- RJ-45 to DB-9 female adapter
- Unpacking tools:
  - 13 mm wrench
  - 8 mm wrench

## Setting Up the Netra 1290 Server

The following list summarizes the tasks to set up your Netra 1290 server:

1. Verify power, air conditioning, and floor area requirements.
2. Set up the Sun™ Rack and connect the power cables. Refer to the *Sun Rack Installation Guide*.
3. Unpack the Netra 1290 server and install it into the rack. Refer to the *Netra 1290 Server Installation Guide*, 819-4372.
4. Power on the Sun Rack. Refer to the *Sun Rack Installation Guide*.
5. Connect an administrative console to access the system controller and power on the Netra 1290 server. Refer to the *Netra 1290 Server Installation Guide*, 819-4372.
6. Allow the server to run through POST and ensure there are no errors, then power off the server. Refer to the *Netra 1290 Server System Administration Guide*, 819-4374, if there are errors.
7. (Optional) Install options and storage devices. Refer to the *Netra 1290 Server Service Manual*, 819-4373, and documentation that came with the option or storage device for details.
8. Power on the Netra 1290 server, and configure the system. Refer to the *Netra 1290 Server System Administration Guide*, 819-4374.
9. (Optional) Create additional domains. Refer to the *Netra 1290 Server System Administration Guide*, 819-4374.
  - a. Install the Solaris™ software on each domain. Refer to the *Solaris Installation Guide*.
  - b. Boot the Solaris software on each domain. Refer to the *Netra 1290 Server System Administration Guide*, 819-4374.
