How to Use
This Document

To move through the pages of this document, click one of the following buttons at the bottom of the page:

➡   Displays the next page

⬅   Displays the previous page

🏠   Displays the first page

The construction symbol 🚧 means the publication is being developed, and is not yet available

Tips for Using These Electronic Guides

▶ Getting Help

For assistance while viewing these guides, select **the online help guide** from the Acrobat Reader Help menu

▶ Using Bookmarks

Use the expandable bookmark feature to quickly jump to a chapter or topic. Bookmarks for each topic are located on the left side of the Adobe Acrobat window

▶ Printing

For best results, print these guides to a PostScript compatible printer

User's Guides

▶ **e*Index Global Identifier User's Guide**

Helps you learn how to use the e*Index interface on the Quality Workstation, how to log on to e*Index, and how to use common functions and tools

▶ **e*Index Administrator User's Guide**

Helps the system administrator learn how to configure e*Index drop-down menus and parameters, to modify code table data, and to customize e*Index

▶ **e*Index Security User's Guide**

Helps the system administrator learn how to set up and maintain users and user groups, grant security permissions, and configure security control keys

e*Index

Technical Guides

▶ **e*Index Global Identifier Technical Reference**

Provides technical and operational information about e*Index, and provides descriptions, examples, and the syntax of each Monk API included in the e*Index API libraries.

▶ **e*Index Initial Load User's Guide**

Helps users install, modify, and run the schemas that are used to load legacy data from the systems that will be cross-referenced by e*Index. This document also describes the format of the data file to be loaded.

e*Index

Technical Guides (cont'd)

▶ **Java Programmer's Guide for e*Index Active Integration**
Provides background and implementation information about the Java APIs for e*Index Active Integration, and includes descriptions, parameters, syntax, return values, and examples for the Java functions

▶ **Working with Reports for e*Index Global Identifier**
Describes each report provided with e*Index, and how to customize and run the reports. Also provides report samples.

e*Index

Install/Upgrade Guides

▶ **e*Index Global Identifier Installation Guide**
Helps users install all components of e*Index, including the e*Gate schema files, the e*Index database, reports, GUI, and documentation

▶ **e*Index Global Identifier Upgrade Guide**
Helps users upgrade all components of e*Index, including the e*Gate schema files, the e*Index database, reports, GUI, and documentation from version 4.1.2 or later

▶ **e*Index 4.1.1 to 4.5.3 Upgrade Guide**
Helps users upgrade all components of e*Index, including the e*Gate schema files, e*Index database, reports, GUI, and documentation from version 4.1.1 to version 4.5.3

e*Index

Release Information

▶ **e*Index Global Identifier Release Bulletin**
Describes the changes made to e*Index between the previous and current versions. Includes information about database, platform, and processing enhancements, as well as changes to the Java APIs from version 4.1.1 to 4.5.3.

▶ **e*Index 4.1.1 to 4.5.2 Release Bulletin**
Describes the changes made to e*Index between the versions 4.1.1 and 4.5.2. Includes information about GUI, database, platform, Schema, and processing enhancements.
