Preface

This document contains a list of patches pre-applied to the Oracle Solaris 10 9/10 release.

Note – This Oracle Solaris release supports systems that use the SPARC and x86 families of processor architectures: UltraSPARC, SPARC64, AMD64, Pentium, and Xeon EM64T. The supported systems appear in the [Oracle Solaris Hardware Compatibility List](#). This document cites any implementation differences between the platform types.

In this document the term “x86” refers to 64-bit and 32-bit systems manufactured using processors compatible with the AMD64 or Intel Xeon/Pentium product families. For supported systems, see the [Oracle Solaris Hardware Compatibility List](#).

Who Should Use This Book

Oracle Solaris 10 9/10 Operating System Patch List

The Oracle Solaris 10 9/10 patch list provides a list of patches pre-applied to the Oracle Solaris 10 9/10 release. Patches released after the Oracle Solaris 10 9/10 release can be found on the [My Oracle Support](#)

The patches that are listed in this chapter have been applied to the Oracle Solaris 10 Operating System in one of the following ways:

- SolStart
These patches are located in the `/var/sadm/patch` directory on an installed system.
- Freshbits technology
These patches were applied when the Oracle Solaris 10 OS was created. Therefore, these patches are not located in the `/var/sadm/patch` directory.

The `showrev -p` command provides a list of all patches that were applied to the installed system, regardless of how they were applied. The Oracle Solaris 10 software includes a known and tested level of patches. However, patches cannot be backed out of the Oracle Solaris 10 release.
