Sun Microsystems, Inc. has intellectual property rights relating to technology embodied in the product that is described in this document. In particular, and without limitation, these intellectual property rights may include one or more of the U.S. patents listed at <http://www.sun.com/patents> and one or more additional patents or pending patent applications in the U.S. and in other countries.

This document and the product to which it pertains are distributed under licenses restricting their use, copying, distribution, and decompilation. No part of the product or of this document may be reproduced in any form by any means without prior written authorization of Sun and its licensors, if any.

Third-party software, including font technology, is copyrighted and licensed from Sun suppliers.

Parts of the product may be derived from Berkeley BSD systems, licensed from the University of California. UNIX is a registered trademark in the U.S. and in other countries, exclusively licensed through X/Open Company, Ltd.

Sun, Sun Microsystems, the Sun logo, AnswerBook2, docs.sun.com, Netra, Netra ft, Sun Fire, and Solaris are trademarks or registered trademarks of Sun Microsystems, Inc. in the U.S. and in other countries.

All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. in the U.S. and in other countries. Products bearing SPARC trademarks are based upon an architecture developed by Sun Microsystems, Inc. The Energy Star logo is a registered trademark of EPA.

The OPEN LOOK and Sun™ Graphical User Interface was developed by Sun Microsystems, Inc. for its users and licensees. Sun acknowledges the pioneering efforts of Xerox in researching and developing the concept of visual or graphical user interfaces for the computer industry. Sun holds a non-exclusive license from Xerox to the Xerox Graphical User Interface, which license also covers Sun's licensees who implement OPEN LOOK GUIs and otherwise comply with Sun's written license agreements.

Use, duplication, or disclosure by the U.S. Government is subject to restrictions set forth in the Sun Microsystems, Inc. license agreements and as provided in DFARS 227.7202-1(a) and 227.7202-3(a) (1995), DFARS 252.227-7013(c)(1)(ii) (Oct. 1998), FAR 12.212(a) (1995), FAR 52.227-19, or FAR 52.227-14 (ALT III), as applicable.

DOCUMENTATION IS PROVIDED "AS IS" AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

Sun Microsystems, Inc. a les droits de propriété intellectuels relatifs à la technologie incorporée dans le produit qui est décrit dans ce document. En particulier, et sans la limitation, ces droits de propriété intellectuels peuvent inclure un ou plus des brevets américains énumérés à <http://www.sun.com/patents> et un ou les brevets plus supplémentaires ou les applications de brevet en attente dans les Etats-Unis et dans les autres pays.

Ce produit ou document est protégé par un copyright et distribué avec des licences qui en restreignent l'utilisation, la copie, la distribution, et la décompilation. Aucune partie de ce produit ou document ne peut être reproduite sous aucune forme, par quelque moyen que ce soit, sans l'autorisation préalable et écrite de Sun et de ses bailleurs de licence, s'il y en a.

Le logiciel détenu par des tiers, et qui comprend la technologie relative aux polices de caractères, est protégé par un copyright et licencié par des fournisseurs de Sun.

Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie. UNIX est une marque déposée aux Etats-Unis et dans d'autres pays et licenciée exclusivement par X/Open Company, Ltd.

Sun, Sun Microsystems, le logo Sun, AnswerBook2, docs.sun.com, Netra, Netra ft, Sun Fire, et Solaris sont des marques de fabrique ou des marques déposées de Sun Microsystems, Inc. aux Etats-Unis et dans d'autres pays.

Toutes les marques SPARC sont utilisées sous licence et sont des marques de fabrique ou des marques déposées de SPARC International, Inc. aux Etats-Unis et dans d'autres pays. Les produits portant les marques SPARC sont basés sur une architecture développée par Sun Microsystems, Inc.

L'interface d'utilisation graphique OPEN LOOK et Sun™ a été développée par Sun Microsystems, Inc. pour ses utilisateurs et licenciés. Sun reconnaît les efforts de pionniers de Xerox pour la recherche et le développement du concept des interfaces d'utilisation visuelle ou graphique pour l'industrie de l'informatique. Sun détient une licence non exclusive de Xerox sur l'interface d'utilisation graphique Xerox, cette licence couvrant également les licenciées de Sun qui mettent en place l'interface d'utilisation graphique OPEN LOOK et qui en outre se conforment aux licences écrites de Sun.

LA DOCUMENTATION EST FOURNIE "EN L'ÉTAT" ET TOUTES AUTRES CONDITIONS, DECLARATIONS ET GARANTIES EXPRESSES OU TACITES SONT FORMELLEMENT EXCLUES, DANS LA MESURE AUTORISÉE PAR LA LOI APPLICABLE, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE À LA QUALITÉ MARCHANDE, À L'APTITUDE À UNE UTILISATION PARTICULIÈRE OU À L'ABSENCE DE CONTREFAÇON.

Replacing DIMMs for the Sun Fire B100x Server Blade

This document provides the procedures for installing DIMMs in the Sun Fire B100x blade, and contains the following sections:

- “Before You Start” on page 1
 - “Replacing the DIMM” on page 2
 - “Installing the Blade” on page 8
-

Before You Start

Check that the blue ‘Ready to Remove’ LED is lit on the blade you want to remove from the system chassis.

Note – Do not remove the blade until this LED state is displayed.

See the *Sun Fire B1600 Blade System Chassis Administration Guide* for details of how to shut down the blade safely.

Caution – Operating the system chassis with empty blade slots might disrupt airflow through the system chassis and will compromise EMC compliance.

Caution – Do not touch, or apply pressure to, any part of the blade server’s main printed circuit board assembly.

Replacing the DIMM

This section provides the following procedures:

- “To Remove the Existing DIMM” on page 2
- “To Install the New DIMM” on page 5

▼ To Remove the Existing DIMM

Caution – Use proper ESD grounding techniques when handling components. Wear an antistatic wrist strap and use an ESD-protected mat. Store ESD-sensitive components in antistatic bags before placing them on any surface.

1. Remove the blade cover screws (FIGURE 1).

Use a Phillips No. 2 screwdriver to remove the screws.

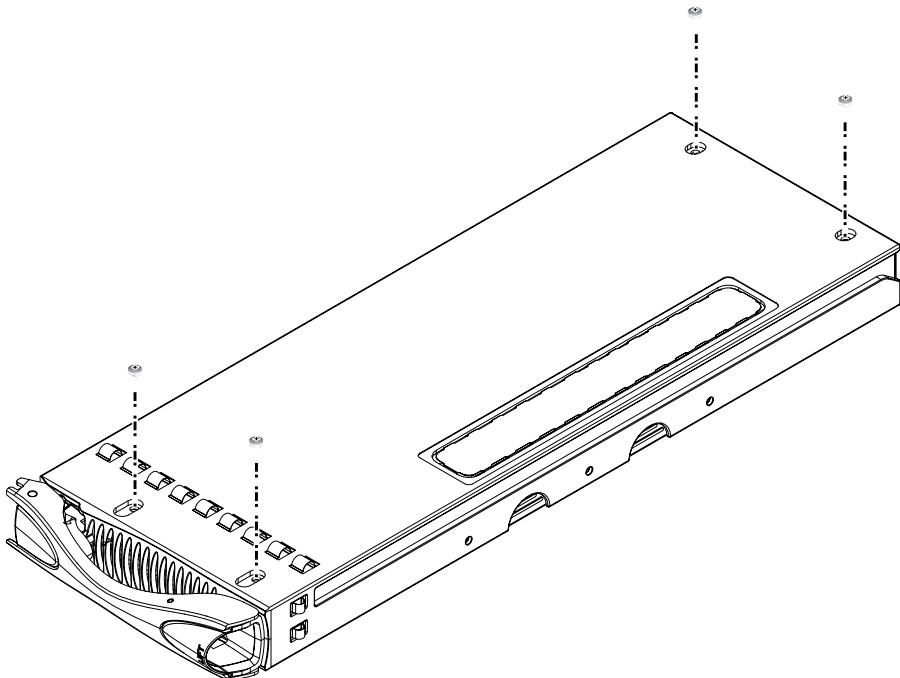

FIGURE 1 Removing the Blade Cover Screws

2. Lift the blade cover away from the blade (FIGURE 2).

Gently hinge open the blade cover and lift it away from the blade.

Caution – Do not use excessive force in hinging open the blade cover, as this might damage the blade EMI fingers and the physical enclosure itself.

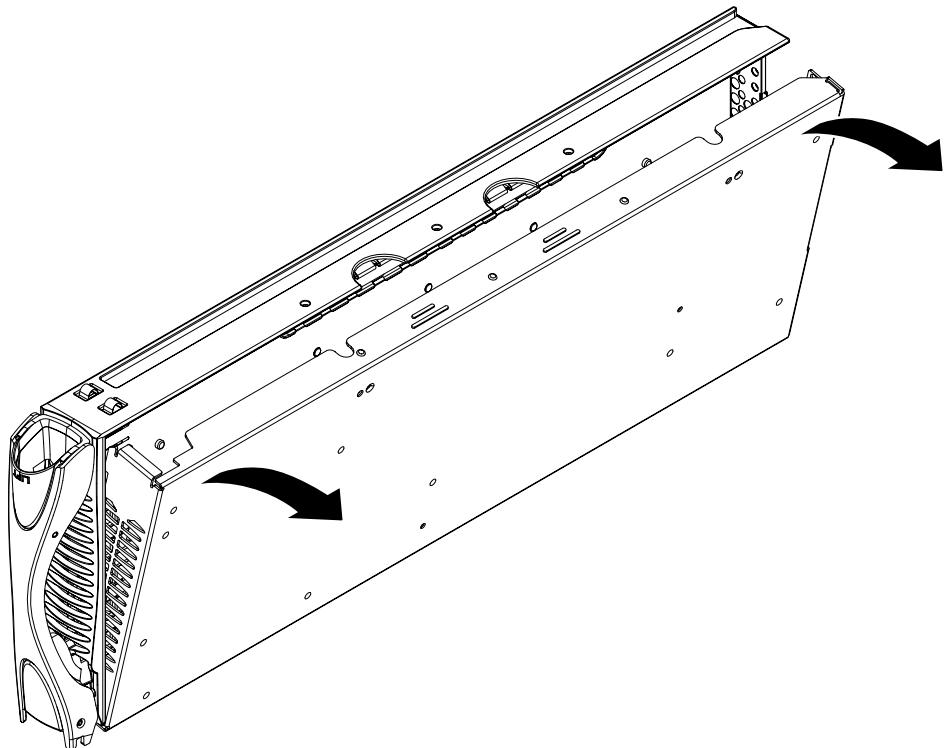

FIGURE 2 Lifting the Blade Cover Away From the Blade

3. Remove the DIMMs by pressing the DIMM ejectors firmly (FIGURE 3).

Press against the back of the DIMM riser card for support.

Note – You must remove the top DIMM if you require access to the bottom DIMM.

Caution – Do not press against the metal blade enclosure when you remove the DIMM as you will place excessive strain on the DIMM riser card. Place your thumbs on the back of the DIMM riser card if you require additional leverage.

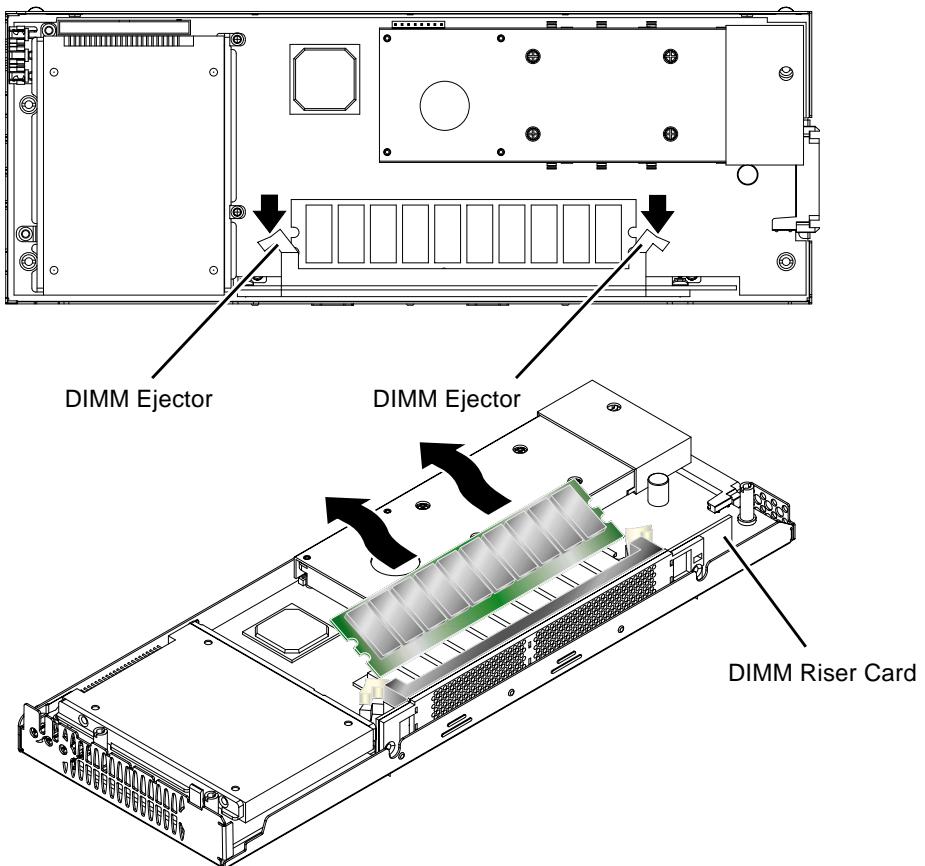

FIGURE 3 Removing the Existing DIMM

▼ To Install the New DIMM

Note – The top DIMM slot must be vacant before you to install a DIMM in the bottom slot.

1. Unpack the replacement DIMM.
2. Insert the DIMM into the vacant DIMM slot.
3. Press the DIMM until the DIMM ejectors engage on the edges of the DIMM (FIGURE 4).

Press against the back of the DIMM riser card for support when you insert the DIMM.

Note – The DIMM ejectors might not engage fully. Press the ejectors to engage them fully with the DIMM.

Caution – Do not press against the metal blade enclosure when you insert the DIMM as you will place excessive strain on the DIMM riser card. Place your thumbs on the back of the DIMM riser card if you require additional leverage.

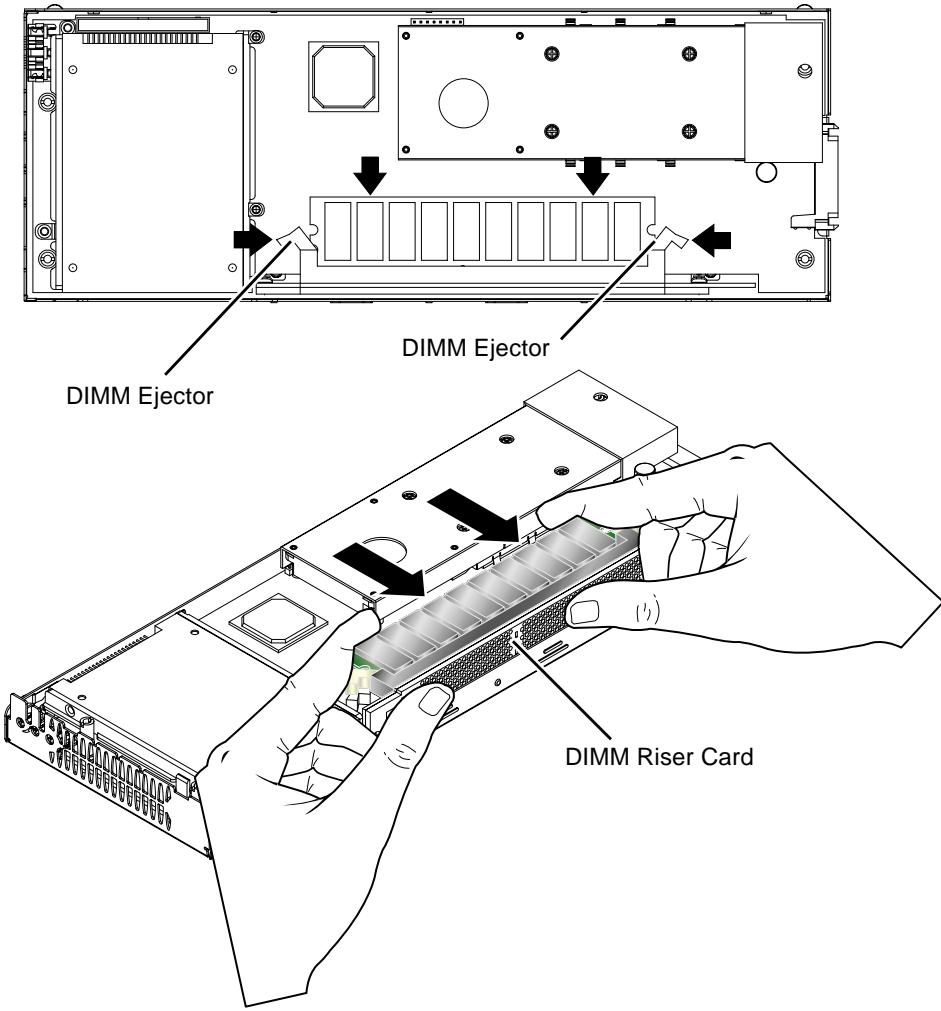

FIGURE 4 Engaging the DIMM Ejectors

4. Lower the blade cover on to the blade (FIGURE 5).

Keep the blade cover level with the blade enclosure. Check that the front of the blade cover is flush with the metal grille at the front of the blade enclosure.

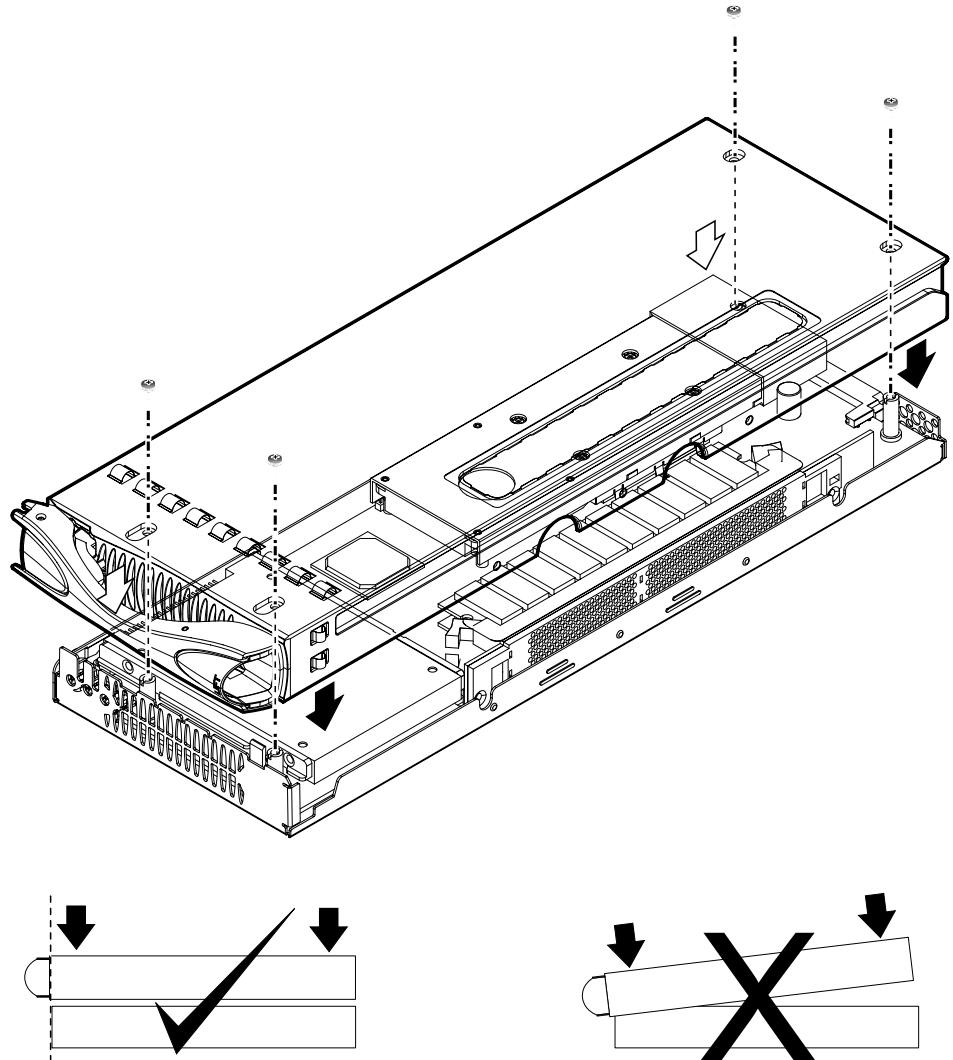

FIGURE 5 Lowering the Blade Cover on to The Blade Enclosure

5. Attach the blade cover to the blade enclosure with the blade cover screws.

Installing the Blade

The system chassis is designed to operate with a total of up to 16 blades and filler panels installed.

Caution – Operating the system chassis with empty blade slots might disrupt airflow through the system chassis and will compromise EMC compliance.

See your Linux documentation and the *Sun Fire B1600 Blade System Chassis Administration Guide* for details of how to install the blade into the system chassis, and how to bring the blade online.
