# Sun Fire™ T1000 Server Getting Started Guide

This guide provides basic information about your server, and explains where to find information to get your server up and running quickly.

The following topics are covered:

- Sun Fire T1000 Server Documentation
- Important Information About Firmware Updates and Solaris OS Patches
- Front and Rear Panel Identification

For detailed information, refer to the Sun Fire T1000 server documentation.

Important Information About Firmware Updates and Solaris OS Patches

Before you deploy your server, check for information about recommended updates of the Sun™ System Firmware and Solaris™ Operating System (OS). This information is described in the *Sun Fire T1000 Server Product Notes* (819-3246) that are posted at:
http://www.sun.com/documentation

Sun Fire T1000 Server Documentation

Instructions for installing, administering, and servicing your server are provided online from the Sun™ documentation web site:
http://www.sun.com/documentation

- *Sun Fire T1000 Server Product Notes* (819-3246)
  Describes late-breaking information about the server

- *Sun Fire T1000 Server Overview* (819-3245)
  Lists product features

- *Sun Fire T1000 Server Site Planning Guide* (819-3749)
  Provides server specifications for site planning

- *Sun Fire T1000 Server Installation Guide* (819-3247)
  Provides detailed rackmounting, cabling, power on, and configuring information

- *Sun Fire T1000 Server Administration Guide* (819-3249)
  Describes how to perform administrative tasks that are specific to this server

- *Advanced Lights Out Manager (ALOM) CMT Guide* (819-6672)
  Describes how to use the Advanced Lights Out Manager (ALOM) software

- *Sun Fire T1000 Server Service Manual* (819-3248)
  Describes how to run diagnostics to troubleshoot the server, and how to remove and replace parts in the server

- Sun Fire T1000 Server Safety and Compliance Guide
  Provides safety and compliance information that is specific to this server

For information about the Solaris Operating System that is preinstalled on the server, go to:
http://www.sun.com/software/preinstall
