000: Resource `string` is not an XDB schema document**
**Cause:** The given schema URL does not refer to a registered XDB schema.
**Action:** Make sure the specified schema has been registered in XDB.

**OCI-31001: Invalid resource handle or path name "string"**
**Cause:** An invalid resource handle or path name was passed to the XDB hierarchical resolver.
**Action:** Pass a valid resource handle or path name to the hierarchical resolver.

**OCI-31002: Path name `string` is not a container**
**Cause:** XDB expected the given path name to represent a container.
**Action:** Pass a path name or resource handle that represents a container.

**OCI-31003: Parent `string` already contains child entry `string`**
**Cause:** An attempt was made to insert a duplicate child into the XDB hierarchical resolver.
**Action:** Insert a unique name into the container.

**OCI-31004: Length `string` of the BLOB in XDB$H_INDEX is below the minimum `string`**
**Cause:** In the XDB$H_INDEX table, the CHILDREN column, a BLOB, must have a certain minimum length without being chained. The calculated length of the LOB was less than the stated minimum.
**Action:** Set the value of the init.ora parameter `db_block_size` to at least 2K. For XDB to run at its fastest, set `db_block_size` to 8K.
OCI-31005: Path name length string exceeds maximum length string
  Cause: The length of a path name passed to the XDB hierarchical resolver exceeded the maximum length.
  Action: Choose a shorter path name.

OCI-31006: Path name segment length string exceeds maximum length string
  Cause: The length of a path name segment passed to the XDB hierarchical resolver exceeded the maximum length of a path name segment.
  Action: Choose a shorter path name segment.

OCI-31007: Attempted to delete non-empty container string/string
  Cause: An attempt was made to delete a non-empty container in the XDB hierarchical resolver.
  Action: Either perform a recursive deletion, or first delete the contents of the container.

OCI-31009: Access denied for property string
  Cause: An attempt was made to access a property you don't have access to
  Action: Check the ACL to see what privileges you have for this property

OCI-31010: XML element index string exceeds maximum insertion index string
  Cause: An attempt was made to insert an XML element at an invalid index location in the node.
  Action: Choose a new index that falls within the allowed range.

OCI-31011: XML parsing failed
  Cause: XML parser returned an error while trying to parse the document.
  Action: Check if the document to be parsed is valid.

OCI-31012: Given XPATH expression not supported
  Cause: XPATH expression passed to the function is currently unsupported.
  Action: Check the xpath expression and change it to use a supported expression.

OCI-31013: Invalid XPATH expression
  Cause: XPATH expression passed to the function is invalid.
  Action: Check the xpath expression for possible syntax errors.

OCI-31014: Attempted to delete the root container
  Cause: An attempt was made to delete the root container in the hierarchical index.
  Action: Do not delete the root container.

OCI-31015: Attempted to insert entry without name
  Cause: An attempt was made to insert an entry into the hierarchical resolver without a child name.
  Action: Supply a child name and try inserting again.

OCI-31016: Attempted to delete entry without name
  Cause: An attempt was made to delete an entry from the hierarchical resolver without a child name.
  Action: Supply a child name and try deleting again.

OCI-31017: Error generating unique OID for XML document
Cause: An error occurred while generating a globally unique OID for storing an XML document.
Action: None

OCI-31018: Error deleting XML document
Cause: The XMLType object pointed to by the given REF could not be deleted because either the REF was invalid or it pointed to a non-existent table.
Action: Either use FORCE deletion or supply a valid REF.

OCI-31019: Recursive deletion snapshot too old for string/string
Cause: Changes were made to the structure of a directory while it was being recursively deleted.
Action: Try deleting the directory again.

OCI-31020: The operation is not allowed, Reason: string
Cause: The operation attempted is not allowed
Action: See reason and change to a valid operation.

OCI-31021: Element definition not found
Cause: The element definition was not found.
Action: Supply the definition for the element or use a defined element.

OCI-31022: Element not found
Cause: The element was not found.
Action: Make sure the specified element exists.

OCI-31023: Index size error
Cause: The index is greater than the allowed value.
Action: Make sure the index is less than allowed value.

OCI-31025: Invalid document element
Cause: An attempt was made to replace the data at an invalid index number in the XML document
Action: Supply a correct occurrence number and try again.

OCI-31027: Path name or handle string does not point to a resource
Cause: An attempt was made to retrieve a resource based on a path name or resource handle that points to an entity other than a resource.
Action: Do not attempt to retrieve a resource based on that path name or resource handle.

OCI-31028: Resource metadata length string exceeded maximum length string
Cause: An attempt was made to insert resource metadata that exceeded the maximum length of that type of metadata.
Action: Keep resource metadata within its allowed length.

OCI-31029: Cannot bind to unsaved resource
Cause: An attempt was made to bind to a resource that had not been saved to disk.
Action: Bind only to saved resources.

OCI-31030: Unable to retrieve XML document
Cause: The resource had an invalid (dangling) REF to an XML document.
Action: Rebind the resource using a valid XMLType REF.

OCI-31033: Requested number of XML children string exceeds maximum string
Cause: An attempt was made to add more than the maximum number of allowable children in an XML element.
Action: Redefine the schema to allow breaking up of the children among siblings.

OCI-31035: Could not bind locked resource to path string/string
Cause: An attempt was made to bind an existing resource to a new location in the hierarchy, but a lock could not be obtained on the resource.
Action: Commit or roll back the transaction that has the lock on the resource.

OCI-31037: Invalid XML attribute name string
Cause: The attribute name in the XML document did not match anything in the associated schema.
Action: Supply only schema-defined or XML standard attributes.

OCI-31038: Invalid string value: "string"
Cause: The text in the XML document did not represent a valid value given the datatype and other constraints in the schema.
Action: Ensure that the specified value in XML documents is valid with respect to the datatype and other constraints in the schema.

OCI-31039: XML namespace length string exceeds maximum string
Cause: The length of the disk-formatted XML namespace exceeded the maximum.
Action: Keep XML namespace declarations below the maximum length.

OCI-31040: Property string: XML type (string) not compatible with internal memory type (string)
Cause: The XML datatype given is inconsistent with the database datatype, and a conversion cannot be made.
Action: This is an internal error, generally resulting from corruption of the compiled XML schema. Re-register schemas, or contact Oracle support.

OCI-31041: Property string: Memory type (string) not compatible with database type (string)
Cause: The memory type associated with this property is mapped to an incompatible database type, and a conversion cannot be made.
Action: This is an internal error, generally resulting from corruption of the compiled XML schema. Re-register schemas, or contact Oracle support.

OCI-31042: Too many properties in type 'string'
Cause: The type can only have the same number of properties (elements and attributes) as a table can have columns.
Action: Modify the XML schema to move properties into subelements that are not inlined.

OCI-31043: Element 'string' not globally defined in schema 'string'
Cause: The specified element name has not been defined at the top level of the XML schema (i.e. globally). Elements must be defined globally to be the root of an XMLType object.
**Action:** Check the XML schema definition to make sure the specified element name has been defined at the top level.

**OCI-31044:** Top-level prefix length *string* exceeds maximum *string*

**Cause:** An attempt was made to save to disk a top-level XML namespace prefix whose length exceeded the maximum.

**Action:** Do not define XML namespace prefixes that exceed the maximum length.

**OCI-31045:** Cannot store more than *string* extras outside the root XML node

**Cause:** An attempt was made to store more than the maximum number of XML extras (e.g. comments and processing instructions) either before or after the document’s root node.

**Action:** Keep the number of extras outside the root node below the maximum.

**OCI-31046:** Incorrect argument(s) specified in the operator

**Cause:** One or more of the arguments specified in the operator in the query are incorrect

**Action:** Correct the arguments specified in the operator

**OCI-31047:** Could not retrieve resource data at path *string*

**Cause:** An error occurred while retrieving the contents and/or metadata of a resource.

**Action:** Contact Oracle customer support.

**OCI-31048:** Unsaved resources cannot be updated

**Cause:** An attempt was made to update a resource that was never saved to disk.

**Action:** Perform a resource insertion instead.

**OCI-31050:** Access denied

**Cause:** The requested access privileges have not been granted to the current user. User must be granted privileges prior to resource access.

**Action:** Check the set of requested access privileges to make sure that they are included in the set of access privileges granted to the user.

**OCI-31051:** Requested access privileges not supported

**Cause:** The requested access privileges are not supported for the specified resource.

**Action:** Ensure that the set of requested access privileges are valid access privileges for the specified resource.

**OCI-31052:** Cannot delete ACL with other references

**Cause:** The requested deletion of an ACL resource cannot proceed. The ACL is in use by other resources.

**Action:** Remove the resources that are making reference to the ACL in question and try again.

**OCI-31053:** The value of the depth argument in the operator cannot be negative

**Cause:** The value of the depth argument passed to the primary operator is not a positive integer

**Action:** Pass a positive value of the depth argument

**OCI-31054:** The *string* operator cannot have an ancillary operator
Cause: An ancillary operator was used with an operator which does not support ancillary operators
Action: Remove the ancillary operator in the query

OCI-31055: A null XMLType element cannot be inserted into RESOURCE_VIEW
Cause: The element which is being inserted into the RESOURCE_VIEW is NULL
Action: Specify a non-null XMLType element to insert into RESOURCE_VIEW

OCI-31056: The document being inserted does not conform to string
Cause: The XMLType element being inserted into the RESOURCE_VIEW does not conform to the specified Schema
Action: Insert an element which conforms to the specified Schema

OCI-31057: Display Name of the element being inserted is null
Cause: The Display Name of the element which is being inserted into the RESOURCE_VIEW is null
Action: Specify the Display Name and insert the element into RESOURCE_VIEW

OCI-31058: cannot modify read-only XOBs
Cause: Read-Only XOBs cannot be modified.
Action: Use only read operations on such a XOB.

OCI-31059: Cannot insert root XML document node if it already exists
Cause: An attempt was made to insert a root node into an XML document that already had a root node.
Action: Call the appropriate replace function to replace the node instead of inserting it anew.

OCI-31060: Resource at path string could not be deleted
Cause: An error occurred while deleting the named resource. The specific error can be found one lower on the error stack.
Action: Look at the next error on the stack and take appropriate action.

OCI-31062: Cannot delete an unsaved resource
Cause: An attempt was made to delete a resource that had not been saved to disk.
Action: Delete only saved resources.

OCI-31065: Cannot modify read-only property [string]
Cause: An attempt was made to modify an immutable XML node.
Action: Use only read operations on such properties.

OCI-31066: Insertion of string into string creates a cycle
Cause: An attempt was made to insert a link into the XDB hierarchy that would create a cycle in the tree.
Action: Ensure that links to existing resources do not cause cycles.

OCI-31067: XML nodes must be updated with nodes of the same type
Cause: An attempt was made to use updateXML to update an XML node with a node of another type.
Action: Ensure that the node specified by the XPath matches the type of new data provided.
OCI-31068: updateXML expected data format [string] instead of [string]
  Cause: An attempt was made to use updateXML to update data with a node of
  the incorrect type. Text and attribute nodes must be updated with string data,
  whereas element nodes must be updated with XMLType data.
  Action: Use CREATEXML or getStringVal to coerce the new data to the proper
  format.

OCI-31069: Cannot apply typed changes to non-schema-based XMLType nodes
  Cause: An attempt was made to insert, delete, or update a non-schema-based
  XMLType node using an XML schema definition.
  Action: Make changes to non-typed nodes only by referencing their tag names.

OCI-31070: Invalid database user ID string
  Cause: An attempt was made set an invalid user ID into an XDB resource
  metadata property.
  Action: Verify the validity of the user ID and try again.

OCI-31071: Invalid database username or GUID string
  Cause: An attempt was made to set an invalid username or GUID into an XDB
  resource metadata property.
  Action: Verify the validity of the username or GUID and try again.

OCI-31072: Too many child nodes in XMLType fragment for updateXML
  Cause: An attempt was made to pass an XMLType fragment with multiple
  children as new data for the updateXML operator.
  Action: Extract the desired child from the XMLType before passing it to
  updateXML as the desired new XML node.

OCI-31073: Resource not retrieved using path name
  Cause: An attempt was made to access the path name of a resource that was
  either never saved to disk or was loaded using a method other than with its path
  name.
  Action: Perform path name operations only on resources obtained using a path
  name.

OCI-31075: invalid string declaration in XML Schema
  Cause: The XML schema contains an invalid declaration identified by the
  message.
  Action: Fix the identified error and try again.

OCI-31076: required attribute "string" not specified
  Cause: The XML schema does not specify a required attribute.
  Action: Specify a value for the required attribute.

OCI-31077: invalid attribute "string" specified
  Cause: The XML schema specifies an invalid attribute.
  Action: Remove specification of the invalid attribute.

OCI-31078: error in SQL mapping information
  Cause: There is an error in the SQL type and table specification within the XML
  Schema.
Action: Ensure that all specified SQL types and tables are valid and compatible with the corresponding XML types.

OCI-31079: unable to resolve reference to string "string"
 Cause: The identified type or attribute or element could not be resolved.
 Action: Make sure that the name corresponds to a valid XML (simple/complex) type or attribute or element and try again.

OCI-31080: type not specified for attribute or element "string"
 Cause: The identified attribute or element does not have a type.
 Action: Make sure that every attribute and element has a valid type specification.

OCI-31081: name not specified for global declaration
 Cause: The XML schema does not specify the name for the global declaration of attribute or element or simpleType or complexType.
 Action: Specify names for all global declarations.

OCI-31082: invalid attribute "string" specified in declaration of "string"
 Cause: The XML schema specifies an invalid attribute.
 Action: Remove specification of the invalid attribute.

OCI-31083: error while creating SQL type "string"."string"
 Cause: An error occurred while trying to create the SQL type based on the specification of a complex type.
 Action: Fix the identified error and try again.

OCI-31084: error while creating table "string"."string" for element "string"
 Cause: An error occurred while trying to create the table based on the declaration for the identified element.
 Action: Fix the identified error and try again.

OCI-31085: schema "string" already registered
 Cause: An attempt was made to register a schema with the same URL as a previously registered schema.
 Action: Register the schema with a different URL.

OCI-31086: insufficient privileges to register global schema "string"
 Cause: An attempt was made to register a global schema without sufficient privileges.
 Action: Make sure that the user has sufficient privileges to register a global schema.

OCI-31087: insufficient privileges to delete schema "string"
 Cause: An attempt was made to delete a schema resource without sufficient privileges.
 Action: Make sure that the user has sufficient privileges to delete the schema.

OCI-31088: object "string"."string" depends on the schema
 Cause: An attempt was made to delete a schema which has dependent objects.
 Action: Either drop the dependent objects prior to deleting the schema or use the CASCADE or FORCE options.
OCI-31089: schema "string" does not target namespace "string"

**Cause:** The schema document contains references (via include and import definitions) to other schemas that do not belong to valid namespaces.

**Action:** Make sure that all schemas referenced via include definitions target the same namespace as the parent schema. Further make sure that the namespace specified in the import definition matches the actual target namespace of the specified schema.

OCI-31090: invalid database schema name "string"

**Cause:** The XML schema document contains an invalid database schema name. For example, the value of attribute SQLSchema.

**Action:** Make sure that all database user/schema names specified in the XML schema document refer to existing database users/schemas.

OCI-31091: empty string specified as a SQL name

**Cause:** The XML schema document contains a null SQL name. For example, the values of attributes SQLName, SQLType, defaultTable.

**Action:** Make sure that all names of SQL schema objects specified in the XML schema document are valid SQL names. Otherwise, remove such attributes from the schema and try again.

OCI-31092: invalid SQL name "string"

**Cause:** The XML schema document contains an invalid SQL name. For example, the values of attributes SQLName, SQLType, defaultTable.

**Action:** Make sure that all names of SQL schema objects specified in the XML schema document are valid SQL names. This implies that the database length and other restrictions on names be satisfied.

OCI-31093: null or invalid value specified for parameter : string

**Cause:** The argument value passed for the given parameter is null or invalid.

**Action:** Make sure that all the input argument values are valid.

OCI-31094: incompatible SQL type "string" for attribute or element "string"

**Cause:** The SQL type information provided in the XML schema is not compatible with the XML datatype for the specified attribute or element.

**Action:** Make sure that the specified SQL types are compatible with the declared XML datatypes.

OCI-31095: cannot generate string : "string.string" already exists

**Cause:** The type/table name specified in the XML schema document cannot be generated because it is already being used.

**Action:** Use different names for types/tables or use the NOGEN mode so that schema compiler does not generate new types/tables.

OCI-31096: validation failed for schema

**Cause:** The XML Schema could not be validated.

**Action:** Make sure that the SQLType and other datatype mapping is valid.

OCI-31097: Hierarchical Index not empty

**Cause:** An attempt was made to rebuild the hierarchical index which is not empty.

**Action:** Delete all rows in the hierarchical index and then rebuild it.
OCI-31099: XDB Security Internal Error
   Cause: An XDB Security internal error has occurred.
   Action: Contact Oracle Support.

OCI-31100: XDB Locking Internal Error
   Cause: An XDB Locking Internal error has occurred.
   Action: Contact Oracle Support.

OCI-31101: Token "string" not given while locking resource "string"
   Cause: Locking attempted on resource when the principal already owns a lock
given by the token above.
   Action: Reattempt the lock with the token.

OCI-31102: Already locked in exclusive mode. Cannot add lock.
   Cause: The resource is already locked in exclusive mode. Cannot add another
lock.
   Action: Unlock the existing lock.

OCI-31103: Resource locked in shared mode. Cannot add exclusive lock
   Cause: The resource is locked in shared mode. Cannot add a shared lock.
   Action: Try locking in shared mode or unlocking the existing lock.

OCI-31104: Cannot find lock with token "string" on "string" for unlock
   Cause: The lock may have been unlock or it may have expired.
   Action: No action needed. Unlock already successful.

OCI-31105: User does not own lock "string"
   Cause: The lock to be unlocked is not owned by the user.
   Action: None

OCI-31107: Action failed as resource "string" is locked by name lock
   Cause: Lock requests cause the whole request URI to be locked
   Action: Supply lock token or unlock the lock

OCI-31108: Action failed as resource string is locked
   Cause: Delete/Rename failed because of an existing lock
   Action: Do lockdiscovery to find the lock and delete it.

OCI-31109: Action failed as parent resource string is locked
   Cause: Delete/Rename failed because of an lock on parent resource
   Action: Do lockdiscovery to find the lock and delete it.

OCI-31110: Action failed as resource string is locked by name
   Cause: Delete/Rename failed because one of the children is locked.
   Action: Do lockdiscovery to find the lock and delete it.

OCI-31111: table string cannot be hierarchically enabled
   Cause: Trigger <tabname>_xdb_pitrigger already exists
   Action: Delete all rows in the hierarchical index and then rebuild it.

OCI-31112: fail to string for string port using xdb configuration
OCI-31113: XDB configuration may not be updated with non-schema compliant data
Cause: An attempt was made to update the XDB configuration resource with non-schema or non-schema compliant data.
Action: Check the document to make sure it is schema based and schema compliant.

OCI-31114: XDB configuration has been deleted or is corrupted
Cause: The XDB configuration resource has been deleted or corrupted.
Action: Reinstall XDB, or reinsert a valid configuration document.

OCI-31115: XDB configuration error: string
Cause: An error related to XDB configuration has occurred.
Action: Make sure the configuration resource contains valid data.

OCI-31116: Tablespace not specified correctly
Cause: XDB cannot be moved to the specified tablespace.
Action: Specify a valid tablespace.

OCI-31121: The string operator can not be FALSE
Cause: The value of the operator that is specified is FALSE
Action: Specify an operator that evaluates to TRUE

OCI-31122: The string operator has incorrect RHS value
Cause: The right hand side value that has been specified for the operator does not evaluate to TRUE
Action: Specify value on the right hand side that evaluate to TRUE

OCI-31151: Cyclic definition encountered for string: "string"
Cause: The schema definition for this type has cycles.
Action: Remove cyclic definition and re-compile schema.

OCI-31153: Cannot create schema URL with reserved prefix "http://xmlns.oracle.com/xdb/schemas/"
Cause: This prefix is reserved for XDB extended schema URLs and cannot be used in a user specified URL.
Action: Modify the prefix to a different one.

OCI-31154: invalid XML document
Cause: The XML document is invalid with respect to its XML Schema.
Action: Fix the errors identified and try again.

OCI-31155: attribute string not in XDB namespace
Cause: The specified attribute should be prefixed with XDB's namespace.
Action: Ensure that all XDB specified attributes are prefixed with XDB's namespace and try again.

OCI-31157: Invalid Content-Type charset
Cause: HTTP Content-Type header had a charset that Oracle does not understand.
Action: Fix the Content-Type header in the HTTP request.

OCI-31158: schema "string" currently being referenced
Cause: The specified schema URL is currently being referenced by the same session. This could happen because of PLSQL XMLType variables still in scope.
Action: Ensure all references to this schema in this session are released and try the operation again.

OCI-31159: XML DB is in an invalid state
Cause: XML DB's internal tables are in an invalid state, probably because the database was not upgraded or the upgrade was not successful
Action: Ensure that the database is upgraded successfully. If the problem persists, contact Oracle Support

OCI-31160: max substitution group size string exceeded by "string" (string) for head element "string" (string)
Cause: The maximum limit on nested substitution groups has been exceeded by an element.
Action: Delete specified schema and re-register it after removing the offending substitution element.

OCI-31161: element or attribute "string" cannot be stored out of line
Cause: An element or attribute of a simple type has SQLInline=false
Action: Remove the SQLInline=false qualification for the offending element or attribute

OCI-31162: element or attribute "string" has no SQLType specified
Cause: Schema registration was invoked with GENTYPES=false without specifying a SQLType for some element or attribute
Action: Specify a SQLType for the offending element or attribute and register the schema again

OCI-31163: element or attribute "string" has invalid attribute value "string" (should be "string")
Cause: An element or attribute for a complextype derived by restriction has an attribute whose value is different from that in the base type
Action: Remove the mismatched attribute values from the offending element or attribute

OCI-31164: cannot load object-relational XML attribute using direct path
Cause: The table being loaded contains a xml column with object-relational storage. The xmltype column contains a type with subtypes. This type of attribute cannot be loaded with direct path.
Action: Perform the load with conventional path mode.

OCI-31165: cannot load object-relational XML attribute using direct path
Cause: The table being loaded contains a xml column with object-relational storage. The xmltype column either contains an out-of-line partitioned table or the table itself is partitioned by one of the attributes of xmltype. This type of table cannot be loaded with direct path.
Action: Perform the load with conventional path mode.

OCI-31167: XML nodes over 64K in size cannot be inserted
Cause: An attempt was made to insert an XML Text Node with a size greater than 64K. This is not supported.
Action: Create text nodes under 64K.

OCI-31168: Node localname and namespace values should be less than 64K
Cause: An attempt was made to specify an XML Node with localname or namespace value greater than or equal to 64K. This is not supported.
Action: Node localnames and namespace values should be under 64K.

OCI-31180: DOM Type mismatch in invalid PL/SQL DOM handle
Cause: The specified PL/SQL DOM handle is referencing a DOM Node whose DOM Type that does not match the one available in the session. This could happen because the pl/sql handle was reused, or the original document is no longer available.
Action: Ensure that the pl/sql handle for the target node is valid and try the operation again.

OCI-31181: PL/SQL DOM handle accesses node that is no longer available
Cause: The specified pl/sql handle is referencing a node in a DOM Document that is no longer available.
Action: Ensure that the pl/sql handle for the target node is valid and try the operation again.

OCI-31182: Too many PL/SQL DOM handles specified
Cause: An attempt was made to create a PL/SQL DOM handle that exceeded the maximum allowable number of PL/SQL DOM handles.
Action: Free PL/SQL DOM handles and try the operation again.

OCI-31185: DOM Nodes do not belong to the same DOM Document
Cause: The specified PL/SQL DOM Node does not belong to the parent DOM Document of the referring DOM Node.
Action: Ensure that both the DOM Nodes are part of the same DOM Document.

OCI-31190: Resource string is not a version-controlled resource
Cause: Either one of the following is the cause:
- Checkout is requested for a resource that isn’t under version control”. Only version-controlled resource can be checked out.
- Checkout is requested for a row of a non-versioned table.
Action: put the resource under version-control before checking out.

OCI-31191: Resource string is already checked out
Cause: Either one of the following is the cause:
- Checkout is requested for a resource that is already checked out to the workspace by the same of different user.
Action: checked in the resource from the workspace before checking out

OCI-31192: Resource string has not been checked out
Cause: Either one of the following is the cause:
- Checkin or uncheckout is requested for a resource that has not been checked out to the workspace by any user in a workspace

**Action:** checked in the resource from the workspace before checking out

**OCI-31193:** This versioning feature isn't supported for resource *string*

**Cause:** Either one of the following is the cause:
- Container cannot be put under version-controlled.

**Action:** Avoid using these features.

**OCI-31194:** Resource *string* is already deleted

**Cause:** Access a version-controlled resource that is already deleted.

**Action:** Remove the cyclic definitions in the type and retry compilation.

**OCI-31195:** XML node 'string' (type=*string*) does not support this operation

**Cause:** The given node’s type is not supported for this operation. For example, trying to add children to an attribute node, or passing in a document node as a child, are unsupported operations.

**Action:** Use a valid node type for the operation.

**OCI-31196:** XML nodes over *string* in size cannot be printed

**Cause:** An attempt was made to use an XML Text Node with a size greater than 64K, or an XML Comment Node with a size greater than 4K. These cannot be printed. For example, trying to add children to an attribute node, or passing in a document node as a child, are unsupported operations.

**Action:** Use getClobVal() or getStringVal() to print the Document.

**OCI-31197:** Error in processing file *string*

**Cause:** An error occurred while operating on the specified file. The possible causes are the file header is corrupt or check the next error on stack

**Action:** Ensure that the specified file is correct. Look at the next error on the stack and take appropriate action.

**OCI-31198:** Mismatch in number of bytes transferred due to non-binary mode

**Cause:** An error occurred while reading the specified file. The most probable cause is that the transfer was initiated in ASCII mode.

**Action:** Ensure that the transfer mode is set to BINARY

**OCI-31199:** Warning in processing file *string*

**Cause:** A warning was raised while operating on the specified file. However, the current operation was completed successfully.

**Action:** This is primarily an informational message. Look at the next error on the stack to obtain further information.
QSM-00501: unable to initialize Summary Advisor environment
   Cause: The Summary Advisor external procedure initialization process failed.
   Action: Contact Oracle Worldwide Support.

QSM-00502: OCI error
   Cause: A OCI callback routine reported an error
   Action: Contact Oracle Worldwide Support.

QSM-00503: out of memory
   Cause: Summary Advisor failed to allocate the necessary memory.
   Action: Contact Oracle Worldwide Support.

QSM-00504: internal error
   Cause: An internal error occurred.
   Action: Contact Oracle Worldwide Support.

QSM-00505: syntax error
   Cause: A syntax error occurred.
   Action: Correct syntax error if possible or contact Oracle Worldwide Support.

QSM-00506: no fact-tables could be found
   Cause: The fact-filter is not specified, and there are no fact-tables in the warehouse. A fact-table is a table having foreign-key constraints to one or more of the dimension-tables in the data warehouse.
   Action: Check the fact-filter is correctly specified; check that appropriate constraints exist; and the user has privileges to access the tables.

QSM-00507: no dimensions could be found
   Cause: The database does not have any dimensions
   Action: Create the dimensions in your warehouse

QSM-00508: statistics missing on tables/columns
   Cause: The system metadata does not contain statistics on one or more tables or columns. The Advisor needs cardinalities of all fact-tables, and of the level-keys of all dimensions in the data warehouse.
   Action: Run ANALYZE on the tables and summaries in the warehouse to collect statistics.

QSM-00509: invalid parameter
Cause: The indicated parameter has an invalid value
Action: Supply a value in the proper range

QSM-00510: statistics missing on materialized views
Cause: The system metadata does not contain statistics on one or more materialized views. The Advisor needs cardinalities of all materialized views in the data warehouse.
Action: Run ANALYZE on the tables and materialized views in the warehouse to collect statistics.

QSM-00511: invalid fact-tables specified in fact-filter
Cause: The tables specified in the fact-filter are not valid fact-tables. A fact-table must have foreign-key constraints to one or more of the dimension-tables in the data warehouse.
Action: Check the fact-filter is correctly specified; check that appropriate constraints exist; and the user has privileges to access the tables

QSM-00512: invalid summaries specified in the retention-list
Cause: The summaries specified in the retention-list are not valid.
Action: Check the spelling of the summary-names; check that they are valid; and the user has privileges to access them.

QSM-00513: one or more of the workload tables is missing
Cause: One or both of the workload tables are missing. The two workload tables which should be present in the user's schema are V_192216243_F_5_E_14_8_1 and V_192216243_F_5_E_15_8_1; the former is mapped to WORK$_IDEAL_MVIEW and the latter to WORK$_MVIEW_USAGE. The workload tables are created by the Oracle Trace Formatter when the data-collection-file (oraclesm.dat) is formatted by the user.
Action: Check whether the Formatter succeeded in formatting the data collection. Sometimes the V_192216243_F_5_E_14_8_1 (i.e WORK$_IDEAL_MVIEW) may not be created whereas the other table is created. The most likely cause of this is the init.ora parameters needed to invoke mview-rewrite are not enabled. Check your documentation for all the init.ora parameters which need to be set for mview-rewrite to occur. Another possibility is no GROUP BY queries were issued during the time the data was collected, in which case, run the Trace collection for a longer time to get a representative sampling of the queries issued in the data warehouse.

QSM-00514: the size of must-retain summaries exceeds specified space limit
Cause: The specified space limit is greater than the size of must-retain summaries.
Action: Reduce the number of must-retain summaries or increase the space limit

QSM-00515: operation cancelled by user
Cause: The operation has been cancelled by the user
Action: None

QSM-00516: illegal status detected for run
Cause: The run has encountered an illegal value in the status field of the mview$_adv_log table. This could be internal error or an application error.
Action: Contact Oracle Worldwide Support.

QSM-00517: Summary Advisor requires a COMPATIBLE setting of 8.1.0.0 or greater
Cause: The current database has a compatibility setting that is earlier than the supported server version.
Action: Adjust the instance parameter COMPATIBLE to 8.1.0.0 or greater.

QSM-00518: Java is not enabled. Please execute INITJVM.SQL and INITQSMA.SQL

Cause: The current database has has not be created or upgraded to support Java stored procedures. Summary Advisor requires Java stored procedures.
Action: Log into the database with SYSDBA privileges. Execute the INITJVM.SQL script which is found in the ORACLE home directory under JAVAVM. Next, execute the INITQSMA.SQL script found in the ADMIN directory under the ORACLE home.

QSM-00519: Summary Advisor is not installed. Please execute INITQSMA.SQL.

Cause: The current database has has not be created or upgraded to support Summary Advisor. Summary Advisor requires several Java stored procedures.
Action: Log into the database with SYSDBA privileges. Execute the INITQSMA.SQL script found in the ADMIN directory under the ORACLE home. **** **** Messages 520-700 are in the 9i Summary Advisor Java modules 701-708 are Hypothetical Workload generator journal messages

QSM-00710: data access error in module string

Cause: SQL Access Advisor detected a severe error while accessing the advisor repository.
Action: See the accompanying error message for appropriate actions.

QSM-00750: the specified value string for parameter string is invalid or contains an invalid item

Cause: The user attempted to set a task parameter using invalid data.
Action: Adjust the data value and retry the operation.

QSM-00751: the file string could not be opened for write access

Cause: Access Advisor could not create the script or report due to a file system error.
Action: Verify the location for file write access and retry the operation.

QSM-00752: the parameter string contains an invalid combination of options string

Cause: The user specified correct option keywords, but entered a combination that is not supported within Access Advisor.
Action: Validate the correct option usage and retry the operation.

QSM-00753: the specified value string is out of the acceptable range of string to string for parameter string

Cause: The user attempted to set a task parameter using invalid data.
Action: Adjust the data value and retry the operation.

QSM-00754: task string does not reference a valid workload and therefore cannot be executed

Cause: The user attempted to execute a advisor task that requires a workload.
Action: Specify a workload for the task and retry the operation.

QSM-00755: a set of workload statements already exists for workload string
Cause: The user attempted to save workload data into an existing workload that already contains data without specifying APPEND or REPLACE.
Action: Validate the import mode retry the operation.

QSM-00756: the specified workload string is being used by one or more advisor tasks
Cause: The user attempted to modify or delete a workload that is currently being used by another task.
Action: Remove the workload reference from the advisor task and retry the operation.

QSM-00757: the specified workload string is not referenced by task string
Cause: The user attempted to delete invalid workload reference from the task.
Action: Validate the workload reference and retry the operation.

QSM-00758: the specified parameter string is not valid for workload string
Cause: The user attempted to access a workload parameter that is does not exist for the specified workload. The parameter may be misspelled or the user selected a parameter that is not supported by the particular advisor.
Action: Validate the parameter name and retry the operation.

QSM-00759: the user string does not exist for the specified workload statement
Cause: The user attempted to add a new SQL statement with an invalid username.
Action: Adjust the name and retry the operation.

QSM-00760: the import mode string is invalid for the current operation
Cause: The user attempted to store data in the repository with an invalid import mode.
Action: Use one of the following valid values: NEW, APPEND, or REPLACE.

QSM-00761: the priority string is invalid for the current operation
Cause: The user attempted to store data in the repository with an invalid priority.
Action: Use one of the following valid values: 1, 2, 3.

QSM-00762: the specified Summary Advisor workload string does not exist
Cause: The user attempted to import an advisor workload from an invalid or non-existent Summary Advisor workload.
Action: Validate the Summary Advisor workload identifier and retry the operation.

QSM-00763: the owner string was not found while validating user-defined workload string.string
Cause: The user attempted to import an advisor workload from a user who may not access to the table.
Action: Validate the location of the user-defined workload.

QSM-00764: the column string was not found in the user-defined workload table string.string
Cause: The user attempted to import an advisor workload from a user table that does not contain the required column.
Action: Validate the user-defined workload table and retry the operation.
QSM-00765: cannot validate user-defined workload because table `string.string` is invalid.

**Cause:** The user attempted to import an advisor workload from a table that is not accessible.

**Action:** Validate the location of the user-defined workload.

QSM-00766: a SQL statement is required for the current workload operation

**Cause:** The user attempted to create an entry in a workload collection without specifying a SQL statement.

**Action:** Validate the SQL statement and retry the operation.

QSM-00767: a SQL cache is not available to user `string`

**Cause:** The user attempted to collect a workload from the SQL without having authorization.

**Action:** Validate the user account and retry the operation.

QSM-00768: the search condition is invalid for the requested operation

**Cause:** The user provided an invalid SEARCH argument to an Access Advisor workload operation. A search condition must be a valid SQL search condition using only the column names specified in the procedure documentation.

**Action:** Correct the search condition and retry the operation.

QSM-00769: the SQL statement `string` was not found for workload `string`

**Cause:** The user attempted to access a SQL statement that does not exist in the workload.

**Action:** Validate the SQL statement identifier and retry the operation.

QSM-00770: the specified workload `string` is already referenced by task `string`

**Cause:** The user attempted to add a workload reference to a task when the task already contains the reference.

**Action:** Validate the workload reference and retry the operation.

QSM-00771: the specified SQL statement cannot be stored in the workload because it has no valid table references

**Cause:** The user attempted to add a workload statement that contains table references that are either system-specified or user-specified invalid tables.

**Action:** Validate the workload statement and retry the operation.

QSM-00772: the specified SQL statement cannot be stored in the workload due to a statement error

**Cause:** The user attempted to add a workload statement that contains invalid SQL syntax or an invalid column reference.

**Action:** Validate the workload statement and retry the operation.

QSM-00773: the parameter `string` contains the invalid `string name `string``

**Cause:** The task or workload parameter contains a name that is either too long or does not exist in the database.

**Action:** Validate the parameter value and retry the operation.

QSM-00774: there are no SQL statements to process for task `string`
Cause: While executing, the specified task found no valid SQL statements to analyze. Possible causes are: an empty workload, table filtering, or username filtering.

Action: Validate the workload and the appropriate task parameters and retry the operation.

QSM-00775: the specified SQL statement cannot be stored in the workload due to invalid table references

Cause: The user attempted to add a workload statement that contains one or more invalid identifier for the parsing user.

Action: Validate the workload statement and retry the operation.

QSM-00776: the user-defined workload string is missing the following column: string

Cause: The user attempted to import a workload from an external table; however, the table does not contain all of the required columns.

Action: Adjust the target workload table and retry the operation.

QSM-00777: the specified directive string is unsupported at this time

Cause: The user attempted to create a directive that is not currently supported.

Action: Check the advisor documentation for valid directives.

QSM-00778: the specified output filename string is invalid or cannot be accessed

Cause: The user attempted to create a report or script in a file that cannot be written or created.

Action: Adjust the file name or directory and retry the operation.

QSM-00779: the specified directive conflicts with the existing directive string

Cause: The user attempted to add a directive that cannot operate with an existing directive.

Action: Check the advisor documentation for valid directives.

QSM-00780: the task string could not be executed because the workload string is being modified

Cause: While attempting to execute a task, Access Advisor checks for exclusive access to all of the referenced workloads. If any cannot be reserved, then the execution fails.

Action: Wait until the referenced workloads are free for exclusive access retry the operation.

QSM-00781: the specified value string is invalid for parameter string. Valid keywords are string

Cause: The user attempted to set a task parameter using invalid data.

Action: Adjust the data value and retry the operation

QSM-00782: the specified value string is an invalid date format for parameter string

Cause: The user attempted to set a task parameter using invalid date formatting directives.

Action: See the Oracle documentation for valid date-formatting and retry the operation.

QSM-00783: the specified value string contains an invalid date for parameter string
Cause: The user attempted to set a task parameter using invalid date formatting.
Action: A date literal must be in the form DD/MM/YYYY HH24:MI:SS.

QSM-00784: the string string referenced in the list string is invalid for parameter string
Cause: The user attempted to set a task parameter using an invalid username or table specification.
Action: Validate the object name and retry the operation.

QSM-00785: the directive string is not supported for task string at this time
Cause: The user attempted to add an invalid directive to the current task.
Action: Validate the directive and retry the operation.

QSM-00786: the name string is invalid for directive string
Cause: The user attempted to add a directive that contains an empty or invalid object name.
Action: Correct the name and retry the operation.

QSM-00787: the tablespace string is invalid for directive string
Cause: The user attempted to add a directive that contains an empty or invalid tablespace name.
Action: Correct the name and retry the operation.

QSM-00788: The requested recommendation does not support direct implementation
Cause: The user attempted to use the DBMS_ADVISOR.IMPLEMENT_TASK procedure to implement a SQL Access Advisor recommendation that cannot be implemented due to its complexity.
Action: The user must generate a script and implement the recommendation outside of the SQL Access Advisor.

QSM-00789: The requested recommendation requires user editing and cannot be implemented
Cause: The user attempted to use the DBMS_ADVISOR.IMPLEMENT_TASK procedure to implement a SQL Access Advisor recommendation that cannot be implemented because it requires additional scripting information from the user.
Action: The user must generate a script and edit the results.

QSM-00790: the workload string cannot be modified or changed because it is being used by task string
Cause: The user attempted to change or delete a workload that is referenced by an active task.
Action: Remove references to a workload from any tasks that reference that workload, unless the task is in its initial task state.

QSM-00791: the specified SQL statement cannot be stored in the workload because it contains unsupported statement type
Cause: The user attempted to add a workload statement that contains an invalid statement type. Supported statement types are INSERT, DELETE, UPDATE, SELECT and MERGE.
Action: Validate the workload statement and retry the operation.
QSM-00792: the specified SQL statement cannot be stored in the workload because one or more tables have missing statistics

**Cause:** The user attempted to add a workload statement that contains a table without statistics. Access Advisor requires all referenced tables to have valid statistics.

**Action:** Validate the workload statement and retry the operation.

QSM-00793: the specified SQL Tuning Set string does not exist

**Cause:** The user specified a SQL Tuning Set that has not been defined in the SQL Tuning Set repository.

**Action:** Correct the SQL Tuning Set name and retry the operation.

QSM-00794: the statement can not be stored due to a violation of the string filter

**Cause:** The user attempted to manually add a workload statement that failed a filter test. Manual statements must meet the same filtering guidelines as imported statements.

**Action:** Adjust the attributes or the filter and retry the operation.

QSM-00795: the SQL Tuning Set repository has not been implemented

**Cause:** The user attempted to collect a workload from a SQL Tuning Set repository that has not yet been implemented or enabled.

**Action:** Validate the existence of the repository and retry the operation.

QSM-00796: the specified SQL statement cannot be stored in the workload because table string does not have valid statistics

**Cause:** The user attempted to add a workload statement that references a table with missing statistics.

**Action:** Gather statistics for the referenced table and retry the operation.

QSM-00797: the specified workload string does not exist for the current user

**Cause:** The user attempted to reference an Access Advisor workload using a name that does not exist in the Advisor repository.

**Action:** Adjust the name and retry the operation.

QSM-00798: the specified workload string already exists

**Cause:** The user attempted to create the specified workload using a name that already exists in the Advisor repository. Task names must be unique to the database user.

**Action:** Adjust the name and retry the operation.

QSM-00799: the user-defined workload table string cannot be found

**Cause:** The user has attempted to import a workload from an external table that does not exist or cannot be accessed.

**Action:** Adjust the target workload table and retry the operation.

QSM-00800: the specified workload name string is invalid

**Cause:** The user has specified an invalid workload name.

**Action:** Adjust the target workload name and retry the operation.

QSM-00801: the specified username string is invalid

**Cause:** The user has specified an invalid username.

**Action:** Adjust the target username and retry the operation.
QSM-00802: An error occurred while implementing action string (string) string.
  Cause: While performing IMPLEMENT_TASK, a specific action operation failed.
  Action: Make the necessary adjustments as specified in the secondary message and retry the operation.

QSM-00803: The STORAGE_CHANGE parameter value string cannot be zero or negative for partial workloads.
  Cause: While performing EXECUTE_TASK, the user specified a STORAGE_CHANGE value that is incompatible with the type of workload data.
  Action: Set a positive STORAGE_CHANGE value.

QSM-00804: not enough space for mandatory access structures
  Cause: While performing EXECUTE_TASK, the user specified a STORAGE_CHANGE value that leaves no space for mandatory access structures, such as primary key indexes.
  Action: Set a greater STORAGE_CHANGE value.

QSM-00805: the specified recommendation string value string is invalid
  Cause: The user has specified an invalid value when attempting to change a recommendation attribute.
  Action: Adjust the target attribute value and retry the operation.

QSM-00806: the string parameter value must be specified when STORAGE_MODE is set to TOTAL
  Cause: While performing EXECUTE_TASK, the user specified a STORAGE_MODE of TOTAL, but failed to set the DEF_MVIEW_OWNER and DEF_INDEX_OWNER to valid owner names.
  Action: Set the specified owner to a valid name

QSM-00807: the ANALYSIS_SCOPE parameter value contains an incomplete or invalid combination of options.
  Cause: Though the ANALYSIS_SCOPE parameter supports several options, some combination are not supported.
  Action: Enter a valid combination of options.

QSM-00808: parameter string only permits a single keyword. Choose one of the following: string
  Cause: The user attempted to set a task parameter using multiple keywords.
  Action: Adjust the data value and retry the operation

QSM-00809: the selected number of recommendations exceeds the maximum value of string
  Cause: While executing GET_TASK_SCRIPT, an attempt was made to fetch a script having too many recommendations. The limit has been set in order to avoid possible performance and out-of-memory errors.
  Action: Select a small set of recommendations prior to fetching the script

QSM-00999: Advisor feature is not currently implemented
  Cause: The user attempted to execute an unsupported advisor operation.
  Action: Verify the availability of the operation.

QSM-01001: query rewrite not enabled
Cause: When query rewrite is disabled, no query rewrite will take place.
Action: Enable query rewrite with ALTER SESSION SET QUERY_REWRITE ENABLE command.

QSM-01002: no query rewrite when OPTIMIZER_MODE is rule based
Cause: Query rewrite did not occur because the OPTIMIZER_MODE was set to RULE.
Action: Change the optimizer mode using the OPTIMIZER_MODE parameter.

QSM-01003: no query rewrite on DDL queries
Cause: If query contains any data definition operations, no query rewrite will take place.
Action: None

QSM-01004: no query rewrite before view merging
Cause: Internal session parameter _QUERY_REWRITE_2 is set to FALSE
Action: Change session parameter with ALTER SESSION command.

QSM-01005: no query rewrite when query has slave SQL
Cause: Current process is a kxfx slave
Action: None

QSM-01006: query rewrite disabled for this query block
Cause: During query rewrite, certain view query blocks cannot be rewritten.
Action: None

QSM-01007: query has NOREWRITE hint
Cause: When query contains a NOREWRITE hint, no query rewrite will take place for that query block.
Action: Remove the NOREWRITE hint from the query

QSM-01008: no query rewrite for update queries
Cause: If a query or part of it has any DML update operations, no query rewrite will take place.
Action: None

QSM-01009: query rewritten with materialized view, string, using text match algorithm
Cause: The query was rewritten using a materialized view, because query text matched the definition of the materialized view
Action: None

QSM-01010: table(s) in the query not found in materialized view, string
Cause: If the materialized view does not reference the base tables found in the query, it cannot be used for rewrite
Action: None

QSM-01011: when heuristic rewrite not set, rewrite hint required
Cause: When using a stored outline, a rewrite hint is required for query rewrite
Action: None

QSM-01012: SAMPLE clause present in FROM
Cause: If a query contains a SAMPLE clause, query rewrite will not take place
Action: None

QSM-01013: nested aggregates or CONNECT BY/START WITH clause present
Cause: If the query contains nested aggregates, CONNECT BY clause, or START
WITH clause, query rewrite will not take place
Action: None

QSM-01014: top level operator in WHERE clause of the query is an OR
Cause: If the top-level operator in the WHERE clause is an OR and there is more
than one table in the FROM list, then query rewrite will not take place.
Action: None

QSM-01015: GROUP BY clause has non-columns
Cause: No query rewrite, if there is no valid column in the GROUP BY clause.
Action: None

QSM-01016: Query rewrite does not support, aggregate, string
Cause: No query rewrite, if the query contains any DISTINCT aggregates other
than COUNT, MIN or MAX.
Action: None

QSM-01017: aggregate argument cannot be converted to canonical form
Cause: Argument of each aggregate in the query needs to be convertible into a
canonical form for query rewrite.
Action: None

QSM-01018: single table materialized join view rewrite not required
Cause: Materialized join view is more expensive for rewrite than using the base
table
Action: None

QSM-01019: no suitable materialized view found to rewrite this query
Cause: There doesn't exist any materialized view in the dataware house that can
be used to rewrite this query.
Action: Consider creating a new materialized view.

QSM-01020: materialized view, string, is ineligible
Cause: Materialized view is probably disabled or stale.
Action: Consider enabling the materialized view for rewrite or refreshing it.

QSM-01021: materialized view, string, not found in the hint list
Cause: There is a rewrite hint list specified in the query, but this materialized view
is not among the hinted ones.
Action: Include this materialized view in the rewrite hint list.

QSM-01022: a more optimal materialized view than string was used to rewrite
Cause: Query Rewrite always chooses the most optimal materialized view based
on certain parameters, such as cardinality of the materialized view, number of
joins etc. The materialized view specified was found to be less optimal.
Action: To force using a materialized view, consider using a rewrite hint.
QSM-01023: materialized view, string, has GRANT errors
   Cause: Materialized view probably has some metadata errors.
   Action: Consider recreating it.

QSM-01024: materialized view, string, has unknown compile errors
   Cause: Materialized view probably has some metadata errors.
   Action: Consider recreating it.

QSM-01025: materialized view, string, not found
   Cause: The specified materialized view is not found in the database.
   Action: Check the spelling or create a new materialized view

QSM-01026: query rewrite is disabled for, string
   Cause: Query rewrite could not use this materialized view, because query rewrite
   was not enabled for it.
   Action: Enable query rewrite for the materialized view with ALTER
   MATERIALIZED VIEW "mv" ENABLE QUERY REWRITE command, where "mv"
   is the name of the materialized view.

QSM-01027: materialized view, string, is unusable
   Cause: Materialized view probably has some metadata errors.
   Action: Consider recreating it.

QSM-01028: materialized view, string, is currently being refreshed
   Cause: Materialized view cannot be used for query rewrite while it is being
   refreshed
   Action: Rerun the query, after the refresh operation is completed.

QSM-01029: materialized view, string, is stale in ENFORCED integrity mode
   Cause: A stale materialized view cannot be used for query rewrite when the
   query rewrite integrity mode is set to ENFORCED.
   Action: Refresh the materialized view or alter the rewrite integrity mode with
   ALTER SESSION QUERY_REWRITE_INTEGRITY = STALE TOLERATED
   command.

QSM-01030: materialized view, string, has PL/SQL functions in ENFORCED
   integrity mode
   Cause: A materialized view with PL/SQL functions in its definition cannot be
   used for query rewrite when query rewrite integrity is set to ENFORCED.
   Action: Consider running the query in STALE TOLERATED mode.

QSM-01031: materialized view, string, is stale in TRUSTED integrity mode
   Cause: A stale materialized view cannot be used for query rewrite when the
   query rewrite integrity mode is set to TRUSTED.
   Action: Refresh the materialized view or alter the rewrite integrity mode with
   ALTER SESSION QUERY_REWRITE_INTEGRITY = STALE TOLERATED
   command.

QSM-01032: materialized view, string, not found
   Cause: There was no associated metadata for the materialized view.
   Action: Check the spelling and re-run the query.
QSM-01033: query rewritten with materialized view, string
  Cause: The specified materialized view was used to rewrite the given query.
  Action: None

QSM-01034: materialized view, string, needs a dimension level to join table, string
  Cause: One or more hierarchical relationship(s) in the table(s) could not be established.
  Action: Consider adding a level in the dimension to provide the missing intra-table relationships.

QSM-01035: a row level security policy exists on this table
  Cause: Any row level security policy that may exist on a base-table prevents exact text match query rewrite.
  Action: None

QSM-01036: unmatched column, string, present in query after view merging
  Cause: Clearing the columns after view merging failed due to some reasons bug??
  Action: None

QSM-01037: Query Rewrite failed to allocate the necessary query join graph
  Cause: Join graph allocation and initialization failed, possibly due to one or more undetermined operand(s) in the query expression.
  Action: None

QSM-01038: logical operator(s) could not be processed
  Cause: One or more logical operator(s) in the query predicates could not be processed, possibly due to invalid operator(s).
  Action: None

QSM-01039: selection present on right hand side of an outer join
  Cause: Query cannot be rewritten if any predicate contains a selection on the right hand side of an outer join.
  Action: None

QSM-01040: match between the materialized view (string) and query join graphs failed
  Cause: Query rewrite will not take place if the joins in the query and the materialized view do not have any match.
  Action: None

QSM-01041: materialized view, string, does not match with a measure in the query
  Cause: If a measure (such as SUM, AVERAGE) in the query cannot be matched or computed from the materialized view, it will not be used for rewrite.
  Action: None

QSM-01042: anchor and matching join arc check failed for string
  Cause: If there is a lossy join in the materialized view that doesn’t exist in the query, query rewrite will not take place.
  Action: None
QSM-01043: join back attempted on a table to the RHS of a semi or anti join for string
  Cause: Query Rewrite will not occur if a join back is required to a table that appears to the right hand side of a semi or anti-join.
  Action: None

QSM-01044: join back attempted on a view for string
  Cause: Query Rewrite will not occur if a join back to a table is required to find any missing columns.
  Action: None

QSM-01046: complex join back on correlated columns not allowed (string)
  Cause: Query Rewrite will not occur if a join back is required on a column that is referenced by a sub-query.
  Action: None

QSM-01047: complex join back on non-MAV rewrite not allowed (string)
  Cause: Query Rewrite can occur by means of a complex join back only during a MAV rewrite.
  Action: None

QSM-01048: join back level(s) not present (string)
  Cause: Query Rewrite requires joining back to a level of a dimension to find a missing information.
  Action: Consider creating a dimension.

QSM-01049: semi-join check failed for materialized view, string
  Cause: If there is a semi join in the query, then Query Rewrite will create (select distinct <pk-list>, <ref-col> from mjv) where <pk-list> is the list of rowids/pk of all mjv tables that don’t correspond to a right side of a semi-join and <ref-col> are their columns. Query Rewrite will not occur if a join from the materialized view cannot match the semi-join from the query.
  Action: None

QSM-01050: roll-up check failed for materialized view, string
  Cause: A column in the query cannot be computed from the materialized view.
  Action: Consider creating a dimension to supply the missing information

QSM-01051: no support for rollup when a window function is present on the column
  Cause: No query rewrite if a window function is present on a column that requires a roll-up to compute a measure.
  Action: None

QSM-01052: referential integrity constraint on table, string, not VALID in ENFORCED integrity mode
  Cause: A join present in the materialized view requires validated primary/foreign key constraints in ENFORCED query rewrite integrity mode.
  Action: Validate the constraint or change the integrity mode with ALTER SESSION SET QUERY_REWRITE_INTEGRITY = STALE_TOLERATED command.
QSM-01053: NORELY referential integrity constraint on table, string, in TRUSTED/STALE TOLERATED integrity mode
   Cause: A join present in the materialized view requires RELY mode to be set on the primary/foreign key constraints.
   Action: Set the RELY mode with ALTER TABLE <table> MODIFY CONSTRAINT <constraint> RELY command. Alternatively validate the constraint with ALTER TABLE <table> VALIDATE CONSTRAINT <constraint>.

QSM-01054: no join match between query and summary, string
   Cause: There are no common joins between the query and the materialized view
   Action: None

QSM-01055: Query Rewrite failed to allocate the necessary materialized view join graph
   Cause: Join graph allocation and initialization failed, possibly due to one or more undetermined operand(s).
   Action: None

QSM-01056: no query rewrite for this DDL expression
   Cause: Some SELECT statements which are part of a DDL expression may be eligible for rewrite. These include CREATE AS SELECT and CREATE OUTLINE statements. The given query expression is a DDL expression, which doesn't fall in this category.
   Action: None

QSM-01057: no query rewrite for this DML expression
   Cause: Current DML is being done using an updatable view, so it is not eligible for rewrite.
   Action: None

QSM-01058: MV, string, does not have column, string, for a joinback
   Cause: A GROUP BY column in the query is not present in the GROUP BY clause of the materialized view. This usually requires a join back to a third table.
   Action: None

QSM-01059: HAVING clause in the query block is malformed
   Cause: An illegal HAVING clause has been specified in the query.
   Action: Correct the query syntax and run the query again.

QSM-01060: illegal subquery in the HAVING clause
   Cause: When a HAVING clause has a subquery, then any references to the tables in the outer query should only reference the tables in the GROUP BY clause.
   Action: Correct error in the syntax and rerun the query.

QSM-01061: illegal query expression
   Cause: An illegal query was specified. Specifically one of the following criteria was not satisfied: (a) All (non-constant, non-aggregate) SELECT expressions in the query should be made up of group expressions. (b) All column references in the HAVING clause should come from the GROUP BY expressions. (c) If there is an ORDER BY clause, then all column references should come from the GROUP BY or SELECT clause, depending on whether the query selects DISTINCT.
Action: Correct error in the syntax and rerun the query.

QSM-01062: query has one or more manual partition(s)
    Cause: Query rewrite is not possible if query has any manual partitions.
    Action: None

QSM-01063: query has a dictionary table or view
    Cause: Query rewrite is not allowed if query references any dictionary tables/views.
    Action: None

QSM-01064: query has a fixed table or view
    Cause: Query rewrite is not allowed if query references any fixed tables/views
    Action: None

QSM-01065: materialized view, string, cannot compute measure, string, in the query
    Cause: If the materialized view cannot compute a measure in the query using the measures in its definition, then query rewrite will not occur.
    Action: None

QSM-01066: materialized view, string, does not have the column, string, from query
    Cause: Query rewrite will not occur, if the materialized view cannot provide all the columns that the query has
    Action: None

QSM-01067: materialized view, string, cannot support the query measure, string
    Cause: An attempt was made to push a grouping function through an expression specified in the query to transform a measure. Query rewrite will not occur if this measure transformation failed.
    Action: None

QSM-01068: no dimensions present
    Cause: An attempt was made to load a dimension from the datawarehouse, but there were no dimensions present.
    Action: None

QSM-01069: summary join graph for, string, does not have table, string
    Cause: An attempt to locate an object that is part of a join failed.
    Action: None

QSM-01070: equivalence class manager was not found
    Cause: An equivalence class manager is required to compute the transitive closure for the columns in an equivalence class.
    Action: None

QSM-01071: query rewrite not possible because a join in materialized view % with table % has eliminated some rows found in query
    Cause: All lossy joins in the materialized view must be present in the query for query rewrite to occur.
    Action: None
QSM-01072: materialized view, *string*, and query have different joins between tables, *string*
  
  **Cause:** Anchors, if any, in the MV and query match. But the joins between these anchors in the MV and query are different.
  
  **Action:** None

QSM-01073: query rewrite not possible because materialized view, *string*, has a join not found in query
  
  **Cause:** Query rewrite may not be possible if the materialized view has some joins that query does not have
  
  **Action:** None

QSM-01074: query rewrite not possible because materialized view, *string*, and query have different number of joins between tables, *string*
  
  **Cause:** Query rewrite may not be possible if the query has some joins that the materialized view does not have between the same pair of tables.
  
  **Action:** None

QSM-01075: materialized view, *string*, does not support aggregate function, *string*
  
  **Cause:** The specified aggregate function is not found in the materialized view.
  
  **Action:** None

QSM-01076: no materialized join view was found
  
  **Cause:** To support an MJV rewrite, we require a materialized join view.
  
  **Action:** None

QSM-01077: materialized view, *string*, is grouping at a higher level than query
  
  **Cause:** If a query column, which is not present in the materialized view, can be obtained by a rollup within the materialized view, then it should group at a higher level than the materialized view.
  
  **Action:** None

QSM-01078: materialized view, *string*, is marked invalid
  
  **Cause:** The materialized view’s kglobsta field has KGLSINV bit set.
  
  **Action:** None

QSM-01079: DML operation occurred on a table referenced by MV, *string*
  
  **Cause:** If any dependent tables of a materialized view undergoes a DML operation, query rewrite may be restricted depending on the query rewrite integrity mode for the session. In this situation, query rewrite will take place only if the rewrite integrity mode is STALE_TOLERATED.
  
  **Action:** Consider refreshing the materialized view changing the rewrite integrity mode to STALE_TOLERATED.

QSM-01080: invalid dimension, *string*
  
  **Cause:** This dimension table has authorization or compilation problems.
  
  **Action:** None

QSM-01081: no primary key or row id found for table, *string*, in MV, *string*
  
  **Cause:** In order to obtain a missing column, the materialized view needs to join back to the above table. But it lacks the primary key or rowid for the table.
  
  **Action:** None
QSM-01082: Joining materialized view, string, with table, string, not possible
   
   **Cause:** A column in the query is not found in the summary. To obtain the column, a join back of materialized view to the table by means of either the primary key, foreign key or rowid of the table is required. The specified materialized view does not have the primary key, foreign key or rowid of the table to perform the join operation.
   
   **Action:** Consider building a dimension-table to provide the missing information.

QSM-01083: query text not available - possible inline view
   
   **Cause:** During the query rewrite transformation, original query was possibly transformed into an inline view.
   
   **Action:** None

QSM-01084: materialized view string has an anchor table string not found in query
   
   **Cause:** A table in a materialized view is an anchor, (a) if it is not joined to any other table or (b) joined to other tables but each of its joins is either lossy or lossless with the above table being child-side table. If an anchor which is present in the materialized view is not found in the query, then query rewrite will not take place.
   
   **Action:** None

QSM-01085: materialized view, string, has a lossy join between tables, string
   
   **Cause:** There are no primary key, foreign key constraints between these tables. But query rewrite is still possible if the lossy join between the above tables also appear in the query
   
   **Action:** None

QSM-01086: dimension(s) not present or not used in ENFORCED integrity mode
   
   **Cause:** Query rewrite does not use dimensions in ENFORCED query rewrite integrity mode. If a suitable dimension is present, consider chancing the current integrity mode to either TRUSTED or STALE_TOLERATED by using ALTER SESSION SET QUERY_REWRITE_INTEGRITY = command.
   
   **Action:** None

QSM-01087: query grouping on a column that cannot be derived from materialized view, string
   
   **Cause:** Query is grouping on undetermined columns.
   
   **Action:** None

QSM-01089: an inline view in the query does not have a materialized view
   
   **Cause:** General query rewrite is not possible if an inline view in the query does not have a matching materialized view in the meta data.
   
   **Action:** None

QSM-01090: no query rewrite after view merging
   
   **Cause:** Internal session parameter _QUERY_REWRITE_1 is set to FALSE
   
   **Action:** Change session parameter with ALTER SESSION command.

QSM-01091: cost based optimizer found query rewrite is more expensive
   
   **Cause:** When cost based optimizer is ON, cost of the rewritten cursor is compared to the cursor generated without query rewrite, and the cheaper one is chosen for execution.
Action: None

QSM-01092: mvj tries to rewrite a semi-join and primary key or rowid missing
Cause: Materialized join view tries to rewrite a semi-join (IN sub-query) and the primary keys or rowids of left tables of semi-joins are missing from MJV.
Action: None

QSM-01093: anti-join marker not found in materialized join view
Cause: Materialized join view has outer join while the query inner join. For rewrite to succeed MV must have an anti-join marker like the rowid or primary key of the right tables of outer join
Action: None

QSM-01094: outer-join filter not found in materialized join view
Cause: Materialized join view has outer join while the query inner join. For rewrite to succeed MV must have an anti-join marker like the rowid or primary key of the right tables of outer join
Action: None

QSM-01095: no suitable grouping_id found in MV with grouping sets
Cause: If materialized aggregate view contains grouping sets, then it also must contain the grouping_id() function. This function must contain all columns in the MV GROUP BY.
Action: None

QSM-01096: Materialized view with grouping sets contains duplicates
Cause: Materialized view with grouping sets contains duplicates and no rewrite is supported for it. For example, GROUP BY GROUPING SET ((a), (a)) is not supported for rewrite.
Action: None

QSM-01097: Materialized view with grouping sets has too long key
Cause: Materialized view with grouping sets has more that 64 different keys in its GROUP BY. No rewrite is supported then.
Action: None

QSM-01098: mv string clause more restrictive than query string clause
Cause: The materialized view contains a selection condition in the WHERE or HAVING clause that is more restrictive than the corresponding selection condition in the request query.
Action: Change the selection criteria in the request query to be at least as restrictive as the selection criteria in the materialized view, or drop and recreate the materialized view using less restrictive selection criteria.

QSM-01099: non-tolerated reference to stale portion of mv for table string
Cause: The materialized view is partially stale. It is stale with respect to one or more partitions in one or more of its detail tables. The request query references one or more such detail partitions.
Action: (1) Change the selection criteria of the request to restrict the query to only the fresh portion of the materialized view, or (2) ALTER [SYSTEM | SESSION] QUERY_REWRITE_INTEGRITY = STALE_TOLERATED or (3) refresh the materialized view.
QSM-01100: containment check failed for mv, string
  Cause: The materialized view contains a selection condition in the WHERE or
  HAVING clause that is more restrictive than the corresponding selection condition
  in the request query.
  Action: Change the selection criteria in the request query to be at least as
  restrictive as the selection criteria in the materialized view, or drop and recreate
  the materialized view using less restrictive selection criteria.

QSM-01101: rollup(s) took place on mv, string
  Cause: If query’s GROUP BY has one of the higher levels of columns found in the
  materialized view, then the lower level columns in the materialized view will be
  rolled up to compute the desired results.
  Action: None

QSM-01102: materialized view, string, requires join back to table, string, on column, string
  Cause: A column in the query does not appear in the materialized view. Query
  rewrite will try to obtain this column from the base table, by doing a join back to
  that column with the MV.
  Action: None

QSM-01103: there is a remote table, string, referenced in the query
  Cause: Query rewrite does not support query with remote tables.
  Action: None

QSM-01104: query is using flashback
  Cause: Query rewrite does not support flashback.
  Action: None

QSM-01105: no primary key or row id in MV, string, is found for table, string
  Cause: In order to obtain a missing column, the materialized view needs to join
  back to the above table. But it lacks the primary key or rowid for the table.
  Action: None

QSM-01106: materialized view, string, is stale with respect to some partition(s) in
  the base table(s)
  Cause: Query is requesting some data from the MV that are stale with respect to
  some partitions in the base tables due to some updates.
  Action: refresh the stale partitions and rerun the query

QSM-01107: Partition Containment Tracking (PCT) rewrite is not allowed
  Cause: Query rewrite is disabled for PCT through a session parameter
  Action: None

QSM-01108: maximum number of disjuncts exceeded in the query string
  Cause: Query rewrite engine cannot process the query if the number of disjuncts
  (OR's)in the WHERE clause exceeds the maximum allowed number. The number
  of disjuncts in the query and the maximum allowed disjuncts are given at the end
  of the message in the form of (no of disjuncts in query, maximum disjuncts
  allowed).
  Action: None
QSM-01109: while rewriting with MV, string, table, string, migrated to query delta
   Cause: There was an unmatched join on the MV, so a table involved in the join
   was pushed to the query delta to see if the query can be rewritten
   Action: None

QSM-01110: query rewrite not possible with materialized view string because it
   contains a join between tables (string) that is not present in the query and that
   potentially eliminates rows needed by the query
   Cause: All lossy joins in the materialized view must be present in the query for
   query rewrite to occur.
   Action: None

QSM-01111: no partition key or partition marker found in MV, string
   Cause: In order to do query rewrite with fresh partitions of an MV, the MV should
   have a partition key or partition marker.
   Action: None

QSM-01112: WHERE clause of mv, string, is more restrictive than query
   Cause: The materialized view contains a selection condition in the WHERE clause
   that is more restrictive than the corresponding selection condition in the request
   query.
   Action: Change the selection criteria in the request query to be at least as
   restrictive as the selection criteria in the materialized view, or drop and recreate
   the materialized view using less restrictive selection criteria.

QSM-01113: HAVING clause of mv, string, is more restrictive than query
   Cause: The materialized view contains a selection condition in the HAVING
   clause that is more restrictive than the corresponding selection condition in the
   request query.
   Action: Change the selection criteria in the request query to be at least as
   restrictive as the selection criteria in the materialized view, or drop and recreate
   the materialized view using less restrictive selection criteria.

QSM-01115: rollup took place on a column with a window function
   Cause: There was a rollup to aggregate the data on a column with a window
   function.
   Action: None

QSM-01116: window function computability checks failed
   Cause: The window function in the query could not be computed from the
   materialized view.
   Action: None

QSM-01120: recursive rewrite not allowed here
   Cause: This query was possibly rewritten with an equivalence which doesn't
   allow further rewrites.
   Action: None

QSM-01121: materialized view, string, is TRUSTED in ENFORCED integrity mode
   Cause: A stale materialized view created with USING TRUSTED CONSTRAINTS
   clause cannot be used when the query rewrite integrity mode is set ENFORCED.
**Action:** Alter materialized view such that it has the ENFORCED CONSTRAINTS

```
ALTER MATERIALIZED VIEW <mv> REFRESH USING ENFORCED CONSTRAINTS
```

**QSM-01123: self-join algorithm could not resolve multiple instances**

**Cause:** The generalized self-join algorithm could not resolve the multiple instances, likely due to mismatch in joins or measures

**Action:** Consider using aliases in the query to match with the aliases in the materialized view

**QSM-01124: set operator materialized view, string, doesn't have a marker column**

**Cause:** The specified set operator materialized view does not have a marker column.

**Action:** Add a marker column to the specified materialized view.

**QSM-01125: a more optimal set operator materialized view than string was used to rewrite**

**Cause:** Query Rewrite always chooses the most optimal set operator materialized view based on parameters, such as cardinality of the set operator materialized view, number of branches that the set operator materialized view can rewrite etc. The set operator materialized view specified was found to be less optimal.

**Action:** To force using a set operator materialized view, consider using a rewrite hint.

**QSM-01126: query rewritten with set operator materialized view, string**

**Cause:** The specified set operator materialized view was used to rewrite the given query.

**Action:** None

**QSM-01127: query rewritten with materialized view(s), string**

**Cause:** The query was succesfully rewritten with multiple MVs

**Action:** None

**QSM-01128: Multi MV rewrite is disabled**

**Cause:** When multimv query rewrite is disabled, no multimv query rewrite will take place.

**Action:** Enable multimv query rewrite with ALTER SESSION SET "_MULTIMV_QUERY_REWRITE_ENABLED" = true .

**QSM-01129: query has NO_MULTIMV_REWRITE hint**

**Cause:** When the query has this hint no multimv rewrite will be tried for this query

**Action:** Remove hint from query

**QSM-01130: Multi MV rewrite not allowed if at least one query block has no MVs**

**Cause:** When only multimv query rewrite is enabled, every query block should have at least one MV in it's from clause

**Action:** Disable only multimv query rewrite with ALTER SESSION SET "_ONLY_MULTIMV_QUERY_REWRITE_ENABLED" = false .

**QSM-01131: query has ONLY_MULTIMV_REWRITE hint**

**Cause:** When the query has this hint no multimv rewrite will be done if the query has a query block with no MVs in the from clause
**Action:** Remove hint from query

**QSM-01132: query has a named array type column**

*Cause:* When the query has a column of named array type, query rewrite cannot be done

*Action:* None

**QSM-01133: query has an ADT column**

*Cause:* When the query has a column of ADT type, query rewrite cannot be done

*Action:* None

**QSM-01134: query has a hidden or nested table column**

*Cause:* When the query has a hidden or nested table column, query rewrite cannot be done

*Action:* None

**QSM-01135: query has an LOB column**

*Cause:* When the query has a column stored in LOB, query rewrite cannot be done

*Action:* None

**QSM-01136: query has a nested table column**

*Cause:* When the query has a nested table column, query rewrite cannot be done

*Action:* None

**QSM-01137: dimension level, string, marked as SKIP WHEN NULL**

*Cause:* Join back is not possible on a level marked as SKIP WHEN NULL in a dimension

*Action:* None

**QSM-01150: query did not rewrite**

*Cause:* See the other messages from explain_rewrite() for explanation”

*Action:* None

**QSM-01168: query rewrite not possible when Fine Grain Auditing is present on a base table**

*Cause:* Query rewrite could not take place because Fine Grain Auditing (FGA) was present on a base table in the query

*Action:* None

**QSM-01169: query rewrite not possible for a CREATE or ALTER VIEW statement**

*Cause:* Query rewrite could not take place because the incoming query was either a CREATE or ALTER VIEW statement

*Action:* None

**QSM-01202: query rewrite not possible when OPTIMIZER_MODE is set to rule based**

*Cause:* Query rewrite did not occur because the OPTIMIZER_MODE was set to RULE.

*Action:* Change the optimizer mode using the OPTIMIZER_MODE parameter.

**QSM-01203: query rewrite not possible on DDL queries**
Cause: If query contains any data definition operations, no query rewrite will take place.
Action: None

QSM-01204: query rewrite not possible before view merging
Cause: Internal session parameter _QUERY_REWRITE_2 is set to FALSE
Action: Change session parameter with ALTER SESSION command.

QSM-01205: query rewrite not possible when query has slave SQL
Cause: Current process is a kxfx slave
Action: None

QSM-01207: query rewrite not possible when query has a NOREWRITE hint
Cause: When query contains a NOREWRITE hint, no query rewrite will take place for that query block.
Action: Remove the NOREWRITE hint from the query

QSM-01208: query rewrite not possible for update queries
Cause: If a query or part of it has any DML update operations, no query rewrite will take place.
Action: None

QSM-01209: query rewritten with materialized view, string, using text match algorithm
Cause: The query was rewritten using a materialized view, because query text matched the definition of the materialized view
Action: None

QSM-01210: query rewrite not possible because no common table(s) found between materialized view string and query
Cause: If the materialized view does not reference the base tables found in the query, it cannot be used for rewrite
Action: None

QSM-01211: query rewrite not possible when stored outline does not have a rewrite hint
Cause: When using a stored outline, a rewrite hint is required for query rewrite
Action: None

QSM-01212: query rewrite not possible when SAMPLE clause is present in FROM
Cause: If a query contains a SAMPLE clause, query rewrite will not take place
Action: None

QSM-01213: query rewrite not possible when nested aggregates or CONNECT BY clause or START WITH clause or recursive WITH clause is present
Cause: If the query contains nested aggregates, CONNECT BY clause, or START WITH clause, or recursive with clause, query rewrite will not take place
Action: None

QSM-01214: query rewrite not possible if OR is the top level operator in query WHERE clause
**Cause:** If the top-level operator in the WHERE clause is an OR and there is more than one table in the FROM list, then query rewrite will not take place.

**Action:** None

**QSM-01215:** query rewrite not possible when query GROUP BY clause has non-columns

**Cause:** No query rewrite, if there is no valid column in the GROUP BY clause.

**Action:** None

**QSM-01218:** query rewrite is likely more expensive due to a single table match between materialized view and query

**Cause:** Materialized join view is more expensive for rewrite than using the base table.

**Action:** None

**QSM-01219:** no suitable materialized view found to rewrite this query

**Cause:** There doesn’t exist any materialized view in the database that can be used to rewrite this query.

**Action:** Consider creating a new materialized view.

**QSM-01220:** materialized view, string, is disabled, stale or unusable

**Cause:** Materialized view is probably disabled or stale.

**Action:** Consider enabling the materialized view for rewrite or refreshing it.

**QSM-01222:** materialized view string is less optimal than string

**Cause:** Query Rewrite always chooses the most optimal materialized view based on certain parameters, such as cardinality of the materialized view, number of joins etc. The materialized view specified was found to be less optimal.

**Action:** To force using a materialized view, consider using a rewrite hint.

**QSM-01241:** query measure cannot be derived from the materialized view string

**Cause:** If a measure (such as SUM, AVERAGE) in the query cannot be matched or computed from the materialized view, it will not be used for rewrite.

**Action:** None

**QSM-01244:** join back could not be done on a view for string

**Cause:** Query Rewrite will not occur if a join back to a table is required to find any missing columns.

**Action:** None

**QSM-01246:** join back on correlated columns not allowed (string)

**Cause:** Query Rewrite will not occur if a join back is required on a column that is referenced by a sub-query.

**Action:** None

**QSM-01247:** join back cannot be done on a materialized view that does not have an aggregate (string)

**Cause:** Query Rewrite can occur by means of a complex join back only during a MAV rewrite.

**Action:** None

**QSM-01248:** materialized view does not have the join back level(s) (string)
Query Rewrite requires joining back to level of a dimension to find missing information.

Action: Consider creating a dimension.

QSM-01251: query rewrite cannot perform rollup due to the presence of a window function

Cause: No query rewrite if a window function is present on a column that requires a roll-up to compute a measure.

Action: None

QSM-01256: query rewrite not possible for this DDL statement

Cause: Some SELECT statements which are part of a DDL expression may be eligible for rewrite. These include CREATE AS SELECT and CREATE OUTLINE statements. The given query expression is a DDL expression, which doesn't fall in this category.

Action: None

QSM-01257: query rewrite not possible for this DML statement

Cause: Current DML is being done using an updatable view, so it is not eligible for rewrite.

Action: None

QSM-01263: query rewrite not possible when query references a dictionary table or view

Cause: Query rewrite is not allowed if query references any dictionary tables/views.

Action: None

QSM-01271: query rewrite not possible because a join in materialized view string with table string has eliminated some rows found in query

Cause: A join from the materialized view to any table that eliminates some rows should be be present in the query. Otherwise query rewrite will not occur.

Action: None

QSM-01273: query rewrite not possible because materialized view string has a join not found in query

Cause: Query rewrite may not be possible if the materialized view has some joins that query does not have

Action: None

QSM-01274: query rewrite not possible because materialized view string and query have different number of joins between tables string

Cause: Query rewrite may not be possible if the query has some joins that the materialized view does not have between the same pair of tables.

Action: None

QSM-01279: query rewrite not possible because DML operation occurred on a table referenced by materialized view string

Cause: If any dependent tables of a materialized view undergoes a DML operation, query rewrite may be restricted depending on the query rewrite integrity mode for the session. In this situation, query rewrite will take place only if the rewrite integrity mode is STALE_TOLERATED.
Action: Consider refreshing the materialized view changing the rewrite integrity mode to STALE_TOLERATED.

QSM-01281: query rewrite not possible because either a primary key or a row id is required to join table string with MV string
Cause: In order to obtain a missing column, the materialized view needs to join back to the above table. But it lacks the primary key or rowid for the table.
Action: None

QSM-01284: materialized view string has an anchor table string not found in query
Cause: A table in a materialized view is an anchor, (a) if it is not joined to any other table or (b) joined to other tables but each of its joins is not guaranteed to provide all the rows or joined with the above table being child-side table. If an anchor which is present in the materialized view is not found in the query, then query rewrite will not take place.
Action: None

QSM-01293: anti-join marker not found in materialized view with joins
Cause: Materialized view has outer join while the query has inner join. For rewrite to succeed MV must have an anti-join marker like the rowid or primary key of the right tables of outer join
Action: None

QSM-01295: no suitable grouping_id found in materialized view with grouping sets
Cause: If materialized view contains grouping sets, then it also must contain the grouping_id() function. This function must contain all columns in the MV GROUP BY.
Action: None

QSM-01296: query rewrite not possible because materialized view contains duplicate grouping sets
Cause: Materialized view with grouping sets contains duplicates and no rewrite is supported for it. For example, GROUP BY GROUPING SET ((a), (a)) is not supported for rewrite.
Action: None

QSM-01297: query rewrite not possible because materialized view with grouping sets has more than 176 different keys
Cause: Materialized view with grouping sets has more that 176 different keys in its GROUP BY. No rewrite is supported then.
Action: None

QSM-01298: materialized view string clause more restrictive than query string clause
Cause: The materialized view contains a selection condition in the WHERE or HAVING clause that is more restrictive than the corresponding selection condition in the request query.
Action: Change the selection criteria in the request query to be at least as restrictive as the selection criteria in the materialized view, or drop and recreate the materialized view using less restrictive selection criteria.

QSM-01299: query rewrite not possible because materialized view string is partially stale
**Cause:** The materialized view is partially stale. It is stale with respect to one or more partitions in one or more of its detail tables. The request query references one or more such detail partitions.

**Action:** (1) Change the selection criteria of the request to restrict the query to only the fresh portion of the materialized view, or (2) ALTER [SYSTEM | SESSION] QUERY_REWRITE_INTEGRITY = STALE_TOLERATED or (3) refresh the materialized view.

**QSM-01303: query rewrite not possible because query references a remote table**

**Cause:** Query rewrite does not support query with remote tables.

**Action:** None

**QSM-01304: query rewrite not possible because query is using flashback**

**Cause:** Query rewrite does not support flashback.

**Action:** None

**QSM-01307: Partition Containment Tracking (PCT) rewrite is not allowed**

**Cause:** Query rewrite is disabled for PCT through a session parameter

**Action:** None

**QSM-01308: number of 'OR's in query exceeded the maximum value**

**Cause:** Query rewrite engine cannot process the query if the number of disjuncts (OR's) in the WHERE clause exceeds the maximum allowed number. The number of disjuncts in the query and the maximum allowed disjuncts are given at the end of the message in the form of (no of disjuncts in query, maximum disjuncts allowed).

**Action:** None

**QSM-01316: window function could not be computed from materialized view**

**Cause:** The window function in the query could not be computed from the materialized view.

**Action:** None

**QSM-01321: query rewrite not possible because materialized view has TRUSTED constraints in ENFORCED integrity mode**

**Cause:** A stale materialized view created with USING TRUSTED CONSTRAINTS clause cannot be used when the query rewrite integrity mode is set ENFORCED.

**Action:** Alter materialized view such that it has the ENFORCED CONSTRAINTS

ALTER MATERIALIZED VIEW <mv> REFRESH USING ENFORCED CONSTRAINTS

**QSM-01332: query rewrite not possible because query has a named array type column**

**Cause:** When the query has a column of named array type, query rewrite cannot be done

**Action:** None

**QSM-01333: query rewrite not possible because query has an ADT column**

**Cause:** When the query has a column of ADT type, query rewrite cannot be done

**Action:** None
QSM-01334: query rewrite not possible because query has a hidden or nested table column
   Cause: When the query has a hidden or nested table column, query rewrite cannot be done
   Action: None

QSM-01335: query rewrite not possible because query has an LOB column
   Cause: When the query has a column stored in LOB, query rewrite cannot be done
   Action: None

QSM-01336: the materialized view you specified (string) was not used to rewrite the query
   Cause: A materialized view specified by the user in the input was not used to rewrite the query, either because query rewrite failed or another more optimal materialized view was used to rewrite.
   Action: None

QSM-01339: rewrite not supported on inline view aggregate
   Cause: Query has an inline view with an aggregate. Such inline views cannot be matched to any inline views in materialized views.
   Action: None

QSM-01340: no inline view match found between query and materialized view(s)
   Cause: Query's inline view does not have a match with any inline views in the materialized view
   Action: None

QSM-01341: joins between materialized view string and query inline views are different
   Cause: There is a mismatch between the joins in the query and materialized view inline views
   Action: None

QSM-01342: query rewrite not possible because query has full outer join
   Cause: When query block has a table involved in full outer join, query rewrite cannot be done
   Action: None

QSM-01343: general inline view rewrite not possible on remote objects
   Cause: The general inline view rewrite could not take place because the query had remote objects
   Action: None

QSM-01344: general inline view rewrite not possible on this WHERE clause construct
   Cause: The general inline view rewrite was not supported with this WHERE clause construct
   Action: None

QSM-01345: general inline view rewrite not possible when inline view has subquery
Cause: The general inline view rewrite could not take place because there were subqueries
Action: None

QSM-01346: general inline view rewrite not possible with nested inline views
Cause: General inline view rewrite cannot take place with nested inline views
Action: None

QSM-01347: a query inline view could not be matched with any materialized view inline view
Cause: No materialized view inline views were found to match with a query inline view
Action: None

QSM-01348: an invalid predicate was found in an inline view
Cause: An inline view in the query contained an invalid WHERE clause predicate
Action: None

QSM-01349: general inline view cannot be supported on this inline view
Cause: Certain inline views are unsupported in general inline view rewrite
Action: None

QSM-01350: query rewrite cannot support this inline view
Cause: Certain inline views are unsupported in general inline view rewrite
Action: None

QSM-01351: query inline view has no matching objects with any materialized view inline views
Cause: There were no matching objects between the query inline view and materialized view inline views
Action: None

QSM-01352: SELECT lists of the query and materialized view inline views do not match
Cause: Query inline view’s and materialized view inline view’s SELECT list items did not match.
Action: None

QSM-01353: no query rewrite on remote objects unless integrity mode is set to stale_tolerated
Cause: Query rewrite’s integrity mode should be set to stale_tolerated for query rewrite to occur on queries with remote objects
Action: Set the session parameter, QUERY_REWRITE_INTEGRITY to stale_tolerated

QSM-01354: query rewrite is disabled for remote objects
Cause: Query rewrite was disabled internally for queries referencing remote objects.
Action: None

QSM-01355: multi-mv rewrite not possible in the presence of remote objects
Cause: Multi-MV rewrite not possible for queries referencing remote objects.
Action: None

QSM-01356: query rewrite against cube-organized materialized views not possible when OLAP option is off
Cause: Query rewrite against cube-organized materialized views was not possible because the OLAP option was off.
Action: None

QSM-01509: equivalence, string, matched query text
Cause: The query was rewritten using an equivalence, because query text matched the source statement for this equivalence.
Action: None

QSM-01522: a more optimal equivalence than string was used to rewrite
Cause: Query Rewrite always chooses the most optimal equivalence based on certain parameters, such as cardinality of the equivalence, number of joins etc. The equivalence view specified was found to be less optimal.
Action: None

QSM-01526: query rewrite is disabled for equivalence, string
Cause: Query rewrite could not use this equivalence, because this equivalence was created as disabled.
Action: Enable this equivalence using alter_rewrite_equivalence procedure from package, dbms_advanced_rewrite.

QSM-01533: query rewritten with equivalence, string
Cause: The specified equivalence was used to rewrite the given query.
Action: None

QSM-01565: equivalence, string, cannot compute measure, string, in the query
Cause: If a measure in the query cannot be computed using the measures in the equivalence, then query rewrite will not occur.
Action: None

QSM-01567: equivalence, string, cannot support the query measure, string
Cause: An attempt was made to push a grouping function through an expression specified in the query to transform a measure. Query rewrite will not occur if this measure transformation failed.
Action: None

QSM-01572: equivalence, string, and query have different joins between tables, string
Cause: Anchors, if any, in the equivalence and query match. But the joins between these anchors in the equivalence and query are different.
Action: None

QSM-01582: Joining equivalence, string, with table, string, not possible
Cause: A column in the query is not found in the equivalence. To obtain the column, a join back of equivalence to the table by means of either the primary key, foreign key or rowid of the table is required. But join backs are not allowed for equivalence rewrite
Action: None
QSM-01584: equivalence, string, has anchor, string, not found in query
  Cause: If an anchor which is present in the equivalence is not found in the query, then query rewrite will not take place.
  Action: None

QSM-01601: rollup(s) took place on equivalence, string
  Cause: If query's GROUP BY has one of the higher levels of columns found in the equivalence, then the lower level columns in the equivalence will be rolled up to compute the desired results.
  Action: None

QSM-01602: equivalence, string, requires join back to table, string, on column, string
  Cause: A column in the query does not appear in the equivalence. Query rewrite will try to obtain this column from the base table, by doing a join back to that column with a materialized view. But join backs are not allowed for equivalence rewrite as the required constraints are not guaranteed to be found on the tables in the destination statement of the equivalence.
  Action: None

QSM-01610: a lossy join in equivalence, string, between tables, string, not found in query
  Cause: All lossy joins in the equivalence must be present in the query for query rewrite to occur.
  Action: None

QSM-01617: equivalence definition is disabled
  Cause: There is an equivalence definition that could have been probably used by query rewrite to rewrite the query. But this equivalence is disabled.
  Action: None

QSM-01618: equivalence, string, is enabled for text match rewrite only
  Cause: This equivalence was created for text match rewrite only
  Action: None

QSM-01619: equivalence cannot be used in ENFORCED integrity mode
  Cause: An equivalence cannot be used for query rewrite when the query rewrite integrity mode is set to ENFORCED.
  Action: None

QSM-01621: join backs to base tables not allowed with an equivalence
  Cause: Query rewrite needs to do a join back to a base table column to answer this query. But join back is not allowed for an equivalence rewrite
  Action: None

QSM-01709: query rewritten with equivalence, string, using text match algorithm
  Cause: The query was rewritten using an equivalence because query text matched the definition of the equivalence
  Action: None

QSM-01784: equivalence string has an anchor table string not found in query
  Cause: A table in an equivalence is an anchor, if (a) it is not joined to any other table or (b) it is joined to other tables but each of its joins is not guaranteed to
provide all the rows or joined with the above table being child-side table. If an anchor which is present in the equivalence is not found in the query, then query rewrite will not take place.

**Action:** None

**QSM-01837:** recursive query rewrite on equivalence, string, not permitted

**Cause:** The source and destination statements of this equivalence MV are possibly identical. A recursive rewrite on this equivalence can lead to an infinite loop and thus not permitted.

**Action:** None

**QSM-01838:** semijoin transformation not supported on equivalence

**Cause:** There was a semijoin transformation attempted on an equivalence rewrite. Currently this is not allowed.

**Action:** None

**QSM-02001:** clustered mv container table

**Cause:** The capability in question is not supported on a materialized view that has a clustered container table.

**Action:** Recreate the materialized view using a conventional container table.

**QSM-02002:** DISTINCT aggregate measure in SELECT list

**Cause:** The capability in question is not supported when the materialized view uses the DISTINCT qualifier on an aggregate function.

**Action:** Remove the DISTINCT qualifier.

**QSM-02003:** aggregate function nested within an expression

**Cause:** The capability in question is not supported when the materialized view contains an aggregate function invocation nested within an outer expression.

**Action:** Re-phrase the expression such that the aggregate function invocation is not nested.

**QSM-02004:** grouping column omitted from SELECT list

**Cause:** The capability in question is not supported when the materialized view contains a column or expression in the GROUP BY clause that is not also present in the list of output select expressions.

**Action:** Include all GROUP BY expressions in the output select list.

**QSM-02005:** named view in FROM list

**Cause:** The capability in question is not supported when a named view appears in the FROM list.

**Action:** Remove the named view from the FROM list.

**QSM-02006:** subquery in FROM list

**Cause:** The capability in question is not supported when a subquery appears in the FROM list.

**Action:** Remove the subquery from the FROM list.

**QSM-02007:** multiple instances of the same table or view

**Cause:** The capability in question is not supported when the same table or view occurs more than once in the FROM list.
**Action:** Re-phrase the query to avoid multiple instances of the same table. For instance,

**QSM-02008: non-join filter condition in WHERE or HAVING clause**

**Cause:** The capability in question is not supported when the materialized view has a selection condition (an expression not representing a join) in the WHERE or HAVING clauses.

**Action:** Remove the selection filter expression.

**QSM-02009: non-inner join**

**Cause:** The capability in question is only supported with inner joins.

**Action:** Re-phrase the query using an inner join. Remove any outer joins.

**QSM-02010: join predicate with operator other than equals (=)**

**Cause:** The capability in question is not supported when the materialized uses a relationship operator other than equals ("=") in a join in the WHERE clause. This is known as a non-equijoin.

**Action:** Re-phrase the query to avoid the non-equijoin.

**QSM-02011: a HAVING clause is present**

**Cause:** The capability in question is not supported when the materialized view uses a HAVING clause.

**Action:** Remove the HAVING clause.

**QSM-02012: a CONNECT BY clause is present**

**Cause:** The capability in question is not supported when the materialized view uses a CONNECT BY clause.

**Action:** Re-phrase the query to avoid use of the CONNECT BY clause.

**QSM-02013: SELECT list includes a RAW data type expression**

**Cause:** The capability in question is not supported when the materialized view uses RAW data type in an expression.

**Action:** Remove the reference to the RAW expression.

**QSM-02014: GROUP BY expression other than a column**

**Cause:** The capability in question is not supported when the materialized view uses an expression other than a simple column reference in the GROUP BY clause.

**Action:** Re-phrase the query to use only simple column expressions in the GROUP BY clause.

**QSM-02015: Index Organized Table (IOT) present in FROM list**

**Cause:** The capability in question is not supported when the materialized view references an Index Organized Table in the FROM list.

**Action:** Remove the reference to the Index Organized Table.

**QSM-02016: clustered table in FROM list**

**Cause:** The capability in question is not supported when the materialized view references a clustered table in the FROM list.

**Action:** Remove the reference to the clustered table in the FROM list.

**QSM-02017: subquery present in the HAVING clause**
Cause: The capability in question is not supported when the materialized view uses a subquery in the HAVING clause.
Action: Re-phrase the query to avoid the subquery in the HAVING clause.

QSM-02018: subquery present in the WHERE clause
Cause: The capability in question is not supported when the materialized view uses a subquery in the WHERE clause.
Action: Re-phrase the query to avoid the subquery in the WHERE clause.

QSM-02019: mv references another mv in FROM clause
Cause: The capability in question is not supported when the materialized view is nested (i.e., when it references another materialized view in its FROM list).
Action: Re-phrase the query to avoid reference to the other materialized view.

QSM-02020: container column not in SELECT list with NOT NULL constraint
Cause: The capability in question is not supported when the materialized view’s container table has a column that does not correspond to an output expression in the select list, and that column has a NOT NULL constraint. This situation can result in problems during refresh since any new rows inserted into the materialized view will set that column to NULL.
Action: Disable or remove the NOT NULL constraint.

QSM-02021: set operator encountered in mv
Cause: The capability in question is not supported when the materialized view uses set operators such as UNION, UNION ALL, MINUS, etc.
Action: Re-phrase the query to avoid the use of set operators.

QSM-02022: aggregate selections
Cause: The capability in question is not supported when the materialized view uses an aggregate expression in the HAVING clause.
Action: Re-phrase the query to avoid the use of an aggregate in the HAVING clause.

QSM-02023: nested cursor
Cause: The capability in question is not supported when the materialized view uses a nested cursor expression.
Action: Re-phrase the query to avoid use of a nested cursor expression.

QSM-02024: no GROUP BY clause
Cause: The capability in question is not supported when the materialized view does not use a GROUP BY clause.
Action: Re-phrase the query to use a GROUP BY clause.

QSM-02025: no aggregate functions
Cause: The capability in question is not supported when the materialized view uses no aggregate functions.
Action: Re-phrase the query to use aggregate functions.

QSM-02026: non-AND conjunction in WHERE clause
Cause: The capability in question is not supported when the materialized view uses a conjunction other than AND (such as OR) in the WHERE clause.
Action: Re-phrase the query to avoid use of the non-AND conjunction.
QSM-02027: group by ROLLUP
   Cause: The capability in question is not supported when the materialized view uses the ROLLUP operator in the GROUP BY clause.
   Action: Re-phrase the query to avoid use of the ROLLUP operator.

QSM-02028: group by CUBE
   Cause: The capability in question is not supported when the materialized view uses the CUBE operator in the GROUP BY clause.
   Action: Re-phrase the query to avoid use of the CUBE operator.

QSM-02029: PL/SQL function invocation
   Cause: The capability in question is not supported when the materialized view invokes a PL/SQL function.
   Action: Re-phrase the query to avoid use of PL/SQL functions.

QSM-02030: reduced precision specified for prebuilt mv
   Cause: The capability in question is not supported when the materialized view is created with the WITH REDUCED PRECISION clause.
   Action: DROP the materialized view and re-create it without using the WITH REDUCED PRECISION clause.

QSM-02031: materialized view cannot support any type of query rewrite
   Cause: of the problem.
   Action: Examine the other messages and documentation to determine the

QSM-02032: no joins are present in the WHERE clause
   Cause: The capability in question is not supported when the materialized view includes no join conditions in the WHERE clause.
   Action: Re-phrase the query to include a join.

QSM-02033: no filter conditions are present in the WHERE clause
   Cause: The capability in question is not supported when the materialized view includes no filter selection conditions in the WHERE clause.
   Action: Add a filter condition.

QSM-02034: no joins are present in the HAVING clause
   Cause: The capability in question is not supported when the materialized view includes no joins in the HAVING clause.
   Action: Re-phrase the query to include a join.

QSM-02035: no filter conditions are present in the HAVING clause
   Cause: The capability in question is not supported when the materialized view includes no filter condition in the HAVING clause.
   Action: Re-phrase the query to include a join.

QSM-02036: in-list present in mv
   Cause: The capability in question is not supported when the materialized view uses an IN list.
   Action: Re-phrase the query to avoid the use of IN lists.

QSM-02037: cannot evaluate constant expression at compile time
**Cause:** The capability in question is not supported when the materialized view uses a compile-time non-constant expression in a filter condition in the WHERE or HAVING clauses. For example, WHERE X=1 uses a compile-time constant expression in a filter condition. WHERE X=MY_PLSQL_FUNCTION() uses a compile-time non-constant expression in a filter condition.

**Action:** Re-phrase the query to avoid the use of a compile-time non-constant expressions in filter conditions.

**QSM-02038: Partition Change Tracking (PCT) is enabled**

**Cause:** The Partition Change Tracking (PCT) capability is supported for this materialized view.

**Action:** No action is needed.

**QSM-02039: top level mv query uses grouping sets**

**Cause:** The capability in question is not supported when the materialized view use grouping sets.

**Action:** Re-phrase the query to avoid use of grouping sets.

**QSM-02040: top level query contains GSets and the key is too long for rewrite**

**Cause:** The capability in question is not supported when the materialized view uses a grouping set with too many keys.

**Action:** Reduce the number of grouping set keys.

**QSM-02041: nested aggregate function**

**Cause:** The capability in question is not supported when the materialized view nests an aggregate function invocation as an argument to another aggregate function.

**Action:** Re-phrase the query to avoid the nested aggregate function invocation.

**QSM-02042: view or subquery in from list**

**Cause:** The capability in question is not supported when the materialized view references a view or subquery in the FROM list.

**Action:** Re-phrase the query to avoid the use of views or subqueries in in the FROM list.

**QSM-02044: ORDER BY clause in mv**

**Cause:** The capability in question is not supported when the materialized view includes an ORDER BY clause.

**Action:** Remove the ORDER BY clause.

**QSM-02045: START WITH clause in mv**

**Cause:** The capability in question is not supported when the materialized view includes a START WITH clause.

**Action:** Re-phrase the query to avoid the use of the START WITH clause.

**QSM-02047: window function in mv**

**Cause:** The capability in question is not supported when the materialized view uses a window function.

**Action:** Re-phrase the query to avoid the use of window functions.

**QSM-02048: outer join in mv**
Cause: The capability in question is not supported when the materialized view uses an outer join.
Action: Re-phrase the query to avoid the use of outer joins.

QSM-02049: subquery using the ANY clause in mv
Cause: The capability in question is not supported when the materialized view uses the ANY clause with a subquery.
Action: Re-phrase the query to avoid the use of the ANY clause.

QSM-02050: subquery using the ALL clause in mv
Cause: The capability in question is not supported when the materialized view uses the ALL clause with a subquery.
Action: Re-phrase the query to avoid the use of the ALL clause.

QSM-02051: subquery using the NOT EXISTS clause in mv
Cause: The capability in question is not supported when the materialized view uses the NOT EXISTS with a subquery.
Action: Re-phrase the query to avoid the use of the NOT EXISTS clause.

QSM-02052: subquery using a select list in mv
Cause: The capability in question is not supported when the materialized view uses a select list.
Action: Re-phrase the query to avoid the use of a select list.

QSM-02053: collection subquery in mv
Cause: The capability in question is not supported when the materialized view uses a collection subquery.
Action: Re-phrase the query to avoid the use of collection subqueries.

QSM-02054: DISTINCT clause in select list in mv
Cause: The capability in question is not supported when the materialized view uses the DISTINCT clause in the select list.
Action: Re-phrase the query to avoid the use of the DISTINCT clause.

QSM-02055: mv references a packed object table or view
Cause: The capability in question is not supported when the materialized view references a packed object table or view.
Action: Re-phrase the query to avoid the use of the packed object tables or views.

QSM-02056: correlated variable and outer join in mv
Cause: The capability in question is not supported when the materialized view uses a correlated variable and an outer join.
Action: Re-phrase the query to avoid the use of the correlated variables or outer joins.

QSM-02057: ROWNUM referenced in mv
Cause: The capability in question is not supported when the materialized view references the ROWNUM function.
Action: Re-phrase the query to avoid the use of the ROWNUM function.

QSM-02058: set operator in mv and compatibility mode is less than 9.0
Cause: The capability in question is not supported when the materialized view uses a set operator and the compatibility mode is less than 9.0.

Action: Re-phrase the query to avoid the use of set operators or set the compatibility mode to 9.0 or greater.

QSM-02059: join may produce duplicate rows in mv

Cause: The capability in question is not supported when the materialized view contains a join condition that can result in duplicate rows in the materialized view.

Action: Re-phrase the query to avoid the occurrence of duplicate rows in the materialized view.

QSM-02061: one or more joins present in mv

Cause: The capability in question is not supported when the materialized view contains joins.

Action: Re-phrase the query to avoid the use of the joins.

QSM-02062: GROUP BY clause in mv

Cause: The capability in question is not supported when the materialized view uses the GROUP BY clause.

Action: Re-phrase the query to avoid the use of the GROUP BY clause.

QSM-02063: aggregate function in mv

Cause: The capability in question is not supported when the materialized view uses an aggregate function.

Action: Re-phrase the query to avoid the use of the aggregate functions.

QSM-02064: subquery in mv

Cause: The capability in question is not supported when the materialized view uses a subquery.

Action: Re-phrase the query to avoid the use of the subqueries.

QSM-02066: Oracle error: see RELATED_NUM and RELATED_TEXT for details

Cause: The capability in question is not supported because an attempt to create the materialized view would result in an error.

Action: Examine the associated Oracle error code in the RELATED_NUM column and the Oracle error text in the RELATED_TEXT column and address the problem.

QSM-02067: no partition key or PMARKER or join dependent expression in select list

Cause: The capability in question is not supported when the materialized view unless the select list (and group by list if a GROUP BY clause is present) includes the partition key or PMARKER function reference to the table in question or an expression join dependent on the partitioning column of the table in question.

Action: Add the partition key or a PMARKER function reference or a join dependent expression to the select list (and the GROUP BY clause, if present).

QSM-02068: relation is not a partitioned table

Cause: The capability in question is not supported when the relation in question is not a partitioned table.

Action: Change the query to reference a partitioned table.

QSM-02069: PCT not supported with multi-column partition key
Cause: The capability in question is not supported when the table in is partitioned on a multi-column key.

Action: Re-phrase the query to reference a table partitioned on a single column key.

QSM-02070: PCT not supported with this type of partitioning

Cause: The capability in question is not supported when the table in question uses certain types of partitioning.

Action: Re-phrase the query to reference a table that is uses a type of partitioning that is supported for this capability.

QSM-02071: internal error: undefined PCT failure code

Cause: An internal Oracle error has occurred.

Action: Report the problem through your normal support channels.

QSM-02072: requirements not satisfied for fast refresh of nested mv

Cause: The capability in question is not supported because one or more of the requirements for this capability have not been satisfied.

Action: Examine the relevant nested materialized view documentation in the Warehouse Guide and address the problem.

QSM-02073: non-primary key RepAPI mv is not fast refreshable

Cause: Fast refresh is supported for RepAPI materialized views only if it is also a primary key materialized view.

Action: Re-design the materialized view to be a primary key materialized view.

QSM-02074: materialized view over Heterogeneous Services link

Cause: The capability in question is not supported when the materialized view uses a heterogeneous link.

Action: Re-design the materialized view to avoid the use of the heterogeneous links.

QSM-02075: materialized view on synonym

Cause: The capability in question is not supported when the materialized view references a synonym, if the compatible parameter is earlier than 10.2.0.

Action: Re-phrase the query to avoid the use of the synonyms.

QSM-02076: sequence number in the mv log is newer than last refresh

Cause: The timestamp of the sequence number in the mv log was after the last refresh time.

Action: A complete refresh is required before the next fast refresh.

QSM-02077: mv log is newer than last full refresh

Cause: The capability in question is not supported when the relevant materialized view log was created after the creation or most recent complete refresh of the materialized view.

Action: Perform a complete refresh of the materialized view.

QSM-02078: mv log must have new values

Cause: The capability in question is not supported when the relevant materialized view log omits new values.

Action: Re-create the materialized view log using the NEW VALUES clause.
QSM-02079: mv log must have ROWID
   Cause: The capability in question is not supported when the relevant materialized view log omits ROWIDs.
   Action: Re-create the materialized view log using the ROWID clause.

QSM-02080: mv log must have primary key
   Cause: The capability in question is not supported when the relevant materialized view log omits primary keys.
   Action: Re-create the materialized view log using the PRIMARY KEY clause.

QSM-02081: mv log does not have all necessary columns
   Cause: The capability in question is not supported when the relevant materialized view log omits columns referenced in the select list of the materialized view.
   Action: Re-create the materialized view log and include all columns referenced in the select list.

QSM-02082: problem with mv log
   Cause: The capability in question is not supported because of a problem the materialized view log in question.
   Action: Examine the relevant materialized view log and fast refresh documentation in the Warehouse Guide and address the problem.

QSM-02083: mv references PL/SQL function that maintains state
   Cause: The capability in question is not supported when the materialized view references a PL/SQL function that maintains state and which may not return the same value every time it is invoked against the same set of rows.
   Action: Re-phrase the query to avoid such a PL/SQL function. Or modify the PL/SQL function to avoid state maintenance and change its declaration accordingly.

QSM-02084: DISTINCT clause on a duplicate sensitive aggregate function
   Cause: The capability in question is not supported when the materialized view uses the DISTINCT clause in this context.
   Action: Re-phrase the query to avoid the use of the DISTINCT clause.

QSM-02086: mv uses the MIN or MAX aggregate functions
   Cause: The capability in question is not supported when the materialized view uses the MIN or MAX function.
   Action: Re-phrase the query to avoid the use of the MIN or MAX functions.

QSM-02088: mv omits at least one grouping key from the select list
   Cause: The capability in question is not supported when the materialized view omits any grouping expressions from the select list.
   Action: Include all GROUP BY expressions in the select list.

QSM-02090: SELECT includes an expression that is not just a column
   Cause: The capability in question is not supported when the materialized view uses an expression in the select list that is not a simple column reference.
   Action: Re-phrase the query to avoid the use of the expressions that are not simple column references.

QSM-02091: mv references a non-repeatable or session-sensitive expression
Cause: The capability in question is not supported when the materialized view uses an expression that may not return the same value each time it is invoked against the same set of rows or that may return different values depending on session parameters.

Action: Re-phrase the query to avoid the use of such expressions.

QSM-02092: mv references a sequence number

Cause: The capability in question is not supported when the materialized view references a sequence number.

Action: Re-phrase the query to avoid the reference to sequence numbers.

QSM-02093: mv uses an object REF clause

Cause: The capability in question is not supported when the materialized view uses an object REF clause.

Action: Re-phrase the query to avoid the use of an object REF clause.

QSM-02096: mv references a named view

Cause: The capability in question is not supported when the materialized view references a view.

Action: Re-phrase the query to avoid references to views.

QSM-02099: mv references a remote table or view in the FROM list

Cause: The capability in question is not supported when the materialized view references a remote table or view in the FROM list.

Action: Re-phrase the query to avoid references to remote tables or views.

QSM-02101: mv references a synonym in the FROM list

Cause: The capability in question is not supported when the materialized view references a synonym in the FROM list.

Action: Re-phrase the query to avoid the reference to the synonym.

QSM-02102: mv FROM list references an object in the SYS schema

Cause: The capability in question is not supported when the materialized view references an object in the SYS schema.

Action: Re-phrase the query to avoid the reference to the SYS schema.

QSM-02104: aggregate function in a filter condition in the HAVING clause

Cause: The capability in question is not supported when the materialized view references an aggregate function in a filter condition in the HAVING clause.

Action: Re-phrase the query to avoid the use of aggregates in filter conditions in the HAVING clause.

QSM-02106: mv uses a filter condition in the WHERE or HAVING clause

Cause: The capability in question is not supported when the materialized view includes a filter condition in the WHERE or HAVING clause.

Action: Re-phrase the query to avoid the use of filter conditions in the WHERE or HAVING clauses.

QSM-02112: top level query has LEFT OUTER, RIGHT OUTER or FULL OUTER join

Cause: The capability in question is not supported when the materialized view uses these types of joins.
Action: Re-phrase the query to avoid the use of these types of joins.

QSM-02113: expression in select list references multiple tables or views
Cause: The capability in question is not supported when the materialized view includes an expression in the select list that references multiple tables or views.
Action: Re-phrase the query to avoid the use of the such expressions.

QSM-02114: no GROUP BY clause, no aggregates and not >= 9.0 compatibility
Cause: The capability in question is not supported when the materialized view has no GROUP BY clause, no aggregates and compatibility mode is less than 9.0.
Action: Re-phrase the query to avoid the include a GROUP BY clause or an aggregate function. Or set compatibility mode to 9.0 or greater.

QSM-02115: mv references a remote object and is refreshed ON COMMIT
Cause: The capability in question is not supported when the materialized view references a remote object and is refreshed ON COMMIT.
Action: Re-phrase the query to avoid the reference to the remote object or alter the materialized view to be refreshed ON DEMAND.

QSM-02116: multiple master sites
Cause: The capability in question is not supported when the materialized view references multiple remote objects that reside at different remote instances.
Action: Re-phrase the query to avoid the use of multiple master sites.

QSM-02117: missing GROUPING_ID or GROUPING functions on GROUP BY column(s)
Cause: The capability in question is not supported when the materialized view uses grouping sets but omits the relevant GROUPING_ID or GROUPING functions.
Action: Re-phrase the query to include the relevant GROUPING_ID or GROUPING functions.

QSM-02118: duplicate grouping sets
Cause: The capability in question is not supported when the materialized view redundantly references grouping sets.
Action: Re-phrase the query to avoid the use of the redundant grouping sets.

QSM-02119: internal error while analyzing required supporting aggregates
Cause: An internal Oracle error has occurred.
Action: Report the problem through your normal support channels.

QSM-02120: compatibility mode must be 9.0 or higher
Cause: The capability in question is not supported when the compatibility mode is less than 9.0.
Action: Set the compatibility mode to 9.0 or higher.

QSM-02121: set operator in a context not supported for fast refresh
Cause: The capability in question is not supported when the materialized view uses a set operator in this context.
Action: Re-phrase the query to avoid the use of the set operator.

QSM-02122: compatibility mode must be 8.1 or higher
Cause: The capability in question is not supported when the compatibility mode is less than 8.1.
Action: Set the compatibility mode to 8.1 or higher.

QSM-02123: subquery and UNION mv's must be primary key mv's
Cause: The capability in question is not supported when the materialized view is not a primary key materialized view and uses subqueries or the union operator in this context.
Action: Re-create the materialized view as a primary key materialized view.

QSM-02124: object type in WHERE clause
Cause: The capability in question is not supported when the materialized view references an object type in the WHERE clause.
Action: Re-phrase the query to avoid the reference to the object type.

QSM-02125: subquery join conditions don't meet requirements for capability
Cause: The capability in question is not supported when the materialized view uses a subquery in a join in this way.
Action: Examine the relevant replication documentation concerning subquery materialized views and address the problem.

QSM-02126: no rowid at master site
Cause: The capability in question is not supported when the materialized view references a remote site that does not support rowids.
Action: Re-phrase the query to avoid the reference to the remote site.

QSM-02127: not supported for this type mv by Oracle version at master site
Cause: The capability in question is not supported when the materialized view uses certain constructs and references an older version, remote Oracle instance.
Action: Re-phrase the query to avoid the use of the construct or upgrade the remote Oracle instance.

QSM-02128: does not meet the requirements of a primary key mv
Cause: The capability in question is not supported when the materialized view fails to meet the requirements of a primary key materialized view.
Action: Examine the relevant primary key materialized view replication documentation and address the problem.

QSM-02129: join or filter condition(s) are complex
Cause: The capability in question is not supported when the materialized view uses a complex join or filter condition.
Action: Re-phrase the query to simplify the join or filter condition.

QSM-02130: expression not supported for fast refresh
Cause: The capability in question is not supported when the materialized view references certain, complex expressions.
Action: Re-phrase the query to simplify the expression.

QSM-02131: agg(expr) requires corresponding SUM(expr) function
Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the SUM function on the same argument.
Action: Add the SUM function to the select list.

QSM-02132: agg(expr) requires corresponding COUNT(expr) function
Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the COUNT function on the same argument.
Action: Add the COUNT function to the select list.

QSM-02133: agg(expr) requires corresponding MIN(expr) function
Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the MIN function on the same argument.
Action: Add the MIN function to the select list.

QSM-02134: agg(expr) requires corresponding MAX(expr) function
Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the MAX function on the same argument.
Action: Add the MAX function to the select list.

QSM-02135: agg(expr) requires corresponding AVG(expr) function
Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the AVG function on the same argument.
Action: Add the AVG function to the select list.

QSM-02136: agg(expr) requires corresponding VARIANCE(expr) function
Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the VARIANCE function on the same argument.
Action: Add the VARIANCE function to the select list.

QSM-02137: agg(expr) requires corresponding STDDEV(expr) function
Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the STDDEV function on the same argument.
Action: Add the STDDEV function to the select list.

QSM-02138: agg(expr) requires corresponding agg(expr*expr) function
Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of that same aggregate function on the square of the same argument.
Action: Add an invocation of the same aggregate function on the square of the same argument (that is, the argument multiplied by itself).

QSM-02139: agg(expr) requires corresponding agg(expr+expr) function
Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of that same aggregate function on the same argument added to the same argument.
Action: Add the indicated aggregate function to the select list.

QSM-02140: agg(expr) requires corresponding SUM(expr*expr) function
Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the SUM function on the square of the same argument (the argument multiplied by itself).

Action: Add the SUM function on the square of the argument.

QSM-02141: the reason why the capability is disabled has escaped analysis
Cause: The EXPLAIN_MV analysis engine has failed to capture the reason why the given capability is not possible.

Action: Report the problem through your normal problem reporting channels.

QSM-02142: COUNT(\*) is not present in the select list
Cause: The materialized view query omits COUNT(\*) from the select list.

Action: Add COUNT(\*) to the select list.

QSM-02143: SUM(expr) without COUNT(expr)
Cause: SUM(expr) occurs in the select list without a corresponding COUNT(expr).

Action: Add COUNT(expr) to the select list.

QSM-02144: aggregate functions are present without a GROUP BY clause
Cause: One or more aggregate functions are present in the select list but a GROUP BY clause is not used.

Action: Add a GROUP BY clause.

QSM-02145: GROUP BY clause is present but no aggregate functions are used
Cause: A GROUP BY clause is used but no aggregate functions are present in the select list.

Action: Add an aggregate function to the select list.

QSM-02146: see the reason why REFRESH_FAST_AFTER_INSERT is disabled
Cause: REFRESH_FAST_AFTER_ONETAB_DML is disabled for the same reason that REFRESH_FAST_AFTER_INSERT is disabled.

Action: Correct the problem with REFRESH_FAST_AFTER_INSERT.

QSM-02147: default date format is sensitive to session settings
Cause: You have specified a date conversion operation using either the default format or an incomplete format. The default date format or an incomplete format is sensitive to session settings, and therefore may not be reproducible across different environments.

Action: Specify a complete date format string.

QSM-02148: many to many subquery joins require 9.0 compatibility or higher
Cause: You have specified a many to many join in your materialized view while running in less than 9.0 compatibility mode.

Action: Set your compatibility mode to 9.0 or higher or restructure the materialized view query.

QSM-02149: ON COMMIT with this MV requires 9.0 compatibility or higher
Cause: You have specified a materialized view that uses some combination of the following: joins aggregation filter conditions in the WHERE clause a remote relation in the FROM list a SUM(x) function without a corresponding COUNT(x) function an omitted COUNT(\*) aggregate function a MIN() or MAX() aggregate
function in combination with the REFRESH ON COMMIT option while running in less than 9.0 compatibility mode.

**Action:** Set your compatibility mode to 9.0 or higher or restructure the materialized view query.

**QSM-02150: select lists must be identical across the UNION operator**

**Cause:** You have specified a materialized view using the UNION operator and the respective queries on each side of the UNION operator do not have the same select list. The RELATED_NAME column shows the alias of the first different select list item. The RELATED_NUM column shows the offset from the SELECT keyword to the start of this select list item.

**Action:** Restructure the materialized view query such that the respective sides of the UNION operator have identical select lists.

**QSM-02151: subquery or named view in FROM list and < 9.0 compatibility**

**Cause:** You have specified a materialized view that references a subquery or named view in its top level FROM list while running in less than 9.0 compatibility mode.

**Action:** Set compatibility mode to 9.0 or higher or restructure the materialized view query.

**QSM-02152: subquery or named view in FROM list even after view merging**

**Cause:** You have specified a materialized view that references a subquery or named view in its top level FROM list that could not be merged during the view merging process.

**Action:** Restructure the materialized view query.

**QSM-02153: inline view or subquery in FROM list not supported for this type MV**

**Cause:** You have specified a materialized view that references an inline view or a subquery. The indicated capability is not supported for this type of materialized view.

**Action:** Restructure the materialized view query.

**QSM-02154: MV is not fast refreshable even with view merging**

**Cause:** You have a materialized view with view in the FROM clause, however it does not meet the criteria for fast refresh after view merging.

**Action:** Restructure the materialized view query to remove the offending view or the complex construct in the view.

**QSM-02161: see the reason why REFRESH_FAST_AFTER_ONETAB_DML is disabled**

**Cause:** REFRESH_FAST_AFTER_ANY_DML is disabled for the same reason that REFRESH_FAST_AFTER_ONETAB_DML is disabled.

**Action:** Correct the problem with REFRESH_FAST_AFTER_ONETAB_DML.

**QSM-02162: the detail table does not have a materialized view log**

**Cause:** The fast refresh cannot be performed because the master table does not contain a materialized view log.

**Action:** Use the CREATE MATERIALIZED VIEW LOG command to create a materialized view log on the master table.

**QSM-02163: cannot use object id columns from materialized view log**
Cause: The materialized view log either does not have object id columns logged, or the timestamp associated with the object id columns is more recent than the last refresh time.
Action: A complete refresh is required before the next fast refresh. Add object id columns to the materialized view log, if required.

QSM-02169: the materialized view contains partition extended table name
Cause: Fast refresh of materialized aggregate views and/or materialized join views are not supported if they were defined using partition extended table names.
Action: Create the fast refreshable materialized view without using partition extended table names or create the materialized view as a complete refresh materialized view.

QSM-02170: tables must be identical across the UNION operator
Cause: You have specified a materialized view using the UNION operator and the tables on each side of the UNION operator do not match. Fast refresh is not supported in this context.
Action: Restructure the materialized view query such that the respective sides of the UNION operator have the same table.

QSM-02171: the materialized view has a join operation in the outer UNION block
Cause: Fast refresh is not supported if a materialized view having the UNION operator contains a join operation.
Action: Rewrite the materialized view query without the join.

QSM-02173: the unique constraints does not exist on the join columns of the inner table
Cause: If there are outer joins, unique constraints must exist on the join columns of the inner table. Otherwise, the materialized view can not be fast refreshable.
Action: None

QSM-02174: the materialized view does not have a UNION ALL marker column
Cause: For a materialized view with UNION ALL to be fast refreshable, it must have a UNION ALL marker column. This is a constant column, at the same ordinal position in each query block and must have distinct values in each query block.
Action: Add a UNION ALL marker column to each query block in the UNION ALL query defining the materialized view.

QSM-02175: some query block in UNION ALL MV is not fast refreshable
Cause: For a materialized view with UNION ALL to be fast refreshable, each query block must conform to a fast refreshable materialized join view or materialized aggregate view.
Action: Check each query block in the UNION ALL to ensure it is either a materialized view with joins or aggregates.

QSM-02176: MV with UNION ALL in a view is too complex
Cause: If a materialized view has a view whose definition involves a UNION ALL query, then the materialized view’s defining query cannot have any clauses other than SELECT or FROM. Other clauses such as WHERE, HAVING, CONNECT BY, or GROUP BY are not allowed. Further more, the FROM clause should have only one item.
Action: Remove any clauses besides SELECT and FROM from the materialized view's defining query.

QSM-02177: MV with UNION ALL in a view must match the view's SELECT list
Cause: If a materialized view has a view whose definition involves a UNION ALL query, then the materialized view's select list must match the underlying view's select list exactly. It must not have any expressions and must not have add/drop/reorder columns from the underlying view.
Action: Use select * when defining a materialized view with a UNION ALL in a view.

QSM-02178: MV has a view with UNION ALL that is not fast refreshable
Cause: The materialized view has a view whose definition involves a UNION ALL query that does not satisfy the requirements for fast refresh.
Action: Check that the defining query of the view being referenced in the materialized view satisfies conditions for fast refresh of a UNION ALL materialized view.

QSM-02179: MV with UNION ALL requires compatibility >= 9.2
Cause: The setting of the COMPATIBLE initialization parameter is less than 9.2.0.
Action: Set COMPATIBLE to 9.2.0 or higher.

QSM-02180: no primary key constraint in the master table
Cause: The explain_mview assumes that the materialized view is going to be created as the Primary Key materialized view. A Primary Key materialized view can not be created if the base table does not have a primary key constraint.
Action: Add a primary key constraint to the base table, or create the materialized view as Rowid MV by specifying the WITH ROWID option. If the materialized view is a Rowid MV, then it should be able to do complete refresh and even fast refresh, given that the materialized view log on the master table has a rowid.

QSM-02181: a SPREADSHEET clause is present
Cause: The capability in question is not supported when the materialized view uses a SPREADSHEET clause.
Action: Remove the SPREADSHEET clause.

QSM-02182: PCT is enabled through a join dependency
Cause: The capability in question is not supported when the materialized view does not contain some expression join dependent on the partitioning key of relation in question in the select list. For definition of join dependency, please look at Oracle documentation.
Action: Change the query to contain the partitioning key

QSM-02183: Expression to enable PCT not in PARTITION BY of analytic function or SPREADSHEET
Cause: The capability in question is not supported when the expression is not in the PARTITION BY clause
Action: Change the query so that the expression is in the PARTITION BY

QSM-02184: Expression to enable PCT cannot be rolled up
Cause: The capability in question is not supported when the expression is rolled up
Action: Change the query so that the expression is not rolled up
QSM-02185: no partition key or PMARKER in select list
  Cause: The capability in question is not supported when the materialized view
  unless the select list (and group by list if a GROUP BY clause is present) includes
  either the partition key of or a PMARKER function reference to the table in
  question.
  Action: Add the partition key or a PMARKER function reference to the select list
  (and the GROUP BY clause, if present).

QSM-02186: PARTITIONED OUTER JOIN is present
  Cause: The capability in question is not supported when the materialized view
  has PARTITIONED OUTER JOIN.
  Action: Remove PARTITIONED OUTER JOIN.

QSM-02187: materialized view on external table
  Cause: The capability in question is not supported when the materialized view
  references an external table.
  Action: Re-phrase the query to avoid the use of the external tables.

QSM-02188: named view in FROM list not supported for this type MV
  Cause: You have specified a materialized view that references a named view The
  indicated capability is not supported for this type of materialized view.
  Action: Restructure the materialized view query.

QSM-02189: materialized view definition changes
  Cause: The definition of the materialized view has changed. Usually redefining
  the synonym or table in the definition can cause this. The materialized view can
  not be fast refreshed.
  Action: Complete refresh or recreate the materialized view.

QSM-02190: SQL PIVOT or UNPIVOT is present
  Cause: The capability in question is not supported when the materialized view
  has sql PIVOT or UNPIVOT operation.
  Action: Remove sql PIVOT or UNPIVOT.

QSM-02191: types of MV logs are not compatible
  Cause: The capability in question is not supported when the materialized view
  is defined on detail tables which do not have a compatible type of materialized view
  logs, either all timestamp based or commit SCN based.
  Action: Complete refresh or recreate materialized view logs.

QSM-02192: commit SCN based MV log is not in consistent state
  Cause: The capability in question is not supported when the relevant materialized
  view log is not in consistent state due to the failure when populating the mapping
  table of SYS.SNAP_XCMT$.
  Action: Perform a complete refresh of the materialized view.

QSM-02193: unsupported MV on commit SCN based MV logs
  Cause: The capability in question is not supported when the relevant materialized
  view is not supported to be defined on detail tables which have commit SCN
  based MV logs.
  Action: None
QSM-02194: CASE expressions present in materialized view
Cause: The capability in question is not supported when the materialized view contain CASE expressions.
Action: Re-phrase the query to avoid the use of CASE expressions.

QSM-02195: PCT FAST REFRESH is not possible if query contains a named view
Cause: The capability in question was not supported because the materialized view query contained a named view.
Action: Rephrase the query to avoid the use of named views.

QSM-02196: PCT FAST REFRESH is not possible if query contains an inline view
Cause: The capability in question was not supported because the materialized view query contained an inline view.
Action: Rephrase the query to avoid the use of an inline view.

QSM-02197: PCT FAST REFRESH is not possible if query contains a remote table
Cause: The capability in question was not supported because the materialized view query contained a remote table.
Action: Rephrase the query to avoid the use of a remote table.

QSM-02198: PCT FAST REFRESH is not possible if HAVING clause includes a subquery
Cause: The capability in question was not supported because the materialized view query HAVING clause included a subquery.
Action: Rephrase the query to avoid the use of a subquery in the HAVING clause.

QSM-02199: PCT FAST REFRESH is not possible if WHERE clause includes a subquery
Cause: The capability in question was not supported because the materialized view query WHERE clause included a subquery.
Action: Rephrase the query to avoid the use of a subquery in the WHERE clause.

QSM-02200: PCT FAST REFRESH is not possible if query contains LEFT OUTER, RIGHT OUTER or FULL OUTER JOIN
Cause: The capability in question was not supported because the materialized view query contained LEFT OUTER, RIGHT OUTER or FULL OUTER JOIN.
Action: Rephrase the query to avoid the use of LEFT OUTER, RIGHT OUTER or FULL OUTER JOIN.

QSM-02201: PCT FAST REFRESH is not possible if there is a self join or self cartesian product in query
Cause: The capability in question was not supported because the materialized view query contained self join of self cartesian product in the query.
Action: Rephrase the query to avoid the use of self joins or self cartesian product in the query.

QSM-02202: PCT FAST REFRESH is not possible if query has ORDER BY clause
Cause: The capability in question was not supported because the materialized view query contained an ORDER BY clause.
Action: Rephrase the query to avoid the use of the ORDER BY clause.
QSM-02203: PCT FAST REFRESH is not possible if query has set operand query blocks
Cause: The capability in question was not supported because the materialized view query contained set operand query blocks.
Action: Rephrase the query to avoid the use of set operand query blocks.

QSM-02204: PCT FAST REFRESH is not possible if query has an inner query
Cause: The capability in question was not supported because the materialized view query contained an inner query.
Action: Rephrase the query to avoid the use of the inner query.

QSM-02205: PCT FAST REFRESH is not possible if there is a subquery inside select-list
Cause: The capability in question was not supported because the materialized view query contained a subquery inside a select-list.
Action: Rephrase the query to avoid the use of a subquery inside a select-list.

QSM-02206: PCT FAST REFRESH is not possible because this query join may produce extra duplicate rows
Cause: The capability in question was not supported because the materialized view contained a join condition that can result in duplicate rows in the materialized view.
Action: Rephrase the query to avoid the occurrence of duplicate rows in the materialized view.

QSM-02207: PCT FAST REFRESH is not possible for complex queries
Cause: The capability in question was not supported because the materialized view query was too complex.
Action: No action is necessary.

QSM-02208: subquery using the NOT IN clause in materialized view
Cause: The capability in question was not supported when the materialized view uses NOT IN with a subquery.
Action: Rephrase the query to avoid the use of the NOT IN clause.

QSM-03112: Invalid CREATE MATERIALIZED VIEW statement string
Cause: The CREATE MATERIALIZED VIEW statement that was passed into the procedure was not a valid one.
Action: Check the reason(s) following the error or the statement and retry the operation.

QSM-03113: Cannot tune the MATERIALIZED VIEW statement string
Cause: The MATERIALIZED VIEW statement could not be tuned.
Action: Check the reason(s) following the error or the statement and retry the operation.

QSM-03114: Cannot tune FOR UPDATE materialized view
Cause: The materialized view was created with the FOR UPDATE option.
Action: Rephrase the statement to avoid the use of the FOR UPDATE option.

QSM-03115: Cannot tune materialized view ON PREBUILT table
Cause: The materialized view was created on a prebuilt table.
**Action:** Rephrase the statement to avoid the use of the ON PREBUILT option.

**QSM-03116:** The materialized view is already optimal and cannot be tuned any further  
**Cause:** The materialized view has the capabilities that are specified in the statement.  
**Action:** None

**QSM-03117:** Cannot tune the materialized view to be fast refreshable  
**Cause:** The materialized view could not be tuned or decomposed to be fast refreshable.  
**Action:** Run the dbms_mview.explain_mview to find out the reason.

**QSM-03118:** Cannot tune the materialized view for general rewrite  
**Cause:** The materialized view could not be tuned for supporting general rewrite.  
**Action:** Run the dbms_mview.explain_mview to find out the reason.

**QSM-03119:** The WHERE/HAVING clause is too complex for general query rewrite  
**Cause:** The WHERE/HAVING was too complex for general rewrite.  
**Action:** Try to simplify the WHERE/HAVING clause in the materialized view defining query.

**QSM-03120:** Cannot create materialized view log on encrypted columns  
**Cause:** There were encrypted columns in materialized view defining query.  
**Action:** Try to remove the encrypted columns in the materialized view defining query.
RMAN-00201: Do you really want to execute the above repair (enter YES or NO)?
Cause: This is a user prompt.
Action: Answer the question to proceed.

RMAN-00202: Do you want to open the database (enter YES or NO)?
Cause: This is a user prompt.
Action: Answer the question to proceed.

RMAN-00203: Do you want to open resetlogs the database (enter YES or NO)?
Cause: This is a user prompt.
Action: Answer the question to proceed.

RMAN-00204: Do you really want to delete the above objects (enter YES or NO)?
Cause: This is a user prompt.
Action: Answer the question to proceed.

RMAN-00205: Do you really want to drop all backups and the database (enter YES or NO)?
Cause: This is a user prompt.
Action: Answer the question to proceed.

RMAN-00206: Do you really want to drop the database (enter YES or NO)?
Cause: This is a user prompt.
Action: Answer the question to proceed.

RMAN-00207: Do you really want to unregister the database (enter YES or NO)?
Cause: This is a user prompt.
Action: Answer the question to proceed.

RMAN-00208: Want to unregister the database with target db_unique_name (enter YES or NO)?
Cause: This is a user prompt.
Action: Answer the question to proceed.

RMAN-00209: Do you really want to change the above failures (enter YES or NO)?
Cause: This is a user prompt.
Action: Answer the question to proceed.

RMAN-00210: Do you really want to catalog the above files (enter YES or NO)?
Cause: This is a user prompt.
Action: Answer the question to proceed.

RMAN-00211: Error occurred getting response - assuming NO response
  Cause: An error occurred reading user response.
  Action: No action is required, this is an informational message only.

RMAN-00212: "string" is an invalid response - please re-enter.
  Cause: An incorrect response was entered.
  Action: Enter a correct response.

RMAN-00550: parser package failed to load
  Cause: lpmloadpkg() return an error indication.
  Action: This message should be accompanied by other error message(s) indicating
           the cause of the error.

RMAN-00551: initialization of parser package failed
  Cause: The parser package initialization routine returned an error.
  Action: This message should be accompanied by other error message(s) indicating
           the cause of the error.

RMAN-00552: syntax error in command line arguments
  Cause: The arguments supplied to RMAN could not be parsed, or no arguments
          were supplied at all.
  Action: This message should be accompanied by other error message(s) indicating
           the cause of the error.

RMAN-00553: internal recovery manager package failed to load
  Cause: lpmloadpkg() return an error indication.
  Action: This message should be accompanied by other error message(s) indicating
           the cause of the error.

RMAN-00554: initialization of internal recovery manager package failed
  Cause: The internal package initialization routine returned an error.
  Action: This message should be accompanied by other error message(s) indicating
           the cause of the error.

RMAN-00555: target database connect string must be specified
  Cause: The TARGET parameter was not specified.
  Action: Supply the necessary parameter.

RMAN-00556: could not open CMDFILE "string"
  Cause: An error occurred when trying to open the file.
  Action: Check that the file name was specified correctly and that the file exists
           and that the user running RMAN has read permission for the file.

RMAN-00557: could not open MSGLOG "string"
  Cause: An error occurred when trying to open the file.
  Action: Check that the file name was specified correctly and that the file exists
           and that the user running RMAN has write permission for the file.

RMAN-00558: error encountered while parsing input commands
Cause: The parser detected a syntax error.
Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-00562: username too long
Cause: The specified user name exceeds the maximum allowable username length.
Action: Correct the username.

RMAN-00563: password too long
Cause: The specified password exceeds the maximum allowable password length.
Action: Correct the password.

RMAN-00564: host data too long
Cause: The SQL*NET host connect string exceeds the maximum allowable length.
Action: Correct the host string.

RMAN-00565: unable to read input file
Cause: An error occurred while trying to read from STDIN or from the CMDFILE.
Action: Ensure that the cmdfile is readable. The cmdfile must be a text file with 1 line per record.

RMAN-00566: could not open TRACE "string"
Cause: An error occurred when trying to open the file.
Action: Check that the file name was specified correctly and that the user running RMAN has write permission for the file.

RMAN-00567: Recovery Manager could not print some error messages
Cause: An error occurred while trying to print the error message stack.
Action: If the associated error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-00568: user interrupt received
Cause: The user typed ^C or ATTN.
Action: No action is required.

RMAN-00569: =============== ERROR MESSAGE STACK FOLLOWS

Cause: This message precedes an error message stack.
Action: The errors are printed in last-in first-out order. To interpret them correctly, read from the bottom to the top.

RMAN-00570: **end-of-file**
Cause: The end of an inline cmdfile was reached. This is just an informational message.
Action: No action is required.

RMAN-00571:
Cause: Displayed to highlight the error message stack.
Action: The errors are printed in last-in first-out order. To interpret them correctly, read from the bottom to the top.
RMAN-00572: waiting for DBMS_PIPE input
   Cause: This message is used only when the PIPE option was specified.
   Action: enqueue some RMAN input into the pipe

RMAN-00573: DBMS_PIPE.NEXT_ITEM_TIME returned unknown type code: number
   Cause: This is an internal error.
   Action: contact Oracle Support Services.

RMAN-00574: rman aborting due to errors reading/writing DBMS_PIPE
   Cause: RMAN was run with input/output being sent to DBMS_PIPE. An error
   was encountered while reading from or writing to the pipe. This error should be
   preceded by information describing the error.
   Action: RMAN terminates. Refer to the cause/action for the preceding errors.

RMAN-00575: timeout while trying to write to DBMS_PIPE
   Cause: death by death of the process that was talking to rman.
   Action: RMAN will abort.

RMAN-00576: PIPE cannot be used with CMDFILE
   Cause: The PIPE and CMDFILE options cannot be used together. When using the
   PIPE option, RMAN must obtain its input from the input pipe.
   Action: Remove either the PIPE or CMDFILE option.

RMAN-00577: PIPE requires that TARGET be specified on the command line
   Cause: The PIPE option obtains its input from, and writes its output to, an Oracle
   database pipe in the target database. Therefore, the target database connection
   must be specified on the command line, so that RMAN can connect to the target
   database to receive its input from the pipe.
   Action: Specify the TARGET option on the RMAN command line.

RMAN-00578: pipe string is not private and owned by SYS
   Cause: The pipe that RMAN needs to use for its input or output is either a public
   pipe or a private pipe that is not owned by SYS. This is a potential security
   problem, because it allows a non-SYS user to issue commands to RMAN or to
   retrieve the RMAN output.
   Action: If you are attempting to put data on the RMAN input pipe prior to
   starting RMAN, so RMAN will process the data on the pipe as soon as it starts,
   you must be connected as SYS and you must first use the DBMS_PIPE.CREATE_
   PIPE function to explicitly create the pipe as a private pipe.

RMAN-00579: SCRIPT cannot be used with CMDFILE
   Cause: The SCRIPT and CMDFILE options cannot be used together. When using
   the SCRIPT option, RMAN executes only the specified script.
   Action: Remove either the SCRIPT or CMDFILE option.

RMAN-00600: internal error, arguments [string] [string] [string] [string] [string]
   Cause: An internal error in recovery manager occurred.
   Action: Contact Oracle Support Services.

RMAN-00601: fatal error in recovery manager
   Cause: A fatal error has occurred.
**Action:** This message should be accompanied by other error message(s) indicating the cause of the error.

**RMAN-00700:** SCRIPT requires that TARGET be specified on the command line  
**Cause:** A SCRIPT option was included on the RMAN command line without a specified TARGET database.  
**Action:** Specify the TARGET option on the RMAN command line.

**RMAN-00701:** SCRIPT requires that CATALOG be specified on the command line  
**Cause:** A SCRIPT option was included on the RMAN command line without a specified CATALOG recovery catalog.  
**Action:** Specify the CATALOG option on the RMAN command line.

**RMAN-00702:** The command has no syntax errors  
**Cause:** This is an informational message only.  
**Action:** No action is required.

**RMAN-00703:** The cmdfile has no syntax errors  
**Cause:** This is an informational message only.  
**Action:** No action is required.

**RMAN-01006:** error signaled during parse  
**Cause:** An error was signaled during parsing.  
**Action:** This message should be accompanied by other error message(s) indicating the cause of the error.

**RMAN-01007:** at line number column number file: string  
**Cause:** This is an informational message indicating the line and column where a syntax error was detected.  
**Action:** No action is required.

**RMAN-01008:** the bad identifier was: string  
**Cause:** This is an informational message indicating the identifier token that caused a syntax error.  
**Action:** No action is required.

**RMAN-01009:** syntax error: found "string": expecting one of: "string"  
**Cause:** A syntax error was signaled during parsing.  
**Action:** Correct the input.

**RMAN-02000:** wrong message file version (msg number not found)  
**Cause:** The rmanxx.msb file is not the correct version.  
**Action:** Check that the installation was done correctly. The RMAN binary (executable, load module, whatever it is called on your O/S) and the rmanxx.msb file must be from the same version, release, and patch level.

**RMAN-02001:** unrecognized punctuation symbol "string"  
**Cause:** An illegal punctuation character was encountered.  
**Action:** Remove the illegal character.

**RMAN-02002:** unexpected end of input file reached
Cause: This is probably caused by failure to supply the closing quote for a quoted string.
Action: Correct the input.

RMAN-02003: unrecognized character: string
Cause: An input character that is neither an alpha, digit, or punctuation was encountered.
Action: Remove the character.

RMAN-02004: quoted string too big
Cause: A quoted string longer than 2000 bytes was encountered.
Action: This may be caused by a missing close quote. If so, add the missing quote, otherwise shorten the string.

RMAN-02005: token too big
Cause: A token longer than 1000 bytes was encountered
Action: Tokens must be separated by whitespace or punctuation. Either add the missing whitespace or punctuation, or shorten the token.

RMAN-02006: script line too long
Cause: a line longer than 500 bytes was encountered
Action: break the line up into shorter lines

RMAN-02007: Integer value overflow
Cause: Parser failed to convert input string to integer
Action: Acceptable values for integer are from 0 to 2147483648. Retry command using valid integer value.

RMAN-02008: no value exists for variable "string"
Cause: The RMAN variable specified was either undefined or null
Action: Verify that a proper value has been given to that variable.

RMAN-02009: unexpected end of command file reached
Cause: This is probably caused by failure to supply the closing brace for a stored script in a command file.
Action: Correct the input.

RMAN-03000: recovery manager compiler component initialization failed
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.

RMAN-03001: recovery manager command sequencer component initialization failed
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.

RMAN-03002: failure of string command at string
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.
RMAN-03003: command not implemented yet: string
  Cause: The command is not implemented in the current release.
  Action: Avoid using the command.

RMAN-03004: fatal error during execution of command
  Cause: This message should be accompanied by other error message(s) indicating
          the cause of the error.
  Action: Check the accompanying errors.

RMAN-03008: error while performing automatic resync of recovery catalog
  Cause: This message should be accompanied by other error message(s) indicating
          the cause of the error.
  Action: Check the accompanying errors.

RMAN-03009: failure of string command on string channel at string
  Cause: This message should be accompanied by other error message(s) indicating
          the cause of the error.
  Action: Check the accompanying errors.

RMAN-03010: fatal error during library cache pre-loading
  Cause: This message should be accompanied by other error message(s) indicating
          the cause of the error.
  Action: Check the accompanying errors.

RMAN-03011: Recovery Managerstring
  Cause: This is the RMAN banner
  Action: No action is required.

RMAN-03012: fatal error during compilation of command
  Cause: A fatal error occurred during compilation of a command.
  Action: This message should be accompanied by other error message(s) indicating
          the cause of the error.

RMAN-03013: Copyright (c) 1995, 2003, Oracle Corporation. All rights reserved.
  Cause: This is the copyright banner
  Action: No action is required.

RMAN-03014: implicit resync of recovery catalog failed
  Cause: of the failure.
  Action: No action is required.

RMAN-03015: error occurred in stored script string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-03017: recursion detected in stored script string
  Cause: A stored script is calling itself or another script which calls itself.
  Action: Remove the recursion.

RMAN-03018: asynchronous RPCs are working correctly
  Cause: This is an informational message only.
Action: No action is required.

**RMAN-03019: asynchronous RPCs are NOT working**

**Cause:** The RPCTEST command has determined that RPCs are not executing asynchronously. Instead, they are blocking. This is caused by using a SQL*NET driver that does not support non-blocking UPI.

**Action:** Try using a different SQL*NET driver.

**RMAN-03020: asynchronous RPC test will take 1 minute**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-03023: executing command: string**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-03028: fatal error code for command string : number**

**Cause:** Informational message. This precedes error 3012.

**Action:** No action is required.

**RMAN-03029: echo set on**

**Cause:** a SET ECHO ON command was issued

**Action:** No action is required.

**RMAN-03030: echo set off**

**Cause:** a SET ECHO OFF command was issued

**Action:** No action is required.

**RMAN-03031: this option of set command needs to be used inside a run block**

**Cause:** The option used with the SET command is not valid outside a run block.

**Action:** Change the SET command or place it inside a run block.

**RMAN-03032: this option of set command needs to be used outside of a run block**

**Cause:** The option used with the SET command is not valid inside of a run block.

**Action:** Change the SET command or place it outside a run block.

**RMAN-03033: current log archived**

**Cause:** "ALTER SYSTEM ARCHIVE LOG CURRENT" command completed successfully.

**Action:** None, this is an informational message.

**RMAN-03034: LEVEL number is invalid. LEVEL must be between string and string**

**Cause:** An invalid DEBUG LEVEL was used.

**Action:** Change the DEBUG LEVEL argument.

**RMAN-03035: Debugging turned off**

**Cause:** a DEBUG OFF command was issued

**Action:** No action is required.

**RMAN-03036: Debugging set to level=number, types=string**

**Cause:** a DEBUG command was issued
Action: No action is required.

RMAN-03037: Spooling started in log file: string
  Cause: a SPOOL LOG TO ... command was issued
  Action: No action is required.

RMAN-03038: Spooling started in trace file: string
  Cause: a SPOOL TRACE TO ... command was issued
  Action: No action is required.

RMAN-03039: Spooling for log turned off
  Cause: a SPOOL LOG OFF command was issued
  Action: No action is required.

RMAN-03040: Spooling for trace turned off
  Cause: a SPOOL TRACE TO ... command was issued
  Action: No action is required.

RMAN-03042: error while analyzing automatic repair options
  Cause: of the failure.
  Action: No action is required.

RMAN-03090: Starting string at string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-03091: Finished string at string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-03098: stringRMAN-number: stringstring
  Cause: This is the message prefix with a possible indentation.
  Action: No action is required.

RMAN-03099: job cancelled at user request
  Cause: The user interrupted the current job.
  Action: None

RMAN-03999: Oracle error occurred while while converting a date: ORA-number: string
  Cause: Internal error converting a date.
  Action: Contact Oracle Support Services.

RMAN-04000: memory allocation failure
  Cause: A memory allocation request could not be satisfied.
  Action: Increase the amount of memory available to RMAN.

RMAN-04001: heap initialization failure
  Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
  Action: Check the accompanying errors.
RMAN-04002: OCIPI failed, ORA-string  
Cause: OCI process level initialization failed.  
Action: This error should not normally occur.

RMAN-04003: OCIINIT failed  
Cause: The call to OCIEnvInit failed.  
Action: This error should not normally happen. Contact Oracle Customer Support.

RMAN-04004: error from recovery catalog database: string  
Cause: Oracle error signaled by catalog database. This message should be accompanied by other error message(s) indicating the cause of the error.  
Action: Check the accompanying errors.

RMAN-04005: error from target database: string  
Cause: Oracle error signaled by target database. This message should be accompanied by other error message(s) indicating the cause of the error.  
Action: Check the accompanying errors.

RMAN-04006: error from auxiliary database: string  
Cause: Oracle error signaled by auxiliary database. This message should be accompanied by other error message(s) indicating the cause of the error.  
Action: Check the accompanying errors.

RMAN-04007: WARNING from recovery catalog database: string  
Cause: Non fatal Oracle error signaled by catalog database. This message should be accompanied by other error message(s) indicating the cause of the error.  
Action: Check the accompanying errors.

RMAN-04008: WARNING from target database: string  
Cause: Non fatal Oracle error signaled by target database. This message should be accompanied by other error message(s) indicating the cause of the error.  
Action: Check the accompanying errors.

RMAN-04009: WARNING from auxiliary database: string  
Cause: Non fatal Oracle error signaled by auxiliary database. This message should be accompanied by other error message(s) indicating the cause of the error.  
Action: Check the accompanying errors.

RMAN-04010: target database Password:  
Cause: No password was provided for the target database.  
Action: Provide target database password.

RMAN-04011: recovery catalog database Password:  
Cause: No password was provided for the recovery catalog database.  
Action: Provide recovery catalog database password.

RMAN-04012: auxiliary database Password:  
Cause: No password was provided for the auxiliary database.  
Action: Provide auxiliary database password.

RMAN-04013: must connect before startup
Cause: A STARTUP command was attempted before connecting to the database.
Action: Connect to database before attempting STARTUP command.

RMAN-04014: startup failed: string
Cause: The database failed to startup.
Action: The cause of the failure is included in the error message. Correct the cause of the failure and retry the startup command.

RMAN-04015: error setting target database character set to string
Cause: An error was received while setting the session character set in the target database.
Action: This error should not normally happen. Contact Oracle Customer Support.

RMAN-04016: could not get OCI error handle
Cause: An error was received while initializing the OCI layer.
Action: This error should not normally happen. Contact Oracle Customer Support.

RMAN-04017: startup error description: string
Cause: of failure.
Action: No action is required.

RMAN-04020: target database name "string" does not match channel's name: "string"
Cause: The CONNECT clause in the ALLOCATE command has resulted in a connection to a database which is not the same as the one used to connect to the target database.
Action: Verify that the CONNECT string connects to the same database as the one specified in the TARGET connection for the CONNECT command.

RMAN-04021: target database DBID string does not match channel's DBID string
Cause: The CONNECT clause in the ALLOCATE command has resulted in a connection to a database which is not the same as the one used to connect to the target database.
Action: Verify that the CONNECT string connects to the same database as the one specified in the TARGET connection for the CONNECT command.

RMAN-04022: target database mount id string does not match channel's mount id string
Cause: The CONNECT clause in the ALLOCATE command has resulted in a connection to a database which is not the same as the one used to connect to the target database.
Action: Verify that the CONNECT string connects to the same database as the one specified in the TARGET connection for the CONNECT command.

RMAN-04024: starting Oracle instance without parameter file for retrieval of spfile
Cause: The instance could not be started because no default parameter file (either PFILE or SPFILE) could be found. The instance will be started in restricted mode with default parameters.
Action: None - this is an informational message.

RMAN-04025: unable to generate a temporary file
Cause: Creation of a temporary file failed. If could be that the system does not have enough resources (disk space, memory or similar).
Action: Verify and free some system resources memory and try again.

RMAN-04026: unable to open a temporary file: "string"
Cause: Opening of a temporary file failed. If could be that the system does not have enough resources (disk space, memory or similar).
Action: Verify and free some system resources memory and try again.

RMAN-04027: unable to write to a temporary file: "string"
Cause: Writing to a temporary file failed. If could be that the system does not have enough resources (disk space, memory or similar).
Action: Verify and free some system resources memory and try again.

RMAN-04031: initialization parameters used for automatic instance: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-04032: using contents of file string
Cause: The specified file was included as part of the auxiliary database parameter file. This is an informational message.
Action: No action is required.

RMAN-04033: cannot open auxiliary parameter file string
Cause: An auxiliary parameter file was specified with SET AUXILIARY INSTANCE PARAMETER FILE command but the specified file cannot be found.
Action: Set the parameter file to an existent file or retry the command without setting AUXILIARY INSTANCE PARAMETER FILE.

RMAN-04034: source recovery catalog database Password:
Cause: A password was not provided for the source recovery catalog database.
Action: Provide source recovery catalog database password.

RMAN-04035: error from source recovery catalog database: string
Cause: Oracle error signaled by source recovery catalog database. This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.

RMAN-04036: WARNING from source recovery catalog database: string
Cause: Nonfatal Oracle error signaled by source recovery catalog database. This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.

RMAN-05000: CONFIGURE AUXNAME required for datafile string
Cause: Either: -) The control file mounted by the auxiliary database does not have an entry for this datafile, therefore file name conversion is not possible. -) A COPY DATAFILE TO AUXNAME command was issued, but no auxname was set for this datafile.
Action: Use the CONFIGURE AUXNAME command to specify a file name that the auxiliary database can use as a restore destination.
RMAN-05001: auxiliary file name string conflicts with a file used by the target database  
Cause: RMAN is attempting to use the specified file name as a restore destination in the auxiliary database, but this name is already in use by the target database.  
Action: Use the CONFIGURE AUXNAME command to specify a name for the data file that does not conflict with a file name in use by the target db.

RMAN-05002: aborting Tablespace Point-in-Time Recovery  
Cause: Previously encountered error(s) were issued which require corrective action.  
Action: Resolve the error conditions, and then re-issue the RECOVER command.

RMAN-05003: Tablespace Point-in-Time Recovery is not allowed for tablespace string  
Cause: The SYSTEM, SYSUAX or a tablespace containing rollback segments is not allowed in Tablespace Point-in-Time Recovery.  
Action: Remove the indicated tablespace from the recovery set and retry the operation.

RMAN-05004: target database log mode is NOARCHIVELOG  
Cause: An attempt was made to apply Tablespace Point-in-Time Recovery to a database that is in NOARCHIVELOG mode.  
Action: If all required archived log files are available for Tablespace Point-in-Time Recovery, alter the target database log mode to ARCHIVELOG and retry the Tablespace Point-in-Time Recovery operation. Otherwise, Tablespace Point-in-Time Recovery cannot be applied to this database.

RMAN-05005: Tablespace Point-in-Time Recovery is not allowed for re-created tablespace string  
Cause: The requested tablespace has been re-created and is not allowed in Point-in-Time Recovery.  
Action: Remove the indicated tablespace from the recovery set and retry the operation.

RMAN-05006: cannot recover clone standby single tablespaces  
Cause: Standby recover can only be performed for the whole database.  
Action: Change the tablespace list to a database specification.

RMAN-05007: no channel allocated  
Cause: A command was entered that requires a channel, and no channel is allocated.  
Action: Use ALLOCATE CHANNEL before using the command.

RMAN-05009: Block Media Recovery requires Enterprise Edition  
Cause: The RECOVER...BLOCK command was specified.  
Action: Remove the RECOVER...BLOCK command.

RMAN-05010: target database must be opened in READ WRITE mode for Tablespace Point-in-Time Recovery  
Cause: The target database was not opened in read write mode.  
Action: Open the database in read write mode.
RMAN-05011: auxiliary instance must be in NOMOUNT state for Tablespace Point-in-Time Recovery
Cause: The Auxiliary instance was not in NOMOUNT state.
Action: Open the auxiliary instance in NOMOUNT state.

RMAN-05013: auxiliary control file name string conflicts with a file used by the target database
Cause: RMAN is attempting to use the specified control file name for Tablespace Point-in-Time Recovery as a restore destination in the auxiliary database, but this name is already in use by the target database.
Action: Set control_files parameter in the auxiliary instance to a name that does not conflict with a file name in use by the target database.

RMAN-05014: Tablespaces with undo segments were not found in recovery catalog
Cause: The recovery catalog did not have information about tablespace with undo segments.
Action: Manually specify the tablespace with undo segments in the optional UNDO tablespace clause of the RECOVER command.

RMAN-05015: WARNING: not enough information in recovery catalog for specified point-in-time recovery
Cause: The recovery catalog did not have information about the tablespace with undo segments at the specified Point-in-Time. This happened because the current recovery catalog was not in use at the specified Point-in-Time. A list of tablespace with undo segments was supplied.
Action: RMAN assumes that the current set of tablespace with undo segments is the same set that was in use at the specified Point-in-Time. If the set of tablespace with undo segments changes, the recovery fails. If recovery fails, use the optional UNDO TABLESPACE clause of the RECOVER command to specify the correct set of tablespace.

RMAN-05016: failover to previous backup
Cause: This is an informational message to indicate the RMAN could not successfully restore the files using the specified backups. An attempt was made to restore the datafile/archived logs/control file/SPFILE using a previous existing backup.
Action: See accompanying additional error messages indicating the cause of the failover.

RMAN-05017: no copy of datafile number found to recover
Cause: A RECOVER COPY command was not able to proceed because no copy of indicated file was found to recover. Possible causes include the following:
1. no copy of indicated file exists on disk that satisfy the criteria specified in the user's recover operands.
2. copy of indicated datafile exists on disk but no incremental backup was found to apply to the datafile copy.
Action: One of the following:
1. Use or correct TAG specification to recover a different datafile copy.
2. Use BACKUP FOR RECOVER OF COPY command to create necessary incremental backup or copy.
RMAN-05018: some datafile copies cannot be recovered, aborting the RECOVER command
Cause: This error message can follow one or more RMAN-5017 or RMAN-5019 error messages.
Action: See RMAN-5017 or RMAN-5019 error messages documentation for more information.

RMAN-05019: WARNING: no channel of required type allocated to recover copy of datafile number
Cause: A RECOVER COPY command could not proceed because incremental backup sets exist on a device type that has not been allocated.
Action: Use the LIST command to determine which device type is needed, then allocate a channel of that type.

RMAN-05020: cannot specify AUXILIARY DESTINATION option for normal recovery
Cause: The AUXILIARY DESTINATION option was specified for a normal recovery. It is only allowed for Tablespace Point-in-Time Recovery.
Action: Remove the AUXILIARY DESTINATION option and re-run the RECOVER command.

RMAN-05021: this configuration cannot be changed for a BACKUP or STANDBY control file
Cause: The user attempted to modify the configuration which cannot be changed for a BACKUP or STANDBY control file while the mounted control file was either BACKUP or STANDBY. The following configurations can be changed only when connected to primary database instance that has CURRENT/CREATED control file type mounted: CONFIGURE RETENTION POLICY CONFIGURE EXCLUDE CONFIGURE ENCRYPTION CONFIGURE DB_UNIQUE_NAME
Action: Connect to primary database instance and execute the command.

RMAN-05022: TRANSPORT TABLESPACE may not be used with user-managed auxiliary instance
Cause: A user-managed auxiliary instance was specified.
Action: Retry the operation with an RMAN-managed auxiliary instance.

RMAN-05023: TABLESPACE DESTINATION required
Cause: A required TABLESPACE DESTINATION was not specified.
Action: Specify a TABLESPACE DESTINATION and retry the operation.

RMAN-05024: List of tablespaces presumed to have UNDO segments
Cause: Accompanying message to 5015.
Action: See action of message 5015.

RMAN-05025: Tablespace string
Cause: Accompanying message to 5015.
Action: See action of message 5015.

RMAN-05026: WARNING: presuming following set of tablespaces applies to specified point-in-time
Cause: RMAN assumes that the current set of tablespaces with undo segments is the same set that was in use at the specified Point-in-Time. If the set of tablespaces
with undo segments changes, the recovery fails. If recovery fails, use the optional UNDO TABLESPACE clause of the RECOVER command to specify the correct set of tablespaces.

**Action:** RMAN assumes that the current set of tablespaces with undo segments is the same set that was in use at the specified Point-in-Time. If the set of tablespaces with undo segments changes, the recovery fails. If recovery fails, use the optional UNDO TABLESPACE clause of the RECOVER command to specify the correct set of tablespaces.

**RMAN-05027: List of tablespaces expected to have UNDO segments**

**Cause:** Accompanying message to 5026.

**Action:** See action of message 5026.

**RMAN-05028: Tablespace string**

**Cause:** Accompanying message to 5026.

**Action:** See action of message 5026.

**RMAN-05029: UNDO TABLESPACE clause is only valid for Tablespace Point-in-Time Recovery**

**Cause:** The UNDO TABLESPACE clause was specified for non-Tablespace Point-in-Time Recovery.

**Action:** Remove the UNDO TABLESPACE clause.

**RMAN-05030: CLONE clause cannot be used with Tablespace Point-in-Time Recovery**

**Cause:** The CLONE clause was specified for a Tablespace Point-in-Time Recovery.

**Action:** Remove the CLONE clause.

**RMAN-05031: cannot specify UNDO TABLESPACE clause for normal recovery**

**Cause:** The UNDO TABLESPACE clause was specified for a normal recovery. It is only allowed for Tablespace Point-in-Time Recovery.

**Action:** Remove the UNDO TABLESPACE clause and re-run the RECOVER command.

**RMAN-05032: datafile string will be created automatically during restore operation**

**Cause:** The specified datafile did not have an available backup.

**Action:** None. This is an informational message displayed for VALIDATE or PREVIEW option of the RESTORE command.

**RMAN-05033: Media recovery start SCN is string**

**Cause:** The above system change number (SCN) would be starting media recovery SCN, if the specified files are restored.

**Action:** None. This is an informational message displayed for PREVIEW option of the RESTORE command.

**RMAN-05034: Recovery must be done beyond SCN string to clear datafile fuzziness**

**Cause:** The above system change number (SCN) identifies the minimum SCN beyond which the media recovery must be performed on the specific datafile to clear the media recovery fuzziness for all datafile.

**Action:** None. This is an informational message displayed for PREVIEW option of the RESTORE command.
RMAN-05035: archived logs generated after SCN string not found in repository
  Cause: The recovery catalog or target database control file did not have a record
  of archived logs containing the redo generated after the specified system change
  number (SCN).
  Action: None. To avoid this message, perform a log switch if the database is in
  open mode.

RMAN-05036: FOR DB_UNIQUE_NAME option cannot be used for this
  configuration
  Cause: An attempt was made to set the configuration which cannot be used with
  FOR DB_UNIQUE_NAME option.
  Action: Remove FOR DB_UNIQUE_NAME option and execute the command.

RMAN-05037: FOR DB_UNIQUE_NAME option cannot be used in nocatalog mode
  Cause: An attempt was made to set the remote configuration in nocatalog mode.
  Action: Connect to recovery catalog and execute the command.

RMAN-05038: unable to determine UNTIL SCN for TRANSPORT
  Cause: No archived logs were found in the control file.
  Action: Add UNTIL clause to TRANSPORT command and retry.

RMAN-05039: One or more auxiliary set datafiles could not be removed
  Cause: There was an error while performing Tablespace Point-in-Time Recovery.
  Some of the restored datafiles had OMF names and were not deleted.
  Action: Manually remove the auxiliary set datafiles that were not removed.

RMAN-05040: List of tablespaces that have been dropped from the target database:
  Cause: One or more tablespaces in the recovery set were not found in the control
  file of the target database.
  Action: None. Informational message.

RMAN-05041: Error during export of metadata
  Cause: Export of metadata received an error from Data Pump.
  Action: This message is accompanied by other error message(s) indicating the
  cause of the error.

RMAN-05042: Error during import of metadata
  Cause: Import of metadata received an error from Data Pump.
  Action: This message is accompanied by other error message(s) indicating the
  cause of the error.

RMAN-05043: Tablespace string
  Cause: Accompanying message to 5040.
  Action: See Action of message 5040.

RMAN-05044: Performing export of metadata...
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-05045: Performing import of metadata...
  Cause: This is an informational message only.
Action: No action is required.

RMAN-05046: Export completed
Cause: This is an informational message only.
Action: No action is required.

RMAN-05047: Import completed
Cause: This is an informational message only.
Action: No action is required.

RMAN-05048: specified file name string conflicts with a file used by the target database
Cause: The specified file name was already in use by another datafile in the database.
Action: Use SET NEWNAME command to specify a different name for the datafile that does not conflict with a file name in use by the target database.

RMAN-05049: datafile string is an Oracle Managed File, DB_CREATE_FILE_DEST not set at target
Cause: A Tablespace Point-in-Time Recovery was attempted but the datafile is an Oracle Managed File and DB_FILE_CREATE_DEST is not currently set for the target database.
Action: Specify DB_FILE_CREATE_DEST for the target database or provide a NEWNAME for the specified datafile.

RMAN-05050: flashing back control file to SCN string
Cause: RESTORE command was issued with a SET UNTIL clause and Flashback Database enabled. The control file was flashed back to the SET UNTIL time.
Action: This is an informational message only.

RMAN-05051: analyzing automatic repair options; this may take some time
Cause: This is an informational message only.
Action: No action is required.

RMAN-05052: Repair string is not compatible with this version of RMAN.
Cause: The specified repair was not compatible with this version of Recovery Manager (RMAN).
Action: Use a newer version of the RMAN executable.

RMAN-05053: AUXILIARY DESTINATION is only valid when using a RMAN-managed auxiliary instance
Cause: AUXILIARY DESTINATION clause was specified while using an user-managed auxiliary instance.
Action: Do not specify AUXILIARY DESTINATION clause and retry the operation or use a RMAN-managed auxiliary instance.

RMAN-05054: recover block operand string cannot be used to recover datafile
Cause: The specified operand could not be used with RECOVER datafile command.
Action: Delete the invalid operand and retry the command.

RMAN-05055: recover datafile operand string cannot be used to recover block
**Cause:** The specified operand could not be used with RECOVER block command.

**Action:** Delete the invalid operand and retry the command.

**RMAN-05060: block specifier must be specified to recover block**

**Cause:** Block Specifier was not specified in the command.

**Action:** Specify block specifier and resubmit the command.

**RMAN-05061: analyzing automatic repair options complete**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-05062: image copy needs no roll forward**

**Cause:** The image copy that would be rolled forward by the RECOVER COPY command is already more recent than the specified UNTIL time or system change number (SCN).

**Action:** Usually this is the result of a recent OPEN RESETLOGS operation, and no action is needed, because the daily backup strategy will start rolling this copy forward after it becomes old enough to be eligible for rolling forward. To force the copy to be rolled forward, specify a more recent UNTIL time or system change number (SCN).

**RMAN-05070: Running TRANSPORT_SET_CHECK on recovery set tablespaces**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-05071: TRANSPORT_SET_CHECK completed successfully**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-05072: TRANSPORT_SET_CHECK failed**

**Cause:** SYS.TS_PITR_CHECK was not empty for recovery set tablespaces.

**Action:** Fix dependencies before attempting TSPITR again.

**RMAN-05073: Tablespace string creation SCN string is ahead of point-in-time SCN string**

**Cause:** The tablespace was found in the control file but the creation system change number (SCN) of the datafile(s) is after the specified point-in-time. This can happen if a previous tablespace point-in-time recovery was performed, for the tablespace.

**Action:** If a previous TSPITR has been performed drop the tablespace and retry the command. Otherwise, verify the name of the tablespace and/or the point-in-time and resubmit the command.

**RMAN-05074: Tablespace string does not exist at specified point-in-time SCN string**

**Cause:** The tablespace was found in the control file but the creation system change number (SCN) of the datafile(s) is after the specified point-in-time.

**Action:** Verify the name of the tablespace and/or the point-in-time and resubmit the command.

**RMAN-05500: the auxiliary database must be not mounted when issuing a DUPLICATE command**
Cause: A DUPLICATE command was issued, but the auxiliary database is mounted.
Action: Dismount the auxiliary database.

RMAN-05501: aborting duplication of target database
Cause: Previously encountered errors require corrective action.
Action: Resolve the error conditions, and reissue the DUPLICATE command.

RMAN-05502: the target database must be mounted when issuing a DUPLICATE command
Cause: A DUPLICATE command was issued, but the target database control file is not mounted.
Action: Mount the target database control file by issuing ALTER DATABASE MOUNT via Enterprise Manager or Server Manager.

RMAN-05503: at least one auxiliary channel must be allocated to execute this command
Cause: No auxiliary channels were allocated.
Action: Allocate an auxiliary channel.

RMAN-05504: at least two redo log files or groups must be specified for this command
Cause: Only one redo log file or group was specified
Action: Specify at least one more redo log file or group

RMAN-05505: auxiliary file name conversion of 'string' exceeds maximum length of 'string'
Cause: When the given file name is converted to the name used for the auxiliary database, the converted name is larger than the maximum allowed file name.
Action: Change initialization parameter DB_FILE_NAME_CONVERT to convert to a valid file name.

RMAN-05506: error during recursive execution
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.

RMAN-05507: standby control file checkpoint (string) is more recent than duplication point-in-time (string)
Cause: A DUPLICATE FOR STANDBY command was issued, but the checkpoint of the control file is more recent than the last archived log or the specified point-in-time.
Action: If an explicit point-in-time was specified, change it to be at least the control file checkpoint; otherwise archive (and backup/copy) the current log.

RMAN-05510: Duplicate finished
Cause: This is an informational message only.
Action: No action is required.

RMAN-05511: Datafile string skipped by request
Cause: This is an informational message only.
Action: No action is required.
RMAN-05512: Tablespace string cannot be skipped from duplication
Cause: The SYSTEM and SYSAUX tablespaces were not included in the DUPLICATE DATABASE. They must be present.
Action: Remove the SYSTEM and/or SYSAUX tablespace from the SKIP list and retry the operation.

RMAN-05513: cannot duplicate, control file is not current or standby
Cause: Target database did not have a current or standby control file.
DUPLICATE requires the target database to have a current or standby control file.
Action: Open database to make control file current or connect to a different database before retrying the command.

RMAN-05514: Tablespace string has undo information, cannot skip
Cause: All tablespaces that have undo information must be included in the duplication.
Action: Remove the specified tablespace from the SKIP list and retry the operation.

RMAN-05515: Duplicate for standby does not allow the use of SET UNTIL
Cause: A SET UNTIL clause was specified for the command.
Action: Remove the SET UNTIL clause and try again.

RMAN-05516: duplicate operand specified: string
Cause: The specified operand appears more than once in the same DUPLICATE option list
Action: Delete the duplicated operand.

RMAN-05517: tempfile string conflicts with file used by target database
Cause: RMAN attempted to use the specified tempfile as a restore destination in the auxiliary database, but this name was already in use by the target database.
Action: Use the SET NEWNAME FOR TEMPFILE command to specify a name for the indicated tempfile, making sure that the new name does not conflict with a file name in use by target database. Alternatively, use DB_FILE_NAME_CONVERT and retry the command.

RMAN-05518: Automatically adding tablespace string
Cause: This is an informational message only.
Action: No action is required.

RMAN-05519: WARNING: tablespace string is always included when duplicating
Cause: The SYSTEM and SYSAUX tablespaces were included in the DUPLICATE TABLESPACE command. They were automatically included by the command and did not need to be explicitly named.
Action: To avoid this warning, remove the SYSTEM and/or SYSAUX tablespace from the tablespaces list and retry the operation.

RMAN-05520: database name mismatch, auxiliary instance has string, command specified string
Cause: The database name specified in the initialization parameter was not the same as the database name provided in the DUPLICATE command.
Action: Correct the database name in the command or adjust the database name of the auxiliary instance.
RMAN-05521: DUPLICATE without CATALOG and TARGET not open requires that UNDO TABLESPACE is specified
Cause: A DUPLICATE was attempted when target database was not open without connection to a recovery catalog. It is necessary that the list of tablespaces with undo segments is provided with the UNDO TABLESPACE clause.
Action: Retry the command specifying the list of tablespaces with undo segments using the UNDO TABLESPACE clause.

RMAN-05522: Skipping tablespace string
Cause: This is an informational message only.
Action: No action is required.

RMAN-05523: Tablespace string is read only and SKIP READONLY was specified
Cause: Conflicting parameters were provided.
Action: Remove SKIP READONLY or remove read-only tablespace from list of tablespaces to duplicate.

RMAN-05524: Tablespace string is offline
Cause: It was not possible to duplicate offline tablespaces.
Action: Remove offline tablespace from list or online tablespace to duplicate it.

RMAN-05525: SKIP TABLESPACE cannot be used when using DUPLICATE TABLESPACE
Cause: A SKIP TABLESPACE clause was specified for the command.
Action: Remove the SKIP TABLESPACE clause and try again.

RMAN-05526: datafile number not processed because file is OFFLINE IMMEDIATE
Cause: A DUPLICATE command omitted processing the indicated datafile because it is offline immediate. The tablespace to which this datafile belongs will also not be included. See message 5528.
Action: None, informational message only.

RMAN-05527: Tablespace string has one or more OFFLINE IMMEDIATE datafiles
Cause: It was not possible to duplicate a tablespace who had offline immediate tablespaces.
Action: Remove offending tablespace from list or recover datafile which are offline immediate in the tablespace before attempting the command again.

RMAN-05528: datafile number not processed because file belongs to tablespace with one or more offline immediate datafile (string)
Cause: A DUPLICATE command omitted processing the indicated datafile because it is part of a tablespace that has offline immediate datafile. See message 5526.
Action: No action is required. This is an informational message only.

RMAN-05529: WARNING: DB_FILE_NAME_CONVERT resulted in invalid ASM names; names changed to disk group only.
Cause: It was not possible to convert ASM Oracle Managed Files names using DB_FILE_NAME_CONVERT parameter. RMAN changed these invalid names to the converted disk group name instead.
Action: No action is required. This is an informational message only. If the automatic change is incorrect, use one of the following options instead of using
DB_FILE_NAME_CONVERT for ASM Oracle Managed Files: 1) use RMAN command SET NEWNAME for each Oracle Managed File. 2) set DB_CREATE_FILE_DEST initialization parameter in auxiliary instance and not specify DB_FILE_NAME_CONVERT.

**RMAN-05530: an UNTIL TIME or SCN cannot be specified with FROM ACTIVE DATABASE**

**Cause:** A DUPLICATE with FROM ACTIVE DATABASE was specified along with either a SET UNTIL statement or UNTIL clause on the command. This is not supported. A DUPLICATE FROM ACTIVE DATABASE always creates a copy as of the current time.

**Action:** Check the statement and remove the use of UNTIL.

**RMAN-05531: a mounted database cannot be duplicated while datafiles are fuzzy**

**Cause:** A DUPLICATE with FROM ACTIVE DATABASE command was specified while the database was mounted or open read-only. Unless the database is open read/write, the datafiles cannot be fuzzy.

**Action:** Open the database read/write, then shutdown cleanly before mounting.

**RMAN-05532: PASSWORD FILE specified without FROM ACTIVE DATABASE**

**Cause:** The PASSWORD FILE clause of the DUPLICATE command was specified but the FROM ACTIVE DATABASE clause was not. A password file can only be duplicated if the FROM ACTIVE DATABASE clause has been used.

**Action:** Remove the PASSWORD FILE clause from the command, or perform an online duplicate of the database by specifying the FROM ACTIVE DATABASE clause.

**RMAN-05533: string is not supported on string database**

**Cause:** The specified command is not supported on this type of database. The type of database can be STANDBY, CLONE, or RAC.

**Action:** Do not use the specified command against this database.

**RMAN-05534: WARNING: LOG_FILE_NAME_CONVERT resulted in invalid ASM names; names changed to disk group only.**

**Cause:** It was not possible to convert ASM Oracle Managed Files names using LOG_FILE_NAME_CONVERT parameter. RMAN changed these invalid names to the converted disk group name instead.

**Action:** If the automatic change is incorrect, use one of the following options instead of using LOG_FILE_NAME_CONVERT for ASM Oracle Managed Files: 1) Use the LOGFILE clause for online log files. 2) After DUPLICATE completes, create standby log files using the SQL ALTER DATABASE ADD STANDBY LOGFILE command.

**RMAN-05535: WARNING: All redo log files were not defined properly.**

**Cause:** It was not possible to define all the redo log files. This can occur when LOG_FILE_NAME_CONVERT initialization parameter is defined but fails to match all the names or causes names to be created that are not in valid directories.

**Action:** Query the V$LOGFILE view to see what redo log files are defined after DUPLICATE has completed. Use the ALTER DATABASE RENAME FILE SQL command to correctly name the existing redo log files.

**RMAN-05536: auxiliary logfile name string conflicts with a file used by the target database**
**Cause:** RMAN attempted to use the specified logfile name as a standby redo log file in the auxiliary database, but this name was already in use by the target database.

**Action:** Use or alter LOG_FILE_NAME_CONVERT so that unique logfile names can be generated. Or wait for the command to complete and create standby logfiles using the SQL ALTER DATABASE ADD STANDBY LOGFILE command.

**RMAN-05537: DUPLICATE without TARGET connection when auxiliary instance is started with spfile cannot use SPFILE clause**

**Cause:** A DUPLICATE was attempted when the auxiliary database was started with a server parameter file and the SPFILE sub-clause was specified. RMAN cannot restore the server parameter file if the auxiliary database is already started with a server parameter file.

**Action:** Start the auxiliary database with a client parameter file or do not specify SPFILE sub-clause and retry.

**RMAN-05538: WARNING: implicitly using DB_FILE_NAME_CONVERT**

**Cause:** The duplicated SPFILE had DB_FILE_NAME_CONVERT set and it has been used to produce datafile names for the new database.

**Action:** No action is required. This is an informational message only. If this behavior was not intended, then do not duplicate the server parameter file, or explicitly set DB_FILE_NAME_CONVERT in the DUPLICATE command and retry the operation.

**RMAN-05539: DUPLICATE TARGET DATABASE cannot be used without connecting to the TARGET**

**Cause:** A DUPLICATE TARGET DATABASE was attempted and no connection to the TARGET database was established.

**Action:** Connect to TARGET or use DATABASE <db_name> clause.

**RMAN-05540: no archived logs found in repository for database string**

**Cause:** Recovery catalog did not have archived log records for the specified database. If database is running in NOARCHIVELOG mode, then specify NOREDO.

**Action:** Specify NOREDO for NOARCHIVELOG databases. Cannot duplicate an ARCHIVELOG database unless the recovery catalog or target database control file has archived redo log information about it.

**RMAN-05541: no archived logs found in target database**

**Cause:** Target database was running in archived log mode, but control file did not have any archived log records.

**Action:** Archive current log before retrying command.

**RMAN-05542: Only UNTIL TIME can be used with DUPLICATE without TARGET and CATALOG connections**

**Cause:** A DUPLICATE without TARGET and CATALOG connections was attempted specifying an UNTIL clause that was not TIME based.

**Action:** Retry the command with an UNTIL TIME clause or without an UNTIL clause.

**RMAN-05543: DUPLICATE without TARGET connection requires that DATABASE is specified**
**Cause:** A DUPLICATE without TARGET connection was attempted without specifying the database to duplicate.

**Action:** Retry the command specifying the DATABASE to duplicate.

**RMAN-05544: Cannot specify ACTIVE DATABASE when not connected to target database**

**Cause:** DUPLICATE from ACTIVE DATABASE required a connection to the target database.

**Action:** Connect to target database or remove from ACTIVE DATABASE and retry the command.

**RMAN-05545: WARNING: Until SCN string is ahead of SCN of last full resync of recovery catalog: string**

**Cause:** The specified point-in-time for duplication without a target connection was ahead of the last time that the datafile information was resynced to the recovery catalog. Information about offline and read-only datafiles might be incorrect.

**Action:** If duplication fails due to incorrectly identified offline and/or read-only datafiles, specify a point-in-time before the last resync of the recovery catalog and retry the command. Or perform full resync of the target database and retry the command.

**RMAN-05546: DUPLICATE without TARGET and CATALOG connections requires that BACKUP LOCATION is specified**

**Cause:** A DUPLICATE without TARGET and CATALOG connections was attempted without specifying BACKUP LOCATION.

**Action:** Retry the command specifying a BACKUP LOCATION.

**RMAN-05547: Checking that duplicated tablespaces are self-contained**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-05548: The set of duplicated tablespaces is not self-contained**

**Cause:** A DUPLICATE TABLESPACE has specified a set of tablespaces that cannot function independently.

**Action:** Retry the command without incomplete tablespaces or add other tablespaces to make the set self-contained.

**RMAN-05549: The following SYS objects were found in skipped tablespaces**

**Cause:** This is an informational message only.

**Action:** No action required.

**RMAN-05550: TARGET database not open, cannot verify that set of tablespaces being duplicated does not have SYS objects**

**Cause:** This is an informational message only.

**Action:** No action required.

**RMAN-05551: Not connected to TARGET, cannot verify that set of tablespaces being duplicated does not have SYS objects**

**Cause:** This is an informational message only.

**Action:** No action required.
RMAN-05552: Object string on tablespace string
 Cause: A SYS object was found in one of the skipped tablespaces.
 Action: Remove object if possible or include tablespace in duplicated tablespaces.

RMAN-05553: SYS objects in skipped tablespaces prevent duplication
 Cause: Objects owned by SYS were found in the tablespaces that would not be duplicated.
 Action: If using SKIP TABLESPACE, do not skip tablespaces that contain SYS objects. If using DUPLICATE TABLESPACE, make sure to specify all tablespaces containing SYS objects.

RMAN-05554: cannot specify INCARNATION when duplicating without TARGET and CATALOG connections
 Cause: A DUPLICATE without TARGET and CATALOG connections was attempted when INCARNATION was also specified.
 Action: Retry the command without specifying INCARNATION.

RMAN-05555: Not connected to TARGET or TARGET not open, cannot verify that subset of tablespaces is self-contained
 Cause: This is an informational message only.
 Action: No action is required.

RMAN-05556: not all datafiles have backups that can be recovered to SCN string
 Cause: One or more datafiles being duplicated could not be restored as no available backups were found.
 Action: Change the system change number (SCN) or make backups available for the specified datafiles and retry the command.

RMAN-05557: Target instance not started with server parameter file
 Cause: SPFILE clause was used but target instance was not started with a server parameter file.
 Action: Do not specify SPFILE clause, or restart target instance with server parameter file.

RMAN-05558: Must specify DB_UNIQUE_NAME with FOR STANDBY clause
 Cause: A DUPLICATE FOR STANDBY ... SPFILE command was issued but DB_UNIQUE_NAME was not provided for the standby database.
 Action: Specify a DB_UNIQUE_NAME in the SPFILE clause for the standby database.

RMAN-05559: error converting parameter string, string larger than number
 Cause: While attempting to apply a PARAMETER_VALUE_CONVERT to the specified parameter value, the resulting string exceeded the maximum length for a value.
 Action: Change the PARAMETER_VALUE_CONVERT so that, when converting the parameter, the maximum length is not reached.

RMAN-05560: Using previous duplicated file string for datafile number with checkpoint SCN of string
 Cause: A datafile copy from a previous duplicate attempt matching the duplicate name requested was found for the specified datafile and will be used instead of restoring the datafile from a backup.
**Action:** No action needed unless this behavior is not desire. In that case, either use a different name for the datafile or use NORESUME to avoid using previous datafile copies for all the datafiles.

**RMAN-05561: CATALOG did not return information about tablespaces with undo segments**

**Cause:** A DUPLICATE with no target connection was attempted, but the recovery catalog did not have information about the tablespaces with undo segments at the specified point in time. It is necessary that the list of tablespaces with undo segments is provided with the UNDO TABLESPACE clause.

**Action:** Retry the command specifying the list of tablespaces with undo segments using the UNDO TABLESPACE clause.

**RMAN-05562: SPFILE backup not found for database **string** with DBID number created before **string** in **string****

**Cause:** RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

**Action:** Change the parameters, or provide a different location and retry the command.

**RMAN-05563: SPFILE backup not found for database with DBID number created before **string** in **string****

**Cause:** RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

**Action:** Change the parameters, or provide a different location and retry the command.

**RMAN-05564: SPFILE backup not found for database **string** created before **string** in **string****

**Cause:** RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

**Action:** Change the parameters, or provide a different location and retry the command.

**RMAN-05565: SPFILE backup created before **string** not found in **string****

**Cause:** RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

**Action:** Change the parameters, or provide a different location and retry the command.

**RMAN-05566: SPFILE backup not found for database **string** with DBID number in **string****

**Cause:** RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

**Action:** Change the parameters, or provide a different location and retry the command.

**RMAN-05567: SPFILE backup not found for database with DBID number in **string****

**Cause:** RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

**Action:** Change the parameters, or provide a different location and retry the command.
RMAN-05568: SPFILE backup not found for database string in string
Cause: RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.
Action: Change the parameters, or provide a different location and retry the command.

RMAN-05569: SPFILE backup not found in string
Cause: RMAN could not locate a backup of the SPFILE in the specified location.
Action: Provide a different location and retry the command.

RMAN-05570: Duplicate for standby does not allow the use of LOGFILE
Cause: A LOGFILE clause was specified for the command.
Action: Remove the LOGFILE clause and try again.

RMAN-05571: DORECOVER specified for non standby duplication
Cause: A DORECOVER clause was specified and the duplicate did not specify FOR STANDBY.
Action: Remove the DORECOVER clause or add FOR STANDBY and try again.

RMAN-05572: Controlfile backup not found for database string with DBID number created before string in string
Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.
Action: Change the parameters, or provide a different location and retry the command.

RMAN-05573: CONTROLFILE backup not found for database with DBID number created before string in string
Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.
Action: Change the parameters, or provide a different location and retry the command.

RMAN-05574: CONTROLFILE backup not found for database string created before string in string
Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.
Action: Change the parameters, or provide a different location and retry the command.

RMAN-05575: CONTROLFILE backup created before string not found in string
Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.
Action: Change the parameters, or provide a different location and retry the command.

RMAN-05576: CONTROLFILE backup not found for database string with DBID number in string
Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.
Action: Change the parameters, or provide a different location and retry the command.
RMAN-05577: CONTROLFILE backup not found for database with DBID number in string
Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.
Action: Change the parameters, or provide a different location and retry the command.

RMAN-05578: CONTROLFILE backup not found for database string in string
Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.
Action: Change the parameters, or provide a different location and retry the command.

RMAN-05579: CONTROLFILE backup not found in string
Cause: RMAN could not locate a backup of the control file in the specified location.
Action: Provide a different location and retry the command.

RMAN-05580: Duplicate for standby does not allow the use of SKIP READONLY
Cause: A SKIP READONLY clause was specified for the command.
Action: Remove the SKIP READONLY clause and try again.

RMAN-05581: Duplicate for standby does not allow the use of SKIP TABLESPACE
Cause: A SKIP TABLESPACE clause was specified for the command.
Action: Remove the SKIP TABLESPACE clause and try again.

RMAN-05582: Duplicate for standby does not allow the use of OPEN RESTRICTED
Cause: An OPEN RESTRICTED clause was specified for the command.
Action: Remove the OPEN RESTRICTED clause and try again.

RMAN-05583: Duplicate for standby does not allow the use of TABLESPACE
Cause: A TABLESPACE clause was specified for the command.
Action: Remove the TABLESPACE clause and try again.

RMAN-05584: Duplicate for standby does not allow the use of NOREDO
Cause: A NOREDO clause was specified for the command.
Action: Remove the NOREDO clause and try again.

RMAN-05585: Duplicate for standby does not allow the use of UNDO TABLESPACE
Cause: A UNDO TABLESPACE clause was specified for the command.
Action: Remove the UNDO TABLESPACE clause and try again.

RMAN-05586: The following materialized objects were found in skipped tablespaces
Cause: This is an informational message only.
Action: No action required.

RMAN-05587: Materialized table string on tablespace string
Cause: A materialized table was found in one of the skipped tablespaces.
Action: Remove object if possible or include tablespace in duplicated tablespaces.
RMAN-05588: Materialized index string on tablespace string
  Cause: A materialized index was found in one of the skipped tablespaces.
  Action: Remove object if possible or include tablespace in duplicated tablespaces.

RMAN-05589: Materialized objects in skipped tablespaces prevent duplication
  Cause: Materialized objects found in the tablespaces that would not be duplicated.
  Action: If using SKIP TABLESPACE, do not skip tablespaces that contain materialized objects. If using DUPLICATE TABLESPACE, make sure to specify all tablespaces containing SYS objects.

RMAN-05590: Reenabling controlfile options for auxiliary database
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-05591: Ignoring error, reattempt command after duplicate finishes
  Cause: A sql error was received during the execution of command.
  Action: Check the accompanying errors.

RMAN-05592: Dropping offline and skipped tablespaces
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-05593: Could not drop tablespace string due to constraints, will reattempt removal after other tablespaces are removed
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-05594: Could not drop tablespace string due to constraints
  Cause: The tablespace failed to be dropped several times, no more attempts will be made.
  Action: Drop the tablespace manually after duplicate finishes.

RMAN-05595: Leaving database unopened, as requested
  Cause: User requested that the new database was not open.
  Action: After the database is opened with resetlogs you might want to:
          - Catalog datafilecopies of readonly datafiles
          - Switch readonly datafiles to the cataloged datafilecopies
          - Online read only tablespaces
          - Drop skipped tablespaces
          - Enable supplemental logging
          - Enable force logging
          - Enable change tracking

RMAN-05596: Error while removing created server parameter file
  Cause: Server parameter file was not deleted. This message should be accompanied by other error message(s) indicating the cause of the error.
  Action: Check the accompanying errors. Remove file manually.
RMAN-05597: Database started with server parameter file and PFILE clause used in command
   Cause: A PFILE clause was specified for duplicate command, but database was started with a server parameter file causing a conflict.
   Action: Remove PFILE clause from command or restart database without using a server parameter file.

RMAN-05598: SPFILE and PFILE clause specified in command
   Cause: SPFILE and PFILE clauses were specified for duplicate command causing a conflict.
   Action: Remove either one of the clauses and retry the command.

RMAN-05599: PASSWORD clause is not needed when duplicating for standby database from active database
   Cause: PASSWORD clause was specified when creating a standby database from active database. This is not needed, it is automatic.
   Action: No action is required. This is an informational message only.

RMAN-05600: Cannot specify UNTIL clause when duplicating from active database
   Cause: An UNTIL clause in the command or with a SET UNTIL was in effect for an active database duplication.
   Action: Remove UNTIL clause and reattempt duplication.

RMAN-05601: Failed to restore original settings to server parameter file
   Cause: An error was received while duplicating the database after the server parameter file was modified by RMAN. An attempt was made to restore original settings to the server parameter file, but the original error was such that it was not possible to restore the settings.
   Action: Before reattempting database duplication, the server parameter file needs to be fixed manually with the original values.

RMAN-05602: restarting auxiliary database without server parameter file
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-06000: could not open recovery manager library file: string
   Cause: The "recover.bsq" file could not be opened.
   Action: Check that the file was installed correctly and that the user running RMAN has authority to read the file.

RMAN-06001: error parsing job step library
   Cause: A syntax error was encountered while parsing "recover.bsq".
   Action: Ensure that the correct version of the file is installed and that it has not been modified in any way.

RMAN-06002: command not allowed when not connected to a recovery catalog
   Cause: A command that is allowed only when a recovery catalog connect string was supplied was attempted.
   Action: Avoid using the command, or restart RMAN and supply a recovery catalog connect string via the CATALOG parameter.

RMAN-06003: ORACLE error from target database: string
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.

RMAN-06004: ORACLE error from recovery catalog database: string
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.

RMAN-06005: connected to target database: string (DBID=string)
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: No action is required.

RMAN-06006: connected to target database: string (not mounted)
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: No action is required.

RMAN-06007: target database not mounted and db_name not set in init.ora
Cause: The target database has not mounted the control file, and its "init.ora" file does not specify the DB_NAME parameter.
Action: MOUNT the target database, or add the DB_NAME parameter to its "init.ora" and restart the instance.

RMAN-06008: connected to recovery catalog database
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: No action is required.

RMAN-06009: using target database control file instead of recovery catalog
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: No action is required.

RMAN-06010: error while looking up datafile: string
Cause: An error occurred while looking up the specified datafile in the recovery catalog or target database control file.
Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the file name is entered correctly. If the datafile was added recently, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06011: invalid level specified: number
Cause: An invalid incremental backup level was specified.
Action: Incremental backup level must be between 0 and 4.

RMAN-06012: channel: string not allocated
Cause: A RELEASE command was found for a channel identifier that was not yet allocated.
Action: Correct the channel identifier, or add an ALLOCATE CHANNEL command.

RMAN-06013: duplicate channel identifier found: string
Cause: A channel identifier was reused without first releasing the channel.
Action: Add a RELEASE CHANNEL command.
RMAN-06014: command not implemented yet: string
  Cause: Not all commands are implemented for the beta release.
  Action: Avoid using the command.

RMAN-06015: error while looking up datafile copy name: string
  Cause: An error occurred while looking up the specified datafile copy name in the
  recovery catalog or target database control file.
  Action: This error is accompanied by other errors describing the reason for the
  failure. Ensure that the file name is entered correctly. If the datafile copy was
  created when the recovery catalog was not available, then a RESYNC CATALOG
  must be done to update the recovery catalog.

RMAN-06016: duplicate backup operand specified: string
  Cause: The specified operand appears more than once in the same backup
  specifier or backup command.
  Action: Delete the duplicated operand.

RMAN-06017: initialization of parser failed
  Cause: The parser package initialization routine returned an error.
  Action: This message should be accompanied by other error message(s) indicating
  the cause of the error.

RMAN-06018: duplicate operand specified in backup specification: string
  Cause: A backup specification operand appears more than once in a backup
  specification.
  Action: Delete the duplicate operand.

RMAN-06019: could not translate tablespace name "string"
  Cause: An error occurred while looking up the specified tablespace name in the
  recovery catalog or target database control file.
  Action: This error is accompanied by other errors describing the reason for the
  failure. Ensure that the tablespace is entered correctly. If the tablespace was added
  recently, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06020: connected to auxiliary database (not started)
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06021: FROM DATAFILECOPY/BACKUPSET may not be specified with
  archived logs
  Cause: The FROM DATAFILECOPY/BACKUPSET option applies only to datafile
  and control file restores.
  Action: Use this option only for datafile and control file restores.

RMAN-06022: invalid level specified for image copy: number
  Cause: An invalid incremental backup level was specified for an image copy.
  Action: Incremental backup level must be 0 for image copies.

RMAN-06023: no backup or copy of datafile number found to restore
  Cause: A datafile, tablespace, or database restore could not proceed because no
  backup or copy of the indicated file was found. It may be the case that a backup or
copy of this file exists but does not satisfy the criteria specified in the user's restore operands.

**Action:** None - this is an informational message. See message 6026 for further details.

**RMAN-06024: no backup or copy of the control file found to restore**

**Cause:** A control file restore could not proceed because no backup or copy of the control file was found. It may be the case that a backup or copy of this file exists but does not satisfy the criteria specified in the user's restore operands.

**Action:** None - this is an informational message. See message 6026 for further details.

**RMAN-06025: no backup of archived log for thread number with sequence number and starting SCN of string found to restore**

**Cause:** An archived log restore restore could not proceed because no backup of the indicated archived log was found. It may be the case that a backup of this file exists but does not satisfy the criteria specified in the user's restore operands.

**Action:** None - this is an informational message. See message 6026 for further details.

**RMAN-06026: some targets not found - aborting restore**

**Cause:** Some of the files specified for restore could not be found. Message 6023, 6024, or 6025 is also issued to indicate which files could not be found. Some common reasons why a file can not be restored are that there is no backup or copy of the file that is known to recovery manager, or there are no backups or copies that fall within the criteria specified on the RESTORE command, or some datafile copies have been made but not cataloged.

**Action:** The Recovery Manager LIST command can be used to display the backups and copies that Recovery Manager knows about. Select the files to be restored from that list.

**RMAN-06027: no archived logs found that match specification**

**Cause:** An archived log record specifier did not match any archived logs in the recovery catalog or target database control file.

**Action:** Resubmit the command with a different archived log record specifier. The Recovery Manager (RMAN) LIST command can be used to display all archived logs that RMAN knows about.

**RMAN-06028: duplicate operand specified in restore specification: string**

**Cause:** The CHANNEL, TAG, FROM, PARMS, VALIDATE, DEVICE TYPE, CHECK READONLY or DB_UNIQUE_NAME option was specified more than once in the restore command or in one of the restore specifications.

**Action:** Correct and resubmit the command.

**RMAN-06029: the control file may be included only in a datafile backup set**

**Cause:** The "include current/standby control file" option was specified for an archived log backup set.

**Action:** Use this option only for datafile backup sets.

**RMAN-06030: the DELETE [ALL] INPUT option may not be used with a datafile backup set**

**Cause:** The DELETE [ALL] INPUT option was specified for a backup that contains the current control file or datafile.
Action: Remove the option and resubmit the command.

**RMAN-06031: could not translate database keyword**
*Cause:* An error was received when calling DBMS_RCVMAN
*Action:* This message should be accompanied by other error message(s) indicating the cause of the error.

**RMAN-06032: at least 1 channel of TYPE DISK must be allocated to execute a COPY command**
*Cause:* No channel of TYPE DISK was allocated.
*Action:* Allocate a channel of TYPE DISK and re-issue the command.

**RMAN-06033: channel string not allocated**
*Cause:* An rman command requests a specific channel, but the requested channel has not been allocated.
*Action:* ALLOCATE the channel, or correct the channel identifier.

**RMAN-06034: at least 1 channel must be allocated to execute this command**
*Cause:* No channels were allocated.
*Action:* ALLOCATE a channel.

**RMAN-06035: wrong version of recover.bsq, expecting string, found string**
*Cause:* The "recover.bsq" file is incompatible with the RMAN executable.
*Action:* Install the correct version of recover.bsq.

**RMAN-06036: datafile number is already restored to file string**
*Cause:* A SET NEWNAME command was issued to restore a datafile to a location other than the original datafile, and Recovery Manager determined that the best candidate for restoring the file is the datafile copy with the same name, therefore the file is already restored and no action need be taken.
*Action:* None - this is an informational message.

**RMAN-06038: recovery catalog package detected an error**
*Cause:* A call to DBMS_RCVMAN returned an error.
*Action:* This message should be accompanied by other error message(s) indicating the cause of the error.

**RMAN-06039: SET NEWNAME command has not been issued for datafile string**
*Cause:* A SWITCH command was specified for a datafile, but no destination was specified and no SET NEWNAME command has been previously issued for that file. An explicit file to switch to must be specified if no SET NEWNAME command has been issued.
*Action:* Correct and resubmit the SWITCH command.

**RMAN-06040: control file is already restored to file string**
*Cause:* The best candidate control file for restoration is the one that is named in the RESTORE CONTROLFILE command, hence no action need be taken.
*Action:* None - this is an informational message.

**RMAN-06041: cannot switch file number to copy of file number**
*Cause:* An attempt was made to switch a datafile to a copy of a different datafile.
*Action:* Correct and resubmit the SWITCH command.
RMAN-06042: PLUS ARCHIVELOG option is not supported with non-datafile backups  
**Cause:** The PLUS ARCHIVELOG option was supplied but does not apply to this type of backup.  
**Action:** Remove the PLUS ARCHIVELOG operand and re-enter the command.

RMAN-06043: TAG option not supported for archived log copies  
**Cause:** The tag option was supplied but does not apply to this type of copy.  
**Action:** Remove the TAG operand and re-enter the command.

RMAN-06045: LEVEL option not supported for archived log or current/standby control file copies  
**Cause:** The LEVEL option was supplied but does not apply to this type of copy.  
**Action:** Remove the LEVEL operand and re-enter the command.

RMAN-06046: archived log name: *string*  
**Cause:** An error occurred while translating an archived log name to its recovery catalog RECID/time stamp. This message should be accompanied by other error message(s) indicating the cause of the error.  
**Action:** Check the accompanying errors.

RMAN-06047: duplicate datafile *number* specified for restoration from copy  
**Cause:** The indicated datafile was specified more than once in the same restore command.  
**Action:** Correct and resubmit the RESTORE command.

RMAN-06048: duplicate control file specified for restoration from copy  
**Cause:** The control file was specified more than once in the same RESTORE command.  
**Action:** Correct and resubmit the RESTORE command.

RMAN-06049: CHECK LOGICAL option not supported for archived log or current/standby control file copies  
**Cause:** The check logical option was supplied but does not apply to this type of copy.  
**Action:** Remove the CHECK LOGICAL operand and re-enter the command.

RMAN-06050: archived log for thread *number* with sequence *number* is already on disk as file *string*  
**Cause:** An archived log which was requested to be restored (either explicitly or via a range specification) does not need to be restored because it already exists on disk.  
**Action:** None - this is an informational message.

RMAN-06051: DELETE INPUT option not implemented yet  
**Cause:** This option was specified in a backup specification.  
**Action:** Remove the DELETE INPUT option.

RMAN-06052: no parent backup or copy of datafile *number* found  
**Cause:** An incremental backup at level 1 or higher could not find any parent backup or copy of the indicated datafile. A level 0 backup of the datafile will be taken automatically.
Action:  This is an informational message only.

RMAN-06053: unable to perform media recovery because of missing log
Cause:  This message is accompanied with another message identifying the missing log. The log would be needed to perform the media recovery, but the log is not on disk and no backup set containing the log is available.
Action:  Determine if a backup set containing the log can be made available. If so, then use the CHANGE command to make the backup set available and retry the command. If not, then a point-in-time recovery up to the missing log is the only alternative.

RMAN-06054: media recovery requesting unknown archived log for thread string with sequence string and starting SCN of string
Cause:  Media recovery is requesting a log whose existence is not recorded in the recovery catalog or target database control file.
Action:  If a copy of the log is available, then add it to the recovery catalog and/or control file via a CATALOG command and then retry the RECOVER command. If not, then a point-in-time recovery up to the missing log is the only alternative and database can be opened using ALTER DATABASE OPEN RESETLOGS command.

RMAN-06055: could not find archived log with sequence string for thread string
Cause:  A log which was on disk at the start of media recovery or which should have been restored from a backup set could not be found.
Action:  Check the Recovery Manager message log to see if the log was restored by a previous job step. If so, then check the V$ARCHIVED_LOG view to see if the log is listed in the control file. If so, then validate that the log exists on disk and is readable. If the log was not restored, or was restored but no record of the log exists in V$ARCHIVED_LOG, then contact Oracle Support Services.

RMAN-06056: could not access datafile number
Cause:  A backup or copy could not proceed because the datafile header could not be read or the header was not valid.
Action:  Make the datafile accessible or skip it.

RMAN-06057: a standby control file cannot be included along with a current control file
Cause:  "current control file" was specified along with "standby control file".
Action:  Remove "current control file" or "standby control file" from backup specification.

RMAN-06058: a current control file cannot be included along with a standby control file
Cause:  "standby control file" was specified along with "current control file".
Action:  Remove "standby control file" or "current control file" from backup specification.

RMAN-06059: expected archived log not found, loss of archived log compromises recoverability
Cause:  The archived log was not found. The recovery catalog or target database control file thinks it does exist. If the archived log has in fact been lost and there is no backup, then the database is no longer recoverable across the point-in-time covered by the archived log. This may occur because the archived log was
removed by an outside utility without updating the recovery catalog or target database control file.

**Action:** If the archived log has been removed with an outside utility and the archived log has already been backed up, then you can synchronize the recovery catalog or target database control file by running `CROSSCHECK ARCHIVELOG ALL`. If the archived log has not been previously backed up, then you should take a full backup of the database and archived logs to preserve recoverability. Previous backups are not fully recoverable.

**RMAN-06060: WARNING: skipping datafile compromises tablespace string recoverability**

**Cause:** SKIP INACCESSIBLE or SKIP OFFLINE option resulted in skipping datafile during BACKUP. If the datafile has in fact been lost and there is no backup, then the tablespace is no longer recoverable without ALL archived logs since datafile creation. This may occur because the datafile was deleted by an outside utility or the datafile is made OFFLINE [DROP].

**Action:** If there is no backup of skipped datafile and the tablespace has to be recoverable without ALL archived logs since datafile creation, then you should make these datafile available for backup.

**RMAN-06061: WARNING: skipping archived log compromises recoverability**

**Cause:** SKIP INACCESSIBLE option resulted in skipping archived logs during BACKUP. If the archived log has in fact been lost and there is no backup, then the database is no longer recoverable across the point-in-time covered by the archived log. This may occur because archived log was removed by an outside utility without updating the recovery catalog or target database control file.

**Action:** If the archived log has been removed with an outside utility and the archived log has already been backed up, then you can synchronize the recovery catalog or target database control file by running `CROSSCHECK ARCHIVELOG ALL`. If the archived log has not been previously backed up, then you should take a full backup of the database and archived logs to preserve recoverability. Previous backups are not fully recoverable.

**RMAN-06062: can not backup SPFILE because the instance was not started with SPFILE**

**Cause:** A backup command requested a backup of the SPFILE, but no SPFILE was used to startup the instance.

**Action:** Create an SPFILE and re-start the instance using the SPFILE or modify the command.

**RMAN-06063: DBID is not found in the recovery catalog**

**Cause:** DBID is not found in the recovery catalog.

**Action:** Verify that the DBID is correct and restart the command.

**RMAN-06064: creating datafile file number=string name=string**

**Cause:** RESTORE/RECOVER command was issued and there were no backup available for the datafile.

**Action:** This is an informational message only.

**RMAN-06065: The backup operand [string] conflicts with another specified operand.**

**Cause:** The user attempted to use two (or more) conflicting operands within the same statement.
**Action:** Remove one or both of the conflicting operands.

**RMAN-06066:** the target database must be mounted when issuing a RECOVER command  
**Cause:** A RECOVER command was issued, but the target database control file is not mounted.  
**Action:** Mount the target database control file by issuing ALTER DATABASE MOUNT via Enterprise Manager or Server Manager.

**RMAN-06067:** RECOVER DATABASE required with a backup or created control file  
**Cause:** The control file has been restored from a backup or was created via ALTER DATABASE CREATE CONTROLFILE.  
**Action:** Use the RECOVER DATABASE command to perform the recovery.

**RMAN-06068:** recovery aborted because of missing datafiles  
**Cause:** This error should be accompanied by one or more instances of message ORA-06094.  
**Action:** Refer to message ORA-06094.

**RMAN-06069:** the file name for datafile *string* is missing in the control file  
**Cause:** Media recovery of a backup control file added this datafile to the control file, but it does not set the file name because that is unsafe.  
**Action:** If the datafile is on disk, then issue ALTER DATABASE RENAME to correct the control file. Otherwise, RESTORE the datafile, and then use SWITCH to make it known to the control file. If the tablespace containing this datafile will be dropped, then reissue the RECOVER command with a SKIP clause to skip recovery of this tablespace.

**RMAN-06070:** DBWR could not identify datafile *string*  
**Cause:** DBWR could not find the specified datafile.  
**Action:** Ensure that the datafile exists and is accessible.

**RMAN-06071:** could not open datafile *string*  
**Cause:** An error was encountered when trying to open the specified datafile.  
**Action:** Ensure that the datafile exists and is accessible.

**RMAN-06073:** file header is corrupt for datafile *string*  
**Cause:** ORACLE detected a corruption in the file header. A media failure has probably occurred.  
**Action:** RESTORE the datafile to a new location, then do a SWITCH, and then retry the RECOVER command.

**RMAN-06074:** file *string* is not an ORACLE datafile  
**Cause:** The file header indicates that this file is not a datafile. The file may have been overlaid or corrupted.  
**Action:** RESTORE the datafile to a new location, then do a SWITCH, and then retry the RECOVER command.

**RMAN-06075:** datafile *string* does not belong to this database  
**Cause:** The file header indicates that this file belongs to some other ORACLE database.
Action: RESTORE the datafile to a new location, then do a SWITCH, and then retry the RECOVER command.

**RMAN-06076: datafile string contains wrong datafile**

**Cause:** The datafile header indicates the file contains a different datafile number.

**Action:** RESTORE the datafile, and then retry the RECOVER command.

**RMAN-06077: datafile string is a different version than contained in the control file**

**Cause:** The control file entry for this datafile specifies a different version of this datafile. Different versions of a datafile can exist when a tablespace is dropped, and a new tablespace is created which reuses the same datafile numbers.

**Action:** If the datafile is correct, fix the control file by using the SWITCH command. Otherwise, RESTORE the correct version of this datafile and retry the RECOVER command.

**RMAN-06078: the control file is older than datafile string**

**Cause:** The control file appears to be older than the specified datafile, but it is not marked as a backup control file. This indicates that the control file has been replaced with an older version. This error does not occur when a backup control file which was created via Recovery Manager or the ALTER DATABASE BACKUP CONTROLFILE command is restored because such control files are marked as backups.

**Action:** RESTORE a control file and perform RECOVER DATABASE.

**RMAN-06079: database must be mounted to perform recovery**

**Cause:** A RECOVER command was issued, but the target database is not mounted.

**Action:** Issue ALTER DATABASE MOUNT.

**RMAN-06080: SWITCH required for datafile string**

**Cause:** The control file record for this datafile is for an older incarnation of the datafile. A SWITCH command must be issued to update the control file before doing RECOVER.

**Action:** Issue SWITCH command then retry RECOVER.

**RMAN-06081: error reading datafile header for datafile string, code string**

**Cause:** X$KCVFH returned the specified code in the HXERR column when it was queried for the specified datafile.

**Action:** Ensure the datafile exists and is readable. Using a newer release of Recovery Manager may return a more meaningful error message. If you have no newer version of Recovery Manager, contact Oracle Support Services.

**RMAN-06082: datafile copy tag string is ambiguous**

**Cause:** The specified tag refers to multiple datafile copies belonging to different datafiles.

**Action:** Specify the datafile copy by file name rather than by tag.

**RMAN-06083: error when loading stored script string**

**Cause:** The recovery catalog database returned an error. This error explains the cause of the problem.

**Action:** Correct the problem and retry.

**RMAN-06084: the target database may not be mounted when issuing REPLICATE...**
Cause: A REPLICATE command was issued, but the target database is already mounted.
Action: dismount the target database control file by issuing ALTER DATABASE CLOSE and ALTER DATABASE DISMOUNT via Enterprise Manager or Server Manager.

RMAN-06085: must use SET NEWNAME command to restore datafile string
Cause: A RESTORE command for the specified datafile could not find a destination name for the specified datafile.
Action: Add a SET NEWNAME command prior to the RESTORE command to specify the restore destination for this file.

RMAN-06086: offline files may only be skipped in a datafile backup set
Cause: The SKIP OFFLINE option was specified for an archived log backup set.
Action: Use this option only for datafile backup sets.

RMAN-06087: read-only files may only be skipped in a datafile backup set
Cause: The SKIP READONLY option was specified for an archived log backup set.
Action: Use this option only for datafile backup sets.

RMAN-06088: datafile copy string not found or out of sync with catalog
Cause: The indicated file is not found, or is found but is not the same file that the recovery catalog thinks it is. It is likely that some operation outside of Recovery Manager has altered the file, or that Recovery Manager has not resynced with the target database.
Action: Re-catalog the file and retry the operation.

RMAN-06089: archived log string not found or out of sync with catalog
Cause: The indicated file is not found, or is found but is not the same file that the recovery catalog thinks it is. It is likely that some operation outside of Recovery Manager has altered the file, or that Recovery Manager has not resynced with the target database.
Action: Re-catalog the file and retry the operation.

RMAN-06090: error while looking up control file copy: string
Cause: An error occurred while looking up the specified control file copy in the recovery catalog or target database control file.
Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the file name is entered correctly. If the control file copy was created when the recovery catalog was not available, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06091: no channel allocated for maintenance (of an appropriate type)
Cause: A command was entered that requires a maintenance channel, and no maintenance channel is allocated, or none of the appropriate type.
Action: Use ALLOCATE CHANNEL FOR MAINTENANCE before deleting backup pieces, or using the CROSSCHECK or DELETE EXPIRED commands. Proxy copies require a non-DISK channel.

RMAN-06092: error while looking up backup piece
Cause: An error occurred while looking up the specified backup piece in the recovery catalog or target database control file.
**Action:** This error is accompanied by other errors describing the reason for the failure. Ensure that the name or key is entered correctly. If the backup piece was created when the recovery catalog was not available, then a RESYNC CATALOG must be done to update the recovery catalog.

**RMAN-06093: recovery catalog contains obsolete version of datafile string**

**Cause:** The specified datafile number was dropped and then reused. The control file mounted by the target database contains the newer version of the datafile, but the recovery catalog contains information about only the older version.

**Action:** Issue a RESYNC command to update the recovery catalog, then reissue the failing command. If the error persists, contact Oracle Support Services.

**RMAN-06094: datafile string must be restored**

**Cause:** A RECOVER command was issued, and the recovery catalog indicates the specified datafile should be part of the recovery, but this datafile is not listed in the control file, and cannot be found on disk.

**Action:** Issue a RESTORE command for this datafile, using the same UNTIL clause specified to the RECOVER command (if any), then reissue the RECOVER.

**RMAN-06095: a backup control file must be restored to recover datafile string**

**Cause:** The control file currently mounted by the target database contains a newer incarnation of the datafile than the recovery catalog indicates is appropriate for the Point-in-Time being recovered to.

**Action:** Restore the control file, using the same UNTIL clause specified on the failing RECOVER command, then reissue the command. If no control file can be restored, then you should issue a CREATE CONTROLFILE command.

**RMAN-06096: SWITCH required for newname of datafile string to take effect**

**Cause:** A SET NEWNAME was issued for this datafile, but no SWITCH command was issued before the RECOVER command.

**Action:** Issue a SWITCH command to make the newname take effect before doing RECOVER.

**RMAN-06098: the target database must be mounted when issuing a BACKUP command**

**Cause:** A BACKUP command was issued, but the target database control file is not mounted.

**Action:** Mount the target database control file by issuing ALTER DATABASE MOUNT via Enterprise Manager or Server Manager.

**RMAN-06099: error occurred in source file: string, line: number**

**Cause:** See accompanying error.

**Action:** See accompanying error.

**RMAN-06100: no channel to restore a backup or copy of datafile number**

**Cause:** A datafile, tablespace, or database restore could not proceed because the backup of the indicated file exists on a device type that was not allocated for restore.

**Action:** None - this is an informational message. See message 6026 for further details.

**RMAN-06101: no channel to restore a backup or copy of the control file**
Cause: A control file restore could not proceed because the backup of the indicated file exists on a device type that was not allocated for restore.

Action: None - this is an informational message. See message 6026 for further details.

RMAN-06102: no channel to restore a backup or copy of archived log for thread number with sequence number and starting SCN of string

Cause: An archived log restore restore could not proceed because the backup of the indicated file exists on a device type that was not allocated for restore.

Action: None - this is an informational message. See message 6026 for further details.

RMAN-06103: duplicate qualifier found in REPORT command: string

Cause: The indicated qualifier appears more than once in a REPORT qualifier list.

Action: delete the duplicate qualifier

RMAN-06105: duplicate qualifier found in LIST command: string

Cause: The indicated qualifier appears more than once in a LIST qualifier list.

Action: delete the duplicate qualifier

RMAN-06106: this command requires that target database be mounted

Cause: A command was issued that requires the target database to be mounted, but the target database is not mounted.

Action: Mount the target database control file by issuing ALTER DATABASE MOUNT via Enterprise Manager or Server Manager.

RMAN-06107: WARNING: control file is not current for REPORT NEED BACKUP DAYS

Cause: The REPORT NEED BACKUP DAYS command may report some files as requiring backups when they really do not, because the most current online status of the file is not known unless a current control file is mounted.

Action: No action is required, however, a current control file should be mounted, if possible, to get the most accurate REPORT output.

RMAN-06108: changed datafile copy unavailable

Cause: This is an informational message only.

Action: No action is required.

RMAN-06109: changed archived log unavailable

Cause: This is an informational message only.

Action: No action is required.

RMAN-06110: changed control file copy unavailable

Cause: This is an informational message only.

Action: No action is required.

RMAN-06111: changed backup piece unavailable

Cause: This is an informational message only.

Action: No action is required.

RMAN-06112: changed datafile copy available

Cause: This is an informational message only.
Action: No action is required.

RMAN-06113: changed archived log available
Cause: This is an informational message only.
Action: No action is required.

RMAN-06114: changed control file copy available
Cause: This is an informational message only.
Action: No action is required.

RMAN-06115: changed backup piece available
Cause: This is an informational message only.
Action: No action is required.

RMAN-06116: cannot crosscheck unavailable object
Cause: An attempt was made to crosscheck an object which is unavailable.
Action: Make object available and try again or don't crosscheck object.

RMAN-06117: cannot do DELETE EXPIRED on an object which is not expired
Cause: An attempt was made to DELETE EXPIRED an object which is not expired.
Action: Remove EXPIRED keyword, crosscheck object, or don't delete object.

RMAN-06118: a backup control file older than SCN string must be used for this recovery
Cause: An attempt was made to recover the database, but some files had no backup, and were not present in the control file at the beginning of the restore. This happens when the control file used during the recovery is a backup control file taken before the creation of some of the files that had no backup. In this situation, the control file that is used must be taken before the creation of all files that have no backup. This will enable RMAN to automatically re-create all of the files that had no backup.
Action: Restore a control file that was backed up before the specified system change number (SCN). The following RMAN commands can be used to do this: SET UNTIL SCN <x>; (where <x> is the SCN displayed in the message) RESTORE CONTROLFILE;

RMAN-06119: uncataloged datafile copy
Cause: This is an informational message only.
Action: No action is required.

RMAN-06120: uncataloged archived log
Cause: This is an informational message only.
Action: No action is required.

RMAN-06121: uncataloged control file copy
Cause: This is an informational message only.
Action: No action is required.

RMAN-06122: CHANGE .. UNCATALOG not supported for BACKUPSET
Cause: The CHANGE BACKUPSET .. UNCATALOG command was entered. The UNCATALOG operation is not supported with backup set.
Action: Use CHANGE BACKUPSET .. DELETE instead.

RMAN-06123: operation not supported without the recovery catalog or mounted control file
Cause: A command was used which requires a connection to a recovery catalog database or the target database to be mounted. The command cannot be used when no backup repository is available.
Action: If a recovery catalog database is available, then connect to the recovery catalog and retry the command, otherwise enter a different command.

RMAN-06124: error while looking up datafile copy key: number
Cause: An error occurred while looking up the specified datafile copy key in the recovery catalog or target database control file.
Action: This error is accompanied by other errors describing the reason for the failure.

RMAN-06125: error while looking up archived log key: number
Cause: An error occurred while looking up the specified archived log key in the recovery catalog or target database control file.
Action: This error is accompanied by other errors describing the reason for the failure.

RMAN-06126: skipping offline file string
Cause: The indicated file will not be included in the backup set because it is offline and the SKIP OFFLINE option was specified.
Action: No action is required.

RMAN-06127: skipping read-only file string
Cause: The indicated file will not be included in the backup set because it is read only and the SKIP READONLY option was specified.
Action: No action is required.

RMAN-06128: skipping inaccessible file string
Cause: The indicated file will not be included in the backup set because it could not be read, and the SKIP INACCESSIBLE option was specified.
Action: No action is required.

RMAN-06129: invalid reserved channel ID: string
Cause: The specified channel id is invalid. DELETE and DEFAULT are reserved channel names and may not be specified by users.
Action: Specify a different channel ID.

RMAN-06131: SKIP OFFLINE/READONLY only allowed with current control file
Cause: The SKIP OFFLINE and SKIP READONLY options are only permitted when the target database control file is current. When the target control file is not current, it is not possible to obtain a datafile’s offline/read only status.
Action: Remove the skip option or mount a current control file on the target database.

RMAN-06132: cannot backup datafile string because it is not in the control file
Cause: A backup command was issued that includes the specified datafile, but the datafile is not listed in the control file. The control file is not current (it is a backup or a created control file).
**Action:** Recover the control file to make it current, then retry the backup command.

**RMAN-06133: recovery catalog may have obsolete data for datafile string**
*Cause:* A RESTORE UNTIL was issued, and the recovery catalog choose an older incarnation of the datafile than is listed in the control file.
*Action:* If the recovery catalog has correct data for the datafile, then restore a backup control file using the same UNTIL clause, then retry the datafile restore. Otherwise, restore a backup of the incarnation of the datafile listed in the control file.

**RMAN-06134: host command complete**
*Cause:* An operating system command has completed.
*Action:* None - this is an informational message.

**RMAN-06135: error executing host command: string**
*Cause:* A host command returned a non-zero return code.
*Action:* Correct the offending command.

**RMAN-06136: ORACLE error from auxiliary database: string**
*Cause:* This message should be accompanied by other error message(s) indicating the cause of the error.
*Action:* Check the accompanying errors.

**RMAN-06137: must have recovery catalog for REPORT SCHEMA AT TIME**
*Cause:* A 'REPORT SCHEMA at_clause' command was issued, but there is no recovery catalog database.
*Action:* If you are not using a recovery catalog, then you may only issue the 'REPORT SCHEMA' command with no at_clause.

**RMAN-06138: control file not mounted - must specify AT clause with REPORT command**
*Cause:* A 'REPORT SCHEMA' with no at_clause was issued, and there is no control file mounted at the target database, so there is no place to get the information about the current list of files comprising the database.
*Action:* Use a recovery catalog or mount a control file at the target database.

**RMAN-06139: WARNING: control file is not current for REPORT SCHEMA**
*Cause:* A 'REPORT SCHEMA' with no at_clause was issued, and there is no control file mounted by the target instance is not current, so the information about the current list of datafiles may not be current.
*Action:* Use a recovery catalog or mount a current control file.

**RMAN-06140: cannot specify TAG option with LIST INCARNATION**
*Cause:* The TAG option was specified with LIST INCARNATION. This is not permitted because there is no TAG associated with a database incarnation.
*Action:* Remove the TAG option and re-run the LIST command.

**RMAN-06141: cannot specify ARCHIVELOG LIKE option with RESTORE**
*Cause:* The ARCHIVELOG LIKE option was specified with RESTORE. This is not permitted because recovery catalog contains only those records that are not deleted from disk.
Action: Remove the ARCHIVELOG LIKE option and re-run the command.

RMAN-06142: DEVICE TYPE cannot be specified with this command
Cause: The DEVICE TYPE option was specified with a command that does not support it.
Action: Remove the DEVICE TYPE option and re-run the command.

RMAN-06143: LIKE may only be specified with COPY
Cause: The LIKE option was specified with a RMAN command. This is not permitted because only copies of datafiles, control files or archived logs have file names that may be tested with a LIKE operand.
Action: Remove the LIKE option and re-run the RMAN command.

RMAN-06144: FROM or UNTIL may not be specified with LIST INCARNATION
Cause: The FROM or UNTIL option was specified with LIST INCARNATION. This is not permitted because there is no time associated with a database incarnation.
Action: Remove the FROM or UNTIL option and re-run the LIST command.

RMAN-06145: control file is not current - obsolete file list may be incomplete
Cause: A CHANGE or REPORT command needs to compute the list of backups that are redundant and may be deleted. If the mounted control file is not current, it may not be possible to determine if a satisfactory backup exists for files which have been offline since the last OPEN RESETLOGS.
Action: No action need be taken - this is an informational message only. To ensure a complete report of obsolete backups, mount a current control file.

RMAN-06146: changes found for file number beyond offline SCN
Cause: A CHANGE or REPORT command needs to compute the list of backups that are redundant and may be deleted. A backup was found for a file which is shown as offline in the target database control file, but the backup contains changes beyond the system change number(SCN) when the file went offline. This is most likely because the target database control file is not really current, but is a restored copy of an older control file.
Action: Mount a current control file or a backup control file.

RMAN-06147: no obsolete backups found
Cause: A CHANGE or REPORT command could find no files that meet the specified criteria for obsoleteness.
Action: None - this is an informational message.

RMAN-06148: redundancy count must be greater than zero
Cause: The REDUNDANCY operand specified for a CHANGE or REPORT OBSOLUTE command was zero.
Action: Specify a REDUNDANCY operand of 1 or greater.

RMAN-06150: auxiliary name for datafile number set to: string
Cause: This message is issued in response to a CONFIGURE AUXNAME command.
Action: None - this is an informational message.

RMAN-06151: datafile string creation SCN string
Cause: This is an informational message. It should be accompanied by other messages.
Action: None

RMAN-06153: validation failed for datafile copy
Cause: The CHANGE DATAFILECOPY VALIDATE command discovered that the datafile copy could not be found or no longer contains the same data, so its record was deleted from the recovery catalog or target database control file.
Action: None - this is an informational message.

RMAN-06154: validation succeeded for datafile copy
Cause: The CHANGE DATAFILECOPY VALIDATE command discovered that the datafile copy still matches its data in the recovery catalog or target database control file.
Action: None - this is an informational message.

RMAN-06155: validation failed for control file copy
Cause: The CHANGE CONTROLFILECOPY VALIDATE command discovered that the control file copy could not be found or no longer contains the same data, so its record was deleted from the recovery catalog or target database control file.
Action: None - this is an informational message.

RMAN-06156: validation succeeded for control file copy
Cause: The CHANGE CONTROLFILECOPY VALIDATE command discovered that the control file copy still matches its data in the recovery catalog or target database control file.
Action: None - this is an informational message.

RMAN-06157: validation failed for archived log
Cause: The CROSSCHECK ARCHIVELOG command determined that the archived log could not be found or no longer contained the same data, so its record was marked expired.
Action: None - this is an informational message.

RMAN-06158: validation succeeded for archived log
Cause: The CROSSCHECK ARCHIVELOG command or VALIDATE HEADER option determined that the archived log still matches its data.
Action: None - this is an informational message.

RMAN-06159: error while looking up backup set
Cause: An error occurred while looking up the specified backup set in the recovery catalog or target database control file.
Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the key is entered correctly. If the backup set was created when the recovery catalog was not available, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06160: no backup pieces found for backup set key: number
Cause: No backup pieces for the requested backup set were found in the recovery catalog, or the target database control file.
Action: Specify an existing backup set.
RMAN-06161: error when inspecting auxiliary file name: string
    Cause: This error is accompanied by other errors explaining the cause.
    Action: Correct the auxiliary file name if it is wrong via the CONFIGURE AUXNAME command.

RMAN-06162: sql statement: string
    Cause: This is the sql statement about to be executed for a SQL command.
    Action: None, informational message only.

RMAN-06163: some datafiles cannot be recovered, aborting the RECOVER command
    Cause: This message should be followed by one or more 6162 or 6164 messages.
    Action: Check the accompanying errors.

RMAN-06164: WARNING: no channel of required type allocated to recover datafile number
    Cause: A RECOVER command could not proceed because incremental backup sets or archived log backup sets exist on a device type that has not been allocated.
    Action: Use the LIST command to determine which device type is needed, then allocate a channel of that type.

RMAN-06165: datafile string is too old to recover, restore a more recent copy
    Cause: The archived logs and/or incremental backup sets required to recover the datafile do not exist, but a more recent backup of the datafile exists which can be recovered.
    Action: Issue a RESTORE for the datafile, then reissue the RECOVER command.

RMAN-06166: datafile string cannot be recovered
    Cause: Incremental backups or archived redo logs needed to recover the datafile cannot be found, and no recoverable full backup or datafile copy exists.
    Action: Use the LIST command to see if there is a backup set or datafile copy that can be made AVAILABLE. If not, then the datafile is unrecoverable. If a full or datafile copy exists, then a Point-in-Time Recovery may be possible.

RMAN-06167: already connected
    Cause: a CONNECT command was issued, but RMAN is already connected to the specified database.
    Action: RMAN has no DISCONNECT command, so to connect to a different instance, exit RMAN and start it again.

RMAN-06168: no backup pieces with this tag found: string
    Cause: A tag was used to specify a list of backup pieces, but no backup pieces with this tag could be found.
    Action: Make sure the tag is specified correctly.

RMAN-06169: could not read file header for datafile string error reason string
    Cause: The specified datafile could not be accessed. The reason codes are: 1 - file name is MISSINGxx in the control file 2 - file is offline 3 - file is not verified 4 - DBWR could not find the file 5 - unable to open file 6 - I/O error during read 7 - file header is corrupt 8 - file is not a datafile 9 - file does not belong to this database 10 - file number is incorrect 12 - wrong file version 15 - control file is not current
**Action:** If the error can be corrected, do so and retry the operation. The SKIP option can be used to ignore this error during a backup.

**RMAN-06170: no control file copy found with offline range RECID string STAMP string datafile string**

**Cause:** This offline range is needed for recovering the specified data file, but the offline range record has aged out of the current control file and no control file copy with the record could be accessed. At least 1 control file copy containing the offline range was found in the recovery catalog and was in AVAILABLE status.

**Action:** Query the RC_CONTROLFILE_COPY view for the names of all control file copies, then issue a CHANGE CONTROLFILECOPY ... VALIDATE; command for them. Then reissue the RECOVER command.

**RMAN-06171: not connected to target database**

**Cause:** A command was issued but no connection to the target database has been established.

**Action:** Issue a CONNECT TARGET command to connect to the target database.

**RMAN-06172: no AUTOBACKUP found or specified handle is not a valid copy or piece**

**Cause:** A restore could not proceed because no AUTOBACKUP was found or specified handle is not a valid copy or backup piece. In case of restore from AUTOBACKUP, it may be the case that a backup exists, but it does not satisfy the criteria specified in the user’s restore operands. In case of restore from handle, it may be the handle is not a backup piece or control file copy. In may be that it does not exist.

**Action:** Modify AUTOBACKUP search criteria or verify the handle.

**RMAN-06173: SET NEWNAME command has not been issued for datafile string when restore auxiliary**

**Cause:** Auxiliary type was specified for the control file, but no SET NEWNAME command has been previously issued for a datafile.

**Action:** Issue SET NEWNAME command for every datafile in the recovery set.

**RMAN-06174: not connected to auxiliary database**

**Cause:** An auxiliary command was issued but no connection to a auxiliary database has been established.

**Action:** Issue a CONNECT AUXILIARY command to connect to the auxiliary database.

**RMAN-06175: deleted script: string**

**Cause:** A DELETE SCRIPT command was executed.

**Action:** None, informational message only.

**RMAN-06176: no recovery required; all files are read only or offline**

**Cause:** A RECOVER DATABASE command does not need to recover any files because all of the files to be recovered are offline or read only. This can only occur when the SKIP clause includes the SYSTEM tablespace.

**Action:** None, informational message only.

**RMAN-06177: restore not done; all files read only, offline, or already restored**
Cause: A RESTORE command does not need to restore any files, because all of the files to be restored are offline, read-only, or are already restored to their correct destinations.

Action: None, informational message only

RMAN-06178: datafile number not processed because file is offline

Cause: A RESTORE DATABASE or RECOVER DATABASE command omitted processing the indicated datafile because it is offline clean at the desired point-in-time.

Action: None, informational message only

RMAN-06179: datafile number not processed because file is read-only

Cause: A RESTORE DATABASE or RECOVER DATABASE command omitted processing the indicated datafile because it is part of a read-only tablespace at the desired point-in-time.

Action: None, informational message only

RMAN-06180: incremental backups require Enterprise Edition

Cause: A BACKUP command with INCREMENTAL LEVEL > 0 was specified.

Action: Use FULL, or INCREMENTAL LEVEL 0.

RMAN-06181: multiple channels require Enterprise Edition

Cause: Attempt to allocate more than 1 channel in a job.

Action: Remove all except one ALLOCATE CHANNEL command.

RMAN-06182: archived log string of thread string with sequence string larger than MAXSETSIZE

Cause: A BACKUP ARCHIVELOG command specified the MAXSETSIZE operand too low. The specified archived log is larger than MAXSETSIZE will allow.

Action: Increase MAXSETSIZE limit.

RMAN-06183: datafile or datafile copy string (file number string) larger than MAXSETSIZE

Cause: A BACKUP DATAFILE(copy) command specified the MAXSETSIZE operand too low. The specified datafile is larger than MAXSETSIZE will allow.

Action: Increase MAXSETSIZE limit.

RMAN-06184: duplicate object in backup specifier: string string

Cause: A backup command specifies the same datafile or copy of a data file multiple times.

Action: Eliminate the duplicates.

RMAN-06185: Recovery Manager incompatible with string database: RMAN number.number.number.number to number.number.number.number required

Cause: This version of recovery manager was incompatible with the indicated database or the DBMS_BACKUP_RESTORE package installed in the indicated database.

Action: If the database has been upgraded from an earlier version, ensure that the catxxxx.sql script has been run successfully. Re-install dbmsbkrs.sql and prvtbkrs.plb if necessary. Otherwise, use a version of RMAN within the range specified in the error message.
RMAN-06186: PL/SQL package string.string version string in string database is too old

Cause: The specified PL/SQL package is a version that is too old to work with this version of the Recovery Manager (RMAN).

Action: If the database indicated is CATALOG, then you can use the UPGRADE CATALOG command to upgrade the recovery catalog to the most current version. If the database is TARGET or AUXILIARY, then you must either upgrade the specified database or use an older version of RMAN.

RMAN-06187: control file copy string not found or out of sync with catalog

Cause: The indicated file is not found, or is found but is not the same file that the recovery catalog thinks it is. It is likely that some operation outside of Recovery Manager has altered the file, or that Recovery Manager has not resynced with the target database.

Action: Re-catalog the file and retry the operation.

RMAN-06188: cannot use command when connected to a mounted target database

Cause: An attempt was made to issue a command that can be used only when there is no connection to the target database or when the target database is not mounted.

Action: Dismount the database or restart RMAN and use the command before connecting to the target database.

RMAN-06189: current DBID number does not match target mounted database (number)

Cause: SET DBID was used to set a DBID that does not match the DBID of the database to which RMAN is connected.

Action: If the current operation is a restore to copy the database, do not mount the database. Otherwise, avoid using the SET DBID command, or restart RMAN.

RMAN-06190: PL/SQL package string.string version string in string database is not current

Cause: RMAN detected an old version of the specified package. RMAN will execute in backwards-compatible mode.

Action: No action is required, but certain features and bug-fixes may not be available when RMAN runs in backwards-compatible mode. If the database is CATALOG, then you can use the UPGRADE CATALOG command to upgrade the recovery catalog to the most current version. If the database is TARGET or AUXILIARY, then you must either upgrade the specified database or use an older version of RMAN. The files that must be run to upgrade the target or auxiliary database are dbmsrman.sql and prvtrman.plb.

RMAN-06191: PL/SQL package string.string version string in string database is too new

Cause: RMAN detected an incompatible version of the specified package.

Action: Use a newer version of recovery manager. Message 6439 indicates the minimum required version of recovery manager.

RMAN-06192: maximum value for MAXPIECESIZE or MAXSETSIZE must be between 1 Kb and 2048 Gb

Cause: Input size for MAXPIECESIZE or MAXSETSIZE was out of range.

Action: Specify a valid size and retry the command.
RMAN-06193: connected to target database (not started)
  Cause: This is an informational message only.
  Action: The database must be started before any other RMAN commands are issued.

RMAN-06194: target database instance not started
  Cause: A command was issued that requires the target database instance be started.
  Action: Issue a STARTUP command to start the instance.

RMAN-06195: auxiliary database not started
  Cause: A command was issued that requires the auxiliary database instance be started.
  Action: Issue a STARTUP AUXILIARY command.

RMAN-06196: Oracle instance started
  Cause: A STARTUP command completed successfully.
  Action: None, this is an informational message.

RMAN-06197: Total System Global Area string bytes
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06198: string string bytes
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06199: database mounted
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06200: Changed string objects to AVAILABLE status
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06201: Deleted string objects
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06202: Deleted string EXPIRED objects
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06203: Changed KEEP options for string objects
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06204: Changed string objects to UNAVAILABLE status
  Cause: This is an informational message only.
  Action: No action is required.
RMAN-06205: Uncataloged string objects
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06206: Crosschecked string objects
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06207: WARNING: string objects could not be deleted for string channel(s) due
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06208: to mismatched status. Use CROSSCHECK command to fix status
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06209: List of failed objects
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06210: List of Mismatched objects
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06211: ================
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06212: Object Type Filename/Handle
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06213: ------------------
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06214: string string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-06215: List of objects that must perform same operation at other database
  Cause: This is an informational message only.
  Action: The specified list of objects were not accessible at connected target database. Re-run the CROSSCHECK command after connecting to database that has DB_UNIQUE_NAME displayed in output for the specified object.

RMAN-06216: WARNING: db_unique_name mismatch - string objects could not be updated
  Cause: This is an informational message only.
**Action:** Run CROSSCHECK command after connecting to a primary or physical standby database that can access the specified objects.

**RMAN-06217: not connected to auxiliary database with a net service name**

**Cause:** A command that moves files from the target instance to the auxiliary instance was requested. Such a command requires a net service name be present in the connect string used to connect to the auxiliary instance.

**Action:** Issue a CONNECT AUXILIARY command and include a net service name in the connect string. That service name must be valid on the target instance.

**RMAN-06218: List of objects requiring same operation on database with db_unique_name string**

**Cause:** This is an informational message only.

**Action:** The specified list of objects were not accessible by the target database. Re-run the same command after connecting to database that has DB_UNIQUE_NAME displayed in output for the specified object.

**RMAN-06219: List of objects not associated with all known db_unique_names**

**Cause:** This is an informational message only.

**Action:** The specified list of objects were not accessible by the target database. Re-run the same command after connecting to primary database or physical standby database that can access the specified objects.

**RMAN-06220: Creating automatic instance, with SID='string'**

**Cause:** No connection to the auxiliary instance was provided, but the command requires an auxiliary instance.

**Action:** No action is required unless you want to create a permanent database, in which case you should stop the command and re-run it, providing an auxiliary instance connection.

**RMAN-06221: Removing automatic instance**

**Cause:** RMAN is removing the automatic auxiliary instance that was created for this command.

**Action:** No action is required.

**RMAN-06223: starting up automatic instance string**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-06224: Automatic instance created**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-06225: shutting down automatic instance string**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-06226: Automatic instance removed**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-06230: List of Stored Scripts in Recovery Catalog**
**Cause:** This message is issued in response to a LIST SCRIPT NAMES command. The following fields are shown for each script that is stored in the recovery catalog: Header indicating to what database the script belongs. Script Name: name of the script. Description: comment associated with this script.

**Action:** No action is required.

**RMAN-06238: List of Databases**

**Cause:** This message is issued in response to a LIST DB_UNIQUE_NAME command. The following fields are shown for each database that is known to the recovery catalog: DB Key: This is the unique key which identifies this database in the recovery catalog. DB Name: The name of the database. DB ID: The database ID. This is a number which remains the same for the life of the database, even if the database name is changed. DB.Unique Name: db_unique_name value for the database.

**Action:** No action is required.

**RMAN-06246: List of Database Incarnations**

**Cause:** This message is issued in response to a LIST INCARNATION OF DATABASE command. The following fields are shown for each database that is registered with the recovery catalog: DB Key: This is the unique key which identifies this database in the recovery catalog. Inc Key: This is the unique key which identifies this incarnation of the database in the recovery catalog. DB Name: The name of the database. DB ID: The database ID. This is a number which remains the same for the life of the database, even if the database name is changed. Status: 'YES' if this is the current incarnation of this database, otherwise 'NO'. Reset SCN: system change number (SCN) of the most recent RESETLOGS operation. Reset Time: Time of the most recent RESETLOGS operation.

**Action:** No action is required.

**RMAN-06250: Report of files that need backup due to unrecoverable operations**

**Cause:** An unlogged change (such as 'create table unrecoverable') has been made to this file, and the most recent backup of the file does not contain those changes.

**Action:** Take a backup of this file. If this file is lost before a backup is taken, then the unlogged modifications will be lost. The message indicates whether a full backup is required or whether an incremental backup will suffice.

**RMAN-06263: string string string**

**Cause:** This message is issued in response to the REPORT NEED BACKUP_INCREMENTAL command, for those files which would use more than the specified number of incrementals during recovery.

**Action:** To reduce the number of incremental backups which would be used during recovery of this datafile, take a new full backup of this file now.

**RMAN-06270: Report of files whose recovery needs more than number days of archived logs**

**Cause:** This message is issued in response to the REPORT NEED BACKUP DAYS command for those files which need more than the specified number of days' archived logs for recovery.

**Action:** To reduce the number of log files needed for recovery of this datafile, take a new full or incremental backup now.

**RMAN-06274: Report of files that must be backed up to satisfy number days recovery window**
**Cause:** This message is issued in response to the REPORT NEED RECOVERY WINDOW OF n DAYS command for those files that must be backed up to satisfy specified retention policy.

**Action:** To satisfy specified recovery window for this datafile, take a new full or incremental backup now.

**RMAN-06275: invalid number of days specified for report : string days**  
**Cause:** This message is issued in response to the REPORT NEED RECOVERY WINDOW OF n DAYS or REPORT NEED BACKUP DAYS n command when an invalid number of days was specified in input command.

**Action:** The number of days specified in REPORT command must be greater than zero.

**RMAN-06280: Report of obsolete backups and copies**  
**Cause:** This message is issued in response to the REPORT OBSOLUTE command. Each of the files listed is obsolete because it is more redundant than the level of redundancy specified in the REPORT command.

**Action:** Depending on your needs, you might need to take new backups.

**RMAN-06290: Report of database schema for database with db_unique_name string**  
**Cause:** This message is issued in response to the REPORT SCHEMA command. The report shows the physical schema of the database at the indicated time. The following fields are shown for each datafile and tempfile: File: The file number. Size(MB): The size of the file in mega bytes. Tablespace: The name of the tablespace which contains this file. RB segs: YES if this file is part of a tablespace containing rollback segments, otherwise NO. Datafile/Tempfile Name: The file name. Maxsize(MB): Maximum file size to which file can be extended

**Action:** No action is required.

**RMAN-06300: Report of files with less than number redundant backups**  
**Cause:** This message is issued when the REPORT NEED BACKUP REDUNDANCY command is used for those files which have less than the specified number of backups which can be used for recovery.

**Action:** Take another backup of the datafiles listed.

**RMAN-06306: ==============**  
**Cause:** This message is issued in response to a LIST BACKUP DATABASE/TABLESPACE/DATAFILE command when some backups were taken with the PROXY option. If a recovery catalog is in use, then the information comes from the recovery catalog, otherwise it comes from the target database control file. The following fields are shown for each proxy datafile backup. Key: This is the unique key which identifies this proxy backup in the recovery catalog. This value can be used in a CHANGE command to change its status. If the target database control file is being used as the recovery catalog, then this field uniquely identifies this copy in the control file. File: The file number that this file was copied from. Status: This is the status of the file. Possible values are: A - Available U - Unavailable D - Deleted X - Expired Status 'U' will not be used if the target database control file is being used as the recovery catalog. Completion time: This is the date and time when the backup was created. This column will be printed in the default Oracle date format, unless overridden with a NLS_DATE_FORMAT environment variable. Ckp SCN: This is the checkpoint system change number (SCN) of the backup. The file contains all changes made at or before this SCN. Ckp time: This is the time that the file was last checkpointed. Handle: This is the media manager handle of the proxy backup.
Action: No action is required.

**RMAN-06378: List of Backup Sets**
Cause: This message is issued in response to a LIST BACKUP command.
Action: No action is required.

**RMAN-06400: database opened**
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06401: database is already started**
Cause: A STARTUP command without the FORCE option was issued, but the target database is already started.
Action: Use the FORCE option if you want to restart the database.

**RMAN-06402: Oracle instance shut down**
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06403: could not obtain a fully authorized session**
Cause: The most likely cause of this error is that one of the databases to which RMAN had previously connected is not started or has has been shutdown. Other error messages should identify exactly which database is the problem.
Action: Startup the database causing the problem.

**RMAN-06404: database dismounted**
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06405: database closed**
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06406: deleted archived log**
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06407: auxiliary instance file string deleted**
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06408: recovery catalog upgraded to version string**
Cause: This is an informational message issued by the UPGRADE CATALOG command. It indicates the version of the recovery catalog schema to which the recovery catalog was just upgraded. Note that this version number may not reflect the version number of your rman executable or target database, because the recovery catalog schema is not changed with each Oracle release.
Action: No action is required.

**RMAN-06409: LIKE clause in LIST BACKUP OF ARCHIVELOG is not supported**
Cause: LIST BACKUP OF ARCHIVELOG LIKE was used, which is not supported.
Action: Remove LIKE clause from command.

RMAN-06410: cannot use command when channels are allocated
Cause: An attempt was made to issue a command that can be used only when there are no allocated channels.
Action: Do not use the command, or de-allocate channels and use the command when no channels are allocated.

RMAN-06411: backup copies setting out of range (1-4): number
Cause: An attempt was made to set backup copies to an invalid value.
Action: Use a value in the specified range.

RMAN-06412: no proxy copy channel found
Cause: A proxy copy was started, but no allocated channel supports proxy copy. This could be because the media management software used by the target database does not support proxy copy, or because all of the allocated channels are of type DISK, which never support proxy copy.
Action: If this is a backup, then either allocate a non-disk channel, or do not use the PROXY option. If this is a restore, then a channel of the same type which created the proxy backup was allocated, but now does not support proxy copy. If proxy copy is no longer supported by the media management software at the target database, the CROSSCHECK or CHANGE commands should be used so that those backups will not be considered for further restores.

RMAN-06413: channel string does not support proxy copy
Cause: The channel which was specified for this backup or restore does not support proxy copy. This could be because the media management software used by the target database does not support proxy copy, or because the channel is of type DISK, which never supports proxy copy.
Action: If this is a backup, then either allocate a non-disk channel, or do not use the PROXY option. If this is a restore, then a channel of the same type which created the proxy backup was allocated, but now does not support proxy copy. If proxy copy is no longer supported by the media management software at the target database, the CROSSCHECK command should be used so that those backups will not be considered for further restores.

RMAN-06414: target database COMPATIBLE option does not support proxy copy
Cause: PROXY was specified, and the target database uses a media manager that supports proxy copy, but the COMPATIBLE initialization parameter of the target database must be 8.1.0 or greater to create proxy backups. If the database is downgraded to the earlier release that is specified in the COMPATIBLE parameter, then it will no longer be able to restore proxy backups.
Action: Either take a non-proxy backup or change the target database COMPATIBLE parameter.

RMAN-06415: file string cannot be proxy backed up
Cause: The PROXY option was specified, but the media management software used by the target database cannot back up the specified file using proxy copy. If PROXY ONLY was specified, then the backup is terminated. If PROXY was specified, then this file will be placed into a non-proxy backup set.
Action: Remove the ONLY option to place the files into a regular backup set, or contact the media management vendor if you believe that the media management software should support proxy copy of this file.
RMAN-06416: PROXY ONLY was specified and some files could not be proxy copied
Cause: PROXY ONLY was specified, and some of the files to be backed up could not be backed up by the media management software used by the target database. Message 6415 is issued for each file that cannot be proxy copied.
Action: Remove the ONLY option to place the files into a regular backup set, or contact the media management vendor if you believe that the media management software should support proxy copy of these files.

RMAN-06417: command not allowed when connected to a virtual private catalog
Cause: The command that was entered cannot be used while connected to a virtual private catalog.
Action: Connect to the base catalog and re-execute the command.

RMAN-06418: proxy incremental backups with level > 0 not supported
Cause: PROXY was specified for a non-level-zero incremental backup. Proxy backups may only be full or level 0 backups.
Action: Remove one of the conflicting options.

RMAN-06419: file string cannot be proxy restored from handle string
Cause: The media management software used by the target database indicated that it cannot restore the specified file from the specified backup handle.
Action: Consult the media management software documentation to find out why this restriction exists or contact the media management vendor.

RMAN-06420: some files could not be proxy restored - aborting restore
Cause: Some of the files to be restored could not be restored by the media management software used by the target database. Message 6419 is issued for each file that cannot be restored.
Action: Contact the media management vendor if you believe that the media management software should support proxy copy of these files. The CROSSCHECK or CHANGE commands can be used to remove these proxy copies from the catalog to prevent the RESTORE command from trying to restore from them.

RMAN-06421: sent command to channel: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-06422: no channels found for SEND command
Cause: No channels with the specified names or device types were found. If no channel qualifiers were specified, then no channels were allocated.
Action: Specify a different channel type or allocate a channel of the desired type.

RMAN-06423: requested limit of number exceeds vendor limit of number
Cause: A command was used to set the backup piece size limit, but the media management software used by the target database cannot create backup pieces that large.
Action: Specify a smaller backup piece limit.

RMAN-06424: error while looking up proxy copy
Cause: An error occurred while looking up the specified proxy copy in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the name or key is entered correctly. If the proxy copy was created when the recovery catalog was not available, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06425: <datafile pathname not available>
Cause: This is an informational message only.
Action: No action is required.

RMAN-06426: RECOVERY_CATALOG_OWNER role must be granted to user string
Cause: The CREATE CATALOG or UPGRADE CATALOG command was used, but the USERID that was supplied in the CATALOG connect string does not have the RECOVERY_CATALOG_OWNER role granted as a DEFAULT role.
Action: Grant the RECOVERY_CATALOG_OWNER role to the recovery catalog owner.

RMAN-06427: recovery catalog already exists
Cause: The CREATE CATALOG command cannot be used when the recovery catalog already exists.
Action: Use the UPGRADE CATALOG command to upgrade your recovery catalog to the most current release without losing any existing backup data. Use the DROP CATALOG command to remove an existing recovery catalog.

RMAN-06428: recovery catalog is not installed
Cause: A recovery catalog database connection has been made, but the recovery catalog tables and views have not been installed.
Action: If you mis-typed the recovery catalog owner USERID, then correct the USERID and reconnect to the recovery catalog. If this is the first time that you have signed on to Recovery Manager with this recovery catalog owner USERID, then use the CREATE CATALOG command to create the recovery catalog schema. Alternatively, exit RMAN and connect without specifying a recovery catalog connection.

RMAN-06429: string database is not compatible with this version of RMAN
Cause: The indicated database is not compatible with this version of the Recovery Manager (RMAN). Other messages have also been issued which detail the cause of the error.
Action: See the other messages. If the database is CATALOG, then you may be able to use the CREATE CATALOG or UPGRADE CATALOG commands to correct the problem. If the database is TARGET or AUXILIARY, then you must either upgrade the target database or use a newer version of the RMAN executable.

RMAN-06430: recovery catalog USERID cannot be SYS
Cause: A recovery catalog connection was made to USERID SYS. The recovery catalog must be created in a USERID other than SYS.
Action: Specify a different USERID in the CATALOG connect string.

RMAN-06431: recovery catalog created
Cause: This is an informational message issued by the CREATE CATALOG command.
Action: No action is required.

RMAN-06432: recovery catalog dropped
Cause: This is an informational message issued by the DROP CATALOG command.
Action: No action is required.

RMAN-06433: error installing recovery catalog
Cause: An error was received from the recovery catalog database while it was being installed. Another error message shows the error message from the server.
Action: The most common reasons for failure to install the recovery catalog are:
- Lack of space in the recovery catalog database: allocate more space, use the DROP CATALOG command to remove any partially installed recovery catalog, and retry the command.
- Object already exists: This is caused by a partial recovery catalog installation. Use the DROP CATALOG command to remove the partially installed recovery catalog and retry the command.

RMAN-06434: some errors occurred while removing recovery catalog
Cause: Some errors were received from the recovery catalog database while removing the recovery catalog.
Action: Correct the error(s) and retry the command. Note that Recovery Manager intercepts and ignores common errors, such as 'object not found', which can happen while removing a partially installed recovery catalog. Only serious errors will be displayed while removing the recovery catalog.

RMAN-06435: recovery catalog owner is string
Cause: This is an informational message issued by the UPGRADE CATALOG and DROP CATALOG commands.
Action: No action is required.

RMAN-06436: enter DROP CATALOG command again to confirm catalog removal
Cause: The DROP CATALOG command deletes the recovery catalog, rendering all database backups unusable, and should be used with care. The command must be entered twice to ensure that this is really what you want to do.
Action: If you really want to remove the recovery catalog, then enter the DROP CATALOG command again.

RMAN-06437: cannot drop catalog - catalog is newer than this RMAN
Cause: The DROP CATALOG command was entered, but the recovery catalog was created by a newer version of the Recovery Manager (RMAN). This version of RMAN may not be able to drop the entire recovery catalog.
Action: Use the version of RMAN which most recently created or upgraded the recovery catalog.

RMAN-06438: error executing package DBMS_RCVMAN in string database
Cause: Recovery Manager requires the DBMS_RCVMAN package in the SYS schema of the indicated database. Normally this package is installed during database creation. To re-create the package, run the files dbmsrman.sql and prvtrmns.plb.
Action: re-create the DBMS_RCVMAN package in the SYS schema.
RMAN-06439: RMAN must be upgraded to version string to work with this package  
**Cause:** This message indicates the minimum version of recovery manager required to use the package which was specified in message 6191.  
**Action:** A newer version of RMAN must be used with this package.

RMAN-06440: virtual catalog dropped  
**Cause:** This is an informational message issued by the DROP CATALOG command, when connected to a virtual private catalog. Note that dropping a virtual private catalog does not delete any data, because the catalog data is owned by the base catalog.  
**Action:** No action is required.

RMAN-06441: cannot upgrade catalog - catalog is already newer than this RMAN  
**Cause:** The recovery catalog is already at a version level that is greater than this version of the Recovery Manager. The UPGRADE CATALOG command is not needed.  
**Action:** Either upgrade to a more recent Recovery Manager, or continue to use the current version. Message 6191 will be issued if the recovery catalog is too new to work with this version of Recovery Manager.

RMAN-06442: enter UPGRADE CATALOG command again to confirm catalog upgrade  
**Cause:** The UPGRADE CATALOG command alters the recovery catalog schema. Although the recovery catalog is designed to be compatible with older versions of the Recovery Manager (RMAN), it is possible that an upgrade will remove support for older versions of RMAN.  
**Action:** If you really want to upgrade the recovery catalog, then enter the UPGRADE CATALOG command again. If you are not going to use an older version of RMAN with this recovery catalog, then compatibility is not an issue. If you plan to also continue using an older version of RMAN with this recovery catalog then, before upgrading, consult the Migration Guide for the current Oracle release to determine if upgrading to the current version of the recovery catalog will remove support for older versions of RMAN.

RMAN-06443: error upgrading recovery catalog  
**Cause:** An error was received from the recovery catalog database while upgrading the recovery catalog.  
**Action:** Correct the error and retry the command. Note that the Recovery Manager intercepts and ignores common errors, such as 'column already exists,' which can happen if the recovery catalog has already been partially upgraded. Only serious errors will be displayed while upgrading the recovery catalog.

RMAN-06444: error creating string  
**Cause:** During the CREATE CATALOG or UPGRADE CATALOG command, the indicated object could not be created due to errors.  
**Action:** Make sure that the RECOVER.BSQ file has not been modified or damaged, and then if this error persists, contact Oracle support. If the error refers to one of the RMAN PL/SQL packages, connect to the recovery catalog owner and query the USER_ERRORS view to find out the details of the compilation errors.

RMAN-06445: cannot connect to recovery catalog after NOCATALOG has been used  
**Cause:** The CONNECT CATALOG command was used after the user had already specified the NOCATALOG option.
Action: Re-start rman if you wish to use a recovery catalog.

RMAN-06446: changed proxy copy unavailable
Cause: This is an informational message only.
Action: No action is required.

RMAN-06447: changed proxy copy available
Cause: This is an informational message only.
Action: No action is required.

RMAN-06448: uncataloged proxy copy
Cause: This is an informational message only.
Action: No action is required.

RMAN-06449: deleted proxy copy
Cause: This is an informational message only.
Action: No action is required.

RMAN-06450: crosschecked proxy copy: found to be 'string'
Cause: This is an informational message only.
Action: No action is required.

RMAN-06451: proxy copy handle=string RECID=string STAMP=string
Cause: This is an informational message only.
Action: No action is required.

RMAN-06452: string package upgraded to version string
Cause: This is an informational message issued by the UPGRADE CATALOG command. It indicates the version to which the indicated package was just upgraded. Note that this version number may not reflect the version number of your rman executable or target database, because the recovery catalog packages are not changed with each Oracle release.
Action: No action is required.

RMAN-06453: RECOVERABLE may only be used with datafile objects
Cause: An attempt was made to use LIST ... RECOVERABLE .. with OF CONTROLFILE or OF ARCHIVELOG.
Action: Remove the RECOVERABLE keyword and try again.

RMAN-06454: duplexed backups require Enterprise Edition
Cause: The SET COPIES or CONFIGURE BACKUP COPIES command was used to create more than one copy of each backup piece, but Enterprise Edition is not installed.
Action: Do not attempt to create more than one copy of each backup piece.

RMAN-06455: Tablespace Point-in-Time Recovery requires Enterprise Edition
Cause: Tablespace Point-in-Time Recovery was attempted, but Enterprise Edition is not installed.
Action: Do not attempt Tablespace Point-in-Time Recovery.

RMAN-06456: command is obsolete
Cause: This is an informational message only.
Action: No action is required.

RMAN-06457: UNTIL SCN (string) is ahead of last SCN in archived logs (string)
  Cause: UNTIL SCN cannot be more than the last system change number (SCN) of the last archived log
  Action: Check the UNTIL SCN.

RMAN-06458: AS COPY option cannot be used with RECOVERY FILES, RECOVERY AREA or DB_RECOVERY_FILE_DEST
  Cause: The RECOVERY FILES, RECOVERY AREA or DB_RECOVERY_FILE_DEST was specified with AS COPY.
  Action: Remove the AS COPY option and resubmit the command.

RMAN-06459: BACKUP <VALIDATE | DURATION> is not supported with PROXY
  Cause: BACKUP <VALIDATE | DURATION> and PROXY were specified in the same backup command.
  Action: Remove the incompatible option.

RMAN-06460: control file copy string cannot be backed up by proxy.
  Cause: The PROXY option was specified, but proxy copy of control file is not supported. This file will be placed into a non-proxy backup set.
  Action: No action required, this is an informational message.

RMAN-06461: current control file cannot be backed up by proxy.
  Cause: The PROXY option was specified, but proxy copy of control file is not supported. This file will be placed into a non-proxy backup set.
  Action: No action required, this is an informational message.

RMAN-06462: no backup sets found on device DISK that match specification
  Cause: A backup set record specifier did not match an backup set on device DISK in the recovery catalog.
  Action: Resubmit the command with a different backup set record specifier. The Recovery Manager (RMAN) LIST command can be used to display all backup sets that RMAN knows about.

RMAN-06463: Backup set key string cannot be backed up by proxy.
  Cause: The PROXY option was specified, but proxy copy of backup set is not supported. This file will be placed into a non-proxy backup set.
  Action: No action required, this is an informational message.

RMAN-06464: BACKUP BACKUPSET is not supported with VALIDATE option
  Cause: BACKUP BACKUPSET and VALIDATE were specified in the same backup command.
  Action: To VALIDATE BACKUPSET use 'validate' or 'restore validate' command.

RMAN-06465: configuration not implemented: string
  Cause: The configuration is not implemented in the current release.
  Action: Avoid using the command.

RMAN-06466: error parsing configuration string (string)
  Cause: Unsupported configuration string is stored in recovery catalog or target database control file.
**Action:** Check compatibility matrix rman executable and target database and recover catalog. Use DBMS_BACKUP_RESTORE.DELETECONFIG to remove problematic configuration.

**RMAN-06467: could not translate DBA: number**  
**Cause:** An error was received when calling DBMS_RCVMAN  
**Action:** This message should be accompanied by other error message(s) indicating the cause of the error.

**RMAN-06468: Invalid Data Block Address: number**  
**Cause:** The DBA specified doesn't belong to the mentioned tablespace  
**Action:** Check the DBA

**RMAN-06469: could not translate corruption list**  
**Cause:** An error was received when calling DBMS_RCVMAN  
**Action:** This message should be accompanied by other error message(s) indicating the cause of the error.

**RMAN-06470: DEVICE TYPE is supported only when automatic channels are used**  
**Cause:** The DEVICE TYPE option was specified with a BACKUP, RESTORE, RECOVER, DUPLICATE, CHANGE, VALIDATE, CROSSCHECK, or DELETE EXPIRED command. This option is allowed only when automatically allocated channels are used.  
**Action:** Remove the DEVICE TYPE option and re-run the command. Or Remove all ALLOCATE commands and re-run the script so that channels are automatically allocated.

**RMAN-06471: no configuration found to allocate channels for string**  
**Cause:** Device type configuration was not found in recovery catalog  
**Action:** Setup device type configuration using configure command for required device type

**RMAN-06472: channel id string is automatically allocated**  
**Cause:** Channel id was used on ALLOCATE/RELEASE command.  
**Action:** Use other channel id that does not belong to reserved channel id’s name space

**RMAN-06473: SET DATABASE can only be used in case of DUPLICATE without TARGET connection**  
**Cause:** A SET DATABASE command was specified when connected to target database or not connected to an auxiliary instance.  
**Action:** Specify the command only when not connected to a target database and when connected to an auxiliary instance in preparation to DUPLICATE without TARGET connection.

**RMAN-06474: maintenance channels are not allocated**  
**Cause:** RELEASE CHANNEL was used without allocating any maintenance channels.  
**Action:** Allocate maintenance channel before executing this command.

**RMAN-06475: parallelism setting out of range (1-254): number**  
**Cause:** Parallelism for the device type in CONFIGURE PARALLELISM command is out of range
Action: Enter value of parallelism that are within the allowed range.

RMAN-06476: channel number out of range (1-254): number
Cause: Channel number entered in CONFIGURE CHANNEL command is out of range.
Action: Enter channel number within allowed range and retry the command.

RMAN-06477: configuration value length exceeds 1024
Cause: CONFIGURE CHANNEL command entered has configuration value greater than 1024 bytes.
Action: Reduce the length of CONFIGURE CHANNEL command options.

RMAN-06478: WARNING: datafile copy 'string' cannot be found on disk
Cause: The CHANGE DATAFILECOPY AVAILABLE command was used, but the datafile copy cannot be found on disk.
Action: If the storage containing the datafile copy has been removed from the host, restore it and retry the command. If the datafile copy is permanently gone, then issue the CHANGE DATAFILECOPY DELETE command for this datafile.

RMAN-06479: WARNING: control file copy 'string' cannot be found on disk
Cause: The CHANGE CONTROLFILECOPY AVAILABLE command was used, but the control file copy cannot be found on disk.
Action: If the storage containing the control file copy has been removed from the host, restore it and retry the command. If the control file copy is permanently gone, then issue the CHANGE CONTROLFILECOPY DELETE command for this control file.

RMAN-06480: WARNING: archived log 'string' cannot be found on disk
Cause: The CHANGE ARCHIVELOG AVAILABLE command was used, but the archived log cannot be found on disk.
Action: If the storage containing the archived log has been removed from the host, restore it and retry the command. If the archived log is permanently gone, then issue the CHANGE ARCHIVELOG DELETE command for this archived log.

RMAN-06481: WARNING: backup piece 'string' cannot be found on the storage medium
Cause: The CHANGE BACKUPPIECE AVAILABLE command was used, but the backup piece cannot be found on the storage medium.
Action: If the storage containing the backup piece has been removed from the host, restore it and retry the command. If the backup piece is permanently gone, then issue the CHANGE BACKUPPIECE DELETE command for this backup piece.

RMAN-06482: WARNING: proxy copy 'string' cannot be found on the storage medium
Cause: The CHANGE PROXY AVAILABLE command was used, but the proxy copy cannot be found on disk.
Action: If the storage containing the proxy copy has been removed from the host, restore it and retry the command. If the proxy copy is permanently gone, then issue the CHANGE PROXY DELETE command for this proxy copy.

RMAN-06483: changed datafile copy expired
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06484: changed control file copy expired**
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06485: changed archived log expired**
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06486: changed backup piece expired**
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06487: changed proxy copy expired**
Cause: This is an informational message only.
Action: No action is required.

**RMAN-06488: restore from AUTOBACKUP does not allow any other modifiers**
Cause: A control file or SPFILE restore from AUTOBACKUP was attempted and other restore options were used.
Action: Do not specify any other options for the control file AUTOBACKUP restore.

**RMAN-06489: no configuration found to allocate clone channel number for device type string**
Cause: Target channel configuration could not be used for clone channel as it contains CONNECT option.
Action: Setup clone channel configuration using CONFIGURE CLONE command for required number and type of channels.

**RMAN-06490: WARNING: limit of AUTOBACKUPS for the day has been reached**
Cause: No more control file AUTOBACKUPS are possible in this day.
Action: This is a warning message, no action is required.

**RMAN-06491: control file AUTOBACKUP format "string" contains more than one "string" format specifier**
Cause: A CONTROLFILE AUTOBACKUP FORMAT cannot have more than one reserved format specifier.
Action: Specify only one reserved format specifier or use an alternative format.

**RMAN-06492: control file AUTOBACKUP format "string" must specify a "string" format specifier**
Cause: A reserved format specifier was not specified for the CONTROLFILE AUTOBACKUP FORMAT
Action: Add a specifier to the CONTROLFILE AUTOBACKUP FORMAT

**RMAN-06493: only UNTIL TIME clause is allowed when performing a restore from AUTOBACKUP, found: string**
Cause: For restoring a control file AUTOBACKUP only SET UNTIL TIME can be used. It is not possible to translate the others to a precise day.
Action: Specify SET UNTIL TIME to indicate the day to start the restore of a control file AUTOBACKUP.

RMAN-06494: string = string is out of range (string-string)
Cause: The specified parameter for restoring a control file AUTOBACKUP is out of the valid range.
Action: Change the parameter value to a valid number or do not specify it.

RMAN-06495: must explicitly specify DBID with SET DBID command
Cause: Restore of a control file AUTOBACKUP or ADVISE FAILURE was attempted when the database is not mounted.
Action: Specify the DBID of the database using SET DBID or mount the database.

RMAN-06496: must use the TO clause when the database is mounted or open
Cause: A control file restore was attempted when the database is mounted or open and no alternate destination was specified.
Action: Specify an alternate destination with the TO clause or dismount the database.

RMAN-06497: WARNING: control file is not current, control file AUTOBACKUP skipped
Cause: Control file AUTOBACKUP is not possible without a current control file.
Action: This is a warning message, no action is required.

RMAN-06498: skipping datafile string; already backed up string time(s)
Cause: The indicated datafile will not be included in the backup set. It is already backed up on the device requested and file is offline/read-only datafile. Use the FORCE option to override backup optimization.
Action: No action is required.

RMAN-06499: skipping archived log file string; already backed up string time(s)
Cause: The indicated log file will not be included in the backup set because it is already backed up on the device requested. Use FORCE option to override backup optimization.
Action: No action is required.

RMAN-06500: skipping backup set key string; already backed up string time(s)
Cause: The indicated backup set will not be copied because it is already backed up on the device requested. Use FORCE option to override backup optimization.
Action: No action is required.

RMAN-06501: skipping datafile string; already backed up on string
Cause: The indicated datafile will not be included in the backup set. It is already been backed up once, or before the since time specified.
Action: No action is required.

RMAN-06502: skipping archived log file string; already backed on string
Cause: The indicated log file will not be included in the backup set. It is already been backed up once, or before the since time specified.
Action: No action is required.

RMAN-06503: skipping backup set key string; already backed up on string
Cause: The indicated backup set will not be backed up. It has already been backed up on the device once, or before the since time specified.
Action: No action is required.

RMAN-06504: PROXY option with multiple backup copies is not supported
Cause: Multiple backup copies and PROXY option were specified in BACKUP command.
Action: Resolve the conflict.

RMAN-06505: specified DATABASE: string does not match previous DATABASE: string
Cause: SET DBID was used to set a DBID that translated into a database name that does not match newly specified database name or a previous SET DATABASE set a different database name.
Action: Verify that the correct DBID was specified or avoid using the SET DATABASE command.

RMAN-06506: the MAXSETSIZE option cannot be used with a backup backup set
Cause: The MAXSETSIZE option was specified for a backup backup set command.
Action: Remove the option and resubmit the command.

RMAN-06507: trying alternate file for archived log of thread number with sequence number
Cause: This is an informational message, appearing when an archived log was found out of sync with catalog database.
Action: No action is required.

RMAN-06508: MAXSETSIZE string KBYTES should be greater than block size string bytes
Cause: MAXSETSIZE configured or specified in backup command should be greater than database block size.
Action: Specify a larger MAXSETSIZE limit.

RMAN-06509: only SPFILE or control file can be restored from AUTOBACKUP
Cause: A datafile or archived log restore from AUTOBACKUP was attempted.
Action: Do not specify DATAFILE or ARCHIVELOG for restore from AUTOBACKUP.

RMAN-06510: RMAN retention policy is set to recovery window of number days
Cause: This is an informational message only.
Action: No action is required.

RMAN-06511: RMAN retention policy is set to redundancy number
Cause: This is an informational message only.
Action: No action is required.

RMAN-06512: copy will be obsolete on date string
Cause: This is an informational message only.
Action: No action is required.

RMAN-06513: copy will never be obsolete
Cause: This is an informational message only.
Action: No action is required.

RMAN-06514: archived logs required to recover from this copy will not be kept
Cause: This is an informational message only.
Action: No action is required.

RMAN-06515: archived logs required to recover from this copy will expire when this copy expires
Cause: This is an informational message only.
Action: No action is required.

RMAN-06516: time specified in KEEP UNTIL clause must be be after today
Cause: KEEP UNTIL support only a future time.
Action: Correct the time and retry the command.

RMAN-06517: KEEP option is not supported for archived log backups
Cause: The KEEP option is not supported for archived logs.
Action: Either remove KEEP option and retry the command or don’t specify archived logs for this backup.

RMAN-06518: backup will be obsolete on date string
Cause: This is an informational message only.
Action: No action is required.

RMAN-06519: backup will never be obsolete
Cause: This is an informational message only.
Action: No action is required.

RMAN-06520: archived logs will not be kept or backed up
Cause: This is an informational message only.
Action: No action is required.

RMAN-06521: archived logs required to recover from this backup will expire when this backup expires
Cause: This is an informational message only.
Action: No action is required.

RMAN-06522: KEEP FOREVER option is not supported without the recovery catalog
Cause: The KEEP FOREVER option was used, but it requires a connection to a recovery catalog database. The KEEP FOREVER option cannot be used when the backup repository is the target database control file. This is because information about this backup cannot be permanently stored. (If information is stored just in the control file it will be aged out depending on CONTROL_FILE_RECORD_KEEP_TIME initialization parameter.)
Action: If a recovery catalog database is available, then connect to the recovery catalog and retry the command, otherwise use a different KEEP option. 6523, 1, "unused"

RMAN-06524: RMAN retention policy will be applied to the command
Cause: This is an informational message only.
Action: No action is required.

RMAN-06525: RMAN retention policy is set to none
  Cause: Command DELETE OBSOLETE and REPORT OBSOLETE requires that either:
  * RMAN retention policy is not NONE or,
  * RMAN retention policy is specified with REPORT/DELETE command.
  Action: Either configure RMAN retention policy with CONFIGURE command or specify it at the end of DELETE/REPORT command.

RMAN-06526: KEEP option cannot be used with incremental backup
  Cause: The KEEP option was specified for a incremental backup.
  Action: Remove the option and resubmit the command.

RMAN-06527: KEEP option is not supported for backup of backup sets
  Cause: The KEEP option is not supported for backup of backup sets.
  Action: Either remove KEEP option and retry the command or don't specify backup sets for this backup.

RMAN-06528: CHANGE ... KEEP not supported for BACKUPPIECE
  Cause: The CHANGE BACKUPPIECE ... KEEP command was entered. KEEP attributes cannot be specified for backup pieces.
  Action: Use CHANGE BACKUPSET ... KEEP instead.

RMAN-06529: CHANGE ... KEEP not supported for ARCHIVELOG
  Cause: The CHANGE ARCHIVELOG ... KEEP command was entered. KEEP attributes cannot be specified for archived logs.
  Action: Use CHANGE BACKUPSET ... KEEP instead.

RMAN-06530: CHANGE ... KEEP LOGS not supported for backup set which contains archived logs
  Cause: The CHANGE BACKUPSET ... KEEP command was entered, but the BACKUPSET contains archived logs. Backup sets with archived logs cannot have KEEP attributes.
  Action: Do not specify backup set with archived logs for the CHANGE BACKUPSET ... KEEP command.

RMAN-06531: CHANGE ... KEEP not supported for incremental BACKUPSET
  Cause: The CHANGE BACKUPSET ... KEEP command was entered, but the BACKUPSET is an incremental backup set. Incremental backup sets cannot have KEEP attributes.
  Action: Do not specify a backup set with archived logs for the CHANGE BACKUPSET ... KEEP command.

RMAN-06532: redundancy count must be greater than zero
  Cause: The REDUNDANCY operand specified for the retention policy was zero.
  Action: Specify a REDUNDANCY operand of 1 or greater.

RMAN-06533: KEEP ... NOLOGS option cannot be used when datafiles are fuzzy
  Cause: The KEEP ... NOLOGS option was specified for a backup or copy of files in a fuzzy state. This kind of backup requires archived logs for recovery, so archived logs must be kept.
Action: Remove the KEEP ... NOLOGS option or make sure the files are not in a fuzzy state and resubmit the command.

RMAN-06534: archived logs required to recover from this backup will be backed up
Cause: This is an informational message only. An archivelog backup will be created and kept so the specified backup can be recovered to a consistent state.
Action: No action is required.

RMAN-06535: LIST COPY OF SPFILE is not supported
Cause: LIST COPY OF SPFILE was used, which is not supported because SPFILE cannot have a copy.
Action: Remove SPFILE from the command.

RMAN-06536: BACKED UP ... TIMES option is supported only for archived logs
Cause: The BACKUP UP ... TIMES option was used as a qualifier. This option is supported only for archived logs.
Action: Remove the option and resubmit the command.

RMAN-06537: CHANGE ... KEEP not supported for BACKUP
Cause: The CHANGE BACKUP... KEEP command was entered. KEEP attributes cannot be specified for copies and backup pieces in a single command.
Action: Use CHANGE BACKUPSET ... KEEP instead.

RMAN-06538: The expected DB_UNIQUE_NAME is string, but found string
Cause: The is an informational message.
Action: Check other error messages associated with this message.

RMAN-06540: Tablespace string will be excluded from future whole database backups
Cause: This is an informational message only.
Action: No action is required.

RMAN-06541: Tablespace string will be included in future whole database backups
Cause: This is an informational message only.
Action: No action is required.

RMAN-06542: file string is excluded from whole database backup
Cause: The indicated file will not be included in the backup set because its tablespace is configured as excluded from backup.
Action: No action is required.

RMAN-06543: duplicate or conflicting LIST options: string and string
Cause: The indicated options conflict with each other or appear more than once in a LIST command.
Action: remove the duplicate/conflicting option from the command.

RMAN-06547: SYSTEM tablespace cannot be excluded from whole database backup
Cause: The SYSTEM tablespace must be included in whole database backup.
Action: Remove the SYSTEM tablespace from the CONFIGURE ... EXCLUDE and retry the operation.

RMAN-06548: connected to auxiliary database: string (DBID=string)
**Cause:** This is an informational message only.
**Action:** No action is required.

**RMAN-06549: connected to auxiliary database: string (not mounted)**
**Cause:** This is an informational message only.
**Action:** No action is required.

**RMAN-06550: clone database not mounted and db_name not set in init.ora**
**Cause:** The clone database "init.ora" file does not specify the DB_NAME parameter.
**Action:** Add the DB_NAME parameter to the clone database "init.ora" and restart the instance.

**RMAN-06551: error while looking up datafile copy for file number: string**
**Cause:** An error occurred while looking up the specified datafile copy in the recovery catalog or target database control file.
**Action:** This error is accompanied by other errors describing the reason for the failure. If the datafile copy was created during a RESTORE with a new name, ensure that the RESTORE completed successfully.

**RMAN-06552: newname for datafile number was set to NEW, but file was not restored**
**Cause:** A SWITCH command was specified for a datafile, but the newname was set to NEW and the file was not restored. If newname is set to NEW, the file must be restored before issuing a SWITCH command.
**Action:** Correct and resubmit the SWITCH command.

**RMAN-06553: DB_CREATE_FILE_DEST must be set for SET NEWNAME ... TO NEW**
**Cause:** The SET NEWNAME ... TO NEW option was specified but the OMF destination init parameter DB_CREATE_FILE_DEST is not set.
**Action:** Supply a full name to the SET NEWNAME command or set DB_CREATE_FILE_DEST at the target database.

**RMAN-06554: WARNING: file string is in backup mode**
**Cause:** A file which is being backed up or copied is in backup mode. RMAN will back up the file anyway, but files do not need to be put into backup mode before backing them up with RMAN.
**Action:** Use the ALTER TABLESPACE ... END BACKUP statement, at the target database server, to take the files out of backup mode.

**RMAN-06555: datafile string must be restored from backup created before string**
**Cause:** An incomplete recovery session was started, but the file is in newer than the UNTIL TIME clause.
**Action:** Check the UNTIL TIME clause or restore the file from a sufficient old backup.

**RMAN-06556: datafile string must be restored from backup older than SCN string**
**Cause:** An incomplete recovery session was started, but the file is newer than the UNTIL clause.
**Action:** Check the UNTIL clause or restore the file from a sufficient old backup.
RMAN-06557: unable to restore archived log of thread number with sequence number

**Cause:** Restore of the specified archived log failed because the size of the archived log is larger than available disk space.

**Action:** One of the following: 1) Increase the MAXSIZE parameter and retry the command. 2) Free up disk space in the recovery area.

RMAN-06558: archived log size of number kb is bigger than available space of number kb

**Cause:** This message should be followed by one or more 6557 messages.

**Action:** Check the accompanying errors.

RMAN-06559: MAXSIZE must be larger than 1 kb

**Cause:** The MAXSIZE parameter is out of range.

**Action:** Specify a valid size and retry the command.

RMAN-06560: WARNING: backup set with key number will be read number times

**Cause:** This message should be followed by one or more 6562 messages.

**Action:** Check the accompanying messages.

RMAN-06561: available space must be larger than number kb

**Cause:** The recovery failed because it requires more disk space. One of the following could have caused this error: 1) The MAXSIZE option is used but is not large enough to restore files. 2) Files should be restored to recovery area, but available disk space is not large enough to restore files.

**Action:** One of the following: 1) Increase the MAXSIZE parameter and retry the command. 2) Free up disk space in the recovery area.

RMAN-06562: available space of number kb needed to avoid reading the backup set multiple times

**Cause:** A backup set is read more than once. Multiple reads of a backup set can slow restore performance. One of the following could have caused this: 1) The MAXSIZE option is used but is not large enough to restore files. 2) Files should be restored to a recovery area, but the available disk space is not large enough to restore files.

**Action:** One of the following: 1) Increase the MAXSIZE parameter and retry the command. 2) Free up disk space in the recovery area.

RMAN-06563: control file or SPFILE must be restored using FROM AUTOBACKUP

**Cause:** RESTORE CONTROLFILE or RESTORE SPFILE was specified without the FROM AUTOBACKUP option when RMAN is not connected to the recovery catalog.

**Action:** If the recovery catalog is available, connect to the recovery catalog and retry the restore. If the recovery catalog in not available, following is the procedure to restore control file or SPFILE:

1. Specify the DBID of the database with the SET DBID command.

2. If the AUTOBACKUP was created with non-default AUTOBACKUP format, then specify the AUTOBACKUP format using the SET CONTROLFILE AUTOBACKUP FORMAT command.

3. If the backup was created with SBT device, then allocate an SBT channel using the ALLOCATE CHANNEL command.
4. Restore control file or SPFILE by starting the RESTORE ... FROM AUTOBACKUP command.

**RMAN-06564:** must use the TO clause when the instance is started with SPFILE

**Cause:** A restore of the SPFILE from AUTOBACKUP was attempted when the instance is started with SPFILE and no alternate destination was specified.

**Action:** Specify an alternate destination with the TO clause.

**RMAN-06565:** WARNING: *string: sqlcode number* was caught, automatic retry

**#number**

**Cause:** The RMAN client caught a transient error and will automatically retry several times.

**Action:** No action required, this is an informational message.

**RMAN-06566:** target database incarnation not found in control file

**Cause:** RESETLOGS CHANGE# and/or time of the target database doesn't match any database incarnation in the control file.

**Action:** One of the following actions can be taken to resolve this error 1) Restore the control file from the incarnation. 2) To populate the new incarnation, inspect or restore an archived log/datafile/datafile copy/backup set from the target incarnation.

**RMAN-06567:** connected to auxiliary database: *string* (DBID=*, not open)

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-06568:** connected to target database: *string* (DBID=*, not open)

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-06569:** DATABASE: *string* does not match previous DATABASE: *string*

**Cause:** SET DBID or SET DATABASE was used to specify the target database name which does not match specified database name in DUPLICATE command.

**Action:** Verify that the correct DBID or the correct DATABASE was specified or avoid specifying DATABASE in DUPLICATE command.

**RMAN-06570:** datafile *number* switched to datafile copy "*string*"

**Cause:** This message was issued in response to a SWITCH command.

**Action:** No action is required, this is an informational message.

**RMAN-06571:** datafile *number* does not have recoverable copy

**Cause:** The SWITCH command with the option TO COPY was specified but the datafile has no valid copy to switch to.

**Action:** Verify whether the datafile has a valid datafile copy.

**RMAN-06572:** database is open and datafile *number* is not offline

**Cause:** The SWITCH command with the option TO COPY was specified, but datafile is not offline and database is open.

**Action:** Either make sure the datafile is offline or the database must be mounted but not opened.

**RMAN-06573:** specified DBID: *string* does not match previous DBID: *string*
Cause: The DBID in the DUPLICATE command did not match the previously specified DBID in the SET DBID command.

Action: Verify that the correct DBID was specified or avoid using DBID in the DUPLICATE command.

RMAN-06575: platform id number found in datafile string header is not a valid platform id
Cause: The platform id found in the datafile header was not recognized.
Action: Verify that this is a valid datafile.

RMAN-06576: platform 'string' (number) found in header of datafile string does not match specified platform name 'string' (number)
Cause: The platform specified in the command did not match the platform found in the datafile header.
Action: Specify the correct platform name and retry the command.

RMAN-06577: FROM TAG option may only be used with datafile copies
Cause: The FROM TAG option was specified for datafiles.
Action: Remove the option and resubmit the command.

RMAN-06578: INCREMENTAL LEVEL > 0 must be specified with FOR RECOVER OF
Cause: The FOR RECOVER OF option was specified without specifying INCREMENTAL LEVEL > 0.
Action: Specify INCREMENTAL LEVEL > 0 and resubmit the command.

RMAN-06580: the string option cannot be used with AS COPY
Cause: The specified option was specified for a backup as copy command.
Action: Remove the option and resubmit the command.

RMAN-06581: option string not supported
Cause: This option was specified and it is not supported.
Action: Remove the specified option.

RMAN-06582: AS COPY option cannot be used when backing up backup sets
Cause: The backup set was specified with AS COPY.
Action: Remove the AS COPY option or remove the backup sets.

RMAN-06583: at least 1 channel of TYPE DISK must be allocated to use AS COPY option
Cause: No channel of TYPE DISK was allocated.
Action: Allocate a channel of TYPE DISK and re-issue the command or remove AS COPY.

RMAN-06584: WARNING: AS BACKUPSET option added due to allocation of multiple channel types
Cause: DISK and non DISK channels were allocated for a backup command. Configuration indicates to produce image copies to DISK, however due to the mixed channel types BACKUPSETS will be created on DISK.
Action: Do not allocate non DISK channels to produce image copies to DISK or allocate only non DISK channels to produce BACKUPSETS only.
RMAN-06585: no copy of datafile number found
Cause: An available datafile copy for the specified datafile could not be found.
Action: make sure that all specified datafiles have a copy available.

RMAN-06586: no copy of datafile number with tag string found
Cause: An available datafile copy for the specified datafile could not be found.
Action: make sure that all specified datafiles have a copy available.

RMAN-06587: one or more datafile copies were not found
Cause: This error message was accompanied by an additional error message or messages indicating the cause of the error.
Action: Follow the recommended actions of the additional error message or messages.

RMAN-06588: number of patterns (number) to DB_FILE_NAME_CONVERT should be even
Cause: An uneven number of patterns was specified.
Action: Specify one more or one less pattern.

RMAN-06589: cannot specify DB_FILE_NAME_CONVERT option without AS COPY
Cause: The DB_FILE_NAME_CONVERT option was specified without AS COPY. This is not permitted for backup set backups where multiple files are combined into a set.
Action: Remove the DB_FILE_NAME_CONVERT option and re-run the BACKUP command.

RMAN-06590: Tablespace string cannot be converted
Cause: The system tablespaces could not be transported to other platforms.
Action: Remove the specified tablespace from the CONVERT command and retry the operation.

RMAN-06593: platform name 'string' specified in FROM PLATFORM is not valid
Cause: The platform name was not recognized.
Action: Specify a valid platform name.

RMAN-06594: platform name 'string' specified in TO PLATFORM is not valid
Cause: The platform name was not recognized.
Action: Specify a valid platform name.

RMAN-06595: platform name 'string' does not match database platform name 'string'
Cause: The platform name specified did not match the name of the database performing the conversion.
Action: Specify the correct platform name.

RMAN-06596: string requires target database compatibility string, currently set to string
Cause: A command or option was used that requires a higher database compatibility than is currently set at the target database.
Action: Raise the compatibility of the database before attempting the command again.
RMAN-06597: conversion between platforms 'string' and 'string' is not implemented
Cause: Conversion of Oracle datafiles between the specified platforms was not supported.
Action: Do not do the conversion.

RMAN-06599: Tablespace string is not read-only
Cause: A conversion was attempted on a tablespace which is not read-only.
Action: Change the tablespace to read-only and retry the operation.

RMAN-06600: old RMAN configuration parameters:
Cause: This message is issued in response to a CONFIGURE command.
Action: No action is required, this is an informational message only.

RMAN-06601: new RMAN configuration parameters:
Cause: This message is issued in response to a CONFIGURE command.
Action: No action is required, this is an informational message only.

RMAN-06602: TO DESTINATION option can be used only for disk device
Cause: The TO DESTINATION option was specified for non-disk device.
Action: Remove the TO DESTINATION option and resubmit the command.

RMAN-06603: TO DESTINATION option must be specified with RECOVERY AREA, RECOVERY FILES or DB_RECOVERY_FILE_DEST on disk device
Cause: RECOVERY FILES, RECOVERY AREA or DB_RECOVERY_FILE_DEST option was specified in BACKUP command on disk device without specifying TO DESTINATION option.
Action: Specify TO DESTINATION option and retry the command.

RMAN-06604: new RMAN configuration parameters are successfully stored
Cause: This message is issued in response to a CONFIGURE command.
Action: No action is required, this is an informational message only.

RMAN-06605: old RMAN configuration parameters are successfully deleted
Cause: This message is issued in response to a CONFIGURE command.
Action: No action is required, this is an informational message only.

RMAN-06606: RMAN configuration parameters are successfully reset to default value
Cause: This message is issued in response to a CONFIGURE command.
Action: No action is required, this is an informational message only.

RMAN-06607: RMAN configuration parameters for database with db_unique_name string are:
Cause: This message is issued in response to a SHOW command.
Action: No action is required, this is an informational message only.

RMAN-06608: RMAN configuration has no stored or default parameters
Cause: This message is issued in response to a SHOW command.
Action: No action is required, this is an informational message only.

RMAN-06609: AS COPY can be configured only for disk device
Cause: The AS COPY option was specified for non-disk device.
Action: Remove the AS COPY option and resubmit the command.

RMAN-06610: For record type string RECIDS from number to number are re-used before resync
Cause: This messages is issued when the control file records were re-used before resyncing to catalog database.
Action: Increase control_file_keep_record_time setting or issue BACKUP command that it will generate fewer control file records, e.g., backup few tablespaces instead of the complete database in one BACKUP command.

RMAN-06611: Following RMAN configuration applied before deleting logs:
Cause: This message is issued in response to a DELETE command.
Action: No action is required, this is an informational message only.

RMAN-06612: Incompatible options were specified for archivelog deletion policy
Cause: Incompabitle options were specified on CONFIGURE ARCHIVELOG DELETION POLICY command.
Action: Remove incompatbile options and retry the command. BACKED UP option can be used individually or combined with SHIPPED or APPLIED option. Following are invalid combination of options: a) TO NONE cannot be used with other options b) SHIPPED ON STANDBY and SHIPPED ON ALL STANDBY cannot be used together. c) APPLIED ON STANDBY and APPLIED ON ALL STANDBY cannot be used together. d) SHIPPED and APPLIED cannot be used together.

RMAN-06613: Connect identifier for DB_UNIQUE_NAME string not configured
Cause: The connect identifier for the specified DB_UNIQUE_NAME initialization parameter was not configured.
Action: Do one of the following:

- If the DB_UNIQUE_NAME belongs to a connected target database, then define the DB_UNIQUE_NAME parameter in LOG_ARCHIVE_DEST_n at the remote database from where the resynchronization is performed. Otherwise, define DB_UNIQUE_NAME parameter in LOG_ARCHIVE_DEST_n at the target database.
Or,

- Configure the appropriate connect identifier using the CONFIGURE DB_UNIQUE_NAME RMAN command and rerun the command.

RMAN-06614: DB_UNIQUE_NAME string is too long
Cause: The DB_UNIQUE_NAME initialization parameter string was too long.
Action: Configure the appropriate DB_UNIQUE_NAME initialization parameter string and re-run the command.

RMAN-06615: resyncing from database with DB_UNIQUE_NAME string
Cause: Resync was performed remotely for the specified DB_UNIQUE_NAME initialization parameter without connecting to it as target database. This type of remote resync has limitations. For example, RMAN output cannot be resynced. Please refer to RMAN documentation for a complete set of limitations.
Action: This is an informational message.

RMAN-06616: RMAN output not resynced for database with DB_UNIQUE_NAME string
Cause: V$RMAN_OUTPUT contents were not rescyned when the RESYNC CATALOG FROM DB_UNIQUE_NAME command was executed.

Action: This is an informational message.

RMAN-06617: UNTIL TIME (string) is ahead of last NEXT TIME in archived logs (string)
Cause: UNTIL TIME was more than the last NEXT TIME of the last archived log.
Action: Check the UNTIL SCN.

RMAN-06700: error parsing text script in file string
Cause: Incorrect syntax or invalid commands were found.
Action: Fix text script and retry the command.

RMAN-06701: could not construct path for file: "string"
Cause: An error was encountered when trying to construct the full pathname for the specified file.
Action: Ensure that the path is correct.

RMAN-06702: could not initialize for input file: "string"
Cause: An error was encountered when trying to initialize the specified file for input.
Action: Ensure that the file exists.

RMAN-06703: could not open file: "string" (reason=string)
Cause: An error was encountered when trying to open the specified file.
Action: Ensure that the file has correct permissions.

RMAN-06705: text script line is too long (>1024)
Cause: A text script contained a line longer than the permitted maximum length.
Action: Split the line in smaller lines and retry the operation.

RMAN-06706: could not close file: "string" (reason=string)
Cause: An error was encountered when trying to close the specified file.
Action: Ensure that the file has correct permissions and still exists.

RMAN-06707: could not initialize for output file: "string"
Cause: An error was encountered when trying to initialize the specified file for output.
Action: Ensure that the file exists.

RMAN-06708: short write while writing file "string". Wrote string bytes instead of string bytes
Cause: An attempt was made to write to a file system that was full.
Action: Ensure that the file system has room for the file. Check system logs.

RMAN-06709: No scripts in recovery catalog
Cause: An attempt was made to list the scripts in the catalog, but no scripts could be found in the specified recovery catalog.
Action: No action required, this is an informational message only.

RMAN-06710: script string not found in catalog
**Cause:** An attempt was made to call a script that could not be found in the target database or as a global script in the specified catalog.

**Action:** Verify the script name and retry the command.

**RMAN-06711: global scripts require a TARGET connection**

**Cause:** Connection to a TARGET database was not specified.

**Action:** Provide a TARGET connection and retry the command.

**RMAN-06716: skipping datafile number; already restored to file string**

**Cause:** Recovery Manager determined that this file is already restored. Use FORCE option to override this optimization.

**Action:** No action required, this is an informational message only.

**RMAN-06717: Could not delete auxiliary instance file string**

**Cause:** Auxiliary instance file was not deleted. This message should be accompanied by other error message(s) indicating the cause of the error.

**Action:** Check the accompanying errors.

**RMAN-06724: backup not done; all files already backed up**

**Cause:** A BACKUP command does not need to backup any files, because all of the files to backup are already backed up.

**Action:** No action required, this is an informational message only.

**RMAN-06725: database not open: sort area size too small**

**Cause:** sort area size too small to execute RMAN commands.

**Action:** open the database or increase sort_area_size.

**RMAN-06726: could not locate archived log string**

**Cause:** The specified archived log could not be found on any allocated channel.

**Action:** Allocate additional channels on other nodes of the cluster or, if the archived logs has been deleted, use the CROSSCHECK ARCHIVELOG command to correct the recovery catalog or target database control file entries.

**RMAN-06727: could not locate datafile copy string**

**Cause:** The specified datafile copy could not be found on any allocated channel.

**Action:** Allocate additional channels on other nodes of the cluster or if the datafile copy has been deleted, use the CROSSCHECK DATAFILECOPY command to correct the recovery catalog or target database control file entries.

**RMAN-06728: could not locate control file copy string**

**Cause:** The specified control file copy could not be found on any allocated channel.

**Action:** Allocate additional channels on other nodes of the cluster or if the control file copy has been deleted, use the CROSSCHECK CONTROLFILECOPY command to correct the recovery catalog or target database control file entries.

**RMAN-06729: no backup of the SPFILE found to restore**

**Cause:** A SPFILE restore could not proceed because no backup of the SPFILE was found. It may be the case that a backup of this file exists but does not satisfy the criteria specified in the user's restore operands.

**Action:** Modify options for the SPFILE restore.
RMAN-06730: no channel to restore a backup of the SPFILE
   Cause: A SPFILE restore could not proceed because the backup on a device type
   that was not allocated for restore.
   Action: No action required, this is an informational message only. See message
   6026 for further details.

RMAN-06731: command string% complete, time left number
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-06732: database dropped
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-06733: database unregistered from the recovery catalog
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-06737: database name "string" does not match target database name "string"
   Cause: The UNREGISTER DATABASE command was used with a database name
   that does not match the name of the database to which RMAN is connected.
   Action: Specify the correct database name or avoid specifying the database name
   when connected to the target database.

RMAN-06738: database name "string" is not unique in the recovery catalog
   Cause: The UNREGISTER DATABASE command was used with a database name
   that is ambiguous.
   Action: Use the SET DBID command to specify the database id and resolve the
   ambiguity.

RMAN-06739: database "string" is not found in the recovery catalog
   Cause: The UNREGISTER DATABASE command was used with a database name
   that was not found in the recovery catalog.
   Action: Make sure the database name specified in the DROP DATABASE
   command syntax is correct.

RMAN-06740: database name is not specified
   Cause: The command failed because of the following:
   o RMAN is not connected to the target database
   o The database name is not specified in the command
   o DBID is not set with the SET DBID command
   Action: Any one of the following actions will fix the problem: o Connect to the
   target database o Specify database name o Set DBID with SET DBID command

RMAN-06741: database name is "string" and DBID is string
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-06742: platform name 'string' longer than number
   Cause: The specified platform name exceeds the maximum allowable platform
   name.
Action: Correct the platform name.

RMAN-06743: specification does not match any backup set in the repository
Cause: The specified backup sets were not found in the recovery catalog or target database control file.
Action: Verify backup set existence and retry the command.

RMAN-06744: specification does not match any datafile copy in the repository
Cause: The specified datafile copies were not found in the recovery catalog or target database control file.
Action: Verify datafile copy existence and retry the command.

RMAN-06745: skipping datafile copy string; already backed up string time(s)
Cause: The indicated datafile copy was not included in the backup set because it was already backed up on the device requested.
Action: Use FORCE option to override backup optimization.

RMAN-06746: backup cancelled because there are no files to backup
Cause: There were no files or all files were skipped for this backup set, therefore no backup set was created.
Action: This message is informational only.

RMAN-06747: at least 1 channel of tertiary storage must be allocated to execute this command
Cause: The executed command requires a SBT channel, but no channels of type SBT were configured or allocated.
Action: ALLOCATE or CONFIGURE a SBT channel.

RMAN-06748: more than one channel types were allocated
Cause: RECOVERY FILES, RECOVERY AREA or DB_RECOVERY_FILE_DEST option was specified in BACKUP command, but more than one channel types was used and no DEVICE TYPE or CHANNEL option was specified.
Action: Specify CHANNEL or DEVICE TYPE option and retry the command.

RMAN-06749: restore point string does not exist.
Cause: The specified restore point does not exists in v$restore_point table of the target database.
Action: Check the name of restore point and retry the command.

RMAN-06750: SPFILE cannot be backed up by proxy.
Cause: The PROXY option was specified, but proxy copy of SPFILE is not supported. This file will be placed into a non-proxy backup set.
Action: No action required, this is an informational message only.

RMAN-06751: ASM file string cannot be proxy backed up.
Cause: The PROXY option was specified, but proxy copy of ASM file is not supported. This file will be placed into a non-proxy backup set.
Action: No action required, this is an informational message only.

RMAN-06752: error while looking up tempfile: string
Cause: An error occurred while looking up the specified tempfile in the recovery catalog or target database control file.
**Action:** This error is accompanied by other errors describing the reason for the failure; see those error messages for further information. One possible problem is that the tempfile name was not entered correctly.

**RMAN-06753: tempfile not found in the repository**

**Cause:** The specified tempfile is not found in the control file or recovery catalog.

**Action:** Make sure that the tempfile name is correct and retry

**RMAN-06754: INCREMENTAL FROM SCN option is not supported with [string]**

**Cause:** The INCREMENTAL FROM SCN option was supplied but does not apply to this type of backup.

**Action:** Remove the INCREMENTAL FROM SCN operand and re-enter the command.

**RMAN-06755: WARNING: datafile string: incremental-start SCN is too recent; using checkpoint SCN string instead**

**Cause:** The incremental-start system change number (SCN) which was specified when starting an incremental datafile backup is greater than the datafile checkpoint SCN, which could cause some blocks to be missed.

**Action:** Specify a smaller incremental-start system change number (SCN).

**RMAN-06756: cannot flashback database to non-guaranteed restore point string when flashback is off**

**Cause:** The indicated restore point was not guaranteed and flashback was disabled. When flashback is disabled, Oracle can flashback only to guaranteed restore point.

**Action:** Specify a guaranteed restore point or turn on flashback and retry the command.

**RMAN-06757: DB_UNIQUE_NAME "string" does not match target database ("string")**

**Cause:** The value specified in the FOR DB_UNIQUE_NAME option did not match the DB_UNIQUE_NAME parameter setting of the target database.

**Action:** Use the RMAN STARTUP command, with no parameter file option, to start the target database without a parameter file, then run the RESTORE SPFILE command again.

**RMAN-06758: DB_UNIQUE_NAME is not unique in the recovery catalog**

**Cause:** RMAN could not identify which SPFILE to restore for this target database, because the recovery catalog contained two or more different instances of this database, each with different DB_UNIQUE_NAME values.

**Action:** Use the FOR DB_UNIQUE_NAME option to specify the name of the instance whose parameter file you want to restore.

**RMAN-06759: skipping datafile copies that are already backed up**

**Cause:** Some datafile copies were not be backed up because they were already backed up on the device requested.

**Action:** No action is required. You can use the FORCE option to override backup optimization and force these files to be backed up.

**RMAN-06760: skipping archived logs that are already backed up**

**Cause:** Some archived logs were not be backed up because they were already backed up on the device requested.
**Action**: No action is required. You can use the FORCE option to override backup optimization and force these files to be backed up.

**RMAN-06761**: skipping backup sets that are already backed up  
**Cause**: Some backup sets were not be backed up because they were already backed up on the device requested.  
**Action**: No action is required. You can use the FORCE option to override backup optimization and force these files to be backed up.

**RMAN-06762**: ignoring encryption for proxy or image copies  
**Cause**: This information message is displayed when the RMAN client is generating proxy or image copies and encryption was enabled for the input files.  
**Action**: This is an informational message only.

**RMAN-06763**: specified encryption algorithm not supported  
**Cause**: An encryption algorithm not supported by the database is specified during backup.  
**Action**: Refer to contents of v$rman_encryption_algorithms view for the list of supported encryption algorithm. Specify a valid encryption algorithm and retry the command.

**RMAN-06764**: string  
**Cause**: An error occurred when processing user request.  
**Action**: None

**RMAN-06765**: Tablespace string will be encrypted in future backup sets  
**Cause**: This is an informational message only.  
**Action**: No action is required.

**RMAN-06766**: Tablespace string will not be encrypted in future backup sets  
**Cause**: This is an informational message only.  
**Action**: No action is required.

**RMAN-06767**: Tablespace string will default to database encryption configuration  
**Cause**: This is an informational message only.  
**Action**: No action is required.

**RMAN-06768**: duplicate or conflicting options are specified: string and string  
**Cause**: An error occurred when processing the command because user specified two duplicate options or the two options are not allowed to be used together.  
**Action**: Remove one of the above options and retry the command.

**RMAN-06769**: length of password must be greater than zero  
**Cause**: Zero length password was specified for encrypted backups.  
**Action**: Retry the command using a password with non-zero length.

**RMAN-06770**: backup encryption requires Enterprise Edition  
**Cause**: The backup command tried to create encrypted backups, but Enterprise Edition is not installed.  
**Action**: Do not create encrypted backups.

**RMAN-06771**: cannot do IMPORT CATALOG after NOCATALOG has been used
Cause: The IMPORT CATALOG command was used after the NOCATALOG option was already specified.
Action: Restart RMAN and connect to recovery catalog if you wish to IMPORT CATALOG.

RMAN-06772: cannot do IMPORT CATALOG before connecting to recovery catalog
Cause: The IMPORT CATALOG command was used before connecting to the recovery catalog.
Action: Connect to recovery catalog using CONNECT CATALOG command if you wish to IMPORT CATALOG.

RMAN-06773: connected to source recovery catalog database
Cause: This is an informational message only.
Action: No action is required.

RMAN-06774: must specify a TNS service name for source recovery catalog database
Cause: The connect string does not contain TNS service name. IMPORT CATALOG without TNS service name is not supported.
Action: Specify a service name and resubmit the command.

RMAN-06775: not connected to source recovery catalog database
Cause: IMPORT CATALOG command was issued but no connection to the source recovery catalog database has been established.
Action: Resubmit IMPORT CATALOG command with correct connect string.

RMAN-06776: source recovery catalog database not started
Cause: IMPORT CATALOG command was issued which requires the source recovery catalog to be open.
Action: Open the source recovery catalog database and re-submit the command.

RMAN-06777: ORACLE error from source recovery catalog database: string
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.

RMAN-06778: WARNING: string sqlcode number was caught, automatic retry #string
Cause: The RMAN client caught a transient error during temporary resource allocate for IMPORT CATALOG command and will automatically retry several times.
Action: No action required, this is an informational message.

RMAN-06779: import validation complete
Cause: This is an informational message only.
Action: No action required.

RMAN-06780: database unregistered from the source recovery catalog
Cause: This is an informational message only.
Action: No action is required.

RMAN-06781: string package version string in source database is not of version string
Cause: The catalog schema version of the source recovery catalog is not the same as the target recovery catalog. The two catalog
Action: UPGRADE source recovery catalog schema and recovery catalog schema to same version and retry the command.

RMAN-06782: Datafile headers of locally managed datafiles need to be updated.
Cause: This is an informational message only.
Action: No action is required.

RMAN-06783: Update of datafile headers of locally managed datafiles finished.
Cause: This is an informational message only.
Action: No action is required.

RMAN-06784: One or more datafile headers of locally managed datafiles were not updated.
Cause: Errors prevented the update of one or more datafile headers.
Action: See trace file for details of the problem.

RMAN-06785: This operation might take some time.
Cause: This is an informational message only.
Action: No action is required.

RMAN-06786: could not read file header for datafile string to do FLASHBACK.
Cause: The indicated datafile header could not be read to do FLASHBACK DATABASE.
Action: If the database must be taken back in time then a restore and incomplete recovery must be performed.

RMAN-06787: WARNING: TAG string option is ignored; backups will be tagged with string
Cause: WITH TAG option and TAG option were used together. When WITH TAG option is used, all the backups created by the command will have tag specified with WITH TAG option.
Action: The TAG option can be removed to not display the message.

RMAN-06791: changed the DB_UNIQUE_NAME value from string to string
Cause: This is an informational message only.
Action: No action is required.

RMAN-06792: database db_unique_name is "string", db_name is "string" and DBID is string
Cause: UNREGISTER DB_UNIQUE_NAME or CHANGE DB_UNIQUE_NAME command was executed, hence RMAN displayed the database information for which DB_UNIQUE_NAME the metadata will be removed/renamed in the recovery catalog.
Action: No action required, this is an informational message only.

RMAN-06793: database with db_unique_name string unregistered from the recovery catalog
Cause: UNREGISTER DB_UNIQUE_NAME command was executed.
Action: No action required, this is an informational message only.
RMAN-06795: Flashback database logging is not on.
   Cause: A FLASHBACK DATABASE command was tried but flashback database logging has not been enabled.
   Action: Flashback database logging must be enabled via the ALTER DATABASE FLASHBACK ON command before a FLASHBACK DATABASE command can be tried. If the database must be taken back in time then a restore and incomplete recovery must be performed.

RMAN-06796: Not enough flashback database log data to do FLASHBACK.
   Cause: There was not enough flashback database log data to do the FLASHBACK DATABASE.
   Action: If the database must be taken back in time then a restore and incomplete recovery must be performed.

RMAN-06797: Grant succeeded.
   Cause: This is an informational message issued in response to a GRANT command.
   Action: No action required.

RMAN-06798: Revoke succeeded.
   Cause: This is an informational message issued in response to a REVOKE command.
   Action: No action required.

RMAN-06799: found eligible base catalog owned by string
   Cause: When creating a virtual private catalog, an 11g base catalog was found, owned by the specified user, and the currently connected catalog user has been granted privileges on this catalog, and can therefore create a virtual private catalog using this base catalog. This is an informational message issued in response to a CREATE VIRTUAL CATALOG command.
   Action: No action required.

RMAN-06800: found ineligible base catalog owned by string
   Cause: When creating a virtual private catalog, an 11g base catalog was found, owned by the specified user, and the currently connected catalog user has not been granted any privileges on this catalog. This is an informational message issued in response to a CREATE VIRTUAL CATALOG command.
   Action: No action required.

RMAN-06801: no base catalog found
   Cause: When trying to create a virtual catalog, either no base catalog was found, or this user has no privilege to create a virtual catalog against any existing base catalog.
   Action: Establish the correct privileges and re-create the virtual catalog.

RMAN-06802: too many eligible base catalogs found
   Cause: When trying to create a virtual catalog, more than one base catalog was found that is eligible to be the base catalog for this virtual catalog.
   Action: Revoke privileges so that the current catalog user has privileges on only one base catalog, then re-issue the CREATE VIRTUAL CATALOG command.

RMAN-06803: created virtual catalog against base catalog owned by string
**Cause:** A virtual private catalog was created, where the base catalog data is owned by the specified user. This is an informational message issued in response to a CREATE VIRTUAL CATALOG command.

**Action:** No action required.

**RMAN-06804: Enter value for string:**

**Cause:** This is a user prompt.

**Action:** Enter a substitution value to proceed.

**RMAN-06805: SET NEWNAME command has not been issued for tempfile string**

**Cause:** A SWITCH command was specified for a tempfile, but no destination was specified and no SET NEWNAME command has been previously issued for that file. An explicit file to switch to must be specified if no SET NEWNAME command has been issued.

**Action:** Correct and resubmit the SWITCH command.

**RMAN-06806: compression algorithm 'string' of release string not found**

**Cause:** An unsupported compression algorithm was specified for the backup.

**Action:** Query the V$RMAN_COMPRESSION_ALGORITHM view for the list of supported compression algorithms. Specify a valid compression algorithm and retry the command.

**RMAN-06807: compression algorithm 'string' of release string cannot be used because database compatibility is less than string**

**Cause:** The compression algorithm is not supported because the current compatibility level of the database is too low.

**Action:** Query the V$RMAN_COMPRESSION_ALGORITHM view for the list of supported compression algorithms. Specify a valid compression algorithm and retry the command.

**RMAN-06808: SECTION SIZE cannot be used when piece limit is in effect**

**Cause:** The SECTION SIZE backup option was used together with the MAXPIECESIZE channel limit. These options are mutually exclusive, because they are independent methods of creating multiple backup pieces with one backup command.

**Action:** Use one option or the other, but not both.

**RMAN-06809: compression algorithm 'string' of release string requires advanced compression option**

**Cause:** The compression algorithm was not supported because it requires advanced compression option to be enabled.

**Action:** Enable advanced compression option by setting advanced_compression_option_usable=true or specify a different compression algorithm.

**RMAN-06810: specification does not match any datafile copy in the repository**

**Cause:** No datafile copies were found that match specification in the recovery catalog or target database control file.

**Action:** Check the specifier.

**RMAN-06811: specification does not match any control file copy in the repository**

**Cause:** No control file copies were found that match specification in the recovery catalog or target database control file.
Action: Check the specifier.

RMAN-06812: specification does not match any backup in the repository
  Cause: No backups were found that match specification in the recovery catalog or target database control file.
  Action: Check the specifier. ADD NEW KRMK ERROR MESSAGES HERE

RMAN-06898: recovery catalog is partially upgraded to string
  Cause: The recovery catalog database was not completely upgraded to the specified version. Either there were some errors during execution of UPGRADE CATALOG or UPGRADE CATALOG was cancelled before completion.
  Action: Execute UPGRADE CATALOG again.

RMAN-06899: updating recovery catalog with new database incarnation
  Cause: The target database has a new incarnation that has not already been seen by the recovery catalog. This usually happens because a Point-in-Time Recovery was done. RMAN has made the necessary updates to the recovery catalog.
  Action: This is an informational message only.

RMAN-06900: WARNING: unable to generate V$RMAN_STATUS or V$RMAN_OUTPUT row
  Cause: The routine createRmanStatusRow() or createRmanOutputRow() could add new row into V$RMAN_STATUS or V$RMAN_OUTPUT.
  Action: Check the associated error messages. If the associated error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-06901: WARNING: disabling update of the V$RMAN_STATUS and V$RMAN_OUTPUT rows
  Cause: Informational message only.
  Action: No action required.

RMAN-06902: AS COMPRESSED BACKUPSET option cannot be used when backing up backup sets
  Cause: The backup set was specified with AS COMPRESSED BACKUPSET.
  Action: Remove the AS COMPRESSED BACKUPSET option.

RMAN-06903: backup of datafile string was cancelled
  Cause: This is an informational message displayed when PARTIAL option of DURATION option was specified on the BACKUP command and backup could not be completed within the given duration time.
  Action: Run the BACKUP command to backup cancelled files, or let the next backup window backup the cancelled files. It should be noted that the files that were skipped in the current job will be given preference to other files for next the BACKUP command with DURATION option.

RMAN-06904: backup of archived log for thread number with sequence number and starting SCN of string was cancelled
  Cause: This is an informational message displayed when PARTIAL option of DURATION option was specified on the BACKUP command and backup could not be completed within the given duration time.
  Action: Run BACKUP command to backup cancelled files, or let the next backup window backup the cancelled files. It should be noted that the files that were
skipped in the current job will be given preference to other files for next the BACKUP command with DURATION option.

RMAN-06905: backup of backup set key number was cancelled

Cause: This is an informational message displayed when PARTIAL option of DURATION option was specified on the BACKUP command and backup could not be completed within the given duration time.

Action: Run BACKUP command to backup cancelled files, or let the next backup window backup the cancelled files. It should be noted that the files that were skipped in the current job will be given preference to other files for next the BACKUP command with DURATION option.

RMAN-06906: backup of control file was cancelled

Cause: This is an informational message displayed when PARTIAL option of DURATION option was specified on the BACKUP command and backup could not be completed within the given duration time.

Action: Run BACKUP command to backup cancelled files, or let the next backup window backup the cancelled files. It should be noted that the files that were skipped in the current job will be given preference to other files for next the BACKUP command with DURATION option.

RMAN-06907: MINIMIZE LOAD option not allowed for the specified input files

Cause: This option was specified in a backup command specification for BACKUP BACKUPSET or BACKUP CURRENT CONTROLFILE command.

Action: Remove the MINIMIZE LOAD option and retry the command.

RMAN-06908: WARNING: operation will not run in parallel on the allocated channels

Cause: RMAN allocated more than one channel for a job, but the job will not run in parallel on these channels because parallelism require Enterprise Edition.

Action: None

RMAN-06909: WARNING: parallelism require Enterprise Edition

Cause: RMAN allocated more than one channel for a job, but the job will not run in parallel on these channels because parallelism require Enterprise Edition.

Action: None

RMAN-06910: can not invoke parallel recovery for test recovery

Cause: Recover database was called with TEST and PARALLEL option

Action: Call recover database with either just the TEST or PARALLEL option

RMAN-06911: only one PARALLEL or NOPARALLEL clause may be specified

Cause: Recover database was called with PARALLEL and NOPARALLEL option

Action: Call recover database with either just the PARALLEL or NOPARALLEL option.

RMAN-06912: backup of spfile was cancelled

Cause: This is an informational message displayed when PARTIAL option of DURATION option was specified on the BACKUP command and backup could not be completed within the given duration time.

Action: Run BACKUP command to backup cancelled files, or let the next backup window backup the cancelled files. It should be noted that the files that were
skipped in the current job will be given preference to other files for next the BACKUP command with DURATION option.

RMAN-06913: validate cancelled because there are no files to validate
  Cause: All files for this validate command were skipped, therefore no files to validate.
  Action: This message is informational only.

RMAN-06914: BLOCK string must be greater or equal to BLOCK string
  Cause: The value of TO block number was less than the value of from block number.
  Action: Increase the value of TO BLOCK past the value of from BLOCK and retry the command.

RMAN-06915: restore point string already exists
  Cause: The specified restore point already exists on this database.
  Action: Use LIST RESTORE POINT to see existing names and retry the command with a unique restore point name.

RMAN-06920: database string is not open read-only
  Cause: CONVERT DATABASE attempted on a database that was not open read-only.
  Action: Open the database in read-only mode and retry the operation.

RMAN-06921: Convert database check failed
  Cause: This database could not be transported because DBMS_TDB.CHECK_DB returned FALSE.
  Action: None

RMAN-06922: External table string.string found in the database
  Cause: An external table was found in the database.
  Action: Redefine the table in the transported database.

RMAN-06923: Directory string.string found in the database
  Cause: A directory object was found in the database.
  Action: Redefine the directory in the transported database.

RMAN-06924: BFILE string.string found in the database
  Cause: A BFILE was found in the database.
  Action: Redefine the BFILE in the transported database.

RMAN-06925: BFILEs are used in the system, please redefine them in the transported database
  Cause: BFILEs may or may not exist in the database. Automatically performed BFILE check failed because database was open read-only and could not allocate temporary space. This does not affect CONVERT DATABASE operation.
  Action: Use DBMS_TDB.CHECK_EXTERNAL to perform BFILE check when the database is open in read/write mode.

RMAN-06926: User string with string privilege found in password file
  Cause: Password file was used.
Action: Re-create the password file on the target platform using ORAPWD for the transported database.

RMAN-06927: Cannot specify NEW DATABASE clause more than once
Cause: NEW DATABASE clause specified more than once
Action: Remove redundant NEW DATABASE clause and retry the operation.

RMAN-06928: Cannot specify ON TARGET PLATFORM clause more than once
Cause: ON TARGET PLATFORM clause specified more than once
Action: Remove redundant ON TARGET PLATFORM clause and retry the operation.

RMAN-06929: Cannot specify TRANSPORT SCRIPT clause more than once
Cause: TRANSPORT SCRIPT clause specified more than once
Action: Remove redundant ON TARGET PLATFORM clause and retry the operation.

RMAN-06930: Cannot specify SKIP clause more than once
Cause: SKIP clause specified more than once
Action: Remove redundant SKIP clause and retry the operation.

RMAN-06931: Cannot specify FROM PLATFORM clause
Cause: CONVERT DATABASE command cannot use FROM PLATFORM clause.
Action: Change FROM PLATFORM clause and retry.

RMAN-06932: Database name 'string' longer than number
Cause: The specified database name exceeded the maximum allowable database name length.
Action: Correct the database name.

RMAN-06933: Transport script name too long
Cause: The specified transport script name exceeded the maximum allowable script name length.
Action: Correct the script name.

RMAN-06934: Format string too long
Cause: The specified format string exceeded the maximum allowable format string length.
Action: Correct the format string.

RMAN-06935: Convert script name too long
Cause: The specified convert script name exceeded the maximum allowable script name length.
Action: Correct the script name.

RMAN-06941: Database must be closed and mounted EXCLUSIVE and RESTRICTED.
Cause: DROP DATABASE was attempted while the database was open or not mounted EXCLUSIVE and RESTRICTED.
Action: Change the database state to mounted EXCLUSIVE and RESTRICTED.
RMAN-06942: OPTION number is invalid; OPTION must be between string and string
   Cause: An invalid OPTION was used.
   Action: Change the OPTION argument.

RMAN-06943: no automatic repair OPTION number was listed in ADVISE FAILURE
   Cause: The OPTION specified was not one of the automatic repair options listed by ADVISE FAILURE or there were no options listed by the ADVISE FAILURE command.
   Action: Change the OPTION argument or resubmit ADVISE FAILURE with a different set of failures.

RMAN-06944: contents of repair script:
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-06945: no repair script present for REPAIRID string
   Cause: REPAIRID option specified in the command was invalid or the repair script had been purged from Automated Diagnostic Repository.
   Action: Retry REPAIR FAILURE command with a different OPTION number.

RMAN-06946: executing repair script
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-06947: searching flashback logs for block images until SCN string
   Cause: Starting the flashback log search for RECOVER...BLOCK command. The log is searched until the indicated system change number (SCN).
   Action: None. This is an informational message displayed for RECOVER...BLOCK command.

RMAN-06948: searching flashback logs for block images
   Cause: Starting the flashback log search for RECOVER...BLOCK command. The log is searched until the end of the log.
   Action: None. This is an informational message displayed for RECOVER...BLOCK command.

RMAN-06949: finished flashback log search, restored string blocks
   Cause: Flashback log search finished for RECOVER...BLOCK command.
   Action: None. This is an informational message displayed for RECOVER...BLOCK command.

RMAN-06950: invalid validate option specified: string
   Cause: The specified object was invalid with VALIDATE command.
   Action: Delete the invalid operand.

RMAN-06951: repair failure complete
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-06952: database needs to be restarted
   Cause: The target database control file was missing.
Action: Restart the instance and repair the database.

RMAN-06953: no automatic repairs were listed by ADVISE FAILURE
Cause: There were no automatic repairs listed by the ADVISE FAILURE command.
Action: Choose a different failure, submit ADVISE FAILURE command, and then submit REPAIR FAILURE command.

RMAN-06954: REPAIR command must be preceded by ADVISE command in same session
Cause: The ADVISE command was not issued in the same session as the REPAIR command.
Action: Submit ADVISE command and then submit the REPAIR command in same session.

RMAN-06955: Network copies are only supported for image copies.
Cause: An attempt was made to specify BACKUP AUXILIARY FORMAT without specifying the AS COPY clause. A network copy is only supported with an image copy.
Action: Seek an alternate method of copying the desired files.

RMAN-06956: create datafile failed; retry after removing string from OS
Cause: An attempt was made to re-create a database file. This attempt failed.
Action: If the indicated file already exists, remove the file from operating system and retry the RMAN command.

RMAN-06957: finished standby search, restored string blocks
Cause: Standby search finished for RECOVER...BLOCK command.
Action: None. This is an informational message displayed for RECOVER...BLOCK command.

RMAN-06958: Executing: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-06959: WARNING: repair completed but could not verify that failures were fixed by it
Cause: RMAN repair command successfully completed but could not check if the failures were fixed.
Action: Use LIST FAILURE command to verify repair results.

RMAN-06960: EXPDP> string
Cause: This is an informational message only.
Action: No action is required.

RMAN-06961: IMPDP> string
Cause: This is an informational message only.
Action: No action is required.

RMAN-06962: Error received during export of metadata
Cause: Data Pump could not perform export of tablespace metadata.
Action: See accompanying datapump messages indicating the cause of the error.
RMAN-06963: Error received during import of metadata
  Cause: Data Pump could not perform import of tablespace metadata.
  Action: See accompanying datapump messages indicating the cause of the error.

RMAN-06964: option string cannot be used with string
  Cause: Incompatible options were specified that caused the command to fail.
  Action: Remove one of the options from the command and retry.

RMAN-06965: Datapump job has stopped
  Cause: A Data Pump error has caused the job to stop.
  Action: See accompanying datapump messages or look for a Data Pump trace file for the cause of the error.

RMAN-06966: Invalid release number string
  Cause: An incorrectly formatted release number was specified.
  Action: Specify a valid release number in n.n.n.n.n format.

RMAN-06967: finished primary search, recovered string blocks
  Cause: Primary Database search finished for RECOVER...BLOCK command.
  Action: None. This is an informational message displayed for RECOVER...BLOCK command.

RMAN-06970: NEWNAME 'string' for database must include %f or %U format
  Cause: The newname in SET NEWNAME FOR DATABASE did not include a format specifier to produce different newnames for the datafiles.
  Action: Include %f or %U in the newname or use SET NEWNAME FOR DATABASE TO NEW to ensure datafiles get different datafile names.

RMAN-06971: NEWNAME 'string' for tablespace must include %f or %U format
  Cause: The newname in SET NEWNAME FOR TABLESPACE did not include a format specifier to produce different newnames for the datafiles.
  Action: Include %f or %U in the newname or use SET NEWNAME FOR TABLESPACE ... TO NEW to ensure datafiles get different datafile names.

RMAN-06980: The following errors need to be fixed before performing this command
  Cause: The tablespaces failed validation by DBMS_TTS.TRANSPORT_SET_CHECK.
  Action: Fix accompanying violations before attempting the command again.

RMAN-06981: Violation: string
  Cause: This message was issued to show a violation obtained from the DBMS_TTS.TRANSPORT_SET_CHECK.
  Action: Fix violation before attempting the command again.

RMAN-07000: List of SPFILE Backups
  Cause: This message is issued in response to a LIST BACKUP OF SPFILE command.
  Action: No action is required.

RMAN-07025: string is not supported for foreign archived log
  Cause: The specified option was not supported for foreign archived log.
Action: Do not use the specified command for foreign archived log.

RMAN-07200: no failures found that match specification
  Cause: A failure specifier did not match any failures in the Automated Diagnostic Repository.
  Action: Resubmit the command with a different failure specifier. You can use the LIST FAILURE ALL command in Recovery Manager to display all failures known to RMAN.

RMAN-07207: changed string failures to HIGH priority
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-07208: changed string failures to LOW priority
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-07209: closed string failures
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-07210: new failures after most recent LIST FAILURE command
  Cause: New failures were found since last LIST FAILURE command in this RMAN session.
  Action: No action is required. This is an informational message only.

RMAN-07211: failure option not specified
  Cause: ALL, CRITICAL, HIGH, LOW, or list of failure numbers was not specified.
  Action: Specify a failure option and resubmit the command.

RMAN-07212: skipping failure string because it was CLOSED
  Cause: The specified failure has been already closed, so ADVISE FAILURE or CHANGE FAILURE cannot be executed on this failure.
  Action: This is an informational message only. No action is required.

RMAN-07213: Mandatory Manual Actions
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-07215: Automated Repair Options
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-07220: no manual actions available
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-07222: ===============
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-07251: Repair script: string
**Cause:** This is an informational message only.
**Action:** No action is required.

**RMAN-07252:**
**Cause:** This is an informational message only.
**Action:** No action is required.

**RMAN-07253:**
**Cause:** This is an informational message only.
**Action:** No action is required.

**RMAN-07255:** *priority change for failure string failed*
**Cause:** An attempt was made to change the priority of a child failure.
**Action:** Specify the parent failure ID to change the child failure.

**RMAN-07256:** *cannot change priority of child failure*
**Cause:** An attempt was made to change the priority of child failure.
**Action:** This message should be followed by one or more 7255 messages.

**RMAN-07259:** *string critical failures exist; cannot exclude from ADVISE FAILURE*
**Cause:** ADVISE FAILURE was executed for HIGH or LOW priority failures when CRITICAL failures existed.
**Action:** Execute ADVISE FAILURE with the CRITICAL or ALL options.

**RMAN-07262:** *no automatic repair options available*
**Cause:** This is an informational message only.
**Action:** No action is required.

**RMAN-07500:** *searching for all files that match the pattern string*
**Cause:** This is an informational message only.
**Action:** No action is required.

**RMAN-07501:** *searching for all files in the recovery area*
**Cause:** This is an informational message only.
**Action:** No action is required.

**RMAN-07502:** *List of Files Unknown to the Database*
**Cause:** This message is issued in response to a CATALOG command.
**Action:** No action is required.

**RMAN-07505:** *no files found to be unknown to the database*
**Cause:** This is an informational message displayed by the CATALOG command. The command either found no files, or all files that matched the specified search pattern were already present in the target database control file.
**Action:** No action is required.

**RMAN-07507:** *cataloging files...*
**Cause:** This is an informational message only.
**Action:** No action is required.

**RMAN-07508:** *cataloging done*
Cause: This is an informational message only.
Action: No action is required.

RMAN-07509: List of Cataloged Files
Cause: This message is issued in response to a CATALOG command.
Action: No action is required.

RMAN-07513: List of Files Which Where Not Cataloged
Cause: This message is issued in response to a CATALOG command.
Action: No action is required.

RMAN-07514: RMAN-07515: File Name: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-07516: Reason: Error reading
Cause: This is an informational message only.
Action: No action is required.

RMAN-07517: Reason: The file header is corrupted
Cause: Either the file is not an Oracle file or the file header is corrupted.
Action: Delete the file using OS utility.

RMAN-07518: Reason: Foreign database file DBID: string Database Name: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-07519: Reason: Error while cataloging. See alert.log.
Cause: This is an informational message only.
Action: No action is required.

RMAN-07520: Reason: Data pump dump file
Cause: This is an informational message only.
Action: No action is required.

RMAN-07521: cannot create recovery catalog in database version string; version string required
Cause: An attempt was made to use a version of the recovery catalog schema that was incompatible with the version of the database.
Action: Upgrade the catalog database to at least the required version or install the catalog schema in a different database which is of at least the required version.

RMAN-07522: CREATE TYPE privilege must be granted to user string
Cause: The CREATE CATALOG or UPGRADE CATALOG command was used, but the USERID that was supplied in the CATALOG connect string does not have the CREATE TYPE privilege granted.
Action: Grant CREATE TYPE privilege to the recovery catalog owner.
RMAN-07523: List of files in Recovery Area not managed by the database
Cause: This message was issued in response to a CATALOG RECOVERY AREA command.
Action: No action is required.

RMAN-07524:
Cause: This is an informational message only.
Action: No action is required.

RMAN-07525: Reason: File is not a supported file type in Recovery Area
Cause: This message should be accompanied by other message(s) indicating the name of file that was not supported in recovery area. Any file other than current control file, online log, archived log, RMAN backups and flashback log is not supported in recovery area. This is an informational message only.
Action: No action is required.

RMAN-07526: Reason: File is not an Oracle Managed File
Cause: This message should be accompanied by other message(s) indicating the name of file that was not a oracle managed file. This is an informational message only.
Action: No action is required.

RMAN-07527: Reason: File was not created using DB_RECOVERY_FILE_DEST initialization parameter
Cause: This message should be accompanied by other message(s) indicating the name of file that was not created using DB_RECOVERY_FILE_DEST initialization parameter. One of the following scenarios caused this error: 1) This is an archived log file and was created when the LOG_ARCHIVE_DEST_n initialization parameter was set explicitly to recovery area location. For example, LOG_ARCHIVE_DEST_1='location=+FRA' where '+FRA' was also your DB_RECOVERY_FILE_DEST value. 2) This is an RMAN backup file and was created in a recovery area using the FORMAT option of the BACKUP command. 3) This is an online log file or current control file and was created prior to setting the recovery area. 4) This file fits none of the above scenarios and is not supported by the recovery area.
Action: All of following actions will resolve future occurrences of this error: 1) To create archived logs in recovery area, set the LOG_ARCHIVE_DEST_n initialization parameter to 'location=USE_DB_RECOVERY_FILE_DEST'. Do not explicitly set the LOG_ARCHIVE_DEST_n initialization parameter to a recovery area location. 2) To create RMAN backups in recovery area, do not use the FORMAT option of the BACKUP command. All of following actions will resolve current problem: 1) If this is an archived log file or an RMAN backup file, use the CATALOG command to re-catalog the files. 2) If this is an online log file or a current control file to be managed by the recovery area, re-create the file using the DB_RECOVERY_FILE_DEST initialization parameter.

RMAN-07528: number of files not managed by recovery area is string, totaling string
Cause: This message should be accompanied by other message(s) indicating the list of files. Either the files listed are not known to the database or not managed by recovery area. The number and size of the files are shown. This is an informational message only.
Action: No action is required.
RMAN-07529: Reason: catalog is not supported for this file type

    Cause: The CATALOG command encountered one or more files of types that cannot be cataloged. These file types include online redo logs, flashback logs, block change tracking files, and data pump files. This message will be accompanied by other messages indicating the names of the file's that could not be cataloged.

    Action: No action is required.

RMAN-07530: Reason: This file type is not requested for cataloging

    Cause: This is an informational message only.

    Action: No action is required.

RMAN-08000: channel string: copied datafile string

    Cause: This is an informational message only.

    Action: No action is required.

RMAN-08001: restore not complete

    Cause: All of the backup pieces have been successfully applied, but DBMS_BACKUP_RESTORE package indicates that the restore conversation is not complete. This usually means that the backup set contained corrupt data.

    Action: Restore the files from a different backup set, if possible. The Recovery Manager CHANGE BACKUPPIECE UNAVAILABLE can be used to prevent Recovery Manager from attempting to restore from the corrupt backup piece(s).

RMAN-08002: starting full resync of recovery catalog

    Cause: This is an informational message only.

    Action: No action is required.

RMAN-08003: channel string: reading from backup piece string

    Cause: This is an informational message only.

    Action: No action is required.

RMAN-08004: full resync complete

    Cause: This is an informational message only.

    Action: No action is required.

RMAN-08005: new incarnation of database registered in recovery catalog

    Cause: This is an informational message only.

    Action: No action is required.

RMAN-08006: database registered in recovery catalog

    Cause: This is an informational message only.

    Action: No action is required.

RMAN-08007: channel string: copied datafile copy of datafile string

    Cause: This is an informational message only.

    Action: No action is required.

RMAN-08008: channel string: starting full datafile backup set

    Cause: This is an informational message only.

    Action: No action is required.
RMAN-08009: channel string: starting archived log backup set
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08010: channel string: specifying datafile(s) in backup set
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08011: including current control file in backup set
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08012: including control file copy in backup set
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08013: channel string: backup piece string
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08014: channel string: specifying archived log(s) in backup set
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08015: datafile string switched to datafile copy
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08016: channel string: starting datafile backup set restore
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08017: channel string: starting archived log restore to default destination
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08018: channel string: starting archived log restore to user-specified destination
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08019: channel string: restoring datafile string
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08020: including standby control file in backup set
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08021: channel string: restoring control file
   Cause: This is an informational message only.
Action: No action is required.

RMAN-08022: channel string: restoring archived log
Cause: This is an informational message only.
Action: No action is required.

RMAN-08023: channel string: restored backup piece string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08025: channel string: copied control file copy
Cause: This is an informational message only.
Action: No action is required.

RMAN-08026: channel string: copied archived log
Cause: This is an informational message only.
Action: No action is required.

RMAN-08027: channel string: copied current control file
Cause: This is an informational message only.
Action: No action is required.

RMAN-08028: channel string: copy current control file failed
Cause: This is an informational message only.
Action: No action is required.

RMAN-08029: snapshot control file name set to default value: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08030: allocated channel: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08031: released channel: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08032: channel string: RECID string STAMP string does not match recovery catalog
Cause: The record that identifies the source file for a copy or backup database does not contain the same data as is stored in the recovery catalog.
Action: Perform a full resync and retry the operation. If the problem persists, then contact Oracle.

RMAN-08033: channel string: including datafile copy of datafile string in backup set
Cause: This is an informational message only.
Action: No action is required.

RMAN-08034: full resync skipped, target database not mounted
Cause: This is an informational message only.
Action: No action is required.

RMAN-08035: partial resync skipped, target database not mounted
Cause: This is an informational message only.
Action: No action is required.

RMAN-08036: channel string: could not create control file record for string string
Cause: The record identifying the named file was no longer present in the target database control file, and repeated attempts to inspect the file were unsuccessful in creating the record. This could be because the circular-reuse section of the control file which holds information about the specified type of file is too small and there is other database activity which is causing the record to be overwritten before it can be used.
Action: Try increasing either the size of the control file circular-reuse section for this file type (datafile copy or archived log, as indicated in the error message, or the CONTROL_FILE_RECORD_KEEP_TIME initialization parameter. If neither of those remedies works then contact Oracle.

RMAN-08037: channel string: unexpected validation return code string
Cause: This is an internal error that should never be issued.
Action: Contact Oracle Support.

RMAN-08038: channel string: starting piece string at string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08039: channel string: starting incremental datafile backup set restore
Cause: This is an informational message only.
Action: No action is required.

RMAN-08040: full resync skipped, control file is not current or backup
Cause: This is an informational message only.
Action: No action is required.

RMAN-08041: partial resync skipped, control file is not current or backup
Cause: This is an informational message only.
Action: No action is required.

RMAN-08042: channel string: copied standby control file
Cause: This is an informational message only.
Action: No action is required.

RMAN-08043: channel string: copy standby control file failed
Cause: This is an informational message only.
Action: No action is required.

RMAN-08044: channel string: finished piece string at string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08045: channel string: finished piece string at string with string copies
Cause: This is an informational message only.
Action: No action is required.

RMAN-08046: channel string: starting compressed full datafile backup set
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08047: channel string: starting compressed incremental level string datafile backup set
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08048: channel string: starting incremental level string datafile backup set
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08049: channel string: starting compressed archived log backup set
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08050: cataloged datafile copy
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08051: cataloged archived log
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08052: cataloged control file copy
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08053: channel string: finished piece string at string with string copies and tag string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08054: starting media recovery
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08056: skipping datafile string because it has not changed
  Cause: The specified datafile has not had its checkpoint advanced since the previous backup, therefore it does not need a new incremental backup.
  Action: This is an informational message only.

RMAN-08057: channel string: backup cancelled because all files were skipped
  Cause: All datafiles for this backup were skipped, therefore no backup is created.
  Action: This is an informational message only.

RMAN-08058: replicating control file
  Cause: This is an informational message only.
Action: No action is required.

RMAN-08059: media recovery failed
Cause: This is an informational message only.
Action: No action is required.

RMAN-08060: unable to find archived log
Cause: This is an informational message only.
Action: No action is required.

RMAN-08061: WARNING: change failure ID string failed due to error ORA-string
Cause: CHANGE FAILURE for the indicated failure ID encountered an error.
Action: See the indicated ORA error message for the cause of the error.

RMAN-08062: WARNING: cannot change priority of a critical failure string
Cause: An attempt was made to change priority of a failure with CRITICAL priority.
Action: No action is required.

RMAN-08066: database reset to incarnation string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08070: deleted datafile copy
Cause: This is an informational message only.
Action: No action is required.

RMAN-08071: channel string: deleting archived log(s)
Cause: This is an informational message only.
Action: No action is required.

RMAN-08072: deleted control file copy
Cause: This is an informational message only.
Action: No action is required.

RMAN-08073: deleted backup piece
Cause: This is an informational message only.
Action: No action is required.

RMAN-08074: crosschecked backup piece: found to be 'string'
Cause: This is an informational message only.
Action: No action is required.

RMAN-08085: created script string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08086: replaced script string
Cause: This is an informational message only.
Action: No action is required.
RMAN-08087: channel string: started backup set validation
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08088: applied offline range to datafile string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08089: channel string: specifying datafile(s) to restore from backup set
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08090: channel string: starting proxy restore
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08091: channel string: specifying datafile(s) for proxy backup
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08092: channel string: specifying datafile copy of datafile string for proxy backup
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08093: specifying current control file for proxy backup
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08094: channel string: specifying datafile(s) for proxy restore
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08096: channel string: starting validation of datafile backup set
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08097: channel string: starting validation of archived log backup set
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08099: specifying standby control file for proxy backup
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08100: channel string: starting proxy validation
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08101: channel string: proxy validation complete
  Cause: This is an informational message only.
Action: No action is required.

RMAN-08102: channel string: located backup piece: string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08103: channel string: could not locate backup piece: string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08104: channel string: input backup set: count=string, stamp=string, piece=string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08105: channel string: backup cancelled because no pieces were found
  Cause: All backup sets specified has no pieces. Therefore, no backup set is created.
  Action: This is an informational message only.

RMAN-08106: channel string: restoring block(s)
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08107: skipping inaccessible backup set count=string STAMP=string
  Cause: The indicated backup set will not be backed up because one or more pieces of the backup set could not be read, and the SKIP INACCESSIBLE option was specified.
  Action: No action is required.

RMAN-08108: channel string: specifying block(s) to restore from backup set
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08109: channel string: restored block(s) from backup piece string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08110: failover to next copy of backup piece
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08111: some blocks not recovered: See trace file for details
  Cause: Some blocks not recovered due to errors.
  Action: See trace file for details of the problem.

RMAN-08112: archived log failover was done on string, check alert log for more info
  Cause: This is an informational message to indicate the server found a corrupted block in an archived log and had to switch to another copy of the same archived log in an alternate archived log destination to get corresponding un-corrupted block.
**Action:** If backup is done with delete input option, nothing needs to be done. Otherwise delete the archived log that has corrupted block(s) as recovery on applying this log would fail. Alert log contains name of the log that has corrupted block(s).

**RMAN-08113:** including current SPFILE in backup set  
**Cause:** This is an informational message only.  
**Action:** No action is required.

**RMAN-08114:** channel *string:* restoring SPFILE to PFILE  
**Cause:** This is an informational message only.  
**Action:** No action is required.

**RMAN-08115:** channel *string:* restoring SPFILE  
**Cause:** This is an informational message only.  
**Action:** No action is required.

**RMAN-08116:** output file name is original SPFILE location  
**Cause:** This is an informational message only.  
**Action:** No action is required.

**RMAN-08117:** channel *string:* the AUTOBACKUP does not contain an SPFILE  
**Cause:** The requested AUTOBACKUP does not contain a SPFILE. This is because the instance was not started with a SPFILE when the AUTOBACKUP was created.  
**Action:** No action is required. RMAN will try three older AUTOBACKUPS before signaling ORA-19687.

**RMAN-08118:** WARNING: could not delete the following archived redo log  
**Cause:** The routine deleteArchivedLog() could not delete an archived redo log on the target instance.  
**Action:** Check the accompanying file specification and the associated error messages. The file specification indicates what archived redo log on the target instance RMAN was trying to delete and the error messages indicate why RMAN was unable to delete it. Resolve the problem by first confirming that the archived redo log in question has been backed up, do the deletion manually, and then do a crosscheck so that RMAN is aware of the deletion.

**RMAN-08119:** skipping backup piece handle *string:* already exists  
**Cause:** A BACKUP command does not need to backup control file AUTOBACKUP pieces, because they already exists.  
**Action:** This is an informational message, no action is required.

**RMAN-08120:** WARNING: archived log not deleted, not yet applied by standby  
**Cause:** This is an informational message to alert the user that an archived log that should have been deleted was not as it has not been applied to the standby database. The next message identifies the archived log  
**Action:** Archivelog can be deleted after it has been applied to standby database.

**RMAN-08121:** keep attributes for the backup are deleted  
**Cause:** This is an informational message only.  
**Action:** No action is required.
RMAN-08122: keep attributes for the backup are changed  
  **Cause:** This is an informational message only.  
  **Action:** No action is required.

RMAN-08123: keep attributes for the datafile/control file copy are deleted  
  **Cause:** This is an informational message only.  
  **Action:** No action is required.

RMAN-08124: keep attributes for the datafile/control file copy are changed  
  **Cause:** This is an informational message only.  
  **Action:** No action is required.

RMAN-08125: keep attributes for the proxy copy are deleted  
  **Cause:** This is an informational message only.  
  **Action:** No action is required.

RMAN-08126: keep attributes for the proxy copy are changed  
  **Cause:** This is an informational message only.  
  **Action:** No action is required.

RMAN-08127: cataloged backup piece  
  **Cause:** This is an informational message only.  
  **Action:** No action is required.

RMAN-08128: uncataloged backup piece  
  **Cause:** This is an informational message only.  
  **Action:** No action is required.

RMAN-08129: failover to piece handle=string tag=string  
  **Cause:** This is an informational message to indicate the server found a corrupted block in a piece and had to switch to another copy of piece to get corresponding un-corrupted block.  
  **Action:** See alert log for information on corruption block(s) and the name of the piece that has the corrupted block(s).

RMAN-08130: failover to copy on device type string  
  **Cause:** This is an informational message to indicate the RMAN could not successfully restore the database using the specified backups. An attempt was made to restore the datafiles/archived logs/ control file/SPFILE using the same backup set on a different device type.  
  **Action:** See accompanying additional error messages indicating the cause of the failover.

RMAN-08131: channel string: specifying datafile copies to recover  
  **Cause:** This is an informational message only.  
  **Action:** No action is required.

RMAN-08132: WARNING: cannot update recovery area reclaimable file list  
  **Cause:** This error should be accompanied by other errors giving the cause of failure to update reclaimable file list.  
  **Action:** Check the accompanying error.
RMAN-08133: channel string: the AUTOBACKUP does not contain a standby control file.

Cause: The requested AUTOBACKUP did not contain a standby control file.

Action: No action is required, RMAN will try three older AUTOBACKUPS before signaling ORA-19687.

RMAN-08135: some corrupt blocks found during conversion of file string

Cause: While converting the specified file from one platform to another, some corrupt blocks were discovered in the specified file. Details about the corruption have been written to a server trace file.

Action: If these corrupt blocks are unexpected, you may be able to use Block Media Recovery at the source database to fix the problem, then re-convert the files.

RMAN-08136: channel string: deleting incremental backup(s)

Cause: This is an informational message only.

Action: No Action Required.

RMAN-08137: WARNING: archived log not deleted, needed for standby or upstream capture process

Cause: An archived log that should have been deleted was not as it was required by upstream capture process or Data Guard. The next message identifies the archived log.

Action: This is an informational message. The archived log can be deleted after it is no longer needed. See the documentation for Data Guard to alter the set of active Data Guard destinations. See the documentation for Streams to alter the set of active streams.

RMAN-08138: WARNING: archived log not deleted - must create more backups

Cause: An archived log that should have been deleted was not as it did not meet the user specified archive log deletion policy of number of backups required before deleting the logs.

Action: This is an informational message. The archived log can be deleted after more backups are created to satisfy archivelog deletion policy.

RMAN-08139: WARNING: archived redo log not deleted, needed for guaranteed restore point

Cause: An archived log that should have been deleted was not because it is required for guaranteed restore point.

Action: This is an informational message. The archived redo log can be deleted after backups are created or after deleting the guaranteed restore point that requires the log.

RMAN-08140: channel string: starting validation of datafile

Cause: This is an informational message only.

Action: No action is required.

RMAN-08141: channel string: specifying datafile(s) for validation

Cause: This is an informational message only.

Action: No action is required.

RMAN-08142: including standby control file for validation

Cause: This is an informational message only.
Action: No action is required.

RMAN-08143: including current control file for validation
Cause: This is an informational message only.
Action: No action is required.

RMAN-08144: channel string: validation complete, elapsed time: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08145: channel string: starting validation of archived log
Cause: This is an informational message only.
Action: No action is required.

RMAN-08146: channel string: specifying archived log(s) for validation
Cause: This is an informational message only.
Action: No action is required.

RMAN-08150: created global script string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08151: replaced global script string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08152: global script string written to file string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08153: deleted global script: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08154: deleted script: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08155: printing stored global script: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08156: printing stored script: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08157: script string written to file string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08158: executing script: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08159: executing global script: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08160: script commands will be loaded from file string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08161: contents of Memory Script:
Cause: This is an informational message only.
Action: No action is required.

RMAN-08162: executing Memory Script
Cause: This is an informational message only.
Action: No action is required.

RMAN-08163: validation succeeded for backup piece
Cause: The VALIDATE HEADER option determined that the backup piece still
matches its data.
Action: None - this is an informational message.

RMAN-08164: validation succeeded for proxy copy
Cause: The VALIDATE HEADER option determined that the proxy copy still
matches its data.
Action: None - this is an informational message.

RMAN-08165: could not locate proxy copy string
Cause: The specified proxy copy could not be found on proxy channel.
Action: If the proxy copy has been deleted, use the CROSSCHECK BACKUP
command to correct the recovery catalog or target database control file entries.

RMAN-08166: validation succeeded for datafile copy and control file copy
Cause: The VALIDATE HEADER option discovered that the datafile copy and
control file copy still matches its data in the recovery catalog or target database
control file.
Action: None - this is an informational message.

RMAN-08180: channel string: restore complete, elapsed time: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08181: media recovery complete, elapsed time: string
Cause: This is an informational message only.
Action: No action is required.

RMAN-08182: channel string: validation complete, elapsed time: string
Cause: This is an informational message only.
Action: No action is required.
RMAN-08183: channel string: block restore complete, elapsed time: string
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08184: added tempfile string to tablespace string in control file
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08185: renamed tempfile string to string in control file
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08186: tempfile string size altered in control file
  Cause: One of tempfile size attributes AUTOEXTEND, MAXSIZE, NEXTSIZE was altered. This is an informational message only.
  Action: No action is required.

RMAN-08187: WARNING: media recovery until SCN string complete
  Cause: Media recovery was completed until the indicated system change number (SCN) because the database was in NOARCHIVELOG mode.
  Action: This is an informational message only. No action is required.

RMAN-08190: validate found one or more corrupt blocks
  Cause: Backup validate found that one or more blocks were corrupt in the specified datafiles. This message should be followed by 8191 message.
  Action: Repair them at your earliest convenience.

RMAN-08191: See trace file string for details
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08300: Run SQL script string on the target platform to create database
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08301: Edit init.ora file string. This PFILE will be used to create the database on the target platform
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08302: Run RMAN script string on target platform to convert datafiles
  Cause: This is an informational message only.
  Action: No action is required.

RMAN-08303: To recompile all PL/SQL modules, run utlrp.sql and utlrp.sql on the target platform
  Cause: This is an informational message only.
  Action: Transport script invokes utlrp.sql and utlrp.sql.

RMAN-08304: To change the internal database identifier, use DBNEWID Utility
  Cause: This is an informational message only.
Action: Transport script does not invoke DBNEWID Utility automatically.

RMAN-08305: channel string: starting to check datafiles
   Cause: This is an informational message only.
   Action: No action is required.

Cause: This is an informational message only.
Action: No action is required.
RMAN-08610: channel string: restoring datafile string to string
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08611: channel string: piece handle=string tag=string
   Cause: This is an informational message only.
   Action: No action is required.

RMAN-08612: channel string: failover to duplicate backup on device string
   Cause: This is an informational message to indicate the RMAN could not successfully restore the files using the specified backups. An attempt was made to restore the datafiles/archived logs/control file/SPFILE using a previous existing backup.
   Action: See accompanying additional error messages indicating the cause of the failover.

RMAN-08613: channel string: failover to piece handle=string tag=string
   Cause: This is an informational message to indicate the server found a corrupted block in a backup piece and had to switch to another copy of the piece to get the same block.
   Action: See alert log for information on corruption block(s) and the name of the backup piece that has the corrupted block(s).

RMAN-08614: channel string: errors found reading piece handle=string
   Cause: This is an informational message to indicate the server found a corrupted block in a backup piece. Accompanying error will describe the action taken.
   Action: See alert log for more information.

RMAN-08615: channel string
   Cause: This is an informational message to indicate the server could not perform the restore due to the included errors. A least recent backup set will be used to perform the restore.
   Action: See alert log for information on corruption block(s) and the name of the backup piece that has the corrupted block(s).

RMAN-08616: validating blocks string through string
   Cause: This is an informational message only
   Action: No action is required.

RMAN-08617: validation failed for foreign archived log
   Cause: The CROSSCHECK FOREIGN ARCHIVELOG command determined that the foreign archived log could not be found or no longer contained the same data, so its record was marked expired.
   Action: None - this is an informational message.

RMAN-08618: validation succeeded for foreign archived log
   Cause: The CROSSCHECK FOREIGN ARCHIVELOG command determined that the foreign archived log still matches its data.
   Action: None - this is an informational message.

RMAN-08619: foreign archived log file name=string RECID=string STAMP=string
   Cause: This is an informational message only.
Action: No action is required.

RMAN-08620: uncataloged foreign archived log
Cause: This is an informational message only.
Action: No action is required.

RMAN-08621: deleted foreign archived log
Cause: This is an informational message only.
Action: No action is required.

RMAN-10000: error parsing target database connect string "string"
Cause: An invalid target connect string was supplied.
Action: Specify a valid connect string and re-run the job.

RMAN-10001: error parsing recovery catalog connect string "string"
Cause: An invalid recovery catalog connect string was supplied.
Action: Specify a valid connect string and re-run the job.

RMAN-10002: ORACLE error: string
Cause: The specified Oracle error was received. This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.

RMAN-10003: unable to connect to target database
Cause: Recovery manager was unable to connect to the target database. This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Ensure that that the target database is started, and that the connect string is valid.

RMAN-10004: unable to connect to recovery catalog
Cause: Recovery manager was unable to connect to the recovery catalog
Action: Ensure that that the recovery catalog is started, and that the connect string is valid. This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-10005: error opening cursor
Cause: An error was received while trying to open a cursor. This message should be accompanied by other error message(s) indicating the cause of the error.
Action: If the associated Oracle error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10006: error running SQL statement: string
Cause: An error message was received while running the SQL statement shown.
Action: If the associated Oracle error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10007: error closing cursor
Cause: An error was received while trying to close a cursor. This message should be accompanied by other error message(s) indicating the cause of the error.
Action: If the associated Oracle error message indicates a condition that can be corrected, do so, otherwise contact Oracle.
RMAN-10008: could not create channel context
Cause: An error was received while trying create a channel context. This message should be accompanied by other error message(s) indicating the cause of the error.
Action: If the associated Oracle error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10009: error logging off of Oracle
Cause: An error was received while disconnecting from Oracle. This message should be accompanied by other error message(s) indicating the cause of the error.
Action: This is an informational message only.

RMAN-10010: error while checking for RPC completion
Cause: Recovery Manager’s channel context had an error while checking to see if a remote procedure call had completed. This message should be accompanied by other error message(s) indicating the cause of the error.
Action: If other error messages indicate a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10011: synchronization error while polling for rpc number, action=string
Cause: Recovery Manager could not synchronize properly with a remote procedure call.
Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10012: KGU error: string
Cause: An error occurred while initializing the KGU subsystem
Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10013: error initializing PL/SQL
Cause: An error occurred while initializing the PL/SQL subsystem.
Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10014: PL/SQL error number on line number column number: string
Cause: PL/SQL error
Action: The text of this message will be issued by the PL/SQL subsystem. See the PL/SQL error message manual.

RMAN-10015: error compiling PL/SQL program
Cause: An error occurred while compiling a PL/SQL program.
Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10018: error cleaning up channel context
Cause: An error was received during inter-step cleanup of a channel context.
Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10020: error initializing Recovery Manager execution layer
**Cause:** An error was received while initializing the Recovery Manager execution layer in preparation for running a job. This message should be accompanied by other error message(s) indicating the cause of the error.

**Action:** If other error messages indicate a condition that can be corrected, do so, otherwise contact Oracle.

**RMAN-10022: error in system-dependent sleep routine**

**Cause:** An error was received while waiting for a remote RPC to complete. The error occurred in the system-dependent sleep routine.

**Action:** This is an internal error that should not be issued. Contact Oracle Support.

**RMAN-10023: RPC attempted to unrecognized package**

**Cause:** The Recovery Manager internal RPC router received a package name that it could not understand.

**Action:** This is an internal error that should not be issued. Contact Oracle Support.

**RMAN-10024: error setting up for rpc polling**

**Cause:** The Recovery Manager could not create the RPC polling context which is required to test for RPC completion. This message should be accompanied by other error message(s) indicating the cause of the error.

**Action:** If other error messages indicate a condition that can be corrected, do so, otherwise contact Oracle.

**RMAN-10025: connection is already registered for events**

**Cause:** The Recovery Manager could not enable the target database connection to test for RPC completion.

**Action:** This is an internal error that should not be issued. Contact Oracle Support.

**RMAN-10026: network error number-number occurred registering connection**

**Cause:** An network error occurred while attempting to register the target database connection to test for RPC completion.

**Action:** This is an internal error that should not be issued. The message numbers are issued by the Sql*Net layer. Contact Oracle Support.

**RMAN-10027: could not locate network layer context**

**Cause:** Recovery Manager could not locate a necessary context area while attempting to register the target database connection to test for RPC completion.

**Action:** This is an internal error that should not be issued. Contact Oracle Support.

**RMAN-10028: network error number-number occurred during remote RPC**

**Cause:** An network error occurred while waiting for a remote RPC to complete.

**Action:** This is an internal error that should not be issued. The message numbers are issued by the Sql*Net layer. Contact Oracle Support.

**RMAN-10029: unexpected return code number from PL/SQL execution**

**Cause:** PL/SQL returned an unexpected return code while executing one channel program.
Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10030: RPC call appears to have failed to start on channel string
Cause: An RPC to a target database instance was issued, but was not observed to start within 5 timeouts.
Action: This error is probably accompanied by other error messages giving the precise cause of the failure.

RMAN-10031: RPC Error: ORA-number occurred during call to string.string
Cause: An RPC to the target database or recovery catalog database encountered an error.
Action: This error is accompanied with the error message from the server where the error occurred.

RMAN-10032: unhandled exception during execution of job step number: string
Cause: An unhandled PL/SQL exception occurred during a job step.
Action: This error is accompanied by the error messages describing the exception.

RMAN-10033: error during compilation of job step number: string
Cause: PL/SQL detected a problem during the compilation of a job step
Action: This error message is accompanied by the error messages describing

RMAN-10034: unhandled exception during execution of job step number, error unknown
Cause: PL/SQL detected an unhandled exception during execution of a job step, but no further information available
Action: None

RMAN-10035: exception raised in RPC: string
Cause: A call to a remote package resulted in an exception.
Action: The exception should indicate what went wrong.

RMAN-10036: RPC call OK on channel string
Cause: This is just an informational message. It should be preceded by message 10030.
Action: No action is required.

RMAN-10037: RPC anomaly detected on channel string, UPINBLT=number
Cause: This is an debugging message and can be ignored.
Action: No action is required.

RMAN-10038: database session for channel string terminated unexpectedly
Cause: The database connection for the specified channel no longer exists. Either the session was terminated by some external means or the channel terminated because of an internal error.
Action: Check for an oracle trace file for detailed information on why the session terminated.

RMAN-10039: error encountered while polling for RPC completion on channel string
Cause: This error should be accompanied by other errors giving the cause of the polling error.
Action: Check the accompanying errors.

**RMAN-10040: asynchronous support not detected, RMAN will run synchronously**

*Cause:* The database connection does not support asynchronous operation, so RMAN will not multi-task work among multiple channels. Multiple channels can still be allocated, but they will not run work concurrently.

*Action:* Use a connection type that supports asynchronous operations.

**RMAN-10041: Could not re-create polling channel context following failure.**

*Cause:* The RPC polling context, which is required to test for RPC completion, failed and Recovery Manager could not re-create this channel. This message should be accompanied by other error messages indicating the cause of the error.

*Action:* If other error messages indicate a condition that can be corrected, do so, otherwise contact Oracle.

**RMAN-11000: message number number not found in recovery manager message file**

*Cause:* Recovery manager message file is out of date.

*Action:* Make sure that the recovery manager error message file is current and installed in the correct location.

**RMAN-11001: Oracle Error: string**

*Cause:* This is an informational message only.

*Action:* No action is required.

**RMAN-11002: could not open a cursor to the target database**

*Cause:* This is an informational message only.

*Action:* No action is required.

**RMAN-11003: failure during parse/execution of SQL statement: string**

*Cause:* This is an informational message only.

*Action:* No action is required.

**RMAN-11004: format requires %c when duplexing**

*Cause:* SET_DUPLEX=ON was specified, but %c was not part of the format.

*Action:* Include %c in format, or use %U.

**RMAN-11005: conflicting media information for piece "string"**

*Cause:* While restoring the specified backup piece, RMAN received conflicting information about the physical location of the piece from the Media Management software. This can cause poor restore performance.

*Action:* If RMAN does not parallelize the restore from all of the available channels, then you should contact the Media Management vendor.

**RMAN-11006: WARNING: test recovery results: string**

*Cause:* User called recover database with the test option

*Action:* None required

**RMAN-12000: execution layer initialization failed**

*Cause:* This message should be accompanied by other error message(s) indicating the cause of the error.
**Action:** Check the accompanying errors.

**RMAN-12001: could not open channel string**

**Cause:** An ALLOCATE CHANNEL command could not be processed.

**Action:** This message should be accompanied by other error message(s) indicating the cause of the error.

**RMAN-12005: error during channel cleanup**

**Cause:** This message should be accompanied by other error message(s) indicating the cause of the error.

**Action:** Check the accompanying errors.

**RMAN-12007: cannot allocate more than number channels**

**Cause:** The maximum number of RMAN channels has been exceeded. Note that one channel is reserved for RMAN.

**Action:** Allocate fewer channels. Contact Oracle if you have a need for more channels in a single job.

**RMAN-12008: could not locate backup piece string**

**Cause:** There was at least 1 backup set that could not be accessed by any of the allocated channels.

**Action:** Allocate additional channels on other nodes of the cluster

**RMAN-12009: command aborted because some backup pieces could not be located**

**Cause:** Same as 7008.

**Action:** Refer to 7008.

**RMAN-12010: automatic channel allocation initialization failed**

**Cause:** This message should be accompanied by other error message(s) indicating the cause of the error.

**Action:** Check the accompanying errors.

**RMAN-12011: multiple records for default device type found in repository**

**Cause:** Configuration for default device type was not consistent.

**Action:** Re-run CONFIGURE DEFAULT DEVICE TYPE command to set device type.

**RMAN-12012: multiple records for string parallelism found in repository**

**Cause:** Configuration for device parallelism was not consistent.

**Action:** Re-run CONFIGURE PARALLELISM command for device to set parallelism.

**RMAN-12013: multiple records for string channel number found in repository**

**Cause:** Configuration for the channel was not consistent.

**Action:** Re-run CONFIGURE CHANNEL command to configure this channel.

**RMAN-12014: multiple records for default channel configuration for string found in repository**

**Cause:** Configuration for the channel was not consistent.

**Action:** Re-run CONFIGURE CHANNEL command to configure the channel.

**RMAN-12015: configuration for string channel number is ignored**
**Oracle Database Error Messages**

**Cause:** This is an informational message only. Parallelism for the device is less than associated channel number.

**Action:** To use this configuration increase parallelism for this device. To clear this configuration use `CONFIGURE CHANNEL... CLEAR` command.

**RMAN-12016: using channel string**

**Cause:** This is an informational message only.

**Action:** No action is required.

**RMAN-12017: could not locate pieces of backup set key string**

**Cause:** Copies of the specified backup set key could not be accessed on any of the allocated channels.

**Action:** Allocate additional channels on other nodes of the cluster or, if the backup pieces has been deleted, use the `CROSSCHECK BACKUP` command to correct the recovery catalog or target database control file entries.

**RMAN-12018: channel string disabled, job failed on it will be run on another channel**

**Cause:** This is an informational message displayed whenever a retryable error occurs for the job and there are channels available to run this step.

**Action:** No action is required.

**RMAN-12019: continuing other job steps, job failed will not be re-run**

**Cause:** This is an informational message displayed whenever there is a non-retryable error occurred for the job.

**Action:** No action is required.

**RMAN-12020: error on step filtered for normal output string**

**Cause:** This message is added when stacking errors for failed jobs after channel failover was performed. It will be filtered from normal output.

**Action:** No action is required.

**RMAN-20000: abnormal termination of job step**

**Cause:** A job step encountered an error and could not recover. This error should be followed by other errors indicating the cause of the problem.

**Action:** Check the accompanying error.

**RMAN-20001: target database not found in recovery catalog**

**Cause:** target database is not found in the recovery catalog

**Action:** make sure that the target database is registered in the recovery recovery catalog

**RMAN-20002: target database already registered in recovery catalog**

**Cause:** target database is already registered in the recovery catalog

**Action:** if the target database is really registered, there is no need to register it again. Note that the recovery catalog enforces that all databases have a unique DBID. If the new database was created by copying files from an existing database, it will have the same DBID as the original database and cannot be registered in the same recovery catalog.

**RMAN-20003: target database incarnation not found in recovery catalog**
**Cause:** RESETLOGS CHANGE# and/or time of the target database doesn’t match any database incarnation in the recovery catalog.

**Action:** if target database was opened with RESETLOGS option then use 'reset database' to register the new incarnation.

**RMAN-20004: target database name does not match name in recovery catalog**

**Cause:** name of the target database doesn’t match the one stored in the recovery catalog

**Action:** This is an internal error.

**RMAN-20005: target database name is ambiguous**

**Cause:** two or more databases in the recovery catalog match this name

**Action:** None

**RMAN-20006: target database name is missing**

**Cause:** target database instance is not started or db_name initialization parameter is not set

**Action:** startup the instance and make sure that db_name parameter is set

**RMAN-20009: database incarnation already registered**

**Cause:** this incarnation is already registered in the recovery catalog

**Action:** No action is required.

**RMAN-20010: database incarnation not found**

**Cause:** database incarnation does not match any database incarnation in the recovery catalog

**Action:** specify a valid database incarnation key

**RMAN-20011: target database incarnation is not current in recovery catalog**

**Cause:** the database incarnation that matches the RESETLOGS CHANGE# and time of the mounted target database control file is not the current incarnation of the database

**Action:** If 'reset database to incarnation <key>' was used to make an old incarnation current then restore the target database from a backup that matches the incarnation and mount it. You will need to do 'STARTUP NOMOUNT' before you can restore the control file using RMAN. Otherwise use 'reset database to incarnation <key>' make the intended incarnation current in the recovery catalog.

**RMAN-20012: not authorized to register new database**

**Cause:** You attempted to register a new database with this recovery catalog, but you are using a virtual private catalog, and you have not been granted permission by the catalog administrator to register this database with this recovery catalog

**Action:** Ask the catalog administrator to grant permission for you to register this database.

**RMAN-20013: error upgrading virtual private catalog**

**Cause:** An error occurred while automatically upgrading a virtual private catalog.

**Action:** Ensure that the virtual private catalog userid has all of the required privileges, such as being granted the RECOVERY_CATALOG_OWNER role.

**RMAN-20014: virtual private catalog owner must be granted RECOVERY_CATALOG_OWNER role**
Cause: An attempt was made to establish a virtual private RMAN catalog in a schema that is not granted the RECOVERY_CATALOG_OWNER role.
Action: Grant RECOVERY_CATALOG_OWNER to the virtual private catalog owner.

RMAN-20015: not authorized to share this catalog
Cause: You attempted to share a recovery catalog but were not authorized to do this by the catalog administrator.
Action: Ask the catalog administrator to grant permission for you to share this catalog.

RMAN-20016: virtual private catalog user cannot modify global scripts
Cause: A virtual private catalog user attempted to create, delete, or modify a global script. Virtual private catalog users cannot modify global scripts.
Action: Connect to the catalog owner userid and retry the global script operation.

RMAN-20017: illegal script update operation
Cause: An illegal script operation was performed.
Action: None

RMAN-20018: database not found in recovery catalog
Cause: An attempt was made to grant or revoke catalog access to a database whose name was not registered in the recovery catalog.
Action: Correct the database name and re-issue the GRANT or REVOKE command. If this is an attempt to grant or revoke access to a database that is not yet registered, then re-issue the command using the database ID of the desired database.

RMAN-20019: database name not unique in recovery catalog
Cause: An attempt was made to grant or revoke catalog access to a database whose name is not unique in the recovery catalog.
Action: Re-issue the command specifying the database ID of the desired database.

RMAN-20029: cannot make a snapshot control file
Cause: another operation that needs the snapshot control file is in progress
Action: try again later if necessary

RMAN-20030: resync in progress
Cause: this procedure cannot be called while a resync is in progress
Action: This is an internal error.

RMAN-20031: resync not started
Cause: this procedure can only be called in a resync
Action: This is an internal error.

RMAN-20032: checkpoint CHANGE# too low
Cause: the checkpoint change# is less than the one of the previous resync or the checkpoint change# is null
Action: make sure that the right control file is used

RMAN-20033: control file SEQUENCE# too low
Cause: the control file sequence is less than the one of the previous resync
Action: make sure that the right control file is used

RMAN-20034: resync not needed
Cause: the control file has not changed since the previous resync
Action: nothing since the recovery catalog is in sync

RMAN-20038: must specify FORMAT for CONVERT command
Cause: No FORMAT was specified when using CONVERT command.
Action: Resubmit the command using FORMAT clause.

RMAN-20039: format requires character when duplexing
Cause: SET_DUPLEX=ON was specified, but %c was not part of the format.
Action: Include %c in format, or use %U.

RMAN-20045: must specify FORMAT for BACKUP INCREMENTAL FROM SCN command
Cause: No FORMAT was specified when using BACKUP INCREMENTAL FROM SCN command.
Action: Resubmit the command using FORMAT clause.

RMAN-20079: full resync from primary database is not done
Cause: Resync from standby detected that a full resync from primary database is required. One of the following events on primary database may have caused this error: 1) one or more tablespaces or datafiles were added 2) one or more tablespaces or datafiles were dropped 3) one or more datafiles status changed
Action: Perform full resync after connecting to primary database.

RMAN-20081: change stamp for the record
Cause: A record with same recid and stamp is already known to catalog.
Action: None. This error is automatically handled by RMAN client by changing the stamp in control file during resync.

RMAN-20108: control file for remote database cannot be updated
Cause: RESYNC CATALOG FROM DB_UNIQUE_NAME command was attempted, but the control file at the database with DB_UNIQUE_NAME needs to be resynced directly instead of through the current target.
Action: Directly connect as target to the remote database with the specified DB_UNIQUE_NAME and resync.

RMAN-20109: remote database has different database ID
Cause: Command RESYNC CATALOG FROM DB_UNIQUE_NAME was executed and the database ID of the remote database was different than the connected target database.
Action: The remote database should have the same database ID as the database connected as the target database. Fix the connect identifier for the remote database and retry the command.

RMAN-20201: datafile not found in the recovery catalog
Cause: The specified datafile is not found in the recovery catalog
Action: make sure that the datafile name is correct and that the recovery catalog is up-to-date
RMAN-20202: Tablespace not found in the recovery catalog  
  Cause: the specified tablespace is not found in the recovery catalog  
  Action: make sure that the tablespace name is correct and that the recovery catalog is up-to-date  

RMAN-20203: translation in progress  
  Cause: this procedure can not be called when name translation is in progress  
  Action: This is an internal error.  

RMAN-20204: translation not started  
  Cause: GETDATAFILE procedure was called before TRANSLATETABLESPACE  
  Action: This is an internal error.  

RMAN-20205: incomplete UNTIL clause  
  Cause: The sequence# was NULL  
  Action: This is an internal error.  

RMAN-20206: log sequence not found in the repository  
  Cause: The specified log sequence does not exists in log history of the current database incarnation  
  Action: check the thread# and sequence#  

RMAN-20207: UNTIL TIME or RECOVERY WINDOW is before RESETLOGS time  
  Cause: UNTIL TIME and RECOVERY WINDOW cannot be less than the database creation time or RESETLOGS time.  
  Action: Check the UNTIL TIME or RECOVERY WINDOW. If the database needs to be restored to an old incarnation, use the RESET DATABASE TO INCARNATION command.  

RMAN-20208: UNTIL CHANGE is before RESETLOGS change  
  Cause: UNTIL CHANGE cannot be less than the database RESETLOGS change.  
  Action: Check the UNTIL CHANGE. If the database needs to be restored to an old incarnation, use the RESET DATABASE TO INCARNATION command.  

RMAN-20209: duplicate datafile name  
  Cause: Two datafiles have the same name  
  Action: This is an internal error.  

RMAN-20211: FROM TIME is before RESETLOGS time  
  Cause: FROM TIME cannot be less than the database creation time or RESETLOGS time.  
  Action: Check the FROM TIME. If the database needs to be restored to an old incarnation, use the RESET DATABASE TO INCARNATION command.  

RMAN-20212: UNTIL CHANGE is an orphan incarnation  
  Cause: Specified UNTIL CHANGE was an orphan incarnation.  
  Action: Check the UNTIL CHANGE or UNTIL RESTORE POINT. If the database needs to be restored or flashed back to an orphan incarnation, use the RESET DATABASE TO INCARNATION command.  

RMAN-20215: backup set not found
**Cause:** The specified backup set key was not found in the recovery catalog or target database control file.
**Action:** Specify a different backup set key.

**RMAN-20217: datafile not part of the database**

**Cause:** the datafile does not exists or did not exist at until time/scn
**Action:** check the datafile name or number. This is an internal error. for restore database or tablespace.

**RMAN-20218: datafile not found in repository**

**Cause:** This is an internal error.
**Action:** Contact Oracle Support Services.

**RMAN-20220: control file copy not found in the repository**

**Cause:** The specified control file was not in the recovery catalog or target database control file or it was marked deleted.
**Action:** check the file name

**RMAN-20221: ambiguous control file copy name**

**Cause:** more than one control file copy in the recovery catalog match the specified name.
**Action:** None

**RMAN-20222: datafile name not found in recovery catalog or is ambiguous**

**Cause:** The specified datafile name is not the name of a datafile that is currently part of the target database, or an UNTIL clause has been specified and the file name was for a different datafile at the time specified by the UNTIL clause than it is now.
**Action:** Use a datafile number to specify the datafile you want to RESTORE or RECOVER.

**RMAN-20223: DB_UNIQUE_NAME mismatch in snapshot control file**

**Cause:** The DB_UNIQUE_NAME value in the snapshot control file was incorrect. This error can occur in Oracle RAC when the snapshot control file location is not shared across nodes and virtual IPs are setup in the remote database from where resynchronization is done using RESYNC CATALOG FROM DB_UNIQUE_NAME commnad.
**Action:** To avoid this error, one of the following actions can be taken: 1) Share the control file snapshot location. The snapshot location can be displayed by executing SHOW SNAPSHOT CONTROLFILE NAME at the RMAN prompt. 2) Do not use Virtual IPs in the service name used to define the connect identifiers. The connect identifiers can be displayed using SHOW DB_UNIQUE_NAME command at the RMAN prompt.

**RMAN-20230: datafile copy not found in the repository**

**Cause:** The specified datafile was not in the recovery catalog or target database control file or it was marked deleted.
**Action:** check the datafile copy name or key

**RMAN-20231: ambiguous datafile copy name**

**Cause:** more than one control file copy in the recovery catalog match the specified name.
Action: use the datafile copy key to uniquely specify the datafile copy

RMAN-20240: archived log not found in the repository
Cause: The specified archived log was not found in the recovery catalog or target database control file or it was marked deleted.
Action: check the archived log name or key

RMAN-20241: ambiguous archived log name
Cause: more than one archived log in the recovery catalog match the specified name
Action: use the archived log key to uniquely specify the archived log

RMAN-20242: specification does not match any archived log in the repository
Cause: No archived logs found that match specification in the recovery catalog or target database control file.
Action: check the archived log specifier

RMAN-20243: database db_unique_name is not known to the recovery catalog
Cause: the user specified DB_UNIQUE_NAME not known to the recovery catalog.
Action: change the database DB_UNIQUE_NAME to a known database value. To display list of known db_unique_names execute LIST DB_UNIQUE_NAME OF DATABASE

RMAN-20244: can not change currently connected database db_unique_name
Cause: the user specified currently connected DB_UNIQUE_NAME value to unregister.
Action: use the DB_UNIQUE_NAME other than connected target database's DB_UNIQUE_NAME value.

RMAN-20245: can not specify db_unique_name option in nocatalog mode
Cause: the user specified DB_UNIQUE_NAME in nocatalog mode.
Action: remove the DB_UNIQUE_NAME option from the command.

RMAN-20246: new db_unique_name is already known to the recovery catalog
Cause: the user specified known DB_UNIQUE_NAME value when renaming a DB_UNIQUE_NAME in the recovery catalog.
Action: change the database DB_UNIQUE_NAME to an known DB_UNIQUE_NAME value; or unregister the new DB_UNIQUE_NAME before renaming an old DB_UNIQUE_NAME value for a database. To display the list of all DB_UNIQUE_NAME for the databases LIST DB_UNIQUE_NAME OF DATABASE command can be executed.

RMAN-20247: specification does not match any foreign archived log in the repository
Cause: No foreign archived logs found that match specification in the recovery catalog or target database control file.
Action: check the foreign archived log specifier

RMAN-20250: offline range not found in the repository
Cause: The specified offline was not found in the recovery catalog or target database control file.
Action: check that recovery catalog is current

RMAN-20260: backup piece not found in the repository
  Cause: The specified backup piece was not in the recovery catalog or target database control file or it was marked deleted.
  Action: check the backup piece handle or key

RMAN-20261: ambiguous backup piece handle
  Cause: more than one backup piece in the recovery catalog match the specified handle
  Action: use the backup piece key to uniquely specify the backup piece

RMAN-20272: no parent backup found for the incremental backup
  Cause: no available backup or copy that could be used as the parent of the incremental backup was found in the recovery catalog.
  Action: take a level 0 backup or copy of the datafile first

RMAN-20280: too many device types
  Cause: more than 8 device types were allocated
  Action: make sure that the job allocates at most 8 different device types

RMAN-20298: DBMS_RCVCAT package not compatible with the recovery catalog
  Cause: The version of the recovery catalog tables does not work with this version of the DBMS_RCVCAT package.
  Action: Check that the recovery catalog packages and schema are installed correctly. The UPGRADE CATALOG command can be used to upgrade the recovery catalog tables and packages to the most current version.

RMAN-20299: DBMS_RCVMAN package not compatible with the recovery catalog
  Cause: The version of the recovery catalog tables does not work with this version of the DBMS_RCVMAN package.
  Action: Check that the recovery catalog packages and schema are installed correctly. The UPGRADE CATALOG command can be used to upgrade the recovery catalog tables and packages to the most current version.

RMAN-20310: proxy copy not found in the repository
  Cause: The specified proxy copy was not in the recovery catalog or target database control file or it was marked deleted.
  Action: check the proxy copy handle or key

RMAN-20311: ambiguous proxy copy handle
  Cause: more than one proxy copy in the recovery catalog matches the specified handle
  Action: use the proxy copy key to uniquely specify the proxy copy

RMAN-20401: script already exists
  Cause: a CREATE SCRIPT was issued, but a script with the specified name already exists.
  Action: use a different name or use REPLACE SCRIPT.

RMAN-20501: redo logs from parent database incarnation cannot be applied
**Cause:** A RESTORE or RECOVER of a datafile was requested, but recovery of the datafile would require applying redo logs that were generated before the most recent OPEN RESETLOGS.

**Action:** If a full backup or datafile copy from the current database incarnation exists, ensure that it is marked AVAILABLE, and that a channel of the correct device type is allocated. It may also be necessary to remove the FROM BACKUPSET or FROM DATAFILECOPY or FROM TAG operands if these have been specified.

**RMAN-20502: DELETE expired cannot delete objects that exist - run CROSSCHECK**

**Cause:** A DELETE EXPIRED command was run, but the object was actually found to exist. This means the recovery catalog or target database control file is out of sync with reality.

**Action:** Run CROSSCHECK.

**RMAN-20503: DELETE cannot delete expired objects - run CROSSCHECK or DELETE EXPIRED**

**Cause:** A DELETE command was run without EXPIRED option, but the object doesn’t exist. This means the recovery catalog or target database control file is out of sync with reality.

**Action:** Run CROSSCHECK.

**RMAN-20504: corruption list not found in recovery catalog**

**Cause:** corruption list is empty

**Action:** make sure that one or more blocks are marked corrupted in v$copy_corruption and v$backup_corruption and recovery catalog is up-to-date.

**RMAN-20505: create datafile during recovery**

**Cause:** applying of archived log caused a create datafile redo-entry to to terminate recovery.

**Action:** none. This message is never displayed. RMAN automatically detects this case and creates the datafile.

**RMAN-20506: no backup of archived log found**

**Cause:** during the recover process, no backup was found from which the archived logs could be restored.

**Action:** this message should be followed by a list of missing archived logs. Please make the necessary archived log backups available and try again.

**RMAN-20507: some targets are remote - aborting restore**

**Cause:** during the restore process, one or more backup files were unavailable locally for the restore operation.

**Action:** This message should be accompanied with the list of remote backup files. Recall these backups from remote location and retry the RESTORE command.

**RMAN-20508: temporary resource already in use**

**Cause:** Temporary resource that was allocated for IMPORT CATALOG command was already in use.

**Action:** Retry IMPORT CATALOG command.

**RMAN-20509: temporary resource not found**
Cause: Temporary resource that was allocated for IMPORT CATALOG command was not found.
Action: Retry IMPORT CATALOG command.

RMAN-20510: database not found in source recovery catalog database
Cause: Database that was specified in IMPORT CATALOG command was not found in the source recovery catalog database.
Action: Make sure that the database is registered in the source recovery catalog database.

RMAN-20511: database name is ambiguous in source recovery catalog database
Cause: Two or more databases in the source recovery catalog database match this name.
Action: Use DBID option in IMPORT CATALOG command to specify the source database.

RMAN-20512: source database already registered in recovery catalog
Cause: Source database was already registered in the recovery catalog.
Action: If the source database is really registered, there is no need to register it again. Note that the recovery catalog enforces that all databases have a unique DBID. If the new database was created by copying files from an existing database, it will have the same DBID as the original database and cannot be registered in the same recovery catalog.
KFNDG-00200: invalid syntax
  Cause: Invalid syntax for renamedg was specified.
  Action: Try renamedg -help for more information.

KFNDG-00201: invalid arguments
  Cause: Invalid key or value was specified for renamedg.
  Action: Try renamedg -help for more information.

KFNDG-00202: invalid value (string) for parameter phase
  Cause: Incorrect value for parameter PHASE was specified.
  Action: Valid values for parameter PHASE are ONE, TWO, BOTH. Retry with correct values.

KFNDG-00203: disk group name (string) exceeds maximum allowed length number
  Cause: Invalid disk group name was specified.
  Action: Disk group name can be a maximum of 32 characters.

KFNDG-00204: disk group name string has invalid characters
  Cause: Invalid disk group name was specified.
  Action: Disk group name can only contain alphabetic, numeric and the underscore (_) characters.

KFNDG-00205: failed to interpret configuration file name
  Cause: Invalid configuration file name was specified.
  Action: Verify configuration file name and folder permissions and retry renamedg.

KFNDG-00301: new disk group (string) already exists, ignoring renamedg
  Cause: disk group specified in NEWDGNAME already exists.
  Action: None

KFNDG-00302: disk (string:string) does not contain a valid header
  Cause: Device header could not be located or corrupt.
  Action: Verify if the device mentioned is an ASM disk device.

KFNDG-00303: failed to update disk group name for string
  Cause: Insufficient privileges or write error in disk.
Action: Verify disk permissions and retry renamedg. Also, see log for additional information.

KFNDG-00304: unable to access heartbeat block of the device `<string>`
Cause: Heartbeat block of the disk was corrupt.
Action: Verify disk header with ASM utilities, retry renamedg.

KFNDG-00305: failed to create configuration file
Cause: Insufficient privileges or invalid path.
Action: Verify folder permissions and retry the command.

KFNDG-00306: unable to write to configuration file
Cause: Insufficient privileges.
Action: Check file permissions and retry renamedg.

KFNDG-00307: unable to read configuration file
Cause: Insufficient privileges or disk read error.
Action: Check file permissions and retry renamedg.

KFNDG-00308: failed to process configuration file entry: `<string>`
Cause: Configuration file was corrupt.
Action: Check file information and retry renamedg.

KFNDG-00401: allocation unit size conflict (`number`, `number`)
Cause: Allocation unit size of disk group and the disk did not match.
Action: Verify that the device is not corrupt and retry renamedg.

KFNDG-00402: ASM metadata block size conflict (`number`, `number`)
Cause: Metadata block size of the disk group and disk did not match.
Action: Verify if the device is not corrupt and retry renamedg.

KFNDG-00403: not all disks of disk group `<string>` were discovered
Cause: Offline disks were present in the specified disk group.
Action: Refer to Oracle Database Storage Administrator’s Guide for more details.

KFNDG-00404: disk group `<string>` contains offline disks, ignoring renamedg
Cause: Disk group with offline disks could not be renamed.
Action: Refer to Oracle Database Storage Administrator’s Guide for more details.

KFNDG-00405: specified disk group `<string>` appears to be mounted
Cause: Disk group was mounted.
Action: Unmount the disk group and retry renamedg.

KFNDG-00406: disk group `<string>` is in use by CSS
Cause: Cluster Synchronization Service(CSS) was using the disk group to be renamed.
Action: Refer to crsctl command to relocate voting disks from disk group.

KFNDG-00407: Could not find disks for disk group `<string>`
Cause: No disks were discovered for disk group.
Action: Try renamedg with a different discovery string.
KFNDG-00408: disk *(string)* could not be discovered
  **Cause:** Disk was either deleted or moved.
  **Action:** None

KFNDG-00409: disk *(string)* doesn't belong to disk group *(string)*
  **Cause:** Disk is not part of the specified disk group.
  **Action:** None

KFNDG-00410: failed to discover devices in folder *string*
  **Cause:** Insufficient privileges or invalid discovery string.
  **Action:** See log for additional details.

KFNDG-00600: internal error *string*
  **Cause:** An internal error occurred while executing renamedg.
  **Action:** Contact Oracle Support Services.

KFNDG-00601: fatal error *string*
  **Cause:** A fatal error occurred while executing renamedg.
  **Action:** Contact Oracle Support Services.

KFNDG-00603: failed to initialize device discovery
  **Cause:** Error occurred while communicating with generic services layer.
  **Action:** Contact Oracle Support Services.

KFNDG-00700: system dependent error *(number, string, string, string)* occurred
  **Cause:** Internal system error occurred.
  **Action:** Contact Oracle Support Services.

KFNDG-00701: Error *number* while performing I/O
  **Cause:** I/O failure.
  **Action:** Contact Oracle Support Services.
LRM-00100: internal error [number]
  Cause: An internal error has occurred.
  Action: Contact Oracle Support Services and report the error.

LRM-00101: unknown parameter name 'string'
  Cause: The parameter name was misspelled.
  Action: Spell the parameter name correctly.

LRM-00102: 'string' is not in the legal range for 'string'
  Cause: The value of the parameter is not within the legal range.
  Action: Refer to the manual for the allowable values for this parameter.

LRM-00103: 'string' contains an illegal integer radix for 'string'
  Cause: An illegal integer radix specification was found.
  Action: Only 'd', 'h', 'D', and 'H' may be used as radix specifications.

LRM-00104: 'string' is not a legal integer for 'string'
  Cause: The value is not a valid integer.
  Action: Specify only valid integers for this parameter.

LRM-00105: 'string' is not a legal Boolean for 'string'
  Cause: The value is not a valid Boolean.
  Action: Refer to the manual for allowable Boolean values.

LRM-00106: out of memory
  Cause: The operating system has run out of memory.
  Action: Take action to make more memory available to the program.

LRM-00107: parameter name abbreviation 'string' is not unique
  Cause: The given abbreviation was not unique.
  Action: Use a longer abbreviation to make the parameter name unique.

LRM-00108: invalid positional parameter value 'string'
  Cause: An invalid positional parameter value has been entered.
  Action: Remove the invalid positional parameter.

LRM-00109: could not open parameter file 'string'
  Cause: The parameter file does not exist.
Action: Create an appropriate parameter file.

LRM-00110: syntax error at 'string'
    Cause: A syntax error was detected.
    Action: Change the input so that the correct syntax is used.

LRM-00111: no closing quote for value 'string'
    Cause: A quoted string was started but not finished.
    Action: Put a closing quote in the proper location.

LRM-00112: multiple values not allowed for parameter 'string'
    Cause: An attempt was made to specify multiple values for a parameter which can take only one value.
    Action: Do not specify more than one value for this parameter.

LRM-00113: error when processing file 'string'
    Cause: A problem occurred when processing this file.
    Action: Examine the additional error messages and correct the problem.

LRM-00114: error when processing from command line
    Cause: A problem occurred when processing the command line.
    Action: Examine the additional error messages and correct the problem.

LRM-00115: error when processing an environment variable
    Cause: A problem occurred when processing an environment variable.
    Action: Examine the additional error messages and correct the problem.

LRM-00116: syntax error at 'string' following 'string'
    Cause: A syntax error was detected.
    Action: Change the input so that the correct syntax is used.

LRM-00117: syntax error at 'string' at the start of input
    Cause: A syntax error was detected.
    Action: Change the input so that the correct syntax is used.

LRM-00118: syntax error at 'string' at the end of input
    Cause: A syntax error was detected.
    Action: Change the input so that the correct syntax is used.

LRM-00119: unable to obtain a valid value for 'string'
    Cause: No valid value was obtained for this parameter.
    Action: Rerun the application and enter a valid value.

LRM-00120: 'string' is not a legal Oracle number for 'string'
    Cause: The value is not a valid Oracle number.
    Action: Refer to the manual for allowable Oracle number values.

LRM-00121: 'string' is not an allowable value for 'string'
    Cause: The value is not a legal value for this parameter.
    Action: Refer to the manual for allowable values.
LRM-00122: value 'string' for 'string' must be between 'number' and 'number'
  Cause: The value of the parameter is not within the legal range.
  Action: Specify a value that is within the legal range.

LRM-00123: invalid character number found in the input file
  Cause: A character that is invalid was found in the input file.
  Action: Specify an input file that contains only valid characters.
LFI-00002: Out of memory. *string*

**Cause:** The File IO package failed in trying to dynamically allocate memory. function name is used for additional comments to indicate where, when and why the error occurred.

**Action:** Perform whatever actions necessary to make more memory available to the executing program.

LFI-00003: Internal exception code. icode = [string], [string].

**Cause:** Unknown - indicated by parameters. The first '%s' gives the internal exception code; the second is for any other additional comments.

**Action:** Report to the appropriate development group.

LFI-00004: Call to *string* failed.

**Cause:** A function call has failed. This error is a generic message to show that the exception has occurred in a particular function function name. This allows the client to know the trace runtime calling sequence by examining the exception stack.

**Action:** See the accompanying error messages for more information.

LFI-00005: Free some memory failed in *string*.

**Cause:** A call to free some memory in function function name has failed.

**Action:** See the accompanying error messages for more information and contact Oracle Worldwide Support immediately.

LFI-00006: Invalid parameter to function *string*.

**Cause:** The function was called with an invalid parameter.

**Action:** Check the function call to make sure that the correct parameters are being passed.

LFI-00007: NLSRTL's call failed. *string*.

**Cause:** LX calls return failure

**Action:** Check if our parameters are correct. Contact the appropriate group immediately if we parameters are valid.

LFI-00008: SLTS's initializing/terminating mutex failed for *string*.

**Cause:** SLTS's call return failure in function '%s'.

**Action:** Contact the appropriate development group.

LFI-00100: Unable to perform operation, file not opened in *string*.
Cause: The file has not been successfully opened at the time the operation is attempted.

Action: Check to make sure that the file exists (for read) or that the program has access to the write a file (for write). It is also possible that the file was just never opened

LFI-00101: Write failed, file cannot be written to.
Cause: The buffer write operation failed. Possibly due to incorrect parameters being passed in.
Action: Check the underlying error for more information.

LFI-00102: Unable to seek in sequentially accessed file.
Cause: The file was opened with the flag LFILFA_SEQ for sequential file operations. Use seek only on files that are opened with the LFILFA_RANDOM flag for random access.
Action: Check to see how the file is being opened and accessed and make the two operations consistent (that is, make them both operations either sequential or random).

LFI-00103: Seek operation failed.
Cause: The buffer seek operation failed. Probably due to incorrect parameters or flags.
Action: Check syntax of the seek command and retry the operation.

LFI-00104: Read operation failed.
Cause: The buffer read operation failed. Probably due to incorrect parameters or flags.
Action: Check syntax of the read command and retry the operation.

LFI-00105: Unable to add path.
Cause: One of the following might have caused the error: the current path might not be in the proper format the directory might not be in the proper format the name object might not have been initialized properly
Action: Check the format of the current path and the new directory; check that the name object was initialized properly.

LFI-00106: Path object holds more than one path.
Cause: The path object passed to lfippth() holds more than one path.
Action: Make sure that the path object used in lfippth() holds only one path.

LFI-00107: Open does not expect the file [string][string] to exist.
Cause: The flags specified for the open indicate that the file does not exist. However, the file does exist.
Action: Check to make sure that the options that were specified for the file are correct and that you do not expect that the file should exist. If so then find out why the file does exist.

LFI-00108: Open expect the file [string][string] to exist.
Cause: The flags specified for the open indicate that the file the file to exist and it does not.
Action: Check to make sure that the options that were specified for the file are correct and that you expect that the file should exist. If so then find out why the file doesn’t.

Cause: Either: the process does not have the proper access rights to open the file  
the file is already open  
Action: Check to make sure the proper access permissions are assigned. If they are and the file still cannot be opened, then contact Oracle Worldwide Support.

LFI-00110: Unable to initialize the Buffer Manager.  
Cause: The Buffer Manager initialization routine failed; probably because memory was exhausted.  
Action: See the accompanying error messages for more information.

LFI-00111: No other flags allowed in fixed length format.  
Cause: The function lfigfo() was called with an invalid File ID Descriptor. The valid File ID Descriptors are LFISTDIN, LFISTDOUT, and LFISTDERR.  
Action: Check the call to lfigfo() to make sure it is correct.

LFI-00113: Unable to initialize the Standard File object string.  
Cause: The call to open the standard file object failed.  
Action: Check the underlying errors for more information.

LFI-00114: Append is not allowed with string.  
Cause: Attempting to append using certain options.  
Action: Check the flag options to verify its usage.

LFI-00115: Buffer free failed.  
Cause: Probably do to the buffer flush failing.  
Action: See the accompanying error messages for more information.

LFI-00116: Unable to close file in operation string.  
Cause: The file close operation failed.  
Action: See the accompanying error messages for more information.

LFI-00117: Unable to rename file.  
Cause: The rename operation failed. Rename is called when we are protecting a file by operating on a temp file.  
Action: Check to make sure that the process has the correct access rights to perform a rename.

LFI-00118: Unable to change type to Unknown.  
Cause: The function lfichty() was called to change the file extension to LFIEXUNK (Unknown). This is not a valid operation.  
Action: Check why you are doing this. If the extension is already unknown then you do not need to do this. If you just want no extension then use the extension type LFIEXNONE.

LFI-00119: Unable to Abort an Unprotected file.  
Cause: The Abort function lfiabt() was called on a file that was not opened as a protected file. As such the abort operation is not valid.
**Action:** Check to see if you intended to open the file as a protected file.

LFI-00120: **Unable to parse root filename string.**  
**Cause:** The root filename that was given to lfimknam() is not in a format that this platform understands.  
**Action:** Check the format of the filename and retry the operation.

LFI-00121: **Only one of REPLACE, or PROT allowed for opty.**  
**Cause:** Two or more of the following open type options were specified for the lfilini() function: LFILOPTY_REPLACE, or LFILOPTY_PROT.  
**Action:** Remove one or more the of options such that you are only passing in one of the three.

LFI-00122: **Can only delete a file if we create it.**  
**Cause:** The delete file flag was specified for a file that was not created by this file operation. The ability to delete a file is not portable. As such the only deletion that is allowed by this package is if we know we want to delete the file when we create it.  
**Action:** You can only delete a file that you create. If you need to delete a file that you do not create then you will have to find another means of doing so.

LFI-00123: **Cannot access file Sequentially and Randomly.**  
**Cause:** Both the LFILFA_SEQ (sequential) and LFILFA_RANDOM (random) flags were specified during the file object creation. This is not allowed. Only one of the two may be specified.  
**Action:** Choose how you wish to access the file. If you choose random you can still access sequentially by just not using the repositioning functions.

LFI-00124: **No access mode was specified, default is sequential.**  
**Cause:** Neither LFILFA_SEQ (sequential) or LFILFA_RANDOM (random) were specified during file object creation.  
**Action:** The default is sequential but this should be explicitly set.

LFI-00125: **Random access only allowed on fixed length record files.**  
**Cause:** The LFILFA_RANDOM flag was specified on a file that was not organized into fixed-length records. Random access is only allowed on fixed-length record files.  
**Action:** Determine if the organization of your data needs to be in variable-length records and if you need to have random access to the file. If both conditions are true then you might need to buffer the entire file or enough of it to remove your need for random access. Another option is to close and rescan the file although this is not the optimal solution.

LFI-00126: **Record format can only be one of Fixed or Variable.**  
**Cause:** Both LFILRF_FIXED (fixed) and LFILRF_VAR (variable) were specified during file object creation. Only one of the two is allowed for a given file.  
**Action:** Determine how the file is organized and choose the option that matches.

LFI-00127: **No Record Format was specified, default is variable.**  
**Cause:** Neither LFILRF_FIXED (fixed) or LFILRF_VAR (variable) were specified for record format. One of the two must be specified for each file.  
**Action:** The default is LFILRF_VAR, but this should be explicitly set during file object creation.
LFI-00128: Carriage Control is only valid for Standard file objects.

  **Cause:** The Carriage Control option is only valid for the standard file objects (LFISTDIN, LFISTDOUT, LFISTDERR). You may not specify this option for any other type of file.

  **Action:** Choose between LFILRF_FIXED and LFILRF_VAR for the record format.

LFI-00129: Invalid option *string* were specified on an input only file.

  **Cause:** The file was opened as input only but the output mode option LFILRF_WR_ASIS or delete option LFLOPTY_DELETE was specified.

  **Action:** Check to see how you intend to open this file and make the necessary changes.

LFI-00130: Input option specified on output only file.

  **Cause:** The file was opened as output only but one of the input mode options (LFILRF_READ_NL or LFILRF_FORCE_NL) or was specified.

  **Action:** Check to see how you intend to open this file and make the necessary changes.

LFI-00131: No open type specified.

  **Cause:** The file object was created without an open type (that is, LFLOPTY_INPUT, LFLOPTY_OUTPUT, etc.).

  **Action:** Decide how the file should be accessed and specify one of the open types.

LFI-00132: Record length *string* is greater than max length of *string*.

  **Cause:** The record length specified for the file is greater than the max supported by this platform.

  **Action:** Decrease the record length.

LFI-00133: Trying to create file *string* that already exists.

  **Cause:** The file object was initialized with LFLOPTY_OUTPUT and without LFLOPTY_REPLACE and yet a file by this name already exists.

  **Action:** Check to make sure that you are creating the right file. If you intend to overwrite the file if it exists that specify the replace option LFLOPTY_REPLACE when initializing the file object.

LFI-00134: Unable to protect a file for an append operation.

  **Cause:** The LFLOPTY_APPEND and LFLOPTY_PROT options were both specified for the file. This is currently not allowed because it would require copying the entire file at open time.

  **Action:** Decide if you really need to protect the file for append. If so then think about making a copy of it before appending.

LFI-00135: Unable to remove temporary file.

  **Cause:** A temporary file was created to protect a file and when the tempfile was no longer needed it LFI attempted to remove it and was unable to do so.

  **Action:** Check the permissions and where the temp files are being created.

LFI-00136: Unable to change type of open file.

  **Cause:** The function lfichty() was called on an opened file.

  **Action:** This is a bug in the client code. lfichty() cannot be used in this case.

LFI-00137: Unable to perform *string* on a file object that is *string*. 
Cause: Unable to perform an LFI operation on a file object for the given reason.
Action: Take the appropriate corrective measure. For example if a file is supposed to be opened before the operation can be performed, client code will need to open the file first.

LFI-00138: Unable to perform string on a name object that is string.
Cause: Unable to perform an LFI operation on a name object for the given reason.
Action: Take the appropriate corrective measure.

LFI-00139: Option string cannot be used with option string in calling string.
Cause: First option cannot be used with second option in such a function call.
Action: Re-examine code to determine which option is needed.

LFI-00140: Invalid option string were specified on input-output file.
Cause: The file was opened as input-output and one of the mode options (LFIOPTY_DELETE or non-LFIOPTY_RANDOM) was specified.
Action: Check to see how you intend to open this file and make the necessary changes.

LFI-00141: Unable to abort file in operation string.
Cause: The abort operation failed.
Action: Check the underlying errors for more information.

LFI-00142: Unable to delete an existing file [string][string] not owned by Oracle.
Cause: The file was not created by Oracle.
Action: Change owner of file to Oracle or give Oracle access privileges to delete it.

LFI-00143: Unable to delete non-existent file string.
Cause: The file to be deleted does not exist.
Action: Check the underlying errors for more information.

LFI-00144: File [string][string] does not exist
Cause: The file does not exist.
Action: Check to make sure the file exists and retry the operation.

LFI-00145: User buffer too short.
Cause: The buffer that was passed is not large enough.
Action: Allocate a larger buffer and retry the operation.

LFI-00146: copy does not expect the file string,string to exist
Cause: We are expecting the destination file not to exist and it does.
Action: Find out why the file does exist.

LFI-00147: File string,string does not exist
Cause: The file does not exist.
Action: Check to make sure the file exists and retry the operation.

LFI-00148: string can be called only on files opened in byte mode
Cause: A routine that should be used only for files in byte mode was called for a file that was opened in record mode
Action: In order to use this function, the file should be opened in byte mode.
LFI-00149: Error on destroying hash table in function string

**Cause:** We were expecting the cache path object and it does not.

**Action:** In order to use this function, the path object should be cache path object.

LFI-00150: Error on creating hash table in function string

**Cause:** routine failed to create path object hash table

**Action:** make sure that startsize <= LHTQMAXSLOTS

LFI-00151: Error on inserting into hash table in function string

**Cause:** routine failed to insert into hash table

**Action:** make sure there is enough memory for allocation and that the hash table exists.

LFI-00152: Read operation (byte mode) failed.

**Cause:** Byte mode read operation failed. Probably due to incorrect parameters or flags, or trying to read beyond end of file.

**Action:** Check syntax of the read command and size of file.

LFI-01000: Unable to write line to file.

**Cause:** The file being written to may no longer be open or we may have reached the end of the file.

**Action:** Examine underlying errors for more information.

LFI-01001: Unable to write string bytes to file.

**Cause:** The file being written to may no longer be open or we may have reached the end of the file.

**Action:** Examine underlying errors for more information.

LFI-01002: Unable to read line from file.

**Cause:** The file being read from may no longer be open.

**Action:** Examine underlying errors for more information.

LFI-01003: Unable to read string bytes from file.

**Cause:** The file being read from may no longer be open.

**Action:** See the accompanying error messages for more information.

LFI-01004: Unable to empty buffer.

**Cause:** The buffer manager is probably unable to write to the underlying file.

**Action:** Examine underlying errors for more information.

LFI-01005: Unable to fill buffer.

**Cause:** The buffer manager is probably unable to read from the underlying file.

**Action:** See the accompanying error messages for more information.

LFI-01006: File ends in partial character in string.

**Cause:** A line ends in a partial character.

**Action:** Examine underlying errors for more information.

LFI-01007: Line is too long; encountered in function string.

**Cause:** The length of the line exceeds the maximum length.

**Action:** Examine underlying errors for more information.
LFI-01500: Error condition on call to OSD function string.  
Cause: An error condition arises in calling an OSD function. This message occurs if calls to malloc or free functions failed.  
Action: Contact Oracle Worldwide Support.

LFI-01501: tmpnam() fails to generate temporary file name.  
Cause: Operating system was unable to create temporary file name.  
Action: Contact the development organization.

LFI-01502: Base filename does not exist.  
Cause: The filename that was parsed had no base file. It was either all path or extension.  
Action: Check the filename being passed in to make sure it is correct.

LFI-01503: Max filename size exceeded generating filename.  
Cause: While building a filename we exceeded the buffer allocated to hold the new filename.  
Action: Contact the development organization.

LFI-01504: fseek() failed(OSD return value = string) in string.  
Cause: The function fseek() returned an error condition.  
Action: Contact Oracle Worldwide Support.

LFI-01505: fclose() failed(OSD return value = string) in string.  
Cause: The function fclose() returned an error condition.  
Action: Contact Oracle Worldwide Support.

LFI-01506: fflush() failed(OSD return value = string).  
Cause: The function fflush() returned an error condition.  
Action: Contact the development organization.

LFI-01507: fwrite() failed(OSD return value = string) in string.  
Cause: File pointer may be null or may not be opened for write.  
Action: Contact the development organization.

LFI-01508: access() failed.  
Cause: Call to access() failed.  
Action: Contact the development organization.

LFI-01509: fopen() failed(OSD return value = string).  
Cause: Call to fopen() failed.  
Action: Contact Oracle Worldwide Support.

LFI-01510: fread() failed(OSD return value = string) in string.  
Cause: Call to fread() failed.  
Action: Contact Oracle Worldwide Support.

LFI-01511: unlink() failed(OSD errno = string) in string.  
Cause: Call to unlink() failed.  
Action: Contact the development organization.
LFI-01512: stat() failed
   Cause: Call to stat() failed.
   Action: Contact Oracle Worldwide Support.

LFI-01514: ftell() failed in string
   Cause: The ftell() function returned an error.
   Action: Contact Oracle Worldwide Support.

LFI-01515: truncate() failed.
   Cause: The function truncate() returned an error condition.
   Action: Contact the development organization.

LFI-01516: read() failed (OSD return value = string) in string.
   Cause: Call to read() failed.
   Action: Contact the development organization.

LFI-01517: open() failed (OSD return value = string).
   Cause: Call to open() failed.
   Action: Contact the development organization.

LFI-01518: write() failed (OSD return value = string) in string.
   Cause: Call to write() failed.
   Action: Contact the development organization.

LFI-01519: llseek() failed (OSD return value = string) in string.
   Cause: The llseek() function returned an error.
   Action: Contact Oracle Worldwide Support.

LFI-01520: close() failed (OSD return value = string) in string.
   Cause: The function close() returned an error condition.
   Action: Contact the development organization.

LFI-01521: fsync() failed (OSD return value = string) in string.
   Cause: The function fsync() returned an error condition.
   Action: Contact the development organization.

LFI-01522: opendir() failed.
   Cause: The function opendir() returned an error condition.
   Action: Contact the development organization.

LFI-01523: rename() failed.
   Cause: The function rename() returned an error condition.
   Action: Contact the development organization.

LFI-01524: fdopen() failed (OSD return value = string).
   Cause: Call to fdopen() failed.
   Action: Contact the development organization.

LFI-01525: setvbuf() failed.
   Cause: A call to lficstd() had failed.
   Action: Contact development service
PLS-00049: **bad bind variable** 'string'

**Cause:** The client (caller) of PL/SQL has parsed a bind variable that it has informed to be 'bad'.

**Action:** None

PLS-00102: **parser stack overflow because nesting is too deep**

**Cause:** The parser, which checks the syntax of PL/SQL statements, uses a data structure called a stack; the number of levels of nesting in the PL/SQL block exceeded the stack capacity.

**Action:** Reorganize the block structure to avoid nesting at too deep a level. For example, move the lowest-level sub-block to a higher level.

PLS-00103: **string**

**Cause:** This error message is from the parser. It found a token (language element) that is inappropriate in this context.

**Action:** Check previous tokens as well as the one given in the error message. The line and column numbers given in the error message refer to the end of the faulty language construct.

PLS-00104: **empty argument list in call of procedure 'string' must be omitted**

**Cause:** In a subprogram call, the name of the subprogram was followed by an empty parameter list. For example, procedure P was called as P(). This is not allowed.

**Action:** Remove the empty parameter list. In the example, change the procedure call to P.

PLS-00105: **at most one forward declaration of type 'string' is permitted**

**Cause:** More than one forward declaration of a type is redundant.

**Action:** Remove all but one forward declaration.

PLS-00108: **declarative units must be a single variable declaration**

**Cause:** While checking a declarative unit (a top-level declare block without the BEGIN...END), PL/SQL found that there was more than one item declared or that the item was not a variable declaration. A table is a common variable declaration at the unit level. To define a TABLE, compile a DECLARE compilation unit, but only one at a time is allowed.

**Action:** Declare variables in separate declarative units.

PLS-00109: **unknown exception name 'string' in PRAGMA EXCEPTION_INIT**
**Cause:** No declaration for the exception name referenced in an EXCEPTION_INIT pragma was found within the scope of the pragma.

**Action:** Make sure the pragma follows the exception declaration and is within the same scope.

**PLS-00110: bind variable 'string' not allowed in this context**

**Cause:** A bind variable, that is, an identifier prefixed with a colon, was found in an inappropriate context.

**Action:** Remove the colon or replace the bind variable with the appropriate object.

**PLS-00111: end-of-file in comment**

**Cause:** A Comment had a comment initiator (/*), but before the

**Action:** Remove the Comment initiator or add a comment terminator. The line and column numbers accompanying the error message refer to the beginning of the last legal token before the Comment initiator.

**PLS-00112: end-of-line in quoted identifier**

**Cause:** A quoted identifier had a beginning quote ("), but before the ending quote (") was found, an end-of-line marker was encountered.

**Action:** Remove the beginning quote or add the ending quote. The line and column numbers accompanying the error message refer to the beginning of the quoted identifier.

**PLS-00113: END identifier 'string' must match 'string' at line string, column string**

**Cause:** Following the keyword END, which terminates some language constructs (such as loops, blocks, functions, and procedures), you can optionally place the name of that construct. For example, at the end of the definition of loop L you might write END L. This error occurs when the optional name does not match the name given to the language construct. It is usually caused by a misspelled identifier or by faulty block structure.

**Action:** Make sure the spelling of the END identifier matches the name given to the language construct and that the block structure is correct.

**PLS-00114: identifier 'string' too long**

**Cause:** The name of a PL/SQL variable is longer than 30 characters. Legal identifiers (including quoted identifiers) have a maximum length of 30 characters. A string literal might have been mistakenly enclosed in double quotes instead of single quotes, in which case PL/SQL considers it a quoted identifier.

**Action:** Shorten the identifier.

**PLS-00115: this PRAGMA must follow the declaration of 'string'**

**Cause:** The pragma refers to a PL/SQL object that was not declared or is not within the scope of the reference. Identifiers must be declared before they are used in a pragma; forward references are not allowed.

**Action:** Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

**PLS-00116: Duplicate where-clause in table expression**

**Cause:** Two or more WHERE clauses were found in a DELETE, SELECT, or UPDATE statement. The WHERE clause specifies a condition under which rows in a table are processed. The condition can contain several logical expressions connected by AND or OR, but a statement can contain only one WHERE clause.
**Action:** Remove one of the WHERE clauses and, if necessary, connect logical expressions by AND or OR

**PLS-00117: Duplicate connect-by clause in table expression**

**Cause:** Two or more CONNECT BY clauses were found in a SELECT statement. The CONNECT BY clause defines a relationship used to return rows in a hierarchical order. The relationship can contain two expressions separated by a relational operator (such as = or !=), but a statement can contain only one CONNECT BY clause.

**Action:** Remove one of the CONNECT BY clauses and, if necessary, separate expressions by a relational operator.

**PLS-00118: Duplicate group-by clause in table expression**

**Cause:** Two or more GROUP BY clauses were found in a SELECT statement. The GROUP BY clause lists column expressions used to form a summary row for each group of selected rows. The list can contain several column expressions separated by commas, but a statement can contain only one GROUP BY clause.

**Action:** Remove one of the GROUP BY clauses and, if necessary, separate column expressions by commas.

**PLS-00119: Duplicate having-clause in table expression**

**Cause:** Two or more HAVING clauses were found in a SELECT statement. The HAVING clause specifies a condition under which groups of rows (formed by the GROUP BY clause) are included in the result. The condition can include several logical expressions connected by AND or OR, but a statement can contain only one HAVING clause.

**Action:** Remove one of the HAVING clauses and, if necessary, connect logical expressions by AND or OR.

**PLS-00120: inappropriate argument in OPEN statement**

**Cause:** The asterisk (*) option was used in the argument list of a SQL group function other than COUNT. For example, the code might look like SELECT SUM(*) INTO emp_count FROM emp; -- should be COUNT(*) Only COUNT permits the use of the asterisk option, which returns the number of rows in a table.

**Action:** Remove the asterisk option from the argument list and replace it with an expression that refers to one or more database columns.

**PLS-00122: string as separator is allowed only with specific built-in functions**

**Cause:** A few built-in functions use keywords (instead of commas) as argument separators: Built-in function Argument separators

| CHR, TRANSLATE USING CAST AS TRIM |
| TRAILING, LEADING, BOTH, FROM |

A function different from one of these built-in functions is using a keyword as an argument separator.

**Action:** Correct the argument list or change the function name.

**PLS-00123: program too large (string)**

**Cause:** PL/SQL was designed primarily for robust transaction processing. One consequence of the special-purpose design is that the PL/SQL compiler imposes a limit on block size. The limit depends on the mix of statements in the PL/SQL block. Blocks that exceed the limit cause this error.

**Action:** The best solution is to modularize the program by defining subprograms, which can be stored in an Oracle database. Another solution is to break the program into two sub-blocks. Have the first block INSERT any data the second
block needs into a temporary database table. Then, have the second block SELECT the data from the table.

**PLS-00124: name of exception expected for first arg in exception_init pragma**

**Cause:** The first argument passed to the EXCEPTION_INIT pragma was something other than an exception name. The first argument must be the name of a legally declared exception.

**Action:** Replace the first argument with the name of a legally declared exception.

**PLS-00125: type name expected**

**Cause:** When a constant or variable was declared, its datatype was not specified. For example, the code might look like pi CONSTANT := 3.14159; -- should be CONSTANT REAL := 3.14159 Every constant and variable must have a datatype, which specifies a storage format, constraints, and valid range of values.

**Action:** Supply the type name

**PLS-00126: selector ALL is not allowed**

**Cause:** The ALL shortcut for specifying system privileges or statement options was used in a SQL statement. PL/SQL does not support the ALL shortcut.

**Action:** Remove the ALL shortcut from the SQL statement.

**PLS-00127: Pragma string is not a supported pragma**

**Cause:** The named pragma (compiler directive) is not among those supported by PL/SQL. The pragma name might be misspelled, or the pragma syntax might be faulty.

**Action:** Check the spelling of the pragma name, and make sure the proper syntax was used.

**PLS-00128: Illegal number of arguments for pragma string**

**Cause:** The number of arguments (actual parameters) passed to the named pragma (compiler directive) is incorrect. A required argument was omitted from the argument list, or the pragma syntax is faulty (for example, a comma might be missing between two parameters).

**Action:** Supply the missing argument, or correct the faulty syntax.

**PLS-00129: Pragma INTERFACE only supports C as its first argument**

**Cause:** The first parameter passed to pragma INTERFACE specified a host language other than C. Currently, C is the only host language supported. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

**Action:** Check the spelling of the first parameter, which should be C, and make sure the proper syntax was used.

**PLS-00130: Pragma string expects 1st argument to be a procedure/function/package/cursor**

**Cause:** The first argument (actual parameter) passed to the named pragma (compiler directive) was not the name of a subprogram, package, or cursor, as required. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

**Action:** Check the spelling of the first parameter, and make sure the proper syntax was used.

**PLS-00131: Pragma string expects 2nd argument to be a procedure/function**
Cause: The second argument (actual parameter) passed to the named pragma (compiler directive) was not the name of a procedure or function, as required. The parameter cannot be a non-static method. The parameter might be misspelled or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).
Action: Check the spelling of the second parameter and make sure the proper syntax was used.

PLS-00132: Pragma string does not support string
Cause: One of the parameters passed to this pragma was not among the list of allowed values. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).
Action: Check the spelling of all the parameters and make sure the proper syntax was used.

PLS-00133: Pragma string expects 1st argument to be an identifier or string-literal
Cause: The first argument (actual parameter) passed to the named pragma (compiler directive) was not an identifier or string literal, as required. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).
Action: Check the spelling of the first parameter, and make sure the proper syntax was used.

PLS-00134: Pragma string expects 2nd argument to be an identifier or string-literal
Cause: The second argument (actual parameter) passed to the named pragma (compiler directive) was not an identifier or string literal, as required. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).
Action: Check the spelling of the second parameter, and make sure the proper syntax was used.

PLS-00135: Pragma string expects 3rd argument to be an identifier, string or numeric literal
Cause: The fourth argument (actual parameter) passed to the named pragma (compiler directive) was not a numeric literal, as required. The parameter might be miscoded, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).
Action: Check the coding of the fourth parameter, and make sure the proper syntax was used.

PLS-00138: Precision for a binary type must be one of 8, 16, or 32
Cause: Invalid precision was specified for a signed or unsigned binary type.
Action: Specify precision as one of 8, 16, or 32.

PLS-00139: duplicate external NAME specification in subprogram expression
Cause: The subprogram was found to have two external NAME specifications.
Action: Remove one of the external NAME specifications.

PLS-00140: duplicate external LIBRARY specification in subprogram expression
Cause: The subprogram was found to have two external LIBRARY specifications.
Action: Remove one of the external LIBRARY specifications.
PLS-00141: duplicate external PARAMETER STYLE specification in subprogram expression
   Cause: The subprogram was found to have two external PARAMETER STYLE specifications.
   Action: Remove one of the external PARAMETER STYLE specifications.

PLS-00142: duplicate external PARAMETER list specification in subprogram expression
   Cause: The subprogram was found to have two external PARAMETER STYLE specifications.
   Action: Remove one of the external PARAMETER STYLE specifications.

PLS-00143: duplicate external LANGUAGE specification in subprogram expression
   Cause: The subprogram was found to have two external LANGUAGE specifications.
   Action: Remove one of the external LANGUAGE specifications.

PLS-00144: duplicate external CALLING STANDARD specification in subprogram expression
   Cause: The subprogram was found to have two external CALLING STANDARD specifications.
   Action: Remove one of the external CALLING STANDARD specifications.

PLS-00145: duplicate external WITH CONTEXT specification in subprogram expression
   Cause: The subprogram was found to have two external WITH CONTEXT specifications.
   Action: Remove one of the external WITH CONTEXT specifications.

PLS-00146: duplicate external TRUSTED/UNTRUSTED specification in subprogram expression
   Cause: The subprogram was found to have two external TRUSTED/UNTRUSTED specifications.
   Action: Remove one of the external TRUSTED/UNTRUSTED specifications.

PLS-00147: LIBRARY or ASSEMBLY file specification string is empty
   Cause: A zero-length string was found for the LIBRARY or ASSEMBLY file specification.
   Action: Specify a non-zero length string for the LIBRARY or ASSEMBLY file specification.

PLS-00148: Only 1 pragma of this type is allowed per subprogram
   Cause: The subprogram was found to have two PRAGMA RESTRICT_REFERENCES.
   Action: Remove one of the PRAGMA RESTRICT_REFERENCES.

PLS-00150: found: string but expected : INTEGER
   Cause: This error happens in the creation of a pl/sql external type: [SIGNED | UNSIGNED] BINARY INTEGER <precision>). It may be referenced only in a create type statement. Such types are non-queryable. Something other than 'INTEGER' was supplied.
**Action:** None

**PLS-00151:** Expression or Variable is an illegal type to PLS/QL: *string*  
**Cause:** A type was used which does not belong PL/SQL. This type can only be referenced in CREATE TYPE statements, and is a non-queryable data type.  
**Action:** None

**PLS-00152:** POINTER type may only reference an object type.  
**Cause:** A POINTER type which does not belong to PL/SQL can only refer to an object type. This type can only be referenced in CREATE TYPE statements, and is a non-queryable data type.  
**Action:** None

**PLS-00153:** A *string* type may only be used as an object type attribute.  
**Cause:** A POINTER or [SIGNED/UNSIGNED] BINARY INTEGER can only be used as attributes of object types. These types can only be referenced in CREATE TYPE statements, and are non-queryable data types. One of these external PL/SQL types outside of an object type.  
**Action:** None

**PLS-00154:** An object type may have only 1 MAP or 1 ORDER method.  
**Cause:** More than one map or order function was declared. An object type can have only one map function or one order function, but not both.  
**Action:** None

**PLS-00155:** Only a function may be a MAP, ORDER or CONSTRUCTOR method.  
**Cause:** A procedure was declared as a MAP, ORDER or CONSTRUCTOR method. Only functions can be MAP, ORDER or CONSTRUCTOR methods.  
**Action:** None

**PLS-00156:** Null constraints not supported for object attributes.  
**Cause:** A null constraint was specified for an attribute in an object. This is not supported.  
**Action:** Remove the constraint.

**PLS-00157:** AUTHID only allowed on schema-level programs  
**Cause:** An AUTHID clause was specified for a subprogram inside a package or type. These clauses are only supported for top-level stored procedures, packages, and types.  
**Action:** Remove the clause

**PLS-00160:** AUTHID must specify CURRENT_USER or DEFINER  
**Cause:** The only two allowed options for AUTHID are CURRENT_USER and DEFINER.  
**Action:** Fix the AUTHID clause to specify CURRENT_USER or DEFINER

**PLS-00161:** Pragma *string* expects 3rd argument to be an identifier or a string literal  
**Cause:** The third argument (actual parameter) passed to the named pragma (compiler directive) was not an identifier or a string literal when there is a fourth argument to the pragma. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).
Action: Check the spelling of the third parameter, and make sure the proper syntax was used.

PLS-00162: Pragma string expects 4th argument to be a positive integer literal
Cause: The fourth argument (actual parameter) passed to the named pragma (compiler directive) was not a numeric literal, as required. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).
Action: Check the spelling of the fourth parameter, and make sure the proper syntax was used.

PLS-00164: cursor subqueries are not supported in this release
Cause: This feature is not yet implemented.
Action: None

PLS-00165: call statement is not supported in PL/SQL
Cause: A CALL statement was found in PL/SQL source.
Action: Use an ordinary PL/SQL function or procedure call.

PLS-00166: bad format for date, time, timestamp or interval literal
Cause: The contents of the date, time, timestamp or interval literal did not match the expected format.
Action: Correct the format for the date, datetime, or interval literal.

PLS-00167: keyword BULK is used in a wrong context
Cause: keyword BULK is used illegally. For example, BULK is used without INTO clause
Action: remove the keyword BULK.

PLS-00168: duplicate modifier specification 'string'
Cause: A method or object type modifier was specified more than once.
Action: Remove all but one occurrence of the duplicate modifier.

PLS-00169: modifier 'string' conflicts with prior 'string' specification
Cause: The method or object type modifier specified conflicts with an earlier modifier. For example, a FINAL modifier cannot be combined with a NOT FINAL modifier.
Action: Remove one of the conflicting modifiers.

PLS-00170: the SQL statement in an OPEN statement or FOR loop must be a SELECT
Cause: An OPEN cursor statement or cursor FOR loop can only invoke a SELECT statement, not an UPDATE, INSERT or DELETE.
Action: Use only SELECT statements in OPEN or cursor FOR loops

PLS-00171: duplicate dedicated AGENT specification in subprogram expression
Cause: The subprogram was found to have two dedicated AGENT specifications.
Action: Remove one of the dedicated AGENT specifications.

PLS-00172: string literal too long
Cause: The string literal was longer than 32767 bytes.
Action: Use a string literal of at most 32767 bytes.
PLS-00173: SPACE, TAB or RETURN are disallowed as alternative quote delimiters
   Cause: SPACE, TAB or RETURN was used as alternative quote delimiter.
   Action: Use a character other than SPACE, TAB or RETURN as the alternative quote delimiter.

PLS-00174: a static boolean expression must be used
   Cause: The expression contained a syntax or semantic error, or it did not have a boolean type or its evaluation raised an exception.
   Action: Write correct static boolean expression.

PLS-00176: unexpected preprocessor token '$string'
   Cause: A preprocessor token was used inappropriately.
   Action: Remove the preprocessor token that is inappropriately used.

PLS-00177: '$string' preprocessor directive does not end properly
   Cause: A preprocessor directive was not ended properly.
   Action: Use $end to end the preprocessor directive properly.

PLS-00178: a static character expression must be used
   Cause: The expression contained a syntax or semantic error, or it did not have a character type or its evaluation raised an exception.
   Action: Write correct static character expression.

PLS-00179: $ERROR: string
   Cause: $ERROR directive was used. This is an expected error message.
   Action: NA

PLS-00180: preprocessor directives are not supported in this context
   Cause: A preprocessor directive was used in a compilation unit for which conditional compilation is not supported.
   Action: Do not use any preprocessor directives in this compilation unit.

PLS-00181: unsupported preprocessor directive 'string'
   Cause: An unsupported preprocessor directive was used.
   Action: Use a supported preprocessor directive.

PLS-00182: Identifier cannot be an empty string
   Cause: Identifier was declared using an empty string,
   Action: rename the identifier to a non empty string.

PLS-00201: identifier 'string' must be declared
   Cause: You tried to reference either an undeclared variable, exception, procedure, or other item, or an item to which no privilege was granted or an item to which privilege was granted only through a role.
   Action: 1) Check your spelling and declaration of the referenced name. 2) Verify that the declaration for the referenced item is placed correctly in the block structure. 3) If the referenced item is indeed declared but you don't have privileges to refer to that item, for security reasons, you will be notified only that the item is not declared. 4) If the referenced item is indeed declared and you believe that you have privileges to refer to that item, check the privileges; if the privileges were granted only via a role, then this is expected and documented behavior. Stored objects (packages, procedures, functions, triggers, views) run in the security
domain of the object owner with no roles enabled except PUBLIC. Again, you will be notified only that the item was not declared.

**PLS-00202: type 'string' must be declared**

**Cause:** An attempt was made to reference an undefined type. Either the type specifier was not declared or it is not within the scope of the reference.

**Action:** Check the spelling and declaration of the type specifier. Also confirm that the declaration is placed correctly in the block structure.

**PLS-00203: function DECODE must be called with at least 3 non-boolean arguments**

**Cause:** Less than three arguments were passed to the built-in function DECODE. Though DECODE takes a variable number of (non-Boolean) arguments, at least three arguments must be passed.

**Action:** Call DECODE with three or more arguments

**PLS-00204: function or pseudo-column 'string' may be used inside a SQL statement only**

**Cause:** A pseudocolumn or proscribed function was used in a procedural statement. The SQL pseudocolumns (LEVEL, ROWID, ROWNUM) can be used only in SQL statements. Likewise, certain functions such as DECODE, DUMP, and VSIZE and the SQL group functions (AVG, MIN, MAX, COUNT, SUM, STDDEV, VARIANCE) can be used only in SQL statements.

**Action:** Remove the pseudocolumn reference or function call from the procedural statement. Or, replace the procedural statement with a SELECT INTO statement; for example, replace bonus := DECODE(rating, 1, 5000, 2, 2500, ...); with the following statement: SELECT DECODE(rating, 1, 5000, 2, 2500, ...) INTO bonus FROM dual;

**PLS-00205: Aggregate not allowed here**

**Cause:** An aggregate, that is, a parenthesized list of values such as (7788, 'SCOTT', 20), was found in an inappropriate context.

**Action:** Remove or relocate the aggregate.

**PLS-00206: %TYPE must be applied to a variable, column, field or attribute, not to "string"**

**Cause:** The program object declared using the %TYPE datatype attribute is not of the appropriate class. It must be a variable, column, record component, subprogram formal parameter, or other object to which values can be assigned.

**Action:** Declare an object of the appropriate class or define the datatype in another way (for example, use %ROWTYPE).

**PLS-00207: identifier 'string', applied to implicit cursor SQL, is not a legal cursor attribute**

**Cause:** An identifier that is not a cursor attribute was applied to the identifier SQL. For example, this error occurs if the cursor attribute is misspelled.

**Action:** Check the spelling of the cursor attribute name. Make sure the attribute is one of these: %NOTFOUND, %FOUND, %ROWCOUNT, %ISOPEN.

**PLS-00208: identifier 'string' is not a legal cursor attribute**

**Cause:** An identifier not declared as a cursor attribute was applied to an identifier declared as a cursor. For example, this error occurs if the cursor attribute is misspelled.
Action: Check the spelling of the cursor attribute name. Make sure the attribute is one of these: %NOTFOUND, %FOUND, %ROWCOUNT, %ISOPEN.

PLS-00209: table 'string' is not in FROM clause
Cause: In a query, a table referenced by the select list is not named in the FROM clause.
Action: Check the spelling of the table names, make sure each column in the select list refers to a table in the FROM clause, then re-execute the query.

PLS-00210: an OTHERS clause is required in this CASE statement
Cause: Unless the clauses of a CASE statement mention all values of the type of the selecting expression, an OTHERS clause must be provided as the last clause of the CASE statement. It is impossible to cover all values of type INTEGER (or NUMBER), so an OTHERS clause is always required when the expression following the keyword CASE is of type INTEGER (or NUMBER).
Action: None

PLS-00211: CASE labels or ranges must not be duplicated in different WHEN clauses
Cause: In this CASE statement, a value appears in more than one WHEN clause. A value may appear in at most one WHEN clause of a CASE statement.
Action: None

PLS-00212: could not obtain enough memory to compile CASE statement
Cause: The CASE statement is too big. The compiler did not have enough storage to process it.
Action: None

PLS-00213: package STANDARD not accessible
Cause: The PL/SQL compiler could not find package STANDARD in the current Oracle database. To compile a program, PL/SQL needs package STANDARD.
Action: Make sure that package STANDARD is available in the current Oracle database, then retry the operation.

PLS-00214: BEGIN...END block nesting is too deep
Cause: The number of levels of nesting in the PL/SQL block is too large. Blocks can be nested up to 255 levels deep, depending on the availability of system resources such as memory.
Action: Reorganize the block structure to avoid nesting at too deep a level. For example, move the lowest-level sub-block to a higher level.

PLS-00215: String length constraints must be in range (1 .. 32767)
Cause: When a character variable was declared, a length outside the legal range was specified. For example, the following declarations are illegal: flag CHAR(0); -- illegal; zero length name VARCHAR2(-10); -- illegal; negative length
Action: Change the length constraint, making sure that it lies in the range 1 .. 32767.

PLS-00216: NUMBER precision constraint must be in range (1 .. 38)
Cause: A NUMBER variable was declared with a precision that is outside the legal range. Declarations such as N NUMBER(800) or N NUMBER(123,10) are not supported.
**Action:** Change the illegal NUMBER precision constraint, making sure that it lies in the range 1 .. 38.

**PLS-00217: NUMBER scale constraint must be in range (-84 .. 127)**

**Cause:** A NUMBER variable was declared with a scale that is outside the legal range. Declarations such as N NUMBER(10,345) or N NUMBER(10,-100) are not supported.

**Action:** Change the illegal NUMBER scale constraint, making sure that it lies in the range -84 .. 127.

**PLS-00218: a variable declared NOT NULL must have an initialization assignment**

**Cause:** In general, variables that have no initialization clause in their declaration are automatically initialized to NULL. This is illogical for NOT NULL variables; therefore, an initialization clause is required.

**Action:** Add an initialization clause to the variable declaration. If the initialization is too complicated for the syntax, one can add a function call (in a later release).

**PLS-00219: label 'string' reference is out of scope**

**Cause:** A block or loop label was used to qualify a variable (as in outer_block.date) that was not declared or is not within the scope of the label. The variable name might be misspelled, its declaration might be faulty, or the declaration might be placed incorrectly in the block structure.

**Action:** Check the spelling and declaration of the variable name. Also confirm that the declaration is placed correctly in the block structure.

**PLS-00220: simple name required in this context**

**Cause:** A qualified name such as A.B or A.B.C is not permitted here.

**Action:** Use a simple name such as A instead.

**PLS-00221: 'string' is not a procedure or is undefined**

**Cause:** An identifier being referenced as a procedure was not declared or actually represents another object (for example, it might have been declared as a function).

**Action:** Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

**PLS-00222: no function with name 'string' exists in this scope**

**Cause:** An identifier being referenced as a function was not declared or actually represents another object (for example, it might have been declared as a procedure).

**Action:** Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

**PLS-00223: parameterless procedure 'string' used as function**

**Cause:** An identifier being referenced as a parameterless function actually represents a procedure.

**Action:** Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure. If necessary, change the declaration of the identifier or change the reference so that it does not require a return value.

**PLS-00224: object 'string' must be of type function or array to be used this way**

**Cause:** An identifier being referenced as a function or an array actually represents an object (a number or date, for example) that cannot be referenced in this way.
Action: Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

PLS-00225: subprogram or cursor 'string' reference is out of scope

Cause: The prefix in a qualified name was a subprogram or cursor which was not in an enclosing scope; i.e., a subprogram or cursor name is being used as a scope qualifier for a reference to an entity (within that subprogram or cursor) that is not in scope. Example: declare x number; type t1 is record (a number); function f return t1 is a number; begin x := f.a; -- legal use of function "f" as a scope qualifier; -- resolves to local variable "a" in function "f". x := f().a; -- legal reference to component "a" of returned record end; begin x := f.a; -- illegal use of function "f" as a scope qualifier x := f().a; -- legal reference to component "a" of returned record end;

Action: a) if the intention was to refer to a local variable of a non-enclosing function, this is not allowed; remove the reference b) if this is a parameterless function, and the the intention was to access a field of the result of a call to this function, then use empty parentheses in the call.

PLS-00226: package 'string' used as variable reference

Cause: A package was referenced in an expression as if it were a variable or function. Either the name of the variable or function is misspelled or the reference is not fully qualified. For example, to call the function my_function, which is stored in package my_package, dot notation must be used, as follows: ... my_package.my_function ...

Action: Correct the spelling of the variable or function name or use dot notation to reference the packaged variable or function.

PLS-00227: subprogram 'in' formal string is not yet denotable

Cause: When the formal parameters of a subprogram were declared, one parameter was used to initialize another, as in PROCEDURE my_proc (j NUMBER, k NUMBER := j) IS ... The first parameter has no value until run time, so it cannot be used to initialize another parameter.

Action: Remove the illegal formal parameter reference.

PLS-00228: Illegal declaration of variable of type LONG

Cause: The identifier is a formal parameter which is being used in the context of a default expression value for a formal parameter in the same formal parameter list. E.g.: procedure p(j number, k number := j).

Action: Remove the offending variable definition

PLS-00229: Attribute expression within SQL expression

Cause: An attribute expression, such as SQL%NOTFOUND, was used in a SQL statement, but attribute expressions are allowed only in procedural statements.

Action: To workaround this limitation, assign the value of the attribute expression to a variable, then use the variable in the SQL statement. For example, replace the statement INSERT INTO audits VALUES (c1%ROWCOUNT, ...); with the following statements: row_count := c1%ROWCOUNT; INSERT INTO audits VALUES (row_count, ...);

PLS-00230: OUT and IN OUT formal parameters may not have default expressions

Cause: When the formal parameters of a procedure were declared, an OUT or IN OUT parameter was initialized to a default value, as in PROCEDURE calc_bonus (bonus OUT REAL := 0, ...) IS ... However, only IN parameters can be initialized to default values.
Action: Remove the illegal default expression.

PLS-00231: function 'string' may not be used in SQL
Cause: A proscribed function was used in a SQL statement. Certain functions such as SQLCODE and SQLERRM can be used only in procedural statements.
Action: Remove the function call from the SQL statement. Or, replace the function call with a local variable. For example, the following statement is illegal: INSERT INTO errors VALUES (SQLCODE, SQLERRM); However, you can assign the values of SQLCODE and SQLERRM to local variables, then use the variables in the SQL statement, as follows: err_num := SQLCODE; err_msg := SQLERRM; INSERT INTO errors VALUES (err_num, err_msg);

PLS-00232: nested packages not permitted
Cause: A package was declared inside another package, but package declarations are allowed only at the top level. In other words, packages cannot be nested.
Action: Move the package declaration outside the enclosing package.

PLS-00233: function name used as an exception name in when clause
Cause: The WHEN clause in an exception handler contains a function call instead of an exception name. A valid exception handler consists of a WHEN clause, which must specify an exception, followed by a sequence of statements to be executed when that exception is raised.
Action: Check the spelling of the identifier in the WHEN clause, then replace the function call with an exception name.

PLS-00234: PARAMETER STYLE SQL may not be specified with a PARAMETERS list
Cause: A subprogram cannot specify both PARAMETER STYLE SQL and an explicit PARAMETERS list. Use PARAMETER STYLE GENERAL to supply default PARAMETERS list types.
Action: Change the subprogram specification.

PLS-00235: the external type is not appropriate for the parameter
Cause: An unsuccessful attempt was made to convert a parameter to the specified external parameter type.
Action: Specify a different external type or parameter type.

PLS-00236: Invalid external type specification for string.
Cause: The external type specified is not valid for one of the following: INDICATOR, LENGTH, MAXLEN, TDO, DURATION, CHARSETID, or CHARSETFORM.
Action: Check the manual and specify an appropriate external type.

PLS-00237: invalid BY VALUE indicator or length specification
Cause: BY VALUE was specified with an indicator or length parameter that is being passed in OUT or IN OUT mode. Only IN mode parameters may be passed by value.
Action: Remove the BY VALUE specification or change it to IN mode.

PLS-00238: external parameter name string not found in formal parameter list
Cause: An external parameter name was specified that does not match one in the formal parameter list.
Action: Correct the external parameter name.
PLS-00239: invalid external type specification for SQLCODE
   Cause: An inappropriate external parameter type was specified for the SQLCODE parameter.
   Action: Correct the SQLCODE parameter specification.

PLS-00240: Invalid type specification for RETURN indicator, length, tdo, duration
   Cause: An inappropriate external parameter type was specified for the RETURN indicator, LENGTH, TDO, or DURATION.
   Action: Correct the RETURN parameter specification.

PLS-00241: invalid external type specification for SQLSTATE
   Cause: An inappropriate external parameter type was specified for the SQLSTATE parameter.
   Action: Correct the SQLSTATE parameter specification.

PLS-00242: invalid external type specification for CONTEXT
   Cause: An inappropriate external parameter type was specified for the CONTEXT parameter.
   Action: Correct the CONTEXT parameter specification.

PLS-00243: invalid external type specification for SQLNAME
   Cause: An inappropriate external parameter type was specified for the SQLNAME parameter.
   Action: Correct the SQLNAME parameter specification.

PLS-00244: Multiple declarations in foreign function formal parameter list
   Cause: There are multiple declarations of at least one the following FORMAL, INDICATOR, LENGTH, MAXLENGTH, or CONTEXT. PL/SQL allows only one declaration of the above for each formal parameter in the PARAMETERS clause.
   Action: Correct the PARAMETERS clause.

PLS-00245: Formals used in the 'parameters' clause must appear exactly once
   Cause: There are multiple declarations of the formal parameter in the PARAMETERS clause. PL/SQL allows only one declaration of the formal parameter in the PARAMETERS clause.
   Action: Correct the PARAMETERS clause.

PLS-00246: PARAMETER STYLE is unsupported
   Cause: A PARAMETER STYLE clause was placed in the external subprogram body.
   Action: Remove the PARAMETER STYLE clause.

PLS-00247: LIBRARY or ASSEMBLY name must be specified
   Cause: The LIBRARY or ASSEMBLY name is missing from the external subprogram body.
   Action: The LIBRARY or ASSEMBLY name was not specified in the external subprogram body.

PLS-00248: Invalid Library Syntax
   Cause: The LIBRARY syntax was entered incorrectly.
   Action: Correct the LIBRARY syntax and recompile.
PLS-00249: Invalid WITH CONTEXT Syntax  
**Cause:** CONTEXT was used in a WITH CONTEXT or a PARAMETERS clause. This is invalid.

**Action:** Check if WITH CONTEXT is used without specifying CONTEXT in the PARAMETERS clause or vice versa. The PARAMETERS clause must be complete. Thus if WITH CONTEXT is specified, then CONTEXT must be referenced in the PARAMETERS clause (if there is one).

PLS-00250: Incorrect Usage of *string* in parameters clause.

**Cause:** The usage of Keywords such as MAXLEN, LENGTH, CHARSETID, CHARSETFORM RETURN in the parameters clause was incorrect.

**Action:** This error occurs if keywords like MAXLEN, LENGTH, TDO, DURATION, CHARSETID, or CHARSETFORM cannot be used with PL/SQL formal parameters or the mode of the formal parameter. For example, MAXLEN can only be declared for a CHAR or VARCHAR2 PL/SQL variable and its use is allowed only for OUT or INOUT PL/SQL variables. Also, RETURN was specified in the parameters clause for a PL/SQL PROCEDURE. E.g. CREATE PROCEDURE proc IS EXTERNAL NAME ... LIBRARY ... PARAMETERS(RETURN INDICATOR SHORT, RETURN);

PLS-00251: RETURN, for actual function return, must be last in the parameters clause

**Cause:** RETURN specification for the actual function return, used within the parameters clause must hold the very last position. Example: The following will give this error since the RETURN specification for the actual function return in the parameters clause is not the last. FUNCTION myexternalfunc (var1 BINARY_INTEGER, var2 BINARY_INTEGER) RETURN BINARY_INTEGER IS EXTERNAL NAME "myexternalfunc" LIBRARY somelib PARAMETERS (var1 LONG, var2 SHORT, RETURN INT, RETURN INDICATOR SHORT); The correct syntax is the following. Note that RETURN for actual function return is the last specification in the parameters clause. FUNCTION myexternalfunc (var1 BINARY_INTEGER, var2 BINARY_INTEGER) RETURN BINARY_INTEGER IS EXTERNAL NAME "myexternalfunc" LIBRARY somelib PARAMETERS (var1 LONG, var2 SHORT, RETURN INDICATOR SHORT, RETURN INT);

**Action:** Correct the syntax of the RETURN specification in the parameters clause.

PLS-00252: reference to the wrong copy of package STANDARD

**Cause:** A reference is made to the fixed package version of STANDARD when the database is open, or to the on-disk version when the database is closed. Explicit use of a SYS.X$ package name can lead to this. One might also see this from a compilation that begins while the db is closed but has the bad luck to have another session open the db before compilation is complete. Another possible cause is having 'set serveroutput on' through svrmgrl when doing an 'alter database close'.

**Action:** Make use of on-disk versions of packages when the database is open and fixed (preloaded) versions when the database is closed. Do not attempt to use the wrong set. It should be quite hard to reference the wrong set, except by using SYS.X$ package names explicitly. Also, be sure to 'set serveroutput off' before doing an 'alter database close'.

PLS-00253: Formal parameter *string* missing in the parameters clause

**Cause:** The parameter clause does not have a matching parameter for a parameter specified in the formal parameter list.
Action: Provide a matching parameter in parameters clause for every formal parameter.

PLS-00254: OUT and IN/OUT modes cannot be used in this context
Cause: actual parameter mode (OUT, or IN/OUT) is not used properly in USING clause. For USING clause in an OPEN statement, only IN mode is allowed.
Action: change the parameter mode in the USING clause to an appropriate mode.

PLS-00255: CALL Specification parameters cannot have default values
Cause: CALL Specification formal parameters default values are disallowed.
Action: Remove the default values in the formal parameter list (spec or body) and compile again.

PLS-00256: string is not a valid external library or assembly
Cause: The supplied external library or assembly name in the external clause is not a valid alias library or assembly.
Action: Provide the name of a valid alias library or assembly which is previously declared.

PLS-00257: illegal use of EXTERNAL clause in a TYPE or PACKAGE specification
Cause: An EXTERNAL Clause was detected in a TYPE Specification or a PACKAGE specification.
Action: Remove the EXTERNAL Clause and use the new CALL Specification syntax.

PLS-00258: constrained datatypes disallowed in CALL Specifications
Cause: A call specification for C or Java cannot have constraints on the PL/SQL formal parameter types. PL/SQL types which have have constraints are NATURAL, NATURALN, POSITIVE, POSITIVEN, SIGNTYPE, INTEGER, INT, SMALLINT, DECIMAL, NUMERIC, DEC This includes NOT NULL constraints from POSITIVEN, NATURALN
Action: Use the unconstrained type for that PL/SQL formal declaration i.e NUMBER, BINARY_INTEGER or PLS_INTEGER

PLS-00259: rights model (AUTHID) must be specified
Cause: It is mandatory to specify the rights model if a PL/SQL PROCEDURE, FUNCTION, PACKAGE OR TYPE HAS CALL-Specifications
Action: Add the AUTHID clause indicating the rights model.

PLS-00260: Datetime/Interval constraints must be in range (0 .. 9)
Cause: A Datetime/Interval variable or attribute was declared with a constraint outside the legal range.
Action: Change the illegal constraint.

PLS-00261: Java CALL Specification not yet allowed as a method in an object type
Cause: A call specification declaring that an implementation is in Java has been found for a method of an object or opaque type. This usage is not yet supported.
Action: Implement the method using a language other than Java. A PL/SQL method implementation is permitted to call to Java through a call specification provided as a schema-level procedure or in a package; such a call specification can only target a static Java method, however. The PH2 errors until 300 are reserved for External Procedures.
PLS-00301: Invalid GOTO to non-label 'string'

*Cause:* A GOTO was attempted to something which is not a label (for example, a variable).

*Action:* Specify a valid label name.

PLS-00302: component 'string' must be declared

*Cause:* In a reference to a component (for example, in the name "A.B", "B" is a component of "A"), the component has not been declared. The component might be misspelled, its declaration might be faulty, or the declaration might be placed incorrectly in the block structure.

*Action:* Check the spelling and declaration of the component. Also confirm that the declaration is placed correctly in the block structure.

PLS-00303: qualifier 'string' must be declared

*Cause:* In a name such as "A.B", "A" is the qualifier, and "B" is a component of the qualifier. This error occurs when no declaration for the qualifier is found. The qualifier might be misspelled, its declaration might be faulty, or the declaration might be placed incorrectly in the block structure.

*Action:* Check the spelling and declaration of the qualifier. Also confirm that the declaration is placed correctly in the block structure.

PLS-00304: cannot compile body of 'string' without its specification

*Cause:* The compiled package specification required to compile a package body could not be found. Some possible causes follow: --the package name is misspelled --the package specification was never compiled --the compiled package specification is not accessible The package specification must be compiled before compiling the package body, and the compiler must have access to the compiled specification.

*Action:* Check the spelling of the package name. Compile the package specification before compiling the package body. Also, make sure the compiler has access to the compiled specification.

PLS-00305: previous use of 'string' (at line string) conflicts with this use

*Cause:* While looking for prior declarations of a cursor, procedure, function, or package, the compiler found another object with the same name in the same scope. Or, the headers of subprogram in a package specification and body do not match word for word.

*Action:* Check the spelling of the cursor, procedure, function, or package name. Also check the names of all constants, variables, parameters, and exceptions declared in the same scope. Then, remove or rename the object with the duplicate name. Or, change the headers of the packaged subprogram so that they match word for word.

PLS-00306: wrong number or types of arguments in call to 'string'

*Cause:* This error occurs when the named subprogram call cannot be matched to any declaration for that subprogram name. The subprogram name might be misspelled, a parameter might have the wrong datatype, the declaration might be faulty, or the declaration might be placed incorrectly in the block structure. For example, this error occurs if the built-in square root function SQRT is called with a misspelled name or with a parameter of the wrong datatype.

*Action:* Check the spelling and declaration of the subprogram name. Also confirm that its call is correct, its parameters are of the right datatype, and, if it is not a built-in function, that its declaration is placed correctly in the block structure.
PLS-00307: too many declarations of 'string' match this call

Cause: The declaration of a subprogram or cursor name is ambiguous because there was no exact match between the declaration and the call and more than one declaration matched the call when implicit conversions of the parameter datatypes were used. The subprogram or cursor name might be misspelled, its declaration might be faulty, or the declaration might be placed incorrectly in the block structure.

Action: Check the spelling and declaration of the subprogram or cursor name. Also confirm that its call is correct, its parameters are of the right datatype, and, if it is not a built-in function, that its declaration is placed correctly in the block structure.

PLS-00308: this construct is not allowed as the origin of an assignment

Cause: The construct or expression does not designate a value that can be assigned to a variable. For example, the datatype name NUMBER cannot appear on the right hand side of an assignment statement as in X := NUMBER.

Action: Correct the illegal assignment statement.

PLS-00309: with %LAST attribute, 'string' must be a variable of an enumerated type

Cause: The "%LAST" attribute must be applied to an identifier that has been declared as a variable of an enumerated type (or subtype of an enumerated type). This error occurs when "%LAST" follows some identifier that has not been so declared.

Action: None

PLS-00310: with %ROWTYPE attribute, 'string' must name a table, cursor or cursor-variable

Cause: The %ROWTYPE attribute must be applied to an identifier declared as a cursor, cursor variable, or database table. This error occurs when %ROWTYPE follows some identifier that has not been so declared.

Action: Change the declaration or do not apply the %ROWTYPE attribute to the identifier.

PLS-00311: the declaration of "string" is incomplete or malformed

Cause: This occurrence of the identifier cannot be compiled because its type has not been properly defined.

Action: Correct the faulty datatype declaration.

PLS-00312: a positional parameter association may not follow a named association

Cause: When a list of parameters is passed to a subprogram or cursor, if both positional and named associations are used, all positional associations must be placed in their declared order and before all named associations, which can be in any order.

Action: Reorder the parameter list to meet the requirements or use named association only.

PLS-00313: 'string' not declared in this scope

Cause: There is no declaration for the given identifier within the scope of reference. The identifier might be misspelled, its declaration might be faulty, or the declaration might be placed incorrectly in the block structure.

Action: Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.
PLS-00314: TABLE declarations are not allowed as PL/SQL local variables

Cause: In a precompiled program, the DECLARE TABLE statement was mistakenly used inside an embedded PL/SQL block. If an embedded PL/SQL block refers to a database table that does not yet exist, use the DECLARE TABLE statement to tell the precompiler what the table will look like. However, DECLARE TABLE statements are allowed only in the host program.

Action: Move the DECLARE TABLE statement outside the embedded PL/SQL block. If you want a variable that can store an entire row of data selected from a database table or fetched from a cursor or cursor variable, use the %ROWTYPE attribute.

PLS-00315: Implementation restriction: unsupported table index type

Cause: In the INDEX BY clause of a PL/SQL table declaration, a datatype other than BINARY_INTEGER, PLS_INTEGER, or VARCHAR2 was specified. PL/SQL tables can have one column and a primary key. The column can have any scalar type, but the primary key must be either a binary integer type or VARCHAR2.

Action: Use one of the supported key types in the INDEX BY clause.

PLS-00316: PL/SQL TABLEs must use a single index

Cause: In the INDEX BY clause of a PL/SQL table declaration, a composite primary key was specified. PL/SQL tables must have a simple, unnamed primary key of a binary integer or VARCHAR2 type.

Action: Use one of the supported key types in the INDEX BY clause.

PLS-00317: incomplete type "string" was not completed in its declarative region

Cause: An incomplete type declaration was not completed in the declarative region where it was declared.

Action: Complete the type appropriately, then retry the operation.

PLS-00318: type "string" is malformed because it is a non-REF mutually recursive type

Cause: A type-declaration such as: -- a non-REF recursive type, for example: type t is record (a t); or -- non-REF mutually dependent types, for example: type t1; type t2 is record (a t1); type t1 is record (a t2); was performed. In these examples, the type is malformed because it participates in a mutually recursive non-REF relationship with itself and possibly other types.

Action: Use another type to remove the recursion.

PLS-00319: subquery in an IN or NOT IN clause must contain exactly one column

Cause: An invalid expression such as X IN (SELECT A,B ...) was used. When a [NOT]IN clause is used with a subquery, it does not test for set membership. The number of expressions in the [NOT]IN clause and the subquery select list must match. So, in the example above, the subquery must specify at most one column.

Action: Change the subquery to select only one column.

PLS-00320: the declaration of the type of this expression is incomplete or malformed

Cause: In a declaration, the name of a variable or cursor is misspelled or the declaration makes a forward reference. Forward references are not allowed in PL/SQL. A variable or cursor must be declared before it is referenced in other statements, including other declarative statements. For example, the following declaration of dept_rec raises this exception because it refers to a cursor not yet declared: DECLARE dept_rec dept_cur%ROWTYPE; CURSOR dept_cur IS SELECT ... ...
Action: Check the spelling of all identifiers in the declaration. If necessary, move the declaration so that it makes no forward references.

**PLS-00321: expression 'string' is inappropriate as the left hand side of an assignment statement**

**Cause:** The expression does not designate a variable that can have a value assigned to it. For example, the function SYSDATE cannot appear on the left hand side of an assignment statement such as SYSDATE := '01-JAN-1990';

**Action:** Correct the illegal assignment statement.

**PLS-00322: declaration of a constant 'string' must contain an initialization assignment**

**Cause:** A constant declaration lacks the assignment of an initial value. For example, in the following declaration " := 3.14159" is the initialization clause: "pi constant number := 3.14159;"

**Action:** Correct the constant declaration by supplying the missing initialization assignment.

**PLS-00323: subprogram or cursor 'string' is declared in a package specification and must be defined in the package body**

**Cause:** A subprogram specification was placed in a package specification, but the corresponding subprogram body was not placed in the package body. The package body implements the package specification. So, the package body must contain the definition of every subprogram declared in the package specification.

**Action:** Check the spelling of the subprogram name. If necessary, add the missing subprogram body to the package body.

**PLS-00324: cursor attribute may not be applied to non-cursor 'string'**

**Cause:** This error occurs when a cursor-attribute ("%FOUND", "%NOTFOUND", "%ROWS", "%IS_OPEN", etc.) appears following an identifier that is not declared as a cursor or cursor variable. It occurs, for example, if the variable name my_cur in my_cur%FOUND was not properly declared as a cursor or if the variable declaration was placed incorrectly in the block structure.

**Action:** Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

**PLS-00325: non-integral numeric literal 'string' is inappropriate in this context**

**Cause:** A non-integral numeric literal was used in a context that requires an integer (a number with no digits to the right of its decimal point).

**Action:** Replace the inappropriate literal with an integer literal.

**PLS-00326: IN clause must contain same number of expressions as subquery**

**Cause:** The number of expressions in an IN clause did not equal the number of expressions in a corresponding subquery select list. For example, the following statement is invalid because the IN clause contains two expressions, but the subquery select list contains just one: ... WHERE (ename, sal) IN (SELECT sal FROM emp);

**Action:** Check the number of expressions in each set, then revise the statement to make the numbers equal.

**PLS-00327: "string" is not in SQL scope here**
Cause: In a SQL statement, a reference was made to an out-of-scope database object. The referenced object might be misspelled, or the reference might be mixed, as in the following example: CURSOR c1 IS SELECT dept.dname FROM emp;

Action: Check the spelling of all database objects in the SQL statement, and make sure all references are to objects within the current scope.

PLS-00328: A subprogram body must be defined for the forward declaration of string.

Cause: A subprogram specification was declared, but the corresponding subprogram body was not defined. Write the subprogram specification and body as a unit. An alternative solution is to separate the specification from its body, which is necessary when you want to define mutually recursive subprograms or you want to group subprograms in a package.

Action: Check the spelling of the subprogram name. If necessary, supply the missing subprogram body.

PLS-00329: schema-level type has illegal reference to string

Cause: An attempt was made to make a reference from a schema-level type to something other than a schema-level type.

Action: Replace the illegal reference and retry the operation.

PLS-00330: invalid use of type name or subtype name

Cause: A datatype or subtype specifier was mistakenly used in place of a constant, variable, or expression. For example, the code might look like IF emp_count > number THEN ... – illegal; NUMBER is a datatype specifier

Action: Replace the datatype or subtype specifier with a valid constant, variable, or expression.

PLS-00331: illegal reference to string

Cause: You had an EITHER

1. an illegal reference to some object in user SYS. to use one of them in an illegal way OR

2. an illegal reference to a remote object type.

Action: Remove the reference.

PLS-00332: "string" is not a valid prefix for a qualified name

Cause: You have a malformed qualified name because the prefix is not valid.

Action: Remove or change the reference.

PLS-00333: "string" must match an object-table alias in this context

Cause: The name, appearing in the context of a REF or VALUE, did not resolve to an object-table alias.

Action: 1) If there is no object table in the scope, then remove the REF or VALUE; or provide the missing object table reference. 2) If there is an object table in the scope, but you’re not referring to it, add the reference.

PLS-00334: "string" matches table or view without an alias

Cause: You have a reference to a table or view name without an alias.

Action: Replace the reference with a reference to an object-table alias.

PLS-00335: a package name conflicts with an existing object
Cause: In a CREATE PACKAGE statement, a package (which is a database object that groups logically related PL/SQL types, objects, and subprograms) was given the same name as an existing database object.

Action: Give the package a unique name.

PLS-00336: non-object-table "string" illegal in this context
Cause: You have a REF or VALUE modifier for a non-object-table
Action: Replace the reference with a reference to an object-table alias.

PLS-00337: "string" matches too many object table aliases
Cause: You have an ambiguous reference to an object-table alias; there are at least two object-table aliases in the same scope.
Action: Remove all but one of the references or change the alias names of the remaining.

PLS-00338: unable to resolve "string" as a column or row expression
Cause: You have a reference to a name that could not be resolved as a column or row expression. This occurred in an update or insert statement involving an object-table.
Action: If this is an update statement and you intended to code this as a column reference, fix it as such. If you intended to code this as a row expression, change this to refer to an alias of an object-table.

PLS-00339: "string" matches object-table without a REF or VALUE modifier
Cause: You have an object-table name appearing without a REF or VALUE modifier.
Action: If you intended to code this with a REF or VALUE modifier, add the modifier; if you intended to code this as a column reference, change the reference appropriately; otherwise, remove the reference.

PLS-00341: declaration of cursor 'string' is incomplete or malformed
Cause: A cursor declaration is improper or an identifier referenced in the cursor declaration was not properly declared. A return type that does not refer to an existing database table or a previously declared cursor or cursor variable might have been specified. For example, the following cursor declaration is illegal because c1 is not yet fully defined: CURSOR c1 RETURN c1%ROWTYPE IS SELECT ... -- illegal In this case, a return type does not have to be specified because it is implicit.
Action: Check the spelling and declaration of the cursor name and any identifiers referenced in the cursor declaration. Also confirm that the declaration is placed correctly in the block structure. If a return type was specified, make sure that it refers to an existing database table or a previously declared cursor or cursor variable.

PLS-00351: Not logged onto database 'string'
Cause: An attempt was made to access an Oracle database without being logged on. Probably, an invalid username or password was entered.
Action: Log on to Oracle with a correctly spelled username and password before trying to access the database.

PLS-00352: Unable to access another database 'string'
Cause: An attempt was made to reference an object in a database other than the current local or remote Oracle database.
**Action:** Correct the reference and make sure the object is in the current Oracle database.

**PLS-00353: 'string' must name a user in the database**  
**Cause:** This error occurs when the username was misspelled or when the user does not exist in the database.  
**Action:** Check the spelling of the username and make sure the user exists.

**PLS-00354: username must be a simple identifier**  
**Cause:** A qualified username such as scott.accts is not permitted in this context.  
**Action:** Specify a simple username such as scott instead.

**PLS-00355: use of pl/sql table not allowed in this context**  
**Cause:** A PL/SQL table was referenced in the wrong context (for example, with a remote link).  
**Action:** Remove the PL/SQL table reference or change the context.

**PLS-00356: 'string' must name a table to which the user has access**  
**Cause:** The named table is not accessible to the user. This error occurs when the table name or username was misspelled, the table and/or user does not exist in the database, the user was not granted the necessary privileges, or the table name duplicates the name of a local variable or loop counter.  
**Action:** Check the spelling of the table name and username. Also confirm that the table and user exist, the user has the necessary privileges, and the table name does not duplicate the name of a local variable or loop counter.

**PLS-00357: Table,View Or Sequence reference 'string' not allowed in this context**  
**Cause:** A reference to database table, view, or sequence was found in an inappropriate context. Such references can appear only in SQL statements or (excluding sequences) in %TYPE and %ROWTYPE declarations. Some valid examples follow: SELECT ename, emp.deptno, dname INTO my_ename, my_deptno, my_dept .FROM emp, dept WHERE emp.deptno = dept.deptno; DECLARE last_name emp.ename%TYPE; dept_rec dept%ROWTYPE;  
**Action:** Remove or relocate the illegal reference.

**PLS-00358: column 'string' exists in more than one table; use qualifier**  
**Cause:** The statement is ambiguous because it specifies two or more tables having the same column name. For example, the following statement is ambiguous because deptno is a column in both tables: SELECT deptno, loc INTO my_depto, my_loc FROM emp, dept;  
**Action:** Precede the column name with the table name (as in emp.deptno) so that the column reference is unambiguous.

**PLS-00359: assignment target in 'string' must have components**  
**Cause:** An assignment target was declared that lacks the components needed to store the assigned values. For example, this error occurs if you try to assign a row of column values to a variable instead of a record, as follows: DECLARE dept_rec dept%ROWTYPE; my_deptno dept.deptno%TYPE; ... BEGIN SELECT deptno, dname, loc INTO my_depto -- invalid FROM dept WHERE ...  
**Action:** Check the spelling of the names of the assignment target and all its components. Make sure the assignment target is declared with the required components and that the declaration is placed correctly in the block structure.
PLS-00360: cursor declaration without body needs return type

**Cause:** A cursor declaration lacks either a body (SELECT statement) or a return type. If you want to separate a cursor specification from its body, a return type must be supplied, as in CURSOR c1 RETURN emp%ROWTYPE;

**Action:** Add a SELECT statement or return type to the cursor declaration.

PLS-00361: IN cursor 'string' cannot be OPEN'ed

**Cause:** A cursor parameter with mode IN cannot be modified, and therefore cannot be opened.

**Action:** Change the cursor parameter to be IN OUT or OUT

PLS-00362: invalid cursor return type; 'string' must be a record type

**Cause:** In a cursor specification or REF CURSOR type definition, a non-record type such as NUMBER or TABLE was specified as the return type. This is not allowed. Only the following return types are allowed: <record_type_name> <record_name>%TYPE <table_name>%ROWTYPE <cursor_name>%ROWTYPE

**Action:** Revise the cursor specification or REF CURSOR type definition so that it specifies one of the above return types.

PLS-00363: expression 'string' cannot be used as an assignment target

**Cause:** A literal, constant, IN parameter, loop counter, or function call was mistakenly used as the target of an assignment. For example, the following statement is illegal because the assignment target, 30, is a literal: SELECT deptno INTO 30 FROM dept WHERE ... -- illegal

**Action:** Correct the statement by using a valid assignment target.

PLS-00364: loop index variable 'string' use is invalid

**Cause:** An attempt was made to assign the value of an OUT parameter to

**Action:** Use an IN OUT parameter instead of the OUT parameter. Inside a

PLS-00366: subtype of a NOT NULL type must also be NOT NULL

**Cause:** After a subtype was defined as NOT NULL, it was used as the base type for another subtype defined as NULL. That is not allowed. For example, the code might look like DECLARE SUBTYPE Weekday IS INTEGER NOT NULL; SUBTYPE Weekend IS Weekday NULL; -- illegal instead of DECLARE SUBTYPE Weekday IS INTEGER NOT NULL; SUBTYPE Weekend IS Weekday;

**Action:** Revise the subtype definitions to eliminate the conflict.

PLS-00367: a RAISE statement with no exception name must be inside an exception handler

**Cause:** A RAISE statement not followed by an exception name was found outside an exception handler

**Action:** Delete the RAISE statement, relocate it to an exception handler, or supply the missing exception name.

PLS-00368: in RAISE statement, 'string' must be an exception name

**Cause:** The identifier in a RAISE statement is not a valid exception name.

**Action:** Make sure the identifier in the RAISE statement was declared as an exception and is correctly placed in the block structure. If you are using the name of a PL/SQL predefined exception, check its spelling.

PLS-00369: no choices may appear with choice OTHERS in an exception handler
Cause: A construct of the form WHEN excep1 OR OTHERS => was encountered in the definition of an exception handler. The OTHERS handler must appear by itself as the last exception handler in a block.

Action: Remove the identifier that appears with OTHERS or write a separate exception handler for that identifier.

PLS-00370: OTHERS handler must be last among the exception handlers of a block

Cause: One or more exception handlers appear after an OTHERS handler. However, the OTHERS handler must be the last handler in a block or subprogram because it acts as the handler for all exceptions not named specifically.

Action: Move the OTHERS handler so that it follows all specific exception handlers.

PLS-00371: at most one declaration for 'string' is permitted

Cause: A reference to an identifier was ambiguous because there were multiple declarations for the identifier. At most one local variable with a given identifier is permitted in the declarative part of a block, procedure, or function. At most one label with a given identifier may appear in a block.

Action: Check the spelling of the identifier. If necessary, remove all but one declaration of the identifier.

PLS-00372: In a procedure, RETURN statement cannot contain an expression

Cause: In a procedure, a RETURN statement contains an expression, which is not allowed. In functions, a RETURN statement must contain an expression because its value is assigned to the function identifier. However, in procedures, a RETURN statement simply lets you exit before the normal end of the procedure is reached.

Action: Remove the expression from the RETURN statement, or redefine the procedure as a function.

PLS-00373: EXIT/CONTINUE label 'string' must label a LOOP statement

Cause: The label in the EXIT or CONTINUE statement did not refer to a LOOP statement. An EXIT or CONTINUE statement need not specify a label. However, if a label is specified (as in EXIT my_label or CONTINUE my_label), it must refer to a LOOP statement.

Action: Make sure the label name is spelled correctly and that it refers to a LOOP statement.

PLS-00374: illegal EXIT/CONTINUE statement; must appear inside the loop labeled 'string'

Cause: The label in the EXIT or CONTINUE statement did not refer to a loop statement. An EXIT or CONTINUE statement need not specify a label. However, if a label is specified (as in EXIT my_label or CONTINUE my_label), the EXIT or CONTINUE statement must be inside the LOOP statement designated by that label.

Action: Make sure the label name is spelled correctly; if necessary, move the EXIT or CONTINUE statement inside the LOOP statement to which the label refers.

PLS-00375: illegal GOTO statement; this GOTO cannot branch to label 'string'

Cause: The line and column numbers accompanying the error message refer to a GOTO that branches from outside a construct (a loop or exception handler, for example) that contains a sequence of statements to a label inside that sequence of statements. Such a branch is not allowed.
**Action:** Either move the GOTO statement inside the sequence of statements or move the labeled statement outside the sequence of statements.

**PLS-00376: illegal EXIT/CONTINUE statement; it must appear inside a loop**

**Cause:** An EXIT or CONTINUE statement was found outside of a loop construct. The EXIT statement is used to exit prematurely from a loop and the CONTINUE statement is used to begin the next iteration of a loop; each must always appear within a loop.

**Action:** Either remove the EXIT or CONTINUE statement or place it inside a loop.

**PLS-00377: internal type PLS_INTEGER is not included in this release of PL/SQL**

**Cause:** The type-name INTEGER was used in a declaration.

**Action:** None

**PLS-00378: invalid compilation unit for this release of PL/SQL**

**Cause:** A compilation unit is a file containing PL/SQL source code that is passed to the compiler. Only compilation units containing blocks, declarations, statements, and subprograms are allowed. This error occurs when some other language construct is passed to the compiler.

**Action:** Make sure the compilation unit contains only blocks, declarations, statements, and subprograms.

**PLS-00379: CASE statements are not included in this release of PL/SQL**

**Cause:** The unit being compiled contains a CASE statement. However, the current release of PL/SQL does not support CASE statements.

**Action:** Remove the CASE statement from the compilation unit.

**PLS-00380: functions and procedures are not included in this release of PL/SQL**

**Cause:** The program being compiled contains a declaration of a FUNCTION or PROCEDURE.

**Action:** None

**PLS-00381: type mismatch found at 'string' between column and variable in subquery or INSERT**

**Cause:** The datatypes of a column and a variable do not match. The variable was encountered in a subquery or INSERT statement.

**Action:** Change the variable datatype to match that of the column.

**PLS-00382: expression is of wrong type**

**Cause:** An expression has the wrong datatype for the context in which it was found.

**Action:** Change the datatype of the expression. You might want to use datatype conversion functions.

**PLS-00383: type mismatch found at 'string' inside an IN or NOT IN clause**

**Cause:** In a test for set membership such as X NOT IN (SELECT Y ...), the expressions X and Y do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

**Action:** Change the expressions so that their datatypes match. You might want to use datatype conversion functions in the select list.

**PLS-00384: type mismatch found at 'string' in UPDATE's SET clause**
Cause: The column to the left of the equal sign in the SET clause of an UPDATE statement does not match in datatype with the column, expression, or subquery to the right of the equal sign, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the expressions so that their datatypes match. You might want to use datatype conversion functions in the SET clause.

PLS-00385: type mismatch found at 'string' in SELECT...INTO statement
Cause: The expressions to the left and right of the INTO clause in a SELECT...INTO statement do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the expressions so that their datatypes match. You might want to use datatype conversion functions in the select list.

PLS-00386: type mismatch found at 'string' between FETCH cursor and INTO variables
Cause: An assignment target in the INTO list of a FETCH statement does not match in datatype with the corresponding column in the select list of the cursor declaration, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the cursor declaration or change the datatype of the assignment target. You might want to use datatype conversion functions in the select list of the query associated with the cursor.

PLS-00387: INTO variable cannot be a database object
Cause: An item in the INTO list of a FETCH or SELECT statement was found to be a database object. INTO introduces a list of user-defined variables to which output values are assigned. Therefore, database objects cannot appear in the INTO list.

Action: Check the spelling of the INTO list item. If necessary, remove the item from the INTO list or replace it with a user-defined output variable.

PLS-00388: undefined column 'string' in subquery
Cause: A subquery contains a column name that was not defined in the specified table.

Action: Change the expression to specify a column that was defined.

PLS-00389: table, view or alias name "string" not allowed in this context
Cause: A table, view or alias name <name> corresponding to a regular (non-object) table appeared in an inappropriate context.

Action: Remove the reference, or, if you intended to code this as a column reference, fix it as such.

PLS-00390: undefined column 'string' in INSERT statement
Cause: Check the spelling of the column name, then change the expression so that it refers only to defined columns.

Action: Check the spelling of the column name, then change the expression so that it refers only to defined columns.

PLS-00391: undefined column 'string' in UPDATE statement
Cause: An UPDATE statement refers to a column not defined for the table or view being updated.
Action: Check the spelling of the column name, then revise the statement so that it refers only to defined columns.

PLS-00392: Type mismatch in arguments to BETWEEN
Cause: In a comparison such as X BETWEEN Y AND Z, the expressions X, Y, and Z do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.
Action: Change the expressions so that their datatypes match. You might want to use datatype conversion functions.

PLS-00393: wrong number of columns in SELECT...INTO statement
Cause: The number of columns selected by a SELECT...INTO statement does not match the number of variables in the INTO clause.
Action: Change the number of columns in the select list or the number of variables in the INTO clause so that the numbers match.

PLS-00394: wrong number of values in the INTO list of a FETCH statement
Cause: The number of variables in the INTO clause of a FETCH statement does not match the number of columns in the cursor declaration.
Action: Change the number of variables in the INTO clause or the number of columns in the cursor declaration so that the numbers match.

PLS-00395: wrong number of values in VALUES clause of INSERT statement
Cause: The number of columns in an INSERT statement does not match the number of values in the VALUES clause. For example, the following statement is faulty because no column is specified for the value 20: INSERT INTO emp (empno, ename) VALUES (7788, 'SCOTT', 20);
Action: Change the number of items in the column list or the number of items in the VALUES list so that the numbers match.

PLS-00396: INSERT statement's subquery yields wrong number of columns
Cause: The number of columns in a subquery select list. For example, the following statement is faulty because no corresponding column is specified for col3: INSERT INTO emp (ename, empno) SELECT col1, col2, col3 FROM ...
Action: Change the number of items in the column list of the INSERT statement or the number of items in the select list so that the numbers match.

PLS-00397: Type mismatch in arguments to IN
Cause: In a test for set membership such as X IN (Y, Z), the expressions X, Y, and Z do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.
Action: Change the expressions so that their datatypes match. You might want to use datatype conversion functions.

PLS-00398: wrong number of columns in UNION, INTERSECT, or MINUS expression
Cause: The SELECT clauses to the left and right of a UNION, INTERSECT, or MINUS expression do not select the same number of columns. For example, the following statement is faulty because the select lists do not contain the same number of items: CURSOR my_cur IS SELECT ename FROM emp INTERSECT SELECT ename, empno FROM emp;
Action: Change the select lists so that they contain the same number of items.
PLS-00399: different types of columns in UNION, INTERSECT, or MINUS expression

**Cause:** The select lists to the left and right of a UNION, INTERSECT, or MINUS expression select at least one column that is mismatched in datatype. For example, the following statement is faulty because the constant 3 has datatype NUMBER, whereas SYSDATE has datatype DATE: CURSOR my_cur IS SELECT 3 FROM emp INTERSECT SELECT SYSDATE FROM emp;

**Action:** Change the select lists so that they match in datatype. You might want to use datatype conversion functions in the select list of one or more queries.

PLS-00400: different number of columns between cursor SELECT statement and return value

**Cause:** In a cursor declaration, a return type (such as RETURN emp%ROWTYPE) was specified, but the number of returned column values does not match the number of select-list items.

**Action:** Change the cursor return type or the select list so that the number of returned column values matches the number of select-list items.

PLS-00401: different column types between cursor SELECT statement and return value found at 'string'

**Cause:** In a cursor declaration, a return type (such as RETURN emp%ROWTYPE) was specified, but a returned column value and its corresponding select-list item have different datatypes.

**Action:** Change the cursor return type or the select list so that each returned column value and its corresponding select-list item have the same datatype.

PLS-00402: alias required in SELECT list of cursor to avoid duplicate column names

**Cause:** A cursor was declared with a SELECT statement that contains duplicate column names. Such references are ambiguous.

**Action:** Replace the duplicate column name in the select list with an alias.

PLS-00403: expression 'string' cannot be used as an INTO-target of a SELECT/FETCH statement

**Cause:** A FETCH statement was unable to assign a value to an assignment target in its INTO list because the target is not a legally formed and declared variable. For example, the following assignment is illegal because 'Jones' is a character string, not a variable: FETCH my_cur INTO 'Jones';

**Action:** Check the spelling and declaration of the assignment target. Make sure that the rules for forming variable names are followed.

PLS-00404: cursor 'string' must be declared with FOR UPDATE to use with CURRENT OF

**Cause:** The use of the CURRENT OF cursor_name clause is legal only if cursor_name was declared with a FOR UPDATE clause.

**Action:** Add a FOR UPDATE clause to the definition of the cursor or do not use the CURRENT OF cursor_name clause.

PLS-00405: subquery not allowed in this context

**Cause:** A subquery was used in an inappropriate context, such as: if (SELECT deptno FROM emp WHERE ...) = 20 then ... Subqueries are allowed only in SQL statements.
**Action:** The same result can be obtained by using a temporary variable, as in:
```
SELECT deptno INTO temp_var FROM emp WHERE ...; IF temp_var = 20 THEN ... 
```

**PLS-00406: length of SELECT list in subquery must match number of assignment targets**

**Cause:** A query select list is not the same length as the list of targets that will receive the returned values. For example, the following statement is faulty because the subquery returns two values for one target: UPDATE emp SET ename = (SELECT ename, empno FROM emp WHERE ename = 'SMITH') ...

**Action:** Change one of the lists so that they contain the same number of items.

**PLS-00407: '*' not allowed here; a list of columns is required**

**Cause:** An asterisk (*) was used as an abbreviation for a list of column names. However, in this context the column names must be written out explicitly.

**Action:** Replace the asterisk with a list of column names.

**PLS-00408: duplicate column 'string' not permitted in INSERT or UPDATE**

**Cause:** An UPDATE or INSERT statement has a column list that contains duplicate column names.

**Action:** Check the spelling of the column names, then eliminate the duplication.

**PLS-00409: duplicate variable 'string' in INTO list is not permitted**

**Cause:** The same variable appears twice in the INTO list of a SELECT or FETCH statement.

**Action:** Remove one of the variables from the INTO list.

**PLS-00410: duplicate fields in RECORD,TABLE or argument list are not permitted**

**Cause:** When a user-defined record was declared, the same name was given to two fields. Like column names in a database table, field names in a user-defined record must be unique.

**Action:** Check the spelling of the field names, then remove the duplicate.

**PLS-00411: Number of values in aggregate and in subquery don't match**

**Cause:** In a statement of the form aggregate = subquery, the numbers of values in the aggregate and subquery are unequal. For example, the code might look like ...
```
WHERE (10,20,30) = (SELECT empno,deptno FROM emp WHERE...); 
```

**Action:** Revise the aggregate or subquery so that the numbers of values match.

**PLS-00412: list of values not allowed as argument to this function or procedure**

**Cause:** A parenthesized list of values separated by commas (that is, an aggregate) was used in the wrong context. For example, the following usage is invalid:
```
WHERE (col1, col2) > (SELECT col3, col4 FROM my_table ...)
```
However, an equal sign can take a list of values and a subquery as left- and right-hand-side arguments, respectively. So, the following usage is valid: WHERE (col1, col2) = (SELECT col3, col4 FROM my_table ...)

**Action:** Rewrite the expression. For example, the clause WHERE (col1, col2) > (SELECT col3, col4 FROM my_table ...) can be rewritten as WHERE col1 > (SELECT col3 FROM my_table ...) AND col2 > (SELECT col4 FROM my_table ...)

**PLS-00413: identifier in CURRENT OF clause is not a cursor name**

**Cause:** The identifier in a CURRENT OF clause names an object other than a cursor.
**Action:** Check the spelling of the identifier. Make sure that it names the cursor in the DELETE or UPDATE statement and that it names the cursor itself, not a FOR-loop variable.

**PLS-00414: no column 'string' in table**

**Cause:** A table name or alias was used to qualify a column reference, but the column was not found in that table. Either the column was never defined or the column name is misspelled.

**Action:** Confirm that the column was defined and check the spelling of the column name.

**PLS-00415: 'string' is an OUT parameter and cannot appear in a function**

**Cause:** An OUT or IN OUT formal parameter was used in a function specification.

**Action:** None

**PLS-00416: The third argument of DECODE cannot be NULL**

**Cause:** The third argument of DECODE is NULL.

**Action:** Enter an argument with a proper type and value.

**PLS-00417: unable to resolve "string" as a column**

**Cause:** A database table, view, or column was specified in a SQL statement that does not exist, or the privileges required to access the table or view were not granted.

**Action:** Check the spelling of the table (or view) and column names; make sure the table and columns exist. If necessary, ask the DBA to grant the privileges required to access the table.

**PLS-00418: array bind type must match PL/SQL table row type**

**Cause:** A host array was passed (by an Oracle Precompiler program, for example) to a PL/SQL subprogram for binding to a PL/SQL table parameter. However, the datatypes of the array elements and PL/SQL table rows are incompatible. So, the binding failed.

**Action:** Change the datatype of the array elements or PL/SQL table rows to make the datatypes compatible.

**PLS-00419: reference to remote attribute not permitted**

**Cause:** An attempt was made to reference a remote cursor attribute, which is not allowed. For example, the code might look like IF SQL%NOTFOUND@newyork THEN ... 

**Action:** Do not try to reference a remote cursor attribute.

**PLS-00420: can't call builtin routines remotely**

**Cause:** An attempt was made to call a built-in PL/SQL function remotely, which is not allowed. For example, the code might look like my_sqlerrm := SQLERRM@newyork; or INSERT INTO emp VALUES (my_empno, STANDARD.RTRIM@newyork(my_ename), ...);

**Action:** Always call built-in functions locally; never specify a database link.

**PLS-00421: circular synonym 'string'**

**Cause:** Directly or indirectly, a synonym was defined in terms of itself, creating a circular definition.

**Action:** Redefine the synonyms to eliminate the circular definition.
PLS-00422: no PL/SQL translation for the bindtype given for this bind variable

**Cause:** A host variable was passed (by an Oracle Precompiler program, for example) to PL/SQL for binding. However, its datatype is not compatible with any PL/SQL datatype. So, the binding failed.

**Action:** Change the datatype of the host variable to make it compatible with a PL/SQL datatype.

PLS-00423: ORDER BY item must be the number of a SELECT-list expression

**Cause:** A column alias was used in the ORDER BY clause of a SELECT statement that uses a UNION, INTERSECT, or MINUS set operator. This is not allowed. In such cases, expressions in the ORDER BY clause must be unsigned integers that designate the ordinal positions of select-list items.

**Action:** Change the alias in the ORDER BY clause to an unsigned integer that designates the ordinal position of the select item in question.

PLS-00424: RPC defaults cannot include Package State

**Cause:** An attempt was made to call a remote subprogram whose defaulted parameters depend on package state, which is not allowed. When calling remote subprograms, the actual parameters must be passed explicitly if the corresponding formal parameters depend on package state.

**Action:** Call the remote subprogram by passing each actual parameter explicitly.

PLS-00425: in SQL, function argument and return types must be SQL type

**Cause:** When a cursor variable was declared as the formal parameter of a

**Action:** Change the parameter mode from OUT to IN or IN OUT.

PLS-00427: RPC defaults cannot use builtins when versions of STANDARD differ

**Cause:** An attempt was made to call a remote subprogram whose defaulted parameter value is calculated using a builtin operation. If the calling system uses a different version of package STANDARD than does the called system, a defaulted expression must be either a simple numeric or string literal, NULL, or a direct call to a user-written function.

**Action:** Call the remote subprogram by passing each actual parameter value explicitly.

PLS-00428: an INTO clause is expected in this SELECT statement

**Cause:** The INTO clause of a SELECT INTO statement was omitted. For example, the code might look like SELECT deptno, dname, loc FROM dept WHERE ... instead of SELECT deptno, dname, loc INTO dept_rec FROM dept WHERE ... In PL/SQL, only a subquery is written without an INTO clause.

**Action:** Add the required INTO clause.

PLS-00429: unsupported feature with RETURNING clause

**Cause:**
- INTO clause and RETURNING clause cannot be use in the same statement
- RETURNING clause is currently not supported for object type columns, LONG columns, records, %rowtypes, remote tables and INSERT with subquery. This is as ORA-28815.

**Action:** Use separate select statement to get the values.

PLS-00430: FORALL iteration variable *string* is not allowed in this context
Cause: FORALL iteration variable can only be used as a subscript. It cannot be used directly or as a part of an expression.
Action: Use FORALL variable only as a collection subscript.

PLS-00431: bulk SQL attributes must use a single index
Cause: More than one index specified to access SQL bulk attribute.
Action: Use a single index of integer datatype.

PLS-00432: implementation restriction: cannot use FORALL and BULK COLLECT INTO together in SELECT statements
Cause: SELECT statement contains both the FORALL and BULK COLLECT INTO phrases.
Action: Do not use FORALL and BULK COLLECT INTO together in SELECT statements.

PLS-00433: inconsistent package STANDARD
Cause: PL/SQL compiler could not find the entries (such as type declarations) that should exist in the package STANDARD.
Action: Make sure that the correct version of package STANDARD is available in the current Oracle database, then retry compilation.

PLS-00434: record field has unsupported type: "string"
Cause: An attempt was made to use an unsupported type for a record field. In this release, the use of the SQL92 datetime types (time, timestamp, time with time zone, timestamp with time zone, interval year to month, interval day to second) are not supported in record fields.
Action: Use only supported types for record fields.

PLS-00435: DML statement without BULK In-BIND cannot be used inside FORALL
Cause: The DML (SELECT/INSERT/DELETE/UPDATE) statement inside the FORALL statement does not contain BULK IN-BIND variables.
Action: The DML (SELECT/INSERT/DELETE/UPDATE) statement inside the FORALL statement must contain BULK IN-BIND variables.

PLS-00436: implementation restriction: cannot reference fields of BULK In-BIND table of records or objects
Cause: table(bulk_index).field is not supported at run-time.
Action: Use FOR loop with instead of the FORALL DML statement (MERGE/INSERT/DELETE/UPDATE).

PLS-00437: FORALL bulk index cannot be used in string clause
Cause: RETURNING table(bulk_index) is not supported.
Action: Use RETURNING BULK COLLECT instead

PLS-00438: value in LIMIT clause: 'string' use is invalid
Cause: The evaluation value in the LIMIT clause of a bulk fetch was found in an inappropriate context. For example, the following statement is illegal because the LIMIT clause in a bulk fetch expects a numeric value. FETCH c1 BULK COLLECT INTO var_tab LIMIT '22333'; -- illegal
Action: Change the expression of the LIMIT clause so that the evaluation result is compatible to a numeric value.
PLS-00439: A LIMIT clause must be used within a BULK FETCH

Cause: A LIMIT clause is used within a non-bulk fetch

Action: Do not use a LIMIT clause when a non-bulk fetch is used.

PLS-00440: FORALL bulk IN-bind variables cannot be used here

Cause: A reference to a FORALL statement's bulk IN-bind variable was found in a context in which it is not permitted. For example, such variables are not permitted in expressions in the USING clause of a dynamic SQL statement: forall j in 1..Users.Count() execute immediate 'insert into System_Users(Username) values :U' using Upper(Users(j));

Action: In the case described above, move the expression from the USING clause into the SQL statement: forall j in 1..Users.Count() execute immediate 'insert into System_Users(Username) values Upper(:U)' using Users(j);

PLS-00441: EXIT/CONTINUE statement may have a label here; 'string' is not a label

Cause: The specified name was not a label. An EXIT or CONTINUE statement does not require a label, but when the optional name appears, it must be a label.

Action: Check the spelling of the name. Make sure that the name is the label of a loop in which the EXIT or CONTINUE statement is nested. If a label is not needed for this statement, delete the name.

PLS-00442: CONTINUE statement may not have the prefix STANDARD

Cause: The procedure CONTINUE appears in STANDARD but that procedure may not be called either with its name alone or with the prefix STANDARD. It exists only to help in analysis of the CONTINUE statement.

Action: If a CONTINUE statement is intended, remove the prefix. If some other procedure was intended, check the spelling of the prefix and of the procedure name.

PLS-00450: a variable of this private type cannot be declared here

Cause: A variable declaration uses a type that is declared PRIVATE in some other compilation unit.

Action: Do not use this type in a PRIVATE variable declaration.

PLS-00452: Subprogram 'string' violates its associated pragma

Cause: A packaged function cannot be called from SQL statements unless its purity level is asserted by coding a RESTRICT_REFERENCES pragma in the package specification. The pragma, which is used to control side effects, tells the PL/SQL compiler to deny the packaged function read/write access to database tables, public packaged variables, or both. A SQL statement that violates the pragma will cause a compilation error.

Action: Raise the purity level of the function, or relax the pragma restrictions.

PLS-00453: remote operations not permitted on object tables or user-defined type columns

Cause: A reference to a remote object tables or user-defined type column was found.

Action: Do not refer to it.

PLS-00454: with a returning into clause, the table expression cannot be remote or a subquery

Cause: A reference to a remote table or subquery was found in a sql statement with a returning into clause.
Action: Do not refer to it, or do use a subsequent select statement.

PLS-00455: cursor 'string' cannot be used in dynamic SQL OPEN statement
Cause: dynamically OPEN a REF CURSOR that has RETURN type. However, only REF CURSOR without RETURN type can be OPEN'ed by an embedded dynamic OPEN statement.
Action: define a REF CURSOR without return type, and use it in the statement.

PLS-00456: item 'string' is not a cursor
Cause: the given variable is not a cursor and therefore cannot be OPEN'ed or FETCH'ed from.
Action: check the spelling and declaration for the given variable.

PLS-00457: expressions have to be of SQL types
Cause: an expression of wrong type is in USING or dynamic RETURNING clause. In USING or dynamic RETURNING clause, an expression cannot be of non-SQL types such as BOOLEAN, INDEX TABLE, and record.
Action: change the expression type to a SQL type.

PLS-00458: subprogram 'string' cannot be called from a REPEATABLE subprogram
Cause: The subprogram is not REPEATABLE and cannot be called from a REPEATABLE subprogram.
Action: delete the call or delete REPEATABLE.

PLS-00459: this feature is not allowed in REPEATABLE subprogram
Cause: Having one of the followings feature in the REPEATABLE subprogram: dynamic SQL statements or autonomous transaction.
Action: delete the statements or delete REPEATABLE.

PLS-00460: REPEATABLE subprogram 'string' has to be RNDS, WNDS, RNPS, and WNPS
Cause: Repeatable subprogram can neither read database state (RNDS), write database state (WNDS), read package state (RNPS), nor write package state (WNPS).
Action: make the subprogram to be RNDS, WNDS, RNPS, and WNPS or delete REPEATABLE

PLS-00461: mismatch REPEATABLE information between specification and body of 'string'
Cause: REPEATABLE is declared at the subprogram's specification, but not at its body, or vice versa.
Action: make sure both specification and body are declared as REPEATABLE

PLS-00462: nested subprogram 'string' has to be REPEATABLE
Cause: the nested subprogram of a REPEATABLE subprogram is not declared as REPEATABLE. If a subprogram is REPEATABLE, all of its nested subprograms has to be declared as REPEATABLE.
Action: declared the nested subprogram as REPEATABLE

PLS-00483: exception 'string' may appear in at most one exception handler in this block
Cause: An exception appears in two different WHEN clauses (that is, two different exception handlers) in the exception-handling part of a PL/SQL block or subprogram.

Action: Remove one of the references to the exception.

PLS-00484: redundant exceptions 'string' and 'string' must appear in same exception handler

Cause: Using the EXCEPTION_INIT pragma, different exceptions were initialized to the same Oracle error number; then, they were referenced in different exception handlers within the same exception-handling part. Such references conflict.

Action: Remove one of the exceptions or initialize it to a different Oracle error number.

PLS-00485: in exception handler, 'string' must be an exception name

Cause: An identifier not declared as an exception appears in an exception handler WHEN clause. Only the name of an exception is valid in a WHEN clause.

Action: Check the spelling of the exception name and make sure the exception was declared properly.

PLS-00486: select list cannot be enclosed in parentheses

Cause: In a SELECT statement, the select list was enclosed in parentheses, as in: SELECT (deptno, dname, loc) FROM dept INTO ... This breaks the rules of SQL syntax. Parentheses are not required because the keywords SELECT and FROM delimit the select list.

Action: Remove the parentheses enclosing the select list.

PLS-00487: Invalid reference to variable 'string'

Cause: A variable was referenced in a way that is inconsistent with its datatype. For example, a scalar variable might have been mistakenly referenced as a record, as follows: DECLARE CURSOR emp_cur IS SELECT empno, ename, sal FROM emp; emp_rec emp_cur%ROWTYPE; my_sal NUMBER(7,2); BEGIN ... total_sal := total_sal + my_sal.sal; -- invalid ...

Action: Check the spelling of the variable name. Make sure the variable was declared properly and that the declaration and reference are consistent regarding datatype.

PLS-00488: 'string' must be a type

Cause: The datatype specifier in a declaration or expression does not designate a legal type. For example, the %TYPE attribute might not have been added to a declaration, as in DECLARE my_sal emp.sal%TYPE; my_ename emp.ename; -- missing %TYPE ... When declaring a constant or variable, to provide the datatype of a column automatically, use the %TYPE attribute. Likewise, when declaring a record, to provide the datatypes of a row automatically, use the %ROWTYPE attribute.

Action: Make sure the datatype specifier designates a legal type. Remember to use the %TYPE and %ROWTYPE attributes when necessary.

PLS-00489: invalid table reference: 'string' must be a column in this expression

Cause: In a query, a select-list item refers to a table in the FROM clause but not to a database column.

Action: Check the spelling of the column names, make sure each column in the select list refers to a table in the FROM clause, then re-execute the query.
PLS-00490: illegal statement
   Cause: A constant, variable, function call, or incomplete statement was used where a statement was expected. For example, instead of calling a function from an expression, it might have been called as a statement (as if it were a procedure).
   Action: Check the statement, making sure that its commands, identifiers, operators, delimiters, and terminator form a complete and valid PL/SQL statement.

PLS-00491: numeric literal required
   Cause: A constant or variable was used where a numeric literal is required. For example, the code might look like my_ename VARCHAR2(max_len); instead of my_ename VARCHAR2(15); When specifying the maximum length of a VARCHAR2 variable, an integer literal must be used.
   Action: Replace the identifier with a numeric literal.

PLS-00492: variable or constant initialization may not refer to functions declared in the same package
   Cause: If a package spec p declares a function f, that function may not be used in any variable declarations in that same package spec. This is because of a circular instantiation problem: in order to fully instantiate the package spec, the variable must be initialized. To initialize the variable, the function body code in the package body must be executed. That requires that the package body be instantiated. However, the package body cannot be instantiated until the package spec is fully instantiated.
   Action: Remove the reference to the function from the variable initialization. A technique which often works is to move the variable initialization from the variable declaration (in the package spec) to the package body initialization block.

PLS-00493: invalid reference to a server-side object or function in a local context
   Cause: A reference to a server-side object (e.g. a table column) or function (a group function such as SUM, AVG, MIN, MAX, ... ) was found in a context where only PL/SQL objects may be present (such as within the parameter list of a local function or as the index of a (local) PL/SQL table.)
   Action: Rewrite the offending statement; or (if a local function call is the problem context), make the function non-local (either packaged or top-level.)

PLS-00494: coercion into multiple record targets not supported
   Cause: The INTO list of a SELECT or FETCH specified more than a single record-type target and the column types required coercion into a record to match the INTO list. This is type checked as correct, but not yet supported.
   Action: Create a new record type to hold all of the column types or code the SELECT with an INTO target for every source column.

PLS-00495: too many columns in SELECT...INTO statement after bursting record targets
   Cause: Type checking indicated the columns in a SELECT or FETCH were being collected into a record in the INTO list. The record was burst into its fields. There were not enough fields in the record for each of the columns.
   Action: Change the number of columns or the record variable(s) in the INTO clause so that they match.

PLS-00496: too few columns in SELECT...INTO statement after bursting record targets
Cause:  Type checking indicated the columns in a SELECT or FETCH were being collected into a record in the INTO list. The record was burst into its fields. There were not enough columns to fill all of the fields in the record.

Action:  Change the number of columns or the record variable(s) in the INTO clause so that they match.

PLS-00497: cannot mix between single row and multi-row (BULK) in INTO list

Cause:  - When BULK syntax (e.g. BULK COLLECT INTO) is used to retrieve data, every variable in the INTO list has to be of type that is a collection of the type of the corresponding column.
- When BULK is NOT used, every variable in the INTO list has to be of compatible type with the corresponding column.

Action:  Change the INTO list so that all variables have correct data types

PLS-00498: illegal use of a type before its declaration

Cause:  A variable or constant was declared to be of a type whose declaration appears later in the compilation unit; or, a type or subtype was declared in terms of another type whose declaration appears later in the compilation unit.

Action:  Ensure that the type declaration preceeds its use in the variable/constant/type declaration.

PLS-00499: coercion into collection of records not supported

Cause:  A SELECT or FETCH may specify a column list to be coerced into a variable which is a collection of records. This is type checked as correct, but not yet supported because of the implicit layout change required.

Action:  Express the SELECT with an object constructor around the columns and use a collection of objects as an INTO variable. Or, build the collection one row at a time coercing each row into a record which happens to be an element. Or, use a record of collections.

PLS-00500: invalid operator binding

Cause:  An operator binding function cannot be found in the specified scope.

Action:  Provide the correct number and types of parameters for the operator binding function. Or, specify the correct names for schema, package, or type containing the operator binding function.

PLS-00503: RETURN <value> statement required for this return from function

Cause:  In a function body, a RETURN statement was used that contains no expression. In procedures, a RETURN statement contains no expression because the statement simply returns control to the caller. However, in functions, a RETURN statement must contain an expression because its value is assigned to the function identifier.

Action:  Add an expression to the RETURN statement.

PLS-00504: type string_BASE may not be used outside of package STANDARD

Cause:  In a declaration, the datatype NUMBER_BASE (for example) was mistakenly specified. The datatypes CHAR_BASE, DATE_BASE, MLSLABEL_BASE, and NUMBER_BASE are for internal use only.

Action:  Specify (for example) the datatype NUMBER instead of NUMBER_BASE.

PLS-00505: User Defined Types may only be defined as PLSQL Tables or Records
**Cause:** An attempt was made to define a type other than TABLE or RECORD, but these are the only user-defined types allowed in this release of PL/SQL. For example, the following type definition is illegal: TYPE Byte IS INTEGER(2); -- illegal

**Action:** Remove the type definition, or revise it to specify a TABLE or RECORD type.

**PLS-00506: User Defined Constrained Subtypes are disallowed**

**Cause:** An attempt was made to define a constrained subtype, but only unconstrained subtypes are allowed in this release of PL/SQL. For example, the following type definition is illegal: SUBTYPE Acronym IS VARCHAR2(5); -- illegal

**Action:** Remove the illegal type constraint.

**PLS-00507: a PLSQL Table may not contain a table or a record with composite fields**

**Cause:** In a TABLE type definition, a nested record type was specified as the element type. This is not allowed. All fields in the record must be scalars.

**Action:** Remove the TABLE type definition, or replace the nested record type with a simple record type.

**PLS-00508: The expression in a RETURN statement cannot be a type**

**Cause:** A datatype specifier was used instead of an expression in the RETURN statement of a user-defined function, as shown in the example below. Do not confuse the RETURN statement, which sets the function identifier to the result value, with the RETURN clause, which specifies the datatype of the result value.

FUNCTION credit-rating (acct_no NUMBER) RETURN BOOLEAN IS BEGIN ...
RETURN NUMBER; -- should be an expression END;

**Action:** Replace the datatype specifier in the RETURN statement with an appropriate expression.

**PLS-00509: Implementation Restriction : Pass a returned record to a temporary identifier before selecting a field**

**Cause:** Illegal syntax was used to call a parameter-less function that returns a record or a PL/SQL table of records. When calling a function that takes parameters and returns a record, you use the following syntax to reference fields in the record: function_name(parameters).field_name However, you cannot use the syntax above to call a parameter-less function because PL/SQL does not allow empty parameter lists. That is, the following syntax is illegal: function_name().field_name -- illegal; empty parameter list You cannot just drop the empty parameter list because the following syntax is also illegal: function_name.field_name -- illegal; no parameter list.

**Action:** Declare a local record or PL/SQL table of records to which you can assign the function result, then reference its fields directly.

**PLS-00510: Float cannot have scale**

**Cause:** When a FLOAT variable was declared, its precision and scale were specified, as shown in the following example: DECLARE Salary FLOAT(7,2); However, a scale for FLOAT variables cannot be specified; only a precision can be specified, as in salary FLOAT(7);

**Action:** Remove the scale specifier from the declaration, or declare a NUMBER variable instead.

**PLS-00511: a record may not contain a PL/SQL table of records**
Cause: In a RECORD definition, one of the fields was declared as a PL/SQL table of records. This is not allowed. A record can be the component of another record (that is, records can be nested), but a PL/SQL table of records cannot be the component of a record.

Action: Remove the field declaration, or revise it to specify a simple record type.

PLS-00512: Implementation Restriction: 'string': Cannot directly access remote package variable or cursor

Cause: An attempt was made to reference a remote packaged variable or cursor. This is not allowed. Instead, add to the remote package a function that returns the value of the variable or cursor.

Action: Remove the illegal reference.

PLS-00513: PL/SQL function called from SQL must return value of legal SQL type

Cause: In a SQL statement, do not call a PL/SQL function having a return type that can not be handled by SQL. For example, type BOOLEAN, records and indexed-tables are not supported by SQL and functions returning such values can not be called from SQL.

Action: None

PLS-00514: INSERT statement with REF INTO clause requires a typed table

Cause: This INSERT statement provides REF INTO clause, which is only legal when the table specified in the INTO clause is an object table.

Action: None

PLS-00515: The type of the REF INTO variable 'string' must be REF to the table's type

Cause: In an INSERT statement with REF INTO clause, the type of the data item must be REF to the type of the table used in INTO clause.

Action: None

PLS-00516: Type mismatch between object table and value 'string' in INSERT statement.

Cause: In the INSERT statement operating on typed tables (tables of objects), the type of a non-aggregate value did not match the object type of the table.

Action: None

PLS-00517: Type mismatch between a select list element 'string' and corresponding table column in INSERT statement with a subquery

Cause: In an INSERT statement with subquery, at least one of the elements of the select list was not type-compatible with the corresponding column of the table in the INTO clause. This error indicates that the subquery should be rewritten to match the structure of the target table.

Action: None

PLS-00518: This INSERT statement requires VALUES clause containing a parenthesised list of values

Cause: A VALUES clause was entered without a list of SQL data items in parentheses. In all INSERT statements with an explicit column list, the VALUES clause must contain a list of SQL data items in parentheses. For example: INSERT INTO my_tab (a,b,c) VALUES (1,2,my_variable);

Action: Rewrite the statement to include a list of SQL data items in parentheses.
PLS-00519: This INSERT statement requires a VALUES clause containing an object type expression, not a list of values
   Cause: In an INSERT statement with typed tables, an aggregate was used when an object type item was expected.
   Action: Replace the aggregate with an object constructor or other object type expression.

PLS-00520: MAP methods must be declared without any parameters other than (optional) SELF.
   Cause: A MAP member function was declared with a parameter. Map member functions can have only one parameter: the default SELF parameter. Map methods must be declared without any parameters. The compiler adds the SELF parameter.
   Action: Remove the parameter from the map member function.

PLS-00521: ORDER methods must be declared with 1 (one) parameter in addition to (optional) SELF.
   Cause: An order member function was declared without the user-specified parameter. Order member functions have two parameters, one is the default SELF parameter which is added by the compiler. the second parameter is added by the user and must declare an order method which must be the same type as the containing object type.
   Action: Check and correct the way the parameter is specified.

PLS-00522: MAP methods must return a scalar type.
   Cause: The MAP member function was written such that it returns something other than a scalar type.
   Action: Rewrite the MAP function such that it returns a scalar type.

PLS-00523: ORDER methods must return an INTEGER.
   Cause: An order member function was written such that it returns something other than an integer type.
   Action: Rewrite the ORDER method such that it returns an integer type.

PLS-00524: The parameter type in an ORDER method must be the containing object type.
   Cause: An order member function was declared without the user-specified parameter. Order member functions have two parameters, one is the default SELF parameter which is added by the compiler. the second parameter is added by the user and must declare an order method which must be the same type as the containing object type.
   Action: Check and correct the way the parameter is specified.

PLS-00525: Within SQL statements, only equality comparisons of objects are allowed without a map or order function.
   Cause: A map or order function was not provided for a relational comparison. Only equality comparisons may be used when a map or order function is not supplied.
   Action: Supply either a map or order function for the object. Otherwise change the program to use only equality comparisons.

PLS-00526: A MAP or ORDER function is required for comparing objects in PL/SQL.
Cause: Within stand alone PL/SQL, an attempt was made to compare objects without a map or order function.
Action: Provide a map or order function and retry the operation.

PLS-00527: MAP or ORDER functions require a PRAGMA RESTRICT_REFERENCES specifying :WNDS,WNPS,RNPS,RNDS.
Cause: Either a PRAGMA RESTRICT_REFERENCES was not specified or it was specified without one of the following: WNDS, WNPS, RNPS, or RNDS.
Action: Add or correct the PRAGMA and retry the operation.

PLS-00528: The parameters to an ORDER function must have IN mode
Cause: You declared parameter to an ORDER function to have OUT or IN OUT mode.
Action: Correct the parameter to use IN mode only.

PLS-00529: Bad column name string in INSERT statement (must be an identifier)
Cause: In an INSERT statement, an attempt was made to use a column name that is not an identifier. In any INSERT statement with explicit column list a column name must be a simple identifier.
Action: Rewrite the INSERT statement, using a simple identifier for the column name.

PLS-00530: Illegal type used for object type attribute: 'string'.
Cause: An attempt was made to use an invalid type for an object type attribute.
Action: Use only supported types for the object type attribute.

PLS-00531: Unsupported type in a VARRAY or TABLE type: 'string'.
Cause: An attempt was made to use an unsupported type in a VARRAY or TABLE type.
Action: Use only supported types in a VARRAY or TABLE type.

PLS-00532: Target of REF must be a complete or incomplete object type.
Cause: The target of a REF can only be a complete or an incomplete object type.
Action: If a REF is to be used, change the type; otherwise, remove the REF.

PLS-00533: Tables of non_queryable types are not supported.
Cause: An attempt was made to create a table of a type which cannot be queried. Tables of such types are not supported.
Action: Create an object type containing the non-queryable type. Then create a table of the object type.

PLS-00534: A Table type may not contain a nested table type or VARRAY.
Cause: An attempt was made to do one of the following: define a table type which contained nested collection types, or define an object table that has (perhaps nested) another table type or VARRAY type.
Action: Check the table definitions to be sure that they do not contain nested tables or VARRAYs.

PLS-00535: A VARRAY type may not contain a NESTED TABLE, VARRAY or LOB
Cause: An attempt was made to do one of the following: define a VARRAY type containing a nested collection type or LOB or define a VARRAY type of an object
type that has a nested attribute which is one of NESTED TABLE, VARRAY or LOB type.

Action: Check the VARRAY definitions to be sure that they do not contain nested collection types, LOBs or nested attributes.

PLS-00536: Navigation through REF variables is not supported in PL/SQL.

Cause: The expression of the form refvar.field was entered. This is not supported in PL/SQL, ver 8.0.

Action: None

PLS-00537: A VARRAY must have a positive limit

Cause: A VARRAY type was declared with a non-positive limit, for example VARRAY(0).

Action: Declare the VARRAY with a positive limit and retry the operation.

PLS-00538: subprogram or cursor 'string' is declared in an object type specification and must be defined in the object type body

Cause: The specified subprogram is declared in an object type's specification, but is not defined in the object type body.

Action: Define the subprogram in the object type body, or remove the declaration from the specification.

PLS-00539: subprogram 'string' is declared in an object type body and must be defined in the object type specification

Cause: The specified subprogram is declared in an object type's body, but is not defined in the object type's specification. Notice cursor bodies can exist without a specification.

Action: Define the subprogram in the object type's specification, or remove the declaration from the body.

PLS-00540: object not supported in this context.

Cause: An object was declared inside a local scope (Function, Procedure, or anonymous block), or in a package scope which is not supported.

Action: Declare the type in a global or data base scope.

PLS-00541: size or length specified is too large.

Cause: A length or size that is too large was specified for a data item.

Action: Specify a smaller value and retry the operation.

PLS-00542: CLOB and NCLOB cannot use varying-width character sets in the server

Cause: A server type is being created with an embedded CLOB or NCLOB attribute which uses a varying-width character set.

Action: Use VARCHAR2 instead of CLOB, or use a fixed-width character set.

PLS-00543: a PLSQL Table may not contain a nested table type or VARRAY.

Cause: An attempt was made to define a PLSQL table that contained a (possibly deeply) nested table type or VARRAY. Nested collection types are not supported.

Action: Remove the nested table type or VARRAY from the table. Then retry the operation.

PLS-00546: SELF may not be declared as a REF parameter.
Cause: SELF was declared as a ref parameter to a member function or procedure. SELF is not supported as a REF.
Action: Redeclare SELF as a value parameter.

PLS-00548: invalid use of operator.
Cause: A name of an operator is used as a qualifier or appears outside from sql context.
Action: Eliminate the use of operator name as a qualifier or place it in a sql clause.

PLS-00550: character set specification is not allowed for this type
Cause: A character set specification was made on a type that does not require one.
Action: Remove the character set specification, or change the type.

PLS-00551: character set ANY_CS is only allowed on a subprogram parameter
Cause: The character set ANY_CS was specified when it is not allowed.
Action: Change or remove the character set specification.

PLS-00552: flexible character set is not allowed on component element
Cause: ANY_CS or %CHARSET was used to reference an ANY_CS parameter which is not a CHAR, VARCHAR2, or CLOB type. ANY_CS or %CHARSET is not allowed for fields of a record, object, elements of a collection, etc.
Action: Change or remove the character set specification.

PLS-00553: character set name is not recognized
Cause: An unrecognized name appears in a character set specification.
Action: Change or remove the character set specification.

PLS-00554: character set has already been determined
Cause: A redundant or conflicting character set was specified.
Action: Remove the CHARACTER SET specification, or change the character set specified.

PLS-00555: default expressions are not allowed for SQL operators
Cause: A default expression has been specified for a SQL operator.
Action: Eliminate the default expression from the operator.

PLS-00560: character set mismatch
Cause: An expression was used that has the wrong character set for this context.
Action: Adjust the expression, using TRANSLATE(... USING ...) or by rethinking the logic.

PLS-00561: character set mismatch on value for parameter 'string'
Cause: An expression was used that contains an incorrect character set. The actual argument has a character set conflict. If a default argument value is being used, it might be in conflict with some actual argument that must have the same character set.
Action: Adjust the expression, using TRANSLATE(... USING ...) or change the character set.

PLS-00562: a function must return a type.
Cause: The current function was defined to return something other than a data type.
PLS-00563: illegal use of CAST expression  
**Cause:** CAST (in PLSQL) was used outside of a DML scope.  
**Action:** Do not use CAST outside DML statements.

PLS-00564: lob arguments are not permitted in calls to remote server  
**Cause:** use of lob argument in call to remote server  
**Action:** Do not use LOBs in call to remote server

PLS-00565: string must be completed as a potential REF target (object type)  
**Cause:** Incomplete library units that are potential targets of REF dependencies must be completed so that they continue to remain potential targets of REF dependencies (since there might be library units with REF dependencies on this library unit). Potential REF targets include complete and incomplete object types. This error happened because an attempt was made to complete a potential REF target as something other than a potential REF target.  
**Action:** Use another name for this library unit, or drop the original incomplete library unit.

PLS-00566: type name "string" cannot be constrained  
**Cause:** A lob, date, boolean, rowid, or mlslabel type was constrained with a length specification. For example: X BLOB(5);  
**Action:** Remove the constraint.

PLS-00567: cannot pass NULL to a NOT NULL constrained formal parameter  
**Cause:** You attempted to pass NULL to a NOT NULL constrained parameter.  
**Action:** Pass a NOT NULL expression instead.

PLS-00568: cannot access rows from a non-nested table item  
**Cause:** You attempted to use TABLE expression, from a non-nested table  
**Action:** pass the correct parameter

PLS-00569: numeric overflow or underflow  
**Cause:** A constant literal is either too large or too small to fit in an Oracle number  
**Action:** Change the value of the literal

PLS-00570: different number of columns in the multiset and cast expressions  
**Cause:** Number of columns in the collection returned by MULTISET and the number of columns for the CAST type don’t match. For example: create type tab_obj as object (n number); create type tab1 as table of tab_obj; create table tab2 (col1 number, col2 number); select CAST(MULTISET(select col1, col2 from tab2) as tab1) from tab2;  
**Action:** None

PLS-00571: method access through data base link not yet supported on client side  
**Cause:** Remote link is used with on client side  
**Action:** Create a dummy function to call symbolic link on server side or wait till it is implemented

PLS-00572: improper constraint form used
Cause: “number” types cannot have a range. User-defined aggregate types and integer types cannot have scale or precision specified. Example: “x number(5,3)” is acceptable but “x number range 1..10” is not.

Action: Remove the constraint

PLS-00573: cannot constrain scale, precision, or range of an anchored type declaration

Cause: A variable declared with %TYPE or %ROWTYPE cannot have a scale, precision, or range constraint. Example: x y%TYPE(10) is not acceptable. It is legal to add “NOT NULL” or non-conflicting CHARACTER SET constraints to anchored type declarations.

Action: Remove the constraint or use a type name instead of an anchored type.

PLS-00580: supertype must be an object type

Cause: An attempt was made to declare an object type to have a supertype, but the specified supertype was not itself an object type. Object types can inherit only from other object types.

Action: Remove the supertype specification, or change it to refer to an object type. If the declaration appears correct, make sure the supertype has compiled correctly.

PLS-00581: inheritance is not supported for opaque types

Cause: An attempt was made to declare an opaque type with a supertype.

Action: Remove the supertype specification.

PLS-00582: attribute declarations are not allowed in opaque types

Cause: An attempt was made to declare an attribute in an opaque type.

Action: Remove the attribute declaration.

PLS-00583: size must be specified if opaque type is fixed-length

Cause: An attempt was made to declare a fixed-length opaque type without specifying an explicit size.

Action: Specify an explicit size, or change the declaration to be varying-length.

PLS-00584: size of an opaque type must be between 1 and 4000 bytes

Cause: An attempt was made to specify an explicit size for an opaque type, but the specified size was out of the valid range.

Action: Change the explicit size to be between 1 and 4000 bytes, or change the declaration to be varying-length without an explicit size.

PLS-00585: declared support library for opaque type is not a library

Cause: An attempt was made to name a support library for an opaque type, but the name refers to an object that is not a library.

Action: Change the declaration to name a valid library.

PLS-00586: a static method cannot declare a parameter named SELF

Cause: An attempt was made to name a parameter SELF when declaring a static method. SELF is reserved as a parameter name in methods, to hold the object instance on which the method is applied. A parameter named SELF is not allowed in static methods because static methods do not apply to a particular object instance.

Action: Change the name of the parameter in the declaration.
PLS-00587: a static method cannot be invoked on an instance value
   Cause: An attempt was made to use an object instance value, not a typename, as the qualifier of the name of a method invocation, but only a typename can be used as the qualifier when calling a static method.
   Action: Use the typename, not an object instance value, to qualify the name of a method if the method is static.

PLS-00588: unqualified instance attribute references allowed only in member methods
   Cause: An attempt was made to use the name of an object instance attribute in the body of a static method, or in an initialization default value on another attribute. If the instance attribute is not qualified with a particular object instance that supplies a value, the instance attribute can be named only when it is inside a member method.
   Action: Qualify the attribute reference with the name of an object value, or change the containing method to a member method rather than a static method.

PLS-00589: no attributes found in object type "string"
   Cause: Table of non adt type is defined.
   Action: Table of type should be of ADT type only

PLS-00590: attempting to create a subtype UNDER a FINAL type
   Cause: An attempt was made to create a subtype UNDER a FINAL type.
   Action: Avoid deriving a subtype from this FINAL type.

PLS-00591: this feature is not supported in client-side programs
   Cause: One of the following features was used in a wrong context: pragma AUTONOMOUS_TRANSACTION, dynamic SQL statements, (e.g. EXECUTE IMMEDIATE), and bulk binds. These listed features can only be used in server-side programs but not client-side programs.
   Action: Remove it or define a server-side subprogram to do the work and call the subprogram from the client.

PLS-00592: the type of a object table must be an object type
   Cause: You have defined a typed-table of a non-object type.
   Action: Replace the non-object type with an object-type.

PLS-00593: default value of parameter "string" in body must match that of spec
   Cause: The default value initialization of a parameter in a subprogram body contained in a package body did not match that of the corresponding subprogram specification in the corresponding package specification.
   Action: Change the default initialization of the parameter in body to match that of spec.

PLS-00594: the SELF parameter can be declared only as IN or as IN OUT
   Cause: The SELF parameter was declared as an OUT parameter.
   Action: Declare the SELF parameter as either an IN or an IN OUT parameter.

PLS-00595: the TABLE operator is not allowed in this context
   Cause: This feature is not yet implemented.
   Action: Don't use weak ref cursors with bulk binds.
PLS-00597: expression 'string' in the INTO list is of wrong type
  Cause: This exception is raised for the following errors:
  - the expression in INTO clause of OPEN or RETURNING statement is neither of
    legal SQL datatypes nor of PL/SQL RECORD datatype
  - a collection of records is used in INTO clause of OPEN or RETURNING
    statement.
  - a record or a collection of records is used in BULK COLLECT INTO
  Action: Use expression with correct datatype in the INTO clause

PLS-00598: comparison of object with NULL using "string" is not allowed
  Cause: An object is compared with NULL using a relational operator.
  Action: Use IS NULL comparison operator.

PLS-00599: SAMPLE percentage must be in the range (0.000001,100)
  Cause: The percentage number is not in the range [0.000001,100)
  Action: Use a percentage number in the range [0.000001,100)

PLS-00600: SAMPLE cannot be applied to a remote object
  Cause: SAMPLE applying to a remote object is not supported
  Action: Do not use SAMPLE with a remote object

PLS-00601: partition extended object names may only be used with tables
  Cause: User attempted to use a partition-extended object name with an object
  which is not a table.
  Action: Avoid using partition-extended name syntax with objects which are not
  tables

PLS-00602: CUBE and ROLLUP may appear only in a GROUP BY clause
  Cause: User attempted to use the keywords CUBE or ROLLUP outside a GROUP
  BY clause
  Action: Avoid using the keywords CUBE and ROLLUP outside the GROUP BY
  clause

PLS-00603: GROUPING function supported only with GROUP BY CUBE or
  ROLLUP
  Cause: User attempted to use the GROUPING function without GROUP BY CUBE or
  GROUP BY ROLLUP
  Action: Avoid using the GROUPING function without GROUP BY CUBE or
  ROLLUP

PLS-00604: aggregate function is not allowed here
  Cause: One of the functions, such as AVG, COUNT, MAX, MIN, SUM, STDDEV
  or VARIANCE, was used in a WHERE or GROUP BY clause
  Action: Remove the group function from the WHERE or GROUP BY clause. The
  desired result may be achieved by including the function in a subquery or
  HAVING clause.

PLS-00605: set operators are not yet supported as an argument to a MULTISET
  operator
  Cause: A set operator was used in a subquery that was the argument to a
  MULTISET operator.
**Action**: Rewrite your SQL statement so that it does not use a set operator in the subquery that is the argument to the MULTISET operator.

**PLS-00606**: cursor subquery is not supported on client side in this release

**Cause**: A query that contains a cursor subquery is being used from client side.

**Action**: Use this feature from server side only.

**PLS-00607**: SQLJ Object Types can have only SQLJ Types as its supertype or subtype

**Cause**: You were trying to create a SQLJ Object Type under a non-SQLJ Object Type.

**Action**: Recreate the type as a SQLJ Object Type.

**PLS-00608**: the value of the USING clause must match that of the supertype

**Cause**: You were trying to create a SQLJ Object Type with a different value of the USING clause from the USING clause specified in its supertype.

**Action**: Change the value of the USING clause to match the USING clause in its supertype.

**PLS-00609**: the OVERRIDING clause is not valid for SQLJ Object Types

**Cause**: You were trying to a SQLJ Object Type method that override an inherited method.

**Action**: Change the SQLJ Object Type definition by removing the OVERRIDING method.

**PLS-00610**: ROW can be used only once in SET clause of UPDATE statement

**Cause**: You were trying to use ROW more than once in UPDATE statement.

**Action**: Remove all the additional ROW in set clause of UPDATE statement.

**PLS-00611**: right hand side can be only the variables of record type

**Cause**: with ROW on LHS, only PL/SQL records or %ROWTYPE variables are allowed on right hand side.

**Action**: Make appropriate changes, so that right hande side should only have variables of record or %ROWTYPE.

**PLS-00612**: Number of attributes do not match in SET clause

**Cause**: Number of columns do not match with number of attributes on record type on rhs.

**Action**: Make sure that number of columns match with the number of attributes in record on rhs.

**PLS-00613**: only one item is allowed, when using variables of record type

**Cause**: You are trying to use more than one values in VALUES clause or RETURNING INTO clause, when one of the value is of record type.

**Action**: Specify only one variable of record type, or don't use variables of record type.

**PLS-00614**: creating a FINAL NOT INSTANTIABLE type

**Cause**: An attempt was made to create a FINAL NOT INSTANTIABLE type. No useful operation can be performed with this type.

**Action**: Avoid using the keywords FINAL and NOT INSTANTIABLE together when creating types.
PLS-00615: type mismatch found at 'string' between CASE operand and WHEN operands

Cause: In a simple CASE statement or expression, the CASE operand and WHEN operands do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the CASE operand and WHEN operands so that their datatypes match. Consider using datatype conversion functions in the CASE operand and/or WHEN operands.

PLS-00616: type mismatch found at 'string' among result expressions in a CASE expression

Cause: In a CASE expression, the result expressions do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the result expressions so that their datatypes match. Consider using datatype conversion functions in the result expressions.

PLS-00617: at least one result in the CASE expression must not be NULL

Cause: All the results in the CASE expression are the literal NULL.

Action: Change at least one result in the CASE expression to be non-NULL.

PLS-00618: type mismatch found at 'string' between operands in a NULLIF expression

Cause: In a NULLIF expression, the two operands do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the operands so that their datatypes match. Consider using datatype conversion functions in the operands.

PLS-00619: the first operand in the NULLIF expression must not be NULL

Cause: The first operand in the NULLIF expression is the literal NULL.

Action: Change the first operand in the NULLIF expression to be non-NULL.

PLS-00620: type mismatch found at 'string' among operands in a COALESCE expression

Cause: In a COALESCE expression, the operands do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the operands so that their datatypes match. Consider using datatype conversion functions in the operands.

PLS-00621: at least one operand in the COALESCE expression must not be NULL

Cause: All the operands in the COALESCE expression are the literal NULL.

Action: Change at least one operand in the COALESCE expression to be non-NULL.

PLS-00622: range constraints must be between -2147483647 and 2147483647

Cause: The range constraints specified for a pls_integer or binary_integer declaration did not fall between -2147483647 and 2147483647.

Action: Use range constraints between -2147483647 and 2147483647.

PLS-00623: FLOAT precision constraint must be between 1 and 126

Cause: The precision specified for a FLOAT, REAL or DOUBLE PRECISION did not fall between 1 and 126.

Action: Use precision constraints between 1 and 126.
PLS-00624: USING clause must be used with either aggregate or pipelined functions

**Cause:** USING clause cannot be used with functions that are not declared with AGGREGATE or PIPELINED properties.

**Action:** Define function body in PL/SQL or some other language (using external callout call specification).

PLS-00625: PARTITION/CLUSTER/ORDER-BY clause can only be used with IN parameters

**Cause:** A PARTITION/CLUSTER/ORDER-BY clause was used with an OUT or IN OUT ref-cursor parameter.

**Action:** Change the parameter mode to IN or use some other parameter with the PARTITION/CLUSTER/ORDER-BY clause.

PLS-00626: partitioned/clustered/ordered parameter must be a function argument

**Cause:** A partitioning or clustering/ordering specification specified on an argument that is not one of the function arguments.

**Action:** Specify partitioning/clustering/ordering based on the function ref-cursor formal argument.

PLS-00627: 'string' must be a strongly typed ref cursor

**Cause:** A partitioning or clustering/ordering specification specified on an argument that is not a strongly typed ref cursor.

**Action:** Specify partitioning/clustering/ordering based on the function ref-cursor formal argument.

PLS-00628: 'string' must be a valid record attribute

**Cause:** A partitioning or clustering/ordering specification must use only valid record attributes.

**Action:** Specify partitioning/clustering/ordering based on valid record attributes.

PLS-00629: PIPE statement cannot be used in non-pipelined functions

**Cause:** A PIPE statement was used in a non-pipelined function.

**Action:** Use PIPE statement only in pipelined functions.

PLS-00630: pipelined functions must have a supported collection return type

**Cause:** A pipelined function was specified with an unsupported return type. The following are not supported as return types of pipelined functions:
- non-collections,
- PL/SQL tables,
- associative arrays,
- collections of PL/SQL types: rowid, mlabel, long, long raw, boolean, binary_integer, pli_integer, string and urowid The following restrictions apply:
  - If the return type is a collection of records, then each of the attributes of the record must be a supported type.
  - A collection of records must not contain a record type as one of its attributes.

**Action:** Specify a supported collection type as the pipelined function return type.

PLS-00631: PARTITION-BY and CLUSTER/ORDER-BY clauses must be used with the same function argument
Cause: PARTITION-BY and CLUSTER/ORDER-BY clauses are specified on different function arguments.

Action: Use the same argument in both PARTITION-BY and CLUSTER/ORDER-BY clauses.

PLS-00632: NOT INSTANTIABLE method cannot have a body

Cause: An attempt was made to provide an implementation for a NOT INSTANTIABLE method.

Action: Remove the implementation for the NOT INSTANTIABLE method.

PLS-00633: RETURN statement in a pipelined function cannot contain an expression

Cause: A RETURN statement in a pipelined function contains an expression, which is not allowed. Pipelined functions must send back values to the caller by using the PIPE statement.

Action: Remove the expression from the RETURN statement and use a PIPE statement to return values. Else, convert the function into a non-pipelined function.

PLS-00634: type with NOT INSTANTIABLE methods must be declared NOT INSTANTIABLE

Cause: The type being created contains NOT INSTANTIABLE methods, either declared or inherited. The type must be explicitly declared NOT INSTANTIABLE.

Action: Explicitly specify the NOT INSTANTIABLE keyword or provide implementations for all the NOT INSTANTIABLE methods.

PLS-00635: method does not override

Cause: The method specification contains the OVERRIDING keyword but the method does not override a method in the ancestor types.

Action: Check the method specification.

PLS-00636: overriding method requires OVERRIDING keyword

Cause: An attempt was made to provide an overriding method specification, but the OVERRIDING keyword was not specified.

Action: Modify the method specification and specify the OVERRIDING keyword.

PLS-00637: FINAL method cannot be overriden or hidden

Cause: An attempt was made to override a FINAL MEMBER method or hide a FINAL STATIC method.

Action: Avoid overriding FINAL MEMBER methods or hiding FINAL STATIC methods.

PLS-00638: cannot overload MAP method

Cause: The MAP method does override the inherited one.

Action: Make the specifications match.

PLS-00639: NCHAR/NVARCHAR2 cannot be byte length semantics

Cause: NCHAR/NVARCHAR can only be codepoint length semantics. BYTE qualifiers used with NCHAR is illegal: nc NCHAR(7 BYTE); name NVARCHAR2(10 byte);

Action: Remove BYTE qualifier to make it as codepoint length semantics.

PLS-00640: a pipelined function cannot be called from PL/SQL context
Cause: A pipelined function was invoked from a PL/SQL expression.
Action: Use the pipelined function in the FROM clause of a SQL query.

**PLS-00641: INTO clause not allowed for this SELECT statement**
Cause: A SELECT statement in a cursor definition, an OPEN statement or a cursor FOR loop has an erroneous INTO clause.
Action: Remove the INTO clause.

**PLS-00642: local collection types not allowed in SQL statements**
Cause: A locally-defined (i.e. not schema level) collection type was used in a SQL statement. The type must be defined in a schema to be accepted in a SQL statement.
Action: Define the collection type in your schema, not inside a PL/SQL subprogram.

**PLS-00643: booleans, index tables, records and cursors not allowed in SQL statements**
Cause: Items of type boolean, table of foo index by binary_integer, record and static cursors cannot be used in SQL statements.
Action: Remove expressions of these types from the SQL statement.

**PLS-00644: character set mismatch found at 'string' among result expressions in a CASE expression**
Cause: In a CASE expression, the result expressions do not match in character set, and it is unclear which implicit conversion is required to correct the mismatch.
Action: Change the result expressions so that their character sets match.

**PLS-00645: character set mismatch found at 'string' among operands in a COALESCE expression**
Cause: In a COALESCE expression, the operands do not match in character set and it is unclear which implicit conversion is required to correct the mismatch.
Action: Change the operands so that their character sets match.

**PLS-00646: MAP or ORDER method must be defined in the root of the subtype hierarchy**
Cause: An attempt was made to define a MAP or ORDER method in a subtype.
Action: Define the MAP or ORDER method in the root of the subtype hierarchy. You can override MAP methods in subtypes.

**PLS-00647: attribute by name "string" conflicts with method by same name**
Cause: While creating a subtype some attribute name conflicted with a method name.
Action: Use a different name for attribute or method in the type being created.

**PLS-00648: type of supertype attribute "string" can not be a subtype or reference to a subtype in this release**
Cause: User tried to complete a type, Ts as a subtype of another type, Ts where Ts had contained an attribute of type Ts or of type REF to Ts. This is an implementation restriction.
Action: Change the design of code to not use any type with attribute whose type is of subtype or REF to subtype.
PLS-00649: method "string" can be overridden only once per object type  
  **Cause:** User tried to override the method more than once in the same subtype.  
  **Action:** Either make this an extra overload by removing the OVERRIDING keyword where the method signature is different. The argument types should be reconsidered otherwise.

PLS-00650: invalid type for PARTITION/CLUSTER/ORDER BY clause  
  **Cause:** User tried to use invalid type for PARTITION/CLUSTER?ORDER BY clause.  
  **Action:** Use legal allowed types.

PLS-00651: implementation type in Aggregate/Table function should be a valid type  
  **Cause:** User tried to use some other database object like a package to define implementation type of an aggregate/table function.  
  **Action:** Use a valid user defined type as implementation type.

PLS-00652: aggregate functions should have exactly one argument  
  **Cause:** User tried to create aggregate function with either 0 or more than one arguments.  
  **Action:** Do not create aggregate function with 0 or more than one argument.

PLS-00653: aggregate/table functions are not allowed in PL/SQL scope  
  **Cause:** User tried to use a table/aggregate function in PL/SQL scope.  
  **Action:** Do not use table/aggregate function in PL/SQL scope.

PLS-00654: PARTITION/ORDER/CLUSTER BY are allowed for only with PARALLEL_ENABLE  
  **Cause:** User tried partition by order by cluster by without parallel enable clause in table function.  
  **Action:** specify parallel enable also when using partion by, cluster by order by clause.

PLS-00655: only functions can be declared as PIPELINED  
  **Cause:** user is trying to declare a procedure to be pipeliend function  
  **Action:** declare a function instead of a procedure to be a pipelined function

PLS-00656: field 'string' not available in input argument  
  **Cause:** An EXTRACT operation specified a field that was not present. For example, you tried to extract the YEAR field from a TIME variable.  
  **Action:** Specify a legal field in the call to EXTRACT.

PLS-00657: Implementation restriction: bulk SQL with associative arrays with VARCHAR2 key is not supported.  
  **Cause:** Variable or expression of associative array type was used as bulk SQL bind or define.  
  **Action:** Use collection types supported by bulk SQL.

PLS-00658: constructor method name must match type name  
  **Cause:** The name of the object type constructor does not match the type name.  
  **Action:** Change the name of the constructor method to match the type name.

PLS-00659: constructor method must return SELF AS RESULT
Cause: The return clause of the constructor method did not specify SELF AS RESULT.
Action: Change the return clause to include RETURN SELF AS RESULT.

PLS-00660: SELF parameter of constructor method must be IN OUT
Cause: The mode of the SELF parameter of the constructor was not IN OUT.
Action: Change the mode of the SELF parameter to be IN OUT.

PLS-00661: RETURN statement in a CONSTRUCTOR cannot include an expression
Cause: An attempt was made to include an expression in the RETURN statement of a CONSTRUCTOR body.
Action: Remove the expression from the RETURN statement.

PLS-00662: Non-external object types containing external mapped attributes are not allowed
Cause: An attempt was made to create a non-external object, whose attributes are mapped externally.
Action: Create the object as an external object.

PLS-00663: the NEW keyword is not allowed in this context
Cause: The NEW keyword is not followed by an call to a constructor method.
Action: Remove the NEW keyword, or make sure the expression following it is a constructor call.

PLS-00664: Both ORDER BY and CLUSTER BY can not be specified for the same table function
Cause: An attempt was made to specify both ORDER BY and CLUSTER BY for the same table function.
Action: specify either ORDER BY or CLUSTER BY for a table function, but not both.

PLS-00665: ORDER BY and CLUSTER BY clauses require a PARTITION BY clause
Cause: An attempt was made to specify an ORDER BY or CLUSTER BY clause without also specifying a PARTITION BY clause.
Action: Add a PARTITION BY clause, or remove the ORDER BY or CLUSTER BY clause.

PLS-00666: Only index by binary_integer/pls_integer associative arrays allowed here
Cause: An attempt was made to specify index collection that was not indexed by binary_integer or pls_integer.
Action: Change the index collection variable type to associative array that is indexed by binary_integer or pls_integer.

PLS-00667: Element type of associative array should be pls_integer or binary_integer
Cause: An attempt was made to specify index collection whos element type was not one of pls_integer or binary_integer.
Action: Change the index collection variable type to associative array whose element type is pls_integer or binary_integer.

PLS-00668: Type of expression should be a collection type
Cause: An attempt was made to specify expression after INDICES OF or VALUES OF clause whose type is not a collection type.
Action: Change the index collection expression type to a valid collection type.

**PLS-00669: Type of expression should be a valid collection variable**
Cause: An attempt was made to specify expression after INDICES OF or VALUES OF clause that is not a collection variable.
Action: Change the index collection expression type to a valid collection variable.

**PLS-00670: sort columns must be simple column names**
Cause: An attempt was made to specify an expression as a sort column in a PARTITION BY, CLUSTER BY or ORDER BY clause. Only simple column names are permitted.
Action: Specify a simple column name.

**PLS-00671: this expression is allowed only with instance methods**
Cause: The generalized invocation syntax was used in instance method context.
Action: The generalized invocation syntax can only be used in an instance method that is not a constructor

**PLS-00672: The expression string should be a subtype of the type string**
Cause: The expression in the generalized expression should be a sub type of the type.
Action: The type of expression should be a subtype of the type name

**PLS-00673: Generalized expression is not allowed in this context**
Cause: The generalized expression is used in wrong context
Action: Fix the expression and remove the generalized expression syntax.

**PLS-00674: references to fields of BULK In-BIND table of records or objects must have the form A(I).F**
Cause: The form table(bulk_index).field is the only field selection supported at runtime.
Action: Use a FOR loop instead of the FORALL DML statement (MERGE/INSERT/DELETE/UPDATE) or revise reference to fit the form allowed.

**PLS-00675: invalid section for this type of Compound Trigger**
Cause: Before and After row sections are not allowed for Compound triggers defined on the Table and instead of row section is not allowed for Compound Triggers defined on a view.
Action: Remove the invalid sections for this context.

**PLS-00676: duplicate Compound Triggers section**
Cause: Each Compound Trigger Section can appear at most once in a body of the compound trigger
Action: Remove the offending sections.

**PLS-00677: Compound Triggers cannot be autonomous transactions**
Cause: The Compound Triggers hsd pragma autonomous transaction.
Action: Call autonomous function or procedure, if autonomous transaction behavior is desired from Compound Triggers.
PLS-00678: RETURN statement not allowed inside Compound Triggers
  Cause: A return Statement was seen inside a compound trigger
  Action: Remove Return statement and use other PL/SQL constructs to transfer flow of control.

PLS-00679: trigger binds not allowed in before/after statement section
  Cause: :new or :old were used in this section.
  Action: Do not use trigger binds in this section

PLS-00680: BEFORE/AFTER ROW sections were used in a view trigger
  Cause: BEFORE/AFTER ROW sections are not allowed with instead of row triggers.
  Action: Remove the offending sections.

PLS-00700: PRAGMA EXCEPTION_INIT of string must follow declaration of its exception in the same declarative part
  Cause: An EXCEPTION_INIT pragma was not declared in the same block as its exception. They must be declared in the proper order in the same block, with the pragma declaration following the exception declaration.
  Action: Place the EXCEPTION_INIT pragma directly after the exception declaration referenced by the pragma.

PLS-00701: illegal ORACLE error number string for PRAGMA EXCEPTION_INIT
  Cause: The error number passed to an EXCEPTION_INIT pragma was out of range. The error number must be in the range -9999 .. -1 (excluding -100) for Oracle errors or in the range -20000 .. -20999 for user-defined errors.
  Action: Use a valid error number.

PLS-00702: second argument to PRAGMA EXCEPTION_INIT must be a numeric literal
  Cause: The second argument passed to an EXCEPTION_INIT pragma was something other than a numeric literal (a variable, for example). The second argument must be a numeric literal in the range -9999 .. -1 (excluding -100) for Oracle errors or in the range -20000 .. -20999 for user-defined errors.
  Action: Replace the second argument with a valid error number.

PLS-00703: multiple instances of named argument in list
  Cause: Two or more actual parameters in a subprogram call refer to the same formal parameter.
  Action: Remove the duplicate actual parameter.

PLS-00704: 'string' must be declared as an exception
  Cause: The exception_name parameter passed to an EXCEPTION_INIT pragma is misspelled or does not refer to a legally declared exception. Or, the pragma is misplaced; it must appear in the same declarative section, somewhere after the exception declaration.
  Action: Check the spelling of the exception_name parameter. Then, check the exception declaration, making sure the exception name and the keyword EXCEPTION are spelled correctly. Also make sure the pragma appears in the same declarative section somewhere after the exception declaration.

PLS-00705: exception 'string' used in expression requiring return type
Cause: An exception was referred to in an expression. Exceptions have names but not values and therefore cannot contribute values to an expression. For example, the following RETURN statement is illegal: FUNCTION credit_limit (cust_no INTEGER) RETURN NUMBER IS limit NUMBER; over_limit EXCEPTION; ... BEGIN ... RETURN over_limit; -- illegal END;

Action: Check the spelling of the identifiers in the expression, then rewrite the expression so that it does not refer to an exception.

PLS-00706: Exception string cannot be used as prefix of a selected component

Cause: An exception name was mistakenly used to qualify a reference to a component. For example, when dot notation was used to specify fields within a record, an exception name might have been coded instead of the record name.

Action: Rewrite the component reference using a valid prefix (for example, the name of a package, record, or schema).

PLS-00707: unsupported construct or internal error [string]

Cause: At run time, this is an internal error. At compile time, it indicates one of the following problems: -- A call was made to a remote subprogram that has a parameter type or default expression not supported at the calling site. -- An incomplete upgrade or downgrade was done to a database that has stored procedures. Perhaps incorrect versions of system packages such as STANDARD.SQL were installed. -- A compiler bug was encountered. In such cases, legal PL/SQL syntax will fail to compile.

Action: Either report the internal error to your Customer Support representative or, depending on the problem, take one of the following actions: -- Revise the logic of the application to use parameter types and default expressions that are supported at both the local and remote sites. -- Complete the upgrade or downgrade properly, making sure to install correct versions of all system packages. -- Report the legal-syntax error to your Customer Support representative. If there are line and column numbers displayed with the error message, they might help you find a workaround. For example, try recoding the offending line to avoid the bug.

PLS-00708:Pragma string must be declared in a package specification

Cause: The named pragma was not declared in a package specification, as required. For example, the pragma RESTRICT_REFERENCES must be declared in a package specification.

Action: Remove or relocate the misplaced pragma.

PLS-00709: pragma string must be declared in package specification and body

Cause: The named pragma was declared in a package specification but not in the corresponding package body or vice-versa, as well as the package body.

Action: Add the pragma to that part of the package declaration that does not have the pragma.

PLS-00710: Pragma string cannot be specified here

Cause: The pragma was specified in an inappropriate context.

Action: Remove or relocate the misplaced pragma. Check the documentation to determine the correct context for this pragma.

PLS-00711: PRAGMA string cannot be declared twice

Cause: The PRAGMA was declared twice in the same block.

Action: remove the duplicate declaration of the PRAGMA
PLS-00712: illegal option for subprogram string

Cause: Only top level subprograms or subprogram declarations in PACKAGE or TYPE specifications are allowed to have the options DETERMINISTIC or PARALLEL_ENABLE. For example, this error would be raised if the options are used in PACKAGE or TYPE body.

Action: remove the option.

PLS-00713: attempting to instantiate a type that is NOT INSTANTIABLE

Cause: An attempt was made to instantiate a type that is defined as NOT INSTANTIABLE.

Action: Avoid instantiating variables of this NOT INSTANTIABLE type, instead derive an INSTANTIABLE subtype from it and instantiate variables of the subtype.

PLS-00714: supertypes's AUTHID is DEFINER but supertype and subtype are not in same schema

Cause: The supertype's AUTHID is DEFINER, but the supertype and subtype are defined in different schemas. SQL statements executed in dynamically dispatched methods can potentially pick up different values from database tables in the two schemas.

Action: Create the subtype in the same schema as the supertype.

PLS-00715: attribute or method by name 'string' does not exist

Cause: An attempt was made to drop a nonexistent method or attribute from the type being altered.

Action: Check the spelling of the attribute or method name. Make sure it is locally defined in the type and not inherited.

PLS-00716: Attribute/method 'string' can occur only once in an ALTER TYPE statement

Cause: User attempted more than one of ADD, DROP or MODIFY on an attribute in single ALTER TYPE statement. User attempted more than one of ADD or DROP on a method in single ALTER TYPE statement.

Action: Do only one ADD, DROP or MODIFY for an attribute in single ALTER TYPE statement. Do only one ADD or DROP for a method in single ALTER TYPE statement.

PLS-00717: method 'string' does not have matching signature among existing methods

Cause: The method to be dropped matches the name of some existing method but does not match it in signature.

Action: Make sure that a matching method signature is provided for dropping a method.

PLS-00718: type of attribute 'string' does not allow modifications to the attribute

Cause: The type of the attribute to modify is not one of VARCHAR2, NUMBER, or RAW.

Action: Only VARCHAR2, NUMBER and RAW type attributes are allowed to be modified.

PLS-00719: only widening of attribute 'string' constraints is allowed

Cause: Modification to the attribute did not widen its constraints or attempted to change the type of the attribute. For NUMBER type attributes, scale and precision
can be changed to allow increase in number of digits after and before the decimal point. For VARCHAR2 and RAW type attributes the size can be increased. Other type attributes are not allowed to be modified. Change of type of attribute is also not allowed.

**Action:** Change the constraint specification so as to widen the existing constraints. To narrow the constraints or to change the type of the attribute, you must drop the attribute and add it with new constraints or new type. In that case you must also take appropriate steps to preserve your existing data based on the type (if you want to preserve it). Typically this will involve backing up the data and restoring it after the ALTER TYPE.

**PLS-00720: type 'string' has evolved**

**Cause:** The type has evolved. The version of the type used by the compiled code is not the same as the latest version of the type.

**Action:** Recompile the code to use the latest version of the type.

**PLS-00721: 'string' formed a non-REF mutually-dependent cycle with 'string'**

**Cause:** This compilation was aborted because the library unit that was compiled would have formed a non-REF mutually-dependent cycle with some other library units. This happens when an attempt is made to compile types that have attributes of other types that may participate in a cycle with this type. Example: create type t1; create type t2 (a t1); create type t1 (a t2);

**Action:** Break the cycle (possibly by adding a REF or by using another type).

**PLS-00722: supertypes's AUTHID is different than subtype's AUTHID**

**Cause:** The subtype’s AUTHID must be same as the supertype’s AUTHID.

**Action:** Create the subtype with AUTHID of its supertype or do not specify AUTHID for subtype.

**PLS-00725: type 'string' must be a supertype or subtype of the TREAT expression**

**Cause:** In TREAT(<expr> AS <type>), type must be a supertype or subtype of <expr>.

**Action:** None

**PLS-00726: MODIFY ELEMENT is supported only on schema-level varray and nested tables**

**Cause:** An attempt was made to modify the limit of a type that was not a schema-level varray and nested table type.

**Action:** This is not a legal ALTER TYPE command for this type.

**PLS-00727: MODIFY LIMIT is supported only on schema-level varray types**

**Cause:** An attempt was made to modify the limit of a type that was not a schema-level varray type.

**Action:** This is not a legal ALTER TYPE command for this type.

**PLS-00728: the limit of a VARRAY can only be increased and to a maximum 2147483647**

**Cause:** An attempt was made to decrease the limit or raise it past 2147483647.

**Action:** This is not a legal limit for this type, change it.

**PLS-00729: only widening of the collection element type is allowed**

**Cause:** Modification to the collection element type did not widen its constraints or attempted to change the type of the element. For NUMBER types, scale and
precision can be changed to allow increase in number of digits after and before the
decimal point. For VARCHAR2 and RAW type attributes the size can be increased.

Action: Change the constraint specification so as to widen the existing constraints.

PLS-00730: collection element type does not allow modifications
    Cause: The element type to modify is not one of VARCHAR2, NUMBER, or RAW.
    Action: Only VARCHAR2, NUMBER and RAW collection elements can be modified.

PLS-00731: ALTER TYPE is supported only on schema-level types
    Cause: An attempt was made to alter a type that was not schema-level.
    Action: ALTER TYPE is not legal for this type.

PLS-00732: Illegal overload of ellipsis in formal parameter list
    Cause: An ellipsis and a non-ellipsis type appeared at the same position in
    separate overload candidates. Currently, if ellipsis types are used they must
    appear in ALL overload candidates with the same name (regardless of the number
    or types of their formal parameters) at the same position in the formal parameter
    list.
    Action: Make sure that ellipsis types appear at the same position in all overload
    candidates.

PLS-00733: RPCs to variable argument functions are not allowed
    Cause: Attempted to call a vararg function (a function which contains ellipsis in
    the formal parameter list) as an RPC.
    Action: Do not call vararg functions as an RPC.

PLS-00734: Illegal use of an associational parameter with a formal ellipsis
    Cause: Attempted to use an associational actual argument for a formal ellipsis
    type argument.
    Action: Remove associational parameters which correspond to formal ellipsis
    types.

PLS-00735: Attempted to declare more than one formal ellipsis parameter
    Cause: More than one ellipsis ("...") was found in a formal parameter specification
    for a function or procedure
    Action: Make sure only one ellipsis appears in a formal parameter specification
    for any given function or procedure

PLS-00736: user-declared operators are not allowed
    Cause: An attempt was made by the user to declare an operator (a function whose
    name is enclosed in single quotes ("'")). Operators may only be declared in package
    STANDARD.
    Action: Remove the single quotes from around the function name, replacing them
    with double quotes (""") only if needed.

PLS-00737: LIBRARY or ASSEMBLY file specification exceeds the maximum
allowed length
    Cause: A string of more than expected number of chararacters was found for the
    LIBRARY or ASSEMBLY file specification.
    Action: Limit the LIBRARY or ASSEMBLY file specification to the appropriate
    size for the platform.
PLS-00738: REF target string changed during compilation
  Cause: The current unit contains a REF to a target object. During compilation, the
  REF’s target object was simultaneously changed by a different session. The current
  unit is therefore invalid and needs to be recompiled to pick up the latest definition
  of the REF target.
  Action: Recompile the unit that has this error.

PLS-00739: FORALL INSERT/UPDATE/DELETE not supported on remote tables
  Cause: The current statement refers to remote insert/update/delete for remote
  object.
  Action: Use a FOR loop instead of a FORALL loop or call a remote function or
  procedure that includes the FORALL INSERT/UPDATE/DELETE statement.

PLS-00740: ASSEMBLY identity specification exceeds the maximum allowed length
  Cause: A string of more than expected number of characters was found for the
  ASSEMBLY identity specification.
  Action: Limit the ASSEMBLY identity specification to the appropriate size.

PLS-00741: string must be specified on subprogram string's declaration and
  definition
  Cause: A property was specified on a subprogram’s declaration but not on its
  definition or vice-versa.
  Action: Certain subprogram properties (e.g., RESULT_CACHE) must be specified
  as part of the subprogram declaration and definition. For example, if the property
  RESULT_CACHE is specified on a subprogram declared in a package
  specification, then it must also be specified on the subprogram’s definition in the
  package body (and vice-versa).

PLS-00742: field string is not yet denotable
  Cause: When the fields of a record were declared, one field was used to initialize
  another, as in: TYPE my_rec IS RECORD (f1 varchar2(10), f2 varchar2(10) := f1);
  The first field has no value until run time, so it cannot be used to initialize another
  field.
  Action: Remove the illegal field reference.

PLS-00743: ASSEMBLY IDENTITY string is null
  Cause: The string provided for the identity clause of an ASSEMBLY was null.
  Action: Provide a valid identity string for the ASSEMBLY.

PLS-00744: DOTNET call specification methodname is null
  Cause: The string provided for the METHODNAME clause of a DOTNET call
  specification was null.
  Action: Provide a valid METHODNAME for the ASSEMBLY.

PLS-00745: ASSEMBLY CONTEXT string is null
  Cause: The string provided for the CONTEXT clause of an ASSEMBLY was null.
  Action: Provide a valid CONTEXT string for the ASSEMBLY.

PLS-00746: ASSEMBLY AGENT string is null
  Cause: The string provided for the AGENT clause of an ASSEMBLY was null.
  Action: Provide a valid AGENT string for the ASSEMBLY.
PLS-00747: .NET assemblies are not supported on this platform
   Cause: .NET assemblies were not supported on this platform. .NET assemblies are
   only supported on 32-bit and 64-bit Windows.
   Action: Only attempt to create assemblies on 32-bit or 64-bit Windows.

PLS-00751: cannot find PACKAGE SYS_STUB_FOR_PURITY_ANALYSIS
   Cause: A top level subprogram (function or procedure) cannot be created if the
   system package SYS_STUB_FOR_PURITY_ANALYSIS is missing in the Oracle
   database.
   Action: Make sure the package is in the database, and retry the creation

PLS-00752: Table function string is in an inconsistent state.
   Cause: Some of the internally generated types prefixed with SYS_ have been
   dropped. These should never be dropped by the user.
   Action: Recompile the table function or the package or type that contains the table
   function.

PLS-00753: malformed or corrupted wrapped unit
   Cause: The format of the wrapped unit being compiled is not understood by the
   compiler. This may be because the unit was edited or modified after it was
   wrapped.
   Action: Rewrap the unit.

PLS-00754: illegal reference to editioned object string
   Cause: An attempt was made to violate the rule "A noneditioned object may not
   depend on an editioned object."
   Action: Either make this object editioned; or do not make the illegal reference.

PLS-00755: SYSAUX tablespace offline while saving identifier data
   Cause: The SYSAUX tablespace was offline while attempting to save identifier
   data. Any identifier data previously collected and saved for the libunit will be
   invalid.
   Action: Bring the SYSAUX tablespace back online and recompile the object.

PLS-00756: PL/SQL does not support feature "string" "string" in this environment
   Cause: Some host environments of the PL/SQL compiler do not support the full
   range of PL/SQL features. A construct in the program violated one of the current
   host's restrictions.
   Action: Modify the program to avoid using features that are not supported by this
   host environment. Check the host environment documentation for specific
   changes and limitations in PL/SQL features.

PLS-00801: internal error [string]
   Cause: This is a generic internal error that might occur during compilation or
   execution. The first parameter is the internal error number.
   Action: Report this error as a bug to your Customer Support representative.

PLS-00900: can't find body of unit 'string'
   Cause: At run time, the body of a program unit could not be found. This can
   happen for one of two reasons. -- First, there may be a unit 'a' which calls a module
   'b', where the spec for 'b' exists but not the body. In this case, since the spec is
   present, there will be no compile-time errors. -- Secondly, this can occur if there is a
reference to a sequence outside of the proper context such as a SQL statement. In this case, the "spec" of the sequence reference can be found, but it is invalid to actually run code which references the sequence outside a SQL statement, as in: i := seq.nextval;

**Action:** If caused by the first reason, create a body for the object that is being referenced. If caused by the second reason, move the sequence into a SQL statement. For example, i := seq.nextval; can be replaced by: select seq.nextval into temp from dual; i := temp;

**PLS-00901: the data type of column 'string' of table 'string' is not supported**

**Cause:** A column in a database table belongs to a datatype that is not supported by the current release of PL/SQL.

**Action:** Remove the offending column from the table or copy the desired columns to another table.

**PLS-00902: A READ-ONLY bind variable used in OUT or IN-OUT context**

**Cause:** A host variable that is protected from update was used in a context that allows an update.

**Action:** Check the context and change the use of the host variable, or assign the value of the host variable to a PL/SQL local variable, then use the local variable instead.

**PLS-00904: insufficient privilege to access object string**

**Cause:** An attempt was made to operate on a database object without the required privilege. This error occurs, for example, if an attempt was made to UPDATE a table for which only SELECT privileges were granted.

**Action:** Ask the DBA to perform the operation or to grant you the required privilege.

**PLS-00905: object string is invalid**

**Cause:** An invalid package specification or stored subprogram was referenced. A package specification or stored subprogram is invalid if its source code or any database object it references has been DROPped, REPLACEd, or ALTERed since it was last compiled.

**Action:** Find out what invalidated the package specification or stored subprogram, then make sure that Oracle can recompile it without errors.

**PLS-00906: Compilation is not possible**

**Cause:** The PL/SQL compiler cannot run properly because its operating environment is corrupted. For example, its error message file might be inaccessible.

**Action:** Check the PL/SQL operating environment, making sure that all files required by the compiler are accessible.

**PLS-00907: cannot load library unit string (referenced by string)**

**Cause:** PL/SQL is unable to find and load a library unit that was previously available. This typically happens when you try to load a unit which references another library unit that is non-existent or invalid.

**Action:** Provide the needed library unit.

**PLS-00908: The stored format of string is not supported by this release**
Cause: PL/SQL cannot understand the stored format of a library unit. It has been compiled or shrink-wrapped with a version of PL/SQL either too new or too old for this version to understand it.

Action: Recompile the library unit for this version of PL/SQL.

PLS-00909: object string is not declared or insufficient privileges to access object string

Cause: An object from the operator declaration is not declared, or it is declared but there is no sufficient privileges to access that object.

Action: Declare the object, or ask the DBA to grant the privileges required to access the object.

PLS-00910: insufficient privilege to inherit from type string

Cause: An attempt was made to inherit from a type without the required UNDER privilege.

Action: None

PLS-00920: parameter plsql_native_library_dir is not set

Cause: A PL/SQL program is being compiled natively, but the compiler parameter plsql_native_library_dir, which denotes the directory to store the native shared objects (DLL), is not set.

Action: The DBA should set this parameter.

PLS-00923: native compilation failed: string:string

Cause: The native compilation of PL/SQL program has failed because the native shared object (DLL) could not be created successfully.

Action: The DBA should ensure that the commands specified in spnc_commands file are correct.

PLS-00924: native compilation is not supported on this platform

Cause: Native compilation of PL/SQL programs is not supported on this platform.

Action: Compile the PL/SQL program to bytecode by setting the parameter plsql_compiler_flags to INTERPRETED.

PLS-00925: native compilation failed: Unable to create file (string string)

Cause: Native compilation of a PL/SQL program failed because a file could not be created. It is likely that the system parameter plsql_native_library_dir does not reference a writable, existing directory

Action: Ensure that the system parameter plsql_native_library_dir references a directory which exists, and is writable.

PLS-00950: In this version, PL/SQL tables can not be used in this SQL statement.

Cause: In a SQL statement, a PL/SQL table was referenced incorrectly. For example, the following reference might have been made, but PL/SQL table attributes can only be used in procedural statements: SELECT ename_tab.COUNT INTO name_count WHERE ...

Action: Remove the incorrect reference from the SQL statement.

PLS-00951: string Feature is not supported by this release

Cause: PL/SQL cannot understand something in an imported library unit. It uses some feature either too new or too old for this version to understand it.
Action: Recompile the imported library unit with this version of PL/SQL, to discover more precisely what feature is not supported.

PLS-00960: RPCs cannot use parameters with schema-level object types in this release
Cause: Schema-level object types, or types which recursively use such types, were used in an RPC, which is not permitted. For example: create type foo as object (...)
create package my_pack is type my_rec is record(v foo); -- on a remote server: x
my_pack.my_rec@rpc; -- illegal attempt to use type my_rec
Action: Use only PL/SQL-defined types in RPC calls. It may be necessary to add extra code to element-wise copy schema-level types into local types in order to move such data through an RPC.

PLS-00970: The class name of a method must match that of EXTERNAL NAME clause in the type header
Cause: The class name defined as part of the method signature does not match the one defined in the type header in the EXTERNAL NAME clause. create type foo as object EXTERNAL NAME 'foo' LANGUAGE JAVA (... MEMBER FUNCTION my
(number) return number EXTERNAL NAME 'bar.func(oracle.sql.NUMBER) return
oracle.sql.NUMBER', .. );
Action: Either omit the class name from the method signature or use the one defined in the type header.

PLS-00989: Cursor Variable in record, object, or collection is not supported by this release
Cause: 3.0 Implementation Restriction for Ref Cursors
Action: None

PLS-00990: Index Tables of Cursor Variables are disallowed
Cause: 2.2 Implementation Restriction for Ref Cursors
Action: None

PLS-00992: Cursor Variables cannot be FETCH'ed from
Cause: 2.2 Implementation Restriction for Ref Cursors
Action: None

PLS-00993: Cursor variables cannot be passed as forwarded RPC arguments or results
Cause: An attempt was made to pass a cursor variable to or from a remote subprogram by way of a forwarded RPC, which is not allowed. For example, from a client-side tool, a procedure on a remote database cannot be used to open a cursor variable because remote subprograms cannot return the values of cursor variables.
Action: Change the subprogram call to reference the local database.

PLS-00994: Cursor Variables cannot be declared as part of a package
Cause: An attempt was made to declare a cursor variable in a package specification, which is not allowed. Although REF CURSOR types can be defined in a PL/SQL block, subprogram, or package, cursor variables can be declared only in a block or subprogram.
Action: Move the cursor variable declaration into a PL/SQL block or subprogram.

PLS-00995: unhandled exception # "string"
**Cause:** An exception was raised for which no handler was found. If it cannot find a handler for a raised exception, PL/SQL returns an unhandled exception to the host environment. The number embedded in the message is an Oracle error code listed in this manual.

**Action:** Fix the condition that raised the exception, write an appropriate exception handler, or use the OTHERS handler. If there is an appropriate handler in the current block, the exception was raised in a declaration or exception handler, and therefore propagated immediately to the enclosing block.

**PLS-00996: out of memory**

**Cause:** A request from PL/SQL for more memory failed.

**Action:** Make sure that you are not referencing the wrong row in a PL/SQL table and that the program is not recursing too deeply.

**PLS-00997: no cursor return types allowed in this beta version**

**Cause:** Cursor return types have bugs, and it is best to disable them for now.

**Action:** None

**PLS-01400: Use of '||' token**

**Cause:** Use of '||' token in expressions is not in ANSI's grammar. This corresponds to the "binary_add_op"'s reduction to a "CAT_" in plsql.y

**Action:** None

**PLS-01401: Identifier over 18 characters long**

**Cause:** Identifiers over 18 characters long are not allowed under the ANSI grammar.

**Action:** None

**PLS-01402: Use of quoted identifier**

**Cause:** The use of quoted identifiers is a PL/SQL extension and is not allowed under the ANSI grammar.

**Action:** None

**PLS-01403: Comment delimiters /* */**

**Cause:** C-style comments (introduced with the '/' and '*' characters) are not part of the ANSI grammar. To conform with ANSI, comments must be preceded by the ANSI comment introducer, '--', and must not contain a newline. If someone can figure out a way to make this message look less cheesy without ending up with nested comments, be my guest.

**Action:** None

**PLS-01404: ANSI Identifiers can only consist of letters, digits, and the underscore character**

**Cause:** ANSI identifiers can only consist of letters, digits, and the underscore character. PL/SQL allows "#" and "$" in identifiers, but these are not ANSI.

**Action:** None

**PLS-01405: Under ANSI's grammar, numeric data represented in exponent notation must use an uppercase E**

**Cause:** Under ANSI's grammar, numeric data represented in exponent notation must use an uppercase "E". Example: 3.45E-6 is ANSI, but 3.45e-6 is not.

**Action:** None

50-68  Oracle Database Error Messages
PLS-01406: An identifier has been found that is considered a keyword in ANSI's grammar but not in PL/SQL's.
   Cause: An identifier has been found that is considered a keyword in ANSI's grammar but not in PL/SQL's.
   Action: None

PLS-01407: One of the identifiers CHAR, CHARACTER, or INTEGER has been redefined by the programmer.
   Cause: One of the identifiers "CHAR", "CHARACTER", or "INTEGER" (all ansi keywords) has been redefined by the programmer.(special case of 1406, above).
   Action: None

PLS-01408: Use of '& token
   Cause: Use of '& token in expressions is not in ANSI's grammar.
   Action: None

PLS-01409: Use of 'PRIOR_' token
   Cause: Use of 'PRIOR_' token in expressions is not in ANSI's grammar.
   Action: None

PLS-01410: Use of 'MOD' token
   Cause: Use of 'MOD' token in expressions is not in ANSI's grammar.
   Action: None

PLS-01411: Use of 'REM' token
   Cause: Use of 'REM' token in expressions is not in ANSI's grammar.
   Action: None

PLS-01412: Use of 'EXP' token
   Cause: Use of 'EXP' token in expressions is not in ANSI's grammar.
   Action: None

PLS-01413: Use of NULL an expression
   Cause: Use of NULL an expression not in ANSI's grammar.
   Action: None

PLS-01414: Use of qualified expression here
   Cause: Use of qualified expression here is not in ANSI's grammar.
   Action: None

PLS-01415: Use of aggregate value here
   Cause: Use of aggregate value here is not in ANSI's grammar.
   Action: None

PLS-01416: Use of &{id} (&{value}>...) here
   Cause: Use of &{id} (&{value}>...) here is not in ANSI's grammar.
   Action: None

PLS-01417: Use of %attribute
   Cause: Use of %attribute value here is not in ANSI's grammar.
   Action: None
PLS-01418: Subquery cannot include set operators in ANSI's grammar
   Cause: Subquery cannot include set operators in ANSI's grammar.
   Action: None

PLS-01419: Subquery must have either '*' or exactly one column in its select list
   Cause: Subquery must have either '*' or exactly one column in its select list according to ANSI's grammar.
   Action: None

PLS-01420: INTERSECT and MINUS set operators are not ANSI
   Cause: INTERSECT and MINUS set operators are not ANSI
   Action: None

PLS-01421: FOR UPDATE clause
   Cause: FOR UPDATE clause is not in ANSI's grammar.
   Action: None

PLS-01422: Aliases
   Cause: Aliases are not in ANSI's grammar.
   Action: None

PLS-01423: Subquery on right-hand-side in set clause
   Cause: Subquery on right-hand-side in set clause is not in ANSI's grammar.
   Action: None

PLS-01424: Non-ANSI order of clauses
   Cause: ANSI specifies an ordering to clauses in a table-expression which PL/SQL doesn't. The ordering according to ANSI must be: (1) from clause (2) where clause (3) group-by clause (4) having clause In PL/SQL, the from clause must come first, and the clauses after it can appear in any order (with the addition of the non-ansi connect-by clause).
   Action: None

PLS-01425: Connect-by clause
   Cause: ANSI doesn't allow connect-by clauses.
   Action: None

PLS-01450: This <value expression> contains a nonconforming data type
   Cause: This <value expression> contains a nonconforming data type. Section 4.2 of X3H2, "Data types" states that: "A nonnull value is either a character string or a number." Many builtin functions in STANDARD will be flagged with this warning by means of a pragma.
   Action: None

PLS-01451: The data types of these <value expressions> must be comparable
   Cause: The data types of these <value expressions> must be comparable. Section 4.2 of X3H2, "Data types", states that: "A character string and a number are not comparable values." Many builtin functions in STANDARD will be flagged with this warning by means of a pragma. This warning will be place on data-type coercion functions, for example, TO_CHAR(<number>), that are inserted in OracleSQL to allow non-conforming data type combinations.
   Action: None
PLS-01452: This function is not part of the ANSI standard
  Cause: This function is not part of the ANSI standard. This warning is used to flag such functions as "POWER" that are not mentioned in the ANSI specifications.
  Action: None

PLS-01453: This procedure is not part of the ANSI standard
  Cause: This procedure is not part of the ANSI standard. This warning is used to flag such procedures as "STOP" that are not mentioned in the ANSI specifications.
  Action: None

PLS-01454: No operator may be used with values of data type CHAR
  Cause: No operator may be used with values of data type "character string". Section 5.9, "<value expression>“, syntax rule 3, of X3H2 states: "If the data type of a <primary> is character string, then the <value expression> shall not include any operators." This warning is placed on many functions in STDBASE that take CHAR args.
  Action: None

PLS-01455: The predicates IS NULL and IS NOT NULL are defined only for column specifications
  Cause: The predicates "IS NULL" and "IS NOT NULL" are defined only for column specifications, not for any other expressions. Section 5.15, "<null predicate>“, indicates that in the predicate "x IS NULL", x must be a column, and may not be any other kind of expression.
  Action: None

PLS-01458: The set clause in an UPDATE statement requires a column name of length 1
  Cause: The set clause in an UPDATE statement requires a column name of length 1. Sect. 8.11, 8.12
  Action: None

PLS-01460: Cannot access object on a remote host
  Cause: Cannot access object on a remote host.
  Action: None

PLS-01463: STDDEV is not a standard set function
  Cause: STDDEV is not a standard set function.
  Action: None

PLS-01464: VARIANCE is not a standard set function
  Cause: VARIANCE is not a standard set function.
  Action: None

PLS-01466: Null strings are not allowed
  Cause: Null strings are not allowed.
  Action: None

PLS-01467: The value list of the IN predicate, if not a subquery, must contain only value_specifications
  Cause: The value list of the IN predicate, if not a subquery, must contain only value_specifications (i.e. literals and PL/SQL or embedded variables).
PLS-01468: The first argument of the like-predicate must be a column of type character string
   Cause: The first argument of the like-predicate must be a column of type character string.
   Action: None

PLS-01469: ANSI standard does not permit records
   Cause: ANSI standard does not permit records.
   Action: None

PLS-01470: The escape character in the like-predicate must be a literal or a variable of type CHAR
   Cause: The escape character in the like-predicate must be a literal or a variable of type character.
   Action: None

PLS-01471: The keyword DISTINCT must be present in a COUNT(DISTINCT sim_expr)
   Cause: The keyword DISTINCT must be present in a COUNT(DISTINCT sim_expr). Sect 5.8
   Action: None

PLS-01472: In a set_function_specification, if DISTINCT is present, the expression must be a column_specification
   Cause: In a set_function_specification, if DISTINCT is present, the expression must be a column_specification.
   Action: None

PLS-01473: Use <> instead of != or ~=
   Cause: Use <> instead of != or ~=. Sect 5.11.
   Action: None

PLS-01474: Use of ANY is non-ANSI
   Cause: Due to the combining of comparison_predicate and quantified_predicate, we may have something like sim_expr = ANY_sim_expr, which is nonetheless accepted by kernel.
   Action: None

PLS-01500: Unions are not allowed in the definition of a view
   Cause: Unions are not allowed in the definition of a view. Sect. 6.9
   Action: None

PLS-01501: Options in CREATE TABLE statement is non-ANSI.
   Cause: CREATE TABLE allows only the definition of the structure of a table. None of the .SPACE__name. .PCTFREE__numeric_literal. .cluster. is ANSI. Sect. 6.2
   Action: None

PLS-01502: Constraint name and constraint status are non-ANSI.
   Cause: Constraint name and constraint status are non-ANSI. Sect. 6.3
Action: None

PLS-01503: The expression in a SET clause must not include a set function
Cause: The expression in a SET clause must not include a set function. Sect. 8.12.
Action: None

PLS-01504: Use of AS phase in CREATE TABLE statement is non-ANSI
Cause: CREATE TABLE allows only the definition of the structure of a table. Use of AS phase in CREATE TABLE statement is non-ANSI.
Action: None

PLS-01505: ALTER is non-ANSI
Cause: ALTER is non-ANSI
Action: None

PLS-01506: CREATE INDEX is non-ANSI
Cause: CREATE INDEX is non-ANSI
Action: None

PLS-01507: DROP is non-ANSI
Cause: DROP is non-ANSI
Action: Sect. 6.2

PLS-01701: Illegal syntax in ROLLBACK WORK statement
Cause: Illegal syntax in ROLLBACK WORK statement.
Action: None

PLS-01702: Illegal syntax in COMMIT WORK statement
Cause: Illegal syntax in COMMIT WORK statement.
Action: None

PLS-01703: Cursor name in CLOSE statement must be of length 1
Cause: Cursor name in CLOSE statement must be of length 1.
Action: None

PLS-01704: The expressions in a sort clause must be column specs or unsigned integers, with optional ASC or DESC
Cause: The expressions in a sort clause may only be column specifications or unsigned integers, followed by optional ASC or DESC.
Action: None

PLS-01705: table specified by a cursor not updatable if cursor specification has a UNION or ORDER_BY
Cause: Missing keyword FROM.
Action: None

PLS-01707: In positioned DELETE or UPDATE statement, table must be identified in specification of cursor
Cause: In a positioned DELETE or UPDATE statement, the table deleted from or updated must be identified in the specification of the cursor.
Action: None
PLS-01708: In searched DELETE, UPDATE or INSERT, table must not appear in FROM clause of subqueries in search condition
Cause: In a searched DELETE, UPDATE or INSERT statement, the table affected must not appear in a FROM clause in any of the subqueries in the search condition.
Action: None

PLS-01709: value list of INSERT statement, if specified with value list rather than subquery, must be value specification
Cause: In an INSERT statement, the insert value list, if specified with a value list rather than a subquery, must be value specifications, i.e. no compound expressions or column references. Sect 8.7.
Action: None

PLS-01710: In a positioned DELETE or UPDATE statement, the cursor name must be of length 1
Cause: In a positioned DELETE or UPDATE statement, the cursor name must be of length 1.
Action: None

PLS-01711: A SELECT statement may not contain ORDER_BY, HAVING, or GROUP_BY clause
Cause: A SELECT statement may not contain ORDER_BY, HAVING, or GROUP_BY clause. Sect. 8.10.
Action: None

PLS-01712: ANSI does not allow bind variables as INDICATORS
Cause: ANSI does not allow bind variables as INDICATORS
Action: None

PLS-01713: The constraints on these types do not match
Cause: The constraints on these types do not match
Action: None

PLS-01714: ANSI expects a column name not a literal value here
Cause: ANSI expects a column name not a literal value here
Action: None

PLS-01900: : character to number conversion error
Cause: There was a failure while converting a character string into a numeric value.
Action: Verify that all character strings assigned to number variables have valid numeric value interpretations.

PLS-01901: : host bind array too small
Cause: PL/SQL was unable to transfer data into a host array because the array is too small.
Action: Increase the size of the host array.

PLS-01902: : hex to raw conversion error
Cause: There was a failure while converting a hexadecimal string to a raw.
Action: Verify that the hexadecimal variable to be converted contains a valid hexadecimal value.

**PLS-01903: Non-integer error number**

Cause: SQLERRM() was called with a non-integer value.

Action: Make sure SQLERRM() is called with an integer value.

**PLS-01904: NULL index table key value**

Cause: An attempt was made to index into an index table with a NULL key value.

Action: Make sure key values used to index into index tables are non-NULL.

**PLS-01905: Character string buffer too small**

Cause: An error was encountered while moving a character string from a source to a destination. This error occurs if, for example, an attempt is made to move a character string of 10 characters into a 1 character buffer. The cause of this error may not always be obvious. For example, the following will result in this error: `a varchar2(1); b number; b := 10; a := b;` An error results because an implicit conversion causes the number 10 to become the character string '10', which does not fit in the character buffer of 1 allocated for the variable a.

Action: First, look for character string assignment statements where the buffer size is mismatched. If there are none found, then consider the implicit conversion case illustrated in the example above.

**PLS-01906: Raw variable length too long**

Cause: The length of a raw variable being copied or assigned was too long to fit into its destination.

Action: Make sure the raw variable length is correct.

**PLS-01907: Number precision too large**

Cause: The number begin copied or assigned had too many digits to the left of the decimal and did not fit into its destination. In other words, there is a number precision mismatch. This error may also occur if, for example, an attempt is made to assign a character string to a number, as demonstrated below. `a varchar2(4); b number(1,1); a := '10.1'; b := a;`

Action: First, check explicit number precision value mismatches. If none are found, then consider implicit conversions of other types to numbers, including conversions performed during binds.

**PLS-01908: RETURNING INTO buffer too small**

Cause: PL/SQL determined that a server side DML with a RETURNING INTO clause does not use a buffer that is large enough to hold the data being returned.

Action: Increase the size of the RETURNING INTO clause buffer.

**PLS-01909: Cannot assign supertype instance to subtype**

Cause: An attempt was made to assign or copy a supertype instance to a container (destination) that can only hold a subtype instance.

Action: Make sure the runtime type of the source of the assignment or copy is the same type as the destination or is a subtype of the destination type.

**PLS-01910: Associative array shape is not consistent with session parameters**

Cause: NLS parameters affecting comparison of keys have been altered dynamically. The associative array’s index is invalid.
**Action**: Avoid using associative arrays with string keys in applications which require frequent changes of NLS_COMP and/or NLS_SORT.

**PLS-01911**: : associative array key violates its type constraints  
*Cause*: The key value of an element being inserted into an associative array violates the the key type constraints.  
*Action*: Relax the constraints if the key value is meant to be acceptable. Otherwise, apply a valid key value when inserting an element.

**PLS-01912**: : instance must of be of type 'string'  
*Cause*: The run-time type of the instance is not the declared type. e.g. If the return value of a user defined constructor is wrong.  
*Action*: Return the correct type.

**PLS-01913**: : instance must of be of type 'string' or one of its subtypes  
*Cause*: The run-time type of the instance is not declared type or one of its subtypes. e.g. TREAT(supertype AS subtype) fails.  
*Action*: Catch the exception.

**PLS-01914**: duplicate SECURITY specification in subprogram expression  
*Cause*: The subprogram was found to have two SECURITY specifications.  
*Action*: Remove one of the SECURITY specifications.

**PLS-01915**: duplicate ASSEMBLY specification in subprogram expression  
*Cause*: The subprogram was found to have two ASSEMBLY specifications.  
*Action*: Remove one of the ASSEMBLY specifications.

**PLS-01916**: SECURITY level specification exceeds ASSEMBLY SECURITY specification  
*Cause*: The security level specified in the callspec exceeds the maximum security level allowed by the assembly.  
*Action*: Lower the security level specified in the callspec to match the maximum security level specified in the assembly.

**PLS-01917**: illegal reference to package STANDARD item 'string'  
*Cause*: The item is intended for internal use and must not be referred to in user code.  
*Action*: Remove the reference and use syntax that provides the necessary functionality.

**PLS-01918**: 9.2 and earlier wrap formats are not permitted  
*Cause*: An attempt was made to compile a unit that was wrapped using 9.2 or earlier version of the wrap utility. Wrapped source created by 9.2 and earlier versions of wrap is not permitted on this database.  
*Action*: Wrap the source using 10g or later versions of the wrap utility. Alternately, set the initialization parameter PERMIT_92_WRAP_FORMAT parameter to TRUE.
PLW-05000: mismatch in NOCOPY qualification between specification and body

Cause: The indicated parameter was declared with the NOCOPY hint in the subprogram specification but not in the body, or it was declared with the NOCOPY hint in the body but not in the specification.

Action: Ensure that the specification and the body agree in their use of NOCOPY. If this mismatch is not corrected, the program will obey the declaration given in the specification, ignoring that in the body.

PLW-05001: previous use of 'string' (at line string) conflicts with this use

Cause: While looking for prior declarations of a variable, constant, or label, the compiler found another declaration with the same name in the same scope. Or, the headers of subprogram in a package specification and body were not identical.

Action: Check the spelling of the variable, constant, or label name. Also check the names of all parameters and exceptions declared in the same scope. Then, remove or rename the object with the duplicate name. Or, change the headers of the packaged subprogram in the package specification or body so that they are identical.

PLW-05003: same actual parameter(string and string) at IN and NOCOPY may have side effects

Cause: The indicated parameter was declared with the NOCOPY hint in the subprogram specification but not in the body, or it was declared with the NOCOPY hint in the body but not in the specification.

Action: Ensure that the specification and the body agree in their use of NOCOPY. If this mismatch is not corrected, the program will obey the declaration given in the specification, ignoring that in the body.

PLW-05004: identifier string is also declared in STANDARD or is a SQL builtin

Cause: The indicated identifier was also either: o) declared in package STANDARD, or o) a SQL builtin function, or o) a pseudo-column. This situation can result in name resolution issues since the STANDARD/builtin declaration will be chosen over the local declaration in SQL statements; however the local declaration will be chosen over the STANDARD/builtin declaration outside SQL scope. (See the documentation on PL/SQL name resolution.)

Action: Either: o) rename the given identifier, o) qualify any references to the identifier with the containing scope’s name, or o) make sure the intended resolution occurs if using the identifier in SQL scope.

PLW-05005: subprogram string returns without value at line string
Cause: A function terminated without a return value. RETURN statements with values are required for all PL/SQL functions.

Action: Inspect function source code to ensure that every RETURN statement returns a value and that a function does not terminate by executing its END statement. Notice that this message may appear at the call site for a function if the function call was inlined and if the called function did not terminate properly.

PLW-05006: shadow type generation resulted in warning: string

Cause: Compilation of a table function causes the creation of internally-generated types. A problem occurred during creation of these types which was not severe enough to prevent the creation of the types, but which may impact the usage of the table function. See the accompanying error message for more information.

Action: Fix the issue reported in the accompanying error message.

PLW-05007: first parameter to pragma INLINE must be an identifier

Cause: The first parameter to the pragma INLINE must be an identifier denoting a procedure or function.

Action: Use a procedure or function name

PLW-05008: illegal number of arguments for pragma string

Cause: The number of arguments (actual parameters) passed to the named pragma (compiler directive) is incorrect. A required argument was omitted from the argument list, or the pragma syntax is faulty (for example, a comma might be missing between two parameters).

Action: Supply the missing argument or correct the faulty syntax.

PLW-05009: pragma INLINE may not appear in a declaration list

Cause:Pragma INLINE applies only to the following statement, and can not appear immediately prior to a declaration.

Action: Remove the pragma.

PLW-05010: duplicate pragma INLINE on procedure 'string'

Cause:Pragma INLINE was applied twice to the same procedure in the same statement. The procedure will be inlined only if all duplicates specify a control value of 'YES'.

Action: Remove the duplicate pragma.

PLW-05011: pragma INLINE for procedure 'string' does not apply to any calls

Cause: A pragma INLINE was provided, but there was no call to the mentioned procedure in the next statement.

Action: Remove the unnecessary pragma.

PLW-05012: pragma INLINE for procedure 'string' could not be applied

Cause: A pragma INLINE(<name>, 'yes') was used, but the named procedure could not be inlined.

Action: Eliminate the reasons which are blocking the inlining. See the documentation for possible problems.

PLW-05013: second parameter to pragma INLINE 'string' is not 'YES' or 'NO'

Cause: The second parameter to the pragma INLINE governs whether or not a procedure call can be inlined. The only legal values are 'YES', meaning that the compiler should attempt to inline the call, and 'NO', meaning that the compiler must not inline the call.
Action: Use 'YES' or 'NO' as appropriate.

PLW-05014: Pragma string cannot be specified here  
Cause: The pragma was specified in an inappropriate context.  
Action: Remove or relocate the misplaced pragma. Check the documentation to determine the correct context for this pragma.

PLW-05015: implementation restriction - too many debug records  
Cause: The program is so large that it overflowed a compiler limit on the size of the debug symbol table. The module was compiled with partial debugging information.  
Action: Compile the module with PLSQL_DEBUG=FALSE, or split it into multiple modules.

PLW-05016: INTO clause should not be specified here  
Cause: The INTO clause was incorrectly specified on a cursor declaration. It should have been specified on the FETCH statement.  
Action: Relocate the misplaced clause.

PLW-05017: prefix of the expression will be ignored  
Cause: Generalized invocation with explicit SELF and a dotted name was used to call the type method causing the prefix of the dotted name to be ignored.  
Action: Do not use a dotted name to invoked type method in this context.

PLW-05018: unit string omitted optional AUTHID clause; default value DEFINER used  
Cause: The AUTHID clause is missing. The unit is allowed to have an AUTHID clause. If the clause is missing, DEFINER’s rights are used by default. Good practice suggests that an explicit AUTHID clause should always be used.  
Action: Write an explicit AUTHID clause for the unit.

PLW-05019: the language element near keyword string is deprecated beginning with version string  
Cause: A deprecated language element was used. The particular language element is deprecated in PL/SQL versions greater than or equal to the version number given in the message text.  
Action: The deprecated language element should be deleted or rewritten. Deprecated PL/SQL language elements become obsolete one version after they are deprecated. An obsolete language element will no longer be supported and use of the element will result in an error.

PLW-05020: parameter name must be an identifier  
Cause: A string literal was used as the parameter name in a call that used named notation.  
Action: Change the code to use an identifier for the parameter name.

PLW-06002: Unreachable code  
Cause: d by expression evaluation at compile time.  
Action: Inspect program logic for possible defects. Disable the warning if much code is made unreachable intentionally and the warning message is more annoying than helpful.

PLW-06003: unknown inquiry directive ‘string’
Cause: An unknown inquiry directive was used. The inquiry directive is neither predefined nor user-defined.
Action: Use a predefined inquiry directive or define the inquiry directive.

PLW-06004: inlining of call of procedure 'string' requested
Cause: A pragma INLINE('YES') referring to the named procedure was found. The compiler will, if possible, inline this call.
Action: None

PLW-06005: inlining of call of procedure 'string' was done
Cause: A call to the procedure was inlined.
Action: None

PLW-06006: uncalled procedure "string" is removed.
Cause: Static program analysis determined that the procedure can never be called or executed. Therefore, it has been removed to save time during compilation and space during execution.
Action: Inspect program logic for possible defects. Disable the warning if the procedure is useful but simply not being used right now and the warning message is more annoying than helpful.

PLW-06007: procedure "string" is removed because optimization removed calls
Cause: Static program analysis determined that the procedure can never be called or executed. Therefore, it has been removed to save time during compilation and space during execution.
Action: Inspect program logic for possible defects. Disable the warning if the procedure is useful but simply not being used right now and the warning message is more annoying than helpful.

PLW-06008: call of procedure 'string' will not be inlined
Cause: A pragma INLINE('NO') referring to the named procedure was found. The compiler is prevented from inlining this call.
Action: None

PLW-06009: procedure "string" OTHERS handler does not end in RAISE or RAISE_APPLICATION_ERROR
Cause: The OTHERS handler can exit without executing some form of RAISE or or a call to the standard procedure RAISE_APPLICATION_ERROR.
Action: Good programming practices suggest that OTHERS handlers must always pass an exception upward. Inspect the program logic to determine if the handler code needs revision.

PLW-06010: keyword "string" used as a defined name
Cause: A PL/SQL or SQL keyword was used as defined name. Although legal, this is not recommended.
Action: Choose another name for the defined item.

PLW-06011: detailed dependency information discarded due to size limitations
Cause: The compiled unit was so large that the compiler could not store detailed dependency information that could be used to quickly recompile the unit if it was invalidated.
Action: Break up the unit into smaller units.
PLW-06012: SQL statement cannot be inlined. *string*

  **Cause:** The SQL statement could not be inlined.
  
  **Action:** None

PLW-06013: deprecated parameter PLSQL_DEBUG forces PLSQL_OPTIMIZE_LEVEL <= 1

  **Cause:** The PLSQL_DEBUG parameter was set to TRUE forcing the optimization level to 1 (or 0 if the user selected 0) regardless of the setting of the PLSQL_OPTIMIZE_LEVEL parameter to a higher level.
  
  **Action:** Do not use the PLSQL_DEBUG parameter; it is deprecated. Instead, set the PLSQL_OPTIMIZE_LEVEL parameter to 1.

PLW-06014: PLSQL_OPTIMIZE_LEVEL <= 1 turns off native code generation

  **Cause:** Native code generation was not done because the optimization was set to 1 or less.
  
  **Action:** The goal of native code generation is high performance and a low optimization level defeats that purpose. Either request a higher optimization level or remove the request for native code generation. Note that using the deprecated parameter PLSQL_DEBUG also forces the optimization level to 1; do not use this parameter when native code generation is desired.

PLW-06015: parameter PLSQL_DEBUG is deprecated; use PLSQL_OPTIMIZE_LEVEL = 1

  **Cause:** The PLSQL_DEBUG parameter was specified.
  
  **Action:** The parameter PLSQL_DEBUG no longer controls the generation of debugging information by the PL/SQL compiler; debugging information is always generated and no special parameter is needed.

PLW-06016: unit *string* is too large; native code generation turned off

  **Cause:** Because the program was extremely large, analysis took an excessive amount of time or space to complete causing native compilation to be turned off.
  
  **Action:** The goal of native code generation is high performance and the compiler does extensive analysis of the program. If possible, reduce the size of the largest procedure, or split the program unit into multiple units.

PLW-06017: an operation will raise an exception

  **Cause:** An operation near this location is certain to raise an exception during execution; it may be a programming error because it is not an explicit RAISE.
  
  **Action:** The compiler has determined that some operation near this location is certain to raise an exception during execution. This may be a programming error; consider rewriting the code. If the intention is to raise an exception, use an explicit RAISE statement.

PLW-06018: an infinity or NaN value is computed or used

  **Cause:** An operation near this location computes or uses an infinite NUMBER, BINARY_FLOAT, or BINARY_DOUBLE value or a NaN BINARY_FLOAT or BINARY_DOUBLE value.
  
  **Action:** The compiler has determined that an operation near this location computes or uses either an infinity or a not-a-number (NaN) value. This may indicate a programming error; consider rewriting the code. If the intention is to use a BINARY_FLOAT or a BINARY_DOUBLE non-numeric value, use the appropriate constant from STANDARD rather than computing the value. Some
valid uses exist for these values; the warning will still appear in those cases. The use of infinite NUMBER values is not well-defined and should be avoided.

**PLW-07202: bind type would result in conversion away from column type**

*Cause:* The column type and the bind type do not exactly match. This will result in the column being converted to the type of the bind variable. This type conversion may prevent the SQL optimizer from using any index the column participates in. This may adversely affect the execution performance of this statement.

*Action:* To make use of any index for this column, make sure the bind type is the same type as the column type.

**PLW-07203: parameter 'string' may benefit from use of the NOCOPY compiler hint**

*Cause:* The mode of the specified parameter was IN OUT or OUT. Use of the NOCOPY compiler hint may speed up calls to this subprogram.

*Action:* Change the mode of the parameter to explicitly use the NOCOPY compiler hint. For example, if your subprogram declaration is: `PROCEDURE proc(p1 IN OUT CLOB);` you can change it to: `PROCEDURE proc(p1 IN OUT NOCOPY clob);` to get the benefit of the NOCOPY hint. For member procedures or functions in object types, you may have to explicitly declare the SELF parameter as illustrated in the following: `MEMBER PROCEDURE proc(SELF IN OUT NOCOPY MY_TYPE);`

**PLW-07204: conversion away from column type may result in sub-optimal query plan**

*Cause:* The column type and the bind type do not exactly match. This may result in the column being converted to the type of the bind variable. This type conversion may prevent the SQL optimizer from using any index the column participates in. This may adversely affect the execution performance of this statement.

*Action:* To make use of any index for this column, make sure the bind type is the same type as the column type.

**PLW-07205: SIMPLE_INTEGER is mixed with BINARY_INTEGER or PLS_INTEGER**

*Cause:* Using SIMPLE_INTEGER and BINARY_INTEGER or PLS_INTEGER arguments in the same arithmetic expression may inhibit certain optimizations.

*Action:* Try using SIMPLE_INTEGER values only if the expression is computed on a performance critical path.

**PLW-07206: analysis suggests that the assignment to 'string' may be unnecessary**

*Cause:* This assignment may be unnecessary; the PL/SQL optimizer could not find any further use of the variable which was being set. If the assignment was being done for some side-effect such as raising a specific exception, the compiler may not have been able to understand the side-effect and this warning may be inappropriate.

*Action:* If the assignment sets a variable whose value will not be used again and there are no side-effects (exceptions or calls) to consider, remove the assignment for better performance. If the assignment was in place to raise a specific known exception, replace the assignment with a RAISE statement.
AMD-00100: not found: string "string"
Causes: A metadata entity could not be found in the OLAP Catalog.
Action: Check that the metadata entity name and owner are properly specified.
Refer to the OLAP Catalog union views named with the OLAP2U prefix) for existing OLAP metadata entity names.

AMD-00101: cannot create string "string"; metadata entity already exists
Causes: A metadata entity could not be created, because it already exists in the OLAP Catalog.
Action: When creating a new metadata entity, specify an entity name that is unique for the entity owner. Refer to the OLAP Catalog union views (named with the OLAP2U prefix) for existing OLAP metadata entity names.

AMD-00102: invalid metadata entity: string "string"
Causes: An OLAP metadata entity was found to be invalid.
Action: Check the mapping to columns in your data warehouse tables or views.

AMD-00103: string "string" does not have a string
Causes: A required child entity was not found for a metadata entity.
Action: Refer to the Oracle9i OLAP User’s Guide to determine which metadata entities require dependent entities.

AMD-00104: Level "string" cannot be added to the hierarchy; parent and child parameters represent the same level
Causes: The same level name was specified for both the parent and the child parameters of the ADD_LEVEL_TO_HIERARCHY procedure.
Action: Determine which level should be the parent of the new level being added to the hierarchy. Specify the parent in the parent parameter and the new level in the child parameter of the ADD_LEVEL_TO_HIERARCHY procedure. Re-run the procedure.

AMD-00105: Level "string" cannot be added to the hierarchy; the specified parent level "string" is already the parent of "string"
Causes: The level specified as the parent in the ADD_LEVEL_TO_HIERARCHY procedure could not be used, because it was the parent of another level within the hierarchy.
Action: In the ADD_LEVEL_TO_HIERARCHY procedure, specify a parent that is not already a parent of another level within a hierarchy.
AMD-00106: parent string "string" must be removed before child string "string" can be removed
  Cause: A metadata entity could not be removed, because it was the child of another metadata entity.
  Action: Remove the parent metadata entity. All the dependent entities will be removed with the parent.

AMD-00107: no root level in hierarchy: "string"
  Cause: A hierarchy was found to have no root level.
  Action: Use the ADD_LEVEL_TO_HIERARCHY procedure to add a level to the hierarchy. Specify the root level in the child parameter and leave the parent parameter blank.

AMD-00108: Dimension "string" is improperly mapped; the dimension has string hierarchies mapped, but hierarchy level "string" has string columns mapped
  Cause: Dimension table columns could not be accessed, because dimension hierarchies were incorrectly mapped.
  Action: Add or remove dimension hierarchies or hierarchy level mappings. The number of dimension hierarchies must equal the number of hierarchy level columns.

AMD-00109: Parent metadata entity has too many child entities. string "string" has more than string string
  Cause: A metadata entity was found to have too many dependent entities of another type.
  Action: Add the required mapping.

AMD-00110: parameter string of "string" not valid
  Cause: A parameter was found to be invalid.
  Action: Ensure that the parameter is correctly formed and valid.

AMD-00111: PROCEDURE string, invalid directory: "string"
  Cause: Directory name provided to a procedure was found to be invalid.
  Action: Ensure that the directory name represents a valid directory.

AMD-00112: PROCEDURE string, invalid mode
  Cause: UTL_FILE.INVALID_MODE: An error occurred when accessing a file.
  Action: Check that files being accessed have correct permissions, then retry.

AMD-00113: PROCEDURE string, invalid operation
  Cause: UTL_FILE.INTERNAL_ERROR: Possible hardware or software problem when accessing a file.
  Action: Verify that hardware is functioning normally, then retry. Contact Oracle Support Services if needed.

AMD-00115: PROCEDURE string, invalid file handle
Cause: UTL_FILE.INVALID_FILEHANDLE: Possible software or hardware problem when accessing a file.
Action: Verify that hardware is functioning normally, then retry. Contact Oracle Support Services if needed.

AMD-00116: PROCEDURE string, read error
Cause: UTL_FILE.READ_ERROR: Possible software or hardware problem when accessing a file.
Action: Verify that hardware is functioning normally, then retry. Contact Oracle Support Services if needed.

AMD-00117: input file "string" not found
Cause: The input text file was not found in the specified location.
Action: Copy the input text file to the specified location, then retry.

AMD-00118: output file "string" already exists
Cause: The output file already exists in the specified location.
Action: Delete or rename the file, then retry.

AMD-00119: analytic workspace dimensions not specified in input
Cause: Either the input text file or the input string did not specify an analytic workspace dimension.
Action: Add one or more dimensions to the input text file or the input string. At least one dimension is required.

AMD-00120: dimension #string: analytic workspace dimension name not specified
Cause: Dimension name was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing dimension name.

AMD-00121: dimension #string: analytic workspace hierarchy not specified
Cause: Hierarchy for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing hierarchy.

AMD-00122: dimension #string: analytic workspace hierarchy dimension not specified
Cause: Hierarchy dimension for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing hierarchy dimension.

AMD-00123: dimension #string: analytic workspace hierarchy dimension value not specified
Cause: Hierarchy dimension value for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing hierarchy dimension value.

AMD-00124: dimension #string: analytic workspace GID variable not specified
Cause: Analytic workspace GID variable for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing Analytic Workspace GID variable.

AMD-00125: dimension #string: analytic workspace column level dimension not specified
Cause: Analytic workspace column level dimension for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing analytic workspace column level dimension.

AMD-00126: dimension #string: analytic workspace column level relation not specified
Cause: Analytic workspace column level relation for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing analytic workspace column level dimension.

AMD-00127: dimension #string: RDBMS dimension column not specified
Cause: RDBMS dimension column for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing RDBMS dimension column.

AMD-00128: dimension #string: RDBMS parent column not specified
Cause: RDBMS parent column for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing RDBMS parent column.

AMD-00129: dimension #string: RDBMS GID column not specified
Cause: RDBMS GID column for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing RDBMS GID column.

AMD-00130: dimension #string: RDBMS dimension column data type not specified
Cause: RDBMS dimension column data type for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing RDBMS dimension column data type.

AMD-00131: dimension #string: RDBMS parent column data type not specified
Cause: RDBMS dimension column data type for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing RDBMS dimension column data type.

AMD-00132: dimension #string: RDBMS GID column data type not specified
Cause: RDBMS dimension column data type for this dimension was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing RDBMS dimension column data type.

AMD-00133: measure #string: analytic workspace measure name not specified
Cause: Analytic workspace measure name for this measure was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing analytic workspace measure name.

AMD-00134: measure #string: RDBMS measure column name not specified
Cause: RDBMS measure column name for this measure was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing RDBMS measure column name.

AMD-00135: measure #string: RDBMS measure column data type not specified
Cause: RDBMS measure column data type for this measure was not specified in either the input text file or the input string.
Action: Modify the input text file or the input string to include the missing RDBMS measure column data type.

AMD-00136: Generation of SQL script "string" failed
Cause: There was a program error or a system resource limit was exceeded.
Action: Verify that sufficient system resources are available, then retry.

AMD-00137: prefix "string" exceeds maximum permitted length of string characters
Cause: A prefix supplied to an API call was too long.
Action: Change the prefix so that it is within the permitted length, then re-issue the API call.

AMD-00138: level names parameter not null or defaulted
Cause: Level names were provided to the LEVELS_LIST parameter, but the LEVELS parameter did not specify the number of levels.
Action: Either set the LEVELS_LIST parameter to null (the default) or set the LEVELS parameter to the number of levels.

AMD-00139: level names parameter not valid
Cause: The number of names in the LEVELS_LIST parameter did not equal the number specified by the LEVELS parameter.
Action: Ensure that the LEVELS_LIST parameter is correctly formed and that it holds the number of names specified by the LEVELS parameter.

AMD-00140: internal error: [string] [string] [string] [string] [string]
Cause: This is an internal error.
Action: Contact Oracle Support Services.

AMD-00141: parameter string of "string" not valid starting around "string"
Cause: A parameter was found to be invalid.
Action: Ensure that the parameter is correctly formed and valid.

AMD-00142: Analytic Workspace name "string" must be fully qualified with the Owner.
Cause: A parameter was found to be invalid.
Action: Ensure that the parameter is correctly formed and valid. For example, SCOTT.EMP is a fully qualified name.

AMD-00143: View name "string" must be fully qualified with the Owner.
Cause: A parameter was found to be invalid.
Action: Ensure that the parameter is correctly formed and valid. For example, SCOTT.EMP is a fully qualified name.

AMD-00144: Custom Measure "string" does not exist in Workspace "string"
Cause: A required object does not exist in specified Workspace.
Action: Ensure that the parameter is correctly formed and valid.

AMD-00145: error attaching Workspace "string" in mode "string"
Cause: Either the Workspace does not exist, is already attached in a different mode, or there are insufficient system resources to attach Workspace.
Action: Ensure that workspace name is correct and can be currently attached in the specified mode.

AMD-00146: Custom Measure "string" already exists in Workspace "string"
Cause: You have attempted to create a Custom Measure when it already exists.
Action: Ensure that the Custom Measure name is correct and does not already exist in the specified Workspace.

AMD-00147: invalid Custom Measure creation mode "string" specified
Cause: Custom Measure creation mode must be "PERMANENT" or "TEMPORARY."
Action: Ensure that the Custom Measure creation mode is correct.

AMD-00148: Workspace "string" is not currently open. No update done.
Cause: The Workspace must be attached before a Custom Measure can be updated.
Action: Attach Workspace first before attempting to modify Custom Measure.

AMD-00149: Custom Measure to delete "string" does not exist in Workspace "string"
Cause: The Custom Measure does not exist in specified Workspace.
Action: Ensure that the Custom Measure name is correct and exists in specified Workspace.

AMD-00150: Custom Measure to delete "string" not mapped to View "string"
Cause: The Custom Measure to delete is not mapped to the View specified.
Action: Ensure that the Custom Measure and View Name name are correct, and mapped to each other.

AMD-00151: Creation of Custom Measure "string" in Workspace "string" failed
Cause: Invalid parameters were supplied, or a program error occured.
Action: Ensure that API parameters are correct and sufficient system resources are available.

AMD-00152: Workspace "string" is not currently open.
Cause: The Workspace must be attached before an operation can be performed on it.
Action: Attach the Workspace first before attempting operation.

AMD-00153: error detaching workspace "string"
Cause: The Workspace was not attached or a program error occurred.
Action: Ensure the Workspace name is correct and it is attached in the current session.

AMD-00154: Cannot delete session object "string" in Workspace "string"
Cause: You cannot delete a session object. These are deleted automatically when the session is ended.
Action: Ensure that API parameters are correct.

AMD-00155: Object to delete "string" does not exist in Workspace "string"
Cause: The Object slated for deletion does not exist in the Workspace specified.
Action: Ensure that API parameters are correct.

AMD-00156: formula "string" to modify does not exist in Workspace "string"
Cause: Formula does not exist in Workspace specified.
Action: Ensure that API parameters are correct.

AMD-00157: invalid attach mode "string" specified when attempting to attach Workspace "string"
Cause: An invalid parameter supplied.
Action: Attach mode must be "RO" (read only) or "RW" (read/write).

AMD-00158: The Workspace "string" is currently open in read-only mode.
Cause: An invalid parameter was supplied. You may not specify an operation which requires an update when the Workspace is open in read-only mode.
Action: The Creation Mode parameter must be "TEMPORARY" for a Workspace open in read-only mode.

AMD-00159: The Workspace "string" is currently attached in read/write mode.
Cause: An invalid parameter was supplied.
Action: The Creation Mode parameter must be "PERMANENT" for a Workspace open in read/write mode.

AMD-00160: Warning! Exceeded maximum Custom Measure number of "string"
Cause: The system limit has been reached.
Action: Old Custom Measures created against the specified View have to be deleted before new Custom Measures can be created.
NDFN-00020: missing IPMI userid
  **Cause:** Required user name argument was not specified.
  **Action:** Reissue command with correct arguments.

NDFN-00021: missing node list
  **Cause:** Required node list was not supplied.
  **Action:** Re-issue command with correct arguments.

NDFN-00022: unrecognized command option: 'string'
  **Cause:** Operation type missing or mis-spelled.
  **Action:** Re-issue command with correct arguments.

NDFN-00023: no password read. Re-issue request
  **Cause:** Required administrator password was not read in response to the password prompt before finding end-of-line.
  **Action:** Re-issue command and be sure to type the password immediately following the prompt.

NDFN-00024: caught I/O exception: string
  **Cause:**
  **Action:** Re-issue command after repairing root cause.

NDFN-00025: string failed for node string
  **Cause:** The indicated operation could not be completed for the specified node.
  The lower-level error messages attached should indicate the root cause.
  **Action:** Re-issue command after repairing the condition indicated.
RDJ-00001: OK ADDRESS
   Cause: The operation succeeded.
   Action: No further action is necessary.

RDJ-00002: invalid operation:
   Cause: The operation specified was incorrect.
   Action: Specify a valid operation.

RDJ-00003: Error parsing "string" string
   Cause: An error occurred parsing an address.
   Action: Correct the address using the other information in the error.

RDJ-00004: invalid trace level
   Cause: The trace level specified was incorrect.
   Action: Specify a valid trace level.

RDJ-00005: Operation: string failed. Error: string
   Cause: An RD operation failed with the specified error.
   Action: Re-try the operation with tracing enabled to determine what happened.

RDJ-00006: invalid port number: number
   Cause: The port number specified for a service is invalid.
   Action: Specify a port number that is greater than zero.

RDJ-00008: invalid number specified:
   Cause: The number specified contained non-numeric characters.
   Action: Specify a number with only numeric characters.

RDJ-00009: invalid address format:
   Cause: The format specified for an address was incorrect.
   Action: Specify a valid format.

RDJ-00011: results processor may not be null
   Cause: A null object was specified for the class that is to process the results of an operation.
   Action: Specify a non-null object.

RDJ-00012: invalid instance uniqueness
RDJ-00013: Invalid service instance attribute
Cause: An attribute specified for a service instance was not valid.
Action: Specify an attribute in the correct format.

RDJ-00015: Invalid service instance tag: "string". Available tags:
Cause: The tag value specified for a service instance was incorrect.
Action: Specify a valid tag value.

RDJ-00017: invalid domain type: "string". Available domain types:
Cause: The type specified for a domain was not valid.
Action: Specify a valid domain type.

RDJ-00048: Unknown command: "string"
Cause: An invalid command was specified.
Action: Specify a valid command.

RDJ-00049: Unknown option: "string"
Cause: An invalid option was specified.
Action: Specify a valid option.

RDJ-00052: invalid flag value:
Cause: The value specified for a flag was not valid.
Action: Specify a valid flag value.

RDJ-00053: deletion of trace output file failed:
Cause: The tool attempted to remove a trace file so that it could create a new one. However, the attempt failed.
Action: Examine the accompanying exception for details about what happened.

RDJ-00054: deletion of error log file failed:
Cause: The tool attempted to remove an error log so that it could create a new one. However, the attempt failed.
Action: Examine the accompanying exception for details about what happened.

RDJ-00055: trace file already exists:
Cause: The trace file specified already exists.
Action: Remove the file or specify a file which does not exist.

RDJ-00056: error log already exists:
Cause: The error log specified already exists.
Action: Remove the file or specify a file which does not exist.

RDJ-00057: trace file is a directory:
Cause: The trace file specified is actually a directory.
Action: Specify a file name.

RDJ-00058: error log is a directory:
Cause: The error log specified is actually a directory.
**Action:** Specify a file name.

RDJ-00059: **The trace file "string" cannot be created**
- **Cause:** The tool failed to create the trace file.
- **Action:** Examine the accompanying exception for details about the error.

RDJ-00060: **The error log "string" cannot be created. Check permissions on the parent directory:**
- **Cause:** The tool failed to create the error log.
- **Action:** Examine the accompanying exception for details about the error.

RDJ-00061: **The file stream cannot be created:**
- **Cause:** The tool failed to create the Java stream for a file.
- **Action:** Examine the accompanying exception for details about the error.

RDJ-00062: **The print stream cannot be created:**
- **Cause:** An error occurred when the tool tried to create a Java print stream for a file.
- **Action:** Examine the accompanying exception for details about the error.

RDJ-00063: **invalid time-to-live:**
- **Cause:** A non-numeric value was specified for the time to live.
- **Action:** Specify a numeric value.

RDJ-00065: **Option type must be greater than zero:**
- **Cause:** The type specified for an option was less than or equal to zero.
- **Action:** Specify a type which is greater than zero.

RDJ-00134: **unknown type:**
- **Cause:** The type specified is invalid.
- **Action:** Specify a known type.

RDJ-00135: **invalid stream type:**
- **Cause:** The stream type specified is invalid.
- **Action:** Specify a known type.

RDJ-00136: **invalid argument count:**
- **Cause:** The number of arguments specified is invalid.
- **Action:** Specify a valid number of arguments.
CLSDNSSD-00000 to CLSDNSSD-03999

CLSDNSSD-00000: no error.
    Cause: Operation was successful.
    Action: No action needed.

CLSDNSSD-00001: unknown error has occurred.
    Cause: an unknown error has occurred.
    Action: This error should not be visible to the user. If it occurs, please contact
             Oracle Customer Support.

CLSDNSSD-00002: no such name.
    Cause: This is an internal error.
    Action: This error should not be visible to the user. If it occurs, please contact
             Oracle Customer Support.

CLSDNSSD-00003: memory allocation failed.
    Cause: The DNS service discovery component was unable to allocate enough
            memory.
    Action: If memory is low on the system, terminate other processes and/or threads
             and try the operation again. Otherwise, this is an internal error and Oracle
             Customer Support should be contacted.

CLSDNSSD-00004: invalid parameter.
    Cause: An parameter which had an invalid value was passed by the caller to the
            DNS service discovery library. This is an internal error.
    Action: This error should not be visible to the user. If it occurs, please contact
             Oracle Customer Support.

CLSDNSSD-00005: invalid reference.
    Cause: An unknown DNS record reference was encountered.
    Action: This error should not be visible to the user. If it occurs, please contact
             Oracle Customer Support.

CLSDNSSD-00006: invalid state.
    Cause: This is an internal error.
    Action: This error should not be visible to the user. If it occurs, please contact
             Oracle Customer Support.

CLSDNSSD-00007: invalid flags.
    Cause: This is an internal error.
**Action**: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**CLSDDNSD-00008: unsupported operation.**

**Cause**: The DNS service discovery component attempted to perform an operation not supported by the library.

**Action**: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**CLSDDNSD-00009: uninitialized.**

**Cause**: This is an internal error.

**Action**: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**CLSDDNSD-00010: service already registered.**

**Cause**: The user attempted to register a service that was already registered.

**Action**: A service should only be registered once.

**CLSDDNSD-00011: service name conflict.**

**Cause**: The user attempted to register a service whose name already exists.

**Action**: A different service name needs to be used.

**CLSDDNSD-00012: invalid data in record.**

**Cause**: The DNS service discovery component attempted to use a record with invalid data. This is an internal error.

**Action**: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**CLSDDNSD-00013: firewall.**

**Cause**: This is an internal error.

**Action**: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**CLSDDNSD-00014: client software incompatible with server.**

**Cause**: The version of the client software used by the DNS service discovery interface is not compatible with the version of the server software.

**Action**: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**CLSDDNSD-00015: bad interface index.**

**Cause**: This is an internal error.

**Action**: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**CLSDDNSD-00016: update refused.**

**Cause**: This is an internal error.

**Action**: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**CLSDDNSD-00017: no such record.**

**Cause**: This is an internal error.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00018: no auth.
Cause: This is an internal error.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00019: no such key.
Cause: This is an internal error.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00020: NAT Traversal.
Cause: This is an internal error.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00021: Double NAT traversal.
Cause: This is an internal error.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00022: invalid time stamp in record
Cause: A DNS record contained an invalid time stamp. This is an internal error.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00023: invalid service type: "string".
Cause: The user specified a service type which does not conform to the standard specified by RFC's 1034 and RFC 1123. The service type must be one or more characters and must start and end with a letter or digit. The interior characters may be letters, digits, or hyphens.
Action: Specify a service type which conforms to the RFC.

CLSDNSSD-03999: unknown error: number.
Cause: A DNS error code was returned that is not known to the system. This is an internal error.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.
CLSGN-00000: no error
  Cause: Operation was successful.
  Action: No action needed.

CLSGN-00003: unknown command: "string"
  Cause: The command entered was invalid.
  Action: Specify a valid command.

CLSGN-00018: parameter has no default value.
  Cause: An attempt was made to reset the value of a parameter for which there is no default value.
  Action: Specify a parameter which has a default value.

CLSGN-00023: "string" is only available in interactive mode.
  Cause: An attempt was made to run or get help for a command from the command line which is available only in interactive mode.
  Action: Change to interactive mode to run the command.

CLSGN-00024: Server abort exception caught - shutting down.
  Cause: Informational message that the server is aborting.
  Action: Examine the alert log and trace files to determine the reason(s) why the abort is occurring.

CLSGN-00025: Creation of name object for configuration file "string" failed.
  Cause: It was not possible to create a name object for the configuration file.
  Action: Examine the rest of the stack for the exact reason.

CLSGN-00026: Configuration file "string" does not exist.
  Cause: The configuration file specified could not be found.
  Action: Specify a file that exists.

CLSGN-00027: Initialization of object for configuration file "string" failed.
  Cause: It was not possible to create a file object for the specified file.
  Action: Examine the rest of the error stack for the exact reason.

CLSGN-00028: Open of configuration file "string" failed.
  Cause: The open of the configuration file failed.
  Action: Examine the rest of the error stack for the exact reason.
CLSGN-00029: Read of configuration file "string" failed.
   Cause: A read of the configuration file failed.
   Action: Examine the rest of the error stack for the exact reason.

CLSGN-00030: Close of configuration file "string" failed.
   Cause: It was not possible to close the configuration file.
   Action: Examine the rest of the error stack for the exact reason.

CLSGN-00031: Server failed to start: string
   Cause: The GNS server failed to start due to an error encountered by the server.
   Action: Examine the message that accompanies this one for details. Also, take a look at the server log files for more information.

CLSGN-00032: Unexpected end of line found in record "string".
   Cause: The line ended unexpectedly. For example, the line might have ended before the end of a quoted string was found.
   Action: Specify a correctly formatted line.

CLSGN-00033: Too few arguments for value of parameter "string" Minimum: number
   Cause: Not enough arguments were specified for a parameter.
   Action: Specify the required number of arguments.

CLSGN-00034: Too many arguments for value of parameter "string" Maximum: number
   Cause: The number of arguments specified for a parameter was greater than maximum allowed.
   Action: Specify the required number of arguments.

   Cause: The entry for a parameter in the configuration file does not contain the required number of fields.
   Action: Correct the entry to have the required number of fields.

CLSGN-00036: Record "string" contains too many fields. Maximum: number. Specified: number.
   Cause: The entry for a parameter in the configuration file contains more than the maximum number of fields.
   Action: Correct the entry to have the required number of fields.

CLSGN-00039: invalid value for floating point parameter: "string": "string"
   Cause: The value specified for a floating point parameter was not floating point.
   Action: Specify a correct value.

CLSGN-00040: invalid value for integer parameter: "string": "string"
   Cause: The value specified for an integer parameter was not an integer.
   Action: Specify a correct value, either decimal or hexadecimal. Hexadecimal values start with the string "0x".

CLSGN-00041: invalid value for boolean parameter "string": "string"
   Cause: The value specified for a boolean parameter was not a boolean value.
Action: Specify a correct value. Correct values include: TRUE/FALSE, YES/NO, ON/OFF, and 1/0.

CLSGN-00043: invalid configuration method: "string"
Cause: An unknown type was specified for the method used to store configuration information.
Action: Specify a valid type.

CLSGN-00044: no file name specified.
Cause: No name was specified for a configuration method which uses a file as the repository.
Action: Specify a file name.

CLSGN-00045: initialization failed: string
Cause: The initialization of GNS failed.
Action: Please examine the accompanying message for the exact reason.

CLSGN-00046: no value found for parameter "string".
Cause: A value was not specified for the parameter.
Action: Specify a parameter.

CLSGN-00047: multiple values found for parameter "string".
Cause: Multiple values were specified for a parameter.
Action: Specify a single value.

CLSGN-00048: type mismatch "string". Expected: string Actual: string.
Cause: The type of the value specified for a parameter does not match the required type.
Action: Change the type of the parameter.

CLSGN-00049: unknown parameter: "string".
Cause: The specified parameter is not supported.
Action: Specify a supported parameter.

CLSGN-00050: failure to convert parameter value "string" to "string".
Cause: The attempt to convert the string value for a parameter failed.
Action: Specify a value of the correct type.

CLSGN-00051: unsupported query type: "string"
Cause: The query type passed in is not supported by GNS.
Action: Specify a supported query type.

CLSGN-00052: Initialization of OCR at level number failed. string
Cause: Initialization of OCR to the specified level failed.
Action: Examine the error message to determine what occurred.

CLSGN-00054: Invalid IP address: string
Cause: The IP address specified is neither in the v4 or v6 format.
Action: Specify a correct address.

CLSGN-00056: Unable to resolve host name "string"
Cause: No entry was found in GNS or the system for the specified host.
Action: Specify a valid machine.

CLSGN-00057: Invalid process type specified.
Cause: The caller specified a process type which is not known.
Action: Specify a valid type.

CLSGN-00058: Invalid number of arguments specified: number.
Cause: The client program sent the wrong number of arguments over for a command.
Action: This error should not ordinarily be seen. Contact Oracle Customer Support.

CLSGN-00059: Unknown command: number.
Cause: The server received an unknown command from the client.
Action: This error should never happen. If it does, contact Oracle Customer Support.

CLSGN-00060: Conversion of string value "string" failed with error number.
Cause: The value of a parameter sent over from the client to number failed.
Action: Specify a valid parameter value.

CLSGN-00061: Internal error.
Cause: An unexpected error occurred. The rest of the error stack contains details about the error.
Action: This error should never happen. If it does, contact Oracle Customer Support.

CLSGN-00062: Server spawn failed: could not access subdirectory string under string.
Cause: The server process could not be spawned because the directory where the program resides could not be located or accessed.
Action: Make sure that the server directory exists and can be accessed by the user starting the program.

CLSGN-00063: Server spawn failed: executable not accessible: directory: string file: string
Cause: The server program could not be accessed.
Action: Make sure the server executable exists and can be accessed by the user starting the program.

CLSGN-00064: spawn of server string failed.
Cause: The client was unable to start the server process.
Action: More details about the failure can be found in messages that follow.

CLSGN-00065: Unable to create backup for configuration file string
Cause: The GNS server was unable to create a backup configuration file.
Action: Check the permissions in the configuration directory. Make sure that the GNS process is permitted to create files there.

CLSGN-00066: Service advertisement initialization failed.
Cause: GNS failed when tried to initialize the Resource Discovery subsystem.
Action: Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

**CLSGN-00067: Service advertisement termination failed.**  
*Cause:* GNS failed while trying to shut down the Resource Discovery subsystem.  
*Action:* Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

**CLSGN-00068: Service advertisement stop failed.**  
*Cause:* GNS encountered an error when it tried to stop the advertisement of its service.  
*Action:* Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

**CLSGN-00069: Service registration failed.**  
*Cause:* GNS was unable to register itself with Resource Discovery.  
*Action:* Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

**CLSGN-00070: Service location failed.**  
*Cause:* If it is a number, consult rdret.h. Also, make sure that the server process has been started.  
*Action:* Examine the message following this one for a possible

**CLSGN-00071: Transport initialization failed.**  
*Cause:* GNS was unable to initialize the transport that it was used to communicate between the client and server.  
*Action:* The message following indicates the exact error that occurred.

**CLSGN-00072: Connection to server failed.**  
*Cause:* GNS was unable to initialize the transport that it was used to communicate between the client and server.  
*Action:* The message following indicates the exact error that occurred.

**CLSGN-00073: Send failed**  
*Cause:* GNS was unable to send data either from the client to the server or from the server to the client.  
*Action:* The message following indicates the exact error that occurred.

**CLSGN-00074: Wait for client connection failed**  
*Cause:* An error occurred while the server was waiting for a connection from the client.  
*Action:* The message following indicates the exact error that occurred.

**CLSGN-00075: Receive failed.**  
*Cause:* GNS was unable to receive data from its peer process.  
*Action:* The message following indicates the exact error that occurred.

**CLSGN-00076: string Packet ignored: string.**  
*Cause:* The packet was ignored by the server because it was invalid. This may be caused by another process sending malformed packets.
Action: Use system tools to determine if a non-GNS process is sending data to the server.

CLSGN-00077: Invalid DNS message received.
Cause: The GNS server received a message from the master DNS server which was not of the correct format. This could be due to an error by the server or because a malicious process is sending the GNS server invalid packets.
Action: The error is informational and should not ordinarily be visible to a user. If it is seen, contact Oracle Customer Support.

CLSGN-00078: No space in packet buffer. Length: number. Remaining: number
Cause: The GNS server was unable to add data to the packet that it was going to send to the DNS server because an internal buffer ran out of room.
Action: This error should ordinarily not be visible to users. If it appears, contact Oracle Customer Support.

CLSGN-00079: Bonjour initialization failed.
Cause: The function called to initialize Bonjour for use by GNS failed.
Action: Examine the accompanying Bonjour error and take corrective action.

CLSGN-00080: Wait for a DNS server request failed.
Cause: The GNS server attempted to wait for a request to arrive from the DNS server.
Action: This error should ordinarily not be visible to users. If it appears, contact Oracle Customer Support.

CLSGN-00081: The GNS service is not running.
Cause: The GNS service could not be contacted because it is not running.
Action: Start the GNS service.

CLSGN-00082: The GNS service is already running.
Cause: An attempt was made to start the GNS service, but it was already running.
Action: Shut down the GNS service before trying to start it.

CLSGN-00083: Invalid option: "string"
Cause: An unknown option was specified either to a client program or the server.
Action: Specify a supported option.

CLSGN-00084: Invalid trace level: "string"
Cause: The value specified for the trace level was not a number.
Action: Specify a number for the trace level.

CLSGN-00085: An argument must be specified for the "string" option.
Cause: An argument was not specified for the specified option.
Action: Provide an argument for the option.

CLSGN-00086: Service location initialization failed.
Cause: The GNS client failed when it tried to initialize the Resource Discovery subsystem.
Action: Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.
CLSGN-00087: Listen on endpoint "string" failed.
   Cause: The server was unable to listen for requests on the specified endpoint.
   Action: The accompanying GIPC error should be examined for the exact error.

CLSGN-00088: Listen on string port number failed due to a lack of privileges.
   Cause: The server was unable to listen on the specified port because it does not have privilege to do so. On Linux and Unix systems, this can occur because the server is not running as the root user.
   Action: Run the server as a user with the needed privileges.

   Cause: Enough arguments were not specified for a command.
   Action: Specify the minimum number of arguments.

   Cause: Too many arguments arguments specified for a command.
   Action: Specify the required number of arguments.

CLSGN-00093: Server failed during start up.
   Cause: The GNS server started but later terminated unexpectedly.
   Action: Examine the trace and log files for the reason.

CLSGN-00094: DNS service query failed: string.
   Cause: The name resolution component was unable to start a query for names of hosts in the cluster.
   Action: The following error will detail exactly what occurred. Also, examine the log files for other information.

CLSGN-00095: Invalid IP address for name "string": "string"
   Cause: An attempt was made to register an IP address which was in the incorrect format.
   Action: Change the address to be in the correct format.

CLSGN-00096: Connection to the mDNS server failed: string.
   Cause: An attempt to perform an operation on an address failed because it was not possible to connect to the mDNS server.
   Action: Ensure that the server is up and try the operation again.

CLSGN-00097: Advertisement of "string" failed.
   Cause: An attempt to advertise an address or create an alias failed.
   Action: Examine the accompanying message for more details as to the reason.

CLSGN-00098: Name already exists.
   Cause: An attempt to advertise an address or create an alias failed because the name already exists.
   Action: Either delete the record and use a different name.

CLSGN-00099: Multicast DNS server not running.
   Cause: GNS was unable to send a query to the multicast DNS server because it is not running.
Action: Start the multicast DNS server.

CLSGN-00100: The alias "string" already exists.
Cause: The specified alias already exists.
Action: Specify an alias which does not exist.

CLSGN-00101: The alias "string" does not exist.
Cause: An alias for a host could not be found.
Action: Specify an alias which exists.

CLSGN-00102: The host name "string" does not exist.
Cause: A host with the specified name could not be found.
Action: Specify a host name which exists.

CLSGN-00105: Server terminated with error.
Cause: GNS terminated with an unexpected error.
Action: See the accompanying exception stack for more information.

CLSGN-00106: Getting information about interfaces failed.
Cause: GNS did not have the privilege to obtain information about the interfaces available on the host.
Action: Consult the documentation about the operating system to determine the privileges needed.

CLSGN-00107: Getting information about interface "string" failed.
Cause: GNS did not have the privilege to obtain information about the given interface.
Action: Consult the documentation about the operating system to determine the privileges needed.

CLSGN-00109: No interfaces available.
Cause: GNS was unable to find any interfaces on which it can listen for requests. This error is likely caused by the incorrect specification of the list of interfaces on which GNS is not to listen. Alternatively, it may be caused by an error in system configuration.
Action: Correct the list of prohibited interfaces if it was set incorrectly. If this is not the case, check the system configuration.

CLSGN-00110: One or threads failed - check log.
Cause: One or more GNS failed unexpectedly.
Action: Check the log file to determine the exact reasons.

CLSGN-00111: Acquisition of privileges needed to perform operation failed.
Cause: An attempt to acquire the privileges needed failed.
Action: Examine the attached message for more details.

CLSGN-00112: Platform initialization failed.
Cause: GNS was unable to initialize the layer the provides system-specific services.
Action: Examine the accompanying message for details.

CLSGN-00115: Authentication failed due to network failure.
Cause: The authentication of the client to the server failed due to a failure in sending or receiving authentication data.
Action: Examine the log or trace files to determine the exact error.

CLSGN-00116: Authentication operation timed out
Cause: The authentication of the client to the server failed because one of the processes did not send its data in time.
Action: The accompanying reason has details about the reason.

CLSGN-00117: Authentication protocol failure.
Cause: The client program did not send to the server the data in the format that it was expecting.
Action: Try the connection again using an Oracle-approved client.

CLSGN-00118: Client was rejected: string.
Cause: The client was not allowed to connect to the GNS server.
Action: Examine the trace and log files for the specific reason.

CLSGN-00120: Creation of configuration file "string" failed.
Cause: The creation of the new version of the configuration file failed.
Action: Examine the rest of the error stack for the exact reason.

CLSGN-00121: Trace level set to number.
Cause: This is an information message to indicate that the trace level was set.
Action: No action is needed.

CLSGN-00122: Dynamic messaging initialization failed - error number
Cause: The facility used to control the GNS server dynamically failed.
Action: This error should not be seen in normal use. Contact Oracle Customer Support if it appears.

CLSGN-00127: Privileged user "string" does not exist.
Cause: The user which GNS is to run as in order to run operations which require special privileges does not exist.
Action: Specify a user which does exist on the host. This user must have the ability to listen for requests from the DNS server.

CLSGN-00128: Unprivileged user "string" does not exist.
Cause: The user which GNS is to run as in order to perform operations which do not require special privileges does not exist.
Action: Specify a user which exists.

CLSGN-00129: Privileged group "string" does not exist.
Cause: The group to which a user must belong in order to perform administrative operations does not exist.
Action: Specify a group which exists on the host.

CLSGN-00130: no privileges to access OCR key "string".
Cause: It was not possible to retrieve the specified key from OCR because the user does not have the required privileges.
Action: Either run the command as a user which has the required privileges or configure OCR to allow retrieval of the key.
CLSGN-00131: no privileges to get value for OCR key "string".
   Cause: It was not possible to retrieve the specified value from OCR because the
   user does not have the required privileges.
   Action: Either run the command as a user which has the required privileges or
   configure OCR to allow retrieval of the key.

CLSGN-00132: user "string" not authorized to run command.
   Cause: A user tried to run a command but has no permission to do so.
   Action: Run the command as a user which has the proper privileges.

CLSGN-00133: Exception received: string
   Cause: An exception occurred on the server process.
   Action: Examine the exception for details.

CLSGN-00134: Invalid host name: "string".
   Cause: The name of the host to be used for a GNS operation was not valid. The
   name may have no domain or be qualified with the name of subdomain serviced
   by GNS.
   Action: Specify a correct host name.

CLSGN-00135: Mandatory parameter "string" is not configured.
   Cause: A value was not configured for a mandatory parameter.
   Action: Configure a value in the parameter repository.

CLSGN-00136: Query for a host address failed.
   Cause: An address was not found for the specified host.
   Action: Register the host using srvctl.

CLSGN-00138: No thread names specified.
   Cause: The command requires at least one thread name to be specified.
   Action: Specify at least one thread name.

CLSGN-00139: Invalid thread name "string"
   Cause: The name of the thread was unknown to GNS.
   Action: Specify a valid thread name.

CLSGN-00140: OCR key "string" does not exist.
   Cause: The specified key cannot be found in the Oracle Cluster Registry.
   Action: Specify a key that exists This exception often happens when trying to
   retrieve a configuration parameter.

CLSGN-00141: The address "string" already exists.
   Cause: A mapping for a address to a host already exists.
   Action: Specify an address which does not exist.

CLSGN-00142: Open of OCR key "string" failed.
   Cause: An error occurred while trying to open the root OCR used by GNS.
   Action: Examine the accompanying exceptions for more information about the
   error. This error may be caused by mis-configuration.

CLSGN-00143: Subdomain "string" already exists.
Cause: An attempt was made to create a GNS subdomain which already exists.
Action: Specify a subdomain which does not exist.

CLSGN-00144: Subdomain "string" does not exist.
Cause: The specified GNS subdomain does not exist.
Action: Specify a subdomain which exists.

CLSGN-00145: The host "string" already exists.
Cause: The specified host already exists.
Action: Specify an host which does not exist.

CLSGN-00146: Address "string" for name "string" does not exist.
Cause: The specified host address does not exist.
Action: Specify a host address which exists.

CLSGN-00149: Host address "string" does not exist.
Cause: The specified address is not known to GNS.
Action: Specify a valid address.

CLSGN-00150: Alias "string" is invalid.
Cause: The name of the alias to be advertised was not valid. The name may have
no domain or be qualified with the name of subdomain serviced by GNS.
Action: Specify a correct alias.

CLSGN-00151: Host domain "string" does not match GNS subdomain "string"
Cause: The domain specified for the host does not specify the subdomain served
by GNS.
Action: Either specify the correct domain or just specify the name of the host.

CLSGN-00152: Self-check failed.
Cause: The self-check performed by GNS at initialization time failed.
Action: Check the accompanying exceptions and the log and trace files for details
as to why it failed. Also verify that DNS has been configured so that it contains a
"forwarders" clause which contains the domain used by GNS and the IP address
on which the GNS server is listening.

CLSGN-00153: Length of subdomain "string": string exceeds the maximum: string.
Cause: The name specified for the subdomain to be served by GNS is longer than
the maximum.
Action: Specify a shorter subdomain name.

CLSGN-00154: Invalid subdomain: "string"
Cause: The name of the subdomain does not conform to Internet standards. It
must meet the following requirments:
1. Only alphanumeric characters, periods are hyphens are allowed;
2. It must start and end with an alphanumeric character;
3. Consecutive periods are not allowed. In addition, the subdomain must not end
with with ".local" as it is reserved for multicast DNS.
Action: Specify a subdomain in the correct format.

CLSGN-00155: trace level number is less than the minimum number - ignoring.
Cause: The trace level specified is lower than the minimum supported.
Action: Specify a valid trace level.

CLSGN-00156: trace level number is greater than the maximum number. Using the maximum value instead.
Cause: The trace level specified is greater than the maximum supported.
Action: Specify a valid trace level.

CLSGN-00158: Initialization or shut down in progress.
Cause: GNS was unable to process a command because it is either starting up or shutting down.
Action: If the server is starting up, try the command again in a few seconds. The server is shutting down, try the command again after the server has restarted.

CLSGN-00161: Failed to set GNS trace level: string.
Cause: The call to set the trace level on the GNS server failed.
Action: Examine the accompanying error message for details.

CLSGN-00162: Name "string" and address "string" will not be advertised due to configuration change.
Cause: When GNS attempted to advertise a name and address upon re-start, it failed because the address can no longer be serviced. This can happen if the subnet used by GNS was changed between the time that GNS was stopped and it was started.
Action: If this result was expected, the error can be ignored. Otherwise, the subnet needs to be changed in OCR and GNS needs to be stopped and re-started.

Cause: GNS was unable to contact Cluster Synchronization Services in order to retrieve the name of the cluster.
Action: This error is most probably caused by the Cluster Synchronization Services daemon being down. If the daemon is running, contact Oracle Customer Support and provide them with the error code.

CLSGN-00164: Failed to retrieve cluster name: Error: number.
Cause: GNS was unable to get the name of the cluster from Cluster Synchronization Services.
Action: This error is most probably caused by the Cluster Synchronization Services daemon being down. If the daemon is running, contact Oracle Customer Support and provide them with the error code.

CLSGN-00165: Running as user "string" which is not privileged.
Cause: GNS is not running as a privileged user e.g. root.
Action: Start GNS as a privileged user.

CLSGN-00166: Creation of OCR key "string" failed. string
Cause: GNS was unable to create the specified OCR key.
Action: Examine the accompanying error for details about what occurred. This error may be caused by mis-configuration.

CLSGN-00167: Operation is unsupported.
Cause: An operation was attempted which is not currently supported by GNS.
Action: Do not attempt the operation.

CLSGN-00168: Name advertisement or alias re-creation failed.
Cause: When GNS starts, it re-creates the advertisements and aliases that existed when it was shut down. The attempt to re-create an advertisement or alias failed.
Action: This error should not occur in normal use. Contact Oracle Customer Support.

CLSGN-00169: Spawn of thread "string" failed.
Cause: GNS was unable to spawn a thread. This may be due to low system resources.
Action: If the memory or processes in use on the system are too high, reduce one or both and restart GNS. If this is not the case, contact Oracle Customer Support.

CLSGN-00170: Thread "string" failed on startup.
Cause: A GNS thread failed when it tried to start.
Action: Examine the alert log and and trace file (if any) for details about the error.

CLSGN-00171: Invalid alias "string" specified for name "string"
Cause: The name of the alias to be advertised was not valid. The name must have no domain or be qualified with the name of subdomain serviced by GNS.
Action: Specify an alias whose name is in the correct format.

CLSGN-00172: Domain given in alias "string" for name "string" does not match GNS domain "string".
Cause: The domain specified for an alias does not match the domain serviced by GNS.
Action: Either specify the correct domain or do not specify a domain and GNS will use its domain as the default.

CLSGN-00173: GNS has not been configured.
Cause: An operation on GNS failed because GNS has not configured.
Action: Configure GNS and retry the operation.

CLSGN-00174: Packet replay detected - dropping connection.
Cause: GNS received a duplicate packet from a client. The connection was dropped as a consequence.
Action: Examine the trace file for details. It is possible that a malicious user is attempting to send an invalid packet to GNS.

CLSGN-00175: Invalid packet received - dropping connection.
Cause: The packet was ignored by the server because it was invalid. This may be caused by another process sending malformed packets. This error is usually accompanied by another error which describes the exact error that occurred.
Action: Use system tools to determine if a non-GNS process is sending data to the server.

CLSGN-00176: Packet security check failed.
Cause: The check of the security attributes of a packet failed.
Action: Check the trace file for details about the failure. It is possible that a malicious user is attempting to send an invalid packet to GNS.
CLSGN-00177: Invalid packet type received.
   Cause: GNS received a packet whose type is unknown.
   Action: Check the trace file for details about the failure. It is possible that a malicious user is attempting to send an invalid packet to GNS.

CLSGN-00178: Resolution of name "string" failed.
   Cause: GNS failed to retrieve the address of the specified name.
   Action: Check to make sure that an address for the name has been registered with GNS. If it is configured, check to make sure that DNS has been properly configured.

CLSGN-00179: No forwarded query received from DNS for name in "string" domain, check DNS configuration
   Cause: A query was not forwarded from DNS to GNS for a name in the subdomain that it services.
   Action: Check the configuration of DNS. Make sure that it contains the required forwarding directive contained in the following message.

CLSGN-00180: If BIND is being used and the zone is being forwarded, the entry will likely look like the following:
   Cause: This message is displayed when the GNS self-check fails.
   Action: Ensure that the configuration of DNS has the entry listed in the message that follows this one.

CLSGN-00182: string Unable to resolve self-check name.
   Cause: This is an informational message which accompanies other messages describing a self-check failure.
   Action: Examine the accompanying error messages for more information as to the cause of the problem.

CLSGN-00183: Number of retries exceeded maximum: number.
   Cause: An operation failed after the maximum number of retries.
   Action: Examine the accompanying message(s) for the reasons to why this error occurred.

CLSGN-00184: Operation has to be retried.
   Cause: An operation failed because it could not be performed at this time and should be tried again later.
   Action: Examine the accompanying message(s) for details about the operation that was performed.

CLSGN-00185: Invalid argument.
   Cause: An argument was passed to a function which was incorrect. In the case of a string, for example, a string will be invalid if it is null or has a zero length.
   Action: Supply a valid argument.

CLSGN-00186: Insufficient privileges.
   Cause: The user attempted an operation for which he or she does not have sufficient privileges.
   Action: Either have the system administrator grant the needed privileges or re-try the operation as a user which has the needed privileges.
CLSGN-00187: Listening address "string" is not on the public network.
Cause: The address specified as the address on which GNS is to listen is not on the public network.
Action: Specify a different address which is on the public network.

CLSGN-00188: The value for parameter "string": number may only be from number to number.
Cause: The value for a parameter is outside the range of permitted values.
Action: Specify a value within the range.

CLSGN-00190: No records found for "string".
Cause: No records could be found for the specified name in GNS.
Action: Specify a name which exists in GNS.

CLSGN-00191: No records registered.
Cause: A query was made for the names registered in GNS but none were found.
Action: Re-run the query after names have been advertised.

CLSGN-00192: string Open of OCR key "string" failed. string
Cause: GNS was unable to open the specified OCR key.
Action: Examine the accompanying error for details about what occurred.

CLSGN-00193: Deletion of OCR key "string" failed. string
Cause: GNS was unable to delete the specified OCR key.
Action: Examine the accompanying error for details about what occurred.

CLSGN-00194: Time needed for resolution of name "string": string ms exceeded threshold of string ms
Cause: Name resolution took longer than the expected time.
Action: This may indicate a problem in the network or DNS configuration and should be investigated by each administrator.

CLSGN-00196: Self-check succeeded after previous failure.
Cause: This is an informational message which indicates that the self-check succeeded after having failed previously.
Action: No action required.

CLSGN-00197: string Self-check failed due to failure in name resolution.
Cause: The self-check failed because it was not possible to resolve the self-check name into the address used for reference.
Action: Examine the errors that follow the message for further information as to the cause.

CLSGN-00201: string first self-check name resolution failed.
Cause: GNS was unable to resolve the name that it uses for the self-check the first time after it started.
Action: Examine the logs for more information about the error.

CLSGN-00202: string first self-check failed.
Cause: GNS was unable run the self-check the first time after it started.
Action: Examine the logs for more information about the error.
CLSGN-00205: string self-check failed while in "recovery" state.
  Cause: The self-check had previously succeeded after a failure but has failed again.
  Action: Examine the logs for more information about the failure.

CLSGN-00206: Creation of a network endpoint failed.
  Cause: The creation of a listening endpoint failed.
  Action: Examine the accompanying error stack for more information about the error.

CLSGN-00207: Creation of a network endpoint failed due to lack of permissions.
  Cause: The creation of a listening endpoint failed because the server did not have the needed permissions.
  Action: Examine the accompanying error stack for more information about the error.

CLSGN-00208: Network endpoint "string" already in use.
  Cause: The creation of an endpoint failed because another process is using it.
  Action: If another GNS instance is running, this error is expected. Otherwise, terminate the process using the address or start GNS on another node.

CLSGN-00209: Listen for DNS requests failed. IP address string port number is in use.
  Cause: Listening for requests from the DNS server(s) failed because another process is using the address.
  Action: If another GNS instance is running, this error is expected. Otherwise, terminate the process using the address or start GNS on another node.

CLSGN-32767: Internal error.
  Cause: An unexpected error occurred.
  Action: Examine the message(s) that accompany this one for details about the error and contact Oracle Customer Support.
CLSMDNS-00000: no error
  Cause: A command completely successfully.
  Action: No action is needed.

CLSMDNS-00001: GIPC endpoint creation failed.
  Cause: An attempt to create a GIPC endpoint for use multicast operations failed.
  Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00002: bind failed.
  Cause: An attempt to bind an address to a GIPC endpoint failed.
  Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00003: address creation failed.
  Cause: An attempt to create a GIPC address failed.
  Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00004: attribute setting failed.
  Cause: An attempt to set an attribute on a GIPC endpoint or address failed.
  Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00005: interface registration failed.
  Cause: The registration of an interface with mDNS failed.
  Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00006: failed to get name server list.
  Cause: An attempt to get the list of available name servers failed.
  Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00007: mDNS initialization failed.
  Cause: The initialization of the mDNS subsystem failed.
  Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.
CLSMDNS-00008: start of host query failed.
   Cause: The query for hosts from mDNS failed to start.
   Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00009: stop of host query failed.
   Cause: Termination of the query for hosts from mDNS failed.
   Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00010: Initialization of name server name retrieval failed.
   Cause: The initialization of the retrieval of the names of the name servers used by multicast DNS failed.
   Action: Examine the accompanying messages(s) that detail the platform error(s) for details about the exception.

CLSMDNS-00011: retrieval of name server name failed.
   Cause: The retrieval of the name of a name server to be used by multicast DNS failed.
   Action: Examine the accompanying messages(s) that detail the platform error(s) for details about the exception.

CLSMDNS-00012: no name servers found.
   Cause: No name servers were found that could be used by multicast DNS.
   Action: Check the system configuration and ensure that or more DNS name servers are configured, operating and accessible.

CLSMDNS-00013: Send of response to DNS server failed.
   Cause: An attempt to send a response to a query from the DNS server failed.
   Action: Examine accompanying exceptions for details about the exact error.

CLSMDNS-00015: invalid record type: number
   Cause: The DNS server sent a record whose type is unknown.
   Action: This is a warning message which can be ignored because the error should occur very infrequently. If the error occurs frequently, Oracle Customer Support should be contacted.

CLSMDNS-02000: unknown error.
   Cause: An unknown error occurred. This error can occur when the multicast DNS server is not running.
   Action: If the multicast server is not running, start it and try the operation again. If it is running, this is an internal error and Oracle Customer Support should be contacted with details about how and when the error occurred.

CLSMDNS-02001: no such name exists.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02002: memory allocation failure.
   Cause: The allocation of process memory failed.
Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

CLSMDNS-02003: invalid parameter.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02004: invalid reference.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02005: invalid state.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02006: invalid flags.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02007: operation is unsupported.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02008: uninitialized.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02009: no cache.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02010: record or service is already registered.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02011: name conflict found.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02012: Invalid.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02013: Firewall.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.

CLSMDNS-02014: Incompatible.
Cause: This error is internal and should not ordinarily be seen by the user.
Action: Contact Oracle Customer Support.
CLSMDNS-02015: invalid interface.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02016: Refused.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02017: no such record.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02018: no authentication.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02019: no such key.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02020: error occurred while passing through NAT.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02021: double NAT encountered.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02022: invalid time.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02023: invalid signature.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02024: invalid key.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02025: transient error.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02250: connection pending.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.

CLSMDNS-02251: connection failed.
   Cause: This error is internal and should not ordinarily be seen by the user.
   Action: Contact Oracle Customer Support.
CLSMDNS-02252: connection established.
  Cause: This error is internal and should not ordinarily be seen by the user.
  Action: Contact Oracle Customer Support.

CLSMDNS-02253: more memory needed for cache.
  Cause: This error is internal and should not ordinarily be seen by the user.
  Action: Contact Oracle Customer Support.

CLSMDNS-02254: configuration changed.
  Cause: This error is internal and should not ordinarily be seen by the user.
  Action: Contact Oracle Customer Support.

CLSMDNS-02255: memory free needed.
  Cause: This error is internal and should not ordinarily be seen by the user.
  Action: Contact Oracle Customer Support.
CLSR-00001: Oracle error *number* encountered
	Cause: Oracle-related error is encountered.
	Action: Check alert log and trace file for more detail.

CLSR-00002: Oracle error encountered while executing *string*
	Cause: Oracle-related error is encountered while executing a request.
	Action: Check alert log for more detail.

CLSR-00003: ORACLE_HOME environment variable not set
	Cause: ORACLE_HOME environment variable is not set.
	Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

CLSR-00004: Error encountered at *string*, category=*number*, operation=*string*, OS error=*number*
	Cause: Operating system error occurred.
	Action: Check for the error message for more detail.

CLSR-00005: Error encountered during memory allocation
	Cause: System memory is insufficient.
	Action: Check the availability of memory in the system before retrying.

CLSR-00006: Error encountered when writing file *string*
	Cause: Error when writing file.
	Action: Check the permission of the file and the existence of its path.

CLSR-00007: Error encountered when reading file *string*
	Cause: Error when reading file.
	Action: Check the permission and existence of the file.

CLSR-00501: Error *number* encountered when connecting to EVM daemon
	Cause: Error encountered when connecting to EVM daemon.
	Action: Check status of EVM daemon and log file for detail.

CLSR-00502: Error *number* encountered when subscribing an EVM event
	Cause: Error encountered when subscribing an EVM event.
	Action: Contact customer support.

CLSR-00503: Error *number* encountered when creating an EVM event
Cause: Error encountered when creating an EVM event.
Action: Contact customer support.

CLSR-00504: Error number encountered when posting an EVM event
Cause: Error encountered when posting an EVM event.
Action: Contact customer support.

CLSR-00505: Empty event type is specified
Cause: Empty event type is specified.
Action: Try again with a valid event type.

CLSR-00506: Unmatched resource name prefix string is specified
Cause: Specified resource name prefix does not match as required.
Action: Try again with a valid resource name prefix.

CLSR-00507: The length of the facility name string exceeds the limit (number)
Cause: The given facility name is too long.
Action: Try again with a short facility name.

CLSR-00508: Invalid message number number
Cause: An incorrect message number is specified.
Action: Try again with a correct message number.

CLSR-00509: Unable to initialize NLS
Cause: Failed to initialize callback structure for NLS.
Action: Contact customer support.

CLSR-00510: Unable to load NLS data
Cause: Failed to initialize NLS data loading.
Action: Not action required as default data loading will be used.

CLSR-00511: Error number encountered when handling incoming EVM message
Cause: Error encountered when handling incoming EVM message.
Action: Check log file for detail.

CLSR-00512: Invalid CAA trigger event type [string]
Cause: Invalid CAA trigger event type is specified.
Action: Try again with a valid type.

CLSR-00513: Message file is not found
Cause: The requested OCI message file is not found.
Action: Check if the message file is properly installed.

CLSR-00514: Unable to locate PMON [pid=string]
Cause: Cannot find PMON with this pid.
Action: Check the existence of PMON.

CLSR-00515: A service member is already running on this node
Cause: There is a service member of the same service running on this node.
Action: No action required as the service member will try to start on another node.
CLSR-00516: No service provider found at this node
   Cause: No suitable service provider is found on this node.
   Action: No action required as the service member will try to start on another node.

CLSR-00517: Failed to register a service name
   Cause: The requested service name cannot be registered.
   Action: Check log file for detail.

CLSR-00518: Failed to register a preconnect service name
   Cause: The requested preconnect service name cannot be registered.
   Action: Check log file for detail.

CLSR-00519: No instance found
   Cause: No instance is found running for the database resource.
   Action: No action required as the database resource will fail itself.

CLSR-00520: No service member found
   Cause: No service member is found running for the composite service resource.
   Action: No action required as the composite service resource will fail itself.

CLSR-00521: Event string is rejected by EVM daemon
   Cause: No template has been registered for the event or caller is not authorized to post the event.
   Action: Check if there is a template registered for this event and the authority of posting this event.

CLSR-00522: Resource string is not registered
   Cause: CRS resource is not registered.
   Action: Register the CRS resource.

CLSR-00523: Resource string is not enabled
   Cause: CRS resource is not enabled.
   Action: Enable the CRS resource.

CLSR-00524: Resource string is stopping, resource string cannot start
   Cause: Resource cannot start because its composite resource is stopping.
   Action: Retry to start the resource when its composite resource is not stopping.

CLSR-00525: prsr initialization failed
   Cause: See the related error message.
   Action: Run crs_stat to make sure CSS and OCR working properly.

CLSR-00526: Failed to retrieve database configuration in OCR
   Cause: See the related error message.
   Action: Run crs_stat to make sure CSS and OCR working properly and database configuration in ocr is initialized.

CLSR-00527: OCR operation failed
   Cause: See related error messages about the OCR operation.
   Action: Fix the related error. Then try again.
CLSR-00528: RACGONS: host and port number already configured in OCR
   Cause: host and port number already configured in OCR.
   Action: None

CLSR-00529: RACGONS: host and port number to be removed does not exist
   Cause: host and port number to be removed is not configured in OCR.
   Action: None

CLSR-00530: Can not get user name
   Cause: Error caused by OSD layer.
   Action: Contact Oracle support.

CLSR-00531: Can not get primary group name
   Cause: There is no primary group for this OS.
   Action: Not fatal. None.

CLSR-01001: Unsupported open mode number is specified
   Cause: Unsupported open mode is specified for mounting database.
   Action: Retry again with a valid open mode.

CLSR-01002: Unable to process instance startup
   Cause: ORACLE_HOME environment variable not set.
   Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

CLSR-01003: Error number encountered during mounting database
   Cause: Unexpected error occurs when mounting database.
   Action: Check current status of database before retrying.

CLSR-01004: Failed to mount database
   Cause: Database cannot be mounted by an instance.
   Action: Check alert log for error detail.

CLSR-01005: Error number encountered during altering database open mode
   Cause: Unexpected error occurs when altering database open mode.
   Action: Check current database status.

CLSR-01006: Unable to process instance shutdown
   Cause: ORACLE_HOME environment variable not set.
   Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

CLSR-01007: Connection to database was not established
   Cause: Connection to database is failed to establish.
   Action: Make sure connection and environment are properly set up.

CLSR-01008: Error number encountered during querying for PMON status
   Cause: Unexpected error encountered when querying v$process for PMON.
   Action: Check alert log and connection to database.

CLSR-01009: database management module failed to start
Cause: Error encountered during initializing database management module.
Action: Check previous error message for detail.

CLSR-01010: Unable to record PMON pid to string
Cause: Failed to write os pid for PMON to file.
Action: Check file system for disk space and access privilege.

CLSR-01011: Invalid instance startup mode [string] is specified
Cause: Invalid startup mode is specified.
Action: Retry again with a valid startup mode.

CLSR-01012: Invalid instance stop mode [string] is specified
Cause: Invalid stop mode is specified.
Action: Retry again with a valid stop mode.

CLSR-06500: Invalid input arguments
Cause: Invalid input arguments are specified.
Action: Retry again with a valid argument.

CLSR-06501: Exceeds maximum number of arguments
Cause: Too many input arguments are specified.
Action: Retry again with correct number of arguments.

CLSR-06502: Failed to connect to database 'string' as user 'string'
Cause: Failed to connect to database.
Action: Check database and log file for details.

CLSR-06503: Service name already registered
Cause: Requested service name has been registered by another service.
Action: Choose another service name and retry registration again.

CLSR-06504: Service name not in SERVICE_NAMES
Cause: Requested service name is not registered.
Action: Make sure the correct service name is specified in the request.

CLSR-06505: SERVICE_NAMES found null and fixed
Cause: SERVICE_NAMES parameter becomes null after the delete operation.
Action: Not action required as SERVICE_NAMES is set to default value.

CLSR-06506: Error number encountered when executing string
Cause: Error occurred when executing the SQL statement.
Action: Check alert log for more detail.

CLSR-06507: Cannot add to SERVICE_NAMES, SERVICE_NAMES will be too long
Cause: Adding the service name will exceed the limit of SERVICE_NAMES.
Action: Change the configuration to avoid SERVICE_NAMES becomes too long.
CLSS-00001: skgxn not active
   Cause: The skgxn service is required, but is not active
   Action: Verify that the clusterware skgxn is active and restart it if necessary

CLSS-00002: unable to determine local node number. type string
   Cause: Either the skgxn service is unavailable, or the OCR configuration is incomplete/inaccurate.
   Action: Verify that the clusterware skgxn is active and restart it if necessary. Additionally validate that the clusterware installation was successful, and that the local node was entered in the node listings.

CLSS-00003: unable to determine cluster name. type string
   Cause: Name of the cluster cannot be determined from configuration.
   Action: Verify that the clusterware installation was successful and that the OCR registry is available.

CLSS-00004: unable to allocate memory resources
   Cause: Memory allocation routines failed.
   Action: Validate that the system has sufficient memory resources to use the product.

CLSS-00099: logfile open failed for string, err string
   Cause: The log file could not be opened, with error type err
   Action: Verify that the log directory specified during installation exists and that the ocssd executable has permission to create a file in that directory

CLSS-00100: configuration data access failed for key string
   Cause: Access of the configuration data indicated by key failed with error code error
   Action: Verify that the clusterware installation was successful and that the OCR registry is accessible

CLSS-00101: Oracle Cluster Repository mismatch with node string. (string != string)
   Cause: A remote node is accessing a different set of configuration. This situation can be caused by attempting to reinstall while there are active cluster nodes.
   Action: Verify that the local and remote nodes are accessing the same Oracle Cluster Repository.

CLSS-00102: initialization failure: [string] [string] [string] [string] [string] [string]
Cause: A general initialization failure occurred.
Action: Contact Oracle Customer Service for more information.

CLSS-00103: unable to read configuration information for node string
Cause: Incomplete configuration information for the specified node was found.
Action: Validate the integrity of the Oracle Cluster Repository, restoring it from backup if necessary.

CLSS-00200: local node string not listed in configuration
Cause: The OCR configuration information does not list this node as a member of the cluster
Action: Verify that the clusterware installation was successful and that the node has not been added since installation

CLSS-01200: skgxn error: category string, operation string, loc string
Cause: The skgxn service encountered an error, the information in the error message is vendor supplied diagnostic information
Action: Report this error to the vendor who supplied the skgxn

CLSS-02000: reconfiguration successful, incarnation string with string nodes
Cause: A reconfiguration has completed successfully
Action: None

CLSS-02001: local node number string, master node number string
Cause: Informational message regarding this incarnation
Action: None

CLSS-02200: Received node deletion request for active node string.
Cause: User attempted to delete a node from the configuration before shutting it down.
Action: Shut down the specified node and retry the node deletion.

CLSS-02201: endpoint already in use: string
Cause: The specified endpoint is already in use. Another process is using the endpoint.
Action: Shut down the other process, and retry the startup attempt.

CLSS-02202: voting device access took an excessive amount of time. (string sec)
Cause: A read or write to the voting device took an unacceptable amount of time.
Action: Contact the disk hardware vendor for information on improving the availability of the disk.

CLSS-02203: unable to access voting device: string
Cause: The CSS daemon received a failure using the voting device.
Action: Examine the permissions on the voting device. If this failure occurred later than boot time, then access to the voting device was lost.

CLSS-02204: voting device not configured. [string] [string]
Cause: A voting device was not supplied during configuration.
Action: The voting device assists in ensuring data integrity and is required by the CSS daemon. Configure a voting device and restart the cluster.
CLSS-02205: remote node *string* signaled our eviction via voting device: cause *string*

**Cause:** A remote node of the cluster evicted the local node due to network failure or due to software failure in the local CSS daemon.

**Action:** Verify the stability of the private network between the local node and the specified remote node.

CLSS-02206: local node evicted by vendor node monitor

**Cause:** The Operating System vendor's node monitor evicted the local node.

**Action:** Examine the vendor node monitor's logs for relevant information.

CLSS-02207: error *string* getting status from vendor node monitor

**Cause:** The CSS daemon received a failure interacting with the vendor node monitor. The local node may have been evicted or the vendor node monitor may have been shut down.

**Action:** Examine the vendor node monitor's logs for relevant information.

CLSS-03000: reconfiguration successful, incarnation *string* with *string* nodes

**Cause:** A reconfiguration has completed successfully

**Action:** None

CLSS-03001: local node number *string*, master node number *string*

**Cause:** Informational message regarding this incarnation

**Action:** None

CLSS-03200: timed out waiting on nested reconfiguration

**Cause:** The current reconfiguration hung. A network failure may have occurred.

**Action:** The local node will terminate itself to cause remote nodes to enter a nested reconfiguration. This may allow the cluster to continue operation.

CLSS-03201: An attempt to begin a nested reconfiguration failed.

**Cause:** unable to cancel previous reconfiguration to begin a new one

**Action:** None

CLSS-03202: out of sync with master: [*string*] [*string*] [*string*] [*string*] [*string*]

**Cause:** Consistency checks between the local node and the master failed.

**Action:** The local daemon will terminate itself to ensure that the surviving cluster is all properly coordinated.
CLST-01101: assigning default private interconnect name *string* for node *string*

**Cause:** A private interconnect name was not specified. The node name was used as a default instead.

**Action:** Verify that the node name refers to IP addresses on the private interconnect. Using a non-private network can cause performance and stability issues.

CLST-01102: assigning default host name *string* for node *string*

**Cause:** A host name for the node was not specified. The node name was used as a default instead.

**Action:** If the node name is not equal to the host name, the host name must be supplied to clscfg. Failure to do so will cause the Cluster Ready Services daemons not to function.

CLST-01103: existing configuration version (*string*) detected

**Cause:** An existing configuration was detected.

**Action:** Informational message only. No action is required. clscfg will not modify the existing configuration unless explicitly requested with the -force flag.

CLST-01104: successfully determined required configuration for all components

**Cause:** clscfg was able to determine the proper configuration requirements.

**Action:** Informational message only. No action is required. clscfg will attempt to write the configuration next.

CLST-01105: An existing configuration was detected. It was not overwritten.

**Cause:** An existing configuration was detected, and clscfg chose not to overwrite it.

**Action:** This message may be ignored if it is seen as part of starting any node other than the first one. The -force option can be used to override this decision, but if it is used when there are active cluster members, failure CLSS-0101 and data integrity issues are likely.

CLST-01301: successfully deleted *string* of *string* configuration values

**Cause:** clscfg completed a portion of the delete operation.

**Action:** Informational message only. No action is required. If some of the values were not deleted, another error message should be visible with more information.

CLST-01302: successfully deleted *string* of *string* configuration keys

**Cause:** clscfg completed a portion of the delete operation.
**Action:** Informational message only. No action is required. If some of the keys were not deleted, another error message should be visible with more information.

**CLST-01303: successfully rolled back delete operation**
*Cause:* The delete node operation failed, but the configuration was properly restored to its original state.
*Action:* Informational message only. No action is required.

**CLST-01304: node deletion successful**
*Cause:* The delete node operation succeeded.
*Action:* Informational message only. No action is required.

**CLST-01401: formatting voting device: string**
*Cause:* clscfg started formatting the voting device.
*Action:* Informational message only. No action is required.

**CLST-01501: tried to delete key string but it was not there**
*Cause:* clscfg attempted to delete a key as part of a delete operation, but it had already been deleted.
*Action:* Informational message only. No action is required. This might be an indication of corrupted configuration, or a previous delete operation that did not complete.

**CLST-01901: configuring TCP ports string, string, string, and string**
*Cause:* The specified ports were configured for use with the Cluster Ready Services Daemons.
*Action:* Informational message only. No action is required. To change the ports used, specify 4 alternate ports with "-t". Example: -t 1001,1002,1003,1004

**CLST-01902: configuring node: node number string, node name string**
*Cause:* This node configuration was requested.
*Action:* Informational message only. No action is required. To alter the list of nodes re-run the install and specify a different set of nodes, or make use of the add and delete node install options after the current install is complete.

**CLST-01903: configuring node: host name string, private interconnect name string**
*Cause:* This node configuration was requested.
*Action:* Informational message only. No action is required. To alter the list of nodes re-run the install and specify a different set of nodes, or make use of the add and delete node install options after the current install is complete.

**CLST-01904: creating configuration with user (string) and group (string)**
*Cause:* The configuration was set up with the specified user and group.
*Action:* Informational message only. No action is required. Some configuration information will only be accessible to members of the specified group. Note: On Windows platforms the group may be blank.

**CLST-01999: Warning: -force specified. Overwriting existing configuration.**
*Cause:* The -force parameter was supplied.
*Action:* The -force parameter will cause clscfg to overwrite the existing configuration. If used while a Cluster Ready Services cluster is actively running, this can cause instability and data integrity exposures.
CLST-02101: Too many nodes were specified. limit is string
Cause: Too many nodes were specified on command line.
Action: Retry the operation with a smaller number of simultaneous changes.

CLST-02102: Node string specified is out of range. Maximum node number is string.
Cause: A node was specified with node number out of range.
Action: Retry the operation with a smaller node number.

CLST-02103: Unable to parse TCP port options specified.
Cause: Arguments to the -t flag were not valid port numbers, or some number other than 4 ports were supplied.
Action: Correct the arguments to the -t flag and rerun the operation.

CLST-02104: TCP port string is out of bounds.
Cause: The TCP port specified was not a valid port number.
Action: Specify an another port. Usually TCP ports need to be between 1001 and 65,535.

CLST-02105: missing required parameter -l with language ID information
Cause: The -l parameter was required for the requested operation.
Action: Supply the -l parameter with the proper language ID.

CLST-02106: missing required parameter -o with path to ORA_CRS_HOME
Cause: The -o parameter was required for the requested operation.
Action: Supply the -o parameter with the proper path.

CLST-02107: failure configuring component string
Cause: The Oracle Cluster Repository configuration for the specified component was unsuccessful.
Action: Look for other error information and contact Oracle support.

CLST-02108: missing required parameter -q with path to the voting device
Cause: The -q parameter was required for the requested operation.
Action: Supply the -q parameter with a valid path for the voting device.

CLST-02109: missing required parameter -c with a cluster name
Cause: The -c parameter was required for the requested operation.
Action: Supply the -c parameter with a name for the cluster.

CLST-02110: missing required parameter -nn with the list of nodenames
Cause: The -nn parameter was required for the requested operation.
Action: Supply a list of node names with the format:
nodenameA,nodenumA,nodenameB,nodenumB,...

CLST-02201: node string already exists in the configuration with node number string
Cause: A node name specified for the add node operation conflicted with the existing configuration.
Action: Choose an alternate node to add to the cluster, or give the new node a unique name, or delete the previous node, then retry.

CLST-02202: private interconnect name string is already assigned to node number string
Cause: The private interconnect name specified for the add node operation conflicted with the existing configuration.
Action: Choose an alternate node to add to the cluster, or give the new node a unique name, or delete the previous node, then retry.

CLST-02203: Host name string is already assigned to node number string.
Cause: The host name specified for the add node operation conflicted with the existing configuration.
Action: Choose an alternate node to add to the cluster, or give the new node a unique name, or delete the previous node, then retry.

CLST-02204: Node number string is already assigned to node string.
Cause: The node number specified for the add node operation conflicted with the existing configuration.
Action: Choose an alternate node to add to the cluster, or give the new node a unique node number, or delete the previous node, then retry.

CLST-02301: failure string validating configuration of node string
Cause: clscfg was unable to validate existing configuration of the specified node.
Action: Validate the integrity of the Cluster Ready Services install on the local node, or choose another node to delete.

CLST-02302: failure string validating configuration of private interconnect name string
Cause: clscfg was unable to validate existing configuration of the specified node.
Action: Validate the integrity of the Cluster Ready Services install on the local node, or choose another node to delete.

CLST-02303: failure string validating configuration of node with host name string
Cause: clscfg was unable to validate existing configuration of the specified node.
Action: Validate the integrity of the Cluster Ready Services install on the local node, or choose another node to delete.

CLST-02304: node name string for node string does not match existing node name string
Cause: The node name specified in a delete operation did not match the existing configuration.
Action: Specify the correct information describing the node you intend to delete, then retry.

CLST-02305: node number string for node string does not match existing node number string
Cause: The node number specified in a delete operation did not match the existing configuration.
Action: Specify the correct information describing the node you intend to delete, then retry.

CLST-02306: private interconnect name string for node string does not match string
Cause: The private interconnect name specified in a delete operation did not match the existing configuration.
Action: Specify the correct information describing the node you intend to delete, then retry.
CLST-02307: host name *string* for node *string* does not match existing host name *string*

**Cause:** The host name specified in a delete operation did not match the existing configuration.

**Action:** Specify the correct information describing the node you intend to delete, then retry.

CLST-02308: concurrent node deletion suspected when deleting key *string*

**Cause:** A key being deleted by the current operation was deleted by another process during the small amount of time between opening it for deletion and actually deleting it. An attempt to execute multiple separate delete operations may have occurred, and may have corrupted the configuration.

**Action:** Verify the integrity of the Oracle Cluster Repository, and restore from backup if necessary. If only one clscfg process was active on the cluster this may be ignored.

CLST-02309: failure updating the configuration in node deletion

**Cause:** clscfg was unable to modify the existing configuration for node deletion. The existing configuration was probably not harmed.

**Action:** Verify the integrity of the Cluster Ready Services install on the local node, and retry.

CLST-02310: CSS daemon refused node deletion, status *string*. attempting rollback

**Cause:** Cluster Synchronization Services daemon refused the node deletion.

**Action:** One or more of the designated nodes may still be active. clscfg will now attempt to roll back the deletion process. The Cluster Ready Services daemons must be shut down on a node before any attempt to remove them from the configuration. More information on why the attempt was refused may be available in the Cluster Synchronization Service logfile.

CLST-02311: failure rolling back node deletion. configuration irrecoverable

**Cause:** clscfg attempted to roll back the deletion process after a failure and was unable to do so. Configuration was partially deleted and left in an inconsistent state.

**Action:** Shut down the cluster and restore the Oracle Cluster Repository from backup.

CLST-02312: failed to completely delete node configuration

**Cause:** The node deletion was mostly successful, and should be functional in this state. Some portions of the configuration were not successfully deleted.

**Action:** This can be ignored. The safer choice is to restore the Oracle Cluster Repository from backup, and attempt the delete again. Adding any of the deleted nodes back to the configuration in the future may fail if this is ignored.

CLST-02401: failure *string* querying maximum configurable node number

**Cause:** clscfg was unable to determine the legitimate range of node numbers.

**Action:** Verify the integrity of the Cluster Ready Services install on the local node.

CLST-02402: failure *string* querying existing configured node list

**Cause:** clscfg was unable to retrieve the list of currently configured nodes.

**Action:** Verify the integrity of the Cluster Ready Services install on the local node.

CLST-02403: failure *string* querying the maximum node name size
Cause: clscfg was unable to determine the size of the largest node name.
Action: Verify the integrity of the Cluster Ready Services install on the local node.

CLST-02404: failure string querying the cluster name
Cause: clscfg was unable to determine the existing cluster name.
Action: Verify the integrity of the Cluster Ready Services install on the local node.

CLST-02405: failure formatting voting device (string) at [string] [string] [string]
Cause: clscfg failed to format the voting device.
Action: Verify the path and permissions set on the voting device.

CLST-02501: failure string opening configuration for write operation
Cause: clscfg was attempting to open the current configuration for write access.
Action: Verify the integrity of the Oracle Cluster Repository. Shut down the cluster and restore OCR from backup if necessary.

CLST-02502: failure string writing new configuration
Cause: clscfg was attempting to write new configuration data.
Action: Verify the integrity of the Oracle Cluster Repository. Shut down the cluster and restore OCR from backup if necessary.

CLST-02503: failure string opening configuration for delete operation
Cause: clscfg received an error while attempting to delete part of the existing configuration.
Action: Verify the integrity of the Oracle Cluster Repository. Shut down the cluster and restore OCR from backup if necessary.

CLST-02504: failure string writing configuration to disk
Cause: clscfg received a failure writing information to the Oracle Cluster Repository.
Action: Verify the settings for the Oracle Cluster Repository and retry.

CLST-02901: The number of Oracle Cluster Repository keys exceeds limit of string.
Cause: clscfg ran out of internal space for keys during install.
Action: Re-run the install and specify a smaller list of nodes. When that completes, use the add node option to add the remaining nodes.

CLST-02902: The number of Oracle Cluster Repository keys exceeds limit of string.
Cause: clscfg ran out of internal space for keys during delete node.
Action: Re-run the delete node operation and delete fewer nodes at once.

CLST-02903: unable to allocate string bytes of memory at location: string
Cause: clscfg was unable to allocate enough memory to service the request.
Action: Ensure that the specified amount of memory will be available and retry the operation.

CLST-02904: failure string in SCLS API at string
Cause: clscfg was unable to query for information about the system setup.
Action: Contact Oracle support with the additional information printed just after this message.

CLST-02905: add, install, delete, concepts, and local are mutually exclusive
Cause: clscfg was run with two different mode flags. All mode flags are mutually exclusive.
Action: Correct the command line and try again.

CLST-02906: Clustername should be between 1 and string letters.
Cause: cluster name supplied with -c argument was the wrong size.
Action: Supply an alternate cluster name of an appropriate length.

CLST-02907: unknown parameter string supplied
Cause: An unknown parameter was passed to clscfg.
Action: Use "clscfg -help" or "clscfg -concepts" for more information.

CLST-02908: unable to determine local hostname
Cause: clscfg was unable to determine the local hostname.
Action: Verify the operating system host name configuration.

CLST-02909: The requested operation requires High Availability privileges.
Cause: The current user did not have High Availability privileges.
Action: Log in as a different user and retry the operation.

CLST-02910: Failure string contacting the CRS daemon.
Cause: clscfg was unable to communicate with the CRS daemon.
Action: The requested operation must be performed from an active cluster node. Validate the pre-existing installation on the local machine, or perform the operation from another node.

CLST-02911: failure string contacting the CSS daemon
Cause: clscfg was unable to communicate with the CSS daemon.
Action: The requested operation must be performed from an active cluster node. Validate the pre-existing installation on the local machine, or perform the operation from another node.

CLST-02999: Untranslated failure: [string] [string] [string] [string] [string] [string]
Cause: A failure with no translation occurred.
Action: Contact Oracle Customer Support for more information.

CLST-03100: See the documentation for usage information.
Cause: Incorrect or insufficient arguments were passed to crsuser.
Action: Read documentation for instructions on how to use this tool.

CLST-03101: Enter the password for user string.
Cause: crsuser requires the password to register the user.
Action: Enter the requested password.

CLST-03102: Operation successful.
Cause: The operation succeeded.
Action: None

CLST-03200: internal error: [string] [string] [string] [string] [string]
Cause: A failure with no translation occurred.
Action: Contact Oracle Customer Support for more information.
CLST-03201: unexpected argument: string
  Cause: crsuser failed to parse the arguments, or an unknown argument was passed.
  Action: Supply the correct arguments and try again.

CLST-03202: Memory allocation failure for string bytes.
  Cause: crsuser was unable to allocate memory.
  Action: Free up some system memory and try again.

CLST-03203: insufficient privileges for action: string
  Cause: The current user did not have sufficient privileges.
  Action: Log in as another user and try again.
CLSU-00100: Operating System function: 

**string** failed with error data: **string**

**Cause:** A call to an Operating System dependent service or function returned an error indication. The message includes the name of the function and the returned error data. The latter varies by platform but typically is numeric; on most platforms it is the value of C "errno" after the failing call.

**Action:** This error normally is accompanied by other (higher-level) messages describing the operation that is affected by the failure. It may also include one or more of messages 101, 103, and 104 providing additional error details. All of the messages should be examined to assess the error, which may have a very ordinary cause and correction, such as an input file failing to open because the supplied name was misspelled.

CLSU-00101: Operating System error message: **string**

**Cause:** This message accompanies message 100 above when the Operating System dependent error data can be converted into a text message. On most Oracle platforms the message is a text representation of the C "errno" value reported in message 100.

**Action:** See message 100.

CLSU-00102: Operating System interface detected an error

**Cause:** This message is issued instead of messages 100-101 when a "logical" error condition (rather than failure of an Operating System function call) is detected at an Operating System specific interface. The error condition is further described by accompanying message(s), including 103 and 104.

**Action:** This error normally is accompanied by other (higher-level) messages describing the operation that is affected by the failure. In most cases it will also include messages 103 and 104, providing additional details about the error. All of the messages should be examined to assess the error, which may have a very ordinary cause and correction, such as a missing required environment variable.

CLSU-00103: error location: **string**

**Cause:** This message accompanies message 100, 102, or 105 and identifies a location in Oracle program code that encountered the error.

**Action:** See message 100, 102, or 105. This information normally is useful only when reporting the error condition to Oracle as a potential code bug.

CLSU-00104: additional error information: **string**

**Cause:** This message accompanies message 100, 102, or 105 and supplies additional information related to the error condition. A single error may include multiple lines of additional information.
Action: See message 100, 102, or 105.

CLSU-00105: Operating System interface has reported an internal failure
Cause: This message indicates that an Operating System dependent interface within Oracle code has detected internal corruption or some other evidence of internal program failure.
Action: This message may be accompanied by other (higher-level) messages indicating the product operation that was affected by the failure. It may also be accompanied by either or both of messages 103 and 104. All situations reporting this condition should be referred to Oracle Support for resolution.

CLSU-00106: An improper Operating System error display was attempted
Cause: During processing of an error condition, an attempt was made to format/display Operating System dependent error data, but the error data structure was found to indicate "no error".
Action: This error should be reported to Oracle Support for resolution.

CLSU-00200: **** Error stack contains number records, newest first:
Cause: The collection of errors about to be presented contains this many following records.
Action: This and the following data should be reported to Oracle Support for resolution.

CLSU-00201: **** Error stack end ****
Cause: This marks the end of a collection of errors
Action: The preceding data should be reported to Oracle Support for resolution.

CLSU-00210: CLSUUS test msg 0
Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.

CLSU-00211: CLSUUS test msg 1:string
Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.

CLSU-00212: CLSUUS test msg 2:string 2:string
Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.

CLSU-00213: CLSUUS test msg 3:string 2:string 3:string
Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.

CLSU-00214: CLSUUS test msg 4:string 2:string 3:string 4:string
Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.

CLSU-00215: CLSUUS test msg 5:string 2:string 3:string 4:string 5:string
Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.

Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.

Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.

Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.

CLSU-00220: clsem FATAL exception: string
Cause: Something unrecoverable happened in CLSEM.
Action: Report to Oracle Support.

CLSU-00221: ERROR printed by clsecho: string
Cause: An error printed by clsecho
Action: Report to Oracle Support.

CLSU-00222: WARNING printed by clsecho: string
Cause: A warning
Action: Note the text

CLSU-00223: Info printed by clsecho: string
Cause: Information printed by clsecho
Action: Report to Oracle Support.

CLSU-00910: Named exception string string string string
Cause: Program raised an exception that does not have its own message
Action: Report to Oracle Support.

CLSU-00911: Signal string received
Cause: Program received on OS signal reported as an exception
Action: Report to Oracle Support

CLSU-00912: OSE: string string
Cause: An operating specific error was noticed
Action: Examine the message in context.
CLSW-00001: Cluster Wallet operation failed
Cause: This is generic internal error for Cluster Wallet.
Action: Contact Oracle Customer Support.

CLSW-00002: Out of heap memory.
Cause: The program ran out of heap memory.
Action: Retry the operation when more memory is available.

CLSW-00003: Error in the cluster registry (OCR) layer. [number] [string]
Cause: An error occurred in the cluster registry layer while performing a cluster wallet operation.
Action: Ensure correct operation of cluster registry by inspecting ocr error (oerr proc <ocrerror>), by using ocrcheck and ocrdump, and retry the operation.

CLSW-00004: Error in the network security layer. [number] [string]
Cause: An error occurred in the network security layer while performing a cluster wallet operation.
Action: Inspect the network security error (oerr ora <nzerr>), and take corrective action to ensure correct operation.

CLSW-00005: Cannot perform cluster wallet operation because one of the parameters is NULL.
Cause: Program tried a cluster wallet operation using a NULL parameter.
Action: Check the parameters, and retry the operation.

CLSW-00006: Cannot perform cluster wallet operation because the context is invalid.
Cause: The cluster wallet context passed was invalid.
Action: Initialize the cluster wallet and retry the operation.

CLSW-00007: Cannot perform cluster wallet operation because one of the parameters is invalid. [number] [string]
Cause: Program tried a cluster wallet operation using an invalid parameter.
Action: Check the parameters, and retry the operation.

CLSW-00008: The cluster wallet to be created already exists.
Cause: The program tried to create a cluster wallet that already exists.
Action: Retry the operation after unsetting the CLSW_FLAGS_WALLET_CREATE
CLSW-00009: The cluster wallet to be operated on does not exist.
   Cause: Program tried to access a cluster wallet which does not exist.
   Action: Check to see if the cluster wallet exists and try the operation

CLSW-00010: Error in the NLS services.
   Cause: An error occurred in the NLS services while performing a cluster wallet operation.
   Action: Check to see if the message file exists in $ORACLE_HOME/has/mesg/clsw*.msb

CLSW-00011: Cannot perform cluster wallet operation because data stored in the registry is invalid.
   Cause: The data stored in the registry cannot be converted to a wallet.
   Action: Delete the registry key associated with the wallet and recreate the wallet.

CLSW-00012: User is not authorized to perform the cluster wallet operation. [number] [string]
   Cause: Program tried an operation on a cluster wallet for which it does not have permission.
   Action: Check to see if program is run as the correct user.

CLSW-00013: Error in the clusterware operating system (SCLS) services. [string]
   Cause: An error occurred in the SCLS services while performing a cluster wallet operation.
   Action: Check to see if NIS/LDAP on Unix and Active Directory Service on Windows has been correctly configured.

CLSW-01000: Enter Password:
   Cause: This is a prompt to user to enter password.
   Action: Enter password.
CRS-00001: Message ID string-number not found.
    Cause: The message for the given message id is not found in any language.
    Action: Make sure the product is setup correctly on the system.

CRS-00184: Cannot communicate with the CRS daemon.
    Cause: The CRS daemon on the local node is either not running or there was an internal communication error with the CRS daemon.
    Action: Check if the CRS daemon process is running on the local node.

CRS-00210: Could not find resource 'string'.
    Cause: An attempt was made to operate on a resource that is not registered.
    Action: Ensure that the resource name is specified correctly using the command 'crsctl status resource'.

CRS-00211: Resource 'string' has already been registered.
    Cause: An attempt was made to register a resource that is already registered.
    Action: Ensure that the resource name is specified correctly and retry the command.

CRS-00213: Could not register resource 'string'.
    Cause: There was an internal error while registering the resource.
    Action: Check the CRS daemon log file.

CRS-00214: Could not unregister resource 'string'.
    Cause: There was an internal error while unregistering the resource.
    Action: Check the CRS daemon log file.

CRS-00215: Could not start resource 'string'.
    Cause: There was an internal error while starting the resource.
    Action: Check the CRS daemon log file.

CRS-00216: Could not stop resource 'string'.
    Cause: There was an internal error while stopping the resource.
    Action: Check the CRS daemon log file.

CRS-00217: Could not relocate resource 'string'.
    Cause: There was an internal error while relocating the resource.
    Action: Check the CRS daemon log file.
CRS-00218: Could not restart the resource 'string' on the original node.
    
    **Cause:** There was an internal error while restarting the resource.
    
    **Action:** Check the CRS daemon log file.

CRS-00219: Could not update resource 'string'.
    
    **Cause:** There was an internal error while updating the resource.
    
    **Action:** Check the CRS daemon log file.

CRS-00220: Resource 'string' has invalid resource profile.
    
    **Cause:** Invalid attributes in the resource profile.
    
    **Action:** Run the command `crsctl status type` to identify the invalid attributes. Modify these attributes using the command `crsctl modify type`.

CRS-00221: Resource 'string''s action script cannot be found.
    
    **Cause:** The action script has been deleted from the file system.
    
    **Action:** Run `crsctl status resource -p` to determine the action script location, and check for its existence.

CRS-00223: Resource 'string' has placement error.
    
    **Cause:** There was no host available to on which failover/start the resource based on the Placement Policy for the resource.
    
    **Action:** Check the target host for the resource and restart the resource using the 'crsctl start resource' command.

CRS-00230: Member 'string' is not in the cluster.
    
    **Cause:** The hostname was not found in the cluster.
    
    **Action:** Check the hostnames in the cluster.

CRS-00232: Cluster member is down. Cannot perform operation.
    
    **Cause:** The node on which CRS is attempting to start the resource is down.
    
    **Action:** Start the node and retry the operation.

CRS-00233: Resource or relatives are currently involved with another operation.
    
    **Cause:** Another CRS daemon was operating on the same resource.
    
    **Action:** Wait for a minute and try the command or operation again.

CRS-00253: CRS configuration error, the CRS default directory is not set in Oracle Cluster Registry.
    
    **Cause:** The Oracle Cluster Registry key which contains the user default CRS key is not initialised.
    
    **Action:** Check the CRS configuration. If necessary reinstall CRS.

CRS-00254: authorization failure
    
    **Cause:** The user permissions were insufficient to operate on the resource.
    
    **Action:** Check the permissions associated with the resource using 'crsctl getperm resource' and set the appropriate user permissions using 'crsctl setperm resource'.

CRS-00255: CRSD is not running in privileged mode. Insufficient permissions to run this command.
    
    **Cause:** The CRS daemon was not running as the privileged user.
Action: Check if the CRS daemon is running as root (Unix) or Administrator (Windows).

CRS-00256: Username conflicts with the owner of the resource.
Cause: An attempt was made to give separate user level permissions for the owner of the resource.
Action: Check the owner of the resource and the user being given permissions.

CRS-00257: Groupname conflicts with the primary group of the resource.
Cause: An attempt was made to give separate group level permissions for the primary group of the resource.
Action: Check the primary group of the resource and the group being given permissions.

CRS-00258: Invalid ACL string format.
Cause: An invalid permission string (ACL) was supplied.
Action: Check the syntax of the permission string (ACL).

CRS-00259: Owner of the resource does not belong to the group.
Cause: The owner of the resource does not belong to the expected group.
Action: If this resource is owned by the root user, check if the root user belongs to the dba group.

CRS-00271: CRSD shutdown is already in progress.
Cause: crsctl stop command is issued before waiting for a prior stop command to finish.
Action: Wait for the currently running shutdown command to complete before issuing subsequent command.

CRS-00272: This command remains for backward compatibility only
Cause: A deprecated command was issued.
Action: For all new use cases, please use the replacement.

CRS-00273: This command is deprecated and has been replaced by 'string'
Cause: A deprecated command was issued.
Action: For all new use cases, please use the replacement.

CRS-00274: This command is deprecated and its functionality incorporated into 'string'
Cause: A deprecated command was issued.
Action: For all new use cases, please use the replacement.

CRS-00402: Could not make safe directory('string')
Cause: Unable to create safe directory.
Action: Check if you have proper permissions and sufficient space on the disk to create the directory.

CRS-00403: Could not change working directory to safe directory('string')
Cause: Unable to change directory to safe directory.
Action: Please check if safe directory exists and if you have proper permissions.

CRS-00406: Could not create lock directory ('string')
**Cause:** Unable to create lock directory.
**Action:** Check if you have proper permissions and sufficient space on the disk to create the directory.

**CRS-00407: Another CRSD may be running, could not obtain lock file 'string'.**
**Cause:** Unable to obtain lock file as another CRSD may be running.
**Action:** Stop the existing CRSD before attempting to start CRSD again.

**CRS-00413: Could not initialize the Cluster Synchronization Services context**
**Cause:** Unable to communicate with the cluster services.
**Action:** Verify that the Cluster Synchronization Services Daemon is properly configured and is running.

**CRS-00414: Could not establish Event Manager connection**
**Cause:** Unable to communicate with Event Manager daemon.
**Action:** Run the `crsctl check evmd` command to determine whether Event Manager daemon is properly configured and is running.

**CRS-00451: CRS configuration error, unable to initialize Oracle Cluster Registry.**
**Cause:** The Oracle Cluster Registry that contains information about the CRS configuration is unavailable.
**Action:** Check the OCR configuration using the `ocrcheck` utility and resolve any issues it reports. If the problem persists, contact Oracle Support Services.

**CRS-00452: CRS configuration error, unable to find CRSD Connection Information in Oracle Cluster Registry.**
**Cause:** The Oracle Cluster Registry key which contains the user default CRSD connection is not initialized.
**Action:** Check the OCR configuration using the `ocrcheck` utility and resolve any issues it reports. If the problem persists, contact Oracle Support Services.

**CRS-00453: CRS configuration error, unable to find Instance Information in Oracle Cluster Registry.**
**Cause:** The Oracle Cluster Registry key which contains the Instance’s information is not initialized.
**Action:** Check the OCR configuration using the `ocrcheck` utility and resolve any issues it reports. If the problem persists, contact Oracle Support Services.

**CRS-00471: Node number is not found**
**Cause:** Cluster Synchronization Services is unable to retrieve the node name.
**Action:** Verify your cluster installation, including any vendor cluster ware. If necessary reinstall the cluster.

**CRS-00472: Node name is not found**
**Cause:** Cluster Services is unable to retrieve the node name.
**Action:** Verify your cluster installation, including any vendor cluster ware. If necessary reinstall the cluster.

**CRS-00700: Oracle High Availability Service aborted due to failure to allocate memory. Details at string in string.**
**Cause:** Memory allocation failed.
Action: Restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00701: Oracle High Availability Service aborted due to failure to obtain identity of the running process. Details at string in string.
Cause: Failed to retrieve user id.
Action: Check <crs_home> owner and restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00702: Oracle High Availability Service aborted due to failure to run as privileged user. Details at string in string.
Cause: Oracle High Availability Service was not running as privileged user.

CRS-00703: Oracle High Availability Service aborted due to failure to initialize the communication context. Details at string in string.
Cause: The network layer initialization failed.
Action: Restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00704: Oracle High Availability Service aborted due to Oracle Local Registry error [string]. Details at string in string.
Cause: Oracle Local Registry aborted with an error. Look at the associated error message to determine the underlying issue.
Action: Solve the underlying issue and restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00708: Oracle High Availability Service aborted due to failure to retrieve ORA_CRS_HOME environment variable. Details at string in string.
Cause: An environment variable required by Oracle High Availability Service failed to be set at initialization.

CRS-00709: Oracle High Availability Service aborted due to failure to initialize ORA_CRS_HOME path. Details at string in string.
Cause: Oracle High Availability Service ORA_CRS_HOME path could not be initialized.
Action: Check for execute permissions on the Grid Infrastructure home or <crs_home> and restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00712: Oracle High Availability Service aborted due to failure to initialize the network layer with error [number]. Details at string in string.
Cause: The network layer initialization failed.
Action: Restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00713: An error occurred initializing the Reboot Advisory Monitor: error code [number]. Details at string in string.
Cause: An error occurred initializing the Reboot Advisory Monitor component of Oracle High Availability Service. This error is not fatal; Oracle High Availability Service processing continues.
Action: Examine the Clusterware alert log for messages providing details of the error. If the error is correctable, do so and then restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If no messages are found or you do not understand how to correct the problem, contact Oracle Support Services.

CRS-00800: Cluster Ready Service aborted due to failure to allocate memory. Details at string in string.
Cause: Memory allocation failed.
Action: Restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00801: Cluster Ready Service aborted due to failure to obtain identity of the running process. Details at string in string.
Cause: Failed to retrieve user id.
Action: Check <crs_home> owner and restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00802: Cluster Ready Service aborted due to failure to run as privileged user. Details at string in string.
Cause: Cluster Ready Service was not running as privileged user.

CRS-00803: Cluster Ready Service aborted due to failure to initialize the communication context. Details at string in string.
Cause: The network layer initialization failed.
Action: Restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00804: Cluster Ready Service aborted due to Oracle Cluster Registry error [string]. Details at string in string.
Cause: Oracle Cluster Registry aborted with an error. Look at the associated error message to determine the underlying issue.
Action: Solve the underlying issue and restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00805: Cluster Ready Service aborted due to failure to communicate with Cluster Synchronization Service with error [number]. Details at string in string.
Cause: The Cluster Synchronization Service is unreachable.
Action: Restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00806: Cluster Ready Service aborted due to failure to retrieve the local node name. Details at string in string.
Cause: The Cluster Synchronization Service node name is not accessible.
Action: Restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00807: Cluster Ready Service aborted due to failure to check version compatibility. Details at string in string.
Cause: Oracle Cluster Registry content is not compatible with this version of Cluster Ready Service.
Action: Start the correct version of Cluster Ready Service. If the problem persists, contact Oracle Support Services.

CRS-00808: Cluster Ready Service aborted due to failure to retrieve ORA_CRS_HOME environment variable. Details at string in string.
Cause: An environment variable required by Cluster Ready Service failed to be set at initialization.

CRS-00809: Cluster Ready Service aborted due to failure to initialize ORA_CRS_HOME path. Details at string in string.
Cause: Cluster Ready Service ORA_CRS_HOME path could not be initialized.
Action: Check for execute permissions on the Grid Infrastructure home or <crs_home> and restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00810: Cluster Ready Service aborted due to failure to communicate with Event Management Service with error [number]. Details at string in string.
Cause: The Event Management Service is unreachable.
Action: Restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00811: Cluster Ready Service aborted due to failure to build dependency graph. Details at string in string.
Cause: There exists inconsistencies in the resources dependencies.
Action: Check the resources dependencies and restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00812: Cluster Ready Service aborted due to failure to initialize the network layer with error [number]. Details at string in string.
Cause: The network layer initialization failed.
Action: Restart Cluster Ready Service using ‘crsctl stop crs -f’ followed by ‘crsctl start crs’. If the problem persists, contact Oracle Support Services.

CRS-00813: Cluster Ready Service aborted due to failure to initialize the network layer with error [string]. Details at string in string.
Cause: The network layer initialization failed.
**Action:** Restart Cluster Ready Service using `crsctl stop crs -f` followed by `crsctl start crs`. If the problem persists, contact Oracle Support Services.

**CRS-00814:** Cluster Ready Service aborted due to failure to start thread with error number. Details at string in string.

**Cause:** Thread creation failed.

**Action:** Restart Cluster Ready Service using `crsctl stop crs -f` followed by `crsctl start crs`. If the problem persists, contact Oracle Support Services.

**CRS-01001:** The OCR was formatted using version number.

**Cause:** Successfully formatted the OCR location(s).

**Action:** None

**CRS-01002:** The OCR was restored from file string.

**Cause:** The OCR was successfully restored from a backup file as requested by the user.

**Action:** None

**CRS-01003:** The OCR format was downgraded to version number.

**Cause:** The OCR was successfully downgraded to an earlier block format as requested by the user.

**Action:** None

**CRS-01004:** The OCR was imported from string.

**Cause:** Successfully imported the OCR contents from a file as requested by the user.

**Action:** None

**CRS-01005:** The Oracle Clusterware upgrade was completed. Version has changed from [number, string] to [number, string]. Details in string.

**Cause:** The Oracle Clusterware was successfully upgraded to a version.

**Action:** None

**CRS-01006:** The OCR location string is inaccessible. Details in string.

**Cause:** An error occurred while accessing the OCR.

**Action:** Use the ocrcheck command to validate the accessibility of the device and its block integrity. Check that the OCR location in question has the correct permissions. Determine whether this behavior is limited to one node or whether it occurs across all of the nodes in the cluster. Use the ocrconfig command with the -replace option to replace the OCR location.

**CRS-01007:** The OCR/OCR mirror location was replaced by string.

**Cause:** The OCR location was successfully replaced as requested by the user.

**Action:** None

**CRS-01008:** Node string is not responding to OCR requests. Details in string.

**Cause:** Error in communicating to the OCR server on a peer node. This OCR did not receive a notification regarding its peer’s death within the specified time.

**Action:** Contact Oracle Customer Support.

**CRS-01009:** The OCR configuration is invalid. Details in string.
Cause: The OCR configuration on this node does not match the OCR configuration on the other nodes in the cluster.

Action: Determine the OCR configuration on the other nodes in the cluster on which Oracle Clusterware is running by using the ocrcheck command. Run the ocrconfig command with the -repair option to correct the OCR configuration on this node.

CRS-01010: The OCR mirror location string was removed.
Cause: The OCR location was successfully removed as requested by the user.
Action: None

CRS-01011: OCR cannot determine that the OCR content contains the latest updates.
Details in string.
Cause: The OCR could not be started. The OCR location configured on this node does not have the necessary votes and might not have the latest updates.
Action: Ensure that the other nodes in the cluster have the same OCR location configured. If the configuration on the other nodes in the cluster does not match, then run the ocrconfig command with the -repair option to correct the configuration on this node. If the configurations on all of the nodes match, use the ocrdump command to ensure that the existing OCR location has the latest updates. Run the ocrconfig command with the -overwrite option to correct the problem. If these procedures do not correct the problem, then contact Oracle Customer Support.

CRS-01012: The OCR service started on node string.
Cause: The OCR was successfully started.
Action: None

CRS-01013: The OCR location in an ASM disk group is inaccessible. Details in string.
Cause: An error occurred while accessing the OCR file in an ASM disk group.
Action: Use the 'asmcmd' command to verify if the ASM instance is active. If the ASM instance aborted, it will be restarted automatically. Use 'ocrcheck -config' to discover the OCR locations configured, and verify using 'asmcmd' that the disk group in question is mounted. Mount the disk group if it is not mounted. Validate if the behavior is limited to one node or whether it occurs across all of the nodes in the cluster. If nothing works, use the 'ocrconfig' command with the '-replace' or '-delete' option to replace or remove the OCR location.

CRS-01014: Failed to import Oracle Cluster Registry from file string
Cause: Unable to read data from the import file and import to the cluster registry
Action: Check availability of the cluster registry and the details of the failure from the log file

CRS-01015: A request to terminate the Cluster Ready Service on node string completed successfully. Details at string in string.
Cause: The Cluster Ready Service on the above listed node did not respond to an earlier request within the specified time. The Cluster Ready Service will be terminated to prevent any possible cluster hangs.
Action: Check the Oracle Clusterware alert log on the listed node for any problems. Check for any reason that might not allow the Cluster Ready Service to run optimally on the listed node. Verify network accessibility to the listed node
from other nodes in the cluster. If the problem persists, contact Oracle Support Services.

CRS-01016: The Cluster Ready Service on this node terminated because it detected a failure while upgrading the Oracle Cluster Registry format. Details at string in string.

**Cause:** The Cluster Ready Service on the node coordinating the upgrade of the Oracle Cluster Registry format terminated.

**Action:** The Oracle Cluster Registry format upgrade will be completed by another node in the cluster. The Cluster Ready Service on the node listed above will be automatically restarted, and will be able to function as soon as the upgrade completes. If the problem persists, contact Oracle Support Services.

CRS-01017: The Cluster Ready Service on this node terminated because it was unable to open the import file while upgrading the Oracle Cluster Registry format. Details at string in string.

**Cause:** There was a failure accessing the import file on this node. The Cluster Ready Service on this node may not have been active during the Oracle Cluster Registry format upgrade.

**Action:** The Oracle Cluster Registry format upgrade will be completed by another node in the cluster. The Cluster Ready Service on this node will be automatically restarted, and will be able to function as soon as the upgrade completes. If the problem persists, contact Oracle Support Services.

CRS-01018: The Cluster Ready Service on this node terminated because the OCR configuration on this node is invalid. Details at string in string.

**Cause:** The OCR configuration on this node did not match with the OCR configuration on the other nodes in the cluster.

**Action:** The OCR configuration on this node is automatically repaired and the Cluster Ready Service will be automatically restarted. If the problem persists, contact Oracle Support Services.

CRS-01019: The OCR Service exited on host string. Details in string

**Cause:** The OCR Service exited due to an internal error.

**Action:** Determine whether the service has restarted. Collect Clusterware alert log and the CRSD log indicated in the message and contact Oracle Support Services.

CRS-01110: The Oracle Clusterware upgrade is in unknown state [number].

**Cause:** There was an internal error upgrading the Oracle Clusterware.

**Action:** Retry the ‘crsctl set crs activeversion’ command. If the problem persists, contact Oracle Support Services.

CRS-01111: Error upgrading the Oracle Clusterware. Details [string].

**Cause:** There was an internal error upgrading the Oracle Clusterware.

**Action:** Verify using the ‘crsctl check crs’ command that the CRS Service running. Retry the ‘crsctl set crs activeversion’ command. If the problem persists, contact Oracle Support Services.

CRS-01112: Failed to set the Oracle Clusterware operating version string

**Cause:** There was an internal error upgrading the Oracle Clusterware.

**Action:** Retry the ‘crsctl set crs activeversion’ command. If the problem persists, contact Oracle Support Services.
CRS-01114: Invalid active version [string] passed
  Cause: An invalid active version was passed.
  Action: Use the 'crsctl query crs softwareversion' command to retrieve a valid active version.

CRS-01115: Oracle Clusterware has already been upgraded.
  Cause: Oracle Clusterware is already running in highest possible operating version.
  Action: None

CRS-01116: Oracle Clusterware upgrade has been aborted.
  Cause: One of the Oracle Clusterware components have failed to upgrade within the expected time.
  Action: Check the Oracle Clusterware alert log and the CRS daemon log for additional information.

CRS-01117: Error upgrading the Oracle Clusterware.
  Cause: An attempt was made to change the Oracle Clusterware operating version before all nodes were upgraded.
  Action: Run root.sh script on all nodes in the cluster. If the problem persists, contact Oracle Support Services.

CRS-01201: CRSD started on node string.
  Cause: CRSD has started, possibly due to a CRS start, or a node reboot or a CRSD restart.
  Action: None Required. You can run the command 'crsctl check crsd' to validate the health of the CRSD.

CRS-01202: CRSD aborted on node string. Error [string]. Details in string.
  Cause: Fatal Internal Error. Check the CRSD log file to determine the cause.
  Action: Determine whether the CRSD gets auto-started.

CRS-01203: Failover failed for the CRS resource string. Details in string.
  Cause: Failover failed due to an internal error. Examine the contents of the CRSD log file to determine the cause.
  Action: None

CRS-01204: Recovering CRS resources for node string.
  Cause: CRS resources are being recovered, possibly because the cluster node is starting up online.
  Action: Check the status of the resources using the 'crsctl status resource' command.

CRS-01205: Auto-start failed for the CRS resource string. Details in string.
  Cause: This message comes up when the auto-start for the resource has failed during a reboot of the cluster node.
  Action: Start the resources using the 'crsctl start resource' command.

CRS-01206: Resource string is in the UNKNOWN state. Make sure the resource is completely stopped, then use the 'crsctl stop -f' command.
  Cause: Resource went into an unknown state because the check or the stop
**Action:** Make sure the resource is completely stopped, then use the 'crsctl stop -f' command.

**CRS-01207:** There are no more restart attempts left for resource *string*. Restart the resource manually using the crsctl command.

**Cause:** The Oracle Clusterware is no longer attempting to restart the resource because the resource has failed and the Oracle Clusterware has exhausted the maximum number of restart attempts.

**Action:** Use the 'crsctl start' command to restart the resource manually.

**CRS-01208:** Cluster Ready Service terminating, unable to start successfully. Details at *string* in *string*.

**Cause:** Cluster Ready Service could not initialize successfully.

**Action:** Restart Cluster Ready Service using the command 'crsctl start clusterware'. If the problem persists, contact Oracle Support Services.

**CRS-01209:** Cluster Ready Service terminating, failed to register with group 'string'. Details at *string* in *string*.

**Cause:** Cluster Ready Service could not initialize successfully.

**Action:** Restart Cluster Ready Service using the command 'crsctl start clusterware'. If the problem persists, contact Oracle Support Services.

**CRS-01210:** Cluster Ready Service failed to update group data. Details at *string* in *string*.

**Cause:** Cluster Ready Service failed to update the group private data with new master.

**Action:** Restart Cluster Ready Service using the command 'crsctl start clusterware'. If the problem persists, contact Oracle Support Services.

**CRS-01211:** Cluster Ready Service noticed abnormal termination by Cluster Synchronization Service. Details at *string* in *string*.

**Cause:** Cluster Ready Service terminating due to abnormal termination of Cluster Synchronization Service layer.

**Action:** Contact Oracle Support Services.

**CRS-01212:** Cluster Ready Service received invalid update for group private data. Details at *string* in *string*.

**Cause:** This is an internal error.

**Action:** Contact Oracle Support Services.

**CRS-01213:** Cluster Ready Service failed to retrieve user information. Details at *string* in *string*.

**Cause:** This is an internal error.

**Action:** Contact Oracle Support Services.

**CRS-01214:** Cluster Ready Service failed to initialize OLR context. Details at *string* in *string*.

**Cause:** Cluster Ready Service unable to access local registry.

**Action:** Use the ocrcheck utility to detect errors in the OLR. If problems exist, the registry may need to be recovered or restored.

**CRS-01215:** Cluster Ready Service could not get the local node number. Details at *string* in *string*.
Cause: Cluster Ready Service could not retrieve the local node incarnation number.
Action: Contact Oracle Support Services.

CRS-01216: Cluster Ready Service could not determine node list. Details at string in string.
Cause: This is an internal error.
Action: Contact Oracle Support Services.

CRS-01217: Cluster Ready Service unable to get node name. Details at string in string.
Cause: Cluster Ready Service could not determine node name.
Action: Contact Oracle Support Services.

CRS-01218: Cluster Ready Service error during initialization. Details at string in string.
Cause: Cluster Ready Service could not initialize underlying layers successfully.
Action: Contact Oracle Support Services.

CRS-01219: Cluster Synchronization Service not available. Details at string in string.
Cause: Cluster Ready Service was unable to initialize access to CSS, which is required.
Action: Contact Oracle Support Services.

CRS-01220: Cluster Ready Service could not retrieve local node number. Details at string in string.
Cause: Cluster Ready Service could not retrieve node number for local node.
Action: Contact Oracle Support Services.

CRS-01221: Cluster Ready Service failed to retrieve local node name. Details at string in string.
Cause: Cluster Ready Service could not retrieve node name.
Action: Contact Oracle Support Services.

CRS-01222: Cluster Ready Service failed to retrieve maximum group size. Details at string in string.
Cause: Cluster Ready Service could not retrieve value for maximum group size.
Action: Contact Oracle Support Services.

CRS-01223: Cluster Ready Service error while reading cluster active version. Details at string in string.
Cause: Could not retrieve cluster active version.
Action: Contact Oracle Support Services.

CRS-01224: Server authentication exception encountered, exception text is 'string'. Details at string in string.
Cause: Cluster Ready Service encountered error while authenticating user.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01225: Invalid identity exception encountered, exception text is 'string'. Details at string in string.
Cause: Cluster Ready Service could not verify user identity.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01226: Failed to create message to send to policy engine. Details at string in string.
Cause: Cluster Ready Service encountered communication error.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01227: Error during initialization of communication subsystem. Details at string in string.
Cause: Cluster Ready Service encountered communication error during initialization.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01228: Error while setting up user interface server. Details at string in string.
Cause: Cluster Ready Service encountered communication error.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01229: Error while listening for events. Details at string in string.
Cause: Cluster Ready Service encountered communication error.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01231: Failed to open key 'string' in OCR. Details at string in string.
Cause: This is an internal error.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01232: Could not get security attribute for system key 'string' in OCR. Details at string in string.
Cause: Encountered error while reading system key attributes in OCR.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01233: Failed to initialize batch handler for OCR. Details at string in string.
Cause: Could not initialize batch handler for multiwrite in OCR.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01234: Encountered error while setting key value for key 'string' in OCR. Details at string in string.
Cause: Encountered an error while executing a batch write in OCR.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01235: Error while executing batch for multi writes in OCR. Details at string in string.
Cause: Encountered an error while executing a batch write in OCR.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01236: Error enumerating subkeys for key 'string' in OCR. Details at string in string.
Cause: Encountered an error while reading subkey values in OCR.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01237: Failed to retrieve the maximum value supported in OCR. Details at string in string.
Cause: Could not read the maximum value size from registry.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01238: Failed to add a delete key operation for key 'string' to a batch in OCR.
   Details at string in string.
   Cause: Encountered internal error while deleting key in OCR.
   Action: This is an internal error. Contact Oracle Support Services.

CRS-01239: Cluster Ready Service aborted due to an unexpected error [string].
   Details at string in string.
   Cause: This is an unexpected error. Look at the associated error message to fix the underlying issue.
   Action: If the problem persists, contact Oracle Support Services.

CRS-01301: Oracle High Availability Service started on node string.
   Cause: Oracle High Availability Service has started, possibly due to a Clusterware start, or a node reboot.
   Action: None Required.

CRS-01302: Oracle High Availability Service aborted on node string. Error [string].
   Details in string.
   Cause: Fatal Internal Error. Check the Oracle High Availability Service log file to determine the cause.
   Action: Determine whether the Oracle High Availability Service gets auto-started.

CRS-01303: Failover failed for the OHAS resource string. Details in string.
   Cause: Failover processing for the specified resource did not complete. Examine the contents of the Oracle High Availability Service log file to determine the cause.
   Action: None

CRS-01304: Recovering OHAS resources for node string.
   Cause: Oracle High Availability Service resources are being recovered, possibly because the cluster node is starting up online.
   Action: Check the status of the resources using the crsctl command.

CRS-01305: Auto-start failed for the OHAS resource string. Details in string.
   Cause: This message comes up when the auto-start for the resource has failed during a reboot of the cluster node.
   Action: Start the resources using the 'crsctl start resource' command.

CRS-01306: Resource string is in an unknown state. Make sure the resource is completely stopped, then use the 'crsctl stop -f' command.
   Cause: Resource went into an unknown state because the check or the stop
   Action: Make sure the resource is completely stopped, then use the 'crsctl stop -f' command.

CRS-01307: There are no more restart attempts left for resource string. Restart the resource manually using the crsctl command.
   Cause: The Oracle Clusterware is no longer attempting to restart the resource because the resource has failed and the Oracle Clusterware has exhausted the maximum number of restart attempts.
   Action: Use the 'crsctl start resource' command to restart the resource manually.
CRS-01308: Oracle High Availability Service terminating, unable to start successfully. Details at string in string.
Cause: Oracle High Availability Service could not initialize successfully.
Action: Restart your clusterware installation. If the problem persists, contact Oracle Support Services.

CRS-01309: Oracle High Availability Service terminating, failed to register with group 'string'. Details at string in string.
Cause: Oracle High Availability Service could not initialize successfully.
Action: Restart your clusterware installation. If the problem persists, contact Oracle Support Services.

CRS-01310: Oracle High Availability Service failed to update group data. Details at string in string.
Cause: Oracle High Availability Service failed to update the group private data with new master.
Action: Restart your clusterware installation. If the problem persists, contact Oracle Support Services.

CRS-01311: Oracle High Availability Service noticed abnormal termination by Cluster Synchronization Service. Details at string in string.
Cause: Oracle High Availability Service terminating due to abnormal termination of Cluster Synchronization Service layer.
Action: Contact Oracle Support Services.

CRS-01312: Oracle High Availability Service received invalid update for group private data. Details at string in string.
Cause: This is an internal error.
Action: Contact Oracle Support Services.

CRS-01313: Oracle High Availability Service failed to retrieve user information. Details at string in string.
Cause: This is an internal error.
Action: Contact Oracle Support Services.

CRS-01314: Oracle High Availability Service failed to initialize OLR context. Details at string in string.
Cause: Oracle High Availability Service unable to access local registry.
Action: Use the ocrcheck utility to detect errors in the OLR. If problems exist, the registry may need to be recovered or restored.

CRS-01315: Oracle High Availability Service could not get the local node number. Details at string in string.
Cause: Oracle High Availability Service could not retrieve the local node incarnation number.
Action: Contact Oracle Support Services.

CRS-01316: Oracle High Availability Service could not determine node list. Details at string in string.
Cause: This is an internal error.
Action: Contact Oracle Support Services.
CRS-01317: Oracle High Availability Service unable to get node name. Details at string in string.
Cause: Oracle High Availability Service could not determine node name.
Action: Contact Oracle Support Services.

CRS-01318: Oracle High Availability Service error during initialization. Details at string in string.
Cause: Oracle High Availability Service could not initialize underlying layers successfully.
Action: Contact Oracle Support Services.

CRS-01319: Cluster Synchronization Service not available. Details at string in string.
Cause: Oracle High Availability Service was unable to initialize access to CSS, which is required.
Action: Contact Oracle Support Services.

CRS-01320: Oracle High Availability Service could not retrieve local node number. Details at string in string.
Cause: Oracle High Availability Service could not retrieve node number for local node.
Action: Contact Oracle Support Services.

CRS-01321: Oracle High Availability Service failed to retrieve local node name. Details at string in string.
Cause: Oracle High Availability Service could not retrieve node name.
Action: Contact Oracle Support Services.

CRS-01322: Oracle High Availability Service failed to retrieve maximum group size. Details at string in string.
Cause: Oracle High Availability Service could not retrieve value for maximum group size.
Action: Contact Oracle Support Services.

CRS-01323: Oracle High Availability Service error while reading cluster active version. Details at string in string.
Cause: Could not retrieve cluster active version.
Action: Contact Oracle Support Services.

CRS-01324: Server authentication exception encountered, exception text is 'string'. Details at string in string.
Cause: Oracle High Availability Service encountered error while authenticating user.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01325: Invalid identity exception encountered, exception text is 'string'. Details at string in string.
Cause: Oracle High Availability Service could not verify user identity.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01326: Failed to create message to send to policy engine. Details at string in string.
Cause: Oracle High Availability Service encountered communication error.
**Action**: This is an internal error. Contact Oracle Support Services.

**CRS-01327**: Error during initialization of communication subsystem. Details at *string in string*.

**Cause**: Oracle High Availability Service encountered communication error during initialization.

**Action**: This is an internal error. Contact Oracle Support Services.

**CRS-01328**: Error while setting up user interface server. Details at *string in string*.

**Cause**: Oracle High Availability Service encountered communication error.

**Action**: This is an internal error. Contact Oracle Support Services.

**CRS-01329**: Error while listening for events. Details at *string in string*.

**Cause**: Oracle High Availability Service encountered communication error.

**Action**: This is an internal error. Contact Oracle Support Services.

**CRS-01330**: Oracle High Availability Services aborted due to internal error.

**Cause**: Fatal Internal Error. Check the Oracle High Availability Service log file to determine the cause.

**Action**: Determine whether the Oracle High Availability Service gets auto-started.

**CRS-01331**: Failed to open key *'string'* in OLR. Details at *string in string*.

**Cause**: This is an internal error.

**Action**: This is an internal error. Contact Oracle Support Services.

**CRS-01332**: Could not get security attribute for system key *'string'* in OLR. Details at *string in string*.

**Cause**: Encountered error while reading system key attributes in OLR.

**Action**: This is an internal error. Contact Oracle Support Services.

**CRS-01333**: Failed to initialize batch handler for OLR. Details at *string in string*.

**Cause**: Could not initialize batch handler for multiwrite in OLR.

**Action**: This is an internal error. Contact Oracle Support Services.

**CRS-01334**: Encountered error while setting key value for key *'string'* in OLR. Details at *string in string*.

**Cause**: Encountered an error while executing a batch write in OLR.

**Action**: This is an internal error. Contact Oracle Support Services.

**CRS-01335**: Error while executing batch for multi writes in OLR. Details at *string in string*.

**Cause**: Encountered an error while executing a batch write in OLR.

**Action**: This is an internal error. Contact Oracle Support Services.

**CRS-01336**: Error enumerating subkeys for key *'string'* in OLR. Details at *string in string*.

**Cause**: Encountered an error while reading subkey values in OLR.

**Action**: This is an internal error. Contact Oracle Support Services.

**CRS-01337**: Failed to retrieve the maximum value supported in OLR. Details at *string in string*.

**Cause**: Could not read the maximum value size from registry.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01338: Failed to add a delete key operation for key 'string' to a batch in OLR. Details at string in string.
Cause: Encountered internal error while deleting key in OLR.
Action: This is an internal error. Contact Oracle Support Services.

CRS-01339: Oracle High Availability Service aborted due to an unexpected error [string]. Details at string in string.
Cause: Look at the associated error message to fix the underlying issue.
Action: If the problem persists, contact Oracle Support Services.

CRS-01401: EVMD started on node string.
Cause: EVMD has started either because of a CRS start, a node reboot, or an EVMD restart.
Action: None required. You can run the 'crsctl check evmd' command to validate the health of EVMD.

CRS-01402: EVMD aborted on node string. Error [string]. Details in string.
Cause: EVMD has aborted due to an internal error. Check the EVMD log file to determine the cause.
Action: Determine whether the EVMD is auto-started and contact Oracle Support Services.

CRS-01403: The Event Management Service terminated on node string. Listening port number is in use by another application. Details in string.
Cause: The Event Management Service has aborted because the configured listening port is being used by another application on this node.
Action: Make the listening port listed above available. Restart the Event Management Service using 'crsctl start crs' or 'crsctl start cluster' command.

CRS-01601: CSSD Reconfiguration complete. Active nodes are string.
Cause: A node joined or left the cluster.
Action: None

CRS-01602: CSSD aborted on node string. Error [string]; details in string.
Cause: The CSS daemon aborted on the listed node with the listed return code.
Action: Collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.

CRS-01603: CSSD on node string shutdown by user.
Cause: The CSS daemon on the listed node was terminated by a user.
Action: None

CRS-01604: CSSD voting file is offline: string; details at string in string.
Cause: The listed voting file became unusable on the local node.
Action: Verify that the filesystem containing the listed voting file is available on the local node.

CRS-01605: CSSD voting file is online: string; details in string.
Cause: The CSS daemon has detected a valid configured voting file.
Action: None
CRS-01606: The number of voting files available, *number*, is less than the minimum number of voting files required, *number*, resulting in CSSD termination to ensure data integrity; details at *string in string*.

**Cause:** The number of voting files has decreased to a number of files that is insufficient.

**Action:** as indicated by those messages.

CRS-01607: Node *string* is being evicted in cluster incarnation *number*; details at *string in string*.

**Cause:** The local node has detected that the indicated node is still active, but not able to communicate with this node, so is forcibly removing the indicated node from the cluster.

**Action:** Collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.

CRS-01608: This node was evicted by node *number, string*; details at *string in string*.

**Cause:** The local node was evicted by the indicated node.

**Action:** Collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.

CRS-01609: This node is unable to communicate with other nodes in the cluster and is going down to preserve cluster integrity; details at *string in string*.

**Cause:** Communication was lost with some nodes of the cluster and this node detected that another sub-cluster was designated to be the surviving sub-cluster. This node went down to preserve data integrity.

**Action:** Verify all network connections between cluster nodes and repair any problematic connections. If there do not appear to be any network problems,

1. collect the CSS daemon logs, system messages and any CSS daemon core files from all nodes and
2. contact Oracle Support.

CRS-01610: Network communication with node *string* (*number*) missing for 90% of timeout interval. Removal of this node from cluster in *number* seconds.

**Cause:** Did not receive heartbeat messages from the node. This could be due to network problems or failure of the listed node.

**Action:** Check if the private interconnect network used by cluster is functioning properly, including all the cables, network cards, switches/routers etc. between this node and listed node. Correct any problems discovered.

CRS-01611: Network communication with node *string* (*number*) missing for 75% of timeout interval. Removal of this node from cluster in *number* seconds.

**Cause:** Did not receive heartbeat messages from the node. This could be due to network problems or failure of the listed node.

**Action:** Check if the private interconnect network used by cluster is functioning properly, including all the cables, network cards, switches/routers etc. between this node and listed node. Correct any problems discovered.

CRS-01612: Network communication with node *string* (*number*) missing for 50% of timeout interval. Removal of this node from cluster in *number* seconds.

**Cause:** Did not receive heartbeat messages from the node. This could be due to network problems or failure of the listed node.
Action: Check if the private interconnect network used by cluster is functioning properly, including all the cables, network cards, switches/routers etc. between this node and listed node. Correct any problems discovered.

CRS-01613: No I/O has completed after 90% of the maximum interval. Voting file \textit{string} will be considered not functional in \textit{number} milliseconds

Cause: Voting device I/O has not completed for a long time. This could be due to some error with the device the voting file is on or in some element in the path of the I/O to the device.

Action: Verify that the device is working properly including all elements in the I/O path. The voting file listed will be considered inactive in the number of milliseconds specified. Failure of a majority of devices will result in node reboot.

CRS-01614: No I/O has completed after 75% of the maximum interval. Voting file \textit{string} will be considered not functional in \textit{number} milliseconds

Cause: Voting device I/O has not completed for a long time. This could be due to some error with the device the voting file is on or in some element in the path of the I/O to the device.

Action: Verify that the device is working properly including all elements in the I/O path. The voting file listed will be considered inactive in the number of milliseconds specified. Failure of a majority of devices will result in node reboot.

CRS-01615: No I/O has completed after 50% of the maximum interval. Voting file \textit{string} will be considered not functional in \textit{number} milliseconds

Cause: Voting device I/O has not completed for a long time. This could be due to some error with the device the voting file is on or in some element in the path of the I/O to the device.

Action: Verify that the device is working properly including all elements in the I/O path. The voting file listed will be considered inactive in the number of milliseconds specified. Failure of a majority of devices will result in node reboot.

CRS-01616: The BMC device used for IPMI at IP address \textit{string} is not properly configured for ADMIN access; details at \textit{string in string}

Cause: The IPMI BMC is not configured to support the ADMIN access methods required by Oracle Clusterware.

Action: Consult the clusterware admin manual for proper procedures in configuring BMC. Use the BMC configuration tool (ipmitool or ipmiutil) command to check and verify that the current configuration supports either MD5 or password validation for ADMIN access.

CRS-01617: The information required to do node kill for node \textit{string} is incomplete; details at \textit{string in string}

Cause: Incomplete config information stored in Cluster Registry for node kill.

Action: Make sure all the information pertaining to the node kill method

CRS-01618: The requested node kill information change could not be validated by node \textit{string}; details at \textit{string in string}

Cause: Unable to validate the node kill information for this node.

Action: Additional information can be found in the CRS alert log of the node that performed the validation.

CRS-01619: The node kill information of node \textit{string} could not be validated by this node due to failure in connecting to the IPMI device; details at \textit{string in string}
Cause: Unable to validate the node kill information for this node.
Action: Additional information can be found in the CSSD logs.

CRS-01620: The node kill information of node string could not be validated by this node due to invalid authorization information; details at string in string
Cause: Unable to validate the kill information for this node.
Action: Additional information can be found in the CSSD logs.

CRS-01621: The IPMI configuration data for this node stored in the Oracle registry is incomplete; details at string in string
Cause: All the necessary information such as IPMI username, password and IP address are not present.
Action: Make sure all the information (BMC IPMI username, password and IP address) are present. Use commands 'crsctl set css ipmiaddr' and 'crsctl set css ipmiadmin' for this.

CRS-01622: The IPMI node kill information could not be validated due to inability to connect to the IPMI device at BMC IP address provided string; details at string in string
Cause: Unable to validate the BMC IPMI IP address provided.
Action: Additional information can be found in the CSSD logs.

CRS-01623: The IPMI node kill information of BMC at IP address string could not be validated due to invalid authorization information. The BMC username provided is 'string'; details at string in string
Cause: Unable to validate the BMC IPMI UserName and password provided.
Action: Additional information can be found in the CSSD logs.

CRS-01624: The requested Node kill information change succeeds vacuously because there is no other node in cluster to validate.
Cause: Unable to validate the credentials because this is the sole node in the cluster.
Action: To complete the validation, shut down the clusterware stack on this node, start another node and restart the stack on this node.

CRS-01625: Node string, number number, was manually shut down
Cause: A Clustware stack shutdown command was issued for a node in the cluster and was observed by this node.
Action: None required.

CRS-01626: A Configuration change request completed successfully
Cause: A Configuration change request completed successfully.
Action: None required.

CRS-01627: A Configuration change request failed because another configuration change is in progress; Details at string in string
Cause: Another configuration change is in still in progress.
Action: Wait until the other command completes and reissue the command if necessary. Message 1626 would be printed if the command succeeds.

CRS-01628: A Configuration change request failed because read of existing voting files failed; Details at string in string
**Cause:** CSSD was not able to read the lease blocks of a majority of Voting files which is an indication of a problem with the voting files.

**Action:** Run the command `crsctl query css votedisk` to get the list of currently working voting files. User may delete problematic voting file or use a different set.

**CRS-01629:** A Configuration change request failed because write to new voting files failed; Details at `string` in `string`

**Cause:** A voting file write failed, causing the associated configuration change to fail. This often results from adding a voting file that is not accessible to one or more nodes.

**Action:** Confirm that voting files added in a configuration change are accessible and writeable from all cluster nodes. If they are, contact Oracle Customer Support.

**CRS-01630:** A configuration change request failed because not all the new voting files were discovered; Details at `string` in `string`

**Cause:** One or more of the voting files being added were not discovered. Message 1638 identifies the unique ID(s) of the file(s) that could not be found.

**Action:** Verify if the discovery string is adequate to discover the new voting files. If not, modify discovery string using command `crsctl replace discoverystring xxxx`.

**CRS-01631:** A configuration change request failed because one or more nodes are not a sufficient Clusterware version level; Details at `string` in `string`

**Cause:** One or more nodes are not a sufficient version level.

**Action:** Configuration change would not be successful until all nodes are at the latest version. Try after all the nodes are upgraded.

**CRS-01632:** Node `string` is being removed from the cluster in cluster incarnation `number`

**Cause:** The local node is removing the indicated node from the cluster because it appears to be dead.

**Action:** Verify that the node that was removed, or the Oracle Clusterware on that node, was down. The CRS alert log of the node that was removed has information regarding why the node, or clusterware on the node, was no longer active. If the node was still up and Oracle Clusterware still active on that node, collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.

**CRS-01633:** CSSD failed to register group `string` in vendor clusterware; details at `string` in `string`

**Cause:** The local node is not able to register the group of vendor clusterware.

**Action:** Verify that the vendor clusterware is installed and configured correctly.

**CRS-01634:** CSSD is unable to determine cluster name; details at `string` in `string`

**Cause:** Name of the cluster cannot be determined from configuration.

**Action:** Verify that Oracle Clusterware installation was successful.

**CRS-01635:** CSSSD failed to initialize vendor clusterware; details at `string` in `string`

**Cause:** The local node is not able to attach vendor clusterware.

**Action:** Verify that the vendor clusterware is installed and configured correctly.

**CRS-01636:** The CSS daemon was started in exclusive mode but found an active CSS daemon on node `string` and is terminating; details at `string` in `string`
Cause: The CSS daemon was started in exclusive mode, which requires that the clusterware stack is down on all other nodes to ensure data integrity. A CSS daemon was detected on another node, so the CSS daemon on this node is terminating.

Action: Stop the Oracle clusterware stack that is running on the indicated node.

CRS-01637: Unable to locate configured voting file with ID string; details at string in string
Cause: The voting file with unique the ID indicated in the message was not found during the voting file discovery phase of CSS initialization.
Action: Verify that all configured voting files are accessible on this node. Any voting files that are not accessible should be removed and replaced with accessible voting files using the appropriate 'crsctl' commands.

CRS-01638: Unable to locate voting file with ID string that is being added to the list of configured voting files; details at string in string
Cause: The voting file with the unique ID indicated in the message was not found during the voting file discovery phase of CSS initialization. This voting file is in the process of being added to the list of configured voting files.
Action: Verify that all voting files to be added are accessible on this node. Any voting files that are not accessible should be removed and replaced with accessible voting files using the appropriate 'crsctl' commands.

CRS-01639: Rejecting configuration change number: number because another configuration change is already in progress; details at string in string
Cause: A configuration change was requested, but another configuration change is already in progress and only one configuration change may be processed at a time.
Action: Wait for the current configuration change to complete, then resubmit this configuration change.

CRS-01640: Rejecting configuration change number: number because one or more new voting files in the new configuration could not be found; details at string in string
Cause: A configuration change that involved the addition of voting files is being rejected because some of the new voting files were not located.
Action: Verify that the voting file name is correct and that it is accessible on this node, if the voting files are not managed by ASM. Message number 1638 provides greater detail.

CRS-01641: Rejecting configuration change number: number because only number of the required number voting files of the new configuration were located; details at string in string
Cause: A configuration change that involved a change to the list of voting files is being rejected because a sufficient number of voting files in the new configuration could not be located.
Action: Verify that all voting files in the new configuration are accessible on this node.

CRS-01642: Node number is using a different CSS configuration from the one used by this node; this node is terminating to preserve integrity; details at string in string
Cause: Another node in the cluster is using a different set of CSS configuration values, such as misscount or voting files. Inconsistency can result in data corruption, so this node is terminating to avoid data corruption.

Action: Collect Clusterware alert log and the CSSD log indicated in the message as well as the CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01643: Failed to format the CSS voting disk string

Cause: Problems were encountered attempting to access the voting file.

Action: Verify that the voting file can be accessed, the file exists, has the proper ownership and permissions, etc.

CRS-01644: The initialization of the EXADATA fencing facility failed in start with error ORA-number; details at string in string

Cause: The start of the initialization of the EXADATA fencing facility failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01645: The initialization of the EXADATA fencing facility failed in completion with error ORA-number; details at string in string

Cause: The completion of the initialization of the EXADATA fencing facility failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01646: Creation of a EXADATA fence identifier failed with error ORA-number; details at string in string

Cause: An attempt to create an identifier for a fence to an EXADATA device failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01647: Initialization of a EXADATA fence failed with error ORA-number; details at string in string

Cause: An attempt to initiate a fence to an EXADATA device failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01648: Completion of queued EXADATA fence requests failed with error ORA-number; details at string in string

Cause: Previously queued fence requests to an EXADATA device failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01649: An I/O error occurred for voting file: string; details at string in string.

Cause: The listed voting file became inaccessible.

Action: Verify that the filesystem containing the listed voting file is available on the local node.

CRS-01650: Configuration change number:number rejected by node number string; details at string in string

Cause: A new configuration change request from this node was not accepted due to another node rejecting the change.
**Action:** Check the CRS alert log of the node rejecting this configuration change for more details.

**CRS-01651: Configuration change number rejected because it would make the active version of node number lower than the current setting string of this node; details at string in string**

- **Cause:** A new configuration change request from another node was not accepted because the new Active Version in the request is lower than this node's Active Version.

- **Action:** Ensure that the new Active Version is not lower than the current Active Version of the nodes in the cluster.

**CRS-01652: Starting clean up of CRSD resources.**

- **Cause:** Clean up of the resources registered in CRSD started.

- **Action:** None

**CRS-01653: The clean up of the CRSD resources failed.**

- **Cause:** Clean up of the resources registered in CRSD failed.

- **Action:** Check the CRS alert log.

**CRS-01654: Clean up of CRSD resources finished successfully.**

- **Cause:** Clean up of the resources registered in CRSD finished.

- **Action:** None

**CRS-01655: CSSD on node string detected a problem and started to shutdown.**

- **Cause:** The CSS daemon on the listed node detected a problem and started to shutdown.

- **Action:** Check the CRS alert log.

**CRS-01656: The CSS daemon is terminating due to a fatal error; Details at string in string**

- **Cause:** A fatal error occurred during CSS daemon processing.

- **Action:** Check for prior errors logged in the alert log. Correct any errors that can be corrected. If there are no errors shown, or the errors cannot be resolved, contact Oracle Support

**CRS-01657: Unable to obtain the voting file discovery string; Details at string in string**

- **Cause:** An attempt to obtain the voting file discovery string from the profile failed, causing the CSS daemon to fail.

- **Action:** Collect the Clusterware alert log and the CSSD log of this node as well as all CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

**CRS-01658: There is a mismatch of the initial cluster incarnation among the cluster nodes; Details at string in string**

- **Cause:** An internal error occurred.

- **Action:** Collect the Clusterware alert log and the CSSD log of this node as well as all CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

**CRS-01659: An attempt to kill node string failed; Details at string in string**
Cause: To protect data integrity a node kill was attempted for the indicated node, but it failed.

Action: Collect the Clusterware alert log and the CSSD log of this node as well as the CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01660: The CSS daemon shutdown has completed
Cause: A command to shut down the CSS daemon was issued by a user and the shutdown processing is completed. The CSS daemon is terminated.
Action: No action is required.

CRS-01701: Initialization of the required component GIPC failed; details at string in string
Cause: The initialization of the communications component GIPC failed, causing the CSSD startup to fail.
Action: Collect alert log and the CSSD log indicated in the message and contact Oracle Support Services.

CRS-01702: Initialization of the required component OLR failed; details at string in string
Cause: The initialization of the local repository component OLR failed, causing the CSSD startup to fail.
Action: Collect clusterware alert log and daemon logs and contact Oracle Support Services.

CRS-01703: Initialization of the required component GPNP failed because the GPNP server daemon is not up; details at string in string
Cause: The initialization of the configuration profile service failed because the associated server is not up, causing the CSSD startup to fail.
Action: Collect clusterware alert log and daemon logs and contact Oracle Support Services.

CRS-01704: Initialization of the required component string failed; details at string in string
Cause: The initialization of a component required by the CSS daemon failed, causing the CSSD startup to fail.
Action: Collect clusterware alert log and daemon logs and contact Oracle Support Services.

CRS-01705: Found number configured voting files but number voting files are required, terminating to ensure data integrity; details at string in string
Cause: The voting file discovery was unable to locate a sufficient number of valid voting files to guarantee data integrity and is terminating to avoid potential data corruption.
Action: Delete the voting files that are no longer available, as indicated by message number 1637, using appropriate ‘crsctl’ commands, run either on another node where the clusterware stack is active, or by starting the clusterware stack in exclusive mode.

CRS-01706: Found number of number voting files in a pending configuration change but number voting files are required, terminating to ensure data integrity; details at string in string
Cause: The voting file discovery was unable to locate a sufficient number of voting files from the new configuration when a configuration change to add or delete voting files is in progress. The CSS daemon is terminating to avoid potential data corruption.

Action: Delete the voting files that are no longer available, as indicated by message number 1638, using appropriate 'crsctl' commands, run either on another node where the clusterware stack is active, or by starting the clusterware stack in exclusive mode.

CRS-01707: Lease acquisition for node string number number completed
Cause: CSSD acquired a node number through a lease acquisition procedure.
Action: None

CRS-01708: Lease acquisition failed for node string because all lease slots are in use; Details at string in string
Cause: The node failed to acquire a lease because all the lease slots were found to be occupied by other nodes.
Action: Using olsnodes command get the list of leased nodes. Delete the unused nodes using appropriate crsctl command.

CRS-01709: Lease acquisition failed for node string because no voting file has been configured; Details at string in string
Cause: At least one voting file is required for CSSD to function properly. No voting files have been configured.
Action: Add at lease one voting file using appropriate crsctl command.

CRS-01710: Lease acquisition failed for node string because CSSD failed to access majority of voting files; Details at string in string
Cause: A majority of the voting files are not accessible by a node.
Action: Delete the voting files that are no longer available, as indicated by message number 1637, using appropriate 'crsctl' commands, run either on another node where the Clusterware stack is active, or by starting the Clusterware stack in exclusive mode.

CRS-01711: Increasing the number of leases available for new nodes from number to number
Cause: All the currently available leases are being used. Hence the number of leases available are increased.
Action: None

CRS-01712: Failed to save the node number acquired for node string; Details at string in string
Cause: CSSD failed to save the node number acquired during startup. The node number is saved to speed up the subsequent startup. Hence this is not a real problem but just a performance degradation on the next startup.
Action: Collect Clusterware alert log, CSSD logs and OHASD logs indicated in the message and contact Oracle Support Services.

CRS-01713: CSSD daemon is started in string mode
Cause: CSSD has been started on the node.
Action: None
CRS-01714: Unable to discover any voting files, retrying discovery in number seconds; Details at string in string
Cause: No voting files were discovered. Possible reasons include:
- The filesystems the voting files are on are not available
- The voting files have been deleted
- The voting files are corrupted
Action: Verify that the filesystems that the voting files are on are active and that the voting files have not been damaged. If necessary, start the clusterware stack in exclusive mode using 'crsctl start crs -excl' and add voting files using 'crsctl add css votedisk'

CRS-01715: A failure occurred in the CSS daemon during initialization; Details at string in string
Cause: A fatal error occurred during the initialization of the CSS daemon.
Action: Check for prior errors logged in the alert log. Correct any errors that can be corrected. If there are no errors shown, or the errors cannot be resolved, contact Oracle Support Services

CRS-01716: The CSS daemon cannot join the cluster because the software version string is lower than the active version string; Details at string in string
Cause: The cluster has been upgraded to the active version indicated in the message, but this node is at a lower software version, as indicated in the message.
Action: Upgrade this node to the active version indicated in the message

CRS-01717: The CSS daemon has detected a voting file add during startup and is waiting for the add to complete; Details at string in string
Cause: A voting file add started on another node is in progress while this CSS daemon is starting. To avoid the potential for data corruption, the CSS daemon on this node must wait for the add to complete.
Action: This is normally a temporary condition that is automatically resolved. If the clusterware stack cannot start on any node, this condition may be corrected by starting the clusterware stack in exclusive mode using 'crsctl start crs -excl' followed by 'crsctl stop crs' on one node. This will automatically correct the condition and the clusterware can be started normally on all nodes.

CRS-01805: Unable to connect to the CSS daemon, return code number
Cause: Could not initialize the CSS connection.
Action: Verify that the CSS daemon is running and restart it if it is not up. Retry the operation.

CRS-01806: An error occurred when obtaining the node number of this host, return code number
Cause: The request for node number of this node failed.
Action: Verify that the CSS daemon is running and restart it if it is not. Retry the operation that failed after restart. Look for error messages from the CSS daemon in the alert log indicating any problems.

CRS-01807: An internal cluster configuration command failed in an OCR/OLR operation. Details at string in string.
Cause: This is an internal error.
Action: Contact Oracle Support Services.
CRS-01809: The cluster configuration command failed to open OCR or OLR key string. Details at string in string.
Cause: An expected or required piece of configuration is missing from the cluster or local registry.
Action: Use the ocrcheck utility to detect errors, and the ocrdump utility to review the registry contents. If problems exist, the registry may need to be recovered or restored. If the problem persists, contact Oracle Support Services.

CRS-02001: memory allocation error when initiating the connection
Cause: failed to allocate memory for the connection with the target process.
Action: None

CRS-02002: connection by user string to string refused
Cause: User command cannot connect to the target process.
Action: The user may not have sufficient privilege to connect.

CRS-02003: error number encountered when connecting to string
Cause: Connection to the target process failed.
Action: Examine whether the connection is made properly. Retry again at a later time if necessary.

CRS-02004: error number encountered when sending messages to string
Cause: User command cannot communicate with the target process properly.
Action: Retry again at a later time.

CRS-02005: timed out when waiting for response from string
Cause: the target process does not return acknowledgment in time.
Action: Retry again at a later time.

CRS-02006: error number encountered when receiving messages from string
Cause: no meta or response message was received from the target process.
Action: Retry again at a later time.

CRS-02007: invalid component key name <string> used
Cause: the given component key name could not be recognized.
Action: re-run the command with a valid component key name.

CRS-02008: invalid message type <number> used
Cause: an unrecognized message type was sent.
Action: Retry with a valid command again.

CRS-02009: unable to get authentication for user string
Cause: current user was not authenticated for connection.
Action: Log in as another user and try again.

CRS-02010: invalid response message from string
Cause: Response message has incorrect format.
Action: Retry again at a later time.

CRS-02011: no response at index number in response message from string
Cause: Response message did not contain a response at the specified index.
Action: If this is an unexpected result, retry again at a later time.

CRS-02012: syntax error in command
Cause: The command syntax is not valid.
Action: Issue ‘crsctl debug -h’ to see command syntax details. Watch out for ‘,’ vs. ‘;’.

CRS-02101: The OLR was formatted using version number.
Cause: Successfully formatted the OLR location(s).
Action: None

CRS-02102: The OLR was restored from file string.
Cause: The OLR was successfully restored from a backup file as requested by the user.
Action: None

CRS-02103: The OLR format was downgraded to version number.
Cause: The OLR was successfully downgraded to an earlier block format as requested by the user.
Action: None

CRS-02104: The OLR was imported from string.
Cause: Successfully imported the OLR contents from a file as requested by the user.
Action: None

CRS-02105: The OLR upgrade was completed. Version has changed from number to number. Details in string.
Cause: The OLR was successfully upgraded to a newer block format.
Action: None

CRS-02106: The OLR location string is inaccessible. Details in string.
Cause: An error occurred while accessing the OLR.
Action: Use the “ocrcheck -local” command to validate the accessibility of the device and its block integrity. Check that the OLR location in question has the correct permissions.

CRS-02112: The OLR service started on node string.
Cause: The OLR was successfully started.
Action: None

CRS-02114: Failed to import Oracle Local Registry from file string
Cause: Unable to read data from the import file and import to the local registry
Action: Check availability of the local registry and the details of the failure from the log file

CRS-02301: GPnP: string
Cause: This conveys a message from the GPnP layer to the alert log.
Action: Look up the imbedded message and respond accordingly.

CRS-02302: Cannot get GPnP profile. Error string (string).
Cause: Get GPnP profile operation failed.
**Action:** None

**CRS-02303:** GPNPD is not running on local node.
- **Cause:** GPNPD is not running on local node. GPnP request cannot be completed.
- **Action:** Make sure GPNPD is running and retry the operation.

**CRS-02304:** GPnP profile signature verification failed. *string request aborted.*
- **Cause:** GPnP profile used in GPnP request or request result does not have a valid signature.
- **Action:** If error persists, please contact Oracle Support Services.

**CRS-02305:** GPnP resource discovery (MDNSD) is not running on local node.
- **Cause:** GPnP resource discovery failed.
- **Action:** Make sure resource discovery service (MDNSD) runs on local node.

**CRS-02306:** GPnP service on host "*string*" not found.
- **Cause:** Remote GPnP service on requested host were not found in resource discovery results.
- **Action:** Make sure host is up, clusterware GPnP services (MDNSD and GPNPD) are up and running and network connection is operational.

**CRS-02310:** Fatal error: failed to initialize NZ security facility.
- **Cause:** Error occurred while initializing GPnP security component.
- **Action:** If the problem persists, contact Oracle Support Services.

**CRS-02311:** Fatal error: failed to initialize Resource Discovery. RD error: *string (number).* Make sure RD providers installed properly.
- **Cause:** Error occurred while initializing GPnP Resource Discovery (RD).
- **Action:** If the problem persists, contact Oracle Support Services.

**CRS-02312:** Fatal error: failed to initialize XDK. XDK error *string (number).*
- **Cause:** Error occurred while initializing Xml Development Kit component (XDK).
- **Action:** If the problem persists, contact Oracle Support Services.

**CRS-02313:** Fatal error: failed to initialize GIPC communication layer. GIPC error: *string (number).*
- **Cause:** Error occurred while initializing GIPC communication layer.
- **Action:** If the problem persists, contact Oracle Support Services.

**CRS-02314:** Fatal error: cannot initialize locking subsystem.
- **Cause:** Error occurred while initializing locking subsystem.
- **Action:** If the problem persists, contact Oracle Support Services.

**CRS-02315:** Fatal error: failed to initialize GPnP certkey providers.
- **Cause:** GPnP certkey provider(s) data was not found or corrupt.
- **Action:** If the problem persists, contact Oracle Support Services.

**CRS-02316:** Fatal error: cannot initialize GPnP, *string (string).*
- **Cause:** General GPnP initialization failure.
- **Action:** If the problem persists, contact Oracle Support Services.

**CRS-02317:** Fatal error: cannot get local GPnP security keys (wallet).
Cause: GPnP wallet(s) directory or files were not found or corrupt.
Action: If the problem persists, contact Oracle Support Services.

CRS-02318: GPNPD is not found.
Cause: Local GPnP service is not found.
Action: Make sure GPNPD is running.

CRS-02319: No cluster name found in GPnP profile.
Cause: Profile is invalid - it must specify a mandatory clustername parameter.
Action: Please contact Oracle Support Services.

Cause: Local GPnP setup is invalid.
Action: Please contact Oracle Support Services.

CRS-02322: Error initializing one of the GPnP profile cache providers.
Cause: Local GPnP setup is invalid.
Action: Please contact Oracle Support Services.

CRS-02323: Errors occurred while trying to push GPnP profile.
Cause: GPnP profile update partially failed.
Action: Try to repeat the update. If the problem persists, contact Oracle Support Services.

CRS-02324: Unable to get GPnP profile from requested cluster nodes.
Cause: Get GPnP profile from remote nodes failed.
Action: Try to repeat the update. If the problem persists, contact Oracle Support Services.

CRS-02325: GPNP profile is different across cluster nodes. string.
Cause: GPNP profile is different across cluster nodes.
Action: Try to repeat the update. If the problem persists, contact Oracle Support Services.

CRS-02326: GPNPD already running on node string. Terminating.
Cause: GPNP service instance is already running on node.
Action: Bring down existing GPNPD instance first.

CRS-02327: GPNPD started on node string.
Cause: GPNP service started on node.
Action: None

CRS-02328: GPNPD on node string shutdown.
Cause: GPNP service was shutdown by request.
Action: None

CRS-02329: GPNPD failed to start listening for GPnP peers.
Cause: GPNP service failed to open server endpoint.
Action: Please check GPNPD logs for the cause. If the problem persists, contact Oracle Support Services.
CRS-02331: Error getting GPnP profile from "string".
  Cause: Get remote GPnP profile from remote node operation failed.
  Action: Retry request. If the problem persists, contact Oracle Support Services.

CRS-02332: Error pushing GPnP profile to "string".
  Cause: Push GPnP profile to remote node operation failed.
  Action: Retry request. If the problem persists, contact Oracle Support Services.

CRS-02333: Could not write GPnP profile to local cache.
  Cause: GPNPD service cannot save GPnP profile to local cache.
  Action: Make sure there is at least 10MB of free disk space in Clusterware home. If the problem persists, contact Oracle Support Services.

CRS-02334: Could not delete pending GPnP profile from local cache.
  Cause: GPNPD service cannot delete GPnP profile from local cache.
  Action: If the problem persists, contact Oracle Support Services.

CRS-02335: Could not write pending GPnP profile to local cache.
  Cause: GPNPD service cannot save GPnP profile to local cache.
  Action: Make sure there is at least 10MB of free disk space in Clusterware home. If the problem persists, contact Oracle Support Services.

CRS-02340: Errors occurred while processing received gpnp message.
  Cause: Invalid GPnP message received.
  Action: Please check gpnp client and GPNPD logs for details. If the problem persists, contact Oracle Support Services.

CRS-02341: GPNPD on node string shutting down on signal number.
  Cause: GPnP service shutting down due to received signal.
  Action: Please contact your cluster administrator.

CRS-02342: GPnP messaging received error : string (string).
  Cause: GPnP message error received.
  Action: If the problem persists, contact Oracle Support Services.

CRS-02401: The Cluster Time Synchronization Service started on host string.
  Cause: The Cluster Time Synchronization Service successfully started on the listed node.
  Action: None

CRS-02402: The Cluster Time Synchronization Service aborted on host string.
  Details at string in string.
  Cause: The Cluster Time Synchronization Service aborted due to an internal error. Check the Cluster Time Synchronization Service log file to determine the cause.
  Action: Determine whether the Cluster Time Synchronization Service has auto-started.

CRS-02403: The Cluster Time Synchronization Service on host string is in observer mode.
  Cause: The Cluster Time Synchronization Service detected an active vendor time synchronization service on at least one node in the cluster.
**Action:** Oracle Clusterware requires a time synchronization service in active mode. Oracle Clusterware will work with a vendor service or the Cluster Time Synchronization Service. If you want to change the Cluster Time Synchronization Service to active mode, stop and deconfigure the vendor time synchronization service on all nodes.

**CRS-02404:** The Cluster Time Synchronization Service detects that the local time is significantly different from the mean cluster time. Details in *string*.

**Cause:** The difference between the local time and the time on the reference node was too much to be corrected.

**Action:** Shutdown the Oracle Clusterware on the local node. Adjust the clock via native platform or OS methods. Restart the Oracle Clusterware on the local node.

**CRS-02405:** The Cluster Time Synchronization Service on host *string* is shutdown by user

**Cause:** The Cluster Time Synchronization Service on listed node was terminated by a user.

**Action:** None

**CRS-02406:** The Cluster Time Synchronization Service timed out on host *string*.

**Details in string.**

**Cause:** A Cluster Time Synchronization Service action failed. The information from the reference node was discarded.

**Action:** Verify all network connections between cluster nodes and repair any problematic connections. If no network problems are found,

1. Run diagcollection.pl.
2. Contact Oracle Support Services.

**CRS-02407:** The new Cluster Time Synchronization Service reference node is host *string*.

**Cause:** A new Cluster Time Synchronization Service reference node has been elected.

**Action:** None

**CRS-02408:** The clock on host *string* has been updated by the Cluster Time Synchronization Service to be synchronous with the mean cluster time.

**Cause:** The clock was updated to be in sync with the mean cluster time.

**Action:** None

**CRS-02409:** The clock on host *string* is not synchronous with the mean cluster time. No action has been taken as the Cluster Time Synchronization Service is running in observer mode.

**Cause:** The clock was not in sync with the mean cluster time. No action has been taken as Cluster Time Synchronization Service is running in observer mode.

**Action:** Verify correct operation of the vendor time synchronization service on the node.

**CRS-02410:** The Cluster Time Synchronization Service on host *string* is in active mode.

**Cause:** The Cluster Time Synchronization Service did not detect an active vendor time synchronization service on any node in the cluster.
**Action:** None. If a vendor time synchronization service is preferred to the Cluster Time Synchronization Service, then configure and start the vendor time synchronization service on all nodes to change the Cluster Time Synchronization Service to observer mode.

**CRS-02411:** The Cluster Time Synchronization Service will take a long time to perform time synchronization as local time is significantly different from mean cluster time. Details in string.

**Cause:** The difference between the local time and the time on the reference node was too much to be synchronized in a short period.

**Action:** (Optional) Shutdown and restart the Oracle Clusterware on this node to instantaneously synchronize the time with the reference node.

**CRS-02412:** The Cluster Time Synchronization Service detects that the local time is significantly different from the mean cluster time. Details in string.

**Cause:** The difference between the local time and the time on the reference node was too large. No action has been taken as the Cluster Time Synchronization Service was running in observer mode.

**Action:** Verify correct operation of the vendor time synchronization service on the node. Alternatively, if you want to change the Cluster Time Synchronization Service to active mode, stop and deconfigure the vendor time synchronization service on all nodes.

**CRS-02413:** The Cluster Time Synchronization Service is unable to perform step time synchronization due to high network latency with the reference node. The local time is not significantly different from the mean cluster time. The Cluster Time Synchronization Service is entering slew time synchronization mode.

**Cause:** The Cluster Time Synchronization Service experienced high network latency. The local time was not significantly different from the mean cluster time; therefore, the Cluster Time Synchronization Service will maintain the system time with slew time synchronization.

**Action:** Determine the root cause of high network latency, and perform appropriate repair if necessary.

**CRS-02414:** The Cluster Time Synchronization Service is unable to perform step time synchronization due to high network latency with the reference node. The local time is significantly different from the mean cluster time. The Cluster Time Synchronization Service is aborting.

**Cause:** The Cluster Time Synchronization Service experienced high network latency. The local time was significantly different from the mean cluster time; therefore, the Cluster Time Synchronization Service is aborting.

**Action:** Shut down the Oracle Clusterware on the local node. Determine the root cause of high network latency. Perform appropriate repair if necessary, then restart the Oracle Clusterware on the local node.

**CRS-02500:** Cannot stop resource 'string' as it is not running

**Cause:** A request to stop a resource that is not running was received.

**Action:** Check the current state of the resource, it should no longer be running.

**CRS-02501:** Resource 'string' is disabled

**Cause:** The resource is currently disabled and so may not be operated on.

**Action:** Enable the resource and re-submit your request.
CRS-02502: Resource 'string' has dependency error because of resource 'string'
  Cause: The attempted operation has failed because of a dependency on the specified resource.
  Action: Ensure that the intended operation is still desired. If so, the specified resource and its state need to be evaluated to decide on the corrective action.

CRS-02503: Resource 'string' is in UNKNOWN state and must be stopped first
  Cause: The resource cannot be acted upon when it is in the UNKNOWN state.
  Action: Stop the resource manually, make sure it is OFFLINE, and then re-submit the request.

CRS-02504: Resource 'string' cannot be placed on any online servers that satisfy its placement policy
  Cause: The resource cannot be placed because of the constrains imposed by its placement policy.
  Action: Either change the placement policy of the resource or re-evaluate the request.

CRS-02505: Another operation is being performed on 'string'. Please retry later
  Cause: Another operation is being performed on the specified object.
  Action: Typically, waiting and retrying or using a way to queue the request are the two choices to proceed.

CRS-02506: Operation on 'string' has been cancelled
  Cause: A scheduled or running operation has been cancelled.
  Action: None

CRS-02507: Unsupported modifier 'string' in dependency 'string'
  Cause: The modifier is not a valid one.
  Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02508: Incomplete specification of dependency 'string'
  Cause: The specification does not have the dependent object specified.
  Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02509: Resource type 'string' used in dependency 'string' does not exist or is not registered
  Cause: The resource type referenced by the dependency specification is not found.
  Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02510: Resource 'string' used in dependency 'string' does not exist or is not registered
  Cause: The resource referenced by the dependency specification is not found.
  Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02511: Attribute 'string' cannot be specified on per-X basis for resource 'string'
  Cause: The specified attribute is specified on per-X basis, which is not allowed for this attribute.
Action: Remove the specification.

CRS-02512: Attribute format for 'string' is invalid in resource 'string'
Cause: The specification does not follow valid format.
Action: Correct the specification and re-submit the request.

CRS-02513: Attribute format for 'string' is invalid
Cause: The specification does not follow valid format.
Action: Correct the specification and re-submit the request.

CRS-02514: Dependency attribute specification 'string' is invalid in resource 'string'
Cause: The specification of relations does not follow valid format.
Action: Correct the specification and re-submit the request.

CRS-02515: Circular dependency found for resource 'string'
Cause: The resource dependency specification has a circular dependency.
Action: Circular dependencies are disallowed. Please change the profile and re-submit.

CRS-02516: Server pool is not specified for resource 'string'
Cause: The resource profile does not have server pool specified.
Action: Please either specify a an existing server pool or HOSTING_MEMBERS in the profile and re-submit the request.

CRS-02517: Required attribute 'string' is not specified for resource 'string'
Cause: A required attribute is missing from the resource profile.
Action: Please add the attribute to the profile and re-submit the request.

CRS-02519: Either 'string' or 'string' must be specified when 'string' is 'string'
Cause: Neither or both of the parameters was specified.
Action: Please specify exactly one of the two and re-submit.

CRS-02520: Invalid value 'string' for attribute 'string'
Cause: The value specified for the attribute is inappropriate or invalid.
Action: Review the value, correct the problem and re-submit the request.

CRS-02521: Read-only attribute 'string' cannot be modified
Cause: An attempt was made to modify a read-only attribute.
Action: None

CRS-02522: No value is specified
Cause: There is nothing specified for the value.
Action: Provide a valid value.

CRS-02523: Invalid characters are used when specifying the value
Cause: 1 or more characters used to specify a value are inappropriate.
Action: Provide a valid value.

CRS-02524: Value specification may only contain 'string'/'string'/'string'/'string'/'string'/'string'/'string'
Cause: The value specified is not any of the allowed.
Action: The value must be one of the allowed ones, as specified. Provide a valid one.

CRS-02525: All instances of the resource 'string' are already running; relocate is not allowed because the force option was not specified
Cause: All instances of the resource are running and the start request does not have the force option specified.
Action: Either specify the force option or re-evaluate the need for the request.

CRS-02526: There are no available instances of resource 'string' to start on 'string'
Cause: All instances of the resource are already running or otherwise unavailable to be started on the specified server.
Action: Create more instances or re-evaluate the need for the request.

CRS-02527: Unable to start 'string' because it has a 'string' dependency on 'string'
Cause: Start/relocate of the resource is impossible because it has a dependency on another entity which prevents it from being able to start.
Action: This message will usually be coupled with another one that details the nature of the problem with the other resource. Please follow up on the action recommended for that message.

CRS-02528: Unable to place an instance of 'string' as all possible servers are occupied by the resource
Cause: Out of possible servers to place the resource on, all already host an instance of the resource.
Action: You need to add more servers or change the resource placement parameters to allow placement on additional servers.

CRS-02529: Unable to act on 'string' because that would require stopping or relocating 'string', but the force option was not specified
Cause: Acting on the resource requires stopping or relocating other resources, which requires that force option be specified, and it is not.
Action: Re-evaluate the request and if it makes sense, set the force option and re-submit.

CRS-02530: Unable to stop 'string' because 'string' has a stop-time 'string' dependency on it
Cause: Stopping the resource is impossible because it has a dependency on another resource and there is a problem with that other resource.
Action: This message will usually be coupled with another one that details the nature of the problem with the other resource. Please follow up on the action recommended for that message.

CRS-02531: Internal error while operating on 'string'
Cause: General-purpose message for highly unexpected internal errors.
Action: This message will usually be preceded by another one with a more specific problem description. Contact Oracle Support Services.

CRS-02532: OCR write failed for 'string'
Cause: Unknown, but would usually imply corruption or unavailability of the OCR or a lack of permissions to update keys or a software defect in the OCR code.
Action: Validate that OCR is accessible, validate that key permissions match. Contact Oracle Support Services.
CRS-02533: Server 'string' is down. Unable to perform the operation on 'string'
   Cause: The server is down and therefore the operation cannot be performed.
   Action: Try using a different server.

CRS-02534: Resource type 'string' is not registered
   Cause: The specified resource type is not registered.
   Action: Re-evaluate the request.

CRS-02535: Resource type 'string' does not have attribute 'string' and thus it cannot
   be updated
   Cause: An non-existing attribute cannot be modified.
   Action: Re-evaluate the request.

CRS-02536: Required attribute 'string' is not specified for 'string'
   Cause: A required attribute is missing from the entity's profile.
   Action: Add the attribute to the profile and re-submit the request.

CRS-02537: Resource type 'string' cannot be extended directly; use its extensions
   instead
   Cause: The type cannot be extended.
   Action: Use a type that extends this one.

CRS-02538: Value for attribute 'string' is of incorrect type (string is expected)
   Cause: The type of the value is not correct.
   Action: Re-submit the request with the value specified in proper type.

CRS-02539: A resource with the name 'string' is already registered
   Cause: A resource with specified name is already registered.
   Action: Use a unique name for the new resource.

CRS-02540: Value for attribute 'string' is of incorrect type (integer is expected)
   Cause: The type of the value is not correct.
   Action: Re-submit the request with the value specified in proper type.

CRS-02541: Server pool 'string' is not registered
   Cause: The specified server pool is not registered.
   Action: Re-evaluate the request.

CRS-02542: The tag 'string' is mentioned in both 'string' and 'string' attributes,
   which is conflicting
   Cause: The same tag is used to specify exclusive as well as overlapping server
   pools. These requirements cannot be satisfied simultaneously.
   Action: Remove the tag from one of the attributes.

CRS-02543: The type is not specified for attribute 'string'
   Cause: Value type specification is missing for the attribute.
   Action: Specify a proper type and re-submit.

CRS-02544: The name 'string' is longer than the allowed maximum of 'number'
   characters
   Cause: The name is too long.
Action: Use a shorter name.

CRS-02545: Cannot operate on 'string'. string
Cause: The entity specified is currently locked as part of another operation.
Action: Re-submit the request later.

CRS-02546: Server 'string' is not online
Cause: Operation is invalid because the specified server is not online.
Action: Provide an online server name.

CRS-02547: Update of an internal or read-only attribute 'string' for resource 'string' is not allowed
Cause: Internal and read-only attributes may not be updated.
Action: Exclude internal and read-only attributes from your request.

CRS-02548: A cyclical dependency on 'string' is detected from 'string'
Cause: There is a cycle in the dependency graph. Cycles are disallowed.
Action: Re-evaluate the dependency graph.

CRS-02549: Resource 'string' cannot be placed on 'string' as it is not a valid candidate as per the placement policy
Cause: The resource cannot be placed because of the constrains imposed by its placement policy.
Action: Either change the placement policy of the resource or re-evaluate the request.

CRS-02550: Resource 'string' cannot be failed-over because it has other non-OFFLINE instances on the server 'string'
Cause: The resource cannot be failed-over from the specified server because has other non-OFFLINE instances still available on that server and fail-over can only be done on all instances of the resource on the server as a whole.
Action: None

CRS-02551: Resource 'string' cannot be failed-over because it is of type 'string', which cannot relocate
Cause: Local resources cannot be relocated from one server to another.
Action: None

CRS-02552: There are no available instances of resource 'string' to start.
Cause: All instances of the resource are in the ONLINE or UNKNOWN state.
Action: Re-evaluate the need for the request.

CRS-02553: Server pool 'string' cannot be unregistered as it does not exist
Cause: The server pool you are trying to remove does not exist.
Action: Make sure the server pool you are trying to remove exists.

CRS-02554: Server pool 'string' cannot be unregistered as it is referenced by resource 'string'
Cause: The server pool you are trying to remove has references to it.
Action: Make sure the server pool you are trying to remove is not referenced by other entities.
CRS-02555: Resource 'string' cannot be relocated as it is a local resource
  Cause: The request is impossible to complete as local resources never relocate.
  Action: Please re-evaluate the request.

CRS-02556: Resource 'string' cannot be restored to its original state after a failed relocate attempt
  Cause: After an unsuccessful attempt to relocate a resource, crsd was unable to restore the resource.
  Action: Manual intervention may be required. Re-try starting the resource.

CRS-02557: Server pool 'string' cannot be unregistered as it is referenced by server pool 'string'
  Cause: The server pool you are trying to remove has references to it.
  Action: Make sure the server pool you are trying to remove is not referenced by other entities.

CRS-02558: Resource type 'string' may not be unregistered as there are types that are based on it.
  Cause: Types may not be unregistered if they have derived types.
  Action: Remove derived types first, then remove this one.

CRS-02559: Resource type 'string' may not be unregistered as it has the following resources: 'string'
  Cause: Types may not be unregistered if they have resources registered.
  Action: Remove the specified resources first, then remove the type.

CRS-02560: Resource type 'string' does not exist
  Cause: The resource type referenced does not exist.
  Action: Please specify a correct type.

CRS-02561: Resource type 'string' may not be unregistered as it is referenced by resource 'string'
  Cause: Types may not be unregistered if they are referenced in resource dependencies.
  Action: Make sure there are no existing resources that reference this type in their dependencies.

CRS-02562: Resource 'string' cannot be relocated as it is not running
  Cause: Only currently running resources can be relocated.
  Action: Make sure the resource is running before issuing the request.

CRS-02563: Attempt to start resource 'string' on 'string' has failed. Will re-retry on 'string' now.
  Cause: Undirected (no target member) start of a resource has failed for the server; a retry is in progress.
  Action: None, this is an informational message.

CRS-02564: Failed to relocate resource 'string'. Will attempt to restore it on 'string' now.
  Cause: Resource relocate operation was unable to relocate the resource to any of the possible servers.
  Action: None, this is an informational message.
CRS-02565: Attempt to relocate resource 'string' to 'string' has failed. Will re-retry on 'string' now.
   Cause: Undirected (no target member) relocate of a resource has failed for the server; a retry is in progress.
   Action: None, this is an informational message.

CRS-02566: User 'string' does not have sufficient permissions to operate on resource 'string', which is part of the dependency specification.
   Cause: User does not have permissions to operate on the resource as it will prevent the current resource from starting or staying online in future.
   Action: The user performing the operation must have access privileges to operate on the entire resource dependency tree. The user must either be given those privileges by modifying the dependent resources' access rights or another user having permissions should perform this operation.

CRS-02567: Error while parsing the default value for attribute 'string'
   Cause: The default value specified is not proper.
   Action: Make sure the value is proper for its type.

CRS-02568: Base resource type name 'string' does not exist
   Cause: The name of a base type used is not valid.
   Action: Use an existing type as a base.

CRS-02569: Unsupported value type is used in attribute 'string'
   Cause: An unsupported value type was specified in the attribute's definition.
   Action: Use one of the supported types.

CRS-02570: Internal Error: Number of objects 'number' is different from number of lists 'number'
   Cause: This is an internal error.
   Action: Contact Oracle Support Services.

CRS-02571: Dependency kind 'string' is specified more than once for resource 'string'
   Cause: A dependency kind is used more than once in the profile of the resource.
   Action: Combine multiple specifications of the same dependency kind into a single clause.

CRS-02572: 'string' is not a supported Special Value
   Cause: The specified identifier is not a valid Special Value.
   Action: Check the value for correctness.

CRS-02573: ACL entry for owner field is missing.
   Cause: The complete value for the ACL attribute has been provided but it is missing a mandatory entry specifying permissions for the owner.
   Action: Include permissions for the owner in the value of ACL attribute.

CRS-02574: ACL entry for primary group field is missing.
   Cause: The complete value for the ACL attribute has been provided but it is missing a mandatory entry specifying permissions for the primary group.
   Action: Include permissions for the primary in the value of ACL attribute.
CRS-02575: ACL entry for users other than the owner and those belonging to primary group is missing.
Causes: The ACL attribute is missing a mandatory entry specifying permissions for users other than the owner and those belonging to the primary group.
Actions: Include permissions for other users in the value of ACL attribute.

CRS-02576: User 'string' is not a member of group 'string'
Causes: The group that the caller claims to be a member of has no such user by configuration.
Actions: Make sure the group is configured to have the calling user as a member.

CRS-02577: Use of 'string' in attributes and values is not allowed
Causes: A disallowed character was detected.
Actions: Retry without the disallowed character.

CRS-02578: Value of 'string' (number) may not be greater than that of 'string' (number)
Causes: The specified values do not make sense - one may not be less than the other.
Actions: Use valid values.

CRS-02579: Value 'number' may not be less than 'number'
Causes: The value is less than the allowed minimum.
Actions: Use a proper value.

CRS-02580: Value 'number' is neither 'number' nor 'number'
Causes: The value must be one of the two and it is neither.
Actions: Use a proper value.

CRS-02581: Value 'string' is not any of the following 'string', 'string', 'string'
Causes: The value must be one of the ones specified and it is not.
Actions: Use a proper value.

CRS-02582: Value 'string' does not follow expected format: <n>[s|d|m|w|h]
Causes: The value specification does not follow required format.
Actions: Use a proper value.

CRS-02583: Value 'number' must be in the 'number' - 'number' range
Causes: The value is not within the allowed range.
Actions: Use a proper value.

CRS-02584: Value 'string' is not allowed here
Causes: The value is not proper in this context.
Actions: Use a proper value.

CRS-02585: Deletion of built-in resource types is not allowed
Causes: An attempt was made to delete a built-in resource type.
Actions: Removal of built-in types is not allowed.

CRS-02586: Deletion of a running resource 'string' requires the force option
Causes: An attempt was made to delete a resource that is still running.
Action: Stop the resource first using the 'crsctl stop resource' command. If the resource cannot be stopped, specify the force option to the 'crsctl delete' command.

CRS-02587: Attribute 'string' is internal and thus may not be overridden in type 'string'
Cause: Attributes defined in built-in resource types that are internal to the subsystem may never be overridden in user-defined resource types.
Action: Do not specify this attribute in the new user-defined type.

CRS-02588: A cyclical dependency on 'string' is detected from 'string' via type 'string'
Cause: There is a cycle in the dependency graph, via a resource type. Cycles are disallowed.
Action: Re-evaluate the dependency graph.

CRS-02589: Relation modifier 'string' is invalid for relation kind 'string'
Cause: An unexpected relation modifier is specified.
Action: Use defined modifiers only.

CRS-02590: A resource name may not be empty or contain spaces
Cause: A name must not be empty or contain space character(s).
Action: Specify a valid name.

CRS-02591: A server pool name may not be empty or contain spaces
Cause: A name must not be empty or contain space character(s).
Action: Specify a valid name.

CRS-02592: A type name may not be empty or contain spaces
Cause: A name must not be empty or contain space character(s).
Action: Specify a valid name.

CRS-02593: Comparator value 'string' in the filter specification is not supported
Cause: An unsupported comparator was supplied.
Action: Use a supported value.

CRS-02594: Filter specification 'string' is invalid
Cause: The filter specification invalid or empty.
Action: Provide a valid filter or do not specify you have one.

CRS-02595: Server pool 'string' has already been registered
Cause: A server pool with this name has already been registered.
Action: Provide a name that is not currently in use.

CRS-02596: Modifications to the 'string' attribute of server pools are not supported
Cause: Changes to the value of the attribute are not allowed.
Action: Create a different pool with the desired value and use it.

CRS-02597: Server 'string' may not be moved to pool 'string'
Cause: Because of one or more of configuration-related constrains, the move of the server is not a valid operation at the time.
Action: Re-evaluate the request's validity in the context of the entire error stack.
CRS-02598: Server pool 'string' is already at its maximum size of 'number'
Cause: The pool is already at the maximum.
Action: The request is impossible to execute.

CRS-02599: Server 'string' is not in a parent pool of 'string'
Cause: The server is not in a parent pool of the pool in question.
Action: The request is impossible to execute.

CRS-02600: Server 'string' is already in another top-level server pool
Cause: The server is already consumed by a different top-level pool and all such pools are exclusive as far as server ownership.
Action: The request is impossible to execute.

CRS-02601: Server 'string' is not explicitly mentioned as a candidate by server pool 'string'
Cause: The server is not in the list of names the pool allows as candidates.
Action: Use a server that is in the specified group.

CRS-02602: Server 'string' is in server pool 'string' which is exclusive with server pool 'string'
Cause: The server is already in a pool that's configured to be exclusive with the one at hand.
Action: The request is impossible to execute.

CRS-02603: Server 'string' cannot be assigned to server pool 'string' because it is not a top-level pool
Cause: Server movement is only supported between top-level server pools.
Action: The request is impossible to execute as such an action is not supported.

CRS-02604: Server 'string' is already assigned to server pool 'string'
Cause: Server movement makes no sense: the server is already in the target pool.
Action: Check the request validity.

CRS-02605: Server 'string' may not be relocated from server pool 'string' as the pool disallows transfers
Cause: The server pool is configured not to allow server transfers.
Action: Check the request validity.

CRS-02606: Server 'string' may not be relocated from server pool 'string' because it is not above its minimum size
Cause: Server pools of identical or higher importance may not be used to steal servers from if they are not above their minimum size.
Action: Update the configuration of server pools by either changing the importance or the minimum size or both and then re-submit the request.

CRS-02607: Attribute 'string' has not been specified on per-X basis for resource 'string'
Cause: The specified attribute has not been specified on per-X basis for this resource.
Action: Check the per-X attribute for the resource, fix and resubmit.

CRS-02608: Attribute 'string' is not a per-X value and cannot be removed
Cause: The specified attribute is not a per-X value.
Action: Check the per-X attribute for the resource, fix and resubmit.

CRS-02609: Server 'string' may not be relocated to server pool 'string' as the pool disallows transfers
Cause: The server pool is configured not to allow server transfers.
Action: Check the request validity.

CRS-02610: Server 'string' is unavailable
Cause: The server is not available at the moment.
Action: Check available servers and rerun the request with an active server.

CRS-02611: Server pool 'string' is built-in and may not be deleted
Cause: Built-in server pools may never be deleted.
Action: None

CRS-02612: Server pools do not have attribute named 'string'
Cause: An unsupported attribute was provided as part of the register or update request.
Action: Please double check the attributes that are supplied.

CRS-02613: Could not find resource 'string'.
Cause: An attempt was made to operate on a resource that is not registered.
Action: Check if the resource is registered.

CRS-02614: Could not find resource type 'string'.
Cause: An attempt was made to operate on a resource type that is not registered.
Action: Check if the resource type is registered.

CRS-02615: Could not find server pool 'string'.
Cause: An attempt was made to operate on a server pool that is not registered.
Action: Check if the server pool is registered.

CRS-02616: The owner of resource type 'string' does not have sufficient permissions to operate on resource type 'string', from which it is directly or indirectly derived.
Cause: Update of a resource type in the current manner is not allowed as it will severely limit operations on the current resource type and will potentially prevent resources of derived types from starting or staying online in future.
Action: If access privileges must be changed, then they need to changed bottom-up in a dependency.

CRS-02617: Incorrect value of attribute flags has been specified for attribute string.
Only READONLY flag can be changed for a type attribute.
Cause: Attempt was made to update the flag on a resource type attribute. The only change allowed is to the readonly property of the attribute.
Action: Provide correct value of the attribute flag.

CRS-02618: Cannot change data type string of existing attribute string to type string.
Cause: Attempt was made to update the data type of attribute value.
Action: Data type of the attribute cannot be changed.
CRS-02619: Server pool 'string' may not be edited
  Cause: The pool's attributes may not be edited.
  Action: None

CRS-02620: Attribute 'string' of server pool 'string' may not be edited
  Cause: Editing of the attribute of the server pool is not allowed.
  Action: None

CRS-02621: Server 'string' is assigned to 'string' to which you have no permission. The operation is not authorized.
  Cause: The operation requires making the specified server a placement candidate for the resources owned by the requesting user. However, this is not allowed because the user is not authorized to utilize the server.
  Action: Either specify another server that that's in the pool you are authorized to use or request that a cluster administrator gives you access to the pool to which the server is currently assigned.

CRS-02622: Server 'string' is not assigned to any server pool and thus may only be specified by a cluster administrator
  Cause: The operation makes use of the server that's not currently assigned to a server pool and the requesting user is not a cluster administrator. Because of that use of the server cannot be authorized at the moment.
  Action: Either request a cluster administrator to perform the operation for you or wait until the server has joined the cluster and is assigned to a pool to which you have an x-permission.

CRS-02623: Server pool 'string' cannot accept server 'string' because its name is not specified in 'string'
  Cause: Only servers whose names are mentioned in the attribute may be assigned to the pool.
  Action: None

CRS-02624: One of 'string', 'string' must be specified when 'string' is 'string'
  Cause: Neither of the parameters was specified.
  Action: Please specify either of the two and re-submit.

CRS-02625: Owner of resource 'string' does not have execute permission to pool 'string' and may not use it
  Cause: Resource profile references a server pool to which the owner of the resource does not have the X-permission.
  Action: Either have the pool's permission changed appropriately or use a different pool.

CRS-02626: Owner of server pool 'string' does not have execute permission to parent server pool 'string'
  Cause: Parent pool does not have the X-permission for the pool's parent.
  Action: Either have the desired parent pool's permission changed appropriately or use a different pool.

CRS-02627: You must have execute permission on pool 'string' to relocate server 'string'
Cause: The client requesting the operation does not have proper permissions to the specified pool.

Action: Acquire required permissions or use another server/pool. Permissions can be added by an authorized user using ‘crsctl setperm’ command.

CRS-02628: Server pool 'string' may not be a parent of itself
Cause: An attempt was made to make a server pool a parent of itself.
Action: Re-evaluate the server pool dependencies.

CRS-02629: Only cluster administrators are allowed to create top-level server pools
Cause: An attempt was made to create a server pool that has no parent pools. Creation of such pools is only allowed for cluster administrators.
Action: Either acquire the role of cluster administrator or have one create the pool for you.

CRS-02630: Only cluster administrators are allowed to create local resources
Cause: An attempt was made to create a local resource which is only allowed for cluster administrators.
Action: Either acquire the role of cluster administrator or have one create the resource for you.

CRS-02631: Only cluster administrators are allowed to create cluster resources that may run anywhere in the cluster
Cause: An attempt was made to create a cluster resource that may run anywhere in the cluster which is only for cluster administrators.
Action: Either acquire the role of cluster administrator or have one create the resource for you.

CRS-02632: There are no more servers to try to place resource 'string' on that would satisfy its placement policy
Cause: After one or more attempts, the system ran out of servers that can be used to place the resource and satisfy its placement policy.
Action: None

CRS-02640: Required resource 'string' is missing.
Cause: A resource that's configured as required is not registered.
Action: Register the missing resource or update the dependency specification so as to the missing resource is not required for start.

CRS-02641: The value of 'string' cannot override that defined in the resource's type: 'string'
Cause: Agent filename cannot be overridden on per-resource basis.
Action: Define a sub-type that uses the agent. Then create a resource of this new type.

CRS-02642: Relocate resource is not a valid command for this configuration
Cause: A relocate command was issued in the configuration where it is not possible in principle.
Action: None

CRS-02643: The server pool(s) where resource 'string' could run have no servers
Cause: All of the server pools the resource uses (and has permissions to use) have no servers assigned.
Action: Either make sure there are active servers in the pools or use different pools for the resource.

CRS-02644: No hosting members of 'string' are either online or are allowed to be used by the resource
Cause: No server out of the enumerated as hosting members is online or, if it is, may be used by the resource.
Action: You need to either add more servers into the cluster or request permission to pools to which currently available servers are assigned.

CRS-02645: Cannot create resources of type 'string'
Cause: The type is abstract.
Action: Only concrete extensions of the type can be created.

CRS-02646: 'string' must have a default value if specified
Cause: This attribute must have a default value if specified.
Action: Modify the type definition so that the attribute is removed or has a valid default value.

CRS-02647: Attribute 'string' may not be a negative value
Cause: A negative value was provided for an attribute which only accepts non-negative values.
Action: Specify a non-negative number.

CRS-02649: Attribute 'string' of 'string' is internally managed and may not be specified
Cause: An internal attribute was specified as part of an add/modify request.
Action: Re-execute the request without any internal attribute.

CRS-02650: Resource 'string' is configured to run only on 'string' and cannot be started on 'string'
Cause: An attempt was made to start a resource on a server where it cannot run given its placement configuration.
Action: Make sure you start resources where they are configured to run.

CRS-02651: Resource alias 'string' must use special values to be unique for each server
Cause: Resource alias name must resolve to a unique identifier for every server in the cluster. To achieve that, special values that yield different values on for each server must be used.
Action: You need to special an alias with special variables that will make it unique for every server.

CRS-02652: string is a resource and only resource instances can be relocated.
Cause: An attempt was made to relocate a resource.
Action: Make sure you supply a resource instance rather than a resource.

CRS-02653: Special value evaluation must be associated with a resource instance
Cause: Because some special values are per-server, each special value evaluation request must be associated with a resource instance.
**Action:** Please specify a server for the resource using -k or -n.

**CRS-02660: Resource 'string' or all of its instances are disabled**

**Cause:** This is an API return code for requests that cannot be performed because the resource is disabled.

**Action:** Look at the detailed error messages that should always accompany this error.

**CRS-02661: All instances of resource 'string' are disabled**

**Cause:** All instances of the resource instances are disabled.

**Action:** In order to change a resource state through CRS, its instances need to be enabled.

**CRS-02662: Resource 'string' is disabled on server 'string'**

**Cause:** The resource was disabled on the specified server.

**Action:** Either re-enable, or use a different server.

**CRS-02663: Resource instance of 'string' with string=number, string=number is disabled**

**Cause:** The resource instance whose cardinality/degree is specified is disabled.

**Action:** Either re-enable or use a different resource instance.

**CRS-02664: Resource 'string' is already running on 'string'**

**Cause:** The resource is already running everywhere it may run.

**Action:** None

**CRS-02665: Resource 'string' is disabled on 'string'**

**Cause:** The resource is disabled on every server it is configured to start on.

**Action:** None

**CRS-02666: Resource 'string' is disabled on 'string' and is already running on 'string'**

**Cause:** The resource is disabled on every server it is configured to start on.

**Action:** None

**CRS-02667: Resource 'string' with string=string may only run on servers assigned to string and string, both of which are empty**

**Cause:** The resource's placement policy only allows it to run on servers assigned to the specified pools, and they are all empty.

**Action:** Either change the placement policy of the resource, or change the cluster configuration so that there are servers in those pools.

**CRS-02668: The value of attribute 'string' (number) may not not be above 'number'**

**Cause:** Attribute value specified is above the allowed maximum.

**Action:** Use a value below the specified maximum.

**CRS-02669: The value is out of range. Maximum allowed value is 'number'**

**Cause:** Attribute value is out of the valid range.

**Action:** The value needs to be in a valid range.

**CRS-02670: Unable to start/relocate 'string' because 'string' has a stop-time 'string' dependency on it**
Cause: Start/relocate of the resource is impossible because another resource has a stop-time dependency on it and the action requires stopping that resources.
Action: This message will usually be coupled with another one that details the nature of the problem with the other resource. Please follow up on the action recommended for that message.

CRS-02671: Error processing attribute 'string': string
Cause: The value specified for the attribute is inappropriate or invalid.
Action: Review the value, correct the problem and re-submit the request.

CRS-02672: Attempting to start 'string' on 'string'
Cause: This is a status message.
Action: None

CRS-02673: Attempting to stop 'string' on 'string'
Cause: This is a status message.
Action: None

CRS-02674: Start of 'string' on 'string' failed
Cause: This is a status message.
Action: None

CRS-02675: Stop of 'string' on 'string' failed
Cause: This is a status message.
Action: None

CRS-02676: Start of 'string' on 'string' succeeded
Cause: This is a status message.
Action: None

CRS-02677: Stop of 'string' on 'string' succeeded
Cause: This is a status message.
Action: None

CRS-02678: 'string' on 'string' has experienced an unrecoverable failure
Cause: This is a status message.
Action: Perform whatever steps necessary to reset the state.

CRS-02679: Attempting to clean 'string' on 'string'
Cause: This is a status message.
Action: None

CRS-02680: Clean of 'string' on 'string' failed
Cause: This is a status message.
Action: None

CRS-02681: Clean of 'string' on 'string' succeeded
Cause: This is a status message.
Action: None

CRS-02682: It is locked by 'string' for command 'string' issued from 'string'
Cause: This message is generated for operations that have a locking conflict.
Action: None

CRS-02683: It is locked by 'string' for command 'string'
Cause: This message is generated for operations that have a locking conflict.
Action: None

CRS-02714: 'string' is specified multiple times in 'string' of 'string'
Cause: The specified value is specified multiple times.
Action: Remove duplicates and retry.

CRS-02715: Update to attribute AGENT_FILENAME is not currently supported.
Please recreate the resource type with new value.
Cause: Attempt was made to update AGENT_FILENAME attribute.
Action: Delete existing resource type and add it back with the new value.

CRS-02716: Failure threshold exhausted for resource 'string'
Cause: The resource instance has failed more times than allowed in the specified
time interval. It will not be restarted automatically.
Action: Please identify and fix the problem. Restart the resource manually thereafter.

CRS-02717: Server 'string' is not in any of the server pool(s) hosting resource 'string'
Cause: An attempt was made to start a resource on a server that is not currently
an active server in any of the resource's server pool(s).
Action: Use a server name that is currently an active server of the resource's
server pools(s).

CRS-02718: Server 'string' is not a hosting member of resource 'string'
Cause: An attempt was made to start the resource on a server not listed as a
hosting member of the resource.
Action: Use a server name that is listed as a hosting member.

CRS-02719: Resource 'string' may not be started on server 'string' because the server
is not in either 'string' or 'string' server pools
Cause: The resource's placement policy only allows it to run in the specified
server pools. An attempt was made to start it on a server assigned to a different
pool.
Action: Either use a different server or set the value of SERVER_POOLS to *,
which will allow the resource to run on any server.

CRS-02720: 'string' is a resource alias for 'string' and cannot be updated
Cause: An attempt was made to update a resource as if it were a resource.
Action: Please update the resource which this alias refers to instead.

CRS-02721: 'string' is a resource alias for 'string' and cannot be unregistered
Cause: An attempt was made to unregister a resource alias as if it were a resource.
Action: Either unregister the resource which this alias refers to or modify its
ALIAS_NAME attribute to not have a resource alias.

CRS-02722: The instance of resource 'string' may only run on 'string'; check on
'string' is unnecessary
Cause: A check was issued on a server for a resource instance that may only run on a particular server.
Action: Please issue a check on the server where the resource instance is supposed to be run.

CRS-02723: No instance of resource 'string' found on 'string'
Cause: A check was issued on a server for a resource which does not have any offline instances and no running instances on that server.
Action: Please issue a check on a server where a resource instance might be running.

CRS-02724: Modifications to the built-in resource type 'string' are not allowed
Cause: An attempt was made to modify a built-in resource type.
Action: Modification of built-in resource types is not allowed.

CRS-02725: User string does not have permission to operate on resource string.
Cause: Access control list on the resource do not permit the user to operate on the resource.
Action: Access privileges on the resource must be honored or this user must be given appropriate permissions.

CRS-02726: Invalid permissions specified for access control.
Cause: Access permissions are specifies using 'r', 'w', 'x' and '-' characters to indicate read, write and execute permissions. '-' indicates no access of any kind.
Action: Check format for the permissions string and re-run the command with the correct string.

CRS-02727: Acl entry 'string' has been specified more than once.
Cause: Access permissions for the entry have been specified more than once.
Action: Specify permissions for each entry only once and rerun the command.

CRS-02728: A resource type with the name 'string' is already registered
Cause: A resource type with such name is already registered.
Action: Use a unique name for the new resource type.

CRS-02729: Attribute 'string' cannot be overridden for a resource type
Cause: An attribute was specified that is not allowed in a resource type.
Action: Do not use the attribute specified in the error message for a resource type.

CRS-02730: Resource 'string' depends on resource 'string'
Cause: An attempt was made to unregister a resource that is referenced by another resource in the dependency specification(s).
Action: Either remove the reference to this resource or the other resource first. Alternatively, the operation can be retried with a force option.

CRS-02731: Resource 'string' is already running on server 'string'
Cause: The resource is already running on the server; relocate is impossible.
Action: Select another server.

CRS-02732: Resource 'string' is already starting on server 'string'
Cause: The resource is currently starting on the server.
Action: Wait for the request to complete.
CRS-02733: Failed to stop all required resources on 'string'; the server will be restored into the original server pool(s)
   Cause: In order to successfully relocate a server, all resources that cannot run in the new server pool(s) must be stopped. That did not happen and thus the server was placed back into its original server pool(s).
   Action: Manual intervention in stopping resources is required. The operation can be retried thereafter. Alternatively, another server can be used.

CRS-02734: Failed to stop all required resources on 'string'; the server will stay in RECONFIGURING state
   Cause: In order to successfully relocate a server, all resources that cannot run in the new server pool(s) must be stopped. Since that did not happen, the server will be kept in the RECONFIGURING state until the resources that did not stop have been stopped or unregistered.
   Action: Manually stop the resources that did not stop or unregister them.

CRS-02735: The operation requires relocating resource 'string' from server 'string'
   Cause: The operation would end up relocating the resource and the force option is not specified.
   Action: Add more servers to the cluster, stop or relocate the resource, or use the force option for the same command.

CRS-02736: The operation requires stopping resource 'string' on server 'string'
   Cause: The operation would end up stopping the resource and the force option is not specified.
   Action: Add more servers to the cluster, stop or relocate the resource, or use the force option for the same command.

CRS-02737: Unable to register server pool 'string' as this will affect running resources, but the force option was not specified
   Cause: One or more running resources would be affected by the operation.
   Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02738: Unable to modify server pool 'string' as this will affect running resources, but the force option was not specified
   Cause: One or more running resources would be affected by the operation.
   Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02739: Unable to relocate server 'string' as this will affect running resources, but the force option was not specified
   Cause: One or more running resources would be affected by the operation.
   Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, use a different server, or use the force option for the same command.

CRS-02740: Failed to relocate server 'string' to server pool 'string'. The server has been restored to original server pool(s).
   Cause: In order to successfully relocate a server, all resources that cannot run in the new server pool(s) must be stopped. That did not happen and thus the server was placed back into its original server pool(s).
**Action**: Manual intervention in stopping or unregistering resources is required. The operation can be retried thereafter. Alternatively, another server can be used.

**CRS-02741**: A value must be specified for attribute 'string'

*Cause*: The attribute was not given a value.

*Action*: Provide a value and retry.

**CRS-02742**: The update of resource 'string' would lose track of one or more running instances

*Cause*: An attempt was made to modify the configuration of the resource such that one or more currently running instance will be lost track of (the new configuration would change the resource to have fewer instances).

*Action*: Stop the resource and resubmit.

**CRS-02743**: Unable to register resource 'string' as this will affect running resources, but the force option was not specified

*Cause*: One or more running resources would be affected by the operation.

*Action*: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

**CRS-02744**: Unable to modify resource 'string' as this will affect running resources, but the force option was not specified

*Cause*: One or more running resources would be affected by the operation.

*Action*: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

**CRS-02745**: Unable to relocate server string because it results in violation of a pool string constraint

*Cause*: The requested move was rejected because it would cause either the source or target pool (or both) to violate a pool size constraint, as indicated.

*Action*: Either change the pool size constraint(s) to accommodate your intent with this move, or choose a different server to move.

**CRS-02746**: Cannot act on the instance of resource 'string' which is last known to have run on 'string' where Cluster Ready Services are not properly functioning

*Cause*: The resource had been running on the server in the past but currently there's no way to know if it's still running there because the Cluster Ready Services daemon does not appear to be running on the server. To prevent possible configuration violation, any attempt to start the resource instance on another server is rejected.

*Action*: The underlying problem preventing Cluster Resource Services on the server from functioning properly must be addressed. Only then the resources that used to run there can be operated on again. Alternatively, the server may be shut down or the clusterware stack on it stopped completely.

**CRS-02747**: Server reconfiguration has failed to stop resources 'string' on server 'string'. Resources that did not stop must be stopped or unregistered manually. Details at string in string.

*Cause*: The specified resources could not be stopped.

*Action*: Stop the specified resources manually using and retry the last action.

**CRS-02748**: Failed to stop resource 'string' during server reconfiguration on server 'string'.

---

63-56 Oracle Database Error Messages
**Cause:** The specified resources could not be stopped.
**Action:** Stop the specified resources manually and retry the last action.

**CRS-02749:** A write of OCR server data 'string' failed. Details at string in string.
**Cause:** Could not persist data to OCR.
**Action:** Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

**CRS-02750:** Cardinality violation detected on server 'string', resource 'string' is in unexpected state. Details at string in string.
**Cause:** The specified resource was in an unexpected state.
**Action:** Manually restart the resource.

**CRS-02751:** Cannot create new resource, the resource type 'string' is not supported. Details at string in string.
**Cause:** The specified resource had an incorrect base type.
**Action:** Check the attributes for the resource and add it using crsctl again.

**CRS-02752:** Unable to write event sequence number to OCR. Details at string in string.
**Cause:** Could not update OCR with event sequence number.
**Action:** Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

**CRS-02753:** Timed out waiting for the server pools to be unfrozen.
**Cause:** Timed out while waiting for a client to unfreeze the pools it froze.
**Action:** If the problem persists, contact Oracle Support Services.

**CRS-02754:** Unable to change locks for a running operation 'string'. Details at string in string.
**Cause:** This is an internal error.
**Action:** Contact Oracle Support Services.

**CRS-02755:** Error reading type definition for type 'string'. Details at string in string.
**Cause:** This is an internal error.
**Action:** Contact Oracle Support Services.

**CRS-02756:** Invalid tag for command 'string'. Details at string in string.
**Cause:** An invalid command was received by the CRS daemon.
**Action:** Contact Oracle Support Services.

**CRS-02757:** Command 'string' timed out waiting for response from the resource 'string'. Details at string in string.
**Cause:** Timeout occurred while waiting for response to specified command.
**Action:** Check that the server targeted by the command is online and responsive.

**CRS-02758:** Resource 'string' is in an unknown state.
**Cause:** Unable to determine the current state of specified resource.
**Action:** Manually restart the resource.

**CRS-02759:** Failed to read repository key for NLS language 'string'. Details at string in string.
**Oracle Database Error Messages**

**Cause:** The key for the specified language could not be read from OCR.

**Action:** Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

**CRS-02760:** Policy engine failed to initialize internal types. Details at `string` in `string`.

**Cause:** Error during initialization of internal data.

**Action:** If the problem persists, contact Oracle Support Services.

**CRS-02761:** Consistency problem in registry while processing resource `string`.

**Cause:** This is an internal error.

**Action:** Contact Oracle Support Services.

**CRS-02762:** Unable to find type `string` in registry while processing resource `string`.

**Cause:** This is an internal error.

**Action:** Contact Oracle Support Services.

**CRS-02763:** Error while reading resources. Details at `string` in `string`.

**Cause:** This is an internal error.

**Action:** Contact Oracle Support Services.

**CRS-02764:** CRSADMIN and CRSUSER keys are not in repository. Details at `string` in `string`.

**Cause:** Error with repository. Required keys are not present.

**Action:** Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

**CRS-02765:** Resource `string` has failed on server `string`.

**Cause:** The specified resource was no longer running.

**Action:** The resource will be automatically brought back online. Use crsctl to confirm that it is online.

**CRS-02766:** Received state change for disabled resource `string` from server `string`.

**Cause:** Received command to change state for a resource that was disabled.

**Action:** None

**CRS-02767:** Resource state recovery not attempted for `string` as its target state is OFFLINE.

**Cause:** Target state for resource was OFFLINE. Clusterware will not attempt to recover it.

**Action:** None

**CRS-02768:** Failure threshold exhausted by resource `string`.

**Cause:** The specified resource failed too many times. No further restart attempts will be made.

**Action:** Fix the underlying cause of resource failure and manually restart the resource.

**CRS-02769:** Unable to failover resource `string`.

**Cause:** Could not failover the specified resource.
Action: Restart the resource manually.

CRS-02770: Resource target 'string' is offline; will not restart.
Cause: The target state of the specified resource was offline.
Action: None

CRS-02771: Maximum restart attempts reached for resource 'string'; will not restart.
Cause: Specified resource had been restarted too many times.
Action: Change the maximum restart parameter of the resource, and restart it manually.

CRS-02772: Server 'string' has been assigned to pool 'string'.
Cause: The specified server had been assigned to a server pool.
Action: None

CRS-02773: Server 'string' has been removed from pool 'string'.
Cause: The specified server had been removed from a server pool.
Action: None

CRS-02774: Failed to save resource 'string' to the repository. Details at string in string.
Cause: Could not update repository with resource details.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02775: Failed to update resource 'string'. Details at string in string.
Cause: Could not update repository with resource details.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02776: Failed to update server pool 'string'. Details at string in string.
Cause: Could not update repository with server pool details.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02777: Failed to delete resource 'string' from repository. Details at string in string.
Cause: Unable to update resource details in repository.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02778: Failed to delete server pool 'string' from repository. Details at string in string.
Cause: Could not update repository with server pool details.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02779: Failed to delete type 'string' from repository. Details at string in string.
Cause: Failed to update repository.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.
CRS-02780: Could not find Access Control List for resource 'string'. Details at string in string.
Cause: This is an internal error.
Action: Contact Oracle Support Services.

CRS-02781: Error during registration for resource 'string'. Details at string in string.
Cause: Error occurred during registration callback of new resource.
Action: Contact Oracle Support Services.

CRS-02782: Unable to find attributes for resource 'string'. Details at string in string.
Cause: This is an internal error.
Action: Contact Oracle Support Services.

CRS-02783: Internal error in local placement policy for resource 'string'. Details at string in string.
Cause: Internal error in CRS Policy Engine.
Action: Contact Oracle Support Services.

CRS-02784: Internal error, invalid server 'string' in local placement policy. Details at string in string.
Cause: Internal error in CRS Policy Engine.
Action: Contact Oracle Support Services.

CRS-02785: Failed to register resource 'string'. Details at string in string.
Cause: Could not update repository with resource details.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02786: Failed to register server pool 'string'. Details at string in string.
Cause: Could not update repository with server pool details.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02787: Server pool 'string' has fallen below its minimum size. Details at string in string.
Cause: The specified server pool has fallen below its minimum size and will be reconfigured.
Action: None

CRS-02788: Server reconfiguration failed to stop resources 'string'. The server 'string' has been restored into the original pool(s).
Cause: The specified resources could not be stopped.
Action: Stop the specified resources manually and retry the last action.

CRS-02789: Cannot stop resource 'string' as it is not running on server 'string'
Cause: An request to stop a resource on a server where it is not running was received
Action: Check the current state of the resource; it should no longer be running on that server.

CRS-02790: Starting shutdown of Cluster Ready Services-managed resources on 'string'
Cause: Shutdown of Cluster Ready Services and the resources it manages has started on the specified server.
Action: None

CRS-02791: Starting shutdown of Oracle High Availability Services-managed resources on 'string'
Cause: Shutdown of Oracle High Availability Services and the resources it manages has started on the indicated server.
Action: None

CRS-02792: Shutdown of Cluster Ready Services-managed resources on 'string' has completed
Cause: Shutdown of Cluster Ready Services and the resources it manages on the indicated server has completed.
Action: None

CRS-02793: Shutdown of Oracle High Availability Services-managed resources on 'string' has completed
Cause: Shutdown of Oracle High Availability Services and the resources it manages has completed on the indicated server.
Action: None

CRS-02794: Shutdown of Cluster Ready Services-managed resources on 'string' has failed
Cause: The failure is associated with one or more of the resources affected by this command on the indicated server.
Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02795: Shutdown of Oracle High Availability Services-managed resources on 'string' has failed
Cause: The failure is associated with one or more of the resources affected by this command on the indicated server.
Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02796: The command may not proceed when Cluster Ready Services is not running
Cause: This command must stop Cluster Ready Services-managed resources. However, Cluster Ready Services is not running, which does not mean its resources are not running.
Action: The underlying reason for Cluster Ready Services not running needs to be resolved and the command retried. Alternatively, the command can be retried with the force option.

CRS-02797: Shutdown is already in progress for 'string', waiting for it to complete
Cause: Another shutdown command was issued for the indicated server in the past and it is currently in progress. This command will wait until the original command completes and then complete as well.
Action: None
CRS-02798: State change received for resource 'string' from unexpected server 'string'. Details at 'string' in 'string'.
   Cause: A state change was reported for an instance of the resource from a server
   where the resource was never started.
   Action: Shutdown the resource on the unexpected server

CRS-02799: Failed to shut down resource 'string' on 'string'
   Cause: Shut down failed because the listed resource failed to stop.
   Action: Error message(s) preceding this one should have the details about the
   resources that refused to shut down. Either manually stop those resources or retry
   with the force option.

CRS-02800: Cannot start resource 'string' as it is already in the INTERMEDIATE
   state on server 'string'
   Cause: An attempt was made to start a resource that is already in the
   INTERMEDIATE state.
   Action: Determine why the resource is in the INTERMEDIATE state based on the
   value of the STATE_DETAILS attribute. If it is due to a check timeout, no action is
   needed. Otherwise, manual intervention is required to bring the resource out of
   the INTERMEDIATE state.

CRS-02801: No instance of the resource 'string' should be running
   Cause: An attempt was made to relocate resource and the resource's instances to
   be relocated have TARGET=OFFLINE.
   Action: Restart the resource to change the value of the TARGET attribute to
   ONLINE. Examining the value of the INTERNAL_STATE attribute can be used to
   determine if the instances are being operated on currently.

CRS-02802: Purging events not published within 15 minutes
   Cause: The events could not be published to the Event Manager Daemon either
   because it is down or there are errors doing the publish.
   Action: Check the status of the Event Manager Daemon.

CRS-02803: Attribute 'string' has already been declared in a derived type 'string'
   Cause: An attempt was made to add a new attribute definition to a resource type
   that has an identically named attribute already defined in one or more derived
   types. Attributes declared in base types can be overridden in derived ones, but the
   opposite is not allowed.
   Action: Pick a different attribute name or delete the derived type(s), resubmit, and
   then add derived types back.

CRS-02805: Unable to start 'string' because it has a 'string' dependency on resource
   type 'string' and no resource of that type can satisfy the dependency
   Cause: Start/relocate of the resource is impossible because it has a dependency on
   a resource type no resource of which can currently be used to satisfy the
   dependency.
   Action: This message will normally be coupled with one or more other messages
   that detail the nature of the problem for each existing resource of the type.

CRS-04000: Command string failed, or completed with errors.
   Cause: The specified command did not complete successfully. If the command
   performs multiple operations internally, one or more of those operations
   experienced an error that is reported in a previous message.
**Action:** Examine the error message(s) preceding this message and correct the problem(s) they describe.

**CRS-04016:** Key 'string' is missing in the OCR.
- **Cause:** Internal error.
- **Action:** Contact Oracle Support Services.

**CRS-04017:** Failed to get the value for key 'string' from OCR.
- **Cause:** Internal error.
- **Action:** Contact Oracle Support Services.

**CRS-04038:** Cannot delete invalid user 'string' from CRS Admin list.
- **Cause:** An attempt was made to delete an invalid username from the CRS Admin list.
- **Action:** Reissue the command with a valid username.

**CRS-04044:** CRS Administrator List: string
- **Cause:** Output message, not an error.
- **Action:** None

**CRS-04046:** Invalid Oracle Clusterware configuration.
- **Cause:** The Oracle Clusterware configuration is invalid.
- **Action:** Configure Oracle Clusterware or Oracle Restart.

**CRS-04047:** No Oracle Clusterware components configured.
- **Cause:** No Oracle Clusterware components have been configured.
- **Action:** Configure Oracle Clusterware or Oracle Restart.

**CRS-04200:** Failed to initialize a security context during wallet IPMI credentials creation.
- **Cause:** Internal error.
- **Action:** Contact Oracle Customer Support.

**CRS-04201:** Hash context initialization failure during wallet IPMI credentials creation
- **Cause:** Internal error.
- **Action:** Contact Oracle Customer Support.

**CRS-04202:** String hashing failed during wallet credentials creation
- **Cause:** Internal error.
- **Action:** Contact Oracle Customer Support.

**CRS-04203:** Hashing creation error during wallet credentials creation
- **Cause:** Internal error.
- **Action:** Contact Oracle Customer Support.

**CRS-04204:** Failed to initialize the IPMI credentials wallet: string
- **Cause:** While trying to initialize the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.
- **Action:** See the documentation and follow the directions for the displayed error.

**CRS-04205:** Failed to open the IPMI credentials wallet. The wallet does not exist.
Cause: The wallet does not exist.
Action: Configure the wallet for the IPMI device using ‘crsctl set’

CRS-04206: Error reading IPMI credentials wallet: 'string'
Cause: While trying to read the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.
Action: See the documentation and follow the directions for the displayed error.

CRS-04207: Error writing IPMI credentials wallet: 'string'
Cause: While trying to write the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.
Action: See the documentation and follow the directions for the displayed error.

CRS-04208: Unexpected error encountered during lookup of IPMI credentials in the wallet
Cause: Possible corruption in wallet or internal error.
Action: Reconfigure the IPMI wallet using ‘crsctl set’ and then retry the operation. If the retry fails call customer support.

CRS-04209: IPMI credentials not contained in the wallet
Cause: The wallet has not been configured.
Action: Configure the wallet for the IPMI device using ‘crsctl set’

CRS-04210: Failed to obtain the length of IPMI credentials while accessing the wallet.
Cause: Possible corruption in wallet or internal error.
Action: Reconfigure the IPMI wallet using ”crsctl set” and then retry the operation. If the retry fails call customer support.

CRS-04211: Failed to allocate memory
Cause: Insufficient system memory resources.
Action: Correct the system memory resources problem and retry.

CRS-04212: Failed to obtain the secret from the wallet.
Cause: Possible corruption in wallet or internal error.
Action: Reconfigure the IPMI wallet using ”crsctl set” and then retry the operation. If the retry fails call customer support.

CRS-04213: Secret from wallet has incorrect size
Cause: Possible corruption in wallet or internal error.
Action: Reconfigure the IPMI wallet using ”crsctl set” and then retry the operation. If the retry fails call customer support.

CRS-04214: crsctl string and string wallet versions of IPMI do not match.
Cause: A mismatch occurred between the IPMI versions of crsctl and the Cluster Synchronization Services Daemon.
Action: Check proper installation and configuration of crsctl and the Cluster Synchronization Services Daemon.

CRS-04215: Wallet secret encoding error
Cause: Internal error.
Action: Contact Oracle Customer Support.
CRS-04216: Unexpected error configuring the wallet contents
  Cause: Possible corruption in wallet or internal error.
  Action: Reconfigure the IPMI wallet using “crsctl set” and then retry the operation. If the retry fails call customer support.

CRS-04217: Unexpected error saving IPMI credentials wallet: string
  Cause: While trying to save the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.
  Action: See the documentation and follow the directions for the displayed error.

CRS-04218: Unable to access an IPMI device on this system
  Cause: A test for the availability of an IPMI device failed. This can occur if:
  - the IPMI device driver is not installed,
  - the installed device driver is not supported by Oracle,
  - IPMI is not supported on this platform or operating system,
  - no IPMI device is present, or
  - an IPMI device is present but not configured.
  Action: Verify that IPMI hardware supporting IPMI version 1.5 or greater is present and supported on this server, that the IPMI device is configured and the device driver is properly installed.

CRS-04219: Failed to open the wallet. User must be the creator of the wallet: string
  Cause: Not the owner/creator of the wallet. The cluster wallet subsystem returned an error included with this message.
  Action: Retry as the owner/creator of the wallet. If necessary, also see the documentation and follow the directions for the displayed error.

CRS-04221: Must specify a password
  Cause: No password entered in response to password prompt.
  Action: Specify a password which matches the local servers IPMI BMC password.

CRS-04222: Supplied password was greater than number bytes
  Cause: The password specified was too long for the IPMI device.
  Action: Supply a password with a length no greater than the indicated size while still matching the password used to configure the IPMI device. Retry.

CRS-04223: Username is greater than number bytes
  Cause: The username specified was too long for the IPMI device.
  Action: Supply a username with a length no greater than the indicated size while still matching the username used to configure the IPMI device. Retry.

CRS-04224: Unable to communicate with the Cluster Synchronization Services daemon to update IPMI values.
  Cause: crsctl modified the IPMI credential wallet but could not notify the Cluster Synchronization Services Daemon.
  Action: Retry after assuring the Cluster Synchronization Services Daemon is functioning by executing csscheck.

CRS-04225: Unexpected authorization error while creating the IPMI credentials wallet: string
Cause: Error creating the IPMI credentials wallet. The cluster wallet subsystem returned an unexpected error. The error is included with this message.
Action: See the documentation and follow the directions for the displayed error and retry.

CRS-04226: Unexpected authorization error while saving the IPMI credentials wallet: string
Cause: While attempting to save the IPMI credentials wallet, the cluster wallet sub-system returned an authorization error. The text of the authorization error text is included with this message. This error was unexpected, and might have been due to an internal error, because wallet creation should be authorized for anyone, and, if the wallet was pre-existing, it had already been read after proper authorization checks.
Action: Consult the documentation for the included message to investigate the root cause of the authorization error, and retry the "set" operation if indicated. If this fails, contact Oracle Support.

CRS-04227: Configuration data stored but IPMI IP address is required to complete the change. The change cannot be validated until the information is complete.
Cause: Not proceeding with Client's IPMI login change request because all information such as IPMI username, password and IP address need to be present.
Action: Please execute 'crsctl set css ipmiaddr' from crsctl.

CRS-04228: Value of attribute 'string' is missing
Cause: The user did not provide a value for the attribute.
Action: Provide a value using the format <attrName>=<value>, where <value> may be empty single quotes.

CRS-04229: The IPMI information change was successful
Cause: The IPMI address and authorization information have been validated and the change completed.
Action: None required.

CRS-04230: A device was found where the IPMI device should be, but the device is not an IPMI device
Cause: The IPMI driver may not be configured or supported by this host.
Action: Check the configuration of the IPMI driver and verify the server's support of an IPMI version 1.5 or greater device.

CRS-04231: IPMI device and/or driver found
Cause: An IPMI device and/or device driver was identified on the machine. Detection mechanisms for IPMI hardware vary by platform.
Action: None required.

CRS-04232: Configuration data stored but IPMI authorization information is required to complete the change. The change cannot be validated until the information is complete.
Cause: Not proceeding with Client's IPMI login change request because all information (IPMI username, password and IP address) need to be present.
Action: Please execute 'crsctl set css ipmiadmin' from crsctl.

CRS-04233: New IPMI configuration data stored, but failed validation by remote node.
Cause: The supplied configuration data was stored in the Oracle registry, but the resulting configuration could not be used for IPMI access by a remote node. The stored IP address and/or IPMI admin credentials is/are incorrect.
Action: The validating node is identified in the CRS alert log, and further details can be found in the alert log on that node. Verify the credentials for the local IPMI device and reset the configuration using commands ‘crsctl set css ipmiadmin’ and ‘crsctl set css ipmiaddr’

CRS-04234: IPMI configuration unset and registry entries deleted.
Cause: Requested operation successful. However, if the CRS stack was able to access and use the deleted configuration data, it will continue to do so until it is restarted.
Action: None required. Enter new configuration data or restart the CRS stack if desired.

CRS-04235: Failed to delete the IPMI configuration from the Oracle Registry: 'string'
Cause: An error was encountered in the Oracle registry sub-system while trying to clear IPMI configuration and delete the IPMI configuration entries. The detailed error message is included with this message.
Action: See the documentation and follow the directions for the displayed error.

CRS-04236: Oracle Clusterware configured to use IPMI
Cause: The Oracle Registry contains complete configuration data for IPMI.
Action: None required.

CRS-04237: Oracle Clusterware is not fully configured to use IPMI
Cause: The Oracle Registry does not contain complete configuration data for IPMI.
Action: None required.

CRS-04251: Failed to change the discovery string
Cause: An internal error happened during this operation.
Action: Please contact Oracle Support Services.

CRS-04252: Failed to update the profile with the new discovery string
Cause: An internal error happened when updating the discovery string in the profile.
Action: Please contact Oracle Support Services.

CRS-04253: The discovery string can not be changed because the voting files are on ASM
Cause: Changing the discovery string is allowed only if the voting files are not on ASM.
Action: None

CRS-04254: The discovery string has already been set to this value
Cause: The value being passed is the same as the current discovery string.
Action: Pass a different discovery string if necessary.

CRS-04255: Not able to find the current configured voting files with the provided discovery string
Cause: The supplied discovery string does not discover the voting files that are currently configured.
Action: Pass a different discovery string that includes the location of the current configured voting files.

CRS-04256: Updating the profile
Cause: An update to the profile is being performed.
Action: None

CRS-04257: Voting file discovery string successfully replaced
Cause: A request to replace a discovery string completed.
Action: None

CRS-04258: Addition and deletion of voting files are not allowed because the voting files are on ASM
Cause: A voting file add or delete request was issued, but voting files have been configured on ASM storage. Once voting files are configured for ASM, changes in the configuration can be made only with `crsctl replace votedisk`.
Action: Use `crsctl replace votedisk` to modify the voting file configuration.

CRS-04259: Only one ASM diskgroup may be specified
Cause: If the voting files will be on ASM, no more than one diskgroup should be specified.
Action: Specify the correct ASM diskgroup.

CRS-04260: Voting file string is already configured
Cause: The location provided is already configured as a voting file.
Action: Specify another location that is not a current voting file.

CRS-04261: Diskgroup string is already configured with voting files
Cause: The diskgroup name provided is already configured with voting files.
Action: Specify another location for the voting files.

CRS-04262: Failure when retrieving information from the GPnP profile
Cause: An internal error happened when accessing GPnP profile.
Action: Contact Oracle Support Services.

CRS-04263: This operation is not allowed
Cause: Replacing a list of non-ASM voting files with a different list of voting files is not supported.
Action: To change the list of non-ASM voting files and add new voting files, use `crsctl add css votedisk <vfile> ... <vfile>`.

CRS-04264: The operation could not be validated
Cause: An internal error happened during the validation of the discovery string.
Action: Contact Oracle Support Services.

CRS-04265: The operation cannot be performed because the profile is busy with another operation
Cause: Another operation on the profile is taking place.
Action: Let the other operation finish and retry.
CRS-04266: Voting file(s) successfully replaced
  Cause: A request to replace a voting file(s) completed.
  Action: None

CRS-04267: Error while updating the profile with ASM discovery string
  Cause: An internal error happened while updating the ASM discovery string.
  Action: Contact Oracle Support Services.

CRS-04268: '-name' option is supported only with APPQOSDB type wallets
  Cause: The '-name' option was specified in a wallet command for APPQOSDB type wallet.
  Action: Use the '-name' option only for actions on APPQOSDB type wallets.

CRS-04269: Successful get priority number string for Cluster Synchronization Services.
  Cause: The 'get' operation was performed successfully.
  Action: None

CRS-04402: The CSS daemon was started in exclusive mode but found an active CSS daemon on node string, number string, and is terminating
  Cause: The CSS daemon was started in exclusive mode, which requires that the clusterware stack is down on all other nodes to ensure data integrity. A CSS daemon was detected on another node, so the CSS daemon on this node is terminating.
  Action: is required, otherwise stop the Oracle clusterware stack that is running on the indicated node. The name and number of the active node may be unknown.

CRS-04404: The following nodes did not reply within the allotted time: string
  Cause: The clusterized command timed out before the specified nodes responded to the command.
  Action: Check if the nodes are online; also check for communications problems. Consider issuing the command locally on the specified node(s).

CRS-04405: The following nodes are unknown to Oracle High Availability Services: string
  Cause: The local Oracle High Availability Services is not in contact with Oracle High Availability Services on the specified nodes.
  Action: Check if the nodes are online and Oracle High Availability Services is running. Check for communications problems and consider issuing the command locally on the specified node(s).

CRS-04481: Unable to spawn a process.
  Cause: There was an internal error while spawning a process.
  Action: Report the error to Oracle Support.

CRS-04482: A child process terminated abnormally.
  Cause: A child process exited due to an internal error.
  Action: Report the error to Oracle Support.

CRS-04602: Failed number to add voting file string.
  Cause: An attempt to add a voting file failed. The number following "Failed" is a return code, which can be: 1 - internal OCSSD server error; 8 - rejected by OCSSD;
15- insufficient privileges for this operation; 19- version incompatibility between client and server;

**Action:** Respond based on the return code as follows: 15 - adjust privileges or use a different userid 19 - ensure that compatible versions are installed others - report to Oracle Support Services

**CRS-04608:** Failure *number* with Cluster Synchronization Services while deleting voting disk.

**Cause:** An attempt to delete a voting disk failed. The number following "Failed" is a return code, which can be: 1 - internal OCSSD server error; 8 - rejected by OCSSD; 15- insufficient privileges for this operation; 16- either the specified voting disk does not exist or you tried to delete a majority of voting disks; 19- version incompatibility between client and server;

**Action:** Respond based on the return code as follows: 15 - adjust privileges or use a different userid 16 - review the voting disk configuration displayed by 'crsctl query css votedisk' and correct your request accordingly 19 - ensure that compatible versions are installed others - report to Oracle Support Services

**CRS-04615:** Failure *number* in clsvswversion for node *string*

**Cause:** Internal error.

**Action:** Contact Oracle Support Services.

**CRS-04625:** Failure to allocate *number* bytes for username.

**Cause:** System is out of memory.

**Action:** Free up memory on system and retry.

**CRS-04626:** The requested setting must be between *number* and *number*.

**Cause:** An attempt to change a setting to an out of bounds value.

**Action:** Retry with the setting within the proper limits.

**CRS-04627:** Unable to lock the configuration before making changes. *number*

**Cause:** Failure in a CSS API acquiring a lock.

**Action:** Retry or contact support for information on the error code.

**CRS-04628:** Change to configuration failed, but was successfully rolled back.

**Cause:** See accompanying messages for explanation of cause.

**Action:** No action is required. This indicates that no damage was done.

**CRS-04629:** Unable number to mark unformat information on voting file *string*

**Cause:** Probably an unreadable / unwritable voting file was being removed.

**Action:** If cause is correct, this is ignorable, but not ideal.

**CRS-04630:** Unable to apply correct permissions to new voting file *string*.

**Cause:** An attempt to set permissions on a new voting file failed. This message is accompanied by others that provide OS-specific details of the error.

**Action:** Examine the OS-specific error and correct it if possible; otherwise, specify a different voting file.

**CRS-04631:** Unable number to undo initialization of voting file.

**Cause:** Could not roll back format of voting file.

**Action:** Disk should be cleaned out before an attempt to add again.
CRS-04632: Unable number to roll back OCR settings for voting file.
   Cause: Could not remove temporary changes to OCR adding voting file.
   Action: Shut down the cluster and restart. New voting file must be removed with "crsctl delete css votedisk".

CRS-04633: This could take several minutes.
   Cause: CRS daemons is engaged in an activity take could potentially take a long time.
   Action: None

CRS-04634: Retrying stop resources.
   Cause: crsctl command is trying again to stop resources.
   Action: None

CRS-04635: Internal error 'number' while attempting to send shutdown request
   Cause: This is an internal error.
   Action: If retrying does not work, contact Oracle support

CRS-04636: Failure number in clsvrelversion
   Cause: Internal error.
   Action: Contact Oracle Support Services.

CRS-04637: Oracle High Availability Services release version on the local node is [string]
   Cause: Output message, not an error.
   Action: None

CRS-04651: No resources found on server 'string'.
   Cause: The server has no resources associated with it.
   Action: Provide a server with resources running.

CRS-04652: Failure number in clsvswversion for the local node
   Cause: Internal error.
   Action: Contact Oracle Support Services.

CRS-04653: Server name 'string' contains invalid characters.
   Cause: The name provided contains invalid characters.
   Action: Use a server name with only alphanumeric characters.

CRS-04654: Server 'string' could not be found.
   Cause: The name provided is not a known server's name.
   Action: Use a known server's name.

CRS-04655: Resource 'string' could not be found.
   Cause: The name provided is not a known resource's name.
   Action: Use a known resource's name.

CRS-04656: Resource 'string' is not running on server 'string'.
   Cause: The resource is not on the server the user specified.
   Action: User must type a known server.
CRS-04657: Source and destination servers are the same.
   Cause: The source and destination servers may not be the same.
   Action: Specify a different destination server.

CRS-04658: The clusterware stack on node string is not completely down.
   Cause: There is indication that the clusterware stack is still up.
   Action: Please shutdown the entire clusterware stack before deleting the node.

CRS-04659: Error while trying to unpin node string.
   Cause: An internal error happened during this operation.
   Action: Please contact Oracle Support Services.

CRS-04660: Could not find node string to delete.
   Cause: The node to be deleted could not be found because it has not been a member of this cluster recently.
   Action: Please check the name provided. If the name is correct, the node has been automatically deleted because it was inactive for a long time and no further action is required to delete the node from the cluster.

CRS-04661: Node string successfully deleted.
   Cause: A request to delete a node completed.
   Action: None

CRS-04662: Error while trying to delete node string.
   Cause: Some internal error happened during this operation.
   Action: Please contact Oracle Support Services.

CRS-04663: Could not find node string to pin.
   Cause: The indicated node is not an active node in the cluster.
   Action: Ensure that the node name is correct and that Oracle Clusterware is running on the node.

CRS-04664: Node string successfully pinned.
   Cause: A request to pin a node completed.
   Action: None

CRS-04665: Error while trying to pin node string.
   Cause: An internal error happened during this operation.
   Action: Please contact Oracle Support Services.

CRS-04666: Could not find node string to unpin.
   Cause: The indicated node is not an active node in the cluster.
   Action: Ensure that the node name is correct and that Oracle Clusterware is running on the node.

CRS-04667: Node string successfully unpinned.
   Cause: A request to unpin a node completed.
   Action: None

CRS-04668: This ASM diskgroup does not contain voting disks to be deleted
   Cause: The ASM diskgroup name provided does not contain voting files.
Action: Provide the right ASM diskgroup name.

**CRS-04669: Failed to set parameter string to number due to conflicting parameter string; the new value for string must be less than number.**

Cause: An attempt was made to set a new value to a configuration parameter which conflicts with another parameter's current value.

Action: Set the value of this parameter to a lower value than what is indicated in the message.

**CRS-04670: Failed to unset parameter string due to conflicting parameter string currently set to number.**

Cause: An attempt was made to unset a configuration parameter which conflicts with another parameter's current value.

Action: Set the conflicting parameter to a value which can coexist with proposed parameter change before submitting this parameter change.

**CRS-04671: This command is not supported for ASM diskgroups.**

Cause: The command 'crsctl add css votedisk' contains one or more ASM diskgroups in the list of voting files. Voting files may be migrated to and from ASM, but diskgroups cannot be added or deleted.

Action: Use an appropriate 'crsctl set' command to add ASM diskgroups. Use 'crsctl replace votedisk' command to migrate voting files to ASM.

**CRS-04672: Successfully backed up the Voting File for Cluster Synchronization Service.**

Cause: The backup of the voting file completed successfully.

Action: None

**CRS-04673: Oracle High Availability Services version on the local node is [string].**

Cause: Output message, not an error.

Action: None

**CRS-04674: Cannot add invalid user 'string' to CRS Admin list.**

Cause: An attempt was made to add an invalid username to the CRS Admin list.

Action: Reissue the command with a valid username.

**CRS-04675: Failed to get logfilesize for Cluster Synchronization Services.**

Cause: An internal error happened during this operation for Cluster Synchronization Services.

Action: Please contact Oracle Support Services.

**CRS-04676: Successful get logfilesize number for Cluster Synchronization Services.**

Cause: The operation is done successfully for Cluster Synchronization Services.

Action: None

**CRS-04677: Failed to get string for Cluster Synchronization Services.**

Cause: An internal error happened during this operation for Cluster Synchronization Services.

Action: Please contact Oracle Support Services.

**CRS-04678: Successful get string number for Cluster Synchronization Services.**

Cause: The 'get' operation was performed successfully.
CRS-04679: Failed to unset logfilesize for Cluster Synchronization Services.
  Cause: An internal error happened during this operation for Cluster Synchronization Services.
  Action: Please contact Oracle Support Services.

CRS-04680: Successful unset logfilesize for Cluster Synchronization Services.
  Cause: The 'unset' operation was performed successfully.
  Action: None

CRS-04681: Failed to unset priority for Cluster Synchronization Services.
  Cause: An internal error happened during this operation for Cluster Synchronization Services.
  Action: Please contact Oracle Support Services.

CRS-04682: Successful unset priority for Cluster Synchronization Services.
  Cause: The 'unset' operation was performed successfully.
  Action: None

CRS-04683: Failed to set parameter string to number for Cluster Synchronization Services.
  Cause: An internal error happened during this operation for Cluster Synchronization Services.
  Action: Please contact Oracle Support Services.

CRS-04684: Successful set of parameter string to number for Cluster Synchronization Services.
  Cause: The 'set' operation was performed successfully for Cluster Synchronization Services.
  Action: None

CRS-04685: Failed to set logfilesize number for Cluster Synchronization Services.
  Cause: An internal error happened during this operation for Cluster Synchronization Services.
  Action: Please contact Oracle Support Services.

CRS-04686: Successful set logfilesize number for Cluster Synchronization Services.
  Cause: The 'set' operation was performed successfully for Cluster Synchronization Services.
  Action: None

CRS-04687: Shutdown command has completed with errors.
  Cause: Processing of a shutdown command has completed with errors.
  Action: Refer to preceding error message(s) for information about the errors that occurred.

CRS-04688: Oracle Clusterware is already stopped on 'string'
  Cause: Oracle Clusterware is not running on the indicated server.
  Action: None

CRS-04689: Oracle Clusterware is already stopped
Cause: Oracle Clusterware is not running.
Action: None

CRS-04690: Oracle Clusterware is already running on 'string'
Cause: Oracle Clusterware is already running on the indicated server.
Action: None

CRS-04691: Oracle Clusterware is already running
Cause: Oracle Clusterware is already running.
Action: None

CRS-04692: Cluster Ready Services is online in exclusive mode
Cause: Cluster Ready Services is limited to providing internal services to other Oracle Clusterware components. External Cluster Ready Services are not available.
Action: When in exclusive mode, Oracle Clusterware components are dedicated to the repair or reconfiguration of the Oracle Cluster Registry, voting files or both. Oracle Clusterware should be down and remain down on every other cluster node. Only commands that check or stop the stack, interact with Cluster Synchronization Services or aid in Clusterware repair or reconfiguration should be issued.

CRS-04693: Failed to back up the voting file for Cluster Synchronization Service.
Cause: This is an internal error.
Action: Contact Oracle Support Services.

CRS-04694: Number of voting files cannot exceed number. Failed to add voting files.
Cause: The request to add voting files would cause the maximum number allowed to be exceeded.
Action: Specify fewer voting files to add so that the maximum is not exceeded, or include the -purge option on 'crsctl add css votedisk' to replace the existing set of files with an allowable number of new files.

CRS-04695: Voting disk addition failed because this disk string is a duplicate of an existing voting disk with matching File Universal ID string.
Cause: This disk is already a part of the current cluster.
Action: None needed.

CRS-04696: Failed to set parameter string to number due to conflicting parameter string; the new value for string must be greater than number.
Cause: An attempt was made to set a new value to a configuration parameter which conflicts with another parameter’s current value.
Action: Set the value of this parameter to a higher value than what is indicated in the message.

CRS-04697: This command must be executed by Operating System user 'string'.
Cause: A crsctl command was executed by the wrong Operating System user.
Action: The specified Operating System user should execute the command.

CRS-04700: The Cluster Time Synchronization Service is in Observer mode.
Cause: Vendor time synchronization software exists on at least one of the nodes in the cluster.
Action: None
CRS-04701: The Cluster Time Synchronization Service is in Active mode.
    Cause: Vendor time synchronization software is not detected on any of the nodes in the cluster.
    Action: None

CRS-04703: The Cluster Time Synchronization Service is Offline.
    Cause: The Cluster Time Synchronization Service is not running on the current node.
    Action: None

CRS-04704: Shutdown of Clusterware failed on node string.
    Cause: The shutdown did not complete successfully. One or more of the internal operations experienced an error that is reported in previous messages.
    Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04705: Start of Clusterware failed on node string.
    Cause: The start did not complete successfully. One or more of the internal operations experienced an error that is reported in previous messages.
    Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04730: Command aborted due to an internal error
    Cause: An inconsistent internal state was detected.
    Action: Call Oracle Support Services.

CRS-04731: Specified file string could not be created.
    Cause: JAZN configuration file required by the OC4J container could not be created.
    Action: Ensure that the directory path exists and that its permissions will allow the file to be created by oracle owner of clusterware home.

CRS-04732: Could not be open file string.
    Cause: JAZN configuration file required by the OC4J container could not be opened.
    Action: Ensure that the directory path exists and that its permissions will allow the file to be created by oracle owner of clusterware home.

CRS-04733: File string does not exist.
    Cause: The JAZN configuration file required by the OC4J container does not exist.
    Action: Ensure that the directory path exists and that its permissions will allow the file to be created oracle owner of the clusterware home.

CRS-04734: Filename was not specified.
    Cause: filename was not supplied or was an empty string.
    Action: Re-try the command by specifying a valid JAZN configuration filename.

CRS-04735: Expected OCR key does not exist
    Cause: An infrastructure error occurred because a required OCR key was missing.
    Action: Call Oracle Support Services.

CRS-04736: Operation on OCR key failed
Cause: Operation on OCR key failed due to an OCR error.
Action: Re-issue the command as oracle owner of clusterware home.

CRS-04737: Failed to allocate number bytes of memory
Cause: Could not allocate memory for internal buffers due to insufficient system memory resources
Action: Correct the system memory resources problem and retry the command

CRS-04738: Size of file string is too large
Cause: Specified file size exceeds 65536 bytes.
Action: Re-issue the command after reducing the size of the file.

CRS-04739: Could not close file string
Cause: Due to an internal error the specified file could not be closed
Action: Re-issue the command after verifying disk space, permissions and path.

CRS-04740: I/O operation on file string failed.
Cause: Due to an internal error an I/O operation on the specified file failed.
Action: Call Oracle Support if the problem persists.

CRS-04741: Insufficient permissions on OCR key
Cause: Operation on OCR key failed due to insufficient permissions.
Action: Re-issue the command as oracle owner of clusterware home.

CRS-04742: OCR updated with contents of string (New = number, Old = number bytes)
Cause: set jazn command was issued and OCR key was updated.
Action: None Required.

CRS-04743: File string was updated from OCR(Size: number(New), number(Old) bytes)
Cause: get jazn command was issued and specified file was updated with the contents from OCR key.
Action: None Required.

CRS-04922: string module: string ignored; module level out of bounds (range 0 - 65535)
Cause: Module log/trace level was out of bounds (range 0 - 65535).
Action: Specify a log/trace level within the valid range (0 - 65535).

CRS-04923: string module: string ignored; module level is invalid (range 0 - 65535)
Cause: Module log/trace level was invalid (range 0 - 65535).
Action: Specify a log/trace level within the valid range (0 - 65535).

CRS-04925: 'all' module keyword was specified with other module names
Cause: The module keyword 'all' already refers to all module names.
Action: When referring to all modules, use 'all' without duplicate references to other module names.

CRS-04980: Duplicate value string specified for resource attribute string
Cause: A duplicate value was specified for a resource attribute.
**Action:** Specify only one value for a resource attribute.

**CRS-04981:** Duplicate value *string* specified for type attribute keyword *string*

**Cause:** A duplicate value was specified for a type attribute keyword.

**Action:** Specify only one value for DEFAULT_VALUE, FLAGS and TYPE per type attribute.

**CRS-04982:** Valid type attribute keyword *string* specified outside a type attribute

**Cause:** A valid type attribute keyword was specified outside a type attribute.

**Action:** Specify the ATTRIBUTE type attribute keyword before specifying the DEFAULT_VALUE, FLAGS or TYPE type attribute keywords.

**CRS-04983:** Invalid type attribute keyword *string* specified

**Cause:** An invalid type attribute keyword was specified.

**Action:** Specify only the valid type attribute keywords ATTRIBUTE, DEFAULT_VALUE, FLAGS and TYPE.

**CRS-04984:** Duplicate definition for type attribute *string*

**Cause:** The same type attribute was named on more than one ATTRIBUTE keyword.

**Action:** Define a type attribute only once.

**CRS-05000:** Expected resource *string* does not exist in agent process

**Cause:** The expected resource must have been created by Oracle Configuration tools.

**Action:** Check that the resource was not manually deleted. If not the case call Oracle Support.

**CRS-05001:** Expected dependency in resource *string* on a resource of type *string* does not exist

**Cause:** The expected resource dependency must have been created by Oracle Configuration tools.

**Action:** Check that the resource dependency was not manually removed.

**CRS-05002:** Agent action was aborted

**Cause:** Agent action was aborted either due to action timeout expiry or the user canceled the action.

**Action:** Retry the operation.

**CRS-05003:** Invalid attribute value: *'string'* for attribute *string*

**Cause:** An attribute value passed to the Agent was NULL or invalid.

**Action:** Give the correct value to the attribute and retry.

**CRS-05004:** Cannot find listener endpoint for listener *string*

**Cause:** listener endpoint not found.

**Action:** Check listener.ora for that listener.

**CRS-05005:** IP Address: *string* is already in use in the network

**Cause:** The VIP resource attempted to use an IP address already in use in the network.

**Action:** Use srvctl to re-create vip or scanvip specifying an IP address which is not being used in the network and retry the operation.
CRS-05006: Unable to automatically select a network interface which has subnet mask string and subnet number string

Cause: The subnet mask and subnet number configured for the resource did not match the subnet mask and subnet number of any network interface on this node.

Action: Provide a subnet mask and subnet number which matches at least one network interface's subnet mask and subnet number using srvctl remove and add vip and retry the operation.

CRS-05007: Cannot remove the primary IP string from the network interface

Cause: The primary IP of the network interface was incorrectly configured as the VIP.

Action: Use 'srvctl remove' and 'srvctl add vip' or 'srvctl remove' and 'srvctl add scan' to provide the correct IP address for the VIP and retry the operation.

CRS-05008: Invalid attribute value: string for the network interface

Cause: The network interface value did not match the subnet mask and subnet number of any network interface on the node.

Action: Modify the network interface's value such that the subnet mask and subnet number of at least one network interface on the node using 'srvctl remove' and 'srvctl add vip' and retry the operation.

CRS-05009: The VIP address string does not belong to the subnet string

Cause: The VIP's subnet number and the network interface's subnet number did not match.

Action: Make the VIP's subnet number match the network interface's subnet number using 'srvctl remove' and 'srvctl add vip' or 'srvctl remove' and 'srvctl add scan' and retry the operation.

CRS-05010: Update of configuration file "string" failed: details at "string" in "string"

Cause: An attempt to open the specified file failed. Common causes are that the file does not exist, or the file permissions prohibit access.

Action: Check that the file exists and has the proper permissions.

CRS-05011: Check of resource "string" failed: details at "string" in "string"

Cause: The check of the database or Automatic Storage Management instance failed.

Action: Check the database or ASM instance alert log and the referenced Oracle Clusterware trace file for additional information. Recover the instance if necessary.

CRS-05012: Check of service resource "string" failed: details at "string" in "string"

Cause: The check of the preconnect service failed because it could not run on the same node as the main service.

Action: Check the referenced Oracle Clusterware trace file for additional information. Start the preconnect service on a different node.

CRS-05013: Agent "string" failed to start process "string" for action "string": details at "string" in "string"

Cause: The named agent failed to start the named process for the named action.

Action: Check the referenced Oracle Clusterware trace file for additional operating system specific information. Refer to operating system documentation to correct the error.
CRS-05014: Agent "string" timed out starting process "string" for action "string":
details at "string" in "string"
Cause: The named agent aborted the named process because the process failed to respond within the timeout period.
Action: Check the agent log files for further information

CRS-05015: Agent timed out waiting for a response from the DHCP server
Cause: Agent and the DHCP server were not able to communicate with each other. Common causes of this failure are due to the DHCP server not running, or improper DHCP server configuration, or the DHCP server running out of DHCP leases.
Action: Identify the cause of the problem from the DHCP server log files. If the problem is due to the DHCP server running out of leases, increase the number of addresses which can be served by the DHCP server.

CRS-05016: Process "string" spawned by agent "string" for action "string" failed:
details at "string" in "string"
Cause: The named process failed to complete successfully.
Action: Check details in the agent log for error information from the spawned process.

CRS-05017: The resource action "string string" encountered the following error:
string
Cause: The following error occurred during the resource action.
Action: Examine the accompanying error messages and respond accordingly.

CRS-05018: string Removed unused HAIP route: string / string / string / string
Cause: A potentially conflicting route in the same subnet as the HAIP addresses was found and removed to prevent routing conflicts.
Action: Validate that the route described was not actually in use.

CRS-05501: Unable to connect to eONS server on port number
Cause: The eONS server may not be active or listening on a different port.
Action: Ensure that the eONS resource is ONLINE and listening on the above port.

CRS-05502: Invalid event template string
Cause: The event template specified is invalid.
Action: The event template format must be <PROPERTY | ELEMENT>(<attribute name>=<literal | %resource attribute name%>) ...

CRS-05503: Error creating the eONS subscriber
Cause: The eONS server may not be active.
Action: Ensure that the CRS eONS resource is in ONLINE state.

CRS-05504: Node down event reported for node 'string'.
Cause: The specified node was not responsive.
Action: Restart the specified node.

CRS-05601: MDNS: string
Cause: None, generic bypass mdns message.
Action: None
CRS-05602: mDNS service stopping by request.
  
  **Cause:** MDNSD stopping by OHASD request.
  
  **Action:** None

CRS-05705: Failed to get required resources
  
  **Cause:** There was an internal error while evaluating the required resources for the subject resource.
  
  **Action:** Contact Oracle Support Services.

CRS-05706: No more members to consider
  
  **Cause:** There was no host found on which to start the resource based on the placement policy.
  
  **Action:** Check the placement policy and the required resources for the subject resource.

CRS-05707: Failed after successful dependency consideration
  
  **Cause:** There was no host found on which to start the resource based on the placement policy.
  
  **Action:** Check the placement policy and the required resources for the subject resource.

CRS-05709: Resource 'string' is already running on member 'string'
  
  **Cause:** An attempt was made to start a resource on a host while it is already running on that host.
  
  **Action:** This is an insignificant error. Check the operation being performed.

CRS-05801: Agent path is null or does not resemble a filesystem path
  
  **Cause:** Unable to spawn the agent program because of incorrect agent path.
  
  **Action:** Fix the agent path using 'crsctl modify type'.

CRS-05802: Unable to start the agent process
  
  **Cause:** An attempt to start the agent process failed.
  
  **Action:** Ensure that the agent path is correct and has the proper permissions, and retry the command.

CRS-05805: Missing the required action callback in agent
  
  **Cause:** Unable to execute resource's command.
  
  **Action:** Ensure that agent executable or action script contains the missing function.

CRS-05809: Failed to execute 'string' value of 'string' for 'string'. Error information 'string'
  
  **Cause:** Unable to spawn the resource action script due to incorrect path value and/or incorrect permissions.
  
  **Action:** Correct the action script path and/or permissions using 'crsctl modify type'.

CRS-05810: Attempt to add a duplicate resource 'string'. Details at string in string.
  
  **Cause:** An identical resource was already being monitored.
  
  **Action:** Rename the resource and retry the operation.
CRS-05811: Failed to read ORA_CRS_HOME from environment. Details at string in string.
Cause: The ORA_CRS_HOME environment variable was not set correctly.
Action: This variable is set during CRS installation. If necessary, reinstall CRS.

CRS-05812: Could not get local hostname. Details at string in string.
Cause: The hostname could not be read.
Action: Check that the hostname for the local machine is valid. If the problem persists, contact Oracle Support Services.

CRS-05813: Could not change directory to 'string'. Details at string in string.
Cause: The specified path is inaccessible to the agent process.
Action: Check that the specified path exists.

CRS-05814: Agent 'string' started with invalid arguments. Details at string in string.
Cause: An invalid parameter was supplied to the agent.
Action: Contact Oracle Support Services.

CRS-05815: Agent 'string' could not find any base type entry points for type 'string'.
Details at string in string.
Cause: Action entry points were not defined for this agent.
Action: No action necessary if this is a script agent. If this is not a script agent, define action points in your agent code.

CRS-05816: Agent 'string' could not start implicit monitoring for resource 'string'.
Details at string in string.
Cause: The resource was currently disabled and hence could not be monitored.
Action: Enable the resource.

CRS-05817: Caught exception from user code for command 'string'. Details at string in string.
Cause: An exception was thrown from the user code when an action entry point was called.
Action: This is due to an error in the agent user code. Modify the agent's code to resolve this.

CRS-05818: Aborted command 'string' for resource 'string'. Details at string in string.
Cause: Execution of the specified command was aborted due to a timeout.
Action: Restart the resource manually. If the problem persists, contact Oracle Support Services.

CRS-05819: Could not abort command 'string' for resource 'string'. Details at string in string.
Cause: Attempt to abort the specified command failed.
Action: Define an abort action entry point for the agent.

CRS-05820: Agent 'string' failed to initialize server process address. Details at string in string.
Cause: Agent could not connect to the server process.
Action: Contact Oracle Support Services.
CRS-05821: Agent 'string' is started with wrong user 'string'. Details at string in string.
   Cause: An incorrect owner was specified for the agent.
   Action: Make sure CRSD has enough privileges to spawn programs as the value specified as the 'owner' in the ACL attribute.

CRS-05822: Agent 'string' disconnected from server. Details at string in string.
   Cause: Agent could not connect to server process.
   Action: Contact Oracle Support Services.

CRS-05823: Could not initialize agent framework. Details at string in string.
   Cause: Initialization of the agent failed.
   Action: Contact Oracle Support Services.

CRS-05824: Could not initialize server connect string 'string'. Details at string in string.
   Cause: Incorrect server connect string was specified in the environment.
   Action: Contact Oracle Support Services.

CRS-05825: Agent 'string' is unresponsive and will be restarted. Details at string in string.
   Cause: The specified agent did not respond and will be restarted automatically.
   Action: None

CRS-05826: Agent 'string' could not read environment variable 'string'. Details at string in string.
   Cause: The agent could not read a required environment variable.
   Action: Contact Oracle Support Services.

CRS-05827: Could not find information for resource 'string'. Details at string in string.
   Cause: The specified resource was not found in the internal list of resources.
   Action: Check the agent parameters and restart the resource manually.

CRS-05828: Could not start agent 'string'. Details at string in string.
   Cause: Creation of the agent process failed.
   Action: Contact Oracle Support Services.

CRS-05829: Failed to get definition for resource 'string'. Details at string in string.
   Cause: The definition of the resource could not be determined.
   Action: Delete the resource and add it again using the crsctl command.

CRS-05830: Invalid path 'string' found for agent filename. Details at string in string.
   Cause: The path that was specified for the agent was incorrect.
   Action: Check that the path exists and is readable.

CRS-05831: Agent 'string' has exceeded maximum failures and has been disabled. Details at string in string.
   Cause: The specified agent has failed too many times.
   Action: Contact Oracle Support Services.
CRS-05832: Agent 'string' was unable to process commands. Details at string in string.
    Cause: Agent was unable to process commands.
    Action: Contact Oracle Support Services.

CRS-06001: User does not have permission to start CRSD.
    Cause: Unable to start CRSD due to insufficient permissions.
    Action: Start CRSD as a privileged user.

CRS-06007: Could not communicate with Event Manager.
    Cause: Unable to communicate with Event Manager daemon.
    Action: Run the 'crsctl check evmd' command to determine whether Event Manager daemon is properly configured and is running.

CRS-06015: Oracle Clusterware has experienced an internal error. Details at string in string.
    Cause: This is an internal error.
    Action: Contact Oracle Support Services.

CRS-06021: Could not set system resource limits for Clusterware: "ulimit -string string".
    Cause: A ulimit command issued internally to set system resource limits failed.
    Action: Ensure that the correct resource limit values are set in the user profile and limits.conf.

CRS-08000: unable to obtain local host name for reboot advisory log file scan
    Cause: An attempt to retrieve the local host name failed. The scan for reboot advisory files will not use host name criteria and so may report occurrences for other nodes as well as this one.
    Action: Report this error to Oracle Support Services.

CRS-08001: an error occurred accessing reboot advisory log file location: string
    Cause: The scan for reboot advisory log files was unable to access the indicated file system location. The location was skipped, so any reboot advisory files that it contains will not be reported. This message is accompanied by CLSU- messages containing details of the access error.
    Action: Respond based on the error described by the accompanying CLSU-messages. This may involve re-creating the directory or changing its permissions.

CRS-08002: an error occurred searching reboot advisory log file location: string
    Cause: The scan for reboot advisory log files was unable to read the next file name from the indicated file system location. No further processing of reboot advisory files from that location occurs. This message is accompanied by CLSU- messages containing details of the access error.
    Action: Respond based on the error described by the accompanying CLSU-messages.

CRS-08003: reboot advisory log file: string is unexpectedly empty
    Cause: The scan for reboot advisory log files encountered a file that was empty. This might happen (rarely) if a component is initializing its use of reboot advisory at the same time the scan is running. Processing of other files in the location continues.
Action: Frequent occurrence of this message should be reported to Oracle Support Services.

CRS-08004: an error occurred reading reboot advisory log file: string
    Cause: The scan for reboot advisory log files experienced a read error on a reboot advisory file. No further processing is done for that file, but the scan continues with other files. This message is accompanied by CLSU- messages containing details of the read error.
    Action: Respond based on the accompanying CLSU- messages.

CRS-08005: an error occurred closing reboot advisory log file: string
    Cause: The scan for reboot advisory log files experienced a close error on a reboot advisory file. The scan continues with other files. This message is accompanied by CLSU- messages containing details of the close error.
    Action: Report this error to Oracle Support Services.

CRS-08006: an error occurred opening reboot advisory log file: string
    Cause: The scan for reboot advisory log files experienced an error when it opened a reboot advisory file. The scan continues with other files. This message is accompanied by CLSU- messages containing details of the open error.
    Action: If the error indicated in the accompanying CLSU- messages is one that can be corrected, do so. Otherwise, report this error to Oracle Support Services.

CRS-08007: an error occurred closing reboot advisory log file location: string
    Cause: The scan for reboot advisory log files experienced an error when it closed the indicated file system location. Processing of other reboot advisory locations (if any) continues normally. This message is accompanied by CLSU- messages containing details of the close error.
    Action: Report this error to Oracle Support Services.

CRS-08008: string
    Cause: Operating system error data related to reboot advisory file processing was returned. The error data is packaged in a CLSU- message that follows "CRS-08008:". One or more of these messages appears after a message announcing the error condition.
    Action: Look up the embedded CLSU- message for an explanation of the operating system error data. If there is no CLSU- message ID present, contact Oracle Support Services.

CRS-08009: reboot advisory log file: string contains invalid data (length number, error code number)
    Cause: A reboot advisory log record read from the indicated file contained incorrect data.
    Action: Report this error to Oracle Support Services.

CRS-08010: invalid network reboot advisory message detected (length number, error code number)
    Cause: A reboot advisory record received over the network was improperly formed or contained incorrect data.
    Action: Report this error to Oracle Support Services.

CRS-08011: reboot advisory message from host: string, component: string, with time stamp: string
**Cause:** A reset or reboot of the affected host, and respond accordingly. Refer to the discussion of reboot advisories in the Oracle Clusterware administration documentation for additional guidance.

**Action:** Use the reboot advisory message(s) to determine why Oracle Clusterware

**CRS-08012: reboot advisory message from a higher Oracle Clusterware version detected**

**Cause:** A reboot advisory message from a higher version installation of Oracle Clusterware was detected. This is an expected occurrence with network reboot advisories when there are nodes with a higher Oracle Clusterware version than this node (such as during an upgrade). It is an unexpected condition with file reboot advisories.

**Action:** The reboot advisory message is displayed in a following CRS-08013 message in a "raw" text form. In the case of network reboot advisories, the explanatory message text should be readable and useful to determine the cause of the node reboot. If the reboot advisory message is from a file, report this message to Oracle Support Services.

**CRS-08013: reboot advisory message text: string**

**Cause:** An explanatory text message associated with a reboot advisory announced in a preceding CRS-08011 or CRS-08012 message was displayed. These text messages are always written in US English locale.

**Action:** Refer to the descriptions of messages CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

**CRS-08014: reboot advisory binary data (number bytes string) follows:**

**Cause:** Binary data associated with a reboot advisory message was displayed. It is followed by one or more lines of CRS-08015 message containing the binary data formatted in hexadecimal. If an asterisk appears inside the parentheses, an invalid data length was detected.

**Action:** Refer to the description of message CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

**CRS-08015: number string**

**Cause:** Hexadecimal display of binary data included in a reboot advisory log message was displayed. The first number is an offset and is followed by up to 16 bytes of data.

**Action:** Refer to the description of message CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

**CRS-08016: an error occurred determining the location for reboot advisory log files**

**Cause:** The search for reboot advisory log files was unable to determine the file system location used for those files. Processing of reboot advisory files is skipped. This message is accompanied by CLSU- messages containing failure details. This is an internal error.

**Action:** Report this error to Oracle Support Services.

**CRS-08017: location: string has number reboot advisory log files, number were announced and number errors occurred**

**Cause:** This summary message is written during Oracle Clusterware startup if one or more reboot advisory log files was found and examined.

**Action:** This message is informational, but if the error count is nonzero the associated messages (earlier in the alert log) should be examined.
CRS-08018: warning: missing cluster identity data for reboot advisory message validation
Cause: During Oracle Clusterware start up, an attempt to obtain the identity of the cluster failed. Processing continues normally, but network reboot advisories from nodes in other clusters may be reported in this cluster's alert log.
Action: Report this error to Oracle Support Services.

CRS-08019: warning generated by the initialization of the reboot advisory in the CSS agent, string
Cause: During initialization of the reboot advisory, a warning was generated
Action: Report this warning to Oracle Support Services.

CRS-08020: error generated by the initialization of the reboot advisory in the CSS agent, string
Cause: During initialization of the reboot advisory, an error was generated.
Action: Report this error to Oracle Support Services.

CRS-09000: Failed to allocate memory.
Cause: During initialization, memory could not be allocated.
Action: Report this error to Oracle Support Services.

CRS-09001: Internal Error
Cause: An internal error occurred.
Action: Report this error to Oracle Support Services.

CRS-09004: Error reading from standard input
Cause: Could not read commands from the command line.
Action: Report this error to Oracle Support Services.

CRS-09005: Quoted string not ended
Cause: An unmatched " was found in the command entered.
Action: Put in the corresponding quote or remove the unmatched quote.

CRS-09008: Unknown verb string
Cause: Unknown or invalid verb passed to oclumon.
Action: Use 'oclumon -h' in command line or help command in interactive mode to see the supported verbs.

Cause: Invalid or unknown arguments passed.
Action: Refer to product documentation or to command online help for an explanation of verbs and arguments.

CRS-09010: Error string: mandatory data not supplied
Cause: Mandatory data not supplied to the command.
Action: Refer to product documentation or to command online help for an explanation of verbs and arguments.

CRS-09011: Error string: Failed to initialize connection to the Cluster Logger Service
Cause: Error occurred while connecting to the Cluster Logger Service.
**Action:** Ensure that Cluster Logger Service is running and reachable from the client node by using the ‘ping’ command for the given node.

**CRS-09012: Error string: Error sending query to the Cluster Logger Service**

**Cause:** Error occurred while sending query to the Cluster Logger Service.

**Action:** Ensure that the Cluster Logger Service is running and reachable from the client node by using the ‘ping’ command for the given node.

**CRS-09013: Error string: Invalid data received from the Cluster Logger Service**

**Cause:** Invalid or unknown data received from the Cluster Logger Service.

**Action:** Ensure that the Cluster Logger Service is running and reachable from the client node by using the ‘ping’ command for the given node.

**CRS-09017: Error: Invalid or unknown reply received from the Cluster Logger Service**

**Cause:** Error occurred in the data received.

**Action:** Make sure that the version of both master and client installation is same. Also, check the connectivity between master and client.

**CRS-09018: Error string: No arguments supplied**

**Cause:** No argument was supplied with the command.

**Action:** Some commands need arguments with them. Refer to the product documentation or to the online help display.

**CRS-09019: Error string: No parameter string supported**

**Cause:** A wrong parameter was passed with the command.

**Action:** Refer to the command help and pass the correct parameters.

**CRS-09020: Error string: No master node name given**

**Cause:** The master node name was not passed in the command.

**Action:** Pass the appropriate master node name with the command.

**CRS-09021: Error string: Invalid or no start time given**

**Cause:** A start time was not provided or the time was passed in the wrong format.

**Action:** Pass the correct start time. For correct format, refer to command help.

**CRS-09022: Error string: Invalid or no end time given**

**Cause:** A end time was not provided or the time was passed in the wrong format.

**Action:** Pass the correct end time. For correct format, refer to command help.

**CRS-09023: Error string: Time not given or in wrong format or invalid**

**Cause:** Time was not provided or was invalid.

**Action:** Pass the correct and valid time. For correct format, refer to command help.

**CRS-09024: Error string: No node name given**

**Cause:** Node name not provided.

**Action:** Provide a node name in the command. Refer to the product documentation or to the command online help for information.

**CRS-09025: Error string: No disk ID name given**

**Cause:** Disk ID was not given in the command with -diskid.
Action: Pass a valid disk ID with -diskid option.

CRS-09026: Error string: No parameter given
Cause: The parameter was not passed in the query.
Action: Pass appropriate parameter for query. Refer to the product documentation or to the command online help for information.

CRS-09027: Error string: Parameter string is not supported with this verb
Cause: Invalid or unknown parameter passed.
Action: Pass the correct parameter. Refer to the product documentation or to the command online help for information.

CRS-09028: Error string: No NIC ID given
Cause: NIC ID was not given in the command with -nicid.
Action: Pass a valid NIC ID with -nic option.

CRS-09029: Error string: No PID given
Cause: PID was not given in the command with -pid.
Action: Pass a valid PID with -pid option.

CRS-09030: Error string: No region given
Cause: Incorrect or no region given with -c option.
Action: Pass a valid region with -c option. Refer to the product documentation or to the command online help for information.

CRS-09031: Argument string not supported with this verb string. -h for help.
Cause: Unknown or invalid argument passed with the command.
Action: Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09032: Invalid hour given in the time argument
Cause: Invalid hour in the time string was passed.
Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09033: Invalid minutes given in the time argument
Cause: Invalid minutes in the time string was passed.
Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09034: Invalid seconds given in the time argument
Cause: Invalid seconds in the time string was passed.
Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09035: Arguments not in proper format, or invalid arguments
Cause: Invalid arguments given.
Action: Pass a valid verb and correct arguments for it. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09036: Invalid CHM repository size given
Cause: Non-numeric value or value out of range given for CHM repository size.
Action: Give CHM repository size in the valid range. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09037: string Error: Node name not given. -disk, -nic and -proc need node name
Cause: The required node name was not provided for -disk, -nic, or -proc.
Action: Provide a node name with -n option. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09040: Error string: Band value not given or incorrect
Cause: The band value was not passed with -t option or was invalid.
Action: Provide a valid band value. Refer command help.

CRS-09041: Error string: The -repos argument was specified without an option.
Cause: -repos was not provided with the option, generating a parsing error.
Action: Provide a valid option to -repos. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09042: Error string: No size given with resize
Cause: A valid value was not provided with resize.
Action: Provide a valid numerical value with 'resize'. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09043: Error string: Non-numeric or invalid value for size: string
Cause: An invalid or non-numeric value was provided for size.
Action: Provide a valid numeric size. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09044: No key specified with -getkey
Cause: An option was not given with -getkey.
Action: Provide a valid key as an option with -getkey.

CRS-09045: No key given for -get
Cause: An option was not provided with -get.
Action: Provide a valid option with -get. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09046: Invalid key given
Cause: An unknown key was provided with -get.
Action: Provide a supported key with -get. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09047: Error string: Error Dumping Log (return code: number) for node string
Cause: An error occurred while dumping local log.
Action: Report this error to Oracle Support Services. CHM repository directory may be unreachable, unreadable or incorrect.

CRS-09048: Error string: No data received from the Cluster Logger Service after number attempts
Cause: Data was not received from the Cluster Logger Service after the given number of attempts or data was not available.
Action: None

CRS-09049: Error string: Cannot get environment variable CRFHOME
Cause: An internal error occurred.
Action: Report this error to Oracle Support Services.

CRS-09050: Error string: Too many host names
Cause: Too many host names were provided.
Action: Provide valid number of host names. Refer to the product documentation or to the command online help for information.

CRS-09051: Error string: Invalid interval size given
Cause: Non-numeric or invalid interval provided.
Action: Provide a valid numerical value for interval size. Refer to the product documentation or to the command online help for information.

CRS-09052: Error string: string control not supported
Cause: The given debug control was not supported.
Action: Provide a supported control. Refer to the product documentation or to the command online help for information.

CRS-09053: Key:value pair missing
Cause: A required key:value pair was missing.
Action: Provide a valid key:value pair. Refer to the product documentation or to the command online help for information.

CRS-09054: Incomplete or invalid parameters string
Cause: Incomplete or invalid parameters supplied.
Action: Provide the complete and correct parameters. Refer to the product documentation or to the command online help for information.

CRS-09055: module:level given in invalid format or invalid value
Cause: Invalid format or value specified for module:level.
Action: Provide correct module:level. Refer to the product documentation or to the command online help for information.

CRS-09056: Error string: Invalid CHM repository location given
Cause: Unknown or invalid CHM repository location provided.
Action: Provide a valid path for CHM repository location. Refer to the product documentation or to the command online help for information.

CRS-09057: Error string: No response received from the Cluster Logger Service
Cause: No data received from the Cluster Logger Service for the query.
Action: Ensure that the Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the given node.
CRS-09058: **Error string:** Changing log level failed due to authentication failure  
**Cause:** Log level could not be changed due to authentication failure.  
**Action:** Ensure that this command is run as root.

CRS-09059: **Error string:** Changing log level failed due to connection failure  
**Cause:** A connection failure occurred while changing the log.  
**Action:** Ensure that the daemons are running and are reachable from the client node by using the ‘ping’ command for the given node.

CRS-09060: **Error string:** Unable to send message due to memory allocation failure  
**Cause:** Memory could not be allocated for debug message.  
**Action:** Report this error to Oracle Support Services.

CRS-09061: **Error string:** Changing log level failed due to response time-out  
**Cause:** A time out happened while waiting for response.  
**Action:** Report this error to Oracle Support Services.

CRS-09062: **Error string:** Error in changing log level  
**Cause:** An error occurred while changing log level.  
**Action:** Report this error to Oracle Support Services.

CRS-09065: **Disk ID not found**  
**Cause:** Given disk ID was not found or not present in the interesting list.  
**Action:** Provide a disk ID which is available at the start of the query range.

CRS-09066: **Process ID not found**  
**Cause:** Given process ID was not found.  
**Action:** Provide a process ID which is available at the start of the query range.

CRS-09067: **NIC ID not found**  
**Cause:** Given NIC ID was not found.  
**Action:** Provide a correct NIC ID.

CRS-09100: **Error setting CHM repository size**  
**Cause:** An error occurred while setting CHM repository size on the Cluster Logger Service.  
**Action:** Report this error to Oracle Support Services.

CRS-09101: **Error updating CHM repository size in configuration file.**  
**Cause:** An error occurred while writing the CHM repository size to configuration files.  
**Action:** Report this error to Oracle Support Services.

CRS-09102: **No data for the node at the given time**  
**Cause:** Data was not found for the given node.  
**Action:** This is an informational message only.

CRS-09103: **No data available**  
**Cause:** Data was not available for the query.  
**Action:** Make sure the System Monitor Service is running on the given node.
CRS-09104: No data available for the given nodes
   Cause: Data was not available for given nodes.
   Action: Make sure the System Monitor Service is running on the given nodes.

CRS-09105: Internal Error on master
   Cause: An internal error on master caused this error.
   Action: Report this error to Oracle Support Services.

CRS-09106: Data outside CHM repository limit requested
   Cause: A request for data outside CHM repository limit caused this error.
   Action: Data needs to be requested in the proper CHM repository limits. Refer to the product documentation for more information.

CRS-09107: Start time greater than end time
   Cause: A start time greater [or later] than end time caused an error.
   Action: Make sure the start time is less than the end time for the given range query.

CRS-09108: Threshold out of acceptable range
   Cause: A threshold was specified that is outside the allowed range.
   Action: Make sure threshold is within the acceptable range. Refer documentation or online help for more information.

CRS-09109: New CHM repository location same as old location
   Cause: The new location given for CHM repository is same as old location.
   Action: Provide a different location for CHM repository. Refer documentation or online help for more information.

CRS-09111: Error updating CHM repository location in configuration file.
   Cause: An error occurred while writing the CHM repository location to config files.
   Action: Report this error to Oracle Support Services.

CRS-09600: Failed to initialize string daemon
   Cause: An error occurred during initialization.
   Action: Report this error to Oracle Support Services.

CRS-09603: Failed to read configuration files
   Cause: An error encountered while retrieving information from configuration files.
   Action: Report this error to Oracle Support Services.

CRS-09607: Cannot spawn thread for string
   Cause: An error encountered while spawning thread.
   Action: Report this error to Oracle Support Services.

CRS-09608: ASM disk method failed
   Cause: An error encountered with ASM disks configuration.
   Action: Report this error to Oracle Support Services.

Cause: An error was encountered with CSSD layer while retrieving information.
Action: Report this error to Oracle Support Services.

CRS-09610: Encountered a fatal internal error. Daemon string exiting.
Cause: A fatal error occurred with CSSD layer.
Action: Report this error to Oracle Support Services.

CRS-09611: Mark string disks encountered errors
Cause: An error occurred while accessing disk.
Action: Report this error to Oracle Support Services.

CRS-09612: Mark string disks failed
Cause: A fatal error occurred while accessing disk.
Action: Report this error to Oracle Support Services.

CRS-09615: Disk method Failure : string
Cause: Internal error occurred.
Action: Report this error to Oracle Support Services.

CRS-09616: Daemon started : string
Cause: A daemon process started successfully.
Action: None

CRS-09617: Invalid message type encountered
Cause: An invalid or corrupted message was received.
Action: Report this error to Oracle Support Services.

CRS-09618: Daemon stopped : string
Cause: A daemon process stopped successfully.
Action: None

CRS-10002: failed to allocate memory
Cause: Memory allocation failed.
Action: Correct the system memory problem and retry.

CRS-10004: unable to reach string address from local node
Cause: An attempt to reach the IP address specified failed.
Action: Make sure that the specified IP address is a valid IP address and is assigned to an interface. Make sure that there are no firewalls between local node and node on which specified IP address is hosted.

CRS-10005: unable to determine local hostname
Cause: The hostname could not be read.
Action: Check that the hostname for the local machine is valid. Look at the accompanying messages. If the problem persists, contact Oracle Support Services.

CRS-10006: APPVIP type needs a VIP name. Specify a VIP name using -vip command line option
Cause: VIP resource name was missing in the command line for APPVIP type.
Action: Specify a VIP name using -vip option.
CRS-10008: unable to generate client ID for VIP type string, cluster name string, VIP resource name string  
**Cause:** An attempt to generate client ID for specified cluster name, VIP type and resource name failed.  
**Action:** Make sure that cluster name and VIP resource name do not exceed 252 characters. Make sure that VIP type is a valid VIP type. Refer to 'crsctl get clientid -help' for more information.

CRS-10010: unable to discover DHCP server in the network listening on port number for client ID string  
**Cause:** An attempt to discover DHCP server listening on port specified failed.  
**Action:** Make sure that DHCP servers exist on the network and are listening on port specified. If they are listening on a different port specify then specify that port using the -port option. For more information refer to help for 'crsctl discover dhcp' command.

CRS-10011: unable to request DHCP lease for client ID string on port number  
**Cause:** An attempt to request DHCP lease for the specified client ID on specified port failed.  
**Action:** Make sure that there are DHCP servers with IP addresses available on the network. If other DHCP servers are available which are listening on a different port specify an alternative port using the -port option. For more information refer to help for 'crsctl request dhcp' command.

CRS-10013: unable to release DHCP lease for client ID string, on port number  
**Cause:** An attempt to release DHCP lease for the specified client ID on specified port failed.  
**Action:** Make sure that there are DHCP servers listening on port specified. If the DHCP server is listening on a different port specify an alternative port using -port option. For more information refer to help for 'crsctl release dhcp' command.

CRS-10014: HOSTVIP type needs a node name. Specify a node name using -n option  
**Cause:** Node name was missing in the command line for HOSTVIP type.  
**Action:** For HOSTVIP type node name needs to be specified via -n option.

CRS-10015: VIP type string is invalid  
**Cause:** An invalid VIP type was specified for DHCP client ID generation.  
**Action:** Make sure that VIP type is a valid VIP type. Refer to 'crsctl get clientid -help' for more information.

CRS-10016: error obtaining local host DNS resolver configuration  
**Cause:** An attempt to obtain local host DNS configuration failed.  
**Action:** Make sure that the user executing the command has sufficient permission to read local system configuration.

CRS-10017: the number name servers configured on this system exceeds the number maximum allowed  
**Cause:** An attempt to obtain local host DNS configuration failed because more name servers were found then allowed on this operating system.  
**Action:** Reduce the number of name servers configured to the maximum allowed.
CRS-10023: Domain name look up for name *string* failed. Operating system error: *string*
    
    **Cause:** An attempt to query DNS servers for name specified failed.
    
    **Action:** Look at accompanying messages for more information on the failure.

CRS-10029: could not verify if port *number* at address *string* is in use
    
    **Cause:** An attempt to verify if port at address specified is in use failed.
    
    **Action:** Make sure that the user has permission to create socket at port specified.
    For ports < 1024 user should be root. Also look at the accompanying messages for more information.

CRS-10030: could not verify if port *number* on local node is in use
    
    **Cause:** An attempt to verify if port specified on local node is in use failed.
    
    **Action:** Make sure that the user has permission to create socket at port specified.
    For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10033: could not stop the DNS listening daemon running on port *number* at address *string*
    
    **Cause:** An attempt to stop the DNS listening daemon running on port and address specified failed.
    
    **Action:** Make sure that the user has permission to send packets at the port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10034: could not stop the DNS listening daemon running on port *number* on local node
    
    **Cause:** An attempt to stop the DNS listening daemon on local node running on port specified failed.
    
    **Action:** Make sure that the user has permission to send packets at the port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10035: invalid name server 'string' specified in command line
    
    **Cause:** An invalid IPv4 address was specified on the command line for -dnsserver option.
    
    **Action:** Specify a valid IPv4 address on the command line.

CRS-10036: value for command line parameter 'string' is not an integer
    
    **Cause:** An invalid value was specified for the specified command line parameter.
    
    **Action:** Re-submit the request with an integer value.

CRS-10051: CVU found following errors with Clusterware setup: *string*
    
    **Cause:** A resource-specific error was detected by the Clusterware Verification Utility (CVU). This message is accompanied by others providing details of the error condition.
    
    **Action:** Respond based on the accompanying messages.

CRS-10100: Execution of crswrapexece.pl script with arguments 'string' fails.
    
    **Cause:** crswrapexece.pl script failed when executed with the specific arguments.
    
    **Action:** Check system log and crswrapexece.log for more details. Contact Oracle Support Services.
CRS-10101: Internal Error
   Cause: Execution of crswrapexece.pl script failed due to missing argument.
   Action: Contact Oracle Support Services.

CRS-10102: Failure to open environment file *string*.
   Cause: The crswrapexece.pl script failed to open the environment file, which might be caused by hostname change or user edits.
   Action: Check for the existence and permission of the environment file.

CRS-10103: Found *string* syntax errors in environment file *string*.
   Cause: crswrapexece.pl found syntax errors in the provided environment file.
   Action: Check and fix syntax error in the indicated environment file. If the problem persists, contact Oracle Support Services.

CRS-10131: Failure to create named pipe *string*. Details [*string*].
   Cause: The specified named pipe could not be created. Oracle High Availability Service would not be able to restart if crashes.
   Action: Check for the existence and permission of the parent directory, where the named pipe was created.

CRS-10132: Oracle High Availability Service was restarted at least *string* times within the last *string* seconds. Stop auto-restarting Oracle High Availability Service.
   Cause: Oracle High Availability Service was restarted too rapidly within a short period of time.
   Action: Check the Oracle High Availability Service log file to determine the cause. If the problem persists, contact Oracle Support Services.
EVM-00001: Cannot write raw events to a terminal
   **Cause:** Attempted to redirect binary events to a terminal.
   **Action:** Use evmshow to format events for display.

EVM-00002: Use evmshow to format events for display
   **Cause:** Attempted to redirect binary events to a terminal.
   **Action:** Use evmshow instead.

EVM-00003: Failed to open file "string": string
   **Cause:** Filename, path or the permissions were not valid.
   **Action:** Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00004: Failed to open channel config file "string"
   **Cause:** Configuration file name, the path or the permissions were not valid.
   **Action:** Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00006: Failed to create temporary file
   **Cause:** The file being used as a temporary file for evmsort had one of the following issues; filename, path or the permissions were not valid.
   **Action:** Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00007: Failed to write to temporary file
   **Cause:** The file being used as a temporary file for evmsort had one of the following issues; filename, path or the permissions were not valid.
   **Action:** Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00008: Failed to read from temporary file
   **Cause:** The file being used as a temporary file for evmsort had one of the following issues; filename, path or the permissions were not valid.
   **Action:** Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00009: Failed to create EVM posting connection
   **Cause:** Error occurred while communicating with the EVM daemon.
   **Action:** Check log and status of the EVM daemon.
EVM-00010: Failed to read from EVM posting connection  
   **Cause:** Error occurred while communicating with the EVM daemon.  
   **Action:** Check log and status of the EVM daemon.

EVM-00011: Failed to write to EVM posting connection  
   **Cause:** Error occurred while communicating with the EVM daemon.  
   **Action:** Check log and status of the EVM daemon.

EVM-00012: Failed to create EVM listening connection  
   **Cause:** Error occurred while communicating with the EVM daemon.  
   **Action:** Check log and status of the EVM daemon.

EVM-00013: Failed to read from EVM listening connection  
   **Cause:** Error occurred while communicating with the EVM daemon.  
   **Action:** Check log and status of the EVM daemon.

EVM-00014: Failed to write to EVM listening connection  
   **Cause:** Error occurred while communicating with the EVM daemon.  
   **Action:** Check log and status of the EVM daemon.

EVM-00015: Failed to create EVM service connection  
   **Cause:** Error occurred while communicating with the EVM daemon.  
   **Action:** Check log and status of the EVM daemon.

EVM-00016: Failed to read from EVM service connection  
   **Cause:** Error occurred while communicating with the EVM daemon.  
   **Action:** Check log and status of the EVM daemon.

EVM-00017: Failed to start EVM service "string"  
   **Cause:** EVM daemon failed to start.  
   **Action:** Check log for the EVM daemon.

EVM-00018: Failed to write to output stream  
   **Cause:** Failed to write to standard output.  
   **Action:** Contact Oracle Customer Support.

EVM-00019: Failed to read event from input stream  
   **Cause:** Bad input file for evmshow/evmsort EOF missing.  
   **Action:** Check the input file.

EVM-00020: Failed to create event subscription  
   **Cause:** Bad network connection between subscriber and EVM daemon.  
   **Action:** Check the network connection and filter string.

EVM-00021: Failed to create filter  
   **Cause:** Used a null filter string or memory allocation failed.  
   **Action:** Use a non null filter string.

EVM-00022: Invalid filter string  
   **Cause:** Used a null or invalid filter string.  
   **Action:** Contact Oracle Customer Support.
EVM-00023: Filter test operation failed
   Cause: Used a null or invalid filter string.
   Action: Use a non null filter string. Otherwise contact Oracle Customer Support.

EVM-00024: Lost connection to EVM daemon
   Cause: Evmlogger lost connection to evmdaemon.
   Action: Check status of evmlogger, evmdaemons and logs.

EVM-00025: Authorization database error
   Cause: Not authorized to post/listen for certain events.
   Action: Check evm.auth file to ensure the current user is authorized to post/listen for specific events.

EVM-00026: Failed to post event "string"
   Cause: Evmpost failed to post an event.
   Action: Check the status and log for EVM daemon.

EVM-00027: Memory allocation failure
   Cause: The system is running low on memory.
   Action: Check the availability of memory in the system.

EVM-00029: Event contains invalid values
   Cause: Invalid syntax for an event was used.
   Action: Use a valid syntax for an event.

EVM-00030: Event name is missing
   Cause: Name of the event was missing.
   Action: Use a valid syntax for an event.

EVM-00031: Event name has too few components
   Cause: Invalid syntax for an event was used.
   Action: Use a valid syntax for an event.

EVM-00032: Failed to write event
   Cause: Failed to write event to output file.
   Action: Check the permissions of the file. Otherwise contact Oracle Customer Support.

EVM-00033: Error in input file "string", line number
   Cause: Failed to parse input file.
   Action: Check input file and the line for possible errors. Otherwise contact Oracle Customer Support.

EVM-00034: Error: string
   Cause: Error Occurred.
   Action: Look at the error message for details.

EVM-00035: EVM service "string" terminated with exit code number
   Cause: EVM daemon died.
   Action: Check the EVM daemon log.
EVM-00036: Host "string" is unknown
Cause: Invalid hostname discovered while trying to create a connection to the EVM daemon.
Action: Check the hostname, on which EVM daemon is running. Otherwise contact Oracle Customer Support.

EVM-00037: Failed to connect to EVM daemon on "string"
Cause: EVM daemon is dead or is not responding.
Action: Check the status of EVM daemon and logs.

EVM-00038: Failed to create an EVM event
Cause: Failed to create an EVM event.
Action: Check the EVM daemon log.

EVM-00039: Invalid port number in host name "string"
Cause: Used an invalid port number.
Action: Use a valid or a different port number.

EVM-00040: Error occurred while reading from "string"
Cause: Error occurred when evmshow was reading from an input file.
Action: Check the input file.

EVM-00042: Use "string -A" to format events, or pipe output to evmshow
Cause: Invalid use of evmshow command.
Action: Use evmshow command as instructed.

EVM-00043: Attempting to reconnect to the EVM daemon...
Cause: Evmwatch trying to reconnect to the evm daemon.
Action: Not an error message.

EVM-00044: Attempting to reconnect to the EVM daemon on "string"...
Cause: Evmwatch trying to reconnect to the evm daemon on this host.
Action: Not an error message.

EVM-00045: EVM connection re-established
Cause: Evmwatch was able to reconnect to the evm daemon.
Action: Not an error message.

EVM-00104: End of file reached unexpectedly
Cause: End of event template file reached unexpectedly.
Action: Check the event template file in evm/admin.

EVM-00105: Missing end-of-group character
Cause: end-of-group character missing in event template file.
Action: Check the event template file in evm/admin.

EVM-00106: Missing end-of-string character
Cause: end-of-string character missing in event template file.
Action: Check the event template file in evm/admin.

EVM-00107: Value "string" is not valid
Cause: Invalid value found in the event template file.
Action: Check the event template file in evm/admin.

EVM-00108: Keyword "string" is not valid
Cause: Invalid keyword found in the event template file.
Action: Check the event template file in evm/admin.

EVM-00201: Failed to allocate space for application object
Cause: The system is running low on memory.
Action: Check the availability of memory in the system.

EVM-00202: Failed to allocate space for local lock pathname
Cause: The system is running low on memory.
Action: Check the availability of memory in the system.

EVM-00301: Failed to open logger config file "string"
Cause: Configuration file had one of the following problems; filename, path or permissions were not valid.
Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00302: Configuration error - using default configuration
Cause: Configuration file had invalid configuration details
Action: Check the configuration file.

EVM-00303: Keyword "string" is invalid in this position
Cause: Valid Keyword was used in an invalid position in configuration file.
Action: Use the correct syntax.

EVM-00304: Configuration error in file string, line number
Cause: Configuration error in configuration file.
Action: Check the configuration file.

EVM-00305: Memory allocation failure for "string"
Cause: The system is running low on memory.
Action: Check the availability of memory in the system.

EVM-00306: Failed to create filter for "string"
Cause: Failed to create a filter for events for evmlogger.
Action: Check the availability of memory.

EVM-00307: Filter string invalid for "string"
Cause: Used a null filter string or memory allocation failed.
Action: Use a non null filter string.

EVM-00308: Failed to open eventlog "string": string
Cause: Eventlog file had one of the following problems; filename, path or permissions were not valid.
Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.
EVM-00309: Failed to write to eventlog "string"
  Cause: Eventlog had one of the following problems; size or permissions were not valid.
  Action: Check the permissions and the size of the eventlog file. Otherwise contact Oracle Customer Support.

EVM-00310: Invalid suppression filter for eventlog "string"
  Cause: Invalid filter was used.
  Action: Use a non null filter. Otherwise contact Oracle Customer Support.

EVM-00311: Invalid entry in eventlog "string" (number events OK)
  Cause: Evmlogger found an invalid entry in eventlog.
  Action: Check the eventlog file.

EVM-00312: Eventlog "string" disabled
  Cause: Events could not be written to the eventlog file.
  Action: Check the permissions,max size of the logfile.

EVM-00313: Eventlog "string" re-enabled
  Cause: Events logging is reenabled.
  Action: Not an error message.

EVM-00314: Forwarder "string" disabled
  Cause: Forwarding is disabled by the evmlogger.
  Action: Not an error message.

EVM-00315: Forwarder "string" re-enabled
  Cause: Forwarding is disabled by the evmlogger.
  Action: Not an error message.

EVM-00316: Suppression disabled for "string"
  Cause: Error message filtering supression disabled for this string.
  Action: Not an error message.

EVM-00317: Suppression re-enabled for "string"
  Cause: Error message filtering supression reenabled for this string.
  Action: Not an error message.

EVM-00318: Failed to open config info file "string"
  Cause: Configuration file had one of the following problems; filename, path or permissions were not valid.
  Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00319: Keyword "string" is not allowed in a secondary config file
  Cause: Invalid Keyword was used.
  Action: Use a valid Keyword.

EVM-00323: Config file "string" has insecure write permission
  Cause: The configuration file had write permissions for the group 'other'.
  Action: Change the write permissions for the configuration file
EVM-00324: Config file "string" has incorrect ownership
  Cause: Configuration file should be owned by root or bin.
  Action: Change the owner of configuration file to root or bin.

EVM-00325: Config file "string" is not a regular file
  Cause: Configuration file is not a regular file.
  Action: Check the configuration file.

EVM-00401: Failed to open binary event library file
  Cause: Binary event file had one of the following problems; filename, path or
  permissions were not valid.
  Action: Check whether path and permissions are valid. Otherwise contact Oracle
  Customer Support.

EVM-00601: Data read from the input stream is not a valid EVM event
  Cause: evmshow tried to read an invalid EVM event.
  Action: Check the logs for the evm daemon.

EVM-00701: Check that the event is registered and you are authorized to post it
  Cause: Not authorized to post for certain events.
  Action: Check evm.auth file to ensure the current user is authorized to post the
  specific event.

EVM-00702: Priority must be an integer in the range 0-number
  Cause: Used an integer out of the range for priority.
  Action: Use a valid integer.

EVM-00801: Missed number subscribed-to event(s)
  Cause: Missed some events during the connection setup phase.
  Action: Not an error message.

EVM-00802: Failed to reconnect within number seconds - terminating
  Cause: Failed to establish a connection with EVM daemon.
  Action: Check the logs for EVM daemon.

EVM-00901: Invalid sort specification "string"
  Cause: Invalid sort specification used for evmsort.
  Action: Use a valid sort specification. Look at documentation for evmsort using
  evmsort -h.
GIPC-00000: general success.
  Cause: The operation succeeded.
  Action: No action is required.

GIPC-00001: general failure.
  Cause: A GIPC operation failed.
  Action: Examine the trace and log files for the specific cause.

GIPC-00002: GIPC needs to be initialized.
  Cause: The application failed to initialize GIPC prior to performing an operation.
  Action: Initialize GIPC.

GIPC-00014: buffer not large enough to hold data.
  Cause: The buffer provided by the application was not big enough to hold the data received.
  Action: Use a larger buffer.

GIPC-00016: timeout waiting on request.
  Cause: A wait call returned because the time expired.
  Action: This error happens normally in most cases. If this error was not expected, examine the trace and log files for the reason.

GIPC-00017: waiting call has been posted.
  Cause: A wait was interrupted by another thread posting it.
  Action: This error happens normally in most cases. If this error was not expected, examine the trace and log files for the reason.

GIPC-00020: bind address already in use.
  Cause: The application attempt to bind an endpoint to an address which has already been bound.
  Action: Specify another address.
RDE-00000: no error  
   **Cause:** Operation was successful.  
   **Action:** No action needed.

RDE-00001: unspecified error  
   **Cause:** An unknown error occurred. This is an internal error.  
   **Action:** Contact Oracle Customer Support and provide details about how and when the error occurred.

RDE-00002: provider busy  
   **Cause:** The provider is processing a request.  
   **Action:** This is not an error.

RDE-00003: no value found for service tag string.  
   **Cause:** A value was not found for the given service tag.  
   **Action:** This is normally not an error.

RDE-00004: operation timeout  
   **Cause:** A FIND or REGISTER operation timed out.  
   **Action:** For a FIND operation, this is only an error if the find was expected to successfully locate a service.

RDE-00005: invalid universe: "string"  
   **Cause:** An unknown universe was specified for the address.  
   **Action:** Specify a valid universe.

RDE-00006: invalid protocol: "string"  
   **Cause:** An invalid protocol was specified in an address.  
   **Action:** Specify a valid protocol.

   **Cause:** This error is for internal use only and should not normally be seen by users.  
   **Action:** Contact Oracle Customer Support.

RDE-00010: not found  
   **Cause:** A value was not found in a list.
**Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**RDE-00011: invalid type: number**
- **Cause:** The type given for a piece of data was invalid.
- **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**RDE-00012: no list name specified.**
- **Cause:** A name was not given for a list.
- **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**RDE-00013: name busy.**
- **Cause:** This is an internal error.
- **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**RDE-00014: operation was interrupted.**
- **Cause:** An operation was interrupted.
- **Action:** None. This normally is not an error.

**RDE-00015: load of provider library failed.**
- **Cause:** The load of a library which implements the interface for a provider failed.
- **Action:** Enable tracing to determine the exact error that occurred.

**RDE-00016: no provider libraries found.**
- **Cause:** It was not possible to locate any provider libraries.
- **Action:** Make sure that the provider libraries have been installed.

**RDE-00017: provider error.**
- **Cause:** A provider generated an error.
- **Action:** If errors follow, examine them to determine the exact error. Otherwise, enable tracing to determine the exact error.

**RDE-00018: regular expression compilation failed. Pattern "string" Error: number.**
- **Cause:** The creation of a pattern for use in a comparison failed.
- **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**RDE-00019: pattern match failed. String: "string" Pattern: "string" Error: number.**
- **Cause:** A comparison against a regular expression failed.
- **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

**RDE-00020: no host name or IP address.**
- **Cause:** An address must contain either the name of the server or its IP address.
- **Action:** Specify a host name or an IP address in the address.

**RDE-00021: no providers found for universe "string".**
- **Cause:** A provider was not found for the specified universe.
Action: Either specify a different universe or obtain a provider library for that universe. Examine the errors that follow (if any) for more information.

RDE-00022: property not found.
Cause: A provider property was not found.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-00023: provider not found. Universe "string".
Cause: A provider was not found for the specified universe.
Action: Either specify a different universe or obtain a provider library for that universe.

RDE-00024: address invalid
Cause: The address is not in the correct format.
Action: Specify an address in the correct format. The syntax is described in rd.h.

RDE-00025: service type not specified.
Cause: The service type is not specified in the address.
Action: Specify an address with the service type.

RDE-00026: expected delimiter not found. Expected: "string" Found: "string"
Cause: The delimiter expected in the address was not found.
Action: Correct the address so that the delimiter is present.

RDE-00027: port number not found.
Cause: When a colon (":") follows the host name, it must be followed by a port number.
Action: Specify a port number.

RDE-00028: initialization failed.
Cause: Initialization of RD failed.
Action: Examine the errors that follow this one to determine the problem that is causing the error.

RDE-00029: no server found.
Cause: No server for the specified provider could be found to perform the desired operation.
Action: Start a server for the desired provider or use a different provider.

RDE-00030: memory allocation failure
Cause: An operation failed because it was not possible to allocate enough process memory.
Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

RDE-00031: invalid domain: number.
Cause: The application specified an invalid number for the domain.
Action: Specify a correct domain. See rd.h for the allowed values.
RDE-00032: length of service type "string" (number) is greater than than the maximum allowed: number
Cause: The user specified a service type which is longer than that permitted by the provider.
Action: Use a shorter service type.

RDE-00033: no universe specified.
Cause: The user did not specify a universe in the address.
Action: Specify a universe.

RDE-00034: address not registered: "string"
Cause: The application attempted to use an address which does not exist.
Action: Specify a registered address.

RDE-00037: invalid service instance tag: number
Cause: The value for a service instance tag was incorrect.
Action: Specify a valid tag. They are listed in rd.h.

RDE-00038: invalid protocol type: "string" Valid protocols: string
Cause: The user specified a protocol which is not supported by the provider.
Action: Specify a valid protocol. The protocol must be at least one character which is not a period (".").

RDE-00039: invalid host name: "string"
Cause: The name of the host specified was not in the correct format.
Action: Use the correct host name format. The host name must be one of the following:

1. The name of the machine;
2. A valid IPv4 address (N.N.N.N);
3. A valid IPv6 address (N[:N]*).

RDE-00040: invalid search domain: "string"
Cause: The name of the domain searched by the service was not in the correct format.
Action: Use the correct domain name format. A domain is a series of one or more alphanumeric characters.

RDE-00041: no protocol or domain specified.
Cause: The service name was followed by a period separator, but no protocol or domain was found after it.
Action: Specify a valid protocol and/or domain.

RDE-00042: invalid port number: "string"
Cause: The port specified in the service address was not valid. A port number may only be a positive decimal number.
Action: Specify a valid port number.

RDE-00043: no search domain specified.
Cause: No search domain followed the period separator.
Action: Specify a valid search domain.
RDE-00044: no protocol specified.  
Cause: No protocol was specified for the service.  
Action: Specify a valid protocol.

RDE-00045: port number required to register with a generic address.  
Cause: Because of the requirements of some providers, the port number must be specified when registering using a generic address.  
Action: Specify a port number.

RDE-00046: invalid attribute  
Cause: An attribute was specified using an incorrect format.  
Action: An attribute should be specified using the following format: "name=value[, name1=value1 ...]"

RDE-00047: no name specified for attribute.  
Cause: A value was given for an attribute but no name was specified.  
Action: Specify a name for the attribute.

RDE-00048: no attribute specified.  
Cause: An attribute was not found in the address where it was expected.  
Action: Specify a valid attribute. An attribute is composed of a name followed by an equals sign ("=") and then by an optional value. The name and value may both contain spaces.

RDE-00049: expected separator not found. Expected: "string" Found: "string"  
Cause: The separator expected to be present between the mandatory and optional sections of the address was not found.  
Action: Specify the separator.

RDE-00050: provider initialization for universe "string" failed.  
Cause: The operation failed because providers could not be initialized for the specified universe.  
Action: The message(s) that follow describe the errors encountered by the providers.

RDE-00051: provider "string" error.  
Cause: The specified provider failed to perform an operation.  
Action: The message(s) that follow describe the errors encountered by the provider.

RDE-00052: invalid numeric value specified: "string".  
Cause: The value specified as a number was not valid.  
Action: Specify a valid number.

RDE-00053: invalid or null service instance.  
Cause: The service instance used for an operation is either invalid or null.  
Action: Specify a valid service instance.

RDE-00054: invalid operation: number.  
Cause: The operation specified was not valid.  
Action: Specify a valid operation.
RDE-00055: no providers available.
   **Cause:** No providers were available for an operation. This may be caused by the failure of a process or service needed by the provider (e.g. the mDNS service).
   **Action:** Examine the trace and log files for details. Ensure that the process or service required by the process is running.

RDE-00056: registration of service instance "string" failed.
   **Cause:** The registration of the specified service instance failed.
   **Action:** Examine the errors that follow for more information about the error.

RDE-00057: unregistration of service instance "string" failed.
   **Cause:** The deletion of the registration of the specified service instance failed.
   **Action:** Examine the errors that follow for more information about the error.

RDE-00058: confirmation of service instance "string" failed.
   **Cause:** The confirmation of the specified service instance failed.
   **Action:** Examine the errors that follow for more information about the error.

RDE-00059: location of service types "string" failed.
   **Cause:** It was not possible to retrieve types of services supported by Resource Discovery.
   **Action:** Examine the errors that follow for more information about the error.

RDE-00060: service instance "string" was not found.
   **Cause:** The location of the specified service.
   **Action:** Examine the errors that follow for more information about the error.

RDE-00061: retrieval of details about service instance "string" failed.
   **Cause:** It was not possible to get details about the specified service instance.
   **Action:** Examine the errors that follow for more information about the error.

RDE-00062: termination failed.
   **Cause:** The call to terminate the use of Resource Discovery failed.
   **Action:** Examine the errors that follow for more information about the error.

RDE-00063: operation failed.
   **Cause:** A FIND or REGISTER operation failed.
   **Action:** Examine the errors that follow for more information about the error.

RDE-00064: retrieval of a provider for universe "string" failed.
   **Cause:** It was not possible to retrieve a provider descriptor for the specified universe.
   **Action:** Examine the errors that follow for more information about the error.

RDE-00065: creation of service instance failed.
   **Cause:** An error occurred while trying to assemble a service instance using components.
   **Action:** Examine the errors that follow for more information about the error.

RDE-00066: parsing of service instance "string" failed.
   **Cause:** An error occurred while trying to parse the specified address.
Action: Examine the errors that follow for more information about the error.

RDE-00067: location of domain failed.
Cause: An error occurred while trying to locate domains of the specified type.
Action: Examine the errors that follow for more information about the error.

RDE-00068: length of universe component "string" (number) is longer than the maximum: number.
Cause: The string specified for the universe-specific portion of the service instance is longer than the maximum allowed by the provider.
Action: Specify a universe component which is shorter than the maximum. If this error occurs when no universe-specific portion was specified, the provider may have used the service type for the universe-specific component. In that case, make sure that the length of the service type does not exceed the maximum.

RDE-01999: internal error
Cause: RD failed due to some unforeseen reason.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-02000: invalid service type: "string"
Cause: The user specified a service type which does not conform to the standard specified by RFC’s 1034 and RFC 1123. The service type must be one or more characters and must start and end with a letter or digit. The interior characters may be letters, digits, or hyphens.
Action: Specify a service type which conforms to the RFC.

RDE-02001: failed to connect to the mDNS responder.
Cause: The provider was unable to make a connection with the mDNS responder.
Action: Check to ensure that the responder is running. If it is, this is an internal error and Oracle Customer Support should be contacted.

RDE-04000: client waiting
Cause: The client uses this error to signal to the server that it is waiting for query results.
Action: This error is used for signalling between the client and the DNS server. It should not be visible to the user. If it occurs, please contact Oracle Customer Support

RDE-04001: no error
Cause: Operation was successful.
Action: No action needed.

RDE-04002: unknown error has occurred
Cause: an unknown error has occurred.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04003: no such name
Cause: a record could not be found with the given name.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.
RDE-04004: memory allocation failed
  Cause: An operation failed because it was not possible to allocate enough process memory.
  Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

RDE-04005: invalid parameter
  Cause: a record contained an illegal or non-existing value.
  Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04006: invalid reference
  Cause: An unknown DNS record was found.
  Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04007: invalid state
  Cause: This is an internal error.
  Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04008: invalid flags
  Cause: This is an internal error.
  Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04009: unsupported operation
  Cause: The provider interface attempted to perform an operation which is not supported by the provider.
  Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04010: not initialized
  Cause: This is an internal error.
  Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04011: no cache allocated
  Cause: a DNS query failed because no cache was allocated.
  Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04012: service already registered
  Cause: The user attempted to register a service that was already registered.
  Action: A service should only be registered once.

RDE-04013: service name conflict
  Cause: The user attempted to register a service whose name already exists.
  Action: A service should only be registered once.

RDE-04014: invalid record entry
Cause: The provider interface attempted to perform an operation whose record contained invalid or non-existent data.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04015: client software incompatible with server

Cause: The version of the client software used by the provider interface is not compatible with the version of the server software.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04016: invalid interface

Cause: The provider interface attempted to use an unknown interface.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04017: cache size must be increased

Cause: The size of the cache maintained by the provider interface must be increased.

Action: This error is used as a status indicator. It should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04018: configuration changed

Cause: The server configuration changed during an operation.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04019: client should free resources

Cause: This error is used as an internal status indicator and should not be visible outside of the provider.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06000: no more data

Cause: This error is used internally to signal that there is no more data to be passed by the SLP provider.

Action: This error is normal - no action is required.

RDE-06001: no error

Cause: Operation was successful.

Action: This error is normal - no action is required.

RDE-06002: language not supported

Cause: No service could be found that supports the language required.

Action: A service will have to be added or modified which supports the requested language.

RDE-06003: parse error

Cause: The SLP message rejected by a remote SLP agent.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.
RDE-06004: invalid registration
   **Cause:** The SLP provider attempted to register a URL which is malformed.
   **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06005: scope not supported
   **Cause:** This is an internal error.
   **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06006: authenticator not provided
   **Cause:** The SLP provider failed to authenticate itself.
   **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06007: authentication failed
   **Cause:** The SLP provider failed to authenticate itself.
   **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06008: invalid update
   **Cause:** An update for a non-existing registration was issued, or the update includes a service type or scope different than that in the initial registration, etc.
   **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06009: refresh rejected
   **Cause:** Attempts were made to refresh a registration more frequently than the minimum refresh interval.
   **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06010: feature unimplemented
   **Cause:** An unimplemented feature was used.
   **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06011: buffer overflow
   **Cause:** An outgoing request overflowed the maximum network MTU size.
   **Action:** This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06012: network timed out
   **Cause:** An reply to an SLP request did not arrive in the configured timeout interval.
   **Action:** Check the network connection and retry the request.

RDE-06013: network initialization failure
   **Cause:** The network failed to initialize properly.
   **Action:** Check the network connection and retry the request.

RDE-06014: memory allocation failed
Cause: The SLP provider was unable to allocate enough process memory.
Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

RDE-06015: invalid parameter
Cause: The provider attempted to pass an invalid parameter.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06016: network error
Cause: The network failed to initialize properly.
Action: Check the network connection and retry the request.

RDE-06017: internal system error
Cause: The SLP subsystem failed for unknown reasons.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06018: handle in use
Cause: The SLP provider attempted to recursively use a handle.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06019: generic error
Cause: The provider failed for unknown reasons.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06020: unicast query must be sent.
Cause: The provider must send a unicast query.
Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.
PRKU-01001: Unexpected argument {0}.
  
  **Cause:** The command line argument reported in above error message is not expected by tool.
  
  **Action:** Refer to the tool's inline help display or to the product documentation of the command line tool for valid options and arguments, and then rerun the tool.

PRKU-01002: The option {0} is required.
  
  **Cause:** The command line option reported by the above error message is a mandatory option required by the tool.
  
  **Action:** Review the tool's inline help display or to the product documentation of the command line tool for type of value required for this option. And then rerun the command specifying the above option in command line options.

PRKU-01003: The parameter {0} requires an argument.
  
  **Cause:** The command line parameter reported in error message needs a value.
  
  **Action:** Review the tool's inline help display or to the product documentation of the command line tool for type of value required for this option. And then rerun the command specifying the above option in command line options.

PRKU-01015: Oracle Clusterware is not properly stopped and de-configured on node "{0}". The files "{1}" exist as configured.
  
  **Cause:** The files init.ohasd, or ocr.loc and/or directory scls_scr still exists on this node which makes the tool believe that the clusterware stack is not shutdown properly.
  
  **Action:** Run the Oracle clusterware deconfiguration utility to completely cleanup the configuration. The Clusterware deconfiguration tool is available in Oracle clusterware home and also on Oracle OTN (Technology Network) page.

PRKU-01016: Failed to stop Oracle Clusterware on nodes "{0}". Run the command "{1}" after fixing the problem.
  
  **Cause:** The clusterware deconfiguration tool has failed to stop Oracle clusterware stack. The reason for failure can be found browsing through clusterware alert logs found in log/<hostname>/alert<hostname>.log directory under Oracle clusterware.
  
  **Action:** You should browse through deamon logs in log/<hostname> under Oracle clusterware home and manually correct the problem to stop clusterware stack. And then rerun the command specified in above error message.

PRKU-01018: Run the following command as the root user on node "{0}".
Cause: The clusterware deconfiguration that is run as non-root user cannot automatically run the command specified in above message.

Action: You should login to another session as a privileged user and run the command specified in above message

PRKU-01019: Run the following command as administrator.

Cause: The clusterware deconfiguration which is run as non-root user cannot automatically run the command specified in above message.

Action: You should login to another session as a privileged user and run the command specified in above message

PRKU-01021: As the privileged user, Execute "{0}" on every node in this cluster except for this node, and then execute "{1}" on this node to remove the configuration of the Oracle Clusterware and to completely remove the Oracle software

Cause: This is the message reported by Oracle clusterware deconfiguration tool when it is run in non-interactive (or silent) mode.

Action: Execute the identified scripts as described. Deconfiguring Oracle Clusterware in silent mode requires one set of operations on all nodes but the last followed by a special set of operations on the last node.

PRKU-01023: Oracle Clusterware is not stopped and de-configured on node "{0}" due to error "{1}"

Cause: The tool failed to deconfigure Oracle clusterware stack on the node because of errors reported in the above message

Action: You should review the error messages reported in above message to perform corrective actions and then rerun the tool

PRKU-01024: The stopping and de-configuring of Oracle Clusterware failed on some nodes. Fix the problem and rerun this tool to completely remove the Oracle Clusterware configuration and the software

Cause: This is a message reported by the tool to inform you that the Oracle clusterware deconfiguration did not happen on some of the nodes in the cluster.

Action: You should review the error messages reported by the tool for failing to deconfigure clusterware stack on each node, perform corrective actions after reviewing the error messages, and rerun the tool to completely deconfigure Oracle clusterware stack

PRKU-01025: You must delete or downgrade Clusterware-managed Oracle databases and de-install Clusterware-managed Oracle homes before attempting to remove the Oracle Clusterware home.

Cause: An attempt was made to deconfigure the Oracle Clusterware when one or more Clusterware-managed Oracle databases still exist.

Action: Run the Oracle Clusterware deconfiguration tool from Clusterware-managed Oracle homes to delete, deconfigure or downgrade Oracle database and then run the same tool from Oracle Clusterware home to deconfigure Clusterware.

PRKU-01029: The node "{0}" is currently not responding.

Cause: The host reported in the above message may have rebooted or hung

Action: Login to the host if possible and review system logs, correct the problem
PRKU-01035: The stopping and de-configuring of Oracle Restart failed. Fix the problem and rerun this tool to completely remove the Oracle Restart configuration and the software
  Cause: The Oracle Restart stack couldn't be stopped cleanly before de-configuring.
  Action: Review the error messages reported by the tool for failing to deconfigure Oracle Restart stack, perform corrective actions after reviewing the error messages, and rerun the tool to completely deconfigure Oracle Restart stack.

PRKU-01036: The deinstall tool failed to create the script file "[0]" that needs to be run in silent mode due to error "[1]"
  Cause: The tool failed to create silent mode script file because of errors reported in the above message.
  Action: You should review the error messages reported in above message to perform corrective actions and then rerun the tool.

PRKU-01037: As the privileged user, execute "[0]" and then execute "[1]" on this node to remove the configuration of the Oracle Restart and to completely remove the Oracle software
  Cause: This is the message reported by Oracle Restart deconfiguration tool when it is run in non-interactive (or silent) mode.
  Action: Execute the identified scripts as described.

PRKU-01039: Can't deconfigure Oracle Restart before removing or downgrading managed Oracle databases.
  Cause: A request to deconfigure Oracle Restart found one or more managed Oracle database homes, so the request was rejected.
  Action: Run the Oracle deconfiguration tool from Oracle database homes to delete, deconfigure or downgrade Oracle database and then run the same tool from Oracle Restart home to deconfigure the Oracle Restart stack.
PRKH-01016: Failed to get CSS mode
  Cause: An error occurred on a Cluster Synchronization Services request. This message may be accompanied by others identifying the specific problem.
  Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-01050: Buffer is too small
  Cause: An internal error occurred.
  Action: Contact Oracle Support Services.

PRKH-01051: Cluster software (skgx) error
  Cause: An error occurred when Cluster Synchronization Services attempted to use non-Oracle vendor clusterware. This message may be accompanied by others identifying the specific problem.
  Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-01052: Invalid arguments
  Cause: An internal error occurred.
  Action: Contact Oracle Support Services.

PRKH-01053: Cluster synchronization services are not active
  Cause: CSS daemon is not running or unable to authenticate with CSS daemon
  Action: Use `crsctl check css` to ensure that CSS daemon is running. If CSS daemon is not running, execute `crsctl start crs` command.

PRKH-01054: Communications error
  Cause: CSS daemon is not running on the local node or unable to authenticate with CSS daemon
  Action: Use `crsctl check css` to ensure that CSS daemon is running. If CSS daemon is not running, execute `crsctl start crs` command.

PRKH-01055: Oracle Cluster Registry error
  Cause: OCR returned an error while processing a CSS request
  Action: Ensure that CRSD daemon is running e.g. with crsctl check clusterware

PRKH-01056: Unexpected CSS error
  Cause: An internal error occurred.
  Action: Contact Oracle Support Services.
PRKH-01057: Check for node with node number 0 failed.
   Cause: CSS daemon is not running on local node or unable to authenticate with CSS daemon.
   Action: Use 'crsctl check css' to ensure that CSS daemon is running. If CSS daemon is not running, execute 'crsctl start crs' command.

PRKH-01058: Node number specified for the node name lookup is beyond the allowed node number range
   Cause: An internal error occurred.
   Action: Contact Oracle Support Services.

PRKH-03002: Vendor cluster software error occurred in Cluster Synchronization Services
   Cause: An error occurred when Cluster Synchronization Services attempted to use non-Oracle vendor clusterware. This message may be accompanied by others identifying the specific problem.
   Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03003: An attempt to communicate with the CSS daemon failed
   Cause: CSS daemon is not running.
   Action: Ensure that CSS daemon is running.

PRKH-03004: Failed due to insufficient memory for Cluster Synchronization Services
   Cause: An internal error occurred.
   Action: Contact Oracle Support Services.

PRKH-03005: Entity {0} was not registered with CSS
   Cause: The given entity (e.g. instance) was not registered with CSS.
   Action: Start the entity before retrying the operation.

PRKH-03009: An attempt was made by Cluster Synchronization Services to release a lock that was not held
   Cause: An internal error occurred.
   Action: Contact Oracle Support Services.

PRKH-03011: Cluster Synchronization Services was started but has not completed startup
   Cause: An attempt to connect to CSS failed because initialization is still in progress.
   Action: None

PRKH-03013: An improper buffer argument was supplied to Cluster Synchronization Services
   Cause: This is an internal error.
   Action: Contact Oracle Support Services.

PRKH-03016: Invalid arguments
   Cause: An internal error occurred.
   Action: Contact Oracle Support Services.
PRKH-03050: Unexpected error (01) returned from Cluster Synchronization Services
Cause: An internal error occurred.
Action: Contact Oracle Support Services.

PRKH-03101: GIPC Error returned from DHCP module
Cause: A communication error occurred on a DHCP operation. This message may be accompanied by others identifying the specific problem.
Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03150: Unexpected error (01) returned from DHCP module
Cause: An internal error occurred.
Action: Contact Oracle Support Services.

PRKH-03202: An error occurred in Oracle Clusterware during an Operating System function call or request
Cause: An error occurred in Oracle Clusterware. This message may be accompanied by others identifying the specific problem.
Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03203: Required password not supplied
Cause: A requested operation requires a password but none was supplied. This message may be accompanied by others identifying the specific problem.
Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03204: An improper buffer argument was supplied to Oracle Clusterware
Cause: An internal error occurred.
Action: Contact Oracle Support Services.

PRKH-03205: Internal error in Oracle Clusterware
Cause: An internal error occurred.
Action: Contact Oracle Support Services.

PRKH-03250: Unexpected error (01) returned from Oracle Clusterware
Cause: An internal error occurred.
Action: Contact Oracle Support Services.

PRKH-03301: Invalid arguments
Cause: An internal error occurred.
Action: Contact Oracle Support Services.

PRKH-03302: Oracle Clusterware database support layer returned OCR error
Cause: This message may be accompanied by others identifying the specific problem.
Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03303: Oracle Clusterware database support layer returned OSD error
Cause: This message may be accompanied by others identifying the specific problem.
**Action**: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

**PRKH-03304: Internal error returned from Oracle Clusterware database support layer**
*Cause*: An internal error occurred.

**PRKH-03306: Internal error returned from Oracle Clusterware database support layer**
*Cause*: An internal error occurred.

**PRKH-03307: Internal error returned from Oracle Clusterware database support layer**
*Cause*: An internal error occurred.

**PRKH-03340: Following VIP error occurred from Oracle Clusterware database support layer**
*Cause*: An error occurred while processing a VIP request. This message may be accompanied by others identifying the specific problem.
*Action*: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

**PRKH-03350: Unexpected error returned from Oracle Clusterware database support layer**
*Cause*: An internal error occurred.

**PRKH-03401: An improper buffer argument was supplied to an internal interface**
*Cause*: An internal error occurred.

**PRKH-03402: OCR error returned from an internal interface**
*Cause*: An internal interface encountered an error in OCR processing. This message may be accompanied by others identifying the specific problem.
*Action*: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

**PRKH-03450: Unexpected error (0) returned from an internal interface**
*Cause*: An internal error occurred.
PRKA-02001: GSD already exists
   **Cause:** An attempt was made to create the Global Services Daemon (GSD) application while there was a running GSD application.
   **Action:** Stop and remove the GSD and create the GSD application again using 'srvctl add nodeapps'.

PRKA-02002: Listener already exists
   **Cause:** An attempt was made to create a Listener application while there was a running Listener application.
   **Action:** Stop and remove the running Listener and create the Listener application again using 'srvctl add nodeapps'.

PRKA-02003: EM Agent already exists
   **Cause:** An attempt was made to create an Agent application while there was a running Agent application.
   **Action:** Stop the running Agent and create the Agent application again using 'srvctl add nodeapps'.

PRKA-02005: Netmasks are different for starting and ending IP addresses
   **Cause:** An invalid range of VIP addresses was specified for the cluster
   **Action:** Check if the starting and ending addresses in the VIP range belong to the same netmask.
PRKC-01000: No active nodes detected in the cluster
   Cause: The active node list of the cluster could not be retrieved. This could occur if the operating system dependent clusterware was not functioning properly in one or more nodes in the cluster, or because there was no clusterware installed on the system.
   Action: Check the state of the cluster by running 'lsnodes' binary from your ORACLE_HOME/bin and see if it prints the node list correctly.

PRKC-01001: Error submitting commands in the buffer
   Cause: This is an internal error.
   Action: Contact Oracle Support Services.

PRKC-01002: All the submitted commands did not execute successfully
   Cause: Either a node failed in the middle of a manageability operation, or the communication between nodes was disrupted.
   Action: Check the state of your cluster by running 'lsnodes' binary from your ORACLE_HOME/bin and see if it prints the node list correctly.

PRKC-01004: Problem in copying file to nodes
   Cause: Attempted file copy operation(s) from the local node to one or more nodes in the cluster and one or multiple of those copy file operations failed. Possible causes: 1) One or more file copy operations to nodes in the cluster failed. 2) The destination directory did not have write permission for the user on one or more of the nodes. The source file did not exist. 3) The ‘rcp’ command to one or more nodes failed on UNIX platforms.
   Action: 1) Check that the source file exists. 2) Check that all nodes in the cluster are up. 3) Check that destination directory has write permission for the user. 4) On UNIX based platforms check that user can do ‘rcp’ to all the nodes.

PRKC-01005: Problem in removing file from nodes
   Cause: Attempted file remove operation(s) from the local node to one or more nodes in the cluster and one or multiple of those file remove operations failed. Possible causes: 1) One or more nodes failed during the operation. 2) The destination directory did not have write permission for the user on one or more of the nodes. 3) The source file did not exist. 4) The ‘rcp’ command to one or more nodes failed on UNIX platforms.
   Action: Check the accompanying error messages for details.

PRKC-01006: Problem in moving file to nodes
Cause: Attempted file move operation(s) from the local node to one or more nodes in the cluster and one or multiple of those move file operations failed. Possible causes: 1) One or more nodes failed during the operation. 2) The destination directory did not have write permission for the user on one or more of the nodes. 3) The source file did not exist. 4) The ‘rcp’ command to one or more nodes failed on UNIX platforms.

Action: Check the accompanying error messages for details.

PRKC-01007: Problem in creating directories on the nodes

Cause: Attempted directory create operation(s) from the local node to one or more nodes in the cluster and one or multiple of those directory create operations failed. Possible causes: 1) One or more nodes failed during the operation. 2) The destination directory did not have write permission for the user on one or more of the nodes. 3) The ‘rcp’ command to one or more nodes failed on UNIX platforms.

Action: Check the accompanying error messages for details.

PRKC-01009: Failed to start the service on all nodes

Cause: The service failed to start on one or more nodes of the cluster.

Action: Check if all the nodes in cluster are up and look in the clusterware alert log.

PRKC-01010: Failed to stop the service on all nodes

Cause: The service failed to stop on one or more nodes of the cluster.

Action: Check if all the nodes in cluster are up and service is still up on failed nodes. Look in the clusterware alert log.

PRKC-01011: Failed to delete the service from all nodes

Cause: The service failed to be deleted on one or more nodes of the cluster.

Action: Check if all the nodes in cluster are up and service is still registered. Look in the clusterware alert log.

PRKC-01012: Failed to create the service on all nodes

Cause: The service failed to be created on one or more nodes of the cluster.

Action: Check if all the nodes in cluster are up. Look in the clusterware alert log.

PRKC-01016: Failed to retrieve value of the environment variable "{0}", {1}

Cause: Attempted to retrieve value of an environment variable which was not defined.

Action: Define the environment variable.

PRKC-01017: Problem restarting GSD

Cause: GSD (Global Services Daemon) could not be started on the local node. This could occur if the operating system dependent clusterware was not functioning properly or there is already a running GSD.

Action: Check the state of your clusterware by running 'lsnodes' from ORACLE_HOME/bin. It should list the nodes in the cluster. Try ‘gsdctl stop’ and then ‘gsdctl start’ again.

PRKC-01018: Error getting coordinator node

Cause: This could occur if the operating system dependent clusterware was not functioning properly.
Action: Use ‘gsdctl stop’ on each node to stop the GSDs. Use ‘gsdctl start’ on each node in the cluster.

PRKC-01019: Error creating handle to GSD daemon on the node {0}
Cause: Global Services Daemon was not running on the node.
Action: Use ‘gsdctl stat’ to check the status of the daemon. Use ‘gsdctl start’ to start it.

PRKC-01020: Exception while executing the operation on the remote node {0}
Cause: Attempted to execute an operation on the remote node when the Global Services Daemon was not up on the remote node {0}.
Action: Start the Global Services Daemon on the remote node using ‘gsdctl start’.

PRKC-01021: Problem in the clusterware
Cause: The operating system dependent clusterware could not be contacted. This could occur because the operating system dependent clusterware was not functioning properly.
Action: Check the state of the operating system dependent clusterware.

PRKC-01022: Could not get node name for node {0} in {1}
Cause: The operating system dependent clusterware could not be contacted. This could occur because the operating system dependent clusterware was not functioning properly.
Action: Check the state of the operating system dependent clusterware using 'lsnodes -n'.

PRKC-01025: Failed to create a file under the filepath {0} because the filepath is not executable or writable
Cause: The directory of the specified filepath did not have execute or write permission. So the temporary file could not be created to test whether the filepath was shared among nodes.
Action: Make the directory of the specified filepath executable and writable.

PRKC-01144: File "[0]" not found.
Cause: The file was not found in the file system.
Action: Make sure that the file exists in the file system.

PRKC-01148: Failed to get host name for the local computer
Cause: An error occurred while attempting to retrieve the TCP/IP host name
Action: Correct the problem indicated by the accompanying error messages.

PRKC-01149: Failed to get OCR locations
Cause: An error occurred while attempting to retrieve the OCR locations, possibly due to missing or incorrect OCR locations file, or incomplete OCR configuration, or due to missing or incorrect SRVM shared libraries.
Action: Verify that the Clusterware has been correctly installed and configured. Verify that the ocr.loc file is present and readable in the appropriate location for your platform.

PRKC-01150: Failed to get drive letters used on following nodes: "[0]"
Cause: An error occurred while attempting to retrieve used drive letters on one or more nodes.
**Action:** Look at the accompanying messages and fix the error(s). The messages typically relate to a node not being reachable, or the remote execution service not running on the node, or some permissions issue when attempting to use the remote execution service on the remote node.

PRKC-01151: The given path "[0]" does not exist

*Cause:* The specified path may not have been created or an incorrect path has been specified.

*Action:* Make sure that the given path exists by specifying a correct existing path.

PRKC-01152: The specified path "[0]" is not a directory

*Cause:* The specified path may be a file, not a directory, or an incorrect path may have been specified.

*Action:* Make sure to specify a path that is a valid directory path.

PRKC-01153: No directory is available on the remote node "[0]" to copy the binary RemoteExecService.exe

*Cause:* Either the path defined by value of registry key HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/OracleRemExecService is not available on the remote node, or the c:/temp/ directory is not available or not accessible on the specified remote node.

*Action:* Make sure that the required path is available on the remote node.

PRKC-01155: The node list provided had only one entry or had multiple entries that were duplicates of a single nodename entry

*Cause:* The list of nodes provided for the shared path check was either only one node, or the list included entries that were duplicates of the same single node.

*Action:* Please provide the correct nodelist for the cluster on which the check is being called, making sure that there are at least two distinct entries.

PRKC-01156: Failed to validate raw device "[0]" -- Details: {1}

*Cause:* The raw device was not an existing device that could be opened and recognized by the OS as a "raw/character" device type.

*Action:* Make sure the supplied value identifies a valid raw device that can be opened as a "raw/character" device type.

PRKC-01157: Failed to validate raw device "[0]"

*Cause:* The raw device was not an existing device that could be opened and recognized by the OS as a "raw/character" device type.

*Action:* Make sure the supplied value identifies a valid raw device that can be opened as a "raw/character" device type.

PRKC-01158: Failed to validate raw device "[0]" -- Details: {1}

*Cause:* The device was not an existing device that could be opened and recognized by the OS as either "raw/character" or a "block" device type.

*Action:* Make sure the supplied value identifies a valid device that can be opened as a "raw/character" or "block" device type.

PRKC-01159: Failed to validate device "[0]"

*Cause:* The device was not an existing device that could be opened and recognized by the OS as either "raw/character" or a "block" device type.

*Action:* Make sure the supplied value identifies a valid device that can be opened as a "raw/character" or "block" device type.
PRKC-01160: Failed to retrieve the value of environment variable "{0}" on following nodes: "{1}", [{2}]
  
  Cause: An error occurred while attempting to retrieve value of environment variable on one or more nodes due to the node not being reachable, or the remote execution service not running on the node, or some permissions issue when attempting to use the remote execution service on the remote node.
  
  Action: Look at the accompanying messages and respond accordingly.

PRKC-01161: Failed to retrieve the Windows domain on following nodes: "{0}" 
  
  Cause: An error occurred while attempting to retrieve the Windows domain on one or more nodes. The possible causes include:
  
  - A node is not reachable.
  - Remote execution service is not running on the node.
  - Permissions problems prevented use of remote execution service on a node.
  
  Action: Look at the accompanying messages and respond accordingly.

PRKC-01162: "{0}" is not a file
  
  Cause: The indicated object was expected to be a file, but it was not.
  
  Action: Make sure that the indicated object is a file and not a directory.

PRKC-01163: {0} Exception occurred while determining validity of storage type.
  
  Cause: An error occurred while getting storage type of the given path. Null arguments might have been passed.
  
  Action: Make sure that the native api is passing non null arguments.

PRKC-01164: invalid command or arguments
  
  Cause: This is an internal error.
  
  Action: Contact Oracle Support Services.

PRKC-01165: Failed to set up Windows service OracleRemoteExecService on node '{0}'
  
  Cause: An error occurred while setting up OracleRemoteExecService on the specified nodes."
  
  Action: Look at the accompanying messages and respond accordingly.
PRKE-01008: Failed to get list of active nodes from Clusterware

**Cause:** Possible causes: 1) Not operating in cluster mode. 2) Failed to load SRVM libraries. 3) Failed to initialize clusterware context.

**Action:** Check for the health of clusterware using "lsnodes" utility to get the list of active nodes in the cluster. Also, check for the presence of srvm libraries in the load library path. If these two checks get cleared, please contact Oracle Support Services.

PRKE-01009: Failed to start GSD on local node

**Cause:** GSD is already running on the local node, or GSD could not be started because of some other reason.

**Action:** Run "gsdctl stat" to check if a daemon is already running on the local node. If a daemon is not running on local node, please contact Oracle Support Services to check for the other reasons for failure.

PRKE-01010: Failed to stop GSD on local node

**Cause:** GSD is not running on the local node, or GSD could not shut down gracefully.

**Action:** Run "gsdctl stat" to check if a GSD is running on the local node. If a GSD is running, please contact Oracle Support Services to check for other reasons for failure.

PRKE-01011: Failed to get status of GSD on local node

**Cause:** Failure to get the list of active nodes from the cluster, or failure to query the list of live daemons from the clusterware.

**Action:** Run "lsnodes" to check the health of the clusterware. If the clusterware is working fine, check for the presence of SRVM libraries in the load library path. If the libraries are present, please contact Oracle Support Services for further assistance.
PRKP-01000: Cannot retrieve configuration for cluster database {0}

    **Cause:** The cluster database configuration could not be retrieved from the repository. This could occur either because the database was never registered, or because the repository itself had not been created.

    **Action:** Check if the database has been configured by printing a list of all cluster databases using 'srvctl config'. If the repository has not been created, use 'srvconfig -init' to create it.

PRKP-01001: Error starting database instance {0} on node {1}

    **Cause:** The instance could not be started using the SQL*Plus startup command.

    **Action:** Try starting the named instance manually using SQL*Plus to see why it failed and examine the database instance alert log.

PRKP-01002: Error stopping database instance {0} on node {1}

    **Cause:** The SQL*Plus shutdown command returned an error while stopping the instance.

    **Action:** Try stopping the named instance manually using SQL*Plus to see why it failed and examine the database instance alert log.

PRKP-01003: Startup operation partially failed

    **Cause:** Some components of the cluster database could not be started.

    **Action:** Check the accompanying error messages for details.

PRKP-01004: Shutdown operation partially failed

    **Cause:** Some components of the cluster database reported errors while being stopped.

    **Action:** Check the accompanying error messages for details.

PRKP-01005: Failed to start up cluster database {0}

    **Cause:** The cluster database could not be started.

    **Action:** Check the accompanying error messages for details.

PRKP-01006: Failed to shut down cluster database {0}

    **Cause:** The cluster database reported errors while being shut down.

    **Action:** Check the accompanying error messages for details.

PRKP-01007: Failed to start all the listeners associated with all the instances of cluster database {0}

    **Cause:** Internal error.
Action: Contact your customer support representative.

PRKP-01008: Failed to start listeners associated with instance \{0\} on node \{1\}
Cause: Internal error.
Action: Contact your customer support representative.

PRKP-01009: Failed to stop all the listeners associated with all the instances of
cluster database \{0\}
Cause: Either the listener name associated with an instance could not be
determined, or 'lsnrctl stop' failed for a listener.
Action: Verify that listener.ora contains a SID_LIST entry for each instance of the
named database, and that the 'lsnrctl stop' command succeeds for those listeners.

PRKP-01010: Failed to stop all the listeners associated with instance \{0\} on node \{1\}
Cause: Either the listener name associated with an instance could not be
determined, or 'lsnrctl stop' failed for a listener.
Action: Verify that listener.ora contains a SID_LIST entry for each instance of the
named database, and that the 'lsnrctl stop' command succeeds for those listeners.

PRKP-01011: Failed to get all the listeners associated with instance \{0\} on node \{1\}
Cause: The listener name associated with an instance could not be determined.
Action: Ensure that listener.ora contains a SID_LIST entry for the named instance.

PRKP-01012: Invalid environment variable \{0\} setting for cluster database \{1\}
Cause: The argument to the -t option was not of the form \<name>=<value> or it
contained special characters.
Action: Ensure that the -t option has an argument of the form \<name>=<value>. Enclose
the argument to the -t flag in quotes.

PRKP-01013: \{0\}: undefined environment variable for cluster database \{1\}
Cause: The named environment variable is not defined for the named cluster
database
Action: Set a value for the variable with 'srvctl setenv'.

PRKP-01014: \{0\}: undefined environment variable for instance \{1\} of cluster database
\{2\}
Cause: The named environment variable is not defined for the given instance
Action: Set a value for the variable with 'srvctl setenv'.

PRKP-01015: \{0\}: undefined environment variable
Cause: The named environment variable is not defined
Action: Set a value for the named environment variable with 'srvctl setenv'.

PRKP-01084: Database "\{0\}" cannot have more than "\(1\)" services
Cause: Attempt to add a new service to database was rejected because database
has already reached the maximum services limit.
Action: Retry after removing a service of this database via 'srvctl remove service'
command, or contact Oracle Support Services.

PRKP-01088: Failed to retrieve configuration of cluster database \{0\}
**Cause:** Attempt to retrieve configuration of cluster database failed. This failure is most likely due to user incorrectly using a tool, such as SRVCTL, that is of different version than that of database’s configuration.

**Action:** If error is due to user using SRVCTL that is of different version than that of the database’s, then run SRVCTL tool from the ORACLE_HOME reported in the error message. Otherwise, contact Oracle support services.
PRKR-01001: cluster database {0} does not exist
   Cause: The cluster database was never registered in the repository.
   Action: Check if the database has been configured by printing a list of all cluster
databases using 'srvctl config'.

PRKR-01002: cluster database {0} already exists
   Cause: An attempt was made to register a cluster database which already existed
   in the repository.
   Action: Check if the database has already been configured by printing a list of all
   cluster databases using 'srvctl config'.

PRKR-01003: instance {0} does not exist
   Cause: The named instance was never registered in the repository.
   Action: Use 'srvctl config instance' to check if the instance is registered in the
   repository.

PRKR-01005: adding of cluster database {0} configuration failed, {1}
   Cause: Internal error.
   Action: Contact your customer support representative.

PRKR-01006: deleting of cluster database {0} configuration failed, {1}
   Cause: Internal error.
   Action: Contact Oracle Support Services.

PRKR-01007: getting of cluster database {0} configuration failed, {1}
   Cause: Internal error.
   Action: Contact Oracle Support Services.

PRKR-01008: adding of instance {0} on node {1} to cluster database {2} failed.
   Cause: Internal error.
   Action: Contact Oracle Support Services.

PRKR-01009: deleting of instance {0} from cluster database {1} failed, {2}
   Cause: Internal error.
   Action: Contact Oracle Support Services.

PRKR-01010: moving of instance {0} to node {1} of cluster database {2} failed.
   Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01011: renaming of instance {0} to instance {1} of cluster database {2} failed, {3}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01012: error {0} while serializing configuration of cluster database {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01013: error {0} while deserializing configuration of cluster database {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01014: error {0} while serializing directory
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01015: error {0} while deserializing directory
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01016: reading of cluster database {0} configuration failed, {1}, {2}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01017: writing of cluster database {0} configuration failed, {1}, {2}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01018: reading of directory failed, {0}, {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01019: writing of directory failed, {0}, {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01020: reading of version information failed, {0}, {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01021: writing of version information failed, {0}, {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01022: Cluster registry {0} contains incompatible version, {1} != {2}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01023: file {0} does not exist
Cause: The named file did not exist.
Action: Specify a file that exists.

PRKR-01024: file {0} does not have {1} permissions
Cause: The named file did not have the specified permission.
Action: Try changing the permission on the file to the specified permission.

PRKR-01025: file {0} does not contain property {1}
Cause: The file did not contain the specified property.
Action: Contact Oracle Support Services.

PRKR-01026: property {0} not set in file {1}
Cause: The file did not contain the specified property.
Action: Contact Oracle Support Services.

PRKR-01027: failed to retrieve list of cluster databases
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01028: Cluster registry {0} is invalid [HINT: initialize cluster registry by using "srvconfig" tool]
Cause: The management repository was never initialized.
Action: Use 'srvconfig -init' to initialize the repository.

PRKR-01039: invalid option {0} specified
Cause: The specified option was invalid.
Action: Check the command documentation or the inline help display for usage details.

PRKR-01040: missing <file> argument for {0} option
Cause: The specified option was invalid for srvconfig.
Action: Check the command documentation or the inline help display for usage details.

PRKR-01050: file {0} creation in {1} directory failed
Cause: Either the directory did not exist or it did not have the required permissions.
Action: Create the directory if it did not exist or change the permission of the directory.

PRKR-01051: file {0} does not contain an entry for dbname {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01052: file name {0} is not of <cluster database name>.conf form
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01053: invalid range {0} specified in node_list = {1}
Cause: Internal error.
Action: Contact Oracle Support Services.
PRKR-01054: invalid parameter {0} specified in inst_oracle_sid = {1}
  Cause: Internal error.
  Action: Contact Oracle Support Services.

PRKR-01055: invalid extra arguments {0} specified to {1} option
  Cause: Provided invalid arguments to srvconfig.
  Action: Check the command documentation or the inline help display for usage details.

PRKR-01056: invalid registry entry {0} found; should be of form {1}
  Cause: Internal error.
  Action: Contact Oracle Support Services.

PRKR-01057: environment variable does not exist
  Cause: Attempted to retrieve non existing environment variable.
  Action: Set the environment variable.

PRKR-01078: Database {0} of version {1} cannot be administered using current version of srvctl. Instead run srvctl from {2}
  Cause: An attempt was made to access configuration of database using srvctl that was of different version than that of the database.
  Action: Perform the operation using srvctl from the ORACLE_HOME mentioned in the error message.

PRKR-01082: Failed to get OCR locations
  Cause: An error occurred while attempting to retrieve the OCR locations, possibly due to missing or incorrect OCR locations file, or incomplete OCR configuration, or due to missing or incorrect SRVM shared libraries.
  Action: Verify that the Clusterware has been correctly installed and configured. Verify that the ocr.loc file is present and readable in the appropriate location for your platform.
PRKO-00371: No option specified for "modify gns"
   Cause: No option was specified for the "modify gns" command.
   Action: Specify at least one option.

PRKO-00372: The "-{0}" option requires the specification of the "-{1}" option.
   Cause: An option was specified which requires that another option to be specified
   at the same time.
   Action: Specify the required option.

PRKO-00373: Invalid host name or address: "{0}".
   Cause: The host name or address specified for the address on which GNS is to
   listen was not valid.
   Action: Specify a valid host name or IP address. If an IP address is used, it must
   be one of the following:
   1. A valid IPv4 address (N.N.N.N);
   2. A valid IPv6 address (N[:N]*).

PRKO-00374: The "-{0}" option may not be used with the "-{1}" option.
   Cause: The two options may not be used together.
   Action: Run srvctl with each option specified separately.

PRKO-00375: No option was specified for the GNS "modify" command.
   Cause: An option was not specified for the modify command.
   Action: Specify an option.

PRKO-00377: The "-{0}" option requires the specification of either the "-{1}" or the
   "-{2}" option.
   Cause: An option was specified which requires that one of the other possible
   options to be specified at the same time.
   Action: Specify the one of the other options.

PRKO-00378: Both "-{0}" and "-{1}" options may not be specified with the "-{2}" option.
   Cause: An invalid combination of options was specified.
   Action: Specify only one of the other possible options.

PRKO-00380: No other option is allowed when the "-{l}" option is specified.
   Cause: If the "-{l}" option is specified, no other option may be given.
Action: Only specify the "-l" option.

PRKO-00381: Both "-g" and "-x" options are required to set server pool [0] for single instance database [1] on the cluster.
Cause: Option "-x" is not specified in 'srvctl modify database' command for a single instance database on the cluster.
Action: Specify both -g and -x options in 'srvctl modify database' and retry.

PRKO-00382: The number of candidate servers [0] in server pool [1] should be one for single instance database [2]
Cause: The server pool specified in 'srvctl modify database' command for a single instance database contains more than 1 candidate servers.
Action: Either modify the given server pool via 'srvctl modify srvpool' command to have only one candidate server specified via -x argument or specify another server pool that contains only one candidate server specified via -x argument.

PRKO-02000: Invalid command line syntax for a single instance database
Cause: user specified invalid command line syntax.
Action: Look at the usage provided for this command and specify all mandatory options.

PRKO-02001: Invalid command line syntax
Cause: The syntax of the command is incorrect.
Action: Look at the usage provided for this command and use the correct syntax.

PRKO-02002: Invalid command line option:
Cause: Invalid command line option was specified.
Action: Check the value printed along with the exception and specify the correct value.

PRKO-02003: Invalid command line option value:
Cause: Invalid command line option was specified.
Action: Check the value printed along with the exception and specify the correct value.

PRKO-02004: Repetition of command line option:
Cause: The command line option printed along with the exception was repeated.
Action: Delete the repeated command line option and try the command again.

PRKO-02005: Failure in getting Cluster Database Configuration for:
Cause: The specified database does not exist.
Action: Check the specified database name and try again.

PRKO-02006: Invalid node name: [0]
Cause: Unable to get the hostname for the given node/machine name.
Action: Check the node name and try again.

PRKO-02007: Invalid instance name: [0]
Cause: Unable to obtain the node name on which the instance name specified was running.
Action: Check the instance name specified and try again.
PRKO-02008: Invalid connect string:
  Cause: The connect string specified was not in the format username/password [as [SYSDBA | SYSOPER]]
  Action: Check the connect string and try again.

PRKO-02009: Invalid name/value string: {0}
  Cause: The name value string should be of the form name = value
  Action: check the input name/value pair and try again.

PRKO-02010: Invalid command specified on command line: {0}
  Cause: The <command> specified on the command line was not recognized.
  Action: Valid commands are enable | disable | start | stop | relocate | status | add | remove | modify | getenv | setenv | unsetenv | config. Usage of srvctl is printed with this errori. Check the usage and specify a valid command.

PRKO-02011: Invalid object specified on command line: {0}
  Cause: The <object> specified on the command line was not recognized.
  Action: Valid objects are database | instance | service | nodeapps | vip | network | asm | diskgroup | listener | srv pool | scan | scan_listener | oc4j | home | filesystem | gns | cvu. Srvctl usage is printed along with this exception. Check the usage printed with this error and use a valid object.

PRKO-02012: {0} object is not supported in Oracle Restart
  Cause: The <object> specified on the command line was not a valid object for the Oracle Restart mode.
  Action: Valid objects for Oracle Restart mode are database | service | asm | diskgroup | listener | home | ons. Srvctl usage is printed along with this exception. Check the usage printed with this error and use a valid object.

PRKO-02013: {0} object is not supported in Oracle Clusterware
  Cause: The <object> specified on the command line was not a valid object for the Oracle Clusterware mode.
  Action: Valid objects for Oracle Clusterware are database | instance | service | nodeapps | vip | network | asm | diskgroup | listener | srvpool | scan | scan_listener | oc4j | home | filesystem | gns | cvu. Srvctl usage is printed along with this exception. Check the usage printed with this error and use a valid object.

PRKO-02014: The -a option should be specified with -d <dbunique_name> for 'srvctl config database' command
  Cause: -a option was specified without the required -d option specifying for which database to retrieve configuration.
  Action: To retrieve the full configuration of the database, specify both -d and -a option with the 'srvctl config database' command.

PRKO-02016: Database {0} has no services configured
  Cause: 'srvctl config database' request found no services configured for the database.
Action: Use 'srvctl add service' command to configure services for the database and then retry.

PRKO-02017: Service {0} does not exist for database {1}.
   Cause: The service being updated is not defined for the given database.
   Action: If the service needs to be added don’t use '-u' option in 'srvctl modify service' command. Option '-u' is for updating existing services.

PRKO-02018: No databases are configured
   Cause: No databases were configured.
   Action: Use 'srvctl add database' command to configure databases.

PRKO-02049: Invalid name-value string: {0}
   Cause: The name=value string specified is not in valid format.
   Action: The format for the string should be name=value. Check input and correct the error.

PRKO-02050: Error in enabling ASM instance on node {0}. {1}
   Cause: ASM could not be enabled.
   Action: Make sure that the node name is correct and that ASM exists on the specified node and it is not already enabled on the node. The current state of the ASM can be found using 'srvctl status asm' command. To check if ASM is configured or not, use 'srvctl config asm' command.

PRKO-02053: Error in disabling ASM instance on node {0}. {1}
   Cause: ASM could not be disabled.
   Action: Make sure that the node name is correct and that ASM exists on the specified node and it is not already disabled on the node. The current state of the ASM can be found using 'srvctl status asm' command. To check if ASM is configured or not, use 'srvctl config asm' command.

PRKO-02054: Invalid command line syntax, mandatory options are either {0} or {1}, but not both.
   Cause: The command requires exactly one set of mandatory command line options. But either some options in one set were missing or the options from both sets were specified.
   Action: Check the command line options entered and make sure that all the mandatory options in one set are specified.

PRKO-02056: Error occurred while checking dependent resources on network {0}. Network was not removed.
   Cause: An attempt made to check if any resources are dependent on the given network failed.
   Action: Make sure that the network is up. Make sure that the user has sufficient permission to remove network. If force flag was not specified in the remove command then specify force flag and try the command again.

PRKO-02058: Scan name {0} cannot be the same as a cluster node name: {1}
   Cause: Scan name is same as a cluster node name.
   Action: Choose a different scan name and issue the command.

PRKO-02065: Only one server pool should be provided for a single instance database on a cluster
Cause: An attempt to create a single instance database failed because more than one server pool was specified.

Action: Provide only one server pool while creating the single instance database.

PRKO-02067: The size of server pool should be one for single instance database
Cause: An attempt to create a single instance database failed because a server pool with more than one server was specified.
Action: Provide a server pool with only one server while creating a single instance database.

PRKO-02069: OC4J could not be created as it already exists
Cause: A new OC4J instance could not be created, as there is an existing instance of OC4J.
Action: Only one instance of OC4J can exists at any given time.

PRKO-02070: OC4J creation failed
Cause: A new OC4J instance could not be added because of OC4J exception.
Action: Resolve the OC4J exception and then try the OC4J addition again.

PRKO-02072: OC4J is not configured
Cause: OC4J is not configured on the cluster.
Action: Check the exception printed with this message. If OC4J is not configured then OC4J instance can be created using 'srvctl add oc4j'. If there are other errors shown with this error then check the cause/action messages of underlying exception.

PRKO-02074: OC4J is still running. It must be stopped before removing.
Cause: 'srvctl remove oc4j' was issued while OC4J instance was running.
Action: Stop the oc4j instance using 'srvctl stop oc4j' and then try removing.

PRKO-02075: OC4J could not be removed
Cause: OC4J instance could not be removed because it does not exist.
Action: The current OC4J configuration can be checked using 'srvctl config oc4j' command. Make sure that OC4J instance is running on that port. If their are other underlying messages printed then check the cause/action messages of underlying errors shown with this.

PRKO-02077: OC4J RMI port could not be modified
Cause: OC4J RMI port could not be modified.
Action: Make sure that OC4J instance exists and port is not in use by using the command 'srvctl config oc4j' and try again.

PRKO-02079: OC4J could not be started
Cause: The start of OC4J instance failed.
Action: Make sure that OC4J instance exists and is not already started.

PRKO-02081: OC4J failed to stop
Cause: The OC4J instance could not be stopped.
Action: Make sure that OC4J instance exists and are not already stopped.

PRKO-02082: Missing mandatory option [0]
Cause: The specified mandatory command option is missing.
**Action:** Use srvctl with the -h option to display option details for the command and make sure that all the mandatory options are specified.

**PRKO-02087: OC4J could not be enabled**

**Cause:** OC4J instance could not be enabled.

**Action:** Make sure that node name is correct and that OC4J instance exists and is not already enabled. The current state of the OC4J instance can be found using `srvctl status oc4j` command. To check if OC4J instance is configured or not use `srvctl config oc4j` command.

**PRKO-02090: OC4J could not be disabled**

**Cause:** OC4J instance could not be disabled.

**Action:** Make sure that Node name is correct and that OC4J instance exists and is not already disabled. The current state of the OC4J instance can be found using the `srvtl status oc4j` command. To check if OC4J instance is configured or not use `srvctl config oc4j` command.

**PRKO-02093: OC4J could not be relocated**

**Cause:** OC4J instance could not be relocated to given node.

**Action:** If the node name was passed in the command line make sure that the node name is valid. Also make sure that 0C4J instance exists on the cluster and is running.

**PRKO-02100: Cannot update service {0} because {1} is not is not administrator-managed**

**Cause:** An attempt to update the service using `-u` option failed because this option can be used with administrator-managed databases only.

**Action:** Make sure that you provide correct options for `srvctl add service` command.

**PRKO-02102: Failed to create server pool {0}: {1}**

**Cause:** An attempt to create the specified server pool failed because of the reason provided by the accompanying error.

**Action:** Examine the accompanying error messages for details.

**PRKO-02103: The `-a` and `-r` options cannot both be supplied with `-u`**

**Cause:** Command `srvctl add service` with `-u` option failed because both options `-a` and `-r` were provided.

**Action:** Correct options and issue command again.

**PRKO-02104: Option `-a` or `-r` should be supplied with `-u`**

**Cause:** Command `srvctl add service` with option `-u` failed because both it requires options `-a` or `-r` to be provided.

**Action:** Correct options and issue command again.

**PRKO-02105: Option `-g` cannot be used with option `-r`, `-a` or `-P`**

**Cause:** Incorrect usage of -g option.

**Action:** Correct options and issue command again.

**PRKO-02106: There is no server pool associated with database {0}**

**Cause:** Command `srvctl add service` failed because the given database doesn’t have an associated server pool.
Action: Oracle internal error. Contact customer support.

PRKO-02108: Command line options '-i' and '-n' cannot be used at the same time
   Cause: Incorrect usage of -i and -n options.
   Action: Correct options and issue command again.

PRKO-02109: Options '-e', '-i', or '-w' should be supplied with option '-c'
   Cause: Incorrect usage of -e, -i and -w options.
   Action: Correct options and issue command again.

PRKO-02110: Option '-c' cannot be used to create services with administrator-managed database [0]
   Cause: Incorrect usage of -c option.
   Action: Remove -c option and issue command again.

PRKO-02111: Invalid number [0] for command line option [1]
   Cause: Invalid value was specified for the command line option that requires a number in a certain range.
   Action: Check the value printed and specify a number within the required range.

PRKO-02112: Options 'x' and '-y' cannot be used to create RAC One Node database [0]
   Cause: Incorrect usage of -x and -y options.
   Action: Remove -x and -y options and issue command again.

PRKO-02115: OC4J is already disabled
   Cause: OC4J instance could not be disabled because it is already disabled.
   Action: If this is the expected state then this is not an error. If it is not then enable OC4J instance by using the 'srvctl enable oc4j' command.

PRKO-02116: OC4J is already enabled
   Cause: OC4J instance could not be enabled because it is already enabled.
   Action: If this is the expected state then this is not an error. If it is not then disable OC4J instance by using the 'srvctl disable oc4j' command.

PRKO-02117: Options '-g' and '-e' cannot be used together
   Cause: Options -g and -e were used incorrectly.
   Action: Correct options and issue command again.

PRKO-02118: Options '-g' and '-i' cannot be used together
   Cause: Incorrect usage of -g and -i options.
   Action: Correct options and issue command again.

PRKO-02119: Only one server pool can be specified with the -g option for a RAC One Node database
   Cause: Incorrect number of serverpools was supplied with the -g option.
   Action: Specify one server pool with the -g option and issue command again.

PRKO-02120: Options '-x' and '-y' cannot be used to modify RAC One Node database
   Cause: Options -x and -y were used incorrectly.
   Action: Remove -x and -y options and issue command again.
PRKO-02121: Options '-e' and '-w' cannot be used to modify a database that is not RAC One Node
Cause: Options -e and -w were used incorrectly.
Action: Remove -e and -w options and issue command again.

PRKO-02122: Database type can only be 'RAC' or 'RACONENODE'
Cause: Incorrect database type was specified for 'srvctl convert database' command.
Action: Specify 'RAC' or 'RACONENODE' when running 'srvctl convert database' command.

PRKO-02126: Options '-n' and '-w' cannot both be used with options '-a' and '-r'
Cause: Options -n, -w, -a and -r were used incorrectly.
Action: Correct options and issue command again.

PRKO-02127: Either option '-e' or '-g' must be supplied for adding RAC One Node database
Cause: Options -e and -g were not specified when adding RAC One Node database.
Action: Use 'srvctl add database' command with either -e or -g option.

PRKO-02128: Specified cardinality {0} is not valid for policy-managed RAC One Node service {1}
Cause: Given cardinality was not applicable to RAC One Node service.
Action: Use 'srvctl add service' command without the -c option or specify SINGLETON value for the -c option.

PRKO-02129: Online relocation timeout value {0} is not within the range of {1} and {2}
Cause: Online relocation timeout value was not within the required range.
Action: Supply a value within the required range.

PRKO-02130: Supplied node {0} must be in the candidate list of the administrator-managed database {1}
Cause: The supplied node name was not in the candidate list of the administrator-managed database.
Action: Supply a node in the candidate list of the database and rerun 'srvctl start database' command.

PRKO-02131: Supplied node {0} must be in the server pool of the policy-managed database {1}
Cause: The supplied node name was not in the server pool of the policy-managed database.
Action: Supply a node from the server pool of the database and rerun 'srvctl start database' command.

PRKO-02132: Options '-g', '-r' and '-a' cannot be used to add services for RAC One Node database {0}
Cause: Failed to add specified service because provided options cannot be used to add a service for RAC One Node database.
Action: Use 'srvctl add service' command without options -g, -r or -a.
PRKO-02133: Options '-g', '-r' and '-a' cannot be used to modify services for RAC One Node database {0}

Cause: Failed to modify specified service because provided options cannot be used to modify a service for RAC One Node database.

Action: Use 'srvctl modify service' command without options -g, -r or -a.

PRKO-02134: 'srvctl add instance' command is not supported with RAC One Node databases

Cause: The specified database does not support 'srvctl add instance' command.

Action: Convert the RAC One Node database to a RAC database by using the 'srvctl convert database' command and then rerun 'srvctl add instance' command.

PRKO-02135: 'srvctl remove instance' command is not supported with RAC One Node databases

Cause: The one instance of the RAC One Node database cannot be removed by the 'srvctl remove instance' command.

Action: Run 'srvctl remove database' command.

PRKO-02136: 'srvctl start/stop/enable/disable/modify/status/setenv/getenv/unsetenv instance' commands are not supported with RAC One Node databases

Cause: The supplied instance command is not supported with RAC One Node database.

Action: Perform srvctl operations on the 'database' noun instead of 'instance' with a RAC One Node database.

PRKO-02137: Option '-n' should not be supplied to convert policy-managed RAC One Node database to RAC database

Cause: Failed to convert database because provided option cannot be used to convert policy-managed RAC One Node database.

Action: Use 'srvctl convert database' command without -n option.

PRKO-02138: Database {0} is not of RAC One Node database type

Cause: The supplied database was not a RAC One Node database.

Action: Run 'srvctl convert database' command with database of type RAC One Node.

PRKO-02139: Supplied nodes {0} should contain node {1} where database {1} is already running on

Cause: Supplied nodes did not include the node that the database was running on.

Action: Make sure given nodes include the node that the database is running on.

PRKO-02140: Option '-x' should be supplied when adding single instance database

Cause: Option -x was not supplied when adding single instance database.

Action: Supply -x option and issue command again.

PRKO-02141: Option '-r' requires option '-a'

Cause: Command 'srvctl relocate database' with option '-r' failed because it requires option '-a' to be provided.

Action: Correct options and issue command again.
PRKO-02142: Cannot start RAC One Node database when an online relocation request for the database is already active  
**Cause:** Unable to start the supplied RAC One Node database because it already has an active online relocation request.  
**Action:** Specify another database to start.

PRKO-02143: Cannot stop RAC One Node database when an online relocation request for the database is already active  
**Cause:** Unable to stop the supplied RAC One Node database because it already has an active online relocation request.  
**Action:** Either wait for the online relocation request to complete or specify another database to stop.

PRKO-02144: Option '-e' cannot be used with RAC One Node policy-managed database {0}  
**Cause:** The -e option was specified to modify the candidate server list for RAC One Node policy-managed database.  
**Action:** Either use 'srvctl modify srvpool' to modify the candidate server list or specify -g with 'srvctl modify database' to modify the server pool.

PRKO-02145: 'srvctl remove instance' command is not supported with single instance databases  
**Cause:** The single instance database cannot be removed by the 'srvctl remove instance' command.  
**Action:** Run 'srvctl remove database' command.

PRKO-02147: Options '-e', '-i' and '-w' can only be used if database type is RAC One Node  
**Cause:** Options -e, -i or -w were specified if database type is not RAC One Node.  
**Action:** Either remove -e, -i and -w options or specify -c with type RAC One Node.

PRKO-02148: Option '-n' must be supplied when running 'srvctl relocate database' for administrator managed RAC One Node database  
**Cause:** Option -n was not specified when executing relocate on administrator managed RAC One Node database.  
**Action:** Use 'srvctl relocate database' command with -n option.

PRKO-02156: Instance name {0} is not valid  
**Cause:** The supplied instance name is not the correct format for RAC One Node database.  
**Action:** Make sure that the instance name is of the format <instance_name_prefix>_1 or <instance_name_prefix>_2. Use 'crsctl modify resource' to correct the instance name.

PRKO-02157: Option '-i' should not specified to convert policy-managed RAC database to RAC One Node database  
**Cause:** Failed to convert database because the provided option can not be used to convert policy-managed RAC database to RAC One Node database.  
**Action:** Use 'srvctl convert database' command without -i option.

PRKO-02158: Option '-n' should not be specified to convert a RAC database to RAC One Node database
Cause: Failed to convert database because the provided option ‘-n’ should not be supplied to convert RAC database to RAC One Node database.

Action: Use 'srvctl convert database' command without -n option.

PRKO-02159: Option '-i' should be specified to convert an administrator-managed RAC database to its equivalent RAC One Node database configuration

Cause: Failed to convert database because the option ‘-i’ was not specified to convert administrator-managed RAC database to its equivalent RAC One Node database configuration.

Action: Use ‘srvctl convert database’ command with -i option.

PRKO-02160: Option '-w' should not be specified to convert a RAC One Node database to its equivalent RAC database configuration

Cause: Failed to convert database because option ‘-w’ was specified to convert RAC One Node database to its equivalent RAC database configuration.

Action: Use ‘srvctl convert database’ command without -w option.

PRKO-02165: VIP does not exist on node(s) : {0}

Cause: VIP was not configured on the nodes.

Action: Add VIP using ‘srvctl add nodeapps’ or ‘srvctl add vip’ and try this command again.

PRKO-02166: GSD does not exist on node(s): {0}

Cause: GSD was not configured on the nodes

Action: Add GSD using ‘srvctl add nodeapps’ and try this command again.

PRKO-02167: VIP {0} does not exist.

Cause: VIP with the specified name was not configured.

Action: Add VIP using ‘srvctl add nodeapps’ or ‘srvctl add vip’ and try this command again.

PRKO-02168: Node applications are still running on node:

Cause: Node applications are still running on node when a remove was attempted.

Action: Stop the node applications before removing them or use force flag when attempting removal.

PRKO-02172: Some or all node applications are not removed successfully on node:

Cause: Not all node applications were removed on the node.

Action: Make sure that all resources that depend on node applications are stopped before attempting to remove node applications. Also if force flag was not specified, reissue this command with the force flag specified.

PRKO-02173: Instance {0} is already a preferred instance for service {1}.

Cause: Given instance is already a preferred instance for the service.

Action: Specify an instance other than the preferred instances of this service.

PRKO-02174: Instance {0} is already an available instance for service {1}.

Cause: Given instance is already an available instance for the service.

Action: Specify an instance other than the available instances of this service.
PRKO-02175: Failed to remove service {0} because this is the last service of RAC One Node database {1}
Cause: An attempt was made to remove the last service of a RAC One Node
Action: Add another service, for example by using 'srvctl add service' command, before removing the given service. Otherwise, if you are trying to deconfigure database, then remove the database directly, for example by using 'srvctl remove database' command.

PRKO-02176: ONS daemon does not exist on node(s): {0}
Cause: ONS was not configured on the nodes.
Action: Add ONS using 'srvctl add nodeapps' command and try this command again.

PRKO-02182: eONS daemon does not exist on node(s): {0}
Cause: eONS was not configured on the nodes.
Action: Add eONS using 'srvctl add nodeapps' command and try this command again.

PRKO-02183: Node applications run on default network only. The netmask given {0} doesn't match default networks netmask {1}
Cause: The netmask given in the modify command doesn't match with default network's netmask.
Action: Modify the default network first using 'srvctl modify nodeapps -S <options>' and then try modifying the VIP.

PRKO-02184: Node applications run on default network only. The interface given {0} doesn't match default networks interface {1}
Cause: The interface specified in the modify command doesn't match with default network's interface.
Action: Modify the default network's interface using 'srvctl modify nodeapps -S <options>' and then try modifying the VIP.

PRKO-02185: The new VIP address given is same as the current VIP address
Cause: The VIP address given for modification is same as the current VIP. So there is nothing to modify.
Action: Check the VIP address you want to modify and specify the correct value.

PRKO-02186: The command line parameter host port list should be in the form
<host>[:<port>],<host>[:<port>],...
Cause: The command line parameter -t <host_port_list> was not in the format
<host>[:<port>],<host>[:<port>],... with port being numeric.
Action: Check the input and correct any error and try the command again.

PRKO-02187: The network resource has been modified successfully. VIP and other resources that depend on it might not start up unless they are modified
Cause: When underlying network resource has been modified the VIP should be updated to the new network resource. This is not a error and is just a status message.
Action: Use 'srvctl modify nodeapps -A <options>' to update the VIP to the new network.

PRKO-02188: All the node applications already exist. They were not recreated.
Cause: 'srvctl add nodeapps' was attempted when all the node applications already existed.

Action: If you want to modify node applications you should use 'srvctl modify nodeapps' command.

PRKO-02190: VIP exists for node {0}, VIP name {1}

Cause: The VIP being added already exists.

Action: Check the input and if VIP needs to be modified use 'srvctl modify VIP' command.

PRKO-02199: Invalid address string:

Cause: VIP address being passed on the command line is not a valid address string.

Action: Address string should be of the format <name|ip>/<netmask>/[if1[|if2|...]]. Check the usage and correct the address format.

PRKO-02200: Invalid interface specified on command line: {0}

Cause: VIP address specification '-A <name|ip>/<netmask>/[if1[|if2|...]]' or the network address specification '-S <subnet>/<netmask>/[if1[|if2|...]]' on the command line contained interfaces names, none of which exist on current node.

Action: Check the interfaces listed in the address string and make sure that they are enabled and are up. Use network interface names on the command line if there is more than one interfaces that connect to the same network.

PRKO-02207: -{0} option has been deprecated and will be ignored.

Cause: Deprecated option has been used in the command line. The option will be ignored.

Action: Check the documentation for the new syntax of the command.

PRKO-02208: {0} command has been deprecated and will be ignored.

Cause: The command being executed has been deprecated and will not do any action.

Action: Check the documentation for the commands supported by srvctl.

PRKO-02209: {0} command is not supported for configuration using server pool.

Cause: The given command failed because it isn't applicable to instances of policy managed-databases.

Action: Check the documentation on the commands that are applicable to policy-managed databases.

PRKO-02211: ASM listener was not found

Cause: Check the reported message, ASM listener may not exist.

Action: Use "srvctl modify asm -l <lsnr_name>" to set the listener that ASM should register with.

PRKO-02214: Specified server pool {0} cannot be used to host single instance database {1}

Cause: An attempt to create a single instance database failed because the specified server pool had no configured candidate server.
**Action**: Use `srvctl modify srvpool` with `-n` option to configure a candidate server for the server pool. Make sure that the candidate server name specified with the `-n` option matches that of the `-x` option in `srvctl add database` command.

**PRKO-02215**: Specified server pool {0} has more than one candidate server

**Cause**: An attempt to create a single instance database failed because a server pool with more than one candidate server was specified.

**Action**: Provide a server pool with only one candidate server when creating a single instance database.

**PRKO-02310**: VIP does not exist on node {0}.

**Cause**: VIP was not configured on that node on which modification was attempted.

**Action**: VIP must be added using `srvctl add nodeapps` command, before it can be modified.

**PRKO-02313**: VIP {0} does not exist.

**Cause**: An attempt was made to remove a VIP with the specified vipname. No such VIP was configured on the cluster.

**Action**: If this is the expected state then it is not an error. Check the status of VIPs using `srvctl status vip` command. VIP must be added using `srvctl add vip` command before it can be removed.

**PRKO-02318**: Target instance {0} already supports service {1}.

**Cause**: Given database instance already provides the given service.

**Action**: Specify an instance that is not a preferred or available instance for this service.

**PRKO-02331**: ONS daemon does not exist.

**Cause**: ONS daemon was not configured on this cluster.

**Action**: ONS daemon can be configured using the `srvctl add nodeapps` command.

**PRKO-02339**: eONS daemon does not exist.

**Cause**: eONS daemon was not configured on this cluster.

**Action**: eONS daemon can be configured using the `srvctl add nodeapps` command.

**PRKO-02377**: eONS already uses {0} as listening port. Nothing to modify.

**Cause**: The listening port specified in this command is already in use by eONS.

**Action**: Check the input and if the listening port needs to be changed then specify a different port.

**PRKO-02380**: VIP {0} is still running on node: {1}

**Cause**: VIP to be removed is still running on a node.

**Action**: Stop the VIP before attempting to remove it or retry the command with force flag.

**PRKO-02381**: VIP {0} is not removed successfully:

**Cause**: VIP remove action failed because VIP was running and force flag was not specified or an exception occurred during the removal.
Action: Make sure that any applications, like for example listener, that depend on VIP are down. Try using -f option to remove the VIP. If you use force option to remove VIP then any application that depends on this VIP will stop working. Look at the help message for the accompanying exception.

PRKO-02383: Network {0} is not removed successfully:
 Cause: Since there were no VIPs hosted on the network an attempt was made to remove the network and network removal failed.
 Action: Make sure that all other applications that depend on default network are stopped. If force flag was not specified then specify force flag and try the command again.

PRKO-02385: The specified hostname or address {0} cannot be resolved.
 Cause: An invalid IP address or irresolvable hostname was specified.
 Action: If IP address is specified then make sure that it is of legal length. If a host name is specified then make sure that the host name resolves to an IP address.

PRKO-02386: Netmask is missing in address string:
 Cause: NETMASK is missing in the VIP address that was passed in the command string.
 Action: VIP address is of form <ip_or_name>/<netmask>[/<interface1>...]. Specify the netmask.

PRKO-02387: -n <node_name> option has been deprecated.
 Cause: -n <node_name> has been deprecated in this release.
 Action: Try to remove the usage of -n <node_name> in the command.

PRKO-02388: Command line option {0} should be followed by a value.
 Cause: The value needs to be specified by the command line option.
 Action: Look at the usage and of the command and specify an appropriate value.

PRKO-02389: Invalid command line options. Neither -A nor -n can be specified with -S.
 Cause: Invalid combination of options specified for add/modify node application command. -A is node-specific option and has to be used with -n option. -S option is a global option and it cannot be used with -A or -n option.
 Action: Issue the command using either -A and -n together or -S without -A or -n.

PRKO-02390: -n <node_name> option has been deprecated and is ignored.
 Cause: -n <node_name> option has been deprecated and is ignored from this release. It has no effect on the command.
 Action: Remove the usage of -n <node_name> from the command line.

PRKO-02391: Network resource {0},{1} already exists. Nothing to modify
 Cause: The subnet specified is already the default subnet.
 Action: Check the input and if the subnet needs to be modified then specify a different subnet.

PRKO-02392: eONS already uses {0} as Multicast address. Nothing to modify.
 Cause: The Multicast address specified in this command is already in use by eONS.
Action: Check the input and if the Multicast address needs to be changed then specify a different address.

PRKO-02393: eONS already uses {0} as Multicast port. Nothing to modify.
Cause: The Multicast port specified in this command is already in use by eONS.
Action: Check the input and if the Multicast port needs to be changed then specify a different port.

PRKO-02394: ONS already uses {0} as port for local connections. Nothing to modify.
Cause: The modify node applications command failed because the ONS port for local connections is already used by ONS for local connections.
Action: Check the input and if the port used by ONS for local connections need to be modified specify a different address.

PRKO-02395: ONS already uses {0} as port for remote connections. Nothing to modify.
Cause: The modify node applications command failed because the ONS port for remote connections is already used by ONS for remote connections.
Action: Check the input and if the port used by ONS for remote connections need to be modified specify a different address.

PRKO-02396: The list of remote host/port ONS pairs matches the current list : {0}. Nothing to modify.
Cause: The modify node applications command failed because the remote host/port ONS pairs matches the current list.
Action: Check the input and if the remote host/port pairs need to be modified and specify a different host/port list.

PRKO-02405: Network resource does not exist on the cluster nodes.
Cause: Network resource does not exist on the cluster nodes.
Action: Node applications can be added by using 'srvctl add nodeapps' command.

PRKO-02409: GSD is already disabled on node(s): {0}
Cause: The disable node applications command failed because GSD was already disabled.
Action: If this is the expected state then this is not an error. If it is not then GSD can be enabled by 'srvctl enable nodeapps' command.

PRKO-02410: VIP is already disabled on node(s): {0}
Cause: The disable node applications command failed because VIP was already disabled.
Action: If this is the expected state then this is not an error. If it is not then VIP can be enabled by 'srvctl enable nodeapps' command.

PRKO-02411: Network resource is already disabled.
Cause: The disable node applications command failed because Network resource was already disabled.
Action: If this is the expected state then this is not an error. If it is not then Network resource can be enabled by 'srvctl enable nodeapps' command.

PRKO-02412: ONS is already disabled on node(s): {0}
Cause: The disable node applications command failed because ONS was already disabled.

Action: If this is the expected state then this is not an error. If it is not then ONS can be enabled by 'srvctl enable nodeapps' command.

PRKO-02414: GSD is already enabled on node(s): {0}

Cause: The enable node applications command failed because GSD is already enabled.

Action: If this is the expected state then this is not an error. If it is not then GSD can be disabled by 'srvctl disable nodeapps' command.

PRKO-02415: VIP is already enabled on node(s): {0}

Cause: The enable node applications command failed because VIP is already enabled.

Action: If this is the expected state then this is not an error. If it is not then VIP can be disabled by 'srvctl disable nodeapps' command.

PRKO-02416: Network resource is already enabled.

Cause: The enable node applications command failed because Network resource is already enabled.

Action: If this is the expected state then this is not an error. If it is not then Network resource can be disabled by 'srvctl disable nodeapps' command.

PRKO-02417: ONS is already enabled on node(s): {0}

Cause: The enable node applications command failed because ONS is already enabled.

Action: If this is the expected state then this is not an error. If it is not then ONS can be disabled by 'srvctl disable nodeapps' command.

PRKO-02418: eONS is already enabled on node(s): {0}

Cause: The enable node applications command failed because eONS is already enabled.

Action: If this is the expected state then this is not an error. If it is not then eONS can be disabled by 'srvctl disable nodeapps' command.

PRKO-02419: GSD is already started on node(s): {0}

Cause: The start node applications command failed because GSD is already started.

Action: If this is the expected state then this is not an error. If it is not then GSD can be stopped by 'srvctl stop nodeapps' command.

PRKO-02420: VIP is already started on node(s): {0}

Cause: The start node applications command failed because VIP is already started.

Action: If this is the expected state then this is not an error. If it is not then VIP can be stopped by 'srvctl stop nodeapps' command.
PRKO-02421: Network resource is already started on node(s): {0}
  
  **Cause:** The start node applications command failed because Network resource is already started.
  
  **Action:** If this is the expected state then this is not an error. If it is not then Network resource can be stopped by 'srvctl stop nodeapps' command. Note that once started network resource cannot be stopped.

PRKO-02422: ONS is already started on node(s): {0}
  
  **Cause:** The start node applications command failed because ONS is already started.
  
  **Action:** If this is the expected state then this is not an error. If it is not then ONS can be stopped by 'srvctl stop nodeapps' command.

PRKO-02423: eONS is already started on node(s): {0}
  
  **Cause:** The start node applications command failed because eONS is already started.
  
  **Action:** If this is the expected state then this is not an error. If it is not then eONS can be stopped by 'srvctl stop nodeapps' command.

PRKO-02424: GSD is already stopped on node(s): {0}
  
  **Cause:** The stop node applications command failed because GSD is already stopped.
  
  **Action:** If this is the expected state then this is not an error. If it is not then GSD can be started by 'srvctl start nodeapps' command.

PRKO-02425: VIP is already stopped on node(s): {0}
  
  **Cause:** The stop node applications command failed because VIP is already stopped.
  
  **Action:** If this is the expected state then this is not an error. If it is not then VIP can be started by 'srvctl start nodeapps' command.

PRKO-02426: ONS is already stopped on node(s): {0}
  
  **Cause:** The stop node applications command failed because ONS is already stopped.
  
  **Action:** If this is the expected state then this is not an error. If it is not then ONS can be started by 'srvctl start nodeapps' command.

PRKO-02427: eONS is already stopped on node(s): {0}
  
  **Cause:** The stop node applications command failed because eONS is already stopped.
  
  **Action:** If this is the expected state then this is not an error. If it is not then eONS can be started by 'srvctl start nodeapps' command.

PRKO-02428: VIP is running on the node {0} and cannot be modified.
  
  **Cause:** Modify nodeapps command failed because VIP being modified is running on a node.
  
  **Action:** Stop the node application by issuing 'srvctl stop nodeapps' and retry the modify again.

PRKO-02429: -n <node_name> should be specified with -A <name | ip>/netmask[/if1 | if2] for modifying VIP.
Cause: If -n <node_name> option is specified then -A option should also be specified for modifying VIP.

Action: If you want to modify the VIP then use specify both the -n and -A options. Otherwise remove the -n <node_name> option and try command again.

PRKO-02430: -A <name|ip>/netmask[/if1[/if2] should be specified with -n <node_name> for modifying VIP.

Cause: -A <options> has been specified for the modify nodeapps command without specifying which node VIP needs to be modified.

Action: Specify the node whose VIP needs to be modified by using -n option.

PRKO-02431: Warning: the -n option is obsolescent; 'srvctl remove vip' is preferred for removing per-node VIP resource

Cause: A 'srvctl remove nodeapps' command was issued with the -n option specifying one or more nodes. Support for this option will be removed in a future release, at which time you must use the preferred command 'srvctl remove vip -i <vip_list>'

Action: The command is processed normally and attempts to remove VIP resources for the specified node(s). This message is displayed only to alert you to a future change. Use 'srvctl remove nodeapps' to remove all node applications from the last node of the cluster.

PRKO-02438: Network resource does not exist.

Cause: Network resource to be started/stopped/modifed/enabled/disabled does not exist.

Action: Network resource can be created using 'srvctl add nodeapps' command.

PRKO-02439: VIP does not exist.

Cause: VIP to be started/stopped/modifed/enabled/disabled does not exist.

Action: VIP can be created using 'srvctl add nodeapps' command.

PRKO-02440: Network resource is already stopped.

Cause: The stop node applications command failed because network resource was already stopped.

Action: If this is the expected state then this is not an error. If it is not then network resource can be started by 'srvctl start nodeapps' command.

PRKO-02452: ONS already exists

Cause: A new instance of ONS daemon could not be created, as there is an existing instance of ONS.

Action: If this is the expected state then it is not an error. Use 'srvctl config ons' command to look at ONS daemon attributes and 'srvctl modify ons' command to modify ONS attributes.

PRKO-02453: eONS already exists

Cause: A new instance of eONS daemon could not be created, as there is an existing instance of eONS.

Action: If this is the expected state then it is not an error. Use 'srvctl config eons' command to see if eONS daemon is configured. Use 'srvctl modify eons' command to modify eONS attributes.

PRKO-02458: ONS does not exist

Cause: ONS daemon was not configured on this instance of Oracle Restart.
**Action:** Add ONS daemon using the 'srvctl add ons' command and try this command again.

**PRKO-02463: eONS does not exist**

**Cause:** eONS daemon was not configured on this instance of Oracle Restart.

**Action:** Add eONS daemon using the command 'srvctl add eons' command and try this command again.

**PRKO-02465: ONS does not exist.**

**Cause:** ONS daemon was not configured on this instance of Oracle Restart.

**Action:** ONS daemon can be configured using the 'srvctl add ons' command.

**PRKO-02567: eONS daemon does not exist.**

**Cause:** eONS daemon was not configured on this instance of Oracle Restart.

**Action:** eONS daemon can be configured using the 'srvctl add eons' command.

**PRKO-02569: ONS is already started.**

**Cause:** The 'srvctl start ons' command failed because the ONS daemon was already started.

**Action:** If this is the expected state then this is not an error. If it is not then ONS can be stopped by 'srvctl stop ons' command.

**PRKO-02571: eONS is already started.**

**Cause:** The 'srvctl start eons' command failed because the eONS daemon was already started.

**Action:** If this is the expected state then this is not an error. If it is not then eONS can be stopped by 'srvctl stop eons' command.

**PRKO-02573: ONS daemon is already stopped.**

**Cause:** The 'srvctl stop ons' command failed because the ONS daemon was already stopped.

**Action:** If this is the expected state then this is not an error. If it is not then ONS can be started by 'srvctl start ons' command.

**PRKO-02575: eONS daemon is already stopped.**

**Cause:** The 'srvctl stop eons' command failed because the eONS daemon was already stopped.

**Action:** If this is the expected state then this is not an error. If it is not then eONS can be started by 'srvctl start eons' command.

**PRKO-02576: ONS is already enabled.**

**Cause:** The 'srvctl enable ons' command failed because the ONS was already enabled.

**Action:** If this is the expected state then this is not an error. If it is not then ONS can be disabled by 'srvctl disable ons' command.

**PRKO-02579: eONS is already enabled.**

**Cause:** The 'srvctl enable eons' command failed because the eONS was already enabled.

**Action:** If this is the expected state then this is not an error. If it is not then eONS can be disabled by 'srvctl disable eons' command.
PRKO-02581: ONS is already disabled.
    Cause: The 'srvctl disable ons' command failed because the ONS was already disabled.
    Action: If this is the expected state then this is not an error. If it is not then ONS can be enabled by 'srvctl enable ons' command.

PRKO-02583: eONS is already disabled.
    Cause: The 'srvctl disable eons' command failed because the eONS was already disabled.
    Action: If this is the expected state then this is not an error. If it is not then eONS can be enabled by 'srvctl enable eons' command.

PRKO-02588: ONS daemon could not be removed because it is still running.
    Cause: 'srvctl remove ons' command failed because ONS daemon was still running.
    Action: Stop the ons daemon by using 'srvctl stop ons' command and then attempt to remove it. You can also use the force option to remove a running ons daemon.

PRKO-02589: eONS daemon could not be removed because it is still running.
    Cause: 'srvctl remove eons' command failed because eONS daemon was still running.
    Action: Stop the ons daemon by using 'srvctl stop eons' command and then attempt to remove it. You can also use the force option to remove a running eons daemon.

PRKO-02590: None of the ONS daemon parameters were modified.
    Cause: The configuration of the ONS daemon has remained the same after the 'srvctl modify ons' command.
    Action: Make sure that at least one of the optional modification parameters was specified on the command line. The current values of parameters of the ONS daemon can be found by using 'srvctl config ons' command. Specify at least one value different then current value while issuing the 'srvctl modify ons' command.

PRKO-02591: None of the eONS daemon parameters were modified.
    Cause: The configuration of the eONS daemon has remained the same after the 'srvctl modify eons' command.
    Action: Make sure that at least one of the optional modification parameters was specified on the command line. The current values of parameters of the eONS daemon can be found by using 'srvctl config eons' command. Specify at least one value different then current value while issuing the 'srvctl modify eons' command.

PRKO-02593: enable of GNS failed.
    Cause: Enabling the GNS server failed.
    Action: Examine the accompanying exception for details.

PRKO-02595: modify of GNS failed.
    Cause: Modification the GNS server failed.
    Action: Examine the accompanying exception for details.

PRKO-02597: disable of GNS failed.
    Cause: Disabling the GNS server failed.
**PRKO-02599: relocation of GNS failed.**
**Cause:** Relocation of the GNS server failed.
**Action:** Examine the accompanying exception for details.

**PRKO-02601: removal of GNS failed.**
**Cause:** Removal of the GNS server failed.
**Action:** Examine the accompanying exception for details.

**PRKO-02603: addition of GNS failed.**
**Cause:** The addition of the GNS server failed.
**Action:** Examine the accompanying exception for details.

**PRKO-02604: GNS is already running**
**Cause:** The GNS server is already running.
**Action:** Remove the GNS server first before trying to add it.

**PRKO-02611: GNS VIP does not exist. Specify the {0} option to create one.**
**Cause:** The attempt to add GNS failed because the VIP associated with it does not exist.
**Action:** Create the VIP.

**PRKO-02621: The '-x <node>' option cannot be used to create RAC database {0}**
**Cause:** The '-x' option was supplied to create a single-instance database, along with '-c RAC' requesting a RAC database.
**Action:** Specify '-c SINGLE' with '-x <node>'

**PRKO-02700: The CVU resource is not configured**
**Cause:** The CVU resource was not configured on the cluster or an unexpected error occurred while querying Clusterware for the CVU resource.
**Action:** If the CVU resource was not configured then a new resource can be created using 'srvctl add cvu' command. If the resource was configured, look at any accompanying error messages.

**PRKO-02702: CVU is already disabled**
**Cause:** CVU resource could not be disabled because it is already disabled.
**Action:** If this is the expected state then this is not an error.

**PRKO-02703: CVU is already enabled**
**Cause:** CVU resource could not be enabled because it is already enabled.
**Action:** If this is the expected state then this is not an error.

**PRKO-02707: CVU resource must be stopped before removing**
**Cause:** 'srvctl remove cvu' was issued while CVU instance was running.
**Action:** Stop the CVU resource using 'srvctl stop cvu' and then try removing.

**PRKO-02708: Unable to convert RAC One Node database because it has an active online relocation request**
**Cause:** Failed to convert RAC One Node database to RAC database because there was an active online relocation request for the database.
**Action:** Wait for the online relocation request to complete and then run 'srvctl convert database'.

**PRKO-02709: Unable to convert RAC One Node database because it has a failed online relocation request**

**Cause:** Failed to convert RAC One Node database to RAC database because there was a failed online relocation request for the database.

**Action:** Use 'srvctl status database' command to show the target node of the failed online relocation request process. Either run 'srvctl relocate database' with -a option or with -n option with the correct target node. Then run 'srvctl convert database'.

**PRKO-03026: Only one instance can be listed in -i <inst_name_list> when -n option is specified**

**Cause:** More than one instance was specified for -i option when both -i and -n options were used.

**Action:** Supply one instance name for -i option when using both -i and -n option.

**PRKO-03031: Server pool {0} already exists**

**Cause:** Command 'srvctl add serverpool' failed because the given server pool already exists.

**Action:** Make sure that the name of server pool is correct and a server pool with the given name doesn't exist.

**PRKO-03032: Invalid instance name(s): {0}**

**Cause:** Some of the supplied instance names do not exist in the database configuration.

**Action:** Please supply valid instance names and retry.

**PRKO-03077: Failed to remove database {0}**

**Cause:** Failed to remove the database.

**Action:** Examine the accompanying message(s) for details of the error, and respond accordingly.

**PRKO-03081: No such environment variable setting: {0}**

**Cause:** The environment variable(s) does not exist for the specified resource.

**Action:** Supply a valid environment variable.

**PRKO-03085: Volume device: {0}**

**Cause:** Volume device label

**Action:** None

**PRKO-03086: Mountpoint path: {0}**

**Cause:** Mountpoint path label

**Action:** None

**PRKO-03087: User: {0}**

**Cause:** User label

**Action:** None

**PRKO-03113: Administrator-managed database {1} can not support policy-managed service {0}.**
Cause: The specified database does not support policy-managed services.
Action: Provide a database which supports policy-managed services.

PRKO-03114: Policy-managed database {1} cannot support administrator-managed service {0}.
Cause: The specified database does not support administrator-managed services.
Action: Provide a database which supports administrator-managed services.

PRKO-03115: -P option cannot be used with policy-managed service {0}.
Cause: -P option cannot be used with policy-managed services.
Action: Remove -P option from a command line.

PRKO-03116: '-g' or '-r' option should be provided
Cause: one of specified options should be provided.
Action: make sure that one of specified options is incuded into the command line.

PRKO-03117: Service {0} already exists in database {1}
Cause: The service being added already exists.
Action: If the service needs to be modified use 'srvctl modify service' command.

PRKO-03118: Failed to check if service {0} exists: {1}
Cause: Failed to get the servcie data.
Action: Make sure that Oracle Clusterware is active.

PRKO-03119: Database {0} cannot be started since it has no configured instances.
Cause: The specified database is an administrator-managed database and it cannot be started because no instances were configured.
Action: Use srvctl add instance command to configure the instance and then retry.

PRKO-03120: Database {0} cannot be stopped since it has no configured instances.
Cause: The specified database is an administrator-managed database and it could not be stopped because no instances were configured.
Action: Use srvctl add instance command to configure the instance and then retry.

PRKO-03121: -i option or -n option is required for starting an instance on the administrator-managed database {0}.
Cause: The specified database is an administrator-managed database and the srvctl start instance command requires the instance name or nodename to be specified.
Action: Use srvctl start instance command with either the -i or -n option to start the instance.

PRKO-03122: -i option or -n option is required for stopping an instance of database {0}
Cause: Neither the instance name nor the nodename was provided during 'srvctl stop instance' command invocation.
Action: Use 'srvctl stop instance' command with either the -i or -n option to specify which instance to stop.

PRKO-03125: Invalid value {0} for command line option {1}
Cause: Invalid value was specified for the command line option.
Action: Check the value printed and specify the correct value.
PRKO-03126: Invalid GNS logging level: "[0]"
   Cause: The level of logging specified was not a positive integer.
   Action: Specify a positive integer.

PRKO-03128: Unable to add database because the resource for diskgroup [0] could not be found. [1]
   Cause: The resource for the specified disk group could not be found. Either the diskgroup name was misspelled or the diskgroup has not been mounted.
   Action: Correct the diskgroup spelling or use sqlplus to create the diskgroup.

PRKO-03129: Unable to modify database because the resource for diskgroup [0] could not be found. [1]
   Cause: The resource for the specified disk group could not be found. Either the diskgroup name was misspelled or the diskgroup has not been mounted.
   Action: Correct the diskgroup spelling or use sqlplus to create the diskgroup.

PRKO-03130: Server pool [0] is internally managed as part of administrator-managed database configuration and therefore cannot be modified directly via srvpool object.
   Cause: An attempt was made to alter configuration of an internally managed server pool that is hosting an administrator-managed configuration.
   Action: Do not modify this server pool via srvpool object directly. Instead use srvctl add/remove instance or srvctl modify database/service to alter this server pool's configuration.

PRKO-03132: -i option or -n option is required for checking the status of an instance of database [0]
   Cause: Neither the instance name nor the nodename was provided during 'srvctl status instance' command invocation.
   Action: Use 'srvctl status instance' command with either the -i or -n option to check the status of the instance.

PRKO-03133: Database [0] has no instance on node [1]
   Cause: Instance was not configured on the specified node.
   Action: Both 'srvctl add instance' or 'srvctl modify instance' command can also be used to change inst-node mapping in administrator-managed db's. For policy-managed database, use either 'srvctl start instance' command with -n option to start the instance on the specified node or use 'srvctl modify instance' command to configure an instance for that node.

PRKO-03134: -n option cannot be specified in conjunction with -z option
   Cause: -n and -z options were both provided during 'srvctl modify instance' command invocation.
   Action: Use 'srvctl modify instance' command with either the -n or -z option to modify the node instance mapping of the database instance.

PRKO-03135: -z option cannot be used with administrator-managed database [0]
   Cause: The -z option was specified in an attempt to remove node to instance mapping of administrator-managed database.
   Action: Use 'srvctl remove instance' command to remove node instance mapping of administrator-managed database.

PRKO-03136: Option '-c' cannot be used with administrator-managed service [0]
Cause: The -c option was specified for administrator-managed service.
Action: Reissue the command without the -c option.

PRKO-03138: Node [0] does not belong to server pool [1] which defines nodes for service [2]
Cause: Node doesn't belong to the server pool which defines nodes which can be used to run the specified service.
Action: Supply a node which belongs to specified server pool.

PRKO-03139: Options '-i' and '-t' cannot be used with policy-managed service [0]
Cause: The -i and -t options were specified to relocate a policy-managed service.
Action: Use options -c and -n to relocate a service.

PRKO-03140: Options '-c' and '-n' cannot be used with administrator-managed service [0]
Cause: The -c and -n options were specified to relocate an administrator-managed service.
Action: Use options -i and -t to relocate a service.

PRKO-03141: Database [0] could not be removed because it was running
Cause: The 'srvctl remove database' command failed because the database was running.
Action: Stop the database by using 'srvctl stop database' command and then attempt to remove it. You can also use the force option to remove the running database.

PRKO-03142: Option '-i' cannot be used to enable/disable services for policy-managed database [0]
Cause: Policy-managed database services can only be enabled or disabled by node, not by instance.
Action: Use option -n <node> to specify nodes on which to enable or disable services for this policy-managed database.

PRKO-03143: Options '-i', '-r', '-n' and '-a' cannot be used to modify policy-managed service [0]
Cause: Options -i, -r, -n and -a can be used to modify administrator-managed service only.
Action: Make sure that the service you are going to modify is an administrator-managed service.

PRKO-03144: Option '-a' requires options '-n' and '-i' to be provided
Cause: Option -a can not be used without options -n and -i.
Action: Make sure that options -n, -i and -a are provided according to 'srvctl modify service' syntax.

PRKO-03145: Option '-i' requires one of the options '-t', '-r' or '-n' to be set
Cause: Option -i can not be used without additional options.
Action: Make sure that required option is provided according to 'srvctl modify service' syntax.

PRKO-03146: Option '-i' is not provided
Cause: Options -t, -r, and -n requires option -i to be set.
**Action:** Make sure that required option is provided according to 'srvctl modify service' syntax.

PRKO-03147: Instance (0) cannot be removed because it is the only preferred instance for service(s) (1) for database (2)

**Cause:** An attempt was made to remove the instance which is the only preferred instance for specified services.

**Action:** Make sure that specified services have more than one preferred instance or modify services to not have the instance as a preferred instance.

PRKO-03148: Instance (0) does not support service (1).

**Cause:** The given database instance is not defined as a preferred or available instance for the given service.

**Action:** Specify an instance that is defined as preferred or available instance for the given service.

PRKO-03149: The candidate server (0) of server pool (1) is different from the server (2) specified with the -x option

**Cause:** Specified server must be the candidate server of the specified server pool.

**Action:** Make sure that the server specified with '-x' option is the same as the candidate server of the given server pool.

PRKO-03150: The server pool(s) (0) specified with the -g option cannot be used to add an administrator-managed database

**Cause:** A request to add an administrator-managed database specified the -g option.

**Action:** Use 'srvctl add database' without the '-g' option to add an administrator-managed database.

PRKO-03151: Option '-g' cannot have more than one specified server pool when converting an administrator-managed database to a policy-managed database

**Cause:** An attempt was made to convert an administrator-managed database to a policy-managed database by specifying more than one server pool.

**Action:** Make sure to specify only one server pool with the '-g' option when converting an administrator-managed database to a policy-managed database.

PRKO-03152: The server pool(s) (0) specified with the '-g' option are subpools of Generic and therefore cannot be used to modify the server pool value of a policy-managed database

**Cause:** The supplied server pools are meant for managing administrator-managed databases because they are subpools of Generic.

**Action:** Make sure that none of the supplied server pools are meant for managing administrator-managed database. Only supply server pools meant for managing policy-managed databases to the -g option of 'srvctl modify database' command. Use 'srvctl config srvpool' command to list the qualified server pools meant for managing policy managed databases.

PRKO-03153: -i option and/or -n option is required for starting an instance on the policy-managed database (0).

**Cause:** The specified database is a policy-managed database and the 'srvctl start instance' command requires the instance name and/or nodename to be specified.

**Action:** Use 'srvctl start instance' command with either the -i or -n option or both -i and -n options to start the instance.
PRKO-03154: Both -i and -n options are specified for starting an instance on the administrator-managed database {0}.

Cause: The specified database is an administrator-managed database and the 'srvctl start instance' command requires either the instance name or nodename to be specified but not both.

Action: Use 'srvctl start instance' command with either the -i or -n option to start the instance.

PRKO-03155: Can not start the instance {0} on the specified node {1} because the node is assigned to another user configured instance {2}

Cause: The database specified on 'srvctl start instance' is policy managed and has another instance already configured on the nodename specified with the -n option.

Action: Either reformulate the 'srvctl start instance' command so that there is no conflict with configured instances' nodes, or use 'srvctl modify instance' to change configured instances' nodes.

PRKO-03160: Server pool {0} is internally managed as part of administrator-managed database configuration and therefore cannot be queried directly via srvpool object.

Cause: An attempt was made to query configuration of an internally managed server pool that is hosting an administrator-managed configuration.

Action: Do not query this server pool via srvpool object directly. Instead use srvctl config/status database/service command to query servers that are part of this pool's configuration.

PRKO-03161: Server pool {0} is internally managed as part of administrator-managed database configuration and therefore cannot be removed directly via srvpool object.

Cause: An attempt was made to remove configuration of an internally managed server pool that is hosting an administrator-managed configuration.

Action: Do not remove this server pool via srvpool object directly. Instead use srvctl remove service/database command to remove this server pool and any service/database hosted by the server pool.

PRKO-03162: The actions setenv, getenv, and unsetenv are not supported for Single Client Access Name listener {0}.

Cause: Failed to use srvctl setenv, getenv, and unsetenv listener command for specified Single Client Access Name Listener. The environment variables for Single Client Access Name Listener cannot be changed.

Action: Do not set, get, and unset environment variables for Single Client Access Name Listener.

PRKO-03163: Options '-u', '-r', '-a', '-g' and '-c' cannot be used to add service {0} for single instance database {1}.

Cause: Failed to add specified service because provided options can not be used to add a service for single instance database.

Action: Use 'srvctl add service' command without options -u, -r, -a, -g or -c.

PRKO-03164: Options '-r', '-f', '-n', '-i', '-t', '-a', '-c' and '-x' cannot be used to modify service {0} for single instance database {1}.

Cause: Failed to modify specified service because provided options can not be used to modify a service for single instance database.
**Action:** Use 'srvctl modify service' command without options -r, -f, -n, -i, -t, -a, -c or -x.

PRKO-03165: Service {0} is defined for single instance database {1} and therefore cannot be relocated
**Cause:** Failed to relocat specified service because provided options can not be used to enable/disable a service for single instance database.
**Action:** Make sure that you issue 'srvctl relocate service' command for the service which is not defined for a single instance database.

PRKO-03166: Invalid GNS parameter: "{0}"
**Cause:** An invalid parameter value was specified.
**Action:** A parameter value must have the following format: <name>:<value>. The name may not contain a colon ("."). The value may not contain a comma (",").

PRKO-03167: EONS has been deprecated and ONS should be used to set and modify the local port for Enterprise Manager.
**Cause:** The command being executed has been deprecated and will not do any action.
**Action:** Use online help 'srvctl -h' or check the documentation for the commands supported by srvctl.

PRKO-03174: 'srvctl relocate service' command is not supported on RAC One Node database service {0}
**Cause:** An attempt was made to relocate a RAC One Node database service using 'srvctl relocate service' command.
**Action:** Use 'srvctl relocate database' command to relocate the RAC One Node database and its services to the target server.

PRKO-03175: TAF policy 'PRECONNECT' cannot be used to add a service for single instance database {0}
**Cause:** Failed to add specified service because provided TAF specification can not be used with a single instance database.
**Action:** Use 'srvctl add service' command without 'PRECONNECT' TAF policy.

PRKO-03176: Option '-g' cannot be used with administrator-managed service {0}
**Cause:** An attempt to change the server pool of service was rejected because the -g option cannot be used with administrator-managed service.
**Action:** Change the preferred and available instances of the service via 'srvctl modify service' command to manage placement of administrator-managed service.

PRKO-03226: Upgrade from version {0} to version {1} using 'srvctl upgrade model' command of version {2} is not supported
**Cause:** A 'srvctl upgrade model' command was issued for a version change that is other than an increase in patch set level.
**Action:** Check that the versions provided are correct.

PRKO-03229: Option '-i' cannot be used to enable or disable service(s) {0} for single instance database {1}
**Cause:** Failed to enable/disable specified service because its database is a single instance database.
**Action:** Make sure that you issue 'srvctl enable/disable service' command without option -i.
PRKO-03241: The `-o <oracle_home>' option value "[0]" corresponds to a pathname that does not exist or is not a directory

Cause: The `-o <oracle_home>' option value did not resolve to an existing directory pathname.

Action: Ensure that the `-o <oracle_home>' option value corresponds to an existing directory pathname.

PRKO-03242: The `-s <state_file>' option value "[0]" is a directory

Cause: The `-s <state_file>' option value resolved to an existing directory pathname instead of a file pathname.

Action: Ensure that the `-s <state_file>' option value corresponds to a file.

PRKO-03243: The `-s <state_file>' option value "[0]" is a file under a non-writable directory

Cause: The `-s <state_file>' option value resolved to a non-writable pathname.

Action: Ensure that the state file parent directory has write permissions.

PRKO-03244: The `-s <state_file>' option value "[0]" already exists

Cause: The `-s <state_file>' option value resolved to an existing file pathname.

Action: Ensure that the `-s <state_file>' option value corresponds to a non-existing file pathname.

PRKO-03245: Cannot determine the canonical path to the state file "[0]"

Cause: The `-s <state_file>' option value specified a pathname for which the canonical path cannot be retrieved.

Action: Provide the absolute pathname for `-s <state_file>' option value.

PRKO-03246: The `-s <state_file>' option value "[0]" does not exist or cannot be read

Cause: The `-s <state_file>' option value mapped to a non-existing or non-readable file pathname.

Action: Ensure that the `-s <state_file>' option value corresponds to an existing readable file pathname.

PRKO-09059: Invalid command line options for listener. `-a' can not be specified with `-l'.

Cause: Invalid combination of options specified for listener command.

Action: Issue the command using either `-l <listener_name>' or `-a'.

PRKO-09063: Single Client Access Name must start with a letter unless it is an IP address

Cause: A SCAN was supplied which did not begin with a letter, however SCAN names must begin with a letter.

Action: Supply a SCAN name that begins with a letter.

PRKO-09066: Invalid upgrade phase "[0]" for upgrade model command

Cause: An invalid value was specified for upgrade phase.

Action: Upgrade phase must be either 'first' or 'last'.

PRKO-09067: Invalid network server type "[0]"

Cause: An invalid value was specified for network server type.

Action: Network server type must be 'static' or 'dhcp' or 'mixed'.
PRVF-00001: Could not retrieve static nodelist. Verification cannot proceed
   Cause: Error running lsnodes/olsnodes.
   Action: Ensure that the executable exists and that it is executable by your OS userid.

PRVF-00002: Could not retrieve local nodename
   Cause: Unable to determine local host name using Java network functions.
   Action: Ensure hostname is defined correctly using the 'hostname' command.

PRVF-00006: Unable to check the existence of Oracle Home "[0]"
   Cause: Could not verify the existence of the Oracle Home specified.
   Action: Ensure the Oracle Home location exists and is writeable by your user ID.

PRVF-00020: "[0]" is not writeable
   Cause: The path specified is not writeable.
   Action: Ensure write access to the path specified.

PRVF-00040: The Remote Shell "[0]" requested by the client does not exist
   Cause: Could not locate remote shell requested by the user.
   Action: Ensure that the remote shell exists on all the nodes participating in the operation.

PRVF-00041: The Remote shell "[0]" requested by the client is not an executable file
   Cause: The remote shell requested by the user is not a file.
   Action: Ensure that the remote shell exists on all the nodes participating in the operation and that it is a file with execute permissions.

PRVF-00042: The Remote Copy command "[0]" requested by the client does not exist
   Cause: Cannot locate remote copy command requested by the user.
   Action: Ensure that the remote copy command exists on all the nodes participating in the operation.

PRVF-00045: The Secure Shell "[0]" requested by the client does not exist
   Cause: Could not locate the secure shell executable specified.
   Action: Ensure that the executable file specified exists.

PRVF-00046: The Secure Copy command "[0]" requested by the client does not exist
   Cause: Could not locate the secure copy executable specified.
Action: Ensure that the executable file specified exists.

PRVF-00047: Unable to execute the Secure Shell "[0]" requested by the client  
Cause: Could not execute the secure shell specified.  
Action: Ensure that the secure shell specified allows execute access for the current user ID.

PRVF-00048: Unable to execute the Secure Copy command "[0]" requested by the client  
Cause: Could not execute the secure copy specified.  
Action: Ensure that the secure copy specified allows execute access for the current user ID.

PRVF-00051: The Remote Copy command "[0]" requested by the client is not an executable file  
Cause: The remote copy command requested by the user was not an executable file.  
Action: Ensure that the remote copy command exists on all the nodes participating in the operation and that it is a file with execute permissions.

PRVF-00054: Unable to find oifcfg executable file in directory "[0]"  
Cause: An attempt to locate oifcfg executable file in specified directory failed.  
Action: This is an internal error. Contact Oracle Support Services.

PRVF-00055: User "{0}" does not have sufficient authorization to run this command  
Cause: An attempt to run the CVU command failed because the user does not have sufficient authority to run it.  
Action: The commands can only be run as root user(uid=0). Make sure that you run these commands as appropriate user.

PRVF-00056: User "{0}" does not have sufficient authorization to run this command  
Cause: An attempt to run the CVU command failed because the user does not have sufficient authority to run it.  
Action: The command can be run only by the Oracle installation owner. Make sure that you run these commands as appropriate user.

PRVF-02409: The device file "[0]" does not exist on node "[1]"  
Cause: The expected device file could not be found.  
Action: To enable asynchronous input-output operations using the asynchronous device driver, create the device file.

PRVF-02410: The device file "[0]" does not exist on nodes:  
Cause: The expected device file could not be found.  
Action: To enable asynchronous input-output operations using the asynchronous device driver, create the device file.

PRVF-02411: The file "[0]" is not a device file on nodes:  
Cause: The file was not a device file.  
Action: Ensure that the correct path and filename specified for the device file.

PRVF-02412: The file "[0]" is not a device file on node "[1]"  
Cause: The file was not a device file.
Action: Ensure that the correct path and filename specified for the device file.

PRVF-02413: Failed to retrieve details of the device file "%(0)" on nodes:
  Cause: An attempt to retrieve the attributes of a device file failed.
  Action: Ensure that the file exists on the system and user has correct permissions to retrieve the details of specified device file.

PRVF-02414: Failed to retrieve details of the device file "%(0)" on node "%(1)"
  Cause: An attempt to retrieve the attributes of a device file failed.
  Action: Ensure that the file exists on the system and user has correct permissions to retrieve the details of specified device file.

PRVF-02415: The minor number of device file "%(0)" is incorrect on the nodes:
  Cause: The minor number of a device file was found incorrect as per the requirement.
  Action: The third least significant bit (the 0x4 bit hexadecimal) of the minor number must be set.

PRVF-02416: The minor number of device file "%(0)" is incorrect on the node "%(1)"
  Cause: The minor number of a device file was found incorrect as per the requirement.
  Action: The third least significant bit (the 0x4 bit hexadecimal) of the minor number must be set.

PRVF-02417: Failed to retrieve the ID for device file "%(0)" on the node "%(1)"
  Cause: Device file ID could not be retrieved on the node.
  Action: Ensure that the device file exists at the specified path and is set to correct device ID.

PRVF-02418: Failed to retrieve minor number value for the device file "%(0)" on the node "%(1)"
  Cause: The device file ID does not contain the correct minor number.
  Action: Ensure the value of the minor number of the device file is correct.

PRVF-03911: Length of value of environment variable "%(0)" exceeds the maximum recommended length of "%(1)" on the nodes:
  Cause: Length of the value of environment variable exceeds the recommended length.
  Action: Ensure the value of the environment variable does not exceed the standard operating system specified limit.

PRVF-03912: Length of value of environment variable "%(0)" exceeds the maximum recommended length of "%(1)" on the node "%(2)"
  Cause: Length of the value of environment variable exceeds the recommended length.
  Action: Ensure the value of the environment variable does not exceed the standard operating system specified limit. Restart the installer after changing the setting for environment variable.

PRVF-03913: Environment variable name "%(0)" is set on nodes:
  Cause: The environment variable was set on the nodes indicated.
  Action: Ensure that the environment variable is not set to any value.
PRVF-03914: Environment variable name "[0]" is set on node "[1]"
   Cause: The environment variable was set on the node indicated.
   Action: Ensure that the environment variable is not set to any value. Restart the installer after changing the setting for environment variable.

PRVF-03915: Environment variable name "[0]" is not set on nodes:
   Cause: Environment variable value could not be determined.
   Action: Ensure that the environment variable is set and access permissions for the Oracle user allow access to read the environment variables.

PRVF-03916: Environment variable name "[0]" is not set on node "[1]"
   Cause: Environment variable value could not be determined.
   Action: Ensure that the environment variable is set and access permissions for the Oracle user allow access to read the environment variables. Restart the installer after changing the setting for environment variable.

PRVF-03917: Environment variable check for variable "[0]" cannot be performed on nodes:
   Cause: Environment Variable value could not be determined.
   Action: Ensure that the environment variable is set in either system or user environment and access permissions for the Oracle user allow access to read the environment variables.

PRVF-03918: Can not read environment variable "[0]" from node "[1]"
   Cause: Environment variable value could not be determined.
   Action: Check user equivalence and whether the user has administrative privileges on the node.

PRVF-03919: Failed to retrieve value of environment variable "[0]"
   Cause: Environment variable value could not be determined.
   Action: Check user equivalence and whether the user has administrative privileges on the node.

PRVF-03920: Environment variable name "[0]" is invalid for this operating system.
   Cause: Environment variable name does not meet operating system standards.
   Action: Ensure that the environment variable name is as per the operating system standards. Restart the installer after changing the setting for environment variable.

PRVF-03921: Environment variable name not specified.
   Cause: Environment variable name was not specified.
   Action: Ensure that a valid environment variable name is specified.

PRVF-03928: Adding the Oracle binary location to the PATH environment variable will exceed the OS length limit of ["{0}"]. The maximum allowed length for PATH environment variable is ["{1}"] on the nodes:
   Cause: The environment variable PATH needs to be updated to include the value "%ORACLE_HOME%/bin". However, doing so will cause PATH to exceed the maximum allowable length that this operating system allows.
   Action: Ensure that the length of your current PATH environment variable is less than that of specified maximum allowed length, so that adding of "%ORACLE_HOME%/bin;" does not exceed the operating system’s environment variable length limit.
PRVF-03929: Adding the Oracle binary location to the PATH environment variable will exceed the OS length limit of ["0"], The maximum allowed length for PATH environment variable is ["1"] on the node ["2"]

Cause: The installer needs to update the PATH environment variable to include the value "%ORACLE_HOME%/bin;". However, doing so will cause PATH to exceed the maximum allowable length that this operating system allows.

Action: Ensure that the length of your current PATH environment variable is less than that of specified maximum allowed length, so that adding of "%ORACLE_HOME%/bin;" does not exceed the system's environment variable length limit. Restart the installer after changing the setting for environment variable.

PRVF-04001: Check: Space available on "[0]"

Cause: Could not determine mount point for location specified.

Action: Ensure location specified is available.

PRVF-04007: User equivalence check failed for user "[0]"

Cause: User equivalence for the specified user did not exist amoung all the nodes participating in the operation.

Action: Verify user equivalence on all the nodes participating in the operation, see "Enabling SSH User Equivalency on Cluster Member Nodes" documentation.

PRVF-04008: User equivalence unavailable on all the specified nodes

Cause: User equivalence doesn't exist between the local node and the remote node(s).

Action: Ensure user equivalence exists on all the nodes specified.

PRVF-04020: Inconsistent group IDs found for group "[0]"

Cause: The group ID for the specified group is not the same across all the nodes.

Action: Make sure that the group has the same group ID across all the nodes.

PRVF-04025: Inventory configuration file "[0]" does not exist

Cause: Cannot locate the inventory configuration file specified.

Action: Ensure that the correct inventory location was supplied and that the inventory file is there.

PRVF-04037: CRS is not installed on any of the nodes

Cause: Could not identify a CRS installation on any node.

Action: Ensure that CRS is installed on all the nodes participating in the operation.

PRVF-04038: CRS is not installed on nodes:

Cause: An attempt to identify Oracle Clusterware installation failed on specified nodes.

Action: Ensure that Oracle Clusterware is installed on all the nodes participating in the operation.

PRVF-04041: CSS is probably working with a non-clustered, local-only configuration on all the nodes

Cause: Oracle CSS was found to be configured to run in a local-only (non-clustered) environment on all the nodes.

Action: Ensure cluster setup is correct and reconfigure Cluster Synchronization Services (CSS) as necessary on the nodes that are supposed to be executing in a
clustered environment. See Oracle Cluster Synchronization Services documentation for further information.

**PRVF-04042: CSS is probably working with a non-clustered, local-only configuration on nodes:**
**Cause:** Oracle CSS was found to be configured to run in a local-only (non-clustered) environment on the nodes specified.
**Action:** Ensure cluster setup is correct and reconfigure CSS as necessary on the nodes that are supposed to be executing in a clustered environment, see documentation regarding usage of the 'localconfig' script.

**PRVF-04043: Unable to obtain OCR integrity details from any of the nodes**
**Cause:** OCR was not found to be in a healthy state on any of the nodes.
**Action:** Verify the state of OCR on each of the nodes using 'ocrcheck'.

**PRVF-04044: Unable to obtain OCR integrity details from nodes:**
**Cause:** OCR was not found to be in a healthy state on some of the nodes.
**Action:** Verify the state of OCR on each of the nodes identified using 'ocrcheck'.

**PRVF-04046: OCR ID is inconsistent among the nodes**
**Cause:** Multiple OCR ID’s found across the cluster nodes specified.
**Action:** Verify Oracle Clusterware configuration and setup with 'ocrcheck' on each node specified. See 'ocrcheck' documentation for further information.

**PRVF-04048: Version of OCR found "[0]", expected version of OCR for this release is "[1]"**
**Cause:** An incorrect version of OCR was found running on all the nodes.
**Action:** Verify version of OCR running on all the nodes using 'ocrcheck'.

**PRVF-04049: OCR version is inconsistent amongst the nodes**
**Cause:** Found different version of OCR running on the cluster nodes.
**Action:** Ensure that the correct version of OCR is running on all the nodes using 'ocrcheck'.

**PRVF-04052: Total space in OCR device is inconsistent amongst the nodes**
**Cause:** Found possible different devices in use across the nodes.
**Action:** Verify that the same OCR devices are used across the cluster nodes using 'ocrcheck'.

**PRVF-04055: OCR integrity is invalid**
**Cause:** Cluster registry integrity check failed.
**Action:** Verify state of cluster registry using ocrcheck on the nodes participating in the verification operation.

**PRVF-04056: OCR integrity results are inconsistent amongst the nodes**
**Cause:** Cluster registry integrity check failed on some of the nodes.
**Action:** Verify state of cluster registry using ocrcheck on the nodes participating in the verification operation.

**PRVF-04060: Unable to retrieve storage information**
**Cause:** Internal error encountered while trying to retrieve storage information.
**Action:** If problem persists report issue to Oracle support and provide trace files generated when the cluvfy command is executed. Trace files should be located under <CRSHOME>/cv/log.

**PRVF-04079:** The number of addresses does not match the number of node  
**Cause:** Cannot determine IP address for every node.  
**Action:** Verify each node in the cluster has a valid IP address.

**PRVF-04080:** Network interface information cannot be obtained from any of the node  
**Cause:** Could not find any network interface on any node in the cluster.  
**Action:** Verify network interface(s) operational status on the cluster nodes.

**PRVF-04083:** Node reachability check failed from node "[0]"  
**Cause:** Network link to target node could not be verified using PING.  
**Action:** Verify network link to target node using the PING utility.

**PRVF-04084:** Make sure IP address "[0]" is up and is a valid IP address on node "[1]"  
**Cause:** The network interface, IP address and subnet identified as "<network interface> : <IP address> [ <subnet> ]" is not available or is not functioning correctly.  
**Action:** Please verify that the network interface identified is functioning as intended.

**PRVF-04087:** Node connectivity check failed  
**Cause:** Encountered errors during verification of Node Connectivity.  
**Action:** Review errors reported and correct problems.

**PRVF-04095:** Unable to reach any of the nodes  
**Cause:** Unable to reach any of the nodes using the ping command.  
**Action:** Ensure the nodes specified are accessible.

**PRVF-04097:** Node "[0]" is not reachable  
**Cause:** Unable to reach the node specified using the ping command.  
**Action:** Ensure the node specified is accessible.

**PRVF-04098:** User equivalence not found for node "[0]"  
**Cause:** Cannot access node specified using user equivalence.  
**Action:** Ensure user equivalence is setup between the local node and the node specified.

**PRVF-04101:** Could not find a suitable set of interfaces for VIPs  
**Cause:** Could not find a set of network interface adapters suitable for Virtual IP communication in the cluster.  
**Action:** Ensure that the network interface adapters are installed and configured correctly on each node in the cluster and that each interface can communicate with a network gateway.

**PRVF-04102:** Could not find a suitable set of interfaces for the private interconnect  
**Cause:** Could not find a set of network interface adapters suitable for Private communication in the cluster.
Action: Ensure that the network interface adapters are installed and configured correctly on each node in the cluster according to RFC 1918, or that the interfaces are not accessible from the public network.

PRVF-04107: Source node "(0)" is not reachable from local node
Cause: Unable to reach the source node specified using the ping command.
Action: Ensure the source node specified is accessible.

PRVF-04108: User equivalence not found for source node "(0)"
Cause: Cannot access source node specified using user equivalence.
Action: Ensure user equivalence is setup between the local node and the source node specified.

PRVF-04112: Cannot identify Oracle Restart installation
Cause: Cannot determine location of Oracle Restart installation.
Action: Insure that the Oracle Restart environment is setup correctly.

PRVF-04113: Unable to obtain OLR integrity details from the local node
Cause: Could not verify the state of OLR on the local node.
Action: Check the status of OLR on the local node using the command 'ocrcheck -local'.

PRVF-04118: Unable to obtain Oracle Restart integrity details from the local node
Cause: Encountered an error when trying to run 'crsctl check has', or OHASD was found to be offline.
Action: Check the status of Oracle Restart using the 'crsctl check has' command on the local node.

PRVF-04123: Inconsistent user IDs found for user "(0)"
Cause: The user ID for the specified user is not the same across all the nodes.
Action: Make sure that the user has the same user ID across all the nodes.

PRVF-04125: Failed to retrieve storage type for "(0)"
Cause: The storage location specified may be non-existent or invalid or the user running the check may not have permissions to access the specified storage.
Action: Specify a valid existing location, and ensure that the user running the check has valid read permissions to this location.

PRVF-04126: Global failure for all nodes during execution of space check command
Cause: CVU’s attempt to execute the space check command on all nodes had a total failure.
Action: Make sure that the location specified is a valid location and available on all nodes.

PRVF-04127: Unable to obtain OLR location
Cause: Could not verify the state of OLR.
Action: Check the status of OLR using the command 'ocrcheck -config -local'.

PRVF-04132: Multiple users "(0)" with UID "(1)" exist on "(2)".
Cause: More than one user is found to have the same user ID as specified in the message.
Action: Ensure that no two users share the same UID.
PRVF-04143: Media Sensing of TCP/IP is enabled on the nodes:

**Cause:** Media Sensing setting for TCP/IP is enabled.

**Action:** To disable Media Sensing for TCP/IP, add the REG_DWORD registry entry by name 'DisableDHCPMediaSense' and value 1 to the 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' subkey. It is recommended to backup the Windows Registry before proceeding with any changes, Restart your system to make your changes effective after changing the registry.

PRVF-04144: Media Sensing status check for TCP/IP cannot be performed on nodes:

**Cause:** Media Sensing status could not be determined.

**Action:** Ensure that the access permissions for the Oracle user allow access to the Windows Registry and Registry has the REG_WORD entry named 'DisableDHCPMediaSense' with value 1 under 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' sub key on the node. It is recommended to backup the Windows Registry before proceeding with any changes, Restart your system to make your changes effective after changing the registry.

PRVF-04145: Error reading Registry sub key 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' from Windows Registry

**Cause:** Windows Registry sub key 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' could not be read.

**Action:** Ensure that the access permissions for the Oracle user allow access to the Windows Registry.

PRVF-04146: Error reading Registry sub key 'HKEY_LOCAL_MACHINE/Cluster/Parameters' from Windows Registry

**Cause:** Windows Registry sub key 'HKEY_LOCAL_MACHINE/Cluster/Parameters' could not be read.

**Action:** Ensure that the access permissions for the Oracle user allow access to the Windows Registry.

PRVF-04147: Error reading Registry value 'DisableDHCPMediaSense' for Windows Media Sensing

**Cause:** Could not read Windows Registry value 'DisableDHCPMediaSense' under 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' sub key.

**Action:** Ensure that the access permissions for the Oracle user allow access to the Windows Registry and the Registry value 'DisableDHCPMediaSense' under 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' sub key is present on the node.

PRVF-04148: Error reading Registry value 'DisableClusSvcMediaSense' for Windows Media Sensing

**Cause:** Could not read Windows Registry value 'DisableClusSvcMediaSense' under 'HKEY_LOCAL_MACHINE/Cluster/Parameters' sub key.

**Action:** Ensure that the access permissions for the Oracle user allow access to the Windows Registry and the Registry value 'DisableClusSvcMediaSense' under 'HKEY_LOCAL_MACHINE/Cluster/Parameters' sub key is present on the node.
PRVF-04151: Found different access permissions for the above storage location across the nodes specified
   Cause: The access permissions for the path specified (i.e. read, write, execute) are different, or could not be determined, across the nodes specified.
   Action: Ensure that the access permissions allow access for the Oracle user on all the nodes specified.

PRVF-04152: The access permissions for the above storage location do not allow the user access across the nodes specified
   Cause: The access permissions for the path specified (i.e. read, write, execute) do not allow the user access.
   Action: Ensure that the access permissions allow access for the Oracle user on all the nodes specified.

PRVF-04164: Size of the OCR location "[0]" does not meet the requirement.
   [Expected="[1]" ; Found="[2]"
   Cause: Size of the ocr device does not meet the requirement
   Action: Increase the size of the ocr device

PRVF-04190: Verification of the hosts config file failed
   Cause: The '/etc/hosts' file(s) contain incorrect, or incomplete, network host information.
   Action: Review the contents of the node's '/etc/hosts' file and ensure that each entry contains a valid IP address and a canonical host name for the specified IP address.

PRVF-04192: Encountered error while trying to check hosts file
   Cause: Could not verify the contents of the '/etc/hosts' file.
   Action: Review the node's 'hosts' file and insure that it exists, has necessary permissions and each entry contains at least an IP address and a host name for the IP address specified.

PRVF-04211: The specified OCR location "[0]" is not a partition
   Cause: The location specified should be a disk partition rather than the disk itself.
   Action: Specify a disk partition as the OCR storage.

PRVF-04212: The specified Voting Disk location "[0]" is not a partition
   Cause: The location specified should be a disk partition rather than the disk itself.
   Action: Specify a disk partition as the Voting Disk storage.

PRVF-04213: Encountered issues with the following OCR Device/Files
   Cause: 'ocrcheck' returned failure, or warning, messages with the Device(s)/File(s) listed.
   Action: Run 'ocrcheck' and resolve issues reported.

PRVF-04253: CRS integrity check passed, but encountered some warnings
   Cause: Some warnings were encountered while verifying CRS integrity.
   Action: Review warnings and make modifications as necessary.

PRVF-04309: The effective group id "[0]" differs from the primary group id "[1]" of user "[2]"
   Cause: The user is currently logged into a group that is not user's primary group.
Action: Invoke the application after logging in to the primary group (using command 'newgrp <primary group>').

PRVF-04314: There is no primary group on this Operating System
Cause: An attempt was made to check users primary group on an Operating System where there are no primary groups.
Action: This is an internal error; contact Oracle Support.

PRVF-04317: User "[0]" is part of group "[1]". Check failed
Cause: The user who was executing this check was found to be part of root group.
Action: Use the 'id' command to check if the user is part of root group. Remove the user from root group using the 'usermod' command and try again.

PRVF-04318: Checking that user "[0]" is not part of "[1]" group could not be performed on node "[2]"
Cause: A node specific error occurred while checking if user is not part of root group.
Action: Check that the node is accessible and user equivalence exists between the node on which command was executed and the node on which the check failed.

PRVF-04353: Proper soft limit for resource "[0]" not found on node "[1]" [Expected = "[2]" ; Found = "[3]""]
Cause: Soft limit for the resource does not meet the requirement on the specified node.
Action: Modify the resource limits to meet the requirement.

PRVF-04354: Proper hard limit for resource "[0]" not found on node "[1]" [Expected = "[2]" ; Found = "[3]""]
Cause: Hard limit for the resource does not meet the requirement on the specified node.
Action: Modify the resource limits to meet the requirement.

PRVF-04355: Resource soft limit check for "[0]" failed on node "[1]"
Cause: Soft limit of the resource could not be determined.
Action: Ensure that the resource limit configuration is accessible.

PRVF-04356: Resource hard limit check for "[0]" failed on node "[1]"
Cause: Hard limit of the resource could not be determined.
Action: Ensure that the resource limit configuration is accessible.

PRVF-04363: Persistent configuration check for cluster nodes failed
Cause: The nodes IP address configuration was not found to be persistent.
Action: Make the nodes IP address configuration persistent using the 'crsctl pin css' command, see Oracle documentation 'Pinning Cluster Nodes for Oracle Database Release' for further information.

PRVF-04528: Check for existence of config file "[0]" could not be performed on node "[1]".
Cause: Could not verify existence of configuration file specified.
Action: Verify access to node indicated and that the config file exists.

PRVF-04529: Host-guid of node "[0]" is not unique
Cause: The system guid value is not unique across all the cluster nodes.
Action: Ensure that the guid value is unique across all cluster nodes using 'ocrcheck'.

PRVF-04530: OCFS is not configured in runlevel 3, 4 and 5 on the node
Cause: Runlevel was not configured with levels 3, 4 and 5 all being on.
Action: Check OCFS configuration and ensure the run levels indicated are on.

PRVF-04554: Unable to retrieve {0} resource name from node {1}.
Cause: Could not identify node application resource name specified on the node specified.
Action: Ensure that the node application resource name specified is available for the node specified.

PRVF-04555: Node application "{0}" does not exist on node "{1}".
Cause: Could not identify resource specified on the node specified.
Action: Ensure that the resource specified is available for the node specified.

PRVF-04556: Failed to check existence of node application "{0}" on node "{1}".
Cause: Could not verify existence of the nodeapp identified on the node specified.
Action: Ensure that the resource specified is available on the node specified, see 'srvctl add nodeapps' for further information.

PRVF-04567: Failed to check existence of VIP node application on nodes "{0}".
Cause: An attempt to verify existence of the VIP on the nodes specified failed.
Action: Look at the accompanying messages for details on the cause of failure.

PRVF-04570: Failed to check existence of NETWORK node application on nodes "{0}".
Cause: An attempt to verify existence of the NETWORK node application on the nodes specified failed.
Action: Look at the accompanying messages for details on the cause of failure.

PRVF-04573: Failed to check existence of GSD node application on nodes "{0}".
Cause: An attempt to verify existence of the GSD node application on the nodes specified failed.
Action: Look at the accompanying messages for details on the cause of failure.

PRVF-04576: Failed to check existence of ONS node application on nodes "{0}".
Cause: An attempt to verify existence of the ONS node application on the nodes specified failed.
Action: Look at the accompanying messages for details on the cause of failure.

PRVF-04578: Failed to check existence of node applications on nodes "{0}".
Cause: An attempt to verify existence of node applications on the nodes specified failed.
Action: Look at the accompanying messages for details on the cause of failure.

PRVF-04579: An error occurred while parsing the output of the command "{0}" for node application resource "{1}". The output is: "{2}"
Cause: An error occurred while parsing output of the command listed for the resource listed.
Action: This is an internal error. Contact Oracle Support Services.

PRVF-04580: Node applications do not exist on any node of the cluster
Cause: Node applications were not configured on the cluster nodes.
Action: Node applications are created when root scripts are run. They can also be created using the command `srvctl add nodeapps`.

PRVF-04606: User equivalence not found for reference node "(0)"
Cause: Cannot access reference node using user equivalence.
Action: Ensure user equivalence is configured between the local node and the node specified. See Enabling SSH User Equivalency on Cluster Member Nodes documentation for further information.

PRVF-04657: Name resolution setup check for "(0)" (IP address: (1)) failed
Cause: Inconsistent IP address definitions found for the SCAN name identified using DNS and configured name resolution mechanism(s).
Action: Look up the SCAN name with nslookup, and make sure the returned IP addresses are consistent with those defined in NIS and /etc/hosts as configured in /etc/nsswitch.conf by reconfiguring the latter. Check the Name Service Cache Daemon (/usr/sbin/nscd) by clearing its cache and restarting it.

PRVF-04661: Found inconsistent 'hosts' entry in /etc/nsswitch.conf on node (0)
Cause: The 'hosts' specifications in the /etc/nsswitch.conf file is different the node specified.
Action: Ensure the 'hosts' entries define the same lookup order in the /etc/nsswitch.conf file across all cluster nodes.

PRVF-04663: Found configuration issue with the 'hosts' entry in the /etc/nsswitch.conf file
Cause: The 'hosts' specifications in the /etc/nsswitch.conf file should specify 'dns' before 'nis' to ensure proper IP address to name mapping.
Action: Ensure the 'hosts' entries across the cluster nodes define 'dns' lookup before 'nis' lookup.

PRVF-04664: Found inconsistent name resolution entries for SCAN name "(0)"
Cause: The nslookup utility and the configured name resolution mechanism(s), as defined in /etc/nsswitch.conf, returned inconsistent IP address information for the SCAN name identified.
Action: Check the Name Service Cache Daemon (/usr/sbin/nscd), the Domain Name Server (nslookup) and the /etc/hosts file to make sure the IP address for the SCAN names are registered correctly.

PRVF-04758: 'lsnodes' could not be executed on the node
Cause: Error running 'lsnodes'.
Action: Ensure that the executable exists and that it is executable by your OS user id.

PRVF-04759: 'lsnodes' execution failed on the node
Cause: Error running 'lsnodes'.
Action: Ensure that the executable <CRSHOME>/bin/lsnodes exists and that it is executable by your OS userid.

PRVF-04859: Location "[0]" not accessible on node(s) to be added.
   Cause: Location does not exist, or cannot be created, on node(s) to be added.
   Action: Insure location either exists or can be created on the node(s) to be added.

PRVF-04864: Path location check failed for: "[0]"
   Cause: Cannot write to path location specified.
   Action: Verify access to path specified across cluster nodes(s).

PRVF-04866: Device location check failed for: "[0]"
   Cause: Cannot verify location specified.
   Action: Verify location specified is accessible across cluster node(s).

PRVF-04868: Virtual IP (VIP) "[0]" found for node "[1]"
   Cause: The VIP node application identified was found on the node specified.
   Action: Removed the specified VIP node application from the node specified.

PRVF-04869: Shared OCR location check failed
   Cause: Problem reading inventory file for CRS home location.
   Action: Verify inventory file integrity.

PRVF-04950: Error checking Operating System Version compatibility for Universal Storage Manager on node "[0]"
   Cause: A remote operation to check Operating System version on the remote node failed.
   Action: See the action for the additional error message displayed.

PRVF-04954: Version "[0]" is NOT supported for installing ACFS on node "[1]"
   Cause: The version of operating system on the node is not compatible for installing ACFS.
   Action: Check documentation for compatible version and install compatible version.

PRVF-05054: Verification of SCAN VIP and Listener setup failed
   Cause: Could not identify any SCAN, or Scan Listener, resources on the cluster.
   Action: Verify SCAN configuration using 'srvctl config scan'.

PRVF-05056: Scan Listener "[0]" not running
   Cause: The identified Listener was not in the running state.
   Action: Start the identified Listener using 'srvctl start listener'.

PRVF-05057: Scan Listener port for listener "[0]" do not match other ports
   Cause: The port numbers used for the listener identified do not match in all instances of the Listener started.
   Action: Insure that all the port numbers for the identified Listener match. See the commands 'srvctl config scan' and 'srvctl modify scan' for details on how to inspect and modify scan resource port numbers.

PRVF-05059: An error was encountered while verifying the SCAN configuration
   Cause: An error was encountered while obtaining SCAN information.
Action: Review additional messages displayed for details of the error that was encountered.

PRVF-05060: SCAN Listener processing error
Cause: An error was encountered while obtaining SCAN Listener information.
Action: Review additional messages displayed for details of the error that was encountered.

PRVF-05061: SCAN VIP "[0]" not running
Cause: The SCAN VIP resources is not in the 'running' state.
Action: Start the SCAN VIP resource using using 'srvctl start scan -i <num>'.

PRVF-05062: SCAN VIP "[0]" and Scan Listener "[1]" not running
Cause: The SCAN VIP and SCAN Listener resources are not in the 'running' state.
Action: Start the SCAN VIP and SCAN Listener resources using 'srvctl'.

PRVF-05064: SCAN and Scan Listener may not function correctly
Cause: The SCAN VIP and/or SCAN Listener are not in the 'Running' state, or the port numbers used for the Listeners do not match across the nodes.
Action: Start the SCAN VIP and/or SCAN Listener, or insure that the port numbers used for the SCAN Listeners match across the nodes in the cluster.

PRVF-05065: Warning: all SCAN VIPs and SCAN Listeners are running on node "[0]"
Cause: All the SCAN VIPs and SCAN Listeners were found to be running on specified node.
Action: Relocate scan using 'srvctl relocate scan' command to different nodes of the cluster.

PRVF-05067: TCP connectivity check for SCAN Listener "[0]" failed on node "[1]"
Cause: An attempt to connect to SCAN Listener specified failed from the node specified.
Action: Examine the accompanying TNS error messages and respond accordingly.

PRVF-05109: ASM Running check failed. ASM is not running on all specified nodes
Cause: ASM was not running on all the specified nodes.
Action: Ensure ASM is running on all the nodes specified, see 'srvctl start asm' for further information.

PRVF-05144: ASM Disk group "[0]" is unavailable on nodes "[1]"

Cause: ASM was not running on the cluster nodes specified.
Action: Ensure ASM is running on all the cluster nodes.
Cause: Could not verify existence of ASM disk group specified on the nodes indicated.
Action: Verify existence of ASM group identified on the specified nodes, see 'asmcmd' for further information.

PRVF-05145: ASM Disk group "[0]" is unavailable on all nodes
Cause: Could not verify existence of ASM disk group specified on all the nodes.
Action: Verify existence of ASM group identified on the cluster nodes.

PRVF-05157: Could not verify ASM group "[0]" for Voting Disk location "[1]"
Cause: The ASM group specified was not found running on the system.
Action: Ensure the ASM group is configured correctly and running, and ensure that the Voting Disk locations are configured correctly.

PRVF-05174: ACFS Driver version is not compatible with Operating System version on node "[0]"
Cause: The version of ACFS driver is not compatible with the Operating system version on the node.
Action: Check documentation for compatible version and install compatible version.

PRVF-05175: Failed to retrieve ACFS driver version on node "[0]". Driver version compatibility check cannot be performed
Cause: The version of the ACFS driver could not be retrieved from specified nodes.
Action: Make sure that ACFS driver is installed on these nodes.

PRVF-05176: Failed to retrieve Operating System version on the local node. ACFS driver version compatibility check will not be performed
Cause: Operating system version on local node could not be determined.
Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-05177: Global failure when attempting to query ACFS driver state option "[0]" on all nodes
Cause: ACFS driver state could not be obtained on all the nodes.
Action: Make sure that user executing this check has execute permissions on the usm_driver_state command.

PRVF-05184: Check of following Udev attributes of "[0]" failed: "[1]"
Cause: Found incorrect attributes for the specified device.
Action: Ensure that the device attributes are set correctly. See Configurable Dynamic Device Naming documentation (udev) for further information.

PRVF-05193: No devices found matching discovery string "[0]"
Cause: The specified device may not exist on the node being tested.
Action: Specify a correct discovery string that matches to existing devices on the node being tested.

PRVF-05195: No shared devices found
Cause: No shared storage was found based on the discovery string used in the verification.
Action: A message should have been displayed for each shared storage check failure. For each such message, perform the suggested action for that message.

PRVF-05196: Failed to retrieve OCR locations
Cause: An attempt to retrieve the OCR locations failed, possibly due to incorrect or incomplete Clusterware install, or due to incorrect configuration of the OCR, or due to invalid or incorrect OCR location file ocr.loc.
Action: Make sure that the Clusterware installation and Clusterware configuration has been correctly completed, and the ocr.loc file is present and accessible.

PRVF-05197: Failed to retrieve voting disk locations
Cause: An attempt to retrieve the voting disk locations failed, possibly due to incorrect or incomplete Clusterware install, or due to incorrect configuration of the Clusterware.
Action: Make sure that the Clusterware installation and Clusterware configuration has been correctly completed.

PRVF-05205: GNS VIP resource configuration check failed.
Cause: An error occurred while trying to obtain GNS VIP resource configuration information.
Action: Look at the accompanying messages for details on the cause of failure.

PRVF-05210: GNS resource is running on multiple nodes "[0]"
Cause: GNS resource should be running on only one node in the cluster at any given time. It was found to be running on multiple nodes at the same time.
Action: Stop the GNS resources running on various nodes using 'srvctl stop gns' command and leave it running on just one node of the cluster.

PRVF-05211: GNS resource is not running on any node of the cluster
Cause: GNS resource should be running on one node of the cluster. GNS resource wasn’t running on any node.
Action: GNS can be configured using 'srvctl add gns' command. Use 'srvctl start gns' command to start GNS.

PRVF-05213: GNS resource configuration check failed
Cause: An error occurred while trying to obtain GNS resource configuration information.
Action: Look at the accompanying messages for details on the cause of failure.

PRVF-05216: The following GNS resolved IP addresses for "[0]" are not reachable: "[1]"
Cause: The listed IP addresses for the fully domain qualified name (FDQN) listed in the message and resolved by GNS were not reachable.
Action: Make sure that the configuration of GNS resource is proper using 'srvctl config gns' command. If GNS is configured correctly make sure that the network administrator has provided a set of IP addresses for the subdomain of the cluster and Domain Name Server (DNS) is forwarding requests for these to the GNS.

PRVF-05217: An error occurred while trying to look up IP address for "[0]"
Cause: An error occurred while trying to translate the fully domain qualified name (FDQN), listed in the message, to IP addresses.
**Action:** These IP address requests should have been forwarded to GNS by the Domain Name Server (DNS). Check the configuration of GNS resource using ‘srvcrl config gns’ command. If GNS is configured correctly make sure that the network administrator has provided a set of IP addresses for the subdomain of the cluster and DNS is forwarding requests for these to the GNS.

**PRVF-05218:** "[0]" did not resolve into any IP address

**Cause:** The fully domain qualified name (FDQN) listed in the message did not resolve into any IP address.

**Action:** Make sure that the configuration of GNS resource is proper using ‘srvcrl config gns’ command. If GNS is configured correctly make sure that the network administrator has provided a set of IP addresses for the subdomain of the cluster and Domain Name Server (DNS) is forwarding requests for these to the GNS.

**PRVF-05219:** GNS and GNS VIP resources are running on different nodes. GNS is running on nodes "[1]" while GNS VIP is running on "[0]".

**Cause:** The GNS and GNS VIP resources were running on different nodes.

**Action:** If GNS should be running on one node of the cluster at any given point of time. Make sure that GNS is not running on multiple nodes of the cluster using ‘srvcrl config gns’ command. If GNS is running on multiple nodes then shut down all but one using ‘srvcrl stop gns’ command.

**PRVF-05220:** GNS VIP resource was not running on any node of the cluster

**Cause:** The GNS VIP resource was not running on any nodes of the cluster.

**Action:** Make sure that the VIP name specified in ‘srvcrl add gns’ command is an unused address belonging to one of the public networks of the cluster nodes.

**PRVF-05223:** The GNS subdomain name "[0]" is not a valid domain name

**Cause:** The GNS domain name specified was not a valid domain name.

**Action:** A valid domain name starts with an alphabet and contain characters [A-Z], [a-z], [0-9], '.', '-'. Refer to RFC-1035 for more information.

**PRVF-05227:** GNS VIP "[0]" does not resolve to a valid IP address

**Cause:** The specified GNS VIP does not resolve to an IP address.

**Action:** Make sure that the VIP name is spelled correctly. Make sure that the VIP name is registered with the DNS. Make sure that there are no firewalls between the cluster and the DNS server.

**PRVF-05229:** GNS VIP is active before Clusterware installation

**Cause:** GNS VIP was found to be active on the public network before Clusterware installation.

**Action:** If you are upgrading an older release of Clusterware this is not an error. In case of new installation GNS VIP will be brought up by GNS resource after Clusterware installation. Make sure that GNS VIP is configured to be an unused IP address.

**PRVF-05230:** GNS VIP is inactive after Clusterware installation

**Cause:** GNS VIP was not reachable after Clusterware installation.

**Action:** Bring the GNS resource online using ‘srvcrl start gns’ command.

**PRVF-05232:** The GNS subdomain qualified host name "[0]" was resolved into an IP address
Cause: The specified GNS subdomain qualified host name was resolved into an IP address before Clusterware installation.

Action: Ensure that the DNS is configured to forward (rather than resolve) names in the GNS subdomain.

PRVF-05233: There are no public networks that match the GNS VIP "[0]"

Cause: GNS VIP subnet number did not match any of the public networks on the node.

Action: Specify an address that matches the public subnet number for GNS VIP.

PRVF-05253: Command "[0]" executed to retrieve GPNP resource status failed on all of the nodes

Cause: An attempt to execute the displayed command failed on all of the nodes.

Action: Make sure that the nodes of the cluster are accessible from the current node. Make sure that the user executing the check has permission to execute commands on nodes using 'ssh'.

PRVF-05254: Command "[0]" executed on node "[1]" produced no output

Cause: An attempt to run the command listed on the node listed produced no output.

Action: This is an internal error. Contact Oracle support services.

PRVF-05255: The GPNP resource is not in ONLINE status on the following node(s): [0]

Cause: The GPNP resource was found to be in OFFLINE or UNKNOWN state on the nodes listed.

Action: This is not an error if the GPNP resource was shutdown. If it is not the expected state then use the command 'crsctl start res ora.gpnpd -init' to start the GPNP resource.

PRVF-05256: Command "[0]" executed to retrieve the GPNP resource status failed on node(s): [1]

Cause: An attempt to run the command listed failed on the node listed.

Action: Make sure that the nodes listed are accessible from the current node. Make sure that the user executing the check has permission to execute commands on the node(s) listed using 'ssh'.

PRVF-05300: Failed to retrieve active version for CRS on this node

Cause: Could not identify location of CRS home.

Action: Ensure correct installation of CRS.

PRVF-05301: Failed to locate CRS home

Cause: Could not locate the CRS home.

Action: Ensure the install of CRS has completed successfully and the CRS home is setup correctly.

PRVF-05302: Failed to execute the exectask command on node "[0]"

Cause: Could not execute command specified on node listed.

Action: Verify command specified can be executed on node listed.

PRVF-05305: The Oracle Clusterware is not healthy on node "[0]"

Cause: An error was found with the Oracle Clusterware on the node specified.
**Action:** Review the error reported and resolve the issue specified.

**PRVF-05307: Failed to retrieve Oracle Restart home**  
**Cause:** Could not identify location of Oracle Restart home.  
**Action:** Ensure that Oracle Local Repository (OLR) was created correctly. See Oracle Local Repository documentation for further information.

**PRVF-05308: ohasd is either not running or could not be contacted on node "[0]"**  
**Cause:** CRSCTL did not report that OHAS was online.  
**Action:** Review the error information displayed and verify the state of OHAS on the node identified.

**PRVF-05311: File "[0]" either does not exist or is not accessible on node ",[1]".**  
**Cause:** Cannot access the file specified.  
**Action:** Verify that the specified file exists and can be access on the node identified.

**PRVF-05312: No ohasd entry was found in /etc/inittab file**  
**Cause:** Did not find 'respawn:/etc/init.d/init.ohasd' line in '/etc/inittab' file.  
**Action:** Insure that the OHASD environment has been setup correctly.

**PRVF-05313: Failed to search for ohasd entry in /etc/inittab file on node "[0]"**  
**Cause:** An error was encountered trying to search for OHASD information in /etc/inittab.  
**Action:** Insure that the OHASD environment has been setup correctly and that /etc/inittab is accessible on the specified node.

**PRVF-05314: Could not find CRS, or Oracle Restart, installed on the local node**  
**Cause:** Could not locate the CRS, or Oracle Restart, installation from the local node.  
**Action:** Ensure the install of CRS, or Oracle Restart, has completed successfully and the CRS, or Oracle Restart, home is setup correctly.

**PRVF-05316: Failed to retrieve version of CRS installed on node "[0]"**  
**Cause:** Could not identify location of CRS home.  
**Action:** Verify installation of CRS on the identified node.

**PRVF-05317: The Clusterware is currently being upgraded to version: "[0]". The following nodes have not been upgraded and are running Clusterware version: "[1]", "[2]"**  
**Cause:** The CRS integrity may have discovered that your Oracle Clusterware stack is partially upgraded.  
**Action:** Review warnings and make modifications as necessary. If the warning is due to partial upgrade of Oracle Clusterware stack then continue with upgrade and finish it.

**PRVF-05318: No Oracle Restart is found configured on the local node**  
**Cause:** Could not locate the Oracle Restart configuration on the specified node.  
**Action:** Ensure the install of Oracle Restart has completed successfully and the Oracle Restart home is set up correctly.

**PRVF-05319: Oracle Cluster Synchronization Services do not appear to be online.**
Cause: An error was encountered when trying to verify the status of Oracle Cluster Synchronization Services.

Action: Verify the state of the Oracle Cluster Synchronization Services using 'crsctl check cluster'.

PRVF-05321: Failed to get the CRS or Oracle Restart home
Cause: Could not locate the CRS, or Oracle Restart, home.
Action: Ensure the install of CRS, or Oracle Restart, has completed successfully and the CRS, or Oracle Restart, home is setup correctly.

PRVF-05322: Failed to get the CRS user name for CRS home "[0]"
Cause: An attempt to obtain the Clusterware owner information from CRS home failed.
Action: Ensure that the user executing the CVU check has read permission for CRS or Oracle Restart home.

PRVF-05323: Failed to get information for file "[0]"
Cause: An attempt to read information for a file failed.
Action: Make sure that the user executing the CVU check has read permission for the file and the file exists in the specified path.

PRVF-05324: Could not find CRS installed on the node "[0]"
Cause: Could not locate the CRS installation on the specified node.
Action: Ensure the install of CRS has completed successfully and the CRS home is setup correctly.

PRVF-05325: Failed to retrieve release version for Oracle Restart
Cause: Could not get release version for Oracle Restart.
Action: Ensure that the install of Oracle Restart has completed successfully.

PRVF-05401: Clock synchronization check using Network Time Protocol(NTP) failed
Cause: One or more of the Clock Synchronization checks failed.
Action: Correlate with the other failure messages displayed and fix those failures.

PRVF-05402: Warning: Could not find NTP configuration file "[0]" on node "[1]"
Cause: NTP might not have been configured on the node, or NTP might have been configured with a configuration file different from the one indicated.
Action: Configure NTP on the node if not done so yet. Refer to your NTP vendor documentation for details.

PRVF-05403: Operation to check presence of NTP configuration file "[0]" failed on node "[1]"
Cause: The operation to check NTP configuration file failed on node indicated. The failure is due to a reason like incorrect permissions on the configuration file, communications error with the node, missing or inaccessible remote execution binary on the node, etc.
Action: Review the error messages that follow this message and fix the problem(s) indicated.

PRVF-05405: The NTP configuration file "[0]" does not exist on all nodes
Cause: The configuration file specified was not available or was inaccessible on the given nodes.

Action: If you want to use NTP for time synchronization, create this file and setup its configuration as described in your vendor's NTP document. If you plan to use CTSS for time synchronization then NTP configuration should be uninstalled on all nodes of the cluster. Refer to "Preparing Your Cluster" of "Oracle Database 2 Day + Real Application Clusters Guide".

PRVF-05406: NTP Configuration file Check failed

Cause: Attempt to check presence of configuration file failed on one or more nodes.

Action: Look at the related error messages and fix them.

PRVF-05408: NTP Time Server "[0]" is common only to the following nodes "[1]"

Cause: One or more nodes in the cluster do not synchronize with the NTP Time Server indicated.

Action: At least one common NTP Time Server is required for a successful Clock Synchronization check. If there are none, reconfigure all of the nodes in the cluster to synchronize with at least one common NTP Time Server.

PRVF-05410: Check of common NTP Time Server failed

Cause: The NTP query command showed there is no common time server among all of the nodes in the cluster.

Action: At least one common NTP Time Server is required for a successful Clock Synchronization check. Reconfigure all of the nodes in the cluster to synchronize with at least one common NTP Time Server. If you plan to use CTSS for time synchronization then NTP configuration should be uninstalled on all nodes of the cluster. Refer to "Preparing Your Cluster" of "Oracle Database 2 Day + Real Application Clusters Guide".

PRVF-05411: Query of NTP daemon failed on all nodes on which NTP daemon is running

Cause: Attempt to query the NTP daemon failed on all of the nodes of the cluster because the 'ntpq' command could not be found.

Action: Make sure that the NTP query command 'ntpq' is available on all nodes and the user running the CVU check has execute privilege for it.

PRVF-05413: Node "[0]" has a time offset of [1] that is beyond permissible limit of [2] from NTP Time Server "[3]"

Cause: The time offset for the given node clock with the specified NTP Time Server is beyond permissible limits, possibly due to a clock drift, or due to an incorrectly functioning time server.

Action: Make sure that the Time Server is functioning properly, and if yes, adjust the system clock so that the offset is within limits.

PRVF-05414: Check of NTP Config file failed on all nodes. Cannot proceed further for the NTP tests

Cause: Attempt to check existence of config file failed on all nodes.

Action: Look at the individual error messages displayed for the respective nodes and the overall result message and take appropriate action.

PRVF-05415: Check to see if NTP daemon or service is running failed
**Cause:** Attempt to check if the NTP daemon was running failed on nodes of the cluster.

**Action:** Look at the accompanying error messages for the nodes on which the check failed and fix the problem. If you plan to use CTSS for time synchronization then NTP configuration should be uninstalled on all nodes of the cluster. Refer to "Preparing Your Cluster" of "Oracle Database 2 Day+ Real Application Clusters Guide".

**PRVF-05416: Query of NTP daemon failed on all nodes**

**Cause:** An attempt to query the NTP daemon using the 'ntpq' command failed on all nodes.

**Action:** Make sure that the NTP query command 'ntpq' is available on all nodes and make sure that user running the CVU check has permissions to execute it.

**PRVF-05421: NTP configuration file check failed on the following nodes:**

**Cause:** Check of existence of NTP configuration file failed on nodes listed because NTP was not configured on those nodes.

**Action:** If you plan to use NTP for time synchronization across nodes of the cluster then configure NTP on all of the nodes. If you plan to use CTSS for time synchronization then NTP configuration should be uninstalled on all nodes of the cluster. Refer to "Preparing Your Cluster" of "Oracle Database 2 Day+ Real Application Clusters Guide".

**PRVF-05424: Clock time offset check failed**

**Cause:** Offsets on all of the nodes in the cluster were not within limits for any Time Server.

**Action:** Look at the individual messages displayed and fix the problems indicated.

**PRVF-05428: Network Time Protocol(NTP) configuration file not found on any of the nodes. Oracle Cluster Time Synchronization Service(CTSS) can be used instead of NTP for time synchronization on the cluster nodes**

**Cause:** NTP is not configured on the cluster nodes.

**Action:** This is not an error if the system administrator intended to use Oracle Cluster Time Synchronization Service (CTSS) for clock synchronization on the cluster. If not then install NTP on all nodes of the cluster according to your NTP vendor documentation.

**PRVF-05430: Voting disk configuration does not meet Oracle's recommendation of three voting disk locations**

**Cause:** For high availability, Oracle recommends that you have a minimum of three voting disk locations.

**Action:** Add additional voting disk locations to meet the Oracle recommended amount of three voting disks.

**PRVF-05431: Oracle Cluster Voting Disk configuration check failed**

**Cause:** The Voting Disk configuration does not meet Oracle's recommendations.

**Action:** Review Clusterware and Voting Disk configuration.

**PRVF-05433: The current voting disk state is at high risk**

**Cause:** The current state of the voting disk locations is susceptible to the loss of one voting disk location resulting in failure of the cluster.
**Action:** Add additional voting disk locations, or bring existing locations online, to reduce the risk of losing one voting disk location.

**PRVF-05434:** Cannot identify the current CRS software version  
**Cause:** Unable to obtain CRS version from CRSCTL.  
**Action:** Insure that CRSCTL is accessible on the nodes being verified.

**PRVF-05435:** Voting disk configuration does meet Oracle's recommendation  
**Cause:** For high availability, Oracle recommends that you have more than two voting disk locations.  
**Action:** Add additional voting disk locations.

**PRVF-05436:** The NTP daemon running on one or more nodes lacks the slewing option "(0)"  
**Cause:** NTP daemon on one or more nodes lacked slewing option.  
**Action:** Shut down and restart the NTP daemon with the slewing option set. In each case add -x to the ntpd command line options.

**PRVF-05439:** NTP daemon does not have slewing option "(0)" set on node "(1)"  
**Cause:** NTP daemon on the specified node does not have the slewing option set.  
**Action:** Shut down and restart the NTP daemon with the slewing option set. In each case add -x to the ntpd command line options.

**PRVF-05440:** NTP daemon slewing option "(0)" check could not be performed on node "(1)"  
**Cause:** An attempt to obtain the command line options for NTP daemon failed.  
**Action:** Make sure that the NTP daemon is running on the node. Also look at other messages accompanying this message.

**PRVF-05442:** Could not obtain NTP daemon's command line on any node  
**Cause:** An attempt to obtain the command line options for the NTP daemon's failed on all nodes.  
**Action:** Make sure that the NTP daemon is running on all the nodes. Make sure that slewing option is set on all the nodes of the cluster.

**PRVF-05447:** Could not verify sharedness of Oracle Cluster Voting Disk configuration  
**Cause:** Unable to obtain list of nodes with CRS installed.  
**Action:** Ensure Clusterware is up and running and verify Voting Disk configuration.

**PRVF-05448:** Voting Disk location "(0)" is not shared across cluster nodes  
**Cause:** Voting Disk location specified is not shared across all cluster nodes.  
**Action:** Verify Voting Disk configuration and ensure all Voting Disk locations are shared across all cluster nodes and are of the same storage type.

**PRVF-05449:** Check of Voting Disk location "(0)" failed on the following nodes:  
**Cause:** Voting Disk location specified is not accessible on the nodes identified.  
**Action:** Verify the owner, group and permissions settings on the location indicated.

**PRVF-05450:** Constraint type does not match
Cause: The specified constraint does not relate to space checks.
Action: Make sure that the space constraint data is well formed and consistent in the constraint xml.

PRVF-05451: Missing key data "(0)"
Cause: The data required for constraint check is missing.
Action: Verify that the space constraint data is correctly specified in the constraint xml.

PRVF-05452: Missing key reference data "(0)"
Cause: The reference data required for constraint check is missing.
Action: For a greater than/equal comparison, reference data is required. Verify that the space constraint check reference data is correctly specified in the constraint xml.

PRVF-05453: Invalid data set for "(0)", EXPECTED:"(1)", FOUND: "(2)"
Cause: The specified data is invalid for the space constraint check being performed.
Action: Make sure that correct data is specified, using the values indicated in the message.

PRVF-05454: Qualifier "(0)" is not supported for "(1)"
Cause: The indicated qualifier is not supported for the class indicated in the message.
Action: Make sure that the correct qualifier is specified.

PRVF-05455: Cannot apply invalid constraint
Cause: The specified constraint is invalid.
Action: Specify the correct constraint.

PRVF-05456: Invalid constraint. Compatibility check cannot proceed
Cause: The specified constraint is invalid.
Action: Specify the correct constraint for the compatibility check.

PRVF-05461: Encountered an invalid setting for internal variable "(0)"
Cause: This is an internal error.
Action: Please contact Oracle Support.

PRVF-05470: The NTP daemon"s boot time configuration, in file "(0)", on one or more nodes lacks the slewing option "(1)"
Cause: NTP daemon boot time configuration on one or more nodes lacked slewing option.
Action: Make sure that the slewing option is specified in the file listed. For a list of nodes on which this check failed look at the accompanying error messages.

PRVF-05472: NTP daemon"s boot time configuration does not have slewing option "(0)" set on node "(1)"
Cause: NTP daemon boot time configuration on the specified node does not have the slewing option set.
Action: The NTP daemon's boot time configuration file is listed with the messages accompanying this message. Make sure that slewing option is set in configuration
file. For more information on NTP daemon slewing option refer to NTP daemon's man pages.

PRVF-05473: NTP daemon''s boot time configuration check could not be performed on node "[0]"
Cause: An attempt to obtain the NTP daemon's boot time configuration file failed on the node specified.
Action: Make sure that the NTP daemon is configured on the node and will be started when the node boots up. Make sure that the user running this check has access to the configuration file specified. Also look at other messages accompanying this message.

PRVF-05475: Could not obtain NTP daemon's boot time configuration on any node
Cause: An attempt to obtain the command line options for the NTP daemon's failed on all nodes.
Action: Make sure that the NTP daemon is running on all the nodes. Make sure that slewing option is set on all the nodes of the cluster.

PRVF-05478: TZ value missing in configuration file "[0]" on node "[1]".
Cause: Time Zone value is missing in specified configuration file.
Action: Enter appropriate Time Zone value in the specified configuration file on the indicated node.

PRVF-05479: Time zone is not the same on all cluster nodes.
Cause: Nodes have different time zone settings.
Action: Ensure that time zone is same on all nodes.

PRVF-05486: The NTP daemon on the indicated nodes is not using UDP port 123
Cause: The port 123 for udp is not opened for the NTP daemon or service.
Action: For Unix, edit the /etc/services file appropriately.

PRVF-05492: Warning: Could not find NTP Daemon or Service running on node "[0]".
Cause: NTP Daemon may have aborted, shut down or may not have been installed.
Action: Restart NTP Daemon on the indicated node or install if necessary.

PRVF-05493: Operation to check presence of NTP Daemon or Service failed on node "[0]".
Cause: The operation to check NTP Daemon or service failed on node indicated. The failure is due to a reason like incorrect setup, communications error with the node, missing or inaccessible remote execution binary on the node, etc.
Action: Review the error messages that follow this message and fix the problem(s) indicated.

PRVF-05494: The NTP Daemon or Service was not alive on all nodes
Cause: The NTP Daemon was not alive on all the nodes.
Action: Examine the status of ntp on each of the nodes indicated after this message and restart the daemon or install the NTP software if necessary.

PRVF-05495: The Check for NTP Daemon or Service status failed on some nodes
Cause: The NTP Daemon was not accessible or there was some unknown failure in the check. The failure is due to a reason like incorrect setup, communications...
error with the node, missing or inaccessible remote execution binary on the node, etc.

Action: Review the error that follow this message and fix the problem(s) in the indicated nodes.

PRVF-05498: Timezone file "(0)" missing on node "(1)".
   Cause: A check for the indicated timezone file did not find it on the node shown.
   Action: Restore the file on the indicated node by reinstalling timezone patches for your operating system.

PRVF-05499: There are more than one NTP daemons or Services running on various nodes of the cluster
   Cause: An attempt to check if NTP daemons or Service were running on nodes of the cluster found that more than one NTP daemons or Services were active.
   Action: The accompanying messages will list the NTP daemon or service names along with the nodes on which they are running. Make sure that only one time synchronization service is active on all nodes of the cluster at any given time by shutting down others.

PRVF-05501: The user "(0)" is currently logged in to the group "(1)" which is not the primary group for the user
   Cause: The user is currently logged into a group that is not user's primary group.
   Action: Invoke the application after logging in to the primary group (using command newgrp <primary group>).

PRVF-05502: Current group ID check cannot be performed
   Cause: Attempt to check if the current group ID matches with primary group ID failed.
   Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-05505: The NTP daemon on node "(0)" is not using UDP port 123
   Cause: The port 123 for UDP was not being used by the NTP daemon or service.
   Action: For Unix, edit the /etc/services file appropriately.

PRVF-05506: Check for UDP port 123 being used by NTP daemon or service could not be performed on node "(0)"
   Cause: Attempt to check for UDP port 123 being used by NTP daemon or service failed.
   Action: Look at the accompanying UDP error messages displayed and fix the problems indicated.

PRVF-05507: NTP daemon or service is not running on any node but NTP configuration file exists on the following node(s):
   Cause: The configuration file was found on at least one node though no NTP daemon or service was running.
   Action: If you plan to use CTSS for time synchronization then NTP configuration must be uninstalled on all nodes of the cluster.

PRVF-05508: NTP configuration file is present on at least one node on which NTP daemon or service is not running.
   Cause: An NTP configuration file was found on at least one node where the NTP daemon or service was not running.
Action: NTP configuration must be uninstalled on all nodes of the cluster.

PRVF-05555: Automount feature is disabled on nodes:
Cause: Automount feature for new volumes was found disabled.
Action: To enable Automount feature for new volumes, use 'mountvol /e' or use the 'diskpart' utility's 'automount enable' command. Restart your system to make your changes effective after enabling the Automount feature.

PRVF-05556: Automount feature is disabled on the node "[0]"
Cause: Automount feature for new volumes was found disabled on specified node.
Action: To enable Automount feature for new volumes, use 'mountvol /e' or use the 'diskpart' utility's 'automount enable' command. Restart your system to make your changes effective after enabling the Automount feature.

PRVF-05557: Error reading Registry subkey "[0]" from Windows Registry on node "[1]"
Cause: Windows Registry subkey 'HKEY_LOCAL_MACHINE\System\CurrentControlSet\Services\MountMgr' could not be read on specified node.
Action: Ensure that the specified subkey exists in registry and access permissions for the Oracle user allow access to the Windows Registry. Restart your system to make your changes effective after changing the registry.

PRVF-05558: Check for status of Automount feature cannot be performed on nodes:
Cause: Windows Registry subkey 'HKEY_LOCAL_MACHINE\System\CurrentControlSet\Services\MountMgr' could not be read.
Action: Ensure that the specified subkey exists in registry and the access permissions for the Oracle user allow access to the Windows Registry. Restart your system to make your changes effective after changing the registry.

PRVF-05559: Failed to perform the Automount status verification.
Cause: An error occurred while attempting to retrieve the information about Automount feature.
Action: Look at the accompanying messages and respond accordingly.

PRVF-05600: On node "[0]" The following lines in file "[1]" could not be parsed as they are not in proper format: [2]
Cause: Invalid lines were found in the file resolv.conf at the location and on the node indicated.
Action: Correct the errors indicated. On UNIX the general format of file resolv.conf is "<keyword> <value(s)>". For more details refer to resolv.conf man page.

PRVF-05603: 'domain' entry does not exist in file "[0]" on nodes: "[1]"
Cause: The 'domain' was not found in the resolv.conf file on nodes indicated while it was present in others.
Action: Look at the file specified on all nodes. Make sure that either 'domain' entry is defined on all nodes or is not defined on any nodes.

PRVF-05604: 'domain' entry in file "[0]" on node "[1]" is "[2]" which differs from reference node
Causes:

- PRVF-05605: File "\{0\}" does not exist on following nodes: \{1\}
  - Cause: File specified did not exist on the nodes listed, but exists on other nodes.
  - Action: Make sure that the file is either present on all nodes or is not present on any node.

- PRVF-05607: The file "\{0\}" on following nodes have more than "\{1\}" 'nameserver' entries: \{2\}
  - Cause: The file specified had more than allowed number of 'nameserver' entries.
  - Action: Reduce the number of 'nameserver' entries on the nodes specified to the allowed number.

- PRVF-05608: The file "\{0\}" on the following nodes have more than one 'attempts' entry: \{1\}
  - Cause: More than one 'option attempts:' entry was found on nodes specified.
  - Action: Make sure that there is only one 'option attempts:' entry in the file specified.

- PRVF-05609: The following nodes have multiple 'domain' entries defined in file "\{0\}"; \{1\}
  - Cause: The nodes specified had multiple 'domain' entry defined in the file specified.
  - Action: Make sure that the file specified has only one 'domain' entry.

- PRVF-05610: The file "\{0\}" on the following nodes have more than one 'search' entry: \{1\}
  - Cause: More than one 'search' entry was found on nodes specified, in the file specified.
  - Action: Make sure that there is only one 'search' entry in the file specified. Multiple domains can be listed in the same search entry.

- PRVF-05613: 'nameserver' entry does not exist in file "\{0\}" on nodes: "\{1\}"
  - Cause: The 'nameserver' entry was not found on nodes indicated while it was present in others.
  - Action: Look at the file specified on all nodes. Make sure that either 'nameserver' entry is defined on all nodes or is not defined any nodes.

- PRVF-05614: 'nameserver' entry in file "\{0\}" on node "\{1\}" is "\{2\}" which differs from reference node
  - Cause: The 'nameserver' entry on the node specified was not the same as the reference node 'nameserver' option specified above.
  - Action: Make sure that all nodes of the cluster have same 'nameserver' entry in the file specified.

- PRVF-05622: 'search' entry does not exist in file "\{0\}" on nodes: "\{1\}"
  - Cause: The 'search' entry was not found on nodes indicated while it was present in others.
**Action:** Look at the file specified on all nodes. Make sure that either 'search' entry is defined on all nodes or is not defined any nodes.

PRVF-05623: 'search' entry in file "[0]" on node "[1]" is "[2]" which differs from reference node

**Cause:** The 'search' entry on the node specified was not the same as the reference node 'search' option specified above.

**Action:** Make sure that all nodes of the cluster have same 'search' entry in the file specified.

PRVF-05629: Unable to read file "[0]" copied to local scratch area from node [1]

**Cause:** An error occurred while trying to read file specified.

**Action:** Make sure that the CV_DESTLOC area was not being used by another process. Make sure that CV_DESTLOC has sufficient permissions. Also look for messages accompanying this message for details.

PRVF-05636: The DNS response time for an unreachable node exceeded "[0]" ms on following nodes: [1]

**Cause:** The DNS response time for an unreachable node exceeded the value specified on nodes specified.

**Action:** Make sure that 'options timeout', 'options attempts' and 'nameserver' entries in file resolv.conf are proper. On HPUX these entries will be 'retrans', 'retry' and 'nameserver'. On Solaris these will be 'options retrans', 'options retry' and 'nameserver'.

PRVF-05637: DNS response time could not be checked on following nodes: [0]

**Cause:** An attempt to check DNS response time for unreachable node failed on nodes specified.

**Action:** Make sure that 'nslookup' command exists on the nodes listed and the user executing the CVU check has execute privileges for it.

PRVF-05640: Both 'search' and 'domain' entries are present in file "[0]" on the following nodes: [1]

**Cause:** Both 'search' and 'domain' entries were found in resolv.conf file on the nodes specified.

**Action:** Make sure that only one of these entries exist in file resolv.conf. It is preferable to use entry 'search' in resolv.conf.

PRVF-05642: Unable to create the directory "[0]"

**Cause:** An attempt to create the directory specified failed on local node.

**Action:** Make sure that the user running CVU has read and write permissions on directory specified or specify a different work area using CV_DESTLOC environment variable where user has write permission.

PRVF-05643: Unable to delete files from directory "[0]"

**Cause:** An attempt to remove files from the directory specified failed.

**Action:** Make sure that the user running CVU has read and write permissions on directory specified or specify a different work area using CV_DESTLOC environment variable where user executing this check has write permission.

PRVF-05704: No DHCP server were discovered on the public network listening on port [0]
**Cause:** No reply was received for the DHCP discover packets sent on the specified port.

**Action:** Contact the network administrator to make sure that DHCP servers exist on the network. If the DHCP servers are listening to a different port then specify it by using -port option.

**PRVF-05707: DHCP server was not able to provide sufficient IP addresses (required "[1]", provided "[0]"

**Cause:** DHCP server was unable to provide sufficient number of IP address.

**Action:** An IP is required for each node VIP. Three IP addresses are needed for SCAN VIP. One IP address is required for each application VIP specified. Make sure that the DHCP server listening on port specified in above messages has sufficient number of IP addresses to give out.

**PRVF-05711: DHCP server response time could not be measured

**Cause:** An attempt to measure DHCP server response time using 'crsctl discover' command failed.

**Action:** Look at messages accompanying this message for more information.

**PRVF-05712: Warning: The DHCP server response time of [0] seconds is greater than VIP resource's SCRIPT_TIMEOUT attribute of [1] seconds

**Cause:** An attempt to obtain a DHCP lease took more time than VIP resource's SCRIPT_TIMEOUT attribute.

**Action:** This check is network load sensitive and can yield different result at different times. Make sure that the DHCP server and the network is not overloaded. Also consider a higher SCRIPT_TIMEOUT value.

**PRVF-05713: Command "[0]" executed on node "[1]" produced no output

**Cause:** An attempt to run the command listed on the node listed produced no output.

**Action:** This is an internal error. Contact Oracle Support Services.

**PRVF-05714: An error occurred while parsing the output of the command "[0]". The output is: "[1]"

**Cause:** An attempt to parse output of the command listed failed.

**Action:** This is an internal error. Contact Oracle Support Services.

**PRVF-05715: The number of IP addresses assigned to the network interface "[0]" exceeds recommended value (recommended [1], actual [2])

**Cause:** Too many IP addresses were assigned to the specified interface.

**Action:** If there are IP addresses that are not needed stop them in the operating system specific way. If too many resources are running on this node then relocate them to other nodes of the cluster relocate using 'srvctl relocate' command.

**PRVF-05716: Unable to obtain network interface details on local node

**Cause:** An attempt to obtain network interface details on local node failed.

**Action:** Make sure that the user executing CVU has sufficient permissions to query network interfaces on the node. Also look at accompanying messages and take action as per those messages.

**PRVF-05718: Command "[0]" failed to execute on node "[1]". The output produced by the command is: "[2]"

**Cause:** An attempt to execute specified command on the node specified failed.
Action: Refer to the specified output and fix the error.

PRVF-05801: Failed to execute command "[0]" on all nodes
   Cause: CVU’s attempt to execute the specified command failed on all of the nodes.
   Action: Examine the messages displayed for each node and take action as per those messages.

PRVF-05803: An error occurred while starting the IP address "[0]" on node "{1}"
   Cause: An attempt to start the specified IP address on the node specified failed.
   Action: Look at messages accompanying this message for more information.

PRVF-05805: Unable to start the test DNS server
   Cause: An attempt to start the test DNS server failed with errors.
   Action: Look at messages accompanying this message for more information.

PRVF-05809: Unable to start the test DNS server on address: "[0]", listening on port: "{1}"
   Cause: An attempt to start the test DNS server failed with errors.
   Action: Look at messages accompanying this message for more information.

PRVF-05810: Unable to stop the test DNS server on address: "[0]", listening on port: "{1}"
   Cause: An attempt to stop the test DNS server failed with errors.
   Action: Look at messages accompanying this message for more information.

PRVF-05811: Unable to stop the IP address "[0]" on node "{1}"
   Cause: An attempt to stop the IP address specified on the node specified failed.
   Action: Look at messages accompanying this message for more information.

PRVF-05813: Unable to reach the IP address "[0]" from local node
   Cause: An attempt to reach the specified IP address from current node failed.
   Action: Make sure that the specified IP address is a valid IP address. Check messages of the 'cluvfy comp dns -server' instance to make sure that there are no errors. If the address has been started then make sure that there are no firewalls between the local node and node on which this IP address has been started.

PRVF-05816: Unable to query the test DNS server started on address "[0]", listening on port {1}
   Cause: An attempt to query the test DNS server, started on specified address and port, failed.
   Action: Look at messages on the 'cluvfy comp dns -server' instance to make sure that the test DNS server was stared. Also look at any messages accompanying this message.

PRVF-05819: Failed to verify DNS delegation of the GNS subdomain "[0]"
   Cause: An attempt to perform name resolution for nodename.<gns_subdomain> failed as DNS did not forward requests to the test DNS server.
   Action: Look at messages accompanying this message for more information. Also look at any messages from 'cluvfy comp dns -server' invocation for CVU.

PRVF-05821: Unable to reach the IP address "[0]" from local node
Cause: An attempt to reach the specified IP address failed.

Action: Make sure that the specified IP address is a valid IP address and is assigned to an interface on the node on which 'cluvfy comp dns -server' was run. Make sure that there are no firewalls between local node and node on which specified IP address is assigned.

PRVF-05822: Name lookup for FDQN "(0)" failed with test DNS server running on address "(1)", listening on port (2)

Cause: An attempt to query specified FDQN on the test DNS server running on specified address and port failed.

Action: Make sure that the specified address and port is correct. Make sure that there are no firewalls between the node on which 'cluvfy comp dns -server' was run and the node on which this command was run. Also look at any error messages on the node on which 'cluvfy comp dns -server' was run.

PRVF-05823: Name lookup for FDQN "(0)" failed

Cause: An attempt to query DNS servers for FDQN specified failed.

Action: Make sure that there are no firewalls between the local node and the DNS. Make sure that there are no firewalls between DNS and the node on which 'cluvfy comp dns -server' was run. Make sure that GNS subdomain delegation was setup correctly in the DNS. Also look at any error messages on the node on which 'cluvfy comp dns -server' was run.

PRVF-05826: The domain name "(0)" is not valid

Cause: The GNS domain name specified did not conform to the industry standard.

Action: A valid domain name starts with an alphabetic character and consists only of characters [A-Z], [a-z], [0-9], '.', '-'. Refer to the RFC-1035 standard for more information.

PRVF-05827: The response time for name lookup for name "(1)" exceeded (0) seconds

Cause: The DNS response time for the name specified exceeded the value specified.

Action: On Linux and AIX make sure that 'options timeout', 'options attempts' and 'nameserver' entries in file resolv.conf are proper. On HPUX these entries will be 'retrans', 'retry' and 'nameserver'. On Solaris these will be 'options retrans', 'options retry' and 'nameserver'. On windows look at registry key 'HKEY_LOCAL_MACHINE\System\CurrentControlSet\Services\VxD\MSTCP' for values 'BcastQueryTimeout' and 'MaxConnectRetries'.

PRVF-06001: Could not get required information about the interface "(0)"

Cause: Could not get interface information for the interface specified.

Action: Insure that the interface is installed and online on the nodes in the cluster.

PRVF-06002: Unable to get information about interface "(0)" on the following nodes:

Cause: Could not get interface information for the interface specified on the nodes listed.

Action: Insure that the interface is installed and online on the nodes specified.

PRVF-06003: Unable to get network information from node: (0)

Cause: Could not obtain any network interface information from the node specified.

Action: Verify state of network interface adapters on the specified node.
PRVF-06005: Could not find a fully connected subnet that covers all the nodes
   Cause: Could not find a network interface adapter that exists in the same subnet
   on every node in the cluster.
   Action: Ensure that the network interface adapters are installed and configured
   correctly on each node in the cluster.

PRVF-06006: Unable to reach any of the nodes
   Cause: Unable to reach any of the nodes using the ping command.
   Action: Ensure the nodes specified are accessible with the ping utility.

PRVF-06011: Network interface unavailable on node "[0]"
   Cause: Could not find any network interface on the node.
   Action: Verify network interface(s) operational status on the node identified.

PRVF-06019: Interface subnet "[0]" does not have a gateway defined
   Cause: Could not identify the gateway for the subnet identified.
   Action: Define a gateway for the specified subnet.

PRVF-06020: Different MTU values used across network interfaces in subnet "[0]"
   Cause: Different MTU values found for the network adapter used between cluster
   nodes across the specified subnet.
   Action: Set the MTU value for that network adapter/subnet to be the same on
   each node in the cluster.

PRVF-06402: Core file name pattern is not same on all the nodes.
   Cause: The core file name pattern is not same on all the nodes.
   Action: Ensure that the mechanism for core file naming works consistently on all
   the nodes. Typically for Linux, the elements to look into are the contents of two
   files /proc/sys/kernel/core_pattern or /proc/sys/kernel/core_uses_pid. Refer
   OS vendor documentation for platforms AIX, HP-UX, and Solaris.

PRVF-06407: Core file name pattern can not be obtained from nodes "[0]".
   Cause: Unable to execute commands on the nodes specified.
   Action: Ensure ability to communicate with, and execute commands on, nodes
   specified.

PRVF-07019: OCFS file system does not exist on location "[0]"
   Cause: OCFS file system was not found on the specified location.
   Action: Ensure that OCFS file system is correctly created on the specified location.

PRVF-07037: Reserve_policy setting prevents sharedness of {0} on nodes:
   Cause: The reserve_policy setting for the device is preventing the device from
   being shared on the nodes indicated.
   Action: Change the reserve_policy setting for the device. See the chdev command
   for further details.

PRVF-07038: Reserve_lock setting prevents sharedness of {0} on nodes:
   Cause: The reserve_lock setting for the device is preventing the device from being
   shared on the nodes indicated.
   Action: Change the reserve_lock setting for the device. See the chdev command
   for further details.
PRVF-07039: File system exists on location "[0]"
   Cause: Existing file system found on the specified location.
   Action: Ensure that the specified location does not have an existing file system.

PRVF-07501: Sufficient space is not available at location "[0]" on node "[1]"
   [Required space = {2}]
   Cause: Not enough free space at location specified.
   Action: Free up additional space or select another location.

PRVF-07524: Kernel version is not consistent across all the nodes.
   Cause: The operating system kernel versions do not match across cluster nodes.
   Action: Update the kernel version where necessary to have all cluster nodes running the same kernel version.

PRVF-07530: Sufficient physical memory is not available on node "[0]" [Required physical memory = {1}]
   Cause: Amount of physical memory (RAM) found does not meet minimum memory requirements.
   Action: Add physical memory (RAM) to the node specified.

PRVF-07531: Physical memory check cannot be performed on node "[0]"
   Cause: Could not perform check of physical memory on the node indicated.
   Action: Ensure ability to access the node specified and view memory information.

PRVF-07532: Package "[0]" is missing on node "[1]"
   Cause: A required package is either not installed or, if the package is a kernel module, is not loaded on the specified node.
   Action: Ensure that the required package is installed and available.

PRVF-07533: Proper version of package "[0]" is not found on node "[1]" [Required = "{2}" ; Found = "{3}"].
   Cause: Package does not meet the requirement.
   Action: Upgrade the package to meet the requirement.

PRVF-07534: Package check cannot be performed on node "[0]"
   Cause: Package configuration could not be determined.
   Action: Ensure that the package configuration is accessible.

PRVF-07535: Proper architecture is not found on node "[0]" [Expected = "{1}" ; Found = "{2}"]
   Cause: System architecture does not meet the requirement.
   Action: Ensure that the correct software bundle is being used.

PRVF-07536: Architecture check cannot be performed on node "[0]"
   Cause: System architecture could not be determined.
   Action: Ensure that the correct software bundle is being used.

PRVF-07537: User "[0]" does not exist on node "[1]"
   Cause: The specified user does not exist on the specified node.
   Action: Create the user on the specified node.

PRVF-07538: User existence check cannot be performed on node "[0]"
Cause: Attempt to check the existence of user on the specified node failed.
Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07539: Group "[0]" does not exist on node "[1]"
Cause: The specified group does not exist on the specified node.
Action: Create the group on the specified node.

PRVF-07540: Group existence check cannot be performed on node "[0]"
Cause: Attempt to check the existence of group on the specified node failed.
Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07542: Kernel version check cannot be performed on node "[0]"
Cause: Unable to execute commands on node specified.
Action: Ensure ability to communicate with, and execute commands on, node specified.

PRVF-07543: OS Kernel parameter "[0]" does not have proper value on node "[1]"
[Expected = "[2]" ; Found = "[3]"].
Cause: Kernel parameter value does not meet the requirement.
Action: Modify the kernel parameter value to meet the requirement.

PRVF-07544: Check cannot be performed for kernel parameter "[0]" on node "[1]"
Cause: Kernel parameter value could not be determined.
Action: Ensure that the correct software bundle is being used.

PRVF-07562: Sufficient available memory is not available on node "[0]" [Required available memory = [1]]
Cause: Amount of available memory (RAM) does not meet minimum memory requirements.
Action: Add physical memory (RAM) to the node specified, or free memory being used.

PRVF-07563: Available memory check cannot be performed on node "[0]"
Cause: Could not perform check of available memory on the node indicated.
Action: Ensure ability to access the node specified and view memory information.

PRVF-07564: Incorrect run level set on node "[0]" [Required run level = [1]]
Cause: Found incorrect runlevel on the node specified.
Action: Reboot the specified node with the correct runlevel.

PRVF-07565: Run level check cannot be performed on node "[0]"
Cause: Encountered error when trying to determine runlevel.
Action: Ensure runlevel value can be obtained on the specified node.

PRVF-07566: User "[0]" does not belong to group "[1]" on node "[2]"
Cause: The specified user is not a member of the specified group on the specified node.
Action: Make the user a member of the group on the specified node.

PRVF-07567: Group "[0]" is not the primary group for user "[1]" on node "[2]"
Cause: The specified group is not the primary group for the specified user.
Action: Make the specified group as the primary group for the user.

PRVF-07568: Check cannot be performed for membership of user "{0}" with group "{1}" on node "{2}"
Cause: Attempt to check the group membership of the user on the specified node failed.
Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07571: Process "{0}" not running on node "{1}"
Cause: Required process not running on the specified node.
Action: Ensure that the identified process can be started on the node.

PRVF-07572: Process running check cannot be performed on node "{0}"
Cause: Could not collect process information from the specified node.
Action: Ensure access to node specified and ability to view process information.

PRVF-07573: Sufficient swap size is not available on node "{0}" [Required = {1}; Found = {2}]
Cause: The swap size found does not meet the minimum requirement.
Action: Increase swap size to at least meet the minimum swap space requirement.

PRVF-07574: Swap size check cannot be performed on node "{0}"
Cause: Could not perform check of swap space on the node indicated.
Action: Ensure ability to access the node specified and view swap space information.

PRVF-07575: Encountered an internal error. The range of reference data for verifying swap size has not been correctly defined
Cause: Swap size could not be determined based on the physical memory available.
Action: This is an internal error that should be reported to Oracle.

PRVF-07584: Multiple versions of package "{0}" found on node {1}: {2}
Cause: Multiple versions of the package were found when only one version was expected.
Action: Ensure that the specified package is installed correctly.

PRVF-07590: "{0}" is not running on node "{1}"
Cause: The process identified is not running on the specified node.
Action: Ensure that the identified process is started and running on the specified node. If it is one of the Clusterware daemons then you can use `crsctl check` command to check status.

PRVF-07591: Check cannot be performed for status of "{0}" on node "{1}"
Cause: An error was encountered trying to determine if the identified process was running on the specified node.
Action: Ensure ability to communicate with the specified node. The status of Clusterware daemons can be checked on this node using the `crsctl check` command.
PRVF-07592: Space availability check for location "(0)" cannot be performed on node "(1)"

**Cause:** Unable to determine amount of free space available for the specified location on the node identified.

**Action:** Ensure ability to communicate with the specified node and the ability to access the location identified.

PRVF-07593: CRS is not found to be installed on node "(0)"

**Cause:** Could not identify CRS installation on the specified node.

**Action:** Ensure that CRS is installed on the specified node.

PRVF-07594: (0) is running but is not working effectively on node "(1)"

**Cause:** Could not communicate with the process specified on the node indicated.

**Action:** Verify state of CRS on the node indicated using the 'crsctl check' command.

PRVF-07595: CRS status check cannot be performed on node "(0)"

**Cause:** Could not verify the status of CRS on the node indicated using 'crsctl check'.

**Action:** Ensure ability to communicate with the specified node. Make sure that Clusterware daemons are running using 'ps' command. Make sure that the Clusterware stack is up.

PRVF-07596: CSS is probably working with a non-clustered, local-only configuration on node "(0)"

**Cause:** Oracle CSS was found to be configured to run in a local-only (non-clustered) environment on the specified node.

**Action:** Ensure cluster setup is correct and reconfigure Cluster Synchronization Services (CSS) as necessary on the nodes that are supposed to be executing in a clustered environment. See Oracle Cluster Synchronization Services documentation for further information.

PRVF-07597: Unable to obtain OCR integrity details from node "(0)"

**Cause:** OCR was not found to be in a healthy state on the node specified.

**Action:** Verify the state of OCR on the node specified using 'ocrcheck'.

PRVF-07610: Cannot verify user equivalence/reachability on existing cluster nodes

**Cause:** Attempts to verify user equivalence, or node reachability, failed for all the existing cluster nodes.

**Action:** Verify that all the cluster nodes have user equivalence and are reachable.

PRVF-07611: Proper user file creation mask (umask) for user "(0)" is not found on node "(1)" [Expected = "(2)" ; Found = "(3)"

**Cause:** The user's OS file creation mask (umask) was not the required setting.

**Action:** Set appropriate user file creation mask. Modify the users .profile or .cshrc or .bashrc to include the required umask.

PRVF-07612: User file creation mask check cannot be performed for user "(0)" on node "(1)"

**Cause:** Attempt to check the file creation mask of user on the specified node failed.
Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07616: Node connectivity failed for subnet "]0"] between "]1"] and "]2"]
Cause: Node connectivity for the mentioned <subnet> could not be verified between the two interfaces identified ( <node> - <interface> : <IP addr> ).
Action: Verify the interface configurations for the network interfaces identified on the nodes indicated using utilities like ipconfig or ping.

PRVF-07617: Node connectivity between "]0"] and "]1"] failed
Cause: Node connectivity between the two interfaces identified ( <node> : <IP addr> ) could not be verified.
Action: Verify the interface configurations for the network interfaces identified on the nodes indicated using utilities like ipconfig or ping.

PRVF-07650: Remote execution files could not be copied to "]0"] on the following nodes:
Cause: An attempt to copy files to the directory specified failed.
Action: Make sure that the user running CVU has read and write permissions on directory specified or specify a different work area using CV_DESTLOC environment variable where user executing this check has write permission.

PRVF-07700: Path for fixup root directory is either null or is an empty string
Cause: Provided fixup root directory path is either null or an empty string.
Action: Provide appropriate and absolute path for fixup root directory.

PRVF-07701: Path "]0"] for fixup root directory is invalid. It must be specified as an absolute pathname
Cause: Fixup root directory was not specified as an absolute pathname.
Action: Respecify fixup root directory as an absolute pathname.

PRVF-07702: The path "]0"] for fixup root directory is not a valid directory
Cause: Fixup root directory path was not a valid directory.
Action: Respecify fixup root path as a valid directory where files can be created and executed from.

PRVF-07703: The fixup root directory "]0"] is not writeable
Cause: Directory identified is not writeable.
Action: Verify write access to directory specified.

PRVF-07704: The fixup root directory "]0"] cannot be created
Cause: Could not create fixup root directory specified.
Action: Ensure write access along the path for the directory specified.

PRVF-07705: Directory "]0"] cannot be created
Cause: Could not create directory specified.
Action: Ensure write access along the path for the directory specified.

PRVF-07706: File "]0"] cannot be created
Cause: Could not create file specified.
Action: Ensure write access to file location.
PRVF-07709: File "[0]" cannot be copied to file "[1]" on node "[2]"
    Cause: Could not copy the source file specified to the target file specified on the
            identified node.
    Action: Ensure access to the node identified and the target location for the file
            specified.

PRVF-07710: Invalid path has been specified for fixup root directory
    Cause: The path specified for the fixup root directory is not correct.
    Action: Specify an absolute path for a directory that exists and is writeable by the
             user performing the verification.

PRVF-07720: Fixup cannot be generated for creating group "[0]" on node "[1]"
    Cause: Attempt to generate fixup for group creation on the specified node failed.
    Action: Look at the accompanying error messages displayed and fix the problems
             indicated.

PRVF-07721: Fixup cannot be generated for creating user "[0]" on node "[1]"
    Cause: Attempt to generate fixup for user creation on the specified node failed.
    Action: Look at the accompanying error messages displayed and fix the problems
             indicated.

PRVF-07722: Fixup cannot be generated for setting kernel param "[0]" on node "[1]"
    Cause: Attempt to generate fixup for kernel param on the specified node failed.
    Action: Look at the accompanying error messages displayed and fix the problems
             indicated.

PRVF-07723: Fixup cannot be generated for setting soft limit for resource "[0]" on
            node "[1]"
    Cause: Attempt to generate fixup for resource soft limit on the specified node
            failed.
    Action: Look at the accompanying error messages displayed and fix the problems
             indicated.

PRVF-07724: Fixup cannot be generated for setting hard limit for resource "[0]" on
            node "[1]"
    Cause: Attempt to generate fixup for resource hard limit on the specified node
            failed.
    Action: Look at the accompanying error messages displayed and fix the problems
             indicated.

PRVF-07725: Fixup cannot be generated for setting runlevel "[0]" on node "[1]"
    Cause: Attempt to generate fixup for run level on the specified node failed.
    Action: Look at the accompanying error messages displayed and fix the problems
             indicated.

PRVF-07726: Fixup cannot be generated for setting membership of user "[0]" with
            group "[1]" on node "[2]"
    Cause: Attempt to generate fixup for group membership on the specified node
            failed.
    Action: Look at the accompanying error messages displayed and fix the problems
             indicated.
PRVF-07728: Could not access or create trace file "[0]". Trace information could not be collected
Cause: Trace file location could not be created, or is not writeable.
Action: Make sure user has write access to location specified, or specify a different location using the environmental variable CV_TRACELOC.

PRVF-07729: Fixup cannot be generated for user "[0]", group {1}, on node "[2]" because the user is not defined locally on the node
Cause: Fixup for group membership could not be generated because user was not found to be locally defined on the specified node.
Action: The fixup will have to be done manually. The user could be a Network Information Service (NIS) or Lightweight Directory Access Protocol (LDAP) user. Based on where the user is defined use appropriate tools to modify the user account.

PRVF-07730: Fixup cannot be generated for user "[0]", group "{1}", on node "{2}" because the group is not defined locally on the node
Cause: Fixup for group membership could not be generated because the group was not found to be locally defined on the specified node.
Action: The fixup will have to be done manually. The group could be a Network Information Service (NIS) or Lightweight Directory Access Protocol (LDAP) user. Based on where the group is defined use appropriate tools to modify the user account.

PRVF-09041: String has bad format: "[0]"
Cause: A parsing exception has occurred, and the string displayed could not parsed.
Action: This message should be part of one or more other messages. Please look at those messages and take appropriate action.

PRVF-09105: Linux RPM package version found to be lower than minimum required version of <"[0]"> on nodes:
Cause: Linux RPM package version found to be older than recommended version.
Action: Ensure that the Linux RPM package version installed on the system is version 4.4.2.3 or higher.

PRVF-09106: Linux RPM package version was lower than the expected value. [Expected = "[0]\"; Found = "[1]\" on node "[2]"
Cause: Linux RPM package version found to be older than recommended version.
Action: Ensure that the Linux RPM package version installed on the system is version 4.4.2.3 or higher.

PRVF-09107: Could not retrieve the version of Linux RPM package on node:
Cause: An error occurred while running rpm command on system to determine the current version of Linux RPM package.
Action: Ensure that the Linux RPM package is correctly installed and is accessible to current user.

PRVF-09108: Could not retrieve the version of Linux RPM package on node "{0}"
Cause: An error occurred while running rpm command on system to determine the current version of Linux RPM package.
**Action:** Ensure that the Linux RPM package is correctly installed and is accessible to current user.

**PRVF-09306: OCFS2 is not configured in runlevel 3,4 and 5 on all the nodes**
*Cause:* Runlevel was not configured with levels 3,4 and 5 all being on.
*Action:* Check OCFS2 configuration and ensure the run levels indicated are on.

**PRVF-09555: Current installation user "[0]" is not an owner of an exisiting CRS installation**
*Cause:* Current user was not found to be an owner of an existing CRS installation.
*Action:* Ensure that the user upgrading CRS installation is an owner of already existing installation.

**PRVF-09556: Failed to get the CRS user name for an existing CRS installation**
*Cause:* An attempt to obtain the Clusterware owner information from an existing CRS installation failed.
*Action:* Ensure that the user executing the CVU check has read permission for CRS or Oracle Restart home.

**PRVF-09653: Command "[0]" to check CTSS status failed on all of the nodes**
*Cause:* CVU attempts to execute the displayed command failed on all of the nodes.
*Action:* Examine the messages displayed for each node and take action as per those messages.

**PRVF-09654: CTSS status check command "[0]" executed successfully on node "[1]", but there was a failure in retrieving the output of this command**
*Cause:* Reason for failure to retrieve output could be due to improper execution.
*Action:* Try the command manually on the node to verify proper execution, and fix any issues arising out of this.

**PRVF-09655: Query of CTSS for time offset and reference produced invalid output on node "[0]" Output: "[1]"**
*Cause:* Failure to correctly parse output could be due to improper execution.
*Action:* Try the command manually on the node to verify proper execution, and fix any issues arising out of this.

**PRVF-09656: The CTSS command to query time offset and reference failed on node "[0]" with error message "[1]"**
*Cause:* Reason for failure to retrieve output could have been be due to improper execution.
*Action:* Try the command manually on the node to verify proper execution, and fix any issues arising out of this.

**PRVF-09657: The CTSS command "[0]" failed to execute correctly or failed to produce valid output on all of the nodes**
*Cause:* Reason for failure could be due to improper execution.
*Action:* Look at the individual messages for each node and take action as per those messages.

**PRVF-09659: The time offset of "[1]" on node "[0]" against reference node "[3]" is NOT within specified limit of "[2]" milliseconds**
**Cause:** One of the clocks, either on the current node, or on the reference node has drifted beyond limits.

**Action:** Monitor the offset over a longer duration and verify if the offset reduces over this period and falls within the threshold limits. Oracle Time Synchronization Service does periodic adjustments of the clock to attempt to bring it within threshold limits. If the threshold does not fall within limits over a period of time perhaps due to a large deviation or drift, it is recommended that the Oracle processes on this node be shutdown, and the clock be adjusted on the problematic node suitably. It is NOT recommended to set a clock backwards.

**PRVF-09661:** Time offset is greater than acceptable limit on node "\(0\) [actual = \"(1)\", acceptable = \"(2)\"]

**Cause:** System clock has drifted from the clock on the reference node for the specified set of nodes.

**Action:** Look at the individual messages for each node and take action as per those messages.

**PRVF-09664:** CTSS is in an inconsistent state with some nodes in Observer state and some nodes in Active state. All nodes must be either in Observer state or in Active state. Nodes with CTSS in Active state:"\(0\)" Nodes with CTSS in Observer state: "\(1\)"

**Cause:** Some nodes may have NTP configured and some other nodes may not have NTP configured, resulting in an inconsistent state of CTSS.

**Action:** Stop Oracle CTSS service on all nodes and restart. Ensure that NTP is either configured on all nodes or not configured on any node.

**PRVF-09665:** Check of Clusterware install failed on some nodes. Clock Synchronization check will proceed with remaining nodes

**Cause:** A valid CRSHome was not found on one or more nodes. The messages displayed prior to this message indicate the list of nodes where a valid Clusterware install was not found.

**Action:** Specify the correct set of nodes that contain a valid Clusterware installation, or complete the Clusterware installation on those node(s) and repeat this CVU verification.

**PRVF-09666:** CTSS is in Observer state. Switching over to clock synchronization checks using NTP

**Cause:** All of the nodes queried for CTSS state indicate they are in Observer state. In the Observer state, CTSS is not performing active clock synchronization adjustments, but letting the underlying NTP handle this action.

**Action:** None. This is a normal state.

**PRVF-09667:** CTSS is in Observer state. Switching over to Windows-specific time synchronization checks

**Cause:** All of the nodes queried for CTSS state indicate they are in Observer state. In the Observer state, CTSS is not performing active clock synchronization adjustments, but letting the underlying Windows time synchronization mechanisms handle this action.

**Action:** Look at the results of the Windows time synchronization checks displayed following this message. If there are any errors reported, perform action suggested for those error messages.
PRVF-09668: Command "{0}" executed to retrieve CTSS resource status failed on all of the nodes
Cause: CVU attempts to execute the displayed command failed on all of the nodes.
Action: Examine the messages displayed for each node and take action as per those messages.

PRVF-09669: Failure to query CTSS resource on all nodes in the cluster
Cause: Attempt to query CTSS resource on all of the nodes in the cluster failed. Possibly because Clusterware may not be running on the nodes.
Action: Look at the specific error messages reported for each of the nodes and take action as per those messages.

PRVF-09670: Failure checking status of CTSS on node "{1}" using command "{0}"
Cause: CTSS may not OFFLINE, or may not be running, or the remote node may not be accessible.
Action: Try running in the indicated command directly on the specified node and ensure it is up and running, check that the remote node, and check user equivalence.

PRVF-09671: CTSS on node "{1}" is not in ONLINE state, when checked with command "{0}" 
Cause: The CTSS daemon is not running on the node, it may have died or may have been stopped.
Action: Restart the CTSS daemon on the specified node.

PRVF-09672: All nodes for which CTSS state was checked failed the check: Nodes: "{0}"
Cause: CTSS is not in ONLINE state on any of nodes, possibly due to node accessibility, or being stopped.
Action: Look at the individual messages displayed for each node and perform the suggested action for those messages.

PRVF-09676: Clusterware is not installed on all nodes checked : "{0}"
Cause: A valid Clusterware installation was not found on these nodes.
Action: Make sure the correct nodes are being specified in this check, or make sure that Clusterware is fully installed on the nodes before running this check for those nodes.

PRVF-09691: Clock Synchronization check without Oracle Cluster Time Synchronization Service (CTSS) is not supported on this platform
Cause: The command line parameter, '-noctss', was specified on the command line which indicates that Clock Synchronization check should be performed without Oracle Cluster Time Synchronization Service (CTSS). This is not supported on this platform.
Action: Run the Clock Synchronization check without the '-noctss' flag.

PRVF-09692: CRS Active version is less than 11.2, performing NTP checks
Cause: CTSS is supported only from release 11.2 onwards. Therefore, the clocksync component check can only run NTP checks.
Action: None

PRVF-09695: Failed to determine operating system patch status on the node "{0}"
Cause: Operating system patch status could not be determined.
Action: Ensure that the operating system configuration is accessible.

PRVF-09800: An exception occurred while attempting to determine storage type for location "{0}"
Cause: The location indicated may not be available on the node, or may have insufficient permissions for access by the user running the CVU check.
Action: Make sure that the location is available on the node, and has the right permissions to allow the user running the CVU check to read its attributes.

PRVF-09801: The storage location "{0}" is not a device, and therefore invalid for running Udev permissions check
Cause: UDev permissions check are valid only for storage devices, and not valid for any kind of file system.
Action: Make sure that a valid storage device location is specified. If the location is derived from an ASM discovery string, make sure that the discovery string specified points to one or more storage devices, and not filesystems.

PRVF-09802: Attempt to get udev info from node "{0}" failed
Cause: Attempt to read the udev permissions file failed, probably due to missing permissions directory, missing or invalid permissions file, or permissions file not accessible to use account running the check.
Action: Make sure that the udev permissions directory is created, the udev permissions file is available, and it has correct read permissions for access by the user running the check.

PRVF-09806: Failed to get storage attributes to compare udev attributes against, udev attributes check aborted
Cause: In order to compare Udev attributes for a given storage location, the expected storage attributes are required to compare against. There was a failure to get these attributes, possibly due to invalid or non-existing Clusterware installation.
Action: Make sure that a valid Clusterware install exists on the node.

PRVF-09807: Encountered an internal error. The range of reference data for verification of kernel param "{0}" has not been correctly defined for node "{1}"
Cause: No reference range defined to be used to calculate expected value.
Action: Define a reference range.

PRVF-09809: Proper OS Patch is not found on node "{0}" [Expected = "{1}" ; Found = "{2}"]
Cause: Required OS Patch is not applied.
Action: Apply the required OS Patch.

PRVF-09810: No prereq file defined
Cause: Prereq file was not set.
Action: Set prereq file.

PRVF-09811: Reference data is not available for verifying prerequisites on this operating system distribution
Cause: No reference data was found for this operating system distribution.
**Action:** Please check the documentation for a list of supported operating system distributions for this product.

**PRVF-09903: Check of Clusterware install failed on some nodes. Oracle patch check will proceed with remaining nodes**

**Cause:** A valid CRS home was not found on one or more nodes. The messages displayed prior to this message indicate the list of nodes where a valid Clusterware install was not found.

**Action:** Specify the correct set of nodes that contain a valid Clusterware installation, or complete the Clusterware installation on those node(s) and repeat this CVU verification.

**PRVF-09905: Clusterware is not installed on the following nodes : "(0)"**

**Cause:** A valid Clusterware installation was not found on these nodes.

**Action:** Make sure the correct nodes are being specified, and that the Clusterware is fully installed on the nodes before running this check for those nodes.

**PRVF-09907: Failed to query patch information from OPatch inventory**

**Cause:** The execution of opatch lsinventory command failed.

**Action:** Make sure that the install inventory is readable by the user.

**PRVF-09908: Failed to query patch information from Oracle executable**

**Cause:** Oracle executable could not be queried for patch information.

**Action:** Make sure that Oracle executable is present and is readable by the user running CVU.

**PRVF-09909: Patch information from OPatch did not match patch information from Oracle executable**

**Cause:** Bug information from OPatch inventory does not match patch information recorded with Oracle executable.

**Action:** Make sure that all patches are applied correctly, refer to the OPatch user guide for information on patch application. Make sure that Oracle executable is relinked, refer to the Oracle Administrator Guide for information on relinking executables.

**PRVF-09910: Patch information is not consistent across nodes**

**Cause:** Bug information from OPatch do not match between the nodes.

**Action:** Make sure that all patches are applied correctly on all nodes, refer to the OPatch user guide for information on patch application.

**PRVF-09913: Patch information from OPatch did not match patch information from Oracle executable on the following nodes:**

**Cause:** Bug information from OPatch inventory does not match patch information recorded with Oracle executable.

**Action:** Make sure that all patches are applied correctly, refer to the OPatch user guide for information on patch application. Make sure that Oracle executable is relinked, refer to the Oracle Administrator Guide for information on relinking executables.

**PRVF-09914: bug list did not match across nodes for the following nodes**

**Cause:** Bug information from OPatch do not match between the nodes.

**Action:** Make sure that all patches are applied correctly on all nodes, refer to the OPatch user guide for information on patch application.
PRVF-09990: Antivirus software is running  
**Cause:** Antivirus software was detected to be running.  
**Action:** Oracle recommends that the Antivirus software be disabled. Antivirus may introduce delays in processing that interfere with time-sensitive cluster operations.

PRVF-09991: Owner of device "{0}" did not match the expected owner. [Expected = "{1}"; Found = "{2}"]  
**Cause:** Owner of the device listed was different than required owner.  
**Action:** Change the owner of the device listed or specify a different device.

PRVF-09992: Group of device "{0}" did not match the expected group. [Expected = "{1}"; Found = "{2}"]  
**Cause:** Group of the device listed was different than required group.  
**Action:** Change the group of the device listed or specify a different device.

PRVF-09993: Permissions of device "{0}" did not match the expected permissions. [Expected = "{1}"; Found = "{2}"]  
**Cause:** Permissions of the device listed was different than the required permissions.  
**Action:** Change the permissions on the device listed or specify a different device.

PRVF-09994: Owner, group, permission information could not be obtained for device(s) "{0}" on node "{1}"  
**Cause:** Owner, group and permission information could not be obtained for devices listed on the nodes listed.  
**Action:** Ensure that the correct devices were specified and that they are created on the indicated node. Make sure that the path exists and is accessible by the user.

PRVF-09995: Owner, group, permission information could not be obtained for all devices on node "{1}"  
**Cause:** Owner, group and permission information could not be obtained for all devices on the node listed.  
**Action:** Make sure that the node is up. Make sure that user equivalence exists on the node listed.

PRVF-09998: User "{0}" is not a domain user  
**Cause:** RAC Installation must be done by a domain user. Locally defined users have a different identity on each node.  
**Action:** Log in to the OS as a domain user.

PRVF-10002: Node ",{0}" is not yet deleted from the Oracle inventory node list  
**Cause:** The indicated node still exists in the list of nodes for the CRS home in the Oracle inventory.  
**Action:** Use 'runInstaller -updateNodeList' to remove the indicated node from the CRS home node list.

PRVF-10014: Clusterware home ",{0}" is located under Oracle base directory ",{1}" on nodes ",{2}"  
**Cause:** Clusterware home directory was found to be located in a subdirectory of ORACLE_BASE.
**Action:** Choose a Clusterware home directory that is not a subdirectory of the ORACLE_BASE. After Clusterware installation the owner will be changed to root for all of the directories above Clusterware home.

**PRVF-10015:** Clusterware home "[0]" is located under Oracle base directory "[1]" on node "[2]"

**Cause:** Clusterware home directory was found to be located in a subdirectory of ORACLE_BASE.

**Action:** Choose a Clusterware home directory that is not a subdirectory of the ORACLE_BASE. After Clusterware installation the owner will be changed to root for all of the directories above Clusterware home.

**PRVF-10016:** Unable to check for the locations of Clusterware home and Oracle Base directory on nodes "[0]"

**Cause:** Clusterware home or Oracle Base is not accessible or do not exist.

**Action:** Ensure that Oracle Base and Clusterware home exist and are accessible.

**PRVF-10017:** Unable to check for the locations of Clusterware home and Oracle Base directory on node "[0]"

**Cause:** Clusterware home or Oracle Base is not accessible or do not exist.

**Action:** Ensure that Oracle Base and Clusterware home exist and are accessible.

**PRVF-10018:** Clusterware home "[0]" is located under Oracle base directory "[1]"

**Cause:** The Clusterware home directory was found to be a subdirectory of the Oracle base directory.

**Action:** Choose a Clusterware home directory that is not a subdirectory of the Oracle base directory. After Clusterware installation the owner will be changed to root for all of the directories above Clusterware home.

**PRVF-10037:** Failed to retrieve storage type for "[0]" on node "[1]"

**Cause:** The storage location specified may be non-existent or invalid or the user running the check may not have permissions to access the specified storage.

**Action:** Specify a valid existing location, and ensure that the user running the check has valid read permissions to this location.

**PRVF-10038:** Could not find any OCR Locations

**Cause:** OCR Locations were not passed to the check.

**Action:** Pass Oracle locations to the check.

**PRVF-10105:** ASMLib is not installed on the nodes:

**Cause:** The ASMLib installation file /etc/init.d/oracleasm was not found or could not be accessed on one or more nodes.

**Action:** Ensure that the ASMLib is correctly installed on all the nodes, or is not installed on any node.

**PRVF-10106:** ASMLib is not installed on the node "[0]"

**Cause:** The ASMLib installation file /etc/init.d/oracleasm was not found or could not be accessed on the indicated node.

**Action:** Ensure that the ASMLib is correctly installed on the specified node, or is not installed on any node.

**PRVF-10107:** Failed to retrieve ASMLib information on the nodes:
Cause: The check for ASMLib installation was unable to retrieve the required information on one or more nodes.

Action: Ensure that the ASMLib is correctly installed on all the nodes and that the user has the necessary access privileges.

PRVF-10108: Failed to retrieve ASMLib information on the node "{0}"

Cause: The check for ASMLib installation was unable to retrieve the required information on the indicated node.

Action: Ensure that the ASMLib is correctly installed on all the nodes and that the user has the necessary access privileges.

PRVF-10109: ASMLib is not configured on the nodes:

Cause: ASMLib was found configured on some nodes, but not on the listed nodes.

Action: Ensure that the ASMLib is configured correctly and enabled on all the nodes, or is not configured on any node.

PRVF-10110: ASMLib is not configured on the node "{0}"

Cause: ASMLib was found configured on some nodes, but not on the indicated node.

Action: Ensure that the ASMLib is configured correctly and enabled on all the nodes, or is not configured on any node.

PRVF-10111: ASMLib does not identify the disks "{0}" on the nodes:

Cause: ASMLib could not list all the disks on one or more nodes.

Action: Ensure that the ASMLib is configured correctly to list all the created disks, To refresh the list of disks execute "/etc/init.d/oracleasm scandisks".

PRVF-10112: ASMLib does not identify the disks "{0}" on the node "{1}"

Cause: ASMLib could not list all the disks on the indicated node.

Action: Ensure that the ASMLib is configured correctly to list all the created disks, To refresh the list of disks execute "/etc/init.d/oracleasm scandisks".

PRVF-10208: Following error occurred during the VIP Subnet configuration check

Cause: An error occurred while performing the VIP Subnet check.

Action: Look at the accompanying messages for details on the cause of failure.

PRVF-10209: VIPs "{0}" are active before Clusterware installation

Cause: Node VIPs were found to be active on the network before Clusterware installation.

Action: If you are upgrading an older release of Clusterware this is not an error. In case of new installation, make sure that the IP addresses to be configured as VIPs are currently unused.

PRVF-10210: VIPs "{0}" are not active after Clusterware installation

Cause: Node VIPs were found to be not active on the network after Clusterware installation.

Action: Please run the command ‘srvctl start nodeapps’ to bring up VIPs

PRVF-10211: Failed lookup of IP address for host "{0}"

Cause: An error occurred while trying to get IP address of the node VIP name.

Action: Run ‘nslookup’ on the name and make sure the name is resolved or add the node VIP name into OS hosts file.
PRVF-10304: IPMI device driver does not exist on nodes {0}
   **Cause:** Open IPMI device driver is not installed on the nodes.
   **Action:** Install Open IPMI device drivers.

PRVF-10306: Error occurred while retrieving IP address of IPMI device on nodes {0}
   **Cause:** An internally-issued ‘crsctl get css ipmiaddr’ on the nodes failed.
   **Action:** Configure IPMI device over LAN and run command ‘crsctl set css ipmiaddr’ command on the nodes to set the IP address.

PRVF-10307: IPMI IP address {0} on node {1} is not reachable
   **Cause:** A timeout occurred while receiving IPMI ping response. Usually this results from having the wrong IP address.
   **Action:** Run ‘crsctl set css ipmiaddr’ command to set the correct IP address.

PRVF-10308: Login to node {0} BMC device using stored credentials failed
   **Cause:** An attempt to login to BMC on the node using username and password present in IPMI wallet failed.
   **Action:** Run ‘crsctl set css ipmiadmin’ command to set correct credentials.

PRVF-10405: Path "](0)" is not suitable for usage as RAC database software
   **Cause:** The specified path is not found suitable for usage as RAC database software
   **Action:** Ensure that you have selected a path that is suitable for the desired usage.

PRVF-10406: Path "](0)" is not suitable for usage as RAC database file
   **Cause:** The specified path is not found suitable for usage as RAC database file
   **Action:** Ensure that you have selected a path that is suitable for the desired usage.

PRVF-10407: Path "](0)" is not suitable for usage as Oracle Clusterware storage
   **Cause:** The specified path is not found suitable for usage as Oracle Clusterware storage(OCR or Voting Disk).
   **Action:** Ensure that you have selected a path that is suitable for the desired usage.

PRVF-10408: Path "](0)" is not suitable for usage as Single Instance database software
   **Cause:** The specified path is not found suitable for usage as Single Instance database software
   **Action:** Ensure that you have selected a path that is suitable for the desired usage.

PRVF-10409: Path "](0)" is not suitable for usage as Single Instance database file
   **Cause:** The specified path is not found suitable for usage as Single Instance database file
   **Action:** Ensure that you have selected a path that is suitable for the desired usage.
PRVP-01044: Error occurred while opening configuration file "[0]"

**Cause:** Configuration file could not be opened. It either does not exist or you are not allowed read access.

**Action:** Provide a usable configuration file.
PRCW-01001: Could not allocate new memory
  Cause: Could not allocation any new memory.
  Action: Retry after make more memory available.

PRCW-01002: Network Security error code [0]
  Cause: Failed to perform the network security operation.
  Action: Look at the network security error for the appropriate action.

PRCW-01003: Failed to do the cluster wallet operation [0]
  Cause: Failed to perform the cluster wallet operation.
  Action: Look at the cluster wallet error for the appropriate action.

PRCW-01004: Could not open the wallet [0] due to error [1]: [2]
  Cause: Failed to open the cluster wallet.
  Action: Look at the cluster wallet error for the appropriate action.

PRCW-01005: Wallet [1] did not exist due to error code [1]
  Cause: The cluster wallet did not exist.
  Action: Need to create the cluster wallet.

  Cause: The alias within the cluster wallet did not exist.
  Action: Need to create the alias within the cluster wallet.

PRCW-01007:Alias [0] in Wallet [1] could not be read due to error [2]
  Cause: Could not read the alias within the cluster wallet.
  Action: Look at the network security error for the appropriate action.

  Cause: Could not write the secret of the alias to the cluster wallet.
  Action: Look at the network security error for the appropriate action.

PRCW-01009: Wallet [0] could not be saved due to error code [1]
  Cause: Could not save the cluster wallet.
  Action: Look at the cluster wallet error for the appropriate action.

PRCW-01010: Wallet [0] could not be created due to error [1]: [2]
  Cause: Could not create the cluster wallet.
Action: Look at the cluster wallet error for the appropriate action.

PRCW-01011: Wallet \{0\} could not be accessed due to error code \{1\}
Cause: Could not access the cluster wallet.
Action: Use the correct cluster wallet password.

PRCW-01012: Wallet \{0\} could not be deleted due to error code \{1\}
Cause: Could not delete the cluster wallet.
Action: Look at the cluster wallet error for the appropriate action.

PRCW-01013: Failed to initialize cluster wallet context due to error code \{0\}
Cause: Could not initialize the cluster wallet context.
Action: Look at the cluster wallet error for the appropriate action.

PRCW-01014: Failed to terminate cluster wallet context due to error code \{0\}
Cause: Could not terminate the cluster wallet context.
Action: Look at the cluster wallet error for the appropriate action.
PRCA-01000: ASM Disk Group {0} does not exist  
**Cause:** An attempt failed to retrieve an ASM disk group that was not configured.  
**Action:** Create the diskgroup using sqlplus if the specified diskgroup does not exist. Mount the diskgroup in ASM which registers the diskgroup with CRS.

PRCA-01001: ASM Disk Group resource does not exist  
**Cause:** There was no disk group resource registered with CRS.  
**Action:** Create the diskgroup using sqlplus and mount the diskgroup in ASM which registers the diskgroup with CRS.

PRCA-01002: Failed to remove CRS resource {0} for ASM Disk Group {1}  
**Cause:** An attempt to remove the CRS resource for the specified ASM Disk Group failed.  
**Action:** Examine the accompanying error messages for details.

PRCA-01003: Failed to create ASM {0} resource {1}  
**Cause:** An attempt to add the CRS resource for ASM failed.  
**Action:** Ensure that the CRS stack is running, the user running srvctl add asm is also the owner of the CRS home, and examine the accompanying error message for details.

PRCA-01005: Failed to retrieve server parameter file of ASM {0}  
**Cause:** Cannot retrieve ASM server parameter file.  
**Action:** Retry the request after ensuring that the CRS stack is running, the ASM resource has been configured, and the user has read permission on the ASM resource.

PRCA-01006: Failed to update server parameter file {0} of ASM {1}  
**Cause:** Unable to update the ASM server parameter file.  
**Action:** Retry the request after ensuring that the CRS stack is running, the ASM resource has been configured, and the user has update permission on the ASM resource.

PRCA-01007: ASM {0} is not using initialization parameters: {1}  
**Cause:** The specified ASM instance does not use the initialization parameters shown.  
**Action:** Examine the accompanying error messages for details.

PRCA-01016: Failed to remove ASM resource {0} for ASM instance {1}
Cause: An attempt to remove the specified ASM configuration failed.
Action: Examine the accompanying error message for details.

PRCA-01017: ASM {0} does not exist
Cause: ASM is not configured yet.
Action: Configure ASM and then retry.

PRCA-01018: Failed to retrieve ASM instance list for ASM {0}
Cause: Failed to retrieve the list of ASM instances.
Action: Make sure that the crs stack is up and the ASM resource has been configured.

PRCA-01019: ASM {0} is not running
Cause: The ASM resource does not have any running instances.
Action: Use 'srvctl start asm' command to start the asm resource.

PRCA-01020: Unable to create ACFS file system resource {0} for the volume device {1}
Cause: The ACFS file system resource for the specified volume device path could not be created. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc) 4) Was unable to identify the mount point that the user requested the resource to use.
Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. (srvctl status asm) 3) Verify that the user is running with administrative access. 4) Verify that the mount point given to the create resource command exists.

PRCA-01021: Unable to retrieve ACFS file system for the volume device {0}
Cause: The ACFS file system resource for the specified volume device path could not be retrieved. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc) 4) Was unable to identify the mount point that the user requested the resource to use.
Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. (srvctl status asm) 3) Verify that the user is running with administrative access. 4) Verify that the mount point given to the create resource command exists.

PRCA-01022: ACFS file system resource already exists for disk group {0} and volume {1}
Cause: The ACFS file system resource had already been created for the specified disk group and volume names.
Action: 1) Supply a different volume device path to srvctl add filesystem to create a different ACFS file system resource. -or- 2) Delete the previous resource ('srvctl remove filesystem -d <volume device>') and re-run the command.

PRCA-01023: Unable to add ACFS file system resource {0} for disk group {1} and volume {2}
Cause: The ACFS file system resource for the specified volume device path could not be added. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access.
access. (root, Administrator, etc) 4) Was unable to identify the mount point that the user requested the resource to use.

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access. 4) Verify that the mount point given to the create resource command exists.

PRCA-01024: Unable to retrieve the volume for disk group {0} and volume {1}

Cause: The ACFS file system resource for the specified volume device path was unable to be retrieved. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc)

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access.

PRCA-01025: Unable to retrieve the mountpoint path for disk group {0} and volume {1}

Cause: The ACFS file system resource for the specified volume device path was unable to be retrieved. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc)

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access.

PRCA-01026: Unable to set the user of the ACFS file system for disk group {0} and volume {1}

Cause: The user of the ACFS file system resource for the specified disk group and volume was unable to be modified. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc)

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access.

PRCA-01027: Failed to remove ACFS file system configuration for disk group {0} and volume {1}

Cause: Cannot remove the ACFS file system configuration for the specified disk group and volume.

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access.

PRCA-01028: Failed to retrieve listener associated with ASM {0}

Cause: Failed to retrieve listener associated with ASM.

Action: Ensure that user has read permissions on ASM resource and then retry. Also, ensure that listener specified in ASM resource's start dependencies exists.

PRCA-01029: Failed to associate listener {0} with ASM {1}

Cause: Failed to associate given listener with ASM.

Action: Ensure that user has update permissions on ASM resource and then retry.
PRCA-01030: Failed to retrieve the diskgroup associated with the volume device {0}

**Cause:** Unable to retrieve the diskgroup associated with the given volume device using "asmcmd volinfo -g <volume_name>" command.

**Action:** Make sure that the asm instance is running; the asmcmd utility exists and the underlying ofs devices are accessible.

PRCA-01031: Unable to retrieve the diskgroup {0} associated with the volume device {1}

**Cause:** The ACFS file system resource for the specified volume device path was unable to be retrieved. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc) 4) Disk group is not mounted.

**Action:** 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access. 4) Verify that the disk group is mounted.

PRCA-01032: ASM listener {0} does not exist

**Cause:** ASM listener is not registered with Oracle Clusterware.

**Action:** Run 'srvctl add listener -l <lsnr_name>' command with <lsnr_name> as in above error message, or if there is another listener registered with Oracle clusterware, then try 'srvctl modify asm -l <lsnr_name>'

PRCA-01033: ACFS file system resource does not exist for volume device {0}

**Cause:** The ACFS file system resource with the specified volume device was not registered with the Oracle Clusterware.

**Action:** Use 'srvctl add filesystem' command to create an ACFS file system resource.

PRCA-01034: ACFS file system resource does not exist in Oracle Clusterware

**Cause:** No ACFS file system resource was registered with the Oracle clusterware.

**Action:** Use 'srvctl add filesystem' command to create an ACFS file system resource.

PRCA-01035: Unable to determine the databases that use the disk group {0}

**Cause:** Unable to retrieve databases that have dependencies on the disk group.

**Action:** Make sure that the crs stack is up; the user has read permissions on database CRS resources and then retry.

PRCA-01036: An Oracle Restart environment-specific API was invoked in an Oracle Clusterware environment.

**Cause:** Internal error.

**Action:** Contact Oracle Support Services.

PRCA-01037: Failed to retrieve the diskgroup discovery string of ASM {0}

**Cause:** An attempt to retrieve the diskgroup discovery string for ASM failed.

**Action:** Retry the request after ensuring that the CRS stack is running, the ASM resource has been configured, and the user has read permission on ASM resource.

PRCA-01038: Failed to update the diskgroup discovery string {0} of ASM {1}

**Cause:** An attempt to update the diskgroup discovery string for ASM failed.
**Action:** Retry the request after ensuring that the CRS stack is running, the ASM resource has been configured, and the user has update permission on ASM resource.

**PRCA-01039: Volume device {0} does not exist**

**Cause:** The supplied volume device does not exist.

**Action:** Use asmca to create the volume device and then run ‘srvctl add filesystem’ command again.

**PRCA-01040: Failed to check the existence of volume device {0}**

**Cause:** Failed to execute acfsutil command to check for the existence of the supplied volume device.

**Action:** Review the underlying error messages that provide the details of why acfsutil execution failed. Resolve the reported problem and retry the command.

**PRCA-01041: Failed to validate disk group {0} of volume device {1}**

**Cause:** Failed to execute acfsutil command to validate the disk group of the volume device.

**Action:** Review the underlying error messages that provide the details of why acfsutil execution failed. Resolve the reported problem and retry ‘srvctl add filesystem’ command.

**PRCA-01042: Diskgroup {0} is not valid for volume device {1}**

**Cause:** The supplied diskgroup does not match the underlying diskgroup created for the supplied volume device.

**Action:** Execute ‘srvctl add filesystem’ command with the correct disk group value.

**PRCA-01043: Failed to validate volume {0} of volume device {1}**

**Cause:** Failed to execute acfsutil command to validate the volume of the volume device.

**Action:** Review the underlying error messages that provide the details of why acfsutil execution failed. Resolve the reported problem and retry ‘srvctl add filesystem’ command.

**PRCA-01044: Volume {0} is not valid for volume device {1}**

**Cause:** The supplied volume does not match the underlying volume created for the supplied volume device.

**Action:** Execute ‘srvctl add filesystem’ command with the correct volume value.

**PRCA-01045: ACFS is not supported. Details: {0}**

**Cause:** ACFS is not supported. See the underlying message for further details.

**Action:** Run srvctl filesystem command on a supported platform.

**PRCA-01046: File system for volume device {0} exists in the ACFS registry**

**Cause:** File system for the specified volume device was registered in the ACFS registry. File system can either be in the ACFS registry or registered as a CRS resource, but not both.

**Action:** Either run ‘acfsutil registry -d’ to delete the volume device from the ACFS registry or run ‘srvctl add filesystem’ with a different volume device.
PRCC-01000: Parameter {0} value is not valid
   Cause: This is an internal error. The value for the specified parameter is null or empty string.
   Action: Contact Oracle Support Services.

PRCC-01001: Failed to retrieve install group: {0}
   Cause: An attempt to retrieve the install group failed.
   Action: Examine the accompanying error messages for details.

PRCC-01002: Failed to update install group: {0}
   Cause: An attempt to set the install group failed.
   Action: Examine the accompanying error messages for details.

PRCC-01003: Version for module {0} is not available
   Cause: An attempt to retrieve the version information for specified module failed.
   Action: Examine the accompanying error messages for details.

PRCC-01004: Unknown identifier {0} specified for checking result of operation
   Cause: Failed to retrieve the result from the exception data using the specified identifier because the exception did not have the specified identifier.
   Action: This is an internal error. Contact Oracle Support Services.

PRCC-01005: Parameter {0} is not an absolute path
   Cause: The specified parameter is not an absolute directory path.
   Action: Provide an absolute directory path.

PRCC-01006: Path {0} is not a directory
   Cause: The specified path is not a directory.
   Action: Provide a directory path.

PRCC-01007: Path {0} does not exist
   Cause: The specified path did not exist.
   Action: Provide an existing directory path.

PRCC-01008: Enumerated type {0} does not have a member with corresponding value of {1}
   Cause: This is an internal error.
   Action: Contact Oracle Support Services.
PRCC-01009: Parameter {0} cannot have null as a value
  Cause: This is an internal error.
  Action: Contact Oracle Support Services.

PRCC-01010: {0} was already enabled
  Cause: Given entity was already enabled.
  Action: No action needed. To re-enable the entity, first disable it and then retry.

PRCC-01011: {0} was already enabled on {1}
  Cause: Given entity was already enabled on given nodes.
  Action: No action needed. To re-enable the entity on given nodes, first disable it on these nodes and then retry.

PRCC-01012: {0} was already disabled
  Cause: Given entity was already disabled.
  Action: No action needed. To re-disable the entity, first enable it and then retry.

PRCC-01013: {0} was already disabled on {1}
  Cause: Given entity was already disabled on given nodes.
  Action: No action needed.

PRCC-01014: {0} was already running
  Cause: Given entity is already running.
  Action: No action needed. To re-start the entity, first stop it and then retry.

PRCC-01015: {0} was already running on {1}
  Cause: Given entity was already running on given nodes.
  Action: No action needed. To re-start the entity on given nodes, first stop it on these nodes and then retry.

PRCC-01016: {0} was already stopped
  Cause: Given entity was already stopped.
  Action: No action needed. To re-stop the entity, first start it and then retry.

PRCC-01017: {0} was already stopped on {1}
  Cause: Given entity was already stopped on given nodes.
  Action: No action needed. To re-stop the entity on given nodes, first start it on these nodes and then retry.

PRCC-01018: A request to retrieve private network addresses for node {0} found no addresses
  Cause: A request to retrieve private network addresses by executing 'olsnodes -p' returned no private IP addresses.
  Action: Check 'oifcfg getif' for cluster_interconnect networks and ensure this node has an IP address on the cluster_interconnect networks.

PRCC-01019: Parameter "[0]" value is not valid
  Cause: This is an internal error.
  Action: Contact Oracle Support Services.

PRCC-01020: Version {0} cannot be used to administer resource configuration of version {1} or later
Cause: This is an internal error.
Action: Contact Oracle Support Services.
PRCD-01000: Database {0} already exists
   Cause: The specified database resource was already registered in Oracle Clusterware.
   Action: No action is needed.

PRCD-01001: Database {0} does not exist
   Cause: The specified database resource was not registered in Oracle Clusterware.
   Action: Register the database resource using 'srvctl add database'.

PRCD-01002: Database {0} is dependent upon server pool {1}
   Cause: An attempt to remove the specified server pool failed because the server pool is in use.
   Action: Remove the specified database before removing the server pool.

PRCD-01003: Service {0} already exists
   Cause: The specified service was already created and registered in Oracle Clusterware.
   Action: No action is needed.

PRCD-01004: Service {0} is dependent upon server pool {1}
   Cause: An attempt to remove the specified server pool failed because the server pool is in use.
   Action: Remove the specified service before removing the server pool.

PRCD-01005: Server pool {0} for the database {1} does not exist
   Cause: The specified server pool used by the database was removed by force.
   Action: Create the server pool using 'srvctl add srvpool'.

PRCD-01007: Failed to retrieve the database name
   Cause: Failed in retrieving the DB_NAME resource attribute.
   Action: Review the accompanying error messages for details about the failure. Retry after resolving those issues.

PRCD-01008: Server parameter file does not exist for database {0}
   Cause: Failed in retrieving the SPFILE resource attribute.
   Action: Review the accompanying error messages for details about the failure. Retry after resolving those issues.

PRCD-01009: Failed to retrieve server parameter file of database {0}
**Cause:** Cannot retrieve the server parameter file for the specified database.

**Action:** Retry the request after ensuring that the CRS stack is running, the database resource has been configured, and the user has read permission on the database resource.

PRCD-01010: Failed to update server parameter file [0] of database [1]

**Cause:** Unable to update the server parameter file for the specified database.

**Action:** Retry the request after ensuring that the CRS stack is running, the database resource has been configured, and the user has update permission on the database resource.

PRCD-01011: Failed to identify whether this database [0] is a multi-instance database

**Cause:** Failed in retrieving the CLUSTER_DATABASE resource attribute.

**Action:** Examine the accompanying error messages for details.

PRCD-01012: Failed to retrieve disk group list for database [0].

**Cause:** Failed to retrieve the diskgroups from the start dependencies of the specified database.

**Action:** Examine the accompanying error messages for details. Create the diskgroup using sqlplus if the specified diskgroup does not exist. Mount the diskgroup in database which registers the diskgroup with Oracle Clusterware.

PRCD-01014: Failed to retrieve database domain of database [0]

**Cause:** Failed to get the domain of the specified database from its USR_ORA_DOMAIN attribute.

**Action:** Examine the accompanying error messages for details.

PRCD-01015: Combination of service cardinality [0] and TAF [1] is not allowed for service [2]

**Cause:** The specified service cardinality cannot be used with the specified TAF policy.

**Action:** Change the cardinality or find a matching TAF policy. PRECONNECT can only be used with SINGLETON cardinality.

PRCD-01016: Failure encountered while accessing server pool [0] for database [1]

**Cause:** An attempt to look up the server pools referenced by the database SERVER_POOLS attribute failed.

**Action:** Examine the accompanying error messages for details.

PRCD-01019: Failed to retrieve Oracle home of database [0]

**Cause:** An attempt to retrieve the TAF_POLICY attribute of the specified database failed.

**Action:** Examine the accompanying error messages for details.

PRCD-01020: Failed to retrieve TAF policy for service [0]

**Cause:** An attempt to retrieve the ORACLE_HOME attribute of the specified database failed.

**Action:** Examine the accompanying error messages for details.

PRCD-01021: Failed to update TAF policy [0] for service [1]
Cause: An attempt to set the TAF_POLICY attribute of the specified database failed.
Action: Examine the accompanying error messages for details.

PRCD-01022: Cannot add a second instance to a single instance database
Cause: Unable to add an instance to a single instance database.
Action: Multiple instances are not supported for a single instance database. Convert to a RAC database if multiple instances are desired.

PRCD-01023: An instance has already been added to node {0} for database {1}
Cause: Unable to add an instance to the database on the specified node because another instance has already been added to the node.
Action: Use 'srvctl modify instance' command to change the instance name on the specified node.

PRCD-01024: Failed to retrieve instance list for database {0}
Cause: An attempt to get the list of the instances for the specified database failed.
Action: Examine the accompanying error messages for details.

PRCD-01025: Failed to create database {0}
Cause: An attempt to create Clusterware resources for the specified database failed. Either the request was issued by the wrong OS userid or a problem was detected inside Oracle Clusterware.
Action: Examine the accompanying error messages for details. Login in as the user of the Oracle Home to issue the command 'srvctl add database'.

PRCD-01026: Failed to create service {0} for database {1}
Cause: An attempt to create the specified service failed because the command 'srvctl add service' was not issued by the Oracle Home owner.
Action: Examine the accompanying error messages for details. Login in as the user of the Oracle Home to issue the command 'srvctl add service'.

PRCD-01027: Failed to retrieve database {0}
Cause: An attempt to get the specified database failed.
Action: Examine the accompanying error messages for details.

PRCD-01028: Failed to retrieve service resource {0} for database {1}
Cause: An attempt to get the specified service failed.
Action: Examine the accompanying error messages for details.

PRCD-01029: Disk group {0} for database {1} does not exist
Cause: The disk group for the specified database does not exist.
Action: Use 'srvctl add diskgroup' to add the specified disk group.

PRCD-01030: Failed to determine whether the database {0} has cardinality
Cause: Failed to determine whether the specified database is cardinality based or not based on its VERSION attribute.
Action: Examine the accompanying error messages for details.

PRCD-01031: Failed to determine whether the service {0} has cardinality
Cause: Failed to check whether the specified service is cardinality based or not.
Action: Examine the accompanying error messages for details.
PRCD-01032: Failed to remove database resource [0]
  Cause: Failed to remove the specified database.
  Action: Examine the accompanying error messages for details.

PRCD-01033: The server pool of service [0] is different from the server pool of database [1]
  Cause: The specified server pool is not the child of the database's server pool.
  Action: Use a server pool which is the child of the database's server pool.

PRCD-01034: Database [0] is not a single instance database. It is a cluster database
  Cause: The specified database is not a single instance database.
  Action: Provide database name for a single instance database.

PRCD-01035: Database [0] is not a cluster database
  Cause: The specified database is not a cluster database.
  Action: Provide database name for a RAC database.

PRCD-01036: Failed to set Oracle home [0] for database [1]
  Cause: An attempt to update Oracle home for the specified database failed.
  Action: Examine the accompanying error messages for details.

  Cause: An attempt to update Oracle home for the specified database on the specified node failed.
  Action: Examine the accompanying error messages for details.

PRCD-01038: Cannot create a RAC database [0] in a non cluster environment
  Cause: Failed to create the specified RAC database because Oracle Clusterware is not installed and configured.
  Action: Install and configure Oracle Clusterware before creating the RAC database.

PRCD-01039: Failed to retrieve database for service [0]
  Cause: An attempt to get the database that the specified service depended on failed. This is an internal error.
  Action: Contact Oracle Support Services.

  Cause: Server pool is hosting administrator-managed databases and service.
  Action: Specify a server pool that is not hosting an administrator-managed database and service.

PRCD-01041: The administrator-managed database [0] can have only one server pool [1]
  Cause: Multiple server pools cannot be configured for an administrator-managed database
  Action: Contact Oracle Support.

PRCD-01042: The database [1] is administrator-managed and a policy-managed service [0] cannot be created on it.
  Cause: The specified database does not support policy-managed services.
Action: Provide a database which supports policy-managed services.

PRCD-01043: The service [0] is not a uniform or a singleton service and therefore it cannot be created as policy-managed service. This service can only be created as administrator-managed service using preferred, and optionally available instance lists.

Cause: The service to be created was an administrator-managed service and the database that the service depended on was a policy-managed database.

Action: Use preferred and available instance lists to create an administrator-managed service for an administrator-managed database.

PRCD-01044: Failed to retrieve the list of nodes where instances have been configured for database [0]

Cause: An attempt failed to get the list of nodes where the instances of the specified database were configured.

Action: Examine the accompanying error messages for details.

PRCD-01045: Database [0] is policy managed and does not support add instance option

Cause: The specified database does not support add instance option

Action: 1) Provide an administrator-managed database. -or- 2) For policy-managed database, add a server to a server pool which manages the database using 'srvctl modify srvpool' or 'srvctl relocate server'.

PRCD-01046: Database [0] is policy managed and does not support the remove instance option

Cause: The specified database does not support the remove instance option.

Action: 1) Provide an administrator-managed database. -or- 2) For policy-managed database, stop the database on a server and then remove that server from the server pool which manages the database using 'srvctl modify srvpool' or 'srvctl relocate server'.

PRCD-01047: Failed to retrieve list of services for database [0]

Cause: An attempt to get the list of services for the specified database failed.

Action: Examine the accompanying error messages for details.

PRCD-01048: Cannot remove instance from the single instance database [0]

Cause: An attempt to remove the instance from the single instance database failed.

Action: Remove the database using 'srvctl remove database'.

PRCD-01049: Failed to update server pool [0] for database [1]

Cause: An attempt to update the specified server pool failed.

Action: Examine the accompanying error messages for details.

PRCD-01050: Failed to update auto start value of service [0]

Cause: An attempt to update the auto start value for the specified service failed.

Action: Examine the accompanying error messages for details.

PRCD-01051: Failed to add instance to database [0]

Cause: An attempt to add an instance to the specified database failed because the node of the instance is not a node of the cluster or other errors.
Action: Examine the accompanying error messages for details.

PRCD-01052: Failed to remove instance from database {0}
  Cause: An attempt to remove the specified instance failed because the services depended on the instance or other errors.
  Action: Examine the accompanying error messages for details.

PRCD-01053: Failed to retrieve the database instances providing service {0}
  Cause: An attempt to get the database instances that provide the specified service failed.
  Action: Examine the accompanying error messages for details.

PRCD-01054: Database name is null
  Cause: The database name given by the user is null.
  Action: Provide a valid database name that is not a null string.

PRCD-01055: Instance name is null
  Cause: The instance name given by the user is null.
  Action: Provide a valid instance name that is not a null string.

PRCD-01056: Database name {0} contains invalid characters
  Cause: The supplied database name contains invalid characters.
  Action: Supply a valid database name. The valid character set for database name is [a-zA-Z0-9$#_].

PRCD-01057: Instance name {0} is not valid
  Cause: The supplied instance name is not of the correct format.
  Action: Supply a valid instance name. The valid character set for instance name is [a-zA-Z0-9_].

PRCD-01058: Invalid server pool list {0} supplied for single instance database {1}
  Cause: The server pool size was not one when creating a single instance database on a cluster.
  Action: Use one server pool with only one server when creating the single instance database.

PRCD-01060: Server pool has not been supplied for creating cluster service {0} for database {1}
  Cause: No server pool argument has been supplied when configuring a cluster database.
  Action: Supply an existing server pool when configuring a cluster database.

PRCD-01061: No database exists
  Cause: No database has been configured.
  Action: Configured database and retry.

PRCD-01062: Invalid service cardinality {0}
  Cause: The service cardinality supplied is not valid.
  Action: Supply a valid service cardinality.

PRCD-01063: Invalid service taf policy {0}
  Cause: The service taf policy supplied is not valid.
Action: Supply a valid service taf policy.

PRCD-01064: Invalid database role {0}
Cause: The database role supplied is not valid.
Action: Supply a valid database role.

PRCD-01065: Invalid management policy {0}
Cause: The management policy supplied is not valid.
Action: Supply a valid management policy. The management policy should be automatic or manual.

PRCD-01066: Invalid start option {0}
Cause: The start option supplied is not valid.
Action: Supply a valid start option.

PRCD-01067: Invalid stop option {0}
Cause: The stop option supplied is not valid.
Action: Supply a valid stop option.

PRCD-01068: Failed to modify instance {0} on node {1} for database {2}
Cause: The instance for the specified node does not exist on the database.
Action: Use srvctl add instance to add the per-X instance.

PRCD-01069: Failed to modify instance {0} on node {1} for database {2}
Cause: The instance for the specified node cannot be updated.
Action: Make sure that the crs stack is up and running; the oracle user has the permission to modify the instance; and then retry.

PRCD-01070: Failed to retrieve startup options for database {0}
Cause: Unable to retrieve the startup options for the database.
Action: Make sure that the crs stack is up and running and then retry.

PRCD-01071: Failed to update startup options for database {0}
Cause: Unable to update the startup options for the database.
Action: Make sure that the crs stack is up and running and then retry.

PRCD-01072: Failed to retrieve stop options for database {0}
Cause: Unable to retrieve the stop options for the database.
Action: Make sure that the crs stack is up and running and then retry.

PRCD-01073: Failed to update stop options for database {0}
Cause: Unable to update the stop options for the database.
Action: Make sure that the crs stack is up and running and then retry.

PRCD-01074: Failed to retrieve the database role for database {0}
Cause: Unable to retrieve the database role for the database.
Action: Make sure that the crs stack is up and running and then retry.

PRCD-01075: Failed to set the database role {1} for database {0}
Cause: Unable to update the database role for the database.
Action: Make sure that the crs stack is up and running and then retry.
PRCD-01076: Failed to retrieve the management policy for database {0}
   Cause: Unable to retrieve the management policy for the database.
   Action: Make sure that the crs stack is up and running and then retry.

PRCD-01077: Failed to update the management policy for database {0}
   Cause: Unable to update the management policy for the database.
   Action: Make sure that the crs stack is up and running and then retry.

PRCD-01078: Failed to update the db name {0} of database {1}
   Cause: Unable to update the db name for the database.
   Action: Make sure that the crs stack is up and running and then retry.

PRCD-01079: Failed to update pullup for service {0}: {1}
   Cause: Failed to update pullup modifier for the service.
   Action: Make sure that the crs stack is up and running and then retry.

PRCD-01080: Failed to get attributes for service {0}
   Cause: Failed to get attributes for the service.
   Action: Make sure that the crs stack is up and running and then retry.

PRCD-01081: Failed to set attributes for service {0}
   Cause: Failed to set attributes for the service.
   Action: Make sure that the crs stack is up and running and then retry.

PRCD-01082: Failed to modify service {0}: Unsupported attribute {1}
   Cause: Operation doesn’t support modification of attribute.
   Action: Fix your application.

PRCD-01083: Failed to modify service {0}
   Cause: Failed to modify service.
   Action: Make sure that the crs stack is up and running and then retry.

PRCD-01084: Failed to start service {0}
   Cause: Failed to start the service.
   Action: Make sure that the crs stack is up and running and then retry.

PRCD-01085: Failed to stop service {0}
   Cause: Failed to stop the service.
   Action: Make sure that the crs stack is up, the service is running and then retry.

PRCD-01086: Invalid rlb goal {0}
   Cause: The rlb goal supplied is not valid.
   Action: Supply a valid rlb goal.

PRCD-01087: Invalid failover type {0}
   Cause: The failover type supplied is not valid.
   Action: Supply a valid failover type.

PRCD-01088: Invalid connection load balancing goal {0}
   Cause: The clb goal supplied is not valid.
   Action: Supply a valid clb goal.
PRCD-01089: Invalid failover method [0]
   **Cause:** The failover method supplied is not valid.
   **Action:** Supply a valid failover method.

PRCD-01090: Failed to retrieve Oracle home of database [0] on node [1]
   **Cause:** No Oracle home of the database has been set on the specified node.
   **Action:** Set the Oracle home of the database on the specified node.

PRCD-01091: Failed to create database instance [0] for database [1]
   **Cause:** Unable to create database instance for the specified instance name.
   **Action:** Make sure that the local node can be used for creating a database instance; the instance name provided is valid. The valid character set for instance name is [a-zA-Z0-9-_].

   **Cause:** Unable to create database instance for the specified instance name and node name.
   **Action:** Make sure that the specified node can be used to create a database; the instance name provided is valid. The valid character set for instance name is [a-zA-Z0-9-_].

PRCD-01093: Failed to update the domain [0] of database [1]
   **Cause:** Unable to update the domain for the database.
   **Action:** Make sure that the crs stack is up and running and then retry.

PRCD-01094: Failed to create start dependency for database [0] on the ASM cluster filesystem where ACFS path [1] resides
   **Cause:** Unable to modify the database resource to include a start dependency on the ASM cluster filesystem for the ACFS path.
   **Action:** Make sure that the ASM instance is running, the OFS driver exists in the driver directory, and the underlying ofs devices are accessible.

PRCD-01095: Failed to retrieve databases for version 11.1 and earlier
   **Cause:** Unable to read OCR configuration to get databases for version 11.1 and earlier.
   **Action:** Make sure that the Oracle clusterware is up and running and the primary group of the user running srvctl is the same as the primary group of the user who installed the Oracle clusterware home. Also, run 11.1 srvctl config to verify that the database configuration exists in OCR.

PRCD-01096: Failed to retrieve the database unique name
   **Cause:** Unable to read the attribute value for database unique name.
   **Action:** Make sure that the Oracle clusterware is up and running and then retry.

PRCD-01097: Failed to retrieve the active servers of server pool [0] for database [1]
   **Cause:** Unable to read the active servers attribute value for the database underlying server pools.
   **Action:** Make sure that the Oracle clusterware is up and running; the database underlying server pools exist; the user has the permission to access the database underlying server pools and then retry.
PRCD-01098: Failed to retrieve the configured servers of server pool {0} for database {1}

Cause: Unable to read the servers attribute value for the database underlying server pool.

Action: Make sure that the Oracle clusterware is up and running; the database underlying server pool exists and then retry.

PRCD-01099: {0} enum member has a constant value that cannot be changed to given value {1}

Cause: An attempt was made to change value of read-only valued enum member.

Action: Contact Oracle Support Services.

PRCD-01100: Invalid relocate option {0}

Cause: Supplied relocate option is unknown.

Action: Contact Oracle Support Services.

PRCD-01101: Failed to remove running instance {0} for database {1}

Cause: Unable to remove the instance configuration for the database because the instance was still running.

Action: Stop the running instance using srvctl stop instance command and then retry.

PRCD-01102: Failed to create preconnect service for service {0}

Cause: An attempt to register service failed due to failure to register its corresponding preconnect service.

Action: Contact Oracle Support Services.

PRCD-01103: Failed to retrieve the maximum cardinality for database {0}

Cause: Unable to query the number of servers in the server pool used to manage the database.

Action: Make sure that the Oracle clusterware is up and running; the database underlying server pool exists and then retry.

PRCD-01104: A source server must be specified to relocate cluster database {0}

Cause: Cluster database cannot be relocated without specifying source server to relocate instance from.

Action: Supply source and target servers for database relocation.

PRCD-01105: A source server must be specified to relocate service {0}

Cause: Cluster database service cannot be relocated without specifying source server to relocate service member from.

Action: Supply source and target servers for service relocation.

PRCD-01106: Failed remove service {0}: could not get data for its underlying server pool

Cause: Server pool data is not found.

Action: Make sure that the Oracle clusterware is up and running; the service underlying server pool exists.

PRCD-01107: Removed service {0} but failed to remove its underlying server pool {1}

Cause: Failed to remove the server pool.
**Action:** Make sure that the Oracle clusterware is running and remove the server pool manually.

PRCD-01108: Failed to identify whether database {0} is an administrator-managed database

**Cause:** Failed to get database attributes.

**Action:** Make sure that the Oracle clusterware is up and running; the database exists.

PRCD-01109: Failed to find administrator-managed service {0} of database {1} because the database is a policy-managed database.

**Cause:** The database does not support administrator-managed services.

**Action:** Provide an administrator-managed database and make sure that the service exists within that database.

PRCD-01110: Database {0} does not have instances {1}

**Cause:** The database does not have instances mentioned in the message.

**Action:** Make sure that database name is correct and the database has requested instances.

PRCD-01111: The type of service cardinality for this operation should be {1}, not {0}

**Cause:** This is an internal error.

**Action:** Contact Oracle Support Services.

PRCD-01112: Failed to get preferred instances of service {0}

**Cause:** The service does not exist or the Oracle clusterware is down.

**Action:** Make sure that the Oracle clusterware is up and running and the service exists.

PRCD-01113: Failed to modify service {0}

**Cause:** The service does not exist or the Oracle clusterware is down.

**Action:** Make sure that the Oracle clusterware is up and running and the service exists.

PRCD-01114: Failed to enable service {0} on one or more instances

**Cause:** The service does not exist or enabled on all database instances. The Oracle clusterware is down.

**Action:** make sure that the Oracle clusterware is up and running; the service exists and disabled on at least one database instance.

PRCD-01115: Failed to disable service {0} on one or more instances

**Cause:** The service does not exist or disabled on all database instances. The Oracle clusterware is down.

**Action:** Make sure that the Oracle clusterware is up and running; the service exists and enabled on at least one database instance.

PRCD-01116: Failed to get available instances of service {0}

**Cause:** The service does not exist or the Oracle clusterware is down.

**Action:** Make sure that the Oracle clusterware is up and running and the service exists.
PRCD-01117: Failed to modify service {0}, the service should have at least one preferred instance

**Cause:** An attempt was made to remove all preferred instances of the service.

**Action:** Make sure that there is at least one instance provided in the service preferred instance list.

PRCD-01118: Failed to set service {0} to {1} because it runs on more than one node

**Cause:** The service was running on more than one node.

**Action:** Make sure that the service is not running or running on one node only.

PRCD-01119: Failed to create database {0} because the database unique name matches that of database {1} in the first 8 characters

**Cause:** The database unique name is not unique in the first 8 characters. It is a requirement because the name is used to generate ORACLE_SID.

**Action:** Ensure that the name supplied to either DBCA or srvctl during database creation is sufficiently unique, and retry the command.

PRCD-01120: The resource for database {0} could not be found.

**Cause:** The resource for the specified database name could not be found. Either the database name was misspelled or the database has not been created.

**Action:** Correct the database name spelling or use the 'srvctl add database' command to create the database configuration.

PRCD-01121: Specified server pool {0} for {1} is already hosting an administrator-managed configuration for database(s) {2}

**Cause:** Server pool is hosting administrator-managed databases.

**Action:** Specify a server pool that is not hosting an administrator-managed database.

PRCD-01122: Specified server pool {0} for {1} is already hosting an administrator-managed configuration for service(s) {2}

**Cause:** Server pool is hosting administrator-managed services.

**Action:** Specify a server pool that is not hosting an administrator-managed service.

PRCD-01123: Oracle Clusterware resource does not exist for ACFS filesystem of volume device {0}. A resource is required for the filesystem containing ACFS path {1}

**Cause:** The resource for the filesystem did not exist for the database which has its dependency on the ACFS path. A resource is required for path used by the database on ACFS filesystems so that Oracle Clusterware can track the database’s dependency on the filesystem. Database’s dependent ACFS paths cannot be mounted via the ACFS registry.

**Action:** Add the resource with 'srvctl add filesystem'.

PRCD-01124: Failed to stop database {0} and its services

**Cause:** Attempt to stop the database has failed.

**Action:** Ensure that user attempting to stop the database has execute privileges on the database resource. Also, review the accompanying error messages for details about failure to stop database. Retry after resolving those issues or contact Oracle Support Services.
PRCD-01125: Failed to create dependency from database {0} to its Oracle home {1} that is located on the ASM cluster filesystem
  
  **Cause:** An attempt to modify the database resource to include a stop dependency on the ASM cluster filesystem for the database's Oracle home failed.
  
  **Action:** Make sure that the asm instance is running; the ACFS driver exists in the driver directory and the underlying ACFS devices are accessible.

PRCD-01126: Instance {0} cannot be removed because it is the only preferred instance for service(s) {1} for database {2}
  
  **Cause:** An attempt was made to remove the instance which is the only preferred instance for specified services.
  
  **Action:** Make sure that specified services have more than one preferred instance or modify services to not have the instance as a preferred instance.

PRCD-01127: Failed to verify if instance {0} is the only preferred instance for any service
  
  **Cause:** An attempt to verify if the instance is the only preferred instance for any service failed.
  
  **Action:** Make sure that the Oracle clusterware is up and running. Also, review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01128: Failed to remove all services configured for database {0}
  
  **Cause:** An attempt to remove all services configured for database.
  
  **Action:** Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01129: Failed to start instance {0} for database {1}
  
  **Cause:** An attempt to start an instance with the specified name failed.
  
  **Action:** Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01130: Failed to convert administrator-managed database {0} into a policy-managed database to use server pool {1}
  
  **Cause:** An attempt to convert the database from an administrator-managed configuration to a policy-managed configuration failed.
  
  **Action:** Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01131: Failed to stop database {0} and its services on node(s) {1}
  
  **Cause:** Attempt to stop the database on given nodes has failed.
  
  **Action:** Ensure that user attempting to stop the database has execute privileges on the database resource. Also, review the accompanying error messages for details about failure to stop database. Retry after resolving those issues or contact Oracle Support Services.

PRCD-01132: Database {0} doesn't have defined service(s) {1}
  
  **Cause:** An attempt to start/stop services on the given database failed.
  
  **Action:** Make sure that every service you want to start or stop is configured for the given database.

PRCD-01133: Failed to start services for database {0}
Cause: An attempt to start given services on the given database failed because those service(s) are not configured for the database.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01134: Failed to find any listener defined for network {0}
Cause: An attempt to find listener(s) defined for specified network failed.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01135: There is no listener defined for network {0} to be used by service {1}
Cause: An attempt to create a service failed because provided network doesn't have listener to publish a service on that network.
Action: Make sure that the provided network has a listener.

PRCD-01136: Failed to retrieve type of the database {0}
Cause: An attempt to query the type of database has failed.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01137: Failed to retrieve online relocation timeout for RAC One Node database {0}
Cause: An attempt to query the current online relocation timeout for RAC One Node database has failed.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01138: Failed to set online relocation timeout to {0} for RAC One Node database {1}
Cause: An attempt to update the online relocation timeout for RAC One Node Database has failed.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01139: The current server {0} where RAC One Node database {1} is running is not in the given candidate server list {2}
Cause: An attempt to update the candidate servers of the server pool hosting RAC One Node Database has failed because current server where this database is running is not in the given candidate server list.
Action: Retry the operation after either including the current server where this database is running in the given candidate server list or stopping the database.

PRCD-01140: Failed to update candidate servers to {0} of the server pool hosting RAC One Node database {1}
Cause: An attempt to update the candidate servers of the server pool hosting RAC One Node Database has failed.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01141: The database {0} is not hosted by a server pool
Cause: An attempt to query the server pool for given database failed because this database is not hosted by a server pool. This is most likely due to a program calling cluster environment API in Oracle Restart environment.
Action: Examine the accompanying error messages for details and contact Oracle Support Services.

PRCD-01142: The [0] TAF policy is not valid for RAC One Node service [1]  
Cause: A TAF policy other than BASIC or NONE was specified for RAC One Node service.  
Action: Specify BASIC or NONE TAF policy and retry the operation.

PRCD-01143: The cardinality of [0] is not valid for RAC One Node database or service [1]  
Cause: An invalid cardinality was specified for RAC One Node database or service.  
Action: Specify a SINGLETON cardinality and retry the operation.

PRCD-01144: The [0] management policy is not valid for RAC One Node database [1]  
Cause: A management policy other than AUTOMATIC was specified for RAC One Node database.  
Action: Specify AUTOMATIC management policy and retry the operation.

PRCD-01145: {0} API is not supported on RAC One Node database environment  
Cause: Internal error.  
Action: Contact Oracle Support Services.

PRCD-01146: Database [0] is not a RAC One Node database  
Cause: The specified database is not a RAC One Node database.  
Action: Provide database name for a RAC One Node database.

PRCD-01147: The server pool [0] of administrator-managed database [1] has no candidate servers  
Cause: Either no instance had been added to the database or this database’s server pool was altered inappropriately.  
Action: If no instance was added to the database yet, try to add an instance to this database, for example by using ‘srvctl add instance’ command, and then retry. Otherwise, contact Oracle Support Services.

PRCD-01148: Failed to convert the configuration of RAC One Node database [0] into its equivalent configuration for RAC database  
Cause: Internal error.  
Action: Review the accompanying error messages and contact Oracle Support Services.

PRCD-01149: AUTOMATIC management policy cannot be used for the service [0] when the database [1] is MANUAL  
Cause: An attempt to create/modify a service failed because the management policy specified for the service is AUTOMATIC but the database’s management policy is MANUAL.  
Action: Make sure that the provided service’s management policy is MANUAL when running ‘srvctl add service’ or ‘srvctl modify service’ command.

PRCD-01150: Failed to retrieve EDITION for service [0]  
Cause: An attempt to retrieve the EDITION attribute of the specified database failed.
**Action:** Examine the accompanying error messages for details.

**PRCD-01151:** Failed to convert the configuration of RAC One Node database {0} into its equivalent RAC database configuration because RAC One Node database is running on a different server {1} than the given target server {2}

**Cause:** A target server was specified that was different from the server where the RAC One Node database is running.

**Action:** Either supply the server where RAC One Node Database is running now as target server or stop the database and retry.

**PRCD-01152:** Failed to update instance name {0} for database {1}

**Cause:** An attempt to update instance name for the specified database failed.

**Action:** Examine the accompanying error messages for details.

**PRCD-01153:** Failed to convert the configuration of cluster database {0} into its equivalent RAC One Node database configuration

**Cause:** An attempt to convert the specified cluster database to RAC One Node database failed.

**Action:** Review the accompanying error messages and retry after resolving these errors or contact Oracle Support Services.

**PRCD-01154:** Failed to convert the configuration of cluster database {0} into its equivalent RAC One Node database configuration because cluster database is running on more than one server {1}

**Cause:** User attempted conversion of a cluster database to RAC One Node database that was running on more than one servers.

**Action:** Stop this database on all but one server and retry.

**PRCD-01155:** Failed to convert the configuration of cluster database {0} into its equivalent RAC One Node database configuration because cluster database has more than one server pool {1} to control its placement

**Cause:** User attempted conversion of a cluster database that had more than one server pool to control its placement.

**Action:** Update configuration of this database by either 'srvctl modify database' or if this database has services that are in their own respective server pool, then removing all but one of its services via 'srvctl remove service' and then retry.

**PRCD-01156:** Failed to convert the configuration of cluster database {0} into its equivalent configuration for RAC One Node database due to its services {1} having {2} TAF policy

**Cause:** This database has services that have TAF policy (e.g. PRECONNECT) that is not supported by RAC One Node Database.

**Action:** Either modify the TAF policy of these services to either BASİC or NONE using ‘srvctl modify service’ or remove these services using ‘srvctl remove service’ and then retry.

**PRCD-01157:** Failed to convert the configuration of cluster database {0} into its equivalent configuration for RAC One Node database because none of its services have {1} management policy

**Cause:** An attempt to convert a cluster database configuration into its equivalent configuration for RAC One Node database was rejected because all services of the given database have MANUAL management policy.
Action: Modify the management policy of at least one of these services to AUTOMATIC using 'srvctl modify service ... -y AUTOMATIC' command and then retry.

PRCD-01158: Invalid database type [0]
Cause: The database type supplied is not valid.
Action: Supply a valid database type.

PRCD-01159: Target node must be specified when initiating an online relocation of administrator managed RAC One Node database [0]
Cause: The target node was not specified when requesting online relocation on administrator managed RAC One Node database.
Action: Use 'srvctl relocate database' command with -n option.

PRCD-01160: Online relocation request for RAC One Node database [0] was rejected because this database is not running
Cause: RAC One Node database was not running.
Action: Start the database by issuing the 'srvctl start database' command and then retry.

PRCD-01161: Online relocation failed for RAC One Node database [0]
Cause: Online relocation of the given database was unsuccessful.
Action: Either run 'srvctl relocate database -a' command to abort the online relocation or run 'srvctl relocate database -n' command to perform online relocation of the database to the given target node.

PRCD-01162: Invalid online relocation status [0]
Cause: This is an internal error.
Action: Review the accompanying error messages and contact Oracle Support Services.

PRCD-01163: Failed to modify database [0]
Cause: Failed to modify database.
Action: Make sure that the CRS stack is up and running and then retry.

PRCD-01164: An online relocation request for RAC One Node database [0] is already active
Cause: The given database has an already active online relocation request.
Action: Either specify another database in the 'srvctl relocate database' command or abort the in-progress request with 'srvctl relocate database -a' command.

PRCD-01165: An online relocation request for RAC One Node database [0] has failed
Cause: An online relocation request for the database has failed and the supplied target node was not the same as that in the failed request.
Action: Use 'srvctl status database' command to query the target node of the failed online relocation request. Either run 'srvctl relocate database -a' command to abort the failed request or 'srvctl relocate database -n' command with the correct target node.

PRCD-01166: The supplied node [0] is not available in the [1] server pool
Cause: Supplied node was not in the Free server pool.
Action: Supply node from the Free server pool.

PRCD-01175: Failed to determine the status of the online relocation request for RAC One Node database (0)
Cause: Unable to determine the status of the online relocation request for given RAC One Node database.
Action: Examine the accompanying error messages for details.

PRCD-01176: Invalid online relocation state (0)
Cause: This is an internal error.
Action: Review the accompanying error messages and contact Oracle Support Services.

PRCD-01177: Failed to abort the online relocation request for RAC One Node database (0)
Cause: Failed to abort the online relocation of the RAC One Node database.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01178: A failed online relocation request for RAC One Node database (0) does not exist
Cause: The supplied RAC One Node database does not have a failed online relocation request.
Action: Supply a RAC One Node database that has a failed online relocation request.

PRCD-01179: The online relocation timeout value (0) is not within the range of between (1) and (2)
Cause: The specified online relocation timeout value was not within the required range.
Action: Supply a value within the required range.

PRCD-01180: Configuration of database (0) has already been upgraded to version (1)
Cause: The supplied database was already upgraded.
Action: Supply a database of a lower version.

PRCD-01181: Failed to upgrade configuration of services (0) to version (1)
Cause: Failed to upgrade the service configuration.
Action: Review the accompanying error messages. If you are unable to resolve the problem, contact Oracle Support Services.

PRCD-01182: Failed to upgrade configuration of database (0) to version (1)
Cause: Failed to upgrade the database configuration.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01183: Failed to upgrade configuration of service type to version (0)
Cause: Failed to upgrade the service type configuration.
Action: Review the accompanying error messages and contact Oracle Support Services.

PRCD-01184: Failed to upgrade configuration of database type to version (0)
Cause: Failed to upgrade the database type configuration.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01185: Failed to retrieve service resource \{0\} for non cluster database \{1\}
Cause: An attempt to get the specified service failed because the database provided is a single instance and not a cluster database.
Action: Make sure that Oracle Clusterware is configured, specify a service defined for cluster database, and then retry.

PRCD-01186: TAF policy 'PRECONNECT' cannot be used to add a service for single instance database \{0\}
Cause: Failed to create a service because provided TAF specification cannot be used with a single instance database.
Action: Retry after removing 'PRECONNECT' TAF policy.

PRCD-01187: Failed to enable or disable service \{0\} on particular nodes for non-cluster single instance database \{1\}
Cause: An attempt to enable or disable the service on particular nodes for single instance database failed. Such enable or disable operations are not applicable to services defined for single instance databases in Oracle Restart.
Action: Specify a service defined for database which is running on cluster or do not specify nodes.

PRCD-01188: Failed to detect whether the standby database \{0\} supports the Data Guard protection mode
Cause: An attempt has failed to determine whether the standby database supports the configured Data Guard protection mode.
Action: Review the accompanying error messages for details about the failure and retry the command after resolving those issues.

PRCD-01189: Cannot update server pool to \{0\} for RAC One Node database service \{1\}
Cause: Attempt to update server pool of a RAC One Node database service was rejected because placement of this service is controlled by the server pool hosting the underlying database.
Action: Try updating the server pool controlling the placement of the database via 'srvctl modify database' command or its equivalent.

PRCD-01190: Cannot update server pool to \{0\} for single instance database service \{1\}
Cause: Attempt to update server pool of a single instance (non-RAC) database service was rejected because placement of this service is controlled by the server pool hosting the underlying database.
Action: Try updating the server pool controlling the placement of the database via 'srvctl modify database' command or its equivalent.

PRCD-01191: Cannot update server pool to \{0\} for database service \{1\}
Cause: Attempt to update server pool of database service was rejected because a subpool server pool was specified.
Action: Supply a first-level server pool that is not a subpool of any other server pool and retry the operation.
PRCD-01192: The cardinality {0} is not valid for single instance database service {1}
   Cause: An invalid cardinality was specified for single instance (non-RAC) database.
   Action: Retry after specifying a SINGLETON cardinality in 'srvctl modify service' command or its equivalent.

PRCD-01193: Service {0} defined for RAC One Node database {1} cannot be started on more than one node
   Cause: An attempt to start the specified service failed because RAC One Node service cannot be started on more than one node.
   Action: Retry after specifying one node to start the service on.

PRCD-01194: Failed to retrieve the version of database {0}
   Cause: An attempt to retrieve the VERSION resource attribute has failed.
   Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01195: Option to remove the target node was not allowed for aborting online relocation of policy-managed RAC One Node database {0}
   Cause: Option -r was specified in a request to abort online relocation on policy managed RAC One Node database.
   Action: Use 'srvctl relocate database -a' command without -r option.

PRCD-01196: 'PRECONNECT' TAF policy cannot be used to create service {0} on policy managed database {1}
   Cause: Failed to create a service because a policy managed database cannot have service with PRECONNECT TAF policy.
   Action: Retry after supplying 'BASIC' or 'NONE' TAF policy.

PRCD-01197: The database {0} is policy-managed and an administrator-managed service {1} cannot be created on it
   Cause: The specified database does not support administrator-managed services.
   Action: Provide a database which supports administrator-managed services.

PRCD-01198: Failed to add service {0} to database {1} because database is already at maximum services limit of {2}
   Cause: Attempt to add a new service to database was rejected because database has already reached the maximum services limit.
   Action: Retry after removing a service from this database via 'srvctl remove service' command, or contact Oracle Support Services.

PRCD-01199: The stop request on instance {0} of standby database {1} was rejected to prevent termination of the primary database
   Cause: The attempt to stop this instance of the standby database was rejected because the configured Data Guard protection mode required this instance to be running to prevent termination of the primary database.
   Action: Retry the stop request after stopping the primary database.

PRCD-01200: Configuration of database {0} has already been downgraded to version {1} for database {2}
   Cause: The supplied database was already downgraded.
   Action: Supply a database of a higher version.
PRCD-01201: Downgrade from current version {0} to version {1} is not supported for database {2}
    Cause: An unsupported version was specified for downgrading the database.
    Action: Check that the versions provided are correct.

PRCD-01202: Failed to downgrade configuration of services {0} to version {1}
    Cause: A request to downgrade the service configuration failed.
    Action: Review the accompanying error messages. If you are unable to resolve the problem, contact Oracle Support Services.

PRCD-01203: Failed to downgrade configuration of database {0} to version {1}
    Cause: A request to downgrade the database configuration failed.
    Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01204: Failed to update administrator-managed database {0} to use server pool {1}
    Cause: Attempt to update administrator-managed database was rejected because administrator-managed database cannot be moved to another subpool.
    Action: Retry after supplying a first-level server pool in 'srvctl modify database' command to convert administrator-managed database to policy-managed database.

PRCD-01205: Failed to update policy-managed database {0} to use server pools {1}
    Cause: Attempt to update policy-managed database was rejected because specified server pools do not include all server pools hosting services of this database.
    Action: Either include all server pools hosting services of this database in the supplied server pool list or specify one server pool to move all services into one server pool in 'srvctl modify database' command and retry.

PRCD-01206: Failed to retrieve preferred instance of service {0} of RAC One Node database {1}
    Cause: Attempt to retrieve preferred instance of service belonging to RAC One Node database failed because database is either in failed online relocation state or undergoing online relocation.
    Action: Check the status of online relocation via 'srvctl status database' command. If online relocation status is reported as active, then retry after online relocation completes. If online relocation status is reported as failed, then repair the configuration via 'srvctl relocate database ... -a' command and then retry.

PRCD-01207: The start options {2} can not be used while starting service {0} and its database {1}
    Cause: An attempt to start the service was rejected because the specified start options can not be used with service when the database is not running.
    Action: Remove the specified start options and then retry.

PRCD-01208: The start options {1} can not be used while starting services for database {0}
    Cause: An attempt to start the services was rejected because the specified start options can not be used with services when the database is not running.
    Action: Remove the specified start options and then retry.
PRCD-01209: RAC One Node database {0} does not have enough servers in its server pool {1} to initiate an online relocation

Cause: Online relocation request was rejected because there were less than two servers in the server pool of the specified RAC One Node database.

Action: Make sure that the minimum and maximum size of the server pool are set properly.

PRCD-01210: The service name {0} cannot be same as the database default service name {1}

Cause: An attempt to create the service was rejected because the given service name is same as the database default service name.

Action: Retry after supplying a service name that is different than the database default service name.

PRCD-01211: Cannot start RAC One Node database {0} because a failure has occurred while trying to clean up an earlier failed online relocation

Cause: An attempt to start a RAC One Node database was rejected because a failure has occurred while trying to clean up an earlier failed online relocation.

Action: Use 'srvctl status database' command to query the target node of the failed online relocation process. Either run 'srvctl relocate database' with -a option or with -n option with the target node thus discovered.

PRCD-01212: An instance with name "{0}" already exists on node {1}

Cause: Unable to add an instance to the database on the specified node because an instance with the same name was found on another node.

Action: Use 'srvctl modify instance' command to change the name of the existing instance, or use a different instance name in the 'srvctl add instance -i <inst>' command.

PRCD-01213: Service {0} of database {1} is still running

Cause: An attempt to remove RAC One Node service failed because the given service was still running.

Action: Stop the service and then retry the command.

PRCD-01214: Administrator-managed RAC database {0} has more than one instance

Cause: Failed to convert RAC database to RAC One Node database because there was more than one instance.

Action: Use 'srvctl remove instance' command to remove all but one instance and then run 'srvctl convert database -c RACONENODE'.

PRCD-01215: Unable to downgrade RAC One Node database {0}

Cause: Failed to downgrade RAC One Node database to an earlier version because there was no RAC One Node specific configuration in the earlier version.

Action: None

PRCD-01222: Online relocation of database {0} failed but database was restored to its original state

Cause: Online relocation of the given database was unsuccessful, therefore the database was restored to its original state.

Action: See accompanying messages for online relocation failure.

PRCD-01223: The service name {0} contains illegal characters {1}
Cause: An attempt to create the service was rejected because the given service name contains illegal characters.

Action: Retry after supplying a service name that contains characters from its character set (a-zA-Z0-9_) for the base name, and (a-zA-Z0-9_$#) for the domain name if needed.

PRCD-01224: The [0] management policy is not valid for RAC One Node database service [1]

Cause: A management policy other than AUTOMATIC was specified for RAC One Node database service.

Action: Either specify AUTOMATIC management policy for this service or modify management policy of another service of this database to AUTOMATIC, such as via 'srvctl modify service' command, and then retry the current operation.

PRCD-01225: An attempt to remove service [0] of database [1] was rejected because this is the last service with [2] management policy. A RAC One Node database must have at least one service with [2] management policy.

Cause: An attempt was made to remove the last service of a RAC One Node database having AUTOMATIC management policy.

Action: Add another service with AUTOMATIC management policy, for example by using 'srvctl add service ... -y AUTOMATIC' command, or modify the management policy of an existing service to AUTOMATIC, using 'srvctl modify service' command, before removing the given service.

PRCD-01226: Failed to retrieve ASM Cluster Filesystem resource [0] for database [1].

Cause: The ASM Cluster Filesystem resource was not registered in Oracle Clusterware.

Action: Create the ASM Cluster Filesystem resource using 'srvctl add filesystem' command and then retry.

PRCD-01227: Failed to retrieve ASM Cluster Filesystem list for database [0].

Cause: Failed to retrieve the ASM Cluster Filesystems of the specified database.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01228: Failed to convert administrator-managed RAC database [0] to RAC One Node database because the database had no instance added

Cause: Attempt to convert RAC database to RAC One Node database was rejected because database did not have any instance added.

Action: Use 'srvct add instance' command to add an instance and then run 'srvctl convert database -c RACONENODE'.

PRCD-01229: An attempt to access configuration of database [0] was rejected because its version [1] differs from the program version [2]. Instead run the program from [3].

Cause: An attempt was made to access configuration of database that is of different version than that of the program.

Action: Make sure that database configuration version and the program version are same and then retry. For example, try the operation using srvctl from the ORACLE_HOME mentioned in the error message.

PRCD-01230: Failed to modify database [0] to use server pool [1]

Cause: An attempt to modify the database to use the given server pool has failed.
Action: Review the accompanying error messages for details about the failure. For example, a failure could happen if the database owner does not have execute permissions on the given server pool. In this case, use 'srvctl config database -d <db_unqiue_name>' command to find out the database owner's username, create a server pool as that user, and then supply that server pool as argument when retrying the command.

PRCD-01231: Failed to upgrade configuration of database {0} to version {1} in new Oracle home {2}
Cause: Failed to upgrade the database configuration.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01232: Failed to upgrade configuration of database {0} because database version {1} is an unsupported version for upgrade
Cause: Version of the database was not supported for upgrade.
Action: None

PRCD-01233: Failed to downgrade configuration of database {0} to version {1} in new Oracle home {2}
Cause: Failed to downgrade the database configuration.
Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01234: Failed to downgrade configuration of database {0} to version {1} because the specified version is unsupported for downgrade
Cause: Specified version was not supported for downgrade.
Action: Specify a version that is 10.1 or later.

PRCD-01235: Unable to downgrade configuration of single instance database {0} to version {1}
Cause: Single instance database was specified.
Action: Remove the single instance database configuration. 11.2 Clusterware cannot manage pre-11.2 single instance databases.

PRCD-01236: Unable to downgrade configuration of RAC One Node database {0} to version {1}
Cause: RAC One Node database was specified.
Action: Convert the administrator-managed RAC One Node database to an administrator-managed RAC database using 'srvctl convert database' command and then retry.

PRCD-01237: Unable to downgrade configuration of policy-managed RAC database {0} to version {1}
Cause: Policy-managed RAC database was specified.
Action: Remove the 11.2 database configuration and use pre-11.2 srvctl to re-create the configuration.

PRCD-01238: Failed to get attributes for database {0}
Cause: Failed to get attributes for the database.
Action: Make sure that the CRS stack is up and running and then retry.
PRCD-01239: Failed to downgrade configuration of database {0} to version {1} because the database has dependency on ASM Cluster File System
   Cause: Specified database was dependent on ASM Cluster File System.
   Action: None

PRCD-01240: Unable to downgrade configuration of database {0} because its
database role of {1} is not supported in version {2}
   Cause: Database role of specified database was not supported in the specified
   version.
   Action: Modify the database role using 'srvctl modify database' command and
   then retry this command.

PRCD-01241: Failed to upgrade configuration of database {0} to version {1} in new
Oracle home {2}. Also failed to remove the internal server pool configuration.
   Cause: Failed to upgrade the database configuration.
   Action: Review the accompanying error messages for details about failure. Retry
   after resolving those issues.
PRCH-01000: Failed to stop resources running from Oracle home {0}
   Cause: Attempt to stop one or more resources in the specified Oracle home failed.
   Action: for the individual resource stop failure and perform the steps for each resource that failed to stop.

PRCH-01001: Failed to start resources in Oracle home {0}
   Cause: Attempt to start one or more resources in the specified Oracle home failed.
   Action: for the individual resource start failure and perform the steps for each resource that failed to start.

PRCH-01002: Failed to stop resources running from CRS home {0}
   Cause: Attempt to stop one or more resources in the specified CRS home failed.
   Action: for the individual resource stop failure and perform the steps for each resource that failed to stop.

PRCH-01003: Failed to start resources in CRS home {0}
   Cause: Attempt to start one or more resources in the specified CRS home failed.
   Action: for the individual resource start failure and perform the steps for each resource that failed to start.

PRCH-01004: Failed to stop service
   Cause: Attempt to stop a Service resource in the specified oracle home failed.
   Action: Review the error messages for possible reasons and if needed, use 'srvctl stop service -d <db_unique_name>' to stop the service.

PRCH-01005: Failed to stop database
   Cause: Attempt to stop the database resource in the specified oracle home failed.
   Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop database -d <db_unique_name>' to stop the database.

PRCH-01006: Failed to stop Listener
   Cause: Attempt to stop the Listener resource in the specified oracle home failed.
   Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop listener' to stop the Listener.

PRCH-01007: Failed to stop Listener
   Cause: Attempt to stop the Listener resource in CRS home failed.
   Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop listener' to stop the Listener.
PRCH-01008: Failed to start service
  Cause: Attempt to start a Service resource in the specified oracle home failed.
  Action: Review the error messages for possible reasons, correct the error and use
           'srvctl start service -d <db_unique_name>' to start the service.

PRCH-01009: Failed to start database
  Cause: Attempt to start the database resource in the specified oracle home failed.
  Action: Review the error messages for possible reasons, correct the error and use
           'srvctl start database -d <db_unique_name>' to start the database.

PRCH-01010: Failed to start Listener
  Cause: Attempt to start the Listener resource in the specified Oracle home failed.
  Action: Review the error messages for possible reasons, correct the error and use
           'srvctl start listener' to start the Listener.

PRCH-01011: Failed to start Listener
  Cause: Attempt to start the Listener resource in the specified CRS home failed.
  Action: Review the error messages for possible reasons, correct the error and use
           'srvctl start listener' to start the Listener.

PRCH-01012: Failed to stop EONS
  Cause: Attempt to stop the EONS resource in the specified CRS home failed.
  Action: Review the error messages for possible reasons, correct the error and use
           'srvctl stop nodeapps' to stop the EONS resource.

PRCH-01013: Failed to start EONS
  Cause: Attempt to start the EONS resource in the specified CRS home failed.
  Action: Review the error messages for possible reasons, correct the error and use
           'srvctl start nodeapps' to start the EONS resource.

PRCH-01014: Failed to stop ONS
  Cause: Attempt to stop the ONS resource in the specified CRS home failed.
  Action: Review the error messages for possible reasons, correct the error and use
           'srvctl stop nodeapps' to stop the ONS resource.

PRCH-01015: Failed to start ONS
  Cause: Attempt to start the ONS resource in the specified CRS home failed.
  Action: Review the error messages for possible reasons, correct the error and use
           'srvctl start nodeapps' to start the ONS resource.

PRCH-01016: Failed to stop GSD resource
  Cause: Attempt to stop the GSD resource in the specified CRS home failed.
  Action: Review the error messages for possible reasons, correct the error and use
           'srvctl stop nodeapps' to stop the GSD resource.

PRCH-01017: Failed to start GSD resource
  Cause: Attempt to start the GSD resource in the specified CRS home failed.
  Action: Review the error messages for possible reasons, correct the error and use
           'srvctl start nodeapps' to start the GSD resource.

PRCH-01018: Failed to stop VIP resource
  Cause: Attempt to stop the VIP resource in the specified CRS home failed.
Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop vip -n <node_name>' to stop the VIP resource.

PRCH-01019: Failed to start VIP resource
Cause: Attempt to start the VIP resource in the specified CRS home failed.
Action: Review the error messages for possible reasons, correct the error and use 'srvctl start vip -n <node_name>' to start the VIP resource.

PRCH-01020: Failed to stop Network resource
Cause: Attempt to stop the Network resource in the specified CRS home failed.
Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop nodeapps' to stop the Network resource.

PRCH-01021: Failed to start Network resource
Cause: Attempt to start the Network resource in the specified CRS home failed.
Action: Review the error messages for possible reasons, correct the error and use 'srvctl start nodeapps' to start the Network resource.

PRCH-01022: Failed to stop SCAN VIP resource
Cause: Attempt to stop the SCAN VIP resource in the specified CRS home failed.
Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop scan' to stop the SCAN VIP resource.

PRCH-01023: Failed to start SCAN VIP resource
Cause: Attempt to start the SCAN VIP resource in the specified CRS home failed.
Action: Review the error messages for possible reasons, correct the error and use 'srvctl start scan' to start the SCAN VIP resource.

PRCH-01024: Failed to stop SCAN Listener resource
Cause: Attempt to stop the SCAN Listener resource in the specified CRS home failed.
Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop scan_listener' to stop the SCAN Listener resource.

PRCH-01025: Failed to start SCAN Listener
Cause: Attempt to start the SCAN Listener resource in the specified CRS home failed.
Action: Review the error messages for possible reasons, correct the error and use 'srvctl start scan_listener' to start the SCAN Listener resource.

PRCH-01026: Failed to stop ASM
Cause: Attempt to stop the ASM resource in the specified CRS home failed.
Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop asm' to stop the ASM resource.

PRCH-01027: Failed to start ASM
Cause: Attempt to start the ASM resource in the specified CRS home failed.
Action: Review the accompanying error messages for possible reasons, correct the error and use 'srvctl start asm' to start the ASM resource.

PRCH-01028: One or more resources failed to start: {0}
Cause: Attempt to start one or more resources in the specified oracle home failed.
**Action:** for the individual resource start failure and perform the steps for each resource that failed to start.

**PRCH-01029: One or more resources failed to stop: [0]**
**Cause:** Attempt to stop one or more resources in the specified Oracle home failed.
**Action:** for the individual resource stop failure and perform the steps for each resource that failed to stop.

**PRCH-01030: One or more resources failed to stop: [0]**
**Cause:** An attempt to stop one or more resources in the specified CRS home failed.
**Action:** Review the accompanying resource error messages and their documentation, and correct the problems indicated.

**PRCH-01031: One or more resources failed to start: [0]**
**Cause:** Attempt to start one or more resources in the specified CRS home failed.
**Action:** for the individual resource start failure and perform the steps for each resource that failed to start.

**PRCH-01032: Failed to stop GNS resource**
**Cause:** Attempt to stop the GNS resource in the specified CRS home failed.
**Action:** Review the error messages for possible reasons, correct the error and use 'srvctl stop gns' to stop the GNS resource.

**PRCH-01033: Failed to start GNS resource**
**Cause:** Attempt to start the GNS resource in the specified CRS home failed.
**Action:** Review the error messages for possible reasons, correct the error and use 'srvctl start gns' to start the GNS resource.

**PRCH-01034: Failed to stop diskgroup resource**
**Cause:** Attempt to stop the diskgroup resource in the specified home failed.
**Action:** Review the accompanying error messages for possible reasons, correct the error and use 'srvctl stop diskgroup -g <dg_name>' to stop the diskgroup resource.

**PRCH-01035: Failed to start diskgroup resource**
**Cause:** Attempt to start the diskgroup resource in the specified home failed.
**Action:** Review the accompanying error messages for possible reasons, correct the error and use 'srvctl start diskgroup -g <dg_name>' to start the diskgroup resource.

**PRCH-01036: The state file "[0]" does not exist**
**Cause:** The state file required for the current operation was not found.
**Action:** Make sure the named file exists in the file system.

**PRCH-01037: The filesystem object "[0]" is not a file**
**Cause:** The content that was expected to be a file which turned out not to be a file.
**Action:** Retry the 'srvctl stop home' to generate this file. If the problem still exists, contact Oracle Support Services.

**PRCH-01038: "[0]" is a non-readable file**
**Cause:** The user does not have read permissions to open the file.
Action: Modify the file permissions so that the file becomes readable or execute the command from an OS userid with the required privileges.

PRCH-01039: Failed to stop CVU resource
Cause: Attempt to stop the CVU resource failed.
Action: Review the accompanying error messages for possible reasons, correct the error and use ‘srvcfg stop cvu’ to stop the CVU resource.

PRCH-01040: Failed to start CVU resource
Cause: Attempt to start the CVU resource failed.
Action: Review the accompanying error messages for possible reasons, correct the error and use ‘srvctl start cvu’ to start the CVU resource.

PRCH-01041: Failed while checking status of service "[0]"
Cause: Attempt to check the status of the listed service failed.
Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01042: Failed while checking status of database "[0]"
Cause: Attempt to check the status of the listed database failed.
Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01043: Failed while checking status of database instance "[0]"
Cause: Attempt to check the status of the listed database instance failed.
Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01044: Failed while checking status of listener "[0]"
Cause: Attempt to check the status of the listed listener failed.
Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01045: Failed while checking status of VIP "[0]"
Cause: Attempt to check the status of the listed VIP failed.
Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01046: Failed while checking status of SCAN VIP "[0]"
Cause: Attempt to check the status of the listed SCAN VIP failed.
Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01047: Failed while checking status of SCAN Listener "[0]"
Cause: Attempt to check the status of the listed SCAN Listener failed.
Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01048: Failed while checking status of CVU resource "[0]"
Cause: Attempt to check the status of the listed CVU resource failed.
Action: Review the accompanying error messages for possible reasons, correct the error and retry.
PRCH-01049: Failed while checking status of disk group "[0]"
   Cause: Attempt to check the status of the listed disk group failed.
   Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01050: Failed while checking status of ASM "[0]"
   Cause: Attempt to check the status of the listed ASM failed.
   Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01051: Failed while checking status of GNS "[0]"
   Cause: Attempt to check the status of the listed GNS failed.
   Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01052: Failed while checking status of GSD "[0]"
   Cause: Attempt to check the status of the listed GSD failed.
   Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01053: Failed while checking status of Network "[0]"
   Cause: Attempt to check the status of the listed Network failed.
   Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01054: Failed while checking status of ONS "[0]"
   Cause: Attempt to check the status of the listed ONS failed.
   Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01055: Failed to create or open file "[0]"
   Cause: State file processing failed because: the file specified is a directory rather than a file, the file did not exist but could not be created, or the file exists but could not be opened.
   Action: Enable state file processing by: not specifying a directory name, ensuring the the directory is writable, or ensuring that an existing state file can be overwritten.

PRCH-01056: Failed to write to file "[0]"
   Cause: Attempt to write to the given file failed.
   Action: If the state file already exists, then make sure that it is writable.
   Otherwise, make sure that parent directory of the state file path is writable.

PRCH-01057: The Clusterware resource for database "[0]" does not exist.
   Cause: The Clusterware resource for the database with the given name did not exist.
   Action: Make sure that Clusterware resource for the database with the given name exists.

PRCH-01058: Failed while checking status of CRS home [0]
   Cause: Attempt to check the status of the CRS home failed.
**Action:** Review the accompanying error messages for possible reasons, correct the error and retry.

**PRCH-01059: Failed while checking status of Oracle home {0}**

**Cause:** Attempt to check the status of the Oracle home failed.

**Action:** Review the accompanying error messages for possible reasons, correct the error and retry.

**PRCH-01060: Status check for one or more resources failed: {0}**

**Cause:** Attempt to check the status for one or more resources in the specified Oracle home failed.

**Action:** Review the underlying error messages that provides the details of which resources failed to query their status, check the cause and action for the individual resource start failure and perform the steps for each resource that failed to start.
PRCI-01000: Failed to retrieve install information on local node using OUI location {0}
  Cause: An attempt to retrieve install information on the local node from the specified location failed.
  Action: Examine the accompanying error messages for details.

PRCI-01001: Failed to retrieve install information on remote node {0} using OUI location {1}
  Cause: An attempt to retrieve install information on a remote node from the specified location failed.
  Action: Examine the accompanying error messages for details.

PRCI-01100: Failed to get Vendor Cluster for CRS home {0}
  Cause: Unable to locate vendor cluster library or execute lsnodes.
  Action: Install Vendor Clusterware. Then try to run lsnodes again.

PRCI-01101: Failed to get Vendor Cluster for CRS home {0} on node {1}
  Cause: Unable to locate vendor cluster library or execute lsnodes on the specified node.
  Action: Install Vendor Clusterware on the specified node. Then try to run lsnodes again.

PRCI-01102: Failed to get OracleCM Cluster for CRS home {0}
  Cause: Failed to get OracleCM Cluster for the local node using CRS home provided.
  Action: Install Oracle 9i and make sure that /etc/ORCLcluster exists.

PRCI-01103: Failed to get OracleCM Cluster for CRS home {0} on node {1}
  Cause: Failed to get OracleCM Cluster for the specified node using CRS home provided.
  Action: Examine the accompanying error messages for details.

PRCI-01104: Failed to check Oracle Restart running state for Oracle Restart home {0} on node {1}
  Cause: Failed to check whether Oracle Restart is running from the specified home on the local node.
  Action: Examine the accompanying error messages for details.

PRCI-01105: Failed to check Oracle Restart running state for Oracle Restart home {0} on node {1}
**Cause:** Failed to check whether Oracle Restart is running from the specified home on the specified node.

**Action:** Examine the accompanying error messages for details.

**PRCI-01106:** Failed to check Oracle Restart configuration state for Oracle Restart home \{0\} on node \{1\}

**Cause:** Failed to check whether Oracle Restart is configured for the specified home on the specified node.

**Action:** Examine the accompanying error messages for details.

**PRCI-01107:** Failed to check CRS running state for CRS home \{0\}

**Cause:** Failed to check whether Oracle Clusterware is running from the specified home on the local node.

**Action:** Examine the accompanying error messages for details.

**PRCI-01108:** Failed to check CRS running state for CRS home \{0\} on node \{1\}

**Cause:** Failed to check whether Oracle Clusterware is running from the specified home on the specified node.

**Action:** Examine the accompanying error messages for details.

**PRCI-01109:** Failed to check CRS configuration state for CRS home \{0\}

**Cause:** Failed to check whether Oracle Clusterware is configured for the specified home on the specified node.

**Action:** Examine the accompanying error messages for details.

**PRCI-01110:** Failed to check CRS configuration state for CRS home \{0\} on node \{1\}

**Cause:** Failed to check whether Oracle Clusterware is configured for the specified home on the local node.

**Action:** Examine the accompanying error messages for details.

**PRCI-01111:** File path is null

**Cause:** The specified file is null or an empty string.

**Action:** Provide a valid file path that is not null.

**PRCI-01112:** Directory name passed was null

**Cause:** The specified directory name is null or an empty string.

**Action:** Provide a valid directory name that is not null.

**PRCI-01113:** Directory \{0\} does not exist

**Cause:** Could not find the specified directory or it was a file instead of a directory.

**Action:** Provide an existing directory name.

**PRCI-01114:** Node name is null

**Cause:** The specified node name is null or an empty string.

**Action:** This is an internal error. Contact Oracle Support Services.

**PRCI-01115:** argument passed is null

**Cause:** The specified database name is null or an empty string.

**Action:** This is an internal error. Contact Oracle Support Services.

**PRCI-01116:** Failed to check if a database named \{0\} exists
Cause: Failed to execute the command ‘crsctl stat resource <database_resource_name>’ to decide whether the specified database exists or not.

Action: Examine the accompanying error messages for details.

PRCI-01117: Failed to retrieve list of databases under high availability management
Cause: Failed to execute the command ‘crsctl stat resource -w TYPE=ora.database.type <filter>’ in order to get the list of databases managed by Oracle Restart.

Action: Examine the accompanying error messages for details.

PRCI-01118: Failed to determine if database \{0\} depends on Automatic Storage Management
Cause: Failed to execute crsctl command to decide whether the specified database depended on Automatic Storage Management (ASM).

Action: Examine the accompanying error messages for details.

PRCI-01119: Failed to check if a database named \{0\} exists on node \{1\}
Cause: Failed to decide whether the specified database exists or not on the specified node because the specified node is null or an invalid node or crsctl command execution failed.

Action: Examine the accompanying error messages for details.

PRCI-01120: Failed to retrieve list of databases under high availability management for node \{0\}
Cause: Failed to get the list of database managed by Oracle Restart on the specified node because the specified node is null or an invalid node or crsctl command execution failed.

Action: Examine the accompanying error messages for details.

PRCI-01121: Failed to determine if database \{0\} depends on Automatic Storage Management on node \{1\}
Cause: Failed to execute crsctl command to decide whether the specified database depended on Automatic Storage Management (ASM) on the specified node because the specified node is null or an invalid node or crsctl command execution failed.

Action: Examine the accompanying error messages for details.

PRCI-01122: Failed to determine if the public network is using dynamic address assignment (DHCP)
Cause: An attempt to determine whether the public network is using dynamic address assignment (DHCP) failed.

Action: Examine the accompanying error messages for details.

PRCI-01123: CRS home does not exist on the local node
Cause: CRS home is not installed on the local node.

Action: Install a CRS home using the Oracle Universal Installer.

PRCI-01124: Oracle Restart home does not exist on the local node
Cause: Oracle Restart home is not installed.

Action: Install an Oracle Restart home using the Oracle Universal Installer.

PRCI-01125: CRS home does not exist on node \{0\}
**Cause:** CRS home is not installed on the specified node.
**Action:** Install a CRS home using the Oracle Universal Installer.

**PRCI-01126: Oracle Restart home does not exist on node {0}**
**Cause:** Oracle Restart home is not installed on the specified node.
**Action:** Install an Oracle Restart home using the Oracle Universal Installer.

**PRCI-01127: CRS active version cannot be queried in a non-cluster environment**
**Cause:** Clusterware is not configured.
**Action:** Ensure that Clusterware is configured.

**PRCI-01128: Failed to check Oracle Restart configuration state**
**Cause:** Oracle Restart may not be configured
**Action:** Ensure that Oracle Restart is installed and configured

**PRCI-01128: Failed to check Oracle Restart configuration state**
**Cause:** Oracle Restart may not be configured
**Action:** Ensure that Oracle Restart is installed and configured

**PRCI-01129: Failed to check Oracle Restart configuration state on node {1}**
**Cause:** Oracle Restart may not be configured
**Action:** Ensure that Oracle Restart is installed and configured

**PRCI-01130: Failed to check CRS configuration state**
**Cause:** Clusterware CRS may not be configured
**Action:** Ensure that Clusterware CRS is installed and configured

**PRCI-01131: Failed to check CRS configuration state on node {1}**
**Cause:** Clusterware CRS may not be configured
**Action:** Ensure that Clusterware CRS is installed and configured

**PRCI-01132: Failed to get clustername for CRS home {0} and version {1}**
**Cause:** Clusterware is not configured and CRS stack is not up
**Action:** Ensure that Clusterware CRS is installed and configured and the stack is up.

**PRCI-01133: The IP address {0} does not have the same number of fields with the subnet mask {1}**
**Cause:** IP address is in IPv4 address format while the subnet mask is in IPv6 address format or the other way around.
**Action:** Ensure that both the IP address and the subnet mask use the same representation (the longer required among IPv4 and IPv6).

**PRCI-01134: Applying subnet mask {0} to IP address {1} resulted in an invalid IP address format**
**Cause:** This won’t ever happen. Message added just in case.
**Action:** None

**PRCI-01135: Failed to check if path {0} on node {1} is on ACFS**
**Cause:** An attempt to determine if the specified path is on ACFS failed. This can occur because:
1. The Clusterware stack is down on the specified node.
2. ASM is down on the specified node.
3. A diskgroup associated with the path is not online.
4. The path is not mounted.
**Action:** Perform checks corresponding to the above causes:

1. Ensure the Clusterware stack is running on the specified node.
2. Ensure that ASM is running on the specified node.
3. Ensure that the diskgroup associated with the path is online.
4. Ensure that the file system is mounted on the node.

PRCI-01136: The specified path \{0\} is not on Oracle Automatic Storage Manager Cluster File System (ACFS)

**Cause:** The specified path is not on ACFS.

**Action:** Specify a path that is on ACFS. This check will only accept paths on ACFS.

PRCI-01137: Failed to check if path \{0\} is on ACFS

**Cause:** An attempt to determine if the specified path is on ACFS failed. This can occur because:

1. The Clusterware stack is down on the specified node.
2. ASM is down on the specified node.
3. A diskgroup associated with the path is not online.
4. The path is not mounted.

**Action:** Perform checks corresponding to the above causes:

1. Ensure the Clusterware stack is running on the specified node.
2. Ensure that ASM is running on the specified node.
3. Ensure that the diskgroup associated with the path is online.
4. Ensure that the file system is mounted on the node.
PRCN-02018: Current user {0} is not a privileged user
   Cause: Current user did not have sufficient privileges to perform this operation.
   Action: Make sure that the user has root privileges on Linux/Unix’s and Administrator on Windows.

PRCN-02030: Subnet does not exist for resource {0}
   Cause: An attempt was made to query subnet for a network resource configured with Oracle clusterware and it was not found.

PRCN-02031: Unknown DHCP server name {0} found for resource {1}
   Cause: The DHCP server type obtained for the network resource is not a valid server type.

PRCN-02032: Failed to retrieve DHCP server type {0}
   Cause: An attempt to query the DHCP server type for the network resource failed because its value could not be retrieved from the Oracle clusterware resource attributes.
   Action: make sure Oracle clusterware is up and running. and also look at the help for the accompanying CRS error message.

PRCN-02033: Failed to update DHCP server type to {0} {1}
   Cause: An attempt to update the DHCP server type for the network resource failed because its value could not be updated in the Oracle Clusterware resource attribute.
   Action: Make sure that the Clusterware stack is up. Make sure that the user has enough permission to modify node applications. Examine the accompanying message for additional details.

PRCN-02034: Could not find dependent resource {0} for resource {1}: {2}
   Cause: Could not get the resource associated with a given resource. Could not get the ASM resource associated with a given ASM disk group resource.
   Action: Make sure that clusterware stack is up. Make sure that the network resource associated with this resource has not been removed. Make sure that the user has permission to perform this operation.

PRCN-02035: Port {0} is not available on node(s) or virtual host(s): {1}
Cause: The port specified is already being used by some other applications on the nodes or virtual hosts given.

Action: Stop the applications that are using these ports or specify a different port and try the command again.

PRCN-02036: Failed to retrieve port number(s) for {0}

Cause: An attempt to retrieve the port number(s) for the cluster resource failed.

Action: Make sure that the clusterware stack is up. Make sure that the resource you are querying has been configured. Also take a look at the help for the accompanying error message(s).

PRCN-02037: Failed to retrieve Oracle home for {0}

Cause: An attempt to retrieve Oracle home value for the listener resource failed.

Action: Make sure that the clusterware stack is up. Make sure that listener is configured. If node name is being specified in the command line make sure that the node name is a valid node name. Also look at help for the accompanying error message(s).

PRCN-02038: Failed to update Oracle home {0} for listener {1}

Cause: An attempt to update the Oracle home value for the listener resource failed.

Action: Make sure that the clusterware stack is up. Make sure that the listener is configured. If node name is being specified in the command line make sure that the node name is a valid node name. Make sure that user is a owner or has write permissions to modify the listener resource. Also look at the help for other errors listed in error stack.

PRCN-02039: Failed to retrieve Oracle home for {0} on node {1}

Cause: An attempt to retrieve Oracle home value for the listener resource on a the specified node failed.

Action: Make sure that the clusterware stack is up. Make sure that the listener is configured on the node. Make sure that the node name being passed in the command line is a valid node name. Also look at the help for the accompanying error message(s).

PRCN-02040: Failed to update Oracle home {0} for {1} on node {2}

Cause: Attempt to update value of attribute Oracle home for listener resource on the specified node failed.

Action: Make sure that the clusterware stack is up. Make sure that the listener is configured on the node. Make sure that the user has enough permission to modify the listener. Make sure that the node name being passed in the command line is a valid node name. Also look at the help for other errors listed in error stack.

PRCN-02041: Failed to retrieve properties of {0}

Cause: Failed to retrieve properties of the given entity.

Action: Make sure that user has permission to read resource attribute.

PRCN-02042: Failed to set properties {0} of {1}

Cause: Failed to update properties of the given entity.

Action: Make sure that user has permission to update resource attribute.

PRCN-02043: Multiple network resources {0} exist on the cluster
Cause: More than one network resource has been configured and the one to be used for creating this resource has not been specified.
Action: Use command line option -k <net_num> argument to specify the network to be used and retry the command again.

PRCN-02044: No listener exists
Cause: No listener has been configured.
Action: Use netca or srvctl to add/configure a listener.

PRCN-02045: No network exists
Cause: No network has been configured.
Action: Use 'srvctl add nodeapps' to add/configure network resource.

PRCN-02046: Netmask does not exist for resource {0}
Cause: An attempt to retrieve the subnet information for the network resource resulted in not finding subnet mask.

PRCN-02047: VIP {0} exists
Cause: The VIP with specified name has been registered in CRS.
Action: Remove the existing VIP before registering it again.

PRCN-02048: The network number {0} is already registered for subnet "{3}" and adapters "{4}". Can not add network number {0} for the specified subnet "{1}" and adapters "{2}".
Cause: The network number is taken by a registered network resource.
Action: Use a different network number to add a new network resource with the specified subnet and adapters, or modify existing network using 'srvctl modify nodeapps'.

PRCN-02049: The network attributes specified (network number: {0}, subnet: {1}, adapters: {2}) conflict with an already registered network (network number: {3}, subnet: {4}, adapters: {5})
Cause: The network resource is registered with different network number
Action: Use the registered network resource with the registered network number or provide different subnet or adapters.

PRCN-02050: The requested VIP (nodename: {0}, VIP name: {1}, network number: {2}) has the same VIP name but different network number or preferred node than the registered VIP (nodename: {3}, VIP name: {4}, network number: {5}).
Cause: One VIP name (and IP address) can only be used by one VIP with the same network number on the same node.
Action: Use a different VIP name or IP address.

PRCN-02051: The requested VIP (nodename: {0}, VIP name: {1}, network number: {2}) has the same network number and the same preferred node but different VIP name with the registered VIP (nodename: {3}, VIP name: {4}, network number: {5}).
Cause: One network resource on one preferred node can have only one cluster VIP.
Action: Use different network number or preferred node to register different VIP.
PRCN-02052: Failed to modify Network resource (network number: \{0\}) to use (subnet: \{1\}, netmask \{2\} adapters: \{3\}).

**Cause:** CRS was unable to modify the network resource to use new subnet/netmask/interface

**Action:** Make sure that clusterware stack is up. Make sure that the subnet, netmask and adapters value are correct. Make sure that the interface being referred to is running. Make sure that the user who is trying to modify network resource has root privileges. Examine the accompanying message for additional details.

PRCN-02053: Failed to modify ONS listening port for local client connections to \{0\}

**Cause:** CRS unable to modify the ONS listening port for local connections

**Action:** Make sure that clusterware stack is up. If the port is in use by another application, try using a different port.

PRCN-02054: Failed to modify ONS listening port for remote client connections to \{0\}

**Cause:** CRS unable to modify the ONS listening port for remote client connections

**Action:** Make sure that clusterware stack is up. If the port is in use by another application, try using a different port.

PRCN-02055: Failed to update port number(s) to \{0\} for \{1\}

**Cause:** An attempt to update the listener port failed for the nodes of the cluster.

**Action:** The port could be in use. Try using different port. If node name was specified in the command line make sure that the node name is a valid node name. Also look at the help for the accompanying error message(s).

PRCN-02056: Invalid listener protocol type \{0\}

**Cause:** The specified listener protocol type is invalid.

**Action:** Provide a valid listener protocol type. It can be TCP, TCPS, IPC, NMP, or SDP.

PRCN-02057: Invalid listener protocol value \{0\}

**Cause:** The specified listener protocol value is invalid.

**Action:** Provide a valid listener protocol value. It cannot contain special characters ';', '/'

PRCN-02058: Invalid listener protocol ENDPOINTS \{0\}. Delimiter is \"\{1\}\", invalid part is \"\{2\}\".

**Cause:** The specified listener ENDPOINTS are invalid.

**Action:** Provide valid listener protocol ENDPOINTS. It cannot contain invalid part.

PRCN-02059: Invalid listener port number \{0\}

**Cause:** The specified listener port number is invalid.

**Action:** Provide a valid listener port number.

PRCN-02060: Duplicated listener protocol value \{0\}

**Cause:** The specified listener protocol value is a duplication of another one.

**Action:** Remove duplicated listener protocol value.

PRCN-02061: Failed to add listener \{0\}
Cause: An attempt to add listener failed because endpoints were not specified correctly or other reasons.

Action: Review the underlying error messages that provide the details of which resources failed to create. Check the cause and action for the individual resource creation failure. If the endpoints were not specified correctly, correct endpoints.

PRCN-02062: The specified hostname or address {0} cannot be resolved.

Cause: An invalid IP address or unresolvable hostname was specified.

Action: If IP address is specified then make sure that it is of legal length. If a host name is specified then make sure that the host name resolves to an IP address.

PRCN-02063: Failed to modify OC4J listening port to {0}

Cause: CRS unable to modify the OC4J instances listening port.

Action: Make sure that clusterware stack is up. If the port is in use by another application, try using a different port.

PRCN-02064: Found {0} VIPs for {1}

Cause: A conflict was found in VIP resource definition: either more than one VIP is using the same name or address, or a VIP is using the same name or address as a real host.

Action: Ensure that each VIP is defined with a distinct name and address relative to other VIPs and hosts in the network.

PRCN-02065: Port(s) {0} are not available on the nodes given

Cause: The ports specified are already being used by some other applications on the nodes given.

Action: Stop the applications that are using these ports or specify different ports and try the command again.

PRCN-02066: Failed to retrieve cluster listener for {0} because it has the type of Single Client Access Name Listener

Cause: Failed to use cluster listener APIs or srvctl commands for specified listener.

Action: Use Single Client Access Name Listener (SCAN listener) APIs or srvctl commands (srvctl <verb> scan_listener) for specified listener name.

PRCN-02067: Port {0} is not available across node(s) "{1}""n

Cause: The port specified is already being used by some other applications across the nodes given.

Action: Stop the application that is using this port or specify a different port and try the command again.

PRCN-02068: Failed to check the port availability

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCN-02069: Unable to retrieve the list of nodes

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCN-02070: Failed to validate network. No interface on {0} matches required network (subnet: {1}, netmask: {2} adapters: {3}).
Cause: The nodes don’t have the configuration for the required network.
Action: Specify a subnet that exists on all nodes, or reconfigure the nodes to ensure that the specified subnet exists on all nodes.

PRCN-02071: Failed to update attribute USE_EVM to {0}
Cause: An attempt to update the attribute value of USE_EVM for ONS failed.
Action: Examine the accompanying error message(s) and respond accordingly.

PRCN-02072: Failed to get multicast port for events from ONS
Cause: An attempt to get multicast port for events from ONS failed.
Action: Examine the accompanying error message(s) and respond accordingly.

PRCN-02073: Failed to remove ONS
Cause: An attempt to remove ONS failed.
Action: Examine the accompanying error message(s) and respond accordingly.

PRCN-02074: Specified check interval of {0} minutes is below the minimum check interval {1} minutes
Cause: The CVU resource check interval specified was less than the minimum check interval.
Action: Retry the operation with a interval greater than or equal to the minimum check interval.

PRCN-02075: Failed to modify the CVU CHECK_INTERVAL attribute to {0}
Cause: CRS was unable to modify the CVU CHECK_INTERVAL attribute.
Action: Make sure that Clusterware stack is up. Make sure that user is an owner or has write permissions to modify the CVU resource. Check for and respond to any accompanying error messages.

PRCN-02076: Failed to retrieve the CVU CHECK_INTERVAL attribute for "{0}" 
Cause: An attempt to retrieve the CHECK_INTERVAL for the CVU cluster resource failed.
Action: Make sure that the Clusterware stack is up. Make sure that the CVU resource has been configured. Check for and respond to any accompanying error messages.

PRCN-02077: Failed to modify the CVU CHECK_RESULTS attribute to "{0}" 
Cause: CRS was unable to modify the CVU CHECK_RESULTS attribute.
Action: Make sure that Clusterware stack is up. Make sure that the CVU resource has been configured. Check for and respond to any accompanying error messages.

PRCN-02078: Failed to retrieve the CVU CHECK_RESULTS for "{0}" 
Cause: An attempt to retrieve the CHECK_RESULTS attribute for the CVU cluster resource failed.
Action: Make sure that the Clusterware stack is up. Make sure that the CVU resource has been configured. Check for and respond to any accompanying error messages.

PRCN-02079: Port {0} is out of the valid range, between 1 and 65535 and cannot be used on any of the nodes given
Cause: The port number that was provided was either less than 1 or greater than 65535.
Action: Make sure the port provided has a value between 1 and 65535.

PRCN-03000: The IPMI configuration failed on all nodes
Cause: The node names were invalid or were valid but had no IPMI device present.
Action: Make sure that all nodes are reachable and the IPMI device exists on those nodes.

PRCN-03001: The IPMI configuration failed on one or more nodes
Cause: There was at least one node with invalid name or with no IPMI device.
Action: Make sure that all nodes are reachable and the IPMI device exists on those nodes.

PRCN-03002: There is no network resource configured for the cluster
Cause: A request to add a listener was rejected due to the lack of a network resource.
Action: Use command 'srvctl add network' to configure the network first, then retry the command.

PRCN-03003: Failed to unregister EONS resource type
Cause: A request to unregister the EONS resource type failed because of the reason provided by an accompanying exception message.
Action: Examine the accompanying error message for details.

PRCN-03004: Listener [0] already exists
Cause: The specified listener was already created.
Action: Use 'srvctl modify listener' to modify attributes if needed.

PRCN-03005: Failed to add or use registered network [0] with network interfaces "[1]" because the network was already registered for network interfaces "[2]"
Cause: The network resource was already registered with different interfaces.
Action: Use the same network interfaces as the one registered with network resource.

PRCN-03006: Failed to add or use registered network [0] with network interfaces "[1]" because the network was already registered with no interface specified
Cause: The network resource was already registered with no user specified interface.
Action: Do not specify network interface as the system decides the network interface.

PRCN-03007: Failed to add or use registered network [0] with network mask "[1]" because the network was already registered for network mask "[2]"
Cause: The network resource was already registered with a different network mask.
Action: Use the same network mask as the one registered with network resource.

PRCN-03008: Failed to add or use registered network [0] with network subnet "[1]" because the network was already registered for network subnet "[2]"
Cause: The network resource was already registered with a different network subnet.
**Action:** Use the same network subnet as the one registered with network resource.
PRCR-01000: Resource [0] already exists  
**Cause:** An attempt was made to create a resource that already exists.  
**Action:** Check the resource using ‘srvctl config <object>’ command and if the resource should not exist then remove it using ‘srvctl remove <object>’ command.

PRCR-01001: Resource [0] does not exist  
**Cause:** An attempt was made to operate on a resource that does not exist.  
**Action:** Check the resource using ‘srvctl config <object>’ command and if the resource does not exist then create it using ‘srvcl add <object>’ command.

PRCR-01002: Resource [0] is already enabled  
**Cause:** An attempt was made to enable a resource that is already enabled.  
**Action:** If the resource is already enabled then no action is needed. Use ‘srvctl status <object>’ command to determine whether it is enabled.

PRCR-01003: Resource [0] is already disabled  
**Cause:** An attempt was made to disable a resource that is already disabled.  
**Action:** If the resource is already disabled then no action is needed. Use ‘srvctl status <object>’ command to determine whether it is disabled.

PRCR-01004: Resource [0] is already running  
**Cause:** An attempt was made to start a resource that is already running.  
**Action:** If the resource is already running then no action is needed. Use ‘srvctl status <object>’ command to determine whether it is running.

PRCR-01005: Resource [0] is already stopped  
**Cause:** An attempt was made to stop a resource that is already stopped.  
**Action:** If the resource is already stopped then no action is needed. Use ‘srvctl status <object>’ command to determine whether it is stopped.

PRCR-01006: Failed to add resource [0] for [1]  
**Cause:** An attempt to add the specified resource has failed.  
**Action:** Check and resolve the underlying exception.

PRCR-01007: Failed to check status of resource [0]  
**Cause:** An attempt to check status of specified resource has failed.  
**Action:** Check the help for the underlying exception.

PRCR-01008: Failed to retrieve version of resource [0]
Cause: An attempt to retrieve version of the specified resource has failed.
Action: Check the help for the underlying exception.

PRCR-01009: Failed to retrieve permissions of resource {0}, ACL {1}
  Cause: Internal error.
  Action: Contact Oracle Support Services.

PRCR-01010: Failed to update permissions of resource {0}
  Cause: An attempt to update permissions of specified resource has failed.
  Action: Check the help for the underlying exception.

PRCR-01011: Failed to enable resource {0}
  Cause: An attempt to enable specified resource has failed.
  Action: Check the help for the underlying exception.

PRCR-01012: Failed to disable resource {0}
  Cause: An attempt to disable specified resource has failed.
  Action: Check the help for the underlying exception.

PRCR-01013: Failed to start resource {0}
  Cause: An attempt to start specified resource on several nodes failed.
  Action: Check the help for the underlying exception.

PRCR-01014: Failed to stop resource {0}
  Cause: An attempt to stop specified resource on several nodes failed.
  Action: Check the help for the underlying exception.

PRCR-01015: Failed to relocate resource {0}
  Cause: An attempt to relocate specified resource has failed.
  Action: Check the help for the underlying exception.

PRCR-01016: Failed to modify resource {0}
  Cause: An attempt to modify specified resource has failed.
  Action: Check the help for the underlying exception.

PRCR-01024: Failed to remove resource {0} on nodes {1}
  Cause: An attempt to remove the resource on the specified nodes failed.
  Action: Check the accompanying error messages for details.

PRCR-01025: Resource {0} is still running
  Cause: The specified resource is not stopped.
  Action: Check the accompanying error messages to decide whether to stop the specified resource.

PRCR-01026: Resource {0} is not running
  Cause: The specified resource is not started.
  Action: Check the accompanying error messages to decide whether to start the specified resource.

PRCR-01028: Failed to remove resource {0}
  Cause: An attempt to remove specified resource failed.
Action: Check the help for the underlying CRSException.

PRCR-01029: Attribute [0] does not exist in resource [1] definition
Cause: An attempt was made to get an attribute which is not defined for that resource type.
Action: Make sure that the attribute exists in the resource definition.

PRCR-01030: Resource attribute name [0] is not valid
Cause: Internal error.
Action: Contact Oracle Support Services.

PRCR-01031: Resource attribute [0] value [1] is not valid
Cause: Specified resource attribute value is not valid.
Action: Try recreating the resource attribute value using srvm APIs or recreating the resource using srvctl commands.

PRCR-01032: Current state of resource [0] is not valid
Cause: Internal error.
Action: Contact Oracle Support Services.

PRCR-01033: Resource type [0] does not exist
Cause: An attempt to retrieve the type has failed.
Action: Make sure that the type exists.

PRCR-01035: Failed to look up CRS resource [0] for [1]
Cause: An attempt to access the specified resource failed because it did not exist.
Action: Check that the specified name and resource type are correct.

PRCR-01036: Failed to retrieve cardinality of the resource [0]
Cause: An attempt to retrieve cardinality of resource has failed.
Action: Examine the accompanying error messages to determine how to respond.

PRCR-01037: Failed to update cardinality of the resource [0] to [1]
Cause: An attempt to set cardinality of the resource has failed.
Action: Examine the accompanying error messages to determine how to respond.

PRCR-01039: Server pool [0] does not exist
Cause: An attempt was made to retrieve the server pool which does not exists.
Action: Make sure that requested server pool exists.

PRCR-01040: Resource [0] is already enabled on node(s) [1]
Cause: An attempt was made to enable a resource that is already enable on nodes.
Action: The status of a resource can be checked by using the 'srvctl status <object>' command.

PRCR-01041: Resource [0] is already disabled on node(s) [1]
Cause: An attempt was made to disable a resource that is already disabled on nodes.
Action: The status of a resource can be checked by using the 'srvctl status <object>' command.

PRCR-01042: Failed to get dependent resources [0] of resource [1]: [2]
Cause: Failed to retrieve dependent resources of the given resource.
Action: Examine the accompanying error messages to determine how to respond.

PRCR-01043: Failed to update dependent resources {0} of resource {1} to resource {2}
Cause: Failed to update dependent resources of the given resource.
Action: Examine the accompanying error messages to determine how to respond.

PRCR-01050: Resource {0} is not configured in Oracle cluster environment
Cause: The environment for the specified resource is not Oracle Clusterware.
Action: The specified commands or APIs can only be used when Oracle Clusterware is running. If the environment is configured as Oracle Restart, use the correspond commands and APIs for Oracle Restart.

PRCR-01051: OracleCM Cluster is not found on node {0}
Cause: The OracleCM Cluster was not found on the specified node because the library for OracleCM Cluster was not found.
Action: Install OracleCM Cluster on the specified node.

PRCR-01052: Failed to find OracleCM Cluster library on node {0}
Cause: Failed to check OracleCM Cluster because of the error in executing the command to find the file /etc/ORCLcluster/oracm/lib/libskgxn2.so.
Action: Make sure that the caller has the read and execute permission for the library file.

PRCR-01053: Vendor Cluster is not found on node {0}
Cause: The Vendor Cluster was not installed and configured on the specified node.
Action: Install and configure the Vendor Cluster on the specified node.

PRCR-01054: Failed to find Vendor Cluster library on node {0}
Cause: Failed to check OracleCM Cluster because of the error in executing the command to find the file /etc/ORCLcluster/lib/libskgxn2.so.
Action: Make sure that the caller has the read and execute permission for the library file.

PRCR-01055: Cluster membership check failed for node {0}
Cause: The specified node does not belong to the cluster.
Action: Check whether the node name is correct.

PRCR-01061: User permissions are insufficient
Cause: User permissions are insufficient to register resource/type.
Action: Make sure the user is crs-user or root.

PRCR-01062: Failed to retrieve attributes of resource {0} on node {1}
Cause: An attempt to retrieve attributes of the resource has failed.
Action: Make sure that resource exists.

PRCR-01063: Failed to create context
Cause: Internal error.
Action: Contact Oracle Support Services.

PRCR-01064: Failed to start resource {0} on node {1}
Cause: An attempt to start the resource has failed.
Action: Make sure that resource is ready to start on the node before starting it.

PRCR-01065: Failed to stop resource {0}
Cause: An attempt to stop the resource failed because the resource wasn't running or the running resource had dependent resources also running.
Action: Check the accompanying messages to identify dependent resources and stop them. Make sure that resource is running before stopping it.

PRCR-01067: Failed to create a filter
Cause: An attempt to create a filter has failed.
Action: Check the help for the underlying exception.

PRCR-01068: Failed to query resources
Cause: An attempt to query the resource failed.
Action: Check the help for the underlying exception.

PRCR-01069: Attribute {0} of {1} {2} not found
Cause: Internal error.
Action: Contact Oracle Support Services.

PRCR-01070: Failed to check if {0} {1} is registered
Cause: Failed to check if resource is registered.
Action: Check the help for the underlying exception.

PRCR-01071: Failed to register or update {0} {1}
Cause: An attempt to register or update the resource failed.
Action: Check the help for the underlying exception.

PRCR-01072: Failed to unregister {0} {1}
Cause: An attempt to unregister specified Oracle clusterware entity failed.
Action: Check the help for the underlying exception.

PRCR-01074: Failed to retrieve attributes for {0} {1}
Cause: Failed to retrieve attributes for specified resource.
Action: Check the help for the underlying exception.

PRCR-01075: Failed to retrieve status for resource {0}
Cause: Failed to retrieve status for specified resource.
Action: Check the help for the underlying exception.

PRCR-01076: Failed to retrieve status for resource {0}: {1} is missed
Cause: Internal error.
Action: Contact Oracle Support Services.

PRCR-01077: Failed to calculate status for resource {0}: {1}/[2]
Cause: Internal error.
Action: Contact Oracle Support Services.

PRCR-01078: Failed to retrieve attributes of resource {0}
Cause: An attempt to retrieve attributes of the resource has failed.
Action: Make sure that resource exists.

PRCR-01079: Failed to start resource {0}
    Cause: An attempt to start the resource has failed.
    Action: Make sure that resource is ready to start before starting it.

PRCR-01085: Unknown typeAsSubstring: {0}
    Cause: Internal error.
    Action: Contact Oracle Support Services.

PRCR-01086: {0} {1} is already registered
    Cause: An attempt to register specified resource failed.
    Action: Make sure that a resource is not registered before register it.

PRCR-01087: Failed to retrieve resource {0} instances
    Cause: Internal error.
    Action: Contact Oracle Support Services.

PRCR-01088: Failed to stop resource {0}; it was not started on node {1}
    Cause: The resource was not started on the node.
    Action: Make sure that resource was started before stopping it.

PRCR-01089: Failed to relocate resource {0}.
    Cause: An attempt to relocate specified resource failed.
    Action: Check the help for the underlying exception.

PRCR-01090: Failed to relocate resource {0}. It is not running.
    Cause: The resource was not started.
    Action: Make sure that resource was started before relocating it.

PRCR-01091: Failed to relocate resource {0}. It is not running on node {1}.
    Cause: The resource was not started on the node.
    Action: Make sure that resource was started before relocating it.

PRCR-01092: Failed to relocate resource {0}. It is running on more than one node
    Cause: The resource was started on more than one node.
    Action: Make sure that resource is running on one node only before relocating it.

PRCR-01093: Failed to relocate resource {0}. It is already running on node {1}
    Cause: The resource is running that node.
    Action: Make sure that resource is not running on a node before relocating it.

PRCR-01094: Failed to start resources on node {0}; {1}
    Cause: Resources defined by filter cannot be started on the node.
    Action: Make sure that resources are not running and ready to run before starting them. Make sure that the node is online.

PRCR-01095: Failed to start resources using filter {0}
    Cause: Resources defined by filter cannot be started.
    Action: Make sure that resources are not running and ready to run before starting them.
PRCR-01096: Filter cannot be null
  Cause: An attempt to use filter has failed.
  Action: Make sure that a filter is provided.

PRCR-01097: Resource attribute not found: {0}
  Cause: Requested resource attribute not found.
  Action: Make sure that resource has requested attribute.

PRCR-01098: Could not set rolling upgrade mode {0}
  Cause: An attempt to start the resource in rolling upgrade mode has failed.
  Action: Make sure that the correct LD_LIBRARY_PATH is set and all shared libraries are present.

PRCR-01099: Cannot start resource {0} on {1} additional nodes because it would exceed the resource cardinality {2}. Resource is already running on {3} nodes
  Cause: Resource cannot be started because of its cardinality restriction.
  Action: Make sure that number of additional nodes does not exceed the resource cardinality.

PRCR-01100: Cannot start resource {0} on {1} nodes because it would exceed the resource cardinality {2}
  Cause: Resource cannot be started because of its cardinality restriction.
  Action: Make sure that number of nodes does not exceed the resource cardinality.

PRCR-01101: Cannot stop resource {0} on {1} nodes, it is running on {2} nodes.
  Cause: The resource does not have enough running instances to stop.
  Action: Make sure that resource has enough running instances to stop.

PRCR-01102: Failed to verify if user {0} has CRS administrator role
  Cause: Failed to verify if the user has CRS administrator role.
  Action: Resolve the reported error message and retry.

PRCR-01104: Unsupported relocate option {0}
  Cause: Internal error.
  Action: Contact Oracle Support Services.

PRCR-01105: Failed to relocate resource {0} to node {1}
  Cause: An attempt to relocate the resource to the specified node has failed.
  Action: Examine accompanying message(s) that provide details of the error, and respond accordingly.

PRCR-01106: Failed to relocate resource {0} from node {1} to node {2}
  Cause: An attempt to relocate the resource from the specified node to another has failed.
  Action: Check the help for the underlying exception.

PRCR-01107: Error while trying to set default network as dependent resource for {0}
  Cause: An attempt to set default network dependency for the specified resource failed.
  Action: Examine the accompanying error message(s) for details.

PRCR-01108: ONS cannot be created because default network is not configured.
Cause: An attempt was made to create ONS resource with out creating the dependent default network resource.
Action: Network resource can be created using 'srvctl add nodeapps' command. Create the network resource and try this command again.

PRCR-01109: Failed to remove attributes "[1]" from resource [0]
Cause: Possible reasons: Oracle Clusterware stack might not be active, CRS resource may not exist, or the CRS resource may not have given attributes set.
Action: Make sure that Oracle Clusterware is active, the CRS resource exists and has given attributes set.

PRCR-01110: Failed to retrieve processed attributes of resource [0] for node [1]
Cause: Oracle Clusterware stack was not active or CRS resource did not not exist.
Action: Make sure that Oracle Clusterware is active, the CRS resource exists.

PRCR-01111: Failed to retrieve processed attributes of resource [0] for node [1]
Cause: requested CRS resource did not exist.
Action: Make sure that the CRS resource exists.

PRCR-01112: Failed to retrieve current event sequence number
Cause: Oracle Clusterware stack was not active.
Action: Make sure that Oracle Clusterware is active.

PRCR-01113: Failed to create detailed error message, rc = [0]
Cause: Internal error
Action: Contact Oracle Support Services.

PRCR-01114: Failed to relocate servers [0] into server pool [1]
Cause: Failed to relocate servers into the given server pool. This message may be accompanied by others providing additional details. A likely cause is violation of defined configuration attributes such as pool MIN_SIZE, SERVER_NAMES etc.
Action: If the problem stems from violating configuration attributes, either modify the attributes or reformulate the request. Otherwise, contact Oracle Support Services.

PRCR-01115: Failed to find entities of type [0] that match filters [1] and contain attributes [2]
Cause: Failed to look up entities of given type that match given filters. This message may be accompanied by others providing additional details. A likely cause is that current user does not have permissions to read attributes of entities of given type.
Action: If lack of permissions is the cause of this failure, then use 'srvctl config <object> -a' command to find the current owner of the entity and retry the query as that owner user. Otherwise, contact Oracle Support Services.

PRCR-01116: [0] [1] cannot be created and registered now
Cause: Oracle Clusterware stack could not create and register an object.
Action: Check the help for the underlying exception.

PRCR-01117: Failed to stop resources using filter [0]
Cause: An attempt to stop resources using specified filter failed.
Action: Respond based on the accompanying exception message.
PRCR-01118: Failed to generate resource permissions for the resource
  Cause: Creation of the Access Control List (permission) structures for the resource failed. This message is accompanied by others providing details of the error.
  Action: Respond based on the accompanying exception message(s).

PRCR-01119: Failed to look up CRS resources of {0} type
  Cause: An attempt to find the resource for the specified resource type failed because it did not exist.
  Action: Create a resource of the type.

PRCR-01120: Resources are already running: {0}
  Cause: An attempt to start resources failed because they are already running. For detailed information about resources review the accompanying error messages.
  Action: None

PRCR-01121: Value of parameter "{0}" cannot be null or empty
  Cause: An attempt to construct ACFS resource name failed due to null or empty value for the indicated parameter.
  Action: This is an internal error. Contact Oracle Support Services.

PRCR-01122: Resource type {0} is not registered with Oracle Clusterware
  Cause: Given resource type was not registered.
  Action: Make sure that required resource type is registered.

PRCR-01123: Failed to rename resource type {0}
  Cause: An attempt was made to change name of the given resource type. Resource types cannot be renamed.
  Action: None

PRCR-01124: Failed to check resource {0}
  Cause: An attempt to check the resource failed.
  Action: Correct any problems reported in accompanying messages. Make sure that resource is registered with Oracle Clusterware.

PRCR-01125: Failed to check resource {0} on node {1}
  Cause: An attempt to check the resource on specified node failed.
  Action: Correct any problems reported in accompanying messages. Make sure that resource is registered with Oracle Clusterware.

PRCR-01126: Failed to relocate resource {0} from node {1}
  Cause: An attempt to relocate the resource from the specified node has failed.
  Action: Examine the accompanying error messages and respond accordingly.

PRCR-01127: Resource {0} does not have attributes {1} on per node basis
  Cause: An attempt to remove given attributes failed because these attributes do not exist on per node basis.
  Action: Retry after supplying attributes that exist on per node basis.

PRCR-01128: Resource {0} does not have attributes {1} on node {2}
  Cause: An attempt to remove given attributes failed because these attributes do not exist on the given node.
Action: Retry after supplying attributes that exist on the node.

PRCR-01129: Failed to upgrade resource type {0}
   Cause: An attempt to upgrade specified resource type failed.
   Action: Examine the accompanying error message(s) and respond accordingly.

PRCR-01130: Failed to get the name for resource type {0} from resource type enum class
   Cause: An attempt to get the name of the resource type for the given resource type enum class.
   Action: Ensure that the resource type enum class contains the proper resource type name.

PRCR-01131: CVU resource cannot be created because default network is not configured.
   Cause: An attempt was made to create CVU resource without creating the dependent default network resource.
   Action: Network resource can be created using 'srvctl add nodeapps' command. Create the network resource and try this command again.

PRCR-01132: Failed to stop resources using a filter
   Cause: An attempt to stop resources failed because resources were not running or running resources had dependent resources also running.
   Action: Check the accompanying messages to identify dependent resources and stop them. Make sure that resources are running before stopping them.

PRCR-01133: Failed to stop database {0} and its running services
   Cause: An attempt to stop given database and its running services failed.
   Action: Correct any problems reported in accompanying messages.

PRCR-01134: Failed to stop database {0} and its running services on nodes {1}
   Cause: An attempt to stop the given database and its running services failed on the specified nodes.
   Action: Correct any problems reported in accompanying messages.

PRCR-01135: Failed to check if node with node number 0 exists
   Cause: An attempt failed to determine whether a node numbered 0 exists.
   Action: Follow action specified for accompanying message.
PRCS-01000: Failed to get enabled status of [0]
   Cause: An attempt to check whether a server is enabled failed.
   Action: Examine the accompanying error messages for details.

PRCS-01001: Failed to enable [0]
   Cause: An attempt to enable the specified server failed.
   Action: Examine the accompanying error messages for details.

PRCS-01002: Failed to disable [0]
   Cause: An attempt to disable the specified server failed.
   Action: Examine the accompanying error messages for details.

PRCS-01005: Failed to create server [0]
   Cause: An attempt to create the specified server failed.
   Action: Examine the accompanying error messages for details.

PRCS-01006: Failed to get server for node [0]
   Cause: An attempt to get server for the specified node failed.
   Action: Examine the accompanying error messages for details.

PRCS-01007: Server pool [0] already exists
   Cause: The specified server pool already exists.
   Action: Examine the accompanying error messages for details.

PRCS-01008: Server pool [0] does not exist
   Cause: The specified server pool does not exist.
   Action: Use the srvctl command to create server pool.

PRCS-01009: Failed to create server pool [0]
   Cause: An attempt to create specified server pool failed.
   Action: Examine the accompanying error messages for details.

PRCS-01010: Failed to get [0] of server pool [1]
   Cause: An attempt to get the attribute value of the specified server pool failed.
   Action: Examine the accompanying error messages for details.

PRCS-01011: Failed to modify server pool [0]
   Cause: An attempt to modify the specified server pool failed.
Action: Examine the accompanying error messages for details.

PRCS-01012: Failed to remove server pool {0}
Cause: Failed to unregister server pool. This message is followed by the reason for failure.
Action: Retry after resolving the issue reported in the failure message.

PRCS-01013: Failed to look up server pool {0}
Cause: An attempt to get the specified server pool failed.
Action: Examine the accompanying error messages for details.

PRCS-01014: Server {0} is already part of server pool {1}
Cause: An attempt to add the server as a candidate for the specified server pool failed because the server is already in the pool's SERVER_NAME attribute.
Action: No action is needed.

PRCS-01015: Server {0} is not part of server pool {1}
Cause: An attempt to remove the server from the SERVER_NAME attribute of the server pool failed because the specified server is not in the pool's SERVER_NAME attribute.
Action: Add the server to the server pool.

PRCS-01016: Failed to resolve Single Client Access Name {0}
Cause: An attempt to resolve specified Single Client Access Name to a list of IP addresses failed because Single Client Access Name could not be resolved in DNS using nslookup or using other lookup methods.
Action: Check whether the specified Single Client Access Name is correct. Review the underlying error messages that provide the details of which resource failed to resolve. Check the cause and action for the individual error. If Single Client Access Name should be resolved in DNS, check the configuration of Single Client Access Name in DNS.

PRCS-01017: Failed to configure Single Client Access Name {0}
Cause: An attempt to add cluster configuration for Single Client Access Name failed.
Action: Review the underlying error messages that provide the details of which resources failed to create. Check the cause and action for the individual resource creation failure.

PRCS-01018: Failed to add cluster configuration for Single Client Access Name listener {0}
Cause: An attempt to configure Single Client Access Name listener failed because endpoints were not specified correctly or other reasons.
Action: Review the underlying error messages that provide the details of which resources failed to create. Check the cause and action for the individual resource creation failure. If the endpoints were not specified correctly, correct endpoints.

PRCS-01019: Failed to remove the configuration for Single Client Access Name listener {0}
Cause: An attempt to remove the configuration of Single Client Access Name listener failed because other resources depended on it or other reasons.
Action: Review the underlying error messages that provide the details of which resources failed to remove. Stop Single Client Access Name listener resource
before removing it. Can consider using force flag to remove Single Client Access Name listener resources if no other resources depend on it.

**PRCS-01020: Failed to enable Single Client Access Name resources {0}**

*Cause:* An attempt to enable Single Client Access Name resources failed.

*Action:* Review the underlying error messages that provide the details of which resources failed to enable. Check the cause and action for the individual resource creation failure.

**PRCS-01021: Failed to disable Single Client Access Name resources {0}**

*Cause:* An attempt to disable Single Client Access Name resources failed because current user did not have sufficient privileges to perform this operation or other reasons.

*Action:* Review the underlying error messages that provide the details of which resources failed to disable. Check the cause and action for the individual resource failure. Make sure that the user has root privileges on Linux/Unix's and Administrator on Windows.

**PRCS-01022: Failed to start Single Client Access Name resources {0}**

*Cause:* An attempt to start Single Client Access Name resources failed.

*Action:* Review the underlying error messages that provides the details of which resources failed to start.

**PRCS-01023: Failed to stop Single Client Access Name resources {0}**

*Cause:* An attempt to stop Single Client Access Name resources failed because Single Client Access Name listeners were not stopped/relocated or other reasons.

*Action:* Review the underlying error messages that provides the details of which resources failed to stop. Check the cause and action for the individual resource creation failure. Stop Single Client Access Name listeners first or use force flag to stop Single Client Access Name Virtual Internet Protocol(VIP) resources if no other resources depend on them.

**PRCS-01024: Failed to remove Single Client Access Name Virtual Internet Protocol(VIP) resources {0}**

*Cause:* Could not remove Single Client Access Name Virtual Internet Protocol(VIP) resources because the resources are running or Single Client Access Name listeners depend on or other reasons.

*Action:* Review the underlying error messages that provides the details of which resources failed to remove. Stop the Single Client Access Name VIPs and Single Client Access Name listeners, then remove Single Client Access Name listeners. Or use force flag to remove Single Client Access Name Virtual Internet Protocol(VIP) resources if no other resources depend on them.

**PRCS-01025: Could not find Single Client Access Name Virtual Internet Protocol(VIP) resources {0}**

*Cause:* Could not find Single Client Access Name Virtual Internet Protocol(VIP) resources.

*Action:* Check the resource name and check the underlying error messages that provides the details of which resources failed to be found.

**PRCS-01026: Could not find Single Client Access Name listener resources {0}**

*Cause:* An attempt to find Single Client Access Name listener resources failed.
**Action:** Check the resource name. Review the underlying error messages that provides the details of which resources failed to be found.

**PRCS-01027: Could not find any Single Client Access Name listener with ordinal number {0}**

**Cause:** Could not find the Single Client Access Name listener for specified ordinal number.

**Action:** Use `srvctl config scan_listener` to check available ordinal number.

**PRCS-01028: Single Client Access Name listeners already exist**

**Cause:** Single Client Access Name listeners were already created.

**Action:** Use `srvctl modify scan_listener` to modify attributes if needed.

**PRCS-01031: Failed to modify Single Client Access Name listeners using endpoints {0}**

**Cause:** An attempt to modify Single Client Access Name listeners failed.

**Action:** Review the underlying error messages that provides the details of which resources failed to modify. Resolve the reported problem and retry.

**PRCS-01032: No server pool was found that matches the query {0}**

**Cause:** An attempt to find server pools that match the given query found no matching server pool.

**Action:** Either configure a server pool via `srvctl add srvpool` command or modify existing a server pool via `srvctl modify srvpool` command to match the query and retry the request.

**PRCS-01034: Failed to modify Single Client Access Name {0}**

**Cause:** Failed to modify the configuration of Single Client Access Name because the endpoints were not specified correctly or extra Single Client Access Name VIPs could not be removed or other reasons.

**Action:** Review the underlying error messages that provides the details of which resources failed to modify. Resolve the reported problem and retry. If to modify the endpoints, specify correct endpoints. If to update the number of Single Client Access Name VIPs, stop the Single Client Access Name listeners that depend on.

**PRCS-01035: Invalid number of TCP ports ({0}) for SCAN Listener**

**Cause:** Either no port was specified, or more than one port was specified.

**Action:** Specify only one port number for TCP protocol for SCAN Listener.

**PRCS-01037: Single Client Access Name VIPs already exist**

**Cause:** An attempt was made to add SCAN VIPs when SCAN VIPs are already configured. Only one SCAN per cluster can be configured.

**Action:** Remove existing SCAN and add new SCAN. Or modify scan to use new SCAN name or have the existing SCAN name to map to different SCAN VIPs.

**PRCS-01038: Failed to find Single Client Access Name Virtual Internet Protocol(VIP) associated with listener {0}**

**Cause:** Cannot find Single Client Access Name Virtual Internet Protocol(VIP) associated with the given listener.

**Action:** Examine the accompanying error messages to determine how to respond.

**PRCS-01039: Failed to find Single Client Access Name listener associated with the given Virtual Internet Protocol(VIP) {0}**
**Cause:** Cannot find Single Client Access Name listener associated with the given Virtual Internet Protocol(VIP).

**Action:** Examine the accompanying error messages to determine how to respond.

**PRCS-01040: User {0} does not have CRS administrator role**

**Cause:** Specified user did not have CRS administrator role.

**Action:** Grant CRS administrator role to the user by using `crsctl add crs administrator -u <user_name>` command and retry.

**PRCS-01041: Invalid builtin server pool name {0}**

**Cause:** The specified builtin server pool name is invalid.

**Action:** Provide a valid builtin server pool name. It can be Generic or Free.

**PRCS-01042: Server pool {0} is not hosting any database currently**

**Cause:** No database could be found referencing the given server pool.

**Action:** Create database configuration using `srvctl add database ... -g <server_pool>` command and retry.

**PRCS-01043: Server pool {0} is not hosting any database service currently**

**Cause:** No service could be found referencing the given server pool.

**Action:** Create service configuration using `srvctl add service ... -g <server_pool>` command and retry.

**PRCS-01046: Name {0} is not valid**

**Cause:** Specified name was not valid.

**Action:** Specify a valid string name, and retry.

**PRCS-01047: Minimum size of {0} is not valid**

**Cause:** Specified minimum size was not valid.

**Action:** Specify minimum size to be an integer equal to or greater than zero and less than the maximum size (other than -1), and retry.

**PRCS-01048: Maximum size of {0} is not valid**

**Cause:** Specified maximum size was not valid.

**Action:** Specify maximum size to be an integer greater than or equal to -1 and retry.

**PRCS-01049: Importance of {0} is not valid**

**Cause:** Specified importance was not valid.

**Action:** Specify importance value to be an integer greater than or equal to 0 and retry.

**PRCS-01050: Could not add GNS VIP {0} because another one with name {1} already exists**

**Cause:** The name of the GNS VIP to be added matches one that already existed.

**Action:** Specify another name.

**PRCS-01051: Could not add GNS VIP using network {0} because registered another one using network {1} already exists**

**Cause:** The network specified for the GNS VIP to be added matches one that already existed.

**Action:** Specify another network.
PRCS-01053: failed to resolve address for Grid Naming Service VIP {0}: {1}
  Cause: The address specified for the GNS VIP could not be resolved.
  Action: Specify a valid address.

PRCS-01054: Failed to configure VIP for Grid Naming Service VIP {0}
  Cause: The creation of the GNS VIP failed.
  Action: Examine the accompanying error message for details.

PRCS-01055: Failed to modify Grid Naming Service VIP {0}
  Cause: The modification of the GNS VIP failed.
  Action: Examine the accompanying error message for details.

PRCS-01056: Could not find resources for Grid Naming Service Virtual Internet Protocol(VIP) {0}
  Cause: The specified GNS VIP did not exist.
  Action: Specify a valid GNS VIP name.

PRCS-01057: INTERNAL ERROR: no attributes specified.
  Cause: No attributes to modify GNS with were passed to a method.
  Action: This is an internal error. Please contact Oracle Customer Support.

PRCS-01058: INTERNAL ERROR: unsupported query type: "${0}"
  Cause: The type of query to be made to GNS is unrecognized.
  Action: This is an internal error and should not be visible. Please contact Oracle Customer Support.

PRCS-01059: Failed to get sub-server pools of server pool {0}
  Cause: Failed to look up PARENT_POOLS attribute of server pools containing the given server pool name. Ensure that current user has read permissions on the given server pool and its sub-server pools.
  Action: Grant read permissions on the given server pool and its sub-server pools.

PRCS-01060: Failed to relocate servers {0} into server pool {1}
  Cause: Failed to relocate servers into the given server pool. This message may be accompanied by others providing additional details. A likely cause is violation of defined configuration attributes such as pool MIN_SIZE, SERVER_NAMES etc.
  Action: If the problem stems from violating configuration attributes, either modify the attributes or reformulate the request. Otherwise, contact Oracle Support Services.

PRCS-01061: Failed to find running database instances hosted by server pool {0}
  Cause: Failed to find running database instances hosted by the servers in the given server pool. This message is accompanied by others providing additional details. A likely cause is that current user may not have permissions to query profiles of databases hosted by the given server pool.
  Action: If lack of permissions is the cause of this failure, then use `srvctl config <object>` -a` command to find the current owner of entity and retry the query as that owner user. Otherwise, contact Oracle Support Services.

PRCS-01062: Failed to determine whether server pool {0} has any parents or children
  Cause: Failed to find parents or children of the given server pool. A likely cause is that current user may not have permissions to query profile of given server pool or
profiles of other server pools whose PARENT_POOLS attribute contains this server pool name.

**Action:** If lack of permissions is the cause of this failure, then use 'srvctl config serverpool <serverpool> -a' command to find the current owner of the server pool and retry the query as that owner user. Otherwise, contact Oracle Support Services.

PRCS-01063: Server pool [0] with minimum size [1], maximum size [2], importance [3] and server list ([4]) can not be created

**Cause:** Specified server pool cannot be created because of the reason provided by an accompanying exception message.

**Action:** Respond based on the accompanying exception message.

PRCS-01064: Server [0] is not assigned to any server pool

**Cause:** Given server is not yet recognized by Oracle Clusterware and therefore is not active in any server pool.

**Action:** Check state of the server using 'crsctl stat server <server> -f' and contact Oracle Support Services.

PRCS-01064: Server [0] is not assigned to any server pool

**Cause:** Given server is not yet recognized by Oracle Clusterware and therefore is not active in any server pool.

**Action:** Check state of the server using 'crsctl stat server <server> -f' and contact Oracle Support Services.

PRCS-01065: GNS is not configured.

**Cause:** GNS has not been configured on the cluster.

**Action:** Configure GNS by executing "srvctl add gns".

PRCS-01066: Server group [0] with server list ([1]) can not be created

**Cause:** Specified server group cannot be created because of the reason provided by an accompanying exception message.

**Action:** Respond based on the accompanying exception message.

PRCS-01067: Failed to find online database instances hosted by server pool [0]

**Cause:** Failed to find online database instances hosted by the servers in the given server pool. This message is accompanied by others providing additional details. A likely cause is that current user may not have permissions to query profiles of databases hosted by the given server pool.

**Action:** If lack of permissions is the cause of this failure, then use 'srvctl config <object> -a' command to find the current owner of the entity and retry the query as that owner user. Otherwise, contact Oracle Support Services.

PRCS-01068: Oracle Clusterware server entity for node [0] does not exist

**Cause:** The server entity for the specified node does not exist.

**Action:** Start Oracle Clusterware on the given node and retry.

PRCS-01069: Label [0] in GNS domain name [1] does not follow RFC-1035 convention

**Cause:** The specified portion of the GNS domain name does not follow RFC-1035 label conventions.
**Action**: Specify a domain name that follows RFC-1035 conventions. According to RFC-1035 conventions, the domain name consists of a set of labels separated by ".". A label must begin with an alphabetic character and can contain only alphanumerics and "-" (dash or minus character), end with an alphanumeric, and be no more than 63 characters long.

**PRCS-01070**: Label {0} part of GNS domain name {1} is too long

**Cause**: The specified portion of the GNS domain name does not follow RFC-1035 label conventions, as it is longer than 63 characters.

**Action**: Specify a domain name that follows RFC-1035 conventions. The domain name consists of a set of labels separated by ".". Label must begin with an alphabetic character and can contain only alphanumeric characters and "-" (dash or minus character), end with an alphanumeric and be no more than 63 characters long.

**PRCS-01071**: An error occurred while trying to look up IP address for domain name {0}

**Cause**: An error occurred while trying to translate the indicated fully domain qualified name (FDQN) to IP addresses.

**Action**: Make sure that name servers on local node are correctly configured. If the domain in the FDQN is GNS domain make sure that DNS has been set up to forward request to GNS and GNS resource is online. Make sure that there are no firewalls between the local node and the name servers.

**PRCS-01072**: Failed to create server pool with reserved name {0}

**Cause**: Request to create the specified server pool was rejected because specified server pool name is the name of builtin server pool of Oracle Clusterware.

**Action**: Supply a server pool name other than the builtin server pool name (Generic or Free) of Oracle Clusterware and retry.

**PRCS-01073**: The specified GNS logging level {0} was less than the expected range of {1} to {2}

**Cause**: The log_level value in the ‘srvcnt start gns -l <log_level>’ command was less than the minimum limit.

**Action**: Ensure that the log_level value is within the valid range.

**PRCS-01074**: The specified GNS logging level {0} was greater than the expected range of {1} to {2}

**Cause**: The log_level value in the ‘srvcnt start gns -l <log_level>’ command was greater than the maximum limit.

**Action**: Ensure that the log_level value is within the valid range.

**PRCS-01075**: GNS Domain name {0} ends with invalid character {1}

**Cause**: The specified GNS domain name ends with an invalid character and does not follow RFC-1035 label conventions.

**Action**: Specify a domain name that follows RFC-1035 conventions. According to RFC-1035 conventions, the domain name consists of a set of labels separated by ".". A label must begin with an alphabetic character and can contain only alphanumeric characters or "-" (dash or minus character), end with an alphanumeric, and be no more than 63 characters long.

**PRCS-01076**: Invalid Single Client Access Name {0}. The subnet {1} of SCAN VIP {2} differs from the subnet {3} of network {4}
Cause: The SCAN VIPs resolved from the specified Single Client Access Name are in a subnet that differs from the network's subnet.

Action: Use the SCAN name that can be resolved to the SCAN VIPs in the same subnet of network resource.
PRCT-01000: File path is null
  Cause: The supplied path is set to null.
  Action: Oracle internal error. Contact customer support.

PRCT-01001: Node name is null
  Cause: The supplied node name is set to null.

PRCT-01003: Failed to run "[0]" on node "[1]"
  Cause: Failed to execute the specified command on the specified node.

PRCT-01004: Directory name passed was null
  Cause: The supplied directory name is set to null.

PRCT-01005: Directory [0] does not exist
  Cause: The supplied directory path does not exist.
  Action: Oracle internal error. Contact customer support.

PRCT-01006: Failed to retrieve cluster name from node "[0]"
  Cause: Failed to get the cluster name using 'olsnodes -c' from the specified node.
  Action: Execute 'olsnodes -c' from the specified node and check the output of the command. Fix the problem according to the error message given in the command output.

PRCT-01007: Failed to retrieve local node name
  Cause: Underlying call failed to get the local hostname.
  Action: Please check the underlying error message.

PRCT-01008: Failed to retrieve node names
  Cause: Failed to get the node names using 'olsnodes' command.
  Action: Execute command 'olsnodes' and check the output of the command. Fix the problem according to the error message given in the command output.

PRCT-01009: crsctl execution failed. Detailed error: [0]
  Cause: Failed to execute crsctl command.
  Action: Examine the accompanying error message for details.
PRCT-01010: crsctl execution failed on node {0}. Detailed error: {1}
  Cause: Failed to execute crsctl command on the specified node.
  Action: Examine the accompanying error message for details.

PRCT-01011: Failed to run '{0}', {1}
  Cause: Failed to execute the specified command on the local node.
  Action: Execute the specified command from the console and check the result. Fix the problem according to the error message given in the command output.

PRCT-01012: Invalid file path {0}
  Cause: The supplied path does not exist.
  Action: Oracle internal error. Contact customer support.

PRCT-01013: Failed to start remote execution server on local node.
  Cause: A remote execution server is required on this platform, but an attempt to start one on this node failed. This message is accompanied by other(s) providing details on the failure.
  Action: Correct the problem indicated by the accompanying error messages. On Windows systems, make sure that the current user has authority to remove and create directories and files in the Temp directory and to create and delete registry entries.

PRCT-01014: Internal error: {0}
  Cause: An internal error occurred. The included value is an internal identifier.

PRCT-01050: Failed to parse output returned by kfod when executing kfod at location {0}
  Cause: Failed to parse the output returned by executing kfod because the output string is null or has fewer rows than expected
  Action: This is an internal error. Contact Oracle Support Services.

PRCT-01051: Failed to parse the output returned by kfod for node {0} when executing kfod at location {1}
  Cause: Failed to parse the output returned by executing kfod on the specified node because the output string is null or has fewer rows than expected.
  Action: This is an internal error. Contact Oracle Support Services.

PRCT-01052: Failed to parse output {0} returned by kfod when executing kfod at location {1}
  Cause: Failed to parse the output returned by executing kfod because the output has fewer columns than expected.
  Action: This is an internal error. Contact Oracle Support Services.

PRCT-01053: Failed to parse output {0} returned by kfod for node {1} when executing kfod at location {2}
  Cause: Failed to parse the output returned by executing kfod on the specified node because the output has fewer columns than expected.
  Action: This is an internal error. Contact Oracle Support Services.

PRCT-01054: Fail to retrieve ASM active version for local node
Cause: Failed to get the active version of ASM by executing 'kfod nohdr=true op=version hostlist=<hostlist>'.
Action: This is an internal error. Contact Oracle Support Services.

PRCT-01055: Fail to retrieve ASM active version for node {0}. kfod execution failed at location {1}. Detailed error: {2}
Cause: Failed to get the active version of ASM by executing 'kfod nohdr=true op=version hostlist=<hostlist>' on the specified node.
Action: Examine the accompanying error messages for details.

PRCT-01056: Fail to retrieve ASM instance type. kfod execution failed at location {0}. Detailed error: {1}
Cause: Failed to get the instance type for ASM instance by executing 'kfod nohdr=true op=version'.
Action: Examine the accompanying error messages for details.

PRCT-01057: The value of ASM instance type {0} is not correct
Cause: The value of ASM instance type is invalid.
Action: The instance type of ASM can only be YES or NO.

PRCT-01058: Fail to check if ASM is running on node {0}. kfod execution failed at location {1}. Detailed error: {2}
Cause: Failed to check whether ASM is running by executing 'kfod nohdr=true op=insts hostlist=<hostlist>'.
Action: Examine the accompanying error messages for details.

PRCT-01059: Fail to retrieve list of disk group names for node {0}. kfod execution failed at location {1}. Detailed error: {2}
Cause: Failed to get the diskgroup names by executing 'kfod nohdr=true op=groups hostlist=<hostlist>'.
Action: Examine the accompanying error messages for details.

PRCT-01100: Failed to retrieve ACFS active version for local node
Cause: Failed to execute acfsutil to retrieve the ACFS active version on the local node.
Action: Review the underlying error messages that provides the details of why acfsutil execution failed. Resolve the reported problem and retry.

PRCT-01101: Failed to retrieve ACFS active version for node {0}. acfsutil execution failed at file location {1}. Detailed error: {2}
Cause: Failed to execute acfsutil to retrieve the ACFS active version on the supplied node.
Action: Review the underlying error messages that provides the details of why acfsutil execution failed. Resolve the reported problem and retry.

PRCT-01102: Failed to parse output when executing acfsutil at file location {0}
Cause: Unable to parse output returned by acfsutil.
Action: Oracle internal error. Contact customer support.

PRCT-01103: Failed to parse the output for node {0} when executing acfsutil at file location {1}
Cause: Unable to parse output returned by acfsutil on the supplied node.
Action: Oracle internal error. Contact customer support.

PRCT-01104: Failed to parse output \{0\} when executing acfsutil at file location \{1\}
Cause: Unable to parse output returned by acfsutil at specified location.
Action: Oracle internal error. Contact customer support.

PRCT-01105: Failed to parse output \{0\} for node \{1\} when executing acfsutil at file location \{2\}
Cause: Unable to parse output returned by acfsutil at specified location on the supplied node.
Action: Oracle internal error. Contact customer support.

PRCT-01109: Failed to get diskgroup names for node \{0\}
Cause: Unable to parse diskgroup names returned by acfsutil on the supplied node.
Action: Oracle internal error. Contact customer support.

PRCT-01111: Received empty result while getting ACFS Mount Points on node \{1\}
Cause: The output returned by acfsutil is empty.
Action: Oracle internal error. Contact customer support.

PRCT-01114: Execution of acfsutil command failed on node \{0\} for location \{1\}
Cause: Failed to execute acfsutil on the supplied node at the specified location.
Action: Review the underlying error messages that provides the details of why acfsutil execution failed. Resolve the reported problem and retry.

PRCT-01115: Execution of acfsutil failed on node \{0\} with result \{1\}
Cause: Failed to execute acfsutil on the supplied node.
Action: Review the underlying error messages that provides the details of why acfsutil execution failed. Resolve the reported problem and retry.

PRCT-01116: Invalid partition path \{0\} specified to acfsutil on node \{1\}
Cause: The supplied path path does not exist.
Action: Supply a valid partition path and retry.

PRCT-01117: Received empty result while getting ACFS Disk Groups on node \{1\}
Cause: The output returned by acfsutil is empty.
Action: Oracle internal error. Contact customer support.

PRCT-01118: Received empty result while getting total space at file location \{0\} on node \{1\}
Cause: The output returned by acfsutil is empty.
Action: Oracle internal error. Contact customer support.

PRCT-01119: Received empty result while getting free space at file location \{0\} on node \{1\}
Cause: The output returned by acfsutil is empty.
Action: Oracle internal error. Contact customer support.

PRCT-01120: A NULL path has been specified for the location on node \{0\}
Cause: A null path was provided for the location.
Action: Oracle internal error. Contact customer support.
PRCT-01121: Execution of acfsutil failed on local node with result {0}
    Cause: Execution of acfsutil failed on the local node.
    Action: Review the underlying error messages that provides the details of why
            acfsutil execution failed. Resolve the reported problem and retry.

PRCT-01122: Received empty result while getting mountpoint for path {0} on the
    local node
    Cause: acfsutil returned an empty value when querying for the mountpoint of a
            specified path.
    Action: Oracle internal error. Contact customer support.

PRCT-01123: The mountpoint is either set to null or empty
    Cause: The supplied mountpoint is either an empty string or is set to null.
    Action: Oracle internal error. Contact customer support.

PRCT-01124: Received empty result while getting volume device for mountpoint {0}
    on the local node
    Cause: acfsutil returned an empty value when querying for the volume device of
            a specified mountpoint.
    Action: Oracle internal error. Contact customer support.

PRCT-01125: The volume device is either set to null or empty
    Cause: The supplied volume device is either an empty string or is set to null.
    Action: Oracle internal error. Contact customer support.

PRCT-01126: Received empty result while getting mountpoint for volume device {0}
    on the local node
    Cause: acfsutil returned an empty value when querying for the volume device of
            a specified mountpoint.
    Action: Oracle internal error. Contact customer support.

PRCT-01127: Received empty result while getting all volume devices on the local
    node
    Cause: No ACFS volume devices has been created.
    Action: Use usmca to create ACFS volume devices.

PRCT-01128: ACFS is not supported on this operating system
    Cause: ACFS is not supported on the underlying operating system.
    Action: Run srvctl filesystem command on a supported operating system.

PRCT-01129: Execution of usm_driver_state failed on local node with result {0}
    Cause: Execution of usm_driver_state failed on the local node
    Action: Review the underlying error messages that provides the details of why
            usm_driver_state execution failed. Resolve the reported problem and retry.

PRCT-01130: Execution of advmutil failed on local node with result {0}
    Cause: Execution of advmutil failed on the local node
    Action: Review the underlying error messages that provides the details of why
            advmutil execution failed. Resolve the reported problem and retry.

PRCT-01131: Failed to retrieve mount point for volume device {0}
    Cause: No ACFS filesystem was mounted for the specified volume device.
Action: Mount the filesystem and retry.

PRCT-01149: Failed to retrieve cluster name
Cause: The olsnodes command executed successfully, but there was no output.
Action: This is an internal error. Contact Oracle Support Services.

PRCT-01150: Failed to retrieve cluster name
Cause: Clusterware is not running.
Action: Make sure the clusterware is running.

PRCT-01151: Failed to retrieve cluster nodes status
Cause: Clusterware is not running.
Action: Make sure the clusterware is running.

PRCT-01152: Received empty result while getting cluster nodes Status Map
Cause: The olsnodes command executed successfully, but there was no output.
Action: This is an internal error. Contact Oracle Support Services.

PRCT-01153: Received empty result while getting a list of pinned and unpinned nodes in the cluster
Cause: The olsnodes command executed successfully, but there was no output.
Action: This is an internal error. Contact Oracle Support Services.

PRCT-01200: Failed to retrieve disk group name for volume device {0}. asmcmd execution failed at location {1}. Detailed error: {2}
Cause: Unable to retrieve the disk group name for the specified volume device
Action: Check that ASM instance is running on the local node.

PRCT-01201: Failed to retrieve volume name for volume device {0}. asmcmd execution failed at location {1}. Detailed error: {2}
Cause: Unable to retrieve the volume name for the specified volume device
Action: Check that ASM instance is running on the local node.

PRCT-01202: Failed to parse output returned by asmcmd when executing asmcmd at location {0}
Cause: Unable to parse output returned by asmcmd.
Action: Oracle internal error. Contact customer support.

PRCT-01203: Failed to parse the output returned by asmcmd for node {0} when executing asmcmd at location {1}
Cause: This is an internal error.
Action: Contact Oracle customer support.

PRCT-01204: Failed to find volume device {0}. asmcmd execution failed at location {1}. Detailed error: {2}
Cause: Volume device does not exist.
Action: Create the volume device using asm tools.

PRCT-01205: Failed to parse output {0} returned by asmcmd when executing asmcmd at location {1}
Cause: Unable to parse the specified output returned by asmcmd.
Action: Oracle internal error. Contact customer support.
PRCT-01206: Failed to parse output {0} returned by asmcmd for node {1} when executing asmcmd at location {2}
   Cause: Unable to parse the specified output returned by asmcmd on specified node.
   Action: Oracle internal error. Contact customer support.

PRCT-01207: Failed to set the ORACLE_SID for running asmcmd from CRS home location {0}
   Cause: Unable to retrieve the ASM instance name on the local node to generate the ORACLE_SID value.
   Action: Use crsctl to make sure that the CRS stack is up; use `srvctl status asm` to make sure that the ASM resource is running on the local node.

PRCT-01300: oifcfg execution failed. Detailed error: {0}
   Cause: Failed to execute the oifcfg command for the local node. See the underlying error message for further details.
   Action: Try to execute the oifcfg command manually.

PRCT-01301: oifcfg execution failed on node {0}. Detailed error: {1}
   Cause: Failed to execute the oifcfg command for the remote node. See the underlying error message for further details.
   Action: Try to execute the oifcfg command manually.

PRCT-01302: The "{0}" has an invalid IP address format
   Cause: The format of the subnet number and/or the subnet mask is an invalid IP address format.
   Action: Make sure that both the subnet number and the subnet mask have a valid IP address format.

PRCT-01303: The oifcfg command returned as result the line "{0}" that has less than 4 fields
   Cause: This is an internal error.
   Action: Contact Oracle Support Services.

PRCT-01400: getcrshome execution failed. Detailed error: {0}
   Cause: Failed to execute the getcrshome command. See the underlying error message for further details.
   Action: Try to execute the getcrshome command manually.

PRCT-01401: getcrshome execution failed on node {0}. Detailed error: {1}
   Cause: Failed to execute the getcrshome command. See the underlying error message for further details.
   Action: Try to execute the getcrshome command manually.
SCLC-01000: Failed to retrieve address of {0}, {1}
  Cause: Failed to retrieve current address of the resource.
  Action: Make sure that resource is running and that user has read permission on
           resource profile and try again.

SCLC-01003: Failed to retrieve tier names registered with {0}, {1}
  Cause: Failed to retrieve tier names.
  Action: Make sure that resource is running and try again.

SCLC-01004: Failed to retrieve members of tier {0} registered with {1}, {2}
  Cause: Failed to retrieve tier members.
  Action: Make sure that resource is running and try again.

SCLC-01005: Failed to get member tiers, {0}
  Cause: Failed to get member tiers.
  Action: Make sure that tier specific representatives are running and try again.

SCLC-01006: Failed to get cluster tier instance, {0}
  Cause: Failed to get cluster tier instance.
  Action: Make sure that cluster tier is configured and try again.

SCLC-01007: Failed to get discovery information for tier {0}, {1}
  Cause: Failed to get tier discovery information
  Action: Retry after resolving cause stated in message

SCLC-01008: Failed to get filters at location {0} for tier {1}
  Cause: Failed to get filters registered at the given location of the tier.
  Action: Retry after resolving cause stated in message

SCLC-01009: Failed to set filters {0} at location {1} of the tier {2}, {3}
  Cause: Failed to set filters at the given location of the tier.
  Action: Retry after resolving cause stated in message

SCLC-01010: Failed to create Discovery Server, {0}
  Cause: Failed to initialize Discovery Server
  Action: Retry after resolving cause stated in message.

SCLC-01011: Failed to get Discovery Server reference, {0}
Cause: Failed to get Discovery Server reference
Action: Discovery server is not configured properly, contact Oracle support.

SCLC-01013: Failed to get Super Cluster Representative reference, {0}
Cause: Failed to get Super Cluster Representative reference
Action: Super Cluster Representative is not running, start it and retry.

SCLC-01014: Address {0} is not a multicast address
Cause: Given IP Address is not a multicast address and therefore cannot be used for multicast discovery.
Action: Supply a multicast IP address and try again.

SCLC-01015: Failed to retrieve configured multicast address for tier {0}
Cause: Failed to retrieve multicast address.
Action: Retry after resolving cause stated in message

SCLC-01016: Failed to retrieve discovery method for tier {0}
Cause: Failed to retrieve discovery method for the given tier.
Action: Retry after resolving cause stated in message

SCLC-01017: Multicast discovery method is not configured for tier {0}, {1}
Cause: Multicast discovery method is not configured.
Action: This operation is applicable only for Multicast discovery method. Try it after configuring multicast discovery method for this tier.

SCLC-01018: Discovery Server discovery method is not configured for tier {0}, {1}
Cause: Discovery Server discovery method is not configured.
Action: This operation is applicable only for Discovery Server discovery method.

SCLC-01019: Failed to retrieve member list for tier {0}, {1}
Cause: Failed to current retrieve member list for the tier.
Action: Retry after resolving cause stated in message

SCLC-01021: Failed to retrieve name of tier {0}
Cause: Failed to retrieve name of the tier.
Action: Retry after resolving cause stated in message.

SCLC-01022: Failed to update name of the tier {0}, {1}
Cause: Failed to update name of the tier.
Action: Retry after resolving cause stated in message.

SCLC-01025: Failed to retrieve count of representatives for tier {0}
Cause: Failed to retrieve number of representatives configured for the given tier.
Action: Retry after resolving cause stated in message.

SCLC-01026: Failed to update count of representatives for tier {0}, {1}
Cause: Failed to update number of representatives for the given tier.
Action: Retry after resolving cause stated in message.

SCLC-01027: Failed to start {0}, {1}
Cause: Failed to start given server.
Action: Retry after resolving cause stated in message.

SCLC-01028: Failed to stop {0}, {1}
  Cause: Failed to stop given server.
  Action: Retry after resolving cause stated in message.

SCLC-01029: Failed to check status of {0}, {1}
  Cause: Failed to check status of given server.
  Action: Retry after resolving cause stated in message.

SCLC-01030: {0} server is not running
  Cause: Server is not running.
  Action: Retry after starting the server.

SCLC-01031: Illegal argument : {0}
  Cause: Given argument is illegal.
  Action: See command usage.

SCLC-01032: Usage: {0} {1} {2}
  Cause: Prints given action script usage.
  Action: None

SCLC-01033: Failed to create super cluster client for tier {0}, {1}
  Cause: Failed to create super cluster client for tier.
  Action: Retry after resolving cause stated in message.

SCLC-01034: No argument was supplied to {0}
  Cause: The tool was invoked without any arguments, see its usage.
  Action: Invoke the tool with arguments as documented in its usage.

SCLC-01035: Failed to configure logger for {0}
  Cause: An error was encountered while configuring logger for given program. The message is followed by an exception message that contains more information. Most likely source of error is lack of privileges to create/update files in <crs_home>/log/<hostname>/srvm directory.
  Action: Fix the error reported in the exception message by granting privileges to the current user to create/update files in <crs_home>/log/<hostname>/srvm directory.

SCLC-01036: Failed to start the status listener for the EONS server {0}, {1}
  Cause: The specified EONS server failed to either obtain an available port or create the status listener thread.
  Action: Check if there are available ports on this system.

SCLC-01037: Failed to create the port file for the EONS server {0}, {1}
  Cause: An error occurred while creating a file in the <crs_home>/eons/init directory.
  Action: Ensure that filesystem permissions are correct and that disk space is available.
SCLS-01000: Failed to create super cluster representative server for tier \{0\}, \{1\}
  Cause: Failed to create super cluster representative server for the given tier.
  Action: Retry after resolving cause stated in message.

SCLS-01001: Failed to get ONS runtime of \{0\}
  Cause: Failed to get ONS runtime of the given server.
  Action: Retry after resolving cause stated in message.

SCLS-01002: Failed to get current member list of tier \{0\}
  Cause: Failed to get current member list of the given tier.
  Action: Retry after resolving cause stated in message.

SCLS-01003: eONS runtime was not running for tier \{0\}
  Cause: eONS runtime was stopped abnormally.
  Action: In cluster environment, try srvctl stop nodeapps -n <node> and srvctl start nodeapps -n <node>. In Oracle Restart environment, try srvctl stop eons and srvctl start eons.

SCLS-01004: Failed to set listening port to \{0\} for \{1\}
  Cause: Failed to update listening port of the eONS runtime for this tier.
  Action: Make sure that user has permission to update resource attribute. In cluster environment make sure that the clusterware stack is up.

SCLS-01005: Invalid listening port \{0\} specified for eONS
  Cause: The specified eONS listening port number is invalid.
  Action: Valid port numbers on Unix are from 1025 to 65535. Provide a valid port number for eONS to listen on.
PRCO-00001: Failed to initialize olsnodes
  Cause: Unable to initialize and start olsnodes
  Action: Ensure that the clusterware is running.

PRCO-00002: Unable to communicate with the clusterware
  Cause: Unable to communicate with the clusterware
  Action: Ensure that the clusterware is running.

PRCO-00003: OCR operation failed string
  Cause: OCR operation failed
  Action: Refer to the OCR error message

PRCO-00004: OCR initialization failed string
  Cause: OCR initialization failed
  Action: Refer to the OCR error message

PRCO-00008: Unable to retrieve local node number
  Cause: Unable to retrieve local node number from clusterware
  Action: Ensure that the clusterware is running.

PRCO-00009: Unable to retrieve local node name
  Cause: Unable to retrieve local node name from clusterware
  Action: Ensure that the clusterware is running.

PRCO-00010: Unable to retrieve max number of nodes
  Cause: Unable to retrieve maximum number of nodes from clusterware
  Action: Ensure that the clusterware is running.

PRCO-00011: Unable to retrieve node name
  Cause: Unable to retrieve node name from clusterware
  Action: Ensure that the clusterware is running.

PRCO-00012: Unable to retrieve node number
  Cause: Unable to retrieve node number from clusterware
  Action: Ensure that the clusterware is running.

PRCO-00013: Unable to retrieve private interconnect name
  Cause: Unable to retrieve private interconnect name from clusterware
Action: Ensure that the clusterware is running.

PRCO-00014: Unable to retrieve node virtual IP
  Cause: Unable to retrieve node virtual IP from clusterware
  Action: Ensure that the clusterware is running.

PRCO-00015: Not a cluster member
  Cause: Specified node is not a cluster member
  Action: Specify a cluster member node.

PRCO-00016: Cluster node membership interface for retrieving nodes list returned error code number
  Cause: Call to the CSS nodelist service failed with the specified error as return value
  Action: Ensure that the clusterware is running and look at the Clusteware log files

PRCO-00017: Cluster attribute retrieval interface to retrieve max node length failed
  Cause: Call to the CSS attribute fetch service failed for attribute max node length
  Action: Ensure that the clusterware is running, and look at the Clusterware log files

PRCO-00018: Unable to retrieve cluster name
  Cause: Unable to retrieve cluster name from clusterware
  Action: Ensure that the clusterware is running.

PRCO-00019: Failure retrieving list of nodes in the cluster
  Cause: The list of cluster nodes could not be determined. Additional details on the problem are in accompanying message(s).
  Action: Take action based on the accompanying message(s).
PRIF-00001: invalid format for network interface
   Cause: An invalid network interface was given.
   Action: Supply a network interface of the form <if_name>/<subnet>:<if_type>.

PRIF-00002: invalid network interface type
   Cause: An invalid network interface type was given.
   Action: Supply one of the valid interface types "public", "cluster_interconnect".

PRIF-00003: cannot find the input interface configured
   Cause: An attempt was made to access an interface that is not already configured.
   Action: Check if the input interface is configured through the "getif" command option.

PRIF-00004: OCR error while deleting the configuration for the given interface
   Cause: OCR may have been configured incorrectly or an OCR API failed.
   Action: Check if OCR is configured correctly by running ocrdump.

PRIF-00005: invalid syntax for the setif command option
   Cause: An invalid syntax was specified for the oifcfg setif command option.
   Action: Make sure the syntax for setif is "oifcfg setif [-node <nodename> | -global] [ <if_name>/<subnet>:<if_type>]..."

PRIF-00006: invalid syntax for the getif command option
   Cause: An invalid syntax was specified for the oifcfg getif command option.
   Action: Make sure the syntax for getif is "oifcfg getif [-node <nodename> | -global] [-if <if_name>[/<subnet>][-type <if_type>]]...".

PRIF-00007: invalid syntax for the delif command option
   Cause: An invalid syntax was specified for the oifcfg delif command option.
   Action: Make sure the syntax for delif is "oifcfg delif [-node <nodename> | -global] [ <if_name>/<subnet>][-force] | -force]."

PRIF-00008: failed to initialize the prifcfg context
   Cause: There was a system error.
   Action: Check the messages in the log file oifcfg.log.

PRIF-00009: incorrect usage
   Cause: Invalid command line options specified for the oifcfg tool.
Action: Run "oifcfg -help" to check the usage for the oifcfg tool.

PRIF-00010: failed to initialize the cluster registry
  Cause: The cluster registry was not configured correctly.
  Action: Run "ocrdump" to see if the cluster registry was configured properly.

PRIF-00011: cluster registry error
  Cause: There was an internal error while operating on the cluster registry.
  Action: Check the messages in the log file oifcfg.log.

PRIF-00012: failed to initialize cluster support services
  Cause: The cluster support services module was not configured correctly.
  Action: Check the messages in the log file oifcfg.log.

PRIF-00013: cluster support services error
  Cause: There was an internal error while accessing cluster support services.
  Action: Check if Cluster Support Services is running properly.

PRIF-00014: invalid node name
  Cause: The node name does not match any of the configured nodes.
  Action: Ensure that the supplied node name is one of the node names returned by 'olsnodes'.

PRIF-00015: invalid format for subnet
  Cause: An invalid subnet was given.
  Action: Supply a subnet of the form a.b.c.d where a, b, c and d is a value between 0 and 255 (inclusive).

PRIF-00016: invalid syntax for the iflist command option
  Cause: An invalid syntax was specified for the oifcfg iflist command option.
  Action: Make sure the syntax for iflist is "oifcfg iflist [-p [-n]]".

PRIF-00017: Error in getting the host names in a cluster
  Cause: There was an internal error while calling clsgpnp_crs_getcssheds.
  Action: Check the underlying errors shown with this.

PRIF-00018: Error in deleting network information from GPnP profile
  Cause: There was an internal error while calling clsgpnpx_prfDelHostNetInfo.
  Action: Check the underlying errors shown with this.

PRIF-00019: Error in getting the network attribute values from GPnP profile
  Cause: There was an internal error while calling clsgpnpx_prfGetNetAttrVal.
  Action: Check the underlying errors shown with this.

PRIF-00020: Error in getting the lock for GPnP profile
  Cause: There was an internal error while calling clsgpnp_crs_cssLockUpdates.
  Action: Check the underlying errors shown with this.

PRIF-00021: Error in getting the GPnP profile
  Cause: There was an internal error while calling clsgpnp_getProfile.
  Action: Check the underlying errors shown with this.
PRIF-00022: Error in cloning the GPnP profile
   Cause: There was an internal error while calling clsgnpnpx_getProfile.
   Action: Check the underlying errors shown with this.

PRIF-00023: Error in getting network interface from GPnP profile
   Cause: There was an internal error while calling clsgnpnpx_prfGetHostNetInfo
   Action: Check the underlying errors shown with this.

PRIF-00024: Error in retrieving the network interface from GPnP profile
   Cause: Failed to retrieve the network interface information because of underlying errors.
   Action: Check the underlying errors shown with this.

PRIF-00025: Error in setting network attribute value in GPnP profile
   Cause: There was an internal error while calling clsgnpnpx_prfSetNetAttrVal.
   Action: Check the underlying errors shown with this.

PRIF-00026: Error in update the profiles in the cluster
   Cause: There was an internal error while calling clsgnpnpx_crs_ensuredSignAndPush
   Action: Check the underlying errors shown with this.

PRIF-00027: Error in releasing the in memory presentation of GPnP profile
   Cause: There was an internal error while calling clsgnpnpx_profileDestroy.
   Action: Check the underlying errors shown with this.

PRIF-00028: Error in unlock the GPnP profile
   Cause: There was an internal error while calling clsgnpnpx_crs_cssUnlockUpdates.
   Action: Check the underlying errors shown with this.

PRIF-00029: Warning: wildcard in network parameters can cause mismatch among GPnP profile, OCR, and system
   Cause: Wildcard syntax was detected in one or more network-related parameters. Although this is allowed, be aware that network particulars (such as interface names and subnets) must be identical on all nodes of the cluster. Using wildcard syntax in network parameters does not allow the network configuration to vary across nodes.
   Action: If wild card causes the problem, provide interface name and subnet without wild card.

PRIF-00030: Network information in OCR and GPnP profile differs
   Cause: There was mismatched network information in OCR.
   Action: Use 'oifcfg setif' to synchronize the network information from GPnP profile to OCR.

PRIF-00031: Failed to delete the specified network interface because it is the last private interface
   Cause: A request to delete the only private network interface was refused because force was not specified.
   Action: Specify the 'force' option to to delete the last private interface, but be aware this may render Oracle Clusterware inoperative.
PRIF-00032: Error in checking for profile availability for host string string

**Cause:** Failed to set or delete interface because the profile was not available on the specified node.

**Action:** Make sure that profile is available on all cluster nodes before setting interface or deleting the interface. Examine the accompanying error messages and respond accordingly.

PRIF-00033: Failed to set or delete interface because hosts could not be discovered string

**Cause:** An attempt to set or delete an interface failed because hosts could not be discovered or their GPnP profiles could not be accessed.

**Action:** Ensure that the Oracle GPnP and mDNS daemons are running on all cluster nodes and resolve any other issues reported in accompanying error messages.

PRIF-00050: duplicate interface is given in the input

**Cause:** Duplicate interface is given in the input.

**Action:** Warning: Supply a network interface of the form `<if_name>/<subnet>:<if_type>`. Make sure to provide unique combination for `<if_name>/<subnet>:<if_type>` if multiple inputs are provided in the same command line or if the entry already exists.

PRIF-00051: interface [string] is set to both public and cluster_interconnect

**Cause:** The interface is set to both public and cluster_interconnect.

**Action:** Warning: Make sure that the interface is not set to both public and cluster_interconnect.

PRIF-00052: Could not get an immediate lock for GPnP profile. Wait to get the lock ...

**Cause:** The command was unable to take an exclusive CSS lock with the nowait option.

**Action:** Ctrl-C if wait for too long. Check the setup of clusterware.
PROCL-00001: Oracle Local Registry cannot be initialized.
   Cause: An invalid init level was passed to initialize Oracle Local Registry.
   Action: Initialize Oracle Local Registry with a valid init level.

PROCL-00002: Cannot perform local registry operation at the current init level.
   Cause: Program tried a local registry operation which is not permitted at the init level.
   Action: Initialize Oracle Local Registry with an appropriate init level.

PROCL-00003: Cannot perform local registry operation because context is invalid.
   Cause: The Oracle Local Registry context passed was invalid.
   Action: This is an internal error. Contact Oracle Support Services.

PROCL-00004: The local registry key to be operated on does not exist.
   Cause: Program tried a local registry operation on a key which does not exist.
   Action: Check to see if the key exists and try the operation again.

PROCL-00005: User does not have permission to perform a local registry operation on this key.
   Cause: Program tried an operation on a local registry key for which it does not have permission.
   Action: Check to see if program is run as the correct user.

PROCL-00006: User does not have permission to perform a local registry operation on this key.
   Cause: Program tried a local registry operation on a key for which it does not have permission.
   Action: Check to see if program is run as the correct user.

PROCL-00007: Cannot perform local registry operation because the key or batch handle is invalid.
   Cause: The local registry key or batch handle passed was invalid.
   Action: This is an internal error. Contact Oracle Support Services.

PROCL-00008: Cannot perform local registry operation because one of the parameters is invalid.
   Cause: Program tried a local registry operation using an invalid parameter.
   Action: This is an internal error. Contact Oracle Support Services.
PROCL-00009: Cannot perform local registry operation because the buffer passed is too small.
Cause: The amount of memory allocated for the buffer was insufficient.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00010: Cannot delete the local registry key as subkeys exist.
Cause: The program tried to delete a key for which subkeys exist.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00011: Cannot perform local registry operation because key is NULL.
Cause: The local registry key passed was NULL.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00012: Out of heap memory.
Cause: The program ran out of heap memory.
Action: Contact Oracle Support Services.

PROCL-00013: Cannot perform local registry operation because one of the parameters is NULL.
Cause: Program tried a local registry operation using an NULL parameter.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00014: Unknown error occurred
Cause: This is generic internal error for Oracle Local Registry.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00015: Failed to initialize the local registry
Cause: The Oracle Local Registry could not be accessed. The possible causes are:
1. The local registry has not been formatted.
2. The local registry file is not accessible.
3. The local registry file has incorrect permissions.
4. Oracle Clusterware is not running.
Action:
1. Run the 'ocrcheck -local' command to confirm that the OLR is formatted and usable.
2. Run 'ocrcheck -local -config' command to retrieve the configured file, and verify that the file is accessible and has the correct permissions via native platform or OS methods
3. Run 'crsctl check crs' command to verify that Oracle Clusterware is running.

PROCL-00016: Cannot retrieve any more subkeys for the given keyhandle
Cause: The key has no more subkeys to enumerate.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00017: Unimplemented feature
Cause: Requested feature has not been implemented in the current release.
Action: Try the feature again in the upcoming Oracle release.

PROCL-00018: The value size passed is too large
Cause: Cannot set a value of the given size.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00019: Cannot create more subkeys for the key
Cause: An attempt was made to create more subkeys under a key that is not permitted by the local registry.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00020: ORACLE_HOME environment not set
Cause: ORACLE_HOME environment not set.
Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

PROCL-00021: Maximum permitted depth of the OLR tree is reached
Cause: An attempt was made to create subkeys under a key which is already at depth PROCR_MAX_KEY_DEPTH
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00022: The OLR backend has an invalid format
Cause: An attempt was made to use OLR before initializing it.
Action: Use the root.sh script. The 'ocrconfig -local -upgrade' command will initialize OLR.

PROCL-00023: Error in retrieving hostname
Cause: An error occurred while retrieving hostname.
Action: Contact Oracle Support Services.

PROCL-00024: Error in the messaging layer
Cause: An error occurred in the messaging layer while performing a local registry operation.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00025: Error in the NLS services
Cause: An error occurred in the NLS services while performing a local registry operation.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00026: Error while accessing the physical storage
Cause: The Oracle Local Registry could not be accessed. The possible causes are:
1. The local registry has not been formatted.
2. The local registry file is not accessible.
3. The local registry file has incorrect permissions.
Action:
1. Run the 'ocrcheck -local' command to confirm that the OLR is formatted and usable.
2. Run 'ocrcheck -local -config' command to retrieve the configured file, and verify that the file is accessible and has the correct permissions via native platform or OS methods.

PROCL-00027: Error in authentication layer
Cause: An error occurred in the authentication layer while performing a local registry operation.
Action: Contact Oracle Support Services.

PROCL-00028: Oracle Local Registry already in current version
Cause: An attempt to upgrade the local registry which has already been upgraded.
Action: No action required.

PROCL-00029: Error in logging layer
Cause: An error occurred in the logging layer while performing a local registry operation.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00031: Storage device for the local registry is too small
Cause: The configured storage device for local registry was too small.
Action: Refer to the documentation and configure a storage device that is large enough for use by local registry.

PROCL-00032: Oracle High Availability Services on the local node is not running
Cause: Oracle High Availability Services on the local node was not running
Action: Run `crsctl start crs` command to start the Oracle High Availability Services on the local node.

PROCL-00033: Oracle Local Registry is not configured
Cause: Oracle Local Registry configuration was not present on the node.
Action: Install and configure Oracle Clusterware.

PROCL-00035: Cannot perform local registry operation due to invalid version
Cause: The operation cannot be performed for this local active version
Action: Complete the upgrade before retrying the operation

PROCL-00036: No free space to perform this operation
Cause: There is no free space left to perform the requested operation
Action: Free up space and retry the operation

PROCL-00037: Oracle Local Registry does not support the storage type configured
Cause: The configured storage type for local registry is not supported
Action: Change the configuration of the local registry to a supported storage type. Refer to Oracle documentation for an exhaustive list for each platform.

PROCL-00038: Requested block number is not allocated from Oracle Local Registry
Cause: The requested block number is not allocated from Oracle Local Registry
Action: Retry the operation with another block number

PROCL-00039: Requested block has an invalid header
Cause: The requested block has an invalid header
Action: Retry the operation with another block number

PROCL-00040: Cannot add more operations to the batch
Cause: An attempt was made to add an operation to a batch that already has the maximum allowed operations.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00041: Oracle Local Registry is incorrectly configured
Cause: The local registry is incorrectly configured.
Action: Correct the local registry configuration.

PROCL-00042: User cannot access Oracle Local Registry configuration
Cause: Program encountered an error accessing the local registry configuration.
Action: Check to see if program is run as the correct user. Check that the local registry configuration has the correct permissions.

PROCL-00044: Error in network address and interface operations
Cause: An error occurred in the network address and interface operations layer while performing a local registry operation.
Action: Contact Oracle Support Services.

PROCL-00046: Cannot perform local registry operation because the batch is empty.
Cause: An attempt was made to execute the batch without any operations in it.
Action: This is an internal error. Contact Oracle Support Services.

PROCL-00101: Operating System error [string]
Cause: An error occurred in the operating system layer while performing a local registry operation.
Action: Contact Oracle Support Services.

PROCL-00102: Cluster services error [string]
Cause: An error occurred in the cluster services layer while performing a local registry operation.
Action: Contact Oracle Support Services.

PROCL-00103: Messaging error [string]
Cause: An error occurred in the messaging layer while performing a local registry operation.
Action: Contact Oracle Support Services.

PROCL-00104: Authentication error [string]
Cause: An error occurred in the authentication layer while performing a local registry operation.
Action: Contact Oracle Support Services.

PROCL-00105: Logging error
Cause: An error occurred in the logging layer while performing a local registry operation.
Action: Contact Oracle Support Services.

PROCL-00106: Unidentified component error
Cause: An error occurred in an unidentified layer while performing a local registry operation.
Action: Contact Oracle Support Services.

PROCL-00107: Storage layer error [string]
Cause: An error occurred in the storage layer while performing a local registry operation.
Action: Contact Oracle Support Services.

PROCL-00109: Network address and interface operations error
Cause: An error occurred in the network address and interface operations layer while performing a local registry operation.
Action: Contact Oracle Support Services.
PROC-00001: Oracle Cluster Registry cannot be initialized.
   **Cause:** An invalid init level was passed to initialize Oracle Cluster Registry.
   **Action:** Initialize Oracle Cluster Registry with a valid init level.

PROC-00002: Cannot perform cluster registry operation at the current init level.
   **Cause:** Program tried a cluster registry operation which is not permitted at the init level.
   **Action:** Initialize Oracle Cluster Registry with an appropriate init level.

PROC-00003: Cannot perform cluster registry operation because context is invalid.
   **Cause:** The Oracle Cluster Registry context passed was invalid.
   **Action:** This is an internal error. Contact Oracle Support Services.

PROC-00004: The cluster registry key to be operated on does not exist.
   **Cause:** Program tried a cluster registry operation on a key which does not exist.
   **Action:** Check to see if the key exists and try the operation again.

PROC-00005: User does not have permission to perform a cluster registry operation on this key.
   **Cause:** Program tried an operation on a cluster registry key for which it does not have permission.
   **Action:** Check to see if program is run as the correct user.

PROC-00006: User does not have permission to perform a cluster registry operation on this key.
   **Cause:** Program tried a cluster registry operation on a key for which it does not have permission.
   **Action:** Check to see if program is run as the correct user.

PROC-00007: Cannot perform cluster registry operation because key or batch handle is invalid.
   **Cause:** The cluster registry key or batch handle passed was invalid.
   **Action:** This is an internal error. Contact Oracle Support Services.

PROC-00008: Cannot perform cluster registry operation because one of the parameters is invalid.
   **Cause:** Program tried a cluster registry operation using an invalid parameter.
   **Action:** This is an internal error. Contact Oracle Support Services.
PROC-00009: Cannot perform cluster registry operation because the buffer passed is too small.
  Cause: The amount of memory allocated for the buffer was insufficient.
  Action: This is an internal error. Contact Oracle Support Services.

PROC-00010: Cannot delete the cluster registry key as subkeys exist.
  Cause: The program tried to delete a key for which subkeys exist.
  Action: This is an internal error. Contact Oracle Support Services.

PROC-00011: Cannot perform cluster registry operation because key is NULL.
  Cause: The cluster registry key passed was NULL.
  Action: This is an internal error. Contact Oracle Support Services.

PROC-00012: Out of heap memory.
  Cause: The program ran out of heap memory.
  Action: Contact Oracle Support Services.

PROC-00013: Cannot perform cluster registry operation because one of the parameters is NULL.
  Cause: Program tried a cluster registry operation using an NULL parameter.
  Action: This is an internal error. Contact Oracle Support Services.

PROC-00014: Unknown error occurred
  Cause: This is generic internal error for Oracle Cluster Registry.
  Action: This is an internal error. Contact Oracle Support Services.

PROC-00015: Failed to initialize the cluster registry
  Cause: The Oracle Cluster Registry could not be accessed. The possible causes are:
  1. The cluster registry has not been formatted.
  2. The cluster registry location is not accessible.
  3. The cluster registry location has incorrect permissions.
  4. Oracle Clusterware is not running.
  Action:
  1. Run the 'ocrcheck' command to confirm that the OCR is formatted and usable.
  2. Run 'ocrcheck -config' command to retrieve the configured locations, and verify that each location is accessible and has the correct permissions via native platform or OS methods. If a location is an ASM disk group, verify that the disk group exists and is mounted.
  3. Run 'crsctl check crs' command to verify that Oracle Clusterware is running.

PROC-00016: Cannot retrieve any more subkeys for the given keyhandle
  Cause: The key has no more subkeys to enumerate.
  Action: This is an internal error. Contact Oracle Support Services.

PROC-00017: Unimplemented feature
  Cause: Requested feature has not been implemented in the current release.
  Action: Try the feature again in the upcoming Oracle release.

PROC-00018: The value size passed is too large
**Cause:** Cannot set a value of the given size.
**Action:** This is an internal error. Contact Oracle Support Services.

**PROC-00019: Cannot create more subkeys for the key**
**Cause:** An attempt was made to create more subkeys under a key that is not permitted by the cluster registry.
**Action:** This is an internal error. Contact Oracle Support Services.

**PROC-00020: ORACLE_HOME environment not set**
**Cause:** ORACLE_HOME environment not set.
**Action:** Make sure that the ORACLE_HOME environment variable has been properly set and exported.

**PROC-00021: Maximum permitted depth of the OCR tree is reached**
**Cause:** An attempt was made to create subkeys under a key which is already at depth PROCR_MAX_KEY_DEPTH
**Action:** This is an internal error. Contact Oracle Support Services.

**PROC-00022: The OCR backend has an invalid format**
**Cause:** An attempt was made to use OCR before initializing it.
**Action:** Use the root.sh script. The 'ocrconfig -upgrade' command will initialize OCR.

**PROC-00023: Error in cluster services layer**
**Cause:** An error occurred in the cluster services layer while performing a cluster registry operation.
**Action:** Contact Oracle Support Services.

**PROC-00024: Error in the messaging layer**
**Cause:** An error occurred in the messaging layer while performing a cluster registry operation.
**Action:** This is an internal error. Contact Oracle Support Services.

**PROC-00025: Error in the NLS services**
**Cause:** An error occurred in the NLS services while performing a cluster registry operation.
**Action:** This is an internal error. Contact Oracle Support Services.

**PROC-00026: Error while accessing the physical storage**
**Cause:** The Oracle Cluster Registry could not be accessed. The possible causes are:
1. The cluster registry has not been formatted.
2. The cluster registry location is not accessible.
3. The cluster registry location has incorrect permissions.
4. Oracle Clusterware is not running.
**Action:**
1. Run the 'ocrcheck' command to confirm that the OCR is formatted and usable.
2. Run 'ocrcheck -config' command to retrieve the configured locations, and verify that each location is accessible and has the correct permissions via native platform
or OS methods. If a location is an ASM disk group, verify that the disk group exists and is mounted.

3. Run `crsctl check crs` command to verify that Oracle Clusterware is running.

**PROC-00027: Error in authentication layer**
*Cause:* An error occurred in the authentication layer while performing a cluster registry operation.
*Action:* Contact Oracle Support Services.

**PROC-00028: Oracle Cluster Registry already in current version**
*Cause:* An attempt to upgrade the cluster registry which has already been upgraded.
*Action:* No action required.

**PROC-00029: Error in logging layer**
*Cause:* An error occurred in the logging layer while performing a cluster registry operation.
*Action:* This is an internal error. Contact Oracle Support Services.

**PROC-00030: Oracle Cluster Registry IDs do not match**
*Cause:* The cluster registry storage seen by the client was not the same as the one seen by the server. This may be caused by a misconfiguration.
*Action:* Contact Oracle Support Services.

**PROC-00031: Storage device for the cluster registry is too small**
*Cause:* The configured storage device or the storage device to be newly added to the cluster registry was too small.
*Action:* Refer to the documentation and configure a storage device that is large enough for use by cluster registry. In case the cluster registry is already configured, execute the `ocrcheck` command to retrieve the total size, and ensure that the size of the device to be added is large enough for use by cluster registry.

**PROC-00032: Cluster Ready Services on the local node is not running**
*Cause:* The Cluster Ready Services on the local node was not running.
*Action:* Use the `crsctl start crs` command to start the Cluster Ready Services on the local node.

**PROC-00033: Oracle Cluster Registry is not configured**
*Cause:* Oracle Cluster Registry configuration was not present on the node.
*Action:* Install and configure Oracle Clusterware.

**PROC-00034: Oracle Cluster Registry configurations are not compatible**
*Cause:* Cluster registry configuration on this node did not match with another node in the cluster.
*Action:* Retrieve the cluster registry configuration using `ocrcheck -config` command on all nodes in the cluster. Fix the configuration on this node and make it consistent using `ocrcfg -repair` command.

**PROC-00035: Cannot perform cluster registry operation due to invalid version**
*Cause:* The operation cannot be performed for this cluster active version
*Action:* Complete the upgrade before retrying the operation
PROC-00036: No free space to perform this operation
  Cause: There is no free space left to perform the requested operation.
  Action: Free up space and retry the operation.

PROC-00037: Oracle Cluster Registry does not support the storage type configured
  Cause: The configured storage type for cluster registry is not supported
  Action: Change the configuration of the cluster registry to a supported storage type. Refer to Oracle documentation for an exhaustive list for each platform.

PROC-00038: Requested block number is not allocated from Oracle Cluster Registry
  Cause: The requested block number is not allocated from Oracle Cluster Registry.
  Action: Retry the operation with another block number.

PROC-00039: Requested block has an invalid header
  Cause: The requested block has an invalid header.
  Action: Retry the operation with another block number.

PROC-00040: Cannot add more operations to the batch
  Cause: An attempt was made to add an operation to a batch that already has the maximum allowed operations.
  Action: This is an internal error. Contact Oracle Support Services.

PROC-00041: Oracle Cluster Registry is incorrectly configured
  Cause: The cluster registry is incorrectly configured.
  Action: Correct the cluster registry configuration.

PROC-00042: User cannot access Oracle Cluster Registry configuration
  Cause: Program encountered an error accessing the cluster registry configuration.
  Action: Check to see if program is run as the correct user. Check that the cluster registry configuration has the correct permissions.

PROC-00043: Error in the ASM access layer
  Cause: An error occurred in the layer used to access OCR when configured on ASM managed storage.
  Action: Contact Oracle Support Services.

PROC-00044: Error in network address and interface operations
  Cause: An error occurred in the network address and interface operations layer while performing a cluster registry operation.
  Action: Contact Oracle Support Services.

PROC-00045: Error in the Oracle Clusterware API layer
  Cause: An error occurred in the Oracle Clusterware API layer.
  Action: Contact Oracle Support Services.

PROC-00046: Cannot perform cluster registry operation because the batch is empty.
  Cause: An attempt was made to execute the batch without any operations in it.
  Action: This is an internal error. Contact Oracle Support Services.

PROC-00047: Cannot proceed while the Oracle Cluster Registry format upgrade is in progress.
Cause: An Oracle Cluster Registry operation was requested, but found that an Oracle Cluster Registry format upgrade was in progress.
Action: Retry the operation after the format upgrade completes.

PROC-00101: Operating System error [string]
Cause: An error occurred in the operating system layer while performing a cluster registry operation.
Action: Contact Oracle Support Services.

PROC-00102: Cluster services error [string]
Cause: An error occurred in the cluster services layer while performing a cluster registry operation.
Action: Contact Oracle Support Services.

PROC-00103: Messaging error [string]
Cause: An error occurred in the messaging layer while performing a cluster registry operation.
Action: Contact Oracle Support Services.

PROC-00104: Authentication error [string]
Cause: An error occurred in the authentication layer while performing a cluster registry operation.
Action: Contact Oracle Support Services.

PROC-00105: Logging error
Cause: An error occurred in the logging layer while while performing a cluster registry operation.
Action: Contact Oracle Support Services.

PROC-00106: Unidentified component error
Cause: An error occurred in an unidentified layer while performing a cluster registry operation.
Action: Contact Oracle Support Services.

PROC-00107: Storage layer error [string]
Cause: An error occurred in the storage layer while performing a cluster registry operation.
Action: Contact Oracle Support Services.

PROC-00108: ASM error [string]
Cause: An error occurred in the asm layer while performing a cluster registry operation.
Action: Contact Oracle Support Services.

PROC-00109: Network address and interface operations error
Cause: An error occurred in the network address and interface operations layer while performing a cluster registry operation.
Action: Contact Oracle Support Services.
PROTL-00001: Failed to initialize ocrconfig
   Cause: Unable to initialize and start ocrconfig.
   Action: Check log file for details about the failure.

PROTL-00002: Export file 'string' already exists
   Cause: Requested export file exists in the given path.
   Action: Change the location for export file or remove the old export file.

PROTL-00003: Failed to create export file 'string'
   Cause: Unable to create or open file for exporting local registry data.
   Action: Check access privilege or disk space of the requested path.

PROTL-00004: Failed to retrieve data from the local registry
   Cause: Unable to retrieve necessary information from the local registry.
   Action: Check the availability of the local registry and the details of the failure from the log file.

PROTL-00006: The specified import file 'string' cannot be found
   Cause: The import file did not exist.
   Action: Check the file and its correct path and try again.

PROTL-00007: Failed to open the specified import file 'string'
   Cause: Unable to access the specified import file.
   Action: Check access privilege of the import file.

PROTL-00008: Failed to import data from specified file to the local registry
   Cause: Unable to read data from the import file and import to the local registry.
   Action: Check availability of the local registry and the details of the failure from the log file.

PROTL-00010: Failed to open the specified source local registry
   Cause: Unable to access the specified source local registry.
   Action: Check access privilege and location of the source local registry, and the log file for more detail.

PROTL-00011: Failed to open the specified destination local registry
   Cause: Unable to access the specified destination local registry.
Action: Check access privilege and location of the destination local registry. Also check the log file for more details.

PROTL-00012: Oracle Local Registry to be upgraded has an unsupported version
Cause: Oracle Local Registry to be upgraded had an unsupported version.
Action: Upgrade Oracle Local Registry to a version supported.

PROTL-00013: Oracle Local Registry is in current version
Cause: Oracle Local Registry was in current version.
Action: No action required.

PROTL-00015: Unimplemented feature
Cause: Requested feature has not been implemented in current release.
Action: Try the feature again in the next release.

PROTL-00016: Internal Error
Cause: This is a generic internal error for ocrconfig.
Action: Contact Oracle Support Services.

PROTL-00017: Fatal Error
Cause: This is a generic fatal error for ocrconfig.
Action: Contact Oracle Support Services.

PROTL-00018: Failed to open the specified backup file 'string'
Cause: File did not exist or user did not have permission to open the file.
Action: Ensure that the file exists and its permissions are correct. Also check the log file for more details.

PROTL-00019: Cannot proceed while the Oracle High Availability Service is running
Cause: The Oracle High Availability Service was running.
Action: Use the 'crsctl stop crs' command to shutdown the Oracle High Availability Service on the local node.

PROTL-00020: Insufficient permission to proceed. Require privileged user
Cause: User was not a privileged user.
Action: Run the command again using a privileged user.

PROTL-00021: Invalid parameter
Cause: Input parameter was not valid.
Action: Check log file for more information.

PROTL-00025: Manual backups for the Oracle Local Registry are not available
Cause: Manual backups for the Oracle Local Registry were not yet created.
Action: Manual backups can be created using 'ocrconfig -local -manualbackup' command.

PROTL-00035: The configured Oracle Local Registry location is not accessible
Cause: The configured Oracle local Registry location did not exist or did not have the required permissions.
Action: Ensure that the location exists and that its permissions are correct. Also check the log file for more details.
PROTL-00124: Use option '-local' to indicate that the operation is to be performed on the Oracle Local Registry.
   Cause: ocrconfig called with incorrect or missing options.
   Action: Use ocrconfig with correct options.

PROTL-00302: Failed to initialize ocrdump
   Cause: Unable to initialize and start ocrdump.
   Action: Check log file for details about the failure.

PROTL-00303: Dump file already exists [string]
   Cause: Requested dump file exists in the given path.
   Action: Change the location for the dump file or remove the old dump file.

PROTL-00304: Failed to create dump file [string]
   Cause: Unable to create or open file for dumping local registry data.
   Action: Check access privilege or disk space of the requested path.

PROTL-00305: Failed to write to dump file [string]
   Cause: Unable to write to dump file while dumping local registry data.
   Action: Check access privilege or disk space of the requested path.

PROTL-00306: Failed to retrieve local registry data
   Cause: Unable to read local registry data.
   Action: Check log file for details about the failure.

PROTL-00307: The specified key does not exist in local registry
   Cause: Unable to retrieve the specified key from local registry.
   Action: Check log file for the key name.

PROTL-00418: Use option '-local' to indicate that the operation is to be performed on the Oracle Local Registry.
   Cause: ocrdump called with incorrect or missing options.
   Action: Use ocrdump with correct options.

PROTL-00601: Failed to initialize ocrcheck
   Cause: Unable to initialize and start ocrcheck.
   Action: Check log file for details about the failure.

PROTL-00602: Failed to retrieve data from the local registry
   Cause: Unable to retrieve necessary information from the local registry.
   Action: Check the availability of the local registry and the details of the failure from the log file.

PROTL-00603: Oracle Local Registry is logically corrupted
   Cause: A logical corruption was detected in the Oracle Local Registry.
   Action: Check the log file for more information.

PROTL-00604: Failed to retrieve the configured location of the local registry
   Cause: Unable to retrieve the location of local registry.
   Action: Check log file for details about the failure.
PROTL-00724: Oracle Local Registry configuration is:
   **Cause:** ocrcheck called.
   **Action:** None

PROTL-00811: when running this tool.
   **Cause:** ocrcheck called with incorrect or missing options.
   **Action:** Use ocrcheck with correct options.
PROT-00001: Failed to initialize ocrconfig
   Cause: Unable to initialize and start ocrconfig.
   Action: Check log file for details about the failure.

PROT-00002: Export file 'string' already exists
   Cause: Requested export file exists in the given path.
   Action: Change the location for export file or remove the old export file.

PROT-00003: Failed to create export file 'string'
   Cause: Unable to create or open file for exporting cluster registry data.
   Action: Check access privilege or disk space of the requested path.

PROT-00004: Failed to retrieve data from the cluster registry
   Cause: Unable to retrieve necessary information from the cluster registry.
   Action: Check the availability of the cluster registry and the details of the failure
   from the log file.

PROT-00005: Clusterware is not running properly
   Cause: Unable to register with clusterware for access to the cluster registry.
   Action: Check the status of clusterware running on the machine.

PROT-00006: The specified import file 'string' cannot be found
   Cause: The import file did not exist.
   Action: Check the file and its correct path and try again.

PROT-00007: Failed to open the specified import file 'string'
   Cause: Unable to access the specified import file.
   Action: Check access privilege of the import file.

PROT-00008: Failed to import data from specified file to the cluster registry
   Cause: Unable to read data from the import file and import to the cluster registry.
   Action: Check availability of the cluster registry and the details of the failure from
   the log file.

PROT-00010: Failed to open the specified source cluster registry
   Cause: Unable to access the specified source cluster registry.
   Action: Check access privilege and location of the source cluster registry, and the
   log file for more detail.
PROT-00011: Failed to open the specified destination cluster registry
   Cause: Unable to access the specified destination cluster registry.
   Action: Check access privilege and location of the destination cluster registry. Also check the log file for more details.

PROT-00012: Oracle Cluster Registry to be upgraded has an unsupported version
   Cause: Oracle Cluster Registry to be upgraded had an unsupported version.
   Action: Upgrade Oracle Cluster Registry to a version supported.

PROT-00013: Oracle Cluster Registry is in current version
   Cause: Oracle Cluster Registry was in current version.
   Action: No action required.

PROT-00014: Oracle Cluster Registry to be downgraded has an earlier version
   Cause: Oracle Cluster Registry to be downgraded had an earlier version.
   Action: No action required.

PROT-00015: Unimplemented feature
   Cause: Requested feature has not been implemented in current release.
   Action: Try the feature again in the next release.

PROT-00016: Internal Error
   Cause: This is a generic internal error for ocrconfig.
   Action: Contact Oracle Support Services.

PROT-00017: Fatal Error
   Cause: This is a generic fatal error for ocrconfig.
   Action: Contact Oracle Support Services.

PROT-00018: Failed to open the specified backup file 'string'
   Cause: File did not exist or user did not have permission to open the file.
   Action: Ensure that the file exists and its permissions are correct. Also check the log file for more details.

PROT-00019: Cannot proceed while the Cluster Ready Service is running
   Cause: The Cluster Ready Service was running.
   Action: Use the 'crsctl stop crs' command to shutdown the Cluster Ready Service on the local node.

PROT-00020: Insufficient permission to proceed. Require privileged user
   Cause: User was not a privileged user.
   Action: Run the command again using a privileged user.

PROT-00021: Invalid parameter
   Cause: Input parameter was not valid.
   Action: Check log file for more information.

PROT-00022: Storage too small
   Cause: Specified storage was too small to mirror OCR content.
   Action: Execute the 'ocrcheck' command to retrieve the total size, and ensure that the size of the device to be added is large enough for use by cluster registry.
PROT-00023: Failed to backup OCR
*Cause:* Unable to take a backup of OCR.
*Action:* Check availability of the cluster registry and the available free space on the file system where the manual backup will be stored. Use ocrconfig -backuploc to specify a new backup location if necessary. Check the CRS log file for more information.

PROT-00024: Auto backups for the Oracle Cluster Registry are not available
*Cause:* Auto backups for the Oracle Cluster Registry were not yet created. They are created once every four hours.
*Action:* No action required.

PROT-00025: Manual backups for the Oracle Cluster Registry are not available
*Cause:* Manual backups for the Oracle Cluster Registry were not yet created.
*Action:* Manual backups can be created using 'ocrconfig -manualbackup' command.

PROT-00026: Oracle Cluster Registry backup locations were retrieved from a local copy
*Cause:* The Oracle Cluster Registry files were not accessible. Information about the cluster registry backups is also maintained in the Oracle Local Registry. The information displayed has been retrieved from the Oracle Local Registry. This information may be outdated.
*Action:* Run 'ocrconfig -showbackup' command from another node in the cluster. Compare the output of the 'ocrconfig -showbackup' on this node with output of the same command from other nodes in the cluster to determine the latest backup copy.

PROT-00027: Cannot configure another Oracle Cluster Registry location because the maximum number of Oracle Cluster Registry locations (5) have been configured
*Cause:* The maximum number of Oracle Cluster Registry locations (5) had been configured.
*Action:* (Optional) Verify the configuration using the 'ocrcheck -config' command. Delete an Oracle Cluster Registry device by executing 'ocrconfig -delete <existing location>' command, and retry the operation.

PROT-00028: Cannot delete or replace the only configured Oracle Cluster Registry location
*Cause:* A delete or replace operation was performed when there was only 1 configured Oracle Cluster Registry location. The above listed operation can only be performed when there are at least 2 configured Oracle Cluster Registry locations.
*Action:* Execute 'ocrconfig -add <new location>' to add the new Oracle Cluster Registry location followed by 'ocrconfig -delete <existing location>' command.

PROT-00029: The Oracle Cluster Registry location is already configured
*Cause:* The location to be added was identical to a configured Oracle Cluster Registry location.
*Action:* Verify the configuration using the 'ocrcheck -config' command. Ensure that the location to be added is not already configured.

PROT-00030: The Oracle Cluster Registry location to be added is not accessible
**Cause:** The Oracle Cluster Registry location to be added did not exist, wasn’t mounted correctly, or did not have the required permissions.

**Action:** Ensure that the location exists, that it is mounted correctly and visible to all nodes in the cluster, and that its permissions are correct. If trying to add an ASM Oracle Cluster Registry location, check the ASM entries in the alert log file for more details.

**PROT-00031: The Oracle Cluster Registry location to be added is an ASM disk**

**Cause:** The Oracle Cluster Registry location to be added is already in use by ASM.

**Action:** Specify a Oracle Cluster Registry location that is not currently in use. Use the ‘crsctl query css votedisk’ command to get the list of voting files used by CSS. Use the ‘asmcmd lsdsk --member’ command to get the list of disks used by ASM. Specify a location that is not in either list.

**PROT-00032: The Oracle Cluster Registry location to be added is a CSS voting file**

**Cause:** The Oracle Cluster Registry location to be added is already configured as a CSS voting file.

**Action:** Specify a Oracle Cluster Registry location that is not currently in use. Use the ‘crsctl query css votedisk’ command to get the list of voting files used by CSS. Use the ‘asmcmd lsdsk --member’ command to get the list of disks used by ASM. Specify a location that is not in either list.

**PROT-00033: Oracle High Availability Services on the local node is not running**

**Cause:** Oracle High Availability Services on the local node was not running

**Action:** Run ‘crsctl start crs’ command to start the Oracle High Availability Services on the local node.

**PROT-00034: The Oracle Cluster Registry location to be deleted is not configured**

**Cause:** The location to be deleted was not already configured as an Oracle Cluster Registry location.

**Action:** Run ‘ocrcheck -config’ command to get the list of configured Oracle Cluster Registry locations. Ensure that the location to be deleted is already configured.

**PROT-00035: The configured Oracle Cluster Registry locations are not accessible**

**Cause:** The configured Oracle Cluster Registry locations did not exist, weren’t mounted correctly, or did not have the required permissions.

**Action:** Ensure that the locations exist, that they are mounted correctly and visible to all nodes in the cluster, and that their permissions are correct. If using an ASM Oracle Cluster Registry location, check the ASM entries in the alert log file for more details.

**PROT-00036: Duplicate or previously used Oracle Cluster Registry location string cannot be added**

**Cause:** The Oracle Cluster Registry location to be added had the same contents as that of currently configured locations. This might be due to the location to be added was either duplicate of one of the currently configured locations with a different path or previously used.

**Action:** Make sure that the location to be added is not currently configured with a different path. If the location was previously configured as an Oracle Cluster Registry location, ensure that the contents are erased before adding it again.
PROT-00037: The Oracle Cluster Registry location string cannot be deleted because it is required for the OCR to be available
Cause: A delete operation was requested when there were minimum configured Oracle Cluster Registry locations available. The above listed operation can only be performed when a majority of configured Oracle Cluster Registry locations are accessible and online.
Action: Run 'ocrcheck' command to get the current status of the configured Oracle Cluster Registry locations. Execute 'ocrconfig -add <new location>' to add the new Oracle Cluster Registry location followed by 'ocrconfig -delete <existing location>' command.

PROT-00038: The Oracle Cluster Registry location cannot be added because location string is offline
Cause: An add or replace operation was requested when there was at least one configured Oracle Cluster Registry location which was not accessible or online. The above listed operation can only be performed when the inaccessible Oracle Cluster Registry location has been deleted or replaced.
Action: Run 'ocrcheck' command to get the current status of the configured Oracle Cluster Registry locations. Execute 'ocrconfig -delete <offline location>' command to delete the inaccessible Oracle Cluster Registry location followed by 'ocrconfig -add <new location>' command.

PROT-00124: * Use option '-local' to indicate that the operation is to be performed on the Oracle Local Registry.
Cause: ocrconfig called with incorrect or missing options.
Action: Use ocrconfig with correct options.

PROT-00301: Dump is not feasible when clusterware is running
Cause: Unable to dump cluster registry data when clusterware is running.
Action: Stop the clusterware before retrying ocrdump.

PROT-00302: Failed to initialize ocrdump
Cause: Unable to initialize and start ocrdump.
Action: Check log file for details about the failure.

PROT-00303: Dump file already exists [string]
Cause: Requested dump file exists in the given path.
Action: Change the location for the dump file or remove the old dump file.

PROT-00304: Failed to create dump file [string]
Cause: Unable to create or open file for dumping cluster registry data.
Action: Check access privilege or disk space of the requested path.

PROT-00305: Failed to write to dump file [string]
Cause: Unable to write to dump file while dumping cluster registry data.
Action: Check access privilege or disk space of the requested path.

PROT-00306: Failed to retrieve cluster registry data
Cause: Unable to read cluster registry data.
Action: Check log file for details about the failure.

PROT-00307: The specified key does not exist in cluster registry
Cause: Unable to retrieve the specified key from cluster registry.
Action: Check log file for the key name.

 PROT-00418: Use option '-local' to indicate that the operation is to be performed on the Oracle Local Registry.
Cause: ocrdump called with incorrect or missing options.
Action: Use ocrdump with correct options.

 PROT-00601: Failed to initialize ocrcheck
Cause: Unable to initialize and start ocrcheck.
Action: Check log file for details about the failure.

 PROT-00602: Failed to retrieve data from the cluster registry
Cause: Unable to retrieve necessary information from the cluster registry.
Action: Check the availability of the cluster registry and the details of the failure from the log file.

 PROT-00603: Oracle Cluster Registry is logically corrupted
Cause: A logical corruption was detected in the Oracle Cluster Registry.
Action: Check the log file for more information. Check availability of backups using 'ocrconfig -showbackup' command. Restore a compatible backup, and verify using ocrcheck.

 PROT-00604: Failed to retrieve the configured location(s) of the cluster registry.
Cause: Unable to retrieve the configured location(s) of the cluster registry.
Action: Check log file for details about the failure.

 PROT-00724: Oracle Cluster Registry configuration is:
Cause: ocrcheck called.
Action: None

 PROT-00811: when running this tool.
Cause: ocrcheck called with incorrect or missing options.
Action: Use ocrcheck with correct options.
TNS-00000: Not An Error
   Cause: Everything is working as it should.
   Action: Don't worry: Be happy.

TNS-00001: INTCTL: error while getting command line from the terminal
   Cause: Improper standard input connection from the terminal.
   Action: Normally not visible to the user. Start the INTCTL program again. If error persists, contact Oracle Customer Support.

TNS-00002: INTCTL: error while starting the Interchange
   Cause: Of the problem. Be sure to turn tracing off when the problem has been rectified.
   Action: Check the Interchange configuration files (INTCHG.ORA, TNSNET.ORA and TNSNAV.ORA) for errors and confirm that no other programs are using the ADDRESS(es) specified. If error continues, turn on tracing in the Interchange components and examine the trace files to determine the

TNS-00003: INTCTL: error while sending request to the Interchange
   Cause: Improper command sent to the Interchange or the Interchange is not responding. Not normally visible to the user.
   Action: Verify that the command sent to the Interchange is valid. Also check that the Interchange is running by using the INTCTL STATUS command. If necessary, start the Interchange using the INTCTL START command.

TNS-00004: INTCTL: error while starting the Navigator
   Cause: The Navigator could not be started.
   Action: Check to make sure that executables for the Navigator (navgatr) are present in the ORACLE executable directory on your platform. Check the configuration files TNSNET.ORA and TNSNAV.ORA for errors. If error continues, turn on tracing in the Interchange components and examine the trace files to determine the cause of the problem. Be sure to turn tracing off when the problem has been rectified.

TNS-00005: INTCTL: error while sending request to the Navigator
   Cause: The Navigator is not responding. Either the Navigator is not running or another process is responding.
   Action: Check that the Navigator is running by using the STATUS command of the Interchange Control Utility. Verify that the correct addresses are listed in the TNSNAMES.ORA, TNSNET.ORA, and TNSNAV.ORA configuration files.
TNS-00006: INTCTL: HOST variable is not defined

**Cause:** The HOST variable was not set.

**Action:** Set the variable HOST properly and restart the INTCTL program.

TNS-00007: INTCTL: unknown host

**Cause:** The pointer HOST is set to an unknown hostname.

**Action:** Set the pointer HOST properly and restart INTCTL program.

TNS-00008: INTCTL: could not contact destination Navigator

**Cause:** Connection could not be properly established to a Navigator. This may be because the Navigator specified is not running or the Navigator addresses are incorrect.

**Action:** Check that the Navigator is running by using the STATUS command of the Interchange Control Utility; if necessary, start the Navigator using the START command of the Interchange Control Utility. If it is running and the error persists, contact Oracle Customer Support.

TNS-00009: INTCTL: could not contact destination Connection Manager

**Cause:** Connection could not be properly established to a Connection Manager. This may be because the Connection Manager (Interchange) specified is not running or the Connection Manager addresses are incorrect.

**Action:** Make sure the Connection Manager is running by using the STATUS command of the Interchange Control Utility; if necessary, start the Connection Manager using the START command of the Interchange Control Utility. If it is running and the error persists, contact Oracle Customer Support.

TNS-00010: Error while flushing NS context

**Cause:** Internal NS error; connection may be lost.

**Action:** Make sure the connection is properly established. If the error persists, then contact Oracle Customer Support.

TNS-00011: INTCTL: error while starting the Connection Manager

**Cause:** The Connection Manager could not be started.

**Action:** Assure that the executable can be found in the standard Oracle executable area. Check the configuration file INTCHG.ORA for errors and confirm that no other process is using the ADDRESS(es) for this Connection Manager as specified in TNSNET.ORA. Tracing can also be turned on in the Connection Manager and detailed information about the reason for the error determined. Consult the MultiProtocol Interchange Administrator’s Guide and Chapter 2 of this manual for how to turn on tracing.

TNS-00012: INTCTL: error while processing Connection Manager request

**Cause:** An improper command was sent to the Connection Manager or it is not responding. Not normally visible to the user.

**Action:** Verify that the correct addresses are listed in the TNSNAMES.ORA, TNSNET.ORA, and TNSNAV.ORA configuration files. Also check that the Connection Manager is running by using the STATUS command of the Interchange Control Utility. If the error persists, contact Oracle Customer Support.

TNS-00013: INTCTL: error while performing NS disconnect command

**Cause:** Internal NS error. Error in closing down connections.
**Action:** Make sure the networking protocol being used is properly installed on the machine. If the error persists contact Oracle Customer Support.

**TNS-00014: INTCTL: error while opening terminal input channel**

**Cause:** Could not open standard terminal input. Internal error.

**Action:** Normally not visible to the user. Restart the INTCTL program. If error persists, contact Oracle Customer Support.

**TNS-00015: INTCTL: error while closing terminal input channel**

**Cause:** Could not close terminal input channel. Internal error.

**Action:** Normally not visible to the user. Restart the INTCTL program. If error persists, contact Oracle Customer Support.

**TNS-00016: INTCTL: error while performing NS send command**

**Cause:** Internal NS error. Connection may be lost.

**Action:** If the error persists contact Oracle Customer Support.

**TNS-00017: INTCTL: error while performing NS receive command**

**Cause:** Internal NS error. Connection may be lost.

**Action:** If the error persists contact Oracle Customer Support.

**TNS-00018: INTCTL: TNS_ADMIN not defined**

**Cause:** The TNS_ADMIN pointer is improperly set.

**Action:** No action necessary; TNS_ADMIN need only be set if you want to use a different network environment.

**TNS-00019: INTCTL: error initializing the national language interface**

**Cause:** The message file could not be found.

**Action:** Make sure that the ORACLE environment is set and that the message file is in the correct place.

**TNS-00020: INTCTL: missing NAVIGATOR_DATA in TNSNAV.ORA**

**Cause:** TNSNAV.ORA does not contain the NAVIGATOR_DATA component.

**Action:** Define the ADDRESS(es) for the Navigator, then restart the INTCTL program.

**TNS-00021: INTCTL: missing INTERCHANGE_DATA in INTCHG.ORA**

**Cause:** INTCHG.ORA does not contain an INTERCHANGE_DATA component.

**Action:** Define the correct data for the Connection Manager, then restart the INTCTL program.

**TNS-00022: INTCTL: missing CMANAGER_NAME in INTCHG.ORA**

**Cause:** INTCHG.ORA does not contain a CMANAGER_NAME component.

**Action:** Define the correct name for the CMANAGER_NAME, then restart the INTCTL program.

**TNS-00023: INTCTL: missing ADDRESS(es) in config files**

**Cause:** Configuration files do not contain an ADDRESS/ADDRESS_LIST component.

**Action:** Define the Connection Manager ADDRESS(es) in the TNSNET.ORA file and check the Navigator ADDRESS(es) in the TNSNAV.ORA file, then restart the INTCTL program.
TNS-00024: INTCTL: Unable to contact Navigator to obtain Connection Manager address

Cause: The Navigator is not running.

Action: Verify that the Navigator is running by doing a status request on the Navigator (use the Interchange Control Utility command STATUS). If necessary, start the Navigator using the Interchange Control Utility. Verify that the network is properly configured; if the error persists, contact Worldwide Customer Support.

TNS-00025: INTCTL: The ORACLE environment is not set up correctly

Cause: The ORACLE environment is incorrectly set up.

Action: Refer to the Oracle operating system specific documentation for your platform for information on how the ORACLE environment should be set. Correct it and rerun INTCTL. Make sure the ORACLE environment includes the correct directories.

TNS-00026: INTCTL: TNS_ADMIN directory set, and is being used

Cause: The TNS_ADMIN environment variable is set properly. INTCTL will use the TNS_ADMIN directory. This is only an informative message. If you do not want it to be used, and want the default directory to be used instead, then unset TNS_ADMIN and reexecute.

Action: None

TNS-00027: INTCTL: Could not resolve Navigator's name/address

Cause: The Navigator's name to address definition is missing.

Action: Check TNSNAMES.ORA file and make sure to include a definition for the name specified.

TNS-00028: INTCTL: Could not resolve Connection Manager's name/address

Cause: The Connection Manager's name does not have a definition that the Navigator knows about, nor is the name/address available in the TNSNAMES.ORA file. The name may also be incorrect in the INTCHG.ORA file.

Action: Verify that the Connection Manager's name is in the TNSNET.ORA file read by the Navigator or in the TNSNAMES.ORA file. Be sure that INTCHG.ORA is correct.

TNS-00031: INTCTL: internal NT error

Cause: Problem interfacing to the protocol adapters installed.

Action: Normally not visible to the user. Try starting INTCTL again. If the error persists, check the product installation. If it is correct, contact Oracle Customer Support.

TNS-00032: INTCTL: internal NS error

Cause: Problem interfacing with TNS.

Action: Normally not visible to the user. Try starting INTCTL again. If the error persists, check the product installation. If it is correct, contact Oracle Customer Support.

TNS-00033: INTCTL: internal NL error

Cause: Problem with internal TNS module NL.

Action: Normally not visible to the user. Try starting INTCTL again. If the error persists, check the product installation. If it is correct, contact Oracle Customer Support.
**TNS-00034: INTCTL: internal NR error**

**Cause:** Problem with internal Interchange routines.

**Action:** Normally not visible to the user. Try starting INTCTL again. If the error persists, check the product installation. If it is correct, contact Oracle Customer Support.

**TNS-00035: INTCTL: error while constructing full file name**

**Cause:** Problem while constructing the full path for a file name because the path name to the file or the environment variables are incorrect. Files looked up include TNSNAMES.ORA, TNSNAV.ORA, INTCHG.ORA and the error files for the Navigator and Connection Manager.

**Action:** Check that all environment variables are defined correctly and that all configuration files exist in their correct places.

**TNS-00036: INTCTL: error reading from Navigator or Connection Manager error files**

**Cause:** Problem while reading from Navigator or Connection Manager error files generated by the Navigator or Connection Manager when they fail to start.

**Action:** Check that a standard Network Error directory exists and that all privileges on the directory are appropriate.

**TNS-00037: INTCTL: error opening Navigator or Connection Manager error files**

**Cause:** Failed to open Navigator or Connection Manager error files when they have failed to start.

**Action:** Check that a Network Error directory exists and that all privileges on the directory are appropriate.

**TNS-00038: INTCTL: Poorly formed address or command string**

**Cause:** An unacceptable string was encountered while attempting to send a message to either the Navigator or Connection Manager. The addresses provided for either the Navigator or Connection Manager may be incorrectly constructed.

**Action:** Check all address strings in configuration files (TNSNAMES.ORA, TNSNAV.ORA or TNSNET.ORA) and assure that they are properly formed. Regenerate the files, if possible. If all is correct, please contact Worldwide Customer Support.

**TNS-00039: INTCTL: error while spawning a process**

**Cause:** An error was encountered while spawning a process due to an internal operating system dependent problem. Machine resources may be limited.

**Action:** Retry command. Check permissions on Interchange executables and the current setting of the search path. If necessary, terminate other applications to free up machine resources. If the error persists, contact Oracle Customer Support.

**TNS-00040: INTCTL: failed to initialize trace context- Continuing anyway**

**Cause:** Problem while opening specified trace file because of errors in INTCHG.ORA or because the user has incorrect privileges, or the file does not exist.

**Action:** Check the privileges on the configuration files and ensure that all of them exist in their proper locations.

**TNS-00041: INTCTL: Navigator already running. Start operation cancelled**

**Cause:** There is a Navigator already running and listening on the same addresses.
Action: None; the Navigator is already running.

TNS-00042: INTCTL: CMANAGER already running. Start operation cancelled
Cause: There is a Connection Manager already running and listening on the same addresses.
Action: None; the Connection Manager is already running.

TNS-00043: The CMANAGER has active connections, do you still want to stop it (y/n)?
Cause: The CMANAGER that is being stopped has active connections going through. This is the confirmation message.
Action: Respond by pressing y or n. Answering y will cause the active database connection to be dropped; this is not generally recommended.

TNS-00044: INTCTL: You must have an INTCHG.ORA file to contact the Connection Manager
Cause: There was an attempt to contact a default Connection Manager (Interchange) where there was no INTCHG.ORA present in the correct directory.
Action: Create an INTCHG.ORA file. Make sure it is placed in the correct directory and includes the correct name for the Connection Manager you wish to contact.

TNS-00045: INTCTL: Could not contact the Navigator on address
Cause: There was an attempt to contact a Navigator on a specific address which is not responding.
Action: Check the TNSNAV.ORA file for that address. Or check that the Navigator is actually listening on that address.

TNS-00046: INTCTL: Could not contact the CMANAGER on address
Cause: There was an attempt to contact a CMANAGER on a specific address which is not responding.
Action: Verify that the TNSNET.ORA file contains that address. Also check that the CMANAGER is actually listening on that address by using the INTCTL STATUS command. If necessary, start the Connection Manager using the INTCTL START command.

TNS-00060: INTCTL: Bad command: only the STATUS command can be used on remote Interchanges
Cause: The user entered a command that does not exist, or the user tried to make a request other than STATUS to a remote Interchange.
Action: Check the MultiProtocol Interchange Administrator’s Guide for a list of INTCTL commands or type HELP for a list of valid commands.

TNS-00061: INTCTL: Bad command or syntax error: You must specify a trace level
Cause: The user did not specify a trace level.
Action: Specify a trace level and retry command.

TNS-00062: INTCTL: Bad command or syntax error: For help type help/h/?
Cause: The user entered an invalid command.
Action: Check the MultiProtocol Interchange Administrator’s Guide or type HELP for a list of valid commands.

TNS-00063: INTCTL: Failed to allocate memory for buffers
TNS-00000 to TNS-12699
95-7

**Cause:** INTCTL was unable to allocate memory for internal buffers.
**Action:** Check the amount of available memory on your machine to ensure that there is enough memory to run this executable. If necessary, free up memory by running fewer programs, then try again.

**TNS-00064:** INTCTL: Failed to find CMANAGER_NAME in INTCHG.ORA
**Cause:** INTCTL was unable to find the CMANAGER_NAME parameter in INTCHG.ORA.
**Action:** Check that the INTCHG.ORA file is properly constructed.

**TNS-00065:** INTCTL: Command cannot be executed remotely
**Cause:** A command other than status and version has been attempted remotely.
**Action:** If you desire execute any command other than status and version, you must run intctl on the interchange machine.

**TNS-00070:** INTCTL usage: [intctl] <command> <process_name> [argument]
**Cause:** Help message displayed by INTCTL.
**Action:** None

**TNS-00071:** where <command> is one of following:
**Cause:** Help message displayed by INTCTL.
**Action:** None

**TNS-00072:** * start - start up process_name
**Cause:** Help message displayed by INTCTL.
**Action:** None

**TNS-00073:** * stop/abort - stop the process_name
**Cause:** Help message displayed by INTCTL.
**Action:** None

**TNS-00074:** * status - get statistics from the process_name
**Cause:** Help message displayed by INTCTL.
**Action:** None

**TNS-00075:** NOTE: the user may get the status info of a remote component by specifying the component name in the argument field
**Cause:** Help message displayed by INTCTL.
**Action:** None

**TNS-00076:** component by specifying the component name in the argument field
**Cause:** Help message displayed by INTCTL.
**Action:** None

**TNS-00077:** * log_on - ask process_name to turn logging on
**Cause:** Help message displayed by INTCTL.
**Action:** None
TNS-00079: * log_off - ask process_name to turn logging off
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00080: * force_log - ask process_name to dump its state
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00081: * trace_on - ask process name to turn tracing on
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00082: NOTE: the user MUST specify a trace level
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00083: (USER or ADMIN) in the argument field
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00084: * trace_off - ask process name to turn tracing off
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00085: * reread - ask the process name to reread parameter files
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00086: * reload - ask the Navigator to reload TNSNET.ORA
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00087: * version - ask the process name to display its version number
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00088: * exit - quit the Interchange controller
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00089: process_name is one of Interchange, CMANAGER, or Navigator
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00090: * Interchange - will ask the Interchange
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00091: * Navigator (or navgatr) - will ask the Navigator only
   Cause: Help message displayed by INTCTL.
   Action: None
TNS-00092: * CMANAGER (or intlsnr) - will ask the Cmanager only
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00093: argument is only supplied to either status or trace_on
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00094: * to status - argument is considered the remote process_name
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00095: * to trace_on - argument is considered the trace level
   Cause: Help message displayed by INTCTL.
   Action: None

TNS-00100: Unable to allocate memory
   Cause: Out of memory on the machine.
   Action: Add more memory or run fewer processes.

TNS-00101: File operation error
   Cause: Error in accessing reading or writing a particular file.
   Action: Check existence of or operating system access to the log and trace file locations.

TNS-00102: Keyword-Value binding operation error
   Cause: Not normally visible to the user. May indicate a shortage of memory.
   Action: If error persists contact Oracle Customer Support.

TNS-00103: Parameter file load error
   Cause: Parameter file process failed.
   Action: Check to make sure that all parameter files necessary for the Interchange are present (TNSNAVORA, TNSNETORA and INTCHGORA). If these files are present and properly configured, turn on tracing and repeat the operation. Turn off tracing when the trace is complete. Look in the trace file for errors in the parameter loading process. If error persists contact Oracle Customer Support.

TNS-00104: Data stream open/access error
   Cause: Unable to open or access data stream for either log or trace files for the Interchange.
   Action: Check read/write permissions on Oracle files and directories.

TNS-00105: Could not initialize tracing
   Cause: The INTCHGORA file is improperly configured. Verify the trace parameters specified.
   Action: If error persists contact Oracle Customer Support.

TNS-00106: Failed to open log file
   Cause: Unable to access or obtain write permission to create log file.
   Action: Check existence of or access to log file directory.

TNS-00107: Unable to initialize TNS global data
Cause: Not normally visible to the user.
Action: If error persists contact Oracle Customer Support.

TNS-00108: TNS_ADMIN not defined
Cause: TNS_ADMIN pointer is not set.
Action: Set the TNS_ADMIN pointer before running application.

TNS-00109: Message could not be printed; not enough memory
Cause: Printing of message failed due to lack of memory. Not normally visible to user.
Action: Increase the resources on your machine. If error persists contact Oracle Customer Support.

TNS-00110: Could not initialize network from file TNSNET.ORA
Cause: Poorly formed network information in network file.
Action: Fix network configuration data to assure that at least one Interchange is defined in TNSNET.ORA.

TNS-00111: Failed to get configuration data from file
Cause: Poorly formed configuration information in network files TNSNET.ORA or TNSNAV.ORA.
Action: Check TNSNET.ORA and TNSNAV.ORA and confirm that they are correct.

TNS-00112: Failed to find configuration file name
Cause: Name specified for configuration file was incorrect.
Action: Check for presence of the configuration file.

TNS-00113: Failed to open error log file
Cause: Could not open log file during startup of Navigator or Connection Manager due to read or write permission problems or non-existent error directory.
Action: Create the standard error directory or assure that if one is present the Interchange executables can write to it.

TNS-00114: Internal error- Allocation of addresses not performed
Cause: Internal error. Should not normally occur.
Action: Contact Oracle Customer Support.

TNS-00115: Could not allocate pump global buffers
Cause: Not enough memory to allocate pump buffers.
Action: Decrease the number of PUMP_BUFFERS in INTCHG.ORA.

TNS-00116: Pump failed during initial bequeath
Cause: by insufficient machine resources.
Action: Attempt the connection again. The pump should recover from such a failure. If machine resources appear to be the problem, add more resources // or shut down some active applications. If problem persists, contact Oracle Customer Support.

TNS-00117: Internal error- No data passed through pump
Cause: Internal error. Data expected has not arrived yet.
Action: If error persists, contact Oracle Customer Support.
TNS-00119: Missing PUMP_CONNECTIONS in INTCHG.ORA  
**Cause:** No PUMP_CONNECTIONS parameter specified in INTCHG.ORA.  
**Action:** Add PUMP_CONNECTIONS parameter to INTCHG.ORA.

TNS-00120: Missing PUMPS in INTCHG.ORA  
**Cause:** No PUMPS parameter specified.  
**Action:** Add an appropriate number of PUMPS to INTCHG.ORA.

TNS-00121: Missing CMANAGER_NAME in INTCHG.ORA  
**Cause:** No CMANAGER_NAME parameter specified.  
**Action:** Define the CMANAGER_NAME parameter in INTCHG.ORA; it must match the CMANAGER_NAME parameter used in TNSNET.ORA for that Interchange.

TNS-00122: Missing ADDRESS(es) in TNSNET.ORA file  
**Cause:** No ADDRESS or ADDRESS_LIST parameter specified in TNSNET.ORA.  
**Action:** Define a valid set of ADDRESSes for the Connection Manager in the TNSNET.ORA file.

TNS-00123: Unable to perform a listen on configured ADDRESS(es)  
**Cause:** Another process is already listening on this address or the ADDRESS is incorrectly defined.  
**Action:** Check the ADDRESS(es) defined in TNSNET.ORA (for the Connection Manager) for errors. Verify that another program is not using them.

TNS-00124: Internal error - Unable to create empty address  
**Cause:** - Internal error. Should not normally occur.  
**Action:** If problem persists contact Oracle Customer Support.

TNS-00125: Failed to get number of Interchanges in TNSNET.ORA  
**Cause:** Error in the TNSNET.ORA file.  
**Action:** Check the contents of TNSNET.ORA and eliminate errors. Regenerate the configuration files.

TNS-00126: Missing Connection Manager name and address in TNSNET.ORA  
**Cause:** The Interchange name specified in INTCHG.ORA is not defined in the TNSNET.ORA file.  
**Action:** Define one Connection Manager name and set of addresses for each Interchange in the network. Regenerate the configuration files.

TNS-00127: Missing Connection Manager name in TNSNET.ORA  
**Cause:** One or more Connection Manager names are missing.  
**Action:** Ensure that each Connection Manager name is defined in TNSNET.ORA. Regenerate TNSNET.ORA.

TNS-00128: Missing COMMUNITY in TNSNET.ORA  
**Cause:** One or more ADDRESSes does not have a COMMUNITY assigned.  
**Action:** Ensure that all addresses have a COMMUNITY defined in TNSNET.ORA.

TNS-00129: Internal error - Failed to create new community  
**Cause:** Internal Error. Should not normally occur. There may be a resource limitation problem on the machine.
Action: Stop and restart Interchange. If possible, make more memory available on the machine. If problem persists, contact Oracle Customer Support.

TNS-00130: Failed to create Interchange's internal address
Cause: There is an error in one of the addresses listed in TNSNET.ORA.
Action: Check the file for errors in defining Interchanges.

TNS-00131: Missing COMMUNITY in COMMUNITY_COST_LIST in TNSNET.ORA
Cause: A COMMUNITY keyword-value pair is missing within the COMMUNITY_COST_LIST in TNSNET.ORA.
Action: Define the communities with a COMMUNITY name and associated COST in COMMUNITY_COST_LIST.

TNS-00132: COST value must be an integer greater than 0
Cause: A community has been defined in TNSNET.ORA with a COST of 0.
Action: Assign an alternate value that is greater than 0.

TNS-00133: Missing LOCAL_COMMUNITIES field in TNSNAV.ORA
Cause: Improperly configured TNSNAV.ORA file.
Action: Define the LOCAL_COMMUNITIES fields correctly in TNSNAV.ORA.

TNS-00134: Missing COMMUNITY component in addresses for the Navigator in TNSNAV.ORA
Cause: The addresses specified for the Navigator have no COMMUNITY name.
Action: Ensure that all addresses in the NAVIGATOR_ADDRESSES field have a COMMUNITY entry in the TNSNAV.ORA file.

TNS-00135: Missing TNS error message file
Cause: No error message file present.
Action: Ensure that the ORACLE environment is correctly set for your platform and that there is a message directory that contains the correct error message file.

TNS-00136: Did not register product/facility for TNS error message
Cause: Error message file error.
Action: Ensure that the ORACLE environment is correctly set for your platform and that there is a message directory that contains the correct error message file.

TNS-00137: Failed to get TNS error message file entry
Cause: No TNS error message file present.
Action: Ensure that the ORACLE environment is correctly set for your platform and that there is a message directory that contains the correct error message file.

TNS-00138: Failed to find ORACLE executable directory
Cause: The ORACLE environment is not correctly set.
Action: Ensure that the ORACLE environment is correctly set and the error messages file is in the correct place.

TNS-00139: Internal - Data passed from the Interchange listener is poorly formed
Cause: Internal error in Interchange.
Action: Check that you are using compatible components of the Interchange product, using the INTCTL VERSION command. If problem persists call Oracle Customer Support.

TNS-00140: Interchange specified was not found in network tables
Cause: Could not find the Interchange specified in a control request.
Action: Check that the Interchange specified is indeed in TNSNET.ORA.

TNS-00141: Failed to get file stream information
Cause: Error in the file stream package.
Action: None

TNS-00142: Community mismatch in TNSNAV.ORA
Cause: The communities in the LOCAL_COMMUNITIES entry in TNSNAV.ORA do not correspond with all the communities in the NAVIGATOR_ADDRESSES entry.
Action: Assure that all communities in the NAVIGATOR_ADDRESSES correspond to those in the LOCAL_COMMUNITIES component.

TNS-00143: Illegal PREFERRED_CMANAGERS entry in TNSNAV.ORA
Cause: PREFERRED_CMANAGERS entry in the TNSNAV.ORA used by the Connection Manager. There should only be a PREFERRED_NAVIGATORS entry in the TNSNAV.ORA on an Interchange.
Action: Remove the PREFERRED_CMANAGERS entry from TNSNAV.ORA and assure that either no PREFERRED_NAVIGATORS entry is present or that it is correct.

TNS-00144: PUMP_CONNECTIONS value in INTCHG.ORA is too large.
Cause: The number of PUMP_CONNECTIONS specified in INTCHG.ORA is too large to be supported on this platform.
Action: Consult the Oracle operating system specific manual for the maximum value for the number of PUMP_CONNECTIONS.

TNS-00145: PUMPS value in INTCHG.ORA is too large.
Cause: The number of PUMPS specified in INTCHG.ORA is too large to be supported on this platform.
Action: Consult the Oracle operating system specific manual for the maximum value for the number of PUMPS.

TNS-00146: Internal-- Retry data request withing pump.
Cause: The data space provided in order to receive data from the pump is too small.
Action: Operation must be retried with a larger buffer.

TNS-00147: Failed to start a pre-spawned pump.
Cause: The Connection Manager was unable to start a pump during startup.
Action: Check all configuration parameters and assure that they are correct. Turn on tracing to determine the area that the failure occurred in.

TNS-00200: Unable to do nsanswer on context result=string
Cause: Requester of service may have aborted or options negotiation failed.
**Action:** Try making the connection again. If the problem persists call Oracle Customer Support.

**TNS-00201: Unable to read answer connection data :** string

*Cause:* Improperly formed connect data sent to the Interchange listener.

*Action:* If problem persists, check the application using the Interchange (it may be closing down or crashing). Call Oracle Customer Support if the problem cannot be located.

**TNS-00202: Failure in redirecting call :** Original to string Redirect to string

*Cause:* Internal - error could not redirect call to a pump or other Interchange listener. The cause may be insufficient network or machine resources.

*Action:* Add resources or close some running applications in order to free up resources. If error persists, call Oracle Customer Support.

**TNS-00203: Unable to start tracing in intlsnr**

*Cause:* Failure in setting up tracing for Interchange listener.

*Action:* Check file permissions in Network trace directory also check to make sure that if trace file names and directories are specified in INTCHG.ORA, they are correct.

**TNS-00204: Started tracing in intlsnr**

*Cause:* Internal message- Successfully started tracing information.

*Action:* None

**TNS-00205: Turning off tracing in intlsnr**

*Cause:* Internal message - Turned off tracing in the Interchange listener.

*Action:* None

**TNS-00206: Status Information for Interchange string**

*Cause:* Message sent back by Interchange as header for status request.

*Action:* None

**TNS-00207: Uptime :** number days number hr. number min. number sec

*Cause:* Part of status request.

*Action:* None

**TNS-00208: Logging :** string

*Cause:* Part of status request.

*Action:* None

**TNS-00209: Tracing :** string

*Cause:* Part of status request Interchange.

*Action:* None

**TNS-00210: Total Pumps Available :** number

*Cause:* Part of status request for Connection Manager.

*Action:* None

**TNS-00211: Total Active Pumps :** number

*Cause:* Part of status request for Connection Manager.

*Action:* None
TNS-00212: Total Pumps Started : number
  Cause: Part of status request for Connection Manager.
  Action: None

TNS-00213: Available Connections : number
  Cause: Part of status request for Connection Manager.
  Action: None

TNS-00214: Total Connections in Use : number
  Cause: Part of status request for Connection Manager.
  Action: None

TNS-00215: Total Successful Connections : number
  Cause: Part of status request for Connection Manager.
  Action: None

TNS-00216: Total Failed Connections : number
  Cause: Part of status request for Connection Manager.
  Action: None

TNS-00217: Total Bytes of Data : number
  Cause: Part of status request for Connection Manager.
  Action: None

TNS-00218: Current Bytes/Sec. : number
  Cause: Part of status request for Connection Manager.
  Action: None

TNS-00219: Pump Strategy : string
  Cause: Part of status request.
  Action: None

TNS-00220: Pump Breakdown ---------------
  Cause: Part of status request.
  Action: None

TNS-00221: Pump Connections Total Data Bytes/Second
  Cause: Part of status request.
  Action: None

TNS-00222: -----------------------------------------------
  Cause: Part of status request.
  Action: None

TNS-00223: number
  Cause: Part of status request.
  Action: None

TNS-00224: No more connections available
  Cause: More connections were made to the Interchange than are configured in INTCHG.ORA.
**Action:** Wait until the Interchange is not as busy or change the number of connections allowed in INTCHG.ORA and restart the Interchange.

**TNS-00225: Unable to bequeath connection to pump**  
**Cause:** Unable to start a pump because either the executable cannot be found or too many processes are currently running on a particular machine.  
**Action:** Reduce the number of processes on the machine or increase the resources on the machine.

**TNS-00226: Unable to contact pump number to send broadcast message string**  
**Cause:** Could not call a particular pump.  
**Action:** None, but if the problem persists call Oracle Customer Support.

**TNS-00227: Unable to contact pump; Connection Manager declared pump dead**  
**Cause:** A pump became an orphaned process. A protocol adapter is not working properly or machine network resources are being over used.  
**Action:** This error is not immediately fatal; the orphaned pump may continue to function. Restart the Interchange when convenient. If the problem persists, call Oracle Customer Support.

**TNS-00228: Failure in finding pump data**  
**Cause:** Internal problem with data passed back from pump.  
**Action:** None

**TNS-00229: Error in call: unable to deliver message :string: string string string**  
**Cause:** Destination for call is unavailable.  
**Action:** None

**TNS-00230: Cannot start new pump process: string string Protocol Adapter errors:number**  
**Cause:** Unable to create a new process; possibly there are too many processes on the machine.  
**Action:** Free machine resources by exiting other applications on the Interchange machine. If the problem continues you may need more memory on the machine. If you believe there are sufficient resources on the machine but the problem persists, contact Oracle Customer Support.

**TNS-00231: Pump is alive**  
**Cause:** Pump log message sent to Interchange listener.  
**Action:** None

**TNS-00232: Unable to setup connection**  
**Cause:** Error log message sent from pump to indicate failure in initiating connection because of errors in the call string: network problem or resource limitations.  
**Action:** None

**TNS-00233: Interchange failed to make contact with destination with errors: string string string**  
**Cause:** Pump call to destination failed.  
**Action:** Check destination.
TNS-00234: Connect data for failed call: CALL DATA = string RECEIVED DATA = string:
  Cause: Connect data supplied for error 00233.
  Action: None

TNS-00235: Aborting connection: Protocol Adapter errors: string; number; number;
  Cause: Pump aborting connection because connection has been up too long, or some other network error on the connection.
  Action: None

TNS-00236: Failed to initialize tracing
  Cause: Pump failed to initialize tracing.
  Action: Check that INTCHG.ORA is properly configured.

TNS-00237: Failed to refuse connection
  Cause: Connection may have aborted before error took place in Pump.
  Action: None

TNS-00238: Pump number @: string:
  Cause: Prepended message to all pump log messages.
  Action: None

TNS-00239: Connection Manager has been stopped
  Cause: Message sent back to control program from Interchange.
  Action: None

TNS-00240: Connection Manager: Logging is now ON
  Cause: Message sent back to control program from Interchange.
  Action: None

TNS-00241: Connection Manager: Logging is now OFF
  Cause: Message sent back to control program from Interchange.
  Action: None

TNS-00242: Connection Manager: Tracing is now ON
  Cause: Message sent back to control program from Interchange.
  Action: None

TNS-00243: Connection Manager: Tracing is now OFF
  Cause: Message sent back to control program from Interchange.
  Action: None

TNS-00244: Connection Manager: Request Failed
  Cause: Message sent back to control program from Interchange.
  Action: None

TNS-00245: Connection Manager: Failed to open log file
  Cause: Message sent back to control program from Interchange.
  Action: None
TNS-00246: Connection Manager: Failed to start tracing

Cause: Message sent back to control program from Interchange.

Action: None

TNS-00247: Unable to allocate memory for configuration data from TNSNET.ORA file

Cause: Navigator failed to allocate enough memory for TNSNET.ORA configuration file.

Action: Increase machine resources available for running the Interchange or remove some other running applications from the machine.

TNS-00248: Unable to get information from file :string: Exiting with NR error: number

Cause: TNSNAV.ORA poorly configured or addresses provided are already being used by another application.

Action: Check the syntax of the TNSNAV.ORA file; if necessary, assign new addresses.

TNS-00249: Unable to read network configuration data from file string with error: string

Cause: Network configuration file TNSNET.ORA is missing or poorly configured.

Action: Check to make sure that TNSNET.ORA is properly configured.

TNS-00250: Navigator has been started

Cause: Message to log file on Navigator startup.

Action: None

TNS-00251: Failure in nstest:

Cause: NS test operation failed due to internal error.

Action: If the problem persists there may be a network problem or resource limitations on the machine. If these do not seem to be causing the problem, call Oracle Customer Support.

TNS-00252: Unable to handle route request: string

Cause: Command requested did not exist.

Action: None

TNS-00253: Error in reading network configuration data from file string with error string

Cause: TNSNET.ORA is poorly configured or non-existent.

Action: Check to make sure that TNSNET.ORA is properly configured.

TNS-00254: Navigator has been stopped

Cause: Message sent to Interchange control program by Navigator confirming it has been stopped.

Action: None

TNS-00255: Closing down log, stopping Navigator

Cause: Log message when Navigator is stopped.

Action: None

TNS-00256: Status of Navigator:
Cause: Navigator status message component
Action: None

TNS-00257: Number of Successful Requests: number
Cause: Navigator status message component
Action: None

TNS-00258: Number of Failed Requests: number
Cause: Navigator status message component
Action: None

TNS-00259: Disabled Interchange list:
Cause: Navigator status message component
Action: None

TNS-00260: -------------------------------
Cause: Navigator status message component
Action: None

TNS-00261: Interchange Name Community Link Down Time Remaining (secs)
Cause: Navigator status message component
Action: None

TNS-00262: stringstringnumber
Cause: Navigator status message component
Action: None

TNS-00263: Navigator: Request Failed
Cause: Response from Navigator when a particular request failed.
Action: None

TNS-00264: Navigator: Failed to reload configuration data
Cause: Message sent to the Interchange control program when reload of network configuration failed. TNSNET.ORA Poorly configured or missing.
Action: None

TNS-00265: Navigator: Reloaded network configuration data
Cause: Message sent to Interchange control program when reload of network is successful.
Action: None

TNS-00266: Navigator: Unknown Request
Cause: Request was made to Navigator that it knows nothing about.
Action: None

TNS-00267: Navigator: Internal Error
Cause: Generated when a request was made to the Navigator it knows nothing about.
Action: None

TNS-00268: ON
Cause: On component of message.
Action: None

TNS-00269: OFF
Cause: Off component of message.
Action: None

TNS-00270: string: Terminal Error string
Cause: Message put out in error file of executable when it fails to start.
Action: None

TNS-00271: Connection Manager
Cause: Name of the Connection Manager.
Action: None

TNS-00272: Navigator
Cause: Name for the Navigator.
Action: None

TNS-00273: Navigator: Logging is now ON
Cause: Message sent back to control program from Navigator.
Action: None

TNS-00274: Navigator: Logging is now OFF
Cause: Message sent back to control program from Navigator.
Action: None

TNS-00275: Navigator: Tracing is now ON
Cause: Message sent back to control program from Navigator.
Action: None

TNS-00276: Navigator: Tracing is now OFF
Cause: Message sent back to control program from Navigator.
Action: None

TNS-00277: Navigator: Request Failed
Cause: Message sent back to control program from Navigator.
Action: None

TNS-00278: Navigator: Failed to Open Log file
Cause: Message sent back to control program from Navigator.
Action: None

TNS-00279: Navigator: Failed to Start Tracing
Cause: Message sent back to control program from Navigator.
Action: None

TNS-00280: Max Avg Bytes/Sec: number
Cause: Part of status request for Connection Manager.
Action: None
TNS-00281: Connection Manager: Forced Log output
   Cause: Message sent back to control program from Connection Manager.
   Action: None

TNS-00282: Connection Manager: Failed to force log, logging is off
   Cause: Message sent back to control program from Connection Manager.
   Action: None

TNS-00283: Listening on the following TNS addresses:
   Cause: Message sent back to control program from Connection Manager.
   Action: None

TNS-00284: Imm Max Avg Bytes/Sec : number
   Cause: Part of status request for Connection Manager.
   Action: None

TNS-00285: Avg Connect Time (secs) : number
   Cause: Part of status request for Connection Manager.
   Action: None

TNS-00286: Max Connect Time (secs) : number
   Cause: Part of status request for Connection Manager.
   Action: None

TNS-00287: Min Connect Time (secs) : number
   Cause: Part of status request for Connection Manager.
   Action: None

TNS-00288: Navigator: Failed to Disable Interchange
   Cause: Message sent back to control program from Navigator.
   Action: None

TNS-00289: Navigator: Disabled Interchange
   Cause: Message sent back to control program from Navigator.
   Action: None

TNS-00290: Navigator: Failed to Enable Interchange
   Cause: Message sent back to control program from Navigator.
   Action: None

TNS-00291: Navigator: Enabled Interchange
   Cause: Message sent back to control program from Navigator.
   Action: None

TNS-00292: Log File Name : string
   Cause: Message sent back to control program showing log file name
   Action: None

TNS-00293: Trace File Name : string
   Cause: Message sent back to control program showing trace file name
   Action: None
TNS-00294: Connection Manager: Security is enabled, you cannot STOP the Interchange
  Cause: Message sent back to control program indicating that the connection manager is secure.
  Action: None

TNS-00295: Navigator: Security is enabled, you cannot STOP the Navigator
  Cause: Message sent back to control program indicating that the Navigator is secure.
  Action: None

TNS-00296: Stoppable : string
  Cause: Message sent back to control program indicating whether program can be stopped.
  Action: None

TNS-00297: Logging Level : string
  Cause: Message sent back to control program indicating whether program can be stopped.
  Action: None

TNS-00298: Request to Navigator: string
  Cause: Log entry for request to Navigator.
  Action: None

TNS-00299: Response from Navigator: string
  Cause: Log entry for request to Navigator.
  Action: None

TNS-00300: ***Disabling Interchange : string
  Cause: Log entry for disabling a particular Interchange.
  Action: None

TNS-00301: ***Enabling Interchange : string
  Cause: Log entry for disabling a particular Interchange.
  Action: None

TNS-00302: Connection Manager: Unknown Request
  Cause: Request sent by Interchange control program is unknown.
  Action: None

TNS-00303: Connection Manager: Reread parameter data
  Cause: Request sent by control manager to control programming indicating that parameter data was read.
  Action: None

TNS-00304: Status Information for Connection Manager:
  Cause: Message sent back by Interchange as header for status request.
  Action: None

TNS-00305: The Navigator encountered an invalid/unknown trace level
Cause: Message sent back by the Navigator indicating an invalid trace level.
Action: Reattempt the request with a correct trace level.

TNS-00306: Connection Manager encountered an invalid/unknown trace level
Cause: Message sent back by the Connection Manager indicating an invalid trace level.
Action: Reattempt the request with a correct trace level.

TNS-00307: Navigator: Reread parameter data
Cause: Request sent by the Navigator to control program indicating that parameter data was read.
Action: None

TNS-00308: Navigator: Failed to open log while rereading parameter data
Cause: Request sent by the Navigator to control program indicating that it could not reopen log file after rereading parameter data.
Action: None

TNS-00309: Connection Manager: Failed to open log while re-reading parameter data
Cause: Request sent by the Connection Manager to control program indicating that it could not reopen log file after rereading parameter data.
Action: None

TNS-00310: Navigator: Failed to start tracing after rereading parameter data
Cause: Message sent back to control program from Navigator.
Action: None

TNS-00311: Connection Manager: Failed to start tracing after rereading parameter data
Cause: Message sent back to control program from Connection Manager.
Action: None

TNS-00312: Connection Manager: Failed to get version information
Cause: Message sent back to control program from Connection Manager.
Action: None

TNS-00313: Navigator: Failed to get version information
Cause: Message sent back to control program from Connection Manager.
Action: None

TNS-00314: Protocol Adapter Errors: number,number
Cause: Protocol Adapter errors which go with message 233
Action: None

TNS-00315: Failed to allocate larger connect data area for getting pump data: number
Cause: Could not allocate a large enough area to get pump statistics; continue without them.
Action: None

TNS-00316: Ran out of data buffers in the pump
**Cause:** The Interchange is resource limited by having too few data buffers in the pump.

**Action:** If the problem persists (that is, there are a lot of log messages), increase the number of pump buffers by increasing the value of the parameter PUMP BUFFERS in INTCHG.ORA. Then shutdown and restart the Interchange to make the changes take effect.

**TNS-00317: Failed to contact Connection Manager**

**Cause:** Connection Manager is not running.

**Action:** Start the Connection Manager and retry

**TNS-00501: Cannot allocate memory**

**Cause:** Sufficient memory could not be allocated to perform the desired activity.

**Action:** Either free some resource for TNS or add more memory to the machine. For further details, turn on tracing and reexecute the operation.

**TNS-00502: Invalid argument**

**Cause:** An internal function received an invalid parameter.

**Action:** Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-00503: Illegal ADDRESS parameters**

**Cause:** An illegal set of protocol adapter parameters was specified.

**Action:** Check the parameters within the ADDRESS section of the TNSNAMES.ORA file. It may be helpful to turn on tracing and look at the addresses specified in the trace file, checking for spelling or other errors. Be sure to turn tracing off when the trace is complete.

**TNS-00504: Operation not supported**

**Cause:** An internal function received a request to perform an operation that is not supported (on this machine).

**Action:** Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-00505: Operation timed out**

**Cause:** The requested operation could not be completed within the timeout period.

**Action:** For further details, turn on tracing and reexecute the operation.

**TNS-00506: Operation would block**

**Cause:** An internal operation did not commence because to do so would block the current process and the user has requested that operations be non-blocking.

**Action:** None needed; this is an information message.

**TNS-00507: Connection closed**

**Cause:** Normal "end of file" condition has been reached; partner has disconnected.

**Action:** None needed; this is an information message.

**TNS-00508: No such protocol adapter**

**Cause:** The protocol adapter requested for this connection does not exist.

**Action:** Install the protocol adapter or use one that is available. Be sure that the correct protocols are listed in the configuration files.
TNS-00509: Buffer overflow
Cause: Too much data for buffer.
Action: Reexecute with larger receive buffer or smaller send buffer.

TNS-00510: Internal limit restriction exceeded
Cause: Too many files or sockets open simultaneously (or some other resource has been depleted).
Action: For further details, trace the operation for protocol details.

TNS-00511: No listener
Cause: The connect request could not be completed because no application is listening on the address specified, or the application is unable to service the connect request in a sufficiently timely manner.
Action: Ensure that the supplied destination address matches one of the addresses used by the listener - compare the TNSNAMES.ORA entry with appropriate LISTENER.ORA file (or TNSNAV.ORA if the connection is to go by way of an Interchange. Start the listener on the remote machine.

TNS-00512: Address already in use
Cause: Specified listener address is already being used.
Action: Start your listener with an unused address.

TNS-00513: Destination host unreachable
Cause: Contact cannot be made with remote party.
Action: Make sure the network driver is functioning and the network is up.

TNS-00514: Contexts have different wait/test functions
Cause: Two protocol adapters have conflicting wait/test functions.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00515: Connect failed because target host or object does not exist
Cause: The address specified is not valid, or the program being connected to does not exist.
Action: Ensure the ADDRESS parameters have been entered correctly; the most likely incorrect parameter is the node name. Ensure that the executable for the server exists (perhaps "oracle" is missing.)

TNS-00516: Permission denied
Cause: User has insufficient privileges to perform the requested operation.
Action: Acquire necessary privileges and try again.

TNS-00517: Lost contact
Cause: Partner has unexpectedly gone away.
Action: Investigate partner application for abnormal termination.

TNS-00518: Incomplete read or write
Cause: A data send or receive failed.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00519: Operating system resource quota exceeded
Cause: The current user has exceeded the allotted resource assigned in the operating system.
Action: Acquire more operating system resource, or perform a different function.

TNS-00520: Syntax error
Cause: The supplied connect descriptor contains illegal syntax.
Action: Check the syntax of the connect descriptor for correct syntax.

TNS-00521: Missing keyword
Cause: The supplied connect descriptor is missing one or more TNS keywords.
Action: Check the syntax, and ensure all required keywords are present.

TNS-00522: Operation was interrupted
Cause: An internal operation was interrupted and could not complete.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00523: Previous operation was busy
Cause: Operation tried could not be successfully completed because the requested resource was busy.
Action: Attempt the operation again. If error persists, contact Oracle Customer Support.

TNS-00524: Current operation is still in progress
Cause: Internal operation is still in progress but will complete.
Action: None; wait for operation to complete.

TNS-00525: Insufficient privilege for operation
Cause: Operating system failed to complete operation because user lacked sufficient privileges.
Action: Check your platform-specific privileges.

TNS-00526: No caller (false async event)
Cause: Internal error.
Action: For further details, turn on tracing and reexecute the operation.

TNS-00527: Protocol Adapter not loadable
Cause: On some platforms (for example OS/2) protocol adapters are loaded at run-time. If the shared library (or DLL) for the protocol adapter is missing or one of its supporting libraries is missing, then this error is returned.
Action: For further details, turn on tracing and reexecute the operation. The trace file will have the name of the shared library (or DLL) that could not be loaded.

TNS-00528: Protocol Adapter not loaded
Cause: On some platforms (for example OS/2) protocol adapters are loaded at run-time. If the shared library (or DLL) for the protocol adapter has not been loaded, then this error is returned.
Action: For further details, turn on tracing and reexecute the operation. The trace file will have the name of the shared library (or DLL) that has not been loaded.

TNS-00530: Protocol adapter error
Cause: A generic protocol adapter error occurred.
**Action:** For further details, turn on tracing and reexecute the operation.

**TNS-00532: No previous async operation to wait on**
**Cause:** Internal protocol adapter error.
**Action:** For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-00533: Connection dissolved or not yet made**
**Cause:** Internal protocol adapter error.
**Action:** For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-00534: Failed to grant connection ownership to child**
**Cause:** Internal protocol adapter error.
**Action:** For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-00535: Failed to send or receive disconnect message**
**Cause:** Internal protocol adapter error.
**Action:** For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-00536: Connection entered inappropriate state**
**Cause:** Internal protocol adapter error.
**Action:** For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-00537: Index into protocol adapter table is out of legal range**
**Cause:** Internal protocol adapter error.
**Action:** For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-00539: Network or Protocol services are down**
**Cause:** The Network services on or from your node are not running or have stopped running.
**Action:** Restart your network or protocol services on this platform. If error persists, contact Oracle Customer Support.

**TNS-00540: SSL protocol adapter failure**
**Cause:** The SSL protocol adapter encountered an error.
**Action:** In most cases, this error should only be pair with a more meaningful ORA- error.

**TNS-00541: underlying transport does not exist.**
**Cause:** The SSL protocol adapter was unable to locate an adapter for the protocol that it is going to use as the data transport.
**Action:** In most cases, the underlying transport is TCP. Make sure that the Oracle Net TCP/IP adapter was installed.

**TNS-00542: SSL Handshake failed**
**Cause:** The SSL protocol adapter was unable to connect to another process.
**Action:** This error can be caused by a variety of problems including the termination of the peer process. Enable Oracle Net tracing and attempt the connection again. The trace file should give some clues as to what the exact problem is.

**TNS-00543: internal error**

**Cause:** The SSL protocol adapter encountered an unexpected error.

**Action:** This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

**TNS-00544: unsupported operation**

**Cause:** The SSL adapter could not perform a given command.

**Action:** This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

**TNS-00545: parameter retrieval failure**

**Cause:** The SSL protocol adapter was not able to retrieve a configuration parameter for some reason.

**Action:** This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

**TNS-00546: control failure**

**Cause:** The SSL protocol adapter was unable to perform a command.

**Action:** This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

**TNS-00547: user information retrieval failed**

**Cause:** The SSL protocol adapter was unable to retrieve information about the remote user.

**Action:** Examine the first error in the error stack. It should describe the error in more detail.

**TNS-00548: value specified for client authentication parameter is not boolean**

**Cause:** The value specified for the parameter that specifies that SSL client authentication is to be used was not boolean.

**Action:** Specify a correct value for the parameter.

**TNS-00549: value specified for the SSL version is not valid**

**Cause:** The value specified for the SSL version is not valid.

**Action:** Specify a valid value for the SSL version.

**TNS-00550: disconnection error**

**Cause:** The SSL protocol adapter encountered an error when the underlying transport disconnected.

**Action:** This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

**TNS-00551: underlying transport connection failed**

**Cause:** The underlying transport adapter used by the SSL adapter failed to connect.

**Action:** Enable Oracle Net tracing and try the connection again. If the connection fails, examine the trace file to determine the cause.
TNS-00552: no valid cipher suites were specified
   Cause: SSL cipher specs were specified, but none were valid.
   Action: Specify correct cipher suites.

TNS-00553: read failed
   Cause: The SSL adapter failed to read data from its connection.
   Action: Examine the contents of sqlnet.log for more information. Enable Oracle Net tracing and try the connection again. If the connection fails, examine the trace file to determine the cause.

TNS-00554: write failed
   Cause: The SSL adapter failed to send data over its connection.
   Action: Examine the contents of sqlnet.log for more information. Enable Oracle Net tracing and try the connection again. If the connection fails, examine the trace file to determine the cause.

TNS-00555: no directory specified for wallet resource locator
   Cause: It was specified that a file was to be used from which to retrieve a wallet, but no directory was specified for the wallet.
   Action: Specify the directory where the wallet is located.

TNS-00556: no method specified for wallet retrieval
   Cause: A wallet resource locator was specified, but no method was given for the retrieval of the wallet.
   Action: Specify the method by which the method is to be retrieved.

TNS-00557: unsupported wallet retrieval method
   Cause: The method specified for wallet retrieval is not supported. Currently, only files are supported for wallet retrieval.
   Action: Specify "FILE" as the wallet retrieval method.

TNS-00558: Entrust login failed
   Cause: Entrust failed to authenticate the username, password, and/or profile name that was presented.
   Action: Specify correct values for the username, password or profile name. If no data was prompted for, contact Oracle support.

TNS-00559: load of Entrust certificate failed
   Cause: An error occurred while attempting to validate the provided Entrust certificate.
   Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

TNS-00560: extraction of name from Entrust certificate failed
   Cause: An error occurred while attempting to extract a name from an Entrust certificate.
   Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

TNS-00580: Read failed due to closed or invalid transport connection
   Cause: Read attempt was made on a transport connection which was previously terminated or is somehow deemed to be invalid.
**Action:** Indicates a substantial transport level failure. Check the O/S configuration for the particular transport or contact the transport provider. For further details, turn on tracing and reexecute the operation.

**TNS-00581: Send failed due to timeout**
**Cause:** The send operation did not complete within the allowed time interval.
**Action:** Error is informational. Note, repeated receipt of this error could indicate an attempted Denial-Of-Service attack. Also, if the receipt of this error interferes w/ a customer's normal operations, the customer may wish to lengthen the timeout.

**TNS-00582: Receive failed due to timeout**
**Cause:** The receive operation did not complete within the allowed time interval.
**Action:** Error is informational. Note, repeated receipt of this error could indicate an attempted Denial-Of-Service attack. Also, if the receipt of this error interferes w/ a customer's normal operations, the customer may wish to lengthen the timeout.

**TNS-00583: Valid node checking: unable to parse configuration parameters**
**Cause:** Valid node checking was unable to parse the configuration due to syntactical errors.
**Action:** Ensure that the configuration syntax matches the Oracle reference manual documented syntax. For further details, turn on tracing and reexecute the operation.

**TNS-00584: Valid node checking configuration error**
**Cause:** Valid node checking specific Oracle Net configuration is invalid.
**Action:** Ensure the hosts specified in the "invited_nodes" and "excluded_nodes" are valid. For further details, turn on tracing and reexecute the operation.

**TNS-01000: spawn [<listener_name>] <spawn_alias> [<(ARGUMENTS='arg0, arg1,...')>]
**Cause:** Control program usage message.
**Action:** None

**TNS-01001: start [<listener_name>] : start listener**
**Cause:** Control program usage message.
**Action:** None

**TNS-01002: stop [<listener_name>] : stop listener**
**Cause:** Control program usage message.
**Action:** None

**TNS-01003: status [<listener_name>] : get the status of listener**
**Cause:** Control program usage message.
**Action:** None

**TNS-01004: reload [<listener_name>] : reload the parameter files and SIDs**
**Cause:** Control program usage message.
**Action:** None
TNS-01005: trace OFF | USER | ADMIN | SUPPORT [<listener_name>] : set tracing to the specified level
  Cause: Control program usage message.
  Action: None

TNS-01006: set password : set the password for subsequent calls
  Cause: Control program usage message.
  Action: None

TNS-01007: quit | exit : exit LSNRCTL
  Cause: Control program usage message.
  Action: None

TNS-01008: version [<listener_name>] : get the version information of the listener
  Cause: Control program usage message.
  Action: None

TNS-01009: service [<listener_name>] : get the service information of the listener
  Cause: Control program usage message.
  Action: None

TNS-01013: set|show trc_{ } [<value>] : set|show trace parameters of current listener
  Cause: Control program usage message.
  Action: None

TNS-01014: set|show log_{ } [<value>] : set|show log parameters of current listener
  Cause: Control program usage message.
  Action: None

TNS-01015: set|show parm_name [<value>] : sets|shows current listener parm values
  Cause: Control program usage message.
  Action: None

TNS-01016: change_password [<listener_name>] : changes the password of the listener
  Cause: Control program usage message.
  Action: None

TNS-01017: set|show current_listener [<listener_name>] : sets|shows current listener
  Cause: Control program usage message.
  Action: None

TNS-01018: save_config [<listener_name>] : saves configuration changes to parameter file
  Cause: Control program usage message.
  Action: None

TNS-01019: set rawmode ON | OFF: set output mode for services and status commands
Cause: Control program usage message.
Action: None

TNS-01095: string * string * string * number
   Cause: Listener logging message.
   Action: None

TNS-01096: string * string * string * string * number
   Cause: Listener logging message.
   Action: None

TNS-01097: TIMESTAMP * CONNECT DATA [* PROTOCOL INFO] * EVENT [* SID] * RETURN CODE
   Cause: Listener logging message.
   Action: None

TNS-01098: TIMESTAMP * CONNECT DATA * ADDRESS * [PRESENTATION *] COMMAND * ERROR TIMESTAMP * [INSTANCE NAME *] [ADDRESS *]
TNS-01099: *string* *string* *string* *string* *number*

**Cause:** Listener logging message.

**Action:** None

TNS-01000: TNS returned error *number* when attempting to start the listener

**Cause:** The TNSLSNR executable cannot be found in the place expected in your platform’s ORACLE environment. Verify that the full pathname of the TNSLSNR executable as displayed by LSNRCTL is correct.

**Action:** If NS error code 12538 is also returned then the BEQ driver is not installed; call Oracle Worldwide Support as the BEQ driver should always be installed. If this is not the problem then the error is probably

TNS-01101: Could not find service name *string*

**Cause:** The service name could not be resolved by name-lookup.

**Action:** Verify that the listener name or service name specified to LSNRCTL has the correct name and address defined in LISTENER.ORA or in TNSNAMES.ORA.

TNS-01102: TNS application contacted was not the listener

**Cause:** Another TNS application such as the Interchange was listening at the address contacted. There may be another TNS application listening at the address contacted and the data returned is not in the appropriate format.

**Action:** Verify that the listener name or service name specified to LSNRCTL has the correct name and address defined in LISTENER.ORA or in TNSNAMES.ORA.

TNS-01103: Protocol specific component of the address is incorrectly specified

**Cause:** The ADDRESS used to contact the listener is not correctly specified. This error occurs because the address fails to specify the destination of the listener. The address is well formed (for example, there are no missing parentheses) but it is missing a protocol specific component. For example, this is the error returned when the HOST component is missing from a TCP/IP address string.

**Action:** Edit the ADDRESS in LISTENER.ORA to include the required protocol-specific keywords. For more information about the keywords required by different protocol adapters, see the Oracle operating system specific documentation for your platform.

TNS-01106: Listener using listener name *string* has already been started

**Cause:** Another listener is already listening on one of the ADDRESSes specified.

**Action:** Shutdown the previous listener specified by the listener name before starting this one.

TNS-01107: A valid trace level was not specified

**Cause:** Failed to specify a valid trace level for the LSNRCTL trace command.

**Action:** Specify one of OFF, USER, ADMIN, or SUPPORT. Type "LSNRCTL help trace" for more information or consult Chapter 2 of this manual for an introduction to the concepts of tracing.

TNS-01108: Listener password prompt failed
Cause: Password not entered via tty
Action: Enter the listener password on a tty device

TNS-01109: Listener password encryption failed
Cause: Possibly garbled password entered
Action: Re-enter the listener password, using valid ASCII characters. If problem persists, contact Oracle Customer Support.

TNS-01110: Mismatch - password unchanged
Cause: New password and reentered new password are different
Action: Re-enter the listener password, make sure that New password and reentered new password are the same

TNS-01111: Log status can either be ON or OFF
Cause: Failed to specify a log status value for the LSNRCTL log_status command.
Action: Specify one of ON or OFF. Type "LSNRCTL help set log_status" for more information or consult Chapter 2 of this manual for an introduction to the concepts of logging.

TNS-01112: Plug and play can either be ON or OFF
Cause: Failed to specify a valid value for the LSNRCTL use_plugandplay command.
Action: Specify one of ON or OFF. Type "LSNRCTL help set use_plugandplay" for more information.

TNS-01113: save_config_on_stop can either be ON or OFF
Cause: Failed to specify a valid value for the LSNRCTL save_config_on_stop command.
Action: Specify one of ON or OFF. Type "LSNRCTL help set save_config_on_stop" for more information.

TNS-01114: LSNRCTL could not perform local OS authentication with the listener
Cause: LSNRCTL failed to obtain system resources (heap memory, or shared memory) needed to perform local OS authentication with the listener.
Action: Make sure that system resources like shared memory and heap memory are available for LSNRCTL tool to execute properly.

TNS-01115: OS error string creating shared memory segment of string bytes with key string
Cause: The shared memory segment could not be created as requested. For example, a segment with the provided key may already exist, or the size may be outside of system allowed range.
Action: Use the error code to determine the exact cause of the problem. In certain cases the problem may be resolved by adjusting the system-imposed limits such as the maximum number of allowed shared memory segments, or their maximum and minimum sizes. In other cases, resources need to be freed up first for the operation to succeed.

TNS-01116: Listener alias name given as connect identifier is too long
Cause: The listener alias name you were attempting to resolve was too long.
Action: The maximum length of a listener alias name is 255 bytes; this limit has been exceeded. Use a smaller listener alias name.
TNS-01150: The address of the specified listener name is incorrect
Cause: The address on which the listener attempted to listen contains a syntax error.
Action: For the listener name or service name specified to LSNRCTL, check that the address or connect descriptor is well-formed. You can find the listener name in LISTENER.ORA, or you can access the listener through the service name is TNSNAMES.ORA.

TNS-01151: Missing listener name, string, in LISTENER.ORA
Cause: The listener could not find the listener name specified.
Action: Make sure valid addresses on which to listen are specified for the listener name in LISTENER.ORA.

TNS-01152: All addresses specified for the listener name, string, failed
Cause: The listener failed to listen on any of the specified addresses.
Action: Make sure that another application is not listening on the addresses specified or check that the appropriate protocol adapters are installed. Turn on tracing and execute again for more information.

TNS-01153: Failed to process string: string
Cause: The string specified is not well-formed.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-01154: SID detected in old format that is no longer supported
Cause: One of the SIDs was specified in an obsolete format.
Action: Check LISTENER.ORA for a line of the form: <sid> = (SID=(ORACLE_HOME=<oracle_home>)) OR <sid> = (SID_DESC=(ORACLE_HOME=<oracle_home>)) The above format is no longer supported and SID_LIST_<listener_name> format described in the Oracle9i Net Services Reference Guide should be used. For example, SID_LIST_LISTENER = (SID_LIST=(SID_DESC=(SID_NAME=<sid>)(ORACLE_HOME=<oracle_home>)))

TNS-01155: Incorrectly specified SID_LIST_string parameter in LISTENER.ORA
Cause: SID_LIST_<listener_name> in LISTENER.ORA has an error in it.
Action: Be sure this parameter is specified as described in the Oracle9i Net Services Reference Guide. For example, SID_LIST_LISTENER = (SID_LIST=(SID_DESC=(SID_NAME=<sid>)(ORACLE_HOME=<oracle_home>)))

TNS-01156: Missing or inappropriate PROTOCOL, TIMEOUT or POOL_SIZE parameter from PRESPAWN_DESC
Cause: PRESPAWN_DESC in each SID_DESC does not have required fields.
Action: Be sure the parameters required for PRESPAWN_DESC are specified in each SID_DESC. For example, SID_LIST_LISTENER = (SID_LIST=(SID_DESC=(SID_NAME=<sid>)(PRESPAWN_MAX=5)(ORACLE_HOME=<oracle_home>)(PRESPAWN_DESC=(PROTOCOL=tcp)(POOL_SIZE=10)(TIMEOUT=30)))) Add or correct these parameters in the LISTENER.ORA file

TNS-01157: Can only listen on number addresses - ignoring string
Cause: Too many addresses were given to listen on.
**Action**: Reduce the number of addresses to listen on and use another listener to listen on the remaining addresses.

**TNS-01158: Internal connection limit reached, preventing dispatcher from connecting**

**Cause**: The internal Oracle Net connection list is full. Too many dispatchers are connected to the listener; therefore, no more dispatchers are allowed to connect.

**Action**: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-01159: Internal connection limit has been reached; listener has shut down**

**Cause**: The internal Oracle Net connection list is full. The listener is configured to use too many Oracle Net connections.

**Action**: Reduce the number of listen addresses or services connected to the listener. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-01160: Trace level was not specified**

**Cause**: Failed to specify a trace level for the trace command.

**Action**: Specify one of OFF, USER, ADMIN, or SUPPORT. Users should not see this error if LSNRCTL is being used.

**TNS-01161: Spawn alias string was not found. Check listener parameter file**

**Cause**: The alias specified to spawn a program was not found in LISTENER.ORA.

**Action**: This is not seen in normal use of Oracle Net.

**TNS-01162: Syntax error in the address resolved from the spawn alias: string**

**Cause**: The alias specified to spawn a program was not a valid NVstring.

**Action**: This is not seen in normal use of Oracle Net.

**TNS-01163: Failed to spawn process: string**

**Cause**: The process failed to start correctly.

**Action**: This is not seen in normal use of Oracle Net.

**TNS-01164: No spawn alias sent to listener**

**Cause**: The spawn command was issued without an alias.

**Action**: This is not seen in normal use of Oracle Net.

**TNS-01165: Spawn alias has no program name set in it**

**Cause**: The spawn alias in LISTENER.ORA is incorrectly specified.

**Action**: This is not seen in normal use of Oracle Net.

**TNS-01167: The command string is not supported by the listener contacted**

**Cause**: The listener does not recognize the command.

**Action**: This is caused when a newer version of LSNRCTL contacts an old listener. Upgrade listener if executing this command is important.

**TNS-01168: Cannot allocate memory**

**Cause**: Sufficient memory could not be allocated to perform the desired activity.

**Action**: Either free some resource for TNS, or add more memory to the machine. For further details, turn on tracing and reexecute the operation.
TNS-01169: The listener has not recognized the password

Cause: The listener has the password security mechanism enabled and requires the correct password to execute any command other than VERSION. The user attempted to issue one of the privileged administrative commands, but could not be successfully authenticated with the password provided.

Action: If an authorized user is attempting the command, then use the SET PASSWORD command at the LSNRCTL prompt with the listener password. If you do not know the password, then you are trying to execute an inappropriate command.

TNS-01170: Event detection broke for address: string

Cause: The event detection mechanism for the address specified returned an error.

Action: Future attempts to detect events on this address will fail. The listener will deallocate the listen address and connections will no longer be accepted for this address. This error is not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-01171: Event detection broke for dispatcher: string

Cause: The event detection mechanism for the dispatcher specified returned an error.

Action: Future attempts to detect events on this dispatcher will fail. The listener will deallocate the dispatcher and connections will no longer be redirected to this dispatcher. This error is not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-01172: Listener has shut down since all listen addresses have been deallocated

Cause: The event detection mechanism broke and caused all listen addresses to be removed.

Action: Error 1170 has occurred and caused all the listen addresses to be deallocated. Since all the listen addresses have been removed, no more connections can be established to this listener so it shuts itself down. This error is not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-01173: Missing or inappropriate PRESPAWN_MAX parameter from SID_DESC

Cause: PRESPAWN_MAX in each SID_DESC does not have required fields.

Action: Be sure the parameters required for PRESPAWN_DESC are specified in each SID_DESC. For example, SID_LIST_LISTENER = (SID_LIST=(SID_DESC=(SID_NAME=<sid>)(PRESPAWN_MAX=15)(ORACLE_HOME=<oracle_home>)(PRESPAWN_DESC=(PROTOCOL=tcp)(POOL_SIZE=10)(TIMEOUT=30)))) Add or correct these parameters in the LISTENER.ORA file.

TNS-01174: The sum of the POOL_SIZES from each PRESPAWN_DESC is greater than the PRESPAWN_MAX

Cause: The minimum value for PRESPAWN_MAX should be the sum of the POOL_SIZES.

Action: Be sure the parameters required for PRESPAWN_DESC are specified in each SID_DESC. For example, SID_LIST_LISTENER = (SID_LIST=(SID_DESC=(SID_NAME=<sid>)(PRESPAWN_MAX=15)(ORACLE_HOME=<oracle_
TNS-01175: Password unchanged

Cause: Unable to set the new password

Action: Be sure to see that the new password has legal ASCII characters. Try to set the password again.

TNS-01176: Error in loading the new parameter value

Cause: Illegal values given for the parameters

Action: Make sure that the parameter values are valid refer to the manual for the legal values for parameters

TNS-01177: Log Status is OFF. Log file/directory unchanged

Cause: Log status needs to be set ON for changing the log file

Action: use command set log_status ON to set the log status of the listener ON.

TNS-01178: Trace Level is 0. Trace file/directory unchanged

Cause: Trace Level needs to be set for changing the trace file/directory

Action: use command set trc_level ON to set the trace level

TNS-01179: Listener cannot load instance class "string"

Cause: Instance tried to register as a class unknown to listener.

Action: check LISTENER.ORA and /or instance configuration, and reference platform documentation to find the instance classes available for the listener on this platform.

TNS-01180: Missing listener object string in Directory Server

Cause: The listener could not find the listener object specified.

Action: Make sure the listener object is present in the Directory Server.

TNS-01181: Internal registration connection limit reached

Cause: The number of registration connections has reached the maximum. No more registrations are allowed until some of the existing registration connections are completed.

Action: Disconnect existing registration connections if they are no longer needed.

TNS-01182: Listener rejected registration of service "string"

Cause: Received registration information could not be processed because it was invalid, or an internal error occurred.

Action: Not normally visible to the user. For further details, turn on tracing and restart the instance. If error persists, contact Oracle Customer Support.

TNS-01183: Listener rejected registration or update of instance "string"

Cause: Received registration or update information could not be processed because it was invalid, or an internal error occurred.

Action: Not normally visible to the user. For further details, turn on tracing and restart the instance. If error persists, contact Oracle Customer Support.

TNS-01184: Listener rejected registration or update of service handler "string"
Cause: Received registration or update information could not be processed because it was invalid, or an internal error occurred.

Action: Not normally visible to the user. For further details, turn on tracing and restart the instance. If error persists, contact Oracle Customer Support.

TNS-01185: Registration attempted from a remote node

Cause: It was determined that the registering instance is not located on the same node as the listener. It is required that the instance be colocated with the listener for this type of service registration.

Action: Check the configuration of the registering instance. Ensure that local_listener parameter specifies only local listeners. Use remote_listener parameter to specify remote listeners.

TNS-01186: Client connection was dropped based on a filtering rule

Cause: Listener was configured with a filtering rule which explicitly specified that the client connection should be terminated without returning an error to the client.

Action: Modify the filtering rules if the client should be allowed access to the requested service.

TNS-01187: No proxy service handler available

Cause: One of the following conditions has occurred:
- the proxy service was not registered
- the proxy service was registered, but was blocking new connections
- all of the registered proxy service handlers were blocking new connections

Action: If the proxy service is not registered it may need to be restarted. If the proxy service handlers are busy and not accepting new connections more of them may need to be started to handle the load.

TNS-01188: Listener cannot operate with incompatible transport protocols

Cause: Listener was configured with multiple listening addresses with different and incompatible transport protocols. Listener cannot operate efficiently in such configuration.

Action: Modify the existing listener configuration by removing the listening address that caused the error. Configure a separate listener to listen on this address.

TNS-01189: The listener could not authenticate the user

Cause: The user attempted to issue a privileged administrative command, but could not be successfully authenticated by the listener using the local OS authentication mechanism. This may occur due to one of the following reasons:
1. The user is running a version of LSNRCTL that is lower than the version of the listener.
2. The user is attempting to administer the listener from a remote node.
3. The listener could not obtain the system resources needed to perform the authentication.
4. The local network connection between the listener and LSNRCTL was terminated unexpectedly during authentication message exchange, such as if LSNRCTL program was suddenly aborted.
5. The communication between the listener and LSNRCTL is being intercepted by a malicious user.
6. The software that the user is running is not following the authentication protocol, indicating a malicious user.

**Action:** Make sure that administrative commands are issued using the LSNRCTL tool that is of a version equal or greater than the version of the listener, and that the tool and the listener are running on the same node. You can issue the VERSION command to find out the version of the listener. If a malicious user is suspected, use the information provided in the listener log file to determine the source and nature of the requests. Enable listener tracing for more information. If the error persists, contact Oracle Support Services.

**TNS-01190: The user is not authorized to execute the requested listener command**

**Cause:** Most of the listener administrative commands are only intended to be issued by privileged users, for example DBAs or system administrators. If the listener password is not set, then the listener only accepts administrative requests from LSNRCTL running with the same OS credentials, or running as a local administrator (also referred to as super user).

**Action:** If an authorized user is attempting the command, then make sure that LSNRCTL is executed with the same OS user credentials as the running listener, or as a local administrator.

**TNS-01191: Failed to initialize the local OS authentication subsystem**

**Cause:** Initialization of the security subsystem failed during listener startup or reload. The listener could not obtain system resources (memory, or file descriptors) needed for local OS authentication security mechanism.

**Action:** Make sure that system resources like shared memory and heap memory are available for listener to execute properly. For further details, turn on tracing and execute the operation again. If the error persists, contact Oracle Support Services.

**TNS-01192: Missing SID_LIST_ value left of equation for SID description in LISTENER.ORA**

**Cause:** SID description in LISTENER.ORA had an error in it.

**Action:** Make sure the lines of code in LISTENER.ORA containing SID_DESC or SID begin with SID_LIST_<listener_name> on the left side of the equation. For example, SID_LIST_LISTENER =(SID_LIST=(SID_DESC=(SID_NAME=<sid>)(ORACLE_HOME=<oracle_home>)))

**TNS-01193: Listener cannot operate with specified secure transport**

**Cause:** Listener was configured with transport protocols which are either invalid or none of the secure transport protocols are present in listening addresses.

**Action:** Modify the existing listener configuration by specifying a valid transport protocol in secure transport list.

**TNS-01194: The listener command did not arrive in a secure transport**

**Cause:** Most of the listener administrative commands are only intended to be issued in a secure transport, which are configured in secure_control_ parameter. If the parameter is set, then the listener accepts administrative requests only on those secure transports.

**Action:** Make sure the command is issued using a transport specified in secure transport list.

**TNS-01200: The listener must be suid root**

**Cause:** The ownership privileges of the TNSLSNR executable are incorrect.
Action: Contact your DBA or system administrator to change the ownership of the file to be suid root and restart the listener. This action is necessary because the user that started the process should claim ownership.

TNS-01201: Listener cannot find executable string for SID string
Cause: The executable for the Oracle dedicated server process cannot be found.
Action: Check the appropriate SID_DESC in LISTENER.ORA to make sure that the ORACLE_HOME component is pointing to a valid location. If this component is not set, then check the value of the ORACLE_HOME environment variable.

TNS-01202: Missing the dba group (string) specified by DBA_GROUP in SID_DESC
Cause: The dba group specified is missing from /ETC/GROUP.
Action: Check the DBA_GROUP parameter in the SID_DESC in LISTENER.ORA and verify it has a valid entry in /ETC/GROUP.

TNS-01203: Missing the account (string) specified by DEFAULT_USER_ACCOUNT in SID_DESC
Cause: The unprivileged OS account is missing from /etc/passwd.
Action: Check the DEFAULT_USER_ACCOUNT parameter in the SID_DESC in LISTENER.ORA and verify it has a valid entry in /etc/passwd. This is the account that the Oracle shadow process will be started with if the the connecting client has database privileges or does not exist on this machine.

TNS-01204: Unprivileged account (string) is in dba group (string)
Cause: The unprivileged account has DBA privileges. The unprivileged account specified by DEFAULT_USER_ACCOUNT in the SID_DESC in LISTENER.ORA is a member of the dba group specified by DBA_GROUP in SID_DESC. The unprivileged account cannot belong to the dba group because this would be a security violation with OPS$ logins.
Action: Remove the unprivileged account from the dba group.

TNS-01250: Failed to get ADR Path for trace/alert directory
Cause: The diagnosability API to get the service path returned an error
Action: None

TNS-01251: Cannot set trace/log directory under ADR
Cause: ADR trace and log directories cannot be set by the user.
Action: None

TNS-01300: ERROR at string
Cause: Listener logging message.
Action: None

TNS-01301: TNS error structure:
Cause: Listener logging message.
Action: None

TNS-01302: nr err code: number
Cause: Listener logging message.
Action: None
TNS-01303: ns main err code: number
    Cause: Listener logging message.
    Action: None

TNS-01304: ns secondary err code: number
    Cause: Listener logging message.
    Action: None

TNS-01305: nt main err code: number
    Cause: Listener logging message.
    Action: None

TNS-01306: nt secondary err code: number
    Cause: Listener logging message.
    Action: None

TNS-01307: nt OS err code: number
    Cause: Listener logging message.
    Action: None

TNS-01400: Instance "string" has number handlers.
    Cause: Control program status message.
    Action: None

TNS-01401: Class: string
    Cause: Control program status message.
    Action: None

TNS-01402: TYPE: string
    Cause: Control program status message.

Cause: Control program status message.
Action: None

TNS-01441: Number of filtering rules currently in effect: *number*
Cause: Control program status message.
Action: None

TNS-01442: No filtering rules currently in effect.
Cause: Control program status message.
Action: None

TNS-02020: set displaymode RAW | COMPAT | NORMAL | VERBOSE: output mode for lsnrctl display
Cause: Control program usage message.
Action: None

TNS-02021: DIRECT_HANDOFF can be either ON or OFF.
Cause: Invalid value for the LSNRCTL direct_handoff parameter.
Action: Specify one of ON or OFF.

TNS-02022: show rules: Show rules that are currently in effect
Cause: Control program usage message.
Action: None

TNS-02401: gbname *string* too long, allowed *number* characters
Cause: gbname or domain name too long.
Action: Check the gbname parameter in listener.ora, shorten it.

TNS-02402: Bad CLBGNAMES parameter in tnsnames.ora
Cause: CLBGNAMES parameter in tnsnames.ora is bad.
Action: Check the CLBGNAMES parameter format and correct it. Make sure that the tnsnames.ora file is there.

TNS-02403: Bad alias *string* or alias not present in tnsnames.ora
Cause: An alias was expected in tnsnames.ora but was not found or was not correctly formed.
Action: Check the tnsnames.ora for the alias and make sure it is correctly formed.

TNS-02404: Service *string* contains no local handlers
Cause: The listener found no suitable handler to redirect to.
Action: Make sure that there is at least one handler for this node.

TNS-02405: GMS call failed, check GMS logs.
Cause: A GMS call made by the listener failed.
Action: Check if the GMS is up and running. See GMS-client trace files for more information.
TNS-02501: Authentication: no more roles
  Cause: When a process attempted to retrieve a role from the authentication service, no more were available.
  Action: None. This error is used internally and occurs in the normal course of events.

TNS-02502: Authentication: unable to find initialization function
  Cause: The native authentication service was unable to call the initialization function for the specified service because it does not exist.
  Action: If this service adaptor came directly from Oracle, contact Oracle Customer Support, as this error should never happen. Otherwise, add an initialization function for the service being used.

TNS-02503: Parameter retrieval failed
  Cause: The native service layer was unable to retrieve a parameter from a configuration file.
  Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02504: Parameter count retrieval failed
  Cause: The native service layer was unable to determine the number of arguments given for a configuration parameter.
  Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02505: Authentication: null context pointer provided
  Cause: The function nau_ini() was passed a null pointer as the pointer to the context that it is supposed to use.
  Action: Call nau_ini() with a pointer to a context structure.

TNS-02506: Authentication: no type string
  Cause: An authentication context structure does not contain a string that describes the authentication service being used.
  Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02507: Encryption: algorithm not installed
  Cause: After picking an algorithm, the server was unable to find an index for it in its table of algorithms. This should be impossible because the algorithm was chosen (indirectly) from that list.
  Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-02508: Encryption: server negotiation response in error
  Cause: The server’s response in negotiation was in error.
  Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-02509: Authentication: invalid process state
  Cause: The state in which a process is running does not correspond to any of the values which are valid.
**Action:** If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

**TNS-02510: Invalid numeric data type**

**Cause:** The type of a piece of numeric data that was received does not correspond to one of the valid values.

**Action:** If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

**TNS-02511: Invalid data type**

**Cause:** The type of a piece of data that was received or to be transmitted did not correspond to any of the correct values.

**Action:** If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

**TNS-02512: Invalid status received**

**Cause:** A process received a value as a status flag which was unknown.

**Action:** If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

**TNS-02513: Requested data type does not match retrieved type**

**Cause:** A service requested data whose type does not match that of the segment which was sent from the other process.

**Action:** If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

**TNS-02514: Invalid packet received**

**Cause:** A process received a data packet which was not meant for the native services layer.

**Action:** If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

**TNS-02515: Encryption/crypto-checksumming: unknown control type**

**Cause:** An encryption or crypto-checksumming algorithm "control" function was called, but did not recognize the "type" argument it was given.

**Action:** Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-02516: No data available**

**Cause:** A native service attempted to retrieve data but no data was available to be received.

**Action:** The error is not normally visible as it usually is only used to signal the end of a data stream. If the error becomes visible, enable tracing to reproduce the problem and contact Oracle Customer Support.

**TNS-02517: key smaller than requested size**

**Cause:** The key returned by negotiation was smaller than the size requested by some service (either encryption or crypto-checksumming).

**Action:** The error is not normally visible. If the error persists, enable tracing to reproduce the problem and contact Oracle Customer Support.

**TNS-02518: key negotiation error**
Cause: An error occurred while the two sides of the connection were negotiating an encryption or crypto-checksumming key.
Action: The error is not normally visible. If the error persists, enable tracing to reproduce the problem and contact Oracle Customer Support.

TNS-02519: no appropriate key-negotiation parameters
Cause: No appropriate key-negotiation parameters are available for the key size requested either by encryption or by crypto-checksumming.
Action: The error is not normally visible. Enable tracing to reproduce the problem and contact Oracle Customer Support.

TNS-02520: encryption/crypto-checksumming: no Diffie-Hellman seed
Cause: The "sqlnet.crypto_seed" parameter is missing from the SQLNET.ORA parameters file for Oracle Advanced Security.
Action: Add this line to SQLNET.ORA: sqlnet.crypto_seed = "randomly-chosen text"

TNS-02521: encryption/crypto-checksumming: Diffie-Hellman seed too small
Cause: The "sqlnet.crypto_seed" parameter in the SQLNET.ORA parameter file for Oracle Net is too small.
Action: Add more randomly-chosen text to it.

TNS-02524: Authentication: privilege check failed
Cause: An error occurred when the Oracle Advanced Security authentication service attempted to verify that a user had a specific database privilege.
Action: This error should not happen normally. Enable tracing and attempt to repeat the error. Contact Customer Support.

TNS-02525: encryption/crypto-checksumming: self test failed
Cause: The Oracle Advanced Security encryption/crypto-checksumming service detected an error while running tests on the active encryption or checksumming algorithm.
Action: Contact Customer Support.

TNS-02526: server proxy type does not match client type
Cause: The authentication type selected by the server does not match that picked by the client.
Action: Contact Oracle Customer Support

TNS-03501: OK
Cause: The operation succeeded.
Action: No action necessary.

TNS-03502: Insufficient arguments. Usage: tnsping <address> [<count>]
Cause: Some required command-line arguments are missing.
Action: Re-enter the command using the correct arguments.

TNS-03503: Could not initialize NL
Cause: The network library could not be initialized.
Action: This is an internal error which should not normally be visible. Ensure that memory is available to run the application and that there are no other operating system problems, and then attempt the command again.
TNS-03504: Service name too long
  Cause: The service name you are attempting to ping is too long.
  Action: Re-enter the command using the correct service name.

TNS-03505: Failed to resolve name
  Cause: The service name you provided could not be found in TNSNAMES.ORA, an Oracle Names server, or a native naming service.
  Action: Verify that you entered the service name correctly. You may need to ensure that the name was entered correctly into the network configuration.

TNS-03506: Failed to create address binding
  Cause: The TNSPING utility found the requested address or service name, but received an internal error when trying to use it.
  Action: This is an internal error which should not normally be visible. Ensure that memory is available to run the application and that there are no other operating system problems, and then attempt the command again.

TNS-03507: Failure looking for ADDRESS keyword
  Cause: The TNS address did not contain an ADDRESS keyword.
  Action: If you entered the TNS address on the command line, be sure that the syntax is correct. If you entered a service name on the command line, the address contains the wrong information. You should verify that the information was entered correctly.

TNS-03508: Failed to create address string
  Cause: The TNSPING utility received an internal error when generating an address.
  Action: This is an internal error which should not normally be visible. Ensure that memory is available to run the application and that there are no other operating system problems, and then attempt the command again.

TNS-03509: OK (number msec)
  Cause: The operation succeeded, in this amount of time.
  Action: No action necessary.

TNS-03510: Failed due to I/O error
  Cause: An I/O operation failed, perhaps due to a resource failure or premature window termination.
  Action: This is an internal error which should not normally be visible. Do not close the TNSPING window before all I/O operations have completed.

TNS-03511: Used parameter files: string
  Cause: Prints out the path of the parameter files(sqlnet.ora, tnsnames.ora) used in the process of resolving the NAME.
  Action: None

TNS-03512: Used string adapter to resolve the alias
  Cause: Prints out the name of the adapter which resolved the TNS alias.
  Action: None

TNS-03513: Attempting to contact string
  Cause: Attempting to contact a given TNS address.
Action: None

TNS-03601: Failed in route information collection
Cause: The route could either not connect, or encountered an unsupported version of Oracle Net.
Action: Check if Oracle Net along all nodes is version 2.3 or greater.

TNS-03602: Insufficient arguments. Usage: trcroute <address>
Cause: Some required command-line arguments are missing.
Action: Re-enter the command using the correct arguments.

TNS-03603: Encountered a node with a version earlier than SQL*Net 2.3
Cause: Versions of SQL*Net before 2.3 do not support trcroute.
Action: Find the node that isn’t responding to trcroute.

TNS-04001: string
Cause: CMCTL general message.
Action: None

TNS-04002: The command completed successfully.
Cause: Not applicable.
Action: None

TNS-04003: Syntax Error.
Cause: The command issued has a wrong syntax.
Action: Check for the command issue syntax, and correct the problem.

TNS-04004: Unable to encrypt the supplied password.
Cause: The password that was supplied to the ADMINISTER command could not be encrypted.
Action: Change the password to something acceptable. See Oracle Net Services documentation for valid password values.

TNS-04005: Unable to resolve address for string.
Cause: The alias name supplied with the ADMINISTER command could not be resolved to an Oracle Connection Manager address.
Action: Check if your an entry for the alias is present in either CMAN.ORA file or in TNSNAMES.ORA file.

TNS-04006: Invalid password
Cause: The password given with the ADMINISTER command could not be verified by the Oracle Connection Manager instance.
Action: Retry with the correct password.

TNS-04007: Internal error number.
Cause: Not normally visible to the user.
Action: If error persists, contact Oracle Support Services.

TNS-04008: string | string
Cause: String parameter value.
Action: None
TNS-04009: string | number
Cause: Integer parameter value.
Action: None

TNS-0410: Command cannot be issued before the ADMINISTER command.
Cause: A command was issued before administering the Oracle Connection Manager instance.
Action: Enter the ADMINISTER command before retrying this command.

TNS-0411: Oracle Connection Manager instance not yet started.
Cause: A command was issued when Oracle Connection Manager was not yet started or already shutdown.
Action: Start Oracle Connection Manager.

TNS-0412: Unable to start Oracle Connection Manager instance.
Cause: CMCTL was unable to start the Oracle Connection Manager instance. Some of the possible reasons include: cmadmin not present in ORACLE_HOME/bin, Invalid parameter in configuration repository, wrong parameter values, or log directory not present.
Action: 1. Check whether log directory is present, and is writable. Log directory can be found at ORACLE_HOME/network/log, or as specified by the LOGDIRECTORY parameter in CMAN.ORA.
2. Turn on logging or tracing to get more information about this error.
3. Correct any parameter errors (or mismatched paranthesis), and retry starting Oracle Connection Manager.
4. If the problem persists, contact Oracle Support Services.

TNS-0413: CMCTL timed out waiting for Oracle Connection Manager to start
Cause: Oracle Connection Manager internal registrations have not been completed.
Action: Turn on logging or tracing to get more information about this error. If the problem persists, contact Oracle Support Services.

TNS-0414: Current instance string is already started
Cause: An ADMINISTER command was issued to administer an Oracle Connection Manager instance that is already started.
Action: None

TNS-0415: Current instance string is not yet started
Cause: An ADMINISTER command was issued to an instance that has not yet been started.
Action: None

TNS-0416: Connecting to string
Cause: CMCTL is connecting to the specified Oracle Connection Manager address.
Action: None

TNS-0417: Please wait. Shutdown in progress.
Cause: A command which cannot be used while Oracle Connection Manager is shutting down was issued.
Action: Wait for some time before retrying the command.

TNS-04018: Instance already started
Cause: The STARTUP command was issued to an instance which was already started.
Action: None

TNS-04019: Starting Oracle Connection Manager instance string. Please wait...
Cause: The STARTUP command was issued for an Oracle Connection Manager instance. CMCTL is waiting for the instance to start.
Action: None

TNS-04021: The SET command is unsuccessful for parameter string.
Cause: The value set for the parameter was out of range.
Action: See Oracle Net Services documentation for value ranges for the parameters.

TNS-04022: string parameter string set to string.
Cause: Parameter value was successfully set.
Action: None

TNS-04023: Command failed.
Cause: The command issued failed to complete successfully.
Action: Retry command. If problem persists, contact Oracle Support Services.

TNS-04037: Connections refer to string.
Cause: The ADMINISTER command resolved to the address in the specified message string.
Action: None

TNS-04044: Specified gateways do not exist.
Cause: One or more specified gateway IDs do not exist.
Action: Specify correct gateway IDs.

TNS-04045: Invalid specification of time
Cause: The time specified with the GT (greater than) option was invalid.
Action: Check Oracle Net Services documentation for valid time specification.

TNS-04046: Invalid specification for source
Cause: The source specified with the FROM option was invalid.
Action: Check Oracle specified documentation for valid source specification.

TNS-04047: Invalid specification for destination
Cause: The destination specified with the TO option was invalid.
Action: Check Oracle Net Services documentation for valid destination specification.

TNS-04048: Specified service does not exist.
Cause: The service specified with the FOR option did not exist.
Action: None

TNS-04049: Specified connections do not exist
**Cause:** One or more connection IDs do not exist.
**Action:** None

**TNS-04050: Invalid specification for gateway ID.**
**Cause:** The gateway ID specified is invalid.
**Action:** Check Oracle Net Services documentation for a valid gateway ID specification.

**TNS-04063: Remote administration disabled in the Oracle Connection Manager instance.**
**Cause:** CMCTL attempted to connect to a remote Oracle Connection Manager instance in which remote administration was disabled.
**Action:** Set parameter remote_admin=on in the remote instance before starting it.

**TNS-04064: The number of CMCTL sessions exceeds MAX_CMCTL_SESSIONS.**
**Cause:** The Oracle Connection Manager instance already has MAX_CMCTL_SESSIONS number of CMCTLS connected to it.
**Action:** Use an already connected CMCTL, or, use a higher value for the parameter MAX_CMCTL_SESSIONS in the CMAN.ORA file.

**TNS-04065: The number of remote CMCTL sessions exceeds (MAX_CMCTL_SESSIONS-1)**
**Cause:** The Oracle Connection Manager instance already has (MAX_CMCTL_SESSIONS-1) number of remote CMCTL sessions connected to it.
**Action:** Use an already connected CMCTL, or, use a higher value for the parameter MAX_CMCTL_SESSIONS in the CMAN.ORA file.

**TNS-04067: Number of connections: number.**
**Cause:** Either no information qualifier (COUNT/DETAIL) was present in SHOW CONNECTIONS command, or, COUNT was used as the information qualifier.
**Action:** None

**TNS-04068: Cannot start an Oracle Connection Manager instance remotely.**
**Cause:** CMCTL was used to start Oracle Connection Manager instance in a remote host.
**Action:** Use a local CMCTL to start the Oracle Connection Manager.

**TNS-04069: Sleeping for number seconds...**
**Cause:** CMCTL is idle for specified seconds. This feature is only provided for testing purposes.
**Action:** None

**TNS-04070: Cannot administer a remote Oracle Connection Manager instance which is not yet started.**
**Cause:** An attempt was made to administer a remote Oracle Connection Manager instance which is not yet started.
**Action:** Use a local CMCTL session to start the Oracle Connection Manager instance before trying to administer it remotely.

**TNS-04071: Connections closed successfully. Number closed: number.**
**Cause:** The specified connections were closed successfully.
**Action:** None
TNS-04072: Unable to suspend atleast one of the gateways.
   Cause: CMCTL was unable to suspend one or more gateways. Possible reason could be suspending a gateway that was already suspended or suspending a gateway that was not present.
   Action: Turn on tracing and logging, retry operation. Information in the log files would help.

TNS-04073: Passwords do not match.
   Cause: The new password and its confirmation do not match
   Action: Use SET PASSWORD again.

TNS-04074: Invalid value for the parameter string.
   Cause: The parameter value set using the SET command is invalid.
   Action: See Oracle Net Services documentation for the valid values of the parameter.

TNS-04075: Cannot use ADMINISTER directly from the command line.
   Cause: ADMINISTER can only be issued from the CMCTL> prompt.
   Action: Use the -c option with any command instead of ADMINISTER.

TNS-04076: Invalid specification for state.
   Cause: The state specified with "in" option is invalid.
   Action: Check Oracle Net Services documentation for valid state specification.

TNS-04077: WARNING: No password set for the Oracle Connection Manager instance.
   Cause: A connection to the Oracle Connection Manager instance was made with no password from the user.
   Action: Ignore the warning if the Oracle Connection Manager is secure enough. Otherwise, use SET PASSWORD command to set a new password for the instance.

TNS-04078: Unable to resume atleast one of the gateways.
   Cause: CMCTL was unable to resume one or more gateways. Possible reason could be resuming a gateway that was ready for connections, or resuming a gateway that was not present.
   Action: Turn on tracing and logging, retry operation. Information in the log files would help.

TNS-04079: Cannot administer Oracle Connection Manager with no CMAN.ORA, and port = number.
   Cause: CMAN.ORA is not present or address not configured in CMAN.ORA, and the net service name in the TNSNAMES.ORA contains a nondefault Oracle Connection Manager port.
   Action: Either change the TNSNAMES.ORA entry to use the default port, or configure the CMAN.ORA file with the Oracle Connection Manager’s address.

TNS-04080: Failed to reload
   Cause: Oracle Connection Manager failed to reload the new configuration due to errors in the configuration file.
   Action: Set log_level to support and retry operation. Error encountered will be logged in the log file of CMADMIN.
TNS-04082: *string event string set to string.*
Cause: Event value was successfully set.
Action: None

TNS-04083: Failed to save password
Cause: Oracle Connection Manager failed to save the password in the configuration file.
Action: Check for the permissions on the configuration file. The file should have WRITE permissions.

TNS-04084: WARNING: Non-reloadable parameters have retained their values.
Cause: Values of non-reloadable parameters were changed, or, one or more non-reloadable parameters having non-default values were added to the parameter file.
Action: See Oracle Net Services documentation for a list of non-reloadable parameters.

TNS-04085: Password not changed since last save.
Cause: Password has not been changed since it was last saved.
Action: None

TNS-04086: Invalid value for the event *string.*
Cause: The event value set using the SET EVENT command is invalid.
Action: See Oracle Net Services documentation for the valid values of the event.

TNS-04087: Unable to shutdown atleast one of the gateways.
Cause: CMCTL was unable to shutdown one or more gateways. Possible reason could be shutting down a gateway that was not present.
Action: Turn on tracing and logging, retry operation. Information in the log files would help.

TNS-04088: Unable to close atleast one of the connections.
Cause: CMCTL was unable to close one or more connections. Possible reason could be closing a connection that was not present.
Action: Turn on tracing and logging, retry operation. Information in the log files would help.

TNS-04089: Alias name too long.
Cause: User entered an alias name that exceeded 64 characters.
Action: Retry with a shorter alias name. Alias names have to be less than 65 characters.

TNS-04140: Migration completed successfully.
Cause: CMMIGR has successfully completed the migration of the old CMAN.ORA file to the new format.
Action: None

TNS-04141: Unable to find CMAN.ORA file.
Cause: CMMIGR was not able to find CMAN.ORA file.
Action: Check whether CMAN.ORA file is present in $TNS_NAME/admin, or in $ORACLE_HOME/network/admin, or in the path specified in the command line.
TNS-04142: CMAN.ORA file has an invalid format.
  Cause: CMMIGR was unable to recognize the format of CMAN.ORA file.
  Action: Check for the syntax errors in CMAN.ORA file, and correct them.

TNS-04143: Unable to write the new CMAN.ORA file.
  Cause: CMMIGR was unable to create the new CMAN.ORA file due to insufficient permissions.
  Action: Set WRITE permissions to the directory in which CMAN.ORA file is to be written.

TNS-04144: Nothing to migrate
  Cause: CMMIGR did not find anything in the old CMAN.ORA file that has an equivalent in the new format.
  Action: None

TNS-04201: Trace Assistant Usage ERROR: Missing File name
  Cause: Trace file name argument is missing
  Action: Put the trace file name as the last command line argument for this tool.

TNS-04202: Trace Assistant Usage ERROR: Not enough arguments
  Cause: The <file name> and/or the <options> arguments are missing
  Action: Put the right number of command line arguments.

TNS-04203: Trace Assistant Usage ERROR: Invalid options
  Cause: The options provided are not valid
  Action: Check the valid options for this tool.

TNS-04204: Trace Assistant Internal ERROR: Couldn't Open trace file
  Cause: The trace file name given doesn't exist or it is not accessible for this user.
  Action: Check the spelling, and permissions of the trace file.

TNS-04205: Trace Assistant Internal ERROR: Memory
  Cause: Possible memory problem
  Action: Verify the amount of available memory on the system.

TNS-04206: Trace Assistant Internal ERROR: Packet Type
  Cause: The packet type read by trcAsst is not valid.
  Action: Verify that your trace file is not corrupted. If trace file looks OK, with not strange characters in it, contact World Wide Support and provide trace file to them.

TNS-04207: Trace Assistant Internal ERROR: Packet Length
  Cause: The packet being decode is corrupted.
  Action: Verify that your trace file is not corrupted. If trace file looks OK, with not strange characters in it, contact World Wide Support and provide trace file to them.

TNS-04208: Trace Assistant Internal ERROR: Fatal
  Cause: Fatal internal error
  Action: Contact World Wide Support.

TNS-04209: Trace Assistant Internal ERROR: Type Error
Cause: Internal type error,
Action: Contact World Wide Support.

TNS-04210: Trace Assistant Internal ERROR: End of File
Cause: Reaching End of File to soon. Not able to decode trace file. Your trace file appears to be truncated.
Action: Generate another trace file. This trace file can not be decoded.

TNS-04211: Trace Assistant Internal ERROR: CORE
Cause: Internal System Error
Action: Contact World Wide Support.

TNS-04212: Trace Assistant Internal ERROR: NACOM Type Error
Cause: Not able to decode Network Authentication information
Action: Contact World Wide Support.

TNS-04231: Trace Assistant WARNING: Assuming Oracle trace format
Cause: This trace file may not be a Network trace file. The default format (Oracle Trace) will be assumed.
Action: None

TNS-04232: Trace Assistant WARNING: Not retrieving all rows
Cause: Trace Assistant won’t retrieve all the rows data.
Action: None

TNS-04233: Trace Assistant WARNING: Going beyond Packet length
Cause: Trying to read beyond packet length. The trace file may be corrupted
Action: None

TNS-04234: Trace Assistant WARNING: won't decode TTC
Cause: Trace assistant does not have enough information to decode TTC data. This maybe an old trace file or from a platform that trace assistant does not understand.
Action: None

TNS-04235: Trace Assistant WARNING: Unknown TTC protocol
Cause: Trace Assistant has reached a point in which the TTC protocol can not be understood.
Action: None

TNS-12150: TNS:unable to send data
Cause: Unable to send data. Connection probably disconnected.
Action: Reestablish connection. If the error is persistent, turn on tracing and reexecute the operation.

TNS-12151: TNS:received bad packet type from network layer
Cause: Internal error.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

TNS-12152: TNS:unable to send break message
Cause: Unable to send break message. Connection probably disconnected.
Action: Reestablish connection. If the error is persistent, turn on tracing and reexecute the operation.

TNS-12153: TNS:not connected
Cause: Not currently connected to a remote host.
Action: Reestablish connection.

TNS-12154: TNS:could not resolve the connect identifier specified
Cause: A connection to a database or other service was requested using a connect identifier, and the connect identifier specified could not be resolved into a connect descriptor using one of the naming methods configured. For example, if the type of connect identifier used was a net service name then the net service name could not be found in a naming method repository, or the repository could not be located or reached.
Action:
- If you are using local naming (TNSNAMES.ORA file):
  - Make sure that "TNSNAMES" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA).
  - Verify that a TNSNAMES.ORA file exists and is in the proper directory and is accessible.
  - Check that the net service name used as the connect identifier exists in the TNSNAMES.ORA file.
- Make sure there are no syntax errors anywhere in the TNSNAMES.ORA file. Look for unmatched parentheses or stray characters. Errors in a TNSNAMES.ORA file may make it unusable.
- If you are using directory naming:
  - Verify that "LDAP" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA).
  - Verify that the LDAP directory server is up and that it is accessible.
  - Verify that the net service name or database name used as the connect identifier is configured in the directory.
  - Verify that the default context being used is correct by specifying a fully qualified net service name or a full LDAP DN as the connect identifier.
- If you are using easy connect naming:
  - Verify that "EZCONNECT" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA).
  - Make sure the host, port and service name specified are correct.
  - Try enclosing the connect identifier in quote marks. See the Oracle Net Services Administrators Guide or the Oracle operating system specific guide for more information on naming.

TNS-12155: TNS:received bad datatype in NSWMARKER packet
Cause: Internal error during break handling.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

TNS-12156: TNS:tried to reset line from incorrect state
**TNS-12157: TNS:internal network communication error**

**Cause:** Internal error during network communication.

**Action:** Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

**TNS-12158: TNS:could not initialize parameter subsystem**

**Cause:** Unable to locate parameter file.

**Action:** Verify that a valid parameter file exists, and is readable.

**TNS-12159: TNS:trace file not writeable**

**Cause:** The trace file to be generated is not writable by this user.

**Action:** If the user does not have write permissions in the directory to which the trace file will be written, contact an administrator to get the proper permissions or set the TRACE_DIRECTORY_CLIENT parameter in the net profile (SQLNET.ORA file) to a directory the user can write to.

**TNS-12160: TNS:internal error: Bad error number**

**Cause:** Corrupt error reporting subsystem.

**Action:** Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

**TNS-12161: TNS:internal error: partial data received**

**Cause:** The connection may be terminated.

**Action:** Reconnect and try again. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

**TNS-12162: TNS:net service name is incorrectly specified**

**Cause:** The connect descriptor corresponding to the net service name in TNSNAMES.ORA or in the directory server (Oracle Internet Directory) is incorrectly specified.

**Action:** If using local naming make sure there are no syntax errors in the corresponding connect descriptor in the TNSNAMES.ORA file. If using directory naming check the information provided through the administration used for directory naming.

**TNS-12163: TNS:connect descriptor is too long**

**Cause:** The connect descriptor corresponding to the net service name specified as the connect identifier is too long. The maximum length for a connect descriptor is 512 bytes and this limit has been exceeded.

**Action:** Check the net service name’s connect descriptor in the local naming file (TNSNAMES.ORA) or in the directory server (Oracle Internet Directory). Use a smaller connect descriptor. If this is not possible, contact Worldwide Customer Support.

**TNS-12164: TNS:Sqlnet.fdf file not present**

**Cause:** The sqlnet.fdf file doesn’t exist in $ORACLE_HOME/network/admin.
**Action:** The sqlnet.fdf file is required for Oracle Tracing to occur. Either install the sqlnet.fdf file in $ORACLE_HOME/network/admin or turn off tracing in your ORA file.

**TNS-12165: TNS: Trying to write trace file into swap space.**

**Cause:** Oracle Trace doesn't allow writing trace information into your swap space.

**Action:** Oracle Trace cannot write trace information into swap space so either disable tracing or redirect trace files to be written to another area of your disk.

**TNS-12166: TNS: Client can not connect to HO agent.**

**Cause:** NVstring contained DESCRIPTION/HO.

**Action:** Call HO agent from integrating server.

**TNS-12168: TNS: Unable to contact LDAP Directory Server**

**Cause:** Cannot contact LDAP directory server to get Oracle Net configuration.

**Action:** Verify that the directory server is up and accessible from the network. Verify that directory access configuration is correct. For more information see the Oracle Internet Directory Administrators Guide or the Oracle Net Administrators Guide.

**TNS-12169: TNS: Net service name given as connect identifier is too long**

**Cause:** The net service name you are attempting to resolve is too long.

**Action:** The maximum length of a net service name is 255 bytes; this limit has been exceeded. Use a smaller net service name. If this is not possible, contact Worldwide Customer Support.

**TNS-12170: TNS: Connect timeout occurred**

**Cause:** The server shut down because connection establishment or communication with a client failed to complete within the allotted time interval. This may be a result of network or system delays; or this may indicate that a malicious client is trying to cause a Denial of Service attack on the server.

**Action:** If the error occurred because of a slow network or system, reconfigure one or all of the parameters SQLNET.INBOUND_CONNECT_TIMEOUT, SQLNET.SEND_TIMEOUT, SQLNET.RECV_TIMEOUT in sqlnet.ora to larger values. If a malicious client is suspected, use the address in sqlnet.log to identify the source and restrict access. Note that logged addresses may not be reliable as they can be forged (e.g. in TCP/IP).

**TNS-12171: TNS: could not resolve connect identifier: string**

**Cause:** A connection to a database or other service was requested using a connect identifier, and the connect identifier specified could not be resolved into a connect descriptor using one of the naming methods configured. For example, if the type of connect identifier used was a net service name then the net service name could not be found in a naming method repository, or the repository could not be located or reached.

**Action:**

- If you are using local naming (TNSNAMES.ORA file):
  
- Make sure that "TNSNAMES" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA)
  
- Verify that a TNSNAMES.ORA file exists and is in the proper directory and is accessible.
- Check that the net service name used as the connect identifier exists in the TNSNAMES.ORA file.

- Make sure there are no syntax errors anywhere in the TNSNAMES.ORA file. Look for unmatched parentheses or stray characters. Errors in a TNSNAMES.ORA file may make it unusable.

- If you are using directory naming:
  - Verify that "LDAP" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA).
  - Verify that the LDAP directory server is up and that it is accessible.
  - Verify that the net service name or database name used as the connect identifier is configured in the directory.
  - Verify that the default context being used is correct by specifying a fully qualified net service name or a full LDAP DN as the connect identifier

- If you are using easy connect naming:
  - Verify that "EZCONNECT" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA).
  - Make sure the host, port and service name specified are correct.
  - Try enclosing the connect identifier in quote marks. See the Oracle Net Services Administrators Guide or the Oracle operating system specific guide for more information on naming.

TNS-12196: TNS:received an error from TNS
   Cause: The navigation layer received an error from TNS.
   Action: See the error log file for the specific TNS error.

TNS-12197: TNS:keyword-value resolution error
   Cause: The navigation layer received an error while trying to look up a value for a keyword.
   Action: Check the syntax of the connect descriptor.

TNS-12198: TNS:could not find path to destination
   Cause: Could not navigate a path through Interchanges to the destination. This error occurs if an invalid community is in the address string, or the address includes a protocol that is not available or the TNSNAV.ORA file does not have a correct CMANAGER address specified or the Interchange is down.
   Action: Assure that Interchanges necessary to get to the desired destination are up and have available capacity for an additional connection. Also check that the correct community and protocol have been specified in the CMANAGER address used.

TNS-12200: TNS:could not allocate memory
   Cause: Out of memory on machine.
   Action: Reconfigure machine to have more storage or run fewer applications while the Interchange is running.

TNS-12201: TNS:encountered too small a connection buffer
   Cause: TNS connection buffer supplied by the application was too small to retrieve the data sent back.

TNS-12202: TNS:internal navigation error
Cause: Internal navigation error.
Action: Not normally visible to the user. For further details contact Worldwide Customer Support.

TNS-12203: TNS:unable to connect to destination
Cause: Invalid address specified or destination is not listening. This error can also occur because of underlying network or network transport problems.
Action: Verify that the net service name you entered was correct. Verify that the ADDRESS portion of the connect descriptor which corresponds to the net service name is correct. Ensure that the destination process (for example the listener) is running at the remote node.

TNS-12204: TNS:received data refused from an application
Cause: The application using Connection Manager refused the connection at the listener.
Action: Make sure that the application listener at the destination is functioning correctly. If it is and the problem persists, contact Worldwide Customer Support.

TNS-12205: TNS:could not get failed addresses
Cause: Internal navigation error.
Action: Not normally visible to the user. For further details contact Worldwide Customer Support.

TNS-12206: TNS:received a TNS error during navigation
Cause: Internal navigation error because of an unexpected TNS error.
Action: Look at the log file to find the TNS error. If necessary, turn on tracing and repeat the operation.

TNS-12207: TNS:unable to perform navigation
Cause: Improperly configured navigation file TNSNAV.ORA.
Action: Check the syntax of the TNSNAV.ORA file on the application’s machine, and verify that it lists the correct communities.

TNS-12208: TNS:could not find the TNSNAV.ORA file
Cause: Either the ORACLE environment is not set up correctly, or the TNSNAV.ORA file is not present.
Action: Ensure that the ORACLE environment is set up appropriately on your platform and that a TNSNAV.ORA file is present.

TNS-12209: TNS:encountered uninitialized global
Cause: Application calling navigation routine has not properly configured the global variables. There are no TNSNAV.ORA files available, or they are defective.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

TNS-12210: TNS:error in finding Navigator data
Cause: Application calling navigation routine has not properly configured the TNSNAV.ORA file.
**Action:** Check the syntax of the TNSNAV.ORA file.

**TNS-12211: TNS:needs PREFERRED_CMANAGERS entry in TNSNAV.ORA**

**Cause:** TNSNAV.ORA does not have a PREFERRED_CMANAGERS defined.

**Action:** Add a PREFERRED_CMANAGERS entry to the TNSNAV.ORA file.

**TNS-12212: TNS:incomplete PREFERRED_CMANAGERS binding in TNSNAV.ORA**

**Cause:** The PREFERRED_CMANAGERS binding in the client’s TNSNAV.ORA file does not have a CMANAGER_NAME specified.

**Action:** Define the CMANAGER_NAME as part of the PREFERRED_CMANAGERS binding. Use of the Oracle Network Manager should eliminate this error.

**TNS-12213: TNS:incomplete PREFERRED_CMANAGERS binding in TNSNAV.ORA**

**Cause:** The PREFERRED_CMANAGERS binding in the client’s TNSNAV.ORA file does not have an ADDRESS specified.

**Action:** Define the ADDRESS as part of the PREFERRED_CMANAGERS binding.

**TNS-12214: TNS:missing local communities entry in TNSNAV.ORA**

**Cause:** There is no LOCAL_COMMUNITIES entry in TNSNAV.ORA.

**Action:** Define the LOCAL_COMMUNITIES for this node in the TNSNAV.ORA file.

**TNS-12215: TNS:poorly formed PREFERRED_NAVIGATORS Addresses in TNSNAV.ORA**

**Cause:** Address binding for PREFERRED_NAVIGATORS entry is improperly entered.

**Action:** Check your PREFERRED_NAVIGATORS entry and fix it in TNSNAV.ORA

**TNS-12216: TNS:poorly formed PREFERRED_CMANAGERS addresses in TNSNAV.ORA**

**Cause:** Address binding for the PREFERRED_CMANAGERS entry in the client’s TNSNAV.ORA file is improperly entered.

**Action:** Define the ADDRESS as part of the PREFERRED_CMANAGERS binding.

**TNS-12217: TNS:could not contact PREFERRED_CMANAGERS in TNSNAV.ORA**

**Cause:** There is a syntax error in the PREFERRED_CMANAGERS entry, or addresses specified are wrong, or the intended Connection Managers are unavailable.

**Action:** Check the PREFERRED_CMANAGERS entries in the client’s TNSNAV.ORA file and correct them or talk with your network administrator to determine if the specified Connection Managers are available. Verify that the Interchanges are active by using the INTCTL STATUS command.

**TNS-12218: TNS:unacceptable network configuration data**

**Cause:** Poorly formed network configuration data. For example, a PREFERRED_CMANAGERS entry may have an incorrect CMANAGER_NAME in the client’s TNSNAV.ORA file. Or an Interchange downtime parameter (TIMEOUT_INTERVAL) on the Navigator may be set to zero in INTCHG.ORA.
Action: Check the entries in TNSNAV.ORA and the Interchange configuration files and correct them. If necessary, talk with your network administrator to determine if the specified Interchanges (Connection Managers) are available and properly configured. Use the Oracle Network Manager to generate the configuration files if necessary.

TNS-12219: TNS:missing community name from address in ADDRESS_LIST
Cause: This error occurs when an ADDRESS_LIST has some ADDRESSes in it that have no COMMUNITY component and others that do have a COMMUNITY component.
Action: Check that in the connect descriptors you are using either all the ADDRESSes have a COMMUNITY component or all do not.

TNS-12221: TNS:illegal ADDRESS parameters
Cause: An illegal set of protocol adapter parameters was specified. In some cases, this error is returned when a connection cannot be made to the protocol transport.
Action: Verify that the destination can be reached using the specified protocol. Check the parameters within the ADDRESS section of TNSNAMES.ORA or in the directory. Legal ADDRESS parameter formats may be found in the Oracle operating system specific documentation or the Oracle Net Administrator’s Guide. Protocols that resolve names at the transport layer are vulnerable to this error if not properly configured or names are misspelled.

TNS-12222: TNS:no support is available for the protocol indicated
Cause: The protocol requested in the ADDRESS portion of the connect descriptor identified through the net service name is not available. If the supplied ADDRESS is typographically correct then support for that protocol is not installed.
Action: Install support for the protocol or correct typographical error, as appropriate. Note: if the supplied address was derived from resolving the net service name, check the address in the appropriate file (TNSNAMES.ORA, LISTENER.ORA) or in the directory server.

TNS-12223: TNS:internal limit restriction exceeded
Cause: Too many TNS connections open simultaneously.
Action: Wait for connections to close and re-try.

TNS-12224: TNS:no listener
Cause: The connection request could not be completed because the listener is not running.
Action: Ensure that the supplied destination address matches one of the addresses used by the listener - compare the TNSNAMES.ORA entry with the appropriate LISTENER.ORA file (or TNSNAV.ORA if the connection is to go by way of an Interchange). Start the listener on the remote machine.

TNS-12225: TNS:destination host unreachable
Cause: Contact can not be made with remote party.
Action: Make sure the network driver is functioning and the network is up.

TNS-12226: TNS:operating system resource quota exceeded
Cause: The current user has exceeded the allotted resource assigned in the operating system.
Action: Acquire more operating system resource, or perform a different function.
TNS-12227: TNS: syntax error
Cause: The supplied connect descriptor contains illegal syntax.
Action: Check the syntax of the connect descriptor in TNSNAMES.ORA.

TNS-12228: TNS: protocol adapter not loadable
Cause: On some platforms (such as Windows) protocol support is loaded at run-time. If the shared library (or DLL) for the protocol adapter is missing or one of its supporting libraries is missing then this error is returned.
Action: For further details, turn on tracing and reexecute the operation. The trace file will include the name of the shared library (or DLL) that could not be loaded.

TNS-12229: TNS: Interchange has no more free connections
Cause: One or more Interchanges along the path to the destination desired has no more free connections available to be used for this call.
Action: Try again later when the Interchanges are less busy, or contact your network administrator to have him determine which interchange it is, and increase the number of connections available on that interchange.

TNS-12230: TNS: Severe Network error occurred in making this connection
Cause: This error is reported by an interchange which fails to make contact with the destination due to a physical network error while calling a destination.
Action: Try again later when the network service may have been fixed or report the problem to your Network Administrator so that he may fix the problem.

TNS-12231: TNS: No connection possible to destination
Cause: This error is reported by an interchange which fails to find a possible connection along the path to the destination.
Action: Report the problem to your Network Administrator so that he may fix the problem.

TNS-12232: TNS: No path available to destination
Cause: This error is reported by an interchange which fails to find a possible path to the destination.
Action: Report the problem to your Network Administrator so that he may fix the problem.

TNS-12233: TNS: Failure to accept a connection
Cause: This error is reported by an interchange which fails to accept a connection due to a redirect failure.
Action: Report the problem to your Network Administrator so that he may isolate the interchange problem.

TNS-12234: TNS: Redirect to destination
Cause: This error is reported by an interchange which determines that this interchange is not the right gateway and needs to redirect the connection to another gateway along the path to the destination.
Action: None

TNS-12235: TNS: Failure to redirect to destination
Cause: This error is reported by an interchange which fails to redirect a connection to another interchange along the path to the destination.
**Action:** Report the problem to your Network Administrator so that he may fix the problem.

**TNS-12236: TNS:protocol support not loaded**

**Cause:** On some platforms (such as Windows) protocol support is loaded at run-time. If the shared library (or DLL) for the protocol adapter has not been loaded, then this error is returned.

**Action:** For further details, turn on tracing and reexecute the operation. The trace file will have the name of the shared library (or DLL) that has not been loaded.

**TNS-12500: TNS:listener failed to start a dedicated server process**

**Cause:** The process of starting up a dedicated server process failed. The executable could not be found or the environment may be set up incorrectly.

**Action:** Turn on tracing at the ADMIN level and reexecute the operation. Verify that the ORACLE Server executable is present and has execute permissions enabled. Ensure that the ORACLE environment is specified correctly in LISTENER.ORA. The Oracle Protocol Adapter that is being called may not be installed on the local hard drive. Please check that the correct Protocol Adapter are successfully linked. If error persists, contact Oracle Customer Support.

**TNS-12502: TNS:listener received no CONNECT_DATA from client**

**Cause:** No CONNECT_DATA was passed to the listener.

**Action:** Check that the service name resolved from TNSNAMES.ORA has the CONNECT_DATA component of the connect descriptor.

**TNS-12504: TNS:listener was not given the SERVICE_NAME in CONNECT_DATA**

**Cause:** The listener was not configured with a default service and SERVICE_NAME was missing from the CONNECT_DATA received by the listener.

**Action:** Possible solutions are:

- Configure DEFAULT_SERVICE parameter in LISTENER.ORA with a valid service name. Reload the listener parameter file using reload [<listener_name>]. This should be done by the LISTENER administrator.

- If using a service name, Check that the connect descriptor corresponding to the service name in TNSNAMES.ORA has a SERVICE_NAME or SID component in the CONNECT_DATA.

**TNS-12505: TNS:listener does not currently know of SID given in connect descriptor**

**Cause:** The listener received a request to establish a connection to a database or other service. The connect descriptor received by the listener specified a SID for an instance (usually a database instance) that either has not yet dynamically registered with the listener or has not been statically configured for the listener. This may be a temporary condition such as after the listener has started, but before the database instance has registered with the listener.

**Action:**

- Wait a moment and try to connect a second time.

- Check which instances are currently known by the listener by executing: lsnrctl services <listener name>

- Check that the SID parameter in the connect descriptor specifies an instance known by the listener.
- Check for an event in the listener.log file.

**TNS-12508: TNS:listener could not resolve the COMMAND given**

*Cause:* A command was issued that could not be resolved because of incompatible Oracle Net or Net8 versions. Do not include in error manual.

*Action:* This is not seen in normal use of Oracle Net.

**TNS-12509: TNS:listener failed to redirect client to service handler**

*Cause:* The dispatcher terminates unexpectedly.

*Action:* Attempt to connect again and if the same error occurs, contact the DBA to check the state of the dispatchers for this SID. If the problem persists, turn on tracing in the listener to determine the TNS error caused by the redirect.

**TNS-12510: TNS:database temporarily lacks resources to handle the request**

*Cause:* The dispatchers appear to be busy handling other requests.

*Action:* Attempt the connection again. If error persists, ask the DBA to increase the number of dispatchers and/or dispatchers' limit on number of connections/sessions that they can accept.

**TNS-12511: TNS:service handler found but it is not accepting connections**

*Cause:* The dispatchers notified the listener that they temporarily do not accept new connections.

*Action:* Attempt the connection again. If error persists, contact the DBA to check the state of the dispatchers and/or ask him to increase the number of dispatchers.

**TNS-12513: TNS:service handler found but it has registered for a different protocol**

*Cause:* The dispatchers registered for this service are connected to the listener by way of a different network protocol than that of the client.

*Action:* Contact the DBA to register a dispatcher on your protocol.

**TNS-12514: TNS:listener does not currently know of service requested in connect descriptor**

*Cause:* The listener received a request to establish a connection to a database or other service. The connect descriptor received by the listener specified a service name for a service (usually a database service) that either has not yet dynamically registered with the listener or has not been statically configured for the listener. This may be a temporary condition such as after the listener has started, but before the database instance has registered with the listener.

*Action:*

- Wait a moment and try to connect a second time.

- Check which services are currently known by the listener by executing: `lsnrctl services <listener name>`

- Check that the SERVICE_NAME parameter in the connect descriptor of the net service name used specifies a service known by the listener.

- If an easy connect naming connect identifier was used, check that the service name specified is a service known by the listener.

- Check for an event in the listener.log file.

**TNS-12515: TNS:listener could not find a handler for this presentation**

*Cause:* None of the listener's known service handlers are registered as supporting the presentation protocol required by the connecting client.
**Action:** Check that the destination service is configured to accept the presentation protocol.

**TNS-12516: TNS:listener could not find available handler with matching protocol stack**

**Cause:** None of the known and available service handlers for the given SERVICE_NAME support the client’s protocol stack: transport, session, and presentation protocols.

**Action:** Check to make sure that the service handlers (e.g. dispatchers) for the given SERVICE_NAME are registered with the listener, are accepting connections, and that they are properly configured to support the desired protocols.

**TNS-12518: TNS:listener could not hand off client connection**

**Cause:** The process of handing off a client connection to another process failed.

**Action:** Turn on listener tracing and re-execute the operation. Verify that the listener and database instance are properly configured for direct handoff. If problem persists, call Oracle Support.

**TNS-12519: TNS:no appropriate service handler found**

**Cause:** The listener could not find any available service handlers that are appropriate for the client connection.

**Action:** Run "lsnrctl services" to ensure that the instance(s) have registered with the listener, and are accepting connections.

**TNS-12520: TNS:listener could not find available handler for requested type of server**

**Cause:** None of the known and available service handlers for requested type of server (dedicated or shared) are appropriate for the client connection.

**Action:** Run "lsnrctl services" to ensure that the instance(s) have registered with the listener and that the appropriate handlers are accepting connections.

**TNS-12521: TNS:listener does not currently know of instance requested in connect descriptor**

**Cause:** The listener received a request to establish a connection to a database or other service. The connect descriptor received by the listener specified in addition to the service name an instance name for an instance (usually a database instance) that either has not yet dynamically registered with the listener or has not been statically configured for the listener. This may be a temporary condition such as after the listener has started, but before the database instance has registered with the listener.

**Action:**

- Wait a moment and try to connect a second time.
- Check which instances are currently known by the listener by executing: lsnrctl services <listener name>
- Check that the INSTANCE_NAME parameter in the connect descriptor specifies an instance name known by the listener.
- Check for an event in the listener.log file.

**TNS-12522: TNS:listener could not find available instance with given INSTANCE_ROLE**

**Cause:** There are not any available and appropriate database instances registered with the listener, that are part of the service identified by SERVICE_NAME given
in the connect descriptor and that have the specified INSTANCE_ROLE (and INSTANCE_NAME, if specified).

**Action:** Check to make sure that the INSTANCE_ROLE specified is correct. Run "lsnrctl services" to ensure that the instance(s) have registered with the listener and that they are ready to accept connections.

**TNS-12523: TNS:listener could not find instance appropriate for the client connection**

**Cause:** The listener could not find any available (database) instances, that are appropriate for the client connection.

**Action:** Run "lsnrctl services" to ensure that the instance(s) are registered with the listener, and have status READY.

**TNS-12524: TNS:listener could not resolve HANDLER_NAME given in connect descriptor**

**Cause:** The HANDLER_NAME in the CONNECT_DATA was not found in the listener's tables for the specified SERVICE_NAME and INSTANCE_NAME.

**Action:** Check to make sure that the HANDLER_NAME specified is correct.

**TNS-12525: TNS:listener has not received client's request in time allowed**

**Cause:** The listener disconnected the client because the client failed to provide the necessary connect information within the allowed time interval. This may be a result of network or system delays; or this may indicate that a malicious client is trying to cause a Denial of Service attack on the listener.

**Action:** If the error occurred because of a slow network or system, reconfigure INBOUND_CONNECT_TIMEOUT to a larger value. If a malicious client is suspected, use the address in listener.log to identify the source and restrict access. Turn on tracing for more information.

**TNS-12526: TNS:listener: all appropriate instances are in restricted mode**

**Cause:** Database instances supporting the service requested by the client were in restricted mode. The Listener does not allow connections to instances in restricted mode. This condition may be temporary, such as during periods when database administration is performed.

**Action:** Attempt the connection again. If error persists, then contact the database administrator to change the mode of the instance, if appropriate.

**TNS-12527: TNS:listener: all instances are in restricted mode or blocking new connections**

**Cause:** All appropriate database instances supporting the service requested by the client reported that they either were in restricted mode or were blocking the new connections. The Listener does not allow connections to such instances. This condition may be temporary, such as at instance startup.

**Action:** Attempt the connection again. If error persists, then contact the database administrator to check the status of the instances.

**TNS-12528: TNS:listener: all appropriate instances are blocking new connections**

**Cause:** All instances supporting the service requested by the client reported that they were blocking the new connections. This condition may be temporary, such as at instance startup.

**Action:** Attempt the connection again. If error persists, then contact the administrator to check the status of the instances.
TNS-12529: TNS:connect request rejected based on current filtering rules

Cause: Connection Manager and its listener were configured with filtering rules specifying that the connect request be rejected.

Action: If this connect request should be allowed, then contact the administrator to modify the filtering rules.

TNS-12531: TNS:cannot allocate memory

Cause: Sufficient memory could not be allocated to perform the desired activity.

Action: Either free some resource for TNS, or add more memory to the machine. For further details, turn on tracing and reexecute the operation.

TNS-12532: TNS:invalid argument

Cause: An internal function received an invalid parameter.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12533: TNS:illegal ADDRESS parameters

Cause: An illegal set of protocol adapter parameters was specified. In some cases, this error is returned when a connection cannot be made to the protocol transport.

Action: Verify that the destination can be reached using the specified protocol.
Check the parameters within the ADDRESS section of TNSNAMES.ORA. Legal ADDRESS parameter formats may be found in the Oracle operating system specific documentation for your platform. Protocols that resolve names at the transport layer (such as DECnet object names) are vulnerable to this error if not properly configured or names are misspelled.

TNS-12534: TNS:operation not supported

Cause: An internal function received a request to perform an operation that is not supported (on this machine).

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12535: TNS:operation timed out

Cause: The requested operation could not be completed within the time out period.

Action: Look at the documentation on the secondary errors for possible remedy. See SQLNET.LOG to find secondary error if not provided explicitly. Turn on tracing to gather more information.

TNS-12536: TNS:operation would block

Cause: An internal operation did not commence because to do so would block the current process and the user has requested that operations be non-blocking.

Action: None needed; this is an information message.

TNS-12537: TNS:connection closed

Cause: "End of file" condition has been reached; partner has disconnected.

Action: None needed; this is an information message.

TNS-12538: TNS:no such protocol adapter

Cause: The protocol adapter requested (by way of the "(PROTOCOL=..)" keyword-value pair in a TNS address) is unknown. If the supplied address is typographically correct then the protocol adapter is not installed.
**Oracle Database Error Messages**

**Action:** Install the protocol adapter or correct typographically error, as appropriate. Note: if the supplied address was derived from resolving the service name, check the address in the appropriate file (TNSNAMES.ORA, LISTENER.ORA or SQLNET.ORA).

**TNS-12539: TNS:buffer over- or under-flow**

**Cause:** Buffer too small for incoming data or too large for outgoing data.

**Action:** This restriction (which is associated with CONNECT DATA) is not normally visible to the user. For further details, turn on tracing and reexecute the operation; contact Oracle Customer Support.

**TNS-12540: TNS:internal limit restriction exceeded**

**Cause:** Too many TNS connections open simultaneously.

**Action:** Wait for connections to close and re-try.

**TNS-12541: TNS:no listener**

**Cause:** The connection request could not be completed because the listener is not running.

**Action:** Ensure that the supplied destination address matches one of the addresses used by the listener - compare the TNSNAMES.ORA entry with the appropriate LISTENER.ORA file (or TNSNAV.ORA if the connection is to go by way of an Interchange). Start the listener on the remote machine.

**TNS-12542: TNS:address already in use**

**Cause:** Specified listener address is already being used.

**Action:** Start your listener with a unique address.

**TNS-12543: TNS:destination host unreachable**

**Cause:** Contact can not be made with remote party.

**Action:** Make sure the network driver is functioning and the network is up.

**TNS-12544: TNS:contexts have different wait/test functions**

**Cause:** Two protocol adapters have conflicting wait/test functions.

**Action:** Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-12545: Connect failed because target host or object does not exist**

**Cause:** The address specified is not valid, or the program being connected to does not exist.

**Action:** Ensure the ADDRESS parameters have been entered correctly; the most likely incorrect parameter is the node name. Ensure that the executable for the server exists (perhaps "oracle" is missing.) If the protocol is TCP/IP, edit the TNSNAMES.ORA file to change the host name to a numeric IP address and try again.

**TNS-12546: TNS:permission denied**

**Cause:** User has insufficient privileges to perform the requested operation.

**Action:** Acquire necessary privileges and try again.

**TNS-12547: TNS:lost contact**

**Cause:** Partner has unexpectedly gone away, usually during process startup.
Action: Investigate partner application for abnormal termination. On an Interchange, this can happen if the machine is overloaded.

TNS-12548: TNS:incomplete read or write
Cause: A data send or receive failed.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12549: TNS:operating system resource quota exceeded
Cause: The current user has exceeded the allotted resource assigned in the operating system.
Action: Acquire more operating system resource, or perform a different function.

TNS-12550: TNS:syntax error
Cause: The supplied connect descriptor contains illegal syntax.
Action: Check the syntax of the connect descriptor in TNSNAMES.ORA.

TNS-12551: TNS:missing keyword
Cause: The supplied connect descriptor is missing one or more TNS keywords.
Action: Check the syntax, and ensure all required keywords are present.

TNS-12552: TNS:operation was interrupted
Cause: An internal operation was interrupted and could not complete.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12554: TNS:current operation is still in progress
Cause: An internal operation is still in progress.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12555: TNS:permission denied
Cause: User has insufficient privileges to perform the requested operation.
Action: Acquire necessary privileges and try again.

TNS-12556: TNS:no caller
Cause: TNS detected an incoming connect request but there was no caller.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12557: TNS:protocol adapter not loadable
Cause: On some platforms (such as OS/2) protocol adapters are loaded at run-time. If the shared library (or DLL) for the protocol adapter is missing or one of its supporting libraries is missing then this error is returned.
Action: For further details, turn on tracing and reexecute the operation. The trace file will include the name of the shared library (or DLL) that could not be loaded.

TNS-12558: TNS:protocol adapter not loaded
Cause: On some platforms (such as OS/2) protocol adapters are loaded at run-time. If the shared library (or DLL) for the protocol adapter has not been loaded, then this error is returned.
**Action:** For further details, turn on tracing and reexecute the operation. The trace file will have the name of the shared library (or DLL) that has not been loaded.

**TNS-12560: TNS:protocol adapter error**
**Cause:** A generic protocol adapter error occurred.
**Action:** Check addresses used for proper protocol specification. Before reporting this error, look at the error stack and check for lower level transport errors. For further details, turn on tracing and reexecute the operation. Turn off tracing when the operation is complete.

**TNS-12561: TNS:unknown error**
**Cause:** A generic protocol error occurred.
**Action:** For further details, turn on tracing and reexecute the operation.

**TNS-12562: TNS:bad global handle**
**Cause:** Internal error - bad 'gbh' argument passed to TNS from caller. System may have been linked with old libraries.
**Action:** Not normally visible to the user, contact Oracle Customer Support.

**TNS-12564: TNS:connection refused**
**Cause:** The connect request was denied by the remote user (or TNS software).
**Action:** Not normally visible to the user. For further details, turn on tracing and reexecute the operation.

**TNS-12566: TNS:protocol error**
**Cause:** An unexpected TNS protocol error has occurred.
**Action:** For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-12569: TNS:packet checksum failure**
**Cause:** The data received is not the same as the data sent.
**Action:** Attempt the transaction again. If the error is persistent, turn on tracing and reexecute the operation.

**TNS-12570: TNS:packet reader failure**
**Cause:** An error occurred during a data receive.
**Action:** Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-12571: TNS:packet writer failure**
**Cause:** An error occurred during a data send.
**Action:** Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-12574: TNS:redirected denied**
**Cause:** The connect request failed because it would have required redirection and the caller has requested no redirections.
**Action:** Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

**TNS-12575: TNS:dhctx busy**
Cause: The handoff over a dhctx failed as dhctx was already busy with an ongoing handoff.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12576: TNS:handoff not supported for this session
Cause: Handoff of a established session was attempted which either had tcps as its transport or NA options were enabled for this session.
Action: Check the transport setting as well as NA options. If error persists, contact Oracle Customer Support.

TNS-12578: TNS:wallet open failed
Cause: An error was encountered while trying to open the specified wallet.
Action: For further details, turn on tracing and re-execute the operation.

TNS-12582: TNS:invalid operation
Cause: An internal function received an invalid request.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12583: TNS:no reader
Cause: A send operation has been requested but partner has already disconnected.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12585: TNS:data truncation
Cause: A receive operation has completed with insufficient data to satisfy the user's request.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12589: TNS:connection not bequeathable
Cause: An attempt to hand-off a connection from one process to another has failed because the protocol provider does not support it.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12590: TNS:no I/O buffer
Cause: An attempt to perform an I/O operation failed because no buffer was available.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12591: TNS:event signal failure
Cause: The TNS software is unable to signal an event occurrence.
Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12592: TNS:bad packet
Cause: An ill-formed packet has been detected by the TNS software.
Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12593: TNS:no registered connection
Cause: An attempt to solicit network event activity has failed because no connections are registered for event notification.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12595: TNS:no confirmation
Cause: TNS is unable to get requested confirmation acknowledgment from remote partner.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12596: TNS:internal inconsistency
Cause: TNS has detected an internal inconsistency.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12597: TNS:connect descriptor already in use
Cause: Internal error - illegal use of connect descriptor.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12598: TNS:banner registration failed
Cause: The registration of a product banner with the Oracle server failed.
Action: This is an error which is not normally visible externally. Enable tracing and attempt to repeat the error. If it occurs again, contact Oracle Customer Support.

TNS-12599: TNS: cryptographic checksum mismatch
Cause: The data received is not the same as the data sent.
Action: Attempt the transaction again. If error persists, check (and correct) the integrity of your physical connection.

TNS-12600: TNS: string open failed
Cause: The creation of a string in ORACLE NLS format failed.
Action: This is an internal error, enable tracing and attempt to repeat the error. If it occurs again, contact Oracle Customer Support.

TNS-12601: TNS:information flags check failed
Cause: The TNS information flags set by the process prior to connection negotiation were not present after the negotiation was finished.
Action: This is an internal error. Enable tracing and attempt to repeat the error. If it occurs again, contact Oracle Customer Support.

TNS-12602: TNS: Connection Pooling limit reached
Cause: The operation failed because maximum active current connections has been reached. It may not be a real error when the Connection Pooling feature is enabled. It is possible that the application later reissues the operation and successfully grabs the connection pool slot and proceeds.
Action: This is an internal error. Enable tracing and attempt to repeat the error. If it occurs again, contact Oracle Customer Support.

TNS-12606: TNS: Application timeout occurred  
Cause: A network session did not reach an application-defined stage within the allowed time interval.  
Action: This is an error which does not normally appear at the high level. The action to take is application specific, and is detailed in the higher level error description.

TNS-12607: TNS: Connect timeout occurred  
Cause: A network session did not reach a predefined connect stage within the allowed time interval.  
Action: This is an error which does not normally appear at the high level. The action to take is application specific, and is detailed in the higher level error description.

TNS-12608: TNS: Send timeout occurred  
Cause: The send or write operation did not complete within the allowed time interval.  
Action: Check if the peer host is available. Increase the send timeout value if necessary.

TNS-12609: TNS: Receive timeout occurred  
Cause: The receive or read operation did not complete within the allowed time interval.  
Action: Check if the peer host is available. Increase the receive timeout value if necessary.

TNS-12611: TNS: operation is not portable  
Cause: Attempted operation is not portable.  
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12612: TNS: connection is busy  
Cause: Attempted operation failed because it conflicts with an ongoing  
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12615: TNS: preempt error  
Cause: A request to service an event failed because no event notification has yet been posted.  
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12616: TNS: no event signals  
Cause: The operation failed because the type of data specified is unknown.  
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12618: TNS: versions are incompatible  
Cause: The two machines are running incompatible versions of TNS.
TNS-12619: TNS:unable to grant requested service
Cause: The connect request failed because requested service could not be provided by the local TNS software.
Action: If appropriate, reexecute with reduced service requirements.

TNS-12620: TNS:requested characteristic not available
Cause: The connect request failed because a requested transport characteristic could not be supported by the remote TNS software.
Action: If appropriate, reexecute with reduced requirements.

TNS-12622: TNS:event notifications are not homogeneous
Cause: An attempt to register a connection for event notification failed because the event notification type conflicts with existing registrations.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12623: TNS:operation is illegal in this state
Cause: Connection is half-duplex and a full-duplex operation was attempted.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12624: TNS:connection is already registered
Cause: An attempt to register a connection for event notification failed because the connection is already registered.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12625: TNS:missing argument
Cause: An operation failed because an argument was missing.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12626: TNS:bad event type
Cause: An attempt to register a connection for event notification failed because the event type is unknown.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12628: TNS:no event callbacks
Cause: An attempt to register a connection for event notification failed because asynchronous callbacks are not available.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12629: TNS:no event test
Cause: An attempt to register a connection for event notification failed because the ability to test for events is not available.
Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.
TNS-12630: Native service operation not supported
    Cause: An operation requested by a user is not supported by the native services component.
    Action: This may be an internal error if the operation should have been supported.

TNS-12631: Username retrieval failed
    Cause: The authentication service failed to retrieve the name of a user.
    Action: Enable tracing to determine which routine is failing.

TNS-12632: Role fetch failed
    Cause: The authentication service failed to retrieve one of the user’s roles.
    Action: Enable tracing to determine which routine is failing.

TNS-12633: No shared authentication services
    Cause: The list of authentication services specified by the user does not match those supported by the process.
    Action: Either specify another list or relink the executable with the desired services.

TNS-12634: Memory allocation failed
    Cause: Process was unable to allocate memory.
    Action: Terminate other processes in order to reclaim needed memory.

TNS-12635: No authentication adapters available
    Cause: The executable was not linked with any authentication service adapters but the sqlnet.ora parameter that determines whether or not authentication is required was set to true.
    Action: Either disable the parameter or relink the executable with service adapters.

TNS-12636: Packet send failed
    Cause: A process was unable to send a packet to another process. Possible causes are:
        1. The other process was terminated.
        2. The machine on which the other process is running went down.
        3. Some other communications error occurred.
    Action: If the cause is not obvious, contact Oracle Customer Support.

TNS-12637: Packet receive failed
    Cause: A process was unable to receive a packet from another process. Possible causes are:
        1. The other process was terminated.
        2. The machine on which the other process is running went down.
        3. Some other communications error occurred.
    Action: If the cause is not obvious, contact Oracle Customer Support.

TNS-12638: Credential retrieval failed
    Cause: The authentication service failed to retrieve the credentials of a user.
**Action:** Enable tracing to determine the exact error.

**TNS-12639: Authentication service negotiation failed**

*Cause:* No match was found between the types of authentication services that the client supports and those that the server is using.

*Action:* Possible solutions:

1. Change the entry in sqlnet.ora that determines which services are to be used.
2. Relink the client with at least one of the authentication service adapters that the server supports.
3. Relink the server with at least one of the authentication service adapters that the client supports.
4. Disable authentication on both the client and server.

**TNS-12640: Authentication adapter initialization failed**

*Cause:* The function specified in the authentication table entry for the service failed.

*Action:* Enable tracing to determine the exact error.

**TNS-12641: Authentication service failed to initialize**

*Cause:* The authentication service failed during initialization.

*Action:* Enable tracing to determine the exact error.

**TNS-12642: No session key**

*Cause:* A process has no session key associated with it because the authentication service being used does not use one.

*Action:* If a session key is required, use another authentication service.

**TNS-12643: Client received internal error from server**

*Cause:* The client process received an error from the server that indicated that an internal Oracle Net native services error had occurred.

*Action:* Enable tracing on both processes and attempt to recreate the problem. If successful in recreating the problem, contact Oracle Customer Support.

**TNS-12645: Parameter does not exist.**

*Cause:* A sqlnet.ora parameter from which a value was needed does not exist.

*Action:* Set the parameter in the parameter file.

**TNS-12646: Invalid value specified for boolean parameter**

*Cause:* The value specified for a parameter was set to a value other than true/false or on/off.

*Action:* Correct the value of the parameter.

**TNS-12647: Authentication required**

*Cause:* The parameter that controls whether authentication is required was set to true, but the executable does not have an authentication service linked in.

*Action:* Either re-link the executable with an authentication service adapter or disable the parameter.

**TNS-12648: Encryption or data integrity algorithm list empty**

*Cause:* An Oracle Advanced Security list-of-algorithms parameter was empty, e.g. "()".
**Action:** Change the list to contain the name of at least one installed algorithm, or remove the list entirely if every installed algorithm is acceptable.

**TNS-12649: Unknown encryption or data integrity algorithm**
- **Cause:** An Oracle Advanced Security list-of-algorithms parameter included an algorithm name that was not recognized.
- **Action:** Either remove that algorithm name, correct it if it was misspelled, or install the driver for the missing algorithm.

**TNS-12650: No common encryption or data integrity algorithm**
- **Cause:** The client and server have no algorithm in common for either encryption or data integrity or both.
- **Action:** Choose sets of algorithms that overlap. In other words, add one of the client's algorithm choices to the server's list or vice versa.

**TNS-12651: Encryption or data integrity algorithm unacceptable**
- **Cause:** The algorithm the server chose to use for encryption or data integrity was not one of the choices acceptable to the client. This is either the result of an internal error, of a network data transmission error, or of deliberate tampering with the transmitted data.
- **Action:** For further details, turn on tracing, re-execute the operation, and contact Oracle Customer Support.

**TNS-12652: String truncated**
- **Cause:** Not enough memory was allocated for a string so it had to be truncated.
- **Action:** If it is OK that the string is truncated, then it is not an error. Otherwise, call the routine that reported the error again with a larger string buffer.

**TNS-12653: Authentication control function failed**
- **Cause:** The control function utilized by the authentication service driver failed.
- **Action:** Enable tracing to determine the exact error.

**TNS-12654: Authentication conversion failed**
- **Cause:** The authentication service was unable to convert the credentials of a user from the format specific to the format into the ORACLE format.
- **Action:** Enable tracing to determine the exact error.

**TNS-12655: Password check failed**
- **Cause:** The authentication service being used was unable to verify the provided password.
- **Action:** Enable tracing to determine the exact error.

**TNS-12656: Cryptographic checksum mismatch**
- **Cause:** The cryptographic checksum received with a packet of incoming data didn't match the checksum computed by the receiving end. This indicates that the packet was tampered with or otherwise corrupted in transit.
- **Action:** Look for sources of data corruption, perhaps including deliberate tampering.

**TNS-12657: No algorithms installed**
- **Cause:** The near side of the connection required the use of a service (either encryption or checksumming) when no algorithms for that service were installed.
**Action:** Remove the "ON" requirement for that service.

**TNS-12658: ANO service required but TNS version is incompatible**

**Cause:** A client process that is running an earlier version of TNS attempted to connect but the connection failed because the server process required that an ANO service (authentication, encryption, etc.) be used.

**Action:** Relink the calling executable and retry the connection or eliminate the requirement that the service be used on the server side.

**TNS-12659: Error received from other process**

**Cause:** An error was received by one or more services from the process on the other side of the connection.

**Action:** Enable tracing to determine the exact error(s). The error(s) is (are) not returned directly because an error generated by a server may not make sense on the client side and vice-versa.

**TNS-12660: Encryption or crypto-checksumming parameters incompatible**

**Cause:** One side of the connection specified "REQUIRED" for encryption or crypto-checksumming, while the other side specified "REJECTED".

**Action:** Change the "REQUIRED" side to "REQUESTED" if the you want encryption or crypto-checksumming to be optional, or change the "REJECTED" side to "ACCEPTED" if you do not want the service to be optional.

**TNS-12661: Protocol authentication to be used**

**Cause:** The Oracle Advanced Security authentication service has determined that the Oracle Net transport protocol in use is to be utilized to authenticate a user’s identity.

**Action:** This error is used solely to communicate information between the authentication service and the Oracle Net session layer and should not normally be visible. If the error is seen, contact Oracle Worldwide Support.

**TNS-12662: proxy ticket retrieval failed**

**Cause:** The authentication adapter used by Oracle Net failed to retrieve the credentials needed to authenticate a database link.

**Action:** Enable tracing to determine the exact error.

**TNS-12663: Services required by client not available on the server**

**Cause:** Service(s) that was (were) required by the client process were not available on the server process.

**Action:** Configure the server with the services required by the client (best solution) or delete the requirement from the configuration file of the client (least secure).

**TNS-12664: Services required by server not available on the client**

**Cause:** Service(s) that was (were) required by the server process were not available on the client process.

**Action:** Configure the client with the services required by the server (best solution) or delete the requirement from the configuration file of the server (least secure).

**TNS-12665: NLS string open failed**

**Cause:** A native service was unable to make a string available for use by the National Language Support component.
Action: Make sure the National Language Support component has been properly. If it has, enable tracing and report the problem to Customer Support.

TNS-12666: Dedicated server: outbound transport protocol different from inbound
Cause: The protocol specified for an externally-identified outbound connection from a dedicated server (database link) was not the same as that used for the inbound connection. It is not possible for Oracle Net to authenticate a proxy connection that uses a protocol that is different from that which was used for the connection to the dedicated server.
Action: Specify the same protocol in the Oracle Net connect descriptor for the outbound connection as that used for the inbound connection.

TNS-12667: Shared server: outbound transport protocol different from inbound
Cause: The protocol specified for an externally-identified outbound connection from a shared server (database link) was not the same as that used for the inbound connection. It is not possible for Oracle Net to authenticate a proxy connection that uses a protocol that is different from that which was used for the connection to the shared server.
Action: Specify the same protocol in the Oracle Net connect descriptor for the outbound connection as that used for the inbound connection.

TNS-12668: Dedicated server: outbound protocol does not support proxies
Cause: The protocol specified to perform an externally-identified proxy connection (database link) from a dedicated server does not support proxy connections.
Action: Specify a protocol in the Oracle Net connect descriptor used for the connection that does support externally-authenticated proxy connections. NOTE: Because of a limitation in Oracle Net, the protocol used for the proxy connection must the same as that used for the connection from the client to the server.

TNS-12669: Shared server: outbound protocol does not support proxies
Cause: The protocol specified to perform an externally-identified proxy connection (database link) from a shared server does not support proxy connections.
Action: Specify a protocol in the Oracle Net connect descriptor used for the connection that does support externally-authenticated proxy connections. NOTE: Because of a limitation in Oracle Net, the protocol used for the proxy connection must the same as that used for the connection from the client to the server.

TNS-12670: Incorrect role password
Cause: A password supplied for a role could not be validated by the authentication service.
Action: Supply the correct password.

TNS-12671: Shared server: adapter failed to save context
Cause: The adapter for the authentication service failed when it tried to save the data needed for proxy connections (database links) through the shared server.
Action: Enable tracing to determine the exact error. Contact Oracle Customer Support if the reason is not obvious.

TNS-12672: Database logon failure
Cause: The authentication service adapter in use encountered an error it attempted to validate the logon attempt of a user.
Action: Enable tracing to determine the exact error encountered by the adapter.

TNS-12673: Dedicated server: context not saved
Cause: A connection was marked as being a proxy connection (database link) from a dedicated server but no inbound context was present.
Action: This error should not normally be visible to the user. Contact Oracle Customer Support.

TNS-12674: Shared server: proxy context not saved
Cause: A connection was marked as being a proxy connection (database link) from a shared server but no inbound context was present.
Action: This error should not normally be visible to the user. Contact Oracle Customer Support.

TNS-12675: External user name not available yet
Cause: The authentication service in use was not able to return the external name of a user of the ORACLE server because it is not available to the service yet.
Action: This is just an informational message and should not normally be visible to the user. If the error does appear, contact Oracle Customer Support.

TNS-12676: Server received internal error from client
Cause: The server process received an error from the client which indicated that an internal Oracle Net native services error had occurred.
Action: Enable tracing on both processes and attempt to recreate the problem. If the problem recurs, contact Oracle Customer Support.

TNS-12677: Authentication service not supported by database link
Cause: The authentication service used by the proxy process (database link) was unable to find the adapter being used by the client in its list of authentication mechanisms.
Action: Specify an authentication adapter that is shared by the client and the server being used for the database link.

TNS-12678: Authentication disabled but required
Cause: The configuration parameters that control whether Oracle Advanced Security authentication is disabled or required were both set to TRUE.
Action: Set one or both of the parameters to FALSE.

TNS-12679: Native services disabled by other process but required
Cause: The remote process has disabled native services but the local process requires them.
Action: Enable native services on the remote process or disable them locally.

TNS-12680: Native services disabled but required
Cause: The process has disabled native services but at least one service is required.
Action: Enable native services or change the configuration file so that none of the available services are required.

TNS-12681: Login failed: the SecurID card does not have a pincode yet
Cause: The SecurID card that is used to logon to Oracle, does not have a pincode assigned to it.
Action: Use one of the programs supplied by Security Dynamics to assign a pincode to the card.

TNS-12682: Login failed: the SecurID card is in next PRN mode
Cause: The SecurID card and the SecurID server are out of sync and the server requires the next cardcode to resynchronize the card.
Action: Use one of the programs supplied by Security Dynamics to resynchronize the SecurID card.

TNS-12683: encryption/crypto-checksumming: no Diffie-Hellman seed
Cause: The "sqlnet.crypto_seed" parameter is missing from the SQLNET.ORA parameters file for Oracle Advanced Security.
Action: Add this line to SQLNET.ORA: sqlnet.crypto_seed = "randomly-chosen text"

TNS-12684: encryption/crypto-checksumming: Diffie-Hellman seed too small
Cause: The "sqlnet.crypto_seed" parameter in the SQLNET.ORA parameter file for Oracle Advanced Security is too small.
Action: Add more randomly-chosen text to it, perhaps using Network Manager.

TNS-12685: Native service required remotely but disabled locally
Cause: A native service is required by the remote process but native services have been disabled locally.
Action: Enable native services locally or change the configuration parameters on the remote host so that no native services are required.

TNS-12686: Invalid command specified for a service
Cause: An operation which does not exist was specified for a native service.
Action: This is a programming error and should not normally be visible to the user. If the error does appear, contact Oracle Customer Support.

TNS-12687: Credentials expired.
Cause: The credentials that are used to authenticate the user for the requested connection have expired.
Action: Renew your credentials. Refer to the documentation specific for your Network Authentication Adapter on how to do this.

TNS-12688: Login failed: the SecurID server rejected the new pincode
Cause: There are a number of reasons why the SecurID server would refuse a pincode:
- The user might not have permission to make up his own pincode.
- The pincode was either too short or too long. Valid pincodes consist of minimal four, but no more than eight characters.
- The pincode contains any non alphanumeric characters.
Action: Reexecute the operation and make sure to use a pincode that satisfies the above requirements. If the problem persists, turn on tracing at the Oracle Server side of the connection and examine the trace file for the exact error.

TNS-12689: Server Authentication required, but not supported
Cause: Server Authentication is required for this connection, but not supported by both sides of the connection.
**Action:** Make sure both sides of the connection have the correct version of Advanced Networking Option, and that the Authentication Adapter supports Server Authentication.

**TNS-12690: Server Authentication failed, login cancelled**

**Cause:** Server Authentication is required, but the server's credentials were found invalid by the client.

**Action:** Make sure that the server has a valid set of credentials. Refer to your authentication adapter specific documentation on how to do this.

**TNS-12696: Double Encryption Turned On, login disallowed**

**Cause:** The user is using a Secure Protocol Adapter that has Encryption turned ON as well as ANO Encryption.

**Action:** Turn OFF either ANO Encryption or the Protocol Adapter Encryption if possible. Refer to Oracle Advanced Security Administrator's Guide on how to do this.

**TNS-12699: Native service internal error**

**Cause:** An internal error occurred in the native services component.

**Action:** Enable tracing to determine the exact error. Contact Oracle Customer Support.
NNC-00001: maximum number of connections already open
Cause: All available name service connections are handling requests.
Action: If the problem occurs when running a name server, increase the values of names.max_open_connections. If the problem occurs in a client program, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00002: error listening on stream string
Cause: The name server was asked to listen on the specified address, and failed, probably because the address is malformed, or because it uses a SQL*Net protocol adaptor which has not been installed.
Action: Make sure the address is properly formed, and that it uses a protocol adaptor which has been installed on your system.

NNC-00003: error opening stream string
Cause: A name server or client program attempted to open a connection to another server and failed, either because the server is down, or because the network path to that server is not working. This error is usually displayed underneath an error which describes the problem in more detail.
Action: Make sure that the server being connected to is listening on the address used, and that there is network connectivity between the two end-points.

NNC-00004: connection is broken
Cause: The connection from a name server or client program to another server has been broken, either because that server has shut down, or because the network path to the server has stopped working. This error is usually displayed underneath an error which describes the problem in more detail.
Action: Make sure that the server being connected to is running and listening on the address used, and that there is network connectivity between the two end-points.

NNC-00005: cannot initialization stream subsystem
Cause: The name service stream subsystem could not be started, probably because of a missing TNS error message file.
Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

NNC-00050: message format error
Cause: A corrupted name server message was received by a name server or the name server program interface.
**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00051: message content error**

**Cause**: A corrupted name server message was received by a name server or the name server program interface.

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00052: client and server protocol versions are incompatible**

**Cause**: A name server message with an incompatible protocol version was received by a name server or the name server program interface. This problem will occur when there are clients and servers with widely varying protocol versions that are trying to communicate.

**Action**: upgrade older client and server software so it is compatible with newer software.

**NNC-00053: ASN.1 error encountered while sending or receiving message**

**Cause**: The name server or the name server program interface attempted to send or receive a message and failed because of an ASN.1 error.

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00400: memory exhausted**

**Cause**: The program interface has run out of memory.

**Action**: Add more memory or run fewer processes.

**NNC-00401: program interface initialization failed**

**Cause**: The name server program interface could not be initialised, probably because of a missing TNS or name server error message file.

**Action**: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

**NNC-00402: program interface de-initialization failed**

**Cause**: An internal error occurred while the name server program interface was being de-initialised by an internal function.

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00403: program interface has not been initialised**

**Cause**: An internal function has attempted to de-initialise the name service program interface when it has not yet been initialised.

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00404: supplied buffer of size string is smaller than minimum size string**
**Cause:** A caller supplied the name server program interface with a memory buffer too small for the interface's requirements. This error is usually displayed underneath an error which describes the problem in more detail.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00405: network failure**

**Cause:** The network connection between the client program and the name server has failed, either because the server has shut down, or because the network path to the server has stopped working. This error is usually displayed underneath an error which describes the problem in more detail.

**Action:** Contact your name server administrator to make sure that the server being connected to is running and listening on the address used, and that there is network connectivity between the two end-points.

**NNC-00406: name "string" does not exist**

**Cause:** The user asked for information associated with a global name that does not exist.

**Action:** Re-try the failing operation with a global name that exists.

**NNC-00407: alias loop in name request**

**Cause:** The name service detected an "alias loop" when trying to retrieve information associated with a global name. An alias loop occurs when an alias name X points to another alias name Y, which in turn points back to X, rather than eventually to a global name which contains data.

**Action:** Contact your name server administrator to have the alias loop investigated and fixed.

**NNC-00408: name "string" exists but desired data does not**

**Cause:** The user asked for information associated with a global name. The name in question exists, but does not contain the desired type of information.

**Action:** Re-try the failing operation with a type which the desired name does contain.

**NNC-00409: temporary name service failure**

**Cause:** There are no name servers available to handle a client request, or a name server was temporarily unable to handle a client request. This situation is almost always temporary, and occurs when the program interface has issued a name server request and not received a timely response from any of its preferred servers. Such delays can occur due to transient network or name server outages or heavy load.

**Action:** Re-try the failing operation. If the error persists, make sure there is network connectivity between the client and its preferred name servers, and contact your name server administrator to make sure that those name servers are running.

**NNC-00410: invalid preferred server address list**

**Cause:** The names.preferred_servers parameter in sqlnet.ora is malformed.

**Action:** Make sure the address list is properly formatted.

**NNC-00411: invalid default domain name "string"**

**Cause:** The names.default_domain parameter in sqlnet.ora is invalid.
Action: Make sure the parameter value is a valid global name. See your documentation for the characters which may be used in a global name.

NNC-00412: invalid name "string"
Cause: The name server program interface was given an invalid global name to process.
Action: Supply a valid domain name. If the error is caused by an internal function, contact Worldwide Customer Support.

NNC-00413: general failure
Cause: A name server program interface error occurred which did not fall under the heading of any other more specific error condition. The error will usually be followed by more specific lower-level information.
Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00414: invalid name-value binding string "string"
Cause: A caller provided the name server program interface with an invalid name-value binding string value.
Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid name-value binding string argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00415: section identifier string is invalid, must be between string and string
Cause: An internal function has called the name server program interface with illegal arguments.
Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00416: user callback function returned error number string
Cause: An internal function has called the name server program interface with illegal arguments.
Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00417: name "string" already exists
Cause: A caller has attempted to create a new global name, and that name already exists.
Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a name that does not already exist. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00418: name "string" cannot be modified because it has children
Cause: A caller has attempted to delete or rename a global name, and that name cannot be modified because it has child names underneath it in the name space.
**Action:** Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a name that is a leaf node. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00419: authoritative server is unreachable**

**Cause:** A name server request cannot be processed because the server which received the operation does not own the name specified in the request and cannot locate the server which does own the name. The error is almost always transient, and occurs either because the path between the server receiving the request and the request's final destination has been interrupted, or because the final destination is down.

**Action:** Not normally visible to the user, except when using the name server control program. Because the error is typically a transient one, retrying the failing operation will usually work. If the failure persists, the name server which is allowed to process the failing operation is probably shut down or unreachable. Contact your name server administrator to make sure that your site's name servers are running, and are properly configured.

**NNC-00420: operation not allowed**

**Cause:** A name server request cannot be processed because the server which received the operation is not allowed to process it. The problem typically occurs when an administrator has disabled request processing at a particular server for some reason.

**Action:** Contact your name server administrator to determine why server request processing has been disabled.

**NNC-00421: invalid modification directive string, must be between string and string**

**Cause:** An internal function has called the name server program interface with illegal arguments.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00422: invalid data type name "string"**

**Cause:** A caller has provided an invalid data type name to the name server program interface.

**Action:** Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid type name. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00423: invalid data item syntax code string**

**Cause:** A caller has provided an invalid data type code to the name server program interface.

**Action:** Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid type name. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00424: invalid address "string"**
Cause: A caller provided the name server program interface with an invalid address value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid address argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00425: meta-data violation

Cause: A caller issued a name server modification request and that request cannot be processed because it would violate data type meta-data constraints.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, examine the meta-data constraints for the data type being operated upon and don't violate them. Examples of typical constraint violations are attempts to add a new data item to a name which already contains alias information, or attempts to add alias information to a name which already contains other data, or attempts to replace a data item with another item that has the wrong syntax. If the error occurs outside the control program, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00426: no such data type

Cause: A caller attempted to create a data item, and could not because the data item's type does not exist.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the operation with an existent data type. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00427: server does not support this version of the protocol

Cause: A name server message with an incompatible protocol version was received by a name server or the name server program interface. This problem will occur when there are clients and servers with widely varying protocol versions that are trying to communicate.

Action: upgrade older client and server software so it is compatible with newer software.

NNC-00428: invalid meta-data data item

Cause: A caller provided the name server program interface with an invalid meta-data data item.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid meta-data argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00429: invalid octet string literal "string"

Cause: A caller provided the name server program interface with an invalid octet string value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid octet string argument. Otherwise, turn on tracing
and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNC-00430: Database not accessible**

**Cause:** When a database is used for consistency between different nameservers, any modify operation should not only modify the cache but also the database. And if the database is not accessible, this error occurs.

**Action:** Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, make sure database is available and then re-execute the operation. If error persists, contact Worldwide Customer Support.

**NNC-00431: NS address does not match any of the current addresses**

**Cause:** When delegating a domain, the address of the Nameserver is provided by the client. If the nameserver already exists, then it already has address(es) associated with it. So, the address supplied by the client must match one of them. Otherwise, this error occurs.

**Action:** Not normally visible to the user, except when using name server control program. If the error occurs when using the control program, either provide an one of the existing addresses of the name server or delegate the domain to a new nameserver.

**NNC-00500:** warning: "string" parameter value is illegal, setting to string

**Cause:** The named parameter value is invalid.

**Action:** Make sure the parameter value is formatted correctly. Valid choices for boolean parameter values are TRUE, FALSE, YES, NO, ON, and OFF.

**NNC-00501:** warning: "string" parameter value must be between number and number, setting to number

**Cause:** The named parameter value is invalid or outside legal boundary values.

**Action:** Make sure the parameter value is a number, and falls between valid minimum and maximum values, as specified in the error text.
NNO-00050: serious errors in configuration data, server cannot run

**Cause:** The server's configuration data has a problem of some sort which prevents the server from starting.

**Action:** Previous error messages in the log file will specify the exact problems leading to the shutdown. The problem most frequently occurs when the network is broken up into multiple administrative regions and the delegation points are incorrect. Read the Oracle Names documentation sections on region delegation and ensure that their directions are being followed correctly.

NNO-00051: domain count number exceeds maximum of number, first number will be loaded

**Cause:** The server's configuration contains more domains than the server can support.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00052: invalid domain description list

**Cause:** The server's configuration contains an invalid domain description list.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00053: duplicate domain description for domain "string"

**Cause:** The server's configuration contains duplicate domain descriptions in the domain description list.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00054: invalid domain name "string"

**Cause:** The server's configuration contains a domain description with an invalid name.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00055: invalid domain minimum TTL "string"

**Cause:** The server's configuration contains a domain description with an invalid minimum TTL.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.
NNO-00056: warning: domain minimum TTL must be between number and number, set to number seconds
Cause: The server's configuration contains a domain description with an invalid minimum TTL. This error is not fatal; the server will automatically set the TTL to a default value which is suitable for most uses.
Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00057: loading and verifying topology data
Cause: An informational message written to the log file during normal server startup.
Action: None

NNO-00058: cannot load topology data from configuration database
Cause: An error was encountered while trying to load the server's topology data from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.
Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00059: cannot construct topology checkpoint file name
Cause: The server could not construct a system-dependent file name.
Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00060: loading server topology from checkpoint file "string"
Cause: An informational message written to the log file when the server has been forced to load from its most recent topology checkpoint file, by setting the names.no_region_database parameter to TRUE.
Action: None

NNO-00061: loading data for domain "string"
Cause: An informational message written to the log file during normal server startup.
Action: None

NNO-00062: cannot load domain data from configuration database
Cause: An error was encountered while trying to load the server's domain data from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.
Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00063: cannot construct domain checkpoint file name
Cause: the server could not construct a system-dependent file name.
Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00064: loading domain data from checkpoint file "string"
Cause: An informational message written to the log file when the server has been forced to load from its most recent domain checkpoint file, by setting the names.no_region_database parameter to TRUE.
Action: None

NNO-00065: loading cached data from checkpoint file "string"
Cause: An informational message written to the log file during normal server startup.
Action: None

NNO-00066: server will perform reload check of administrative region in number seconds
Cause: An informational message written to the log file whenever the Oracle Network Manager or the Oracle Names control program send a reload request to the server.
Action: None

NNO-00067: server reload check countdown aborted
Cause: An informational message written to the log file whenever the Oracle Names control program halts a reload request previously sent to the server.
Action: None

NNO-00068: warning: administrative region check failed, next check in number seconds
Cause: this warning is issued whenever the server fails to connect to the configuration database to see if any configuration data has changed. The server will automatically begin reissuing reload checks more frequently, and will eventually give up if connections fail continuously for three days.
Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database.

NNO-00069: warning: too many administrative region check failures, checking disabled
Cause: a warning issued whenever the server has continuously failed for three days in its attempts to connect to the configuration database. The server disables reload checking. Reload checking can later be re-enabled from the Oracle Network Manager or the Oracle Names control program.
Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00070: administrative region has changed, reloading domain data
Cause: An informational message written to the log file whenever the server's configuration has changed, and the server is reloading the new configuration from the configuration database.

Action: None

NNO-00071: cannot construct cache checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00072: loading from region database

Cause: normal

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00073: loading server config from region database

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00074: downloading region from server string

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00080: domain "string" cannot be delegated because its parent is already delegated

Cause: an internal delegation error has occurred. Delegation is controlled by the Oracle Network Manager, which enforces correct delegation rules.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00081: domain "string" has no name servers

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00082: domain "string" is missing my name "string" as a name server

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00083: domain "string" server "string" has no addresses

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.
NNO-00084: domain "string" is not in the authoritative domain list
  Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.
  Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00104: line string: syntax error, data ignored
  Cause: the server found a syntax error its domain data. This message will also appear if the server’s internal checkpoint files become corrupted. The record in question is not loaded, but the server continues to load data.
  Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00105: line string: invalid name "string", data ignored
  Cause: the server found an invalid global name in its domain data. The record in question is not loaded, but the server continues to load data.
  Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00106: line string: invalid TTL "string", data ignored
  Cause: the server found an invalid TTL in its domain data. The record in question is not loaded, but the server continues to load data.
  Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00107: line string: ignoring stale checkpoint data
  Cause: an informational message which appears during server startup when the server detects out-of-date cached data in its cache checkpoint file. The message is part of normal server startup.
  Action: None

NNO-00108: line number: TTL of number seconds below domain minimum number, using minimum
  Cause: the server found an invalid TTL value in its domain data. The record in question is not loaded, but the server continues to load data.
  Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00109: line string: invalid data type name "string", data ignored
  Cause: the server found an invalid data type name in its domain data. The record in question is not loaded, but the server continues to load data.
  Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00110: line string: unknown data type "string", data ignored
  Cause: the server found an unknown data type in its domain data. The record in question is not loaded, but the server continues to load data.
  Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00111: line string: data type "string" has syntax "string", should be "string", data ignored
Cause: the server found an invalid data type syntax in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00112: line string: ignored duplicate data of type "string"

Cause: the server found a duplicate record in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00113: line string: alias data already exists, all other data ignored

Cause: the server found an alias and non-alias data with the same global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00114: line string: other data exists, alias data ignored

Cause: the server found an alias and non-alias data with the same global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00115: line string: single-value data type "string", other instances ignored

Cause: the server found more than one record with the same name and type, when the type allows only a single record with a particular name. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00116: warning: data type "string" in string load

Cause: the server found a record with an invalid data type in its domain data.

Action: No action required; adjustments to data will eliminate warning.

NNO-00117: line string: missing data type, data ignored

Cause: the server found a record with a missing data type in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00118: line string: data length string exceeds maximum of string, data ignored

Cause: the server found a record whose length exceeds an internal limit. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00119: line string: server not authoritative for name "string", data ignored

Cause: the server found a global name in its domain data for which it is not authoritative. The record in question is not loaded, but the server continues to load data.
**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00120: line string: topology name "string" not allowed here**
**Cause:** the server found an invalid record in its domain data. The record in question is not loaded, but the server continues to load data.
**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00121: LDIF file string open failed: error = number**
**Cause:** the server found an invalid record in its domain data. The record in question is not loaded, but the server continues to load data.
**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00122: invalid name, data ignored: entry: string**
**Cause:** the server found an invalid global name in its domain data. The record in question is not loaded, but the server continues to load data.
**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00123: node "string" has no authoritative parent, data ignored**
**Cause:** an object in the domain data is apparently not in the domain(s) which the server is authoritative for. The record in question is not loaded, but the server continues to load data.
**Action:** Check for inconsistencies in the data and correct any errors in topology definition or domain data outside of authoritative domains.

**NNO-00150: warning: invalid hint list, no hints loaded**
**Cause:** The server’s configuration contains an invalid hint description list. The server will continue to run, but will not load any hints.
**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00151: warning: ignoring hint for domain "string", server is authoritative**
**Cause:** the server’s configuration contained a hint for a domain in the server’s administrative region. The hint is ignored and the server continues to run.
**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00152: warning: hint count number exceeds maximum of number, first number will be loaded**
**Cause:** There are too many hints in the server’s hint list. The server will load a specified maximum number of hints, ignore the rest, and continue running.
**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00153: warning: hint domain number has invalid name "string", hint domain ignored**
**Cause:** The server’s configuration contains a hint domain with an invalid name. The domain is ignored and the server continues to run.
**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.
NNO-00154: warning: hint number has invalid server name "string", hint ignored

Cause: The server's configuration contains a hint with an invalid server name. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00155: warning: hint number has missing address, hint ignored

Cause: The server's configuration contains a hint with no server address. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00156: warning: hint number address length number exceeds maximum of number, hint ignored

Cause: The server's configuration contains a hint whose address length exceeds an internal limit. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00157: warning: hint number has invalid address, hint ignored

Cause: The server's configuration contains a hint with an invalid address. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00158: warning: hint domain count number exceeds maximum of number, first number will be loaded

Cause: The server's hint domain list is too long. The server will load a specified maximum number of hint domains, ignore the rest, and continue running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00159: warning: ignoring duplicate hint domain number name "string"

Cause: The server's hint domain list contains a duplicate domain. The duplicate is ignored and the server continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00160: warning: ignoring duplicate hint server "string"

Cause: The server's hint server list contains a duplicate server. The duplicate is ignored and the server continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00250: invalid administrative region description

Cause: The server encountered an invalid administrative region description during startup. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.
NNO-00251: missing administrative region parameter string

**Cause:** The server's administrative region description is missing a required parameter. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

**Action:** Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00252: invalid administrative region parameter string value "string"

**Cause:** The server encountered an invalid administrative region parameter. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

**Action:** Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00253: administrative region parameter string length string exceeds maximum of string

**Cause:** The server encountered an administrative region parameter whose length exceeds an internal limit. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

**Action:** Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00254: warning: parameter string value must be between number and number, set to number seconds

**Cause:** The server encountered an administrative region parameter with an invalid value. The value is set to a default suitable for most applications, and the server continues running. The administrative region description is stored in the server's names.ora configuration file.

**Action:** Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00255: cannot initialize ROS

**Cause:** The server was unable to initialize ROS during startup. The error prevents the server from running.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00256: using administrative region "string"

**Cause:** an informational message which appears during server startup, and notes the name of the administrative region for future diagnostic use by administrators. The message is part of normal server startup.

**Action:** None

NNO-00257: warning: cannot get serial number from region store
Cause: The server encountered an error while trying to get the configuration database’s serial number. The error occurs almost always because time the server is unable to access the configuration database. If the error occurs during server startup, the server will shut down. If the error occurs during server operation (the server checks the serial number periodically to see if it should reload itself), then the server assumes a transient failure has occurred and repeats the operation a short while later. If the repetitions continue to fail for three days, the server will log another error and stop issuing the serial number load operation.

Action: First make sure that the Netadmin program has exported a server configuration for this name server. Next, make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. If the error occurs during server startup, you can force startup anyway, with checkpoint data, by starting the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00258: cannot load configuration from configuration database

Cause: An error was encountered while trying to load the server’s configuration from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00259: configuration tables have not been installed or are inaccessible

Cause: The configuration database has not been properly installed.

Action: Make sure the Oracle Network Manager and its database have been properly installed

NNO-00260: loading configuration data from checkpoint file "string"

Cause: An informational message written to the log file when the server has been forced to load from its most recent configuration checkpoint file, by setting the names.no_region_database parameter to TRUE.

Action: None

NNO-00261: cannot construct configuration checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00262: warning: cannot write checkpoint file "string"

Cause: the server was unable to write the named checkpoint file. This problem is typically due to the file system’s protection settings. The error is not fatal; it simply means the server will not create any checkpoint data. Note, however, that if the configuration database is ever unavailable during a future server startup, the lack of checkpoint data means you will be unable to force a startup from checkpoint data with the names.no_region_database parameter.
Action: Check to see that the server has permission to write the file named in the error message.

NNO-00263: error from configuration database
Cause: the server encountered an error while accessing the configuration database. The error can occur when the database is unavailable, or SQL*Net connectivity to the database is interrupted.
Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00264: configuration database query returned no data
Cause: the server attempted to fetch data from the configuration database and no data was found.
Action: The error generally appears underneath a more specific error which will tell you the exact nature of the problem.

NNO-00265: warning: cannot load data from checkpoint file
Cause: the server was started using checkpoint data, and was unable to read that data. The remaining errors below this one on the error stack provide more specific information about the problem.
Action: Check to see that the named file exists and that the server has permission to read it.

NNO-00266: cannot find document "string" in configuration database
Cause: The server encountered an error while trying to get its configuration ID from the configuration database. The error can occur any time the server is unable to access the configuration database. This error will cause the server to shut down.
Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00267: warning: configuration database contains no data for server "string"
Cause: the server successfully contacted the configuration database, but was unable to find any configuration information associated with the server’s name. The name is specified in the server’s names.ora configuration file. The error occurs almost always because the server configuration has not been exported from the Netadmin program.
Action: Make sure that the Netadmin program has exported a server configuration for this name server.

NNO-00268: warning: configuration database is not used, using checkpoint data instead
Cause: An informational message indicating that the server has been started with the names.no_region_database parameter set to TRUE, and that it will use checkpoint data rather than attempting to contact the configuration database.
Action: None
NNO-00269: configuration database is version string, server requires at least version string

**Cause:** The server cannot use the specified configuration database because it is of an incorrect version.

**Action:** Run the document conversion utility supplied with the Network Manager and re-export your network. The conversion utility will upgrade old documents to a version which can be understood by the name server.

NNO-00270: ORACLE error string

**Cause:** An ORACLE error was encountered while accessing the configuration database. The error can occur when the database is unavailable, or SQL*Net connectivity to the database is interrupted.

**Action:** Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00271: warning: names.ora region is version string, network definition is version string

**Cause:** The region description in names.ora is out of synch with the network definition.

**Action:** No action is required unless the name server cannot run with the network definition. To be safe names.ora should be updated with one which is consistent with the network definition.

NNO-00272: line string; invalid DIT/DN

**Cause:** There is a syntax error in the DIT/DN provided in the region description.

**Action:** Correct the error and restart the server.

NNO-00300: no listen addresses specified, at least one is required

**Cause:** the server's configuration is missing addresses on which to listen.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00301: server will shut down in number seconds

**Cause:** An informational message written to the log file when the server receives a shutdown request from the Oracle Names control program.

**Action:** None

NNO-00302: server stopped

**Cause:** An informational message written to the log file when the server shuts down.

**Action:** None

NNO-00303: server "string" started with process ID number

**Cause:** An informational message written to the log file when the server successfully starts up.

**Action:** None

NNO-00304: listen address string length string exceeds maximum of string
**Cause:** the length of one of the server's listen addresses exceeds an internal limit.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00305: trace level changed from number to number**

**Cause:** An informational message written to the log file when the server changes its trace level in response to a request from the Oracle Names control program.

**Action:** None

**NNO-00306: server shutdown countdown aborted**

**Cause:** An informational message written to the log file whenever the Oracle Names control program halts a shutdown request previously sent to the server.

**Action:** None

**NNO-00307: invalid server name "string"**

**Cause:** the server's name is invalid. The name is specified in the server's names.ora configuration file.

**Action:** Make sure that the names.server_name parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

**NNO-00308: server will restart in number seconds**

**Cause:** An informational message written to the log file when the server receives a restart request from the Oracle Names control program.

**Action:** None

**NNO-00309: server restarting**

**Cause:** An informational message written to the log file when the server restarts.

**Action:** None

**NNO-00310: server restart countdown aborted**

**Cause:** An informational message written to the log file whenever the Oracle Names control program halts a restart request previously sent to the server.

**Action:** None

**NNO-00311: invalid listen address list**

**Cause:** the server's configuration contains an invalid listen address list.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00312: listen address string is invalid**

**Cause:** the server's configuration contains an invalid listen address.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00313: server password length string exceeds maximum of string**

**Cause:** the server's password length exceeds an internal limit.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00314: error changing trace level from number to number, level change ignored**
Cause: the server encountered an error while changing its trace level in response to a request from the Oracle Names control program.
Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00315: server is listening on address string
Cause: An informational message written to the log file during server startup.
Action: None

NNO-00316: statistic counter reset disabled
Cause: An informational message written to the log file when the server disables statistic counter resetting in response to a request from the Oracle Names control program.
Action: None

NNO-00317: statistic counter reset interval changed to number seconds
Cause: An informational message written to the log file when the server changes its statistic counter reset interval in response to a request from the Oracle Names control program.
Action: None

NNO-00318: overriding next statistic counter reset, resetting in number seconds
Cause: An informational message written to the log file when the server resets its statistic counters in response to a request from the Oracle Names control program.
Action: None

NNO-00320: missing server name parameter
Cause: the server could not find a names.server_name parameter. The name is specified in the server's names.ora configuration file.
Action: Make sure that the names.server_name parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00321: statistic counter dump disabled
Cause: An informational message written to the log file when the server disables statistics dumping in response to a request from the Oracle Names control program.
Action: None

NNO-00322: statistic counter dump interval changed to number seconds
Cause: An informational message written to the log file when the server changes its statistic dump interval in response to a request from the Oracle Names control program.
Action: None

NNO-00323: overriding next statistic counter dump, dumping in number seconds
Cause: An informational message written to the log file when the server dumps its statistic counters in response to a request from the Oracle Names control program.
Action: None
NNO-00326: server statistic counter dump follows
Cause: An informational message written to the log file at the beginning of a statistic dump. The message is followed by a set of server statistics, and ends with another informational message indicating the dump has finished.
Action: None

NNO-00327: server statistic counter dump ends
Cause: An informational message written to the log file at the end of a statistic dump. The message is preceded by a set of server statistics.
Action: None

NNO-00328: server has reset statistic counters to zero
Cause: An informational message written to the log file when the server resets its statistic counters to zero in response to a request from the Oracle Names control program.
Action: None

NNO-00329: server will save the config file in number seconds
Cause: An informational message written to the log file when the server saves the config to config file in response to a request from the Oracle Names control program.
Action: None

NNO-00330: server saved the config file "string".
Cause: An informational message written to the log file when the server saves the config to config file in response to a request from the Oracle Names control program.
Action: None

NNO-00331: error saving new value string of string to the save config table.
Cause: An informational message written to the log file when a set operation is performed and the change cannot be saved in the save config ptable, but should be.
Action: None

NNO-00332: warning: region store serial number reduced from number to number
Cause: An informational message written to the log file when the server finds the region database has its serial number set lower than it was when the server previously loaded the region data. This is an unnatural condition- every update to the region should increment the serial number so a reduction of the serial number might reflect tampering or accidental manual alteration this and possibly other region tables.
Action: Administrators should find out how/why the serial number decreased.

NNO-00333: warning: ROS admin_region types obsolete; using SQL
Cause: the value set in names.admin_region is an obsolete ROS type
Action: No action is necessary; administrators should set the value to the correct type- probably SQL, possibly LDAP or LDIF

NNO-00334: region load failure: ROS admin_region type number unsupported
Cause: the value set in names.admin_region is an obsolete ROS type
**Action**: No action is necessary; administrators should set the value to the correct type—probably SQL, possibly LDAP or LDIF

**NNO-00600**: warning: forwarder count **number** exceeds maximum of **number**, first **number** will be loaded

**Cause**: the server's configuration contains too many default forwarders. The server loads a specified maximum number of forwarders, ignores the rest, and continues running.

**Action**: An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00601**: warning: no forwarders, DEFAULT-FORWARDERS-ONLY mode ignored

**Cause**: the server's configuration enables DEFAULT-FORWARDERS-ONLY mode but the configuration contains no default forwarders. The server ignores the request and continues running.

**Action**: An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00602**: warning: forwarder **number** has invalid address, forwarder ignored

**Cause**: One of the forwarders in the default forwarder list has an invalid address. The forwarder definition is ignored and the server continues running.

**Action**: An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00603**: enabling all request processing

**Cause**: An informational message written to the log file when the server enables request processing in response to a request from the Oracle Names control program.

**Action**: None

**NNO-00604**: disabling all request processing

**Cause**: An informational message written to the log file when the server disables request processing in response to a request from the Oracle Names control program.

**Action**: None

**NNO-00605**: enabling modification requests

**Cause**: An informational message written to the log file when the server enables modification-request processing in response to a request from the Oracle Names control program.

**Action**: None

**NNO-00606**: disabling modification requests

**Cause**: An informational message written to the log file when the server disables modification-request processing in response to a request from the Oracle Names control program.

**Action**: None

**NNO-00607**: server will forward to default forwarders only

**Cause**: An informational message written to the log file when the server's configuration enables DEFAULT-FORWARDERS-ONLY mode.

**Action**: None
NNO-00608: received corrupted message
  Cause: The server received a corrupted request. The request is ignored.
  Action: Corrupted requests are usually caused by transient network problems. If many corrupted messages are received, turn on tracing for further information. If the errors persist, contact Worldwide Customer Support.

NNO-00609: warning: forwarder number address length number exceeds maximum of number, ignored
  Cause: The server's configuration contains a forwarder address whose length exceeds an internal limit.
  Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00610: detected possible alias loop involving name "string"
  Cause: The server detected an alias loop involving the specified name. An alias loop occurs when an alias "X" points to another alias "Y", which points back to "X" rather than to an address or other name server data. The loop can contain more hops but the basic idea remains the same. Loops occur when administrators mis-enter network data, particularly when an alias in one administrative region points to data in another administrative region.
  Action: Use the Oracle Names control program to query for the specified name. The control program will describe the alias path, and you can use that information to find which names are incorrect and what administrative regions the incorrect data belongs to.

NNO-00611: disabling request forwarding
  Cause: An informational message written to the log file when the server disables request forwarding in response to a request from the Oracle Names control program.
  Action: None

NNO-00612: enabling request forwarding
  Cause: An informational message written to the log file when the server enables request forwarding in response to a request from the Oracle Names control program.
  Action: None

NNO-00613: disabling FORWARDING-DESIRED on system queries
  Cause: An informational message written to the log file when the server disables the FORWARDING-DESIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.
  Action: None

NNO-00614: enabling FORWARDING-DESIRED on system queries
  Cause: An informational message written to the log file when the server enables the FORWARDING-DESIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.
  Action: None

NNO-00615: disabling DEFAULT-FORWARDERS-ONLY mode
  Cause: An informational message written to the log file when the server disables DEFAULT-FORWARDERS-ONLY mode in response to a request from the Oracle Names control program.
NNO-00616: enabling DEFAULT-FORWARDERS-ONLY mode
Cause: An informational message written to the log file when the server enables DEFAULT-FORWARDERS-ONLY mode in response to a request from the Oracle Names control program.
Action: None

NNO-00617: enabling AUTHORITY-REQUIRED on system queries
Cause: An informational message written to the log file when the server enables the AUTHORITY-REQUIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.
Action: None

NNO-00618: disabling AUTHORITY-REQUIRED on system queries
Cause: An informational message written to the log file when the server disables the AUTHORITY-REQUIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.
Action: None

NNO-00622: warning: too many auto-refresh failures for name "string", query expired
Cause: If an auto-refresh query is issued and continuously returns an error for three days, the query is removed from the auto-refresh queue and a warning logged. The query can be restarted from the Oracle Names control program.
Action: this message will be preceded by numerous warnings that the query in question is failing. Use the Oracle Names control program to describe the failing query. Make sure the server being queried is running and that there is network connectivity between the querying server and the server being queried.

NNO-00623: setting auto-refresh retry interval to number seconds
Cause: An informational message written to the log file when the server changes its auto-refresh retry interval in response to a request from the Oracle Names control program.
Action: None

NNO-00624: setting auto-refresh expiration period to number seconds
Cause: An informational message written to the log file when the server changes its auto-refresh expiration period in response to a request from the Oracle Names control program.
Action: None

NNO-00625: overriding auto-refresh of name "string", type "string", refresh in number seconds
Cause: An informational message written to the log file when the server changes the time when an auto-refresh query is next issued. The message comes in response to a request from the Oracle Names control program.
Action: None

NNO-00626: cannot enable DEFAULT-FORWARDERS-ONLY mode, no default forwarders exist
Cause: the Oracle Names control program issued a request to enable DEFAULT-FORWARDERS-ONLY mode, and the request was ignored because the server has no default forwarders.

Action: None

NNO-00627: cancelling auto-refresh of name "string", type "string"
Cause: An informational message written to the log file when the server removes a query from the auto-refresh queue in response to a request from the Oracle Names control program.
Action: None

NNO-00628: setting maximum reforwards per query to number
Cause: An informational message written to the log file when the server changes its maximum-reforward count in response to a request from the Oracle Names control program.
Action: None

NNO-00629: warning: invalid forwarder list, no default forwarders loaded
Cause: The server's configuration contains an invalid forwarder description list.
Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00630: setting request-processing delay to number seconds
Cause: An informational message written to the log file when the server sets an artificial request-processing delay in response to a request from the Oracle Names control program.
Action: None

NNO-00631: warning: forwarder number has invalid name "string", forwarder ignored
Cause: The server's configuration contains a forwarder description with an invalid server name.
Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00632: warning: forwarder number has missing address, forwarder ignored
Cause: The server's configuration contains a forwarder description with a missing address.
Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00633: detected fatal delegation loop involving server "string"
Cause: the server detected a fatal delegation loop while forwarding a request. A loop occurs when the server's topology data indicates that it should forward a request to itself. The server immediately shuts down in response to this error.
Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00634: received authoritative name "string" when we are its authority
Cause: a server "X" received authoritative data from another server "Y" when server "X" is also authoritative for the data. Such situations should never arise.
because if server "X" is authoritative for the requested data, it should never forward the request to another server.

**Action:** An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

**NNO-00635: warning: ignoring duplicate forwarder "string"**

**Cause:** The server's default forwarder list contains a duplicate server. The duplicate is ignored and the server continues running.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00700: warning: cannot checkpoint the cache, trying again in number seconds**

**Cause:** The server was unable to perform its normal periodic cache checkpointing, typically because the cache checkpoint file could not be written. The cache checkpoint file name appears as an informational message during server startup.

**Action:** Check to see that the server has permission to write the cache checkpoint file, and that there is sufficient disk space for the file to be written.

**NNO-00701: warning: cannot construct checkpoint file name, checkpointing disabled**

**Cause:** The server could not construct a system-dependent file name.

**Action:** An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

**NNO-00702: cache checkpointing disabled**

**Cause:** An informational message written to the log file when the server disables cache checkpointing in response to a request from the Oracle Names control program.

**Action:** None

**NNO-00703: checkpoint interval changed to number seconds**

**Cause:** An informational message written to the log file when the server changes its cache checkpoint interval in response to a request from the Oracle Names control program.

**Action:** None

**NNO-00705: warning: cannot open checkpoint file "string", checkpointing disabled**

**Cause:** The server was unable to open the named checkpoint file for writing. This problem is typically due to the file system's protection settings. The error is not fatal; it simply means the server will not checkpoint its cache.

**Action:** Check to see that the server has permission to write the file named in the error message.

**NNO-00706: overriding next cache checkpoint, checking in number seconds**

**Cause:** An informational message written to the log file when the server checkpoints its cache in response to a request from the Oracle Names control program.

**Action:** None

**NNO-00707: server's cache will be flushed in number seconds**
Cause: An informational message written to the log file when the server flushes its cache in response to a request from the Oracle Names control program.
Action: None

NNO-00708: cache flush countdown aborted
Cause: An informational message written to the log file whenever the Oracle Names control program halts a cache flush request previously sent to the server
Action: None

NNO-00709: failed delete of cache checkpoint file "string", cache flush may not work
Cause: the server attempted to flush its cache, which also deletes the cache checkpoint file. The file deletion failed, although the rest of the cache flush succeeded. Succeeding errors describe the reason for the deletion failure.
Action: This error typically occurs when two cache-flush operations are issued in succession without an intervening cache checkpoint operation (which would recreate the file). The first deletes the cache file, the second attempts to do so, but fails since the file has already been deleted. In such cases, the message is harmless and can be ignored. If, however, the error occurs because the server lacks permission to delete the file, then you must change the file system permissions so the server is allowed to delete the file.

NNO-00710: server's cache will be dumped to the trace file in number seconds
Cause: An informational message written to the log file when the server dumps its cache to the trace file in response to a request from the Oracle Names control program.
Action: None

NNO-00711: cache dump countdown aborted
Cause: An informational message written to the log file whenever the Oracle Names control program halts a cache dump request previously sent to the server
Action: None

NNO-00712: warning: group string cache checkpoint failed
Cause: The server was unable to perform its normal periodic cache checkpointing, typically because the cache checkpoint file could not be written. The cache checkpoint file name appears as an informational message during server startup.
Action: Check to see that the server has permission to write the cache checkpoint file, and that there is sufficient disk space for the file to be written.

NNO-00800: Error: cannot read version from config database
Cause: The query for the region database version failed. The database may be shut down, or the tables may not exist in the schema specified in names.ora.
Action: Correct any access problems accordingly.

NNO-00801: Error: OCI_SUCCESS_WITH_INFO: string
Cause: Diagnostic information was returned from OCI during region database access.
Action: None

NNO-00802: Error: OCI_NEED_DATA
Cause: The server did not provide sufficient data to the OCI interface while accessing the region database.
Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00803: Error: OCI_INVALID_HANDLE
Cause: The server called OCI with an invalid handle while accessing the region database.
Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00804: Error: OCI_STILL_EXECUTE
Cause: An OCI operation between the server and the database is still in progress.
Action: None

NNO-00805: Error: OCI_CONTINUE
Cause: Not possible.
Action: None

NNO-00806: Error: OCI_ERROR: string
Cause: An OCI occurred accessing the region database. More specific details will be written to the log file.
Action: Find the appropriate entry in the log file and correct the cause of the failure if possible. Otherwise contact Worldwide Customer Support.

NNO-00807: End of Fetch: OCI_NO_DATA
Cause: All rows have been returned from the region table.
Action: None

NNO-00808: Error connecting to region database
Cause: Not possible.
Action: None

NNO-00809: Unknown OCI error: number
Cause: Not possible.
Action: None

NNO-00850: Error: LDAP query returns string
Cause: The LDAP API returned an error. More specific details will be written to the log file.
Action: Find the appropriate entry in the log file and correct the cause of the failure if possible. Otherwise contact Worldwide Customer Support.

NNO-00851: LDAP open/bind failed: error = number
Cause: The server failed to connect to the LDAP directory.
Action: Find the cause of the error and correct it and restart the server.

NNO-00852: failed to get LDAP entry: error = number
Cause: The server could not retrieve query entries from the LDAP API.
Action: Find the cause of the error and correct it and restart the server.

NNO-00853: failed to get LDAP attribute/value: error = number
Cause: The server failed to connect to the LDAP directory.
Action: Find the cause of the error and correct it and restart the server.
NNO-00854: error unbinding LDAP: error = number

Cause: the server failed to connect to the LDAP directory.

Action: Find the cause of the error and correct it and restart the server.
NNL-00001: request argument "string" is invalid
   Cause: The user entered an invalid request command argument.
   Action: Supply a valid argument.

NNL-00002: request argument "string" is not allowed with this operation
   Cause: The user entered a request command argument which is not valid with the
   particular request command.
   Action: Supply a valid argument.

NNL-00003: memory exhausted
   Cause: The program has run out of memory
   Action: Check the amount of available memory on your machine to ensure that
   there is enough memory to run this executable. If necessary, free up memory by
   running fewer programs, then try again.

NNL-00004: invalid command argument "string"
   Cause: The user entered an invalid command argument.
   Action: Supply a valid argument.

NNL-00005: no server has been set. Use the "SET SERVER" command first
   Cause: The user attempted to issue a command which requires that a default
   managed Oracle Names server be set first.
   Action: Use the SET SERVER command to set your default server, then reissue the
   command. Alternatively, if the command allows, re-issue it with a specific server
   name so the control program does not need to use the default.

NNL-00006: timeout, server is not responding
   Cause: The control program issued a request to an Oracle Names server and no
   response arrived in a timely fashion. The network connection between the control
   program and the server may be faulty, the server may be very heavily loaded, or
   there may be substantial network delays between the control program and the
   server. The latter is especially true for WAN links.
   Action: Reissue the command; if it continues to fail, check to see that the server
   being managed is running correctly and that the network connection between the
   server and the control program is working correctly.

NNL-00007: server responded with an error
   Cause: The control program issued a request to an Oracle Names server and the
   server responded with an error.
**Action:** For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNL-00008: request not understood by server**

**Cause:** The control program issued a request to an Oracle Names server and the server did not understand the request.

**Action:** If the server and the control program have different versions, they may be unable to communicate. Check your documentation for version compatibility constraints. If the server and control program are compatible, turn on tracing for further details, and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNL-00009: encryption of server password failed**

**Cause:** The control program attempted and failed to encrypt a server password, supplied either through the SET PASSWORD command or the namesctl.server_password configuration parameter.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNL-00010: error getting address for server "string"**

**Cause:** For the failure. The control program’s SQLNET.ORA file must exist in the correct system-specific location, and must be readable by the control program. The file must contain a names.preferred_servers entry with valid name server addresses. If the user has changed managed servers with the SET SERVER command, the new server must be running, and must be able to resolve the address or forward the request to another server which can resolve the address. Alternatively, a TNSNAMES.ORA file with valid name server names and addresses must exist in the correct system-specific location.

**Action:** For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NNL-00011: no server with name "string" exists**

**Cause:** The user issued a SET SERVER request and the current managed Oracle Names server was unable to translate that name into an address. Alternatively, the user issued a control program request to a specific server, and that server’s name could not be translated into an address. Both problems are almost always caused by mis-typing the server name.

**Action:** Re-issue the request with a valid server name.

**NNL-00012: invalid "string" value "string"**

**Cause:** The first argument is a data type, the second is a value. The user supplied an invalid data value of the specified type.

**Action:** Re-issue the failing operation with correct data.

**NNL-00013: not performed, permission denied for supplied password**

**Cause:** The user issued a request to an Oracle Names server, and the password supplied with the request was incorrect.

**Action:** Check to see that the password sent by the control program to the server is correct for that server. You can set a new password with the SET PASSWORD control program command.

**NNL-00014: unknown data type "string"**
Cause: The user issued a name server request which contained an unknown data type.

Action: It is possible that the server had no information on the type, but automatically fetched it in response to the failing request. Re-issue the failing request; if the server has in the meantime fetched the appropriate data type information, the error will go away. If the error persists, the data type is probably invalid.

NNL-00015: type "string" has "string" syntax, which has no textual representation

Cause: Not all data type syntaxes can be represented as text. This message indicates that the user issued a name server request for a type with an non-textual representation.

Action: Re-issue the operation with a data type that has a syntax with a textual representation.

NNL-00016: cannot start server, error getting program directory's name

Cause: The user issued a STARTUP request, but the control program was unable to start the server because it was unable to find the name of the directory where the server executable resides.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNL-00017: cannot start server, program "string" does not exist

Cause: The user issued a STARTUP request, but the control program was unable to start the server because it was unable to find the server executable.

Action: Make sure that a copy of the server executable exists in your system's oracle executable directory.

NNL-00018: warning: could not contact default name server

Cause: The control program was unable to contact its default name server during startup. There are a number of possible causes for this error. The control program’s SQLNET.ORA file must exist in the correct system-specific location, and must be readable by the control program. The file must contain a names.preferred_servers entry with valid name server addresses. The first server in the preferred-server list must be running, and there must be network connectivity between the control program and that server.

Action: Check to see that all of the above are true. If the control program is still unable to contact its default server, turn on tracing and restart the control program. If the error persists, contact Worldwide Customer Support.

NNL-00019: warning: server either changed or ignored your request

Cause: The user issued a request to an Oracle Names server and that request was altered in some way. Typically the user specified an invalid argument of some sort, and the server either ignored the request, or replaced the invalid argument with a reasonable default.

Action: Use the control program to check the current state of the value that you attempted to change. The server’s log file may also contain information about the exact cause of the problem. Re-issue the operation with correct arguments.

NNL-00020: warning: no TNSNAMES.ORA file and no preferred name servers in SQLNET.ORA

Cause: The control program was unable to find a TNSNAMES.ORA file and was unable to find a default name server in SQLNET.ORA. The control program will
operate in this state, but will be unable to resolve any names until a default server has been set, and that server must be set using its raw TNS address.

**Action:** The control program's SQLNET.ORA file must exist in the correct system-specific location, and must be readable by the control program. The file must contain a names.preferred_servers entry with valid name server addresses. The first server in the preferred-server list must be running, and there must be network connectivity between the control program and that server. Alternatively, a TNSNAMES.ORA file with valid name server information must exist in the correct system-specific location.

**NNL-00022: error changing trace level from string to string, level change ignored**

**Cause:** The user attempted to change the control program's local trace level, and the program encountered an error while changing the level. Usually the problem is that tracing was enabled for the first time (by changing the trace level from OFF to something else) and the trace file is not writable by the control program.

**Action:** Check to see that the trace file is writable. Your documentation will tell you the name of the trace file.

**NNL-00023: SET command is missing an argument**

**Cause:** The user attempted to issue a SET command with no argument.

**Action:** Supply a valid argument to the SET command.

**NNL-00024: warning: no preferred name servers in SQLNET.ORA**

**Cause:** The control program was unable to find any preferred name servers in SQLNET.ORA, and will therefore not connect to a default server.

**Action:** Make sure that the SQLNET.ORA file contains a valid names.preferred_servers entry.

**NNL-00035: File string or nested IFILEs not found.**

**Cause:** Error in loading from the tnsfile.

**Action:** None

**NNL-00036: No records loaded**

**Cause:** No loadable data.

**Action:** None

**NNL-00037: Error number while sequencing through parameter table.**

**Cause:** The NL Parameter system reported an error while retrieving the next name from the table.

**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNL-00038: Distinguished Name syntax error**

**Cause:** Distinguished Name incorrectly specified.

**Action:** Supply a valid DN.

**NNL-00039: no RRs**

**Cause:** Object has no relevant RRs to be mapped to LDAP objects.

**Action:** None

**NNL-00040: Distinguished Name exceeds buffer length: string**

**Cause:** Distinguished Name derived from Domain Name is too long.
**Action:** Either move the object to a domain whose name is shorter or manually update the LDAP object.

**NNL-00041: Object string not in domain string**  
**Cause:** Object has no relevant RRs to be mapped to LDAP objects.  
**Action:** None

**NNL-00042: LDAP bind failure: number, string**  
**Cause:** Call to ldap_bind failed with return set to given number.  
**Action:** Correct user/pwd parameters or definitions.

**NNL-00043: LDAP open failure**  
**Cause:** LDAP server could not be contacted.  
**Action:** Correct connect info or server unavailability.

**NNL-00044: Unsupported data type string not mapped**  
**Cause:** ONames data type could not be mapped to LDAP attributes  
**Action:** An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNL-00045: No host given for LDAP server**  
**Cause:** LDAP open will dump core without a host.  
**Action:** Provide appropriate host with ‘-h’ option.

**NNL-00046: Name string exceeds DN template depth**  
**Cause:** There are more domains in the name than are specified in the DN template.  
**Action:** Add fields to the template or migrate subdomains with separate dump operations.

**NNL-00047: LDAP modify returned error: 0xnumber, string**  
**Cause:** LDAP failed with the return code shown.  
**Action:** Refer to LDAP documentation for the meaning of the error.

**NNL-00048: Error opening file: string**  
**Cause:** Named file cannot be opened.  
**Action:** Provide for access to file.

**NNL-00049: Output in string cannot be renamed to string**  
**Cause:** The given file cannot be created.  
**Action:** Insure that the file specified can be created before running the command. Or use the temporary file itself.

**NNL-00201: Shutdown occurs in string**  
**Cause:** Control program general message.  
**Action:** None

**NNL-00202: No shutdown currently scheduled**  
**Cause:** Control program general message.  
**Action:** None

**NNL-00203: Scheduled shutdown to occur in string**
Cause: Control program general message.
Action: None

NNL-00204: Cancelled shutdown
Cause: Control program general message.
Action: None

Cause: Control program help text.
Action: None

NNL-00509: set|show cache_checkpoint_interval [<seconds>] [<server_list>]:
set|show the server's cache checkpoint interval
Cause: Control program help text.
Action: None

NNL-00510: Adds a data record to an existing name
Cause: Control program help text.
Action: None

NNL-00511: Shows or sets the server's system query authority requirements
Cause: Control program help text.
Action: None

NNL-00512: Shows or sets the server's auto-refresh expiration period
Cause: Control program help text.
Action: None

NNL-00513: Shows or sets the server's auto-refresh failure retry interval
Cause: Control program help text.
Action: None

NNL-00514: Creates a new name with a default TTL
Cause: Control program help text.
Action: None

NNL-00515: Deletes a name and its data
Cause: Control program help text.
Action: None

NNL-00516: Displays complete server status
Cause: Control program help text.
Action: None

NNL-00517: Insert-replaces a data item under an existing name
Cause: Control program help text.
**Action:** None

**NNL-00518:** Shows or sets the maximum number of times a server can reforward a request  
**Cause:** Control program help text.  
**Action:** None

**NNL-00519:** Shows, enables, or disables modification request processing  
**Cause:** Control program help text.  
**Action:** None

**NNL-00520:** Changes an existing name's TTL  
**Cause:** Control program help text.  
**Action:** None

**NNL-00521:** Shows or sets the server's system query forwarding requirements  
**Cause:** Control program help text.  
**Action:** None

**NNL-00522:** Removes a data item from a name by value or by type  
**Cause:** Control program help text.  
**Action:** None

**NNL-00523:** Renames an existing name  
**Cause:** Control program help text.  
**Action:** None

**NNL-00524:** Replaces a data item with another data item  
**Cause:** Control program help text.  
**Action:** None

**NNL-00525:** Shows or sets the server's default-forwarding status  
**Cause:** Control program help text.  
**Action:** None

**NNL-00526:** Starts a server using a non-standard executable and optional arguments  
**Cause:** Control program help text.  
**Action:** None

**NNL-00527:** Shows, sets, or cancels the time when the server next checkpoints its cache  
**Cause:** Control program help text.  
**Action:** None

**NNL-00528:** [set] password <password> : set the password for subsequent calls  
**Cause:** Control program help text.  
**Action:** None

**NNL-00529:** set|show default_domain [<domain_name>] : set|show the current default domain  
**Cause:** Control program help text.
Action:  None

**NNL-00530: quit | exit** : exit the names control program
- **Cause:** Control program help text.
- **Action:** None

**NNL-00531: flush_name** <name> : removes a name from caches along a route to an authoritative server
- **Cause:** Control program help text.
- **Action:** None

**NNL-00532: set | show forwarding_available** [<on | off>] [<server_list>] : enable, disable or show server request forwarding
- **Cause:** Control program help text.
- **Action:** None

**NNL-00533: ping** [<server_list>] : ping one or more Names servers
- **Cause:** Control program help text.
- **Action:** None

**NNL-00534: query** <name> [<type>] : query for a desired name and RR type
- **Cause:** Control program help text.
- **Action:** None

**NNL-00535: reload** [<server_list>] : reload server cache data if there are changes
- **Cause:** Control program help text.
- **Action:** None

**NNL-00536: set | show requests_enabled** [<on | off>] [<server_list>] : enable, disable or show server request processing
- **Cause:** Control program help text.
- **Action:** None

**NNL-00537: set | show server** [<server_name>] : set | show the currently managed server
- **Cause:** Control program help text.
- **Action:** None

**NNL-00538: stop | shutdown** [<server_list>] : stop one or more Names servers
- **Cause:** Control program help text.
- **Action:** None

**NNL-00539: start | startup** [<args>] : start the Names server with optional arguments
- **Cause:** Control program help text.
- **Action:** None

**NNL-00540: [show] status** [<server_list>] : display server status summary
- **Cause:** Control program help text.
- **Action:** None

**NNL-00541: set | show trace_level** [<level>] [<server_list>] : set | show the server's tracing level
- **Cause:** Control program help text.
- **Action:** None
Cause: Control program help text.
Action: None

NNL-00542: restart [<server_list>]: restart one or more Names servers
Cause: Control program help text.
Action: None

NNL-00543: [show] version [<server_list>]: show the name and version of one or more Names servers
Cause: Control program help text.
Action: None

NNL-00544: Displays operations statistics
Cause: Control program help text.
Action: None

NNL-00545: Displays query request statistics
Cause: Control program help text.
Action: None

NNL-00546: Displays delete request statistics
Cause: Control program help text.
Action: None

NNL-00547: Displays rename request statistics
Cause: Control program help text.
Action: None

NNL-00548: Displays update request statistics
Cause: Control program help text.
Action: None

NNL-00549: Displays stream usage statistics
Cause: Control program help text.
Action: None

NNL-00550: flush [<server_list>]: flush one or more servers' cache(s)
Cause: Control program help text.
Action: None

NNL-00551: Displays cache statistics
Cause: Control program help text.
Action: None

NNL-00553: Displays forwarding statistics
Cause: Control program help text.
Action: None

NNL-00555: Displays meta data statistics
Cause: Control program help text.
Action: None
NNL-00556: set | show reset_stats_interval [<seconds>] [<server_list>] : set | show server statistic counter reset interval
  Cause: Control program help text.
  Action: None

NNL-00557: Causes the controller to sleep for N seconds
  Cause: Control program help text.
  Action: None

NNL-00558: set | show namesctl_trace_level : set | show the controller's tracing level
  Cause: Control program help text.
  Action: None

NNL-00559: Shows, sets, or cancels the time for the next cache dump to the trace file
  Cause: Control program help text.
  Action: None

NNL-00560: Shows or sets the server's request-processing delay
  Cause: Control program help text.
  Action: None

NNL-00561: register <name> [-t<type>] [-d<address>] [-h<hostname>] [-l<listener_name>] : register an object with Oracle Names
  Cause: Control program help text.
  Action: None

NNL-00562: unregister <name> [-d<address>] [-l<listener_name>] : unregister an object with Oracle Names
  Cause: Control program help text.
  Action: None

NNL-00563: timed_query [<timestamp>] : query all objects in the Names server's cache
  Cause: Control program help text.
  Action: None

NNL-00565: set trace_file_name [<filename>] [<server_list>] : set | show the server's trace file name
  Cause: Control program help text.
  Action: None

NNL-00566: set | show log_file_name [<filename>] [<server_list>] : set | show the log file name on one or more servers
  Cause: Control program help text.
  Action: None

NNL-00567: reorder_ns [<server_address>] : Generate the enhanced discovery file
  Cause: Control program help text.
  Action: None

NNL-00568: delegate_domain <domain_name> <NS_name> <NS_Addr> : Delegate the given domain to the given nameserver
NNL-00569: domain_hint <domain_name> <NS_name> <NS_Addr> : Provide hint of a nameserver for a given domain
   Cause: Control program help text.
   Action: None

NNL-00570: save_config [<server_list>] : saves server configuration to parameter file
   Cause: Control program help text.
   Action: None

NNL-00571: set | show save_config_on_stop [<on | off>] 
   Cause: Control program help text.
   Action: None

NNL-00572: set | show save_config_interval [<seconds>] [<server_list>] : set time of next config save
   Cause: Control program help text.
   Action: None

NNL-00573: load_tnsnames [<file>, ... ] : load tnsnames into ONames
   Cause: Control program help text.
   Action: None

NNL-00574: dump_tnsnames [<file>] : dump ONames addresses into tnsnames file
   Cause: Control program help text.
   Action: None

NNL-00575: list_objects: list all objects in a domain or subtree 
   Cause: Control program help text.
   Action: None

NNL-00576: list_delegated: list all delegated domains in the region or subtree 
   Cause: Control program help text.
   Action: None

NNL-00577: list_domains: list authoritative domains in the region or subtree 
   Cause: Control program help text.
   Action: None

NNL-00578: dump_ldap: dump addresses in the domain or region to LDAP
   Cause: Control program help text.
   Action: None

NNL-00579: _scan: find objects/records matching the given types
   Cause: Control program help text.
   Action: None

NNL-00580: register_ns: <name server> <address> <domain>
   Cause: Control program help text.
Action: None

NNL-00581: unregister_ns: <name server> <domain>
Cause: Control program help text.
Action: None

NNL-00582: dump_alias: dump aliases in the domain or region to LDAP
Cause: Control program help text.
Action: None

NNL-00800: Query requests received: number
Cause: Control program statistic description
Action: None

NNL-01062: Cache checkpoint file name: string  
    Cause: Control program statistic description  
    Action: None

NNL-01063: Statistic counters next reset in: string  
    Cause: Control program statistic description  
    Action: None

NNL-01064: Statistic counter reset interval: string  
    Cause: Control program statistic description  
    Action: None

NNL-01065: Statistic counters next logged in: string  
    Cause: Control program statistic description  
    Action: None

NNL-01066: Statistic counter logging interval: string  
    Cause: Control program statistic description  
    Action: None
NNL-01067: Trace level: number
  Cause: Control program statistic description
  Action: None

NNL-01068: Trace file name: string
  Cause: Control program statistic description
  Action: None

NNL-01069: Log file name: string
  Cause: Control program statistic description
  Action: None

NNL-01070: System parameter file name: string
  Cause: Control program statistic description
  Action: None

NNL-01071: Command-line parameter file name: string
  Cause: Control program statistic description
  Action: None

NNL-01072: Administrative region name: string
  Cause: Control program statistic description
  Action: None

NNL-01073: Administrative region description: string
  Cause: Control program statistic description
  Action: None

NNL-01074: ApplTable Index: number
  Cause: Control program statistic description
  Action: None

NNL-01075: Contact string
  Cause: Control program statistic description
  Action: None

NNL-01076: Operational Status number
  Cause: Control program statistic description
  Action: None

NNL-01077: Save Config on Stop string
  Cause: Control program statistic description
  Action: None

NNL-01078: Access/Create File Error : string
  Cause: Failed to access/create named file or its backup File due to incorrect permissions
  Action: Provide correct access to file.
NPL-00100: cannot initialize ASN.1 context
  Cause: The ASN.1 program interface could not be initialized, probably because its error message file could not be found.
  Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

NPL-00101: uninitialized ASN.1 context
  Cause: The ASN.1 program interface received an uninitialized ASN.1 handle.
  Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00102: missing stream functions in ASN.1 context initialization
  Cause: An internal function improperly attempted to initialize an ASN.1 handle.
  Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00103: unusable ASN.1 context
  Cause: The ASN.1 program interface received an unusable ASN.1 handle.
  Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00300: maximum ASN.1 element nesting depth string exceeded on read
  Cause: An ASN.1 construct is too complex for the program interface to read.
  Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00301: maximum ASN.1 element nesting depth string exceeded on write
  Cause: An ASN.1 construct is too complex for the program interface to write.
  Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00302: ASN.1 type tag is greater than maximum of 16383
  Cause: An internal function attempted to create an illegal ASN.1 construct
**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00303: uninitialized ASN.1 class attribute**

**Cause**: An internal function attempted to create an illegal ASN.1 construct

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00304: uninitialized ASN.1 tag attribute**

**Cause**: An internal function attempted to create an illegal ASN.1 construct

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00305: unsupported ASN.1 "UNIV" type string**

**Cause**: An internal function attempted to create an illegal ASN.1 construct

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00307: ASN.1 sequence has already been ended on write**

**Cause**: An internal function attempted to end an ASN.1 construct prematurely.

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00308: requested ASN.1 class string does not match received class string**

**Cause**: An internal function requested an ASN.1 construct different from that received by the ASN.1 protocol engine.

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00309: requested ASN.1 type tag string does not match received type tag string**

**Cause**: An internal function requested an ASN.1 construct different from that received by the ASN.1 protocol engine.

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00310: ASN.1 sequence has already been ended on read**

**Cause**: An internal function attempted to finish reading an ASN.1 construct which has already been completely read.

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00311: cannot end constructed ASN.1 encoding, string encoding octets unread**

**Cause**: An internal function attempted to finish reading an ASN.1 construct prematurely.
Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00312: attempt to put ASN.1 "UNIV" type with illegal tag string
   Cause: An internal function attempted to create an illegal ASN.1 construct.
   Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00313: requested form string does not match actual form string
   Cause: An internal function received an ASN.1 construct different from that expected.
   Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00410: incoming ASN.1 value too large (string octets) to store locally
   Cause: The ASN.1 protocol engine was unable to translate an ASN.1 construct to its host representation because the construct was too big.
   Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00411: incoming ASN.1 NULL encoding has nonzero length of string
   Cause: The ASN.1 protocol engine received a corrupted ASN.1 construct.
   Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00412: incoming ASN.1 BOOLEAN encoding has incorrect length of string
   Cause: The ASN.1 protocol engine received a corrupted ASN.1 construct.
   Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00413: incoming ASN.1 encoding has length string, maximum allowed is string
   Cause: The ASN.1 protocol engine received an ASN.1 construct too large for it to process.
   Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00414: incoming ASN.1 type tag is greater than maximum of 16383
   Cause: The ASN.1 protocol engine received an illegal ASN.1 construct.
   Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00415: received unsupported ASN.1 INDEFINITE-LENGTH encoding
   Cause: The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.
**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00416: received illegal ASN.1 encoding length of string**

**Cause:** The ASN.1 protocol engine received a corrupted ASN.1 construct.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00417: received ASN.1 length octet count greater than maximum of string**

**Cause:** The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00418: received malformed ASN.1 object identifier**

**Cause:** The ASN.1 protocol engine received a corrupted ASN.1 construct.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00419: received ASN.1 object identifier with sub-identifier that is too large**

**Cause:** The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NPL-00420: received ASN.1 object identifier with more than 256 sub-identifiers**

**Cause:** The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.
NNF-00001: Not a TNS address

**Cause:** While asking to read an address the name service returned a record which was not an address.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-00002: Invalid value passed to function call

**Cause:** An invalid value was passed to an interface function.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-00003: Naming adapter *string* does not exist

**Cause:** The requested name service adapter was not found in the current adapter table.

**Action:** Check the spelling of the adapter requested. Verify that the adapter runs on this platform, and the adapter is compiled into the adapter table linked into the executable.

NNF-00004: Operation not supported in *string*

**Cause:** The operation requested is not supported under this adapter.

**Action:** Verify that the operation being performed is not under restriction, such as writing to read-only name service. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-00005: Functionality not implemented

**Cause:** The operation requested is not supported in this implementation.

**Action:** If this is retrieved from a production release, contact Worldwide Customer Support. Otherwise, check the release notes as to the restrictions in this release.

NNF-00110: no values exist

**Cause:** Test program help text.

**Action:** None

NNF-00540: Failed to insert name: *string*

**Cause:** Failed to insert name into the native service.
Action: Verify that the name is not already in the native namespace and the appropriate access permissions are set for the namespace.

NNF-01001: ds_initialize: workspace initialization failed
Cause: The DCE workspace as setup by ds_initialize() failed to initialize.
Action: Verify that conditions necessary for a successful ds_initialize() call are present on this platform (e.g. is there enough memory?). Check that there is not another workspace user in this program. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-01002: DCE could not open configuration file
Cause: A DCE call returned an error that it could not access its configuration file.
Action: Check that the DCE configuration file for this platform is present, and accessible. On Unix this file is dce_cf.db. Check if a simple call to dce_cf_get_cell_name() succeeds.

NNF-01003: DCE could not find cell name
Cause: A DCE call returned an error that it could not find the cell name in its configuration file.
Action: Check that this machine has been configured for a DCE cell. Check that the DCE configuration file is not corrupted. On Unix, this file is dce_cf.db. Check if a simple call to dce_cf_get_cell_name() succeeds.

NNF-01004: DCE returned unspecified error string
Cause: A DCE call returned an status that was not in this implementation’s list of possible status values for this DCE call.
Action: Verify that this platform’s DCE release is not beyond those supported by this Oracle application. If the error persists, contact Worldwide Customer Support.

NNF-01005: Internal XOM class violation
Cause: A DCE XOM call returned statuses inconsistent with the class definitions in the DCE documentation.
Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-01006: Attribute string not available
Cause: A insertion call attempted to use an attribute which did not have a translation to a DCE attribute.
Action: Use another attribute, or insert the translation into DCE.

NNF-01007: DCE long strings are not supported
Cause: A query returned a object which has a XOM OM_S_LONG_STRING. The current implementation does not support such objects.
Action: For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-01008: XDS attribute syntax string incorrect for Oracle Names syntax string
Cause: The syntax as specified in the XDS object is different than that which is expected for the given Oracle names syntax.
Action: For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.
NNF-02001: NIS client error string: string
   Cause: A call to an NIS (YP) function failed. This message contains the text of the
   NIS error code returned.
   Action: Should only be visible when returned as part of another error. If the error
   persists, contact Worldwide Customer Support.

NNF-02002: NIS value does not conform to adapter schema: string
   Cause: The values in the maps used by the NIS adapter must conform to a specific
   set of internal formatting rules. This value returned did not conform to those rules.
   Action: Should not be visible, unless you are attempting to create your own maps.
   If the error persists, contact Worldwide Customer Support.

NNF-02003: Unknown NIS error code: string
   Cause: An error code returned by a NIS (YP) function was not in the list expected
   by this program.
   Action: Verify that the error is generated by the YP functions on this platform.
   Notify Worldwide Customer Support of the error.

NNF-02004: NIS map string does not exist
   Cause: The requested attribute does not exist.
   Action: For an unused attribute, no action is required, as this is the expected error.
   Otherwise, add the attribute and reload the NIS (YP) maps.

NNF-02005: NIS key string does not exist in map string
   Cause: The requested name was not found.
   Action: For an unused name, no action is required, as this is the expected error.
   Otherwise, add the name to the map and reload the NIS (YP) maps.

NNF-03002: Unknown BIND error code: string
   Cause: The return code in the BIND (DNS) query response did not conform to
   those values listed in RFC 1035.
   Action: Verify that the error is generated by the BIND functions on this platform.
   Notify Worldwide Customer Support of the error.

NNF-03003: Format error parsing server response
   Cause: The query response packet returned from the BIND (DNS) API did not
   conform to the format listed in RFC 1035.
   Action: Verify that the error is generated by the BIND functions on this platform.
   Notify Worldwide Customer Support of the error.

NNF-03004: DNS Class mismatch (string)
   Cause: The query response packet returned a class different from the ones
   expected by the interface.
   Action: Verify that the error is generated by the BIND functions on this platform.
   Notify Worldwide Customer Support of the error.

NNF-04000: File successfully converted
   Cause: The requested conversion is performed.
   Action: Normal condition, no action necessary.

NNF-04001: Error converting input file
Cause: The input file contains lines that cannot be converted by the conversion program.
Action: Check that the syntax of the input file is correct.

NNF-04002: Outputfile already exists
Cause: An old output file already exists in the current directory
Action: Remove the existing file, and restart the conversion tool

NNF-04003: Entry in inputfile is too long
Cause: The makedbm program, limits entries in mapfiles to 1017 characters. Therefor, the conversion tool will not process TNS addresses which are longer than 1017 characters.
Action: Shorten the offending entry.

NNF-04004: Invalid string in inputfile
Cause: the input file contains invalid lines.
Action: Check that the syntax of the input file is correct.

NNF-04005: Cannot open inputfile
Cause: The specified input file could not be found.
Action: restart the conversion tool with the correct input file.

NNF-04006: Could not create outputfile
Cause: An output file could not be created in the current working directory
Action: Change the permissions of the current directory and restart the conversion tool.

NNF-04007: Error reading input file
Cause: A problem while reading the input file. This could be caused by an unexpected end of file in the input file.
Action: Check that the file is intact and that the syntax of the input file is correct.

NNF-04008: Error writing outputfile
Cause: An error occured while writing to the output file.
Action: Check available disk space. If the error persists, contact Worldwide Customer Support.

NNF-04009: Usage: tns2nis <filename>
Cause: The conversion tool was not invoked properly. The filename should either be tnsnames.ora or native.ora
Action: Restart the conversion tool with the proper parameter.
NMP-00001: value too big

**Cause:** The SNMP program interface received a value too large for it to process. This error is usually displayed underneath an error which describes in more detail the value which caused the problem.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NMP-00002: no such SNMP variable name

**Cause:** An SNMP request was not processed because the one or more of the variable names in the request does not exist. This error is not normally visible to the user except in a trace file, where it is usually part of a "soft" error condition which is normal.

**Action:** The error may indicate that a managed server does not support an operation requested by its control program, perhaps because of version incompatibility. For further details, turn on tracing and re-execute the failing operation. If the error persists, and does not occur as part of a "soft" error condition as noted in the trace file, contact Worldwide Customer Support.

NMP-00003: bad SNMP variable value

**Cause:** The SNMP program interface received a variable value which has an unsupported data type. This error may occur if a standard SNMP network monitor is sending requests to an Oracle service through an SNMP-to-TNS gateway, and that service cannot understand the requests.

**Action:** Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, and occurs when an Oracle control program sends requests to an Oracle service, contact Worldwide Customer Support.

NMP-00004: SNMP variable is read only

**Cause:** The user attempted to change a variable value at a remote server, and that variable is read-only. This error is usually displayed underneath an error which describes the problem in more detail.

**Action:** Read-only variables may never be modified.

NMP-00005: general SNMP error

**Cause:** an SNMP error occurred which did not fall under the heading of any other more specific error condition. This error may occur if a standard SNMP network monitor is sending requests to an Oracle service through an SNMP-to-TNS gateway, and that service cannot understand the requests.
**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, and occurs when an Oracle control program sends requests to an Oracle service, contact Worldwide Customer Support.

**NMP-00006: uninitialized SNMP context**

**Cause**: An internal function attempted to use an uninitialized SNMP handle.

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

**NMP-00007: I/O failure**

**Cause**: The SNMP program interface attempted to send or receive an SNMP request and was unable to do so because of a network failure of some sort. This error is usually displayed underneath an error which describes the problem in more detail. The problem typically occurs when a control program is attempting to communicate with a service and either that service has unexpectedly terminated or the network path between the control program and the service has been interrupted.

**Action**: None

**NMP-00008: SNMP message has incorrect version, version 0 is required**

**Cause**: The SNMP program interface received a protocol request with an illegal version number. This error may occur if a standard SNMP network monitor is sending malformed requests to an Oracle service through an SNMP-to-TNS gateway.

**Action**: Ensure that the management platform in question is sending SNMP requests with the correct version number. If the error persists, and occurs when an Oracle control program sends requests to an Oracle service, contact Worldwide Customer Support.

**NMP-00009: SNMP initialization failure**

**Cause**: The SNMP program interface could not be initialized, either because its error message file could not be found, or because there is a malformed snmp.communities parameter value in the parameter table.

**Action**: Check that SQL*Net has been installed properly and that all message files are in their proper locations. Turn on tracing and look for parameter table load errors.

**NMP-00010: memory exhausted**

**Cause**: The program interface has run out of memory.

**Action**: Add more memory or run fewer processes.

**NMP-00011: internal SNMP program interface error**

**Cause**: An internal error occurred inside the SNMP program interface. This error is usually displayed underneath an error which describes the problem in more detail.

**Action**: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.
NCR-00001: NCR: Could not allocate memory
  Cause: Insufficient swap space or system memory.
  Action: Increase swap space or system memory.

NCR-00002: NCR: Invalid usage
  Cause: Bad function parameter.
  Action: Check function call.

NCR-00003: NCR: Initialization failure
  Cause: Usually insufficient swap space or system memory.
  Action: Increase swap space or system memory.

NCR-01003: NCRS: Read error.
  Cause: Failed to read data from an input device.
  Action: Check the input device driver return code for further information.

NCR-01004: NCRS: Write error.
  Cause: Failed to write data to an output device.
  Action: Check the output device driver return code for further information.

NCR-01005: NCRS: Failed to flush the output buffer.
  Cause: Failed to write data in the output buffer to an output device.
  Action: Check the output device driver return code for further information.

NCR-01006: NCRS: Data buffer overflow.
  Cause: An attempt to read or write data outside of a given data buffer.
  Action: Check data buffer size.

NCR-01007: NCRS: Operation is not supported in a given mode.
  Cause: Attempt to perform an operation which is not supported for the current mode.
  Action: See documentation for a list of work modes and supported operations.

NCR-01008: NCRS: Failed to obtain transport parameters.
  Cause: Could not identify transport layer parameters.
  Action: Check the transport layer return code for further information.

NCR-01009: NCRS: Record handling error.
Cause: Encountered an invalid record or an attempt to read beyond last record.
Action: See documentation for description of record handling methods.

NCR-01010: NCRS: Invalid network address length.
Cause: Network address size is set to 0.
Action: See documentation for valid network address sizes.

NCR-01011: NCRS: Send message failure.
Cause: Failed to send a message over network.
Action: Check the network interface return code for further information.

NCR-01012: NCRS: Receive message failure.
Cause: Failed to receive a network message.
Action: Check the network interface return code for further information.

NCR-01013: NCRS: Unvalid connection type.
Cause: Connection type is other than stream or message.
Action: See documentation for description of connection types.

Cause: Can not do the encryption for the data.
Action: See the SNS documentation for more information.

NCR-01019: NCRS: Checksumming failure.
Cause: Can not add the checksumming for the data.
Action: See the SNS documentation for more information.

NCR-01020: NCRS: Operation would block.
Cause: An I/O operation returned with no data read/written because the transport connection is “non-blocking” and, to succeed, the operation would have needed to block.
Action: This is a soft error; retry the operation.

NCR-02003: NCRF: Invalid type passed to format interpreter.
Cause: The format interpreter was given a data type it did not recognize.
Action: Check the types returned to the interpreter from either the type callback routine or from the type context structure.

NCR-02004: NCRF: Invalid format interpreter type context
Cause: The format interpreter was given an invalid type context.
Action: This error usually happens due to an improperly described aggregate. For example, declaring NCRF_END_STRUCT_DATA_TYPE within a context, without a complementary NCRF_STRUCT_DATA_TYPE, is invalid.

NCR-02005: NCRF: Invalid session mode
Cause: The data format layer received a session mode other than GET, PUT or FREE.
Action: None

NCR-02006: NCRF: Invalid floating point representation received
Cause: The data format layer received a floating point representation it did not recognize.
Action: Check incoming format descriptor for errors.

**NCR-02007: NCRF: Invalid format descriptor received**
Cause: The data format layer received an improperly formed format descriptor. Subsequent data could not be formatted.
Action: Check for data integrity on receipt from remote host.

**NCR-02008: NCRF: Error within stream processing in format interpreter**
Cause: An error occurred while the interpreter was processing an NCRF_STREAM_DATA_TYPE.
Action: Check for data integrity, or for stream existence.

**NCR-02009: NCRF: Unable to open trace file**
Cause: Failure to open tracing file.
Action: Make sure that this is a legal file name and that the user has write access.

**NCR-02010: NCRF: Call context is not available**
Cause: Call context not passed to format context.
Action: Make sure that create call context has been called.

**NCR-02011: NCRF: Exceeded maximum number of rfids.**
Cause: Exceeded maximum number of rfids.
Action: Call Oracle Support.

**NCR-03002: NCRO: Maximum number of contexts has been reached**
Cause: An attempt to create either a call context or a service context has failed because all context slots are in use.
Action: Free-up context slots by destroying those contexts no longer required, or, reconfigure NCRO with more context slots.

**NCR-03003: NCRO: Unexpected message**
Cause: Message read from service connection is not of the expected type.
Action: Application error - debug and fix.

**NCR-03004: NCRO: Unknown message**
Cause: Message read from service connection is of unknown type.
Action: Internal error - contact customer support.

**NCR-03005: NCRO: Orphan message**
Cause: Message read from service connection is for a call context that no longer exists.
Action: Application error - debug and fix.

**NCR-03006: NCRO: Invalid operation**
Cause: Attempted operation over call context is invalid. For example, attempting to send IN args for a procedure which is defined to have none.
Action: Application error - debug and fix.

**NCR-03007: NCRO: Context is busy**
Cause: Attempted operation failed because service/call context is busy performing a previous operation.
Action: Application error - debug and fix.
NCR-03008: NCRO: Call rejected
   Cause: An attempt to execute a remote procedure has failed because the server has rejected the procedure id.
   Action: If wrong procedure id, send the correct one. If wrong server was contacted, then contact the right one.

NCR-03009: NCRO: Protocol version mismatch
   Cause: Client and server NCRO layers are at incompatible versions levels.
   Action: Upgrade to latest NCRO version.

NCR-03010: NCRO: Transfer callback error
   Cause: Application transfer callback function has returned a "FAILED" status.
   Action: Debug the transfer callback function.

NCR-03012: NCRO: Invalid session mode
   Cause: Attempted operation has failed because the session context is in an invalid state.
   Action: Internal error - contact customer support.

NCR-03013: NCRO: Operation not supportd
   Cause: Attempted operation is not supported on this service connection because it is incompatible with the NCRO version level of the remote application.
   Action: Link remote application with latest NCR library.

NCR-03014: NCRO: Bad transport address
   Cause: A service context cannot be created because the transport address descriptor (contained in the binding context) is invalid.
   Action: Application error - initialize the transport address descriptor correctly.

NCR-03015: NCRO: No transport address
   Cause: A service context cannot be created because no transport address was provided (in the binding context) and the transport protocol uses datagrams.
   Action: Application error - provide a transport address.

NCR-03016: NCRO: Message has bad address
   Cause: Message read from service connection has bad address information.
   Action: Internal error - contact customer support.

NCR-03017: NCRO: Transport type RSLV not supported
   Cause: Support for transport type RSLV has not been built.
   Action: Re-compile NCR library with NCR_USE_RSLV defined.

NCR-03018: NCRO: Failed to make RSLV connection
   Cause: Failure to make RSLV connection usually means that the name resolution failed or the resolved TNS address is bad.
   Action: Make sure that the name is in TNSNAMES.ORA and that it is set to the correct TNS address.

NCR-03019: NCRO: Unable to initialize thread support
   Cause: Attempt to initialize the Core thread package has failed.
   Action: Internal error - contact customer support.
NCR-03020: NCRO: Invalid call context
   Cause:  The call context is not an valid call context.
   Action:  Call context was destroyed, probably because the Break was received

NCR-03021: NCRO: Reset the in-band line
   Cause:  Our parnter is asking to reset the in-band line, after receiving a break
   Action:  The in-band line is required to be reset

NCR-03022: NCRO: Cannot send the break
   Cause:  There is an error occur when sending the break using the side-band channel
   Action:  Read the documentation regarding to side-band break support issues

NCR-03023: NCRO: Cannot receive the break
   Cause:  There is an error occur when receiving the break using the side-band channel
   Action:  Read the documentation regarding to side-band break support issues

NCR-03024: NCRO: Transport type LIST not supported
   Cause:  Support for transport type LIST has not been built.
   Action:  Re-compile NCR library with NCR_USE_LIST defined.

NCR-03025: NCRO: Failed to make LIST connection(s)
   Cause:  Failure to make LIST connection(s) usually means one of two things: (1) Address list syntax error, (2) Could not connect with supplied addresses
   Action:  Check address list syntax and make sure that there is a 'listener' process for each (or some) of the supplied addresses.

NCR-03026: NCRO: The result buffer has overflowed
   Cause:  The result buffer for holding the pickling result is too small.
   Action:  Please enlarge the result buffer and try again.

NCR-03027: NCRO: No remote service session set up yet.
   Cause:  Sender-makes-right needs the remote FID.
   Action:  Please set up the remote session before using the Send Make's Right option.

NCR-03028: NCRO: Partner refused request for sender-makes-right.
   Cause:  Sender-makes-right was requested by the current side, yet refused by the server.
   Action:  Check the server side to see why it refused SMR.

NCR-04002: NCRR: Invalid interface descriptor
   Cause:  An attempt to register an interface has failed because of an invalid interface descriptor.
   Action:  Check interface descriptor passed into the ncrrri_register_interface call.

NCR-04003: NCRR: Interface exists
   Cause:  An attempt to register an interface has failed because an interface already exists.
**Action**: Application error - register a new interface, destroy the old one, or indicate that the old one must be replaced.

**NCR-04004: NCRR: Invalid interface instance handle**

**Cause**: A service registration API call has failed because of an invalid instance handle.

**Action**: Application error - debug and fix.

**NCR-04005: NCRR: Invalid procedure handle**

**Cause**: A procedure/object registration has failed because of an invalid procedural handle.

**Action**: Application error - debug and fix.

**NCR-04006: NCRR: Invalid argument descriptor**

**Cause**: A procedure registration has failed because of an invalid argument descriptor.

**Action**: Application error - debug and fix.

**NCR-04007: NCRR: Invalid object handle**

**Cause**: A service registration API call failed because of an invalid object handle, for example, one that does not exist.

**Action**: Application error - debug and fix.

**NCR-04008: NCRR: Procedure exists**

**Cause**: An attempt to register a remote procedure has failed because the procedure already exists in this interface.

**Action**: Application error - register a new procedure, destroy the old one, or indicate that the old one must be replaced.

**NCR-04009: NCRR: Object exists**

**Cause**: An attempt to register an object has failed because the object already exists in this interface.

**Action**: Application error - register a new object, destroy the old one, or indicate that the old one must be replaced.

**NCR-04010: NCRR: Unable to contact Oracle Internet Directory Server**

**Cause**: Service export or import failed to contact Oracle Internet Directory Server.

**Action**: Ensure Oracle Internet Directory configuration is correct. Otherwise, turn on tracing and/or contact customer support.

**NCR-04011: NCRR: Oracle Internet Directory error**

**Cause**: Service export or import failed during interaction with Oracle Internet Directory Server.

**Action**: Either wrong parameters with respect to the Remote Operations Service Registration Schema were passed in and/or the Oracle Internet Directory server refused to perform the requested operation. Refer the Remote Operations Service Registration Schema and/or turn on Oracle Internet Directory tracing and/or contact customer support.

**NCR-04012: NCRR: Invalid address descriptor**

**Cause**: An ncrrei_export_interface call failed because of an invalid address descriptor.
Action: Application error - debug and fix.

NCR-04013: NCRR: Insufficient authorization
  Cause: Attempted Oracle Internet Directory Server operation has failed because of insufficient authorization.
  Action: Contact customer support.

NCR-04014: NCRR: Invalid instance name
  Cause: Service export or import failed because of an invalid instance name
  Action: Application error - debug and fix.

NCR-04015: NCRR: Invalid interface name
  Cause: Service export or import failed because of an invalid interface name
  Action: Application error - debug and fix.

NCR-04016: NCRR: Last interface instance handle
  Cause: The instance handle passed in is the last instance handle in the list.
  Action: Not an error - means reaching the end of the list.

NCR-04017: NCRR: Unable to find the interface instance handle
  Cause: The instance handle corresponding to the instance name was not found.
  Action: Application error - debug and fix.

NCR-04018: NCRR: Unable to create the TNS address list
  Cause: Unable to create the TNS address list from the interface instance list.
  Action: Application error - debug and fix.

NCR-04019: NCRR: Interface or instance name already exists
  Cause: Service export failed because the name already exists with the Oracle Internet Directory server
  Action: Application error - debug and fix.

NCR-04020: NCRR: Interface or instance name does not exist
  Cause: Service expunge/query failed because the name does not exist with the Oracle Internet Directory server
  Action: Use Oracle Internet Directory tools on the relevant Oracle Internet Directory instance to verify the same. Otherwise turn on tracing and/or contact customer support

NCR-04021: NCRR: Pickler errors
  Cause: Service export/query failed because of pickler errors
  Action: Contact customer support

NCR-04022: NCRR: Invalid procedure descriptor
  Cause: A procedure registration has failed because of an invalid procedural descriptor.
  Action: Application error - debug and fix.

NCR-04023: NCRR: Invalid object descriptor
  Cause: An object registration has failed because of an invalid object descriptor.
  Action: Application error - debug and fix.
NCR-04024: NCRR: Maximum number of procedures reached
   Cause: A procedure registration has failed because the procedures array is filled up.
   Action: Re-register the interface increasing the maximum # of procedures.

NCR-04025: NCRR: Operation timed out
   Cause: An operation for the Oracle Internet Directory server failed because it exceeded the timeout period.
   Action: Retry the operation and/or turn on Oracle Internet Directory tracing.

NCR-04026: NCRR: Operation not supported
   Cause: An operation for the Oracle Internet Directory server failed because it met with a server referral to another instance.
   Action: Unify the Remote Ops registration entries into the Oracle Internet Directory instance and/or turn on Oracle Internet Directory tracing.

NCR-04027: NCRR: Operation failed
   Cause: An operation for the Oracle Internet Directory server failed because the Service Registration interfaces met with invalid parameters.
   Action: Contact customer support.

NCR-04028: NCRR: Operation failed
   Cause: An operation for the Oracle Internet Directory server failed because the data involved exceeds the maximum allowed size.
   Action: Check the entries in the Oracle Internet Directory instance with tools available from Oracle Internet Directory and/or turn on Oracle Internet Directory tracing.
O2F-00301: Error attempting to read from the INTYPE file
  Cause: An operating system error occurred while attempting to read from the
         INTYPE file.
  Action: Try opening the INTYPE file with an editor to make sure you are able to
         access the file.

O2F-00302: Unable to allocate memory
  Cause: OTT was unable to allocate memory.
  Action: Contact ORACLE customer support.

O2F-00303: No INTYPE file was specified
  Cause: The required option INTYPE was not specified.
  Action: Set the INTYPE option to the name of the file containing names of types
         for OTT to translate. The INTYPE option may be specified on the command line or
         in a CONFIG file.

O2F-00304: Invalid filename for the INTYPE file
  Cause: The filename specified for the INTYPE file is not syntactically correct.
  Action: Make sure you spelled the filename of the INTYPE file correctly.

O2F-00305: Error opening the INTYPE file for reading
  Cause: An operating system error occurred while attempting to open the INTYPE
         file.
  Action: Make sure you spelled the filename of the INTYPE file correctly. Try
         opening the INTYPE file with an editor to make sure you have access to the file.

O2F-00306: Unable to close the INTYPE file
  Cause: An operating system error occurred while attempting to close the INTYPE
         file.
  Action: Try opening the INTYPE file with an editor to make sure you are able to
         access the file.

O2F-00307: Unable to read the INTYPE file
  Cause: The first token of the INTYPE file was not read. Either an operating system
         error occurred while attempting to read from the INTYPE file, or all lines of the
         INTYPE file are blank lines or comment lines.
  Action: Try opening the INTYPE file with an editor to make sure you are able to
         access the file. Make sure the INTYPE file contains one or more type specifications.
O2F-00308: No type specifications were seen in the INTYPE file  
    **Cause:** Either there are no type specifications in the INTYPE file, or the first type  
    specification could not be read due to a previously reported error.  
    **Action:** Fix any previously reported errors. Make sure there are one or more type  
    specifications in the INTYPE file.

O2F-00309: Name of user-defined type is illegal or missing  
    **Cause:** The name of a user-defined type is expected following the keyword TYPE  
    at the beginning of a type specification. No legal type name was seen.  
    **Action:** Make sure that the type specification is syntactically correct, and that the  
    type name is spelled correctly.

O2F-00310: Illegal or missing identifier name  
    **Cause:** A legal C or C++ identifier was expected following AS, but was not seen.  
    **Action:** Use a legal C or C++ identifier, consisting of letters, digits, and  
    underscores not beginning with a digit.

O2F-00311: Illegal or missing file name  
    **Cause:** A legal file name was expected, but was not seen.  
    **Action:** Make sure your TYPE file syntax is correct. Use a correct file name.

O2F-00312: Illegal or missing type version string  
    **Cause:** A type version name was expected, but was not seen.  
    **Action:** Make sure your TYPE file syntax is correct. Use a correct version name.

O2F-00313: Illegal or missing attribute name  
    **Cause:** An attribute name was expected in the INTYPE file, but was not seen.  
    **Action:** Make sure your TYPE file syntax is correct. Use a correct attribute name.

O2F-00314: AS expected but not seen in the INTYPE file  
    **Cause:** Incorrect syntax in the INTYPE file.  
    **Action:** Make sure your TYPE file syntax is correct.

O2F-00315: An attribute of a type is listed twice in a type specification  
    **Cause:** An attribute of a user-defined type is listed twice in a type specification in  
    the INTYPE file. The second occurrence is ignored.  
    **Action:** Remove one of the two occurrences of the attribute.

O2F-00316: An unexpected token was seen at the end of a type specification  
    **Cause:** There is a syntax error in the INTYPE file.  
    **Action:** Check your documentation to make sure the type specifications

O2F-00317: Error opening the ERRTYPE file for writing  
    **Cause:** An operating system error occurred while attempting to open the  
    ERRTYPE file for writing.  
    **Action:** Make sure you spelled the ERRTYPE filename correctly. Try creating or  
    modifying the ERRTYPE file to make sure you have write access to the file.

O2F-00318: Error writing to the OUTTYPE file  
    **Cause:** An operating system error occurred when attempting to write to the  
    OUTTYPE file.
**Action:** Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

**O2F-00319: No OUTTYPE file specified**

**Cause:** The required option OUTTYPE was not specified.

**Action:** Set the OUTTYPE option to the name of the file to which the TYPE file produced by OTT should be written. The OUTTYPE option may be specified on the command line or in a CONFIG file.

**O2F-00320: Invalid filename for the OUTTYPE file**

**Cause:** The filename specified for the OUTTYPE file is not syntactically correct.

**Action:** Make sure you spelled the filename of the OUTTYPE file correctly.

**O2F-00321: Error opening the OUTTYPE file for writing**

**Cause:** An operating system error occurred while attempting to open the OUTTYPE file.

**Action:** Make sure you spelled the filename of the OUTTYPE file correctly. Make sure you have operating system permission to open the the file.

**O2F-00322: Unable to close the OUTTYPE file**

**Cause:** An operating system error occurred while attempting to close the OUTTYPE file.

**Action:** Try opening the OUTTYPE file with an editor to make sure you are able to access the file.

**O2F-00323: Internal error in OTT facility O2F**

**Cause:** An internal OTT error occurred in the O2F component of OTT.

**Action:** Contact ORACLE customer support.

**O2F-00324: Unable to convert from the database character set to the compiler character set**

**Cause:** The name of a type, attribute, or method cannot be converted from the client character set in effect when OTT was invoked to the compiler character set (typically ASCII or EBCDIC).

**Action:** A name is translated first from the database character set to the client character set, and then from the client character set to the compiler character set. The client character set is specified in a platform-dependent manner (On UNIX platforms, the client character set is specified by setting the NLS_LANG environment variable). Use a client character set that can be translated to the compiler character set. The compiler character set itself is one such character set. Specify synonyms in the INTYPE file for any names of database objects that cannot be successfully translated to the client character set.

**O2F-00325: None of the characters in a name were legal identifier characters**

**Cause:** None of the characters in the name of a database entity could be translated to a character that may begin a C or C++ identifier, such as a letter or an underscore.

**Action:** Specify an explicit translation for the name in the INTYPE file.

**O2F-00326: Some characters in this name were not legal identifier characters**

**Cause:** One or more characters in the name of a database entity could not be translated to a character that may appear in a C or C++ identifier, such as a letter,
an underscore, or a digit. The characters that could not be translated were replaced with underscores.

**Action:** Make sure that the name is spelled correctly, and that it is terminated by a blank, the end of a line, or an equals sign ("="). You may use the translated name with added underscores, or you may specify an explicit translation for the name in the INTYPE file.

O2F-00327: CASE option has an illegal value

**Cause:** The value given for the CASE option in the INTYPE file is not legal.

**Action:** Change the value given for the CASE option to one of the following legal values: SAME, LOWER, UPPER, or OPPOSITE.

O2F-00328: Illegal INITFUNC name

**Cause:** The function name given for the INITFUNC option in the INTYPE file is not a legal C or C++ identifier.

**Action:** Specify the name of the INITFUNC function as a legal C or C++ identifier. This name can be given in the INTYPE file, given on the command line, or derived from the INITFILE name.

O2F-00329: Type or option specification expected

**Cause:** A type or option specification was expected in the INTYPE file, but was not seen.

**Action:** Check the INTYPE file for syntax errors. Supply a type or option specification. A type specification begins with the word TYPE. An option specification begins with the word CASE, INITFILE, or INITFUNC.

O2F-00330: Name exceeds 265 bytes in length

**Cause:** A name seen in the INTYPE file exceeds 265 bytes in length.

**Action:** Choose a shorter name.

O2F-00331: A syntactically illegal name was seen in the INTYPE file

**Cause:** A syntax error occurred in a name used in the INTYPE file.

**Action:** If the name is quoted, make sure that the quotes are at the beginning and at the end of the name. If a period (which separates a schema name from a type name) appears, make sure that the schema name and the type name are both present.

O2F-00332: A database link may not appear in the name of a user-defined type

**Cause:** A database link was seen in the name of a user-defined type. This feature is not yet supported.

**Action:** Declare the user-defined type in the database to which OTT connects.

O2F-00333: An unexpected token appeared where a keyword was expected in the INTYPE file

**Cause:** A keyword such as TYPE was expected in the INTYPE file, but an incorrect or misspelled keyword was seen.

**Action:** Verify that your TYPE specification obeys the syntax described in your documentation. Verify that your keyword is spelled correctly.

O2F-00334: A user-defined type is listed more than once in the INTYPE file

**Cause:** The same name of a user-defined type appears in more than one type specification. The duplicate specifications of the type name will be ignored.
Action: Put all of the information about the type, including all type name and attribute name translations, in a single TYPE specification, and eliminate the duplicate TYPE specifications.

O2F-00335: Internal error in O2F component of OTT
Cause: A request was made that all types in the database schema are to database.
Action: List the types to be processed in an INTYPE file. Contact ORACLE customer support.

O2F-00336: Error reported by subsystem:
Cause: A request was made to generate declarations for all the types in a database schema. An error occurred in a subsystem when accessing the database.
Action: Examine the error message reported by the subsystem to determine its cause. List the types to be processed in an INTYPE file.

O2F-00337: Schema not found, or no types found in schema
Cause: A request was made to generate declarations for all the types in a database schema. Either the schema was not found, no user-declared types were found in the schema, or unable to connect to Oracle.
Action: Ensure that a login/password string was specified for OTT and that the Oracle database can be accessed with it. Ensure that the USER_TYPES table contains at least one row.

O2F-00338: Illegal or missing package name
Cause: A legal Java package name was expected following IN or PACKAGE or IN PACKAGE, but was not seen.
Action: Use a legal Java package name.

O2F-00339: CODE option has an illegal value
Cause: The value given for the CODE option in the INTYPE file is not legal.
Action: Change the value given for the CODE option to one of the following legal values: C, ANSI_C, KR_C, JAVA, NATIVE_JAVA, ORACLE_JAVA.

O2F-00340: Name was null
Cause: A name had a length of 0 characters.
Action: This error should never be reported to the user. Contact ORACLE customer support.

O2F-00341: An error occurred for which no message is available
Cause: The cause of this error was not reported.
Action: Contact ORACLE customer support.
O2I-00101: Invalid value for the USERID parameter

cause: The value supplied for the USERID parameter is not a legal 
$username$/<password>@<databasename> string.

Action: Set the USERID option to the correct $username$/<password> or 
$username$/<password>@<database name> combination to use when 
connecting to the database. If you have an OPS$ account, you may instead omit 
the USERID option, in which case OTT will attempt to connect to the database 
using the userid OPS$<username>. The USERID option may be specified on the 
command line or in a CONFIG file.

O2I-00102: Unable to connect to Oracle

cause: OTT could not connect to Oracle with the username, password, and, if 
applicable, database link that was supplied. Either the USERID option value was 
incorrect, or, if the USERID was not supplied, the userid OPS$<username> was 
not accepted.

Action: Check that the username and password are current and correct. Run 
another program that connects to Oracle to verify that you can connect using that 
username and password.

O2I-00103: Two file names refer to the same HFILE file in the INTYPE file

cause: Two different file names have been used in the INTYPE file to refer to the 
same HFILE file, or different file names have been used to refer to the same HFILE 
file on the command line and in the INTYPE file.

Action: Consistently refer to each HFILE file using the same file name.

O2I-00110: Internal error in OTT component O2I

cause: An internal OTT error occurred in the O2I component of OTT.

Action: Contact ORACLE customer support.

O2I-00111: Unable to allocate memory

cause: OTT was unable to allocate memory.

Action: Contact ORACLE customer support.

O2I-00112: Unable to write to the HFILE file

cause: An operating system error occurred when attempting to write to the 
HFILE file.

Action: Make sure you have operating system permission to write to the file. 
Also, make sure disk space is available.

O2I-00113: No HFILE specified
Cause: The HFILE file to which C declarations generated by OTT are written was not specified.

Action: Specify the global HFILE option on the command line or in a CONFIG file. You may choose a different HFILE for a particular type by specifying a different HFILE in the INTYPE file entry describing the type. If every INTYPE file entry specifies an HFILE, and if none of the types in the HFILE require declarations of types not mentioned there, the global HFILE option may be omitted. An INTYPE file generated by a previous invocation of OTT satisfies these conditions.

O2I-00114: Invalid HFILE file name
Cause: An HFILE file name was specified that is not syntactically correct.
Action: Make sure the HFILE filename is spelled correctly.

O2I-00115: Error opening the HFILE file
Cause: An operating system error occurred while attempting to open the HFILE file for writing.
Action: Make sure the HFILE filename is spelled correctly. Try creating or modifying the HFILE to make sure you have write access to the file.

O2I-00116: Unable to close the HFILE file
Cause: An operating system error occurred while attempting to close the HFILE file.
Action: Try creating or modifying the HFILE file to make sure you are able to access the file.

O2I-00117: Internal error: No message file for component O2U
Cause: The message file for the internal OTT component O2U was not found. OTT may not be correctly installed.
Action: Contact ORACLE customer support.

O2I-00118: This user-defined type was not found in the database
Cause: A user-defined type specified in the INTYPE file was not found in the database.
Action: Make sure the name of the type is spelled correctly. Make sure the type is actually declared in the database.

O2I-00119: Warning reported by subsystem:
Cause: A subsystem invoked by OTT reported a warning. This warning immediately follows the "Warning reported by subsystem" message.
Action: Examine the warning reported by the subsystem to determine its cause.

O2I-00120: Error reported by subsystem:
Cause: A subsystem invoked by OTT reported an error. This error immediately follows the "Error reported by subsystem" message.
Action: Examine the error message reported by the subsystem to determine its cause.

O2I-00121: No value was specified for the CODE option
Cause: The required CODE option was not specified on the command line or in a configuration file.
**Action:** Specify the CODE option on the command line or in a configuration file. Currently, the following values of the CODE option are supported: CODE=ANSI_C, CODE=KR_C, CODE=C

**O2I-00122: Invalid filename for the INITFILE file**

**Cause:** The filename specified for the INITFILE file is not syntactically correct.

**Action:** Make sure the filename of the INITFILE file is spelled correctly.

**O2I-00123: Unable to close the INITFILE file**

**Cause:** An operating system error occurred while attempting to close the INITFILE file.

**Action:** Try opening the INITFILE file with an editor to make sure the file can be accessed.

**O2I-00124: Error opening the INITFILE file for writing**

**Cause:** An operating system error occurred while attempting to open the INITFILE file for writing.

**Action:** Make sure the INITFILE filename is spelled correctly. Try creating or modifying the INITFILE file to make sure you have write access to the file.

**O2I-00125: Error writing to the INITFILE file**

**Cause:** An operating system error occurred when attempting to write to the INITFILE file.

**Action:** Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

**O2I-00126: You must specify an INTYPE file with SCHEMA_NAMES=FROM_INTYPE**

**Cause:** The option SCHEMA_NAMES=FROM_INTYPE requests that schema names be written to the OUTTYPE file as given in the INTYPE file. However, an INTYPE file was not specified.

**Action:** Either supply the name of an INTYPE file, or specify the SCHEMA_NAMES option ALWAYS or IF_NEEDED.

**O2I-00127: Illegal INITFUNC name**

**Cause:** The name of the INITFUNC function is not a legal C or C++ identifier.

**Action:** Specify the name of the INITFUNC function as a legal C or C++ identifier. This name may be given in the INTYPE file, given on the command line, or derived from the INITFILE name.

**O2I-00128: Unable to write to the Java file**

**Cause:** An operating system error occurred when attempting to write to a Java source file.

**Action:** Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

**O2I-00129: No Java file specified**

**Cause:** The file to which Java declarations generated by OTT are written was not specified.

**Action:** This message should never be seen, because Java files are named after the classes declared within them. Contact ORACLE customer support.

**O2I-00130: Invalid Java file name**
Cause: A Java file name was specified that is not syntactically correct.
Action: Make sure the Java filename is spelled correctly.

O2I-00131: Error opening a Java file
Cause: An operating system error occurred while attempting to open a Java file for writing.
Action: Make sure the filename is spelled correctly. Try creating or modifying the file to make sure you have write access to the file.

O2I-00132: Unable to close a Java file
Cause: An operating system error occurred while attempting to close a Java file.
Action: Try creating or modifying the Java file to make sure you are able to access the file.

O2I-00133: An error occurred for which no message is available
Cause: The cause of this error was not reported.
Action: Contact ORACLE customer support.
O2U-00200: Internal error in OTT facility O2U

**Cause:** An internal OTT error occurred in the O2U facility of OTT.

**Action:** Contact ORACLE customer support.

O2U-00201: Illegal arguments to function o2upt()

**Cause:** Illegal arguments were passed to the function o2upt(). This is an internal error that should not be encountered by an end user.

**Action:** Contact ORACLE customer support.

O2U-00202: Invalid data passed to function

**Cause:** Arguments with incorrect values were passed to the function o2upt(). This is an internal error that should not be encountered by the end user.

**Action:** Contact ORACLE customer support.

O2U-00203: Type to be declared must be an object type or a named collection type

**Cause:** You have asked OTT to generate code for a type it does not support. When generating Java code, OTT will only generate code for object types. When generating C declarations, OTT will only generate declarations for object types and named collection types.

**Action:** You are probably asking OTT to declare a built-in type, or, if you are generating Java code, a named collection type. Do not ask OTT to generate a declaration for this type.

O2U-00204: Unable to convert from the database character set to the compiler character set

**Cause:** The name of a type, attribute, or method cannot be converted from the client character set in effect when OTT was invoked to the compiler character set (typically ASCII or EBCDIC).

**Action:** A name is translated first from the database character set to the client character set, and then from the client character set to the compiler character set. The client character set is specified in a platform-dependent manner (On UNIX platforms, the client character set is specified by setting the NLS LANG environment variable.) Use a client character set that includes the character set of the INTYPE file and can be translated to the compiler character set. The database character set is one such character set. Specify synonyms in the INTYPE file for any names of database objects that cannot be successfully translated to the client character set.

O2U-00205: None of the characters in a type name were legal identifier characters
**Cause:** None of the characters in the name of a user-defined type could be translated to a character that can begin a C or C++ identifier, such as a letter or an underscore.

**Action:** Specify an explicit translation for the type name in the INTYPE file.

**O2U-00206: Some characters in a type name were not legal identifier characters**

**Cause:** One or more characters in the name of a user-defined type could not be translated to a character that can appear in a C or C++ identifier, such as a letter, an underscore, or a digit. The characters that could not be translated were replaced with underscores.

**Action:** Specify an explicit translation for the type name in the INTYPE file, or just use the translated type name with added underscores.

**O2U-00207: None of the characters in an attribute name were legal identifier characters**

**Cause:** None of the characters in the name of an attribute of a type could be translated to a character that can begin a C or C++ identifier, such as a letter or an underscore. To find the affected attribute, look in the declaration generated for this type for data member names that are obviously incorrect.

**Action:** Specify an explicit translation for the attribute name in the INTYPE file.

**O2U-00208: One or more characters in an attribute name were not legal identifier characters**

**Cause:** If an attribute name contains one or more characters that can not be translated to a legal C or C++ identifier character, the characters that can not be translated are replaced with underscores. To find the affected attribute or attributes, look in the declaration generated for this type for data member names that have extra underscores not present in the original attribute names.

**Action:** Specify explicit translations for the affected attribute names in the INTYPE file, or just use the translated attribute names with added underscores.

**O2U-00209: Attribute or function name to be translated was not found**

**Cause:** This name, for which a translation was requested, is not the name of an attribute or a function of the current type.

**Action:** Make sure that the name is spelled correctly, and is the name of an attribute or function defined in the current type.

**O2U-00210: Unable to allocate memory**

**Cause:** OTT was unable to allocate memory.

**Action:** Contact ORACLE customer support.

**O2U-00211: A type without attributes was translated**

**Cause:** OTT translated a type without attributes. The corresponding C-type will be a struct without any components, which is not legal C. The empty type in the database may be the result of an error during type creation. Additionally, incomplete types may be used temporarily in the creation of types that reference one another.

**Action:** Re-create a full version of the type in the database and then re-run OTT.

**O2U-00212: An error occurred for which no message is available**

**Cause:** The cause of this error was not reported.

**Action:** Contact ORACLE customer support.
PCB-00001: *string*
   **Cause:** This is a generic error message from the command-line processor.
   **Action:** Correct the indicated error.

PCB-00002: Command line processor severe error
   **Cause:** The command line processor encountered a severe error.
   **Action:** After making sure that all the command-line options are specified correctly, call customer support with a full account of all the options and configuration files used.

PCB-00003: Value of DBMS option invalid with given value of MODE option
   **Cause:** When MODE={ANSII14 | ANSII13}, DBMS=V7 or V8 was specified, or when MODE=ANSI, DBMS=v6 was specified. These option settings are incompatible. Note that the DBMS option was not available before release 1.5 of the Oracle Precompilers.
   **Action:** With DBMS=V7 or V8, instead of MODE={ANSII14 | ANSII13}, specify MODE={ANSI | ORACLE}. With DBMS=V6, instead of MODE=ANSI, specify MODE={ANSII14 | ANSII13 | ORACLE}, but MODE=ORACLE is recommended.

PCB-00004: UNSAFE_NULL=TRUE must be used with DBMS=V7 or V8 and MODE=ORACLE
   **Cause:** The option UNSAFE_NULL=YES has been used with DBMS=V6 or DBMS=NATIVE (the default) or has been used with MODE=ANSI/ANSII14/ANSII13.
   **Action:** Use DBMS=V7 or V8 and MODE=ORACLE (the default) when using UNSAFE_NULL=YES or do not use UNSAFE_NULL=YES.

PCB-00005: Command line option MODE=ANSI required with option NLS_LOCAL=YES
   **Cause:** The precompiler option NLS_LOCAL=YES was used without also specifying MODE=ANSI. The precompiler option MODE=ANSI must be specified if NLS_LOCAL=YES.
   **Action:** Set the precompiler option MODE=ANSI in addition to NLS_LOCAL=YES or do not set NLS_LOCAL=YES.

PCB-00006: Userid only used when SQLCHECK=FULL, userid ignored.
   **Cause:** The USERID option was specified when SQLCHECK={SYNTAX | NONE}. This is unnecessary.
   **Action:** Specify the USERID option only when SQLCHECK=SEMANTICS.
PCB-00007: String
Cause: This is a generic error message from the command-line processor.
Action: Correct the indicated error.

PCB-00008: Must use option SQLCHECK=SEMANTICS(FULL) when there is embedded PL/SQL
Cause: The precompiler tried to parse an embedded PL/SQL block when SQLCHECK={SYNTAX | NONE}. PL/SQL blocks can be parsed only when SQLCHECK=SEMANTICS is specified.
Action: Remove the PL/SQL block or specify SQLCHECK=SEMANTICS.

PCB-00009: Cannot change MAXLITERAL after an EXEC SQL statement
Cause: The MAXLITERAL option has been used in an inline EXEC ORACLE OPTION statement after an EXEC SQL, EXEC TOOLS, or EXEC IAF statement. This is not allowed.
Action: Use the MAXLITERAL option only on the command line or in an EXEC ORACLE OPTION statement placed at the beginning of the input source file.

PCB-00010: SQLCHECK value in EXEC ORACLE statement exceeds command line value
Cause: The SQLCHECK option was entered inline and specified a level of checking higher than the level specified (or accepted by default) on the command line. This is not allowed. For example, if SQLCHECK={SYNTAX | LIMITED} is specified on the command line, SQLCHECK={SEMANTICS | FULL} cannot be specified inline. This informational message is; the precompiler ignores the inline value and continues processing.
Action: Revise the EXEC ORACLE statement or specify a lower level of checking on the command line.

PCB-00011: DBMS=V6 no longer supported; using DBMS=NATIVE
Cause: V6 compatibility is no longer supported. The precompiler will precompile as though DBMS=NATIVE was specified.
Action: Revise the specified DBMS option value from V6 to another value as desired.

PCB-00012: Command line option DYNAMIC=ANSI required with option TYPE_CODE=ANSI
Cause: The precompiler option TYPE_CODE=ANSI was used without also specifying DYNAMIC=ANSI. The precompiler option DYNAMIC=ANSI must be specified if TYPE_CODE=ANSI.
Action: Set the precompiler option DYNAMIC=ANSI in addition to TYPE_CODE=ANSI or do not set TYPE_CODE=ANSI.

PCB-00013: Must use option SQLCHECK=SEMANTICS(FULL) when option OUTLINE is used
Cause: The precompiler option OUTLINE was used without also specifying SQLCHECK=SEMANTICS(FULL).
Action: Set the precompiler option SQLCHECK=SEMANTICS(FULL).

PCB-00014: Must use option OUTLINE when option OUTLNPREFIX is used
Cause: The precompiler option OUTLNPREFIX was used without also specifying OUTLINE=YES|<category_name>. The precompiler option OUTLINE must be specified if OUTLNPREFIX is used.
**Action:** Set the precompiler option OUTLINE=YES|<category_name>

**PCB-00015:** Must use option OUTLINE when option RUNOUTLINE is used

**Cause:** The precompiler option RUNOUTLINE was used without also specifying OUTLINE=YES|<category_name>. The precompiler option OUTLINE must be specified if RUNOUTLINE is used.

**Action:** Set the precompiler option OUTLINE=YES|<category_name>

**PCB-00016:** Semantic checking disabled by TimesTen.

**Cause:** Semantic checking is not supported by TimesTen.

**Action:** This is an informational message only.

**PCB-00100:** Unable to reopen temporary file *string*

**Cause:** The precompiler was unable to reopen a temporary file. Some possible causes follow:
- File access privileges are insufficient.
- Another user has locked the file.
- There is not enough disk space.
- There are too many open files.

**Action:** Check that sufficient privileges have been granted to access the file, and that it is not locked by another user. Also check that there is enough disk space and that the limit for open files is set high enough (check with the system manager).

**PCB-00101:** Could not find or open system configuration file

**Cause:** The precompiler was unable to open the system configuration file. The system configuration file does not exist or is not in the proper directory.

**Action:** Check that the system configuration file is in the proper directory. See Oracle installation documentation for where this should be. Put a new copy of pcccob.cfg with desired default options in the proper directory.

**PCB-00102:** Input file name length exceeds the maximum length

**Cause:** The file name length specified exceeded the maximum length. Some operating systems have a maximum file name length.

**Action:** Use a file name of length less than or equal to the maximum platform specific file name length.

**PCB-00103:** Unable to open generated outline sql file "*string*"

**Cause:** The precompiler was unable to open the input file specified in the INCLUDE statement. Some possible causes follow:
- The filename is misspelled.
- The file does not exist.
- The search path to the file is incorrect.
- File access privileges are insufficient.
- There is not enough disk space.
- There are too many open files.

**Action:** Check that the file exists, that the search path to the file is correct, that sufficient privileges to access the file have been granted, and that it is not locked.
by another user. Also, check that there is enough disk space and that the limit for open files is set high enough (check with the system manager).

**PCB-00104: Unable to open input file "string"**

**Cause:** The precompiler was unable to open the input file specified by the INAME precompiler option. Some possible causes follow:

  o The filename is misspelled.
  o The file does not exist.
  o The search path to the file is incorrect.
  o File access privileges are insufficient.
  o Another user has locked the file.
  o There is not enough disk space.
  o There are too many open files.

**Action:** Check that the file exists, that the search path to the file is correct, that sufficient privileges have been granted to access the file, and that it is not locked by another user. Also check that there is enough disk space and that the limit for open files is set high enough (check with the system manager).

**PCB-00105: Included file name "string" exceeds name limit of number characters**

**Cause:** The file name length specified exceeded the maximum length. Some operating systems have a maximum file name length.

**Action:** Use a file name of length less than or equal to the maximum platform specific file name length.

**PCB-00106: Unable to open INCLUDE file "string"**

**Cause:** The precompiler was unable to open the input file specified in the INCLUDE statement. Some possible causes follow:

  o The filename is misspelled.
  o The file does not exist.
  o The search path to the file is incorrect.
  o File access privileges are insufficient.
  o There is not enough disk space.
  o There are too many open files.

**Action:** Check that the file exists, that the search path to the file is correct, that sufficient privileges to access the file have been granted, and that it is not locked by another user. Also, check that there is enough disk space and that the limit for open files is set high enough (check with the system manager).

**PCB-00107: Unable to open generated outline log file "string"**

**Cause:** The precompiler was unable to open the input file specified in the INCLUDE statement. Some possible causes follow:

  o The filename is misspelled.
  o The file does not exist.
  o The search path to the file is incorrect.
  o File access privileges are insufficient.
There is not enough disk space.

There are too many open files.

**Action:** Check that the file exists, that the search path to the file is correct, that sufficient privileges to access the file have been granted, and that it is not locked by another user. Also, check that there is enough disk space and that the limit for open files is set high enough (check with the system manager).

**PCB-00108: Unable to open list file "string"**

**Cause:** The precompiler was unable to open the list file specified by the LNAME precompiler option. Some possible causes follow:

- The filename is misspelled.
- The file does not exist.
- The search path to the file is incorrect.
- File access privileges are insufficient.
- Another user has locked the file.
- There is not enough disk space.
- There are too many open files.

**Action:** Check that the file exists, that the search path to the file is correct, that sufficient privileges have been granted to access the file, and that it is not locked by another user. Also check that there is enough disk space and that the limit for open files is set high enough (check with the system manager). If a listing file is not needed, specify LTYPE=None on the command line.

**PCB-00109: Unable to open generated source file "string"**

**Cause:** The precompiler was unable to open the output file specified by the ONAME precompiler option. Some possible causes follow:

- The filename is misspelled.
- The file does not exist.
- The search path to the file is incorrect.
- File access privileges are insufficient.
- Another user has locked the file.
- There is not enough disk space.
- There are too many open files.

**Action:** Check that the file exists, that the search path to the file is correct, that sufficient privileges have been granted to access the file, and that it is not locked by another user. Also check that there is enough disk space and that the limit for open files is set high enough (check with the system manager).

**PCB-00110: Unable to open temporary file "string"**

**Cause:** The precompiler was unable to open a file for temporary use. Some possible causes follow:

- File access privileges are insufficient.
- A file of the same name already exists and is locked.
- There is not enough disk space.
- There are too many open files.
**Action**: Check that the file exists, that sufficient privileges have been granted to access the file, and that it is not locked. Also check that there is enough disk space and that the limit for open files is set high enough (check with the system manager). "200 - 299, Host variable errors."

**PCB-00200: Cannot equivalence PIC N or PIC G variable "string"**

**Cause**: A PIC N/G variable, an implicit VARCHAR group item with a PIC N/G elementary item, or a group item with a PIC N/G elementary item was used in an EXEC SQL VAR statement. This is not allowed.

**Action**: Do not use the PIC N variable in an EXEC SQL VAR statement. If you want an equivalence to an Oracle type using an EXEC SQL VAR statement, use a PIC X variable, instead of a PIC N variable.

**PCB-00201: Indicator variable string not a group item**

**Cause**: The host variable is a group item containing tables. Indicator variables used with this type of host variable must be group items of tables of indicators corresponding to the tables in the group item host variable.

**Action**: Change the indicator variable to be a group item of indicator tables.

**PCB-00202: Indicator variable string not a group item or table**

**Cause**: The host variable is a group item. Indicator variables used with this type of host variable must be a group item or table of indicator variables.

**Action**: Use a group item or table of indicator variables.

**PCB-00203: Nested group item "string" not supported**

**Cause**: The variable used as a host variable was a group item which itself contained other group items.

**Action**: Remove any group items from the group item to be used as a host variable.

**PCB-00204: Group items cannot be used except in INTO or VALUES clause**

**Cause**: A group item host variable was used outside of an INTO or VALUES clause. A group item host variable may be used only in an INTO or VALUES clause.

**Action**: Do not use a group item outside of an INTO or VALUES clause.

**PCB-00205: Cannot use PIC N or PIC G variable in PL/SQL when NLS_LOCAL=YES**

**Cause**: A PIC N or PIC G variable was used in an embedded PL/SQL block when the precompiler option NLS_LOCAL=YES was used. A PIC N or PIC G variable is not supported in this situation.

**Action**: Do not use the PIC N or PIC G variable within the PL/SQL block or use precompiler option NLS_LOCAL=NO.

**PCB-00206: Cannot use N quoted literal in PL/SQL when NLS_LOCAL=YES**

**Cause**: A "N" literal (a literal of the form N'...) was used within a PL/SQL block when the precompiler option NLS_LOCAL=YES was used. N literals are not supported in this situation.

**Action**: Use an ordinary literal (one without the "N") within the PL/SQL block or use precompiler option NLS_LOCAL=NO.

**PCB-00207: Invalid use of PIC N or PIC G table variable when NLS_LOCAL=YES**
Cause: A PIC N variable was declared using an OCCURS clause. Tables of PIC N variables are not supported when NLS_LOCAL=YES.
Action: Declare the PIC N variable without an OCCURS clause or, do not use the PIC N variable in any SQL statements.

PCB-00208: Incorrect type for host variable "string"
Cause: A variable of unsupported datatype was used in a SQL statement or embedded PL/SQL block.
Action: Use a host variable of a supported datatype.

PCB-00209: Scale is not supported for host variable "string"
Cause: A variable whose format does not support scaling was used in a SQL statement or embedded PL/SQL block. The following formats do not support scaling: PIC S9(n) COMP PIC S9(n) COMP-4 PIC S9(n) COMP-5 PIC S9(n) BINARY PIC 9(n) COMP
Action: Remove the scale or use a datatype that support scaling.

PCB-00210: DISPLAY-1 only allowed with PIC G and PIC N variables "string"
Cause: A variable declared with DISPLAY-1 in the usage clause without PIC G or PIC N in the picture clause was used in a SQL statement.
Action: Replace DISPLAY-1 with DISPLAY or change the picture clause to use PIC N or PIC G.

PCB-00211: VARYING not supported with PIC N or PIC G variable "string"
Cause: The keyword VARYING was used in a PIC N variable declaration.
Action: Remove the keyword VARYING from the variable declaration. If you want to declare a PIC N VARCHAR variable, specify the precompiler option VARCHAR=YES and declare the variable as an implicit VARCHAR group item as illustrated by the following example: EXEC SQL BEGIN DECLARE SECTION END-EXEC. ...
01 ENAME. 05 ENAME-LEN PIC S9(4) COMP . 05 ENAME-ARR PIC N(20). ... EXEC SQL END DECLARE SECTION END-EXEC.

PCB-00212: PICTURE clause not allowed for host variable "string"
Cause: A variable declared with a PIC clause and COMP-1 or COMP-2 was used in a SQL statement or embedded PL/SQL block.
Action: Remove the PIC clause or use a datatype other than COMP-1 or COMP-2 in the declaration of the variable.

PCB-00214: JUSTIFIED clause not allowed for host variable "string"
Cause: A variable declared with a JUSTIFIED clause was used in a SQL statement or embedded PL/SQL block.
Action: Remove the JUSTIFIED clause from the variable declaration.

PCB-00215: OCCURS TO TIMES clause not allowed for host variable "string"
Cause: A variable declared with an OCCURS clause with the TO TIMES subclause was used in a SQL statement or embedded PL/SQL block.
Action: Remove the TO TIMES subclause from the variable declaration.

PCB-00216: OCCURS ASCENDING/DESCENDING clause not allowed for "string"
Cause: A variable declared with an OCCURS clause with the ASCENDING or DESCENDING KEY IS subclause was used in a SQL statement or embedded PL/SQL block.
Action: Remove the ASCENDING or DESCENDING KEY IS subclause from the variable declaration.

PCB-00217: OCCURS INDEXED clause not allowed for host variable "string"
Cause: A variable declared with an OCCURS INDEXED clause was used in a SQL statement or embedded PL/SQL block.
Action: Remove the OCCURS INDEXED clause from the variable declaration.

PCB-00218: RENAMES clause not allowed for host variable "string"
Cause: A variable declared with a RENAMES clause was used in a SQL statement or embedded PL/SQL block.
Action: Remove the RENAMES clause from the declaration.

PCB-00219: Invalid size specified in EXEC SQL VAR statement
Cause: A size which is specified which is not valid for the specified data type.
Action: Specify a size which is valid for the specified type.

PCB-00220: Invalid scale specified in EXEC SQL VAR statement
Cause: A scale which is specified which is not valid for the specified data type.
Action: Specify a scale which is valid for the specified type.

PCB-00221: OCCURS DEPENDING ON clause not allowed for host variable "string"
Cause: A variable declared with an OCCURS clause with the DEPENDING ON subclause was used in a SQL statement or embedded PL/SQL block.
Action: Remove the DEPENDING ON subclause from the variable declaration.

PCB-00222: Size for host variable string exceeds maximum size
Cause: A variable declared with PIC S9(n), with n greater than what is allowed on the given platform, was used in an embedded sql statement. On 32 bit machines n must not exceed 9, and on 64 bit machines, n must not exceed 18.
Action: Use a smaller number in the picture clause that does not exceed the maximum allowed size on your platform or use COMP-3.

PCB-00223: Undeclared variable "string"
Cause: A variable used in a SQL statement was not declared or its name is misspelled or if option DECLARE_SECTION=YES the declaration was not in a DECLARE SECTION.
Action: Add or correct the variable declaration.

PCB-00224: Ambiguously referenced variable "string"
Cause: There is more than one variable of the same name and the qualification given was insufficient to determine which variable the reference was to.
Action: Use more complete qualification in the variable reference.

PCB-00225: Undeclared SQL identifier "string"
Cause: The name of a descriptor, statement, or cursor was not declared or is misspelled, or was declared as a different kind of SQL identifier.
Action: Add or correct the descriptor, statement, or cursor declaration.

PCB-00226: SQL identifier "string" already defined
**Cause:** The SQL identifier (cursor name, statement name, etc.) has already been defined in another way.

**Action:** Use a different name for this use of the name.

**PCB-00227: Undeclared indicator variable "string"**

**Cause:** An indicator variable used in a SQL statement was not declared in the Declare Section or its name is misspelled.

**Action:** Add or correct the indicator variable declaration.

**PCB-00228: Invalid group item variable "string"**

**Cause:** An unacceptable group item variable was used in a SQL statement. or its name is misspelled.

**Action:** Correct the group item variable declaration or its use in the SQL statement.

**PCB-00229: Indicator variable "string" has wrong type or length**

**Cause:** An indicator variable was not declared in the Declare Section as a 2-byte integer. Indicator variables must be defined as 2-byte integers.

**Action:** Redefine the indicator variable as a 2-byte integer.

**PCB-00230: Indicator table size must not be less than its host variable**

**Cause:** An host variable table was used with an indicator table declared with a smaller dimension. For example: EXEC SQL BEGIN DECLARE SECTION END-EXEC. 01 EMP-NUM OCCURS 4 TIMES PIC S9(4) COMP. 01 EMP-NUM-IND OCCURS 2 TIMES PIC S9(4) COMP. EXEC SQL END DECLARE SECTION END-EXEC. ... SELECT ... INTO EMP-NUM:EMP-NUM-IND ...

**Action:** Increase the size of the indicator table.

**PCB-00231: Host and indicator variables may not have the same name.**

**Cause:** In an EXEC SQL statement, an indicator variable had the same name as a host variable. The names of a host variable and its associated indicator variable must be different. Also, an indicator variable cannot be used as a host variable.

**Action:** Rename the host or indicator variable.

**PCB-00232: Tables not allowed as input bind variables in SELECT statement**

**Cause:** A host table was used in the WHERE clause of a SELECT-INTO statement or in the SELECT list of a SELECT-INTO statement.

**Action:** Rewrite the SELECT statement without using tables or use a cursor.

**PCB-00233: Table size mismatch in INTO/USING. Minimum is: number**

**Cause:** The size of an table variable in an INTO/USING clause is too small for the number of rows processed.

**Action:** Declare all table variables in the INTO/USING clause to have at least the minimum dimension given.

**PCB-00234: FOR variable "string" is invalid type**

**Cause:** The count variable in a FOR clause has the wrong datatype. The datatype must be NUMBER or LONG (or be compatible with NUMBER or LONG).

**Action:** Check the declaration and check that the count variable has a datatype of NUMBER or LONG (or a compatible Oracle or host-language datatype).

**PCB-00235: Table size mismatch in INTO/USING. Minimum is: number**
Cause: The size of a table variable in an INTO/USING clause of a dynamic EXECUTE statement has been ARRAYLEN...EXECUTEd while the other host variable has not and is not a table of dimension 1 or a plain non-table host variable. Example: 01 X PIC X(10) OCCURS 10. 01 Y PIC S9(4) COMP OCCURS 10. 01 Z PIC S9(4) COMP. ... EXEC SQL ARRAYLEN X (DIM) EXECUTE END-EXEC. ... EXEC SQL EXECUTE S1 USING :X, :Y END-EXEC. <-- error EXEC SQL EXECUTE S1 USING :X, :Z END-EXEC. <-- ok Please note that this error differs from 233 in that it is an ERROR not a WARNING.

Action: ARRAYLEN...EXECUTE all of the table variables in the INTO/USING clause or those host variables not ARRAYLEN...EXECUTEd need to be of dimension 1.

PCB-00236: Cannot use PIC N/G variable. NLS_NCHAR not set or set incorrectly.

Cause: To use PIC N or PIC G variables as host variables, both of the environment variables NLS_LANG and NLS_NCHAR must be set with correct values. One of the following problems has occurred which prevents Pro*COBOL from accepting PIC N and PIC G variables as host variables: 1) One or both of NLS_LANG and NLS_NCHAR are not set at all. 2) NLS_LANG is not set with a valid language, territory, or character set. 3) NLS_NCHAR is not set to a valid NCHAR character set. 4) The character set specified by NLS_NCHAR is not a fixed width character set. Pro*COBOL can only use fixed width character sets for PIC N or PIC G host variables.

Action: Set the NLS_NCHAR environment variable to a valid fixed width character set name. Set NLS_LANG with a valid language, territory, and character set.

PCB-00237: Declaration of "string" cannot have a level number greater than 48

Cause: A VARYING or SQL-CURSOR declaration has been encountered which has the level number greater than 48.

Action: Change the level to 48 or less.

PCB-00238: Element of this table group item host variable cannot be a table

Cause: A group item that is a table and having an element that is a table was used in a SQL statement.

Action: Remove the OCCURS clause from the element of the group item.

PCB-00239: Element of a table group item indicator cannot be table or group item

Cause: A group item that is a table and used as an indicator has an element that is a table or group item.

Action: Change the nested table or group item in the indicator so that it is an elementary item.

PCB-00240: Group item containing this host variable cannot be table

Cause: An elementary item belonging to a group item with an OCCURS clause has been referenced. This is not allowed.

Action: Change the elementary item used to an item that is not an element of a table of group items.

PCB-00241: A host variable is required here

Cause: The COUNT item in the dynamic SQL statement must be a host variable but is not.

Action: Use a host variable in the COUNT item of the dynamic SQL statement.
PCB-00242: A host variable or exact numeric constant is required here

**Cause:** The particular item in the dynamic SQL statement is required to be a host variable or exact numeric (integer) constant, but is not.

**Action:** Change the item in the dynamic SQL statement to use a host variable or exact numeric constant. "300 - 399: FIPS flagging error messages."

PCB-00300: Datatype for host variable not supported by ANSI "string"

**Cause:** An Oracle extension to the ANSI/ISO standard was used. Specifically, a pointer or nonconforming datatype such as VARCHAR was used. For example, the offending code might look like: EXEC SQL BEGIN DECLARE SECTION END-EXEC. 01 USERNAME PIC X(10) VARYING. EXEC SQL END DECLARE SECTION END-EXEC. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** None

PCB-00301: Use of non-ANSI function is an Oracle extension

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a non-ANSI function was used. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action is required. However, for ANSI/ISO compliance, do not use this function.

PCB-00302: This statement is not supported by ANSI

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a nonconforming SQL statement such as PREPARE was used. For example, the offending code might look like: EXEC SQL PREPARE SQL-STMT FROM :HV END-EXEC. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the nonconforming statement.

PCB-00303: Dynamic SQL and PL/SQL are Oracle extensions to ANSI SQL

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, dynamic SQL or embedded PL/SQL was used. For example, the offending code might look like: EXEC SQL EXECUTE BEGIN SELECT ... END; END-EXEC. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use dynamic SQL or embedded PL/SQL.

PCB-00304: Oracle extension to the WHENEVER statement

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a nonconforming keyword such as NOTFOUND, STOP, RAISE, or DO was used in the WHENEVER statement. (Note that NOT FOUND is ANSI-compliant.) For example, the offending code might look like: EXEC SQL WHENEVER SQLERROR STOP END-EXEC. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the nonconforming keyword.

PCB-00305: Oracle extension to the COMMIT and ROLLBACK statements

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the parameter RELEASE, COMMENT, or FORCE were used in a
COMMIT or ROLLBACK statement. For example, the offending code might look like: EXEC SQL ROLLBACK RELEASE END-EXEC. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the nonconforming parameter.

**PCB-00306: CREATE FUNCTION/PROCEDURE/PACKAGE/TRIGGER are Oracle extensions**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, one of the following statements was used:

- CREATE FUNCTION
- CREATE PROCEDURE
- CREATE PACKAGE
- CREATE TRIGGER

This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action is required. However, for ANSI/ISO compliance, do not use any of these statements.

**PCB-00307: DROP TABLE statement is an Oracle extension**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the DROP TABLE statement was used. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action is required. However, for ANSI/ISO compliance, do not use the DROP statement.

**PCB-00308: FOR clause is an Oracle extension**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the FOR clause was used in a table-processing SQL statement. For example, the offending code might look like: EXEC SQL FOR :LIMIT INSERT INTO EMP (EMPNO, JOB, DEPTNO) VALUES (:EMPNUM, :JOB, :DEPTNO) END-EXEC. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the FOR clause.

**PCB-00309: The CONNECT statement is Oracle implementation dependent**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the CONNECT statement was used to log on to ORACLE. For example, the offending code might look like: EXEC SQL CONNECT :USERNAME IDENTIFIED BY :PSSWORD END-EXEC. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, specify the AUTO_CONNECT command-line option instead of using a CONNECT statement.

**PCB-00310: AT clause is an Oracle extension**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the AT <db_name> clause was used in a SQL statement. For example, the offending code might look like: EXEC SQL AT oracle3 COMMIT RELEASE END-EXEC. This informational message is issued by the FIPS Flagger when FIPS=YES.
Action: No action required. However, for ANSI/ISO compliance, do not use the AT <db_name> clause.

PCB-00311: Datatype equivalencing is an Oracle extension
Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the EXEC SQL VAR statement was used.
Action: No action required. However, for ANSI/ISO compliance, do not use the EXEC SQL VAR statement.

PCB-00312: Keyword WORK required here by ANSI
Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the keyword WORK was used in a COMMIT or ROLLBACK statement. For example, the offending code might look like: EXEC SQL COMMIT WORK RELEASE END-EXEC. This informational message is issued by the FIPS Flagger when FIPS=YES.
Action: No action required. However, for ANSI/ISO compliance, do not use the keyword WORK.

PCB-00313: TO SAVEPOINT clause is an Oracle extension
Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the TO SAVEPOINT <save_id> clause was used in a ROLLBACK statement.
Action: No action required. However, for ANSI/ISO compliance, do not use the TO SAVEPOINT clause.

PCB-00314: DECLARE DATABASE is an Oracle extension
Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the DECLARE DATABASE statement was used.
Action: No action required. However, for ANSI/ISO compliance, do not use this statement.

PCB-00315: DECLARE TABLE is an Oracle extension
Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the DECLARE TABLE statement was used.
Action: No action required. However, for ANSI/ISO compliance, do not use this statement.

PCB-00316: SQL FORMS statements are Oracle extensions
Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the one of the following statements was used:
- EXEC IAF GET
- EXEC IAF PUT
- EXEC TOOLS GET
- EXEC TOOLS SET
This informational message is issued by the FIPS Flagger when FIPS=YES.
Action: No action is required. However, for ANSI/ISO compliance, do not use any of these statements.

PCB-00317: Group item host variables are Oracle extensions
Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a group item variable was used as a host variable. This informational message is issued by the FIPS Flagger when FIPS=YES.

Action: No action is required. However, for ANSI/ISO compliance, do not use group items as host variables.

PCB-00318: ARRAYLEN is an Oracle extension

Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the ARRAYLEN statement was used. This informational message is issued by the FIPS Flagger when FIPS=YES.

Action: No action is required. However, for ANSI/ISO compliance, do not use this statement.

PCB-00319: EXEC ORACLE statements are an Oracle extension

Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, an EXEC ORACLE statement was used. This informational message is issued by the FIPS Flagger when FIPS=YES.

Action: No action is required. However, for ANSI/ISO compliance, do not use this statement.

PCB-00320: VARYING host variable "string" is an Oracle extension

Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a variable declared of VARYING type was used in a SQL statement. This informational message is issued by the FIPS Flagger when FIPS=YES.

Action: No action is required. However, for ANSI/ISO compliance, do not use this statement.

PCB-00321: Implicit varchar host variables are an Oracle extension

Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, an implicit varchar variable was used in a SQL statement. This informational message is issued by the FIPS Flagger when FIPS=YES.

Action: No action is required. However, for ANSI/ISO compliance, do not use this statement.

PCB-00322: EXEC SQL LOB statements an Oracle extension

Cause: An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, an EXEC SQL LOB statement was used. This informational message is issued by the FIPS Flagger when FIPS=YES.

Action: No action is required. However, for ANSI/ISO compliance, do not use this statement. "400 - 499, Tokenizer or parsing errors."

PCB-00400: string

Cause: A syntax error was found.

Action: Do the appropriate action to fix the indicated error.

PCB-00401: Character string not properly terminated

Cause: The character string was not terminated with a quote or apostrophe as appropriate or line continuation was not correct.

Action: Check that the character string is terminated properly and that line continuation syntax is correct.

PCB-00402: Pseudo-text not properly terminated

Cause: A block of pseudo-text has not been properly terminated with "==".
PCB-00403: EXEC statement cannot begin in Area A  
**Cause:** An EXEC statement began in Area A (before column 12).  
**Action:** Shift the EXEC statement to the right to start it in Area B (in or after column 12).

PCB-00404: *string*  
**Cause:** A syntax error was found.  
**Action:** Do the appropriate action to fix the indicated error. "500 - 524, Threads"

PCB-00500: No EXEC SQL CONTEXT USE statement encountered  
**Cause:** No EXEC SQL CONTEXT USE statement was encountered and the option threads=yes was requested.  
**Action:** Ensure that the necessary context variable (of type sql-context) has been declared, ALLOCATEd, and USEd prior to any executable SQL statements.

PCB-00501: Runtime context variable "*string*" not of correct type  
**Cause:** The runtime context variable referenced in an EXEC SQL CONTEXT USE statement is not of type sql_context.  
**Action:** Declare your runtime context variable of type sql_context.

PCB-00502: This statement can only be used with THREADS=YES  
**Cause:** EXEC SQL ENABLE THREADS has been used, even though option THREADS is set to NO.  
**Action:** Specify option THREADS=YES or remove the EXEC ENABLE THREADS statement from the source code. "525 - 549, Result Set Cursors"

PCB-00525: Use of the AT clause is not permitted here  
**Cause:** An explicit AT clause was used with an ALLOCATE statement or a FETCH/CLOSE statement also using a sql-cursor declaration.  
**Action:** Remove the AT clause. "550 - 574, Miscellaneous"

PCB-00550: Unable to log on to ORACLE with "*string*". ORACLE error number: *number*  
**Cause:** The precompiler was unable to log on to ORACLE with the specified username and password. An ORACLE error with given number occurred when the logon was attempted.  
**Action:**

PCB-00551: The SQLCA has already been included  
**Cause:** The precompiler has encountered an include SQLCA statement after SQLCA has already been included. The SQLCA can only be included once.  
**Action:** Remove the duplicate include SQLCA statement.

PCB-00552: The SQLCA and a SQLCODE variable cannot both be used  
**Cause:** The SQLCA has been included and a SQLCODE variable has been declared. This is not allowed as references to the SQLCODE variable are ambiguous and will result in COBOL compiler errors.
**Action:** Use either the SQLCA or the SQLCODE variable. Remove either the include of the SQLCA or the SQLCODE variable declaration.

**PCB-00553: FOR clause not allowed on this statement**

**Cause:** A FOR clause was used with a SELECT, LOB, or DEALLOCATE DESCRIPTOR statement. A FOR clause cannot be used with these statements. In the case of a SELECT statement, data returned from the last loop in the execution of the SELECT would overwrite data returned in a previous loop.

**Action:** Remove the FOR clause from the statement. Use a host language construct to iteratively execute the statement.

**PCB-00554: Must include SQLCA when mode=ANSI and WHENEVER SQLWARNING used**

**Cause:** When MODE={ANSI | ANSI14}, an attempt was made to use the WHENEVER SQLWARNING statement without declaring the SQLCA. When MODE={ANSI | ANSI14}, declaring the SQLCA is optional, but to use the WHENEVER SQLWARNING statement, the SQLCA must be declared.

**Action:** Remove all WHENEVER SQLWARNING statements from the program or declare the SQLCA by hardcoding it or copying it into the program with the INCLUDE statement.

**PCB-00555: Using WHERE CURRENT OF on cursor defined without FOR UPDATE clause**

**Cause:** If mode=ORACLE, then a cursor defined with a WHERE CURRENT OF clause must also have a FOR UPDATE clause.

**Action:** Rewrite the cursor definition.

**PCB-00556: Unrecoverable error. Fix previous errors and re-precompile**

**Cause:** A fatal parsing error or token stack overflow error has been encountered.

**Action:** Fix the syntax error that is causing the parsing error.

**PCB-00557: USING clause can only be used on a PREPAREd dynamic statement**

**Cause:** A severe semantics error occurred because the USING clause was used with the OPEN cursor statement and the cursor declaration is not for a PREPAREd statement. The correct sequence of statements should be like: EXEC SQL prepare sv from :sel_stmt END-EXEC. EXEC SQL declare csv cursor for sv END-EXEC. EXEC SQL open csv USING :hv1, :hv2 END-EXEC.

**Action:** Use the prepare statement for the sql statement and use that in the declare cursor statement.

**PCB-00558: Invalid external datatype specified in EXEC SQL VAR statement**

**Cause:** An invalid external datatype was specified in the EXEC SQL VAR statement.

**Action:** Specify a valid external datatype. "575 - 599, PL/SQL (including ARRAYLEN)"

**PCB-00559: Cursor was not declared in scrollable mode**

**Cause:** A cursor which was not DECLAREd in SCROLL mode was used in scrollable mode in the FETCH statement.

**Action:** Declare the cursor in scroll mode using the SCROLL keyword.

**PCB-00560: Value of offset cannot be negative in ABSOLUTE orientation mode**

**Cause:** The offset for the FETCH ABSOLUTE statement is negative.
Action: Value of offset should be positive.

PCB-00575: PLS-number: string
Cause: Refer to the indicated PL/SQL error message for the indicated condition.
Action: Refer to the indicated PL/SQL error message to correct the SQL statement or embedded PL/SQL block.

PCB-00576: PLS-number: string
Cause: The precompiler found an error in an embedded SQL statement or PL/SQL block.
Action: Refer to the indicated PL/SQL error message to correct the SQL statement or embedded PL/SQL block.

PCB-00577: Use of ARRAYLEN with host tables in SQL statements is ignored
Cause: ARRAYLEN is only valid with PL/SQL.
Action: Use an appropriate table type.

PCB-00578: Variable "string" must be a table
Cause: In an ARRAYLEN statement, the name of a previously declared host table was not specified. The first host variable in an ARRAYLEN statement must be a table. The second host variable, which specifies an array dimension, must be a 4-byte integer. The correct syntax follows: EXEC SQL ARRAYLEN HTABLE (DIM) END-EXEC. The ARRAYLEN statement must appear along with, but somewhere after, the declarations of host_table and dimension.
Action: Check the spelling of both identifiers in the ARRAYLEN statement. If necessary, supply the missing host table name.

PCB-00579: Invalid ARRAYLEN length variable type for "string"
Cause: A valid table dimension was not specified in an ARRAYLEN statement. The table dimension must be specified using a previously declared 4-byte integer host variable, not a literal or expression. For example, the offending code might look like: EXEC SQL ARRAYLEN ETABLE (25) END-EXEC. -- illegal dimension
Action: Supply a valid table dimension. If necessary, declare a 4-byte integer host variable for use in the ARRAYLEN statement.

PCB-00579: Previous use of host variable "string" uses different indicator
Cause: Within a PL/SQL statement, a host variable was used with two different indicator variables or was used with an indicator variable in one instance and without an indicator in another instance.
Action: Change all references to the host variable so that they all use the same indicator variable or all use no indicator variable.

PCB-00580: "string" used as both host variable and indicator
Cause: Within a PL/SQL statement, the variable was used as both a host variable and an indicator variable.
Action: Use different variables for host variables and indicator variables. "600 - 624, EXEC TOOLS"

PCB-00581: Indicators are not allowed in EXEC IAF statements
Cause: Indicator variables associated with host variables cannot be used in EXEC IAF statements such as GET and PUT in a user exit.
Action: Eliminate the indicator variables. If feasible (for example with Forms V4), use EXEC TOOLS statements, which do allow indicator variables. See the
Programmer's Guide to the Oracle Precompilers for more information of EXEC IAF and EXEC TOOLS statements.

PCB-00603: An EXEC TOOLS MESSAGE host variable is not a character type
Cause: If a host variable is used to specify the message in an EXEC TOOLS MESSAGE statement, that host variable must be of a character type.
Action: Declare the message to a host variable of a char type. "625 - 649, EXEC SQL LOB statements"

PCB-00625: An indicator variable is not required with this attribute
Cause: In a LOB DESCRIBE, an indicator variable was used with a host variable when retrieving a LOB attribute that does not require one.
Action: Remove the indicator variable.

PCB-00626: Incompatible LOB types
Cause: A LOB operation was attempted between LOBs whose types were not compatible. For example, When ASSIGNing one LOB to another, both LOBs must be of the same type. If they are not, this error results.
Action: Correct the LOB operation by having it function between LOBs of the same type. This may require a redeclaration of one of the LOBs used in the LOB statement performing the specified operation.

PCB-00627: Host variable is not of character type
Cause: The given host variable was not declared to be of the required character type. In this case, one of several possible character types would have been accepted. However, the host variable type did not match any of them.
Action: Redeclare the problematic host variable, using one of the permitted character types.

PCB-00628: Buffer type is incompatible with LOB type
Cause: This error can occur in either of the following situations
1. An attempt to READ from a LOB into a buffer whose type was not compatible with the LOB type.
2. An attempt to WRITE a buffer into a LOB whose type was not compatible with the buffer type.
Action: Either the LOB type or the buffer type needs to be changed so that the LOB and buffer types become compatible for the specified operation.

PCB-00629: Host variable is not of Internal LOB type
Cause: The given host variable was not declared to be an internal LOB. BLOB, CLOB or NCLOB are internal lob types.
Action: Redeclare the host variable using one of the internal LOB types.

PCB-00630: Host variable is not of LOB type
Cause: The given host variable was not declared to be any type of LOB, Internal or External. BLOB, CLOB or NCLOB are internal lob types. BFILE is an external type.
Action: Redeclare the host variable using any of the LOB types, Internal or External.

PCB-00631: Host variable is not an External LOB
Cause: The given host variable was not declared to be an External LOB. BFILE is an external type.

Action: Redeclare the host variable using an External LOB type (BFILE).

PCB-00632: Cannot open an External LOB in READ WRITE mode
Cause: An attempt was made to OPEN a BFILE in READ WRITE mode. Writable BFILEs are currently not supported so this operation is considered erroneous.

Action: Do not open BFILEs using READ WRITE mode. BFILEs can only be OPENed in READ ONLY mode.

PCB-00633: Invalid host variable and attribute pairing
Cause: The host variable and attribute pairing in a LOB DESCRIBE was invalid. Most likely, this was due to some problem with the host variable. For example, this error could occur if the host variable was not declared.

Action: Usually, other, more specific, errors will accompany this one. Correcting some or all of those problems should resolve this error.

PCB-00635: This attribute is only valid for Internal LOB types
Cause: A request for a LOB attribute was made in a LOB DESCRIBE statement in which the given LOB was not of some Internal LOB type.

Action: Replace the LOB host variable in the LOB DESCRIBE with one that was declared to be an Internal LOB.

PCB-00636: This attribute is only valid for External LOB types
Cause: A request for a LOB attribute was made in a LOB DESCRIBE statement in which the given LOB was not an External LOB type (BFILE).

Action: Use an External LOB (BFILE) host variable in the LOB DESCRIBE statement.

PCB-00637: Host variable is not an exact binary integer
Cause: A host variable was given that was not declared to be of some acceptable exact binary integer type. Generally, when this error occurs, a signed or unsigned integer type was expected. Floating point or otherwise imprecise numeric types are considered erroneous.

Action: Replace the problematic host variable with one that was declared using a proper binary integer type.

PCB-00638: This attribute is only valid for internal or external LOB types
Cause: A request for a LOB attribute was made in a LOB DESCRIBE statement in which the given source was not an internal or external LOB type.

Action: Use a LOB host variable in the LOB DESCRIBE statement.

PCB-00639: Cannot specify destination offset in a LOB WRITE APPEND
Cause: A destination offset was specified in a LOB WRITE APPEND statement. The destination offset is assumed to be the end of the LOB so specifying an explicit destination offset is erroneous.

Action: Remove the destination offset from the LOB WRITE APPEND statement.

"700 - 725, Dynamic SQL error conditions"

PCB-00700: This statement can only be used with DYNAMIC=ANSI
Cause: One of the following statements was used without specifying DYNAMIC=ANSI:
EXEC SQL ALLOCATE/DEALLOCATE/GET/SET DESCRIPTOR

EXEC SQL DESCRIBE OUTPUT/INPUT ... USING ... <descriptor name>

EXEC SQL EXECUTE ... INTO ...

EXEC SQL EXECUTE ... USING... <descriptor name>

EXEC SQL OPEN ... INTO ...

EXEC SQL OPEN ... USING... <descriptor name>

SCROLL in DECLARE CURSOR

EXEC SQL FETCH <orientation> ... where <orientation> is NEXT, PRIOR, FIRST, LAST, ABSOLUTE, or RELATIVE

Action: Specify DYNAMIC=ANSI or remove statement(s) like those above.

PCB-00701: MAX OCCURRANCES must be between 1 and 65535

Cause: The value specified in the WITH MAX clause of an EXEC SQL ALLOCATE DESCRIPTOR statement was less than 1 or greater than 65535

Action: Specify a value between 1 and 65535 inclusive

PCB-00702: Out-of-range item number

Cause: The value specified in the VALUES clause of an EXEC SQL GET/SET DESCRIPTOR statement was less than one or greater than 65535.

Action: Specify a value between 1 and 65535.

PCB-00725: Outline name length exceeds the allowed limit of number characters

Cause: Outline name <category_name>_<filename>_<filetype>_<seqno> has exceeded the allowed limit.

Action: Use OUTLNPREFIX option to specify the outline name which will be well in the permitted limit.

PCB-00726: Number of outlines has exceeded the limit

Cause: Number of outlines that can be created has exceeded the file limit. Allowed outlines per file is 10000.

Action: Split the file so that each file can have not more than 10000 outlines.

PCB-00727: Outline cannot be created on statement at line number, column number

Cause: Outline cannot be created as there is a syntax error or outlines are not supported on that statement.

Action: Correct the syntax error in the actual SQL used in the file or refer to "Performance Tuning Guide" for the list of supported statements.

PCB-00901: Pro*COBOL internal error condition detected (Code = number)

Cause: Pro*COBOL had detected an abnormal condition in its internal data structures. This error message should not normally ever be produced. Customer service should be contacted to report the error.

Action: Correct any other errors which have been reported. If the internal error still exist, examine the source code where the condition was detected and try modifying in some way. Possibly this will alleviate the internal error condition.

PCB-00902: Unable to read message file, facility PCB

Cause: Pro*COBOL was unable to access the message file containing message text. The file is possibly corrupt.
**Action:** Contact customer support for information on reinstalling the Pro*COBOL message files.

**PCB-00903: Pro*COBOL is unable to initialize its parser function**

**Cause:** Pro*COBOL was unable to access the message file containing message text. The file is possibly corrupt.

**Action:** Contact customer support for information on reinstalling the Pro*COBOL message files.
PCC-00001: Unable to open file string

Cause: The precompiler was unable to open a temporary file for internal use. There might be insufficient disk space, too many open files, or read-only protection on the output directory.

Action: Check that there is enough disk space, that the limit for open files is set high enough (check with the system manager) and that protection on the directory allows opening a file for writing.

PCC-00002: Invalid syntax at column number in line number of file string

Cause: There is a syntax error in an EXEC statement or the statement is not properly terminated.

Action: Correct the syntax of the EXEC statement. If the error occurred at the end of the input file, check that the last EXEC statement is properly terminated.

PCC-00003: Invalid SQL Identifier at column number in line number of file string

Cause: The symbol in a conditional precompilation statement (such as EXEC ORACLE IFDEF) is invalid, or the name of a SQL descriptor, statement, or cursor is invalid or was not properly declared.

Action: Check the statement syntax and spelling of the identifier and check that a reserved word was not accidentally used. If necessary, define the identifier in a variable declaration or DECLARE statement ahead of the line in error.

PCC-00004: Mismatched IF/ELSE/ENDIF block at line number in file string

Cause: There is an EXEC ORACLE ELSE or EXEC ORACLE ENDIF statement without a matching EXEC ORACLE IFDEF statement.

Action: Add the missing EXEC ORACLE IFDEF statement or delete or move the EXEC ORACLE ELSE or EXEC ORACLE ENDIF statement.

PCC-00005: Unsupported datatype in line number of file string

Cause: A host variable defined in the Declare Section has an unsupported datatype or has a scale or precision outside the supported range.

Action: Redefine the host variable using a supported datatype. Check that the scale and precision of a numeric variable are in the accepted range.

PCC-00007: Invalid WHENEVER condition at column number in line number of file string

Cause: A condition other than SQLERROR, SQLWARNING, or NOT FOUND was specified in an EXEC SQL WHENEVER statement, or one of these was used, but spelled incorrectly.
**Action:** Correct the spelling of the WHENEVER condition or use a host-language IF statement to test the special condition.

**PCC-00008: Invalid WHENEVER action at column number in line number of file string**

**Cause:** At least one of the following:
- An action other than CONTINUE, DO, GOTO, or STOP was specified in an EXEC SQL WHENEVER statement.
- One of the specified actions was spelled incorrectly.
- The host language does not allow the action (STOP is illegal in Pro*Pascal programs).
- A GOTO label is invalid.

**Action:** Check that the host language allows the specified WHENEVER action. If necessary, correct the spelling of the WHENEVER action or correct the GOTO label.

**PCC-00009: Invalid host variable at column number in line number of file string**

**Cause:** A host variable used in an EXEC SQL statement was not declared in the Declare Section or has an unsupported datatype.

**Action:** Declare the host variable in the Declare Section, making sure it has one of the supported datatypes.

**PCC-00010: Statement out of place at line number in file string**

**Cause:** An EXEC statement was not placed properly in the host program. For example, there might be a data manipulation statement in the Declare Section. In a Pro*COBOL program, the Declare Section might be outside the WORKING-STORAGE or LINKAGE SECTION.

**Action:** Remove or relocate the statement.

**PCC-00011: Already in a declare section at line number in file string**

**Cause:** A BEGIN DECLARE SECTION statement was found inside a Declare Section.

**Action:** Remove the extra BEGIN DECLARE SECTION statement.

**PCC-00012: Not in a declare section at line number in file string**

**Cause:** An END DECLARE SECTION statement without a matching BEGIN DECLARE SECTION statement was found. Either the BEGIN DECLARE SECTION statement is missing or misspelled or the END DECLARE SECTION statement is an extra.

**Action:** Add or correct the BEGIN DECLARE SECTION statement or remove the extra END DECLARE SECTION statement.

**PCC-00013: Unable to open include file "string" at line number in file string**

**Cause:** The precompiler was unable to open the input file specified in the INCLUDE statement. Some possible causes follow:
- The filename is misspelled.
- The file does not exist.
- The search path to the file is incorrect.
- File access privileges are insufficient.
o There is not enough disk space.

o There are too many open files.

**Action:** Check that the file exists, that the search path to the file is correct, that sufficient privileges to access the file have been granted, and that it is not locked by another user. Also, check that there is enough disk space and that the limit for open files is set high enough (check with the system manager).

**PCC-00014: Undeclared SQL Identifier "string" at line number in file string**

**Cause:** The name of a descriptor, statement, or cursor was not declared or is misspelled.

**Action:** Add or correct the descriptor, statement, or cursor declaration.

**PCC-00015: Unrecognized Host Language syntax ignored at line number in file string**

**Cause:** The host language syntax used to define a host variable in the Declare Section is incorrect.

**Action:** Check the syntax and the spelling, then correct the declaration.

**PCC-00016: Unable to open a cursor at line number in file string**

**Cause:** The syntax in a SQL statement is faulty. The precompiler was expecting a host variable, but found something else.

**Action:** Check the syntax and the spelling, then correct the SQL statement.

**PCC-00017: Unable to parse statement at line number in file string**

**Cause:** There is a syntax error in an array declaration. The precompiler was expecting a right bracket (]) but found something else.

**Action:** Check the syntax, then correct the array declaration.

**PCC-00018: Expected "string", but found "string" at line number in file string**

**Cause:** The syntax in a SQL statement is faulty. The precompiler found an unexpected or illegal token.

**Action:** Check the syntax and the spelling, then correct the SQL statement.

**PCC-00019: Unable to obtain bind variables at line number in file string**

**Cause:** The precompiler was unable to find information about an input host variable (bind variable) used in a SQL statement.

**Action:** Check that the input host variable is declared in the Declare Section and used properly in the SQL statement.

**PCC-00020: Unable to obtain define variables at line number in file string**

**Cause:** The precompiler was unable to find information about an output host variable (define variable) used in a SQL statement.

**Action:** Check that the output host variable is declared in the Declare Section and used properly in the SQL statement.

**PCC-00021: Oracle Error: string**

**Cause:** An Oracle error occurred.

**Action:** Refer to the indicated message in the ORA message chapters of this manual.

**PCC-00022: Out of space - unable to allocate number bytes**

**Cause:** The precompiler process ran out of memory.
Action: Allocate more memory to the process, then retry.

PCC-00023: Unable to log off from ORACLE
Cause: An Oracle connection error occurred while the precompiler was trying to log off, probably because ORACLE has been shut down.
Action: Check that ORACLE is available, then retry.

PCC-00024: Indicator variable "string" has wrong type or length at line number in file string
Cause: An indicator variable was not declared in the Declare Section as a 2-byte integer. Indicator variables must be defined as 2-byte integers.
Action: Redefine the indicator variable as a 2-byte integer.

PCC-00025: Undeclared indicator variable "string" at line number in file string
Cause: An indicator variable used in a SQL statement was not declared in the Declare Section or its name is misspelled.
Action: Add or correct the indicator variable declaration.

PCC-00026: Invalid host variable "string" at line number in file string
Cause: A host variable used in a SQL statement was not declared properly. Some possible causes follow:
- It was not declared in the Declare Section.
- Its datatype is not supported.
- Its name is misspelled.
- It is a COBOL group item; in Pro*COBOL, only elementary items are allowed in a SQL statement.
Action: Add or correct the host variable declaration.

PCC-00027: Redeclared SQL Identifier "string" at line number in file string
Cause: The name of a SQL descriptor, statement, or cursor was re-declared (that is, declared twice)
Action: Check the spelling of the identifier, then, if necessary, remove the extra declaration.

PCC-00028: Option "string" not legal as EXEC ORACLE OPTION
Cause: A precompiler option was specified inline in an EXEC ORACLE statement. Some options can be specified only on the command line. For example, INAME cannot be specified inline.
Action: Respecify the precompiler option on the command line, instead of in an EXEC ORACLE statement. To see an online display of the precompiler options, enter the precompiler command (with no options) at the operating-system prompt.

PCC-00029: Ambiguous option "string"
Cause: The name of a precompiler option was abbreviated ambiguously. For example, MAX= might refer to MAXLITERAL or MAXOPENCURSORS.
Action: Respecify the full option name or an unambiguous abbreviation. To see an online display of the precompiler options, enter the precompiler command (with no options) at the operating-system prompt.

PCC-00031: Invalid value given for option "string"
**Cause:** The value specified for a precompiler option is invalid, probably because the value is misspelled (as in LTYPE=HORT) or out of range (as in PAGELEN=-55).

**Action:** Check the value, making sure it is spelled correctly and within the legal range.

**PCC-00032: Invalid option "string"**

**Cause:** The precompiler found an invalid precompiler option name. Some possible causes follow:

- The option name is misspelled.
- The specified option does not exist.
- The equal sign (=) between the option name and value is missing or has space around it.

**Action:** Check that the option exists and that its name is spelled correctly. To see an online display of the precompiler options, enter the precompiler command (with no options) at the operating-system prompt. Also check that there is an equal sign between the option name and value.

**PCC-00033: Missing operand for option "string"**

**Cause:** No value was specified for a precompiler option. Either the value is missing or there is space around the equal sign (as in LTYPE=SHORT).

**Action:** Check that a value for each option has been specified and there is no space around the equal sign.

**PCC-00036: No input file name specified**

**Cause:** The input file was not specified on the command line.

**Action:** Use the INAME command-line option to specify the input file.

**PCC-00037: Unable to log on to ORACLE with "string", ORACLE error number: number**

**Cause:** The precompiler was unable to log on to ORACLE with the specified username and password. An ORACLE error with given number occurred when the logon was attempted.

**Action:** Refer to the indicated message in the ORA message chapters of this manual.

**PCC-00038: Unable to open a cursor**

**Cause:** This is an internal error message not usually issued.

**Action:** Call customer support for assistance. If the application does not require syntactic or semantic checking of SQL statements and does not use PL/SQL, specify SQLCHECK=None on the command line.

**PCC-00039: Unable to open input file "string"**

**Cause:** The precompiler was unable to open the input file specified by the INAME precompiler option. Some possible causes follow:

- The filename is misspelled.
- The file does not exist.
- The search path to the file is incorrect.
- File access privileges are insufficient.
Another user has locked the file.

There is not enough disk space.

There are too many open files.

**Action:** Check that the file exists, that the search path to the file is correct, that sufficient privileges have been granted to access the file, and that it is not locked by another user. Also check that there is enough disk space and that the limit for open files is set high enough (check with the system manager).

**PCC-00040: Unable to open listing file "string"**

**Cause:** The precompiler was unable to open the listing file specified by the LNAMES precompiler option. Some possible causes follow:

- The filename is misspelled.
- The file does not exist.
- The search path to the file is incorrect.
- File access privileges are insufficient.
- Another user has locked the file.
- There is not enough disk space.
- There are too many open files.

**Action:** Check that the file exists, that the search path to the file is correct, that sufficient privileges have been granted to access the file, and that it is not locked by another user. Also check that there is enough disk space and that the limit for open files is set high enough (check with the system manager). If a listing file is not needed, specify LTYPE=NONE on the command line.

**PCC-00041: Unable to open output file "string"**

**Cause:** The precompiler was unable to open the listing file specified by the ONAME precompiler option. Some possible causes follow:

- The filename is misspelled.
- The file does not exist.
- The search path to the file is incorrect.
- File access privileges are insufficient.
- Another user has locked the file.
- There is not enough disk space.
- There are too many open files.

**Action:** Check that the file exists, that the search path to the file is correct, that sufficient privileges have been granted to access the file, and that it is not locked by another user. Also check that there is enough disk space and that the limit for open files is set high enough (check with the system manager).

**PCC-00042: Must EXEC SQL INCLUDE SQLCA when mode=ANSI and WHENEVER SQLWARNING used**

**Cause:** When MODE=[ANSI | ANSI14], an attempt was made to use the WHENEVER SQLWARNING statement without declaring the SQLCA. When MODE=[ANSI | ANSI14], declaring the SQLCA is optional, but to use the WHENEVER SQLWARNING statement, the SQLCA must be declared.
Action: Remove all WHENEVER SQLWARNING statements from the program or declare the SQLCA by hardcoding it or copying it into the program with the INCLUDE statement.

PCC-00044: Array size mismatch in INTO/USING. Minimum is: string(number: number)
Cause: The size of an array variable in an INTO/USING clause is too small for the number of rows processed.
Action: Declare all array variables in the INTO/USING clause to have at least the minimum dimension given.

PCC-00045: string clause inappropriate at line number in file string. Ignored.
Cause: There is a misplaced clause at the end of an EXEC SQL statement (an AT clause at the end of a SELECT statement, for example), or the
Action: Check the statement syntax, then relocate or correct the misplaced or invalid clause.

PCC-00047: Unterminated comment/string constant beginning near line number in file string
Cause: A string constant is missing an ending quotation mark, or a comment is missing an ending delimiter.
Action: Check that all comments are delimited and all string constants are enclosed by quotation marks.

PCC-00050: Unable to generate descriptor in program unit ending line number in file string
Cause: The precompiler was unable to generate a descriptor for the compilation unit. This can occur from either of the following:
- A non-existent or improperly implemented Declare Section
- Undetected syntax errors near the beginning of the source file or just before the END DECLARE SECTION statement
Action: Verify that the Declare Section is properly implemented. Then check for syntax errors at the beginning of the compilation unit and before any END DECLARE SECTION statement, and correct as appropriate.

PCC-00051: Size of VARCHAR string is larger than 65533 in line number in file string
Cause: The declared size of a VARCHAR host variable exceeds the precompiler limit of 65533 bytes.
Action: Check the Declare Section, making sure the size of each VARCHAR variable does not exceed the limit of 65533 bytes.

PCC-00053: FOR variable string is invalid type at line number in file string
Cause: The count variable in a FOR clause has the wrong datatype. The datatype must be NUMBER or LONG (or be compatible with NUMBER or LONG).
Action: Check the declaration and check that the count variable has a datatype of NUMBER or LONG (or a compatible Oracle or host-language datatype).

PCC-00054: Expected End-of-Statement at column number in line number of file string
Cause: The precompiler expected to find a statement terminator at the end of an EXEC statement but found something else. This can happen if tabs were
embedded in the source code (because the precompiler has no way of knowing how many spaces a tab represents).

**Action:** If tabs are embedded in the source code, replace them with spaces. Check the statement syntax and check that each EXEC statement has a terminator. For embedded CREATE FUNCTION | PROCEDURE | PACKAGE statements and for embedded PL/SQL blocks, check that the statement terminator is END-EXEC.

**PCC-00055: Array "string" not allowed as bind variable at line number in file string**

**Cause:** A host array was used as a bind (input) variable in the WHERE clause of a SELECT statement. This is not allowed.

**Action:** Remove the host array or replace it with a simple host variable.

**PCC-00056: FOR clause not allowed on SELECT statement at line number in file string.**

**Cause:** A FOR clause was used with a SELECT statement. This is not allowed as data returned from the last loop in the execution of the SELECT overwrites data returned in a previous loop.

**Action:** Remove the FOR clause from the SELECT statement and use a host-language construct to iteratively execute the SELECT statement.

**PCC-00060: Both CURSOR and STATEMENT have AT clauses at line number of file string.**

**Cause:** Two AT clauses, one in a DECLARE STATEMENT statement, the other in a DECLARE CURSOR statement, pertain to the same SQL statement. The AT clause may be specified with either DECLARE STATEMENT or DECLARE CURSOR, but not with both.

**Action:** Remove the AT clause from one of the statements.

**PCC-00061: Error at line number, column number. PLS-number: string**

**Cause:** The precompiler found an error in an embedded SQL statement or PL/SQL block.

**Action:** Refer to the indicated PL/SQL error message to correct the SQL statement or embedded PL/SQL block.

**PCC-00062: Must use option SQLCHECK=SEMANTICS(FULL) when there is embedded PL/SQL**

**Cause:** The precompiler tried to parse an embedded PL/SQL block when SQLCHECK={SYNTAX | NONE}. PL/SQL blocks can be parsed only when SQLCHECK=SEMANTICS is specified.

**Action:** Remove the PL/SQL block or specify SQLCHECK=SEMANTICS.

**PCC-00063: Reached end of file string before End-of-Statement at line number!**

**Cause:** The precompiler encountered an end-of-file while parsing a PL/SQL block.

**Action:** Add the appropriate statement terminator (;) or end-of-block statement (END;) to the PL/SQL block.

**PCC-00064: All uses of a given host variable must use identical indicator variables.**

**Cause:** Two or more occurrences of a host variable in an EXEC SQL statement were associated with different indicator variables. This is not allowed.

**Action:** Rename the indicator variables so that each occurrence of the host variable is associated with the same indicator variable.
PCC-00065: Userid required, but not specified.
  Cause: The SQLCHECK=SEMANTICS option was specified, but the USERID option on the command line was not specified.
  Action: Specify USERID=username/password or enter a username and password when prompted or specify SQLCHECK=[SYNTAX | NONE].

PCC-00066: Userid only used when SQLCHECK = FULL, userid ignored.
  Cause: The USERID option was specified when SQLCHECK={SYNTAX | NONE}. This is unnecessary.
  Action: Specify the USERID option only when SQLCHECK=SEMANTICS.

PCC-00067: Ireclen exceeded. Line number in file string truncated.
  Cause: While reading the input file, the precompiler found a line longer than IRECLLEN.
  Action: Either shorten the input line or specify a larger IRECLLEN value on the command line.

PCC-00068: Host and indicator variables may not have the same name.
  Cause: In an EXEC SQL statement, an indicator variable had the same name as a host variable. The names of a host variable and its associated indicator variable must be different. Also, an indicator variable cannot be used as a host variable.
  Action: Rename the host or indicator variable.

PCC-00069: Host variable "string" has unsupported datatype at line number in file string
  Cause: A host variable had an unsupported datatype. For a list of supported datatypes, see the language-specific supplement to the Programmer's Guide to the Oracle Precompilers.
  Action: Redefine the host variable in the Declare Section, giving it a supported datatype.

PCC-00070: Illegal syntax, Exponential value in SQL statement: string
  Cause: The precompiler found a syntax error while parsing a number coded in scientific notation. The precompiler expected to find a signed integer following the exponentiation indicator (E), but found something else.
  Action: Reformat the number correctly.

PCC-00071: Unable to open message file.
  Cause: The precompiler was unable to open the message file containing the messages that can be issued by the precompiler. This can happen if there are too many open files or if there were problems with installation of the precompiler.
  Action: Check that the limit for open files is high enough (check with the system manager). Otherwise, contact customer support.

PCC-00072: Input file name length exceeds the maximum length
  Cause: The file name length specified exceeded the maximum length. Some operating systems have a maximum file name length.
  Action: Use a file name of length less than or equal to the maximum platform specific file name length.

PCC-00073: Cursor is declared but never OPENed at line number in file string.
**Cause:** A cursor was DECLAREd but was not referenced in an OPEN statement. This is only an informational message.
**Action:** Remove the cursor declaration or code an OPEN statement for the cursor.

**PCC-00075: ":" expected before indicator variable**
**Cause:** An indicator variable was not prefixed with a colon, as required.
**Action:** Prefix a colon to the indicator variable in question.

**PCC-00076: DISPLAY type must be SIGN LEADING SEPARATE**
**Cause:** This message is issued only by Pro*COBOL. DISPLAY SIGN LEADING SEPARATE is the only DISPLAY type supported by Pro*COBOL.
**Action:** Check the spelling of the variable declaration. If necessary, remove the reference to the unsupported DISPLAY type.

**PCC-00077: Colon usage with numeric label in WHENEVER statement is not ANSI**
**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a numeric WHENEVER ... GOTO label was prefixed with a colon. For example the code might have looked like EXEC SQL WHENEVER SQLERROR GOTO :99; This informational message is issued by the FIPS Flagger when FIPS=YES.
**Action:** No action required. However, for ANSI/ISO compliance, prefix alphanumeric (but not numeric) WHENEVER ... GOTO labels with a colon.

**PCC-00078: FIPS warning: Invalid ANSI SQL Identifier**
**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the name given to a host variable:
- is longer than 18 characters,
- does not begin with a letter, or
- contains consecutive or trailing underscores. In the following Pro*C example, the host variable name is 19 characters long and therefore non-compliant: EXEC SQL BEGIN DECLARE SECTION; int department_location: -- not ANSI/ISO compliant EXEC SQL END DECLARE SECTION; This informational message is issued by the FIPS Flagger when FIPS=YES.
**Action:** No action required. However, for ANSI/ISO compliance, change the host variable name so that it is <= 18 characters long, begins with a letter, and does not contain consecutive or trailing underscores.

**PCC-00079: ANSI requires colon on label in WHENEVER statement**
**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, an alphanumeric WHENEVER ... GOTO label was not prefixed with a colon. For example the offending code might look like: EXEC SQL WHENEVER NOT FOUND GOTO no_more; This informational message is issued by the FIPS Flagger when FIPS=YES.
**Action:** No action required. However, for ANSI/ISO compliance, prefix alphanumeric (but not numeric) WHENEVER ... GOTO labels with a colon.

**PCC-00080: TYPE identifier already TYPEd**
**Cause:** The identifier being TYPEd in an EXEC SQL TYPE statement appeared in a previous EXEC SQL TYPE statement. A given identifier can appear in only one EXEC SQL TYPE statement.
Action: Check the spelling of the identifiers. Use different identifiers in the EXEC SQL TYPE statements, or remove one of the EXEC SQL TYPE statements.

PCC-00081: Scale specification not allowed for given datatype
  Cause: The Oracle external datatype referenced in an EXEC SQL VAR or EXEC SQL TYPE statement does not allow a scale specification.
  Action: Check the precision specification and remove the scale specification.

PCC-00082: Length and scale specifications must be an integer
  Cause: A floating point number or a non-number to specify a length or scale was used. Only integers can be used.
  Action: Correct or remove the length and/or scale specification.

PCC-00083: Bind and define variables not allowed in CREATE statement
  Cause: Host variables cannot appear in a CREATE statement. If the makeup of a CREATE statement cannot be known until run time, a dynamic SQL statement must be used to execute it. That is, the program must accept or build the CREATE statement at run time, store it in a host string, then EXECUTE it.
  Action: Correct or remove the erroneous CREATE statement.

PCC-00085: Error writing to file string
  Cause: The precompiler was unable to write to the named output file. Some possible causes follow:
  o Sufficient file access privileges were not defined.
  o Another user has locked the file.
  o There is not enough disk space.
  o There are too many open files.
  Action: Check that sufficient privileges exist to access the file and that it is not locked by another user. Also check that there is enough disk space and that the limit for open files is set high enough (check with system manager).

PCC-00086: Source file string has zero length
  Cause: The source file specified on the command line contains no code. Consequently, there is nothing for the precompiler to process.
  Action: Specify a valid source file containing embedded SQL statements.

PCC-00087: EXEC SQL TYPE statement not allowed for this host language
  Cause: An EXEC SQL TYPE statement was used with a host language that does not support user-defined datatype equivalencing. This feature is available only in Pro*C and Pro*Pascal.
  Action: Remove the offending EXEC SQL TYPE statement.

PCC-00088: User defined type identifier expected
  Cause: The user-defined datatype name in an EXEC SQL TYPE statement is missing or misspelled, is a reserved word, is not a legal identifier in the host-language or conflicts with a base datatype in that language.
  Action: Check the spelling of the user-defined datatype name. If necessary, declare a valid user-defined datatype. User-defined datatype equivalencing is available only in Pro*C and Pro*Pascal.

PCC-00089: Invalid Oracle TYPE specification
**Cause:** The Oracle external datatype name in an EXEC SQL TYPE or EXEC SQL VAR statement is missing or misspelled.

**Action:** Check the spelling of the external datatype name. If necessary, supply the missing datatype name.

**PCC-00090:** Precision/scale specification must be given for DECIMAL datatype

**Cause:** A precision and/or scale specification for the Oracle external datatype DECIMAL in an EXEC SQL TYPE or EXEC SQL VAR statement was omitted.

**Action:** Add the precision and/or scale specification to the EXEC SQL TYPE or EXEC SQL VAR statement.

**PCC-00091:** TYPE statement requires format specification for this Oracle datatype

**Cause:** A length, precision, and/or scale specification for an Oracle external datatype in an EXEC SQL TYPE or EXEC SQL VAR statement was omitted.

**Action:** Add the length, precision, and/or scale specification for the external datatype to the EXEC SQL TYPE or EXEC SQL VAR statement.

**PCC-00092:** Length and/or scale incompatible with specified Oracle datatype

**Cause:** An invalid length or scale for an Oracle external datatype in an EXEC SQL TYPE or EXEC SQL VAR statement was specified.

**Action:** Check that a length large enough to accommodate the external datatype is specified. If a scale is specified, check that it lies in the range -84..99.

**PCC-00093:** Invalid or obsolete option, ignored

**Cause:** The precompiler found an option available in a prior version or different host language but not in the current version or host language.

**Action:** Remove the option specification.

**PCC-00094:** Array length for char[n] datatype must be >= 2

**Cause:** When MODE={ANSI | ANSI14}, a length of less than 2 characters for a char[n] host variable was specified or a simple char variable was specified. When MODE={ANSI | ANSI14}, the length must be at least 2 characters. This message is issued only by the Pro*C precompiler.

**Action:** Correct the declaration so that it specifies a length of at least 2 characters.

**PCC-00095:** Missing PROGRAM, SUBROUTINE, FUNCTION, or BLOCK DATA statement

**Cause:** FORTRAN source files are expected to have at least one PROGRAM, SUBROUTINE, FUNCTION, or BLOCK DATA statement, which the precompiler uses to detect the beginning of a routine or compilation unit.

**Action:** Add one of these statements to the source file.

**PCC-00096:** Array FETCH not allowed for mode=ANSI14

**Cause:** When MODE=ANSI14, an array SELECT or FETCH was attempted. However, array operations are not allowed with MODE=ANSI14.

**Action:** If MODE=ANSI14 must be specified, place the SELECT or FETCH statement in a host-language loop, instead of using the array interface.

**PCC-00097:** Use of DECIMAL and DISPLAY types allowed only for COBOL and PL/1

**Cause:** The DECIMAL and DISPLAY external datatype was used in an EXEC SQL VAR or EXEC SQL TYPE statement with an Oracle precompiler other than
Pro*COBOL or PRO*PL/I. These external datatypes are available only in Pro*COBOL and PRO*PL/I.

**Action:** Remove the reference to the DECIMAL or DISPLAY external datatype from the EXEC SQL TYPE or EXEC SQL VAR statement.

**PCC-00098: Scale specification cannot be used in this context**

**Cause:** In a Pro*C, Pro*FORTRAN, Pro*Pascal program, scale in an EXEC SQL TYPE or EXEC SQL VAR statement in the current context cannot be specified.

**Action:** Remove the scale specification from the EXEC SQL TYPE or EXEC SQL VAR statement.

**PCC-00099: Length cannot be given for types ROWID, DATE, or MLSLABEL**

**Cause:** A length for the ROWID, DATE, or MLSLABEL external datatype was specified in an EXEC SQL TYPE or EXEC SQL VAR statement. This is unnecessary because those are fixed length types.

**Action:** Remove the length specification from the EXEC SQL TYPE or EXEC SQL VAR statement.

**PCC-00100: Non integer label is not ANSI**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a non-integer WHENEVER ... GOTO label was in a Pro*Pascal program. For example, the offending code might look like: EXEC SQL WHENEVER NOT FOUND GOTO quit; This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, use only integer WHENEVER... GOTO labels in a Pro*Pascal program.

**PCC-00101: Lower case 'e' in floating point number is not ANSI**

**Cause:** A Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a lowercase 'e' was used in scientific notation. For example, the offending code might look like: maxnum = 10e38; This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, use an uppercase 'E' in scientific notation.

**PCC-00102: FOR UPDATE is an Oracle extension**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the FOR UPDATE OF clause was used in a cursor declaration. For example, the offending code might look like: EXEC SQL DECLARE emp_cursor CURSOR FOR SELECT ENAME, SAL FROM EMP WHERE DEPTNO = :dept_number FOR UPDATE OF SAL; This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the FOR UPDATE OF clause.

**PCC-00103: AT clause is an Oracle extension**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the AT <db_name> clause was used in a SQL statement. For example, the offending code might look like: EXEC SQL AT oracle3 COMMIT RELEASE; This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the AT <db_name> clause.
PCC-00104: FOR clause is an Oracle extension

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the FOR clause was used in an array-processing SQL statement. For example, the offending code might look like: EXEC SQL FOR :limit INSERT INTO EMP (EMPNO, JOB, DEPTNO) VALUES (:emp_number, :job_title, :dept_number); This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the FOR clause.

PCC-00105: Keyword WORK required here by ANSI

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the keyword WORK was used in a COMMIT or ROLLBACK statement. For example, the offending code might look like: EXEC SQL COMMIT WORK RELEASE; This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the keyword WORK.

PCC-00106: RELEASE is an Oracle extension to the COMMIT and ROLLBACK statements

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the parameter RELEASE was used in a COMMIT or ROLLBACK statement. For example, the offending code might look like: EXEC SQL ROLLBACK RELEASE; This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the parameter RELEASE.

PCC-00107: The CONNECT statement is Oracle implementation dependent

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, the CONNECT statement was used to log on to ORACLE. For example, the offending code might look like: EXEC SQL CONNECT :username IDENTIFIED BY :password; This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, specify the AUTO_CONNECT command-line option instead of using a CONNECT statement.

PCC-00108: This statement is not supported by ANSI

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a nonconforming SQL statement such as PREPARE was used. For example, the offending code might look like: EXEC SQL PREPARE sql_statement FROM :sql_string; This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the nonconforming statement.

PCC-00109: Dynamic SQL and PL/SQL are Oracle extensions to ANSI SQL

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, dynamic SQL or embedded PL/SQL was used. For example, the offending code might look like: EXEC SQL EXECUTE BEGIN SELECT ... END; END-EXEC; This informational message is issued by the FIPS Flagger when FIPS=YES.
**Action:** No action required. However, for ANSI/ISO compliance, do not use dynamic SQL or embedded PL/SQL.

**PCC-00110: Oracle extension to the WHENEVER statement**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a nonconforming keyword such as NOTFOUND, STOP, RAISE, or DO was used in the WHENEVER statement. (Note that NOT FOUND is ANSI-compliant.) For example, the offending code might look like: EXEC SQL WHENEVER SQLERROR STOP; This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use the nonconforming keyword.

**PCC-00111: SQLCHECK value in EXEC ORACLE statement exceeds command line value**

**Cause:** The SQLCHECK option was entered inline and specified a level of checking higher than the level specified (or accepted by default) on the command line. This is not allowed. For example, if SQLCHECK={SYNTAX | LIMITED} is specified on the command line, SQLCHECK={SEMANTICS | FULL} cannot be specified inline.

**Action:** Revise the EXEC ORACLE statement or specify a lower level of checking on the command line.

**PCC-00112: Datatype not supported by ANSI**

**Cause:** An Oracle extension to the ANSI/ISO standard was used. Specifically, a pointer or nonconforming datatype such as VARCHAR was used. For example, the offending code might look like: EXEC SQL BEGIN DECLARE SECTION VARCHAR username[20]; EXEC SQL END DECLARE SECTION This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use pointers or nonconforming datatypes.

**PCC-00113: Value of DBMS option invalid with given value of MODE option**

**Cause:** When MODE={ANSI14 | ANSI13}, DBMS=V7 was specified, or when MODE=ANSI, DBMS=v6 was specified. These option settings are incompatible. Note that the DBMS option was not available before release 1.5 of the Oracle Precompilers.

**Action:** With DBMS=V7, instead of MODE={ANSI14 | ANSI13}, specify MODE={ANSI | ORACLE}. With DBMS=V6, instead of MODE=ANSI, specify MODE={ANSI14 | ANSI13 | ORACLE}, but MODE=ORACLE is recommended.

**PCC-00114: Length spec required in EXEC SQL VAR statements for VARxxx types**

**Cause:** In an EXEC SQL VAR statement, a VARCHAR or VARRAW external datatype was specified without a length. Unlike other types, the maximum length of the data field must be specified for VARCHAR and VARRAW.

**Action:** Add a length specification to the EXEC SQL VAR statement.

**PCC-00115: Array required here**

**Cause:** In an ARRAYLEN statement, the name of a previously declared host array was not specified. The first host variable in an ARRAYLEN statement must be an array. The second host variable, which specifies an array dimension, must be a 4-byte integer. The correct syntax follows: EXEC SQL ARRAYLEN host_array (dimension); The ARRAYLEN statement must appear in the Declare Section along with, but somewhere after, the declarations of host_array and dimension.
**Action:** Check the spelling of both identifiers in the `ARRAYLEN` statement. If necessary, supply the missing host array name.

**PCC-00116: This array already given in an `ARRAYLEN` statement**

**Cause:** The same host array was specified in two different `ARRAYLEN` statements. A given host array cannot be specified in more than one `ARRAYLEN` statement.

**Action:** Check the spelling of the host array names in both `ARRAYLEN` statements. Change one of the names so that they refer to different host arrays or remove one of the `ARRAYLEN` statements.

**PCC-00117: Invalid `ARRAYLEN` length variable type**

**Cause:** A valid array dimension was not specified in an `ARRAYLEN` statement. The array dimension must be specified using a previously declared 4-byte integer host variable, not a literal or expression. For example, the offending code might look like: EXEC SQL `ARRAYLEN` `ename_array` (25); -- illegal dimension

**Action:** Supply a valid array dimension. If necessary, declare a 4-byte integer host variable for use in the `ARRAYLEN` statement.

**PCC-00118: Use of host variable initialization not supported by ANSI SQL**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a host variable was initialized in its declaration, as shown in the following Pro*C example: EXEC SQL BEGIN DECLARE SECTION; int `dept_number` = 20; -- not ANSI/ISO-compliant EXEC SQL END DECLARE SECTION;

This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not initialize host variables in their declarations.

**PCC-00119: Value of const variable in INTO clause will be modified**

**Cause:** A variable declared with the type specifier "const" was used in an INTO clause. Such variables should not be modified and should not be used in an INTO clause.

**Action:** Check the spelling of all identifiers in the INTO clause. If necessary, remove "const" from the host variable declaration or use a different host variable.

**PCC-00120: File I/O error during code generation**

**Cause:** Due by insufficient disk space.

**Action:** Check that there is enough disk space.

**PCC-00121: Arrays of VARCHAR pointers are not supported**

**Cause:** An array of pointers was declared, which is not allowed. However, pointers to scalar types are allowed. With Pro*C, declare pointers to char[n] and varchar[n] variables as pointers to CHAR or VARCHAR (with no length specification).

**Action:** Correct or remove the declaration.

**PCC-00122: Input file name and output file name are identical**

**Cause:** On the command line, the same pathname for INAME and ONAME was specified, which designates the precompiler input and output files, respectively.

**Action:** Change one of the path/filenames.

**PCC-00123: Entire VARCHAR declaration must be on same line**
Cause: In a Pro*C program, a VARCHAR declaration spans more than one line, which is not allowed.
Action: Revise the declaration so that it uses only one line.

**PCC-00124: COMMON_NAME option is specified too late**

Cause: In a FORTRAN program, subroutine, or function, the precompiler option COMMON_NAME was mistakenly specified after the PROGRAM, SUBROUTINE, or FUNCTION statement. If COMMON_NAME is specified inline, its EXEC ORACLE OPTION statement must precede the PROGRAM SUBROUTINE, or FUNCTION statement.

Action: Relocate the EXEC ORACLE OPTION statement or specify COMMON_NAME on the command line.

**PCC-00126: Could not find or open system configuration file**

Cause: The precompiler was unable to find or open the system configuration file (a text file containing preset command-line options, which the precompiler uses by default). Some possible causes follow:

- The file does not exist.
- The search path to the file is incorrect.
- File access privileges are insufficient.
- There are too many open files. However, this message is just a warning. Processing continues even if the system configuration file does not exist.

Action: Check that the file exists, that the search path to the file is correct, and that sufficient privileges exist to access the file. Also check that the limit for open files is set high enough (check with the system manager).

**PCC-00127: string**

Cause: This is a generic error message from the command-line processor.
Action: Correct the indicated error.

**PCC-00128: Command line processor severe error**

Cause: The command line processor encountered a severe error.
Action: After making sure that all the command-line options are specified correctly, call customer support with a full account of all the options and configuration files used.

**PCC-00129: Option "string" must be given**

Cause: A required command-line option is missing. For example, the INAME option, which specifies the name of the input file, might be missing.
Action: Supply the missing command-line option.

**PCC-00132: Indicator array size must not be less than its host variable**

Cause: An host variable array was used with an indicator array declared with a smaller dimension. For example: EXEC SQL BEGIN DECLARE SECTION; int dept_no[20]; short dept_no_ind[10]; EXEC SQL END DECLARE SECTION; ...
SELECT ... INTO dept_no:dept_no_ind ...
Action: Increase the size of the indicator array.

**PCC-00133: Command line option MODE=ANSI required with option NLS_LOCAL=YES**
**Cause:** The precompiler option NLS_LOCAL=YES was used without also specifying MODE=ANSI. The precompiler option MODE=ANSI must be specified if NLS_LOCAL=YES.

**Action:** Set the precompiler option MODE=ANSI in addition to NLS_LOCAL=YES or do not set NLS_LOCAL=YES.

**PCC-00135: Result Set Cursor usage is not standard SQL**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, an Oracle Result Set Cursor has been used. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action required. However, for ANSI/ISO compliance, do not use Result Set Cursors.

**PCC-00136: Invalid SQL_CURSOR declaration**

**Cause:** An array of SQL_CURSOR host variables was declared or, if Pro*COBOL, a PICTURE clause was specified in the SQL_CURSOR declaration. In Pro*FORTRAN, a length specification (i.e. "*n") on the SQL_CURSOR declaration could have been specified. These usages are not supported.

**Action:** Check that the SQL_CURSOR variable is not declared as an array or, if Pro*COBOL, that no PICTURE clause is specified for the SQL_CURSOR. In Pro*FORTRAN, check that there is no length specification (i.e. "*n") for the SQL_CURSOR.

**PCC-00137: Invalid use of SQL cursor host variable**

**Cause:** A SQL_CURSOR variable was used in an INTO or WHERE clause. SQL_CURSOR variables can be used only where ordinary cursor identifiers would be used or, in a PL/SQL block, where a cursor would normally be used.

**Action:** Remove the SQL cursor variable reference from the INTO clause or WHERE clause, or use a host variable of another type in the INTO or WHERE clause.

**PCC-00138: Result Set Cursors are not implemented in this precompiler**

**Cause:** There was an attempt to reference a host variable as a cursor reference. Cursor variables are not implemented in PRO*Pascal or Pro*PL/I.

**Action:** Rewrite your host-language code to use standard SQL cursors.

**PCC-00139: Cannot change MAXLITERAL after an EXEC SQL statement**

**Cause:** The MAXLITERAL option has been used in an inline EXEC ORACLE OPTION statement after an EXEC SQL, EXEC TOOLS, or EXEC IAF statement. This is not allowed.

**Action:** Use the MAXLITERAL option only on the command line or in an EXEC ORACLE OPTION statement placed at the beginning of the input source file.

**PCC-00140: CREATE FUNCTION/PROCEDURE/PACKAGE/TRIGGER are Oracle extensions**

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, one of the following statements was used:

- CREATE FUNCTION
- CREATE PROCEDURE
- CREATE PACKAGE
CREATE TRIGGER

These statements are Oracle extensions to the ANSI/ISO SQL standards. This informational message is issued by the FIPS Flagger when FIPS=YES.

**Action:** No action is required. However, for ANSI/ISO compliance, do not use any of these statements.

**PCC-00141: Thread Safety is not implemented in this precompiler**

**Cause:** There has been an attempt to use CONTEXT sql statements. The thread safety feature is not implemented in PRO*Pascal, Pro*PL/I, or Pro*C 1.x.

**Action:** Rewrite your host-language code to not use contexts.

**PCC-00142: No EXEC SQL CONTEXT USE statement encountered**

**Cause:** No EXEC SQL CONTEXT USE statement was encountered and the option threads=yes was requested.

**Action:** Ensure that the necessary context variable (of type sql_context) has been declared, ALLOCATEd, and USEd prior to any executable SQL statements.

**PCC-00143: Runtime context variable not of correct type**

**Cause:** The runtime context variable referenced in an EXEC SQL CONTEXT USE statement is not of type sql_context.

**Action:** Declare your runtime context variable of type sql_context.

**PCC-00144: UNSAFE_NULL=YES must be used with DBMS=V7 and MODE=ORACLE**

**Cause:** The option UNSAFE_NULL=YES has been used with DBMS=V6 or DBMS=NATIVE (the default) or has been used with MODE=ANSI/ANSI14/ANSI13.

**Action:** Either specify DBMS=V7 and MODE=ORACLE (the default) when using UNSAFE_NULL=YES or do not use UNSAFE_NULL=YES.

**PCC-00145: This statement can only be used with THREADS=YES**

**Cause:** EXEC SQL ENABLE THREADS or one of the EXEC SQL CONTEXT statements has been used, even though option THREADS is set to NO.

**Action:** Specify option THREADS=YES or remove the EXEC ENABLE THREADS or EXEC SQL CONTEXT statement from the source code.

**PCC-00146: Illegal value for host option, ignored**

**Cause:** An invalid host language was specified using the command-line host option. The host option valid values are pro* language specific. For example, for profor, the only valid value is FORTRAN. For procob, the only valid values are COBOL and COB74.

**Action:** Specify a valid host language with the host option.

**PCC-00147: DBMS=V6 no longer supported; using DBMS=NATIVE**

**Cause:** V6 compatibility is no longer supported. The precompiler will precompile as though DBMS=NATIVE was specified.

**Action:** Revise the specified DBMS option value from v6 to another value as desired.

**PCC-01000: You are not authorized to run Pro*COBOL**

**Cause:** The authorization or license to run the Pro*COBOL Precompiler has expired.
**Action**: Call customer support for assistance.

**PCC-01001: Your Pro*COBOL authorization is about to expire**

**Cause**: The authorization or license to run the Pro*COBOL Precompiler is about to expire.

**Action**: Call customer support for assistance.

**PCC-01002: Invalid character "character" in indicator area at line number in file string**

**Cause**: In a Pro*COBOL Precompiler program, only a blank, hyphen (-), asterisk (*), slash (/), or letter “D” is allowed in the indicator area, but the precompiler found another character.

**Action**: Remove or replace the invalid character. If the FORMAT=ANSI option is specified, check for an end-of-line in column 7.

**PCC-01003: Invalid continuation at line number in file string**

**Cause**: In a PRO*COBOL program, a continuation line was completely blank, except for the continuation character.

**Action**: Remove or replace the empty continuation line.

**PCC-01004: In an EXEC statement at end-of-file**

**Cause**: In a Pro*COBOL input file, the last EXEC statement was not terminated properly.

**Action**: Terminate the last EXEC statement with an END-EXEC.

**PCC-01005: PROCEDURE DIVISION not found**

**Cause**: The precompiler could not find the PROCEDURE DIVISION header in a Pro*COBOL program. Some possible causes follow:

- A keyword in the header is missing or misspelled.
- There is an apostrophe in the REMARKS section (the precompiler mistook the apostrophe for the beginning of a string literal).
- There is an unterminated literal in the WORKING-STORAGE SECTION.
- The wrong value for the FORMAT option was specified.

**Action**: Check that the PROCEDURE DIVISION header is in place and spelled correctly, that there is no apostrophe in the REMARKS section, that all literals in the WORKING-STORAGE SECTION are terminated, and that the right value for the FORMAT option is specified.

**PCC-01006: EXEC statement cannot begin in Area A at line number in file string**

**Cause**: In a Pro*COBOL program, EXEC statements must begin in Area B, but the precompiler found a statement beginning in Area A.

**Action**: Move the statement rightward so that it begins in Area B.

**PCC-01007: WORKING-STORAGE SECTION not found**

**Cause**: The precompiler could not find the WORKING-STORAGE SECTION header in a Pro*COBOL program, probably because a keyword is missing or misspelled, or the wrong value for the FORMAT option might have been specified.

**Action**: Check that the WORKING-STORAGE SECTION header is in place and spelled correctly and that the right value for the FORMAT option is specified.

**PCC-01008: Multiple element records not allowed in DECLARE section**
Cause: A few COBOL compilers do not allow group items to be passed as parameters in a CALL statement. (Check the COBOL compiler user’s guide.) If the compiler is one of these, group items within the Declare Section can contain only one elementary item.

Action: Assign each host variable its own group item.

PCC-01009: For hostlan = COB74, a SQL statement must be followed by ELSE or ",".
Cause: In a Pro*COBOL program, an EXEC SQL statement is followed by another statement in the same sentence. An EXEC SQL statement must be the last statement in a COBOL-74 sentence and so must be terminated by the keyword ELSE or a period.
Action: Change the program logic, making the EXEC SQL statement the last statement in the sentence.

PCC-01010: Invalid use of NULL character in character literal
Cause: A null character (binary zero) was found in a string literal. This is not allowed by Pro*COBOL.
Action: Remove the null character from the string literal.

PCC-01011: USAGE IS BINARY clause must be terminated by "," on same line
Cause: The period terminating the USAGE IS BINARY clause must be on the same line as the USAGE clause. This message only occurs on systems that support the COMP5=YES command line option of Pro*COBOL, where where COMP-5 is substituted for BINARY.
Action: Check that the period terminating the USAGE IS BINARY clause is on the same line as the USAGE clause.

PCC-01012: DATA DIVISION not found
Cause: The Pro*COBOL precompiler did not find a DATA DIVISION in the input source file. Pro*COBOL applications are required to have a DATA DIVISION.
Action: Add a DATA DIVISION to the input source file.

PCC-01013: Invalid use of PIC N array variable "string" at line number in file string
Cause: A PIC N variable was declared using an OCCURS clause. Tables of PIC N variables are not supported by the Pro*COBOL precompiler.
Action: Declare the PIC N variable without an OCCURS clause or, if the PIC N variable is not used in any SQL statements, declare it outside the Declare Section.

PCC-01014: "VARYING" not supported with PIC N PICTURE clause
Cause: The keyword VARYING was used in a PIC N variable declaration.
Action: Remove the keyword VARYING from the variable declaration. If you want to declare a PIC N VARCHAR variable, specify the precompiler option VARCHAR=YES and declare the variable as an implicit VARCHAR group item as illustrated by the following example: EXEC SQL BEGIN DECLARE SECTION END-EXEC. ... 01 ENAME. 05 ENAME-LEN PIC S9(4) COMP . 05 ENAME-ARR PIC N(20). ... EXEC SQL END DECLARE SECTION END-EXEC.

PCC-01015: Cannot equivalence PIC N variable string
Cause: A PIC N variable or an implicit VARCHAR group item (with a PIC N variable as an elementary item) was used in an EXEC SQL VAR statement. This is not allowed.
Action: Do not use the PIC N variable in an EXEC SQL VAR statement. If you want an equivalence to an Oracle type using an EXEC SQL VAR statement, use a PIC X variable, instead of a PIC N variable.

PCC-01016: "N" character literals not supported in embedded PL/SQL
Cause: An "N" character literal was used within a PL/SQL block
Action: Remove the "N" character literal from the PL/SQL block.

PCC-01017: The SQLCA and a SQLCODE variable cannot both be used
Cause: The SQLCA has been included and a SQLCODE variable has been declared. This is not allowed as references to the SQLCODE variable are ambiguous and will result in COBOL compiler errors.
Action: Use either the SQLCA or the SQLCODE variable. Remove either the include of the SQLCA or the SQLCODE variable declaration.

PCC-01018: Conversion buffer size can only be specified for character types
Cause: A CONVBUFSZ clause has been used in an EXEC SQL VAR statement where the variable is not of a character datatype.
Action: Remove the CONVBUFSZ clause from the EXEC SQL VAR statement.

PCC-01019: Invalid conversion buffer size
Cause: The size specified in a CONVBUFSZ clause must be an integer in the range 1-32765. Either the size given is not an integer or is outside the required range.
Action: Specify an integer in the range 1-32765.

PCC-01100: You are not authorized to run Pro*FORTRAN
Cause: The authorization or license to run the Pro*FORTRAN Precompiler has expired.
Action: Call customer support for assistance.

PCC-01101: Your Pro*FORTRAN authorization is about to expire
Cause: The authorization or license to run the Pro*FORTRAN Precompiler is about to expire.
Action: Call customer support for assistance.

PCC-01102: Invalid label at line number in file string
Cause: The Pro*FORTRAN Precompiler found an invalid FORTRAN statement label in columns 1 through 6.
Action: Correct or remove the statement label.

PCC-01200: You are not authorized to run Pro*C
Cause: The authorization or license to run the Pro*C Precompiler has expired.
Action: Call customer support for assistance.

PCC-01201: Your Pro*C authorization is about to expire
Cause: The authorization or license to run the Pro*C Precompiler is about to expire.
Action: Call customer support for assistance.

PCC-01202: Identifier "string" truncated to 31 characters
Cause: A host identifier (the name of a host variable, for example) was truncated to the maximum length (31 characters) allowed by the precompiler.
Action: No action required. This message is just informational.

PCC-01300: You are not authorized to run Pro*PL/I
Cause: The authorization or license to run the Pro*PL/I Precompiler has expired.
Action: Call customer support for assistance.

PCC-01301: Your Pro*PL/I authorization is about to expire
Cause: The authorization or license to run the Pro*PL/I Precompiler is about to expire.
Action: Call customer support for assistance.

PCC-01400: You are not authorized to run Pro*Pascal
Cause: The authorization or license to run the Pro*Pascal Precompiler has expired.
Action: Call customer support for assistance.

PCC-01401: Your Pro*Pascal authorization is about to expire
Cause: The authorization or license to run the Pro*Pascal Precompiler is about to expire.
Action: Call customer support for assistance.

PCC-01500: You are not authorized to run Pro*Ada
Cause: The authorization or license to run the Pro*Ada Precompiler has expired.
Action: Call customer support for assistance.

PCC-01501: Your Pro*Ada authorization is about to expire
Cause: The authorization or license to run the Pro*Ada Precompiler is about to expire.
Action: Call customer support for assistance.

PCC-01510: No Package, Procedure or Function statement seen in string
Cause: Every Ada source file must have a package, procedure, or function statement. The precompiler did not find one.
Action: Add the appropriate statement(s) to the source file and rerun Pro*Ada.

PCC-01511: Identifier on line number in file string too long for code generated in file string
Cause: An identifier used in the host program is of a length that causes precompiler-generated code to exceed the length limitation on source lines.
Action: Use a shorter identifier or use the ORECLEN option to increase the allowed line length.

PCC-01512: Invalid EXEC SQL INCLUDE of file string found at line number in file string
Cause: The EXEC SQL INCLUDE statement is not allowed in Pro*Ada.
Action: Embed required source text directly in the Pro*Ada file. Use the "with" context clause to include required packages.

PCC-01513: FIPS warning: Unsupported datatype in line number of file string
**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a host variable was declared with a non-ANSI/ISO standard type.

**Action:** No action required. However, for ANSI/ISO compliance, use only ANSI/ISO standard types.

PCC-01515: FIPS warning: Undeclared host variable "string" at line number in file string

**Cause:** An Oracle extension to the ANSI/ISO SQL standard was used. Specifically, a host variable was declared outside of a Declare Section.

**Action:** No action required. However, for ANSI/ISO compliance, declare the host variable within a Declare Section.
PCC-02010: found end-of-file while scanning string literal  
Cause: A string in a SQL statement, which should be delimited by single quotation marks, was not terminated properly. 
Action: Check that all strings are delimited.

PCC-02011: found identifier greater than 128 characters (truncated)  
Cause: The precompiler found an identifier that was too long. 
Action: Shorten the identifier. SQL identifiers should be limited to 18 characters.

PCC-02012: did not find matching quote for char constant  
Cause: A character constant with a single quotation mark was not terminated. 
Action: Terminate the character constant.

PCC-02013: unknown escape sequence  
Cause: The precompiler found an escape sequence that it could not process inside a string literal. This error can arise when multibyte character strings that can contain shift-in or shift-out escape sequences are used. 
Action: Correct the string representation.

PCC-02014: Syntax error at line number, column number, file string: 
Cause: The precompiler detected an error in C or embedded SQL syntax. This message is followed by a more specific error message. 
Action: Correct the syntax error.

PCC-02015: unable to open include file  
Cause: The precompiler could not open a header file that was specified using the #include preprocessor directive or the EXEC SQL INCLUDE statement. This can happen if the file specification is inaccurate or if read permission or read access rights on the file or on one or more of the directories in the path were not granted. 
Action: Recheck that the file specification is correct, that the file exists, and that read permission has been granted so that the file can be read.

PCC-02016: Absolute path to included file, "string" exceeds the limit of number characters  
Cause: The file name length specified exceeded the maximum length. Some operating systems have a maximum file name length. 
Action: Use a file name of length less than or equal to the maximum platform specific file name length.
PCC-02017: unable to open output file

**Cause:** The precompiler could not open an output file. This could be a generated code output file (.c file) or a listing file. This message can result from many causes. For example: o) A pathname for a specified output file contains a non-existent directory. o) An operating-system error occurred because the file system or disk is full. o) Write permission on the specified directory or directories in the path do not exist.

**Action:** Track down the cause of the error, as suggested above, and correct it.

PCC-02018: found end-of-file while scanning comment

**Cause:** A C comment either in C code or in an embedded SQL statement, was not terminated.

**Action:** Find the unterminated comment and terminate it with */ .

PCC-02019: Preprocessor warning at line number, column number, file string:

**Cause:** This message indicates that a warning condition occurred as the precompiler was doing the preprocessor pass. A more specific warning message will follow this message.

**Action:** Correct the condition according to the action specified for the message that follows.

PCC-02020: Preprocessor error at line number, column number, file string:

**Cause:** This message indicates that an error condition occurred as the precompiler was in the preprocessing phase. A more specific error message will follow this message.

**Action:** Correct the error according to the action specified for the message that follows.

PCC-02021: Found newline while scanning string literal

**Cause:** A string constant contains a newline character, For example char x[] = "Hello world";

**Action:** Remove the newline character.

PCC-02022: Found end of file while scanning a SQL statement

**Cause:** The precompiler encountered an end of file while parsing an EXEC SQL statement.

**Action:** Add statement terminator (;) or complete the EXEC SQL statement.

PCC-02023: Found end of file while scanning a PL/SQL statement

**Cause:** The precompiler encountered an end of file while parsing a PL/SQL statement (EXEC SQL EXECUTE ...).

**Action:** Complete the PL/SQL statement.

PCC-02035: CMD-LINE: CONFIG= option is invalid in a config file

**Cause:** A user configuration file inside a user configuration file cannot be specified. That is, nested configuration files cannot be nested.

**Action:** If there are nested configuration files, move the options from the nested files to the top levels.

PCC-02040: CMD-LINE: Option selected, but no value provided
Cause: An option on the command line was specified, but a value for it was not included. For example, the offending code might look like: proc iname=sample1.pc oname=
Action: Provide a value for the option.

PCC-02041: CMD-LINE: Option does not exist:
Cause: A non existent option on the command line was specified.
Action: See the Programmer’s Guide to the Oracle Precompilers, Release 2.2 for a list of the valid command line options and their possible values.

PCC-02043: CMD-LINE: Option syntax is incorrect
Cause: A value for a command line option was incorrectly specified.
Action: See the Programmer’s Guide to the Oracle Precompilers, Release 2.2 for the correct syntax for specifying command line option values.

PCC-02044: CMD-LINE: Illegal or out of range value for option:
Cause: A value specified for a command line option was not within the accepted range. For example, the range for the MAXOPENCURSORS option is 5 to 256. If a value outside the range is specified, the message is triggered.
Action: See the Programmer’s Guide to the Oracle Precompilers for the ranges that option values can take.

PCC-02045: CMD-LINE: Option is not unique:
Cause: An option name was partially specified on the command line that made it non unique. For example, % proc in=t.pc the "in" option can imply either the INAME or INCLUDE option.
Action: Provide sufficient characters on the command line to make the option name unique.

PCC-02046: CMD-LINE: Unable to open config file:
Cause: A non-existent user configuration file was specified on the command line with the config option.
Action: Provide a valid filename for the configuration file.

PCC-02047: CMD-LINE: Option is not allowed inline:
Cause: An option was entered inline that can only be entered on the command line or in a configuration file. For example, the offending code might look like EXEC ORACLE OPTION (NLS_CHAR=<name>); The NLS_CHAR option can only be entered on the command line or in a configuration file.
Action: Remove the option from the source file, and specify it on the command line.

PCC-02066: CMD-LINE: Could not find or could not open system config file
Cause: The system configuration file has a standard name (pmscfg.h) and a location that is operating system dependent. On UNIX systems, it is located in the ORACLE_HOME/proc directory. If a file named pmscfg.h is not found in the standard location, this warning message is issued.
Action: Create a system configuration file in the standard location. The file can be empty. See also the operating system specific Oracle documentation.

PCC-02081: CMD-LINE: Unterminated option value list or value list was truncated.
Cause: An option that takes a list of values was entered. The value list did not have a closing parenthesis. This error may also occur if the list of values entered on a single line was too long and Pro*C truncated it.

Action: Ensure that all value lists are terminated with a closing parenthesis. Split long value lists into individual entries.

PCC-02100: Unable to initialize PL/SQL

Cause: The precompiler connected to Oracle but could not invoke the PL/SQL engine. This error can result if an earlier release of Oracle7 is used without the Procedural Option.

Action: To use PL/SQL, upgrade to a more recent release of Oracle7.

PCC-02101: Unable to open input file

Cause: The precompiler could not open the input file. This is the .pc file specified in the INAME=option. This means that the file does not exist, that a directory was incorrectly specified in the pathname, or that the person running the precompiler does not have read permission for the file. This message could also result from operating-system errors. For example, an unmounted file system or disk I/O errors, could trigger this error.

Action: Check that permission to read the file exists and that the full pathname has been specified correctly. Check for operating-system problems. See also the operating system-specific Oracle documentation.

PCC-02102: Fatal error while doing C preprocessing

Cause: The precompiler issues this message after a more specific message.

Action: Correct the problem specified in the previous message or messages.

PCC-02103: Password:

Cause: The username was specified on the command line without a password. For example, proc sql=full iname=sample1.pc userid=scott

Action: Re-enter the command line, and include the password or specify the password when prompted.

PCC-02104: Unable to connect to Oracle

Cause: The precompiler could not connect to Oracle with the username, password, and, if applicable, database link that was supplied. Note that this is a precompiler message, not a runtime message. This means that the USERID option value, either on the command line or in a configuration file, was incorrect.

Action: Check that the username and password are current and correct. Run SQL*DBA or SQL*PLUS and verify that connection can be made using that username and password.

PCC-02105: Unable to open list file

Cause: The precompiler could not open the listing file. This message can result from many causes. For example, o) A pathname for a specified listing file contains a non-existent directory. o) An operating-system error occurred because the file system or disk is full. o) Write permission on the specified directory has not been granted.

Action: Track down the cause of the error, as suggested above, and correct it.

PCC-02106: Userid only used when SQLCHECK = FULL, userid ignored.
Cause: The USERID option was specified on the command line, but SQLCHECK was not equal to FULL or SEMANTICS. The USERID has no effect, unless SQLCHECK=FULL or SQLCHECK=SEMANTICS.

Action: This is a warning message only.

PCC-02107: You may not specify PARSE = FULL when CODE = CPP

Cause: The PARSE=FULL and CODE=CPP options were both specified on the command line. The PARSE=FULL option invokes the C parser which does not understand any C++ constructs generated by the precompiler with CODE=CPP option.

Action: Set the PARSE option to either NONE or PARTIAL if the CODE=CPP option is specified.

PCC-02108: UNSAFE_NULL=YES allowed if MODE=ORACLE and DBMS=V7 or V8

Cause: UNSAFE_NULL=YES was specified on the command line, but either the MODE was not ORACLE or the DBMS was not V7 or V8.

Action: Specify MODE=ORACLE and DBMS=V7 or V8 when using UNSAFE_NULL=YES.

PCC-02109: SQLCHECK=None is no longer supported. using SYNTAX

Cause: SQLCHECK=None was specified on the command line but is no longer a supported option. SQLCHECK=SYNTAX was used instead.

Action: This is a warning message only. To avoid this warning, specify SQLCHECK=SYNTAX or SQLCHECK=SEMANTICS.

PCC-02110: DBMS=V6_CHAR is deprecated. Use CHAR_MAP=VARCHAR2, DBMS=V7 instead

Cause: DBMS=V6_CHAR was specified on the command line but is no longer a supported option. The options CHAR_MAP=VARCHAR2 and DBMS=V7 were used instead.

Action: This is a warning message only. To avoid this warning, specify CHAR_MAP=VARCHAR2 and, if required, DBMS=V7.

PCC-02111: CHAR_MAP option ignored. Only CHAR_MAP=VARCHAR2 allowed for DBMS=V6

Cause: DBMS=V6 was specified, and CHAR_MAP was specified with a value other than VARCHAR2. The CHAR_MAP value is ignored.

Action: This is a warning message only. To avoid this warning, specify a DBMS value other than DBMS=V6 or use CHAR_MAP=VARCHAR2.

PCC-02112: OBJECTS option ignored. OBJECTS=YES is not allowed for DBMS=V6 or V7.

Cause: OBJECTS=YES was specified on the Pro*C command line, but the DBMS option value was not valid.

Action: This is a warning message only. To avoid this warning for OBJECTS=YES, use DBMS=V8 or DBMS=NATIVE with a V8 database.

PCC-02113: DBMS=V6 no longer supported; using DBMS=NATIVE, CHAR_MAP=VARCHAR2.

Cause: DBMS=V6 was specified on the command line, but is no longer a supported option value. The options DBMS=NATIVE and CHAR_MAP=VARCHAR2 were used instead.
Action: Check your program to verify that you are not depending on any V6 behavior. Please refer to the Programmer’s Guide to the Pro*C/C++ Precompiler for effects of specifying DBMS=V6.

PCC-02114: Command line argument MODE=ANSI may not be used with DBMS=V6
Cause: The semantics of certain operations (such as character comparison) in Oracle version ^ are not 100% compliant with the ANSI/ISO SQL standards. When V6 semantics are requested, using the DBMS=V6 or DBMS=V6_CHAR option, precompilation with MODE=ANSI is not permitted.
Action: Do not use ANSI mode with V6 options.

PCC-02115: Unable to open output file for writing
Cause: An attempt was made to precompile a header file where the output data file could not be opened (or created) for writing.
Action: Check for appropriate permissions on the directory and possibly file objects (if a data file already exists) to make sure that write permissions have been granted.

PCC-02116: You must specify a file extension using the HEADER option
Cause: An attempt was made to precompile a header file without specifying the name of the extension to use when creating the generated data file.
Action: Use the HEADER option to specify the name of a file extension to use when creating a data file for a precompiled header.

PCC-02117: Semantic checking disabled by TimesTen.
Cause: Semantic checking is not supported by TimesTen
Action: This is a warning message only.

PCC-02129: CMD-LINE: Client supplied static options table is invalid
Cause: This is an internal error message not usually issued.
Action: Call Oracle customer support.

PCC-02132: CMD-LINE: Could not allocate memory
Cause: This is an internal error message not usually issued.
Action: Call Oracle customer support.

PCC-02133: CMD-LINE: Error in string processing function
Cause: This is an internal error message not usually issued. It indicates that a C string function, such as strcpy or strlen, returned an error.
Action: Call Oracle customer support.

PCC-02134: CMD-LINE: Null option supplied
Cause: A zero length option was specified on the command line.
Action: Re-enter the command line with a valid option.

PCC-02135: CMD-LINE: User asked for help
Cause: This is a final message that the precompiler issues when information about the command line options has been requested. For example, if the command proc ? is issued to get a list of current default values for the command line options, this message appears at the end of the list.
Action: No action required.
PCC-02138: CMD-LINE: Internal consistency error
Cause: This is an internal message for program exceptions. An unexpected condition was encountered by the command-line processor and a consistency check failed. Some possible causes of this message include: --invalid command-line options --memory corruption
Action: Report this error to Worldwide Support after gathering the following information: --the events that led to the error --the attempted operations that led to the error --any unusual circumstances prior to this error

PCC-02144: CMD-LINE: Blank characters are not allowed on either side of an equal sign (=)
Cause: An equal sign (=) was either immediately preceded or followed by a blank character.
Action: Precompile your program again without blank characters on either side of any equal sign (=) on the command line.

PCC-02146: CMD-LINE: value of option too long
Cause: The length of the user option exceeded 1023 bytes
Action: Reduce the length of the user option

PCC-02150: Error at line number, column number in file string
Cause: An error was encounter at the given location.
Action: Check the named source file and correct the error using the additional information which follows this error message.

PCC-02151: Line number column number file string:
Cause: An error was encounter at the given location.
Action: Check the listed source file and correct the error using the additional information which follows this error message.

PCC-02152: Unable to open file string to display or list the source line number
Cause: The file contains an error, but could not be reopened to list or display the incorrect line.
Action: Check that the file is intact and it has read permission. Then rerun the operation.

PCC-02153: Open file: string
Cause: A new source file was opened while producing the list file.
Action: No action required; this is an informational message.

PCC-02154: Close file: string
Cause: A source file was closed while producing the list file.
Action: No action required; this is an informational message.

PCC-02200: found unrecognized punctuation sequence
Cause: The error indicates that the precompiler parser encountered a badly-formed identifier or keyword.
Action: Correct the syntax.

PCC-02201: Found syntax error
Cause: This general message precedes one or more specific messages that detail the nature of the error.
**Action:** No action required. Correct the errors diagnosed in the following message(s).

**PCC-02202: No typedef name was given**

**Cause:** The precompiler parser encountered a typedef statement that had no name after the type specification. For example, typedef int;

**Action:** Correct the syntax

**PCC-02203: found end of file when not expected**

**Cause:** The parser can emit this message when a general syntax error occurs, for example, an unmatched ’{’ or ’}.

**Action:** Correct the syntax.

**PCC-02204: EXEC SQL INCLUDE not permitted from within an included file**

**Cause:** EXEC SQL INCLUDE statements cannot be nested. Also, EXEC SQL INCLUDE statement cannot be put inside a file that is included using the #include preprocessor command.

**Action:** Recode the program so that the nested include statement is not required.

**PCC-02205: Parser error at line number, column number, file string**

**Cause:** The precompiler parser encountered a syntax error, either in C code or in SQL code. A more specific message should follow.

**Action:** for any following messages.

**PCC-02206: Host variables are not permitted within a DDL statement**

**Cause:** A Data Definition Language statement cannot use host variables. For example, the statement CREATE TABLE :table_name (c1 char(10)); is illegal, because the name of the table in a CREATE TABLE statement cannot be represented using host variable.

**Action:** Use dynamic SQL to create the names of database objects (tables, views, columns, etc.) at runtime. See the Programmer’s Guide to the Oracle Precompilers, Release2.2 for information about dynamic SQL.

**PCC-02207: Invalid macro name**

**Cause:** The precompiler parser encountered a #define directive that had no macro name associated with it. For example, #define

**Action:** Correct the syntax.

**PCC-02208: No filename specified in #include statement**

**Cause:** The precompiler parser encountered a #include directive that had no filename associated with it. For example, #include

**Action:** Specify appropriate filename with the #include directive, or correct the syntax.

**PCC-02209: Macro invocation has incorrect number of arguments**

**Cause:** A macro invocation in the source does not have the same number of arguments as the macro definition in the #define line.

**Action:** Correct the macro reference or the macro definition.

**PCC-02210: C++ punctuation sequences are not permitted**

**Cause:** C++ punctuation sequences are not supported by the ProC/C++ precompiler.
Action: Rewrite your C++ code without using punctuation sequences and precompile it again.

PCC-02301: cannot reopen input file for reading
Cause: The semantic analysis phase of the precompiler could not reopen the input file to generate the output code.
Action: Check that the input file and its directory protection and privileges do not change during precompilation.

PCC-02302: cannot open code generation output file "string"
Cause: Pro*C was unable to open one or both temporary files required for code generation. The user executing the precompiler must have write permission (and/or the appropriate privileges) on the current directory.
Action: Check that permission exists to create files in the directory where you precompile.

PCC-02303: cannot open include file
Cause: The precompiler was not able to open a header file specified using the #INCLUDE preprocessor directive or the EXEC SQL INCLUDE statement. This can happen if the file specification is inaccurate or if read permission or read-access rights on the file or on one or more of the directories in the path have not been granted.
Action: Recheck that the file specification is correct, that the file exists, and that read permission has been granted so that the file can be read.

PCC-02304: invalid declaration of C function
Cause: A C function using invalid syntax was declared.
Action: Consult a C programming manual and correct the declaration.

PCC-02305: illegal mixing of new and old style C function declarations
Cause: All C functions using either the traditional style (K&R style) function declarations or the new (ANSI) style must be declared; the two styles cannot be mixed.
Action: Adopt a consistent declaration style for functions.

PCC-02306: illegal name of C function
Cause: A C function was declared with a name that is not a legal C identifier.
Action: Use legal C identifiers for all function names.

PCC-02307: void can only be used when single parameter
Cause: A function can be declared or defined using the following syntax: int func1(void) to indicate that the function has no parameters. void can be used only once in this case.
Action: Remove the extra voids in the function definition or declaration.

PCC-02308: identifier required in this function declaration
Cause: A function definition written in ANSI C must have both the name and the type for all parameters.
Action: Rewrite the function definition so that it contains the name of each parameter.

PCC-02309: illegal formal parameter declaration
Cause: A formal parameter to a function was specified without giving its type.
**Action:** Rewrite the function declaration and include types of all parameters in function declarations.

**PCC-02310: formal parameter VARCHARs should be declared as pointers**

**Cause:** Many C compilers allow structures to be passed to and returned from functions. Although a VARCHAR is implemented as a C struct, VARCHARs must be passed to a function as pointers.

**Action:** Take the address of a VARCHAR when it is passed to a function. See the example in the section "Referencing VARCHAR Variables" in the Programmer's Guide to the Oracle Precompilers.

**PCC-02311: cannot have VARCHAR bit fields**

**Cause:** Host variables cannot contain bit fields.

**Action:** Recode the application to remove the bit fields.

**PCC-02312: arrays of VARCHAR greater than 2 dimensions not allowed**

**Cause:** A VARCHAR variable having more that 2 dimensions was declared. Multidimensional arrays are not supported as host variables.

**Action:** Recode the application to remove multidimensional array usage.

**PCC-02313: malformed VARCHAR declaration - missing length**

**Cause:** When a VARCHAR is declared, a length specification is mandatory. For example, the following VARCHAR declaration is meaningless, hence illegal: VARCHAR v1[];

**Action:** Specify the length for each declared VARCHAR.

**PCC-02314: cannot evaluate constant sizeof expression**

**Cause:** A SIZEOF operator was used where a precompiler expression was expected. For example, as the length of a varchar.

**Action:** Eliminate the SIZEOF operator in this instance.

**PCC-02315: cannot evaluate expression as constant**

**Cause:** The specified expression does not evaluate to a constant. Such expressions are required, for example, as the length of a VARCHAR.

**Action:** Replace the expression with one that does evaluate to a constant integer.

**PCC-02316: illegal operator in constant expression**

**Cause:** A non-arithmetic operator was present in a constant expression.

**Action:** Rewrite the expression to eliminate the non-arithmetic operator.

**PCC-02317: illegal cast type expression**

**Cause:** An illegal cast is present in the expression.

**Action:** Remove the illegal cast.

**PCC-02318: missing type expression**

**Cause:** The specified expression is missing the declaration of a type.

**Action:** Specify a type for the expression.

**PCC-02319: expression type does not match usage**

**Cause:** The type of a variable does not match usage. For example, in dynamic SQL, a host variable containing the text of a SQL statement must be declared as a C character type or be equivalenced to the SQL type STRING.
Action: Remove the declaration.

PCC-02320: arithmetic expression does not have correct operand types
Cause: The arithmetic expression must be specified with integral types.
Action: Rewrite the expression using integral types.

PCC-02321: only subtraction between two pointers is permitted
Cause: Pointer values cannot be added, multiplied, or divided. The only arithmetic operation permitted with pointers is subtraction.
Action: Recode to avoid this error message.

PCC-02322: found undefined identifier
Cause: An identifier used in a SQL statement was not defined. For example, a cursor name was referenced that had not been declared, or in a DECLARE CURSOR statement, a statement name was used that had not been PREPAREd.
Action: Provide a declaration for the variable and/or its type identifier.

PCC-02323: found typedef name used in an expression (expecting a value)
Cause: The name of a typedef was found where a variable was expected.
Action: Rewrite the expression and remove the reference to the typedef.

PCC-02324: found variable name used as a typedef name
Cause: The name of a variable was found where a typedef was expected.
Action: Rewrite the expression and specify the correct typedef reference.

PCC-02325: illegal indirection operation
Cause: An attempt was made to use a non-pointer type as a pointer.
Action: Rewrite the expression.

PCC-02326: illegal structure reference operation
Cause: A structure component using invalid syntax was referenced. For example, a -> operator was used instead of a required `.` operator.
Action: Correct the invalid reference.

PCC-02327: struct or struct pointer required
Cause: A scalar host variable was used in a context where a structure (or its pointer) is required.
Action: Make the host variable a structure or add more scalar host variables to satisfy the SQL syntax requirements.

PCC-02328: undefined struct member
Cause: A structure component was referenced that was not declared as part of the structure.
Action: Redefine the structure member.

PCC-02329: found reference to undeclared function
Cause: A function was referenced that was not declared. All function references must be declared.
Action: Declare the function.

PCC-02330: expecting an expression of integer type
**Cause:** The expression does not evaluate to an integer. For example, a SQL FOR expression must evaluate to an integral type.

**Action:** Rewrite the expression.

**PCC-02331: undefined SQL identifier**

**Cause:** All SQL identifiers must be declared before they are used. This message can result when a CURSOR or STATEMENT is not declared (defined) before being referenced.

**Action:** Define the SQL identifier before it is used.

**PCC-02332: attempted to redefine SQL identifier**

**Cause:** A SQL identifier (such as a cursor name) can be defined only once.

**Action:** Do not redefine the SQL identifier. Use a different name.

**PCC-02333: SQL identifier was not declared as a statement**

**Cause:** A SQL statement identifier was referenced in a DECLARE... CURSOR statement that was not PREPAREd.

**Action:** Check that all SQL statement names have been declared. Remember that SQL statement names are identifiers, not variables, and that they are local to the precompilation unit.

**PCC-02334: SQL identifier was not declared as a cursor**

**Cause:** A cursor name was used in an OPEN, FETCH, or CLOSE statement that had not been DECLARED.

**Action:** Check that all SQL cursor names have been declared. Remember that cursors are identifiers, not variables, and that they are local to the precompilation unit.

**PCC-02335: body of cursor must name statement identifier**

**Cause:** In a Dynamic SQL Method 4 application, the DECLARE... CURSOR statement must name a statement identifier that has been PREPAREd in a preceding statement. The PREPARE statement must physically (not logically) precede the DECLARE command.

**Action:** This error message is followed by another message that gives the line and column of the reference to the statement. Recode the application.

**PCC-02336: host variable expression has invalid type**

**Cause:** The host variable was declared using a C type that is not permitted as a host variable. See the Programmer’s Guide to the Oracle Precompilers for a list of the permissible C types for host variables.

**Action:** Use a permissible host variable type.

**PCC-02337: cannot declare multi-dimensioned array for this type**

**Cause:** Host variable arrays of scalars with more than 1 dimension cannot be declared. The only host variables allowed to be multi-dimensioned are CHAR and VARCHAR.

**Action:** Rewrite the variable declaration.

**PCC-02338: structure contains a nested struct or union**

**Cause:** A structure used as a host variable may not have structures or unions nested within it.

**Action:** Rewrite the variable declaration.
PCC-02339: host variables cannot be of union types
    Cause: A C union as a host variable cannot be used.
    Action: This error message is followed by another message that gives the line and column of the reference to the illegal union. Recode, using a struct or individual scalar host variables.

PCC-02340: structure contains a bit field
    Cause: Bit fields are not allowed in host variables because they are meaningless for database DML operations.
    Action: This error message is followed by another message that gives the line and column of the reference to the offending host variable. Recode the application.

PCC-02341: host variable has illegal type
    Cause: A host variable has an unpermitted type (i.e.; enum, void, etc).
    Action: Rewrite the host variable declaration, using a permissible host variable type.

PCC-02342: using WHERE CURRENT OF on cursor defined without FOR UPDATE clause
    Cause: When MODE=Oracle, a cursor defined with a WHERE CURRENT OF clause must also have a FOR UPDATE clause.
    Action: Rewrite the cursor definition.

PCC-02343: body of cursor must be a query expression
    Cause: A cursor definition must be a SELECT statement.
    Action: Rewrite the cursor definition.

PCC-02344: Host variable array size mismatch. Using minimum: number
    Cause: Host variable arrays in a single statement should all be of equal size.
    Action: Redefine the bind variable array lengths to all be the same size.

PCC-02345: SQLCHECK=SEMANTICS must be given when embedded PL/SQL blocks are used
    Cause: Embedded PL/SQL blocks require that the command-line flag SQLCHECK=SEMANTICS is used.
    Action: Use the SQLCHECK=SEMANTICS option. This also requires that the USERID connect option be given.

PCC-02346: PL/SQL found semantic errors
    Cause: A database entity, such as a table or column name, was referenced, that does not exist. This is a compile time error, not a runtime error.
    Action: Check that all referenced objects in PL/SQL statements actually exist and that the necessary access permission on them have been granted.

PCC-02347: PL/SQL found syntax errors
    Cause: A PL/SQL statement was used illegally.
    Action: Check the PL/SQL User's Guide and Reference for the correct syntax.

PCC-02348: indicators are not allowed in EXEC IAF statements
    Cause: Indicator variables associated with host variables cannot be used in EXECIAF statements such as GET and PUT in a user exit.
Action: Eliminate the indicator variables. If feasible (for example with Forms V4), use EXEC TOOLS statements, which do allow indicator variables. See the Programmer's Guide to the Oracle Precompilers for more information of EXECIAF and EXEC TOOLS statements.

PCC-02349: precision must be specified for this type
Cause: In a VAR or TYPE statement, certain Oracle types require that the precision be specified. For example, VARCHAR2 or CHAR.
Action: Indicate the precision.

PCC-02350: cannot equivalence this SQL type
Cause: Datatype or variable equivalencing to the datatypes NUMBER or DECIMAL cannot be used. See the "Datatype Equivalencing" section in the Programmer's Guide to the Oracle Precompilers for more information.
Action: Use the appropriate datatype for the application.

PCC-02351: illegal datatype equivalencing operation
Cause: The datatype specified could not be equivalenced, or the syntax was incorrect in the VAR or TYPE statement.
Action: See the Programmer's Guide to the Oracle Precompilers for a list of the datatypes that can be equivalenced and the correct syntax of the VAR or TYPE statement.

PCC-02352: out of bounds bind position from PL/SQL
Cause: PL/SQL requested a bind position that does not exist.
Action: Contact ORACLE customer support.

PCC-02353: Semantic error at line number, column number, file string:
Cause: This error message precedes a more specific error message.
Action: No action required. Correct the error(s) reported in the following message(s).

PCC-02354: A file included with #include may not contain SQL statements
Cause: The Pro*C Precompiler reads header files referenced in #INCLUDE directives and uses the values defined in them. But the precompiler never generates code using statements in header files, so use of SQL statements in these files is illegal.
Action: Move the SQL statement(s) into the main body of the application or use EXEC SQL INCLUDE to check that the included file is precompiled.

PCC-02355: Invalid or obsolete option, ignored
Cause: A command-line option that is not used in Pro*C Release 2.0 was specified. For example, the option AREASIZE is no longer valid with precompilers used with the Oracle7 Server.
Action: No action required. This is an informational message.

PCC-02356: Warning at line number, column number, file string:
Cause: This is a generic warning message. It precedes a more specific warning.
Action: No action required. Correct the error(s) indicated in the following message(s).

PCC-02357: Function calls may not be used as host variable expressions
Cause: Only objects that are lvalues (that resolve to an address) can be host variables. Because a function call is not an lvalue, one cannot be used in place of a host variable.

Action: Recode the application.

PCC-02358: Identifier following ARRAYLEN must be the name of an array

Cause: A declared array must be specified as the argument for an ARRAYLEN statement. Declare the array textually before the ARRAYLEN statement. See the Programmer's Guide to the Oracle Precompilers for the syntax of the ARRAYLEN statement.

Action: Correct the statement, specifying a host array as the argument.

PCC-02359: Identifier specifying ARRAYLEN must be a 4-byte integer

Cause: The expression that specifies the ARRAYLEN dimension must evaluate to an integer. For example, the statement EXEC SQL ARRAYLEN my_array(1,3) cannot be parsed.

Action: Correct the statement, using an integral dimension.

PCC-02360: This array type is invalid for use with ARRAYLEN statement

Cause: Arrays of some host variables types are not allowed and hence also cannot be used in ARRAYLEN statements. VARCHAR and DATE are examples.

Action: Specify an array with a datatype that can be used in host arrays.

PCC-02361: Use of ARRAYLEN with SQL bind arrays is ignored

Cause: ARRAYLEN is only valid with arrays that can be bound in PL/SQL blocks.

Action: Use an appropriate array type.

PCC-02362: Host variable not declared within SQL DECLARE section

Cause: When MODE=ANSI is specified at precompile time, all host variables must be declared inside Declare Sections. Remember that MODE=ANSI refers to ANSI SQL, not ANSI C.

Action: Add the EXEC SQL BEGIN DECLARE SECTION... EXEC SQL END DECLARE SECTION statements around all host variable declarations.

PCC-02363: Indicator variable must be a structure

Cause: If a host variable is a structure, the associated indicator variable must also be a structure.

Action: Recode the application to create an indicator variable as a structure.

PCC-02364: Host struct and its indicator must have the same number of fields

Cause: When a structure containing indicator variables is declared and associated with a host structure, the indicator structure must contain the same number of fields as the host structure. This is so even when some of the indicators will not be used or even when it would not make sense to do so (for fields constrained as NON NULL, for example).

Action: Redeclare the indicator variable with the correct number of fields.

PCC-02365: Indicator array size cannot be smaller than host array size

Cause: An indicator array must have dimension greater than or equal to the corresponding host variable array dimension.

Action: Change the dimension of the indicator array.
PCC-02366: Command line argument MODE=ANSI may not be used with DBMS=V6
  Cause: The semantics of certain operations (such as character comparison) in Oracle version ^ are not 100% compliant with the ANSI/ISO SQL standards. When V6 semantics are requested, using the DBMS=V6 or DBMS=V6_CHAR option, precompilation with MODE=ANSI is not permitted.
  Action: Do not use ANSI mode with V6 options.

PCC-02367: This indicator variable must be declared as type short
  Cause: An indicator for a host variable of this type must have the C type short. An array of such indicators must be an array of shorts.
  Action: Declare the indicator variable or indicator array as type short.

PCC-02368: An EXEC TOOLS host variable context name is not type char
  Cause: If a host variable is used to define a context name in an EXEC TOOLS GET CONTEXT or EXEC TOOLS SET CONTEXT statement, that host variable must be of a character type.
  Action: Redeclare the context name to a host variable of a char type.

PCC-02369: An EXEC TOOLS host pointer variable is not a pointer
  Cause: The host variable specifying an EXEC TOOLS context must be a pointer type.
  Action: Redeclare the variable, making sure that it is a pointer.

PCC-02370: An EXEC TOOLS MESSAGE host variable is not type char
  Cause: If a host variable is used to define a context name in an EXEC TOOLS GET CONTEXT or EXEC TOOLS SET CONTEXT statement, that host variable must be of a character type.
  Action: Declare the message to a host variable of a char type.

PCC-02371: Illegal FOR clause
  Cause: The argument of a FOR clause must be specified as an integer or as an identifier containing an integer.
  Action: Rewrite the FOR clause.

PCC-02372: FOR clause not allowed in SELECT statement
  Cause: A SQL statement containing a SELECT command cannot contain a FOR clause. The meaning of such a statement would be unclear.
  Action: Rephrase the SELECT statement, removing the FOR clause.

PCC-02373: Invalid declaration in EXEC SQL DECLARE section
  Cause: An improper declaration was placed in a Declare Section. This message is usually caused by including an EXEC SQL TYPE or EXEC SQL VAR declaration in a Declare Section.
  Action: Move the declaration outside of the SQL DECLARE section.

PCC-02374: SQLCHECK value exceeds command line value
  Cause: The value given to the SQLCHECK option in an EXEC ORACLE statement in a program was greater than the value given either on the command line or greater than the default value if no SQLCHECK option was given on the command line. The order of the option values is SEMANTICS>SYNTAX>NONE.
When this warning message is issued, the original value of SQLCHECK (the default or the command-line value) stays in effect.

**Action:** Remove or recode the EXEC Oracle option(s) in the .pc source file to avoid this warning message.

PCC-02375: **SQL statement found outside the body of a function**

**Cause:** A SQL statement other than a declarative, datatype equivalence or WHENEVER statement was found outside the body of a function when PARSE=FULL.

**Action:** Move the SQL statement inside the body of a function.

PCC-02376: **You may not declare SQLCODE when DEF_SQLCODE = TRUE**

**Cause:** The DEF_SQLCODE option may not be specified if a SQLCODE declaration already explicitly appears in the program.

**Action:** Remove the SQLCODE declaration from the program or specify DEF_SQLCODE=NO (the default).

PCC-02377: **Arrays of implicit varchars are not permitted**

**Cause:** An array of implicit VARCHARS was declared when HOSTVARCHAR=TRUE.

**Action:** Rewrite the implicit VARCHAR declaration without using arrays.

PCC-02378: **Invalid type for National Language character variable**

**Cause:** A variable declared as a National Language character using the NLS_CHAR option was not declared as a char or implicit VARCHAR.

**Action:** Declare the variable as a char or implicit VARCHAR or do not specify using the NLS_CHAR option.

PCC-02379: **Cannot equivalence National Language character variables**

**Cause:** A National Language character variable (specified using the NLS_CHAR option) has undergone datatype equivalencing using either the EXEC SQL VAR or TYPE statements.

**Action:** Do not equivalence National Language character variables.

PCC-02380: **Cannot specify a connect mode when altering a user password**

**Cause:** An attempt was made to connect in either SYSOPER or SYSDBA mode while at the same time trying to change passwords using the ALTER AUTHORIZATION clause in the same CONNECT statement.

**Action:** Changing passwords while connecting in SYSOPER or SYSDBA mode is prohibited. Rewrite the connect statement by either removing the ALTER AUTHORIZATION clause or the CONNECT MODE clause.

PCC-02382: **You must specify MODE=ANSI when using NLS_LOCAL=YES**

**Cause:** NLS_CHAR was used to specify NLS multi-byte character variables without specifying MODE=ANSI.

**Action:** Specify MODE=ANSI on the command line when using NLS_LOCAL=TRUE.

PCC-02383: **Expecting an expression of type OCIExtProcContext**

**Cause:** The type of the bind variable given in a REGISTER CONNECT USING statement was not (pointer to) OCIExtProcContext.
**Action:** Declare a variable having type (pointer to) OCIExtProcContext and use it in the REGISTER CONNECT USING statement.

**PCC-02384: Missing array length specifier**
**Cause:** An array declaration was given without an array length specifier.
**Action:** Provide the length for the array declaration.

**PCC-02385: CHAR_MAP disallowed when using NLS_CHAR and NLS_LOCAL=TRUE**
**Cause:** The CHAR_MAP option was specified while indicating which host variables are to be treated by the precompiler as NLS multi-byte character variables. This mapping cannot be performed with the option NLS_LOCAL=TRUE. This error also occurs when DBMS=V6 is used in conjunction with NLS_CHAR and NLS_LOCAL=TRUE.
**Action:** Remove either the CHAR_MAP option or set NLS_LOCAL=FALSE. Ensure that DBMS is not set to V6.

**PCC-02386: Use of the AT clause is not permitted here**
**Cause:** An explicit AT clause was used with an ALLOCATE statement or a FETCH/CLOSE statement also using a SQL_CURSOR declaration.
**Action:** Remove the AT clause.

**PCC-02387: Expecting an expression of type sql_cursor**
**Cause:** A host bind variable was used in an ALLOCATE, FETCH or CLOSE statement that was not declared as a result set SQL_CURSOR.
**Action:** Declare the variable to be of type sql_cursor.

**PCC-02388: Arrays not allowed in FROM/WHERE clause of SELECT statement**
**Cause:** A host array was used in the WHERE clause of a SELECT-INTO statement.
**Action:** Rewrite the SELECT statement without using arrays or use a cursor.

**PCC-02389: Arrays not allowed as input bind variables in SELECT list**
**Cause:** A host array was used in the SELECT list of a SELECT-INTO statement.
**Action:** Rewrite the SELECT statement without using arrays in SELECT list.

**PCC-02390: No EXEC SQL CONTEXT USE statement encountered**
**Cause:** No EXEC SQL CONTEXT USE statement was encountered and the option threads=yes was requested.
**Action:** Ensure that the necessary context variable (of type SQL_CONTEXT) has been declared and that has been ALLOCATEd and USEd prior to any executable SQL statements.

**PCC-02391: Runtime context variable not of correct type**
**Cause:** The host variable in a EXEC SQL CONTEXT USE statement or in the RETURNING clause of a REGISTER CONNECT statement was not declared to be of type SQL_CONTEXT.
**Action:** Declare the runtime context variable to be of type SQL_CONTEXT.

**PCC-02392: You are already in an EXEC SQL DECLARE SECTION**
**Cause:** A SQL DECLARE SECTION appears nested inside another one.
**Action:** Do not nest DECLARE SECTIONS. Remove any nested inner ones.
PCC-02393: SQL statement found inside an EXEC SQL DECLARE SECTION
Cause: An executable SQL statement appears inside a DECLARE SECTION.
Action: Move the SQL statement into the body of a function.

PCC-02394: Input file name and output filename are identical
Cause: The values of INAME and ONAME are the same or the default output filename is the same as that specified by ONAME.
Action: Use ONAME to specify a different filename for the output file.

PCC-02395: Using arrays of structs requires that the struct be named
Cause: An array of some unnamed struct was used as a host variable. When using arrays of structs, the struct requires a name or tag.
Action: Provide a name for the struct.

PCC-02396: Illegal use of arrays inside an array of structs
Cause: An array of a struct that contained arrays of scalars or two-dimensional char or VARCHAR fields was used as a host variable.
Action: Rewrite the struct so that there are no scalar arrays or two-dimensional char or VARCHAR fields.

PCC-02397: VARCHAR declarations not permitted in #include file
Cause: A VARCHAR declaration was found in a file included using a #include form.
Action: Use the EXEC SQL INCLUDE form to include files with VARCHAR declarations instead.

PCC-02398: Indicator ignored in this statement for this type
Cause: An indicator variable was used in a host/indicator variable pair for some type in a statement that did not require or need one. Typically, indicator variables are not used in ALLOCATE and FREE statements for types other than object or collection types. They are also not used in OBJECT CREATE/DEREF statements for REF types.
Action: Remove the use of the indicator for the type in the specified statement. It will be ignored otherwise.

PCC-02399: Illegal CHAR_MAP option value for DBMS=V6. Option ignored.
Cause: A CHAR_MAP option other than CHAR_MAP=VARCHAR2 was specified inline. Since DBMS=V6, this option is ignored for a character or string variable in the offending statement.
Action: Either set DBMS to something other than V6, or specify CHAR_MAP=VARCHAR2.

PCC-02400: This host variable must be declared as a pointer type
Cause: The specified host variable was not declared as a pointer type.
Action: Declare the host variable to be a pointer type.

PCC-02401: Host variable arrays of this type are currently not supported
Cause: Host variable arrays of the specified type are not supported.
Action: Rewrite your program so that there are no arrays of this type.

PCC-02402: Pro*C option OBJECTS=YES is required when using the object cache
Cause: The object cache will be used for this host variable, but OBJECTS=NO was specified on the Pro*C command line.
Action: Specify OBJECTS=YES on the Pro*C command line when using the object cache.

PCC-02403: Invalid indicator variable type for this host variable
Cause: The type of the indicator variable is not appropriate for the specified host variable.
Action: Change the type of the indicator variable to a valid type. Refer to the "Programmer’s Guide to the ORACLE Pro*C/C++ Precompiler" for a discussion of appropriate indicator variable declarations.

PCC-02404: This indicator variable must be declared as a pointer type
Cause: The specified indicator variable was not declared as pointer type.
Action: Declare the indicator variable to be a pointer type.

PCC-02405: Variable is of undefined type
Cause: No declaration was found for the type identifier of the variable.
Action: Provide a valid declaration for the type of the host variable. If using objects in your program, check that the OTT-generated header for the object type was #included and that the typefile was specified in the INTYPE option on the Pro*C command line.

PCC-02406: Expecting the form 'RETURN[ING] REF INTO :<ref>' only
Cause: When using the RETURNING clause in an OBJECT CREATE statement, only a single 'REF INTO :<host variable>' is expected. This error occurs if the expression list to which REF belongs is greater than one or if there are more than one host variables supplied in the into list.
Action: Rewrite the RETURNING clause as per the given specification.

PCC-02407: Object and REF types do not match
Cause: In an OBJECT CREATE or DEREF statement, the types of the given Object and its associated REF do not match.
Action: Make sure that the Object and its REF have the same type. The type information is generated by OTT and should appear in the header file which OTT creates.

PCC-02408: Expecting an expression of some Object type
Cause: The expression is not an Object type. For example, many host variable expressions in the Navigational statements require that the variable be declared of some Object type.
Action: Rewrite the expression or declare the variable to be an Object.

PCC-02409: Expecting an expression of some REF type
Cause: The expression is not a REF type. For example, some host variables in the Navigational CREATE and DEREF statements are required to be declared of some REF type.
Action: Rewrite the expression or declare the variable to be a REF.

PCC-02410: Expecting an expression of some Collection type.
Cause: The expression is not a Collection type. A VARRAY or Nested Table object was expected, but the given host variable did not resolve to a valid Collection type.
Action: Check that the OTT-generated header for the Collection type was properly included in the Pro*C/C++ program and that the typefile was specified in the INTYPE option on the Pro*C/C++ command line.

PCC-02411: Invalid type for INDICATOR descriptor item host variable
Cause: The type of the host variable paired with the INDICATOR descriptor item was invalid. The only permissible types for the INDICATOR item are a signed 2 byte numeric type or an indicator struct generated by the Object Type Translator for a user defined object type.
Action: Either replace the INDICATOR host variable with a valid one having an acceptable type or redefine the existing host variable to be of a valid type.

PCC-02412: FOR clause not permitted in OBJECT GET or SET statement
Cause: An explicit FOR clause was used in an OBJECT GET or OBJECT SET statement. Use of the FOR clause is illegal for these statements.
Action: Remove the FOR clause.

PCC-02413: Number of attributes does not match number of host variables
Cause: The number of attributes supplied in the attribute list of an OBJECT SET of GET statement does not match the total number of host variables also supplied in that statement.
Action: Either remove some attributes or remove some host variables from the statement in order to make the total count for each the same.

PCC-02414: This attribute does not exist in the specified Object
Cause: An attribute given in the attribute list of an OBJECT SET or GET statement is not a member of the specified object in that statement.
Action: Remove the attribute from the list.

PCC-02415: Cannot manipulate Object attributes in an OBJECT GET or SET
Cause: An attempt was made to either GET or SET an attribute of an Object that itself was an Object or REF type.
Action: Remove the attribute from the attribute list in the statement.

PCC-02416: The Object in an OBJECT GET or SET must not be an array
Cause: The Object specified in an OBJECT GET or SET statement is an array which is illegal.
Action: Redeclare the Object so that it is not an array or subscript the Object so that only a single element of the Object array is specified.

PCC-02417: Illegal type conversion between attribute and host variable
Cause: An illegal type conversion was attempted in a Navigational GET or SET statement between the type of the Attribute and the type of the Host Variable.
Action: Change the type of either the Attribute or the Host Variable.

PCC-02418: Array size mismatch between Object and REF host variables
Cause: The array sizes of the Object and REF variables in an OBJECT CREATE or DEREF do not match.
Action: Adjust the array dimensions of the two host variables so that they are equal to one another.

PCC-02419: Host variable arrays not allowed in an OBJECT SET or GET
Cause: An array was found in the host variable list of an OBJECT SET or GET statement.

Action: Only scalars are allowed (except for single dimensioned char or varchar variables) in the host variable list of an OBJECT SET or GET. Make sure to use only scalars in these statements.

PCC-02420: Incomplete (or missing) type specification

Cause: An incomplete or perhaps missing type specification was given when declaring a host variable used in some SQL statement.

Action: Provide a complete type definition when declaring host variables intended for use inside any SQL statements.

PCC-02421: This host variable requires the use of an indicator variable

Cause: No indicator variable was provided (or matched) with a specific host variable where one was explicitly required.

Action: Provide an indicator variable for use with the specified host variable in the given SQL statement.

PCC-02422: Invalid value specified for the given context option

Cause: An illegal value was given for the specified runtime context option in the CONTEXT <option> OPTION SET (or GET) statement.

Action: Use a valid option value in the statement for the specified option being manipulated by the statement.

PCC-02423: Host variable has an invalid type for this option value

Cause: The type of the host variable corresponding to a specific option value in a CONTEXT <option> OPTION SET (or GET) statement is invalid for that particular value.

Action: Use a type suitable for the specific value being manipulated.

PCC-02424: The number of values and host variables does not match

Cause: There is a mismatch between the number of values specified and the number of valid host variables given in a CONTEXT <option> OPTION SET (or GET) statement.

Action: Use the same number of host variables as there are values given in that particular statement.

PCC-02425: An indicator variable is not required with this attribute

Cause: In a LOB or Collection DESCRIBE, an Indicator Variable was used with a Host Variable when retrieving a LOB attribute that doesn't require one.

Action: Remove the Indicator Variable.

PCC-02426: Incompatible LOB types

Cause: A LOB operation was attempted between LOBs whose types were not compatible. For example, When ASSIGNing one LOB to another, both LOBs must be of the same type. If they are not, this error results.

Action: Correct the LOB operation by having it function between LOBs of the same type. This may require a redeclaration of one of the LOBs used in the LOB statement performing the specified operation.

PCC-02427: Expression is not of the correct character string type
Cause: The given host variable expression was not declared to be of the required character type. In this case, one of several possible character types would have been accepted. However, the host variable type did not match any of them.

Action: Redeclare the problematic host variable, using one of the permitted character types.

PCC-02428: Buffer type is incompatible with LOB type

Cause: This error can occur in either of the following situations
1. An attempt to READ from a LOB into a buffer whose type was not compatible with the LOB type.
2. An attempt to WRITE a buffer into a LOB whose type was not compatible with the buffer type.

Action: Either the LOB type or the buffer type needs to be changed so that the LOB and buffer types become compatible for the specified operation.

PCC-02429: Expecting an expression of some internal LOB type

Cause: The given host variable was not declared to be an Internal LOB. BLOB, CLOB or NCLOB would have been accepted, however, the type of the host variable did not match any of these.

Action: Redeclare the host variable using one of the Internal LOB types.

PCC-02430: Expecting an expression of some arbitrary LOB type

Cause: The given host variable was not declared to be any type of LOB, Internal or External. In addition to any Internal LOB type, BFILE would also have been accepted, however, the type of the host variable did not match any of these.

Action: Redeclare the host variable using any of the LOB types, Internal or External.

PCC-02431: Expecting an expression of type external LOB (BFILE)

Cause: The given host variable was not declared to be an External LOB. Only BFILE would have been accepted in this case.

Action: Redeclare the host variable using an External LOB type (BFILE).

PCC-02432: Cannot open an external LOB (BFILE) in READ WRITE mode

Cause: An attempt was made to OPEN a BFILE in READ WRITE mode. Writable BFILEs are currently not supported so this operation is considered erroneous.

Action: Do not open BFILEs using READ WRITE mode. BFILEs can only be OPENed in READ ONLY mode.

PCC-02433: Invalid host variable and attribute pairing

Cause: The host variable and attribute pairing in a LOB or Collection DESCRIBE is invalid. Most likely, this was due to some problem with the host variable. For example, this error could occur if the host variable was not declared or is otherwise not provided.

Action: Usually, other, more specific, errors will accompany this one. Correcting some or all of those problems should resolve this error.

PCC-02434: FOR clause not permitted in any LOB statement

Cause: An explicit FOR clause was used in some LOB statement. The use of the FOR clause in LOB statements is erroneous.

Action: Remove the FOR clause.
PCC-02435: This attribute is only valid for internal LOB types
   **Cause:** A request for a LOB attribute was made in a LOB DESCRIBE statement in which the given LOB was not of some Internal LOB type.
   **Action:** Replace the LOB host variable in the LOB DESCRIBE with one that was declared to be an Internal LOB.

PCC-02436: This attribute is only valid for external LOB types (BFILEs)
   **Cause:** A request for a LOB attribute was made in a LOB DESCRIBE statement in which the given LOB was not an External LOB type (BFILE).
   **Action:** Use an External LOB (BFILE) host variable in the LOB DESCRIBE statement.

PCC-02437: Expecting an expression having binary integral type
   **Cause:** A host variable was given that was not declared to be of some acceptable binary numeric integral type. Generally, when this error occurs, a signed or unsigned integral type was expected. Floating point or otherwise imprecise numeric types are considered erroneous.
   **Action:** Replace the problematic host variable with one that was declared using a proper exact numeric integral type.

PCC-02438: Arrays of collection objects are not allowed
   **Cause:** An array of collections was given in a COLLECTION statement. Only scalar (non-array) collection objects are allowed in any of the COLLECTION statements.
   **Action:** Change the declaration of the Collection host variable so that it is not an array.

PCC-02439: FOR clause not allowed in this COLLECTION statement
   **Cause:** An illegal FOR clause was used in a COLLECTION statement that did not allow one, particularly, one of either the TRIM or DESCRIBE COLLECTION statements.
   **Action:** Remove the FOR clause from the statement.

PCC-02440: This attribute is valid for either internal or external LOBs
   **Cause:** A request for a LOB attribute was made in a LOB DESCRIBE statement in which the given LOB host variable was neither an Internal nor an External LOB (BFILE) type.
   **Action:** Use either an Internal or External LOB host variable in the LOB DESCRIBE statement.

PCC-02441: Number of attributes does not match number of host variables
   **Cause:** There is a mismatch between the number of attributes and the number of valid host variables in the LOB or Collection DESCRIBE.
   **Action:** Make sure that for each attribute being requested there is at most a single valid host variable given to hold its value.

PCC-02442: Expecting a value between 1 and 65535 inclusive
   **Cause:** The value specified in the WITH MAX clause of an ALLOCATE DESCRIPTOR statement or the VALUE clause of a GET/SET DESCRIPTOR statement was either less than 1 or greater than 65535.
   **Action:** Specify a value between 1 and 65535 inclusive.

PCC-02443: This usage is only valid when DYNAMIC=ANSI is specified
Cause: One of the following statements was used without specifying a DYNAMIC=ANSI command line option setting
- EXEC SQL ALLOCATE/DEALLOCATE/GET/SET DESCRIPTOR
- EXEC SQL DESCRIBE OUTPUT/INPUT ... USING ... <descriptor>
- EXEC SQL EXECUTE ... INTO ...
- EXEC SQL EXECUTE ... USING ... <descriptor>
- EXEC SQL OPEN ... INTO ...
- EXEC SQL OPEN ... USING ... <descriptor>

Action: Specify DYNAMIC=ANSI or remove statements like those above from the program.

PCC-02444: Invalid combination of descriptor and non-descriptor clauses
Cause: There was a mixing of descriptor and non-descriptor clauses in an ANSI Dynamic SQL statement.
Action: Do not mix descriptors and non-descriptors in the ANSI statement in question.

PCC-02445: USING clause valid only on a PREPAREd dynamic statement
Cause: The USING clause was used with an OPEN cursor statement where the cursor declaration was not for a PREPAREd statement. The correct sequence of statements should be as follows:
- EXEC SQL PREPARE s FROM :stmt;
- EXEC SQL DECLARE c CURSOR FOR s;
- EXEC SQL OPEN c USING ...;

Action: Use the PREPARE statement for the SQL statement and use that in the DECLARE CURSOR statement.

PCC-02446: FOR clause not allowed in a DEALLOCATE statement
Cause: An explicit FOR clause was used in a DEALLOCATE DESCRIPTOR statement.
Action: Remove the FOR clause from the statement.

PCC-02447: Cannot specify destination offset in a LOB WRITE APPEND
Cause: A destination offset was specified in a LOB WRITE APPEND statement. The destination offset is assumed to be the end of the LOB so specifying an explicit destination offset is erroneous.
Action: Remove the destination offset from the LOB WRITE APPEND statement.

PCC-02448: Cannot specify a UCS2 variable in the NLS_NCHAR option
Cause: A variable declared as utext, uvarchar, or longuvarchar was specified in the NLS_NCHAR command line option.
Action: Re-precompile without specifying the variable in an NLS_NCHAR command line option.

PCC-02449: Cannot type equivalence a UCS2 type
Cause: A UCS2 type has been type equivalenced in an EXEC SQL TYPE statement or a variable of UCS2 type has been type equivalenced in an EXEC SQL VAR statement.
Action: Remove the EXEC SQL TYPE or EXEC SQL VAR statement.

PCC-02450: Cursor was not declared in scrollable mode
Cause: A cursor which was not DECLAREd in SCROLL mode was used in scrollable mode in the FETCH statement.
Action: Declare the cursor in scroll mode using the SCROLL keyword.

PCC-02451: Value of offset cannot be negative in ABSOLUTE orientation mode
Cause: The offset for the FETCH ABSOLUTE statement is negative.
Action: Value of offset should be positive.

PCC-02452: Common SQL Front End found semantic error
Cause: A database entity, such as a table or column name, was referenced, that does not exist. This is a compile time error, not a runtime error.
Action: Check that all referenced objects in the SQL statements actually exist and that the necessary access permission on them have been granted.

PCC-02453: Must use option SQLCHECK=SEMANTICS(FULL) when option OUTLINE is used
Cause: The precompiler option OUTLINE was used without specifying SQLCHECK=SEMANTICS(FULL).
Action: Set the precompiler option SQLCHECK=SEMANTICS(FULL).

PCC-02454: Must use option OUTLINE when option OUTLINPREFIX is used
Cause: The precompiler option OUTLINPREFIX was used without specifying OUTLINE=YES | <OUTLINENAME>. The precompiler option OUTLINE must be specified if OUTLINPREFIX is used.
Action: Set the precompiler option OUTLINE=YES | <OUTLINENAME>.

PCC-02455: Must use option OUTLINE when option RUNOUTLINE is used
Cause: The precompiler option RUNOUTLINE was used without specifying OUTLINE=YES | <OUTLINENAME>. The precompiler option OUTLINE must be specified if RUNOUTLINE is used.
Action: Set the precompiler option OUTLINE=YES | <OUTLINENAME>.

PCC-02456: Unable to open Outline SQL file
Cause: Pro* C was unable to open the OUTLINE SQL file. The user executing the precompiler must have write permission (and/or the appropriate privileges) on the current directory.
Action: Check that permission exists to create files.

PCC-02457: Unable to open Outline LOG file
Cause: Pro* C was unable to open the OUTLINE LOG file. The user executing the precompiler must have write permission (and/or the appropriate privileges) on the current directory.
Action: Check that permission exists to create files.

PCC-02458: Outline name length exceeds the allowed limit
Cause: Outline name <value of outline option>_<filename>_<filetype>_<seqno> has exceeded the allowed limit.
Action: Use OUTLINPREFIX option to specify the outline name which will be well in the permitted limit.

PCC-02459: Number of outlines has exceeded the limit
Cause: Number of outlines that can be created has exceeded the file limit. Allowed outlines per file is 10000.

Action: Split the file so that each file can have not more than 10000 outlines.

PCC-02460: Outline cannot be created

Cause: Outline cannot be created as there is syntax error; or outlines are not supported on that statement.

Action: Correct the syntax error in the actual SQL used in the file or refer to "Performance Tuning Guide" for the list of supported statements.
SQL-01075: you are currently logged on
  Cause: There is already a connection on this host.
  Action: Do not attempt the second connection.

SQL-02100: Out of memory (i.e., could not allocate)
  Cause: SQLLIB was unable to allocate enough memory to execute the program.
  Action: Allocate more memory to the user session, then rerun the program. If the
          error persists, call customer support for assistance.

SQL-02101: Inconsistent cursor cache. Unit cursor/global cursor mismatch
  Cause: This internal error typically indicates a memory-related error.
  Action: Check the program for memory-related errors, such as invalid pointers or
           array-bounds violations.

SQL-02102: Inconsistent cursor cache. No global cursor entry.
  Cause: This internal error typically indicates a memory-related error.
  Action: Check the program for memory-related errors, such as invalid pointers or
           array-bounds violations.

SQL-02103: Inconsistent cursor cache. Out of range cursor cache reference
  Cause: This internal error typically indicates a memory-related error.
  Action: Check the program for memory-related errors, such as invalid pointers or
           array-bounds violations.

SQL-02104: Inconsistent host cache. No cursor cache available
  Cause: This internal error typically indicates a memory-related error.
  Action: Check the program for memory-related errors, such as invalid pointers or
           array-bounds violations.

SQL-02105: Inconsistent cursor cache. Global cursor not found
  Cause: This internal error typically indicates a memory-related error.
  Action: Check the program for memory-related errors, such as invalid pointers or
           array-bounds violations.

SQL-02106: Inconsistent cursor cache. Invalid Oracle cursor number
  Cause: This internal error typically indicates a memory-related error.
  Action: Check the program for memory-related errors, such as invalid pointers or
           array-bounds violations.
SQL-02107: Program too old for runtime library; please re-precompile it
  
  **Cause:** The program was precompiled by an older version of the Oracle Precompilers, which is incompatible with this release of SQLLIB.
  
  **Action:** Precompile the program with a newer version of the Oracle Precompilers.

SQL-02108: Invalid descriptor passed to run-time library
  
  **Cause:** This internal error typically indicates a memory-related error.
  
  **Action:** Check the program for memory-related errors, such as invalid pointers or array-bounds violations.

SQL-02109: Inconsistent host cache. Host reference is out of range
  
  **Cause:** This internal error typically indicates a memory-related error.
  
  **Action:** Check the program for memory-related errors, such as invalid pointers or array-bounds violations.

SQL-02110: Inconsistent host cache. Invalid host cache entry type
  
  **Cause:** This internal error typically indicates a memory-related error.
  
  **Action:** Check the program for memory-related errors, such as invalid pointers or array-bounds violations.

SQL-02111: Heap consistency error
  
  **Cause:** This internal error typically indicates a memory-related error.
  
  **Action:** Check the program for memory-related errors, such as invalid pointers or array-bounds violations.

SQL-02112: SELECT..INTO returns too many rows
  
  **Cause:** A SELECT...INTO statement returned more rows than can be stored in the host variable provided.
  
  **Action:** There are 3 possible solutions:

  1. Use the precompiler option select_error=no.
  2. Declare a host variable with a larger array dimension.
  3. Declare a cursor or cursor variable for the select statement.

SQL-02113: Unable to open message file
  
  **Cause:** SQLLIB was unable to find or open the sqllib message file sql*.msb
  
  **Action:** Check that the file exists in the mesg directory and that it is readable

SQL-02114: Invalid SQL Cursor usage: trying to CLOSE a CLOSEd cursor
  
  **Cause:** An attempt was made to CLOSE a cursor that was already CLOSEd with MODE={ANSI | ANSI14}. A CLOSEd cursor can be re-CLOSEd only when MODE={ORACLE | ANSI13}.
  
  **Action:** When MODE={ANSI | ANSI14}, verify that a cursor is not already CLOSEd before trying to CLOSE it. Specify MODE={ORACLE | ANSI13} if a CLOSEd cursor is to be re-CLOSEd.

SQL-02115: Code interpretation problem -- check COMMON_NAME usage
  
  **Cause:** With PRO*FORTRAN, this error occurs if the precompiler option COMMON_NAME is specified incorrectly. With other Oracle Precompilers, this error occurs when the precompiler cannot generate a section of code.
  
  **Action:** With Pro*FORTRAN, when using COMMON_NAME to precompile two or more source modules, make sure to specify a different common name for each
module. With other Oracle Precompilers, if the error persists, call customer support for assistance.

**SQL-02116: FATAL ERROR: Reentrant code generator gave invalid context**

**Cause:** This internal error typically indicates a memory-related error.

**Action:** Check the program for memory-related errors, such as invalid pointers or array-bounds violations.

**SQL-02117: Invalid SQL Cursor usage: trying to OPEN an OPENed cursor**

**Cause:** An attempt was made to OPEN a cursor that was already OPENed with MODE=[ANSI | ANSI14 | ANSI13]. An open cursor can be re-OPENed only when MODE=ORACLE.

**Action:** When MODE=[ANSI | ANSI14 | ANSI13], verify that a cursor is not already OPENed before trying to OPEN it. Specify MODE=ORACLE if an OPENed cursor is to be re-OPENed.

**SQL-02118: Invalid row for a WHERE CURRENT OF operation**

**Cause:** An attempt was made to reference a nonexistent row using the CURRENT OF clause in an UPDATE or DELETE statement. This happens when no FETCH has been executed or when FETCH returns a "no data found" error that the program fails to trap.

**Action:** Check that the last cursor operation succeeded and that the current row of the cursor is valid. The outcome of a cursor operation can be checked in two ways: implicit checking with the WHENEVER statement or explicit checking of SQLCODE in the SQLCA.

**SQL-02119: Invalid HSTDEF argument**

**Cause:** A non-null ptr was given for a hstdef as the second argument to a call to sqrlrcn when the first argument was also used. Either the first or the second argument to SQLRCN must be null.

**Action:** Pass a null pointer in either the first or second argument to SQLRCN.

*Note: This error *msg* is never actually used. The error *number* is used, given as the return value of sqrlrcn if this error occurs.

**SQL-02120: First and second arguments to SQLRCN both null**

**Cause:** Both the first and second arguments to sqrlrcn were null. An HSTDEF must be passed into SQLRCN in either the form of an OCI Lda (first argument) or as an HSTDEF pointer itself (second argument).

**Action:** Pass in either an OCI LDA or an HSTDEF, but not both. *Note: This error *msg* is never actually used. The error *number* is used, given as the return value of sqrlrcn if this error occurs.

**SQL-02121: Invalid host name**

**Cause:** The host name passed into a SQLFCN call was not used in a previous call to SQLRCN.

**Action:** Use the same identifier used in the corresponding SQLRCN call. *Note: This error *msg* is never actually used. The error *number* is used, given as the return value of sqlfcn if this error occurs.

**SQL-02122: Invalid OPEN or PREPARE for this database connection**

**Cause:** An attempt was made to execute an OPEN or a PREPARE statement using a cursor that is currently open for another database connection and, therefore, cannot be used for this connection.
**Action:** Close the cursor to make it available for this connection or use a different cursor for this connection.

**SQL-02123: Context referenced in EXEC TOOLS GET CONTEXT statement not found**

**Cause:** The context name given in the EXEC TOOLS GET CONTEXT statement was never stored with an EXEC TOOLS SET CONTEXT statement.

**Action:** Use the EXEC TOOLS SET CONTEXT statement to save any contexts to be retrieved later.

**SQL-02124: NULL value returned by EXEC TOOLS statement**

**Cause:** A NULL value was returned by EXEC TOOLS for a host variable that lacks an indicator variable. This error is returned only when MODE=ANSI. When MODE=ORACLE, although the value of the host variable is indeterminate, no error is generated.

**Action:** Associate an indicator variable with each host variable to which nulls might be returned.

**SQL-02125: Connect error, can’t get error text**

**Cause:** No connection (not even to the default host) was available, so SQLLIB could not get the message text for the Oracle error that occurred. However, SQLLIB returns the Oracle error number, which can be used to look up the message.

**Action:** Look up the appropriate message in the Oracle7 Server Messages manual, and follow the Cause and Action information provided.

**SQL-02126: Count of array elements cannot be negative (i.e. < 0)**

**Cause:** The precompiler found a negative number of array elements in the the N or F element of the SQLDA (SQL Descriptor Area, which is used with dynamic SQL Method 4). Before executing the DESCRIBE statement, N must be set to the dimension of the descriptor arrays. After executing the DESCRIBE statement, N must be reset to the actual number of variables DESCRIBEd, which is stored in the F variable.

**Action:** Check that the N or F variables are set to non-negative values.

**SQL-02127: Precompiler/SQLLIB version mismatch**

**Cause:** The program was linked to an older version of SQLLIB, which is incompatible with this release of the Oracle Precompilers.

**Action:** Relink the program with a newer version of SQLLIB.

**SQL-02128: Sessions still exist, not logged off**

**Cause:** A host was not removed ("logged off") from SQLLIB because XA still has sessions associated with that host.

**Action:** Before calling SQLXDH to drop a host, XA must either drop all sessions for that host or set the "doit_anyway" flag. *Note: This error *msg* is never actually used. The error *number* is used, given as a possible return value to the sqllib xa function sqlxdh.

**SQL-02129: Fetched number of bytes is odd.**

**Cause:** The program tried to FETCH an invalid column value into a multi-byte NLS host variable. Specifically, the column did not contain valid double-byte data.

**Action:** Make sure the column contains only double-byte data. To verify this, use SQL*Plus or Server Manager.
SQL-02130: EXEC TOOLS interface is not available.
   Cause: An attempt was made to link with a version of an Oracle tool that does not support the EXEC TOOLS interface. EXEC TOOLS interface.
   Action: Either upgrade the Oracle tool, or use the EXEC IAF interface.

SQL-02131: Runtime context in use
   Cause: Your application attempted to execute a SQL statement using a runtime context that is already in use.
   Action: Rewrite the application to either wait for one thread to complete before executing another SQL statement with the same runtime context, or to allocate and use a separate runtime context for each thread.

SQL-02132: Unable to allocate runtime context sdfla asdjkIfajs jfja ajdfsdf
   Cause: An attempt to allocate a runtime context failed.
   Action: This error typically occurs when the process memory is low. Allocate more memory and run the application again.

SQL-02133: Unable to initialize process for use with threads
   Cause: This is an internal error.
   Action: Call customer support.

SQL-02134: Invalid runtime context
   Cause: The runtime context associated with this statement has not been properly allocated.
   Action: Rewrite the application to execute the EXEC SQL CONTEXT ALLOCATE statement before executing any SQL statements.

SQL-02135: Unable to initialize date format using supplied mask
   Cause: The runtime library was unable to issue a set date format statement with the date format mask supplied.
   Action: Check the validity of the date format and correct if necessary. Check the ORA error number for further information.

SQL-02136: Invalid NCHAR character set id
   Cause: An attempt was made to bind or define an NCHAR host variable, and the NLS_NCHAR variable was not set correctly.
   Action: Set the NLS_NCHAR environment variable to a valid fixed width character set id and run the application again.

SQL-02137: Multi-threaded agent with no RETURNING clause present
   Cause: The EXEC SQL REGISTER CONNECT statement does not contain a RETURNING clause and the agent is running in threaded mode.
   Action: Re-code the statement to use a RETURNING clause that references a declared sql_context host variable.

SQL-02138: No external procedure context exists
   Cause: The external procedure context passed in the EXEC SQL REGISTER CONNECT statement is not valid.
   Action: Ensure that you have done the following:
   1. Created the PL/SQL procedure/function with a CONTEXT parameter.
2. Included OCIExtProcContext in the formal parameter list of the external procedure

3. Correctly passed the OCIExtProcContext to the EXEC SQL REGISTER CONNECT statement.

**SQL-02139: Unable to get the OCI handles**

**Cause:** The call to OCIExtProcGetEnv failed.

**Action:** Ensure that the OCIExtProcContext that the external procedure has been created with a CONTEXT parameter and that this context is correctly referenced in the EXEC SQL REGISTER CONNECT statement.

**SQL-02140: An unnamed connection already exists**

**Cause:** An attempt to register an external procedure context was made when an unnamed connection already exists for the runtime context.

**Action:** Do not attempt to establish any connections with the EXEC SQL CONNECT statement from external procedures.

**SQL-02141: Collection descriptor has not been allocated**

**Cause:** An unallocated collection descriptor was referenced in a COLLECTION SET or COLLECTION GET statement.

**Action:** Allocate the collection descriptor with the EXEC SQL ALLOCATE statement. e.g. EXEC SQL ALLOCATE :coldesc_p;

**SQL-02142: Collection is NULL**

**Cause:** The collection referenced in an EXEC SQL COLLECTION statement is null.

**Action:** Check the status of the associated indicator variable prior to executing an EXEC SQL COLLECTION statement.

**SQL-02143: Target object has not been properly allocated**

**Cause:** An attempt was made to retrieve elements from a collection into an unallocated object pointer.

**Action:** Allocate the object pointer with the EXEC SQL ALLOCATE statement.

**SQL-02144: Invalid ANSI dynamic usage**

**Cause:** An ANSI allocate, deallocate, get or set descriptor statement was encountered when dynamic option was not set.

**Action:** Precompile your source with option dynamic=ansi.

**SQL-02145: Invalid dynamic descriptor**

**Cause:** An attempt to access an unallocated or invalid descriptor was encountered.

**Action:** For ANSI descriptors, check that descriptor name is valid and descriptor has been allocated and not previously deallocated. Or if using Oracle descriptors (sqlda) with mode=ansi also use dynamic=oracle.

**SQL-02146: Attempt to allocate an existing descriptor**

**Cause:** An attempt allocated a descriptor which has previously been allocated was encountered.

**Action:** Use and unique descriptor name or deallocate the descriptor before attempting to reallocate it.

**SQL-02147: ANSI Dynamic occurrence value out of range**
Cause: The value clause in a dynamic GET or SET statement is less than one or greater than MAX given for descriptor allocation.

Action: Supply a number for the VALUE clause between 1 and the MAX occurrences supplied when the descriptor was allocated.

SQL-02148: ANSI Dynamic count value out of range

Cause: The count in a dynamic GET or SET statement is less than one or greater than MAX given for descriptor allocation.

Action: Supply a number for the COUNT clause between 1 and the MAX occurrences supplied when the descriptor was allocated.

SQL-02149: ANSI Dynamic insufficient item descriptor areas

Cause: The SQL statement being described contains more output items (or columns) than were allocated in the descriptor.

Action: Increase the MAX number of occurrences when allocating the descriptor.

SQL-02150: Encountered zero length in ANSI dynamic SET statement

Cause: An invalid length of zero was encountered in an ANSI dynamic statement.

Action: Set the length to a non-zero value.

SQL-02151: Invalid host variable for exact numeric SET statement item

Cause: An host variable with an invalid type or length was used to get or set an exact numeric item in an ANSI dynamic statement.

Action: Make sure your host variable is and int or short for C or for COBOL, S9(4) or S9(9) binary/comp/display sign leading separate.

SQL-02152: Invalid numeric variable for use in an array GET/SET statement

Cause: An host variable with type other than int or short for C or S9(4) or S9(9) binary or comp was used for an exact numeric with and array size > 1.

Action: Use only int or short for C or S9(4) or S(9) binary or comp for COBOL when supplying an exact numeric in conjunction with the for clause to indicate arrays. Specifically, display sign leading separate is not allowed in this context.

SQL-02153: Invalid character variable for use in a GET/SET statement

Cause: An host variable with type other than character, string or varchar was found as an item name (other than DATA item) in an ANSI Dynamic GET or SET descriptor statement.

Action: Host variable types for character items (other than the DATA item) in ANSI dynamic GET or SET descriptor statements must not be of type LONG or LONG VARCHAR. Redeclare the variable to be character, string or varchar type.

SQL-02154: Invalid or unset data type for host variable in ANSI Dynamic

Cause: An ANSI Dynamic SET statement with item name DATA was encountered with out a valid TYPE having been previously set and option mode=ansi was used.

Action: With mode=ansi, you must set the TYPE before setting the DATA. Issue a SET statement with correct item TYPE or, for output issue a DESCRIBE to set the item type. Or use mode=oracle which allows the type to default to the type of the bind/define host variable.

SQL-02155: Date Time Interval only valid with Dynamic=ANSI

Cause: An attempt to access the datetime interval code or precision was encountered when type_code option not set to ANSI.
**Action:** Use precompiler option `type_code=ansi` to access the date time interval code or date time interval precision

**SQL-02156: Invalid type for Indicator or Returned Length**

**Cause:** A host variable associated with the item Indicator or Returned Length must be of type short or s9(4) comp. If value semantics and scalar they may also be gotten into display sign leading separate host variables

**Action:** Use signed short for indicator, ref indicator and returned length, ref returned length host variables in C. For COBOL use s9(4) comp. for GETs only with non-arrays and you may use display sign leading separate host variables

**SQL-02157: Source or destination lob is invalid**

**Cause:** One of the lobs used in the lob append call is invalid or possibly null.

**Action:** Make sure the lobs used in the append call are non-null.

**SQL-02158: Unable to establish savepoint**

**Cause:** An internal error occurred while establishing an internal savepoint.

**Action:** Check trace files for errors and rerun your application.
AUD-00611: unable to access the BLOB for reading
   Cause: The BLOB could not be opened for reading.
   Action: Contact Oracle Support Services.

AUD-00612: unable to open export destination file
   Cause: The file could not be created or opened.
   Action: Check that the file does not refer to an existing directory. Check that the file is not locked by another application.

AUD-00613: export destination access denied
   Cause: Permission to write to destination file was denied.
   Action: Refer to the Oracle Multimedia documentation for information on granting privileges for the export() method.

AUD-00614: I/O error during export
   Cause: The export operation failed because of an I/O error.
   Action: Check OS logs and contact Oracle Support Services.

AUD-00702: unable to initialize audio processing environment
   Cause: The initialization of the audio processing procedure failed.
   Action: See the database administrator to make sure that enough memory has been allocated to JServer. If JServer does have enough memory, contact Oracle Support Services.

AUD-00703: unable to read audio data
   Cause: An error occurred while accessing the audio source.
   Action: Make sure the audio source is valid. For external sources, make sure all access privileges are granted.

AUD-00704: invalid input format or corrupted input data
   Cause: The audio data in the source was not in the format specified by the format field of the audio object. In some unusual cases, the audio data is actually corrupted.
   Action: Provide a correct value in the format field. If the correct value is unknown, put NULL in the format field to invoke the DEFAULT format plug-in.

AUD-00705: unsupported input format
   Cause: The file format of the audio data was not supported. This error can only occur in the DEFAULT format plug-in package.
Action: Refer to the Oracle Multimedia documentation for supported formats.

**AUD-00706: unsupported or corrupted input format**

*Cause:* The audio data was either corrupted or the file format was not supported.

*Action:* Refer to the Oracle Multimedia documentation for supported formats. If the audio data is not corrupted and is in a supported file format, contact Oracle Support Services.

**AUD-00707: unable to read empty audio data**

*Cause:* There is no data in the audio object.

*Action:* Refer to the Oracle Multimedia documentation for information on how to populate the audio object with audio data.

**AUD-00713: internal error while parsing audio data**

*Cause:* An internal error occurred during parsing.

*Action:* Contact Oracle Support Services.

**AUD-00714: internal error**

*Cause:* An internal error occurred.

*Action:* Contact Oracle Support Services.

**AUD-00721: unable to find format plug-in package ORDPLUGINS.ORDX_string_AUDIO**

*Cause:* Custom audio plug-in for user-specified format was not found.

*Action:* Ensure correct audio format is specified or proper custom audio plug-in package is installed.

**AUD-00802: name of index is limited to 22 characters**

*Cause:* The user specified an index name that is more than 22 characters long.

*Action:* Drop this index, and issue the CREATE INDEX statement again with a name that is at most 22 characters long.

**AUD-00803: internal error while processing WHERE clause**

*Cause:* The WHERE clause could not be properly processed.

*Action:* Contact Oracle Support Services.

**AUD-00806: first argument to SpeechContains must be a column**

*Cause:* The first argument to SpeechContains is not a column. This is not allowed.

*Action:* Make sure that the first argument to SpeechContains is a column in a database table.

**AUD-00807: SpeechContains: index of indextype ORDSpeechIndex is required**

*Cause:* SpeechContains was used without an associated index of indextype ORDSpeechIndex.

*Action:* Make sure that SpeechContains is used in the context of an index of indextype ORDSpeechIndex. See the Oracle Multimedia documentation for sample usage scenarios.

**AUD-00808: ORDSpeechIndex: unable to CREATE internal Text index**

*Cause:* CREATE INDEX for ORDSpeechIndex failed when trying to create internal Text index.
**Action:** Make sure that you are supplying a valid parameter string. See SpeechIndexing and Oracle Text documentation for descriptions of a valid parameter string for CREATE INDEX. To return to a consistent state, issue a DROP INDEX command.

**AUD-00809: ORDSpeechIndex: unable to ALTER REBUILD internal Text index**

**Cause:** ALTER INDEX REBUILD for ORDSpeechIndex failed when trying to alter rebuild internal Text index.

**Action:** Make sure that you are supplying a valid parameter string. See SpeechIndexing and Oracle Text documentation for descriptions of a valid parameter string for ALTER INDEX REBUILD. To return to a consistent state, issue a ALTER INDEX REBUILD PARAMETERS('optimize full') command.
IMG-00001: unable to initialize Oracle Multimedia environment

Cause: The image processing external procedure initialization process failed.
Action: Contact Oracle Support Services.

IMG-00002: unrecoverable error

Cause: This is an internal error.
Action: Contact Oracle Support Services.

IMG-00003: exhausted memory while processing image

Cause: Oracle Multimedia exhausted available Java memory during processing.
Action: Increase the JAVA_POOL_SIZE initialization parameter setting.

IMG-00201: unsupported metadata type

Cause: The requested metadata type could not be read from or written to this image format.
Action: Refer to the Oracle Multimedia documentation to select the proper metadata type for this image.

IMG-00202: unsupported character encoding

Cause: The character encoding was not supported for this image format.
Action: Refer to the Oracle Multimedia documentation to select the proper encoding for this image.

IMG-00203: xmlData is invalid

Cause: The XML document was NULL or not schema valid.
Action: Create a schema valid document for input.

IMG-00204: input metadata too long

Cause: The metadata was too long to embed in this image format.
Action: Trim the metadata, or use a different image format.

IMG-00205: cannot add a TIFF directory entry

Cause: No new entries could be added to this directory.
Action: Use a different image format.

IMG-00206: unsupported image format for putMetadata

Cause: Metadata could not be written to this image format.
Action: Use a different image format.
IMG-00207: input parameter is not valid
  Cause: The input parameter value contained an invalid value.
  Action: Correct the input parameter value.

IMG-00208: metadata format parse error
  Cause: The parser detected an error in the embedded metadata.
  Action: Verify that the metadata conforms to proper standards.

IMG-00209: error parsing metadata
  Cause: There was an internal error while parsing the metadata.
  Action: Contact Oracle Support Services.

IMG-00210: unable to get metadata from an empty image
  Cause: There was no data in the input image.
  Action: Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

IMG-00211: metadataType value "string" is invalid
  Cause: The metadataType parameter value was NULL or invalid.
  Action: Correct the metadataType parameter value.

IMG-00212: encoding value "string" is invalid
  Cause: The encoding parameter value was NULL or invalid.
  Action: Correct the encoding parameter value.

IMG-00213: xmlData does not contain an <RDF> element
  Cause: The XML document did not contain an <RDF> element as a child of <xmpMetadata>.
  Action: Create a schema valid document with an <RDF> element.

IMG-00502: invalid scale value
  Cause: An invalid scale value was found while parsing the parameters for the image process function.
  Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00505: missing value in CUT rectangle
  Cause: An incorrect number of values was used to specify a rectangle.
  Action: Use exactly four integer values for the lower-left and upper-right vertices.

IMG-00506: extra value in CUT rectangle
  Cause: An incorrect number of values was used to specify a rectangle.
  Action: Use exactly four integer values for the lower left and upper right vertices.

IMG-00510: string
  Cause: A syntax error was found while parsing the parameters for the image process function.
  Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00511: string
Cause: An error was found while accessing image data.
Action: Contact Oracle Support Services.

**IMG-00512: multiple incompatible scaling parameters found**

*Cause:* Multiple incompatible scaling parameters were found in the image process command string. With the exception of XSCALE and YSCALE, which can be used together in a process command string, scaling functions are mutually exclusive and cannot be combined.

*Action:* Remove scaling functions until only one remains (or two, if they are XSCALE and YSCALE).

**IMG-00513: missing value in scaling operation**

*Cause:* An incorrect number of values was used to specify image dimensions. fixedScale and maxScale require exactly two integer values for the X and Y dimensions of the desired image.

*Action:* Use two values for fixedScale and maxScale.

**IMG-00514: extra value in scaling operation**

*Cause:* An incorrect number of values was used to specify image dimensions. fixedScale and maxScale require exactly two integer values for the X and Y dimensions of the desired image.

*Action:* Use two values for fixedScale and maxScale.

**IMG-00515: incorrect number of input channels**

*Cause:* An incorrect number of values was used to specify input channels. InputChannels requires either one or three channels numbers for the gray or red, green, and blue channel assignments.

*Action:* Use either one or three values to specify the input channels.

**IMG-00516: default channel out of range**

*Cause:* An incorrect value was used to specify the default channel selection.

*Action:* Use a channel number which is less than or equal to the number of bands and greater than zero.

**IMG-00517: height or width not present in parameter string**

*Cause:* Height and/or width were not specified in the setProperties parameter string.

*Action:* Specify both the height and width.

**IMG-00518: invalid value for height or width**

*Cause:* Height and/or width were not positive integers

*Action:* Specify both the height and width as positive integers

**IMG-00519: illegal combination of parameters**

*Cause:* Other than height, width, dataOffset, and userString no other parameters may be specified in the setProperties parameter string when CCITTG3 or CCITTG4 is used as the compressionFormat.

*Action:* Supply only the height and width when compressionFormat is either CCITTG3 or CCITTG4. The dataOffset and userString may optionally be supplied as well.

**IMG-00520: invalid value for numberOfBands**
Cause: NumberOfBands was not a positive integer
Action: Specify numberOfBands as a positive integer

IMG-00521: invalid value for dataOffset
Cause: DataOffset was not a positive integer
Action: Specify dataOffset as a positive integer

IMG-00522: invalid format for parameter value
Cause: A floating point value was specified where an integer is required, or a character value was specified where a numeric value is required.
Action: Specify the correct type of values for process parameters.

IMG-00523: invalid process verb
Cause: A process verb was specified that is not understood by Oracle Multimedia.
Action: Refer to the Oracle Multimedia documentation for a description of valid process verbs.

IMG-00524: mismatched quotes
Cause: Quotation marks used within a process command string were not matched.
Action: Ensure that quotation marks occur in pairs.

IMG-00525: locale error
Cause: This is an internal error.
Action: Contact Oracle Support Services.

IMG-00526: error parsing foreign image description
Cause: An internal error occurred while processing a foreign image.
Action: Contact Oracle Support Services.

IMG-00527: invalid deletePages specified
Cause: The specified value for the deletePages parameter was not valid.
Action: See the Oracle Multimedia documentation for reference information about valid values for deletePages parameter.

IMG-00528: invalid movePages specified
Cause: The specified value for the movePages parameter was not valid.
Action: See the Oracle Multimedia documentation for reference information about valid values for movePages parameter.

IMG-00529: invalid combination of TIFF page operations
Cause: The specified TIFF page operations were not valid.
Action: See the Oracle Multimedia documentation for reference information about valid values for TIFF page operations.

IMG-00530: internal error while parsing command
Cause: An internal error occurred while parsing the command passed to the image processing function or the foreign image setProperties function.
Action: If you are certain that your command is correct, then contact Oracle Support Services.

IMG-00531: empty or null image processing command
Cause: An empty or null image processing command was passed to the image process function.

Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00540: contentFormat and interleave conflict
Cause: Interleave values were specified using both the contentformat and interleave verbs.
Action: Specify interleave using either contentformat or interleave, but not both.

IMG-00541: invalid contentFormat specified
Cause: The specified contentFormat was not valid.
Action: Refer to the Oracle Multimedia documentation for a description of valid contentFormat specifications.

IMG-00542: contentFormat includes invalid extra information
Cause: The specified contentFormat included invalid characters at the end of the parameter string.
Action: Refer to the Oracle Multimedia documentation for a description of valid contentFormat specifications.

IMG-00543: invalid compressionFormat specified
Cause: The specified compressionFormat was not valid.
Action: Refer to the Oracle Multimedia documentation for a description of valid compressionFormat specifications.

IMG-00544: invalid compressionQuality specified
Cause: The specified compressionQuality was not valid.
Action: Refer to the Oracle Multimedia documentation for a description of valid compressionQuality specifications.

IMG-00545: invalid cut values specified
Cause: An invalid value was found while parsing the parameters for the cut operation.
Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00546: invalid page number specified
Cause: An invalid page number was specified.
Action: Specify page numbers that are not negative.

IMG-00547: invalid channelOrder specified
Cause: The specified channelOrder was not valid.
Action: Refer to the Oracle Multimedia documentation for a description of valid channelOrder specifications.

IMG-00548: invalid interleave specified
Cause: The specified interleave was not valid.
Action: Refer to the Oracle Multimedia documentation for a description of valid interleave specifications.

IMG-00549: invalid pixelOrder specified
Cause: The specified pixelOrder was not valid.
Action: Refer to the Oracle Multimedia documentation for a description of valid pixelOrder specifications.

IMG-00550: invalid scanlineOrder specified
Cause: The specified scanline order was not valid.
Action: Refer to the Oracle Multimedia documentation for a description of valid scanlineOrder specifications.

IMG-00551: invalid quantize method specified
Cause: The specified quantization method was not valid.
Action: Refer to the Oracle Multimedia documentation for a description of valid quantization method specifications.

IMG-00552: invalid inputChannels specified
Cause: An invalid value was specified for the inputChannels verb.
Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00553: invalid rotate value
Cause: An invalid value was specified for image rotation. Rotation values must be a floating point number.
Action: Correct the statement by providing a valid rotation value.

IMG-00554: extra value in rotate operation
Cause: Multiple arguments were used to specify image rotation. The rotate operation accepts only a single value.
Action: Provide a single value for the rotate operation.

IMG-00555: invalid value for gamma correction
Cause: An invalid value was specified for gamma correction. Gamma values must be positive.
Action: Correct the statement by providing a positive gamma value.

IMG-00556: incorrect number of gamma values
Cause: An incorrect number of values were used to specify gamma correction. Gamma correction requires either one or three gamma values.
Action: Provide either one or three values to specify the gamma correction.

IMG-00557: invalid value for contrast enhancement
Cause: An invalid value was used to specify contrast enhancement.
Action: To specify contrast enhancement using percentages, provide values between 0 and 100. To specify contrast enhancement using bounds, provide values greater than 0.

IMG-00558: incorrect number of contrast values
Cause: An incorrect number of values were used to specify contrast enhancement. Contrast enhancement requires one, two, three, or six contrast values.
Action: Provide one or three values to specify contrast enhancement using percentages; provide two or six values to specify contrast enhancement using contrast bounds.
**IMG-00559: invalid frame number**

Cause: An incorrect number was used to specify frame in Dicom image. The number should be greater than 0 and less than total frames in Dicom image.

Action: Provide one number greater than 0 and less than total frames in Dicom image.

**IMG-00560: input format does not support page selection**

Cause: The page verb was specified for an input format that does not support selecting pages.

Action: Refer to the Oracle Multimedia documentation for a description of which image formats support page selection.

**IMG-00561: input format does not support channel selection**

Cause: The inputChannels verb was specified for an input format that does not support selecting channels.

Action: Refer to the Oracle Multimedia documentation for a description of which image formats support input channel selection.

**IMG-00577: invalid quantize argument**

Cause: A quantize value was specified that accepts an argument, but the argument provided was not valid.

Action: Provide a valid, non-negative argument for the quantize value.

**IMG-00578: missing quantize argument**

Cause: A quantize value was specified that requires an argument, but no argument was provided.

Action: Provide an argument for the quantize value.

**IMG-00579: extra quantize argument**

Cause: An extra argument was provided for a quantize value. Some quantize values accept no arguments, while others accept a single argument.

Action: Provide an argument only for quantize values that accept an argument.

**IMG-00580: specified format does not support output**

Cause: The output format specified by fileFormat does support output.

Action: Refer to the Oracle Multimedia documentation for a description of which formats support output.

**IMG-00581: output format does not support the specified contentFormat**

Cause: The specified contentFormat is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which contentFormat values are supported for each output format.

**IMG-00582: output format does not support the specified interleave**

Cause: The specified interleave is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which interleave values are supported for each output format.

**IMG-00583: output format does not support the specified compressionFormat**
Cause: The specified compressionFormat is not supported by the explicitly or implicitly specified output format.
Action: Refer to the Oracle Multimedia documentation for a description of which compressionFormat values are supported for each output format.

IMG-00584: output format does not support the specified compressionQuality
Cause: The specified compressionQuality is not supported by the explicitly or implicitly specified output format.
Action: Refer to the Oracle Multimedia documentation for a description of which compressionQuality values are supported for each output format.

IMG-00585: output format does not support the specified channelOrder
Cause: The specified channelOrder is not supported by the explicitly or implicitly specified output format.
Action: Refer to the Oracle Multimedia documentation for a description of which channelOrder values are supported for each output format.

IMG-00586: output format does not support the specified pixelOrder
Cause: The specified pixelOrder is not supported by the explicitly or implicitly specified output format.
Action: Refer to the Oracle Multimedia documentation for a description of which pixelOrder values are supported for each output format.

IMG-00587: output format does not support the specified scanlineOrder
Cause: The specified scanlineOrder is not supported by the explicitly or implicitly specified output format.
Action: Refer to the Oracle Multimedia documentation for a description of which scanlineOrder values are supported for each output format.

IMG-00599: internal error
Cause: An internal error has occurred.
Action: Contact Oracle Support Services.

IMG-00601: out of memory while copying image
Cause: Operating system process memory has been exhausted while copying the image.
Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00602: unable to access image data
Cause: An error occurred while reading or writing image data.
Action: Ensure that the source image can be read from and the destination can be written to.

IMG-00603: unable to access source image data
Cause: The source image SOURCE attribute is invalid.
Action: Ensure that the SOURCE attribute of the source image is populated with image data.

IMG-00604: unable to access destination image data
Cause: The destination image SOURCE attribute is invalid.
Action: Ensure that the SOURCE attribute of the destination image is populated with image data.

**IMG-00606: unable to access image data**
*Cause:* An attempt was made to access an invalid image.
*Action:* Ensure that the SOURCE attribute of the image is populated with image data.

**IMG-00607: unable to write to destination image**
*Cause:* The destination image SOURCE attribute is invalid.
*Action:* Ensure that the SOURCE attribute of the destination image is initialized correctly and that you have sufficient tablespace.

**IMG-00609: unable to read image stored in a BFILE**
*Cause:* The image stored in a BFILE cannot be opened for reading.
*Action:* Ensure that the access privileges of the image file and the image file's directory allow read access.

**IMG-00611: unable to access the BLOB for reading**
*Cause:* The BLOB could not be opened for reading.
*Action:* Contact Oracle Support Services.

**IMG-00612: unable to open export destination file**
*Cause:* The file could not be created or opened.
*Action:* Check that the file does not refer to an existing directory. Check that the file is not locked by another application.

**IMG-00613: export destination access denied**
*Cause:* Permission to write to destination file was denied.
*Action:* Refer to the Oracle Multimedia documentation for information on granting privileges for the export() method.

**IMG-00614: I/O error during export**
*Cause:* The export operation failed because of an I/O error.
*Action:* Check OS logs and contact Oracle Support Services.

**IMG-00701: unable to set the properties of an empty image**
*Cause:* There is no data in the image object.
*Action:* Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

**IMG-00702: unable to initialize image processing environment**
*Cause:* The image processing external procedure initialization process failed.
*Action:* Contact Oracle Support Services.

**IMG-00703: unable to read image data**
*Cause:* There is no image data in the image object.
*Action:* Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

**IMG-00704: unable to read image data**
*Cause:* There is no image data in the image object.
**Action:** Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

**IMG-00705: unsupported or corrupted input format**

*Cause:* This is an internal error.

*Action:* Contact Oracle Support Services.

**IMG-00706: unsupported or corrupted output format**

*Cause:* This is an internal error.

*Action:* Contact Oracle Support Services.

**IMG-00707: unable to access image data**

*Cause:* An error occurred while reading or writing image data.

*Action:* Contact your system administrator.

**IMG-00710: unable to write to destination image**

*Cause:* The destination image is invalid.

*Action:* Ensure that the SOURCE attribute of the destination image is initialized and that you have sufficient tablespace.

**IMG-00711: unable to set properties of destination image**

*Cause:* This is an internal error.

*Action:* Contact Oracle Support Services.

**IMG-00712: unable to write to destination image**

*Cause:* The destination image is invalid.

*Action:* Ensure the row containing the destination image has been locked (this does not apply to temporary BLOBs).

**IMG-00713: unsupported destination image format**

*Cause:* A request was made to convert an image to a format that is not supported.

*Action:* Refer to the Oracle Multimedia Documentation for supported formats.

**IMG-00714: internal error**

*Cause:* This is an internal error.

*Action:* Contact Oracle Support Services.

**IMG-00715: unable to open image stored in a BFILE**

*Cause:* The image stored in a BFILE could not be opened for reading.

*Action:* Ensure that the access privileges of the image file and the image file's directory allow read access.

**IMG-00716: source image format does not support process options**

*Cause:* A request was made to apply a processing option not supported by the source image format.

*Action:* Refer to the Oracle Multimedia Documentation for a discussion of supported processing options.

**IMG-00717: destination image format does not support process options**

*Cause:* A request was made to apply a processing option not supported by the destination image format.
**Action:** Refer to the Oracle Multimedia Documentation for a discussion of supported processing options.

**IMG-00718: the same Temporary LOB cannot be used as both source and destination**  
**Cause:** A call was made to processCopy with the same Temporary LOB being specified as both the source and destination.  
**Action:** Specify a different LOB for parameter “dest”.

**IMG-00719: image processing internal error**  
**Cause:** This is an internal error.  
**Action:** Contact Oracle Support Services.

**IMG-00720: image processing internal error**  
**Cause:** This is an internal error.  
**Action:** Contact Oracle Support Services.

**IMG-00721: unable to find source plug-in package ORDPLUGINS.ORDX_string_SOURCE**  
**Cause:** Custom source plug-in for user-specified source type was not found.  
**Action:** Ensure correct source type is specified or proper custom source plug-in package is installed.

**IMG-00722: incorrect value of bitsAllocated, bitsStored or highBit for output Dicom image**  
**Cause:** incorrect value of bitsAllocated, bitsStored or highBit for output Dicom image.  
**Action:** Ensure correct value of bitsAllocated, bitsStored or highBit for output Dicom image.

**IMG-00723: missing value in SHARPEN operation**  
**Cause:** An incorrect number of values was used to specify the sharpen parameters.  
**Action:** Use one integer value to specify the kernel type and one float value to specify the gain factor.

**IMG-00724: extra value in SHARPEN operation**  
**Cause:** An incorrect number of values was used to specify the sharpen parameters.  
**Action:** Use one integer value to specify the kernel type and one float value to specify the gain factor.

**IMG-00725: output image will be empty**  
**Cause:** The processing commands resulted in an empty output image.  
**Action:** Ensure the resulting output image will not be empty.

**IMG-00726: invalid value for the AVI framerate**  
**Cause:** An invalid value was used to specify the AVI framerate parameter.  
**Action:** Use a floating-point value to specify the AVI framerate parameter.

**IMG-00727: invalid value for the AVI frametime**  
**Cause:** An invalid value was used to specify the AVI frametime parameter.  
**Action:** Use a floating-point value to specify the AVI frametime parameter.
IMG-00728: multiple incompatible AVI frame parameters found
  Cause: Multiple incompatible AVI frame parameters were found.
  Action: Use only one AVI frame parameter.

IMG-00729: output format does not support the specified frame parameters
  Cause: The specified frame parameter is not supported by the explicitly or implicitly specified output format.
  Action: Specify AVI as the output format in the process command string.

IMG-00730: unable to process empty image
  Cause: There is no data in the input image object.
  Action: Refer to the Oracle Multimedia documentation for information on how to put image data into the image object.

IMG-00731: specified page could be found in input image
  Cause: The specified page does not exist in the input image.
  Action: Restrict the value of the page parameter to values specifying pages that exist within the input image object.

IMG-00732: specified inputChannels could not be found in input image
  Cause: The specified inputChannel parameter does not exist in the input image.
  Action: Restrict the value of the inputChannels parameter to values specifying channels that exist within the input image object.

IMG-00733: invalid watermark property setting
  Cause: The specified watermark property setting is not supported by Oracle Multimedia.
  Action: See the Oracle Multimedia documentation for a description of valid watermark property settings.

IMG-00734: invalid deflateLevel value
  Cause: The specified value for the deflateLevel parameter was not supported by Oracle Multimedia.
  Action: See the Oracle Multimedia documentation for a description of the valid values for the deflateLevel parameter.

IMG-00735: incorrect transparencyFillColor values
  Cause: The specified value for the transparencyFillColor parameter was not supported by Oracle Multimedia.
  Action: See the Oracle Multimedia documentation for a description of the valid values for the transparencyFillColor parameter.

IMG-00800: internal error while parsing attribute string
  Cause: An internal error occurred while parsing the attribute string containing the weights of the attributes.
  Action: If you are certain that your command is correct, then contact Oracle Support Services.

IMG-00801: cannot extract height and width
  Cause: Height and width are not set in the image object.
  Action: Set the properties of the image object by calling setProperties and then generate signature.
IMG-00802: empty or null attribute string
Cause: An empty or null attributes string was passed to the image matching operators.
Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax of the attributes string.

IMG-00803: invalid attribute value
Cause: An invalid value was found while parsing the attribute string for the image matching operators.
Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the attributes string. The weight values should be between 0.0 and 1.0.

IMG-00804: Syntax error in attribute string
Cause: A syntax error was found while parsing the attribute string for the image matching operators.
Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax of the attributes string.

IMG-00805: SIGNATURE data has been corrupted or is invalid
Cause: The data in the signature is not a valid signature.
Action: Re-create the signature using the generateSignature method.

IMG-00806: invalid input image
Cause: The image data is either corrupt or is in an unsupported format.
Action: Repopulate the image object, set properties of the image, and generate the signature.

IMG-00807: no weights specified in weight string
Cause: All weights passed were zero. At least one attribute must be weighted.
Action: Specify a non-zero weight for at least one attribute.

IMG-00808: unable to read an empty image
Cause: There is no data in the image object.
Action: Refer to the Oracle Multimedia documentation for information on how to populate the image object with image data.

IMG-00809: usage of IMGSimilar is incorrect
Cause: Syntax error while using IMGSimilar
Action: Refer to the Oracle Multimedia documentation for information on how to use the IMGSimilar operator. Check whether the value returned by IMGSimilar is compared to the value 1.

IMG-00810: boundary queue initialization failed
Cause: Operating system process memory has been exhausted while initializing the boundary queue.
Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00811: fail queue initialization failed
Cause: Operating system process memory has been exhausted while initializing the fail queue.
**Action:** See the database administrator or operating system administrator to increase process memory quota.

**IMG-00812: merged area queue initialization failed**
**Cause:** Operating system process memory has been exhausted while initializing the merged area queue.
**Action:** See the database administrator or operating system administrator to increase process memory quota.

**IMG-00813: boundary queue free failed**
**Cause:** An internal error has occurred.
**Action:** Contact Oracle Support Services with the error number.

**IMG-00814: fail queue free failed**
**Cause:** An internal error has occurred.
**Action:** Contact Oracle Support Services with the error number.

**IMG-00815: merged area queue free failed**
**Cause:** An internal error has occurred.
**Action:** Contact Oracle Support Services with the error number.

**IMG-00820: area 0 queue clear failed**
**Cause:** An internal error has occurred.
**Action:** Contact Oracle Support Services with the error number.

**IMG-00821: area N queue clear failed**
**Cause:** An internal error has occurred.
**Action:** Contact Oracle Support Services with the error number.

**IMG-00822: area queue reset failed**
**Cause:** An internal error has occurred.
**Action:** Contact Oracle Support Services with the error number.

**IMG-00823: boundary queue pop failed**
**Cause:** An internal error has occurred.
**Action:** Contact Oracle Support Services with the error number.

**IMG-00824: fail queue pop failed**
**Cause:** An internal error has occurred.
**Action:** Contact Oracle Support Services with the error number.

**IMG-00825: merged area queue pop failed**
**Cause:** An internal error has occurred.
**Action:** Contact Oracle Support Services with the error number.

**IMG-00830: boundary queue is full**
**Cause:** An internal error has occurred.
**Action:** Contact Oracle Support Services with the error number and the image causing this problem.

**IMG-00831: boundary queue size exceeds expected size**
**Cause:** An internal error has occurred.
Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00832: fail queue is full
	Cause: An internal error has occurred.
	Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00833: boundary queue size exceeds expected size
	Cause: An internal error has occurred.
	Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00834: merged area queue is full
	Cause: An internal error has occurred.
	Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00835: merged area queue size exceeds expected size
	Cause: An internal error has occurred.
	Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00836: area queue merge failed
	Cause: An internal error has occurred.
	Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00840: image structure allocation failed
	Cause: Operating system process memory has been exhausted while initializing the image structure.
	Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00841: image data allocation failed
	Cause: Operating system process memory has been exhausted while initializing the image data.
	Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00842: image index allocation failed
	Cause: Operating system process memory has been exhausted while initializing the image index.
	Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00843: internal image structure allocation failed
	Cause: Operating system process memory has been exhausted while initializing the internal image structure.
	Action: See the database administrator or operating system administrator to increase process memory quota.
IMG-00844: internal image data allocation failed
  Cause: Operating system process memory has been exhausted while initializing the internal image data.
  Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00845: internal image index allocation failed
  Cause: Operating system process memory has been exhausted while initializing the internal image index.
  Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00846: adjacency matrix allocation failed
  Cause: Operating system process memory has been exhausted while initializing the adjacency matrix.
  Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00847: area list allocation failed
  Cause: Operating system process memory has been exhausted while initializing the area list.
  Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00850: image structure free failed
  Cause: An internal error has occured.
  Action: Contact Oracle Support Services with the error number.

IMG-00851: image data free failed
  Cause: An internal error has occured.
  Action: Contact Oracle Support Services with the error number.

IMG-00852: image index free failed
  Cause: An internal error has occured.
  Action: Contact Oracle Support Services with the error number.

IMG-00853: internal image structure free failed
  Cause: An internal error has occured.
  Action: Contact Oracle Support Services with the error number.

IMG-00854: internal image data free failed
  Cause: An internal error has occured.
  Action: Contact Oracle Support Services with the error number.

IMG-00855: internal image index free failed
  Cause: An internal error has occured.
  Action: Contact Oracle Support Services with the error number.

IMG-00856: adjacency matrix free failed
  Cause: An internal error has occured.
  Action: Contact Oracle Support Services with the error number.
IMG-00857: area list free failed
   Cause: An internal error has occurred.
   Action: Contact Oracle Support Services with the error number.

IMG-00860: assert failure, number of region exceeds allocated
   Cause: An internal error has occurred.
   Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00861: assert failure, inconsistency in area merge operation
   Cause: An internal error has occurred.
   Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00862: assert failure, inconsistency in merged area labels
   Cause: An internal error has occurred.
   Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00870: unsupported aspect ratio or image size
   Cause: Signature generation was attempted on an image smaller than the supported size.
   Action: Try scaling the image up to have a larger height and width, the suggested size is greater than 21 pixels each. If signature generation still fails, contact Oracle Support Services with the error number and the image causing this problem.

IMG-00871: unexpected number of seeds
   Cause: An internal error has occurred.
   Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00872: unsupported image model
   Cause: Signature generation was attempted on an image with an image model that Oracle Multimedia is unable to support.
   Action: Try scaling the image down. If signature generation still fails, contact Oracle Support Services with the error number and the image causing this problem.

IMG-00899: signature cannot be generated
   Cause: generateSignature could not generate the signature.
   Action: Verify that the input image is a format supported by Oracle Multimedia.

IMG-00901: VIR signature version mismatch
   Cause: Two signatures to be compared have different versions.
   Action: Recompute signatures on the same platform and repeat signature comparison.

IMG-00902: VIR signature free failed
   Cause: An internal error has occurred.
   Action: Contact Oracle Support Services.

IMG-00910: allocation of basic data structure failed
Cause: Operating system process memory has been exhausted while copying the image.
Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00911: free basic data structure failed
Cause: Operating system process memory has been exhausted while copying the image.
Action: Contact Oracle Support Services.

IMG-00921: threshold out of range
Cause: Threshold is not between 0 and 100
Action: Use a threshold between 0 and 100 and retry query.

IMG-00922: location specified without feature
Cause: only location was specified.
Action: Specify at least one other parameter (color, texture or shape) along with location. Refer to the Oracle Multimedia documentation for more details.

IMG-00923: signature is empty
Cause: Signature has not been generated.
Action: Generate the signature for the image by calling the generateSignature method.

IMG-00924: Incorrect parameter specification during CREATE INDEX
Cause: There is a spelling error, or duplicate parameter specification, or incorrect specification of parameters while creating an index of type ORDIMAGEINDEX.
Action: Refer to the Oracle Multimedia documentation for correct specification of CREATE INDEX parameters.

IMG-00925: unable to write to the ORDImageSignature object
Cause: The signature object was not valid and therefore the write operation failed. This problem is commonly caused by an attempt to invoke the generateSignature method on an uninitialized ORDImageSignature object.
Action: Ensure that the ORDImageSignature object has been initialized and inserted into a table. Also ensure that the row containing the signature object is locked. (The two previous actions do not apply to signature objects created using temporary BLOBs). Ensure that there is sufficient tablespace to contain the signature.

IMG-00926: tablespace specified during CREATE INDEX is not valid
Cause: A tablespace specified in the parameter string of a CREATE INDEX operation did not exist or the current user did not have sufficient privileges on the tablespace.
Action: Create the tablespace, grant appropriate privileges on the tablespace to the current user, or choose a different tablespace.

IMG-01000: unsupported option string
Cause: The function was invoked with an invalid option string.
Action: Ensure that correct option string is passed to the PL/SQL function. Refer to the Oracle Multimedia documentation for more information.
IMG-01001: not a DICOM object
   Cause: The input was not a valid DICOM standalone object.
   Action: Use an object that conforms to the DICOM standard. Refer to the Oracle Multimedia documentation for more information.

IMG-01002: unsupported DICOM version
   Cause: The object header could not be parsed, possibly because the object header did not conform to the DICOM standard release 2003.
   Action: Use an object that conforms to the DICOM standard release 2003. Refer to the Oracle Multimedia documentation for more information.

IMG-01003: unsupported DICOM object type
   Cause: The category of DICOM objects is not supported by Oracle Multimedia.
   Action: Use a DICOM image is supported by Oracle Multimedia. Oracle Multimedia supports image types defined in the DICOM standard release 2003. Refer to the Oracle Multimedia documentation for more details.

IMG-01004: input DICOM object is not an image
   Cause: The DICOM object was not a DICOM image. DICOM object types such as structured reporting are not allowed by this function.
   Action: Invoke this function with a DICOM image. Refer to the Oracle Multimedia documentation for more details.

IMG-01005: unsupported DICOM transfer syntax
   Cause: The operation failed because the transfer syntax in the DICOM object, which describes the binary encoding of the DICOM object, was not supported by Oracle Multimedia.
   Action: Use a DICOM object with a transfer syntax supported by Oracle Multimedia. Refer to the Oracle Multimedia documentation for more details.

IMG-01006: DICOM object cannot be parsed
   Cause: The DICOM object could not be parsed by Oracle Multimedia, possibly due to an incorrect format or corrupted object.
   Action: Verify that the DICOM object is not corrupted. If the DICOM object is valid, contact Oracle Support Services.

IMG-02001: 2FF01 - incorrect image format
   Cause: There was a SQL/MM Still Image exception. Either the supplied image BLOB format did not match the image format or the image format is unsupported.
   Action: For supported image formats, specify an input BLOB that has the same format as the image. For unsupported image formats, this method is not supported. Refer to the Oracle Multimedia documentation for more information.

IMG-02002: 2FF02 - incorrect average color feature specification
   Cause: There was a SQL/MM Still Image exception. The specified average color value was not a valid SI_Color value.
   Action: Specify an average color value that is not null and contains valid SI_Color values. SI_Color attribute values must be integers from 0 to 255. Refer to the Oracle Multimedia documentation for more information on constructing valid SI_Color objects.

IMG-02003: 2FF03 - incorrect color histogram feature specification
**Cause:** There was a SQL/MM Still Image exception. This exception was caused by one of the following.
- The specified color value was null or invalid.
- The specified frequency value was null or invalid.
- The input color and frequency arrays were not equal in size.
- The SI_ColorList array attribute had reached the maximum size.

**Action:** Ensure that the following are true (as applicable to your case):
- The color and frequency values are not null.
- The SI_Color attribute values are integers from 0 to 255.
- The frequency value is a double precision number from 0 to 100.
- The color and frequency arrays are equal in size and the size of the arrays is less than the SI_MaxHistogramLength value listed in the SI_VALUES view in the SI_INFORMTN_SCHEMA. Refer to the Oracle Multimedia documentation for more information on constructing SI_ColorHistogram objects.

**IMG-02004: 2FF04 - incorrect feature list specification**

**Cause:** There was a SQL/MM Still Image exception. Either the specified feature values were invalid or the specified feature weights were invalid.

**Action:** Check the values of feature and featureweight pairs. For a non null feature value, the corresponding feature weight value must be a double precision number greater than 0.0. Refer to the Oracle Multimedia documentation for more information on the SI_FeatureList object type and its methods.

**IMG-02005: 2FF05 - incorrect color specification**

**Cause:** There was a SQL/MM Still Image exception. The specified red/green/blue value was null or invalid.

**Action:** Specify red, green and blue values as integers from 0 to 255.

**IMG-02006: 2FF06 - average color feature cannot be determined**

**Cause:** There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the average color feature was not supported by the specified image format

**Action:** Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image formats and image features.

**IMG-02007: 2FF07 - positional color feature cannot be determined**

**Cause:** There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the positional color feature was not supported by the specified image format

**Action:** Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image features and formats.

**IMG-02008: 2FF08 - color histogram feature cannot be determined**

**Cause:** There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the color histogram feature was not supported by the specified image format.
**Action:** Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image features and formats.

**IMG-02009: 2FF09 - texture feature cannot be determined**

**Cause:** There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the texture feature was not supported by the specified image format.

**Action:** Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image features and formats.

**IMG-02010: 2FF10 - illegal image format specification**

**Cause:** There was a SQL/MM Still Image exception. The specified format name was null or invalid.

**Action:** Specify a format name that is not null. For supported image formats, specify a format name that matches the image BLOB format. For unsupported image formats, specify a format name that is not listed as supported image format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image formats.

**IMG-02011: 2FF11 - unsupported image format conversion specified**

**Cause:** There was a SQL/MM Still Image exception. Either the specified target format value was null, the specified image had a null format value, or the conversion from the specified image format to the specified target format was not supported.

**Action:** Specify an image with a supported image format and specify a target format value that is supported for conversion. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image format conversions.

**IMG-02012: 2FF12 - illegal specification for thumbnail generation**

**Cause:** There was a SQL/MM Still Image exception. Either the specified image format did not support thumbnail generation, the specified thumbnail height or width was greater than the image height or width respectively, or the default thumbnail size 80 X 80 was greater than the image height or width respectively.

**Action:** Specify an image for which thumbnail generation is supported and specify thumbnail height and width values that are less than the image height and width values. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported thumbnail formats.

**IMG-02014: 2202D Data exception - Null image value**

**Cause:** There was a SQL/MM Still Image exception. The function was invoked using a null image value.

**Action:** Specify an image whose image data is not null. Refer to the Oracle Multimedia documentation for more information on constructing SI_StillImage objects.
VID-00611: unable to access the BLOB for reading
Cause: The BLOB could not be opened for reading.
Action: Contact Oracle Support Services.

VID-00612: unable to open export destination file
Cause: The file could not be created or opened.
Action: Check that the file does not refer to an existing directory. Check that the file is not locked by another application.

VID-00613: export destination access denied
Cause: Permission to write to destination file was denied.
Action: Refer to the Oracle Multimedia documentation for information on granting privileges for the export() method.

VID-00614: I/O error during export
Cause: The export operation failed because of an I/O error.
Action: Check OS logs and contact Oracle Support Services.

VID-00702: unable to initialize video processing environment
Cause: The initialization of the video processing procedure failed.
Action: See the database administrator to make sure that enough memory has been allocated to JServer. If JServer does have enough memory, contact Oracle Support Services.

VID-00703: unable to read video data
Cause: An error occurred while accessing the video source.
Action: Make sure the video source is valid. For external sources, make sure all access privileges are granted.

VID-00704: invalid input format or corrupted input data
Cause: The video data in the source was not in the format specified by the format field of the video object. In some unusual cases, the video data is actually corrupted.
Action: Provide a correct value in the format field. If the correct value is unknown, put NULL in the format field to invoke the DEFAULT format plug-in.

VID-00705: unsupported input format
Cause: The file format of the video data was not supported. This error can only occur in the DEFAULT format plug-in package.
Action: Refer to the Oracle Multimedia documentation for supported formats.
VID-00706: unsupported or corrupted input format
   Cause: The video data was either corrupted or the file format was not supported.
   Action: Refer to the Oracle Multimedia documentation for supported formats. If the video data is not corrupted and is in a supported file format, contact Oracle Support Services.

VID-00707: unable to read empty video data
   Cause: There is no data in the video object.
   Action: Refer to the Oracle Multimedia documentation for information on how to populate the video object with video data.

VID-00713: internal error while parsing video data
   Cause: An internal error occurred during parsing.
   Action: Contact Oracle Support Services.

VID-00714: internal error
   Cause: An internal error occurred.
   Action: Contact Oracle Support Services.

VID-00721: unable to find format plug-in package ORDPLUGINS.ORDX_stringVIDEO
   Cause: Custom video plug-in for user-specified format was not found.
   Action: Ensure correct video format is specified or proper custom video plug-in package is installed.
DRG-10000: failed to read column string
  Cause: Error during read of specified text column
  Action: check existence and privs of column

DRG-10001: can not access result table string
  Cause: specified table does not exist or server does not have write privileges
  Action: check result table

DRG-10002: can not insert into result table
  Cause: text server is not privileged to insert, tablespace exhausted
  Action: check privileges and tablespace

DRG-10011: invalid object name string
  Cause: a table, column or procedure name specified had an invalid format. It is either too long or contains illegal characters. Probably you are passing in incorrect parameters.
  Action: check parameter values

DRG-10015: id exceeds limit(2147483642) of a number
  Cause: the limit of an id is 2147483642
  Action: use an id with value 214748364 or under

DRG-10016: you must be the owner to modify this object
  Cause: you tried to modify an object which you do not own
  Action: have the owner modify the object

DRG-10017: you must be string to do this: string
  Cause: you tried to modify an object which you have no privilege
  Action: have the owner modify the object

DRG-10100: invalid argument found: string
  Cause: invalid command argument was specified
  Action: check the documentation for the legal arguments and re-execute the command

DRG-10101: no value for argument: string
  Cause: this argument requires value(s)
  Action: re-execute the command with the correct argument value(s)
DRG-10102: mandatory argument missing: string
  Cause: this argument is mandatory
  Action: re-execute the command and specify the argument

DRG-10103: illegal value for argument: string
  Cause: an illegal value was passed to this argument
  Action: check the documentation for the legal values for this argument

DRG-10200: invalid server personality mask: string
  Cause: the specification for the server personality mask is invalid
  Action: check the documentation and specify the correct mask

DRG-10202: server failed to register
  Cause: the server failed to register itself with the data dictionary
  Action: look at the next error on the stack

DRG-10203: server named string does not exist
  Cause: update was called with the name of a server that does not exist
  Action: correct the name of the server

DRG-10204: server update failed
  Cause: the attempt to update the server failed
  Action: look at the next error on the stack

DRG-10205: server deregister failed
  Cause: the attempt to deregister the server from the data dictionary failed
  Action: look at the next error on the stack

DRG-10206: failed to perform recovery for a server or client
  Cause: Contact oracle support
  Action: Contact oracle support

DRG-10301: timed out waiting for responses from servers
  Cause: Not enough servers are running to handle the current system load, and a
  large backlog of commands has accumulated; perhaps no servers are running. This
  message could also indicate an internal error where one of the servers has crashed
  trying to process a given request
  Action: Check that enough servers are running, and that they are processing
  commands of the correct type. For instance, a DDL command might timeout if all
  the servers are setup to exclusively process query commands. Also, check the
  server log files.

DRG-10302: interrupted waiting for responses from servers
  Cause: User interrupted the request before it was completed
  Action: Restart the request

DRG-10303: could not queue given commands to be processed
  Cause: The given command or commands could not (all) be queued. This could
  indicate an extremely high system load, but it is more likely an internal error.
  Action: Check if any servers are running to process the command.

DRG-10304: unexpected error sending command(s) to Oracle Text server
Cause: There was an unexpected error sending command(s) to server
Action: Call customer support.

DRG-10305: pipe string is full
Cause: Could not send command to pipe, because the pipe was full
Action: Check if any servers are running to process the commands on that pipe

DRG-10306: server terminated unexpectedly while processing command
Cause: The server shutdown during execution of your command. This could be caused by a shutdown abort, or by an internal error in the server.
Action: If the server terminated had an internal error, contact customer support.

DRG-10307: no servers running
Cause: Could not process command because no servers are running with the correct personality mask.
Action: Start some servers with correct personality mask.

DRG-10308: no server with the required string personality mask is running
Cause: Could not process command because no servers are running with the correct personality mask.
Action: Start some servers with correct personality mask.

DRG-10309: not enough job queue processes
Cause: Could not process command because no servers with the correct personality mask are running.
Action: increase the JOB_QUEUE_PROCESSES initialization parameter or reduce the parallel degree for this statement.

DRG-10310: servers were shutdown before processing request
Cause: The command could not be completed because the servers were shut down or terminated before processing the request.
Action: Start another server with the correct personality mask.

DRG-10311: remote send not supported
Cause: You tried to specify a database link in an index specification
Action: Specify only local index names

DRG-10312: logfile name must be specified
Cause: You tried to start logging without specifying a logfile name
Action: Specify a logfile name

DRG-10313: logging has already been started
Cause: You tried to start logging even though logging has already been started
Action: Stop logging first, or ignore

DRG-10314: logging has not been started
Cause: You tried to stop logging even though logging has not been started
Action: Start logging first, or ignore

DRG-10315: logging is not supported on MTS
Cause: You tried to start logging on MTS
DRG-10500: CREATE_INDEX failed: column spec string
  Cause: failed to create text index on the specified column
  Action: See the next errors on stack and take appropriate action

DRG-10501: invalid stopword: string
  Cause: The stopword specified could be lexed into multiple tokens with current lexer preference
  Action: Check lexer preference and Respecifies the stopword

DRG-10502: index string does not exist
  Cause: the specified index does not exist or you do not have access to it.
  Action: Specify an existing index

DRG-10503: table string cannot be indexed because it has no primary key
  Cause: a textkey needs to be a single column unique key whose length does not exceed 64 bytes. no such key was defined as an unique index or declared as a primary or unique key constraint
  Action: create a suitable textkey for the table or specify it explicitly in this procedure call

DRG-10504: primary key is required when using the DETAIL_DATASTORE
  Cause: you tried to use the detail datastore to index a table with no primary key constraint
  Action: add a primary key constraint on the table

DRG-10506: table does not exist: string
  Cause: The table, view, or synonym specified does not exist. There may also be a permissions problem reading the table.
  Action: Reinvoke the operation with the correct table name

DRG-10507: duplicate index name: string
  Cause: the specified index already exists in the dictionary
  Action: this index can be updated or deleted, however this is only allowed if there is no text index available on the text column

DRG-10509: invalid text column: string
  Cause: the column specified is not valid
  Action: check that the followings are valid: a) text column is of supported datatype b) valid table name, column name in the specification.

DRG-10510: stopword is missing
  Cause: The stopword to be added was not specified.
  Action: Specify the stopword

DRG-10511: index string does not exist or is incomplete
  Cause: index creation is not complete
  Action: create index before performing this operation

DRG-10513: index string metadata is corrupt
  Cause: dictionary contains bad preferences for this index
Action: contact your DBA

DRG-10516: failed to perform DDL operation due to an Oracle error
Cause: the ddl operation requested has failed because of an Oracle error
Action: see the Oracle error on the stack and take the appropriate action

DRG-10517: index string is already valid
Cause: The index was in a valid state and did not need the requested operation.
Action: Check the requested operation

DRG-10518: an operation is in progress which conflicts with string request
Cause: another session is operating on this index. it could be: a) DML is requested and DDL is in progress or b) DDL is requested and DML is in progress on the index
Action: try again later

DRG-10520: failed to drop index: string
Cause: Failed to drop index on the specified index
Action: see the Oracle error on the stack and take the appropriate action

DRG-10525: missing REBUILD keyword
Cause: all Oracle Text alter index options require the REBUILD keyword
Action: specify alter index with the REBUILD keyword

DRG-10528: primary keys of type string are not allowed
Cause: you tried to create an index on a table with an illegal primary key datatype
Action: change the textkey to one of the followings: VARCHAR2, NUMBER, VARCHAR, DATE, CHAR, MLSLABEL

DRG-10531: parallel parameter must be > 0
Cause: you called create index with parallel = 0
Action: specify with value > 0

DRG-10532: table is not partitioned
Cause: you called parallel create index on non-partitioned table
Action: recreate the table with partitions or remove the PARALLEL clause

DRG-10533: invalid user name: string
Cause: you specified a user name that is invalid
Action: specify the correct user name

DRG-10535: failed to optimize text index string
Cause: the optimize operation requested has failed because of an Oracle error
Action: see the Oracle error on the stack and take the appropriate action

DRG-10549: length of the object name string exceeded the limit
Cause: object name has exceeded the maximum length of 30 bytes
Action: Reduce the length of the object name if you want to re-create it

DRG-10550: illegal syntax for index, preference, source or section name
Cause: name may have additional periods(.)
Action: check the syntax of the name

DRG-10553: illegal syntax for column specification string
Cause: column specification may have additional periods(.)
Action: check the syntax of column specification if you want to re-create it

DRG-10561: index string is not valid for requested operation
Cause: The index was not in a valid state due to some prior error.
Action: Drop index and create index again.

DRG-10562: missing alter index parameter
Cause: The parameter string was missing
Action: Provide correct parameter string with regard to the requested alter index operation.

DRG-10569: table or column does not exist: string
Cause: The table, view, synonym or column specified does not exist. There may also be a permissions problem reading the table.
Action: Reinvoke the operation with the correct table name or column name

DRG-10573: index string is obsolete
Cause: you specified an obsolete index
Action: perform upgrade_index on the index

DRG-10574: failed to upgrade text index string
Cause: the upgrade operation has failed because of an Oracle error
Action: see the Oracle error on the stack and take the appropriate action

DRG-10579: must provide text query criteria
Cause: text query criteria is mandatory
Action: provide text query criteria

DRG-10580: parallel indexing is not supported: string
Cause: attempted to create index with parallel servers
Action: Drop index and set parallel to 1 in create index

DRG-10581: indirect datastores cannot be used with long or lob text columns
Cause: You tried to create an index on a long or lob column using an indirect datastore such as the file or url datastores
Action: Use direct datastore or a varchar column

DRG-10582: column string does not exist in table string
Cause: you specified an invalid column
Action: specify valid column

DRG-10583: TRUNCATE INDEX failed: string
Cause: Failed to truncate index
Action: See the next errors on stack and take appropriate action

DRG-10584: failed to string string string due to an Oracle error
Cause: a DDL operation on an index object failed due to SQL error
Action: see following error

DRG-10595: ALTER INDEX string failed
Cause: failed to alter index
Action: See the next errors on stack and take appropriate action

DRG-10597: invalid rebuild online operation
Cause: REBUILD ONLINE is not supported for requested operation.
Action: Alter index without the online option.

DRG-10598: invalid parallel operation
Cause: PARALLEL is not supported for requested operation.
Action: Alter index without the parallel option

DRG-10599: column is not indexed
Cause: The column specified is not indexed.
Action: Create index on the column before performing this operation

DRG-10601: failed to remove pending DML for this index
Cause: The system could not remove triggers setup to monitor updates to the requested table
Action: See next error on stack to determine course of action. Call Oracle support if necessary. Until this error is fixed, updates to all text columns in the given table may not be indexed.

DRG-10602: failed to queue DML change to column string for primary key string
Cause: The system could not record that a change had been made to the given column
Action: See next error on stack to determine course of action. Call Oracle support if necessary. Until this error is fixed, updates to all text columns in the given table may not be indexed.

DRG-10606: server failed to access the DML Queue
Cause: the meta data for the index has not been created yet
Action: retry the DML operation

DRG-10700: preference does not exist: string
Cause: the preference name specified does not exists
Action: retry with the correct preference name

DRG-10701: preference string.string already exists
Cause: the specified preference already exists
Action: must drop the preference if you want to re-create it.

DRG-10702: cannot create or modify preference in another user's schema
Cause: you tried to create a preference for another user
Action: owner or CTXSYS or a user who has CTXADMIN role should create preference

DRG-10703: invalid framework object string
Cause: you specified an invalid object type
Action: use a valid framework object
DRG-10704: preference string does not have an attribute named string
Cause: you tried to set value for a invalid attribute (not supported by the object.
Action: specify the correct attribute name

DRG-10705: invalid value string for attribute string
Cause: you tried to set an illegal value for an attribute
Action: specify the correct attribute value for the datatype of the attribute

DRG-10706: length of string exceeds maximum size of string
Cause: Parameter is too many bytes
Action: Correct preference setting and resubmit

DRG-10707: a value is required for attribute string of preference string
Cause: A required attribute was not provided
Action: Correct preference setting and resubmit

DRG-10708: invalid class id string for preference string
Cause: the specified class id is not correct for the specified preference
Action: specify the correct class id

DRG-10709: this preference is referenced by string and cannot be dropped
Cause: the specified preference is used as part of another preference and cannot be dropped until the referring preference is modified
Action: modify the referring preference

DRG-10750: unknown parameter string
Cause: Unrecognized parameter
Action: Specify correct parameter

DRG-10751: invalid value for parameter
Cause: Wrong data type or out of range
Action: Specify correct parameter value

DRG-10752: DEFAULT_INDEX_MEMORY cannot be greater than MAX_INDEX_MEMORY
Cause: You tried to set DEFAULT_INDEX_MEMORY to a value higher than the maximum set in MAX_INDEX_MEMORY
Action: Specify a lower value

DRG-10753: invalid memory size string string
Cause: You specified an incorrectly formatted memory string
Action: Specify a correctly formatted memory string

DRG-10754: memory size must be between string and string
Cause: You specified a memory size which is outside the allowed range
Action: Specify a memory size within the allowed range

DRG-10755: string and string have characters in common
Cause: the join character sets cannot have characters in common
Action: Correct the attribute values and resubmit
DRG-10756: neither text indexing nor theme indexing has been selected
  Cause: INDEX_TEXT and INDEX_THEMES preferences both cannot be FALSE.
  Action: Set either of INDEX_TEXT or INDEX_THEMES or both to TRUE.

DRG-10757: stoplist cannot have more than 4096 stopwords
  Cause: a stoplist cannot have more than 4096 stopwords. This includes stopthemes.
  Action: none required

DRG-10758: index owner does not have the privilege to use file or URL datastore
  Cause: index owner does not have the role defined in FILE_ACCESS_ROLE
  Action: grant index owner the appropriate role

DRG-10759: invalid role
  Cause: the role does not exist in the database
  Action: check the role name or create the role

DRG-10760: illegal format for procedure name
  Cause: the procedure name specified is invalid. For instance, it may have a semicolon
  Action: check the procedure name

DRG-10761: procedure string does not exist
  Cause: the specified procedure could not be found
  Action: check input. Try a fully-specified format such as OWNER.OBJECT

DRG-10762: index owner does not have access to procedure string
  Cause: the index owner does not have execute privilege on the specified procedure
  Action: grant index owner execute permission on the procedure

DRG-10763: value string is not a valid character set
  Cause: the value specified for the filename_charset attribute of the file datastore is not a valid character set name
  Action: specify a valid Oracle character set name

DRG-10764: only SYS can modify FILE_ACCESS_ROLE
  Cause: For security reasons, only SYS can modify the FILE_ACCESS_ROLE system parameter
  Action: Connect as SYS before modifying the parameter

DRG-10800: query failed: string string string
  Cause: Failed to process the query
  Action: Check the errors on stack and take appropriate action

DRG-10801: cannot create an SQE for another user
  Cause: You tried to create an SQE for another user
  Action: Remove owner from SQE name specification

DRG-10816: display/highlight call failed
  Cause: See the next error on the stack.
**Action:** See the next error on the stack.

**DRG-10817: CONTAINS term consists of stopword or phrase of stopwords:** string

**Cause:** One or more terms within a CONTAINS query consist of just a stopword or a phrase of just stopwords

**Action:** Replace the stopword or use stopwords within phrases containing non-stopwords.

**DRG-10819: could not open contains cursor**

**Cause:** An error occurred while trying to open a contains cursor

**Action:** See accompanying error messages in the stack

**DRG-10820: invalid contains cursor id**

**Cause:** You tried to fetch or close a contains cursor with an id which does not exist.

**Action:** Review fetch or close invocation

**DRG-10821: contains cursor is not open**

**Cause:** You tried to fetch from a contains cursor which was not open.

**Action:** Open cursor first

**DRG-10822: duplicate query name**

**Cause:** You tried to create a stored query with a name already used.

**Action:** Use different name

**DRG-10823: invalid query name**

**Cause:** The query name specified is not valid

**Action:** Check the query name

**DRG-10825: stored query does not exist:** string

**Cause:** The specified stored query does not exist.

**Action:** Check the query name

**DRG-10826: no document with the specified textkey is found**

**Cause:** There is no document with the specified textkey.

**Action:** Check the textkey

**DRG-10827: open_con must be performed before count_last**

**Cause:** last_count returns hit from in-memory query, so an in-memory query must be run before you can use count_last

**Action:** execute open_con before run count_last

**DRG-10828: token string is longer than maximum length for column string**

**Cause:** A token to be inserted in the feedback table is longer than the maximum allowed column size.

**Action:** Modify the query, or the column size for feedback table, or feedback procedure arguments accordingly.

**DRG-10829: feedback id string is longer than the maximum length of string bytes**

**Cause:** Feedback id is longer than the maximum allowed length for the feedback_id column.

**Action:** Use a smaller feedback_id.
DRG-10830: SHARELEVEL is not 0 or 1  
  Cause: You specified a sharelevel which is not 0 or 1  
  Action: Use sharelevel equal to 0 or 1 only.

DRG-10831: can not insert into feedback table string  
  Cause: Not privileged to insert.  
  Action: Check privileges.

DRG-10832: can not delete from feedback table string  
  Cause: Not privileged to delete.  
  Action: Check privileges.

DRG-10833: feedback failed  
  Cause: Failed to process feedback request  
  Action: Check the errors on stack and take appropriate action

DRG-10834: upper-case form of section name string too long  
  Cause: upper-case form of the section name is longer then supported length  
  Action: reduce length of section name when adding section

DRG-10835: WITHIN operator not supported for theme index  
  Cause: WITHIN operator used in theme index query  
  Action: Rewrite query without WITHIN operator

DRG-10836: field section and attribute section can not be nested  
  Cause: A field section or a attribute section is specified in a nested section search  
  Action: Rewrite query without nested field sections

DRG-10837: section string does not exist  
  Cause: The given section name does not exist in USER_SECTIONS  
  Action: Rewrite query with valid section name

DRG-10838: invalid SPAN argument supplied to NEAR  
  Cause: An invalid value was supplied for SPAN argument to NEAR  
  Action: Provide a valid SPAN. Valid values are integers from 0 to 100.

DRG-10839: invalid ORDER argument supplied to NEAR  
  Cause: An invalid value was supplied for ORDER argument to NEAR  
  Action: Provide a valid ORDER. Valid values are T, TRUE, F, FALSE (case insensitive).

DRG-10840: CONTAINS predicate including 0 is not supported by FIRST_ROWS hint  
  Cause: User attempts to issue a query with CONTAINS predicate including 0  
  while giving FIRST_ROWS hint.  
  Action: remove FIRST_ROWS hint.

DRG-10841: invalid SCORE argument supplied to FUZZY  
  Cause: An invalid value was supplied for SCORE argument to FUZZY  
  Action: Provide a valid SCORE. Valid values are integers from 0 to 80.
DRG-10842: invalid NUMRESULTS argument supplied to FUZZY
Cause: An invalid value was supplied for NUMRESULTS argument to FUZZY
Action: Provide a valid NUMRESULTS. Valid values are integers from 0 to 5000.

DRG-10843: invalid WEIGHT argument supplied to FUZZY
Cause: An invalid value was supplied for WEIGHT argument to FUZZY
Action: Set WEIGHT to WEIGHT or NOWEIGHT.

DRG-10844: index cannot execute this structured predicate efficiently
Cause: You specified a combination of condition and order by columns in a catsearch query which cannot be executed by the index's index set efficiently
Action: None

DRG-10845: column string is not indexed
Cause: You specified a column in a condition or order by which is not part of the ctcxt index
Action: None

DRG-10846: order by columns must be all ascending or all descending
Cause: You specified an order by clause which has some columns ascending and some descending. This is not currently supported by catsearch
Action: None

DRG-10847: catsearch requires prefix index for this type of queries
Cause: For efficient execution of this Vgram query we require presence of a prefix index.
Action: create a prefix index

DRG-10848: invalid structured clause
Cause: you have specified an invalid structured clause
Action: None

DRG-10849: catsearch does not support functional invocation
Cause: the query plan for your query is invoking a catsearch operator functionally rather than as an index rowsource. The catsearch operator does not support functional invocation
Action: add optimizer hints so that all catsearch operators are performed through index scans

DRG-10850: CTXRULE indextype does not support the operator
Cause: Used an operator not supported by CTXRULE. Currently it only supports AND, NEAR, phrase, NOT, WITHIN, OR, ABOUT, EQUIVALENCE, STEM and THESAURUS operators
Action: Rewrite query without this operator

DRG-10851: Invalid grammar string specified for query template
Cause: incorrect grammar specification
Action: Rewrite query specifying valid grammar name

DRG-10852: Invalid scoring type string specified for query template
Cause: incorrect scoring type specification
Action: Rewrite query specifying valid scoring type (integer/float)

DRG-10853: Catsearch does not support this operator
Cause: unsupported operator specified
Action: Rewrite query using valid operators

DRG-10854: Invalid scoring algorithm string specified for query template
Cause: incorrect scoring algorithm specification
Action: Rewrite query specifying valid scoring algorithm (default/count)

DRG-10855: CTXRULE indextype does not support the token type
Cause: Unsupported VGRAM token type 1.
Action: None

DRG-10856: SDATA section string does not exist
Cause: The given SDATA section name does not exist in USER_SECTIONS
Action: Rewrite query with valid SDATA section name

DRG-10857: literal is not compatible with the data type of the SDATA section
Cause: The given literal is not compatible with the data type of the specified SDATA section.
Action: Rewrite query with a compatible literal

DRG-10858: SDATA operator is not allowed in WITHIN
Cause: A field section or a attribute section is specified in a nested section search
Action: Rewrite query without nested field sections

DRG-10859: Only one predefined scoring component can be used in DEFINESCORE
Cause: More than one predefined scoring component (i.e. RELEVANCE, OCCURRENCE, etc.) is used in the scoring expression of the DEFINESCORE operator
Action: Rewrite query using only one predefined component

DRG-10860: All expressions under the same WITHIN must use the same predefined scoring component
Cause: The query side of the same within mixes different types of scoring components(i.e. RELEVANCE, OCCURRENCE, etc.)
Action: Rewrite query using only one type of predefined component

DRG-10861: COMPLETION score must be used with WITHIN operator
Cause: The completion score is used without using the WITHIN operator
Action: Rewrite query to include a within operator

DRG-10862: string attribute cannot be used with CTXRULE indexes
Cause: Used an attribute not supported by CTXRULE. This restriction is due to lack of wildcard support for CTXRULE indexes.
Action: Rewrite query without this attribute

DRG-10863: invalid ORDER argument supplied to NDATA
Cause: An invalid value was supplied for ORDER argument to NDATA
Action: Set ORDER to ORDER or NOORDER.
DRG-10864: invalid PROXIMITY argument supplied to NDATA

Cause: An invalid value was supplied for PROXIMITY argument to NDATA
Action: Set PROXIMITY to PROXIMITY or NOPROXIMITY.

DRG-10865: invalid datatype in user scoring expression

Cause: The scoring expression specified in DEFINESCORE or NORMALIZATION_EXPR in the query template either contains components with unsupported datatypes or does not return numerical values.
Action: Rewrite the scoring expression.

DRG-10866: The right hand operand of MINUS cannot use IGNORE score

Cause: The IGNORE score is used as the right hand operand of MINUS
Action: Rewrite the scoring expression.

DRG-10867: OCCURRENCE and COMPLETION score cannot be used with ABOUT in DEFINESCORE

Cause: The OCCURRENCE and COMPLETION score cannot be used with ABOUT queries
Action: Rewrite the scoring expression.

DRG-10868: matches does not support functional invocation

Cause: The query plan for your query is invoking a matches operator functionally rather than as an index rowsource. The matches operator does not support functional invocation
Action: add optimizer hints so that all matches operators are performed through index scans

DRG-10869: Invalid span supplied to NEAR2 operator

Cause: Near2 span must be between 0 and 100
Action: Use acceptable span

DRG-10870: Invalid weight supplied to NEAR2 operator

Cause: Near2 weights must be between 0 and 10
Action: Use acceptable weight

DRG-10871: NDATA operator not supported with string

Cause: NDATA operator is not supported in the specified operation
Action: Rewrite the query without NDATA operator

DRG-10900: out of memory

Cause: can not allocate more memory
Action: Contact your system administrator

DRG-11000: invalid keyword string

Cause: A keyword was invalid.
Action: Respecify the parameter string with correct keyword

DRG-11001: missing keyword when expecting one of string

Cause: A keyword was missing.
Action: Respecify the parameter string with keyword

DRG-11002: missing value for string
Cause: A value for the argument was missing.
Action: Respecify the parameter string with value

DRG-11003: invalid value *string for string*
Cause: An invalid value was given for the argument
Action: Specify a valid value

DRG-11004: duplicate or conflicting value for *string*
Cause: More than one value has been specified for the argument
Action: Check parameter string and correct the problem parameter

DRG-11005: invalid create index parameter string
Cause: the supplied parameter string is not correct
Action: drop index and recreate index with correct parameters

DRG-11006: invalid alter index parameter string
Cause: The parameter string was invalid.
Action: Reissue the statement with the correct parameter string

DRG-11007: multiple stopwords specified
Cause: Tried to add more than one stopword
Action: Specify one stopword at a time

DRG-11008: invalid create index partition parameter string
Cause: The parameter string was invalid
Action: drop index and recreate index with correct parameters

DRG-11100: unable to connect to the database
Cause: failed to connect to Oracle database
Action: check the Oracle error and connect string

DRG-11101: failed to open file *string*
Cause: failed to open a file
Action: check whether the file exist or access permission available

DRG-11102: assigned lexer can not operate on *string language setting*
Cause: Single byte lexer selected in multibyte language setting
Action: check RDBMS language setting or text columns lexer setting

DRG-11104: Oracle Text error:
Cause: See the next error on stack
Action: See the next error on stack

DRG-11106: user database session has terminated during this operation
Cause: this database session does not exist or has terminated
Action: determine why the user database session terminated while the operation was still being carried out.

DRG-11107: invalid path specification: *string*
Cause: the path specified is not valid
Action: check the path specification
DRG-11108: invalid filename specified: string
  Cause: the filename specified is not valid
  Action: check the filename for beginning or trailing spaces, invalid characters, or other such problems.

DRG-11109: assigned lexer does not support string query operator
  Cause: This lexer does not support this query operator
  Action: do not use the operator in your query

DRG-11111: value of string must be between string and string
  Cause: You specified a value for the parameter which is out of range
  Action: Specify a value which is in the allowed range

DRG-11112: length of string exceeds maximum of string
  Cause: You specified a value for the parameter which is too long
  Action: Specify a value which is less than or equal to the maximum length

DRG-11113: value of string must be one of string
  Cause: You specified a value for the parameter which is invalid
  Action: Specify a valid value for the parameter

DRG-11114: result table format is not correct for this operation
  Cause: You specified a result table which has the wrong number, type, or names of columns for this operation.
  Action: Check result table. Refer to the documentation for the correct format for each operation

DRG-11115: a value for string must be specified
  Cause: You did not specify a value for the parameter
  Action: Specify a value for the parameter

DRG-11116: value of string must be less than or equal to value of string
  Cause: You specified values for the two parameters which are invalid
  Action: Specify valid values for the parameters

DRG-11117: name is already used by an existing object
  Cause: You tried to create an object whose name conflicts with an object of that type which already exists
  Action: Specify a new name

DRG-11118: object string does not exist
  Cause: You tried to modify or drop an object which does not exist
  Action: Specify correct object name

DRG-11119: operation is not supported by this index type
  Cause: You tried to invoke an operation on an index which is not supported by the index type
  Action: None

DRG-11120: failed to write to file string
  Cause: failed to write to a file
Action: check whether the file exist or access permission available

DRG-11121: failed to read from file string
Cause: failed to read from a file
Action: check whether the file exist or access permission available

DRG-11122: unsupported section group
Cause: unsupported section group is specified for functional contains
Action: change the section group to NULLSECTIONGROUP

DRG-11123: theme indexing is not supported
Cause: theme indexing is on in the lexer preference for functional contains
Action: turn off theme indexing

DRG-11124: invalid value string
Cause: you specified an invalid value
Action: specify a valid value

DRG-11125: invalid format of existing log file string
Cause: the file specified by START_LOG already exists, and is not a previously written log file
Action: specify a new file, or remove the existing file

DRG-11126: context index is empty
Cause: the training table is empty or the context index of training table is not populated
Action: populate the training table or context index

DRG-11127: inconsistent index policy with trained rule
Cause: the ctxrule index policy is inconsistent with the policy in which the rule was trained
Action: change the ctxrule index policy

DRG-11128: invalid format of rule
Cause: the rule format is not valid for this operation
Action: check the rule type and operation type

DRG-11129: the rule table is empty
Cause: the rule table is empty
Action: populate the rule table by training

DRG-11130: no data found in the collection
Cause: feature preparation program can not find any feature in the specified collection
Action: check the setting for extracting features.

DRG-11131: Error from Oracle XML parser: string
Cause: The Oracle XML parser reported an error
Action: Check the document for the error, and fix if necessary

DRG-11132: Invalid character in logfile name
Cause: The logfile parameter to CTX_OUTPUT.START_LOG or CTX_OUTPUT.START_QUERY_LOG contains an invalid character (such as a forward slash)
Action: Remove the invalid character

DRG-11133: failed to convert a datetime value [ora-number]
Cause: Failed to convert the datetime value.
Action: Check the error code

DRG-11134: The file string is currently being used for logging by another process
Cause: The file is currently being used by another process.
Action: Give a different file name.

DRG-11135: feature not generally available
Cause: You tried to use a feature not generally available.
Action: Contact customer support

DRG-11136: assigned lexer does not support entity extraction
Cause: This lexer does not support entity extraction
Action: Do not use this lexer for entity extraction

DRG-11137: tracing is not supported on MTS
Cause: you tried to use ctx_output tracing in an MTS session
Action: connect using a dedicated session and retry the operation

DRG-11138: trace string is already enabled
Cause: you tried to enable a trace that is already enabled
Action: disable the trace first

DRG-11139: trace string is not enabled
Cause: you tried to disable a trace that is not enabled
Action: enable the trace first

DRG-11140: Section string is not MDATA
Cause: you tried to perform MDATA operation on non-mdata section
Action: provide correct mdata section name

DRG-11141: CTX_DDL.REMOVE_MDATA() and CTX_DDL.ADD_MDATA() not allowed for MDATA Section string
Cause: you tried to call CTX_DDL.REMOVE_MDATA() or CTX_DDL.ADD_MDATA() on a MDATA section which is created with ALLOW_ADD_REM parameter set to FALSE.
Action: do not call CTX_DDL.REMOVE_MDATA() or CTX_DDL.ADD_MDATA() on a MDATA section that is created with ALLOW_ADD_REM parameter set to FALSE.

DRG-11142: string cannot be string
Cause: The value for the specified parameter cannot be as specified
Action: Specify the correct value

DRG-11143: Only 64 errors can be traced
Cause: You tried to trace more than 64 errors with ctx_output
Action: Trace fewer errors, or use DRG_DUMP_ALL_ERRORS

DRG-11203: INSO filter not supported on this platform
Cause: You tried to use the INSO filter on a platform which does not support it
Action: Do not use the INSO filter

DRG-11204: user filter command is too long
Cause: The user filter command must be 32 characters or less
Action: Specify a shorted user filter command

DRG-11205: user filter command contains illegal characters
Cause: The user filter command cannot contain special characters such as slashes, parentheses, semicolons, etc.
Action: Correct command specification

DRG-11206: user filter command string could not be executed
Cause: The user filter command could not be executed.
Action: Check that the command exists in $ORACLE_HOME/ctx/bin, and that it is executable.

DRG-11207: user filter command exited with status string
Cause: The user filter command exited with the given error status.
Action: See any DRG-11220, DRG-11221, DRG-11222, DRG-11223, DRG-11224, DRG-11225, or DRG-11227 error message on the error stack otherwise see error status.

DRG-11208: ORACLE_HOME is not set
Cause: ORACLE_HOME is not set
Action: make sure ORACLE_HOME is set when running ctxsrv

DRG-11209: filename for string exceeds maximum length of string
Cause: Value of the file name is too long
Action: Specify a shorter filename

DRG-11210: format column must be a char, varchar, or varchar2 type
Cause: you specified a format column which is not a char, varchar, or varchar2 type.
Action: specify a format column of correct type

DRG-11211: charset column must be a char, varchar, or varchar2 type
Cause: you specified a charset column which is not a char, varchar, or varchar2 type.
Action: specify a charset column of correct type

DRG-11212: procedure filter procedure name contains a semicolon
Cause: the procedure name specified had a semicolon
Action: remove semicolon or rename procedure name. The correct format is PACKAGENAME.PROCEDURE_NAME

DRG-11213: CTXSYS does not own procedure filter stored procedure: string
Cause: CTXSYS does not have execute privilege to the procedure filter stored procedure
DRG-11214: execution of procedure filter stored procedure has failed
  Cause: an error occur while executing the procedure filter stored procedure
  Action: check or debug the stored procedure

DRG-11215: index owner does not have access to filter stored procedure: string
  Cause: the index owner does not have execute privilege of the procedure
  Action: CTXSYS to grant execute privilege of the procedure to index owner

DRG-11216: length of datastore data exceeds limit
  Cause: the length of the datastore data passed to the filter stored procedure is longer than the maximum length (32767 bytes)
  Action: check primary key parameter

DRG-11217: INSO safe callout failed
  Cause: The INSO safe callout cannot be executed
  Action: check the Oracle error

DRG-11218: malformed mail line, line string
  Cause: The mail message has an error at the indicated line
  Action: manually edit mail message, if possible

DRG-11219: malformed mail configuration file, line string
  Cause: mail filter configuration file has an error at the indicated line
  Action: manually edit mail filter configuration file, if possible

DRG-11220: Third-party filter is out of memory.
  Cause: Third-party filter could not filter this document because it was unable to allocate sufficient virtual memory.
  Action: Increase virtual memory provided by the Operating System and reindex this document.

DRG-11221: Third-party filter indicates this document is corrupted.
  Cause: Third-party filter could not filter this document because this document is corrupted.
  Action: Fix the corruption and reindex this document.

DRG-11222: Third-party filter does not support this known document format.
  Cause: Third-party filter was able to recognize the format of this document but could not filter it because this format is not supported.
  Action: Remove this document or specify it to be ignored.

DRG-11223: Third-party filter indicates this document is password protected or encrypted.
  Cause: Third-party filter encountered a password protected or encrypted document and could not filter it because this level of password protection or encryption is not supported.
  Action: Remove this document or specify it to be ignored.

DRG-11224: Third-party filter is unable to create or write to temporary file.
**Cause:** Third-party filter could not filter this document because it was unable to create a temporary file or unable to write to a temporary file.

**Action:** Make sure that the Operating System specified temporary directory has enough space and that the Operating System Oracle user has the privileges to create files in this temporary directory.

**DRG-11225: Third-party filter timed out.**

**Cause:** Third-party filter could not filter this document because the filter timed out.

**Action:** Increase the value of the TIMEOUT attribute of INSO_FILTER filter type and reindex this document. When TIMEOUT attribute is set to 0 and the session hangs then contact Oracle Support.

**DRG-11226: Error initializing third-party filter: string**

**Cause:** There was an error initializing the third-party filter.

**Action:** Check the following messages for details

**DRG-11227: Third-party filter does not support this document format.**

**Cause:** Third-party filter does not support the format of this document.

**Action:** Remove this document or specify it to be ignored.

**DRG-11301: error while indexing document**

**Cause:** An error was encountered while indexing the document. The error may have occurred during lexing, parsing for sections, or other

**Action:** review document and update with valid data. Note that the document contents may have been partially indexed, so it may be returned by some queries.

**DRG-11303: secondary indexes are not supported by this indextype**

**Cause:** You attempted to create an index on an index-organized table, but the indextype does not support this action.

**Action:** None

**DRG-11304: function-based indexes are not supported by this indextype**

**Cause:** You attempted to create a function-based index but the indextype does not support this action.

**Action:** None

**DRG-11305: create/alter index string is in progress in another session**

**Cause:** you attempted to mark the index from INPROGRESS to FAILURE but create/alter on the same index is in progress in another session

**Action:** None

**DRG-11306: operation cannot be performed on a policy**

**Cause:** you attempted to perform an operation on a policy, but the operation is only valid for an index.

**Action:** None

**DRG-11307: operation cannot be performed on an index**

**Cause:** you attempted to perform an operation on an index, but the operation is only valid for a policy.

**Action:** None
DRG-11308: unsupported column expression *string*
   Cause: You attempted to create an index with an unsupported column expression.
   Action: None

DRG-11309: invalid filter by column: *string*
   Cause: the column specified is not valid
   Action: check that the followings are valid: a) column is of supported datatype b) valid table name, column name in the specification.

DRG-11310: invalid order by column: *string*
   Cause: the column specified is not valid
   Action: check that the followings are valid: a) column is of supported datatype b) valid table name, column name in the specification.

DRG-11311: *string* cannot be specified for this optimization mode
   Cause: the specified option is not valid for this optimization mode
   Action: remove the specified option

DRG-11312: source and new policy must have same owner
   Cause: the new policy has a different owner than the source policy
   Action: Ensure that both policies are owned by the same user

DRG-11313: populate index error on index partition *string*
   Cause: failed to populate the text index on the specified partition
   Action: See the next errors on stack and take appropriate action

DRG-11314: changing TRANSACTIONAL property on index with rows on pending queue not allowed
   Cause: the index has pending unsynced rows
   Action: sync the index before changing the TRANSACTIONAL property

DRG-11316: $S table cannot be created with *string*
   Cause: the $S table cannot be created with the specified storage option
   Action: remove the specified option from the index preference and retry the index creation

DRG-11317: rowid *string* is not in the index
   Cause: you specified an invalid rowid in ctx_ddl.add_mdata
   Action: correct the rowid and retry

DRG-11318: error processing dr$sdata_update
   Cause: there was an error
   Action: check the error stack for more details

DRG-11319: more than 1 index found on $I. OPTIMIZE REBUILD not supported
   Cause: OPTIMIZE REBUILD is not supported due to the specified reason
   Action: resolve the issue, and retry the operation

DRG-11320: no index found on $I. OPTIMIZE REBUILD not supported
   Cause: OPTIMIZE REBUILD is not supported due to the specified reason
   Action: resolve the issue, and retry the operation
DRG-11321: triggers detected on SI. OPTIMIZE REBUILD not supported
   Cause: OPTIMIZE REBUILD is not supported due to the specified reason
   Action: resolve the issue, and retry the operation

DRG-11322: fast optimize not supported for big_io option
   Cause: OPTIMIZE FAST is not supported with big_io option
   Action: run optimize full or rebuild instead

DRG-11323: merge optimize requires near_realtime option
   Cause: OPTIMIZE MERGE requires near_realtime option
   Action: run another optimize mode

DRG-11324: fast optimize not supported for separate_offsets option
   Cause: OPTIMIZE FAST is not supported with separate_offsets option
   Action: run optimize full or rebuild instead

DRG-11325: stageitab only supported for context index
   Cause: STAGEITAB requires context index
   Action: don’t use stageitab on non context indexes

DRG-11326: separate offsets only supported for context index
   Cause: SEPARATE_OFFSETS requires context index
   Action: don’t use separateOffsets on non context indexes

DRG-11327: big_io only supported for context index
   Cause: BIG_IO requires context index
   Action: don’t use big_io on non context indexes

DRG-11328: optimize validation failed
   Cause: optimize validation failed
   Action: file a bug

DRG-11332: Index already has STAGE_ITAB set
   Cause: Index already has stage_itab set
   Action: Do not add stage_itab to this index

DRG-11333: Index does not have STAGE_ITAB set
   Cause: Index does not have stage_itab set
   Action: Do not remove stage_itab from this index

DRG-11334: Index already has BIG_IO set
   Cause: Index already has big_io set
   Action: Do not add big_io to this index

DRG-11335: Index does not have BIG_IO set
   Cause: Index does not have big_io set
   Action: Do not remove big_io from this index

DRG-11336: Index already has SEPARATE_OFFSETS set
   Cause: Index already has separate_offsets set
   Action: Do not add separate_offsets to this index
DRG-11337: Index does not have SEPARATE_OFFSETS set
  Cause: Index does not have separate_offsets set
  Action: Do not remove separate_offsets from this index

DRG-11338: policy string does not exist
  Cause: the specified policy does not exist or you do not have access to it.
  Action: Specify an existing index

DRG-11339: $A table cannot be created with string
  Cause: the $A table cannot be created with the specified storage option
  Action: remove the specified option from the index preference and retry the index creation

DRG-11340: $F table cannot be created with string
  Cause: the $F table cannot be created with the specified storage option
  Action: remove the specified option from the index preference and retry the index creation

DRG-11341: Index optimization failed for one or more tokens
  Cause: Index optimization generated an error for one or more tokens, possibly due to corruption of the token_info blob.
  Action: Check the index optimization log for the detailed error, or retry the optimize call with logging enabled

DRG-11342: OPTIMIZE REBUILD not supported for partitioned $I and global $X
  Cause: OPTIMIZE REBUILD is not supported due to the specified reason
  Action: resolve the issue, and retry the operation

DRG-11343: OPTIMIZE REBUILD not supported for current $I partitioning scheme
  Cause: OPTIMIZE REBUILD is not supported due to the specified reason
  Action: resolve the issue, and retry the operation

DRG-11344: SPLIT DOLLARI does not allow an empty mapping table input
  Cause: SPLIT DOLLARI doesn’t generate any output for empty mapping table
  Action: populate the mapping table, and retry the operation

DRG-11400: failed to parse document with key string
  Cause: the document specified for linguistic extraction could not be parsed. This could indicate that the document is not well-formed English
  Action: check the document contents

DRG-11403: primary key value too long
  Cause: the primary key value parameter passed to the service request is longer than the maximum primary key length (64 bytes)
  Action: check primary key parameter

DRG-11404: no primary key value specified
  Cause: the primary key value parameter passed to the service request is null
  Action: check primary key parameter

DRG-11410: could not insert into string result table
Cause: an ORACLE error occurred while linguistic output was being inserted into the result table
Action: take action appropriate to the ORACLE error code.

DRG-11418: insufficient document content for linguistic parser
Cause: the document specified for linguistic extraction was parsed but the document content was insufficient for linguistic extraction by the specified parser.
Action: check the document contents or try modifying linguistic settings

DRG-11422: linguistic initialization failed
Cause: linguistic services initialization failed
Action: Check to see if knowledge base files present for the language

DRG-11425: gist level string is invalid
Cause: invalid gist level
Action: Specify a valid gist level

DRG-11427: valid gist level values are string
Cause: Invalid gist level
Action: Specify a valid gist level

DRG-11428: document contains invalid characters
Cause: The document contains invalid characters
Action: Remove invalid characters

DRG-11432: file error while accessing knowledge base
Cause: An oracle error was encountered during knowledge base access
Action: Check to see if knowledge base files present for the language

DRG-11435: primary key value is invalid
Cause: the primary key value parameter passed to the service request is not valid
Action: check primary key parameter

DRG-11439: index name length exceeds maximum of string bytes
Cause: the length of the index name is longer than the maximum index name size
Action: drop the index and recreate the index with a shorter index name

DRG-11440: operation not supported for the string language
Cause: the requested operation is not supported for the current language
Action: Do not request this operation

DRG-11441: gist numParagraphs string is invalid
Cause: invalid gist numparagraphs
Action: Specify valid gist numparagraphs

DRG-11442: valid gist numParagraphs values are string
Cause: invalid gist numparagraphs
Action: Specify valid gist numparagraphs

DRG-11443: gist maxPercent string is invalid
Cause: invalid gist max percent
Action: Specify valid gist max percent

DRG-11444: valid gist maxPercent values are string
  Cause: invalid gist max percent
  Action: Specify valid gist max percent

DRG-11445: rowid value is invalid: string
  Cause: the rowid value parameter passed to the service request is not valid
  Action: check rowid parameter

DRG-11446: supplied knowledge base file string not installed
  Cause: Either using Oracle Express edition or supplied Knowledge Base was required but was not installed.

DRG-11480: ctxkbtc memory allocation error: %(1)
  Cause: Unable to allocate memory
  Action: Contact your system administrator

DRG-11481: linguistic feature not enabled
  Cause: linguistic feature not enabled
  Action: enable linguistic feature

DRG-11500: column name expected, found string on line string
  Cause: possibly miss-spelt column name or keyword
  Action: check spellings and punctuation around specified line

DRG-11501: identifier string found in place of column name on line string
  Cause: possibly miss-spelt column name
  Action: check spellings around specified line

DRG-11502: read of file failed at line string for file string
  Cause: bad file name, wrong file_type or file system error
  Action: check file name, type and/or file integrity

DRG-11503: insert statement overflows maximum statement size
  Cause: total length of statement exceeds database maximum
  Action: reduce length of column names or number of columns

DRG-11504: invalid longsize parameter of string specified
  Cause: invalid option argument
  Action: specify long buffer size in kbytes above 0

DRG-11505: long data on line string not found or invalid
  Cause: either bad data or bad data file
  Action: check file exists and is accessible, if separate

DRG-11506: record ignored on line string because of error(s)
  Cause: an error occurred parsing this row’s data
Action: move and amend line in error to alternate load file

DRG-11507: file error trying to read file string
Cause: file not found or could not be read
Action: check name and location of file

DRG-11508: bad or missing string token on line string
Cause: token expected was not found
Action: move and amend record affected to error load file

DRG-11509: value expected on line string
Cause: could not make sense of text where value expected
Action: move and amend record affected to error load file

DRG-11510: encountered unrecoverable error on line string
Cause: see previous messages
Action: see previous errors

DRG-11511: specified table does not contain a LONG RAW column
Cause: text must be inserted into a LONG RAW type column
Action: check table and type of data

DRG-11512: bad syntax for thesaurus load file at line string
Cause: load file must have specific format for loading thesaurus
Action: check documentation for description of correct format

DRG-11513: unable to open or write to file string
Cause: an attempt to open or to write to the given file failed
Action: check with system administrator

DRG-11514: user string does not have UPDATE or SELECT privilege on string
Cause: user has not been granted UPDATE or SELECT privilege
Action: check privilege on the user

DRG-11515: not enough text key values
Cause: number of values provided does not match the number of text keys
Action: provide same number of values as the number of text keys

DRG-11516: user must be at least in role CTXUSER to perform this operation
Cause: user does not have CTXUSER, CXAPP or CTXADMIN role
Action: grant user the proper role

DRG-11517: error when validating text objects
Cause: see accompanying Oracle error
Action: see accompanying Oracle error

DRG-11518: text table string does not have a LONG or LONG RAW column
Cause: table specified does not have a LONG or LONG RAW column
Action: check the table

DRG-11519: encounter error when exporting a LONG or LONG RAW column
Cause: see accompanying error message
Action: see accompanying error message

DRG-11520: error writing to file
Cause: file does not exist
Action: make sure file exists

DRG-11521: encounter error when updating a LONG or LONG RAW column
Cause: see accompanying error message
Action: see accompanying error message

DRG-11522: no row exists for the text key(s) specified
Cause: no row in the table has the text key(s) specified
Action: use a valid text key(s)

DRG-11523: unable to lock the specified row for update
Cause: some other process has a lock on the row
Action: release the lock or wait until the lock is released

DRG-11524: primary key value is missing
Cause: primary key value is not provided
Action: provide the primary key value(s)

DRG-11525: invalid commitafter parameter of string specified
Cause: invalid option argument
Action: specify commitafter above 0

DRG-11526: filename exceeds maximum length
Cause: value of the file name is too long
Action: Specify a shorter file name

DRG-11527: end token not found on line string
Cause: <TEXTEND> not found at end of record
Action: processing discontinued - amend record

DRG-11528: LONG or LONG RAW column definition found in structure data
Cause: could be misplaced
Action: remove reference to LONG or LONG RAW column from structure data

DRG-11529: token exceeds maximum length
Cause: value of the column name or value is too long
Action: processing discontinued - amend record

DRG-11530: token exceeds maximum length
Cause: value of the phrase or relation word is too long
Action: processing discontinued - amend record

DRG-11531: start token not found on line string
Cause: <TEXTSTART: not found at start of record
Action: processing discontinued - amend record
DRG-11532: error reading through end of line string for file string
  Cause: characters encountered while reading through end of line
  Action: remove extraneous characters

DRG-11533: improper value of column string
  Cause: value of the column is too long or mismatched quote
  Action: processing discontinued - amend record

DRG-11534: invalid column string
  Cause: column does not exist or it's misspelled
  Action: processing discontinued - amend record

DRG-11535: error writing phrase or qualifier: string on line string to memory
  Cause: not enough memory
  Action: allocate more memory, contact WorldWide Support if problem persists

DRG-11600: URL store: string has permanently moved
  Cause: the document referred to by the URL has permanently moved
  Action: find the new address, if any, of the document

DRG-11601: URL store: bad syntax on request for string
  Cause: client did not make correct request
  Action: contact support

DRG-11602: URL store: access to string requires authentication
  Cause: user has to provide password or other authentication
  Action: get required access, or check URL

DRG-11603: URL store: payment required to access string
  Cause: payment is required before the URL can be accessed
  Action: check URL, or pay if required if access necessary

DRG-11604: URL store: access to string is denied
  Cause: access to the URL is denied
  Action: check URL; if correct, do not try to access URL again

DRG-11605: URL store: document specified by string not found
  Cause: the document can not be found on the host specified
  Action: check URL

DRG-11606: URL store: access to string timed out waiting for client request
  Cause: client did not make response within timeout period
  Action: check URL

DRG-11607: URL store: access to string was denied due to garbled response
  Cause: Web server identified in URL doesn't obey HTTP protocol
  Action: contact the Web administrator of the remote host

DRG-11608: URL store: host portion of string specified incorrectly
  Cause: host portion of the URL could not be parsed
  Action: check URL
DRG-11609: URL store: unable to open local file specified by *string*
Cause: attempt to open local file failed
Action: check URL

DRG-11610: URL store: unable to read local file specified by *string*
Cause: attempt to read local file failed
Action: contact system administrator

DRG-11611: URL store: unknown protocol specified in *string*
Cause: the protocol parsed is neither http or file
Action: check URL

DRG-11612: URL store: unknown host specified in *string*
Cause: the address of the host specified could not be resolved
Action: check URL

DRG-11613: URL store: connection refused to host specified by *string*
Cause: attempt to connect to host was forcibly refused
Action: check URL

DRG-11614: URL store: communication with host specified in *string* timed out
Cause: a network operation timed out
Action: try again later; network connection may be down to Web server

DRG-11615: URL store: write failed sending to *string* over network
Cause: unknown error writing request to Web server
Action: check network connection

DRG-11616: URL store: too many redirections trying to access *string*
Cause: too long a chain of HTTP redirections given the URL
Action: contact the Web administrator of the remote host

DRG-11617: URL store: URL *string* is too long
Cause: The length of the URL string is longer than URLSIZE
Action: set URLSIZE attribute to a larger value

DRG-11618: URL store: document identified by *string* is too large
Cause: document larger than user-set maximum size
Action: do not access URL, or increase document size limit

DRG-11619: URL store: row in table is empty
Cause: row deleted or otherwise missing
Action: check table if necessary

DRG-11620: URL store: thread operation error
Cause: thread operation failed
Action: contact system administrator

DRG-11621: URL store: socket open error for *string*
Cause: socket open failed; probably too many open file descriptors
Action: reduce the maximum number of threads started
DRG-11622: URL store: unknown HTTP error string getting string
  Cause: an unexpected HTTP error has occurred
  Action: consult HTTP error codes; if valid, contact support

DRG-11623: URL store: unknown error getting string
  Cause: unexpected error
  Action: contact support

DRG-11624: invalid attribute string for string: proper range string to string
  Cause: unexpected error
  Action: change attribute value

DRG-11625: MAXURLS * URLSIZE must be less than string
  Cause: MAXURLS * URLSIZE cannot be larger than the limit
  Action: Lower either MAXURLS or URLSIZE

DRG-11626: URL store: unknown protocol specified during redirect from string
  Cause: the URL redirected to a site with neither http nor file protocol
  Action: check URL

DRG-11627: URL store: not implemented error getting string
  Cause: The remote host returned a 501 not implemented error
  Action: Check URL

DRG-11628: URL store: bad gateway error getting string
  Cause: The remote host returned a 502 bad gateway error
  Action: Check URL

DRG-11629: URL store: service unavailable error getting string
  Cause: The remote host returned a 503 service temporarily unavailable error
  Action: Check URL

DRG-11630: URL store: gateway timeout error getting string
  Cause: The remote host returned a 504 gateway timeout error
  Action: Check URL

DRG-11700: thesaurus string already exists
  Cause: thesaurus with same name exists
  Action: use another name

DRG-11701: thesaurus string does not exist
  Cause: thesaurus does not exist
  Action: use another thesaurus or create it

DRG-11702: string
  Cause: error while parsing thesaurus operator in query term. see error message for details.
  Action: see error message

DRG-11703: user string must have at least CTXAPP role to execute this function
  Cause: privilege is not sufficient
Action: grant user CTXAPP role

DRG-11704: phrase 'string' does not exist
Cause: phrase does not exist
Action: use another phrase or create it

DRG-11705: multilevel jump from string to string
Cause: the thesaurus load file has a multilevel jump which could not be parsed.
Action: correct thesaurus file

DRG-11706: invalid relation string
Cause: You specified an invalid relation. The set of valid relations will be displayed. Additionally, you may be able to specify a translation, which has the syntax languagename: where languagename can be any string up to 10 bytes
Action: Specify a valid relation

DRG-11707: valid relations: string
Cause: You specified an invalid relation. The set of valid relations will be displayed. Additionally, you may be able to specify a translation, which has the syntax languagename: where languagename can be any string up to 10 bytes
Action: Specify a valid relation

DRG-11708: too many thesauri
Cause: ctxkbtc cannot compile more than 16 thesauri
Action: Specify fewer thesauri

DRG-11709: too many terms in thesaurus
Cause: number of thesaurus terms exceeds maximum
Action: Use a thesaurus with fewer terms

DRG-11710: thesaurus term string too long
Cause: knowledge base does not permit terms longer than 80 characters
Action: Correct thesaurus

DRG-11711: too much data for term string
Cause: internal limit on size of data per term
Action: redesign thesaurus

DRG-11712: multiple Broader Terms for term string
Cause: There is a term in the thesaurus with multiple broader terms
Action: make sure each term has only one broader term

DRG-11713: multiple Preferred Terms per synonym ring
Cause: There is a synonym ring in the thesaurus with multiple preferred terms
Action: make sure each synonym ring has only one preferred term

DRG-11714: synonyms have different Broader Terms
Cause: Some synonyms in a synonym ring have different broader terms
Action: make sure all synonyms have the same broader term

DRG-11715: attempt to add a BT relation between 2 KB categories string and string
Cause: BT relation cannot be between two existing knowledge base categories
Action: redesign the BT hierarchy

DRG-11716: attempt to add Narrower Term string for non-Preferred Term string
  Cause: only a PT can have NTs
  Action: attach the NT to the preferred term

DRG-11717: attempt to add Related Term string to non-Preferred Term string
  Cause: only a PT can have RTs
  Action: attach the RT

DRG-11718: multiple Preferred Terms for term string
  Cause: There are multiple preferred terms for this term
  Action: Correct thesaurus

DRG-11719: Broader Term hierarchy too deep
  Cause: The broader term hierarchy in this thesaurus is too deep
  Action: flatten the hierarchy for best results

DRG-11720: too many synonyms per synonym ring
  Cause: too many synonyms for a single preferred term
  Action: introduce further distinctions to deepen the hierarchy

DRG-11721: thesaurus string is empty
  Cause: no entries in thesaurus
  Action: add some entries or drop the thesaurus

DRG-11722: invalid language specification
  Cause: language specification cannot be more than 10 characters
  Action: reduce language specification to less or equal to 10 char

DRG-11723: phrase cannot be NULL
  Cause: you tried to add a NULL phrase to the thesaurus
  Action: specify a valid phrase

DRG-11724: phrase string already exists
  Cause: phrase with same name exists
  Action: use another name

DRG-11725: phrase does not have any synonyms
  Cause: you tried to nominate a phrase with no synonyms to be the preferred term,
  or you tried to drop SYN from a phrase with no synonyms
  Action: None

DRG-11726: phrase is not a preferred term
  Cause: you tried to remove the preferred term relation from a phrase which is not
  a preferred term.
  Action: None

DRG-11727: phrase does not have any related terms
  Cause: you tried to drop a relation which does not exist
  Action: None
DRG-11728: phrase does not have any broader terms of this type
  Cause: you tried to drop a relation which does not exist
  Action: None

DRG-11729: phrase does not have any narrower terms of this type
  Cause: you tried to drop a relation which does not exist
  Action: None

DRG-11730: relation does not exist
  Cause: you tried to drop a relation which does not exist
  Action: None

DRG-11731: translation does not exist
  Cause: you tried to drop a translation which does not exist
  Action: None

DRG-11732: phrase does not have any translations
  Cause: you tried to drop translations which does not exists
  Action: None

DRG-11733: more than one translation for the term in the specified language
  Cause: the term has more than one translation in the specified language
  Action: specified a translation

DRG-11734: missing homograph
  Cause: A term of the form 'homograph(disambiguation)' is missing the the homograph.
  Action: None

DRG-11735: missing disambiguation
  Cause: A term of the form 'homograph(disambiguation)' is missing the the disambiguation (i.e., homograph()).
  Action: None

DRG-11736: illegal text after disambiguated homograph
  Cause: A term of the form 'homograph(disambiguation)' has text after the disambiguation (e.g, homograph(disambiguation) extra text”.
  Action: None

DRG-11801: Continue
  Cause: Enquire user to decide if continue is necessary HTTP_ERROR = 100
  Action: Upon positive response, continue the original operation

DRG-11802: Switching Protocols
  Cause: Telling client a protocol switching just happened HTTP_ERROR = 101
  Action: The user agent takes proper actions

DRG-11803: OK
  Cause: Telling client things are ok HTTP_ERROR = 200
  Action: The user agent takes proper actions
DRG-11804: Created
  Cause: Telling client things are created HTTP_ERROR = 201
  Action: The user agent takes proper actions

DRG-11805: Accepted
  Cause: Telling client things are accepted but not committed HTTP_ERROR = 202
  Action: The user agent takes proper actions

DRG-11806: Non-authoritative Information
  Cause: The returned metainformation is not the definitive set HTTP_ERROR = 203
  Action: The user agent knows the information is Non-authoritative

DRG-11807: No Content
  Cause: Request has been fulfilled but no new information found HTTP_ERROR = 204
  Action: The user agent takes proper actions

DRG-11808: Reset Content
  Cause: Telling client to reset the document view HTTP_ERROR = 205
  Action: The user agent takes proper actions

DRG-11809: Partial Content
  Cause: Telling client document content is a partial content HTTP_ERROR = 206
  Action: The user agent takes proper actions

DRG-11810: Partial Update OK
  Cause: Telling client document is partially updated HTTP_ERROR = 207
  Action: The user agent takes proper actions

DRG-11811: Multiple Choices
  Cause: Telling client multiple choices of resources is possible HTTP_ERROR = 300
  Action: The user agent takes proper actions

DRG-11812: Moved Permanently
  Cause: The URI has been assigned a new permanent URI HTTP_ERROR = 301
  Action: The user agent takes proper actions

DRG-11813: Moved Temporarily
  Cause: The URI resides temporarily under a different URI HTTP_ERROR = 302
  Action: The user agent takes proper actions

DRG-11814: See Other
  Cause: The URI can be found using GET METHOD under a different URI HTTP_ERROR = 303
  Action: The user agent takes proper actions

DRG-11815: Not Modified
  Cause: Response to conditional GET, indicating document not modified. HTTP_ERROR = 304
  Action: The user agent takes proper actions
DRG-11816: Use Proxy
  Cause: The client should use specified proxy to repeat the request HTTP_ERROR = 305
  Action: The user agent takes proper actions

DRG-11817: Proxy Redirect
  Cause: Proxy redirection. Not used HTTP_ERROR = 306
  Action: Outdated due to HTTP evolution

DRG-11818: Temporary Redirect
  Cause: The resource is temporarily under a different URI. HTTP_ERROR = 307
  Action: The takes proper actions

DRG-11819: Bad Request
  Cause: The URL syntax is incorrect. Request rejected by server. HTTP_ERROR = 400
  Action: The user agent takes proper actions

DRG-11820: Unauthorized
  Cause: The request requires further authentication. HTTP_ERROR = 401
  Action: The user agent takes proper actions

DRG-11821: Payment Required
  Cause: Reserved for future use. HTTP_ERROR = 402
  Action: The user agent takes proper actions

DRG-11822: Forbidden
  Cause: The server refuses to fulfil the request from client HTTP_ERROR = 403
  Action: The user agent takes proper actions

DRG-11823: Not Found
  Cause: The server can not find the requested URI HTTP_ERROR = 404
  Action: The user agent takes proper actions

DRG-11824: Method Not Allowed
  Cause: The user agent specified method not allowed HTTP_ERROR = 405
  Action: The user agent reads allow header to decide alternatives.

DRG-11825: Not Acceptable
  Cause: Requested resource is not acceptable according to request header HTTP_ERROR = 406
  Action: The user agent should query the user for the next action.

DRG-11826: Proxy Authentication Required
  Cause: The client must authenticate itself with the proxy. HTTP_ERROR = 407
  Action: The user agent takes proper actions

DRG-11827: Request Timeout
  Cause: The server is tired of waiting for the request HTTP_ERROR = 408
  Action: The user agent repeat the request
DRG-11828: Conflict
   Cause: The request conflicts with the current state of the URI HTTP_ERROR = 409
   Action: The user agent takes proper actions

DRG-11829: Gone
   Cause: The resource is no longer available and no forwarding address. HTTP_ERROR = 410
   Action: The user agent takes proper actions

DRG-11830: Length Required
   Cause: The server must receive a content-length header. HTTP_ERROR = 411
   Action: The user agent takes proper actions

DRG-11831: Precondition Failed
   Cause: Telling the user agent that the resource failed preconditions HTTP_ERROR = 412
   Action: The user agent takes proper actions

DRG-11832: Request Entity Too Large
   Cause: Request rejected because request entity is too large. HTTP_ERROR = 413
   Action: If Retry-After header found, the user agent should retry.

DRG-11833: Request-URI Too Big
   Cause: The server is refusing to accept the URI which is too big. HTTP_ERROR = 414
   Action: The user agent takes proper actions

DRG-11834: Unsupported Media Type
   Cause: The server is refusing the request because of media type HTTP_ERROR = 415
   Action: The user agent takes proper actions

DRG-11835: Requested Range Not Satisfiable
   Cause: The byte range request can not be satisfied by the resource extent. HTTP_ERROR = 416
   Action: The user agent reads content-range header in the response.

DRG-11836: Expectation Failed
   Cause: Server can not meet the user agent’s expectation. HTTP_ERROR = 417
   Action: The user agent takes proper actions

DRG-11837: Reauthorization Required
   Cause: Reserved HTTP_ERROR = 418
   Action: Reserved

DRG-11838: Proxy Reauthentication Required
   Cause: Reserved HTTP_ERROR = 419
   Action: Reserved

DRG-11839: Internal Server Error
Cause: The server encountered internal error in fulfilling the request. HTTP_ERROR = 500
Action: The user agent takes proper actions

DRG-11840: Not Implemented
Cause: The server can’t support a request feature which has yet to be implemented. HTTP_ERROR = 501
Action: The user agent takes proper actions

DRG-11841: Bad Gateway
Cause: In serving the request, the server received invalid response from gateway. HTTP_ERROR = 502
Action: The user agent takes proper actions

DRG-11842: Service Unavailable
Cause: Server overloaded or in maintenance mode. HTTP_ERROR = 503
Action: If retry-after header is in the response, retry the request.

DRG-11843: Gateway Timeout
Cause: Upstream server did not timely respond to the gateway server. HTTP_ERROR = 504
Action: The user agent takes proper actions

DRG-11844: HTTP Version Not Supported
Cause: The HTTP version in the request header is rejected by the server. HTTP_ERROR = 505
Action: The user agent takes proper actions

DRG-11845: No Partial Update
Cause: Reserved HTTP_ERROR = 506
Action: Reserved

DRG-11846: Response Is Stale
Cause: The user agent knows the returned response is stale. HTTP_CACHE_ERROR = 10
Action: The user agent client takes proper actions.

DRG-11847: Revalidation Failed
Cause: User agent's attempt to revalidate a stale response failed. HTTP_CACHE_ERROR = 11
Action: The user agent client takes proper actions

DRG-11848: Disconnected Operation
Cause: The cache is intentionally disconnected for a time period. HTTP_CACHE_ERROR = 12
Action: The user agent client takes proper actions

DRG-11849: Heuristic Expiration
Cause: Cache freshness lifetime and response age both greater than 24 hours. HTTP_CACHE_ERROR = 13
Action: The user agent client takes proper actions
DRG-11850: Transformation Applied
  Cause: Telling cache manager, content encoding/media type has been changed in cache. HTTP_CACHE_ERROR = 14
  Action: The user agent takes proper actions

DRG-11851: Cache Related Warning
  Cause: Arbitrary information about cache to be presented to logger. HTTP_CACHE_ERROR = 99
  Action: The user agent client must not take any automated action.

DRG-11852: Can't Locate Remote Host
  Cause: connection to remote host failed USER_AGENT_ERROR
  Action: The user agent client takes proper actions

DRG-11853: No Host Name Found
  Cause: The host name is not specified in URI. USER_AGENT_ERROR
  Action: The user agent client takes proper action.

DRG-11854: No File Name Found Or File Not Accessible
  Cause: Unable to open the file specified USER_AGENT_ERROR
  Action: The user agent client takes proper actions

DRG-11855: FTP Server Replies
  Cause: FTP server responds to the agent request USER_AGENT_ERROR
  Action: The user agent client takes proper actions

DRG-11856: FTP Server Doesn't Reply
  Cause: No response from FTP server during operation. USER_AGENT_ERROR
  Action: The user agent client takes proper actions

DRG-11857: Server Timed Out
  Cause: Server operation timed out USER_AGENT_ERROR
  Action: The user agent client takes proper actions

DRG-11858: Gopher Server Replies
  Cause: Gopher server responds to the agent request. USER_AGENT_ERROR
  Action: The user agent client takes proper actions

DRG-11859: Data Transfer Interrupted
  Cause: Processing of URL request was interrupted USER_AGENT_ERROR
  Action: The user agent client takes proper actions

DRG-11860: Connection Establishment Interrupted
  Cause: Connection operation was interrupted USER_AGENT_ERROR
  Action: The user agent client takes proper actions

DRG-11861: CSO-server Replies
  Cause: Telling client things are ok USER_AGENT_ERROR
  Action: The user agent takes proper actions

DRG-11862: This Is Probably A HTTP Server 0.9 Or Less
Cause: A very old web server USER_AGENT_ERROR
Action: The user agent client takes proper actions

DRG-11863: Bad, Incomplete, Or Unknown Response
Cause: The server is numbering something not understandable USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11864: Unknown Access Authentication Scheme
Cause: The server is using an unknown access authentication scheme USER_AGENT_ERROR
Action: The user agent client takes proper actions

DRG-11865: News Server Replies
Cause: News Server is responding USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11866: Please Try `ftp://` Instead Of `file://`
Cause: wrong access scheme is used. USER_AGENT_ERROR
Action: The user agent client takes proper actions

DRG-11867: Method Not Suited For Automatic Redirection
Cause: Telling client things are ok USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11868: Too Many Redirections
Cause: The web server setup configured too many redirections USER_AGENT_ERROR
Action: The user agent client should take proper actions

DRG-11869: Premature End Of File Detected
Cause: Detected end of file is unexpected USER_AGENT_ERROR
Action: The user agent client takes proper actions

DRG-11870: Response From WAIS Server Too Large -- Extra Lines Ignored
Cause: Response from WAIS caused buffer overflow USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11871: WAIS Server Doesn't Return Any Data
Cause: Bad WAIS Server USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11872: Can't Connect To WAIS Server
Cause: Connect to WAIS server failed USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11873: System Call Replies
Cause: register what system call replies USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11874: Wrong Or Unknown Access Scheme
Cause: Protocol class is wrongfully connected to the server USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11875: Access Scheme Is Not Allowed
Cause: Telling client things are ok USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11876: When You Are Connected, You Can Log In
Cause: Pass information to telnet agent USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11877: This Cache Version Has Expired And Will Be Automatically Reloaded
Cause: Need to tell user that cache entry has been reloaded USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11878: Loading New Rules Must Be Explicitly Acknowledged
Cause: Let user agent client be aware of new rule loading USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-11879: Automatic Proxy Redirection Must Be Explicitly Acknowledged
Cause: Let user agent client be aware of proxy redirection USER_AGENT_ERROR
Action: The user agent takes proper actions

DRG-12001: Please enter username:
Cause: Prompt user for name W3CLIB_MSG = 0
Action: The user agent client takes proper actions

DRG-12002: Please enter username for proxy authentication:
Cause: Prompt user for name W3CLIB_MSG = 1
Action: The user agent client takes proper actions

DRG-12003: Please enter username for this FTP server:
Cause: Prompt user for name W3CLIB_MSG = 2
Action: The user agent client takes proper actions

DRG-12004: Password:
Cause: Prompt user for password W3CLIB_MSG = 3
Action: The user agent client takes proper actions

DRG-12005: Please give name of file to save in:
Cause: Prompt user for file name W3CLIB_MSG = 4
Action: The user agent client takes proper actions

DRG-12006: Please enter account:
Cause: Prompt user for account W3CLIB_MSG = 5
Action: The user agent client takes proper actions

DRG-12007: You might not be allowed to use this method here, continue?
Cause: Warn user of deny of service. W3CLIB_MSG = 6
Action: The user agent client takes proper actions

DRG-12008: Location has moved, continue?
Cause: Warn user of location changes. W3CLIB_MSG = 7
Action: The user agent client takes proper actions

DRG-12009: A new set of rules is requested to be added to your setup - continue?
Cause: Warn user of rule changes. W3CLIB_MSG = 8
Action: The user agent client takes proper actions

DRG-12010: This file already exists - replace existing file?
Cause: Warn user of pending replacement W3CLIB_MSG = 9
Action: The user agent client takes proper actions

DRG-12011: Authentication failed - retry?
Cause: Warn user of authentication failure W3CLIB_MSG = 10
Action: The user agent client takes proper actions

DRG-12012: Proxy authentication failed - retry?
Cause: Warn user of proxy authentication failure W3CLIB_MSG = 11
Action: The user agent client takes proper actions

DRG-12013: This method has already been performed - repeat operation?
Cause: Warn user the repetition of previous method used W3CLIB_MSG = 12
Action: The user agent client takes proper actions

DRG-12014: This document is very big - continue operation?
Cause: Warn user of big document processing W3CLIB_MSG = 13
Action: The user agent client takes proper actions

DRG-12015: The source document for this operation has moved - continue?
Cause: Warn user of location changes W3CLIB_MSG = 14
Action: The user agent client takes proper actions

DRG-12016: The target document for this operation has moved - continue?
Cause: Warn user of destination document changes W3CLIB_MSG = 15
Action: The user agent client takes proper actions

DRG-12017: A redirection may change the behavior of this method - proceed anyway?
Cause: Warn user of redirection effects on method W3CLIB_MSG = 16
Action: The user agent client takes proper actions

DRG-12018: Encountered an automatic request for changing proxy - continue?
Cause: Warn user of automatic proxy change W3CLIB_MSG = 17
Action: The user agent client takes proper actions

DRG-12201: section group string already exists
Cause: Section group with the same name already exists
Action: Use another name or delete the existing one first
DRG-12202: error while creating section group
Cause: detect an Oracle error while creating section group
Action: see the accompanying Oracle error and take appropriate action

DRG-12203: section group string does not exist
Cause: section group provided does not exist
Action: provide an existing section group

DRG-12204: error while dropping section group string
Cause: detect an Oracle error while dropping a section group
Action: see the accompanying Oracle error and take appropriate action

DRG-12206: tag string already exists in section group string
Cause: the start tag provided already exists in the same Section
Action: provide another start tag

DRG-12210: error while adding section string
Cause: detect an Oracle error while adding a section
Action: see the accompanying Oracle error and take appropriate action

DRG-12211: section or section id string does not exist
Cause: Section name or Section id to be dropped does not exist
Action: provide an existing Section name or Section id

DRG-12212: error while dropping section string
Cause: detect an Oracle error while dropping a Section
Action: see the accompanying Oracle error and take appropriate action

DRG-12213: cannot create/drop section group or sections for other user
Cause: You can only create/drop section group objects of your own
Action: have the other user create/drop his/her own objects

DRG-12217: tags cannot be more than 64 bytes
Cause: max limit of start and end tag is 64 bytes
Action: provide a shorter start and end tag

DRG-12218: section group name missing
Cause: must provide section group name
Action: provide a section group name when creating Section or section group

DRG-12219: section name missing
Cause: must provide Section name when creating a Section
Action: provide a Section name

DRG-12220: a valid tag must be provided
Cause: must provide tag when adding a section to a section group
Action: provide a tag

DRG-12223: section name string is a reserved name
Cause: you tried to name a section a reserved name
Action: Specify a different name for the section
DRG-12224: use `ctx_ddl.create_section_group` to create section groups
   Cause: you tried to use `ctx_ddl.create_preference` to create a section group
   Action: use `ctx_ddl.create_section_group`

DRG-12225: this type of section cannot be added to this section group
   Cause: You tried to add sections to the null section group, add a stop section to a non-auto section group, or add a zone or field section to the auto section group
   Action: Do not add this type of section to this section group

DRG-12226: a field section named `string` already exists in this section group
   Cause: you tried to name an attribute or zone section the same name as an existing field section
   Action: use another name

DRG-12227: a zone section named `string` already exists in this section group
   Cause: you tried to name an attribute or field section the same name as an existing zone section
   Action: use another name

DRG-12228: maximum number of field sections (`string`) exceeded
   Cause: a section group has more than the maximum number of unique field sections
   Action: no action required

DRG-12229: special section `string` already exists in this section group
   Cause: you tried to add a special section which already exists
   Action: no action required

DRG-12230: special section name must be one of `string`
   Cause: you tried to add an invalid special section
   Action: specify a valid special section

DRG-12231: an attr section named `string` already exists in this section group
   Cause: you tried to name a field or zone section the same name as an existing attribute section
   Action: use another name

DRG-12232: invalid attribute tag format
   Cause: you specified a tag for use as an attribute tag which did not have the correct format. An attribute tag must have the form TAG@ATTR
   Action: use correct format

DRG-12233: xml sections cannot co-exist with other section types
   Cause: you tried to add an xml section to a section group or index which already has zone, field, attr, or special sections, or you tried to add a zone, field, attr, or special section to a section group or index which already has xml sections
   Action: None

DRG-12234: column `string` already mapped in section group `string`
   Cause: you tried to add a column section which already exists
   Action: use correct format
DRG-12235: an sdata section named string already exists in this section group
   Cause: you tried to name a non-sdata section the same name as an existing sdata section
   Action: use another name

DRG-12236: an mdata section named string already exists in this section group
   Cause: you tried to name a non-mdata section the same name as an existing mdata section
   Action: use another name

DRG-12237: a section named string already exists in this section group
   Cause: you tried to map a column but the section name is already being used by another section
   Action: use another name

DRG-12238: maximum number of mdata sections (string) exceeded
   Cause: a section group has more than the maximum number of unique mdata sections
   Action: no action required

DRG-12239: maximum number of sdata sections (string) exceeded
   Cause: a section group has more than the maximum number of unique sdata sections
   Action: no action required

DRG-12240: ORDER BY column string must be indexed as an SDATA section
   Cause: an order by column has been mapped to an MDATA section
   Action: adjust section group

DRG-12241: column name string is not a valid section name
   Cause: an order by or filter by column cannot be implicitly mapped to an SDATA section because the name is not valid as a section name
   Action: adjust section group to map column name to a valid section name

DRG-12242: value of string is too large for section string
   Cause: the value of a filter by or order by column is too large to be indexed
   Action: update the row

DRG-12243: invalid datatype
   Cause: the datatype specified for a sdata or mdata section is invalid
   Action: specify a supported datatype

DRG-12244: data conversion error for sdata section string
   Cause: failed to convert data
   Action: check the format of the data

DRG-12245: SDATA operator not compatible with the sdata section string
   Cause: failed to convert data
   Action: check the format of the data

DRG-12246: SDATA operand not compatible with the sdata section string
Cause: failed to convert data
Action: check the format of the data

DRG-12247: maximum number of NDATA sections (string) exceeded
Cause: a section group has more than the maximum number of unique NDATA sections
Action: no action required

DRG-12248: a NDATA section named string already exists in this section group
Cause: you tried to name a non-NDATA section the same name as an existing NDATA section
Action: use another name

DRG-12249: a MVDATA section named string already exists in this section group
Cause: you tried to name a non-MVDATA section the same name as an existing MVDATA section
Action: use another name

DRG-12250: maximum number of mvdata sections (string) exceeded
Cause: a section group has more than the maximum number of unique mvdata sections
Action: no action required

DRG-12300: an index with this column list already exists in the index set
Cause: You tried to add an index to an index set, but an index with the specified column list already exists
Action: None

DRG-12301: index does not exist in index set
Cause: You tried to remove an index from an index set, but the specified index was not found
Action: None

DRG-12302: invalid column list
Cause: You specified an invalid column list -- it may have a syntax error, duplicate columns, or invalid column names
Action: None

DRG-12303: cannot add more than 99 indexes to an index set
Cause: You tried to add too many indexes to the index set
Action: None

DRG-12304: index set string does not exist
Cause: You specified an invalid index set name
Action: None

DRG-12305: column string data type is not supported for index set columns
Cause: You specified a column in the column list of an index of an index set which does not have a valid datatype
Action: use only DATE, NUMBER, CHAR, or VARCHAR2 columns in index column lists
DRG-12306: column string is too long for index set columns
  Cause: You specified a column in the column list of an index of an index set which is too long
  Action: CHAR and VARCHAR2 columns must be 30 bytes or less max length

DRG-12307: column string is NULL and cannot be indexed
  Cause: You tried to index a row where at least one of the meta columns was NULL.
  Action: provide a value for the meta column and reindex the row

DRG-12308: use ctx_ddl.create_index_set to create index sets
  Cause: you tried to use ctx_ddl.create_preference to create an index set
  Action: use ctx_ddl.create_index_set

DRG-12400: template string is empty
  Cause: The template is empty.
  Action: Check the template was installed successfully.

DRG-12401: invalid template: query within a loop
  Cause: A CTX EXEC tag cannot occur within a CTX REPEAT tag.
  Action: Remove the CTX EXEC tag.

DRG-12402: error processing template string, line string
  Cause: An error occurred when processing a template.
  Action: See other errors on the stack and take the appropriate action.

DRG-12403: template string was not found
  Cause: The template does not exist.
  Action: Check the name of the template and check that it is installed.

DRG-12404: more than one template string found
  Cause: More than one template with the same name was found.
  Action: Remove templates as appropriate.

DRG-12405: error occurred processing CTX REDIRECT or CTX LABEL tag
  Cause: Error in syntax of a tag.
  Action: Correct the syntax of the tag.

DRG-12406: invalid CTX EXEC tag attribute (string)
  Cause: The specified attribute is incorrectly specified.
  Action: Check the syntax of the specified attribute.

DRG-12407: invalid CTX REPEAT tag attribute (string)
  Cause: The specified attribute is incorrectly specified.
  Action: Check the syntax of the specified attribute.

DRG-12408: invalid variable reference: string.string
  Cause: The variable referenced does not exist.
  Action: Check the label and column name.

DRG-12409: syntax error for label in string
Cause: The SQL in a CTX EXEC tag has incorrect syntax for a label or label type.
Action: Check the SQL attribute of the CTX EXEC tag.

**DRG-12410: could not process CTX EXEC tag**
Cause: An error occurred when processing the SQL attribute of a CTX EXEC tag.
Action: See other errors on the stack and take the appropriate action.

**DRG-12411: SQL processing error: string**
Cause: Error executing SQL from SQL attribute of CTX EXEC tag.
Action: Check the SQL in the SQL attribute.

**DRG-12412: missing or invalid Template Processor attribute (string)**
Cause: The specified attribute was missing or invalid in a HTML input field.
Action: Check the Template Processor-specific attributes in the INPUT, SELECT, RADIO and CHECKBOX tags of the template.

**DRG-12422: write to client failed**
Cause: See the following messages.
Action: Contact the administrator.

**DRG-12430: mandatory argument missing: string**
Cause: This argument is mandatory.
Action: Re-submit the URL with this argument supplied.

**DRG-12431: configuration section string not found**
Cause: Specified conf argument is invalid.
Action: Re-submit the URL with this argument corrected.

**DRG-12432: configuration file string not found or unreadable**
Cause: An error occurred when processing the configuration file.
Action: Contact the administrator.

**DRG-12433: load of string JDBC driver class failed**
Cause: Driver class is invalid.
Action: Contact the administrator to modify configuration.

**DRG-12434: connection failed using configuration string information**
Cause: Configuration information is not correct.
Action: Contact the administrator to modify configuration.

**DRG-12435: highlight table allocation failed**
Cause: See the following messages.
Action: Contact the administrator.

**DRG-12436: document table allocation failed**
Cause: See the following messages.
Action: Contact the administrator.

**DRG-12437: highlight table release failed**
Cause: See the following messages.
Action: Contact the administrator.
DRG-12438: document table release failed
   Cause: See the following messages.
   Action: Contact the administrator.

DRG-12439: highlight table read failed
   Cause: See the following messages.
   Action: Contact the administrator.

DRG-12440: document table read failed
   Cause: See the following messages.
   Action: Contact the administrator.

DRG-12441: counting the number of highlights failed
   Cause: See the following messages.
   Action: Contact the administrator.

DRG-12500: stoplist string already exists
   Cause: the specified stop list already exists
   Action: must remove the duplicate stop list if you want to re-create it.

DRG-12501: null stoplist is not allowed
   Cause: the specified stop list is null
   Action: must specify a valid stop list

DRG-12502: cannot modify stoplists owned by other users
   Cause: You can only create/drop Stop List or Stop Word objects of your own
   Action: have the other user create/drop his/her own objects

DRG-12503: error while creating or dropping stoplist
   Cause: detect an Oracle error while creating Stop List
   Action: see the accompanying Oracle error and take appropriate action

DRG-12504: stoplist string does not exist
   Cause: the specified stop list does not exist
   Action: check that the Stop List is valid

DRG-12505: error while adding or removing a stop word
   Cause: detect an Oracle error while adding or removing Stop Word
   Action: see the accompanying Oracle error and take appropriate action

DRG-12506: stop word string does not exist in stoplist string
   Cause: the specified Stop Word does not exist
   Action: check that the Stop Word is valid

DRG-12507: stop word string already exists in this stoplist
   Cause: the specified stop word already exists
   Action: must remove the duplicate word if you want to re-create it.

DRG-12508: null stop words are not allowed
   Cause: the specified stop word is null
   Action: must remove the null stop word if you want to re-create it.
DRG-12509: length of the stop word string exceeded the limit of string bytes
   Cause: A stop list entry has exceeded the maximum length
   Action: Reduce the length of the stop list entry

DRG-12511: use ctx_ddl.create_stoplist to create stoplists
   Cause: you tried to use ctx_ddl.create_preference to create a stoplist
   Action: use ctx_ddl.create_stoplist

DRG-12512: invalid stop class string
   Cause: you specified an invalid stop class
   Action: specify a valid stop class

DRG-12513: valid stop classes are: string
   Cause: You specified an invalid stop class
   Action: Specify a valid stop class

DRG-12514: languages must be specified for stopwords in a MULTI_STOPLIST
   Cause: You tried to add a stopword to a multi_stoplist without specifying the language of the stopword
   Action: Specify the language of the stopword

DRG-12515: cannot specify language for stopwords in a BASIC_STOPLIST
   Cause: You tried to add a language-specific stopword to a basic stoplist.
   Action: Do not specify language for the stopword

DRG-12516: language column must be specified when using the multi stoplist
   Cause: you tried to create an index using a multi_stoplist but you did not specify a language column
   Action: specify a language column

DRG-12517: cannot add stopthemes to a MULTI_STOPLIST
   Cause: you tried to add a stoptheme to a MULTI_STOPLIST. This is not supported in this version.
   Action: None

DRG-12518: cannot use this option with MULTI_STOPLIST
   Cause: index already has multi_stoplist
   Action: can only be used to migrate from basic to multi stoplist

DRG-12519: LANGUAGE COLUMN missing
   Cause: index does not have a language column
   Action: specify language column value

DRG-12520: LANGUAGE COLUMN mismatch
   Cause: LANGUAGE COLUMN does not match language column of the Index
   Action: index language column should match specified one

DRG-12600: user datastore procedure name contains a semicolon
   Cause: the procedure name specified had a semicolon
   Action: remove semicolon or rename procedure name. The correct format is PACKAGENAME.PROCEDURE_NAME
DRG-12601: invalid user datastore procedure name: string
   Cause: the format of the procedure name is invalid. It should be in the form
          PACKAGENAME.PROCEDURENAME or PROCEDURENAME
   Action: make sure PROCEDURE attr has the format
            PACKAGENAME.PROCEDURENAME or PROCEDURENAME

DRG-12602: index owner does not have access to user datastore procedure: string
   Cause: the index owner does not have execute privilege of the procedure
   Action: CTXSYS to grant execute privilege of the procedure to index owner

DRG-12603: CTXSYS does not own user datastore procedure: string
   Cause: CTXSYS does not have execute privilege to the user datastore procedure
   Action: make sure the package is owned by CTXSYS and the procedure exist

DRG-12604: execution of user datastore procedure has failed
   Cause: an error occur while executing the user datastore procedure
   Action: check or debug the datastore procedure

DRG-12605: datatype of column number in COLUMNS list is not supported
   Cause: one or more of the columns in the column list of the multi datastore are of
          a type which the multi datastore is unable to process
   Action: change the column list of the multi datastore to contain only supported
          types. PL/SQL functions can be used in the column list to convert unsupported
          types to supported types.

DRG-12606: error encountered while parsing COLUMNS list
   Cause: An oracle error was encountered while parsing the columns list of the
          multi datastore.
   Action: See next error on stack and take appropriate action

DRG-12607: only ctxsys can create MULTI_COLUMN preferences
   Cause: In order to create a multi column datastore preference, the effective user
          must be ctxsys.
   Action: contact your DBA to create the preference as ctxsys

DRG-12700: seed word must be a single word
   Cause: seed word is not a single word
   Action: use a single-word seed word

DRG-12800: Attribute NESTED_TYPE must have owner name as prefix
   Cause: the attribute NESTED_TYPE does not have an owner name prefix
   Action: reset the attribute NESTED_TYPE to include owner name prefix

DRG-12801: invalid type: string
   Cause: invalid nested_type or
   Action: check the owner and the type attribute names

DRG-12802: invalid type column: string
   Cause: column specified does not exist in the type table
   Action: check the type table

DRG-12803: invalid text datatype
CAUSE: LONG and LONG RAW are not supported in nested table
ACTION: change text column to a supported data type

DRG-12900: Operation: string for index: string has already been started
CAUSE: the specified operation has been started
ACTION: None

DRG-13000: error while adding or removing a sub lexer
CAUSE: see next error
ACTION: None

DRG-13001: sub lexer and multi lexer must have the same owner
CAUSE: you specified a sub lexer which is not owned by the owner of the enclosing multi-lingual lexer preference
ACTION: specify a sub lexer owned by the owner of the multi-lexer preference

DRG-13002: preference string is not a MULTILexer
CAUSE: you tried to add a sub lexer to a lexer preference which cannot accept sub lexers. Only multi-lingual lexers can accept sub lexers.
ACTION: specify a multi lingual lexer

DRG-13003: preference string cannot be used as a sub lexer
CAUSE: you specified a preference for sub lexer which is not a lexer, or is a multi-lingual lexer
ACTION: specify a sub lexer which is not a multi-lingual lexer

DRG-13004: language is invalid
CAUSE: you specified an invalid language for the sub lexer or stopword
ACTION: specify a valid language -- see NLS Support Guide for a list of valid languages

DRG-13005: alt_value cannot be an NLS language name
CAUSE: you specified an NLS language name as the alt value
ACTION: specify a non-NLS value

DRG-13006: sub lexer for this language is not defined
CAUSE: you tried to remove a sub lexer for a language, but no sub lexer was defined for that language
ACTION: None

DRG-13007: cannot define an alternate value for the DEFAULT sub lexer
CAUSE: you tried to define an alternate value for the DEFAULT sub lexer
ACTION: None

DRG-13008: cannot remove the DEFAULT sub lexer
CAUSE: you tried to remove the DEFAULT sub lexer
ACTION: None

DRG-13009: multi lexer preference does not have a DEFAULT sub lexer
CAUSE: you tried to use a multi lexer preference which does not have a DEFAULT sub lexer defined
Action: add a DEFAULT sub lexer to the multi lexer preference and retry

DRG-13010: alt_value is already used by another sub lexer
Cause: you tried to specify an alt value which is already in use by another sub lexer in the lexer preference
Action: specify a different alt value

DRG-13011: language column must be specified when using the multi lexer
Cause: you tried to create an index using a multi lexer preference, but you did not specify a language column
Action: specify a language column

DRG-13012: language column must be a char, varchar, or varchar2 type
Cause: you specified a language column which is not a char, varchar, or varchar2 type.
Action: specify a language column of correct type

DRG-13013: cannot have language independent DEFAULT sub lexer
Cause: you tried to define a language independent DEFAULT sub lexer
Action: DEFAULT sub lexer can only be language dependent

DRG-13014: base table has rows with language column value string
Cause: there are documents in the base table with language column value set to symbol for sublexer or stopword being removed
Action: base table should not have such rows

DRG-13015: sublexer string already exists in the index
Cause: cannot add a sub_lexer more than once
Action: if you want to update sub_lexer preferences, use update sub_lexer parameter or remove currently used sub_lexer

DRG-13100: index is not partitioned
Cause: you attempted to invoke a partition-level operation on an index which is not partitioned
Action: invoke appropriate index-level operation

DRG-13101: partition string does not exist in this index
Cause: you specified a partition name which does not exist
Action: specify correct partition name

DRG-13102: index partition name must be specified
Cause: you attempted to invoke a partition-level operation on a partitioned index but did not specify the partition name
Action: None

DRG-13103: index table string is partitioned
Cause: you attempted to perform an exchange partition including indexes, but one or more of the internal index tables are partitioned.
Action: specify EXCLUDING INDEXES on the exchange partition, then manually rebuild the indexes.

DRG-13104: indexes do not have equivalent settings for string
Cause: you attempted to perform an exchange partition including indexes, but the specified metadata setting is not equivalent across the two indexes, so the data cannot be exchanged

Action: specify EXCLUDING INDEXES on the exchange partition, then manually rebuild the indexes.

DRG-13200: failed to load dictionary file string

Cause: failed to load a dictionary file

Action: check whether the dictionary file exists in $ORACLE_HOME/ctx/data/kolx or access permission is available

DRG-13201: KOREAN_LEXER is desupported

Cause: Using lexer type KOREAN_LEXER which is desupported.

Action: Use lexer type KOREAN_MORPH_LEXER instead.

DRG-13300: document size bigger than string bytes

Cause: size of the document being indexed is larger than the maximum supported size for the VARCHAR2 interface of stored procedure

Action: use the CLOB interface for the stored procedure

DRG-13301: syntax error in token data when expecting string, at line string

Cause: token data returned by the user-defined lexer procedure is incorrect

Action: modify user-defined lexer procedure to return expected data

DRG-13302: number of wildcard offsets must be in the range string..string, at line string

Cause: number of wildcard offsets specified as value for the wildcard attribute does not meet the supported range

Action: modify user-defined lexer query procedure to return valid number of wildcard offsets

DRG-13303: value of wildcard offset must be in the range string..string, at line string

Cause: value of pre-normalized wildcard offset or post-normalized wildcard offset specified as value for the wildcard attribute does not meet the supported range

Action: modify user-defined lexer query procedure to return valid value for wildcard offset

DRG-13304: character referenced by wildcard attribute is not a wildcard character, at line string

Cause: The wildcard attribute value specified the offset of a wildcard character. The character at the specified offset is neither the '%' character nor the '_' character.

Action: Modify user-defined lexer query procedure.

DRG-13305: 'off' attribute value must be in the range string..string, at line string

Cause: value of 'off' attribute does not meet the supported range

Action: modify user-defined lexer index procedure to return valid value for 'off' attribute

DRG-13306: 'len' attribute value must be in the range string..string, at line string

Cause: value of 'len' attribute does not meet the supported range
Action: modify user-defined lexer index procedure to return valid value for 'len' attribute

DRG-13307: 'off'=string and 'len'=string references character past end-of-file of string character document, at line string
Cause: value of 'off' attribute plus value of 'len' attribute is greater than the number of characters in the document
Action: modify user-defined lexer index procedure to return valid values for 'off' and 'len' attributes

DRG-13308: query operator ABOUT not supported by USER_LEXER
Cause: the query contains an ABOUT operator while using USER_LEXER lexer type
Action: remove ABOUT operator from query or use lexer type other than USER_LEXER

DRG-13309: operation not supported by USER_LEXER
Cause: USER_LEXER does not support this operation
Action: stop the operation or use alternate lexer type

DRG-13310: index owner does not have EXECUTE privilege on USER_LEXER stored procedure string
Cause: user CTXSYS did not grant EXECUTE privilege on USER_LEXER stored procedure to the index owner
Action: user CTXSYS grant EXECUTE privilege on USER_LEXER stored procedure to index owner

DRG-13311: USER_LEXER stored procedure name contains a semicolon
Cause: the procedure name contains a semicolon character
Action: remove semicolon from procedure name or rename stored procedure

DRG-13312: user CTXSYS does not own USER_LEXER stored procedure string
Cause: CTXSYS does not have EXECUTE privilege on the USER_LEXER stored procedure
Action: make sure the stored procedure exists and is owned by CTXSYS

DRG-13400: Oracle Data Mining was not installed
Cause: The function you used depends on Oracle Data Mining, which has not been installed yet.
Action: make sure the Oracle Data Mining is installed

DRG-13401: the preference string type is not supported in this API
Cause: the type you have specified is not supported
Action: use a different type

DRG-13500: Parameter_string must start with string
Cause: Wrong syntax for parameter_string.
Action: Make sure the parameter_string has the correct syntax

DRG-13501: Shadow Index Already Exists
Cause: A shadow index was previously created already
Action: Drop the shadow index and try again
DRG-13502: NOPOPULATE is not allowed in recreate_index_online
    Cause: Specify NOPOPULATE in parameter_string in recreate_index_online
    Action: Don't specify NOPOPULATE.

DRG-13503: POPULATE is not allowed for a local index in create_shadow_index
    Cause: Specify POPULATE for a local index during create_shadow_index
    Action: Don't specify POPULATE.

DRG-13504: string has no shadow index
    Cause: Tried to perform exchange shadow without creating shadow index first
    Action: create a shadow index before doing exchanges_shadow_index

DRG-13505: Keyword string is not allowed here in parameter_string
    Cause: Wrong syntax for parameter_string
    Action: Make sure the parameter_string has the correct syntax

DRG-13506: string has no shadow part
    Cause: Tried to perform exchange shadow part without creating shadow part first
    Action: create a shadow part before doing exchanges_shadow_index on the partition.

DRG-13507: SWAP and NOPOPULATE is incompatible
    Cause: Specified SWAP and NOPOPULATE in parameter string
    Action: Correct the parameter string setting

DRG-13508: Not all partitions for index string are swapped
    Cause: try to swap an local partitioned index when not all partitions are swapped
    Action: Swap all partitions first, then swap the (local) index.

DRG-13509: error while swapping shadow index
    Cause: an error occurred during the shadow index swap
    Action: check error message stack for the actual error

DRG-13510: shadow index does not exist
    Cause: Tried to perform exchange shadow without creating shadow index first
    Action: create a shadow index before doing exchanges_shadow_index

DRG-13600: Syntax error in the result set descriptor at string
    Cause: The result set descriptor has a syntax error
    Action: check the syntax of the result set descriptor

DRG-13601: Syntax error in the order attribute
    Cause: The order attribute has a syntax error
    Action: check the syntax of the order attribute

DRG-13602: Number parsing error in string
    Cause: The number string is malformed
    Action: check the syntax of the number string

DRG-13603: To many sort keys
    Cause: Too many sort keys are specified
Action: reduce the number of sort keys

DRG-13604: To many items to select
Cause: Too many select items are specified
Action: reduce the number of select items

DRG-13605: Too many group tags
Cause: Too many group tags are specified
Action: reduce the number of group tags

DRG-13606: start_hit_num is not specified or out of valid range number..number
Cause: start_hit_num is not specified or out of valid range
Action: set a correct start_hit_num value

DRG-13607: end_hit_num is not specified or out of valid range number..number
Cause: end_hit_num is not specified or out of valid range
Action: set a correct end_hit_num value

DRG-13608: Temporary lob not created for ctx_query.result_set_document
Cause: Temporary lob is not allocated for ctx_query.result_set_document
Action: Create a temporary lob for ctx_query.result_set_document

DRG-13609: Result set Interface should only have group mvdatal element in absence of a query
Cause: No query is specified and result set descriptor has invalid elements
Action: either specify query or change result set descriptor

DRG-13610: Missing group_values in the result set interface
Cause: MVDATA group values not specified in RSI
Action: add group_values element for group counting

DRG-13611: Missing value id for MVDATA group counting in the result set interface
Cause: MVDATA group values not specified in RSI
Action: add value id element for group counting

DRG-13612: Missing path element in the result set interface
Cause: Path element not specified for the ctx_tree element
Action: add path element for the ctx_tree element

DRG-13613: Missing index name
Cause: index name not specified in the API
Action: specify an index name

DRG-13700: Syntax error in the Extraction Rule Descriptor
Cause: The Extraction Rule descriptor has a syntax error
Action: check the syntax of the Extraction rule descriptor

DRG-13701: Invalid rule_id
Cause: rule_id is NULL or rule_id <= 0
Action: rule_id must be number > 0
DRG-13702: Rule not found
    Cause: No rule for given rule_id
    Action: Specify a valid rule_id

DRG-13703: Invalid Type Specified: string
    Cause: An invalid entity type was specified
    Action: Specify a valid entity type

DRG-13704: Invalid Entity Type List
    Cause: An invalid entity type list was specified
    Action: Check format and types on entity type list

DRG-13705: Must use an Extract Policy
    Cause: Using a non-extraction policy
    Action: Use a policy created with ctx_entity.create_extract_policy

DRG-13706: Cannot use Entity Extraction Policy here
    Cause: Using an entity extraction policy
    Action: Use a policy created with ctx_ddl.create_policy

DRG-13707: Rule Engine Loading Failed
    Cause: A user rule has an error
    Action: Fix the user rule with the error

DRG-13708: Dictionary Loading Failed
    Cause: The user dictionary has an error
    Action: Fix the user dictionary

DRG-13709: Unsupported Language Specified: string
    Cause: Unsupported Language Specified
    Action: Specify a supported language

DRG-13710: Syntax Error in Dictionary
    Cause: Syntax error in dictionary
    Action: Correct syntax error in dictionary

DRG-13711: Stop Entity Not Found
    Cause: Tried to remove a non-existent stop entity
    Action: Cannot remove non-existent stop entity

DRG-13712: User Dictionary already loaded
    Cause: Tried to load a 2nd user dictionary to a policy
    Action: Drop the dictionary, and then load

DRG-13713: No User Dictionary loaded
    Cause: No user dictionary loaded for this policy
    Action: Cannot drop non-existent dictionary

DRG-13714: Duplicate Stop Entity
    Cause: Trying to load a duplicate uncompiled stop entity
    Action: Stop entity is already present
DRG-13715: Null name and type for Stop entity
  Cause: Trying to load a stop entity with null name and type
  Action: Stop entity must have at least one parameter non-null

DRG-13716: Entity Extraction not enabled
  Cause: Haven't loaded correct event
  Action: Must load correct event and level

DRG-13717: Null entry or alternate form in user dict
  Cause: A entry or alternate form has null value
  Action: Entries or alternate forms must be non-null

DRG-13718: No entity type given in user dict
  Cause: An entry was not given an entity type
  Action: All entries must have an entity type

DRG-13719: File and Drop are mutually exclusive
  Cause: Tried to run ctxload with file and drop
  Action: file and drop are mutually exclusive

DRG-13720: Stop entity already marked for deletion
  Cause: Tried to re-drop a stop entity
  Action: Only drop this stop entity once

DRG-13721: Duplicate Type on Typelist
  Cause: Duplicate type on typelist
  Action: Typelist must be unique

DRG-13722: Invalid Backreference
  Cause: Backreference not between 1 and 10
  Action: Backreferences must be between 1 and 10

DRG-13723: Invalid Attribute: string
  Cause: Unsupported Attribute
  Action: Follow correct syntax for rule or dictionary

DRG-13724: Invalid Attribute Value: string
  Cause: Unsupported attribute value
  Action: Follow correct syntax for rule or dictionary

DRG-13725: Type Name Too Long
  Cause: Type name more than 30 bytes
  Action: Type must be less than 30 bytes

DRG-13726: Invalid Tag: string
  Cause: Unsupported Tag
  Action: Follow correct syntax for rule or dictionary

DRG-13727: Missing Tag: string
  Cause: Missing Necessary Tag
  Action: Add tag for rule or dictionary
DRG-13728: Missing Attribute: string
  Cause: Missing Necessary Attribute
  Action: Add attribute for rule or dictionary

DRG-13800: MVDATA section string does not exist
  Cause: The given MVDATA section name does not exist in USER_SECTIONS
  Action: Rewrite query with valid MVDATA section name

DRG-13801: literal is not compatible with the data type of the MVDATA section
  Cause: The given literal is not compatible with the data type of the specified MVDATA section.
  Action: Rewrite query with a compatible literal

DRG-13802: MVDATA operand not compatible with the mvdata section string
  Cause: failed to convert data
  Action: check the format of the data

DRG-13803: Illegal MVDATA value
  Cause: failed to convert data
  Action: check the format of the data

DRG-13804: ctx_tree.register_index() not run for index string and mvdata section string
  Cause: failed to create data
  Action: create the data (trees) first

DRG-13805: Invalid character in node name string
  Cause: failed to create data
  Action: check the format of the data

DRG-13806: Duplicate Path string in CTX_TREE.ADD_NODE()
  Cause: The path specified in ctx_tree.add_node() adds the node with the same name in the same tree at the same level
  Action: change path

DRG-13807: Node string does not exist or is deleted
  Cause: failed to lookup input node
  Action: check if the path exists

DRG-13808: Empty path passed into string
  Cause: path is empty
  Action: pass in a non-empty and valid path

DRG-13809: Index with MVDATA sections must have big_io turned on
  Cause: Big_io option not specified for MVDATA index
  Action: turn on big_io for the index

DRG-13810: Index with support_ctx_tree must have atleast one MVDATA section
  Cause: MVDATA section not specified for ctx_tree usage
  Action: add one MVDATA section for the index
DRG-13900: Auto_Optimize Process is already started
   Cause: Auto_Optimize Process is already started
   Action: Can’t start auto_optimize when it’s already running

DRG-13901: Index must have stage_itab
   Cause: Auto_Optimize works on indexes with stage_itab
   Action: Use an index with stage_itab for auto_optimize

DRG-13902: Index/Partition already added to auto_optimize list
   Cause: Index/Partition already added to auto_optimize list
   Action: Can’t add index/partition to list twice

DRG-50000: requested size larger than pagesize
   Cause: The requested memoery size is larger than page size,
   Action: Contact support

DRG-50100: CORE LSF error: string
   Cause: detect a CORE LSF error
   Action: look up the core error and take appropriate action

DRG-50101: CORE LEM error: string
   Cause: detect a CORE LEM error while reading the error stack
   Action: Contact support

DRG-50200: Third-party filter internal error
   Cause: Third-party filter could not filter this document because of an internal error.
   Action: Contact Oracle Support.

DRG-50300: error sending message from server to client
   Cause: internal database error or internal Text error
   Action: Call customer support

DRG-50301: server error reading request queue
   Cause: database error or internal Text error
   Action: Call customer support

DRG-50302: server error reading OOB break queue; cannot detect interrupts
   Cause: database error or internal Text error
   Action: Call customer support

DRG-50303: error in bufout
   Cause: This is an internal error
   Action: Contact Oracle Support

DRG-50304: error in execute()
   Cause: This is an internal error
   Action: Contact Oracle Support

DRG-50305: getcmd() called when one of the queue names is NULL
   Cause: This is an internal error
Action: Contact Oracle Support

DRG-50400: maximum number of fuzzy match candidates exceeded: string
    Cause: Internal error, probably result of large number of indexed words
    Action: Contact Oracle support

DRG-50401: failed to retrieve fuzzy match candidates from db: string
    Cause: Internal error
    Action: Contact Oracle support

DRG-50402: Index validation failed for one or more tokens
    Cause: Index validation generated an error for one or more tokens
    Action: Check the ctx log for the detailed errors

DRG-50500: only RULE_CLASSIFIER is accepted in this API
    Cause: you specified an illegal classifier
    Action: use RULE_CLASSIFIER

DRG-50501: classifier preference not specified
    Cause: the classifier preference is not specified
    Action: specify a classifier preference

DRG-50502: cannot use RULE_CLASSIFIER in this API
    Cause: you specified RULE_CLASSIFIER
    Action: use a different classifier

DRG-50503: unsupported classification method
    Cause: you specified an unsupported classification method
    Action: use a different classifier

DRG-50504: invalid column datatype for string table
    Cause: the column datatype is invalid
    Action: specify a different datatype

DRG-50600: assertion failed
    Cause: An internal check-condition has been violated
    Action: Contact Oracle support for assistance

DRG-50601: fatal error
    Cause: A fatal error has occurred
    Action: Contact Oracle support for assistance

DRG-50603: unrecognized operation code string
    Cause: Bad operation code was encountered (reached switch default:)
    Action: check .h files versions

DRG-50607: failed to obtain column info for cid string
    Cause: internal error, probably a bug
    Action: call customer support

DRG-50608: unexpected end of data
Cause: internal error, probably a bug
Action: call customer support

**DRG-50609: pipe internal error**
Cause: internal error, probably a bug
Action: call customer support

**DRG-50610: internal error: string**
Cause: internal error, probably a bug
Action: call customer support

**DRG-50611: Third party lexer internal error: string**
Cause: internal error from inxight lexer
Action: call customer support

**DRG-50612: internal error: you need to call bind first for this insertion mode**
Cause: internal error
Action: call customer support

**DRG-50613: internal error: model type is not supported in drctrwpf**
Cause: internal error
Action: call customer support

**DRG-50614: library loading error in string**
Cause: internal error
Action: call customer support

**DRG-50615: Third party lexer timed out**
Cause: Third-party auto lexer could not complete tokenization because the lexer timed out.
Action: Increase the value of the TIMEOUT attribute of the auto_lexer and reindex the document. If TIMEOUT is set to 0 and the lexer still hangs context Oracle Support.

**DRG-50700: unknown command (args=queue, command)**
Cause: this is an internal error
Action: Contact Oracle support to report a bug

**DRG-50701: error in listener.get_cmd()**
Cause: this is an internal error
Action: Contact Oracle support to report a bug

**DRG-50702: error in drtlsleep()**
Cause: this is an internal error in a testing function
Action: Contact Oracle Support

**DRG-50703: listener startup error**
Cause: this is an internal error
Action: Contact Oracle support to report a bug

**DRG-50704: Net8 listener is not running or cannot start external procedures**
Cause: Oracle Text needs to call external code to complete your request, and could not start the extproc agent process.
Action: Start listener if it is configured for external procedures and is not running. If your listener is running, configure it for starting external procedures and restart it. Consult Oracle documentation for details.

DRG-50800: failed to open cursor
Cause: Too many cursors open for internal queries
Action: implement cursor cleanup routine

DRG-50801: failed to parse cursor
Cause: parse error on an internal query
Action: check versions of code

DRG-50802: failed to bind input
Cause: bind error on an internal query
Action: check versions of code

DRG-50803: failed to define output
Cause: define error on an internal query
Action: check versions of code

DRG-50804: failed to exec cursor
Cause: exec error on an internal query
Action: debug code

DRG-50805: failed to close cursor
Cause: cursor close error on an internal query
Action: check versions of code

DRG-50806: failed to rollback
Cause: transaction rollback error
Action: contact support

DRG-50807: failed to commit
Cause: internal error
Action: contact support

DRG-50850: string
Cause: This is an oracle error
Action: See RDBMS documentation

DRG-50851: SQL execute failed
Cause: failed to execute a sql statement
Action: please report this as a bug

DRG-50852: failed to turn SQL trace on
Cause: internal error
Action: Please contact Oracle support

DRG-50853: fetch error
Cause: fetch error on an internal query
Action: check versions of code

DRG-50855: logoff fail
Cause: Fail to logoff from the database
Action: check versions of code

DRG-50857: oracle error in string
Cause: this is an informational message
Action: See error

DRG-50858: OCI error: string
Cause: a generic OCI error occurred
Action: Please contact Oracle support

DRG-50859: failed to allocate statement handle
Cause: This is an internal error
Action: Contact Oracle Support

DRG-50860: failed to prepare statement
Cause: This is an internal error
Action: Contact Oracle Support

DRG-50861: failed to obtain type descriptor
Cause: This is an internal error
Action: Contact Oracle Support

DRG-50862: failed to create new Oracle object
Cause: This is an internal error
Action: Contact Oracle Support

DRG-50863: string assignment failed
Cause: This is an internal error
Action: Contact Oracle Support

DRG-50864: number assignment failed
Cause: This is an internal error
Action: Contact Oracle Support

DRG-50865: failed to append to collection
Cause: This is an internal error
Action: Contact Oracle Support

DRG-50866: failed to resize string
Cause: This is an internal error
Action: Contact Oracle Support

DRG-50867: failed to free Oracle object
Cause: This is an internal error
Action: Contact Oracle Support
DRG-50868: failed to free statement handle
  Cause: This is an internal error
  Action: Contact Oracle Support

DRG-50900: text query parser error on line string, column string
  Cause: bad query
  Action: fix query

DRG-50901: text query parser syntax error on line string, column string
  Cause: bad query
  Action: fix query

DRG-50902: unexpected character string
  Cause: bad query
  Action: fix query

DRG-50903: invalid weight string
  Cause: invalid weight
  Action: fix query

DRG-50904: weight string outside valid range 0.1 to 10.0
  Cause: invalid weight
  Action: fix query

DRG-50905: invalid score threshold string
  Cause: invalid score threshold
  Action: fix query

DRG-50906: score threshold string is not an integer
  Cause: invalid score threshold
  Action: fix query

DRG-50907: score threshold string outside valid range 1 to 100
  Cause: invalid score threshold
  Action: fix query

DRG-50908: invalid maximum number of documents string
  Cause: invalid maximum number of documents
  Action: fix query

DRG-50909: maximum number of documents string is not an integer
  Cause: invalid maximum number of documents
  Action: fix query

DRG-50910: max documents requested string outside valid range 1 to 65535
  Cause: invalid maximum number of documents
  Action: fix query

DRG-50911: invalid first document number string
  Cause: invalid first document number
  Action: fix query
DRG-50912: first document number string is not an integer  
   Cause: invalid first document number  
   Action: fix query  

DRG-50913: first document requested string is not a positive number  
   Cause: invalid first document number  
   Action: fix query  

DRG-50914: invalid last document number string  
   Cause: invalid last document number  
   Action: fix query  

DRG-50915: last document number string is not an integer  
   Cause: invalid last document number  
   Action: fix query  

DRG-50916: last document string is less than first document  
   Cause: invalid last document number  
   Action: fix query  

DRG-50917: escape on at end of text query string  
   Cause: unbalanced escape characters  
   Action: turn escape off  

DRG-50918: mismatched close escape character  
   Cause: no matching open escape character for close escape  
   Action: match open and close escapes  

DRG-50919: NEAR operand not a phrase, equivalence or another NEAR expression  
   Cause: invalid operand type for NEAR operator  
   Action: correct operand type  

DRG-50920: part of phrase not itself a phrase or equivalence  
   Cause: invalid type of expression which is part of phrase  
   Action: fix query  

DRG-50921: EQUIV operand not a word or another EQUIV expression  
   Cause: invalid operand type for EQUIV operator  
   Action: correct operand type  

DRG-50922: PL/SQL execution failed for string  
   Cause: PL/SQL function may not exist or is returning bad value  
   Action: PL/SQL may not exist or is returning bad value  

DRG-50923: could not rewrite PL/SQL for execution  
   Cause: parser internal  
   Action: call support  

DRG-50924: PL/SQL inside PL/SQL not supported  
   Cause: PL/SQL function call returned another PL/SQL call  
   Action: remove recursive PL/SQL
DRG-50925: could not parse return value of PL/SQL
  Cause: string returned by PL/SQL function could not be parsed
  Action: fix PL/SQL function being called

DRG-50926: invalid text query string
  Cause: query string empty or made up of invalid characters
  Action: fix query

DRG-50927: parser failed on line string on column string
  Cause: bug
  Action: call support

DRG-50928: reserved failure on line string on column string
  Cause: bug
  Action: call support

DRG-50929: parser internal on line string on column string
  Cause: bug
  Action: call support

DRG-50930: parser memory failure on line string on column string
  Cause: memory allocation or freeing error
  Action: call support

DRG-50931: parser not opened
  Cause: bug
  Action: call support

DRG-50932: parser preference initialization failed
  Cause: bug
  Action: call support

DRG-50933: parser hash insert failure
  Cause: bug
  Action: call support

DRG-50934: parser hash create failure
  Cause: bug
  Action: call support

DRG-50935: parser component failure
  Cause: bug
  Action: look for other errors

DRG-50936: query word string is too complex for index
  Cause: bug
  Action: look for other errors

DRG-50937: query too complex
  Cause: query is too complex for our query evaluator
  Action: make query smaller
DRG-50938: parser already bound
  Cause: internal coding mistake
  Action: call support

DRG-50939: parser not set
  Cause: bug
  Action: call support

DRG-50940: parser not parsed
  Cause: bug
  Action: call support

DRG-50941: PL/SQL function string cannot be executed
  Cause: PL/SQL function may not exist or cannot be executed by user
  Action: rewrite PL/SQL function specified in query

DRG-50942: errors: stringstring
  Cause: PL/SQL function encountered error -- this is the error message
  Action: See error message

DRG-50943: query token too long on line string on column string
  Cause: A query token is longer than 256 bytes
  Action: Rewrite query

DRG-50944: NEAR operator not supported for theme index
  Cause: NEAR operator used in theme index query
  Action: Rewrite query without NEAR operator

DRG-50945: Illegal phrase in query for theme index
  Cause: Phrase incorrectly defined in theme index query
  Action: Rewrite query

DRG-50946: Invalid unary operator for theme index
  Cause: Stemming, fuzzy match and soundex not allowed for theme index
  Action: Rewrite query

DRG-50947: ABOUT clause not allowed without a theme index
  Cause: The query contains an ABOUT clause, but there is no theme index to support it
  Action: Rewrite query

DRG-50948: ABOUT clause required in the absence of a text index
  Cause: There is no text index, but the query does not contain any about clause. With only a theme index present, each query term must belong to an ABOUT clause
  Action: Rewrite query

DRG-50949: too many SQEs
  Cause: Too many SQEs to expand
  Action: Rewrite query or SQE
DRG-50950: circular SQE found
  Cause: Circular SQE reference is found.
  Action: Rewrite query or SQE

DRG-50951: Unable to resolve element name for attribute string
  Cause: XPATH expression such as A/*/@B or A///@B is not supported.
  Action: Rewrite query

DRG-50952: Section is not PATH section group
  Cause: XPATH expression has section which is not created using PATH section group.
  Action: Rewrite query not to use XPATH expression or create the index with PATH section group

DRG-50953: Unable to determine section name
  Cause: XPATH expression should not end with . or *
  Action: Rewrite the path expression not to use . or * at the end

DRG-50954: Theme index is required for CTXCAT about queries
  Cause: There is no theme index, but the catsearch query contains about clause. You must create a theme index before using ABOUT query against CTXCAT index
  Action: create theme index

DRG-50955: Missing comma in transform clause string
  Cause: A transform clause in a query template is missing a comma
  Action: Add the comma in the appropriate position

DRG-50956: Theme index is required for THEMES transform queries
  Cause: There is no theme index, but the operator TRANSFORM is used with THEMES as its parameter. You must create a theme index before using THEMES in TRANSFORM operator.
  Action: create theme index

DRG-50957: Missing <textquery> element in query template string
  Cause: The <textquery> tag is missing or misspelled in a query template
  Action: Correct the missing tag

DRG-50958: Missing quote in transform clause string
  Cause: A transform clause in a query template is missing a quote
  Action: Add the quote in the appropriate position

DRG-50959: Query length exceeds string bytes
  Cause: the query length exceeds the maximum allowed length
  Action: reduce the length of the query

DRG-50960: Mild not operand not a term or phrase
  Cause: invalid operand type for MNOT operator
  Action: correct operand type

DRG-50961: Missing string for string clause
  Cause: the specified tag is missing from the specified complex query clause
Action: Add missing clause

DRG-50962: Query operators are not allowed in transform input string
  Cause: You specified an operator (such as wildcard) in the input string for the transform operator
  Action: Remove or escape the query operator

DRG-51002: unexpected component failure
  Cause: Internal error
  Action: Contact Oracle support

DRG-51017: unable to open storage buffer for fuzzy match candidates
  Cause: Internal error, probably insufficient memory
  Action: Contact Oracle support

DRG-51019: unable to open or illegal format for fuzzy match data file: string
  Cause: Unable to open OS file containing fuzzy matching information or the file was not of the correct format
  Action: Consult the documentation for correct location of the fuzzy match information files and check for file damage

DRG-51020: out of memory in fuzzy matcher
  Cause: Cannot allocate more memory
  Action: Contact your system administrator

DRG-51021: undefined error in fuzzy matcher
  Cause: Internal error
  Action: Contact Oracle support

DRG-51022: undefined error in stemmer
  Cause: Internal error
  Action: Contact Oracle support

DRG-51023: stemmer file cannot be opened
  Cause: Unable to open OS file containing stemmer lexicon, or the file contents were not correct
  Action: Consult documentation for correct location of the stemmer lexicons and check for file damage

DRG-51024: out of memory in stemmer
  Cause: Cannot allocate more memory
  Action: Contact your system administrator

DRG-51025: an invalid character was passed to the stemmer
  Cause: Invalid character in word input to the stemmer
  Action: Remove invalid character from word to be stemmed

DRG-51028: unexpected error in fuzzy match expansion: %(1)
  Cause: Internal error
  Action: Contact Oracle support

DRG-51029: unexpected error in stemmer expansion: %(1)
Cause: Internal error
Action: Contact Oracle support

DRG-51030: wildcard query expansion resulted in too many terms
Cause: User error
Action: Make wildcard query narrower

DRG-51100: invalid program argument index
Cause: This is an internal error
Action: Contact Oracle Support to report a bug

DRG-51101: argument processing callback failed
Cause: this is an internal error
Action: Contact Oracle support to report a bug

DRG-51200: open keymap failed for index id = string
Cause: Failed to initialize the keymap for the column id specified.
Action: Check index ID. Contact support if caused by internal errors

DRG-51201: failed to perform DDL operation: database object string
Cause: Textkey mapping service failed on DDL operation
Action: Check Oracle error and take corrective action

DRG-51202: invalid key mapping operation mode : string
Cause: invalid keymap mode value found. This is an internal error
Action: Contact Oracle support

DRG-51203: found doc ids without mappings during get maps
Cause: found doc ids without mappings during get mapping by doc ids, the
index data and keymap service are out of synch.
Action: Contact Oracle support

DRG-51300: error getting dml Queue lock
Cause: a server must have hung while processing the dml Queue, leaving it
locked
Action: Contact Oracle support

DRG-51301: error releasing dml Queue lock
Cause: internal database error, or perhaps someone dropped the lock while we
were using it
Action: Contact Oracle support

DRG-51311: DML lock handle previously allocated
Cause: internal error
Action: Contact Oracle support

DRG-51312: DML lock internal error string
Cause: internal error
Action: Contact Oracle support

DRG-51313: timeout while waiting for lock
Cause: most likely an internal error
Action: Contact Oracle support

DRG-51314: index is not empty
  Cause: you attempted to invoke populate_pending against an index which already has or has had indexed documents.
  Action: populate pending manually, or recreate the index NOPOPULATE

DRG-51403: New index name not provided by kernel
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-51801: failed to seek in file: %(1)
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-51802: failed to read from file: %(1)
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-51803: failed to open file: %(1)
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-51804: failed to write to file: %(1)
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52100: string returned internal error code string
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52101: an invalid session handle was passed to Oracle Text
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52102: an invalid transaction handle was passed to Oracle Text
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52103: the Oracle Text environment could not reset
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52104: the Oracle Text environment could not initialize
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52105: no delete function found
  Cause: this is an internal error
  Action: Contact Oracle support
DRG-52106: Oracle Text service results could not be committed
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52107: ctxkbtc internal error
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52108: failed to delete knowledge base user extension
  Cause: this is an internal error
  Action: check file permissions or contact Oracle support

DRG-52109: error in reading thesaurus
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52110: error in writing extended knowledge base
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52111: error in knowledge base cache
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52112: improper Chinese string \textit{string} of length \textit{number}
  Cause: this is an internal error
  Action: None

DRG-52113: improper Japanese string \textit{string} of length \textit{number}
  Cause: this is an internal error
  Action: None

DRG-52200: invalid state during export
  Cause: this is an internal error
  Action: Contact Oracle support

DRG-52201: incompatible Oracle Text versions
  Cause: attempting to import an incompatible version of Oracle Text data
  Action: make sure source and target Oracle Text versions are compatible

DRG-52202: invalid class name: \textit{string}
  Cause: the specified class name is not valid
  Action: Contact Oracle Support

DRG-52203: invalid object name: \textit{string}
  Cause: the specified object name is not valid
  Action: Contact Oracle Support

DRG-52204: error while registering index
  Cause: this is an internal error
  Action: Contact Oracle support
DRG-52205: class *string* and object *string* already exists for this index  
  **Cause:** duplicate entry of class and object  
  **Action:** Contact Oracle support

DRG-52206: error while registering index object  
  **Cause:** this is an internal error  
  **Action:** Contact Oracle support

DRG-52207: the specified attribute does not exist: *string*  
  **Cause:** This is an internal error  
  **Action:** Contact Oracle Support

DRG-52208: the specified attribute already exist: *string*  
  **Cause:** This is an internal error  
  **Action:** Contact Oracle Support

DRG-52210: error while registering value for attribute: *string*  
  **Cause:** This is an internal error  
  **Action:** Contact Oracle Support

DRG-52211: error while registering partition  
  **Cause:** this is an internal error  
  **Action:** Contact Oracle support

DRG-52212: error while registering cdi columns  
  **Cause:** this is an internal error  
  **Action:** Contact Oracle support

DRG-52300: Index *string.string* does not exist  
  **Cause:** The given index does not exist for the current user  
  **Action:** Give a valid index name

DRG-52301: Query Stats is already enabled for this index  
  **Cause:** attempting to enable the query stats for an index for which it is already enabled  
  **Action:** None. No need to enable again

DRG-52302: Query Stats is not enabled for this index  
  **Cause:** attempting to disable the query stats for an index for which it is not enabled  
  **Action:** None. No need to disable if it is not already enabled

DRG-52303: Option String is full  
  **Cause:** Index option string is full  
  **Action:** None

DRG-52304: This operation requires Query Stats to be enabled for the index  
  **Cause:** attempting to do an operation which required query stats option for the index to be enabled  
  **Action:** Enable query stats option for the index using ctx_output.enable_query_stats()
DRG-52305: Unknown value, string, passed in to stat_type

Cause: An invalid value is passed in to the parameter stat_type

Action: Give a valid value
LPX-00000: normal, successful completion
   Cause: Normal exit
   Action: No action required.

LPX-00001: NULL pointer
   Cause: A NULL pointer was detected as an internal error condition.
   Action: This is a programming error by the caller of the XML parser. Please contact someone who can fix the problem.

LPX-00002: out of memory
   Cause: The operating system has run out of memory.
   Action: Make more memory available to the program.

LPX-00003: duplicate entry in hash table
   Cause: An internal error has occurred (a key was requested to be placed in a hash table but was already there).
   Action: Contact Oracle Support Services and report the error.

LPX-00004: internal error "-s"
   Cause: An internal error has occurred.
   Action: Contact Oracle Support Services and report the error.

LPX-00005: -1s buffer overflow, maximum size is -2u bytes
   Cause: A name, quoted string, URL, or other document component was too long.
   Action: Restrict the component to the maximum size shown.

LPX-00006: invalid child type for parent node
   Cause: An attempt was made to add an invalid node-type to a parent node.
   Action: Correct the code.

LPX-00007: unexpected end-of-file encountered
   Cause: The documented ended unexpectedly, perhaps due to truncation.
   Action: Verify that the document is complete.

LPX-00008: invalid memory callback
   Cause: The memory callback structure passed to xmlinit was missing the allocate or free functions (or both).
   Action: Provide both functions in the callback structure.
LPX-00011: In line ~1u of ~2s [general entity ~3S]:
  Cause: Error message prefixes, not errors themselves. These are the possible banner messages which appear before an XML error to describe the position (line#) and source (buffer or URI) in which the error occurred, as well as the entity's name (if the source is an entity). Parameter entity banner must be at +1 to non-entity banner, general entity at +2 (see lpxerr.c).
  Action: No action required. This is not an error message.

LPX-00012: Unicode data alignment error
  Cause: An input Unicode (UCS2) datum was not aligned properly.
  Action: UCS2 data consists of an array of shorts (ub2) which must be aligned on an even-byte boundary.

LPX-00013: wrong node type
  Cause: The wrong node type was given as argument to a DOM call.
  Action: Review the failing function call, consult the documentation, and make sure the node types passed as correct.

LPX-00014: context is not clean
  Cause: An operation was performed on a context that has already been used (so is not "clean").
  Action: Some functions must be performed on a newly initialized context before being used for parsing. For example, setting a shared DTD. Change the code and do the call before parsing.

LPX-00017: ~1sNodeName: <~2S>
  Cause: More error message boilerplate.
  Action: No action required. This is not an error message.

LPX-00018: internal error "nested open strings"
  Cause: An internal error has occurred.
  Action: Contact Oracle Support Services and report the error.

LPX-00019: property "~s" unknown
  Cause: An unexpected error has occurred in a subsystem used by XML. Subcode is the error code returned by that failing subsystem.
  Action: Contact Oracle Support Services and report the error and subcode.

LPX-00050: initialization error: NLS mismatch
  Cause: A language ID was specified without the matching global area.
  Action: Internal error, contact Oracle Support Services and report the error.

LPX-00051: NLS initialization failed
  Cause: The NLS (National Language Support) package initialization failed.
  Action: Internal error, contact Oracle Support Services and report the error.

LPX-00052: LEH initialization failed
  Cause: The LEH (Library Exception Handling) package initialization failed.
  Action: Internal error, contact Oracle Support Services and report the error.

LPX-00053: LML initialization failed
  Cause: The LML (Low-Level Memory manager) package initialization failed.
Action: Internal error, contact Oracle Support Services and report the error.

LPX-00054: LPU initialization failed, error ~u
Cause: The LPU (URL Parser/Loader) package initialization failed.
Action: Internal error, contact Oracle Support Services and report the error.

LPX-00100: root element "~1S" does not match DTD root "~2S"
Action: Correct the document.

LPX-00101: parameter-entity markup cannot be split up
Cause: Validity Constraint 2.8 failed: "Parameter-entity replacement text must be properly nested with markup declarations." *Example: <?xml version="1.0"?> <!DOCTYPE greeting [ <!ENTITY % e "<!ELEMENT > %e; greeting (#PCDATA)> ]> <greeting>Hello!</greeting> *Explanation: The parameter entity 'e' contains markup which may not be split up; the entire ELEMENT (or ATTLIST or ENTITY) definition must be present in one piece.
Action: Correct the document.

LPX-00102: standalone document declaration should be "no"
Cause: Validity Constraint 2.9 failed: "Standalone document declaration must have the value 'no' if any external markup declarations contain declarations of:
* attributes with default values - or -
* entities - or -
* attributes with values subject to normalization - or -
* element types with element content"
Action: Correct the document.

LPX-00103: document structure does not match DTD
Cause: Validity Constraint 3 failed: "An element is valid if there is a declaration matching elementdecl where the Name matches the element type, and one of the following holds:
* The declaration matches EMPTY and the element has no content
* The declaration matches children and the sequence of child elements belongs to the language generated by the regular expression in the content model, with optional white space (characters matching the nonterminal S) between each pair of child elements.
* The declaration matches Mixed and the content consists of character data and child elements whose types match names in the content model.
* The declaration matches ANY, and the types of any child elements have been declared."
Action: Correct the document.

LPX-00104: element "~5" is not declared in the DTD
Cause: Validity Constraint 3 failed: The named element has no matching elementdecl in the DTD
Action: Correct the document.

LPX-00105: element "~S" is not empty as required by the DTD
Cause: Validity Constraint 3 failed: The named element is declared as EMPTY in the DTD but contains sub-elements in the document.
Action: Correct the document.

LPX-00106: attribute "~1S" of element "~2S" is undefined
Cause: Validity Constraint 3.1 failed:
Action: Correct the document.

LPX-00107: element "~S" has multiple declarations
Cause: Validity Constraint 3.2 failed: "No element type may be declared more than once."
Action: Correct the DTD.

LPX-00108: parameter-entity parenthetical cannot be split up
Cause: Validity Constraint 3.2.1 failed: "Parameter-entity replacement text must be properly nested with parenthesized groups. For interoperability, if a parameter-entity reference appears in a choice, seq, or Mixed construct, its replacement text should not be empty, and neither the first nor last non-blank character of the replacement text should be a connector (| or ,). *Example: <?xml version="1.0"?> <!DOCTYPE foo [ <!ELEMENT greeting (#PCDATA)> <!ENTITY % e "(#PCDATA |"> <!ELEMENT foo %e; greeting)> ]>
<greeting>Hello!</greeting> *Explanation: The parenthetical content of the 'e' entity may not be split up into sections: both open and close parentheses must be in the same declaration.
Action: Correct the DTD.

LPX-00109: duplicate name "~S" in mixed-content declaration
Cause: Validity Constraint 3.2.2 failed: "The same name must not appear more than once in a single mixed-content declaration." *Example: <!ELEMENT p (#PCDATA | a | b | c | d | a)> *Explanation: 'a' occurs more than once in the mixed-content declaration.
Action: Correct the DTD.

LPX-00110: invalid ~1s "~2S" (not a Name)
Cause: Validity Constraint 3.3.1 failed: Given thing is not a Name
Action: Correct the document.

LPX-00111: invalid ~1s "~2S" (not a Nmtoken)
Cause: Validity Constraint 3.3.1 failed: Given thing is not a Nmtoken
Action: Correct the document.

LPX-00112: element "~S" has multiple ID attributes
Cause: Validity Constraint 3.3.1 failed: "No element type may have more than one ID attribute specified."
Action: Correct the document.

LPX-00113: element "~1S" ID attribute "~2S" must be #IMPLIED or #REQUIRED
Cause: Validity Constraint 3.3.1 failed: "An ID attribute must have a declared default of #IMPLIED or #REQUIRED."
Action: Correct the document.

LPX-00114: element "~1S" attribute "~2S" has invalid enumeration value "~3S"
Cause: Validity Constraint 3.3.1 failed: "Values of this type must match one of the
Nmtoken tokens in the declaration."
Action: Correct the document.

LPX-00115: element "~1S" is missing required attribute "~2S"
Cause: Validity Constraint 3.3.2 failed: "If the default declaration is the keyword
#REQUIRED, then the attribute must be specified for all elements of the type in
the attribute-list declaration."
Action: Correct the document.

LPX-00116: element "~1S" attribute "~2S" has invalid value "~3S", must be "~4S"
Cause: Validity Constraint 3.3.2 failed: "If an attribute has a default value declared
with the #FIXED keyword, instances of that attribute must match the default
value."
Action: Correct the document.

LPX-00118: undefined entity "~S"
Cause: Validity Constraint 4.1 failed: "In a document with an external subset or
external parameter entities with "standalone='no'", the Name given in the entity
reference must match that in an entity declaration."
Action: Correct the document.

LPX-00119: element "~1S" attribute "~2S" must be an unparsed entity
Cause: The attribute value must be an unparsed entity.
Action: Correct the document.

LPX-00120: entity "~1S" NDATA (notation) "~2S" is undefined
Cause: Entity’s NDATA (notation) is undefined
Action: Correct the document.

LPX-00121: undefined notation "~S"
Cause: Notation is not known.
Action: Correct the document.

LPX-00122: undefined ID "~S" in IDREF
Cause: Validity Constraint 3.3.1 failed: "A name must not appear more than once
in an XML document as a value of this type; i.e., ID values must uniquely identify
the elements which bear them."
Action: Correct the document.

LPX-00123: duplicate ID "~S"
Cause: An ID was used twice, they must be unique.
Action: Correct the document.

LPX-00124: attribute value should be one or more tokens
Cause: An attribute with tokenized type (IDREFS, ENTITIES, NMTOKENS) did
not contain any tokens.
Action: Value must contain one or more tokens, separated by spaces.
LPX-00125: duplicate entity "~S" (ignored)
  Cause: Warning returned by XmlDomGetDecl when original document did not contain an XMLDecl
  Action: This is a warning, not an error. The value XMLERR_NO_DECL is used by the programmer to detect whether a document had an XMLDecl or not. It does not indicate a problem.

LPX-00200: could not convert from encoding ~1s to ~2s
  Cause: The conversion cannot be made between the specified encodings.
  Action: Choose a data encoding which can represent all expected input encoding (such as a Unicode-based encoding, UTF-8 or UTF-16).

LPX-00201: unknown encoding "~s"
  Cause: The specified encoding was not known. It should be an IANA or Oracle encoding name.
  Action: Use an appropriate encoding.

LPX-00202: could not open "~s" (error ~u)
  Cause: The named input (file, URL, etc) does not exist.
  Action: Make sure the named input is available and can be opened.

LPX-00203: could not read from "~s" (error ~u)
  Cause: Data could not be read from the named input.
  Action: Take appropriate action to allow data to be read.

LPX-00204: syntax error
  Cause: A syntax error was found.
  Action: Check the XML document line and correct it.

LPX-00205: expected "<![--" at the start of comment
  Cause: Bad syntax detected when processing a comment.
  Action: Fix the comment syntax.

LPX-00206: invalid CDATA section
  Cause: Bad syntax detected when processing CDATA. Proper format is '<![CDATA[ data ']].
  Action: Correct the CDATA syntax.

LPX-00207: expected "[" at the start of conditional section
  Cause: Bad syntax detected when processing a conditional section.
  Action: Fix the conditional section syntax.

LPX-00208: unknown DTD keyword "~s"
  Cause: An unknown keyword was found in the DTD.
  Action: Use a proper keyword.

LPX-00209: PI names starting with XML are reserved
  Cause: Processing instruction starting with XML was found.
  Action: Use another name for the processing instruction.

LPX-00210: expected '~1c' instead of '~2c'
Cause: A syntax error was detected.
Action: Use proper syntax.

LPX-00211: attribute default must be REQUIRED, IMPLIED, or FIXED
Cause: Attribute default was invalid.
Action: Default must be REQUIRED, IMPLIED, or FIXED.

LPX-00212: comment must not contain "--"
Cause: A syntax error was detected in the comment.
Action: Use '--' only when specifying the end of the comment.

LPX-00213: comment did not end in "-->"
Cause: A syntax error was detected in the comment.
Action: Be sure to end the comment with '-->'.

LPX-00214: CDATA section did not end in ']]>"'
Cause: A syntax error was detected in the CDATA section.
Action: Be sure to end the CDATA section with ']]>}'.

LPX-00215: processing instruction did not end in '?>'
Cause: A syntax error was detected in the PI section.
Action: Be sure to end the PI with '?>'.

LPX-00216: invalid character ~1u (~2X)
Cause: An invalid multibyte character was found.
Action: Use only characters allowed by the XML specification.

LPX-00217: invalid character ~1u (~2x)
Cause: An invalid Unicode character was found.
Action: Use only characters allowed by the XML specification.

LPX-00218: invalid character ~1u ('~2c')
Cause: An invalid native (ASCII/EBCDIC) character was found.
Action: Use only characters allowed by the XML specification.

LPX-00219: invalid digit '~c' in character reference
Cause: An invalid digit was found in a character reference.
Action: Character references are either '&#DDD;' where D's are decimal digits, or
'&#xHHH;' where H's are hexadecimal digits.

LPX-00220: the string ']]>" cannot occur in character data
Cause: Found ']]>' in character data.
Action: Do not use ']]>' in character data.

LPX-00221: the character '<' cannot occur in attribute values
Cause: Found '<' in an attribute value.
Action: Do not use '<' in attribute values.

LPX-00222: error received from SAX callback function
Cause: An error was received from the SAX callback function.
Action: Examine the additional error messages and take corrective action.
LPX-00223: external entity "~s" found in an attribute value  
  **Cause:** An external entity reference was found in an attribute value.  
  **Action:** Use only references to internal or character entities in attribute values.

LPX-00224: multiple occurrences of attribute "~S" found  
  **Cause:** An attribute occurred multiple times in the same start-tag or empty-element tag.  
  **Action:** Make sure that the attributes are unique.

LPX-00225: end-element tag "~1S" does not match start-element tag "~2S"  
  **Cause:** An element tag was not ended properly.  
  **Action:** Make sure that the correct end element tag is used.

LPX-00226: entity "~S" is not declared  
  **Cause:** An entity is not declared.  
  **Action:** Declare the entity before referencing it.

LPX-00227: entity "~S" is not a parsed entity  
  **Cause:** An entity reference contained the name of an unparsed entity.  
  **Action:** Only reference parsed entities.

LPX-00228: entity reference "~S" refers to itself  
  **Cause:** An entity reference contains a recursive reference to itself.  
  **Action:** Modify the contents of the entity reference to remove this recursion.

LPX-00229: input source is empty  
  **Cause:** An XML input file has no contents.  
  **Action:** The XML file representing a document must contain at least one element.

LPX-00230: invalid character ~1u (~2x) found in a Name or Nmtoken  
  **Cause:** An invalid character was found in a NAME or NM_TOKEN.  
  **Action:** Use only the characters allowed for NAMES and NM_TOKENS by the XML specification.

LPX-00231: invalid character ~1u (~2c) found in a Name or Nmtoken  
  **Cause:** An invalid character was found in a NAME or NM_TOKEN.  
  **Action:** Use only the characters allowed for NAMES and NM_TOKENS by the XML specification.

LPX-00232: invalid use of a parameter entity reference  
  **Cause:** A parameter entity reference was found in an improper location in the internal DTD subset.  
  **Action:** Use a parameter entity reference only where markup declarations can occur in the internal DTD subset, in the external DTD subset, or in an external entity.

LPX-00233: namespace prefixes starting with "xml" are reserved  
  **Cause:** Namespace prefix starting with XML was found.  
  **Action:** Use another name for the namespace prefix.

LPX-00234: namespace prefix "~5" is not declared
Cause: Namespace prefix is not declared.
Action: Declare the prefix in an attribute list.

LPX-00235: invalid XML version, must be 1.0 or 2.0
Cause: Only versions 1.0 and 2.0 of the XML specification are supported.
Action: Use the 1.0 or 2.0 specification & set version# accordingly.

LPX-00236: invalid character ~1u (~2c') found in public identifier
Cause: An invalid character was found in a public identifier.
Action: Use only the characters allowed for public identifiers by the XML specification.

LPX-00237: invalid condition section keyword, must be INCLUDE or IGNORE
Cause: A conditional section <![ keyword [ markup ]]> had invalid keyword, must be either "IGNORE" or "INCLUDE"
Action: Correct condition section usage in document.

LPX-00238: unterminated conditional section
Cause: A conditional section was not properly terminated with ]]>.
Action: Verify conditional nesting in document and correct.

LPX-00239: invalid attribute type "~s"
Cause: The attribute type is not valid. Options are CDATA, ID, IDREF, IDREFS, ENTITY, ENTITIES, NMTOKEN, or NMTOKENS.
Action: Check and correct attribute declaration.

LPX-00240: element-start tag is not well formed
Cause: A start-element tag was improperly formed.
Action: Check and correct the start-element syntax.

LPX-00241: entity reference is not well formed
Cause: An entity reference (general or parameter) was not formed properly.
Action: Form entity reference correctly as "&name;" or "%name;".

LPX-00242: invalid use of ampersand ('&') character (use &amp)
Cause: The ampersand character is used only to start entity or character references.
Action: To include an ampersand character as data, use the built-in & general entity.

LPX-00243: element attribute value must be enclosed in quotes
Cause: An attribute defined in an element's start-tag must be enclosed in single (') or double (""') quotes.
Action: Enclose the attribute value in quotes.

LPX-00244: invalid use of less-than ('<') character (use &lt)
Cause: The less-than character ('<') is not permitted as data.
Action: Use the built-in entity &lt; instead. Check for mismatched quotes (") in case the '<' is part of subsequent markup.

LPX-00245: extra data after end of document
Cause: After the close of the top-level element, more data was found.
**Action:** The end-element tag for the top-level element must be the last thing in the document.

**LPX-00246: missing system ID after public ID**
- **Cause:** In an external ID declaration, the public ID literal was not followed by the system ID literal as required.
- **Action:** Provide with public *and* system IDs for 'PUBLIC' type.

**LPX-00247: invalid Document Type Declaration (DTD)**
- **Cause:** Problems were encountered in the DTD declaration.
- **Action:** Review the DTD and correct the problems.

**LPX-00248: invalid entity declaration**
- **Cause:** Problems were encountered parsing an entity declaration.
- **Action:** Check and correct the declaration syntax.

**LPX-00249: invalid external ID declaration**
- **Cause:** Problems were encountered parsing an external ID declaration.
- **Action:** Check and correct the declaration syntax.

**LPX-00250: invalid attribute declaration**
- **Cause:** Problems were encountered parsing an attribute declaration.
- **Action:** Check and correct the declaration syntax.

**LPX-00251: conditional sections are valid only in external DTDs**
- **Cause:** A condition section is not permitted in internal DTDs.
- **Action:** Remove the condition section.

**LPX-00252: invalid entity replacement-text nesting**
- **Cause:** Markup included from an entity must nest/group properly. That is, open/close markup must occur within the same entity. For example, `<!DOCTYPE doc [ <!ENTITY e "</foo><foo>" ]> <doc><foo>&e;</foo></doc>` Is invalid since foo's start-tag occurs in the top-level document, but the close-tag is provided by the "e" entity. Both start and end must be provided by the same source.
- **Action:** Examples, such as the ones above, are not permitted.

**LPX-00253: missing required version number in XML declaration**
- **Cause:** An XML declaration was missing the required version#.
- **Action:** Always provide a version#, which must come first in the declaration. XML is case sensitive, so only "version" (not "Version", and so on) is valid.

**LPX-00254: invalid XML declaration**
- **Cause:** Problems were encountered parsing an XML declaration.
- **Action:** Check and correct the declaration syntax.

**LPX-00255: XML standalone declaration must be "yes" or "no"**
- **Cause:** The "standalone" parameter in the XML declaration had an invalid value.
- **Action:** standalone must be set to either "yes" or "no". Case is sensitive, so "Yes", "YES", and so on, are invalid.

**LPX-00256: invalid element declaration**
- **Cause:** Problems were encountered parsing an element declaration.
Action: Check and correct the declaration.

LPX-00257: invalid children specification in element declaration
Cause: The 'children' specification in an element declaration was invalid.
Action: Check and correct the declaration.

LPX-00258: invalid "Mixed" specification in element declaration
Cause: The 'Mixed' specification in an element declaration was invalid.
Action: Check and correct the declaration.

LPX-00259: invalid notation declaration
Cause: Problems were encountered parsing a notation declaration.
Action: Check and correct the declaration syntax.

LPX-00260: invalid xml:space attribute declaration
Cause: The xml:space attribute must be declared as an enumeration with choices "default" and "preserve". For example, <!ATTLIST foo xml:space (default|preserve) 'preserve').
Action: Declare the special attribute as above.

LPX-00261: invalid URL ~s
Cause: The specified URL was invalid and could not be parsed.
Action: Correct the URL; consult RFC-2396.

LPX-00262: unsupported protocol ~s
Cause: An URL was encountered which requested a protocol not supported by the XML parser. Only HTTP and file are currently allowed.
Action: Make the data available through the filesystem or HTTP.

LPX-00263: couldn't connect to host ~s port ~d
Cause: A TCP connection couldn't be opened to the named host.
Action: Verify the hostname and connectivity to the host.

LPX-00264: send failed to host ~s
Cause: An error occurred trying to send data over a TCP connection.
Action: Verify network connectivity, and so on.

LPX-00265: read failed from to host ~s
Cause: An error occurred trying to read data from a TCP connection.
Action: Verify network connectivity, and so on.

LPX-00266: invalid language specification ~s
Cause: The given language specification was invalid.
Action: Language specification has the format <language>_<territory>.<character set>. For example, "French_France".

LPX-00267: could not resolve relative URL ~s
Cause: The named relative URL couldn't be resolved against its parent.
Action: Make sure the relative makes sense in relation to its parent URL; see RFC-2396 sections 4, 5, and appendix C.

LPX-00268: invalid access method ~1d, must be 0 to ~2d
Cause: The provided access code was not in the valid range.
Action: The code should be one of the XMLACCESS_xxx codes defined in oraxml.h, in the range shown in the error message.

LPX-00269: all three access functions (open/close/read) must be provided
Cause: An attempt was made to set the access method callbacks, but all three functions were not provided.
Action: All three callback functions (open, close, and read) are required. They must all be provided, even if they are stub functions which do nothing.

LPX-00270: FTP error: ~s
Cause: An error was returned from the FTP server while trying to retrieve a file. See the specific message for details.
Action: Corrective action depends on the error.

LPX-00271: FTP login failed: ~s
Cause: The username/password combination was invalid for FTP login.
Action: Specify a valid pair.

LPX-00272: FTP server unavailable: ~s
Cause: The FTP server is unavailable for use.
Action: No action is possible from the client side. See server's error message.

LPX-00273: failed to initialize TCP/IP
Cause: The TCP/IP package could not be initialized.
Action: Check with system administrator to see if this is a configuration problem or a connectivity problem.

LPX-00274: can't import node type
Cause: Some node types (DOCUMENT_NODE & DOCUMENT_TYPE_NODE) cannot be imported with importNode().
Action: No action required.

LPX-00275: can't set output/data encoding AFTER parsing
Cause: Output/data encoding must be set after initialization but BEFORE any parsing has taken place.
Action: Set encoding before parsing any documents.

LPX-00276: bad HTTP/Mime header
Cause: An HTTP reply contained an invalid Mime header.
Action: Verify HTTP reply for accuracy. See RFC 2616.

LPX-00277: no closing quote was seen
Cause: A quoted string was started but not finished.
Action: Put a closing quote in the proper location.

LPX-00278: invalid ~s proxy "~s"
Cause: The proxy specification for the given protocol was invalid.
Action: Check and correct the proxy specification. For HTTP, this is the environment variable "http_proxy".

LPX-00279: invalid no_proxy "~s"
Cause: The no_proxy specification was invalid.
Action: Check and correct it. no_proxy is a comma- or space-separated list of machine or domain names, with an optional port part. If no port part is present, then it applies to all ports on that domain.

LPX-00280: HTTP error ~s
Cause: An HTTP protocol error occurred.
Action: Corrective action depends on the error.

LPX-00281: unsupported encoding "~s"
Cause: The specified encoding is known but not supported by the parser.
Action: Try a different encoding.

LPX-00282: document cannot have both internal/external and shared DTDs
Cause: A parser context which had a shared DTD set was used to parse a document which also contained a DTD. You cannot use both a shared DTD and and internal/external one.
Action: If a shared DTD is to be used, then the documents parsed must not contain or reference a DTD.

LPX-00283: document encoding is ~s-based but default input encoding is not
Cause: The input document was detected to be ASCII (or EBCDIC) based, but no encoding was specified in the XMLDecl and the default input coding was not ASCII (or EBCDIC) based, so could not be applied.
Action: Add an explicit encoding specification to the XMLDecl so the default input encoding is not needed, or pick a default encoding which matches the input document.

LPX-00284: namespace prefix to NULL URI is not allowed
Cause: An element's namespace prefix declarations was for a NULL URI, e.g. <foo xmlns:bar=""/> This is illegal presently in XML 1.0, but will be legal in XML 1.1
Action: Remove erroneous prefix definition.

LPX-00285: invalid Unicode surrogate ~X ~X
Cause: A Unicode document contained an invalid surrogate. If the first (high) surrogate is in the correct range 0xD800 to 0xDBFF, then the second (low) surrogate must be in the range 0xDC00 to 0xDFFF.
Action: Correct the document.

LPX-00286: Exceeded max depth for recursion
Cause: The depth of embedded elements in the document exceeded the limit of 2000.
Action: Correct the document.

LPX-00287: Max limit of ~1d exceeded for ~s
Cause: Max limit exceeded
Action: Correct the document.

LPX-00300: no name in attribute set
Cause: The name attribute was not found in the attribute-set element.
Action: Add a name attribute for this element.
LPX-00301: error in XPATH evaluation  
  **Cause:** The XPATH evaluation returns an error.  
  **Action:** Check specified XPATH expression to determine the error.

LPX-00302: Incorrect stylesheet. The node is not valid.  
  **Cause:** The child node is of invalid type or has invalid name for this particular location in stylesheet, rendering the stylesheet as invalid XSLT.  
  **Action:** Fix the stylesheet by using valid nodes only.

LPX-00303: attribute value "~S" not expected for ~S  
  **Cause:** Attribute is found but its value is not the expected value.  
  **Action:** Set the attribute value to the correct value.

LPX-00304: input parameter to function is null  
  **Cause:** An input parameter passed into this function is null when it is not supposed to.  
  **Action:** Make sure the caller function is not passing null for this parameter.

LPX-00305: missing token  
  **Cause:** An expected token is not found.  
  **Action:** Check the input string to make sure the expected token is present.

LPX-00306: inputed string ended with no corresponding closing ']'  
  **Cause:** A closing ']' is expected.  
  **Action:** Add the closing ']' to the input string or remove the extra opening '{'.

LPX-00307: namespace prefix ~S used but not declared  
  **Cause:** Namespace prefix is used but not declared.  
  **Action:** Either declare the namespace or don't use this namespace prefix.

LPX-00308: attribute ~S not found in ~S  
  **Cause:** The expected attribute for this node is not found.  
  **Action:** Need to add this attribute to the node.

LPX-00309: cannot initialize XPATH  
  **Cause:** XPATH context could not be initialized.  
  **Action:** Check the initialization function LpxsutInitXpathCtx().

LPX-00310: element ~S not found in ~S  
  **Cause:** The expected element is not found.  
  **Action:** Check the initialization function LpxsutInitXpathCtx().

LPX-00311: unsupported feature: ~s  
  **Cause:** This feature is not supported.  
  **Action:** Do not use this feature.

LPX-00312: cannot construct XML PI with content: ~S  
  **Cause:** The content of XML PI node might be invalid.  
  **Action:** Make necessary changes to make the node valid according to spec.

LPX-00313: cannot construct XML comment with content: ~S
Cause: The content of XML comment node might be invalid.
Action: Make necessary changes to make the node valid according to spec.

LPX-00314: an internal failure occurred
Cause: An internal error occurred in the code.
Action: Contact appropriate developer.

LPX-00315: extension function ~S not supported
Cause: This extension function is not supported.
Action: Either contact appropriate developer for more information or don’t use this extension function.

LPX-00316: invalid value ~S for ~S attribute ~S
Cause: The value for the specified attribute is invalid.
Action: Consult the XSL spec, use only legal values.

LPX-00317: undefined decimal-format "~S"
Cause: The named decimal-format is undefined (the name "#default" means the default format).
Action: Define the desired decimal-format before trying to use it.

LPX-00318: duplicate xsl:decimal-format "~S"
Cause: The named decimal-format was declared more than once.
Action: Make sure there is only a single declaration.

LPX-00319: The node specified is not valid
Cause: The node specified is not of expected type.
Action: Use only the nodes of legal type.

LPX-00320: No more attributes can be added to a non empty element
Cause: The element to which an attribute was being added is non empty and hence can not add anymore attributes to it.
Action: Modify the XSLT stylesheet so that all the attributes are added to an element before anything else is added to it. If you absolutely can not do that then select your output method to be DOM based rather then a stream or SAX based output which you are using presently.

LPX-00321: None of the output method (DOM, SAX, Stream) is selected
Cause: User is trying to process an XML file with out selecting any mechanism for output.
Action: User must select one of the output mechanisms (SAX/DOM/Stream) before attempting to process the XML file.

LPX-00322: A doc referred by XSLT stylesheet could not be opened : ~s
Cause: Either an import,include or document() function tried to open a document and failed.
Action: Make sure that document is present and can be opened.

LPX-00323: illegal apply-imports because of no current template: ~s
Cause: apply-imports was used even when there was no current template possibly with in for-each.
**Action:** Make sure that apply-imports are invoked only if there is a current template and it is not in a xsl:for-each.

**LPX-00324:** "~S" is not a valid value for the lang attribute of xsl:sort  
**Cause:** An invalid language name was specified for sorting.  
**Action:** Provide a valid value for the lang attribute of xsl:sort.

**LPX-00400:** an internal error has occurred in XPATH  
**Cause:** An internal error has occurred in XPATH.  
**Action:** Contact the appropriate developer.

**LPX-00401:** invalid QName in the XSL file  
**Cause:** An invalid QName was passed to the XPATH parser.  
**Action:** See whether there are any invalid QNames in the XSL file.

**LPX-00402:** invalid axisname in the XSL file  
**Cause:** An invalid axis name was passed to the XPATH parser.  
**Action:** See whether all axis names in the XSL file are correct.

**LPX-00403:** unmatched quote in the XSL file  
**Cause:** An unmatched quote was found in the XSL file.  
**Action:** Check for unmatched quotes in the XSL file.

**LPX-00404:** unable to resolve namespace URI  
**Cause:** The namespace URI may not be valid.  
**Action:** Make sure that the name space URIs are valid.

**LPX-00405:** unable to allocate memory  
**Cause:** May be out of memory.  
**Action:** Try increasing virtual memory.

**LPX-00406:** object of incorrect type passed to the function  
**Cause:** An object of incorrect type was passed to the XPATH/XSL function.  
**Action:** Do the required conversion before passing in an object of type which is different from the expected type.

**LPX-00407:** right square bracket missing in the XSL file  
**Cause:** Right square bracket missing in the XSL file.  
**Action:** Check for unmatched square bracket in the XSL file.

**LPX-00408:** right parenthesis missing in the XSL file  
**Cause:** Right parenthesis missing in the XSL file.  
**Action:** Check for unmatched parenthesis in the XSL file.

**LPX-00409:** incorrect token encountered while parsing  
**Cause:** An unexpected token encountered while parsing the expression/ pattern.  
**Action:** Check the syntax of the expressions/patterns.

**LPX-00410:** unable to resolve the variable reference  
**Cause:** Variable reference may not be valid.  
**Action:** Check whether the variable references are valid.
LPX-00411: unknown function name encountered
    Cause: The function is not supported at this time or the name is invalid.
    Action: Check the function names. If valid and this error occurs, then avoid using
             them at this time.

LPX-00413: loss of precision due to excessively large numerical constant
    Cause: The numerical constant in the XPath expression is too big.
    Action: None

LPX-00601: Invalid token in: '~S'
    Cause: Invalid token in XPath expression.
    Action: Check the expression.

LPX-00602: Invalid child element '~1S' of element '~2S'.
    Cause: Invalid child element in this stylesheet context.
    Action: Check the stylesheet.

LPX-00603: Invalid attribute value '~1S': [element '~2S', attribute '~3S'].
    Cause: Invalid attribute value in this stylesheet context.
    Action: Check the stylesheet.

LPX-00604: Invalid attribute value '~1S', for attribute '~2s'.
    Cause: Invalid attribute value for this attribute.
    Action: Check the stylesheet.

LPX-00605: Invalid attribute '~1S' in element '~2S'.
    Cause: Invalid attribute for this element.
    Action: Check the stylesheet.

LPX-00606: Missing attribute '~1s' in element '~2S'.
    Cause: Missing attribute for this element.
    Action: Check the stylesheet.

LPX-00607: Invalid reference: '~S'.
    Cause: Invalid variable or parameter or template reference.
    Action: Check the stylesheet.

LPX-00608: Repeated declaration of '~1S' in element '~2S'.
    Cause: Only one declaration is allowed at this level.
    Action: Check the stylesheet.

LPX-00609: Function call with invalid number of arguments in '~1S'.
    Cause: Invalid number of arguments.
    Action: Check the function signature.

LPX-00651: VM Stack overflow.
    Cause: The XML data is too large.
    Action: Increase the size of VM stacks in XmlXslVMCreate().

LPX-00652: SAX callback returns with error.
    Cause: SAX callback returns an error.
Action: Check the callback function.

LPX-00653: Output attribute '−S' doesn't have a parent element.
   Cause: Attribute is generated in a wrong context.
   Action: Check the XSLT stylesheet.

LPX-00654: Output namespace attribute '−S' doesn't have a parent element.
   Cause: Attribute generated in the wrong context.
   Action: Check the XSLT stylesheet.

LPX-00655: Invalid output comment '−S'.
   Cause: Invalid comment node.
   Action: Check the XSLT stylesheet.

LPX-00656: XSLTVM terminate.
   Cause: VM terminates.
   Action: No action.

LPX-00657: Invalid output PI '−S'.
   Cause: Invalid PI node.
   Action: Check the XSLT stylesheet.

LPX-00658: Invalid XSLT object type.
   Cause: Invalid object type in XPath evaluation.
   Action: Check the XSLT stylesheet.

LPX-00659: Output write failed.
   Cause: Write operation failed.
   Action: Check the write method.

LPX-00660: Not a well-formed document or external entity.
   Cause: The generated document is not well-formed.
   Action: Check the XSLT stylesheet.

LPX-00661: Failed to load: '−s'.
   Cause: Failed to load a document.
   Action: Check the XSLT stylesheet.

LPX-00662: Invalid encoding.
   Cause: Invalid encoding specified.
   Action: Check the encoding string.

LPX-00663: VM String-Stack overflow.
   Cause: The string data is too large.
   Action: Increase the size of VM StringStack in XmlXslVMCreate().

LPX-00664: VM Node-Stack overflow.
   Cause: Too many XML nodes.
   Action: Increase the size of VM NodeStack in XmlXslVMCreate().

LPX-00690: Invalid argument.
Cause: Invalid or missing argument.
Action: Check the function signature.

LPX-00700: invalid SOAP context
Cause: The SOAP context passed to an XmlSoap function was invalid.
Action: Make sure the context passed is an xmlsoapctx and is still valid (has not been destroyed).

LPX-00701: invalid SOAP role
Cause: An invalid SOAP role was specified.
Action: Only xmlsoaprole enum values should be used (see xml.h).

LPX-00702: invalid SOAP connection binding
Cause: An invalid SOAP connection binding was specified.
Action: Only xmlsoapbind enum values should be used (see xml.h).

LPX-00703: SOAP POST failed
Cause: A SOAP message sent with an HTTP binding failed.
Action: See the returned HTTP error to determine the problem.

LPX-00704: elem has no mustUnderstand
Cause: Header block does not have a mustUnderstand attribute.
Action: This is legal, no action required.

LPX-00705: elem has no role
Cause: Header block does not have a role attribute.
Action: This is legal, no action required.

LPX-00706: message has no fault
Cause: Message body has no Fault child.
Action: This is legal, no action required.

LPX-00707: no Fault reason w/given language
Cause: Fault element does not have a reason with given language.
Action: This is legal, no action required.

LPX-00708: SOAP failed to make HTTP connection
Cause: SOAP failed to make an HTTP connection to the given URL.
Action: Possible cause is invalid URL or memory exhaustion.

LPX-00709: SOAP reply not valid XML
Cause: The reply to a SOAP call was not a valid XML document.
Action: Check the calling URL for validity; otherwise the problem is likely to be on the reply side.

LPX-00711: invalid SOAP version
Cause: The version string specified at SOAP creation time was invalid.
Action: Specify a valid version string, either '1.1' or '1.2'.

LPX-00712: failed to set HTTP header
Causes and Actions for Specific Error Messages:

LPX-00713: `body has more than one fault`
- **Cause:** Message body has multiple Fault children.
- **Action:** Most likely bug in the server.

LPX-00714: `fault is not a single child`
- **Cause:** Message body has additional children besides Fault.
- **Action:** Most likely bug in the server.

LPX-00715: `badly formed fault element`
- **Cause:** Fault element does not have one of mandatory children or has children, which are not allowed.
- **Action:** Most likely bug in the server.

LPX-00716: `badly formed Text subelement`
- **Cause:** Mandatory text child is missing from the requested message subelement.
- **Action:** Most likely bug in the server.

LPX-00717: `badly formed Value subelement`
- **Cause:** Mandatory Value child of the Code child of the Fault badly formed or absent.
- **Action:** Most likely bug in the server.

LPX-00718: `message has no envelope`
- **Cause:** The message has no envelope element child.
- **Action:** Most likely bug in the server.

LPX-00719: `prefix too long`
- **Cause:** The maximum size of encoded namespace attribute name is 1022.
- **Action:** Use shorter prefix.

LPX-00720: `envelope has no header`
- **Cause:** The message envelope does not have header.
- **Action:** This is legal, no action required

LPX-00721: `envelope has no body`
- **Cause:** The message envelope does not have body.
- **Action:** Most likely bug in the server.

LPX-00722: `elem has no relay`
- **Cause:** Header block does not have a relay attribute.
- **Action:** This is legal, no action required.

LPX-00723: `no such element`
- **Cause:** The element with requested namespace name and local part does not exist.
- **Action:** This is legal, no action required.
LPX-00750: arguments "~1s" to function "~2s" are null
  Cause: Input arguments passed into this function are null when it is not supposed to.
  Action: Make sure the caller function is not passing null for this parameter.

LPX-00751: arguments "~s" are exclusive
  Cause: Input arguments passed into this function are exclusive. Specify only one of them.
  Action: Specify only one of the exclusive arguments.

LPX-00752: invalid ~1s, must be ~2s
  Cause: Invalid value was specified for attribute.
  Action: Correct the value with one of the suggested values.

LPX-00753: invalid proxy "~s"
  Cause: The proxy specification for the given protocol was invalid.
  Action: Check and correct the proxy specification. For HTTP, this is the environment variable "http_proxy".

LPX-00754: invalid no_proxy "~s"
  Cause: The no_proxy specification was invalid.
  Action: Check and correct the specification. no_proxy is a comma- or space-separated list of machine or domain names, with an optional port part. If no port part is present, then it applies to all ports on that domain.

LPX-00755: missing required argument "~s"
  Cause: A required argument was missing.
  Action: Provide the missing argument to the function.

LPX-00756: Etags and tokens must be either all tagged or all untagged
  Cause: The list of condition factors need to be either all tagged with absoluteURI's or all untagged with absoluteURI's.
  Action: If all condition factors were applied to the resource receiving the request, make them all untagged. Otherwise, make them all tagged with appropriate resource's URI's.

LPX-00757: maximum XML document size (~s bytes) exceeded
  Cause: The input XML document's size exceeded the limit set by "max_xml_size" attribute set in XmlDavCreate().
  Action: Raise the value set for max_xml_size attribute in XmlDavCreate() if this does not create problems with security.

LPX-00758: user-provided callback returns null
  Cause: Null was returned from user-provided callback function.
  Action: Check error(s) encountered within the callback function.

LPX-00759: failed to initialize TCP/IP
  Cause: The TCP/IP package could not be initialized.
  Action: Check with your system administrator to see if this is a configuration problem or a connectivity problem.

LPX-00760: couldn't connect to host ~s port ~u
Cause: A TCP connection couldn’t be opened to the named host.
Action: Verify the hostname and connectivity to the host.

LPX-00761: send failed to host ~s
Cause: An error occurred trying to send data over a TCP connection.
Action: Verify network connectivity.

LPX-00762: read failed from host ~s
Cause: An error occurred trying to read data from a TCP connection.
Action: Verify network connectivity.

LPX-00763: exceeded maximum TCP connections
Cause: The maximum allowable number of TCP connections were exceeded. This happens only if too many pending HTTP responses have not been properly ended or destroyed.
Action: End a pending response session or destroy response objects that have been processed.

LPX-00764: TCP connection was broken
Cause: Either the server terminated the TCP connection or the TCP connection is in a bad state.
Action: Analyze the error. After cleanup, retry the method.

LPX-00765: HTTP error ~s
Cause: An HTTP protocol error occurred.
Action: Corrective action depends on the error.

LPX-00766: unsupported transfer-coding values: ~s
Cause: Only "chunked" and "identity" transfer-coding values are supported.
Action: This is WebDAV implementation’s shortfall. There is no workaround for this problem.

LPX-00767: not a text media type
Cause: A text media type was expected. But other media types were found.
Action: Since this data cannot be read as a text type, use another routine to read it.

LPX-00768: no entity body found
Cause: No entity body was found when it was read.
Action: Check the HTTP status code and headers to see why the entity body was not found.

LPX-00769: not xml media type
Cause: An XML media type was expected. But other media types were found.
Action: Since this data cannot be read as an XML type, use another routine to read it.

LPX-00770: missing lock token in lock refresh request
Cause: A LOCK request to refresh a lock had no lock token header specified.
Action: Use XmlDavUpdResDesc to set a lock token in the resource

LPX-00771: missing lock token in UNLOCK request
Cause: An UNLOCK request to remove a lock had no lock token header specified.
Action: Use XmlDavUpdResDesc to set a lock token in the resource

LPX-00772: wrong object type
Cause: The wrong object type was given as argument to a WebDAV call.
Action: Review the failing function call, consult the documentation, and make sure the object types pass as correct.

LPX-00773: protocol violation: ~s
Cause: The entity body sent by the server in Chunked Transfer Encoding violated protocol.
Action: Either this is an internal implementation error or a server implementation error. Users should file a bug against either the server’s or the client’s implementation.

LPX-00800: XQuery invalid token
Cause: Invalid XQuery query.
Action: Correct the query.

LPX-00801: XQuery syntax error at
Cause: Invalid XQuery query.
Action: Correct the query.

LPX-00802: Too many arguments
Cause: Invalid XQuery query.
Action: Correct the query.

LPX-00803: Too few arguments
Cause: Invalid XQuery query.
Action: Correct the query.

LPX-00804: Invalid token: ‘~S’
Cause: Invalid program.
Action: Correct the program.

LPX-00805: Syntax error at ‘~S’
Cause: Invalid program.
Action: Correct the program.

LPX-00806: Invalid token in the pattern
Cause: The program was invalid.
Action: Correct the program.

LPX-00807: Invalid range
Cause: The program was invalid.
Action: Correct the program.

LPX-00808: internal error, invalid OPCODE
Cause: An internal error has occurred.
Action: Contact Oracle Support Services and report the error.

LPX-00809: Invalid subexpression reference
Cause: The replacement string was invalid.
Action: Correct the replacement string.

LPX-00825: Can't compile the element:
Cause: XSLT Stylesheet can't be compiled to XQuery query.
Action: Correct the the stylesheet.

LPX-00826: Can't compile the attribute:
Cause: XSLT Stylesheet can't be compiled to XQuery query.
Action: Correct the the stylesheet.

LPX-00827: Namespace conflict for prefix:
Cause: XSLT Stylesheet can't be compiled to XQuery query.
Action: Correct the the stylesheet.

LPX-00903: Invalid flags specified for XmlDiff or XmlPatch
Cause: Invalid value supplied to flags parameter for XmlDiff or XmlPatch functions.
Action: Specify valid flags (see xmldf.h).

LPX-00904: Invalid inputs were supplied to XmlDiff or XmlPatch
Cause: Data could not be read from inputs to XmlDiff or XmlPatch functions.
Action: Specify valid inputs (see xmldf.h).

LPX-00910: The root nodes in input documents to XmlDiff did not match
Cause: The root nodes in input documents do not match.
Action: Make sure the root nodes have same qualified name in both input documents. XmlDiff can be called only if the root nodes are same in input documents.

LPX-00913: XmlPatch could not process the XML PI oracle-xmldiff
Cause: The diff document either did not specify the XML Processing Instruction "oracle-xmldiff" or did not specify all data required by XmlPatch. The PI should be the first child of the top-level xdiff element. This error is also thrown when the output-model is 'snapshot' and operations-in-docorder is 'false'.
Action: Specify the "oracle-xmldiff" PI correctly. See documentation for XmlPatch C function in xmldf.h.

LPX-00918: XmlPatch encountered an error in translating XPATH using XmIXVM
Cause: XmlPatch encountered an invalid XPATH in the diff document.
Action: If you handcoded the diff document, make sure all the XPATHs in the diff document are valid.

LPX-01001: [XPST0001] Static context component '~S' has no value
Cause: It is a static error if analysis of an expression relies on some component of the static context that has not been assigned a value.
Action: None

LPX-01002: [XPDY0002] Dynamic context component '~S' has no value
Cause: It is a dynamic error if evaluation of an expression relies on some// part of the dynamic context that has not been assigned a value.
Action: None
LPX-01003: [XPST0003] Syntax error at '−s'
  Cause: It is a static error if an expression is not a valid instance of the grammar defined in A.1 EBNF
  Action: None

LPX-01004: [XPTY0004] Expression type does not match a required type
  Cause: It is a type error if, during the static analysis phase, an expression is found to have a static type that is not appropriate for the context in which the expression occurs, or during the dynamic evaluation phase, the dynamic type of a value does not match a required type as specified by the matching rules in 2.5.4 SequenceType Matching.
  Action: Check the expression type.

LPX-01005: [XPST0005] Invalid empty-sequence() expression
  Cause: During the analysis phase, it is a static error if the static type assigned to an expression other than the expression () or data(()) is empty-sequence().
  Action: None

LPX-01006: [XPTY0006]
  Cause: Not currently used.
  Action: None

LPX-01007: [XPTY0007]
  Cause: Not currently used.
  Action: None

LPX-01008: [XPST0008] Invalid reference
  Cause: It is a static error if an expression refers to an element name, attribute name, schema type name, namespace prefix, or variable name that is not defined in the static context, except for an ElementName in an ElementTest or an AttributeName in an AttributeTest.
  Action: None

LPX-01009: [XQST0009] Schema Import Feature not supported
  Cause: An implementation that does not support the Schema Import Feature must raise a static error if a Prolog contains a schema import.
  Action: None

LPX-01010: [XPST0010] Axis '−S' not supported
  Cause: An implementation must raise a static error if it encounters a reference to an axis that it does not support.
  Action: None

LPX-01012: [XQST0012] Invalid XML schema
  Cause: It is a static error if the set of definitions contained in all schemas imported by a Prolog do not satisfy the conditions for schema validity specified in Sections 3 and 5 of [XMLSchema] Part 1 i.e., each definition must be valid, complete, and unique
  Action: None

LPX-01013: [XQST0013] Invalid pragma content
Cause: It is a static error if an implementation recognizes a pragma but determines that its content is invalid.

Action: None

LPX-01014: [XQST0014]
Cause: Not currently used.
Action: None

LPX-01015: [XQST0015]
Cause: Not currently used.
Action: None

LPX-01016: [XQST0016] Module Feature not supported
Cause: An implementation that does not support the Module Feature raises a static error if it encounters a module declaration or a module import.
Action: None

LPX-01017: [XPST0017] Invalid function call
Cause: It is a static error if the expanded QName and number of arguments in a function call do not match the name and arity of a function signature in the static context.
Action: None

LPX-01018: [XPTY0018] Path last step contains both nodes and atomic values
Cause: It is a type error if the result of the last step in a path expression contains both nodes and atomic values.
Action: None

LPX-01019: [XPTY0019] Path step contains atomic values
Cause: It is a type error if the result of a step (other than the last step) in a path expression contains an atomic value.
Action: None

LPX-01020: [XPTY0020] The path step context item is not a node
Cause: It is a type error if, in an axis step, the context item is not a node.
Action: None

LPX-01021: [XPDY0021]
Cause: Not currently used.
Action: None

LPX-01022: [XQST0022] The value of a namespace must be a URILiteral.
Cause: It is a static error if the value of a namespace declaration attribute is not a URILiteral.
Action: None

LPX-01023: [XPDY0023]
Cause: Not currently used.
Action: None

LPX-01024: [XQTY0024] Attribute node out of context
Cause: It is a type error if the content sequence in an element constructor contains an attribute node following a node that is not an attribute node.
Action: None

LPX-01025: [XQDY0025] Repeated attribute name
Cause: It is a dynamic error if any attribute of a constructed element does not have a name that is distinct from the names of all other attributes of the constructed element.
Action: None

LPX-01026: [XQDY0026] Processing instruction content contains ‘?>’
Cause: It is a dynamic error if the result of the content expression of a computed processing instruction constructor contains the string ‘?>’.
Action: None

LPX-01027: [XQDY0027] Invalid PSVI validity property of the root element
Cause: In a validate expression, it is a dynamic error if the root element information item in the PSVI resulting from validation does not have the expected validity property: valid if validation mode is strict, or either valid or notKnown if validation mode is lax.
Action: None

LPX-01028: [XQDY0028]
Cause: Not currently used
Action: None

LPX-01029: [XQDY0029]
Cause: Not currently used
Action: None

LPX-01030: [XQTY0030] Expression should evaluate to exactly one node
Cause: It is a type error if the argument of a validate expression does not evaluate to exactly one document or element node.
Action: None

LPX-01031: [XQST0031] Version not supported by the implementation
Cause: It is a static error if the version number specified in a version declaration is not supported by the implementation.
Action: None

LPX-01032: [XQST0032] Repeated base URI declaration
Cause: A static error is raised if a Prolog contains more than one base URI declaration.
Action: None

LPX-01033: [XQST0033] Multiple bindings for the namespace prefix ‘~s’
Cause: It is a static error if a module contains multiple bindings for the same namespace prefix.
Action: None

LPX-01034: [XQST0034] Repeated function declaration
Cause: It is a static error if multiple functions declared or imported by a module have the number of arguments and their expanded QNames are equal (as defined by the eq operator).
Action: None

LPX-01035: [XQST0035] Repeated schema components
Cause: It is a static error to import two schema components that both define the same name in the same symbol space and in the same scope.
Action: None

LPX-01036: [XQST0036] Importing module should import schema '~s'
Cause: It is a static error to import a module if the importing module's in-scope schema types do not include definitions for the schema type names that appear in the declarations of variables and functions (whether in an argument type or return type) that are present in the imported module and are referenced in the importing module.
Action: None

LPX-01037: [XQST0037]
Cause: Not currently used
Action: None

LPX-01038: [XQST0038] Invalid collation
Cause: It is a static error if a Prolog contains more than one default collation declaration, or the value specified by a default collation declaration is not present in statically known collations.
Action: None

LPX-01039: [XQST0039] Repeated parameter name
Cause: It is a static error for a function declaration to have more than one parameter with the same name.
Action: None

LPX-01040: [XQST0040] Repeated attribute name
Cause: It is a static error if the attributes specified by a direct element constructor do not have distinct expanded QNames.
Action: None

LPX-01041: [XQDY0041] Expression can't be cast to the type xs:NCName
Cause: It is a dynamic error if the value of the name expression in a computed processing instruction constructor cannot be cast to the type xs:NCName.
Action: None

LPX-01042: [XQST0042]
Cause: Not currently used.
Action: None

LPX-01043: [XQST0043]
Cause: Not currently used.
Action: None

LPX-01044: [XQDY0044] Invalid attribute namespace
Cause: It is a dynamic error if the node-name property of the node constructed by a computed attribute constructor is in the namespace http://www.w3.org/2000/xmlns/ (corresponding to namespace prefix xmlns), or is in no namespace and has local name xmlns.

Action: None

LPX-01045: [XQST0045] Invalid function namespace
  Action: None

LPX-01046: [XQST0046] Invalid URILiteral
  Cause: An implementation MAY raise a static error if the value of a URILiteral is of nonzero length and is not in the lexical space of xs:anyURI.
  Action: None

LPX-01047: [XQST0047] Repeated import module target namespace
  Cause: It is a static error if multiple module imports in the same Prolog specify the same target namespace.
  Action: None

LPX-01048: [XQST0048] Namespace should be as the module target namespace
  Cause: It is a static error if a function or variable declared in a library module is not in the target namespace of the library module.
  Action: None

LPX-01049: [XQST0049] Repeated variable declaration
  Cause: It is a static error if two or more variables declared or imported by a module have equal expanded QNames (as defined by the eq operator.)
  Action: None

LPX-01050: [XPDY0050] Invalid dynamic type
  Cause: It is a dynamic error if the dynamic type of the operand of a treat expression does not match the sequence type specified by the treat expression. This error might also be raised by a path expression beginning with "/" or "//" if the context node is not in a tree that is rooted at a document node. This is because a leading "/" or "//" in a path expression is an abbreviation for an initial step that includes the clause treat as document-node().
  Action: None

LPX-01051: [XPST0051] AtomicType not defined
  Cause: It is a static error if a QName that is used as an AtomicType in a SequenceType is not defined in the in-scope schema types as an atomic type.
  Action: None

LPX-01052: [XQDY0052]
  Cause: Not currently used.
  Action: None
LPX-01053: [XQDY0053]
  Cause: Not currently used.
  Action: None

LPX-01054: [XQST0054] The variable depends on itself
  Cause: It is a static error if a variable depends on itself.
  Action: None

LPX-01055: [XQST0055] Repeated copy-namespaces declaration
  Cause: It is a static error if a Prolog contains more than one copy-namespaces declaration.
  Action: None

LPX-01056: [XQST0056]
  Cause: Not currently used.
  Action: None

LPX-01057: [XQST0057] Missing schema import target namespace
  Cause: It is a static error if a schema import binds a namespace prefix but does not specify a target namespace other than a zero-length string.
  Action: None

LPX-01058: [XQST0058] Repeated schema import target namespace
  Cause: It is a static error if multiple schema imports specify the same target namespace.
  Action: None

LPX-01059: [XQST0059] Can't find schema or module with namespace 's'
  Cause: It is a static error if an implementation is unable to process a schema or module import by finding a schema or module with the specified target namespace.
  Action: None

LPX-01060: [XQST0060] Function name should have a namespace
  Cause: It is a static error if the name of a function in a function declaration is not in a namespace (expanded QName has a null namespace URI).
  Action: None

LPX-01061: [XQDY0061] Invalid document node
  Cause: It is a dynamic error if the operand of a validate expression is a document node whose children do not consist of exactly one element node and zero or more comment and processing instruction nodes, in any order.
  Action: None

LPX-01062: [XQDY0062]
  Cause: Not currently used.
  Action: None

LPX-01063: [XQST0063]
  Cause: Not currently used.
  Action: None
LPX-01064: [XQDY0064] Processing instruction name contains 'XML'
   Cause: It is a dynamic error if the value of the name expression in a computed
          processing instruction constructor is equal to "XML" (in any combination of upper
          and lower case).
   Action: None

LPX-01065: [XQST0065] Repeated ordering mode declaration
   Cause: A static error is raised if a Prolog contains more than one ordering mode
          declaration.
   Action: None

LPX-01066: [XQST0066] Repeated default declaration
   Cause: A static error is raised if a Prolog contains more than one default
          element/type namespace declaration, or more than one default function
          namespace declaration.
   Action: None

LPX-01067: [XQST0067] Repeated construction declaration
   Cause: A static error is raised if a Prolog contains more than one construction
          declaration.
   Action: None

LPX-01068: [XQST0068] Repeated boundary-space declaration
   Cause: A static error is raised if a Prolog contains more than one boundary-space
          declaration.
   Action: None

LPX-01069: [XQST0069] Repeated empty order declaration
   Cause: A static error is raised if a Prolog contains more than one empty order
          declaration.
   Action: None

LPX-01070: [XQST0070] Invalid (prefix, URI) combination
   Cause: A static error is raised if a namespace URI is bound to the predefined
          prefix xmlns, or if a namespace URI other than
          http://www.w3.org/XML/1998/namespace is bound to the prefix xml, or if the
          prefix xml is bound to a namespace URI other than
   Action: None

LPX-01071: [XQST0071] Repeated namespace attribute
   Cause: A static error is raised if the namespace declaration attributes of a direct
          element constructor do not have distinct names.
   Action: None

LPX-01072: [XQDY0072] Element content contains invalid hyphens combination
   Cause: It is a dynamic error if the result of the content expression of a computed
          comment constructor contains two adjacent hyphens or ends with a hyphen.
   Action: None

LPX-01073: [XQST0073] Cyclic import sequence
Cause: It is a static error if the graph of module imports contains a cycle (that is, if there exists a sequence of modules $M_1$ ... $M_n$ such that each $M_i$ imports $M_{i+1}$ and $M_n$ imports $M_1$), unless all the modules in the cycle share a common namespace.

Action: None

LPX-01074: [XQDY0074] Invalid element or attribute QName
Cause: It is a dynamic error if the value of the name expression in a computed element or attribute constructor cannot be converted to an expanded QName (for example, because it contains a namespace prefix not found in statically known namespaces.)
Action: None

LPX-01075: [XQST0075] Validate expression not supported
Cause: An implementation that does not support the Validation Feature must raise a static error if it encounters a validate expression.
Action: None

LPX-01076: [XQST0076] Invalid collation
Cause: It is a static error if a collation subclause in an order by clause of a FLWOR expression does not identify a collation that is present in statically known collations.
Action: None

LPX-01077: [XQST0077]
Cause: Not currently used.
Action: None

LPX-01078: [XQST0078]
Cause: Not currently used.
Action: None

LPX-01079: [XQST0079] Invalid extension expression
Cause: It is a static error if an extension expression contains neither a pragma that is recognized by the implementation nor an expression enclosed in curly braces.
Action: None

LPX-01080: [XPST0080] Invalid target type
Cause: It is a static error if the target type of a cast or castable expression is xs:NOTATION or xs:anyAtomicType.
Action: None

LPX-01081: [XPST0081] Invalid prefix
Cause: It is a static error if a QName used in a query contains a namespace prefix that cannot be expanded into a namespace URI by using the statically known namespaces.
Action: None

LPX-01082: [XQST0082]
Cause: Not currently used.
Action: None

LPX-01083: [XQST0083]
Cause: Not currently used.

Action: None

LPX-01084: [XQDY0084] Missing top-level element declaration
Cause: It is a dynamic error if the element validated by a validate statement does not have a top-level element declaration in the in-scope element declarations, if validation mode is strict.
Action: None

LPX-01085: [XQST0085] The namespace URI shouldn't be a zero-length string
Cause: It is a static error if the namespace URI in a namespace declaration attribute is a zero-length string, and the implementation does not support [XML Names 1.1].
Action: None

LPX-01086: [XQTY0086] No-preserve mode conflict
Cause: It is a type error if the typed value of a copied element or attribute node is namespace-sensitive when construction mode is preserve and copy-namespaces mode is no-preserve.
Action: None

LPX-01087: [XQST0087] Invalid encoding
Cause: It is a static error if the encoding specified in a Version Declaration does not conform to the definition of EncName specified in [XML 1.0].
Action: None

LPX-01088: [XQST0088] Target namespace string shouldn't be of zero length
Cause: It is a static error if the literal that specifies the target namespace in a module import or a module declaration is of zero length.
Action: None

LPX-01089: [XQST0089] Repeated variable name
Cause: It is a static error if a variable bound in a for clause of a FLWOR expression, and its associated positional variable, do not have distinct names (expanded QNames).
Action: None

LPX-01090: [XQST0090] Invalid character reference
Cause: It is a static error if a character reference does not identify a valid character in the version of XML that is in use.
Action: None

LPX-01091: [XQDY0091] Invalid xml:id
Cause: An implementation MAY raise a dynamic error if an xml:id error, as defined in [XML ID], is encountered during construction of an attribute named xml:id.
Action: None

LPX-01092: [XQDY0092] Invalid xml:space value
Cause: An implementation MAY raise a dynamic error if a constructed attribute named xml:space has a value other than preserve or default.
Action: None
LPX-01093: [XQST0093] Module depends on itself
   **Cause:** It is a static error to import a module M1 if there exists a sequence of
   modules M1 ... Mi ... M1 such that each module directly depends on the next
   module in the sequence (informally, if M1 depends on itself through some chain of
   module dependencies.)
   **Action:** None

LPX-01094: [FORG0003] fn:zero-or-one called with a sequence containing more than
   one item
   **Cause:** It is a dynamic error if fn:zero-or-one is called with a sequence containing
   more than one item
   **Action:** None

LPX-01095: [FORG0004] fn:one-or-more called with a sequence containing no items
   **Cause:** It is a dynamic error if fn:one-or-more is called with a sequence containing
   no items
   **Action:** None

LPX-01096: [FORG0005] fn:exactly-one called with a sequence containing zero or
   more than one item
   **Cause:** It is a dynamic error if fn:exactly-one is called with a sequence containing
   zero or more than one item
   **Action:** None

LPX-01097: [FORG0006] Invalid argument type
   **Cause:** It is a dynamic error if an XQuery F&O is called with wrong argument
   type.
   **Action:** None

LPX-01098: [FOCA0002] Invalid lexical value
   **Cause:** It is a dynamic error if an XQuery F&O is called with wrong argument
   value.
   **Action:** None

LPX-01099: [FOCA0001] Input value too large for decimal
   **Cause:** It is a dynamic error if the Input value too large for decimal
   **Action:** None

LPX-01100: [FOCA0003] Input value too large for integer
   **Cause:** It is a dynamic error if the Input value too large for integer
   **Action:** None

LPX-01101: External Error '~s' occurs
   **Cause:** An error occurred during the processing of the XQuery expression.
   **Action:** Check the detailed error message for the possible causes.

LPX-01102: [FORG0008] both arguments to fn:dateTime have a specified timezone
   **Cause:** It is an error to pass arguments to fn:dateTime having a specified timezone
   **Action:** None

LPX-01105: [FOAR0001] Division by zero
   **Cause:** It is an error to divide by zero
Action: None

LPX-01106: [FOAR0002] Numeric operation overflow/underflow
Cause: Numeric operations causes overflow/underflow
Action: None

LPX-01107: [FORG0002] invalid argument to fn:resolve-uri()
Cause: Wrong argument to fn:resolve-uri() function
Action: None

LPX-01108: [FORG0009] error in resolving a relative URI against a base URI in fn:resolve-uri()
Cause: Error resolving relative URI in fn:resolve-uri() function
Action: None

LPX-01109: [FOCA0005] NaN supplied as float/double value
Cause: NaN supplied as float/double value
Action: None

LPX-01110: [FOCA0006] String to be cast to decimal has too many digits of precision
Cause: String to be cast to decimal has too many digits of precision
Action: None

LPX-01111: [FOCH0002] Unsupported collation
Cause: Unsupported collation
Action: None

LPX-01112: [FOCH0003] Unsupported normalization form
Cause: Unsupported normalization form
Action: None

LPX-01113: [FOCH0004] Collation does not support collation units
Cause: Collation does not support collation units
Action: None

LPX-01114: [FODC0001] No context document
Cause: No context document
Action: None

LPX-01115: [FODC0002] Error retrieving resource
Cause: Error retrieving resource
Action: None

LPX-01116: [FODC0003]
Cause: Function stability not defined
Action: Function stability not defined

LPX-01117: [FODC0004] Invalid argument to fn:collection
Cause: Invalid argument to fn:collection
Action: None
LPX-01118: [FODC0005] Invalid argument to fn:doc or fn:doc-available
  Cause: Invalid argument to fn:doc or fn:doc-available
  Action: None

LPX-01119: [FODT0001] Overflow/underflow in date/time operation
  Cause: Overflow/underflow in date/time operation
  Action: None

LPX-01120: [FODT0002] Overflow/underflow in duration operation
  Cause: Overflow/underflow in duration operation
  Action: None

LPX-01121: [FODT0003] Invalid timezone value
  Cause: Invalid timezone value
  Action: None

LPX-01122: [FONS0005] Base-uri not defined in the static context
  Cause: Base-uri not defined in the static context
  Action: None

LPX-01123: [FORG0001] Invalid value for cast/constructor
  Cause: Invalid value for cast/constructor
  Action: None

LPX-01124: [FORX0001] Invalid regular expression flags
  Cause: Invalid regular expression flags
  Action: None

LPX-01125: [FORX0002] Invalid regular expression
  Cause: Invalid regular expression
  Action: None

LPX-01126: [FORX0003] Regular expression matches zero-length string
  Cause: Regular expression matches zero-length string
  Action: None

LPX-01127: [FORX0004] Invalid replacement string
  Cause: Invalid replacement string
  Action: None

LPX-01128: [FOTY0012] Argument node does not have a typed value
  Cause: Argument node does not have a typed value
  Action: None

LPX-01129: [XUST0001] Updating expression in a wrong position
  Cause: It is a static error if an updating expression is used in any position other than one of the following:
  1. The topmost expression in the body of a query.
  2. The modify clause of a transform expression.
  3. The return clause of a FLWOR expression.
4. The return clauses of a typeswitch expression in which every return clause contains an updating expression, an empty expression ( ), or a call to the fn:,error function.

5. The then and else clauses of a conditional statement in which both the then and else clauses contain either an updating expression, an empty expression ( ), or a call to the fn:,error function.

6. An operand of a comma expression in which each operand is either an updating expression, an empty expression ( ), or a call to the fn:,error function.

7. The content of a parenthesized expression.

8. The body of a function declaration in which the keyword updating is specified.

Action: None

LPX-01130: [XUST0002] Non-updating expression in a wrong position
Cause: It is a static error if an non-updating expression other than an empty expression ( ) or a call to the fn: error function is used in one of the following positions:
1. The modify clause of a transform expression.
2. The top-level expression in the body of a function declaration in which the keyword updating is specified.
Action: None

LPX-01131: [XUST0003] Repeated revalidation declaration
Cause: It is a static error if a Prolog contains more than one revalidation declaration.
Action: None

LPX-01132: [XUTY0004] Invalid attribute node in the insertion sequence
Cause: It is a type error if the insertion sequence of an insert expression contains an attribute node following a node that is not an attribute node.
Action: None

LPX-01133: [XUTY0005] Invalid target expression for 'insert'
Cause: In an insert expression where into, as first into, or as last into is specified, it is a type error if the target expression returns a non-empty result that does not consist of a single element or document node.
Action: None

LPX-01134: [XUTY0006] Invalid target expression for 'insert'
Cause: In an insert expression where before or after is specified, it is a type error if the target expression returns a non-empty result that does not consist of a single element, text, comment, or processing instruction node.
Action: None

LPX-01135: [XUTY0007] Invalid target expression for 'delete'
Cause: It is a type error if the target expression of a delete expression does not return a sequence of zero or more nodes.
Action: None

LPX-01136: [XUTY0008] Invalid target expression for 'replace'
**Cause:** In a replace expression, it is a type error if the target expression returns a non-empty result that does not consist of a single element, attribute, text, comment, or processing instruction node.

**Action:** None

**LPX-01137: [XUDY0009] Invalid target expression for 'replace'**

**Cause:** In a replace expression where value of is not specified, it is a dynamic error if the node returned by the target expression does not have a parent.

**Action:** None

**LPX-01138: [XUTY0010] Invalid replacement sequence for 'replace'**

**Cause:** In a replace expression where value of is not specified and the target is an element, text, comment, or processing instruction node, it is a type error if the replacement sequence does not consist of zero or more element, text, comment, or processing instruction nodes.

**Action:** None

**LPX-01139: [XUTY0011] Invalid replacement sequence for 'replace'**

**Cause:** In a replace expression where value of is not specified and the target is an attribute node, it is a type error if the replacement sequence does not consist of zero or more attribute nodes.

**Action:** None

**LPX-01140: [XUTY0012] Invalid target expression for 'rename'**

**Cause:** In a rename expression, it is a type error if the target expression returns a non-empty result that does not consist of a single element, attribute, or processing instruction node.

**Action:** None

**LPX-01141: [XUTY0013] Invalid copy expression for transform**

**Cause:** In a transform expression, it is a type error if a source expression in the copy clause does not return a single node.

**Action:** None

**LPX-01142: [XUDY0014] Modified node was not created by the copy clause**

**Cause:** In a transform expression, it is a dynamic error if the modify clause modifies any node that was not created by the copy clause.

**Action:** None

**LPX-01143: [XUDY0015] Duplicate 'rename' for the same target node**

**Cause:** It is a dynamic error if any node is the target of more than one rename expression within the same query.

**Action:** None

**LPX-01144: [XUDY0016] Duplicate 'replace' for the same target node**

**Cause:** It is a dynamic error if any node is the target of more than one replace expression (without value of being specified) within the same query.

**Action:** None

**LPX-01145: [XUDY0017] Duplicate 'replace' for the same target node**

**Cause:** It is a dynamic error if any node is the target of more than one replace value of expression within the same query.
Action: None

LPX-01146: [XUDY0018] External not updating function returns an updated value
  Cause: It is a dynamic error if a function that was declared to be external but not updating returns a non-empty pending update list.
  Action: None

LPX-01147: [XUDY0019] External updating function returns an invalid value
  Cause: It is a dynamic error if a function that was declared to be both external and updating returns a non-empty data model instance.
  Action: None

LPX-01148: [XUDY0020] Deleted node has no parent
  Cause: An implementation may (but is not required to) raise a dynamic error if a node is deleted that had no parent before execution of the query began.
  Action: None

LPX-01149: [XUDY0021] The result XDM instance violates XDM constraints
  Cause: It is a dynamic error if the XDM instance that would result from applying all the updates in a query violates any constraint specified in [XQuery/XPath Data Model (XDM)]. In this case, none of the updates in the query are made effective.
  Action: None

LPX-01150: [XUTY0022] Invalid attribute insertion into a document node
  Cause: It is a type error if an insert expression specifies the insertion of an attribute node into a document node.
  Action: None

LPX-01151: [XUDY0023] Updating expression introduces a namespace conflict
  Cause: It is a dynamic error if an insert, replace, or rename expression affects an element node by introducing a new namespace binding that conflicts with one of its existing namespace bindings.
  Action: None

LPX-01152: [XUDY0024] Updating expression introduces a namespace conflict
  Cause: It is a dynamic error if the effect of a set of updating expressions is to introduce conflicting namespace bindings into an element node.
  Action: None

LPX-01153: [XUDY0025] Invalid QName for processing instruction rename
  Cause: It is a dynamic error if the target of a rename expression is a processing instruction node, and the new name expression returns a QName with a non-empty namespace prefix.
  Action: None

LPX-01154: [XUST0026] Revalidation mode '~s' is not supported
  Cause: It is a static error if a revalidation declaration in a Prolog specifies a revalidation mode that is not supported by the current implementation.
  Action: None

LPX-01155: [XUDY0027] Invalid target expression
**Cause:** It is a dynamic error if the target expression of an insert, replace, or rename expression evaluates to an empty sequence.

**Action:** None

**LPX-01156: [XUST0028] Updating function should not have a return type**

**Cause:** It is a static error if a function declaration specifies both updating and a return type.

**Action:** None

**LPX-01157: [XUDY0029] Insert expression target node doesn't have a parent**

**Cause:** In an insert expression where before or after is specified, it is a dynamic error if node returned by the target expression does not have a parent.

**Action:** None

**LPX-01158: [XUDY0030] Invalid insertion of an attribute node**

**Cause:** It is a dynamic error if an insert expression specifies the insertion of an attribute node before or after a child of a document node.

**Action:** None

**LPX-01159: [FOUP0001] Invalid 'fn:put' first operand**

**Cause:** It is a dynamic error if the first operand of fn:put is not a node of a supported kind.

**Action:** None

**LPX-01160: [FOUP0002] Invalid 'fn:put' second operand**

**Cause:** It is a dynamic error if the second operand of fn:put is not a valid lexical representation of the xs:anyURI type.

**Action:** None
LSX-00001: NULL pointer
  Cause: A NULL pointer was detected as an internal error condition.
  Action: This is a programming error by the caller of the Schema processor.
  Contact someone who can fix the problem.

LSX-00002: root element is not <schema>
  Cause: The top-level element of an XML Schema must be <schema>.
  Action: Correct the Schema; consult the Schema specification.

LSX-00003: invalid attribute "~1S" for element "~2S"
  Cause: The named Schema element had an invalid attribute.
  Action: Correct the Schema; consult the Schema specification.

LSX-00004: unexpected XML node type
  Cause: Schema contains an XML node other than element, text (or CDATA),
  Action: Other node types are not permitted; remove them.

LSX-00008: feature "~s" is not implemented
  Cause: An attempt was made to use a feature that is not yet implemented.
  Action: Make an enhancement request for the feature.

LSX-00009: data missing for type "~S"
  Cause: Data is missing for an element or attribute of a simple type.
  Action: Add data in the element or attribute.

LSX-0010: extra element(s) at end of "~S"
  Cause: Extra elements exist at the end of schema component declarations.
  Action: Remove the extra elements.

LSX-0011: internal error: ~s
  Cause: Implementation error.
  Action: File a bug.

LSX-0013: element "~S" not from Schema of Schemas
  Cause: Bogus element exists in the schema file. Its name is not from Schema of Schemas.
  Action: Remove the bogus element.

LSX-0014: empty instance document
Cause: Instance document to be Schema validated was empty (no top-level element).
Action: Provide a complete XML instance document.

LSX-00015: failed to parse document
Cause: Failed to parse the schema document using the given URI.
Action: Provide the correct URI and make sure that the schema document is valid.

LSX-00016: schema and instance document have incompatible character sets
Cause: Parsed schema components were in a simple-type character set while the parsed instance document data was not. A simple-type character set is single-byte, not shift sensitive, and has no linguistic specials in use.
Action: Reinitialize the schema global context with appropriate parser context settings, i.e. pass a parser context with its output encoding set to be a multibyte or Unicode character set.

LSX-00018: invalid schema context
Cause: An invalid schema context was provided to the processor. Multiple schema documents were loaded and assembled into the schema context. At least one of them is not fully valid with respect to a schema corresponding to the Schema for Schemas.
Action: Check the errors reported when schema documents were loaded, mapped, or validated. Correct errors found in the identified schema documents and reload them into a new schema context. Then provide the new schema context to the processor.

LSX-00020: unknown type "~S"
Cause: A specified type was unknown (not defined in any loaded Schemas).
Action: Make sure the type was defined and that the type usage referenced the correct Schema.

LSX-00021: undefined element "~S"
Cause: Element is undefined in the specified namespace.
Action: If the element name is misspelled, correct the spelling.

LSX-00022: unknown namespace prefix "~S"
Cause: Prefix in a QName is undefined in the current scope.
Action: Correct the prefix name if it's misspelled.

LSX-00023: unknown namespace URI "~S"
Cause: Namespace URI is unknown to the schema processor.
Action: Correct the namespace URI if it's misspelled.

LSX-00024: unknown attribute group "~S"
Cause: The name of attribute group is unknown to the schema processor in the current scope.
Action: Correct the name of attribute group if it's misspelled.

LSX-00025: unknown group "~S"
Cause: The name of group is unknown to the schema processor in the current scope.
Action: Correct the name of group if it's misspelled.
LSX-00026: unknown attribute "~S"
   Cause: The name of attribute is unknown to the schema processor in the current scope.
   Action: Correct the name of attribute if it’s misspelled.

LSX-00027: property "~s" unknown
   Cause: The named validation property was unknown.
   Action: Refer to the documentation for the complete list of validation properties.

LSX-00102: duplicate element "~S"
   Cause: Element declaration is not unique within its scope.
   Action: Rename the element.

LSX-00103: duplicate group "~S"
   Cause: Group declaration is not unique within its scope.
   Action: Rename the group.

LSX-00104: duplicate type "~S"
   Cause: Type definition is not unique within its scope.
   Action: Rename the type.

LSX-00105: duplicate attribute group "~S"
   Cause: Attribute group declaration is not unique within its scope.
   Action: Rename the attribute group.

LSX-00106: duplicate attribute "~S"
   Cause: Attribute declaration is not unique within its scope.
   Action: Rename the attribute.

LSX-00110: facet "~S" should have single value attribute
   Cause: A facet declaration did not have a value attribute.
   Action: Each facet declaration must contain one and only one value attribute.

LSX-00111: type "~S" contains invalid facets
   Cause: A specified facet was invalid for a type. Each datatype has a different set of facets which may apply.
   Action: Use only applicable facets for the type.

LSX-00112: facet "~S" duplicated
   Cause: A facet (other than "enumeration") was specified more than once.
   Action: Only the enumeration facet may be used more than once for a type.

LSX-00113: facet "~1S" has invalid value "~2S"
   Cause: Facet value contained illegal characters or its value was out of range.
   Action: Remove illegal characters.

LSX-00114: facet "~S" not in schema schema
   Cause: Facets are not defined in the XMLSchema namespace.
   Action: Remove illegal facet declarations.

LSX-00116: mutually exclusive facets are not allowed
Cause: Mutual exclusiveness violations were found for facets. For example, both "length" and either "minLength" or "maxLength" are not allowed to be facets.
Action: Remove the facets that are at fault.

LSX-00117: "minLength" should not be greater than "maxLength"
Cause: The value of "minLength" must be less than or equal to the value of "maxLength".
Action: Correct either "minLength" or "maxLength".

LSX-00118: fixed facet value cannot be changed
Cause: The value of a fixed facet in the base type definition should remain the same.
Action: Remove the fixed facet specification in the parent's type for the erroneous facet component.

LSX-00119: value is not valid restriction of parent's minLength
Cause: There was an error in that minLength was among the members of {facets} of {base type definition} and {value} was less than the {value} of the parent minLength.
Action: Increase the {value} of minLength.

LSX-00120: value is not valid restriction of parent's maxLength
Cause: There was an error in that maxLength was among the members of {facets} of {base type definition} and {value} was greater than the {value} of the parent maxLength.
Action: Increase the {value} of maxLength.

LSX-00121: value is not valid restriction of parent's length
Cause: There was an error in that length was among the members of {facets} of {base type definition} and {value} was not equal to the {value} of the parent length.
Action: Make {value} the same as parent's.

LSX-00122: value is not valid restriction of parent's whiteSpace
Cause: There was an error in that whiteSpace was among the members of {facets} of {base type definition} and at least one of the following conditions was true: 1 {value} is replace or preserve and {value} of the parent whiteSpace is collapse 2 {value} is preserve and the {value} of the parent whiteSpace is replace
Action: Change the {value} of whiteSpace.

LSX-00123: base type is required
Cause: Missing base type declaration in the type definition.
Action: Define a base type.

LSX-00124: "list" element is improperly defined
Cause: A "list" element either must have its "itemType" attribute set or have one of its children be a "simpleType" element, but both conditions cannot exist.
Action: Remove the erroneous condition.

LSX-00125: "restriction" element is improperly defined
Cause: A "restriction" element either must have its "base" attribute set or have one of its children be a "simpleType" element, but both conditions cannot exist.
Action: Remove the erroneous condition.
LSX-00126: facet "~1S" has invalid value "~u"
  Cause: Facet value contained illegal characters or its value was out of range.
  Action: Remove illegal characters.

LSX-00130: attribute "processContents" has invalid value "~S"
  Cause: Attribute "processContents" in the "any" element or "anyAttribute" declaration has an invalid value.
  Action: Specify one of the following values: lax, skip, or strict.

LSX-00132: attribute "~1S" has invalid occurrences value "~2S"
  Cause: A minOccurs or maxOccurs attribute had an invalid value (not a integer or less than zero).
  Action: Use a legal "occurs" value.

LSX-00133: attribute "use" has invalid value "~S"
  Cause: A "use" attribute had an invalid value. Choices for "use" are "default", "fixed", "optional", "prohibited", or "required".
  Action: Change the attribute to one of the above values.

LSX-00134: attribute "~1S" has invalid qualification "~2S"
  Cause: An attribute that specifies qualification (form, attributeFormDefault, elementFormDefault) was invalid; it must be one of "qualified" or "unqualified".
  Action: Change the attribute to one of the above values.

LSX-00135: invalid min/max Occurs for <all> element, must be 0/1
  Cause: "minOccurs" has a value other than 0/1 or "maxOccurs" has a value other than 1.
  Action: Specify 0/1 for "minOccurs" or "maxOccurs".

LSX-00136: "maxOccurs" is less than "minOccurs"
  Cause: The value of the "maxOccurs" specification is less than the value of the "minOccurs" specification.
  Action: Correct "minOccurs" or "maxOccurs".

LSX-00141: ID type may only be used in attributes
  Cause: For backward compatibility with DTD, ID type may only be used in attributes.
  Action: Remove the ID type.

LSX-00142: invalid sub-element "~1S" for element "~2S"
  Cause: There was an invalid sub-element in the content of either the attribute or the element declaration. This was because the sub-element was either at the wrong position or out of context.
  Action: Remove the sub-element or move it to the correct position.

LSX-00143: element "~S" must have type or ref
  Cause: A Schema element was declared but was neither type or reference.
  Action: One of type or reference must be specified.

LSX-00144: attribute "~1S" invalid derivation-restriction value "~2S"
  Cause: An attribute which specifies a derivation-restriction setting (block, content, final) had an invalid value. Choices are "#all", "extension", or "restriction".
Action: Change the attribute to one of the above values.

LSX-00145: attribute "~1S" invalid derived value "~2S"
Cause: A derivedBy attribute had an invalid value. Choices are "extension" or "restriction".
Action: Change the attribute to one of the above values.

LSX-00146: element or attribute is improperly defined
Cause: An element or attribute definition must have either its "type" attribute set or must have one of its children be a "simpleType" or "complexType" element but both conditions cannot exist.
Action: Remove the erroneous condition.

LSX-00147: "~1S" cannot contain "~2S"
Cause: An invalid schema component exists in the current declaration.
Action: Remove the schema component.

LSX-00148: annotation must come first in "~S"
Cause: "annotation" element must be the first in the content.
Action: Make "annotation" the first element.

LSX-00149: duplicated ID specified in "~S"
Cause: An attempt was made to specify two distinct members of {attribute uses} with {attribute declaration}s, both of whose {type definition}s are from ID or are derived from ID.
Action: Declare only one member of the {attribute uses} whose {type definition} is from ID or will be derived from ID.

LSX-00150: attributeGroup reference shouldn't have children
Cause: A reference-to-attributeGroup element has children. It is suppose to be empty except for annotations.
Action: Remove the children.

LSX-00151: invalid combination of attributes "ref" and "name"
Cause: If the item’s parent is not <schema>, then either the "ref" or the "name" attribute must be present, but not both. Top-level elements or attributes must have a name.
Action: Specify either the "ref" or "name" attribute.

LSX-00152: only "minOccurs", "maxOccurs", or "id" is allowed
Cause: If the item’s parent is not <schema> and "ref" is present, then "complexType", "simpleType", "key", "keyref", "unique", "nillable", "default", "fixed", "form", "block", and "type" must be absent.
Action: Remove the prohibited attribute.

LSX-00153: invalid combination of default and fixed attributes
Cause: It is an error for a declaration to contain both fixed and default attributes.
Action: Remove either the default or the fixed attributes.

LSX-00154: attribute "use" must have its value set to "optional"
Cause: If "default" and "use" are both present, use must have its value set to "optional".
**Action**: Remove the default attribute or change the value of the "use" attribute.

**LSX-00155: invalid use of attribute "ref"**

**Cause**: If the item's parent is not <schema> and the attribute "ref" is present, then the element "simpleType" and the attributes "form" and "type" must be absent.

**Action**: Remove the prohibited items.

**LSX-00156: type is final and no derivations are allowed**

**Cause**: Derivation from a type that is declared to be final occurred.

**Action**: Remove the final declaration from the base type.

**LSX-00157: "-S" is abstract and cannot be used in an instance document**

**Cause**: The element declaration or the type definition was abstract.

**Action**: When an element is declared to be abstract, a member of that element's substitution group must appear in the instance document. When an element's corresponding type definition is declared as abstract, all instances of that element must use xsi:type to indicate a derived type that is not abstract.

**LSX-00158: base type of "-S" must be simple type or primitive datatype**

**Cause**: The derivation constraint was violated.

**Action**: Use complexType instead of simpleType.

**LSX-00159: list content of multiple simple types is not allowed**

**Cause**: Two or more simple types were specified within the list content.

**Action**: Specify only one simple type.

**LSX-00160: invalid substitution group affiliation between "-S" and "-S"**

**Cause**: There was an error in that {substitution group exclusions} prevented substitution group affiliation by type restriction or type extension.

**Action**: Remove the offending deriving method from the {substitution group exclusions} list.

**LSX-00161: disallowed type substitution between "-S" and "-S"**

**Cause**: There was a substituted type whose deriving method falls in the union of the {disallowed substitutions} and the {type definition}'s {prohibited substitutions}.

**Action**: Remove the offending deriving method from the element's {disallowed substitutions} list or the {type definition}'s {prohibited substitutions} list.

**LSX-00162: string "-S" is an invalid default for the complex type**

**Cause**: If the {content type} is a simple type definition, then the string must be valid with regard to the simple type definition as defined by String Valid (3.14.4). If the {content type} is mixed, then the {content type}'s particle must be emptiable as defined by Particle Emptiable (3.9.6). However, one of these conditions was not met, resulting in this error.

**Action**: Make the default string a valid default with regard to the complex type definition.

**LSX-00163: duplicated content specification in "-S"**

**Cause**: There was a duplicate content specification in the children of complexType.

**Action**: Remove the duplicate content specification.
LSX-00164: no content specified in "~S"

Cause: In a simpleContent specification, either "restriction" or "extension" was not specified as a child.

Action: Add either a "restriction" or an "extension" element information item.

LSX-00165: content type of "~S" must be simple type

Cause: The content type of the type definition was not a simple type definition.

Action: Use complexContent instead of simpleContent.

LSX-00166: both content types must be mixed or both must be element-only

Cause: If the content types of the derived type and base type are not the same simple type definition and the content type of the base type is not empty, then both content types must be mixed or both must be element-only. This was not the case, resulting in this error.

Action: Add attribute mixed="true" or remove it.

LSX-00167: defining form of "~S" must occur at the top level

Cause: The defining form did not occur at the top level of a schema.

Action: Move attributeGroup or group definition to the top level of the schema.

LSX-00168: referring form of "~S" must NOT occur at the top level

Cause: The referring form did not occur within a complex type definition or an attribute group definition.

Action: Move the attributeGroup definition to within a complex type definition or an attribute group definition. Or, move the group definition to within a complex type, restriction, extension, choice, or sequence.

LSX-00169: circular group reference is disallowed outside <redefine>

Cause: There was a circular group reference.

Action: One of the group references needs to be changed to a group definition.

LSX-00170: union must have memberTypes attribute or some simpleType children

Cause: There was no member type definition for the union declaration.

Action: Add memberTypes attribute or simpleType children.

LSX-00171: missing required sub-element "~S"

Cause: The sub-element specified in the error message was required.

Action: Add the required sub-element.

LSX-00172: "~S" is not a valid restriction of "~S"

Cause: The schema component constraint, Derivation Valid (Restriction, Complex) or Particle Valid (Restriction), was violated.

Action: Modify the base type (particle) or the restricted type (particle) definition.

LSX-00173: ~S of ~S type is not a valid restriction of ~S of ~S type

Cause: The schema component constraint, Particle Restriction OK (Elt:Elt -- NameAndTypeOK), was violated.

Action: Modify either or both element declaration particles.

LSX-00174: "~S" is not a valid derivation of "~S"

Cause: The schema component constraint, Derivation Valid (Restriction, simple), (Restriction, complex) or (Extension), was violated.
Action: Modify the base type or the derived type definition.

LSX-00175: a complex base within "simpleContent" must have simple content
Cause: A complex base within "simpleContent" was not restricted to contain only simple content.
Action: Modify the base type or the derived type definition.

LSX-00176: circular reference detected in schema component named "~S"
Cause: An attempt was made to use a circular reference. This is not allowed. For example, it is not possible to return to an element declaration by repeatedly following the {substitution group affiliation} property. Or, within the {particles} of a group there must not be at any depth a particle whose {term} is the group itself.
Action: Modify one of the schema components in the loop.

LSX-00200: element "~S" not empty
Cause: Content of the element must be empty.
Action: Remove any schema components in the content.

LSX-00201: contents of "~S" should be elements only
Cause: Node with type other than "element", "processing instruction", or "comment" exists in the content of the violating element.
Action: Remove the offending nodes.

LSX-00202: contents of "~S" should be text only
Cause: Node with type other than "text", "processing instruction", or "comment" exists in the content of the violating element.
Action: Remove the offending nodes.

LSX-00204: extra data at end of complex element
Cause: Extra nodes exist at the end of an element with a complex type definition.
Action: Remove the offending nodes or check the definition of the complex type.

LSX-00205: element "~1S" value "~2S" is wrong (must be "~3S")
Cause: The element had a value other than its fixed value.
Action: Use the fixed value as its value.

LSX-00206: substitution for element "~S" is disallowed
Cause: An attempt was made to substitute an element that violated a constraint.
Action: Change to a valid new element that can be substituted for the headElement.

LSX-00210: value "~1S" out of range for type "~2S"
Cause: Value is out of range for the data with a specific type.
Action: Fix the value.

LSX-00211: value "~1S" whose fractional digits exceeds ~2d
Cause: Too many fractional digits after the decimal point.
Action: Remove the extra fractional digits.

LSX-00212: value "~1s" whose total digits exceeds ~2d
Cause: Too many digits in the decimal data.
Action: Remove the extra digits.
LSX-00213: only ~1d occurrences of particle "~2S", minimum is ~3d  
   **Cause:** Too few occurrences of particles in the node.  
   **Action:** Specify more particles.

LSX-00214: too many occurrences of particle "~1S", maximum is ~2d  
   **Cause:** Too many occurrences of particles in the node.  
   **Action:** Remove extra ones.

LSX-00215: value "~1S" whose total digits exceeds ~2d  
   **Cause:** There were too many digits in the decimal data.  
   **Action:** Remove the extra digits.

LSX-00220: "~1S" is wrong length, should be ~2d  
   **Cause:** Data of simple type has invalid length.  
   **Action:** Fix the length of the data.

LSX-00221: "~1S" is too short (minimum length is ~2d)  
   **Cause:** The length of the data is too short.  
   **Action:** Prepend extra characters (such as zeros or blank characters) to make the data longer.

LSX-00222: "~1S" is too long (maximum length is ~2d)  
   **Cause:** The length of the data is too long.  
   **Action:** Remove extra characters from the data.

LSX-00229: item type is not a valid type for a list simple type  
   **Cause:** The specified item type must not itself be a list type, and must be one of the types identified in [XML Schemas: Datatypes] as a suitable item type for a list simple type.  
   **Action:** Change the list schema component’s declaration.

LSX-00230: invalid integer "~S"  
   **Cause:** Illegal characters exist in the "integer" or its derivative type declarations.  
   **Action:** Remove illegal characters.

LSX-00231: invalid unsigned integer "~S"  
   **Cause:** Illegal characters exist in the "unsignedLong", "unsignedInt", "unsignedShort", or "unsignedByte" declarations.  
   **Action:** Remove illegal characters.

LSX-00232: invalid unsigned long "~S"  
   **Cause:** Illegal characters exist in the "unsignedLong" declaration.  
   **Action:** Remove illegal characters.

LSX-00233: invalid long "~S"  
   **Cause:** Illegal characters exist in the "long" declaration.  
   **Action:** Remove illegal characters.

LSX-00234: invalid decimal "~S"  
   **Cause:** Illegal characters exist in the "decimal" declaration.  
   **Action:** Remove illegal characters.
LSX-00235: invalid URI "~S"
   Cause: Invalid URI specification for data of "anyURI" type.
   Action: Remove illegal characters.

LSX-00237: invalid Name "~S"
   Cause: Invalid XML name.
   Action: Remove illegal characters.

LSX-00238: invalid Nmtoken "~S"
   Cause: Invalid Nmtoken.
   Action: Remove illegal characters.

LSX-00240: bad float "~S"
   Cause: Invalid value for "float" type data.
   Action: Remove illegal characters.

LSX-00241: bad double "~S"
   Cause: Invalid value for "double" type data.
   Action: Remove illegal characters.

LSX-00242: bad Boolean "~S"
   Cause: Boolean data must have a value from the following set: "1", "0", "true", or "false".
   Action: Specify one of "1", "0", "true", or "false".

LSX-00243: invalid date "~S"
   Cause: Invalid value for data of "date" type.
   Action: Remove illegal characters.

LSX-00244: invalid NCName "~S"
   Cause: Invalid value for data of "NCName" type.
   Action: Remove illegal characters.

LSX-00245: invalid ID "~S"
   Cause: Data specified is not of "NCName" type.
   Action: Remove illegal characters.

LSX-00246: invalid QName "~S"
   Cause: Invalid value for data of "QName" type.
   Action: Remove illegal characters.

LSX-00247: invalid language specification "~S"
   Cause: Invalid value for data of "language" type.
   Action: Remove illegal characters.

LSX-00248: invalid duration "~S"
   Cause: Invalid value for data of "duration" type.
   Action: Remove illegal characters.

LSX-00249: invalid date or time "~S"
Cause: Invalid value for data of "dateTime", "time", "gYearMonth", "gYear", "gMonthDay", "gDay", or "gMonth" type.
Action: Remove illegal characters.

LSX-00250: invalid normalizedString "~S"
Cause: Invalid value for data of "normalizedString" type.
Action: Remove illegal characters.

LSX-00251: invalid token "~S"
Cause: Invalid value for data of "token" type.
Action: Remove illegal characters.

LSX-00252: invalid union "~S"
Cause: Data of simple type is not one of the union type.
Action: Use one of the union type as its type.

LSX-00253: branch is empty
Cause: The pattern specification "branch1 | branch2" has either "branch1" or "branch2" missing.
Action: Remove '|' or add either "branch1" or "branch2".

LSX-00255: mismatched parentheses
Cause: ")" found without a matching "(" in a pattern specification.
Action: Add "(" to the pattern specification.

LSX-00256: empty character class expression
Cause: "[]" found when processing a character class expression.
Action: Specify the character group within the brackets.

LSX-00257: atom specification is missing
Cause: A quantifier was found without an atom specification.
Action: Add an atom specification in front of the quantifier.

LSX-00258: invalid escape character
Cause: "x" in \x" is not a valid escape character.
Action: Change "x" to a valid escape character.

LSX-00259: invalid character found in the pattern
Cause: An unexpected character was found in the pattern.
Action: Fix the pattern.

LSX-00260: unexpected end of pattern
Cause: Something is missing at the end of the pattern.
Action: Fix the pattern.

LSX-00261: invalid character property
Cause: An error occurred when processing the character property. For example, "\" is missing after "p" or "P".
Action: Fix the character property.

LSX-00262: attribute "~1S" cannot have complex type "~2S"
**Cause:** The type of the attribute is "complex".
**Action:** Specify the type of the attribute to be "simple".

**LSX-00263: undefined attribute "~S"**
**Cause:** Violating attribute is not defined in the current scope.
**Action:** Correct the attribute name if it's misspelled.

**LSX-00264: attribute "~S" is prohibited (may not occur)**
**Cause:** Global declarations cannot contain the attributes "ref", "minOccurs", or "maxOccurs", or the use of this attribute is explicitly declared as "prohibited" by the schema.
**Action:** Remove the attribute.

**LSX-00265: attribute "~1S" value "~2S" is wrong (must be "~3S")**
**Cause:** Attribute has a value other than its fixed value.
**Action:** Use fixed value as its value.

**LSX-00266: missing required attribute "~S"**
**Cause:** A required attribute is missing.
**Action:** Add the required attribute.

**LSX-00270: hex-encoded binary has odd length**
**Cause:** Data of "hexBinary" type has odd number of digits.
**Action:** Add missing digits as appropriate.

**LSX-00271: invalid character "~c" in hex-encoded binary**
**Cause:** Data of "hexBinary" type has invalid characters.
**Action:** Remove illegal characters.

**LSX-00272: BASE64-encoded binary grouped improperly (not 4's)**
**Cause:** Number of digits is not a multiple of four.
**Action:** Add missing digits as appropriate.

**LSX-00273: invalid character "~c" in base64-encoded binary**
**Cause:** Data of "base64Binary" type has invalid characters.
**Action:** Remove illegal characters.

**LSX-00274: invalid padding in base64-encoded binary**
**Cause:** Invalid padding characters at the end of data.
**Action:** Use "=" as the padding characters.

**LSX-00280: duplicate ID "~S"**
**Cause:** ID name is not unique within the schema scope.
**Action:** Rename the ID.

**LSX-00281: referenced ID "~S" is not defined**
**Cause:** Referenced ID name is not defined within the schema scope.
**Action:** Define the ID.

**LSX-00282: duplicate notation name "~S"**
**Cause:** The name of the "notation" element is not unique within the schema scope.
Action: Rename the element.

LSX-00283: referenced notation "~S" is not defined
Cause: Referenced notation name is not defined within the schema scope.
Action: Define the element.

LSX-00284: duplicate constraint name "~S"
Cause: Each constraint declaration has a name which exists in a single symbol space for constraints.
Action: Choose a different name.

LSX-00285: referenced key "~S" is not defined
Cause: Referenced key name is not defined within the schema scope.
Action: Define the key.

LSX-00286: duplicate key "~S" for ["~S"]"~S"
Cause: The key value was not unique within its scope.
Action: Change the key value.

LSX-00287: duplicate key "~S"
Cause: The key value was not unique within its scope.
Action: Change the key value.

LSX-00290: invalid enumeration choice "~S"
Cause: The value of the data is not one of the enumeration choice.
Action: Select one of the enumeration choice as its value.

LSX-00291: value "~1S" is less than minimum "~2S" (~3S)
Cause: Data has a value less than required minimum.
Action: Increase the value.

LSX-00292: value "~1S" is greater than maximum "~2S" (~3S)
Cause: Data has a value greater than maximum.
Action: Decrease the value.

LSX-00293: missing one or more fields from element "~S"
Cause: The required fields were missing from the content of the element.
Action: Add the fields.

LSX-00294: field "~S" produced multiple hits
Cause: XPath expressions relative to each element selected by a [selector]are specified by [fields]. These XPath expressions must identify a single node (element or attribute) whose content or value was used in the constraint. This content or value must be of a simple type.
Action: Remove duplicate elements or attributes.

LSX-00295: field element "~S" is not a simple type
Cause: The field element evaluated to a node-set with a member that was not a simple type.
Action: Change the field element’s type.

LSX-00300: group must have name or ref but not both
Cause: "ref" or "name" attributes are either both missing or have both been specified.
Action: Specify either "ref", "name", but not both.

LSX-00310: local element or attribute should be namespace qualified
Cause: Element or attribute name is not namespace qualified.
Action: Add prefix or default namespace URI declaration.

LSX-00311: local element or attribute shouldn't be namespace qualified
Cause: Element or attribute name is namespace qualified.
Action: Remove prefix or default namespace URI declaration from itself or ancestors.

LSX-00320: missing required elements in <all>
Cause: Some required elements in "all" particle are missing.
Action: Add the missing elements.

LSX-00330: missing range start character
Cause: Missing range start character in a character range specification.
Action: Add the missing characters.

LSX-00331: missing comma
Cause: A comma is missing in a range specification.
Action: Add the missing characters.

LSX-00332: bad decimal digits in a quantifier specification
Cause: Quatifier has invalid characters.
Action: Remove illegal characters.

LSX-00333: literal "~S" is not valid with respect to the pattern
Cause: Literal is not valid with respect to the pattern.
Action: Choose correct characters in the literal.

LSX-00340: improper namespace value for the imported element
Cause: If the namespace attribute is present, then its actual value must not match the actual value of the enclosing schema's targetNamespace attribute. If the namespace attribute is not present, then the enclosing schema must have a targetNamespace attribute.
Action: Match namespace value.

LSX-00341: ENTITY or ENTITIES type may only be used in attributes
Cause: For compatibility, ENTITY or ENTITIES should be used only on attributes.
Action: Remove the ENTITY or ENTITIES.

LSX-00342: value of attribute "base" must be a complex type definition
Cause: If the "complexContent" alternative is chosen, then the type definition resolved to by the actual value of the attribute "base" must be a complex type definition.
Action: Choose a complex type definition as its base type.

LSX-00343: "~S" is not nillable
Cause: Attribute nillable was set to be "false" in element's declaration.
**Action**: Remove attribute xsi:nil from the instance document.

**LSX-00344: namespace values "~1S" and "~2S" differ**

**Cause**: The targetNamespace specified in the schema document differed from either: a) the value of the enclosing schema's namespace attribute, or b) the value of the namespace attribute identified in the import element information item.

**Action**: Match the namespace value to the enclosing schema's targetNamespace attribute or the actual value of the namespace attribute identified in the import element information item.

**LSX-00345: Element (~1S) from "~2S" namespace is unexpected. Expecting element from "~3S" namespace**

**Cause**: The namespace of the Xml Node in the instance document does not match with the expected element definition namespace

**Action**: None
PGA-20900: unable to obtain number bytes of storage for string
   Cause: Memory shortage in the gateway server process.
   Action: Ensure your system has enough available memory to support the number of concurrent users you are running.

PGA-20901: internal gateway error: string
   Cause: Internal error in the gateway server process.
   Action: Reproduce the error with debugging enabled to produce a log file. Supported customers should contact Oracle Worldwide Support for assistance.

PGA-20905: invalid conversation id: no active conversations were found
   Cause: There were no APPC conversations active for the user.
   Action: Check that the application is not calling the PL/SQL TIP routines out of sequence.

PGA-20906: invalid conversation id: no matching conversation was found
   Cause: The conversation id received from the caller is not a valid active conversation id.
   Action: Check that the application is not calling the PL/SQL TIP routines out of sequence.

PGA-20907: preceding error occurred during gateway string processing
   Cause: An error occurred processing the Oracle function <func>. This message is preceded by additional messages providing more detailed information about the error.
   Action: Refer to the messages preceding this one to determine the course of action to take.

PGA-20910: communication error: CPI-C string failed, rc = number, errno = number
   Cause: An unexpected communication error occurred while executing the specified CPI-C function <func>. The CPI-C function return code <rc> and system error number <errno> are provided in the message text. The CPI-C function return codes and system error numbers are described in the vendor documentation.
   Action: Determine the cause of the communications error, correct it, and rerun the transaction.

PGA-20911: update transaction is already active with TP string at LU string
Cause: Transaction <tpname> has already been started at LU <luname> by a
PGA INIT call with synlevel set to 1 or 2. Only one transaction at synlevel 1 or 2
is allowed at any given time.

Action: The new transaction is not started. Change your application to start the
second update transaction after the first one has completed, or to use a different
gateway database link for the second update transaction.

PGA-20912: send and receive buffer lengths cannot both be zero
Cause: Both the send and receive buffer lengths passed to PGAXFER were zero.
This is invalid.

Action: Check that the PGDL and COBOL record descriptions used to define the
transaction to PGAU are in sync with the transaction program and that the
PL/SQL TIP was generated by PGAU using the correct definitions. If
modifications have been made to the generated PL/SQL code, check that they are
correct.

PGA-20914: send buffer length of number exceeds actual send buffer size of number
Cause: The send buffer length <len> passed to PGAXFER was larger than the
actual size <size> of the send buffer passed to PGAXFER.

Action: Check that the PGDL and COBOL record descriptions used to define the
transaction to PGAU are in sync with the transaction program and that the
PL/SQL TIP was generated by PGAU using the correct definitions. If
modifications have been made to the generated PL/SQL code, check that they are
correct.

PGA-20915: receive buffer length of number exceeds the maximum of number
Cause: The receive buffer length <len> passed to PGAXFER was larger than the
maximum allowed length <max>.

Action: Check that the PGDL and COBOL record descriptions used to define the
transaction to PGAU are in sync with the transaction program and that the
PL/SQL TIP was generated by PGAU using the correct definitions. If
modifications have been made to the generated PL/SQL code, check that they are
correct.

PGA-20916: send count is number but only number send lengths were specified
Cause: The first value <count> in the send lengths array passed to PGAXFER
specified more elements than the send lengths array contained. Only <num>
elements were found in the array.

Action: Check that the PGDL and COBOL record descriptions used to define the
transaction to PGAU are in sync with the transaction program and that the
PL/SQL TIP was generated by PGAU using the correct definitions. If
modifications have been made to the generated PL/SQL code, check that they are
correct.

PGA-20917: receive count is number but only number receive lengths were specified
Cause: The first value <count> in the receive lengths array passed to PGAXFER
specified more elements than the receive lengths array contained. Only <num>
elements were found in the array.

Action: Check that the PGDL and COBOL record descriptions used to define the
transaction to PGAU are in sync with the transaction program and that the
PL/SQL TIP was generated by PGAU using the correct definitions. If
modifications have been made to the generated PL/SQL code, check that they are
correct.
PGA-20918: send length number number is number but only number bytes are left in the buffer
  Cause: The length <len> specified in send lengths array element number <num> exceeded the number of bytes <bytes> of data remaining in the send buffer.
  Action: Check that the PGDL and COBOL record descriptions used to define the transaction to PGAU are in sync with the transaction program and that the PL/SQL TIP was generated by PGAU using the correct definitions. If modifications have been made to the generated PL/SQL code, check that they are correct.

PGA-20919: receive length number number is number but only number bytes are left in the buffer
  Cause: The length <len> specified in receive lengths array element number <num> exceeded the number of bytes <bytes> of space remaining in the receive buffer.
  Action: Check that the PGDL and COBOL record descriptions used to define the transaction to PGAU are in sync with the transaction program and that the PL/SQL TIP was generated by PGAU using the correct definitions. If modifications have been made to the generated PL/SQL code, check that they are correct.

PGA-20920: unexpected request-to-send received
  Cause: The remote transaction program requested to send data when the gateway was still sending data.
  Action: Check that the PGDL and COBOL record descriptions used to define the transaction to PGAU are in sync with the transaction program and that the PL/SQL TIP was generated by PGAU using the correct definitions. If modifications have been made to the generated PL/SQL code, check that they are correct.

PGA-20921: buffer overflow on receive: requested number bytes, received number bytes
  Cause: The remote transaction program sent <len> bytes of data when the gateway was expecting to receive only <num> bytes.
  Action: Check that the PGDL and COBOL record descriptions used to define the transaction to PGAU are in sync with the transaction program and that the PL/SQL TIP was generated by PGAU using the correct definitions. If modifications have been made to the generated PL/SQL code, check that they are correct.

PGA-20922: no data available to receive: number bytes were requested
  Cause: The remote transaction program has either requested to receive or deallocated the conversation, but the gateway is still expecting to receive more data.
  Action: Check that the PGDL and COBOL record descriptions used to define the transaction to PGAU are in sync with the transaction program and that the PL/SQL TIP was generated by PGAU using the correct definitions. If modifications have been made to the generated PL/SQL code, check that they are correct.

PGA-20923: unexpected status, number (string), received after string
**Cause:** An unexpected status code `<stat>` was received from the remote transaction program following the CPI-C `<func>` call. The descriptive name of the status code is `<desc>`. `<func>` is the CPI-C function receiving the status.

**Action:** This is usually a problem with the remote transaction program or a network problem. The status codes for each CPI-C function call are documented in the platform-specific SNA software documentation for your system. Refer to the “System Requirements” chapter of the Oracle Database Gateway for APPC Installation and Configuration Guide for your platform for titles of SNA software documentation.

**PGA-20924: unable to enter send state for deallocate, state = number (string)**

**Cause:** The gateway was unable to enter send state to perform a normal deallocation. The conversation state is `<state>`, and its descriptive name is `<desc>`. The conversation states are documented in the `/usr/include/cmc.h` header file.

**Action:** This is usually a problem with the remote transaction program or a problem with the network. Check the remote system for diagnostic information. The gateway will perform an abnormal deallocation after this error has been encountered.

**PGA-20925: missing LU/TP/MODE name parameter and no side info profile specified**

**Cause:** PGAINIT was called with no Side Information profile name specified but the LU name, TP name, and MODE name parameters were not all filled in with non-blank values.

**Action:** Check the PGDL used to define the transaction program to PGAU to ensure that either a valid Side Information profile name is specified (SIDEPROFILE keyword), or that the LU name, TP name, and Mode name (LUNAME, TPNAME, LOGMODE keywords) are all specified with valid values. If no Side Information profile is specified, the LU name, TP name, and Mode name parameters are all required.

**PGA-20926: userid string length of number is invalid; maximum length is number**

**Cause:** The userid `<uid>` is too long (<len>) to be used with APPC conversation security. The maximum allowable length for the userid is <max> characters. This can occur only when the gateway initialization parameter PGA_SECURITY_TYPE is set to either SAME or PROGRAM.

**Action:** The userid must be changed to a shorter value on both the client system and the system where the remote transaction program is being executed. This restriction is imposed by SNA and APPC, not by the gateway.

**PGA-20927: password length of number is invalid; maximum length is number**

**Cause:** The password is too long (<len>) to be used with APPC conversation security. The maximum allowable length for the password is <max> characters. This can occur only when the gateway initialization parameter PGA_SECURITY_TYPE is set to PROGRAM.

**Action:** The password must be changed to a shorter value on both the client system and the system where the remote transaction program is being executed. This restriction is imposed by SNA and APPC, not by the gateway.

**PGA-20928: cannot open parameter file string**

**Cause:** The gateway cannot locate or open the file specified.

**Action:** Make sure that the file exists in a location expected by the gateway and can be opened.
PGA-20930: invalid SYNCLEVEL, number, specified; valid range is number

**Cause:** The synclevel, <sync>, passed to PGAINIT is not a valid value. This value is specified by the SYNCLEVEL keyword in the DEFINE TRANSACTION statement used to define the transaction to PGAU.

**Action:** The value for SYNCLEVEL must fall within the range <min>:<max>. Correct the value specified in the DEFINE TRANSACTION statement for the SYNCLEVEL keyword, and regenerate the PL/SQL TIP using PGAU.

PGA-20931: send buffer length of number exceeds the maximum of number

**Cause:** The send buffer length, <len>, passed to PGAXFER was larger than the maximum allowed, <max>.

**Action:** Check that the PGDL and COBOL record descriptions used to define the transaction to PGAU do not define any data items larger than the maximum size allowed by APPC. Correct the data item(s) in error and regenerate the PL/SQL TIP using PGAU.

PGA-20932: invalid function code, string, passed to pgatctl

**Cause:** The function code, <func>, passed to the PGATCTL function was invalid.

**Action:** Correct the function code in the PL/SQL procedure, recompile it, and retry the operation.

PGA-20933: invalid value specified by initialization parameter string=string

**Cause:** The keyword parameter <keyword>=<value> specifies an invalid value.

**Action:** Refer to the Oracle Database Gateway for APPC, Installation and Configuration Guide, documenting gateway initialization parameters for the keyword and correct the error.

PGA-20934: side information profile string not defined; cannot establish conversation

**Cause:** The Side Information profile <profile> is not defined to the SNA software. Either the profile name was misspelled, or no profile has been defined.

**Action:** Correct the profile name if it was misspelled, or have the profile defined to the SNA software if it was not already defined.

PGA-20935: synclevel number is not allowed when PGA_CAPABILITY=string

**Cause:** The synclevel parameter <sync> passed to PGAINIT was incompatible with the setting of the PGA_CAPABILITY gateway initialization parameter, <cap>.

**Action:** If the synclevel passed to PGAINIT is correct, then the gateway initialization parameter PGA_CAPABILITY must be changed to allow the desired synclevel to be supported. If the synclevel is not correct, the TIP should be changed to specify the correct sync level in the call to PGAINIT. If the TIP was generated by PGAU, the SYNCRLEVEL keyword of the DEFINE TRANSACTION statement should be changed to specify the correct synclevel and the TIP should be regenerated. The table below shows which synclevels are valid with each PGA_CAPABILITY setting. PGA_CAPABILITY Value SYNCLEVELs Allowed

<table>
<thead>
<tr>
<th>PGA_CAPABILITY</th>
<th>SYNCLEVELs Allowed</th>
</tr>
</thead>
<tbody>
<tr>
<td>READ_ONLY</td>
<td>0</td>
</tr>
<tr>
<td>SINGLE_SITE</td>
<td>0, 1</td>
</tr>
<tr>
<td>COMMIT_CONFIRM</td>
<td>0, 1</td>
</tr>
</tbody>
</table>

PGA-20936: send buffer length is number but no send lengths were specified

**Cause:** The send buffer length passed to PGAXFER was <len>, but the send lengths array was either null or contained a send count of zero.
**Action**: Check that the PGDL or COBOL record descriptions used to define the transaction to PGAU are in sync with the transaction program and that the PL/SQL TIP was generated by PGAU using the correct definitions.

**PGA-20937**: receive buffer length is number but no receive lengths were specified  
**Cause**: The receive buffer length passed to PGAXFER was <len>, but the receive lengths array was either null or contained a receive count of zero.  
**Action**: Check that the PGDL or COBOL record descriptions used to define the transaction to PGAU are in sync with the transaction program and that the PL/SQL TIP was generated by PGAU using the correct definitions.

**PGA-20938**: send lengths array too small (number) to contain a valid send count  
**Cause**: The send lengths array passed to PGAXFER was too small to contain a valid send item count. The actual length of the send lengths array was <len>. The minimum length of the send lengths array is 4 bytes.  
**Action**: If the TIP was generated by PGAU, ensure that it was not modified incorrectly. If the TIP was not modified, supported customers should contact Oracle Worldwide Support for assistance. If the TIP was modified or was not generated by PGAU, correct the send lengths array passed to PGAXFER.

**PGA-20939**: receive lengths array too small (number) to contain a valid receive count  
**Cause**: The receive lengths array passed to PGAXFER was too small to contain a valid receive item count. The actual length of the receive lengths array was <len>. The minimum length of the receive lengths array is 4 bytes.  
**Action**: If the TIP was generated by PGAU, ensure that it was not modified incorrectly. If the TIP was not modified, supported customers should contact Oracle Worldwide Support for assistance. If the TIP was modified or was not generated by PGAU, correct the receive lengths array passed to PGAXFER.

**PGA-20945**: unable to log on to Oracle for transaction logging  
**Cause**: The gateway server was unable to connect to the Oracle server where the transaction log table is stored. An Oracle server message will follow this message.  
**Action**: Ensure that the Oracle server and its TNS listener are both operational. If the protocol is SNA: also check the PGA_LOG_DB, PGA_LOG_USER, and PGA_LOG_PASS parameters in the gateway init file and ensure that they specify the correct database string, userid, and password, respectively. If the protocol is TCP/IP: also check the PGA_TCP_DB, PGA_TCP_USER, and PGA_LOG_PASS parameters in the gateway init file and ensure that they specify the correct database string, userid, and password, respectively. Refer to the Oracle Server Messages and Codes Manual for information on the Oracle server message.

**PGA-20947**: unable to bind variable string for transaction logging  
**Cause**: The gateway server was unable to bind variable <var> for use in performing transaction logging functions. An Oracle server message will follow this message.  
**Action**: Ensure that the Oracle server and its TNS listener are both operational. Also check the PGA_LOG_DB, PGA_LOG_USER, and PGA_LOG_PASS parameters in the gateway init file and ensure that they specify the correct database string, userid, and password, respectively. Refer to the Oracle Server Messages and Codes Manual for information on the Oracle server message.

**PGA-20948**: unable to prepare the statement for transaction logging
Cause: The gateway server was unable to prepare the statement to be used to call the transaction logging PL/SQL stored procedure. An Oracle server message will follow this message.

Action: Ensure that the Oracle server and its TNS listener are both operational. Also check the PGA_LOG_DB, PGA_LOG_USER, and PGA_LOG_PASS parameters in the gateway init file and ensure that they specify the correct database string, userid, and password, respectively. Verify that the transaction logging PL/SQL procedure has been properly installed into the Oracle server under the userid and password specified by PGA_LOG_USER and PGA_LOG_PASS and that it is executable. Refer to the Oracle Server Messages and Codes Manual for information on the Oracle server message.

PGA-20949: unable to define variable string for transaction recovery

Cause: The gateway server was unable to define variable <var> to be used in accessing the transaction log table during recovery processing. An Oracle server message will follow this message.

Action: Ensure that the Oracle server and its TNS listener are both operational. Also check the PGA_LOG_DB, PGA_LOG_USER, and PGA_LOG_PASS parameters in the gateway init file and ensure that they specify the correct database string, userid, and password, respectively. Refer to the Oracle Server Messages and Codes Manual for information on the Oracle server message.

PGA-20950: unable to perform string on transaction log

Cause: The gateway server was unable to insert, update, or delete a pending transaction row in the transaction log table. An Oracle server message will follow this message.

Action: Ensure that the Oracle server and its TNS listener are both operational. Also check the PGA_LOG_DB, PGA_LOG_USER, and PGA_LOG_PASS parameters in the gateway init file and ensure that they specify the correct database string, userid, and password, respectively. Verify that the transaction logging PL/SQL stored procedure and the transaction log table have been properly installed into the Oracle server under the userid and password specified by PGA_LOG_USER and PGA_LOG_PASS. Refer to the Oracle Server Message and Codes Manual for information on the Oracle server message.

PGA-20960: missing string parameter, required when PGA_CAPABILITY=string

Cause: The PGA_CAPABILITY parameter specified <cap>, but another required parameter, <parm>, was omitted.

Action: Add the missing parameter to the gateway initialization file. Refer to Appendix A, 'Gateway Initialization Parameters', in the Oracle Database Gateway for APPC Installation and Configuration Guide for information on required parameters.

PGA-20961: synclevel 1 conversations not allowed when PGA_CAPABILITY=2_PHASE

Cause: A conversation was requested at synclevel 1. The gateway init file specified PGA_CAPABILITY=2_PHASE. When 2-phase commit is enabled, synclevel 1 conversations are not supported, since they are not protected by 2-phase processing.

Action: Either use synclevel 2 for the conversation (if the remote transaction program supports it) or use a different gateway SID for this conversation.

PGA-20962: synclevel 2 conversations not currently allowed
Cause: A conversation was requested at synclevel 2, but the SNA software allocated the conversation at synclevel 0 or 1. This means that the SNA software is not configured to support synclevel 2, or has no RRM enabled.

Action: Correct the SNA software configuration to support synclevel 2 and to enable RRN processing.

PGA-20963: side profile string specifies the wrong local LU name (string)
Cause: The Side Information profile <profile> specified for this conversation has a local LU name <lu> that is different from the local LU name specified by the PGA_LOCAL_LU gateway initialization parameter.

Action: This message will be accompanied by message PGA-20984, which provides the local LU name that was specified by the PGA_LOCAL_LU gateway initialization parameter. The Side Information profile must be changed to use the same local LU name.

PGA-20964: local LU name specified by PGA_LOCAL_LU is string
Cause: Message PGA-20963 was issued. This message always follows.

Action: See message PGA-20963.

PGA-20965: syncpoint error: expecting string PS header, received string
Cause: During the processing of a 2-phase commit, an incorrect response was received from the remote transaction program following a syncpoint control command. The response received was <rcv> and not a <pstype> PS header as expected.

Action: This is an error in the remote transaction program or the remote OLTP. Check the remote system for error messages from the OLTP. Contact the system administrator for the remote system to assist in problem determination.

PGA-20966: syncpoint error: sent string, expecting string, received string
Cause: During the processing of a 2-phase commit, an incorrect response <resp> was received from the remote transaction program following a syncpoint control command <psh>. The expected response was <exp>.

Action: This is an error in the remote transaction program or the remote OLTP. Check the remote system for error messages from the OLTP. Contact the system administrator for the remote system to assist in problem determination.

PGA-20967: 2-phase commit recovery attempted, DBA action required
Cause: The recovery process of the Oracle integrating server has connected to the gateway to perform recovery. However, the gateway cannot perform automatic recovery for this transaction due to unknown heuristic action taken by the target OLTP.

Action: The DBA must attempt to manually resolve the in-doubt transaction. Detailed information on how to proceed is contained in Chapter 8 of the Oracle Database Gateway for APPC Installation and Configuration Guide, in the section titled "Manual Recovery of In-Doubt Transactions".

PGA-20995: communication error: 'string' failed, rc = number, errno = number
Cause: An unexpected communications error occurred while executing the AIX SNA Server API <func> function. The function return code is <rc> and the system error number is <errno>. The AIX SNA Server LU6.2 API function return codes and system error numbers are described in the vendor documentation. The SNA system error numbers can also be found in the /usr/include/luxsna.h header file on AIX systems.
Action: Determine the cause of the communications error, correct it, and rerun the transaction. If you need assistance, contact your system administrator.

PGA-20999: SIGDANGER received from system - all conversations deallocated
Cause: The system sent a SIGDANGER signal to the server, indicating that there is a shortage of paging space. All currently active conversations are deallocated abnormally.
Action: Contact your system administrator.

PGA-21001: internal error: string
Cause: Internal error in the gateway RRM process.
Action: Reproduce the error with tracing enabled to produce a trace file. Supported customers should contact Oracle Worldwide Support for assistance.

PGA-21002: unable to obtain number bytes of memory for string
Cause: Memory shortage in the gateway RRM process. A request failed to allocate <bytes> of memory for the <usage> area.
Action: Ensure your system has enough available memory to support the RRM.

PGA-21003: memory allocation error in lxlinit
Cause: Memory shortage in the gateway RRM process.
Action: Ensure your system has enough available memory to support the RRM.

PGA-21004: invalid string specified by NLS_LANG
Cause: The <comp> component of the NLS_LANG environment variable was not valid. The component can be the language, territory, or character set.
Action: Correct the invalid component and restart the RRM process.

PGA-21005: no message file found for language 'string'
Cause: There was no message file available for the language <lang> specified by the NLS_LANG environment variable.
Action: Refer to Appendix J, National Language Support, for a list of message file languages supported by the RRM. If the language required is supported, ensure that the ORACLE_HOME environment variable specifies the gateway’s home directory and that the message files are properly installed.

PGA-21006: RRM initialization failed
Cause: The initialization of the gateway RRM process failed.
Action: This message is sent to the system log as an ALERT message when the initialization of the RRM failed before it could initialize the message facility or before it could determine the local LU name for which it was started.

PGA-21010: missing fully-qualified local LU name argument
Cause: The fully-qualified local LU name was not passed as the first argument to the pg4arrm program on the command line.
Action: The fully-qualified local LU name must be specified as the first argument to the pg4arrm program. Reenter the command line with the fully-qualified local LU name specified.

PGA-21011: invalid network name length (number), valid range is number
Cause: The network name portion of the fully-qualified local LU name specified as the first argument to the pg4arrm program is the wrong length (<len>).

PGA-20900 to PGA-22014  116-9
Action: The valid range of lengths for the network name is given in the message text by \(<\text{min}>:\text{<max>}\). Reenter the command line with a valid network name specified in the fully-qualified local LU name.

PGA-21012: invalid LU name length (number), valid range is number:number

Cause: The LU name portion of the fully-qualified local LU name specified as the first argument to the pg4arrm program is the wrong length (<len>).

Action: The valid range of lengths for the LU name is given in the message text by \(<\text{min}>:\text{<max>}\). Reenter the command line with a valid LU name specified in the fully-qualified local LU name.

PGA-21013: missing period(.) in fully-qualified local LU name

Cause: There is no period (.) in the fully-qualified local LU name specified as the first argument to the pg4arrm program.

Action: A fully-qualified local LU name must contain a network name and an LU name, separated by a period (.). Reenter the command line with a valid fully-qualified local LU name specified.

PGA-21014: invalid character(s) found in network name 'string'

Cause: One or more invalid characters were found in the network name portion <net> of the fully-qualified local LU name.

Action: The network name must begin with an upper-case alphabetic character or one of the national characters $, #, or @. Subsequent characters can be upper-case alphabetic, national, or numeric. Reenter the command line with a valid network name specified in the fully-qualified local LU name.

PGA-21015: invalid character(s) found in LU name 'string'

Cause: One or more invalid characters were found in the LU name portion <lu> of the fully-qualified local LU name.

Action: The LU name must begin with an upper-case alphabetic character or one of the national characters $, #, or @. Subsequent characters can be upper-case alphabetic, national, or numeric. Reenter the command line with a valid network name specified in the fully-qualified local LU name.

PGA-21016: RRM initialization failed for LU string

Cause: The initialization of the gateway RRM process for local LU <lu> failed.

Action: This message is sent to the system log as an ALERT message when the initialization of the RRM failed for the local LU.

PGA-21017: RRM already active for LU string

Cause: The RRM has already been started for the local LU <lu>. A second RRM cannot be started for the same local LU.

Action: Determine whether the RRM is still active and functioning. If it is not, then it may have terminated without cleaning up. On AIX systems, the /tmp/o/e<lu>name> file may still exist. This will prevent a new RRM from being started. If you have verified that the original RRM is no longer running, you can delete the file to allow a new copy of the RRM to be started.

PGA-21020: error creating path object for init file

Cause: A memory creating path object for init file.
**Action:** Ensure that sufficient memory is available to the RRM process. If the problem persists, supported customers should contact Oracle Worldwide Support for assistance.

**PGA-21021: error creating name object for init file**

**Cause:** A memory shortage occurred while creating an internal control block for accessing the init file.

**Action:** Ensure that sufficient memory is available to the RRM process. If the problem persists, supported customers should contact Oracle Worldwide Support for assistance.

**PGA-21022: error creating file object for init file**

**Cause:** A memory shortage occurred while creating an internal control block for accessing the init file.

**Action:** Ensure that sufficient memory is available to the RRM process. If the problem persists, supported customers should contact Oracle Worldwide Support for assistance.

**PGA-21023: error opening init file string**

**Cause:** An error occurred opening the init file <ifn>.

**Action:** This message will be followed by an OS-specific message displaying the error information. Use that information to determine the cause of the error and correct it. Then restart the RRM process.

**PGA-21024: error reading init file string**

**Cause:** An error occurred reading the init file <ifn>.

**Action:** This message will be followed by an OS-specific message displaying the error information. Use that information to determine the cause of the error and correct it. Then restart the RRM process.

**PGA-21025: error closing init file string**

**Cause:** An error occurred opening the init file <ifn>.

**Action:** This message will be followed by an OS-specific message displaying the error information. Use that information to determine the cause of the error and correct it. Then restart the RRM process.

**PGA-21030: invalid keyword in line number**

**Cause:** An invalid keyword was encountered in the init file in line number <line>.

**Action:** Correct the invalid line in the init file and restart the RRM process.

**PGA-21031: length of string value (number) not within valid range (number:number)**

**Cause:** The length <len> of the value specified in the init file by the keyword <key> is not within the valid range <min>:<max>.

**Action:** Correct the invalid keyword value in the init file and restart the RRM process.

**PGA-21032: invalid value specified by stringstring**

**Cause:** The value <val> specified in the init file by the keyword <key> is invalid.

**Action:** Correct the invalid keyword value in the init file and restart the RRM process.

**PGA-21033: error(s) found in init file**
**Cause:** One or more errors were found in the init file during RRM initialization. The RRM process has terminated.

**Action:** Correct all init file errors and restart the RRM process.

**PGA-21034: too many errors in init file, cannot continue**

**Cause:** The init file contained more errors than the RRM initialization code could process.

**Action:** Correct all errors that have been processed so far, and restart the RRM process. Any additional errors will then be processed. This error is received only when the init file contains a very large number of invalid lines.

**PGA-21035: value of string (number) not within valid range (number,number)**

**Cause:** The value `<val>` specified in the init file by the keyword `<key>` is not within the valid range `<min>:<max>`.

**Action:** Correct the invalid keyword value in the init file and restart the RRM process.

**PGA-21040: error creating path object for log file**

**Cause:** A memory shortage occurred while creating an internal control block for accessing the log file.

**Action:** Ensure that sufficient memory is available to the RRM process. If the problem persists, supported customers should contact Oracle Worldwide Support for assistance.

**PGA-21041: error creating name object for log file**

**Cause:** A memory shortage occurred while creating an internal control block for accessing the log file.

**Action:** Ensure that sufficient memory is available to the RRM process. If the problem persists, supported customers should contact Oracle Worldwide Support for assistance.

**PGA-21042: error creating file object for log file**

**Cause:** A memory shortage occurred while creating an internal control block for accessing the log file.

**Action:** Ensure that sufficient memory is available to the RRM process. If the problem persists, supported customers should contact Oracle Worldwide Support for assistance.

**PGA-21043: error opening log file string**

**Cause:** An error occurred opening the log file `<lfn>`.

**Action:** This message will be followed by an OS-specific message displaying the error information. Use that information to determine the cause of the error and correct it. Then restart the RRM process.

**PGA-21044: error writing to log file string**

**Cause:** An error occurred writing to the log file `<lfn>`.

**Action:** This message will be followed by an OS-specific message displaying the error information. Use that information to determine the cause of the error and correct it. Then restart the RRM process.

**PGA-21045: error closing log file string**

**Cause:** An error occurred closing the log file `<lfn>`.
Action: This message will be followed by an OS-specific message displaying the error information. Use that information to determine the cause of the error and correct it. Then restart the RRM process.

PGA-21046: logging switched to system log due to error on log file
Cause: An error occurred writing to the log file, and logging as been switched to the system log facility for the remainder of this RRM execution.
Action: Correct the problem that caused the error on the log file, so that the next restart of the RRM will be able to write to the log file. A common cause for this message is unavailable disk space for the file.

PGA-21050: error creating path object for trace file
Cause: A memory shortage occurred while creating an internal control block for accessing the trace file.
Action: Ensure that sufficient memory is available to the RRM process. If the problem persists, supported customers should contact Oracle Worldwide Support for assistance.

PGA-21051: error creating name object for trace file
Cause: A memory shortage occurred while creating an internal control block for accessing the trace file.
Action: Ensure that sufficient memory is available to the RRM process. If the problem persists, supported customers should contact Oracle Worldwide Support for assistance.

PGA-21052: error creating file object for trace file
Cause: A memory shortage occurred while creating an internal control block for accessing the trace file.
Action: Ensure that sufficient memory is available to the RRM process. If the problem persists, supported customers should contact Oracle Worldwide Support for assistance.

PGA-21053: error opening trace file string
Cause: An error occurred opening the trace file <tfn>.
Action: This message will be followed by an OS-specific message displaying the error information. Use that information to determine the cause of the error and correct it. Then restart the RRM process.

PGA-21054: error writing to trace file string
Cause: An error occurred writing to the trace file <tfn>.
Action: This message will be followed by an OS-specific message displaying the error information. Use that information to determine the cause of the error and correct it. Then restart the RRM process.

PGA-21055: error closing trace file string
Cause: An error occurred closing the trace file <tfn>.
Action: This message will be followed by an OS-specific message displaying the error information. Use that information to determine the cause of the error and correct it. Then restart the RRM process.

PGA-21056: tracing suspended due to error on trace file
Cause: An error occurred writing to the trace file, and tracing has been suspended for the remainder of this RRM execution.
**Action:** Correct the problem that caused the error on the trace file, so that the next restart of the RRM will be able to write to the trace file. A common cause for this message is unavailable disk space for the file.

**PGA-21060: system errno = number**  
**Cause:** The system error number was <errno> following a failure in a file operation.  
**Action:** The system error codes are documented in the header file /usr/include/errno.h. Determine the cause of the file error and correct it.

**PGA-21100: RRM initializing for local LU string**  
**Cause:** The RRM is initializing for the local LU <llu>.  
**Action:** Informational message.

**PGA-21101: initialization parameters read from string**  
**Cause:** Init parameters were read from the file <ifn>.  
**Action:** Informational message.

**PGA-21102: log messages written to string**  
**Cause:** Log messages will be written to the file <lfn>.  
**Action:** Informational message.

**PGA-21103: trace information written to string**  
**Cause:** Trace information will be written to the file <tfn>.  
**Action:** Informational message.

**PGA-21104: trace level currently set to number**  
**Cause:** The trace level specified by the TRACE_LEVEL parameter is <trc>.  
**Action:** Informational message.

**PGA-21105: startup for local LU string is warm**  
**Cause:** The RRM is warm-starting for the local LU <llu>. The RRM will attempt to restore all LU6.2 log states from the RRM LU6.2 log as it existed at the last RRM shutdown.  
**Action:** Informational message.

**PGA-21106: warm start complete for local LU string**  
**Cause:** The RRM has warm-started for the local LU <llu>. This means that all state information for the local LU and partner LUs with which the RRM has previously communicated was restored from the RRM LU6.2 log as it existed at the last RRM shutdown.  
**Action:** Informational message.

**PGA-21107: startup for local LU string is cold**  
**Cause:** The RRM is cold-starting for the local LU <llu>. The RRM will not retain any LU6.2 log states from the previous execution.  
**Action:** Informational message.

**PGA-21108: cold start complete for local LU string**  
**Cause:** The RRM has cold-started for the local LU <llu>. The RRM has a new local LU6.2 log name and all LU6.2 log names for partner LUs have been erased.  
**Action:** Informational message.
PGA-21109: local log name is x'string'
  Cause: The local LU's LU6.2 log name is <llog>. Since the log name is not
  necessarily a printable string, it is listed as a hexadecimal string.
  Action: Informational message.

PGA-21110: XLN received from partner LU string
  Cause: An Exchange Log Names (XLN) GDS variable has been received from the
  RRM at the partner LU <plu>. This is the first thing that occurs when
  communication is established with a partner LU for the first time since either the
  local RRM or the partner RRM was last started.
  Action: Informational message.

PGA-21111: partner log name is x'string'
  Cause: The partner LU's LU6.2 log name is <plog>. Since the log name is not
  necessarily a printable string, it is listed as a hexadecimal string.
  Action: Informational message.

PGA-21112: creating new log entry for partner LU string
  Cause: The RRM is creating an entry in its LU6.2 log for the partner LU <plu>.
  This happens only the first time that the partner LU's RRM contacts the local RRM
  since the last cold start of the local RRM.
  Action: Informational message.

PGA-21113: warm starting for partner LU string
  Cause: The RRM is warm starting for the partner LU <plu>. This happens when
  the partner LU's RRM is warm starting and is contacting the local RRM for the
  first time since the local RRM was started.
  Action: Informational message.

PGA-21114: cold starting for partner LU string
  Cause: The RRM is cold starting for the partner LU <plu>. This happens when the
  partner LU's RRM is cold starting and is contacting the local RRM for the first time
  since the local RRM was started.
  Action: Informational message.

PGA-21115: shutdown request received
  Cause: A shutdown request has been received by the RRM.
  Action: Informational message.

PGA-21116: RRM termination complete for local LU string
  Cause: The RRM has terminated for the local LU <llu>.
  Action: Informational message.

PGA-21200: connect to Oracle Server as string failed
  Cause: The RRM was unable to connect as user <user> to the Oracle server where
  its LU6.2 log information is stored. An Oracle server message will follow this
  message.
  Action: Ensure that the Oracle server and its TNS listener are both operational.
  Also check the LOG_DB, LOG_USER, and LOG_PASS parameters in the RRM init
  file and ensure that they specify the correct database string, userid, and password,
PGA-21201: error selecting PGA_2PC_LUS row for local LU string

Cause: The RRM was unable to read its local LU6.2 log entry. An Oracle server message will follow this message, and contains information on the Oracle error.

Action: Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started.

PGA-21202: error updating PGA_2PC_LUS row for local LU string

Cause: The RRM was unable to update its local LU6.2 log entry during warm start processing. An Oracle server message will follow this message, and contains information on the Oracle error.

Action: Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started.

PGA-21203: error inserting PGA_2PC_LUS rows for local LU string

Cause: The RRM was unable to create its local LU6.2 log entry during cold start processing. An Oracle server message will follow this message, and contains information on the Oracle error.

Action: Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started again.

PGA-21204: error deleting PGA_2PC_PENDING rows for local LU string

Cause: The RRM was unable to delete the pending transaction entries from its local LU6.2 log during cold start processing. An Oracle server message will follow this message, and contains information on the Oracle error.

Action: Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_PENDING table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started again.

PGA-21205: error deleting PGA_2PC_LUS rows for partner LUs

Cause: The RRM was unable to delete the partner LU entries from its local LU6.2 log during cold start processing. An Oracle server message will follow this message, and contains information on the Oracle error.

Action: Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started again.

PGA-21206: error selecting PGA_2PC_LUS row for partner LU string

Cause: The RRM was unable to read its local LU6.2 log entry for the partner LU. An Oracle server message will follow this message, and contains information on the Oracle error.

Action: Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started.
PGA-21207: error inserting PGA_2PC_LUS row for partner LU string  
**Cause:** The RRM was unable to create a local LU6.2 log entry for the partner LU. An Oracle server message will follow this message, and contains information on the Oracle error.  
**Action:** Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started.

PGA-21208: error updating PGA_2PC_LUS row for partner LU string  
**Cause:** The RRM was unable to update its local LU6.2 log entry for the partner LU. An Oracle server message will follow this message, and contains information on the Oracle error.  
**Action:** Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started.

PGA-21209: error selecting PGA_2PC_PENDING rows for partner LU string  
**Cause:** The RRM was unable to read the pending transaction entries from its LU6.2 log for the partner LU <plu>. An Oracle server message will follow this message, and contains information on the Oracle error.  
**Action:** Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_PENDING table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started.

PGA-21210: unable to open connection with SNA services  
**Cause:** The RRM was unable to initialize its connection with the SNA software for LU6.2 communications. An OS-specific error message precedes this message.  
**Action:** Check the error information in the OS-specific error message to determine the cause of the problem, and take corrective action. Once the problem has been corrected, restart the RRM.

PGA-21211: unable to allocate LU6.2 listen for RRM TP  
**Cause:** The RRM was unable to allocate an LU6.2 listen with the SNA software for LU6.2 communications. An OS-specific error message precedes this message.  
**Action:** Check the error information in the OS-specific error message to determine the cause of the problem, and take corrective action. Once the problem has been corrected, restart the RRM.

PGA-21212: incorrect data received from partner LU string  
**Cause:** A partner LU has sent incorrect data in its initial communication with the local RRM. The first data received should be an Exchange Log Names (XLN) GDS variable, but was not.  
**Action:** This error indicates that there is a problem on the partner LU side of the connection. Corrective action must be taken by the system administrator for that LU.

PGA-21213: received x'string'  
**Cause:** This message follows message PGA-00208, and dumps out the first 32 bytes of the data received from the partner LU.
**Action**: If the data in this message is not sufficient for determination of the problem at the partner LU, use SNA traces on either side of the connection to gather more detailed information, or use the TRACE_LEVEL parameter in the RRM init file to enable SNA data tracing to the trace file.

**PGA-21214: incorrect service flag in XLN**

**Cause**: The service flag in the Exchange Log Names (XLN) GDS variable received from the partner LU’s RRM is not correct. The XLN is expected to have the REQUEST flag set.

**Action**: This error indicates that there is a problem on the partner LU side of the connection. Corrective action must be taken by the system administrator for that LU.

**PGA-21215: partner log name mismatch on warm start**

**Cause**: The Exchange Log Names (XLN) GDS variable received from the partner LU’s RRM contains an LU6.2 log name that is different from that known by the local LU’s RRM.

**Action**: This can happen if the partner LU was cold started and later warm started, all between the times the local LU’s RRM was last shut down and warm started. The local LU’s RRM is not aware that the partner LU was cold started, and therefore assumes that the partner LU’s RRM is using the wrong LU6.2 log name. Verify that this is what happened, and if so, the local LU’s RRM can be forced to accept the new LU6.2 log name from the partner LU’s RRM by deleting the local RRM’s LU6.2 log entry for the partner LU, and then forcing the partner LU to reinitiate the connection to the local LU. For further information on recovery from this error, refer to "RRM Recovery" in Chapter 12, "2-Phase Commit".

**PGA-21216: last stored log name x’string’**

**Cause**: This message always follows message PGA-00213, and lists the last partner LU LU6.2 log name <plog> saved by the local LU’s RRM.

**Action**: The log name in the message may be of use to the system administrator for the partner LU in determining the cause for the log name mismatch.

**PGA-21217: partner sent log name x’string’**

**Cause**: This message always follows message PGA-00214, and lists the LU6.2 log name <plog> sent by the partner LU’s RRM in the warm start Exchange Log Names (XLN) GDS variable.

**Action**: The log name in the message may be of use to the system administrator for the partner LU in determining the cause for the log name mismatch.

**PGA-21218: cold start for partner LU string rejected, number pending transactions exist**

**Cause**: A cold start was requested by the partner LU’s RRM, but the local RRM determined that there are still unresolved pending transactions for that LU in the local RRM’s LU6.2 log.

**Action**: If the pending transactions have been resolved, then they must be manually deleted from the local RRM’s LU6.2 log before the partner LU’s cold start request will be accepted. If the pending transactions have not been resolved, then they must be resolved and then manually deleted from the local RRM’s LU6.2 log before the partner LU’s cold start request will be accepted.

**PGA-21219: recovery action by DBA required for local LU string**

**Cause**: A condition has occurred which requires action by the DBA. This message is also sent to the system log as an alert message.
**Action:** The DBA should examine the RRM log file to determine what action to take. The messages in the log file show what event has occurred that makes DBA action necessary, and their descriptions in this appendix provide the DBA with a course of action. For further information on recovery, refer to "RRM Recovery" in Chapter 8, "Implementing Two-Phase Commit", of the Oracle Database Gateway for APPC Installation and Configuration Guide.

**PGA-21220: logging error limit (number) exceeded, RRM shutting down for LU string**

**Cause:** The limit of <lim> Oracle errors while accessing the RRM's local LU6.2 log tables has exceeded. The RRM for the local LU <llu> is shutting down.

**Action:** The DBA should examine the RRM log file to determine what action to take. The messages in the log file will show what Oracle errors have occurred, and the DBA should take whatever corrective action is required.

**PGA-21221: commit failed during cold start of local LU string**

**Cause:** The RRM was unable to commit updates to its local log during a cold start of local LU <llu>. An Oracle server message will follow this message, and contains information on the Oracle error.

**Action:** Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started.

**PGA-21222: commit failed during warm start of local LU string**

**Cause:** The RRM was unable to commit updates to its local log during a warm start of local LU <llu>. An Oracle server message will follow this message, and contains information on the Oracle error.

**Action:** Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started.

**PGA-21223: commit failed during first-time processing for partner LU string**

**Cause:** The RRM was unable to commit updates to its local log during a first-time processing for partner LU <plu>. An Oracle Server message will follow this message, and contains information on the Oracle error.

**Action:** Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started.

**PGA-21224: commit failed during cold start of partner LU string**

**Cause:** The RRM was unable to commit updates to its local log during a cold start of partner LU <plu>. An Oracle Server message will follow this message, and contains information on the Oracle error.

**Action:** Ensure that the Oracle server and its TNS listener are both operational. Also ensure that the PGA_2PC_LUS table exists and has not been altered or updated manually. If the table has been tampered with, it may need to be reinitialized and the RRM cold started.

**PGA-21300: received no data when expecting data**

**Cause:** The RRM was expecting to receive data from a partner RRM, but received none.
**Action:** This error indicates that there may be a problem on the partner LU side of the connection. Corrective action must be taken by the system administrator for that LU.

PGA-21301: invalid control received: *string*

**Cause:** The RRM received an invalid control flag `<control>` from a partner RRM.

**Action:** This error indicates that there may be a problem on the partner LU side of the connection. Corrective action must be taken by the system administrator for that LU.

PGA-21400: ORACLE_HOME environment variable not set

**Cause:** The ORACLE_HOME environment variable was not set before the RRM was started.

**Action:** The ORACLE_HOME environment variable must be set to the gateway's ORACLE_HOME directory before the RRM is started.

PGA-21401: ORACLE_HOME environment variable set to null string

**Cause:** The ORACLE_HOME environment variable was set to a null value.

**Action:** The ORACLE_HOME environment variable must be set to the gateway's ORACLE_HOME directory before the RRM is started.

PGA-21402: error opening file *string*, fopen errno = *number*

**Cause:** An error occurred opening the RRM enqueue file `<fn>` for writing. The error number from fopen is `<errno>`.

**Action:** Use the `<errno>` value to determine the cause of the problem and correct it before restarting the RRM.

PGA-21403: error writing to file *string*, fputs errno = *number*

**Cause:** An error occurred writing to the RRM enqueue file `<fn>`. The error number from fputs is `<errno>`.

**Action:** Use the `<errno>` value to determine the cause of the problem and correct it before restarting the RRM.

PGA-21404: error closing file *string*, fclose errno = *number*

**Cause:** An error occurred closing the RRM enqueue file `<fn>`. The error number from fclose is `<errno>`.

**Action:** Use the `<errno>` value to determine the cause of the problem and correct it before restarting the RRM.

PGA-21405: error deleting file *string*, remove errno = *number*

**Cause:** An error occurred deleting the RRM enqueue file `<fn>` during shutdown. The error number from remove is `<errno>`.

**Action:** Use the `<errno>` value to determine the cause of the problem and correct it before restarting the RRM. The file `<fn>` must be manually deleted before attempting to start the RRM.

PGA-21450: communication error: 'string' failed, errno = *number*

**Cause:** The AIX SNA function `<func>` failed with a system error number of `<errno>`.

**Action:** The AIX SNA error codes are documented in the IBM manual AIX SNA Server: Diagnosis Guide and Messages. Use this manual to determine the cause of the problem and correct it. AIX SNA system error numbers are also documented in the `/usr/include/luxsna.h` header file on AIX systems.
PGA-21451: SNA Server is shutting down
   Cause: SNA Server is being shut down and sent a SIGUSR1 to the RRM.
   Action: The RRM must terminate when this occurs. Contact the system
            administrator to determine the cause of the SNA Server shutdown. Restart the
            RRM after SNA Server has been restarted.

PGA-22001: remote host name is null.
   Cause: TCP/IP protocol has returned "null" for the remote host name.
   Action: Verify the remote host name via the pg4tcpmap tool and re-execute your
            PL/SQL statement. If the problem cannot be resolved, supported customers
            should contact Oracle Support Services.

PGA-22002: communication error: TCP/IP string failed, rc = number
   Cause: The function <func> has failed with the return code of <rc>.
   Action: If the problem cannot be resolved, the supported customers should
            contact Oracle Support Services for assistance.

PGA-22003: communication error: TCP/IP string failed, rc = number, for, string
   Cause: An unexpected communications error occurred while executing the
           specified TCP/IP function <func>. The TCP/IP function return code is <rc> and
           the function <func> parameter is <parm>.
   Action: If the problem cannot be resolved, the supported customers should
            contact Oracle Support Services for assistance.

PGA-22004: length of the total message value (number) not within valid range (number: number)
   Cause: The length <len> for the value is not within the valid range <min>:<max>.
   Action: If the problem cannot be resolved, the supported customers should
            contact Oracle Support Services for assistance.

PGA-22005: invalid socket file descriptor: no active conversations were found
   Cause: There were no TCP/IP conversations active for the user.
   Action: Check that the application is not calling the PL/SQL TIP routines out of
            sequence.

PGA-22006: Parameter string is not specified.
   Cause: Parameter <parm> is missing from the gateway initialization file.
   Action: Add the missing parameter to the gateway initialization file. Refer to the
            Oracle Database Gateway Installation and Configuration Guide for the required
            initialization parameters for gateways using TCP/IP.

PGA-22007: user ID string length of number is invalid; maximum length is number
   Cause: The user id <uid> is too long <len> to be used. The maximum allowable
           length for the user ID is <max> characters.
   Action: The user id must be changed to a shorter value for OCI logon to the table
            PGA_TCP_IMSC. Refer to the Oracle Database Gateway Installation and
            Configuration Guide for the required gateway initialization parameters for
            gateways using TCP/IP.

PGA-22008: password length of number is invalid; maximum length is number
   Cause: The password is too long <len> to be used. The maximum allowable
           length for the password is <max> characters.
**Action:** The password must be changed to a shorter value for OCI logon to the table PGA_TCP_IMSC. Refer to the Oracle Database Gateway Installation and Configuration Guide for the required gateway initialization parameters for gateways using TCP/IP.

PGA-22009: database name *string* length of *number* is invalid; maximum length is *number*

**Cause:** The database name `<db name>` is too long `<len>` to be used. The maximum allowable length for the database name is `<max>` characters.

**Action:** The database name must be changed to a shorter value for OCI logon to the table PGA_TCP_IMSC. Refer to the Oracle Database Gateway Installation and Configuration Guide for the required gateway initialization parameters for gateways using TCP/IP.

PGA-22010: userid *string* length of *number* is invalid; maximum length is *number*

**Cause:** The userid `<uid>` is too long `<len>` to be used with TCP/IP RACF conversation security. This can occur only when the gateway initialization parameter PGA_SECURITY_TYPE is set to either SAME or PROGRAM.

**Action:** The userid must be changed to a shorter value on both the client system and the system where the remote transaction program is being executed. The maximum allowable length for the userid is `<max>` characters. This restriction is imposed by RACF, not by the gateway.

PGA-22011: password length of *number* is invalid; maximum length is *number*

**Cause:** The password is too long `<len>` to be used with TCP/IP RACF conversation security. This can occur only when the gateway initialization parameter PGA_SECURITY_TYPE is set to PROGRAM.

**Action:** The password must be changed to a shorter value on both the client system and the system where the remote transaction program is being executed. The maximum allowable length for the password is `<max>` characters. This restriction is imposed by RACF, not by the gateway.

PGA-22012: IMS Connect error: return code = *string*, reason code = *string*

**Cause:** An unexpected IMS Connect error occurred while executing the ‘recv’ function. The return code `<rc>` and reason code `<rsc>` are provided in the message text. For more information, look at the OLTP SDSF log and IMS Connect error message which starts with HWS. The messages are documented in the IBM IMS Connect Guide and Reference manual.

**Action:** Determine the cause of the error, correct it, and rerun the transaction.

PGA-22014: Transaction code length of *number* exceeds the maximum of *number*

**Cause:** The transaction code length `<len>` passed to PGAINIT or PGAINIT_SEC was larger than the maximum allowed length `<max>`.

**Action:** Check that the PGDL and COBOL record descriptions used to define the transaction to PGAU are in sync with the transaction program and that the PL/SQL TIP was generated by PGAU using the correct definitions. If modifications have been made to the generated PL/SQL code, check that they are correct.
PGU-00100: invalid SPOOL file name
  Cause: When using the SPOOL command, you specified the name of a file that
  already exists.
  Action: Specify a valid name for a file that does not currently exist.

PGU-00101: extraneous text at end of command
  Cause: There were unrecognized commands or other text on the command line.
  Action: Check the syntax of the command, then issue the command again.

PGU-00106: invalid ECHO switch
  Cause: An invalid option for the SET ECHO command was specified.
  Action: Use either ON or OFF as an option for the SET ECHO command.

PGU-00107: invalid TERMOUT switch
  Cause: An invalid option for the SET TERMOUT command was specified.
  Action: Use either ON or OFF as an option for the SET TERMOUT command.

PGU-00108: invalid TIMING switch
  Cause: An invalid option for the SET TIMING command was specified.
  Action: Use either ON or OFF as an option for the SET TIMING command.

PGU-00110: illegal SET option
  Cause: An invalid option for the SET command was specified.
  Action: Check the syntax of the SET command and issue the command again.

PGU-00111: illegal SHOW option
  Cause: An invalid option for the SHOW command was specified.
  Action: Check the syntax of the SHOW command and issue the command again.

PGU-00115: unexpected end of command
  Cause: An option was specified without the required arguments.
  Action: Check the syntax of the command and enter the command again with the
  appropriate arguments for options that require values.

PGU-00120: invalid STOPONERROR switch
  Cause: An invalid options switch was specified for the SET STOPONERROR
  command.
**Action:** Use either ON or OFF as an option for the SET STOPONERROR command.

**PGU-00122: invalid SET numeric parameter**

**Cause:** A character or an invalid value was specified when a number was expected as a value for a SET command option.

**Action:** Check the syntax of the command, use an appropriate number for the option, and enter the command again.

**PGU-00125: integer value overflow**

**Cause:** A numeric value was specified that was too large.

**Action:** Use a smaller number.

**PGU-00129: value out of range (1 - number)**

**Cause:** The specified value was out of range. The valid range is given by the error message.

**Action:** Use a number within the range specified by this message.

**PGU-00132: null hostname/password specified**

**Cause:** The hostname/password was not specified.

**Action:** Specify the correct hostname/password.

**PGU-00136: bad variable specification**

**Cause:** A variable was incorrectly specified using the VARIABLE command.

**Action:** Check the syntax of the command, then issue the command again.

**PGU-00137: syntax error in PL/SQL Block**

**Cause:** The PL/SQL block contains a syntax error.

**Action:** Correct the syntax error.

**PGU-00142: cannot recognize object type, owner or name**

**Cause:** The specified object type, owner, or name was not recognized.

**Action:** Specify a legal object type, owner, or name.

**PGU-00143: variable has not been defined**

**Cause:** The specified variable was not recognized.

**Action:** Specify an existing variable.

**PGU-00144: invalid object type for DESCRIBE**

**Cause:** The specified object type was not TABLE, VIEW, or PROCEDURE.

**Action:** Check that the object is a table, view, or procedure. If so, check that you specified the correct name and try again. If not, you describe the object.

**PGU-00145: invalid object name for DESCRIBE**

**Cause:** The specified table, view, stored procedure, or function was not recognized.

**Action:** Check the spelling and be sure to specify an existing table, view, stored procedure, or function.

**PGU-00149: invalid SERVEROUTPUT switch**

**Cause:** An invalid option was specified for the SET SERVEROUTPUT command.

**Action:** Check the syntax of the command, then issue the command again.
PGU-00300: internal error code; arguments: [number], [string]
  Cause: You have encountered an internal error.
  Action: Supported customers should contact Oracle Worldwide Support and provide the circumstances leading to the error and the complete set of messages.

PGU-00302: not connected to a database
  Cause: You must be connected to the database for the requested operation.
  Action: CONNECT to the database using a valid username and password before retrying the operation.

PGU-00304: input file I/O error [number] - input aborted
  Cause: A command file used as input to PGAU is corrupt or invalid.
  Action: Check the file before retrying the operation.

PGU-00305: command size exceeds internal buffer size (number)
  Cause: The SQL statement size exceeds PGAU's buffer size.
  Action: Shorten the SQL statement by removing extra blanks or by using intermediate statements as views, if necessary.

PGU-00306: monitor cycle interval time out of range (1 - number)
  Cause: You entered an invalid number for the cycle interval.
  Action: Enter a number between 1 and 3600 for the cycle interval. The number indicates seconds.

PGU-00307: cannot open spool file string
  Cause: PGAU tried to open a spool file after you entered SPOOL filename, but could not open the file. Possible causes are not enough disk space or inadequate privileges to create a file.
  Action: Determine why PGAU could not create a new file and retry.

PGU-00308: no spool file opened
  Cause: You entered SPOOL OFF, but you were not spooling currently so there was no file to close.
  Action: If you wish to capture session output, first use the SPOOL command to open a file, and then enter your commands before closing the file with SPOOL OFF.

PGU-00309: cannot close spool file string
  Cause: SPOOL OFF could not close the currently open spool file.
  Action: Check for an operating system reason that the spool file could not be closed.

PGU-00310: cannot open parameter file string
  Cause: PGAU cannot locate or open the file specified by the PFILE option, either because the file does not exist or because PGAU has insufficient privilege to open the file.
  Action: Make sure that the file exists in a location expected by PGAU and can be opened.

PGU-00311: data exceeds internal buffer size
  Cause: The results returned by a SQL query exceed the internal PGAU buffer.
  Action: Use the SET command to increase MAXDATA or decrease ARRAYSIZE.
PGU-00314: invalid parameter given on PGAU command line
  Cause: An unrecognized parameter was given on the PGAU command line.
  Action: Check the parameters given on the PGAU command line.

PGU-00315: cannot open command file string
  Cause: PGAU cannot locate the specified command file.
  Action: Verify the file's name and PGAU's access to it before retrying.

PGU-00317: version of tool conflicts with version [string] of DATA
  Cause: This version of the PGAU tool cannot process the DATA in the database.
  Action: You are attempting to use a tool that might cause damage to the current database. If the version of DATA is greater than the version of the tool, then you are using the wrong version of the tool. If the version of the tool is greater than the version of the DATA, check to see if there is an ORACLE-supplied SQL script to update the DATA to the correct version level.

PGU-00318: PGAU command line error [number]
  Cause: You made a syntax or typing error while entering a PGAU command line.
  Action: Check the syntax and try again.

PGU-00319: cannot locate pgau configuration file, string
  Cause: File mentioned cannot be located.
  Action: Make sure that the specified file exists before re-running PGAU.

PGU-00320: cannot open pgau configuration file, string
  Cause: File mentioned cannot be opened.
  Action: Make sure that the specified file is available for use by PGAU.

PGU-00322: total size of command line parameters exceeds buffer size
  Cause: You entered too many command line arguments and the PGAU buffer was exceeded.
  Action: Reduce the number of command line arguments.

PGU-00325: pfile too large
  Cause: The file you specified using PFILE is too large (exceeds 8K).
  Action: Reduce the size of the parameter file before specifying it again with PFILE.

PGU-00327: command not available in this mode
  Cause: You have specified a command that is not available in this mode.
  Action: Do not specify the command.

PGU-00328: insufficient privilege for this display
  Cause: You attempted to display a MONITOR display without sufficient privileges.
  Action: Contact the DBA to obtain the required privileges.

PGU-00331: cannot allocate enough memory for SQL Buffer
  Cause: There is not enough memory for the current SQL buffer.
  Action: Use the SET command to reduce MAXDATA.

PGU-00337: missing instance name
Cause: The instance name was not specified in the connect statement.
Action: Use 'connect username/password@instance' or 'connect username/password'.

PGU-00341: 'string' is an undefined bind variable
Cause: The SQL statement refers to an undefined bind variable.
Action: Use the VARIABLE statement to define the bind variable and re-execute the query.

PGU-00347: no offline tablespaces exist
Cause: The list box of set tablespace online contained 0 elements.
Action: No action is required.

PGU-00359: monitor already active
Cause: An instantiation of this monitor is already active.
Action: Cycle through windows until this monitor becomes visible.

PGU-00360: object to be described does not exist
Cause: The object in a DESCRIBE FUNCTION/PROCEDURE/PACKAGE statement does not exist.
Action: check that the object name and owner are correct and that the object exists.

PGU-00361: error during describe
Cause: An unexpected error occurred during a describe.
Action: Check the following error and correct the problem.

PGU-00362: object string is a package; use 'DESCRIBE <package>.<procedure>'
Cause: The named object is a package. DESCRIBE does not currently describe an entire package specification.
Action: Describe the package specification, as indicated in the message text.

PGU-00363: procedure or function string not found in the package
Cause: The named package does not contain the procedure or function specified.
Action: Specify a procedure or function within the package.

PGU-00364: object string is a remote object, cannot further describe
Cause: The specified object name contains a database link, or is a synonym that resolves to a name with a database link. Such objects cannot currently be described.
Action: Specify a local object.

PGU-00365: object string is invalid, it may not be described
Cause: The object must have been successfully compiled.
Action: Fix any errors in the object and recompile.

PGU-00366: name string is malformed, it must be of form [[a.|b.|c]@dblink
Cause: The name may have at most 3 parts and a dblink.
Action: Use a well-formed object name.

PGU-00370: mandatory field/list needs to be filled in
Cause: You tried to execute the dialog before filling in all required items.
Action: Fill in all required items and retry.

PGU-00371: cannot open/locate input help file, string
  Cause: You pressed the Help Key or chose an item from the Help Menu.
  Action: Put the help file in the location specified.

PGU-00372: cannot open/locate input index file, string
  Cause: You pressed the Help Key or chose an item from the Help Menu.
  Action: Put the index help file in the location specified.

PGU-00373: cannot allocate memory of size number from toolkit
  Cause: You pressed the Help Key or chose an item from the Help Menu.
  Action: Exit PGAU and re-enter and try again.

PGU-00374: could not set file position in string directly
  Cause: You pressed the Help Key or chose an item from the Help Menu.
  Action: The fseek() routine failed. Alternate chosen - no action is necessary.

PGU-00375: unexpected end of file, string
  Cause: You pressed the Help Key or chose an item from the Help Menu.
  Action: Exit PGAU and install the correct help file.

PGU-00376: mandatory field has to be filled in before navigation is possible
  Cause: Attempted to navigate to the next/previous item.
  Action: Fill in current field and then go to the next/previous item.

PGU-00377: mandatory list item has to be selected before navigation is possible
  Cause: Attempted to navigate to the next/previous item.
  Action: Select an item and then go to the next/previous item.

PGU-00378: an item has to be selected before help can be sought for it
  Cause: Attempted to obtain help before selecting an item.
  Action: Select an item first and re-execute.

PGU-00379: variable(s) not defined
  Cause: Attempted SHOW VAR[IABLES] [var-name] and the variable was not defined, or no variables were specified or defined.
  Action: Ensure the variables are correctly defined.

PGU-00380: procedural option required for this statement
  Cause: Attemt to execute a statement that requires the Procedural option was made, but the Procedural option is not installed.
  Action: This statement cannot be issued without the Procedural option. Install the Procedural option to execute this statement.

PGU-00381: error in the SERVEROUTPUT option
  Cause: Most likely the package DBMS_OUTPUT not installed. Check the accompanying messages for more information.
  Action: Check accompanying messages and take appropriate action.

PGU-00382: value string is not a recognizable file name for string
Cause: The value for the PGAU initialization variable (which points to the initialization file) is not a recognizable file name.
Action: Specify a valid file name or do not define the variable to avoid running the initialization file.

PGU-00383: file name string pointed to by string could not be opened
Cause: The file name pointed to by the PGAU initialization variable could not be opened.
Action: Specify an available file or do not define the variable to avoid running the initialization file.

PGU-00384: could not open pgau resource file, string
Cause: The specified file could not be opened.
Action: Make the file available to PGAU.

PGU-00385: could not locate pgau resource file, string
Cause: The specified file could not be located.
Action: Make sure file exists before rerunning PGAU.

PGU-00386: could not open toolkit resource file, string
Cause: The specified file could not be opened.
Action: Make the file available to PGAU.

PGU-00387: could not locate toolkit resource file, string
Cause: The specified file could not be located.
Action: Make sure file exists before rerunning PGAU.

PGU-00388: cannot start PGAU in screen mode; check if values are legal:
Cause: A variable was not properly set.
Action: Check the values listed by PGAU to see if they are correct.

PGU-00389: toolkit resource file name is defined to string
Cause: The specified file could not be located.
Action: Ensure the file specified exists and can be accessed.

PGU-00390: terminal type string is defined by string
Cause: Terminal type specified by <variable> may not be valid.
Action: Ensure the terminal specification is correct.

PGU-00391: value string is defined to string; legal values: string or string
Cause: The PGAU mode has been incorrectly defined.
Action: Define the value of the variable as one of the legal values.

PGU-20000: string of string statement failed for table string, rc=number
Cause: PGAU encountered a syntax error during parse operation <oper> of the statement <statement> for the table <table> with the indicated return code <rc>.
Action: Check the PGAU statement identifier names for proper spelling and punctuation, or other syntax errors.

PGU-20001: string of string variable of string statement failed for table string,
rc=number
**Cause:** The operation `<oper>` on the variable `<varname>` for the statement `<statement>` against the PG DD table `<table>` failed with return code `<rc>`.

**Action:** A semantic error has occurred. Check all the identifier names in the PGAU script.

**PGU-20002: unable to login to Oracle**

**Cause:** An error occurred attempting to logon to the Oracle server. Syntax checking only continues with the next statement.

**Action:** Ensure that the Oracle server containing the PG DD is operational.

**PGU-20003: unable to open the cursor**

**Cause:** Internal PGAU logic error - should not occur. An error occurred opening an SQL statement cursor. Syntax checking only continues with the next statement.

**Action:** Ensure that the Oracle server containing the PG DD is operational. Otherwise, reproduce the error with symptom documentation. Supported Customers should contact Oracle World Wide Support for assistance.

**PGU-20004: unable to close the cursor**

**Cause:** Internal PGAU logic error - should not occur. An error occurred closing an SQL statement cursor. Syntax checking only continues with the next statement.

**Action:** Ensure that the Oracle server containing the PG DD is operational. Otherwise, reproduce the error with symptom documentation. Supported Customers should contact Oracle World Wide Support for assistance.

**PGU-20005: unable to commit PG DD changes**

**Cause:** Internal PGAU logic error - should not occur. An error occurred attempting to commit changes to the PG DD. Syntax checking only continues with the next statement.

**Action:** Ensure that the Oracle server containing the PG DD is operational. Otherwise, reproduce the error with symptom documentation. Supported Customers should contact Oracle World Wide Support for assistance.

**PGU-20006: unable to logout from Oracle**

**Cause:** Internal PGAU logic error - should not occur. An error occurred during logoff from the Oracle server. Syntax checking only continues with the next statement.

**Action:** Ensure that the Oracle server containing the PG DD is operational. Otherwise, reproduce the error with symptom documentation. Supported Customers should contact Oracle World Wide Support for assistance.

**PGU-20007: unable to rollback PG DD changes**

**Cause:** Internal PGAU logic error - should not occur. An error occurred attempting to rollback changes from the PG DD. Syntax checking only continues with the next statement.

**Action:** Ensure that the Oracle server containing the PG DD is operational. Otherwise, reproduce the error with symptom documentation. Supported Customers should contact Oracle World Wide Support for assistance.

**PGU-30000: transaction string, version string specification generated to file string**

**Cause:** PGAU successfully completed generation of the TIP specification for transaction `<tranname>` and version `<version>` into file `<fileid>`.

**Action:** None required. This is an informational message.
PGU-30001: PGAU internal error - string
  Cause: An internal PGAU operation error has occurred.
  Action: Supported Customers should contact Oracle World Wide Support for assistance.

PGU-30002: >>> Initialization of string File Header <<<
  Cause: This record is written to the Trace or Log file upon initialization.
  Action: This is an informational message only.

PGU-30003: transaction string, version string body generated to file string
  Cause: PGAU successfully completed generation of the TIP body for transaction <tranname> and version <version> into file <fileid>.
  Action: None required. This is an informational message.

PGU-30008: failure to open file string
  Cause: Before complete initialization of LMS functions, PGAU tracing or logging to disks was requested, but PGAU failed to open the indicated trace or log file. <fileid>.
  Action: Ensure that write access exists to the file and that space for file growth is available.

PGU-30009: failure to close file string
  Cause: After termination of LMS functions, PGAU tracing or or logging to disks had been requested, but PGAU failed to close the indicated trace or log file. <fileid>.
  Action: Ensure that write access exists to the file and that space for file growth is available.

PGU-30010: failure to obtain string bytes of storage for string
  Cause: Before complete initialization of LMS functions, PGAU failed to obtain <bytes> of storage for <use>, commensurate with LMS initialization.
  Action: Increase the total amount of private storage available to PGAU during operation.

PGU-30012: invalid language environment (string), default used
  Cause: Before complete initialization of LMS functions, the environment variable LANGUAGE specified an invalid Oracle NLS language <lang>. The language environment variable SSTDLANG setting was used as the default.
  Action: Correct the LANGUAGE environment variable to specify a valid Oracle NLS Language.

PGU-30014: pgau message file string not found
  Cause: Before complete initialization of LMS functions, the PGAU message file <fileid> could not be located.
  Action: Ensure that the Oracle message file resides in $ORACLE_HOME/pg4appc/mesg directory and is not damaged. Valid fileid’s are of the form pguxx.msb where xx is the country code.

PGU-30024: memory allocate failure: string for string bytes
  Cause: Insufficient memory available. Storage failed to be allocated for the reason <purpose> of the size <len> specified.
**Action:** Increase the total amount of private storage available to PGAU during GENERATE operation.

**PGU-30026: open failure: file string in string mode**
**Cause:** Error during fopen processing <file> for <mode> access.
**Action:** Ensure PGAU has access to the file specified, and write access if file is used for output.

**PGU-30028: file string failure: string rc string**
**Cause:** An error occurred during <oper> processing for the file <fileid> with return code <rc>. File operations include: 'fclose' to close input or output files 'remove' to erase, delete, or remove output files
**Action:** Ensure PGAU has access to the file specified, and write access if file is used for output.

**PGU-30030: read failure: string from string after offset string**
**Cause:** Error during fgets <oper> processing for <file> at <offset> bytes into the file.
**Action:** Ensure PGAU has access to the file specified.

**PGU-30031: write failure: string to string at number for string bytes**
**Cause:** Error during fputs <oper> processing for <file> from buffer at <addr> for <len> bytes of data.
**Action:** Ensure PGAU has access to the file specified, and that disk space is available for file growth.

**PGU-30032: write log failure: rc %4li, message no was string**
**Cause:** fprintf returned the error code <rc> attempting to print PGAU error message number <msgno>. The indicated event message was being written when the error occurred.
**Action:** Check to insure that PGAU has write access to the pgau.log file and that disk space is available for file growth.

**PGU-30033: write trace failure: rc %4li, message no was string**
**Cause:** fprintf returned the error code <rc> attempting to print PGAU trace message number <msgno>. The indicated trace message was being written when the error occurred.
**Action:** Check to insure that PGAU has write access to the pgau.trc file and that disk space is available for file growth.

**PGU-30035: file control failure: string for string, rc string**
**Cause:** Error during control function <oper> processing for <file> with error code <rc> returned.
**Action:** Ensure PGAU has access to the file specified, and that disk space is available for file growth.

**PGU-30036: no ORACLE_HOME environment variable available**
**Cause:** The ORACLE_HOME environment variable setting is missing or invalid.
**Action:** Correct the ORACLE_HOME environment variable to specify the current Oracle home directory.

**PGU-30120: missing string attribute for parm string, field string f#string**
Cause: The parameter <parm> specifies an aggregate data record for which field <field> with PG DD field id number <f#> was being processed, but the field had no relative level attribute <attr>. Typical relative level attributes are: nn ...
COBOL-clauses for IBMVSCOBOLII 'LEVEL' attribute Each attribute is stored as a separate row in the PG DD, and the missing attribute's row may have been deleted from the PG DD.

Action: Check the PG DD to ensure that the failing field has a level attribute assigned.

PGU-30122: level limit: field f#=string nest level string exceeds string of string

Cause: PGAU was processing nested records when the next field <f#> for nest level <lev> exceeded the product defined minimum or maximum nest level <limit>.

Action: Simplify the data record definition to reduce nest levels.

PGU-30123: level limit: level string field string can't follow level string

Cause: PGAU was processing nested records when the next field at level <levN>, identified by <fld#>, occurred after fields at current level <levC>. Additional fields at intermediate levels should have preceded this field. This error happens when special fields such as COBOL RENAMES (at LEVEL 66) appear next after the level 01 definition.

Action: Correct the data record definition to place the special fields in their proper sequence, and/or insert fields being modified ahead of the special modifying field.

PGU-30220: allocate failure: string storage of string bytes

Cause: Insufficient memory available for the specified purpose. Requestor attempted to allocate a <type> control block of <len> size specified.

Action: Increase the total amount of private storage available to PGAU during GENERATE operation.

PGU-30233: control block load failure: string block from PG DD

Cause: Control block of the specified <type> was being loaded with a row from the PG Data Dictionary when an error occurred. A preceding message issued specifies the cause.

Action: Refer to the Action for the preceding message.

PGU-30234: attribute array for string exceeded by PG DD rows > string

Cause: A control block of the specified <type> was being loaded with attribute rows from the PG Data Dictionary when the <limit> was exceeded.

Action: Reproduce the error with tracing enable and attempt to determine what PG DD rows are exceeding the attribute limit and delete any possible duplicates. Supported Customers should contact Oracle World Wide Support for assistance.

PGU-30300: work file output error writing string

Cause: PGAU encountered an error writing a PL/SQL code segment to the indicated work file <fileid>.

Action: Ensure PGAU has access to the file specified, and that disk space is available for file growth.

PGU-30301: TIP output error appending string to string

Cause: PGAU encountered an error appending the work file <infile> to the TIP output file <outfile>.
**Action:** Ensure PGAU has access to both files specified, and that disk space is available for TIP output file growth.

**PGU-30302: TIP output error writing function string to file string**

**Cause:** PGAU encountered an error appending the TIP function definition `<func>` to the work output file `<file>`. Error occurred during generation of the TIP Package Specification.

**Action:** Ensure PGAU has write access to the file specified, and that disk space is available for TIP output work file growth.

**PGU-30303: TIP generation error writing variable string to file string**

**Cause:** PGAU encountered an error appending the TIP variable definition `<var>` to the work output file `<file>`. Error occurred during generation of the TIP Package Specification.

**Action:** Ensure PGAU has write access to the file specified, and that disk space is available for TIP output work file growth.

**PGU-30304: TIP generation warning: string name truncated to string characters**

**Cause:** This is a warning of possible non-unique PL/SQL names. PGAU encountered record field names which combined exceed the maximum PL/SQL name length, and the last field name specified `<field>` was truncated to the length `<len>`. The condition occurred during generation of the TIP Package Specification for parameter variables.

**Action:** Revise the PG DD entries for the defined parameters and either reduce the number of nested record levels or shorten the record field names.

**PGU-30305: TIP generation error defining record type string for string**

**Cause:** An error occurred during generation of a nested record type `<type>` for the indicated field name `<name>`. This message should be preceded by the specific error. Condition occurred during generation of the TIP Package Specification for parameter variables.

**Action:** Follow recommended action for the first error message issued.

**PGU-30306: TIP generation: invalid PL/SQL parameter mode string for string**

**Cause:** The parameter call mode `<mode>` specified for the parameter `<parm>`. Valid parameter modes are IN, OUT or IN OUT. Probable PG DD content error.

**Action:** Revise the PG DD entries for the indicated parameter and correct the PL/SQL parameter call mode for the indicated parameter.

**PGU-30307: TIP generation: invalid PL/SQL variable type string for string**

**Cause:** An invalid PL/SQL record type `<type>` was encountered while generating conversion statements for the data field `<field>`. The indicated `<type>` is neither valid PL/SQL nor a nested record type, for the indicated record field `<field>`. Probable PG DD content error.

**Action:** Revise the PG DD entries for the indicated parameter and either correct the PL/SQL variable type for the field, or define a corresponding nested record for the field.

**PGU-30308: TIP generation: name string.string exceeds max length of string characters**

**Cause:** The number of nested groups and lengths of their field names in the input data, when concatenated to form a fully qualified PL/SQL record field variable name `<recname.varname>`, exceeded the maximum length allowed by PL/SQL.
<maxlen>. Condition occurred during generation of the TIP Package Specification for parameter variables.

**Action:** Revise the PG DD entries for the defined parameters and either reduce the number of nested record levels or shorten the record field names.

PGU-30309: TIP generation: call string parm string exceeds PGAXFER string limit (string)

**Cause:** The TIP function call <cname> at parm <pname> exchanges too many parameters for the <type> buffers on a PGAXFER RPC. The PGAXFER parameter limit is <limit>. The indicated <type> is either 'SEND' or 'RECEIVE'. Probable PGAU DEFINE CALL error, coding too many parameters. Note also that IN OUT mode parameters are present in both send and receive buffers and may be causing the excess.

**Action:** Revise the transaction and call to specify the excessive parameters on an additional function call and include that added call in the transaction definition.

PGU-30314: TIP generation: failure converting record type string for string

**Cause:** An occurred during generation of PL/SQL statements for conversion of a nested record type <type> for the indicated field name <name>. This message should be preceded by the specific error. Condition occurred during generation of the TIP Package Specification for parameter variables.

**Action:** Follow recommended action for the first error message issued.

PGU-30315: TIP generation: parameter conversion error for string, string

**Cause:** Failure to generate PL/SQL conversion statements for the indicated parameter data <dname> for function <call>. This message may be preceded by specific messages describing the error. Possible errors include disk access, invalid datatype, and/or missing nested record or field datatype definitions.

**Action:** Follow recommended action for the first error message issued, and ensure the PG DD entries for the indicated parameter are correct and that disk access is allowed to output work files.

PGU-30316: TIP generation: PL/SQL string control logic for string string

**Cause:** Failure to generate PL/SQL statement <stmt> used to control TIP processing of the field <fname> for compiler clause <clause>. Typical IBMVSCOBOLII clauses are: OCCURS (requires FOR/LOOP logic) OCCURS DEPENDING ON (requires FOR/LOOP logic) REDEFINES (requires IF/END IF logic) This message may be preceded by specific messages describing the error. Possible errors include disk access, invalid datatype, and/or missing nested record or field datatype definitions.

**Action:** Follow recommended action for the first error message issued, and ensure the PG DD entries for the indicated parameter are correct and that disk access is allowed to output work files.

PGU-30317: TIP generation: PL/SQL string statements for string string

**Cause:** Failure to generate PL/SQL control logic <stmt> to process TIP parameter <dataname> in function <callname>. This message may be preceded by specific messages describing the error. Possible errors include disk access, invalid datatype, and/or missing nested record or field datatype definitions.

**Action:** Follow recommended action for the first error message issued, and ensure the PG DD entries for the indicated parameter are correct and that disk access is allowed to output work files.
PGU-30318: TIP generation: string string, PL/SQL string for string

Cause: Data field <d-field> <f#> was referenced by other fields which required PL/SQL statements <stmt> be generated for the value <num>, but an error occurred during the generation of the statements. This message may be preceeded by specific messages describing the error. Possible errors include disk access and memory exceeded.

Action: Follow recommended action for the first error message issued, and ensure that disk access is allowed to output work files.

PGU-30319: TIP generation: string string

Cause: TIP execution diagnostics for PG Data Dictionary References PKGEX(DR) was requested on the PGAU GENERATE statement, but the PG DD reference for <type> <id#> couldn’t be generated. This message may be preceeded by specific messages describing the error. Possible errors include disk access and memory exceeded.

Action: Follow recommended action for the first error message issued, and ensure that disk access is allowed to output work files.

PGU-30600: TIP generation: invalid COBOL syntax in string:

Cause: The COBOL data field <field> specifies conflicting or invalid PIC <mask> and USAGE <maskopts> clauses. The invalid PIC and USAGE definitions were selected from the PG DD to identify field conversion function calls. PGAU also issues messages 30601 for <mask> and 30602 for <maskopts>

Action: Use the pgddsf.sql script to reproduce the selected rows and then correct the mask and maskopts columns for the stated field in the PG DD.

PGU-30601: COBOL mask: string

Cause: Issued to identify <mask> for the preceding message.

Action: See preceding message.

PGU-30602: COBOL maskopts: string

Cause: Issued to identify <maskopts> for the preceding message.

Action: See preceding message.

PGU-30604: missing string attribute for string

Cause: A COBOL field <field> containing a clause of the form <syntax> required a missing attribute <attr> corresponding to <token>. PGAU issues messages 30603 and 30604 consecutively for <field>, <syntax>, <attr>, and <token>. Typical IBMVSCOBOLII required token attributes are: field OCCURS int-1 TIMES where 'int-1' is the token for attribute 'regrpff' field OCCURS int-1 TO int-2 TIMES DEPENDING ON name-1 where 'int-1' is the token for attribute 'regrpff' 'int-2' is the token for attribute 'regrpff' 'name-1' is the token for attribute 'regrpff' field RENAMES name-1 THRU name-2 where 'name-1' is the token for attribute 'renamemf' 'name-2' is the token for attribute 'renamemf' field RENAMES name-1 WHEN name-2 = value where 'name-1' is the token for attribute 'remapsmf' 'name-2' is the token for attribute 'remapsml' 'value' is the token for attribute 'remapsml' or for attribute 'remapsml' field LENGTH IS name-1 where 'name-1' is the token for attribute 'length' Each attribute is stored as a separate row in the PG DD, and the missing attribute's row may have been deleted from the PG DD.

Action: In the PG DD, redefine the referencing data item to restore the missing attribute row.

PGU-30605: TIP generation: invalid COBOL syntax in unknown field:
Cause: An unidentified COBOL field specifies conflicting or invalid PIC <mask> and USAGE <maskopts> clauses. The invalid PIC and USAGE definitions were selected from the PG DD to identify global TIP conversion variables. PGAU also issues messages 30601 for <mask> and 30602 for <maskopts>.

Action: Use the pgddsxf.sql script to reproduce the selected rows and then correct the mask and maskopts columns for the invalid row in the PG DD.

PGU-30606: TIP generation: missing multi-byte NLS name for string:

Cause: The COBOL data field <field> specifies character data in the PIC <mask> and USAGE <maskopts> clauses which require translation with a multi-byte character set (MBCS), but no Oracle MBCS NLS name was specified. The MBCS-oriented PIC and USAGE definitions were selected from the PG DD to identify field conversion function calls. PGAU also issues messages 30601 for <mask> and 30602 for <maskopts>.

Action: Use the pgddsxa.sql script to reproduce the selected rows and then either correct the mask and maskopts columns for the stated field in the PG DD to not require MBCS translation, or use the PGAU REDEFINE DATA FIELD NLS_ LANGUAGE(nlsname) parameter to specify an Oracle MBCS NLS name for the field, or specify the NLS_MBCS(nlsname) parameter on the PGAU DEFINE TRANSACTION statement.

PGU-30611: references missing field string specified for string

Cause: The data field <d-field> containing a clause of the form <syntax> references a missing field <r-field> specified by the clause word <token>. PGAU issues messages 30610 and 30611 consecutively for <d-field> <syntax> <r-field> and <token>. Typical IBM/VSCOBOLII clause syntax for this error includes: d-field OCCURS int-1 TIMES d-field OCCURS int-1 TO int-2 TIMES DEPENDING ON name-1 d-field RENAMES name-1 THRU name-2 d-field REDEFINES name-1 WHEN name-2 = value d-field LENGTH IS name-1 The clause references a field <r-field> specified by the word <token>. PGAU GENERATE searched previous fields within the current parameter but failed to find the named field <r-field>. The word <token> may be misspelled in the defining clause or the referenced field whose name should match <token> may be missing from, or misspelled in the PG DD.

Action: In the PG DD, redefine the entry for <d-field> to change its clause <token> to specify the correct name of the intended field <r-field>, or redefine the data name of the intended field <r-field> to match the subsequent clause's <token> reference. Also ensure the data field <d-field> containing the clause follows the intended field <r-field> in the data definition.

PGU-30622: unable to insert string value for field string

Cause: During TIP generation, an attempt to insert a new attribute value for the <attr> attribute for the named field <fname> failed.

Action: Check for an Oracle error message preceding this message to determine the cause of the problem.

PGU-30631: no alignment for environment string string, datatype string string

Cause: The data field <d-field> <f#> specified an attribute which specifies remote host boundary alignment. The PG DD environment tables were searched for alignment information for environment <ename> compiler <compno> datatype <dtype> datatype alignment group <dagno>, but no entries were found matching these characteristics. PGAU issues messages 30630 and 30631 consecutively for <d-field> <f#> and <ename> <compno> <dtype> <dagno>. PGAU requires the alignment information to properly align the remote host data in the TIP transfer.
buffers. Supported: environment and compilers are; IBM370 for compiler IBMVSCOBOLII alignment attributes are; <d-field> ... PIC S9(n) <dtype> SYNC <d-field> ... PIC S9(n) <dtype> SYNCHRONIZE datatype values <dtype> may be; COMP COMPUTATIONAL COMP-4 COMPUTATIONAL-4 datatypes grouped under <dtag> by length/alignment: tag = 1 for 2-byte length aligned on 2-byte boundary tag = 2 for 4-byte length aligned on 4-byte boundary Possible causes are:

- The TRANSACTION entry in the PG DD for the TIP being generated may have specified an invalid ENVIRONMENT.
- The DATA entry in the PG DD being referenced in the TIP function call being generated may have specified an invalid LANGUAGE.
- The field datatype and/or length within the DATA entry may be invalid or unsupported.
- The PG DD may be unavailable, in which case previous error messages will indicate problems accessing the PG DD.

**Action:** In the PG DD, redefine the TRANSACTION or DATA entries to correct the specification of ENVIRONMENT, LANGUAGE or the field datatype and attributes. Ensure the Oracle server supporting the PG DD is active. If the error persists, reproduce the error with tracing enabled. Supported customers should contact Oracle Worldwide Support for assistance.

**PGU-30632: TIP generation: string string, string ignored for string**

**Cause:** The data field <d-field> <f#> specified a modifying clause <clause> which is ignored for datatype <dtype> by the compiler in the remote host environment. For supported: environment and compilers; IBM370 for compiler IBMVSCOBOLII <clause> is ignored when <dtype> is; SYNC | SYNCHRONIZE COMP-3 | COMPUTATIONAL-3 SYNC | SYNCHRONIZE DISP | DISPLAY

**Action:** This is a warning message, PGAU execution continues. No action is necessary. The user may wish to ensure the resulting TIP data conversion is consistent with the remote host data format.

**PGU-30635: TIP generation: string string, nested repeating group for string**

**Cause:** The data field <d-field> <f#> specified a repeating group clause <clause> while a previous repeating group is active. The repeating group in <d-field> cannot be nested within a previous repeating group. TIP’s use PL/SQL tables to implement repeating groups, and PL/SQL tables are limited to a single key or subscript which cannot support nested repeating groups (a table of tables).

**Action:** Redefine the data such that the previous repeating group is ended before beginning another repeating group.

**PGU-30636: TIP generation: string string, string attribute value (string) ignored**

**Cause:** The data field <d-field> <f#> specified an attribute <attr> whose value <attrval> is being ignored. Attribute values are ignored for supported: environment and compilers; IBM370 for compiler IBMVSCOBOLII when <attr> is the <attrval> is ignored: SYNC | SYNCHRONIZE LEFT JUST | JUSTIFY LEFT

**Action:** This is a warning message, PGAU execution continues. No action is necessary. The user may wish to ensure the resulting TIP data conversion is consistent with the remote host data format.

**PGU-30637: TIP generation: string string, string attribute value (string) invalid**

**Cause:** The data field <d-field> <f#> specified an attribute <attr> whose value <attrval> is invalid or unsupported.
**Action:** In the PG DD, redefine the FIELD entry to correct the attribute clause to specify a supported value.

**PGU-35002: failure to open cursor for statement string: rc string**

**Cause:** Open of an Oracle cursor for the PGAU SQL statement <stmtname> failed with Oracle error <rc>. This message is preceded by an Oracle Server message for the specific error encountered.

**Action:** Ensure the Oracle server supporting the PG DD is active. If the error persists, reproduce the error with tracing enabled. Supported customers should contact Oracle Worldwide Support for assistance.

**PGU-35003: failure to parse SQL statement string for cursor string: rc string**

**Cause:** Parsing of the PGAU SQL statement <stmtname> for Oracle cursor <curno> failed with Oracle error <rc>. This message is preceded by an Oracle Server message for the specific error encountered.

**Action:** Ensure the Oracle server supporting the PG DD is active. If the error persists, reproduce the error with tracing enabled. Supported customers should contact Oracle Worldwide Support for assistance.

**PGU-35004: failure to bind string for cursor string statement string: rc string**

**Cause:** Binding input variable <invar> for Oracle cursor <curno> to the PGAU SQL statement <stmtname> failed with Oracle error <rc>. This message is preceded by an Oracle Server message for the specific error encountered.

**Action:** Ensure the Oracle server supporting the PG DD is active. If the error persists, reproduce the error with tracing enabled. Supported customers should contact Oracle Worldwide Support for assistance.

**PGU-35005: failure to define string for cursor string statement string: rc string**

**Cause:** Defining output variable <outvar> for Oracle cursor <curno> to the PGAU SQL statement <stmtname> failed with Oracle error <rc>. This message is preceded by an Oracle Server message for the specific error encountered.

**Action:** Ensure the Oracle server supporting the PG DD is active. If the error persists, reproduce the error with tracing enabled. Supported customers should contact Oracle Worldwide Support for assistance.

**PGU-35006: failure to execute for cursor string statement string: rc string**

**Cause:** Executing Oracle cursor <curno> PGAU SQL statement <stmtname> failed with Oracle error <rc>. Possible error in PGAU GENERATE statement transaction or version parameters, or possible missing rows or misspelled in the PG DD for the requested transaction. This message is preceded by an Oracle Server message for the specific error encountered.

**Action:** Check that all call, data, and attribute definitions associated with the requested transaction and version are properly defined in the PG DD. If the error persists, reproduce the error with tracing enabled. Supported customers should contact Oracle Worldwide Support for assistance.

**PGU-35007: failure to fetch for cursor string statement string: rc string**

**Cause:** Fetch using Oracle cursor <curno> PGAU SQL statement <stmtname> failed with Oracle error <rc>. Possible error in PGAU GENERATE statement transaction or version parameters, or possible missing rows or misspelled in the PG DD for the requested transaction. This message is preceded by an Oracle Server message for the specific error encountered.
**Action:** Ensure the Oracle server supporting the PG DD is active. Check that all call, data, and attribute definitions associated with the requested transaction and version are properly defined in the PG DD. If the error persists, reproduce the error with tracing enabled. Supported customers should contact Oracle Worldwide Support for assistance.

**PGU-35008: failure to close cursor**

**string** for statement **string:** **rc** **string**

**Cause:** Close of Oracle cursor `<curno>` for PGAU SQL statement `<stmtname>` failed with rc `<rc>`. This message is preceded by an Oracle Server message for the specific error encountered.

**Action:** Ensure the Oracle server supporting the PG DD is active. If the error persists, reproduce the error with tracing enabled. Supported customers should contact Oracle Worldwide Support for assistance.

**PGU-35009: no transaction rows for statement**

**string**, **string** **string:** **rc** **string**

**Cause:** No Transaction rows were fetched from the PG DD for PGAU SQL statement `<stmt>` with transaction name `<tnname>` and transaction version `<tver>`. The Oracle error code is `<rc>`. Either the transaction name and version supplied on the GENERATE statement were invalid or the transaction entry is missing from the PG DD. This message is preceded by an Oracle Server message for the specific error encountered.

**Action:** Ensure the requested transaction and version are properly defined in the PG DD or correct the GENERATE statement.

**PGU-35010: no string rows for statement**

**string**, **id** no **string:** **rc** **string**

**Cause:** No `<type>` rows were fetched from the PG DD for PGAU SQL statement `<stmt>` with id number `<idno>`. The Oracle error code is `<rc>`. Either the parent PG DD entry references an invalid subordinate entry or the entry is missing from the PG DD. This message is preceded by an Oracle Server message for the specific error encountered.

**Action:** Ensure the requested transaction and version are properly defined in the PG DD or correct the GENERATE statement.

**PGU-35011: no environment rows for statement**

**string**, **string** **string:** **rc** **string**

**Cause:** No Environment rows were fetched from the PG DD for PGAU SQL statement `<stmt>` with environment name `<ename>` and compiler number `<compno>`. The Oracle error code is `<rc>`. Either the environment specified for the transaction or the compiler specified for the data entry in the transaction were invalid, or the entries are missing from the PG DD. This message is preceded by an Oracle Server message for the specific error encountered.

**Action:** Ensure the requested transaction and version are properly defined in the PG DD or correct the GENERATE statement.

**PGU-35012: missing transaction entry**

**string** **string**

**Cause:** The transaction `<tname>` `<tver>` was not found in the PG DD. Either the transaction name and version requested in the GENERATE statement were invalid or the transaction specified in a previous DEFINE TRANSACTION `<tname>` may have been deleted from or altered in the PG DD. This message may be preceded by specific messages describing the error.

**Action:** Correct the requested transaction and version definitions in the PG DD or correct the GENERATE statement.

**PGU-35013: missing call entry for transaction**

**string** **string** (**string**)
Cause: A call entry under transaction definition \texttt{<tname> <tver> (<tin>)} was not found in the PG DD. The call entry associated with the transaction (as specified in a previous \texttt{DEFINE TRANSACTION ... CALL(cname)}) may have been deleted from or altered in the PG DD. This message may be preceded by specific messages describing the error.

Action: Correct the requested transaction and/or call definitions in the PG DD or correct the \texttt{GENERATE} statement to request a different transaction.

PGU-35014: missing parm entry for transaction \texttt{string string (string)} call \texttt{string string (string)}

Cause: A parameter or data entry for transaction \texttt{<tname> <tver> (<tin>), call \texttt{<cname> <cver> (<cin>)} was not found in the PG DD. The parm or data entry associated with the call (as specified in a previous \texttt{DEFINE CALL <cname> ... PARMS(dname)}) may have been deleted from or altered in the PG DD. This message may be preceded by specific messages describing the error.

Action: Correct the requested transaction and/or call definitions in the PG DD or correct the \texttt{GENERATE} statement to request a different transaction.

PGU-35015: missing field entry for transaction \texttt{string string (string)} call \texttt{string string (string) parm string data string string (string)}

Cause: A data field entry for transaction \texttt{<tname> <tver> (<tin>), call \texttt{<cname> <cver> (<cin>), parm \texttt{<relno> data \texttt{<dname> <dver> (<din>)}} was not found in the PG DD. The field entry associated with this data (as specified in the input file field position or \texttt{FIELD(fname)} of a previous \texttt{DEFINE} or \texttt{REDEFINE DATA} statement) may have been deleted from or altered in the PG DD. This message may be preceded by specific messages describing the error.

Action: Correct the requested transaction and/or call definitions in the PG DD or correct the \texttt{GENERATE} statement to request a different transaction.

PGU-35016: missing formatted conversion entry for transaction \texttt{string string}

Cause: For transaction \texttt{<tname> <tver>}, the data field usage, mask, and maskopts entries were not found in the PG DD. PG DD field entries are selected with usage='PASS' and not null mask and maskopts columns, to identify which data fields will use UTL_RAW MAKE_..._FORMAT conversions. Possible invalid entries in pga_fields( usage,mask,maskopts ) columns. This message may be preceded by specific messages describing the error.

Action: Correct the data definitions for the requested transaction in the PG DD.

PGU-35017: missing environment \texttt{string string for # string d# string}

Cause: The combined environment \texttt{<ename> <compno> was not found in the PG DD for transaction id# <tin> and data id# <din>. The environment name stored in the transaction entry and the compiler no stored in a call parameter data entry have no environment rows stored in the PG DD environment tables. This message may be preceded by specific messages describing the error.

Action: Ensure the Oracle server supporting the PG DD is active, and that the \texttt{TRANSACTION ENVIRONMENT} name and the \texttt{DATA LANGUAGE} name are defined in the PG DD with supported values. If the error persists, reproduce the error with tracing enabled. Supported customers should contact Oracle Worldwide Support for assistance.

PGU-35018: failed select for statement \texttt{string, string: rc string}

Cause: No information was fetched from Oracle dual for SQL statement \texttt{<stmt> with date format <dfmt> and time format <tfmt>. The Oracle error code is <rc>}. Either the date and time formats specified are invalid or some other Oracle server
error occurred. This message is preceded by an Oracle Server message for the specific error encountered.

**Action:** Ensure the Oracle server supporting PGAU is active. If the error persists, reproduce the error with tracing enabled. Supported customers should contact Oracle Worldwide Support for assistance.

**PGU-39100: EP**

Action: None

PGU-39610: TG string for string #string string, string
CAUSE: TIP package generation tracing active. Successful generation of TIP Function. This trace entry is written at the completion of generation for every TIP public function. There should be one trace of this type for every Call defined in the Transaction.
Action: None

PGU-39620: TG rc %4li, string
CAUSE: TIP package generation tracing active. Successful alignment/offset computation
Action: None

PGU-41000: invalid field definition syntax
Cause: An field definition is invalid. There may be invalid punctuation or an invalid keyword present.
Action: Delete invalid punctuation; replace invalid keyword.

PGU-41001: unexpected end of input
Cause: An unexpected end-of-file condition has occurred in the PGAU command stream.
Action: Check the PGAU statement for proper syntax and premature ending on the last line.

PGU-41002: improper REPORT statement
Cause: There is a syntax error in the REPORT statement.
Action: Check for mispelled items or unbalanced parentheses within the REPORT statement.

PGU-41003: invalid data field definition name
Cause: A DEFINE or REDEFINE DATA statement has specified an invalid field name for a field definition. The field name may be missing. A field name must begin with an alphabetic character and contain only alphanumeric characters or an underscore ('_'). Syntax checking only continues with the next statement.
Action: Correct the specification of the field name or its delimiters. Supply the field name if it is missing.

PGU-41004: invalid delimiter
Cause: An invalid delimiter has been found (such as a parenthesis or comma in the wrong place.
Action: The delimiter may have to be deleted. Or there may be tokens missing before the delimiter.

PGU-41005: invalid PGAU statement syntax
Cause: A token has been found which is not a valid PGAU keyword, delimiter, or identifier name. Syntax checking only continues with the next statement.
Action: Correct the PGAU statement.

PGU-41006: value for parameter 'string' missing
Cause: The parameter keyword <keyword> was properly specified but parameter value was not found. Syntax checking only continues with the next statement.
Action: Supply the missing parameter value or remove the keyword from the PGAU statement. PGAU parameter values should be enclosed in parentheses immediately following the keyword with no intervening space.

PGU-41007: parameter 'string' was previously specified
Cause: The parameter <dupparm> has been specified earlier in a PGAU statement and is only allowed once. Syntax checking only continues with the next statement.
Action: Remove one of the duplicated specifications from the statement.

PGU-41008: invalid DATA definition dname specified
Cause: An invalid token has been specified for the data name for a DEFINE DATA or REDEFINE DATA statement. A DATA identifier dname must begin with
an alphabetic character and contain only alphanumeric characters. Syntax checking only continues with the next statement.

**Action:** Correct the DATA dname identifier in the statement.

**PGU-41012: invalid PLSDNAME parameter**

**Cause:** The parameter specified in the PLSDNAME clause of a DEFINE or REDEFINE DATA statement does not comply with PL/SQL syntax for PL/SQL variable names. Syntax checking only continues with the next statement.

**Action:** Correct the PLSDNAME parameter to use a name which complies with PL/SQL syntax for data variables.

**PGU-41013: invalid LANGUAGE parameter**

**Cause:** The LANGUAGE parameter in a DEFINE or REDEFINE DATA statement is not a valid PGA Compiler Language. Syntax checking only continues with the next statement.

**Action:** Correct the LANGUAGE parameter to specify a valid PGA Compiler language. Valid languages are: "IBMVSCOBOLII"

**PGU-41014: invalid USAGE parameter**

**Cause:** The USAGE parameter in a DEFINE or REDEFINE DATA statement is not a valid PGAU usage. Syntax checking only continues with the next statement.

**Action:** Correct the USAGE parameter to specify a valid use. Valid use choices are SKIP, ASIS, PASS, and NULL.

**PGU-41015: USAGE parameter was previously specified**

**Cause:** The USAGE parameter has already been specified in a DEFINE or REDEFINE DATA statement and is only allowed once per data definition. Syntax checking only continues with the next statement.

**Action:** Remove the second specification of USAGE from the PGAU statement.

**PGU-41016: LANGUAGE parameter was previously specified**

**Cause:** The LANGUAGE parameter has already been specified in a DEFINE or REDEFINE DATA statement and is only allowed once per data definition. Syntax checking only continues with the next statement.

**Action:** Remove the second specification of LANGUAGE from the PGAU statement.

**PGU-41017: PLSDNAME parameter was previously specified**

**Cause:** The PLSDNAME parameter has already been specified in a DEFINE or REDEFINE DATA statement and is only allowed once per data definition. Syntax checking only continues with the next statement.

**Action:** Remove the second specification of PLSDNAME from the statement.

**PGU-41018: invalid COMPOPTS parameter**

**Cause:** The COMPOPTS parameter in a DEFINE or REDEFINE DATA statement is not a valid compiler option string recognized by PGAU. Syntax checking only continues with the next statement.

**Action:** Correct the COMPOPTS parameter to specify valid options. The only valid option is 'TRUNC(BIN)'.

**PGU-41019: COMPOPTS parameter was previously specified**
Cause: The COMPOPTS parameter has already been specified in a DEFINE or REDEFINE DATA statement and is only allowed once per data definition. Syntax checking only continues with the next statement.

Action: Remove the second specification of COMPOPTS from the PGAU statement.

PGU-41020: invalid CALL definition cname specified
Cause: The token is not a valid call identifier name for a DEFINE CALL statement. A CALL identifier cname must begin with an alphabetic character and contain only alphanumeric characters. Syntax checking only continues with the next statement.

Action: Correct the CALL cname identifier in the statement.

PGU-41022: invalid PKGCALL parameter
Cause: The function name specified in the PKGCALL parameter of a DEFINE CALL statement does not comply with PL/SQL syntax for PL/SQL function names. Syntax checking only continues with the next statement.

Action: Correct the PKGCALL parameter to use a name which complies with PL/SQL syntax for function calls.

PGU-41025: invalid VERSION number specified
Cause: The token is not a valid version number in a PGAU DEFINE or UNDEFINE CALL or TRANSACTION statement, or in a GENERATE statement. Valid version numbers are all numeric and must match a the Oracle sequence object value reported by a previous DEFINE statement. Syntax checking only continues with the next statement.

Action: Correct the VERSION number in the statement.

PGU-41026: PARMS parameter was previously specified
Cause: The PARMS parameter has already been specified in a DEFINE CALL statement and is only allowed once per call definition. Syntax checking only continues with the next statement.

Action: Remove the second specification of PARMS from the statement.

PGU-41029: invalid TRANSACTION CALL cname specified
Cause: The token is not a valid call identifier name for specifying CALLs in a DEFINE TRANSACTION statement. A CALL identifier cname must begin with an alphabetic character and contain only alphanumeric characters, and must have originated in a previous DEFINE CALL statement. Syntax checking only continues with the next statement.

Action: Correct the TRANSACTION CALL cname parameter in the statement.

PGU-41030: NLS_LANGUAGE parameter was previously specified
Cause: The NLS_LANGUAGE parameter has already been specified in a DEFINE TRANSACTION statement and is only allowed once per transaction definition. Syntax checking only continues with the next statement.
**Action:** Remove the second specification of NLS_LANGUAGE from the statement.

**PGU-41031:** parameter 'string' specifies undefined Oracle NLS name 'string'

**Cause:** The PGAU parameter <parm> specifies an Oracle NLS language name <nlsname> which is not defined on the Oracle server to re PGAU executes. which PGAU is connected. The language <nlsname> is not defined possibly because it was not selected when Oracle was installed, or the GENERATE’d TIPS are intended to execute on another Oracle, or it is not a valid Oracle NLS Language, i.e. misspelled or unsupported. Syntax checking only continues with the next statement.

**Action:** Correct the parameter value to specify a valid Oracle NLS Language, or install the language, or ensure the TIPS execute on a server which has the NLS language installed, (in which case this message may be considered a warning). Valid languages must begin with an alphabetic character, contain only alphanumeric characters, not exceed 40 characters in length. Supported customers may contact Oracle Worldwide Support for assistance with installing or determining NLS language support for your platform.

**PGU-41032:** ENVIRONMENT parameter was previously specified

**Cause:** The ENVIRONMENT parameter has already been specified in a DEFINE TRANSACTION statement and is only allowed once per transaction definition. Syntax checking only continues with the next statement.

**Action:** Remove the second specification of ENVIRONMENT from the statement.

**PGU-41033:** invalid ENVIRONMENT parameter

**Cause:** The ENVIRONMENT parameter in a DEFINE TRANSACTION statement is not a valid PGA ENVIRONMENT. Syntax checking only continues with the next statement.

**Action:** Correct the ENVIRONMENT parameter to specify a valid PGA ENVIRONMENT. Valid environments are: "IBM370"

**PGU-41034:** SIDEPROFILE parameter was previously specified

**Cause:** The SIDEPROFILE parameter as already been specified in a DEFINE TRANSACTION statement and is only allowed once per transaction definition. Syntax checking only continues with the next statement.

**Action:** Remove the second specification of SIDEPROFILE from the statement.

**PGU-41035:** invalid SIDEPROFILE name specified

**Cause:** The token is not a valid name for specifying an SNA Side Profile in a DEFINE TRANSACTION statement. A Side Profile name must begin with an alphabetic character and contain only alphanumeric characters. Syntax checking only continues with the next statement.

**Action:** Correct the TRANSACTION SIDEPROFILE parameter in the statement.

**PGU-41036:** LUNAME parameter was previously specified

**Cause:** The LUNAME parameter has already been specified in a DEFINE TRANSACTION statement and is only allowed once per transaction definition. Syntax checking only continues with the next statement.

**Action:** Remove the second specification of LUNAME from the statement.

**PGU-41037:** invalid LUNAME name specified
Cause: The token is not a valid name for specifying an SNA LU name in a DEFINE TRANSACTION statement. An LU name must begin with an alphabetic character and contain only alphanumeric characters. Syntax checking only continues with the next statement.

Action: Correct the TRANSACTION LUNAME parameter in the statement.

PGU-41038: TPNAME parameter was previously specified

Cause: The TPNAME parameter has already been specified in a DEFINE TRANSACTION statement and is only allowed once per transaction definition. Syntax checking only continues with the next statement.

Action: Remove the second specification of TPNAME from the statement.

PGU-41039: invalid TPNAME name specified

Cause: The token is not a valid name for specifying an SNA TP name in a DEFINE TRANSACTION statement. A TP name must begin with an alphabetic character and contain only alphanumeric characters. Syntax checking only continues with the next statement.

Action: Correct the TRANSACTION TPNAME parameter in the statement.

PGU-41040: LOGMODE parameter was previously specified

 Cause: The LOGMODE parameter has already been specified in a DEFINE TRANSACTION statement and is only allowed once per transaction definition. Syntax checking only continues with the next statement.

Action: Remove the second specification of LOGMODE from the statement.

PGU-41041: invalid LOGMODE name specified

Cause: The token is not a valid name for specifying an SNA logmode in a DEFINE TRANSACTION statement. A logmode must begin with an alphabetic character and contain only alphanumeric characters. Syntax checking only continues with the next statement.

Action: Correct the TRANSACTION LOGMODE parameter in the statement.

PGU-41042: SYNCLEVEL parameter was previously specified

Cause: The SYNCLEVEL parameter has already been specified in a DEFINE TRANSACTION statement and is only allowed once per transaction definition. Syntax checking only continues with the next statement.

Action: Remove the second specification of SYNCLEVEL from the statement.

PGU-41043: invalid SYNCLEVEL value specified

Cause: The token is not a valid value for specifying an APPC SYNC level in a DEFINE TRANSACTION statement. The only values allowed for SYNC level are 0 and 1. Syntax checking only continues with the next statement.

Action: Correct the TRANSACTION SYNCLEVEL parameter in the statement.

PGU-41044: invalid TRANSACTION name

Cause: The token is not a valid transaction identifier name in a DEFINE TRANSACTION statement. A transaction name must begin with an alphabetic character and contain only alphanumeric characters. Syntax checking only continues with the next statement.

Action: Correct the TRANSACTION name parameter in the statement.

PGU-41045: missing call name in DEFINE TRANSACTION
**Cause:** PGAU DEFINE TRANSACTION syntax requires a call name which was not found. Syntax checking only continues with the next statement.

**Action:** Correct the DEFINE TRANSACTION statement to specify a call name.

**PGU-41046: SIDEPROFILE omitted: all of LUNAME, TPNAME, and LOGMODE required**

**Cause:** If the SNA SIDEPROFILE parameter is not specified, then all three of the LUNAME, TPNAME and LOGMODE parameters must be specified in a DEFINE TRANSACTION statement. Syntax checking only continues with the next statement.

**Action:** Correct the DEFINE TRANSACTION statement to specify either (1) the SIDEPROFILE parameter, (2) all three of the LUNAME, TPNAME and LOGMODE parameters, or (3) the SIDEPROFILE parameter and any combination of the LUNAME, TPNAME, and LOGMODE parameters.

**PGU-41048: CALL parameter was previously specified**

**Cause:** The CALL parameter has already been specified in a DEFINE TRANSACTION statement and is only allowed once per transaction definition. Syntax checking only continues with the next statement.

**Action:** Remove the second specification of CALL parameter from the statement.

**PGU-41049: DEFINE TRANSACTION parameter string previously specified**

**Cause:** The parameter <parm> has already been specified in a DEFINE TRANSACTION statement and is only allowed once per transaction definition. Syntax checking only continues with the next statement.

**Action:** Remove the second specification of the parameter <parm> from the DEFINE TRANSACTION statement.

**PGU-41053: VERSION parameter was previously specified**

**Cause:** The VERSION parameter has already been specified, and is only allowed once in a GENERATE or REDEFINE statement. Syntax checking only continues with the next statement.

**Action:** Remove the second specification of VERSION from the statement.

**PGU-41054: invalid version number in VERSION parameter**

**Cause:** The version number must follow the VERSION keyword enclosed in parenthesis in a GENERATE or REDEFINE statement. Syntax checking only continues with the next statement.

**Action:** Correct the version number specification in the VERSION parameter.

**PGU-41055: invalid FIELD or PLSFNAME name for indicated language**

**Cause:** The token is not a valid field identifier name in the specified language for specifying a FIELD or PLSFNAME parameter in a REDEFINE DATA statement. A field identifier name must obey the naming conventions of the specified language. In COBOL, only alphanumerics may be used in addition to the hyphen character and the first character must be alphabetic. Syntax checking only continues with the next statement.

**Action:** Correct the FIELD or PLSFNAME identifier name in the statement.

**PGU-41058: invalid transaction name specified**

**Cause:** The token is not a valid transaction identifier name for a GENERATE statement. A transaction identifier name must begin with an alphabetic character and contain only alphanumeric characters, and must have originated in a previous
DEFINE TRANSACTION statement. Syntax checking only continues with the next statement.

Action: Correct the transaction identifier name in the statement.

PGU-41059: PKGNAME parameter was previously specified

Cause: The PKGNAME parameter has already been specified in a GENERATE statement and is only allowed once per GENERATE request. Syntax checking only continues with the next statement.

Action: Remove the second specification of PKGNAME from the statement.

PGU-41060: invalid PKGNAME name specified

Cause: The token is not a valid identifier name for specifying the PL/SQL TIP package name in a GENERATE statement. A package name identifier must begin with an alphabetic character and contain only alphanumeric characters. Syntax checking only continues with the next statement.

Action: Correct the GENERATE PKGNAME parameter in the statement.

PGU-41061: OUTFILE parameter was previously specified

Cause: The OUTFILE parameter has already been specified in a GENERATE statement and is only allowed once per GENERATE request. Syntax checking only continues with the next statement.

Action: Remove the second specification of OUTFILE from the statement.

PGU-41063: DIAGNOSE parameter was previously specified

Cause: The DIAGNOSE parameter has already been specified in a GENERATE statement and is only allowed once per GENERATE request. Syntax checking only continues with the next statement.

Action: Remove the second specification of DIAGNOSE from the statement.

PGU-41064: PGANODE parameter was previously specified

Cause: The PGANODE parameter <keyword> has already been specified in a GENERATE statement and is only allowed once per GENERATE request. Syntax checking only continues with the next statement.

Action: Remove the second specification of PGANODE from the statement.

PGU-41065: invalid PGANODE name specified

Cause: The token is not a valid PGA node identifier name in a GENERATE statement. A PGA node identifier name must begin with an alphabetic character and contain only alphanumeric characters, and be a valid Oracle DB link name. Syntax checking only continues with the next statement.

Action: Correct the PGANODE parameter in the statement.

PGU-41068: unable to open the input definition file

Cause: An error occurred opening the input definition file specified with the INFILE parameter in a DEFINE or REDEFINE DATA statement. Syntax checking only continues with the next statement.

Action: Ensure that the input definition file exists and read access is allowed to the input definition file.

PGU-41070: COBOL inline definition must start with left-paren at line end

Cause: A COBOL inline definition starts with a left parenthesis. The left parenthesis must be the last character on the line preceding any COBOL data definition statements.
**Action**: Make sure an inline COBOL data definition starts on a line following a left parenthesis

**PGU-41071: missing LANGUAGE parameter**

**Cause**: PGAU DEFINE or REDEFINE DATA syntax requires a LANGUAGE parameter which was not found. Syntax checking only continues with the next statement.

**Action**: Correct the DEFINE or REDEFINE DATA statement to specify a LANGUAGE parameter.

**PGU-41072: OPTIONS parameter was previously specified**

**Cause**: The OPTIONS parameter has already been specified in a GENERATE statement and is only allowed once per GENERATE request. Syntax checking only continues with the next statement.

**Action**: Remove the second specification of OPTIONS from the statement.

**PGU-41073: repeated OPTIONS subparameter**

**Cause**: The indicated subparameter was previously specified in an OPTIONS parameter. The only valid OPTIONS subparameter is UDF. It may be specified only once per GENERATE statement. Syntax checking only continues with the next statement.

**Action**: Remove the duplicate subparameter from the OPTIONS specification.

**PGU-41075: TRACE parameter was previously specified**

**Cause**: The TRACE parameter has already been specified in a GENERATE statement and is only allowed once per GENERATE request. Syntax checking only continues with the next statement.

**Action**: Remove the second specification of TRACE from the statement.

**PGU-41076: repeated TRACE or PKGEX parameter**

**Cause**: The indicated parameter was previously specified in a DIAGNOSE TRACE or PKGEX parameter. The valid TRACE parameters are SE, IT, QM, IO, OC, DD, and TG. The valid PKGEX parameters are DC and DR. Each may be specified only once per GENERATE statement. Syntax checking only continues with the next statement.

**Action**: Remove the duplicate parameter from the TRACE/PKGEX specification.

**PGU-41077: PKGEX parameter was previously specified**

**Cause**: The PKGEX parameter has already been specified in a GENERATE statement and is only allowed once per GENERATE request.

**Action**: Remove the second specification of PKGEX from the statement.

**PGU-41079: data definition string version number inserted into PG DD**

**Cause**: PGAU inserted the data definition <dname> with version number <dver> as the result of processing a DEFINE DATA statement.

**Action**: Note the VERSION number of the data definition for future reference.

**PGU-41080: call definition string version number inserted into PG DD**

**Cause**: PGAU inserted the call definition <cname> with version number <cver> as the result of processing a DEFINE CALL statement.

**Action**: Note the VERSION number of the call definition for future reference.

**PGU-41081: transaction definition string version number inserted into PG DD**
Cause: PGAU inserted the transaction definition <tname> with version number <tver> as the result of processing a DEFINE TRANSACTION statement.

Action: Note the VERSION number of the transaction definition for future reference.

PGU-41082: data definition string version number updated in PG DD
Cause: PGAU updated the data definition <dname> with version number <dver> as the result of processing a REDEFINE DATA statement.
Action: None required. This is an informational message.

PGU-41083: data definition string version number deleted from PG DD
Cause: PGAU deleted the data definition <dname> with version number <dver> as the result of processing an UNDEFINE DATA statement.
Action: None required. This is an informational message.

PGU-41084: call definition string version number deleted from PG DD
Cause: PGAU deleted the call definition <cname> with version number <cver> as the result of processing an UNDEFINE CALL statement.
Action: None required. This is an informational message.

PGU-41085: transaction definition string version number deleted from PG DD
Cause: PGAU deleted the transaction definition <tname> with version number <tver> as the result of processing an UNDEFINE TRANSACTION statement.
Action: None required. This is an informational message.

PGU-41086: length of string token exceeds maximum allowed length of number
Cause: The object name of type <var> is longer than the maximum length <len> allowed by PGAU. Only syntax checking continues with the next statement.
Action: Reduce the length of the indicated name.

PGU-41087: data name string does not exist
Cause: A DEFINE CALL references a data definition name <dname> that does not exist.
Action: Use only previously defined data definitions in a DEFINE CALL statement.

PGU-41088: data name string or specified version (number) of data name string does not exist
Cause: A DEFINE CALL references a data definition name <dname> that does not exist, or specified a non-existent version <dver> of the data definition <dname>.
Action: Use only previously defined data definitions in a DEFINE CALL statement.

PGU-41089: call name string does not exist
Cause: A DEFINE TRANSACTION references a call definition name <cname> that does not exist.
Action: Use only previously defined call definitions in a DEFINE TRANSACTION statement.

PGU-41090: call name string or specified version (number) of call name string does not exist
**Cause:** A DEFINE TRANSACTION references a call definition name `<cname>` that does not exist, or specified a non-existent version `<cver>` of the call definition `<cname>`.

**Action:** Use only previously defined data definitions in a DEFINE TRANSACTION statement.

**PGU-41091: data name string does not exist**

**Cause:** An UNDEFINE DATA references a data definition name `<dname>` that does not exist.

**Action:** Use only previously defined data definitions in an UNDEFINE DATA statement.

**PGU-41092: data name string or specified version (number) of data name string does not exist**

**Cause:** An UNDEFINE DATA references a data definition name `<dname>` that does not exist, or specified a non-existent version `<dver>` of the data definition `<dname>`.

**Action:** Use only previously defined data definitions in an UNDEFINE DATA statement.

**PGU-41093: call name string does not exist**

**Cause:** An UNDEFINE CALL references a call definition name `<cname>` that does not exist.

**Action:** Use only previously defined call definitions in an UNDEFINE CALL statement.

**PGU-41094: call name string or specified version (number) of call name string does not exist**

**Cause:** An UNDEFINE CALL references a call definition name `<cname>` that does not exist, or specified a non-existent version `<cver>` of the call definition `<cname>`.

**Action:** Use only previously defined call definitions in an UNDEFINE CALL statement.

**PGU-41095: transaction name string does not exist**

**Cause:** An UNDEFINE TRANSACTION references a transaction definition name `<tname>` that does not exist.

**Action:** Use only previously defined transaction definitions in an UNDEFINE TRANSACTION statement.

**PGU-41096: transaction name string or specified version (number) of transaction name string does not exist**

**Cause:** An UNDEFINE TRANSACTION references a transaction definition name `<tname>` that does not exist, or specified a non-existent version `<tver>` of the transaction definition `<tname>`.

**Action:** Use only previously defined transaction definitions in an UNDEFINE TRANSACTION statement.

**PGU-41097: language parameter given in REDEFINE DATA conflicts with DEFINE DATA**

**Cause:** The LANGUAGE parameter in a REDEFINE DATA statement for a given dataname specifies a language different than the language originally specified in the DEFINE DATA statement for the given dataname.
**Action:** Change the LANGUAGE parameter in the REDEFINE DATA statement to that of the original DEFINE DATA statement. The associated language-dependent field definitions must also be changed.

**PGU-41100: FIELD parameter on REDEFINE specifies unknown field name (string)**

**Cause:** A REDEFINE with the FIELD parameter specifies a field name <fname> that does not currently exist in the data object being REDEFINED.

**Action:** Specify the correct field name on the FIELD parameter. Use the REPORT DATA statement to list current field names.

**PGU-41101: INFILE parameter given on DEFINE DATA with inline data**

**Cause:** An INFILE parameter was found on a DEFINE DATA statement, but an inline data definition was also found. Only one of the two forms is allowed in a single DEFINE DATA statement.

**Action:** Remove the INFILE specification or the inline data definition.

**PGU-41102: data definition missing on string DATA**

**Cause:** Neither an inline data definition nor an INFILE parameter was found in a DEFINE DATA or REDEFINE DATA statement. One of these is required in a DEFINE DATA. One of these may be required in a REDEFINE DATA depending on other parameters given.

**Action:** Specify either an INFILE parameter or an inline data definition.

**PGU-41103: INFILE parameter was previously specified**

**Cause:** The INFILE parameter has already been specified in a DEFINE DATA or REDEFINE DATA statement and is only allowed once per data definition or redefinition. Syntax checking only continues with the next statement.

**Action:** Remove the second specification of INFILE from the statement.

**PGU-41105: memory exhausted**

**Cause:** An attempt to allocated memory failed.

**Action:** Supported customers should contact Oracle Worldwide Support for assistance.

**PGU-41106: missing left parenthesis in a GROUP**

**Cause:** Left parenthesis must immediately follow a GROUP verb

**Action:** Examine source for missing left parenthesis.

**PGU-41107: GROUP within a GROUP not allowed**

**Cause:** A GROUP was found within a GROUP

**Action:** There is no need to have a recursive GROUP. Delete the inner GROUP along with its enclosing parentheses.

**PGU-41108: data definition string does not exist**

**Cause:** A data name, <name>, was specified but does not exist.

**Action:** Check <name> for a misspelling or, if an explicit version was specified, recheck for a misnumbering. Use the REPORT verb to find out what really exists.

**PGU-41109: field name string does not exist in data definition string**

**Cause:** The field name <fld> does not exist in the data definition named <dnm>.
Action: Check the data definition named <dnm> for the existence of a field named <fld>. Use the REPORT verb to find out what really exists in the data definition named <dnm>.

PGU-41110: field name string appears multiple times in data definition string
Cause: A REDEFINE specifies the field name <fld>; this field name is multiply defined in the data definition <dnm>. The field name must be sufficiently qualified to remove the ambiguity so that a unique field may be referenced.
Action: Replace the ambiguous field name <fld> with a sufficiently qualified field name. An example of a qualified field name is SUBFIELD2 OF FIELD1 (or the generic equivalent, FIELD1.SUBFIELD2). It may be easier to just spool the output for a REPORT of the DATA definition for <dnm> into an output file, edit the output file, and DEFINE the DATA object named <dnm> anew.

PGU-41111: missing string name
Cause: A DEFINE or REDEFINE statement is missing the name of a transaction object, a call object, or a data object. <token> is the type of object.
Action: Supply the missing name (as well as any other parameters that are surely needed).

PGU-41112: invalid name for UNDEFINE string
Cause: The identifier name in an UNDEFINE statement is invalid. An identifier name must begin with an alphabetic character and contain only alphanumeric characters. <token> is the type of object.
Action: Check the name for illegal characters in the identifier name.

PGU-41113: invalid WITH operand
Cause: The token is not a valid operand in a WITH phrase. Only DATA and CALLS are valid.
Action: WITH must be followed by DATA or CALLS.

PGU-41114: duplicate WITH operand
Cause: An identical WITH phrase has been previously found in this statement.
Action: Delete one of the identical phrases.

PGU-41115: invalid WITH operand in this context
Cause: A WITH phrase has been found in an invalid context. The phrase WITH CALLS can appear only in an UNDEFINE TRANSACTION; the phrase WITH DATA cannot appear in an UNDEFINE DATA.
Action: Delete the offending WITH phrase

PGU-41119: expecting one of DATA, CALL, or TRANSACTION in a DEFINE
Cause: One of DATA, CALL, or TRANSACTION must be given to specify what type of object is to be defined.
Action: Insert one of DATA, CALL, or TRANSACTION into the command.

PGU-41120: VERSION parameter conflicts with UNDEFINE ALL
Cause: A VERSION parameter was found in an UNDEFINE ALL.
Action: Either delete the ALL (in UNDEFINE ALL) or delete the VERSION parameter.

PGU-41121: invalid DIAGNOSE parameter
Cause: An invalid sub-parameter was found within a DIAGNOSE parameter.
Action: Check the sub-parameter for mispelling.

PGU-41122: no transaction name given in a GENERATE statement
Cause: The transaction name is missing.
Action: Provide a transaction name.

PGU-41123: expecting DATA (type of object)
Cause: DATA was expected to be found at this point in the REDEFINE.
Action: Examine the REDEFINE statement for the missing DATA token and insert if necessary.

PGU-41124: expecting one of DATA, CALL, or TRANSACTION in an UNDEFINE
Cause: One of DATA, CALL, or TRANSACTION must be given to specify what type of object is to be deleted.
Action: Insert one of DATA, CALL, or TRANSACTION into the command.

PGU-41125: expecting the name of a string object
Cause: The type of object (DATA, CALL, or TRANSACTION) must be followed by a name for the object.
Action: Insert the name of a DATA, CALL, or TRANSACTION object.

PGU-41126: WITH token immediately followed by another WITH token
Cause: There are two successive WITH tokens in the command input stream.
Action: Insert DATA or CALLS after the WITH token depending on which type of referenced objects should also be UNDEFINEd or REPORTed.

PGU-41127: a DATA or CALLS token was found but not preceded by a WITH token
Cause: There is a missing WITH token before DATA or CALLS
Action: Insert the WITH token in the proper place.

PGU-41128: a WITH token ends string
Cause: A WITH token was found as the last token in an UNDEFINE or REPORT command.
Action: The WITH token must be followed either by DATA or CALLS to delete or REPORT all referenced DATA or CALLS.

PGU-41129: parameter string invalid without FIELD parameter
Cause: The FIELD parameter is a pre-requisite to specify the parm parameter because parm applies to FIELDS within a DATA redefinition. PGAU REDEFINE parameters which require FIELD are:
- PLSFNAME
- CODEPAGE
Action: Include the FIELD parameter in the REDEFINE statement to indicate to which FIELD the redefinition of parm applies, or remove the parm specification.

PGU-41131: FIELD specified, but USAGE, PLSFNAME, or language input absent
Cause: The FIELD keyword must be accompanied by at least one of the following keywords: USAGE, PLSFNAME, INFILE.
Action: Make sure at least one of the above keywords is specified.
PGU-41132: language input defines more than one field
   Cause: A REDEFINE DATA with the FIELD option indicates that a single field is
   being redefined. The language input contained definitions for more than one field.
   Action: Delete the extra field definitions.

PGU-41133: language input defines no data field for REDEFINE ... FIELD(…)
   Cause: A REDEFINE DATA with the FIELD option indicates that a single field is
   being redefined. However, the language input contained no field definitions.
   Action: Supply the (single) field definition in the language input.

PGU-41134: no string PGAU objects satisfied the REPORT request
   Cause: A REPORT command requested information about a group of unnamed
   PGAU data objects with a type specified by <token>. But there were no objects of
   that type.
   Action: This is an informational message.

PGU-41135: no PGAU string objects named string satisfied the REPORT request
   Cause: A REPORT command requested information about a PGAU data object
   with a type specified by <type> and a name of <name>. But there were no objects of
   that <type> with the given <name>.
   Action: This is an informational message.

PGU-41136: no string PGAU object named string at version number satisfied the
   REPORT request
   Cause: A REPORT command requested information about a specific PGAU data
   object with a type specified by <type>, a name of <name>, and a version of <vsn>. But there is no object with that name and version.
   Action: This is an informational message.

PGU-41137: too many version requests; maximum of number allowed
   Cause: The VERSION parameter of a REPORT request has too many
   sub-parameters; the <maximum> is specified in the message.
   Action: split the request into multiple REPORTs.

PGU-41138: missing string name
   Cause: The <object> name is missing in a REPORT statement.
   Action: suppley the missing name.

PGU-41139: use of VERSION parameter conflicts with ALL parameter
   Cause: A VERSION parameter has been found. But an ALL parameter has also
   been found (denoting all versions)
   Action: Delete the ALL parameter or the VERSION parameter.

PGU-41140: version number expected
   Cause: A version number was expected at this point.
   Action: supply a version number or delete the entire VERSION parameter.

PGU-41141: an invalid version number was found
   Cause: A non-numeric string was found when scanning for a version number.
   Action: Inspect statement for missing delimiters.

PGU-41142: version parameter has already been specified
Cause: The VERSION parameter has already been found.
Action: Delete a VERSION parameter so there is only one left.

PGU-41143: this type of WITH operand invalid with a string object
Cause: The WITH phrase is invalid with respect to an object of type <type>. For example, REPORT DATA ... WITH DATA is invalid,
Action: Delete the offending WITH phrase.

PGU-41144: default PKGCALL parameter truncated to string
Cause: The PKGCALL parameter was defaulted in a DEFINE CALL statement and normally takes the value of the CALL object name. However, the length of the CALL object name is greater than the maximum length allowed for the PKGCALL parameter (which is 30). The default value actually used is <value>.
Action: None. This is an informational message.

PGU-41145: default PLSDNAME parameter truncated to string
Cause: The PLSDNAME parameter was defaulted in a DEFINE DATA statement and normally takes the value of the DATA object name. However, the length of the DATA object name is greater than the maximum length allowed for the PLSDNAME parameter (which is 30). The default value actually used is <value>.
Action: None. This is an informational message.

PGU-41146: invalid INFILE parameter
Cause: The INFILE parameter in a DEFINE or REDEFINE DATA statement does not designate a valid filename. Syntax checking only continues with the next statement.
Action: Correct the INFILE parameter to specify a valid filename.

PGU-42001: ALL not valid in VALUE(S) clause at level 88
Cause: ALL cannot be specified in a level 88 (condition-names) entry
Action: Delete the reserved word ALL

PGU-42002: COPY statement: ended prematurely
Cause: There are missing operands in the COPY clause
Action: Supply missing operands

PGU-42003: COPY reserved word found within a COPY clause
Cause: COPY clause found embedded within another COPY clause
Action: Examine COPY clauses. Statment terminator may be missing.

PGU-42004: COPY not allowed as operand-1 or operand-2 in COPY REPLACING
Cause: COPY reserved word not allowed as operand-1 or operand-2 in the REPLACING clause of a COPY statement.
Action: If operand-1 replace COPY by some other word here and in the copied source file. If operand-2, examine offending COPY clause for missing terminator or reserved words.

PGU-42005: COPY statement: nothing to copy
Cause: No filename operand given in COPY clause
Action: Supply filename operand in COPY clause

PGU-42006: invalid token string
Cause: An unrecognized token <token> was found when checking for a COBOL reserved word
Action: Check source around the unrecognized token for other missing reserved words or for a missing statement terminator.

PGU-42007: invalid EJECT statement
Cause: An EJECT statement cannot be given with operands
Action: Delete the extraneous text after EJECT up to the statement terminator.

PGU-42008: invalid SKIPn statement
Cause: A SKIP1, SKIP2, or SKIP3 statement cannot have operands
Action: Delete the extraneous text after the SKIPn up to the statement terminator.

PGU-42009: string
Cause: This is an echo of the offending source line, <sourceline>.
Action: Peruse this line with respect to a previous error message

PGU-42010: level-number with number digits exceeds maximum of two
Cause: A level-number was found with <number> digits. Level-numbers are restricted to a maximum of two digits
Action: Make sure level number is in range 01-49, 66, 77, or 88

PGU-42011: invalid level number of number found
Cause: Level numbers are restricted to 01-49, 66, 77, or 88; <number> was found.
Action: Change level number.

PGU-42012: level 01 or 77 has yet to be found
Cause: Record definition must start at level 01 or 77; a level other than 01 or 77 has been found.
Action: Examine source for missing level 01 or 77 definition; if offending definition is a top-level for a record, then renumber it to level 01 or 77.

PGU-42013: level 01 or 77 not yet found or begun between columns number and number
Cause: Missing level 01 or 77 in source file or the 01 or 77 did not start within the column limits specified by <margin-A> and <margin-B>.
Action: If level 01 or 77 appears, make sure it starts before <margin-B> and after <margin-A>. If level 01 or 77 does not appear, a renumbering of levels may be appropriate.

PGU-42014: RENAMES clause must be at level 66
Cause: The RENAMES reserved word may be used ONLY at level 66.
Action: Renumber the level to 66.

PGU-42015: multiple string clauses found
Cause: Multiple instances of a clause of type <type> were found.
Action: Make sure there is only one instance of the type of clause given.

PGU-42016: invalid figurative_type value passed
Cause: This is an internal error.
Action: Supported customers should contact Oracle Worldwide Support.
PGU-42017: VALUES can be used only at level 88
    Cause: The VALUES keyword can only be specified in a data definition describing
            a condition and only at level 88.
    Action: If the definition describes a condition, make sure it is at level 88; if the
             definition does not describe a condition, then use VALUE IS rather than VALUES
             ARE.

PGU-42018: could not open input file string
    Cause: The specified input file <file> could not be opened for reading.
    Action: Make sure the file exists and allows read access.

PGU-42019: REDEFINES clause should be first clause
    Cause: A REDEFINES clause must appear before any other clause in a data
            definition.
    Action: Move the REDEFINES clause to the beginning of the data definition
             immediately after the data definition name.

PGU-42020: RENAMES dn-1 (THROUGH) dn-2 must stand alone
    Cause: If a RENAMES clause appears in a data definition, it must be the ONLY
            clause.
    Action: Delete other clauses.

PGU-42021: unterminated record definition found
    Cause: An end-of-file was found before the ending statement terminator. This also
            results from COBOL definitions which extend beyond column 72.
    Action: Check last records in input file for a missing statement terminator. Also
             check to ensure that the data definitions reside within their proper starting and
             ending columns.

PGU-42022: VALUES clause must be the only clause at level 88
    Cause: The only clause allowed at level 88 is a VALUE or VALUES clause.
    Action: Delete any clauses other than a VALUE or VALUES clause at level 88.

PGU-42024: missing period-separator in TITLE statement
    Cause: A TITLE statement is not ended by a period separator.
    Action: Check for missing period separator.

PGU-42025: invalid TITLE statement
    Cause: Invalid format for TITLE statement.
    Action: Check format of TITLE statement.

PGU-42026: COPY copies a COPY REPLACING or vice versa
    Cause: The source file copied by a COPY statement cannot contain a COPY ...
            REPLACING statment; or the source file copied by a COPY ... REPLACING
            statement cannot have a COPY statement.
    Action: Correct the file in error.

PGU-42027: in line number of file string as follows
    Cause: This message follows another message that describes the actual error. The
            line following this message echoes the input COBOL source line. The source line
            was found in line <line> of file <filename>.
    Action: Peruse messages immediately before and after this message.
PGU-42028: invalid USAGE token: string

Cause: An invalid word, <token>, follows USAGE in a USAGE clause. <token> may be valid in some COBOL dialects.

Action: Replace <token> in the USAGE clause with a valid USAGE operand for the IBMVSCOBOLII COBOL dialect.

PGU-42029: reserved word string is invalid as a PICTURE

Cause: A reserved word, <token>, was used as a PICTURE operand.

Action: Check PICTURE clause for missing PICTURE operand.

PGU-42030: a string clause has been prematurely terminated

Cause: A clause of type <type> has ended but there are missing operands.

Action: Check the clause for missing operands.

PGU-42031: string phrase is misplaced after string phrase

Cause: A phrase introduced by <key-word-1> cannot come after a phrase introduced by <key-word-2>. Certain phrases must precede other phrases in a data definition. For instance, an ASCENDING [KEY] phrase must appear before an INDEXED phrase.

Action: Reverse the placement of the phrases.

PGU-42032: state value string is string

Cause: An internal error has occurred in the PGAU COBOL parser. State <state> is either valid or invalid according to <validity>.

Action: Reproduce the error with full diagnostics enabled and save all related input and output files and listings. Supported customers should contact Oracle Worldwide Support for assistance.

PGU-42033: extraneous text at column string

Cause: Extraneous text has been found at the end of a record definition. It starts in column <column> of the source input record.

Action: The only source text that can follow the terminating '.' of a record definition is a COPY, EJECT, or SKIPn statement. Check to see if the terminating '.' has been misplaced.

PGU-42034: COPY for file string is recursive

Cause: A COPY statement for file <filename> has been found while processing a previous occurrence of a COPY specifying the same file.

Action: Check the COBOL source for recursive COPY. A single COPY file may need to be replaced with multiple, uniquely-named COPY files to achieve the desired results.

PGU-42035: invalid null operand in pseudo-text in a COPY REPLACING clause

Cause: The first operand in a REPLACING clause of a COPY statement is pseudo-text but the pseudo-text is null.

Action: Replace the null pseudo-text string with a non-null string.

PGU-42036: invalid input in string clause or paragraph

Cause: Invalid syntax in a <special> clause or paragraph.

Action: Check the indicated source line(s) for syntactical errors.

PGU-42037: missing END-EXEC token
**Cause:** An END-EXEC was not found while processing an EXEC clause.

**Action:** Insert an END-EXEC where appropriate. If the COBOL source input was generated by another product, regenerate the source using that product.

**PGU-42038: invalid use of reserved word string**

**Cause:** A reserved word, <reserved>, was found in an illegal context.

**Action:** Check to see if a reserved word is perhaps being used where a user dataname would normally appear.

**PGU-42039: in line as follows**

**Cause:** This message follows another message that describes the actual error. The line following this message echos the input COBOL source line.

**Action:** Refer to messages immediately before and after this message.

**PGU-42040: DEPENDING ON phrase missing in OCCURS clause**

**Cause:** An OCCURS clause describes a variable length table. One needs a DEPENDING ON phrase to tell how large is the current instance of the table. The DEPENDING ON clause is missing. DEPENDING ON phrase that tells how large the current instance

**Action:** Supply the DEPENDING ON clause or make the table a fixed length table.

**PGU-42041: missing or invalid USAGE clause for DBCS PIC clause**

**Cause:** A PICTURE clause specifies a DBCS datatype, but the required USAGE IS DISPLAY-1 clause is misisng or inavlid.

**Action:** Supply the USAGE clause or revise the PIC datatype to noth required DBCS.

**PGU-42042: LENGTH IS clause not allowed for numeric or edited data**

**Cause:** A LENGTH IS clause was specified for a data item that is not non-edited character data.

**Action:** Remove the LENGTH IS clause or change the PICTURE clause for the data item to specify a non-edited, character data mask.

**PGU-50001: error reading the log file.**

**Cause:** An error occured reading the log file.

**Action:** Determine the cause of the problem and correct it before restarting PG4TCPMAP.

**PGU-50002: no data found.**

**Cause:** The predicate that was chosen to delete the row from the PGA_TCP_IMSC table is not found.

**Action:** Determine the cause of the problem and correct it before restarting PG4TCPMAP.

**PGU-50003: string length of number exceeds the maximum of number.**

**Cause:** The parameter, <parm> length, <len>, passed to PG4TCPMAP tool was larger than the maximum allowed, <max>.

**Action:** Correct the parameter in error and recall PG4TCPMAP tool. For more information, refer to Oracle Database Gateway for APPC, User's Guide.

**PGU-50004: PG4TCPMAP has ended with a failure.**
Cause: An error occurred processing pg4tcpmap tool. This message is preceded by additional messages providing more information about the error.

Action: Refer to the messages preceding this one to determine the course of action.

PGU-50101: You have entered an invalid value.

Cause: This is a warning that you have entered an invalid value.

Action: The question will be asked again. Enter a valid value.
INS-00001: Unknown irrecoverable error
   Cause: No additional information available.
   Action: Refer to the logs or contact Oracle Support Services

INS-00002: Unhandled exception
   Cause: No additional information available.
   Action: Refer to the logs or contact Oracle Support Services

INS-00003: Application startup failed
   Cause: An unexpected error occurred while loading the application configuration or other startup resources.
   Action: Refer to the logs or contact Oracle Support Services

INS-00004: Unable to load help
   Cause: One or more help configuration files were not readable or not in the correct format.
   Action: Contact Oracle Support Services or refer to the software manual.

INS-00005: Invalid application configuration
   Cause: The given application configuration is not compliant to the expected schema.
   Action: Contact Oracle Support Services

INS-00006: No resource bundle is associated to the Resource instance
   Cause: Specified resource bundle string is not found in the classpath.
   Action: Ensure that the required libraries are in the classpath.

INS-00007: Help not available for this application
   Cause: No additional information available.
   Action: Contact Oracle Support Services support or refer software manual.

INS-00008: Help topic not found
   Cause: The current user interface do not have help content associated with it.
   Action: Contact Oracle Support Services or refer to the software manual.

INS-01001: Failed to create parent directories while copying string to string
   Cause: Unexpected error occurred while creating the nonexistent parent directories of the destination file string
**Action:** Manually verify whether the destination directory is possible to be created.

**INS-01002: Copy failed as the source file string do not exist**
**Cause:** No additional information available.
**Action:** Ensure that the source file exist.

**INS-01003: Copy failed as the source path string do not correspond to a file.**
**Cause:** Copy routine expects a source path, which represents a file.
**Action:** Ensure that the source is a file and destination is a file or a directory. Note: if the destination is a directory, then the source file will be copied in the same name, under the destination directory.

**INS-01004: string is not directory.**
**Cause:** The archive extraction routine expects the destination to be a directory.
**Action:** Ensure that destination is a directory.

**INS-01005: Failed to copy file from string to string**
**Cause:** Unexpected error occurred while copying the file.
**Action:** Refer to the logs for more details.

**INS-01006: The file string cannot be copied onto itself.**
**Cause:** The source file and destination file are same.
**Action:** Ensure that the destination file is different from the source file.

**INS-01007: The directory string cannot be copied onto itself**
**Cause:** The source directory and destination directory are same.
**Action:** Ensure that the destination directory is different from the source directory.

**INS-01008: Copy failed as the destination file string already exists.**
**Cause:** No additional information available.
**Action:** Ensure that the destination file do not exist or use overwrite option to overwrite the destination file.

**INS-01009: string is not valid archive.**
**Cause:** The given archive path, either do not correspond to a file or do not exist.
**Action:** Ensure that the given source path correspond to a valid archive location.

**INS-01010: Unable to save file to the specified location.**
**Cause:** The specified location may not be writable.
**Action:** Specify a location that is writable.

**INS-06001: Failed to perform operation due to internal driver error.**
**Cause:** No additional information available.
**Action:** Refer to the logs or contact Oracle Support Services

**INS-06002: Authentication failed.**
**Cause:** Failed to login into the selected nodes.
**Action:** Check shared unix password. Locked accounts or accounts with no password are not supported. Contact Administrator or refer logs for more details.
INS-06003: Failed to setup passwordless SSH connectivity with the following node(s): string
  Cause: It is possible that the failed nodes are running different Operating System or not reachable. If they are reachable and running the same Operating System as the local machine, it is possible that the SSH daemon is not configured on the selected nodes.
  Action: Ensure that the failed nodes are reachable, running the same Operating System and have support for SSH connectivity.

INS-06004: File operation on user's .ssh directory is not permitted.
  Cause: Write permission not set for either user's home directory or .ssh directory under user's home directory.
  Action: Ensure that .ssh directory is either allowed to be created under user's home directory or .ssh directory allows files to be written into it.

INS-06005: Unable to get SSH connectivity details.
  Cause: An unexpected error occurred while getting SSH connectivity details across the selected nodes.
  Action: Refer to the logs for more details or contact Oracle Support Services.

INS-06006: Passwordless SSH connectivity not set up between the following node(s): string.
  Cause: Either passwordless SSH connectivity is not setup between specified node(s) or they are not reachable. Refer to the logs for more details.
  Action: Refer to the logs for more details or contact Oracle Support Services.

INS-06007: SSH connectivity check operation disabled
  Cause: Either the property named 'oracle.install.ssh.setupCheckEnabled' is set to true in Java system properties or the internal driver had disabled this operation.
  Action: Try setting 'oracle.install.ssh.setupCheckEnabled=true' as Java system property or contact Oracle Support Services.

INS-06008: SSH connectivity setup operation disabled
  Cause: Either the property named 'oracle.install.ssh.setupEnabled' is set to true in Java system properties or the internal driver had disabled this operation.
  Action: Try setting 'oracle.install.ssh.setupEnabled=true' as Java system property or contact Oracle Support Services.

INS-06101: IP address of localhost could not be determined
  Cause: The localhost is not mapped to a valid IP address in Hosts file (Eg. /etc/hosts in Unix).
  Action: Assign a valid IP address for the localhost or set it to loopback IP address (127.0.0.1 in IPv4 or ::1 in IPv6).

INS-07001: Value for property 'string' not found in the bean store.
  Cause: No additional information available.
  Action: It is not mandatory that all properties are to be in a given bean store. This error can be ignored if the given property is not expected to be in the bean store.

INS-07002: Unable to get the type definition for property named 'string' of bean type 'string'
  Cause: No additional information available.
**Action:** Ensure that the properties in the bean type are correctly defined.

**INS-07003: Unexpected error occurred while accessing the bean store**
*Cause:* No additional information available.
*Action:* Refers logs or contact Oracle Support Services

**INS-07004: Invalid bean store**
*Cause:* Either the bean store is corrupt or it does not have access to the underlying data source.
*Action:* Refers logs or contact Oracle Support Services

**INS-07005: The given beans cannot be written because there is no bean store assigned to the bean store writer.**
*Cause:* No additional information available
*Action:* Refers logs or contact Oracle Support Services

**INS-07006: Unable to save the bean store to the given target.**
*Cause:* Either the target is not accessible or an unexpected error occurred while saving the bean store.
*Action:* Refers logs or contact Oracle Support Services

**INS-07007: Failed to open or create a bean store reader.**
*Cause:* Either the bean store is corrupt or it does not have access to the underlying data source.
*Action:* Refers logs or contact Oracle Support Services

**INS-07008: The format of the bean store is not specified**
*Cause:* No additional information available.
*Action:* Refers logs or contact Oracle Support Services

**INS-07009: Unable to load bean store**
*Cause:* Unexpected error while loading the bean store.
*Action:* Refers logs or contact Oracle Support Services

**INS-07010: Invalid argument string**
*Cause:* The argument for a given property did not comply with either the specification, schema, or rules.
*Action:* Ensure that given arguments are of the expected data type or schema

**INS-08001: Flow configuration is syntactically incorrect**
*Cause:* No additional information available.
*Action:* Contact Oracle Support Services or refer to the software manual.

**INS-08005: View class may not exist or a fully qualified View class name is not given.**
*Cause:* No additional information available.
*Action:* Contact Oracle Support Services or refer to the software manual.

**INS-08007: Fully qualified Action class name is not given.**
*Cause:* No additional information available.
*Action:* Contact Oracle Support Services or refer to the software manual.
INS-08011: Route identifier 'string' mentioned in the transition may not exist.
    Cause: No additional information available.
    Action: Contact Oracle Support Services or refer to the software manual.

INS-08012: Unknown View Identifier 'string' associated to a state.
    Cause: No additional information available.
    Action: Contact Oracle Support Services or refer to the software manual.

INS-08013: Unknown Validator class 'string' associated to a state.
    Cause: No additional information available.
    Action: Contact Oracle Support Services or refer to the software manual.

INS-08014: Fully qualified Condition class name is not given.
    Cause: No additional information available.
    Action: Contact Oracle Support Services or refer to the software manual.

INS-08015: No transition specified for condition defined at state 'string'.
    Cause: No additional information available.
    Action: Contact Oracle Support Services or refer to the software manual.

INS-08101: Unexpected error while executing the action at state: 'string'
    Cause: No additional information available.
    Action: Contact Oracle Support Services or refer to the software manual.

INS-08102: Unexpected error occurred while transitioning from state 'string'.
    Cause: No additional information available.
    Action: Contact Oracle Support Services or refer to the software manual.

INS-08103: Null route returned by state 'string'.
    Cause: The route was not chosen from the current state in order to proceed further.
    Action: No additional information available.

INS-08104: Route 'string' returned by state 'string' is not found in the flow configuration.
    Cause: No additional information available.
    Action: Contact Oracle Support Services or refer to the software manual.

INS-08106: Unexpected error occurred while loading the view 'string' associated to state 'string'.
    Cause: No additional information available.
    Action: Contact Oracle Support Services or refer to the software manual.

INS-08107: Failed while processing user inputs at state 'string'.
    Cause: Unexpected error occurred while processing the inputs from view 'string' associated to state 'string'.
    Action: No additional information available.

INS-08108: Failed while localizing the view
    Cause: Unexpected error occurred while localizing the view 'string' associated to state 'string'.

INS-00001 to INS-30000    118-5
**INS-08109: Unexpected error occurred while validating inputs at state 'string'.**

*Cause:* No additional information available.

*Action:* Contact Oracle Support Services or refer to the software manual.

**INS-08110: Invalid checkpoint file 'string'.**

*Cause:* Session restoration failed since the given checkpoint file may have been syntactically incorrect or did not exist.

*Action:* No additional information available.

**INS-08801: View class referred by view ID 'string' not found.**

*Cause:* The given View class was not found in the classpath.

*Action:* No additional information available.

**INS-08802: Unable to instantiate the View class referred by View ID 'string'.**

*Cause:* The given class do not represent a valid View class or an unexpected error occurred while instantiating it.

*Action:* No additional information available.

**INS-10002: Inventory initialization failed**

*Cause:* Inventory exist, but an unexpected error occurred while initializing it.

*Action:* Ensure that the inventory is not corrupt. Otherwise contact Oracle Support Services or refer logs.

**INS-10006: Scratch path 'string' is not valid.**

*Cause:* The specified scratch path is either not accessible or do not exist.

*Action:* Contact Oracle Support Services or refer logs

**INS-10008: Session initialization failed**

*Cause:* An unexpected error occurred while initializing the session.

*Action:* Contact Oracle Support Services or refer logs

**INS-10012: Setup driver initialization failed.**

*Cause:* An unexpected error occurred while initializing the underlying setup driver.

*Action:* Contact Oracle Support Services or refer logs

**INS-10013: The installer has detected that current home is not registered in the central inventory on this system.**

*Cause:* This can happen for the following reasons - either string has not been run or script has been failed to update the inventory.

*Action:* Run the script as a root user.

**INS-10014: The installer has detected that current home is not registered in the central inventory on the node(s): string.**

*Cause:* This can happen for the following reasons - either string has not been run or script has been failed to update the inventory.
Action: Run the script as a root user.

INS-10015: Argument (string) passed from the command line is invalid.
  Cause: n/a
  Action: n/a

INS-10101: The given response file string is not found.
  Cause: The given response file is either not accessible or do not exist.
  Action: Give a correct response file location. (Note: relative path is not supported)

INS-10102: Installer initialization failed.
  Cause: An unexpected error occured while initializing the Installer.
  Action: Contact Oracle Support Services or refer logs

INS-10103: Response file is not specified for this session.
  Cause: Response file was not specified for this session. A silent session requires input from a response file or from the command line.
  Action: Specify the response file and rerun the installer.

INS-10104: The given response file is not accessible.
  Cause: Current user may not have read permission.
  Action: Ensure that the current user have permission to read the given response file.

INS-10105: The given response file string is not valid.
  Cause: Syntactically incorrect response file. Either unexpected variables are specified or expected variables are not specified in the response file.
  Action: Refer the latest product specific response file template

INS-10106: The format of the given response file is not supported.
  Cause: The response file format was incorrect or not supported.
  Action: Use response files of type string.

INS-13001: Environment does not meet minimum requirements.
  Cause: Minimum requirements were not met for this environment
  Action: Either check the logs for more information or check the supported configurations for this product.

INS-13010: Automatic prerequisite fix up is not supported
  Cause: No additional information available
  Action: Refer logs and fix up all prerequisites manually.

INS-13011: No automatic prerequisite fix up routine available.
  Cause: Automatic fix up is not supported, hence no fixup routine generated.
  Action: Refer logs and fix up all prerequisites manually.

INS-13012: Automatic prerequisite fix up is not performed or is incomplete.
  Cause: User has either cancelled the operation or did not execute the automatic prerequisite fix up routines.
  Action: Run the automatic fix up routines or refer logs and fix up all prerequisites manually.
INS-13013: Target environment do not meet some mandatory requirements.
  Cause: Some of the mandatory prerequisites are not met. See logs for details.
  Action: Identify the list of failed prerequisite checks from the log: string. Then either from the log file or from installation manual find the appropriate configuration to meet the prerequisites and fix it manually.

INS-13014: Target environment do not meet some optional requirements.
  Cause: Some of the optional prerequisites are not met. See logs for details. string
  Action: Identify the list of failed prerequisite checks from the log: string. Then either from the log file or from installation manual find the appropriate configuration to meet the prerequisites and fix it manually.

INS-20701: Unexpected internal driver error
  Cause: A call to internal Oracle cluster API failed.
  Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag -ignoreInternalDriverError.

INS-20702: Unexpected internal driver error
  Cause: A call to cluster verification utility failed.
  Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag -ignoreInternalDriverError.

INS-20801: Configuration Assistant 'string' failed.
  Cause: Refer to the logs for additional information.
  Action: Refer to the logs or contact Oracle Support Services.

INS-20802: string failed.
  Cause: The plug-in failed in its perform method
  Action: Refer to the logs or contact Oracle Support Services.

INS-20803: The optional tool named 'string' failed.
  Cause: Refer to the logs for additional information.
  Action: Refer to the logs or contact Oracle Support Services. As 'string' is an optional tool, it is safe to ignore this failure and proceed with the installation.

INS-20804: string aborted.
  Cause: No additional information available.
  Action: Refer to the logs or contact Oracle Support Services.

INS-20805: string is not activated
  Cause: No additional information available.
  Action: Refer to the logs or contact Oracle Support Services.

INS-20806: string not executed.
  Cause: The plug-in was not executed or unavailable
  Action: Refer to the logs or contact Oracle Support Services.

INS-20807: string is not valid.
Cause: The action of the specified type could not be found in the referred aggregate
Action: Refer to the logs or contact Oracle Support Services.

INS-20808: Action already referenced.
Cause: The action was already referred to by a previous micro step
Action: Refer to the logs or contact Oracle Support Services.

INS-20809: Execution of 'string' not enabled
Cause: The invocation of plug-in string is not active
Action: Refer to the logs or contact Oracle Support Services.

INS-20810: Target or command for 'string' not valid.
Cause: The specified external command or internal plug-in could not be executed
Action: Refer to the logs or contact Oracle Support Services.

INS-20811: string parameters are not initialized
Cause: An argument of plug-in 'string' referenced an uninitialized Parameter
Action: Refer to the logs or contact Oracle Support Services.

INS-20812: Unexpected error while executing 'string'
Cause: An unspecified error occurred while attempting to perform the micro step.
Action: Refer to the logs or contact Oracle Support Services.

INS-20813: string not found
Cause: The referred aggregate could not be found
Action: Refer to the logs or contact Oracle Support Services.

INS-20814: The aggregate of 'string' is not activated
Cause: The reference to the referred aggregate is set inactive
Action: Refer to the logs or contact Oracle Support Services.
INS-20701: My Oracle Support username is empty.
   Cause: My Oracle Support username cannot be empty.
   Action: Provide a valid My Oracle Support username.

INS-20702: My Oracle Support password is empty.
   Cause: My Oracle Support password cannot be empty.
   Action: Provide a valid My Oracle Support password.

INS-20703: Connection to My Oracle Support could not be established.
   Cause: Credentials provided may be invalid, or there may be a network connection issue.
   Action: Check the My Oracle Support username and/or password provided. Also check the proxy settings, and network connection.

INS-20704: The location provided is not in the expected directory structure.
   Cause: The location provided is not in the expected directory structure.
   Action: For auto-updates to work in offline mode, the location of the downloaded updates should be in a particular format. Please refer to the doc for details.

INS-20705: n/a
   Cause: n/a
   Action: n/a

INS-20706: n/a
   Cause: n/a
   Action: n/a

INS-20707: n/a
   Cause: n/a
   Action: n/a

INS-20708: n/a
   Cause: n/a
   Action: n/a

INS-20709: Failed to retrieve the updates from My Oracle Support.
   Cause: The credentials provided may not have the download privileges from My Oracle Support, or there may be a network connection issue.
**Action**: Provide credentials which has the download privilege from My Oracle Support. Also check the network connection.

**INS-20710: Failed to retrieve the updates from My Oracle Support.**

**Cause**: This may be due to a network connection problem.

**Action**: Check the connection to My Oracle Support and restart the installer.

**INS-20711: The patch download location provided is empty.**

**Cause**: The location cannot be empty.

**Action**: Provide the location where the updates have been downloaded.

**INS-20712: Unable to retrieve the details from the downloaded metadata.**

**Cause**: The downloaded metadata for software updates is not properly formatted.

**Action**: Refer to the logs or contact Oracle Support Services.

**INS-20713: Unable to read the updates location.**

**Cause**: n/a

**Action**: n/a

**INS-20714: Check the user name provided.**

**Cause**: The user name provided is invalid. It may contain invalid characters or it does not follow the standard e-mail address format.

**Action**: Specify an e-mail address that is consistent with RFC 2822 and RFC 2821 format.

**INS-20715: Insufficient space in the download location provided.**

**Cause**: The location provided does not have space for downloading all the updates.

**Action**: Choose a location for download location that has enough space (minimum of stringMB) or free up space on the existing volume.

**INS-20716: The download location specified may already have downloaded updates. Continuing installation with this location will delete these updates and download the latest updates.**

**Cause**: n/a

**Action**: n/a

**INS-30001: The string password is empty.**

**Cause**: The string password should not be empty.

**Action**: Provide a non-empty password.

**INS-30002: The string password and string confirm password are not same.**

**Cause**: The string password and string confirm password should be the same.

**Action**: Ensure that string password and string confirm password are the same.

**INS-30003: The string password length is too long.**

**Cause**: The string password length cannot exceed string characters.

**Action**: Provide a password lesser than string characters.

**INS-30004: The string password entered is invalid.**

**Cause**: Passwords may contain only alphanumeric characters from the chosen database character set, underscore (_), dollar sign ($), or pound sign (#).
Action: Provide a password as per recommendations.

INS-30005: The string password entered is missing recommended characters.
  Cause: The string password entered is missing recommended characters. Oracle recommends that passwords contain at least one string.
  Action: Provide a password which contains at least one string.

INS-30006: The password specified is too short.
  Cause: Oracle recommends that the string password entered should be at least string characters in length.
  Action: Provide a password which is at least string characters in length.

INS-30007: Unable to get the raw device partition size.
  Cause: Unexpected error occurred while trying to get the raw device partition size.
  Action: Refer to the logs for more details.

INS-30008: Refer to the logs for more details.
  Cause: Unexpected error occurred while trying to get the FS device partition size.
  Action: Refer to the logs for more details.

INS-30009: Unable to get the FS partition free space size
  Cause: Unable to get the FS partition free space size
  Action: Unable to get the FS partition free space size

INS-30010: Unable to get the file system type.
  Cause: Unexpected error occurred while trying to get the file system type.
  Action: Refer to the logs for more details.

INS-30011: The string password entered does not conform to the Oracle recommended standards.
  Cause: Oracle recommends that the password entered should be at least string characters in length, contain at least 1 uppercase character, 1 lower case character and 1 digit [0-9].
  Action: Provide a password that conforms to the Oracle recommended standards.

INS-30013: Unable to check whether the partition is raw.
  Cause: Unexpected error occurred while trying to check whether the partition is raw.
  Action: Refer to the logs for more details.

INS-30014: Unable to check whether the location specified is on CFS
  Cause: The location specified might not have the required permissions.
  Action: Provide a location which has the appropriate required permissions.

INS-30015: An error occurred during setting permission.
  Cause: Unexpected error occurred during setting permission.
  Action: Refer to the logs for more details.

INS-30016: Unable to load the install inventory.
  Cause: Unable to lock or read the install inventory.
  Action: Check the permissions on the inventory location.
INS-30017: Install inventory does not exist.
  Cause: Install inventory does not exist.
  Action: Ensure that the install inventory exists.

INS-30018: Unable to get all the previously installed Oracle Home locations.
  Cause: Error occurred while retrieving the oracle home locations.
  Action: Check if the existing inventory location is accessible.

INS-30020: Unable to get the default oradata location.
  Cause: Unexpected error occurred while trying to get the default oradata location.
  Action: Refer to the logs for more details.

INS-30021: Unable to get Oracle RAC databases info.
  Cause: Unexpected error occurred while trying to get RAC databases info.
  Action: Refer to the logs for more details.

INS-30022: Unable to get SIDs and DB Homes on remote nodes.
  Cause: Unexpected error occurred while trying to get SIDs and DB Homes on remote nodes.
  Action: Refer to the logs for more details.

INS-30023: Unable to get SIDs and DB Homes on node string.
  Cause: Unexpected error occurred while trying to get SIDs and DB Homes on node string.
  Action: Refer to the logs for more details.

INS-30042: IO Exception occurred.
  Cause: IO Exception occurred.
  Action: Refer to the logs for more details.

INS-30043: The Grid Infrastructure home string does not exist or is empty.
  Cause: Installer has detected Grid Infrastructure home (string) registered in the Inventory. But the home location does not exist or is empty.
  Action: Check if the location specified is a valid Grid Infrastructure home. If not unregister the home from inventory using deinstall procedures.

INS-30044: Create Install Session Exception.
  Cause: Refer to the logs for more details.
  Action: Refer to the logs for more details.

INS-30045: Unable to find the specified Oracle Home.
  Cause: Refer to the logs for more details.
  Action: Refer to the logs for more details.

INS-30046: Unable to find product in Oracle Inventory.
  Cause: Refer to the logs for more details.
  Action: Refer to the logs for more details.

INS-30047: Multiple versions of the product were found.
  Cause: Refer to the logs for more details.
  Action: Refer to the logs for more details.
INS-30048: Incorrect format used in the given cluster configuration file.
   Cause: The content of cluster configuration file do not conform to the format recommended.
   Action: Ensure that the contents of the cluster configuration file conform to the expected format.

INS-30049: The given cluster configuration file could not be read.
   Cause: Unexpected error while reading the given cluster configuration file.
   Action: Ensure that the given cluster configuration file exists and has the read permissions.

INS-30051: Failed while checking for string directory existence on remote node (string) using SRVM API.
   Cause: User equivalence may not be setup between the local node and the remote nodes or sufficient file permissions are not set.
   Action: Setup user equivalence or ensure sufficient file permissions are set.

INS-30052: Check for free disk space across nodes failed.
   Cause: Unexpected error occurred while trying to check free disk space across nodes.
   Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30053: Check for shared partitions across nodes failed.
   Cause: Unexpected error occurred while trying to get shared partitions across nodes.
   Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30054: Check for file system type across nodes failed.
   Cause: Unexpected error while detecting file system type across nodes.
   Action: Refer to the logs or contact Oracle Support Services.

INS-30060: Check for group existence failed.
   Cause: Unexpected error occurred while trying to check for group existence.
   Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30070: There are processes running in the currently selected Oracle Home.
   Cause: Software is already running from the home selected for the install.
   Action: Shutdown the following processes before continuing: string

INS-30071: An error occurred while trying to determine the running processes or services.
   Cause: A runtime error
   Action: Refer to the logs or contact Oracle Support Services.

INS-30072: There are services running from the currently selected Oracle Home.
INS-30073: There is software running from the currently selected Oracle Home.
Cause: Files that need to be reinstalled or upgraded in this home are currently in use by running services.
Action: Please stop the following services before continuing.

INS-30080: string did not resolve to an IP address. Provide alternative name that resolves to an IP address.
Cause: n/a
Action: n/a

INS-30081: string could not be resolved using TCP/IP host name lookup. Provide valid name that can be resolvable using TCP/IP host name lookup.
Cause: n/a
Action: n/a

INS-30501: Automatic Storage Management software is not configured on this system.
Cause: Prior to configuring a database to use Automatic Storage Management (ASM), you must install and configure Grid Infrastructure, which includes ASM software.
Action: Grid Infrastructure can be installed from the separate installation media included in your media pack. Alternatively, it can be downloaded separately from Electronic Product Delivery (EPD) or the Oracle Technology Network (OTN). This is typically installed as a separate operating system user than the Oracle database and may have been installed by your system administrator. See the installation guide for more details.

INS-30502: No ASM disk group found.
Cause: There were no disk groups managed by the ASM instance string.
Action: Use Automatic Storage Management Configuration Assistant to add disk groups.

INS-30503: Unknown ASM disk group.
Cause: There was no disk groups named string managed by ASM instance string
Action: Enter a valid existing ASM disk group or use Automatic Storage Management Configuration Assistant to add the desired ASM disk group.

INS-30504: Missing ASM disk group name.
Cause: ASM disk group name was not entered in the text field.
Action: Enter a valid ASM disk group name.

INS-30505: Invalid disk group name.
Cause: A disk group name specified was invalid. It must start with an alphabetic character, and consist of up to 30 characters which are alphabetic, numeric, or the characters $,# and _.
Action: Enter a valid disk group name containing only alphanumeric characters and possibly a few special characters allowed by your platform.
INS-30506: Invalid redundancy level.
**Cause:** Redundancy level was invalid.
**Action:** Choose and complete a valid redundancy level: Normal or External.

INS-30507: Empty ASM disk group.
**Cause:** No disks were selected from a managed ASM disk group.
**Action:** Select appropriate number of disks from a managed ASM disk group.

INS-30508: Invalid ASM disks.
**Cause:** The disks *string* were not valid.
**Action:** Please choose or enter valid ASM disks.

INS-30509: Insufficient space available in the selected disk group.
**Cause:** Insufficient space available in the selected disk group. At least, *string* MB of space is required.
**Action:** Use Automatic Storage Management Configuration Assistant to add more disks to the selected disk group or create a new disk group with as least *string* MB of space.

INS-30510: Insufficient number of ASM disks selected.
**Cause:** The number of disks selected were insufficient for the selected redundancy level.
**Action:** For a disk group with redundancy level 'string', at least 'string' disks are recommended.

INS-30511: An older ASM instance was found.
**Cause:** Automatic Storage Management (ASM) *string* instance is found.
**Action:** Upgrade the existing ASM instance to version *string*.

INS-30512: Automatic Storage Management software is not configured on this cluster.
**Cause:** Prior to configuring a cluster database to use Automatic Storage Management (ASM), you must configure ASM software in the Grid Infrastructure home.
**Action:** Grid Infrastructure installation on this cluster was only configured to run Oracle Clusterware. You will need to go back to the Grid Infrastructure home and configure ASM for storing database. Grid Infrastructure is typically installed as a separate operating system user than the Oracle database and may have been installed by your system administrator. See the installation guide for more details.

INS-30513: ASM not running on one or more nodes in the cluster.
**Cause:** The following nodes did not have an ASM instance running on them. Node list: *string*
**Action:** Before creating a database that uses ASM on all of the nodes chosen for this installation, you should extend the ASM cluster of instances using the Add Instance procedure to the desired set of nodes. Node list: *string*

INS-30514: The ASM diskgroup name has exceeded *string* characters.
**Cause:** The ASM Diskgroup name has exceeded *string* characters.
**Action:** Specify diskgroupname lesser than *string* characters.

INS-30515: Insufficient space available in the selected disks.
Cause: Insufficient space available in the selected Disks. At least, string MB of free space is required.
Action: Choose additional disks such that the total size should be at least string MB.

INS-30516: Please specify unique disk groups.
  Cause: Installer has detected that the diskgroup name provided already exists on the system.
  Action: Specify different disk group.

INS-30517: Automatic Storage Management software is not configured on this system.
  Cause: n/a
  Action: n/a

INS-30601: File access permissions error encountered.
  Cause: File access permissions error encountered.
  Action: Ensure proper file access permissions are granted.

INS-30602: ASM access denied.
  Cause: A connection to the Automatic Storage Management (ASM) instance on this system could not be established.
  Action: To ensure a proper connection, the operating system user performing this installation must be a member of the OSDBA group of the ASM instance. See the installation guide for more information on the proper system setup required for running ASM and database instances as separate operating system users. Refer to Oracle error description for ORA-01031 for additional details.

INS-30603: CRS is not running on local node.
  Cause: Cluster Ready Services (CRS) on the local node was not running.
  Action: Perform a CRS, Grid Infrastructure, installation and configuration.

INS-30604: Required drivers are not found to perform the operation.
  Cause: Required drivers were not found to perform the operation.
  Action: Ensure that all required drivers were installed.

INS-30605: ASM instance seems to be down.
  Cause: ASM instance was down.
  Action: Bring up ASM in order to proceed.

INS-30606: Partially cleaned ASM home is found.
  Cause: Directories or files or both were missing.
  Action: Clean up ASM home and reinstall ASM.

INS-30607: No ASM found on the box.
  Cause: n/a
  Action: n/a

INS-30701: The partition is invalid.
  Cause: The partition provided was not available on the system.
  Action: Provide a partition that is available on the system.
INS-32001: No value has been given for the Password field.
   Cause: A value was not specified for the Password field.
   Action: Choose a nonempty password.

INS-32002: Invalid password.
   Cause: The password entered in the Confirm Password field did not match the password entered in the Password field.
   Action: Enter the same password in both Password and Confirm Password fields for confirmation purposes.

INS-32008: Oracle base location cant be same as the user home directory.
   Cause: The specified Oracle base is same as the user home directory.
   Action: Provide an Oracle base location other than the user home directory.

INS-32010: String contains invalid characters.
   Cause: The specified string contained one or more invalid characters.
   Action: Choose a string containing only alphanumeric characters and a few additional characters that are allowed for your platform.

INS-32011: The string that you have specified contains the space character.
   Cause: The string you entered contains the space character.
   Action: Please choose a string containing only alphanumeric, and a few additional characters that are allowed for your platform.

INS-32012: Unable to create directory: string.
   Cause: Either proper permissions were not granted to create the directory or there was no space left in the volume.
   Action: Check your permission on the selected directory or choose another directory.

INS-32013: The string location is empty.
   Cause: The string location was empty.
   Action: Specify a path for string location.

INS-32015: The location specified for string is invalid.
   Cause: The specified location cannot be used for string. Either the specified location is not found on the system or is detected to be a file.
   Action: Specify a valid location for string.

INS-32016: The selected Oracle home contains directories or files.
   Cause: The selected Oracle home contained directories or files.
   Action: To start with an empty Oracle home, either remove its contents or choose another location.

INS-32017: Invalid path specified for string
   Cause: Path specified for string contains one or more folders which exceeds maximum folder name length.
   Action: Specify the location which contains folders name length not more than string characters.

INS-32018: The selected Oracle home is outside of Oracle base.
   Cause: The Oracle home selected was outside of Oracle base.
**INS-32021**: Insufficient disk space on this volume for the selected Oracle home.

**Cause**: The selected Oracle home was on a volume without enough disk space.

**Action**: Choose a location for Oracle home that has enough space (minimum of \textit{stringMB}) or free up space on the existing volume.

**INS-32022**: Grid infrastructure software for a cluster installations must not be under an Oracle base directory.

**Cause**: Grid infrastructure for a cluster installations assign root ownership to all parent directories of the Grid home location. As a result, ownership of all named directories in the software location path are changed to root, creating permissions errors for all subsequent installations into the same Oracle base.

**Action**: Specify software location outside of an Oracle base directory for grid infrastructure for a cluster installations.

**INS-32024**: The specified Oracle home location is identical to the Oracle base location.

**Cause**: The specified Oracle home location was identical to the Oracle base location.

**Action**: Choose a different location for Oracle base or Oracle home.

**INS-32025**: The chosen installation conflicts with software already installed in the given Oracle home.

**Cause**: The chosen installation conflicted with software already installed in the given Oracle home.

**Action**: Install into a different Oracle home.

**INS-32026**: The Software Location specified should not be under Oracle base location.

**Cause**: Grid Infrastructure for a Cluster installation will assign root ownership to all parent directories of clusterware software location. As a result, all named directories in the software location path will acquire root ownership. This may create problems for subsequent installations into the same Oracle base.

**Action**: Specify software location outside of Oracle base.

**INS-32030**: Invalid location for Central Inventory.

**Cause**: The Central Inventory location provided was empty.

**Action**: Provide a valid location for the inventory.

**INS-32031**: Invalid inventory location.

**Cause**: Inventory location was invalid.

**Action**: Specify a valid inventory location.

**INS-32033**: Central Inventory location is not writable.

**Cause**: Central Inventory location was not writable.

**Action**: Ensure that the inventory location is writable.

**INS-32034**: Invalid characters specified for the inventory directory.

**Cause**: The inventory directory contained one or more invalid characters.
**Action:** The inventory directory can contain only alphanumeric, hyphen, and underscore characters.

**INS-32035: Unable to create a new central inventory directory : string.**

**Cause:** The central inventory location provided is not empty.

**Action:** Please provide another location for the inventory, or clean up the current location.

**INS-32036: User home directory is not recommended as inventory location**

**Cause:** User home directory has been chosen as inventory directory. Oracle recommends that the inventory directory is not users home directory, because members of inventory group will be given write permission to the inventory directory.

**Action:** Choose a directory other than users home as inventory location.

**INS-32037: The operating system group specified for central inventory (oraInventory) ownership is invalid.**

**Cause:** No value specified for central inventory (oraInventory) ownership group.

**Action:** Specify an operating system group whose members should have write permission to the central inventory directory (oraInventory).

**INS-32038: The operating system group specified for central inventory (oraInventory) ownership is invalid.**

**Cause:** User performing installation is not a member of the operating system group specified for central inventory(oraInventory) ownership.

**Action:** Specify an operating system group that the installing user is a member of. All the members of this operating system group will have write permission to the central inventory directory (oraInventory).

**INS-32039: Inappropriate file permissions for inventory location.**

**Cause:** The current user and current group do not match with the user and group of inventory location.

**Action:** Ensure that the file user and group are same as the installer user and install group respectively.

**INS-32052: Oracle base and Oracle home locations are same.**

**Cause:** Oracle base and Oracle home locations were same.

**Action:** Oracle base and Oracle home locations cannot be same. Oracle recommends installing Oracle software within the Oracle base directory. Adjust the Oracle home or Oracle base accordingly.

**INS-32053: The specified Oracle home name already exists.**

**Cause:** The Oracle home name specified on the command line corresponded to an existing Oracle home name in the Central Inventory.

**Action:** Choose another Oracle home name. Abort this installation session and try again.

**INS-32054: The Central Inventory string is located on a shared file system.**

**Cause:** The Central Inventory string was located on a shared file system.

**Action:** Oracle recommends placing this Central Inventory on a local file system that is not shared by other systems, because it is a server-specific inventory of the installation on this server. Oracle strongly recommends that you move the Central
Inventory to a local disk so that installations from other servers do not corrupt the Central Inventory for this server.

INS-32055: The Central Inventory is located in the Oracle base.
Cause: The Central Inventory is located in the Oracle base.
Action: Oracle recommends placing this Central Inventory in a location outside the Oracle base directory.

INS-32060: Insufficient permissions granted to create directory string on node string.
Cause: Insufficient write permissions were granted to create this directory on the specified node.
Action: Ensure that you have the required write permissions. Alternatively, you may want to choose another location.

INS-32061: The selected ASM disk group is invalid.
Cause: An invalid or non-existent ASM disk group has been selected.
Action: Ensure that the selected ASM disk group exists.

INS-32062: Unable to create string at the specified location.
Cause: The string location provided is not absolute path.
Action: Please provide absolute location for the string.

INS-32075: At least one product language need to selected
Cause: No product language selected for installation.
Action: Select at least one product language for installation.

INS-32076: English cannot be removed from the selected languages list.
Cause: An attempt was made to remove English from the selected languages list.
Action: Select English as one of the selected product languages.

INS-32077: The following selected languages are not supported; string
Cause: Not all selected product languages are supported.
Action: Refer to the sample response file for more information.

INS-32090: Software installation was unsuccessful.
Cause: Refer the log files for details.
Action: Refer to the logs or contact Oracle Support Services.

INS-32091: Some of the configuration assistants failed.
Cause: Software installation was successful. But some configuration assistants failed, were cancelled or skipped.
Action: Refer to the logs or contact Oracle Support Services.
INS-35011: E-mail address cannot be empty.
  **Cause:** E-mail address for database management using e-mail notifications was empty.
  **Action:** Specify an e-mail address for notification functions.

INS-35012: Outgoing main (SMTP) server cannot be empty.
  **Cause:** The value for the outgoing main (SMTP) server is empty. You must provide a SMTP server to enable database management with e-mail notifications.
  **Action:** Specify an outgoing main (SMTP) server for e-mail notifications.

INS-35013: Check e-mail address.
  **Cause:** The e-mail address for e-mail notification was invalid. It may contain invalid characters or it does not follow the standard e-mail address format.
  **Action:** Specify an e-mail address that is consistent with RFC 2822 and RFC 2821 format.

INS-35014: Outgoing mail (SMTP) server is invalid.
  **Cause:** The provided outgoing mail (SMTP) server was not valid. You must specify a valid SMTP server to enable database management with e-mail notifications.
  **Action:** Specify an outgoing mail (SMTP) server for e-mail notifications.

INS-35015: Recovery location cannot be empty.
  **Cause:** The database recovery backup location was empty.
  **Action:** Specify a path for the database recovery backup location.

INS-35016: User name cannot be empty.
  **Cause:** The database recovery user name text field was empty.
  **Action:** Provide the user name permitted to perform database recovery.

INS-35017: Password cannot be empty.
  **Cause:** The database recovery password was empty.
  **Action:** Enter a password for database recovery.

INS-35019: Invalid value specified for Management Service field.
  **Cause:** The installer was unable to detect an agent home corresponding to the URL in the Management Service field.
  **Action:** Specify a valid URL for Management Service field that has a corresponding agent configured on the host.
INS-35020: Invalid value specified for Management Service field.
   Cause: No value specified for Management Service field.
   Action: Specify a valid Management service URL.

INS-35021: Backup and recovery location is on a file system that is not shared across
the cluster.
   Cause: The database backup and recovery area is not located on a shared file system.
   Action: Enter a backup and recovery area that is located on a shared file system.

INS-35071: Global database name cannot be left blank.
   Cause: The Global database name was left blank.
   Action: Specify a value for the Global database name.

INS-35072: The SID cannot be left blank.
   Cause: The Oracle system identifier (SID) was left blank.
   Action: Specify a value for Oracle system identifier (SID).

INS-35073: Invalid global database name.
   Cause: The value given for the name portion of Global database name exceeds 30
characters. The maximum length is 30 characters.
   Action: Enter a legal Global database name not exceeding 30 characters.

INS-35074: The specified SID is already in use.
   Cause: The specified SID was already registered in the oratab file (string) on the
server. The oratab file is used by Oracle products to detect existing database instances.
   Action: Specify a unique Oracle system identifier (SID).

INS-35075: The specified SID is already in use.
   Cause: The Oracle system identifier (SID) given was already in use.
   Action: Specify a unique Oracle system identifier (SID).

INS-35076: The specified SID exceeds the number of characters allowed.
   Cause: The length of the Oracle server identifier (SID) on Linux and UNIX platforms either exceeded 12 characters for single-instance installations or 8 characters for Oracle RAC installations.
   Action: Specify an Oracle system identifier (SID) shorter than 12 characters for single-instance installation or 8 characters for Oracle RAC installation.

INS-35077: The specified SID exceeds the number of characters allowed.
   Cause: The length of the Oracle server identifier (SID) on Windows platforms either exceeded string characters for single-instance installations or string characters for Oracle RAC installations.
   Action: Specify a Windows Oracle server identifier (SID) shorter than string characters for a single-instance installation or string characters for an Oracle RAC installation.

INS-35081: The ORACLE_HOME environment variable is currently set.
   Cause: The ORACLE_HOME environment variable was already set. This prevents proper use of multiple Oracle homes and, as it is not required for any Oracle products to function, it will be unset in your environment.
**Action:** The ORACLE_HOME environment variable will be unset automatically.

**INS-35082: Global database name did not begin with an alphabetic character.**
**Cause:** The global database name began with a character that was not an alphabetic character.
**Action:** Specify a global database name that begins with an alphabetic character.

**INS-35083: The specified domain of the Global database name exceeds 128 characters.**
**Cause:** The domain portion entered for Global database name exceeded 128 characters.
**Action:** Specify a domain for the Global database name that is less than 128 characters in length.

**INS-35084: The specified global database name contains invalid characters.**
**Cause:** The specified domain portion of the global database name contained invalid characters.
**Action:** Specify a global database name that contains only alphanumeric, underscore (_), pound (#) and period (.) characters.

**INS-35085: Invalid value specified for string.**
**Cause:** The string derived from string contains one or more invalid characters.
**Action:** Remove the invalid characters (string) from the string or select Advanced install flow to be able to specify different string.

**INS-35086: Invalid value specified for Global Database Name.**
**Cause:** Database name cannot be empty.
**Action:** Enter a legal Global Database Name not exceeding 30 characters.

**INS-35087: Invalid value specified for SID**
**Cause:** The SID you entered begins with a non-alphabetic character.
**Action:** Enter a SID that begins with an alphabetic character.

**INS-35088: The specified Global database name exceeds string characters.**
**Cause:** The name and domain portion entered for Global database name exceeded string characters.
**Action:** Specify the Global database name that is less than string characters in length.

**INS-35089: The specified domain of the Global database name exceeds string characters.**
**Cause:** The domain portion entered for Global database name exceeded string characters.
**Action:** Specify a domain for the Global database name that is less than string characters in length.

**INS-35090: The service name provided for RAC One is empty.**
**Cause:** The service name provided for RAC One is empty.
**Action:** Provide a value for RAC One service name.

**INS-35091: The service name provided for RAC One did not begin with an alphabetic character.**
Cause: The service name provided for RAC One began with a character that was not an alphabetic character.
Action: Provide a service name which begins with an alphabetic character.

**INS-35092: The service name provided for RAC One cannot be same as global database name.**

Cause: The service name provided for RAC One cannot be same as global database name.
Action: Provide a service name which is different from the global database name.

**INS-350923: Invalid value provided for RAC One service name.**

Cause: The service name provided for RAC One may contain invalid characters.
Action: Provide a service name which has either letter or digit or _.

**INS-350924: Invalid value provided for Oracle RAC One service name.**

Cause: The domain portion in the Oracle RAC One service name may contain invalid characters.
Action: Provide a service name which has either alphanumeric character or _ or $ or # in the domain portion.

**INS-350925: The specified domain of the Oracle RAC One service name exceeds 128 characters.**

Cause: The domain portion entered for Oracle RAC One service name exceeded 128 characters.
Action: Specify a domain for the Oracle RAC One service name that is less than 128 characters in length.

**INS-35171: Target database memory (string MB) exceeds at least one of the selected nodes available shared memory (string MB).**

Cause: The total available shared memory on at least one of the selected nodes (string MB) was less than the chosen target database memory (string MB).
Action: Enter a value for the target database memory less than string MB.

**INS-35172: Target database memory (string MB) exceeds the systems available shared memory (0 MB).**

Cause: The total available shared memory on the system (string MB) was less than the chosen target database memory (string MB).
Action: Enter a value for target database memory that is less than string MB.

**INS-35173: Invalid value for allocated memory.**

Cause: The allocated memory specified was greater than or equal to the total memory available on the system.
Action: Enter a value less than the total available memory on the system for target database memory.

**INS-35174: A minimum of string MB (string % of total physical memory) is required.**

Cause: Allocated memory was less than the required memory.
Action: Enter a memory value larger than string MB.

**INS-35175: No value given for the allocated memory of the database.**

Cause: A value was not specified for the allocated memory of the database.
**Action:** Specify a value for the allocated memory of the database. This corresponds to the oracle.install.db.config.starterdb.memoryLimit variable in the response file.

**INS-35176: Invalid value for allocated memory.**

*Cause:* The allocated memory specified was greater than 3GB.

*Action:* Enter a value less than 3GB for target database memory.

**INS-35205: Specified data file storage location is invalid.**

*Cause:* The data file storage location for Oracle Real Application Clusters was not on a shared file system.

*Action:* Specify a location on a shared file system to place the data files.

**INS-35206: Directory is already in use.**

*Cause:* The specified directory for the database files was already in use by the Global database name that was provided.

*Action:* Either change the location or go to the previous screen and change the Global database name.

**INS-35207: The location string you selected is on an Oracle ASM Cluster File System (ACFS).**

*Cause:* Oracle does not recommend placing Oracle Database files on ACFS. Oracle recommends that you place database files directly on the underlying Oracle ASM disk groups, as this provides optimal database performance.

*Action:* Specify a location that is not on ACFS.

**INS-35208: The location string you selected is on an Oracle ASM Cluster File System (ACFS).**

*Cause:* You cannot use ACFS as shared storage for Oracle RAC.

*Action:* Specify an ASM diskgroup or any other supported shared storage location.

**INS-35209: Selected storage type is not valid**

*Cause:* You cannot use file system storage with Standard Edition Oracle Real Application Clusters databases.

*Action:* Choose Oracle Automatic Storage Management for database storage.

**INS-35210: Installing a database with storage on Oracle Automatic Storage Management (Oracle ASM) is not supported on this system.**

*Cause:* Oracle Database 11g Release 2 and later supports Oracle ASM only on 64-bit Windows operating systems.

*Action:* Place database-related files on a supported file system.

**INS-35255: Invalid password.**

*Cause:* One of the database super passwords was either CHANGE_ON_INSTALL or MANAGER or DBSNMP or SYSMAN.

*Action:* Enter a password that is not a former default password for these administrative users, such as CHANGE_ON_INSTALL, MANAGER, DBSNMP or SYSMAN.

**INS-35256: The password for account string is not allowed to be string.**

*Cause:* The specified password for this account was not allowed.
**Action**: Enter the correct password.

**INS-35341**: The installation user is not a member of the following groups: *string*

**Cause**: The installation user account must be a member of all groups required for installation.

**Action**: Ensure that the installation user is a member of the system privileges operating system groups you selected.

**INS-35342**: The specified group for Database Operator (OSOPER) may not be defined in the system.

**Cause**: The OS group you specified as the OSOPER group may not be configured on the server, or in the Network Information Service (NIS).

**Action**: Check the group name you selected, and specify a different group, or create the group on the server or in the Network Information Service.

**INS-35351**: Inconsistant versions detected.

**Cause**: The active version of Oracle Clusterware detected on the system(*string*) was lower than the version of Oracle Database that you were attempting to install(*string*). This is not supported.

**Action**: Upgrade Oracle Clusterware to version *string* or later.

**INS-35352**: There are no disk groups selected for storage and backup.

**Cause**: There were no disk groups selected for storage and backup.

**Action**: Select at least one disk group for storage and backup.

**INS-35354**: The system on which you are attempting to install Oracle RAC is not part of a valid cluster.

**Cause**: Before you can install Oracle RAC, you must install Oracle Grid Infrastructure on all servers (Oracle Clusterware and Oracle ASM) to create a cluster.

**Action**: Oracle Grid Infrastructure is not installed. Install it either from the separate installation media included in your media pack, or install it by downloading it from Electronic Product Delivery (EPD) or the Oracle Technology Network (OTN). Oracle Grid Infrastructure normally is installed by a different operating system user than the one used for Oracle Database. It may need to be installed by your system administrator. See the installation guide for more details.

**INS-35355**: The node *string* specified in response file is not part of the clusterware detected.

**Cause**: The node list for the Oracle RAC database specified in the response file does not match the configuration stored in the OCR.

**Action**: Please specify a valid node or add this node *string* to the cluster.

**INS-35356**: Oracle recommends that you install the database on all nodes that are part of the Oracle Grid Infrastructure cluster.

**Cause**: All Oracle Grid Infrastructure nodes were not selected for installing Oracle RAC.

**Action**: Oracle recommends that you deploy Oracle Real Application Clusters across all Oracle Grid Infrastructure cluster nodes.

**INS-35357**: Oracle RAC is not supported on this system.

**Cause**: Oracle Database 11g Release 2 and later supports Oracle RAC only on 64-bit Windows operating systems.
Action: Choose the option to install a single instance database on this system.

INS-35358: Oracle RAC is not supported on this system.
Cause: Oracle Database 11g Release 2 and later supports Oracle RAC only on 64-bit Windows operating systems.
Action: Migrate your existing Oracle RAC installation to a 64-bit Windows platform before upgrading it.

INS-35359: Only one node is selected for database creation.
Cause: Only one node is selected for database creation. To protect a database against node or instance failure, at least two nodes should be selected.
Action: Provide at least two nodes for database creation.

INS-35371: Oracle RAC databases not detected.
Cause: The installer could not detect any Oracle Real Application Clusters databases that could be upgraded.
Action: None

INS-35372: Oracle RAC databases not detected.
Cause: The installer could not detect any Oracle Real Application Clusters databases that could be upgraded on the selected nodes.
Action: None

INS-35373: Single-instance database not detected
Cause: The installer could not detect a single-instance database that could be upgraded.
Action: None

INS-35375: The installer detects an older version of Oracle ASM on the system. If you intend to upgrade a database using Oracle ASM for storage, then you must first upgrade Oracle ASM. Refer to Oracle Grid Infrastructure Installation Guide for further information.
Cause: An earlier release version of Oracle Automatic Storage Management (Oracle ASM) is detected on the server.
Action: To upgrade Oracle ASM, refer to installation guides for information about Oracle Grid Infrastructure upgrade.

INS-35376: Password cannot be empty for ASMSNMP user
Cause: Password was not specified for ASMSNMP user.
Action: Specify the password for ASMSNMP user in the field provided.

INS-35377: An earlier release version of Oracle Automatic Storage Management (Oracle ASM) exists on this system. If you intend to upgrade an earlier release database that uses Oracle ASM to Oracle Database 11g Release 2, then the upgrade will fail on 32-bit systems.
Cause: Oracle Database 11g Release 2 and later supports Oracle ASM only on 64-bit Windows operating systems.
Action: Migrate database storage from Oracle ASM to a filesystem before upgrading, or migrate earlier release databases versions that use Oracle ASM storage to 64-bit Windows systems. See the upgrade guide for additional information.

INS-35421: This option installs a single instance database only.
**Cause:** You have chosen to perform a Desktop class install on a cluster. This option will not install Oracle RAC.

**Action:** If you wish to install Oracle RAC, choose to perform a Server class install.

**INS-35422: The installer detects that the configured Single Instance High Availability (SIHA) software is not upgraded to the current release. This database installation does not register the database with earlier High Availability service releases.**

**Cause:** The active version of Single Instance High Availability (SIHA) detected on the system(string) was earlier than the Oracle Database release that you selected(string).

**Action:** Upgrade Single Instance High Availability software to version string or later.

**INS-35431: Invalid Location Specified for Oracle home.**

**Cause:** The installer detects that the location you specified for the Oracle home is under an Oracle ASM Cluster File System (ACFS) mount point that is not registered with Oracle Grid Infrastructure on this server.

**Action:** Oracle Database homes can only be placed on ACFS locations registered with Oracle Grid Infrastructure software. Specify a different location for the Oracle home, or register this location with Oracle Grid Infrastructure software.

**INS-35432: The installer has detected that the software location you have specified contains Oracle Database software version string. Oracle recommends that when upgrading to string, you perform an out-of-place installation of the software into a new Oracle home and then upgrade the database using the new software binaries.**

**Cause:** The installer has detected that the software location you have specified contains Oracle Database software version string.

**Action:** Perform an out-of-place upgrade. This allows you to perform the upgrade with less downtime and more stability, due to the non-destructive nature of the software installation. It is possible to perform the upgrade and maintain the same software location as before. This involves taking a backup of the old Oracle home prior to upgrading and moving the old binaries aside before installing the new binaries into the same location. Refer to the documentation for a precise set of steps to follow in this case.

**INS-35461: Standard Edition One (SEONE) not supported for this installation.**

**Cause:** Standard Edition One (SEONE) is not supported for Oracle Real Application Clusters database installation.

**Action:** Select a different Install Edition.

**INS-35462: Personal Edition (PE) not supported for this installation.**

**Cause:** You selected an Install Edition that is not supported for UNIX or Linux operating systems, and for Oracle RAC installations.

**Action:** Select a different Install Edition.
INS-40102: Specified Grid home is invalid
Cause: The Oracle Grid Infrastructure for a cluster home (Grid home) was placed in the installation owners home directory.
Action: Oracle recommends that you do not place the Grid home in a user home directory, because ownership of the path to that directory is changed to root.

INS-40103: The installer has detected that the software location specified is on an OCFS2 partition.
Cause: Configuration of an Oracle Grid Infrastructure for a cluster Grid home is not supported on OCFS2 partitions.
Action: Specify a Grid home location that is not an OCFS2 partition.

INS-40104: The installer has detected that the software location specified is on an OCFS2 partition.
Cause: Configuration of an Oracle Grid Infrastructure for a cluster Grid home is not supported on OCFS2 partitions.
Action: Specify a Grid home location that is not an OCFS2 partition.

INS-40105: The location specified for Oracle Base is invalid.
Cause: The installer detects that you have configured Oracle Grid Infrastructure software on this server, and that the Oracle base you provided for this install is not the same as the existing Oracle Grid Infrastructure software Oracle base.
Action: Provide the same Oracle base location for this Oracle Grid Infrastructure installation that is used for the existing Oracle Grid Infrastructure.

INS-40106: Invalid location specified for Grid home.
Cause: The installer detects that the Oracle home location you provided is on an Oracle ASM Cluster File System (ACFS) mountpoint. You cannot place Oracle Grid Infrastructure binaries on an ACFS mount point.
Action: Specify a Grid home location that is on a location other than an ACFS mount point.

INS-40401: The Installer has detected a configured Oracle Clusterware home on the system.
Cause: The Installer has detected the presence of Oracle Clusterware software configured on the node.
Action: You can have only one instance of Oracle Clusterware software configured on a node that is part of an existing cluster.
INS-40404: The installer has detected a configured instance of Oracle grid infrastructure software on the server.

**Cause:** You selected to install and configure a new Oracle grid infrastructure installation (Oracle Clusterware and Oracle ASM). However, only one installation of Oracle Clusterware and Oracle ASM can be configured on a server at the same time.

**Action:** Deconfigure the existing Oracle Grid Infrastructure software before installing and configuring a new instance of Oracle Grid Infrastructure software.

INS-40405: The installer has detected a configured instance of Oracle Grid Infrastructure software on the system.

**Cause:** You selected to install and configure a new Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM). However, only one installation of Oracle Clusterware and Oracle ASM can be configured on a server at the same time.

**Action:** Deconfigure the existing Oracle Grid Infrastructure software before installing and configuring a new instance of Oracle Grid Infrastructure software.

INS-40406: The installer detects no existing Oracle Grid Infrastructure software on the system.

**Cause:** The installer was unable to detect any existing Oracle Clusterware or Oracle ASM installation to upgrade.

**Action:** You can choose either to install a new Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM) on this node, and add the node to an existing cluster, or you can install a new Oracle Grid Infrastructure installation and make the node part of a new cluster. If you want to add the node to an existing cluster, then review Oracle Clusterware Administration and Deployment Guide and follow the add node procedure. If you want to create a new cluster, then select the option for a new installation.

INS-40407: The installer has detected an Oracle ASM instance is already configured on the computer.

**Cause:** You can have only one Oracle ASM instance configured on the node.

**Action:** Select the Software Only installation of Oracle Grid Infrastructure into a new home, and configure Oracle ASM in the new home after installation.

INS-40409: The installer has detected local Cluster Synchronization Services (CSS) configured on this host. Local CSS is running from: *string*.

**Cause:** You selected to install and configure an Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM). However, Oracle Clusterware cannot be installed on a server with a configured CSS daemon.

**Action:** Deconfigure and delete the existing local CSS daemon, and then restart the installer.

INS-40410: The installer has detected a configured instance of Oracle Grid Infrastructure software on the system.

**Cause:** You selected to install and configure a new Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM). However, only one installation of Oracle Clusterware and Oracle ASM can be configured on a server at the same time.

**Action:** Deconfigure the existing Oracle Grid Infrastructure software before installing and configuring a new instance of Oracle Grid Infrastructure software.
INS-40412: This server does not meet network requirements to install and configure this product.
  Cause: None of the network interfaces detected on this system supports IPv4 protocol.
  Action: Configure at least one of the public interfaces available on this system to support IPv4.

INS-40413: Existing Oracle ASM instance detected.
  Cause: The installer has detected that an earlier version of Oracle ASM is configured on the server.
  Action: If you intend to upgrade Oracle ASM as part of this installation, then you must shut down the Oracle ASM instance before proceeding. Shut down any database instances using Oracle ASM before shutting down the Oracle ASM instance.

INS-40414: The installer has detected an unused Oracle Cluster Registry (OCR) location pointer file (string) on the system.
  Cause: OCR location pointer file (string) is left behind from a previous installation.
  Action: Delete the OCR location pointer file (string) and restart the installer.

INS-40415: Upgrade database instances using Oracle Automatic Storage Management (Oracle ASM).
  Cause: The installer has detected the presence of Oracle Database release string instances.
  Action: If you intend to upgrade Oracle ASM as part of this upgrade, then you must upgrade Oracle Database instances using Oracle ASM to release string or later before proceeding with upgrading Oracle ASM.

INS-40416: The installer has detected that the version of the configured instance of Grid Infrastructure is not compatible for upgrading to this release of Grid Infrastructure.
  Cause: Oracle Clusterware or Oracle ASM release string or above is needed to upgrade to Oracle Grid Infrastructure.
  Action: Install the patchset to upgrade the configured instance of Grid Infrastructure to version string or higher.

INS-40417: The installer has detected an unused Oracle Cluster Registry (OCR) location registry key (string) on the system.
  Cause: OCR location registry key (string) is left behind from a previous installation.
  Action: Delete the OCR location registry key (string) and restart the installer.

INS-40418: The installer has detected that Oracle Clusterware is not running on local node.
  Cause: The installer detects that the Oracle Clusterware stack on the local node is not running.
  Action: Open a terminal, log in as root, change directory to the Oracle Clusterware home (Grid home), and start Oracle Clusterware by entering this command:crsctl start cluster -all
INS-40419: The installer detects that the configured Oracle Automatic Storage Management (Oracle ASM) release is earlier than the Oracle Grid Infrastructure release.

Cause: Installer has detected that configured version of Automatic Storage Management software is lower than the Grid Infrastructure software version.

Action: Open a terminal, log in as the Grid Infrastructure installation owner, change directory to the Grid home, and run ASMCA to upgrade Oracle ASM.

INS-40420: The current installation user is not the same as the installation owner of the existing Oracle Grid Infrastructure software.

Cause: The installer detects that the current installation user (string) is not the same as the existing Oracle Grid Infrastructure software user (string). To upgrade the existing software, run the installer as the user owning the Oracle Grid Infrastructure home.

Action: Restart the installation as the user that owns the existing Grid home.

INS-40421: The installer cannot detect the owner of the existing Oracle Grid Infrastructure home (Grid home).

Cause: The installer is unable to detect the owner of the existing Grid home. To upgrade the software, you must run the installer as the user owning the Grid home.

Action: Run the installer as the user owning the existing Grid home.

INS-40601: The Intelligent Platform Management Interface (IPMI) driver is not installed on one or more of the following nodes: string.

Cause: The installer detected that Intelligent Platform Management Interface (IPMI) drivers were not installed on all the nodes that you indicated should be part of the cluster. Cluster Synchronization Service (CSS) requires this driver, as it interacts with the IPMI driver to ensure cluster integrity.

Action: Download the IPMI driver from the hardware vendor website, and ensure that the driver is installed and configured on all the nodes, so that installation can continue.

INS-40602: Baseboard Management Controller (BMC) user name text field cannot be left blank.

Cause: The BMC user name text field was blank.

Action: You have selected Intelligent Platform Management Interface (IPMI) to use for failure isolation support. The installer requires the Baseboard Management Controller (BMC) user name to proceed with configuration. Enter the BMC user name that has privileges to interact with the IPMI-compliant hardware.

INS-40603: Invalid characters in User Name.

Cause: Invalid characters were specified in the user name.

Action: Enter a valid BMC user name. The Baseboard Management Controller (BMC) user name can only contain lower or uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), period(.) and underscore(_).

INS-40604: Password field is blank.

Cause: The password field was left blank.

Action: Enter a password.

INS-40701: Invalid characters in Grid Naming Service (GNS) subdomain.
cause: the specified value for the gns subdomain contained one or more invalid characters.

action: enter a valid gns subdomain name. valid characters for the gns subdomain can be any combination of lower or uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.)

ins-40702: gns subdomain is blank.
cause: the grid naming service (gns) subdomain was blank.
action: provide a value for gns subdomain.

ins-40704: gns subdomain cannot be resolved.
cause: the gns subdomain could not be resolved using tcp/ip host name lookup.
action: specify a subdomain that can be resolved.

ins-40705: invalid characters in grid naming service (gns) virtual ip address.
cause: the specified value for the gns virtual ip address contained one or more invalid characters.
action: enter a valid value for the gns virtual ip address. valid characters for gns virtual ip addresses can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.)

ins-40706: grid naming service (gns) virtual ip address is blank.
cause: the gns virtual ip address was blank.
action: provide a valid value for the gns virtual ip address.

ins-40707: grid naming service (gns) virtual ip address string cannot be resolved.
cause: the gns virtual ip address could not be resolved using tcp/ip host name lookup.
action: specify a valid gns virtual ip address.

ins-40708: grid naming service (gns) virtual ip address string already assigned to another system.
cause: the specified gns virtual host name could not be resolved to an ip address. this may occur if the ip address is in use on another cluster, or the ip address has not been registered to this name in the domain name system (dns).
action: ensure that you have entered a virtual host name that is not in use. if you continue to receive an error, then contact your network administrator for assistance.

ins-40709: cluster name: string contains invalid characters.
cause: the specified value for the cluster name contained one or more invalid characters.
action: provide a valid value for the cluster name. valid characters can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen(-).

ins-40710: cluster name: string does not start with a letter.
cause: the cluster name did not start with a letter.
action: provide a value for the cluster name that starts with a letter
INS-40711: Cluster Name is blank.
  Cause: The Cluster name text field was blank.
  Action: Provide a valid value for the cluster name.

INS-40712: Cluster Name:string is too long.
  Cause: The specified cluster name was too long.
  Action: Provide a cluster name that is 15 or fewer characters in length.

INS-40713: Installer will use "string" as cluster name.
  Cause: The cluster name cannot be longer than string characters. With the Typical install type, the host portion of the SCAN is used as the cluster name. If that portion is longer than string characters, then the installer truncates the cluster name to string characters.
  Action: If you want to use a specific name for the cluster, then provide a name no greater than string characters, or select the Advanced installation type.

INS-40714: Single Client Access Name (SCAN) Name: string contains invalid characters.
  Cause: The name you provided as the SCAN contained one or more invalid characters.
  Action: Enter a valid name for the SCAN. Valid characters can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.).

INS-40715: Single Client Access Name (SCAN) Name: string contains invalid characters.
  Cause: The name you provided as the SCAN contained one or more invalid characters. For the Typical installation type, invalid characters include those that are invalid for a cluster name, because the cluster name is derived from SCAN.
  Action: Enter a valid name for the SCAN and for the cluster name. Valid characters can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.)

INS-40716: Single Client Access Name (SCAN) Name:string does not start with a letter.
  Cause: The SCAN did not start with an alphabetic character.
  Action: Provide a value for the SCAN that starts with an alphabetic character.

INS-40717: Single Client Access Name (SCAN) is unfilled.
  Cause: No name was provided as the SCAN.
  Action: Provide a valid name to use for the SCAN.

INS-40718: Single Client Access Name (SCAN):string could not be resolved.
  Cause: The name you provided as the SCAN could not be resolved using TCP/IP host name lookup.
  Action: Provide name to use for the SCAN for which the domain can be resolved.

INS-40719: IP address configured for Single Client Access Name (SCAN): string is already assigned to another system.
  Cause: The installer could not find the IP addresses you selected as SCAN addresses. This may be because they are assigned to another system, or because
the IP addresses are not listed in the DNS or hosts files as assigned to this domain name.

**Action:** Enter resolvable IP addresses to use as SCAN addresses.

**INS-40720:** Single Client Access Name (SCAN): *string* is not associated with any IP address.

**Cause:** The name configured as the SCAN was not associated with an IP address.

**Action:** Ensure the names you provide as SCANs are associated with IP addresses.

**INS-40721:** Single Client Access Name (SCAN) port is blank.

**Cause:** The SCAN port text field was empty.

**Action:** Provide a valid value for the SCAN port.

**INS-40722:** Single Client Access Name (SCAN) port: *string* contains non-numeric characters.

**Cause:** The value entered for the SCAN port contained one or more invalid characters. A valid SCAN port is a number.

**Action:** Enter a valid numeric value for the SCAN port.

**INS-40723:** Invalid Single Client Access Name (SCAN) port number: *string*.

**Cause:** The value entered for the SCAN Port was out of the valid range.

**Action:** Enter a SCAN port number between 1024 and 65535.

**INS-40724:** No locally defined network interface matches the SCAN subnet.

**Cause:** None of the locally defined network interfaces has a subnet matching the SCAN subnet.

**Action:** Define a public interface with a subnet matching the one you want to use for the SCAN.

**INS-40725:** Unable to determine the existence of an interface with a subnet matching the SCAN subnet.

**Cause:** No interface was found with a subnet matching the subnet designated as the SCAN subnet.

**Action:** Define a public interface with a subnet matching the one you want to use for the SCAN.

**INS-40726:** Single Client Access Name (SCAN): *string* is not in the GNS subdomain *string*.

**Cause:** The name you provided as the SCAN is not in the GNS subdomain.

**Action:** Ensure the name you provide as the SCAN is in the same domain as the GNS subdomain.

**INS-40727:** Single Client Access Name (SCAN): *string* is already associated with an IP address.

**Cause:** The name for the configured SCAN is already associated with an IP address.

**Action:** If you intend to use GNS resolution for your cluster, then ensure the names you provide for SCANs are not associated with IP addresses that are already in use.

**INS-40728:** Invalid Single Client Access Name (SCAN) port number: *string*.
**Cause:** The installer detects that the SCAN port number you provided is already in use. This can occur if Oracle9i RAC is installed on the server, and it is using the port.

**Action:** Provide a different SCAN port number in the range 1024 and 65535.

**INS-40901: The cluster node information table is unfilled.**

**Cause:** Values in the cluster node information table are unfilled.

**Action:** Provide valid data in the cluster node information table.

**INS-40902: Missing entries in the node Information table.**

**Cause:** Some fields were left blank in the cluster node information table.

**Action:** Ensure that all information in the table is filled in.

**INS-40903: Host name contains invalid characters.**

**Cause:** The name you provided as the host name contains one or more invalid characters.

**Action:** Ensure that the host name contains valid characters. Valid characters for host names can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen (-).

**INS-40904: ORACLE_HOSTNAME does not resolve to a valid host name.**

**Cause:** The value provided for ORACLE_HOSTNAME does not resolve to a valid host name.

**Action:** Provide a valid host name for ORACLE_HOSTNAME, and restart the installer.

**INS-40905: Unresolved host IP addresses.**

**Cause:** One or more IP addresses do not resolve to valid host names.

**Action:** You must enter valid IP addresses that resolve to hostnames before installation can continue.

**INS-40906: Duplicate host names found in the node information table for Oracle Clusterware install.**

**Cause:** Duplicate entries have been made in the node information table for Oracle Clusterware installation.

**Action:** Remove duplicate entries in the Oracle Clusterware node information table.

**INS-40907: Local node not included in the list of host names for grid installation.**

**Cause:** The local node (the node where you are running the installer) was missing from the list of host names you provided.

**Action:** Include the local node in the list of host names for grid installation.

**INS-40908: Invalid host names.**

**Cause:** One or more host names you provided are invalid, as they do not resolve to a valid IP address.

**Action:** Enter valid host names.

**INS-40909: Host names from multiple domains entered.**

**Cause:** Node information was entered for two or more nodes that belonged to different domains.

**Action:** Enter host names belonging to the same domain.
INS-40910: Virtual IP: string entered is invalid.
  Cause: The Virtual IP did not resolve to an IP address.
  Action: Enter a valid name for the virtual IP that resolves to an IP address.

INS-40911: Some public node names could not be resolved.
  Cause: Some public nodes either were unreachable, or they belonged to a different subnet.
  Action: Ensure that nodes in the list are up and reachable, and ensure that the node addresses are all in the same subnet.

INS-40912: Virtual host name: string is assigned to another system on the network.
  Cause: One or more virtual host names appeared to be assigned to another system on the network.
  Action: Ensure that the virtual host names assigned to each of the nodes in the cluster are not currently in use, and the IP addresses are registered to the domain name you want to use as the virtual host name.

INS-40913: The following nodes cannot be clustered due to user equivalence issue: string.
  Cause: The user performing this installation is not configured identically on all nodes. This may be due to differences in the user or group IDs, or to SSH configuration issues.
  Action: If necessary, refer to the installation guide for information about how to set up user equivalence manually on cluster nodes.

INS-40914: The installer has detected the presence of Oracle9i RAC on the remote node, string.
  Cause: An Oracle9i RAC installation was present on remote node string, but not on the local node.
  Action: To install on a set of nodes on which the Oracle9i release of Oracle RAC has been configured, start the installer on the node where Oracle9i RAC is installed so that the installer can upgrade the existing installation.

INS-40915: The installer has detected the presence of Oracle Clusterware on the following nodes: string.
  Cause: Either Oracle Clusterware is running on the listed nodes, or previous installations of Oracle Clusterware are not completely deinstalled.
  Action: For each node listed, ensure that existing Oracle Clusterware is completely deinstalled. You can also choose not to include these nodes in this installation.

INS-40916: Single-instance versions of Cluster Synchronization Services (CSS) are detected.
  Cause: The installer detected single-instance versions of Cluster Synchronization Services (CSS) on the following nodes in the cluster:string
  Action: Before proceeding with the installation, you must deconfigure CSS, shut down any Oracle Automatic Storage Management (Oracle ASM) instances, and shut down all databases that use Oracle ASM for storage on all of the listed nodes. Oracle Clusterware installation starts a clusterwide version of CSS. After Oracle Clusterware installation is complete, you may start up any databases and Oracle ASM instances that previously used CSS. When they are brought back up, Oracle Clusterware provides CSS.
INS-40917: Host name cannot be in IP Address format.
  Cause: Host name cannot be in IP address format.
  Action: Provide the host name for host name.

INS-40918: Virtual IP name: string cannot be in IP Address format.
  Cause: Virtual IP name cannot be in IP address format.
  Action: Provide a valid virtual IP name.

INS-40919: Hostname cannot be left unfilled.
  Cause: You did not provide a hostname for the node.
  Action: Enter a valid hostname.

INS-40920: No name was provided as the virtual IP name.
  Cause: You did not enter a name for the virtual IP address.
  Action: Enter a valid virtual IP name.

INS-40921: Virtual IP name contains invalid characters.
  Cause: The name you provided for the virtual IP name contains one or more invalid characters.
  Action: Provide a name to use for the virtual IP name that contains valid characters. Valid characters for virtual IP name can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen(-).

INS-40922: Invalid SCAN - unresolvable to an IP address.
  Cause: SCAN provided does not resolve to an IP address.
  Action: Ensure that the SCAN is valid, and that it is resolvable to an IP address.

INS-40923: Unable to match a local interface or subnet with the SCAN.
  Cause: No local network interface was found with an address matching the subnet for the SCAN.
  Action: Ensure that the SCAN subnet matches the subnet configured on an existing local network interface.

INS-40924: Failure while initializing search for common interface or subnets across cluster nodes.
  Cause: Unable to locate common interfaces or subnets on all cluster member nodes.
  Action: Ensure that the local node has valid network interfaces, with valid subnets that are the same on all cluster member nodes.

INS-40925: One or more nodes have interfaces not configured with a subnet that is common across all cluster nodes.
  Cause: One or more nodes have network interfaces configured with a subnet that is not common to all nodes in the cluster.
  Action: Ensure all cluster nodes have a public interface that is defined with the same subnet, and accessible by all nodes in the cluster.

INS-40926: Cluster node interfaces are configured in subnets different from the SCAN subnet.
  Cause: One or more nodes have interfaces configured with subnets that are different than the SCAN subnet.
Action: Ensure all nodes have a public interface configured with a subnet that matches the SCAN subnet.

**INS-40927: Interfaces with common subnets have different names on different nodes.**
**Cause:** The following nodes have interfaces in common subnets that have different interface names: string
**Action:** Ensure that the names of interfaces defined on common subnets are the same on all cluster member nodes.

**INS-40928: An unknown interface error occurred during validation of cluster member nodes.**
**Cause:** An unknown error occurred during validation of addresses or subnets on cluster member nodes.
**Action:** Ensure network interfaces are configured correctly, and that subnets are available on all nodes of the cluster. Ensure all nodes have at least one public interface on a subnet available on all nodes, and ensure all nodes have one public interface on the same subnet.

**INS-40929: Installer has detected that the Oracle 9i Global Services Daemon (GSD) is running on the following nodes: string.**
**Cause:** Oracle 9i Global Services Daemon (GSD) processes are detected on some or all of the nodes specified.
**Action:** To allow Oracle Clusterware to serve Oracle9i RAC databases, on each cluster member node you must shut down the Oracle9i Database GSD, and shut down any Oracle RAC databases. The installer will configure a GSD to run in the new grid Oracle home. After installation, you may restart all Oracle9i databases.

**INS-40930: The following nodes were not resolvable during host IP address lookup: string.**
**Cause:** One or more node VIPs could not be resolved to a valid IP address.
**Action:** Be sure all node VIPs are resolvable to a valid IP address.

**INS-40931: The following nodes have interfaces that are configured on a subnet that is different from the SCAN subnet: string.**
**Cause:** Some node VIPs are on subnets that are different from the SCAN subnet.
**Action:** For each cluster member node, ensure that the VIP is configured with the SCAN subnet.

**INS-40932: An unknown error has occurred while validating Node Virtual IPs: string.**
**Cause:** Unknown errors were encountered while validating Node VIPs.
**Action:** Ensure all node VIPs resolve to a valid IP address.

**INS-40933: Interface collection failed on node string.**
**Cause:** Interface information collection failed.
**Action:** Be sure all nodes are accessible and have valid network interfaces defined.

**INS-40934: A remote directory operation failed on node string: Message: string**
**Cause:** A remote directory operation failed.
**Action:** Be sure all nodes are accessible across the network.
INS-40935: A cluster operation (for example, copy file, file exists, or other operation) failed on node string: Message: string
   Cause: A cluster operation failed.
   Action: Ensure that all cluster member nodes are accessible on the network.

INS-40936: A command tool operation failed on node string: Message: string
   Cause: A cluster operation (for example, list interfaces) failed.
   Action: Ensure that all cluster member nodes are accessible on the network.

INS-40937: The following hostnames are invalid: string
   Cause: The hostname or names listed are invalid.
   Action: Ensure that you are not providing aliases, and that the hostnames you provide are valid.

INS-40938: The installer has detected that some or all cluster member nodes of the Oracle 9i RAC database are not included in the selected list of nodes.
   Cause: Some of the nodes that are cluster members of the Oracle9i RAC database are not among the nodes you selected.
   Action: In the list of nodes, specify all the cluster member nodes of the Oracle9i RAC database.

INS-40939: Some of the nodes you selected are not members of the vendor cluster that is on the local server.
   Cause: The installer detects that this node is a member of a vendor cluster, and that some of the nodes you selected to make members of the Oracle Clusterware cluster are not members of the vendor cluster.
   Action: If you install Oracle Clusterware on a node that is a member of a vendor cluster, then all nodes that you select to be Oracle Clusterware nodes must also be members of the vendor cluster.

INS-40940: Nodes : string are not in the domain : string
   Cause: Nodes are not configured on the same domain.
   Action: Ensure that all nodes are configured on the same domain.

INS-40941: Unable to retrieve domain information on one or more nodes.
   Cause: The installer cannot collect domain information from one or more nodes you selected.
   Action: Before proceeding with the installation, ensure that all selected nodes are configured on the same domain.

INS-41101: The specified interface information is incorrect.
   Cause: Either the format of the information entered was incorrect, or the interface name or subnet information was incorrect.
   Action: Enter the correct interface information before proceeding.

INS-41102: No public interface designated.
   Cause: None of the network interfaces were designated as public.
   Action: Designate at least one interface as a public interface.

INS-41103: Interface string has multiple subnets associated with it.
   Cause: Interface string has been marked as both Public and Private.
**Action:** Designate interface string either as Public or Private, but not both Public and Private.

**INS-41104:** Multiple interfaces present with no Private Interface designated.  
**Cause:** There are multiple interfaces available, but none marked as Private.  
**Action:** Ensure that at least one interface is designated as Private.

**INS-41105:** string on subnet string chosen as public does not match subnet of SCAN VIP.  
**Cause:** The chosen public interface is not on the same subnet as the SCAN VIP.  
**Action:** Ensure the chosen public interface is on the same subnet as the SCAN VIP subnet, and that the same subnet is configured for SCAN VIPs on all cluster nodes.

**INS-41106:** Invalid choice for public/private interface.  
**Cause:** The chosen public or private interface subnet is not identical on all nodes.  
**Action:** Ensure that the subnets configured for public and private interfaces are identical on all cluster nodes.

**INS-41107:** string selected for one or more of the public or private interfaces is not on a shared subnet. Nodes not defining are: string  
**Cause:** The public or private interface on the nodes indicated are on a different subnet than the ones used on other nodes.  
**Action:** Ensure that all public interfaces share the same subnet, and ensure that all private interfaces share the same subnet.

**INS-41108:** string on subnet string chosen as public does not match subnet of Grid Naming Service (GNS) VIP.  
**Cause:** The chosen public interface is not on the same subnet as the GNS VIP.  
**Action:** Be sure that the chosen public interface is on a subnet which matches the GNS VIP subnet and is common across all cluster nodes.

**INS-41204:** No shared partition are available between nodes.  
**Cause:** The specified nodes did not have at least one shared partition.  
**Action:** Provide nodes that have at least one shared partition before proceeding with the installation.

**INS-41302:** Normal redundancy requires three locations for the Oracle Cluster Registry.  
**Cause:** Fewer than three locations were provided for the Oracle Cluster Registry.  
**Action:** Specify three locations for the Oracle Cluster Registry.

**INS-41303:** External redundancy requires a location for the Oracle Cluster Registry.  
**Cause:** A location for the Oracle Cluster Registry was not specified.  
**Action:** Specify a location for the Oracle Cluster Registry.

**INS-41305:** Invalid characters in one or more Oracle Cluster Registry (OCR) locations.  
**Cause:** One or more Oracle Cluster Registry (OCR) locations contained bad characters.  
**Action:** Provide an OCR location that uses valid characters in the path.

**INS-41306:** Invalid Oracle Cluster Registry (OCR) Locations.
Cause: One or more Oracle Cluster Registry (OCR) locations are not valid.
Action: Provide valid OCR locations.

INS-41307: Insufficient space in shared file system for Oracle Cluster Registry (OCR).
Cause: Insufficient free space was available in the file system. Oracle Cluster Registry requires a minimum of string MB of free space in the file system.
Action: Enter a shared file system that has at least string MBs of free space.

INS-41309: The Oracle Cluster Registry (OCR) cannot be placed on a block or character device.
Cause: The Oracle Cluster Registry (OCR) location you provided is on a block or character device.
Action: Select one of the following supported locations: Oracle Automatic Storage Management, an OCFS2 partition, or a shared NFS partition.

INS-41310: More than one Oracle Cluster Registry is in the same partition.
Cause: The Oracle Cluster Registry was located more than once on the same partition. For normal redundancy, Oracle recommends that you specify three locations on separate partitions for the Oracle Cluster Registry.
Action: Select separate partitions for each Oracle Cluster Registry.

INS-41311: One or more Oracle Cluster Registry (OCR) locations specified are in an existing OCR directory.
Cause: One or more Oracle Cluster Registry (OCR) locations specified were in directories with existing OCR files.
Action: Specify locations for Oracle Cluster Registry that are not in use.

INS-41312: One or more locations specified for the Oracle Cluster Registry (OCR) cannot be used.
Cause: One or more Oracle Cluster Registry (OCR) locations specified did not have proper permissions or ownership for the installation to proceed.
Action: Specify a location for Oracle Cluster Registry locations where the installation owner and oraInventory group members have read and write permissions.

INS-41313: Duplicate entries found in one or more Oracle Cluster Registry (OCR) locations.
Cause: One or more Oracle Cluster Registry locations specified were duplications.
Action: Specify a unique location for each Oracle Cluster Registry location.

INS-41314: File string already exists. The installer will make an attempt to replace this file.
Cause: The specified OCR file already exists.
Action: You may choose a different location or let the installer replace this file. Replacing it will overwrite its current contents.

INS-41315: File string already exists.
Cause: The specified OCR file already exists.
Action: Ensure that the OCR file you have specify is a nonexistent file.

INS-41316: Unable to delete file string
Cause: The attempt to delete the file was not successful.
Action: Ensure that the user account running the installation has the permissions to replace the file.

INS-41317: Invalid Oracle Cluster Registry (OCR) locations.
Cause: One or more Oracle Cluster Registry (OCR) locations were not valid.
Action: Provide valid OCR locations.

INS-41318: One or more files string already exist. The installer will attempt to replace existing files.
Cause: One or more specified files already exist.
Action: Either choose a different storage location, or allow the installer to overwrite this location and remove any existing files.

INS-41319: File(s) string already exist(s).
Cause: The specified shared location is in use.
Action: Ensure that the location you provided is not already in use, and that any past Oracle Clusterware configuration is completely removed from the partition.

INS-41320: Unable to delete one or more files string.
Cause: The attempt to delete files was unsuccessful.
Action: Ensure that the user account running the installation has the permissions to replace files.

INS-41321: Invalid Oracle Cluster Registry (OCR) location.
Cause: The installer detects that the storage type of the location (string) is not supported for Oracle Cluster Registry.
Action: Provide a supported storage location for the Oracle Cluster Registry.

INS-41502: Insufficient number of voting disk locations provided for normal redundancy configuration.
Cause: You did not provide enough separate locations for voting disk files. To provide normal redundancy, you must specify three separate locations for voting disk files.
Action: Specify three separate locations for voting disk files for normal redundancy.

INS-41503: Missing voting disk file locations for external redundancy configuration.
Cause: A voting disk file location was not specified. For external redundancy, you must specify a location for the voting disk file.
Action: Specify one voting disk file location for external redundancy.

INS-41505: The voting disk file locations contain one or more invalid characters.
Cause: Voting disk file paths contained one or more invalid characters.
Action: Specify voting disk file location paths that do not contain illegal characters.

INS-41506: One or more voting disk file locations are not valid.
Cause: One or more voting disk file locations were not placed in an existing directory.
Action: Provide valid voting disk file locations.
INS-41508: More than one voting disk file is located on the same partition.
  **Cause:** Normal redundancy for voting disk files requires that each file is placed on a different partition, to avoid a single point of failure.
  **Action:** Specify three locations on separate physical partitions to configure normal redundancy for voting disk files.

INS-41509: Duplicate locations used for one or more voting disk file locations.
  **Cause:** One or more voting disk file locations you provide are duplicate. Each voting disk location must be on separate devices.
  **Action:** Specify a location on separate devices for each voting disk file.

INS-41510: One or more voting disk file locations are the same as an OCR location.
  **Cause:** One or more voting disk file locations you provided are the same as an OCR location. Voting disk files cannot be on the same location as Oracle Cluster Registry (OCR) locations.
  **Action:** Specify voting disk file locations that are different from Oracle Cluster Registry (OCR) locations.

INS-41511: One or more of the locations you specified for voting disk files are the same as an Oracle 9i quorum location.
  **Cause:** Oracle 9i quorum disks are located on one or more of the locations you specified for voting disk files.
  **Action:** Provide new locations for voting disk files. You cannot reuse an Oracle9i quorum disk location.

INS-41512: Voting disk files cannot be located on block or character devices.
  **Cause:** The voting disk file location you provided is on a block or character device.
  **Action:** Select one of the following supported locations: Oracle Automatic Storage Management, an OCFS2 partition, or a shared NFS partition.

INS-41513: Voting disk file locations cannot be in a directory with existing voting disks.
  **Cause:** One or more voting disk file locations you provided have an existing voting disk file.
  **Action:** Specify a new voting disk file location.

INS-41514: One or more locations you specified for voting disk files cannot be used.
  **Cause:** One or more locations you specified for placing voting disk files did not have proper permissions or ownership for installation to proceed.
  **Action:** Specify voting disk file locations where the user account running the installation and oraInventory group members have read and write privileges.

INS-41515: Insufficient space in shared file system for voting disk file.
  **Cause:** Insufficient space was available in the storage location for a voting disk file. Voting disk files require a minimum of \textit{string} MB of free space.
  **Action:** Enter a shared storage location that has at least \textit{string} MB of free space.

INS-41516: File \textit{string} already exists. The installer will make an attempt to replace this file.
  **Cause:** The specified voting disk file already exists.
**Action:** You may choose a different location or let the installer replace this file. Replacing it will overwrite its current contents.

**INS-41517: File string already exists.**
**Cause:** The specified voting disk file already exists.
**Action:** Ensure that the location you specify for a voting disk file does not already have a voting disk file in that location.

**INS-41518: Unable to delete file string**
**Cause:** The attempt to delete the file was not successful.
**Action:** Ensure that the user account running this installation has proper permissions in this storage area to replace the file.

**INS-41519: One or more voting disk file locations are not valid.**
**Cause:** One or more voting disk file locations may not be shared on all nodes.
**Action:** Provide valid voting disk file locations on shared paths and directories.

**INS-41520: For high availability, Oracle recommends that you have this storage mirrored at the hardware level. Alternatively, you can select "Normal Redundancy" option and specify three locations that are on different disks.**
**Cause:** n/a
**Action:** n/a

**INS-41521: Invalid Voting Disk location.**
**Cause:** The installer detects that the storage type of the location (string) is not supported for voting disk files.
**Action:** Provide a supported storage location for the voting disk file.

**INS-41701: Unable to acquire node list information from oraInventory.**
**Cause:** The Oracle Clusterware node list could not be acquired from the Oracle inventory contents in the oraInventory directory.
**Action:** Ensure that the inventory is not corrupted, and that the oraInst.loc path is correct.

**INS-41702: No nodes selected for upgrade.**
**Cause:** Node selection was blank.
**Action:** Select a list of nodes to upgrade with the local node.

**INS-41703: The local node is not selected as one of the nodes for upgrade.**
**Cause:** The nodes selected for upgrade did not include the local node.
**Action:** Select the local node (the node from which you are running the installer) as one of the nodes to upgrade.

**INS-41704: Selected nodes should be members of the same cluster. The following nodes are not in the cluster: string.**
**Cause:** One or more nodes selected were not in the same cluster.
**Action:** Select nodes from the same cluster, or exclude the following nodes: string

**INS-41705: One or more nodes that are part of the cluster are down.**
**Cause:** One or more nodes that are part of the cluster cannot be reached
**Action:** Ensure that all the nodes selected that are part of the cluster are up.
INS-41706: Only subset of nodes selected for upgrade.
Caused: You have chosen a subset of the cluster nodes for the upgrade.
Action: During installation, the software will be copied to all cluster nodes. However, during installation setup, you are prompted to run the root script only on the nodes you selected for upgrade. To complete the upgrade, run the root script on the remaining nodes. You do not need to start the installer again to upgrade the remaining nodes.

INS-41707: Not all cluster member nodes are selected for upgrade.
Caused: The installer detects that this server has an earlier release of Oracle Grid Infrastructure software installed on this system. However, you have selected to upgrade a subset of the cluster nodes.
Action: To complete the upgrade, select all the nodes that are part of the Oracle Grid Infrastructure cluster.

INS-41708: Oracle Automatic Storage Management (Oracle ASM) is not selected for upgrade.
Caused: The installer detects that an earlier release of Oracle ASM is installed on this server. Oracle ASM needs to be upgraded as part of this installation.
Action: Select Oracle ASM upgrade option to complete the installation.

INS-41709: Oracle Automatic Storage Management (Oracle ASM) is not installed on this server.
Caused: You selected to upgrade Oracle ASM. However, the installer does not detect Oracle ASM on this server.
Action: To continue with the installation, deselect the option to upgrade Oracle ASM.

INS-41710: Oracle Automatic Storage Management (Oracle ASM) cannot be upgraded using a rolling upgrade.
Caused: The installer has detected that the version of the configured instance of Oracle ASM is not compatible for rolling upgrade to this release of Oracle Grid Infrastructure.
Action: All databases using Oracle ASM for storage will go down during this installation. Plan for databases to be unavailable during the time when the installer is running configuration tools.

INS-41711: The upgrade process upgrades the stack one node at a time, even though you selected to upgrade all nodes. Database service will be disrupted for any database that uses Oracle Automatic Storage Management (Oracle ASM), and that is not managed by Oracle Clusterware, or that uses Oracle Clusterware manual management policy. All other databases and services should not be affected, and should continue to function. If this is not desirable, then before proceeding with the upgrade, ensure that Oracle Clusterware manages databases using Oracle ASM, and set the automatic management policy on databases managed by Oracle Clusterware.
Caused: n/a
Action: n/a

INS-41802: Unable to determine release of Oracle Automatic Storage Management running from home string.
**Cause:** An Oracle Automatic Storage Management (Oracle ASM) home was found, but the Oracle ASM instance was down. The installer was unable to determine the Oracle ASM release.

**Action:** Ensure that the Oracle ASM instance installed in home *string* is up, and then retry the installation.

**INS-41803:** An entry for Oracle ASM is found in the system registry or oratab, but it is not associated with a software home location.

**Cause:** An Oracle ASM entry was listed in the system registry or oratab, but Oracle ASM home *string* was missing.

**Action:** Ensure that either the oratab or the system registry is correct, or that the inventory is not corrupted.

**INS-41804:** An instance of a prior release Oracle ASM is running.

**Cause:** There is an Oracle ASM instance already running on the server.

**Action:** Upgrade the existing Oracle ASM instance to the current release.

**INS-41806:** Virtual IP name cannot be the same as the Single Client Access Name (SCAN): *string*.

**Cause:** The name you provided for the virtual IP name is the same name used as the SCAN.

**Action:** Enter a name for the virtual IP that is different from the name you entered for the SCAN.

**INS-41807:** The installer has detected that Oracle Clusterware is not running on the following nodes: *string*.

**Cause:** Either there was an error in starting the Oracle Clusterware stack on the specified nodes, or the root scripts on the specified nodes were not run.

**Action:** Run the root scripts on the nodes listed. If root scripts have already been run on these nodes, then examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not starting.

**INS-41808:** Possible invalid choice for OSASM Group.

**Cause:** The name of the group you selected for the OSASM group is commonly used to grant other system privileges (For example: asmdba, asmoper, dba, oper).

**Action:** Oracle recommends that you designate asmadmin as the OSASM group.

**INS-41809:** Possible invalid choice for OSDBA Group.

**Cause:** The group name you selected as the OSDBA for ASM group is commonly used for Oracle Database administrator privileges.

**Action:** Oracle recommends that you designate asmdba as the OSDBA for ASM group, and that the group should not be the same group as an Oracle Database OSDBA group.

**INS-41810:** Possible invalid choice for OSOPER Group.

**Cause:** The group name you selected as the OSOPER for ASM group is commonly used for Oracle Database administrator privileges.

**Action:** Oracle recommends that you designate asmoper as the OSOPER for ASM group, and that the group should not be the same group as an Oracle Database OSOPER group.

**INS-41811:** OSDBA for ASM and OSOPER for ASM groups are the same OS group.
**Cause:** The groups you selected granting the OSDBA for ASM and OSOPER for ASM system privileges are the same group.

**Action:** Oracle recommends that you designate different OS groups to grant the OSDBA for ASM and OSOPER for ASM system privileges.

**INS-41812: string and OSASM are the same OS group.**

**Cause:** The chosen values for string group and the chosen value for OSASM group are the same.

**Action:** Select an OS group that is unique for ASM administrators. The OSASM group should not be the same as the OS groups that grant privileges for Oracle ASM access, or for database administration.

**INS-41813: OSDBA for ASM, OSOPER for ASM, and OSASM are the same OS group.**

**Cause:** The group you selected for granting the OSDBA for ASM group for database access, and the OSOPER for ASM group for startup and shutdown of Oracle ASM, is the same group as the OSASM group, whose members have SYSASM privileges on Oracle ASM.

**Action:** Choose different groups as the OSASM, OSDBA for ASM, and OSOPER for ASM groups.

**INS-41814: The installer has detected that some of the services of Oracle Grid Infrastructure are not running on this system.**

**Cause:** There may have been an error in starting the Oracle Grid Infrastructure services, or you may not have run the root scripts starting these services on this server.

**Action:** Confirm that you have run the root scripts on this server. If the root scripts have been run, then examine the log file string to determine the reason for the services failing to start.

**INS-41871: The user account you are using to install the software is not a member of the following OS groups: string**

**Cause:** The installation user account must be a member of all groups required for installation.

**Action:** Change the installation users group memberships to include the required OS system privileges groups, or select system privileges OS groups in which the installation owner is a member.

**INS-41872: The OS group you selected as the ASM Administraton Operator Group (ASMOPER) may not exist on the server.**

**Cause:** The installer cannot find the group you selected to be the ASMOPER group in the groups defined on the server, or in the Network Information Service (NIS).

**Action:** Confirm that the group you want to use as the ASMOPER group exists on the server, or in NIS. Create or specify another group if it does not exist.

**INS-41901: The Oracle Grid Infrastructure Typical installation cannot be performed on this system.**

**Cause:** The installer has detected the existence of vendor-specific clusterware. The typical Oracle Grid Infrastructure installation is a simplified configuration that is not designed to co-exist with clusterware other than Oracle Clusterware.
Action: Select Advanced Installation for Oracle Grid Infrastructure. This option allows you to specify configuration information required for Oracle Clusterware to operate with other vendor clusterware.

INS-41902: The Oracle Grid Infrastructure Typical installation cannot be performed on this system.
Cause: The installer has detected the existence of Oracle RAC 9i release 9.x on this server. The Oracle Grid Infrastructure Typical installation is a simplified configuration that is not designed to support older versions of Oracle RAC.
Action: Select Advanced Installation for Oracle Grid Infrastructure. This option allows you to specify configuration information required for Oracle Clusterware to operate with Oracle RAC release 9.x.

INS-42001: The same drive letter string cannot be assigned to more than one partition
Cause: The same drive letter string cannot be assigned to more than one partition
Action: Provide different drive letters to each partition.

INS-42002: The specified partition cannot be used.
Cause: The specified partition was selected for storing the software binaries.
Action: Instead, choose a location that is formatted for storing data files.

INS-42003: No partitions selected
Cause: No partitions were selected or partition details provided were incomplete.
Action: Specify one or more partitions. For each partition, select the format option and drive letter you want to have assigned to that partition.

INS-42004: No free drive letters available
Cause: The local server did not have any available drive letters to assign to partitions.
Action: Make drive letters available on the server, and then restart the installer.

INS-42005: The drive letter is not assigned to one or more partitions
Cause: Each partition you select must have an assigned drive letter.
Action: Ensure all partitions you want to use are configured with drive letters.

INS-42006: Selected drive letter (string) is invalid or not available for usage.
Cause: Either the drive letter is invalid, or it is already assigned to an existing partition.
Action: Select a valid drive letter.

INS-42011: The operating system group specified for oraInventory group is invalid.
Cause: The user account running the installation must have the oraInventory group as its primary group.
Action: Change the oraInventory group to the primary group of the installation owner account, or change the installation owner groups so that the group you want to use for the oraInventory group is the primary group of the installation owner.

INS-42012: The current Grid home is not registered in the central inventory on this host.
Cause: The wizard finds that this Grid home is not registered in the central inventory.
**Action:** Register the Grid home in the central inventory by using a cloning operation, or by using an attach-home operation.

**INS-42013: Installation user cannot configure the Grid home.**  
**Cause:** The wizard detects that the existing Grid home was not installed or cloned using the current user id: `string`.  
**Action:** Either restart the wizard as the user account that was used previously to install the Grid home, or re-clone the Grid home using the current user account.

**INS-42014: Oracle Grid Infrastructure cannot be configured.**  
**Cause:** The wizard detects that Oracle Grid Infrastructure is already configured on this server.  
**Action:** Before you can proceed, you must completely remove the configured instance.

**INS-42015: File missing from Grid home: string**  
**Cause:** The installer cannot find the specified file in the Grid home. The wizard requires this file to be present in the Grid home before it can proceed.  
**Action:** Restore the home by re-cloning the home, or re-install the software from installation media.

**INS-42016: The current Grid home is not registered in the central inventory on the following nodes: string**  
**Cause:** The wizard does not find this Grid home to be registered with the central inventory on some or all of the nodes specified.  
**Action:** Register the Grid home on the specified nodes with the central inventory, either by using a cloning operation, or by using an attach-home operation. Restart the wizard after fixing this issue.

**INS-42017: The Grid home is inconsistent on the following nodes: string**  
**Cause:** The wizard detects that the Grid home is inconsistent on some or all of the nodes specified. Review the log file for further details.  
**Action:** Ensure that the Grid home is consistent on all nodes.

**INS-42018: Specified disk group is invalid.**  
**Cause:** The installer detects that the specified disk group is not on the discovery path you provided.  
**Action:** For the selected disks, specify a valid disk group name, to which these disk previously were assigned. Also ensure that the discovery path you provide includes the disks.

**INS-42019: The wizard is unable to detect a configured prior release instance of Oracle Grid Infrastructure for a cluster or Cluster Ready Services.**  
**Cause:** You can only use Oracle Grid Infrastructure Configuration Wizard to upgrade earlier releases of Oracle Grid Infrastructure for a cluster or Cluster Ready Services.  
**Action:** Ensure Oracle Grid Infrastructure for a cluster or Cluster Ready Services is configured properly before using the configuration wizard. To perform any other upgrade, use the Oracle Grid Infrastructure installer, or run root configuration scripts directly.
