This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related software documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS. Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle America, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications which may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. UNIX is a registered trademark licensed through X/Open Company, Ltd.

This software or hardware and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

# Sun Management Center 4.0 Version 4 Add-On Software Release Notes

---

This document contains release notes for Oracle's Sun Management Center 4.0 Version 4 Add-On Software for SPARC Enterprise M3000/M4000/M5000/M8000/M9000 servers. The document includes the following sections:

- ["What's New" on page 1](#)
- ["Supported Platforms and Environments" on page 2](#)
- ["Recommended Patches" on page 3](#)
- ["Documentation" on page 3](#)
- ["Obtaining the Add-On Software" on page 3](#)
- ["Known Issues and Workarounds" on page 4](#)
- ["Documentation Updates" on page 4](#)

---

## What's New

- Requires XSCF Control Package (XCP) 1100 firmware for SPARC Enterprise M3000/M4000/M5000/M8000/M9000 servers.

---

**Note** – The *SPARC Enterprise M3000/M4000/M5000/M8000/M900 Servers Product Notes for XCP Version 1100* (821-2799) explains supported hardware, firmware, and software combinations.

---

- The CMU Board Table includes a new column for CMU Board Type.
- The IOU Board Table includes a new column for IOU Board Type.

---

# Supported Platforms and Environments

## Supported Platforms

Sun Management Center 4.0 Version 4 Add-On software supports the following systems:

- SPARC Enterprise M3000 servers
- SPARC Enterprise M4000/M5000 servers
- SPARC Enterprise M8000/M9000 servers

## Supported Software

TABLE 1 lists the minimum software versions required for this release.

**TABLE 1** Minimum Required Software Versions

Host	Required Software	Version
Monitored platform	XCP firmware <b>Note</b> - Sun Management Center add-on software updates are included in XCP firmware image updates.	1100
Monitored domain	Oracle Solaris Operating System Sun Management Center core software Sun Management Center Add-On Software for SPARC Enterprise M3000/M4000/M5000/M8000/M9000 servers	10 11/06 4.0 4.0 Version 4
For both of the following: • Server • Workstations or common network location (for console layer)	Oracle Solaris Operating System (OS distribution must be at least "End User Systems Support") Sun Management Center server core software Sun Management Center Add-On Software for SPARC Enterprise M3000/M4000/M5000/M8000/M9000 servers	8 2/04 9 9/04 10 11/06 4.0 4.0 Version 4

---

## Recommended Patches

Oracle Solaris software patches and Sun Management Center patches might be available for your platform, for the core Sun Management Center 4.0 application, and for this add-on software. The product notes for your platform and the *Sun Management Center Software Release Notes* might also include information about required and recommended patches.

---

**Note** – You must install all the patches required for your platform and your operating system before installing Sun Management Center 4.0 software and this add-on.

---

If you have a service contract, you can download the patches from:

<http://sunsolve.sun.com>

---

## Documentation

Sun Management Center documentation is available at:

<http://docs.sun.com/app/docs/prod/sun.mgmt.ctr40>

For information about this add-on software, refer to the *Sun Management Center 4.0 Supplement for Sun SPARC Enterprise Servers: Sun SPARC Enterprise M3000/M4000/M5000/M8000/M9000 Servers* (820-6019), which supplements the core Sun Management Center documentation.

---

## Obtaining the Add-On Software

Sun Management Center software, including this Sun Management Center 4.0 Version 4 add-on software, is available for download at:

<http://www.oracle.com/technetwork/indexes/downloads>

Look for this product in the Sun Downloads A-Z Listing linked under the Servers and Storage section on this page.

For information about installing the software, refer to the *Sun Management Center 4.0 Supplement for Sun SPARC Enterprise Servers: Sun SPARC Enterprise M3000/M4000/M5000/M8000/M9000 Servers* (820-6019).

---

## Known Issues and Workarounds

TABLE 2 lists issues and possible workarounds for Sun Management Center software.

**TABLE 2** Sun Management Center Issues and Workarounds

CR Number	Description	Workaround
6567937	Sun Management Center alarms do not appear in the Alarms tab after a successful SP failover.	Click the Reload the Alarm Table button to refresh the table and display the correct alarm state.
6750818	The physical view is not seen on the web console. This situation occurs for both the Domain Config reader and Platform Admin Module on all SPARC Enterprise M3000/M4000/M5000/M8000/M9000 systems.	Use the Java Sun Management Center console to see the physical view for this add-on software.
6853141	On SPARC Enterprise M8000/M9000 servers, the System table for the Platform Admin Module displays values for "System permitted power consumption" and for "System Actual Power Consumption Polling Interval." However, these features are not supported on SPARC Enterprise M8000/M9000 servers.	These features are not supported for SPARC Enterprise M8000/M9000 servers. No workaround is required.

---

## Documentation Updates

This section contains late-breaking information that became known after the document *Sun Management Center 4.0 Supplement for Sun SPARC Enterprise Servers: Sun SPARC Enterprise M3000/M4000/M5000/M8000/M9000 Servers* (820-6019) was published.

**TABLE 3** Documentation Updates

Location	Description
Page 18, "Setting Up Security Access"	<p data-bbox="444 336 768 362">Add the following information:</p> <p data-bbox="444 404 1276 484">All monitoring and active management available to domain operators (<code>domNadm</code> groups) in the domain views tables are available to the platform administrator (<code>plataadm</code> group) in the Domain, XSB, and LSB tables of the platform view.</p> <p data-bbox="444 526 1310 579">Therefore, the platform administrator (<code>plataadm</code> group) does not need to be present in all the <code>domNadm</code> groups used by the domain views.</p> <p data-bbox="444 621 1272 675">However, you can add a platform operator user name to all <code>domNadm</code> groups by increasing the maximum number of groups allowed.</p> <p data-bbox="444 716 1005 743">To Increase the Maximum Number of Allowed Groups</p> <ol data-bbox="444 751 1286 805" style="list-style-type: none"><li data-bbox="444 751 1286 805">1. Add the following string to the system specification file (<code>/etc/system</code>) for the Sun Management Center server host: <pre data-bbox="468 847 711 873">set ngroups_max=32</pre></li><li data-bbox="444 907 1072 933">2. Reboot the OS on the Sun Management Center server host.</li></ol> <p data-bbox="444 975 1310 1083"><b>Caution:</b> Setting <code>ngroups_max=32</code> in <code>/etc/system</code> might give rise to NFS interoperability problems, as typical NFS servers only support 16 groups when using <code>AUTH_SYS/AUTH_UNIX</code>. The other NFS authentication mechanisms map "netids" to user names on the servers and can support more than 16 groups.</p> <p data-bbox="444 1091 576 1117">[CR 6872614]</p>

**TABLE 3** Documentation Updates

Location	Description
Page 19, "To Set Up Platform and Domain Views Administrative Groups"	<p data-bbox="362 284 919 307">Step 1 includes a list of possible values for <i>groupname</i>.</p> <p data-bbox="362 317 972 340">The last item in the list should be <code>platoper</code> (not <code>platop</code>).</p> <p data-bbox="362 350 498 373">[CR 6868916]</p> <p data-bbox="362 418 714 440">In Step 2, add the following Note:</p> <p data-bbox="362 451 1196 503"><b>Note</b> - If <code>ngroups_max</code> has been changed in <code>/etc/system</code>, ensure that the user names are not added to more than the <code>ngroups_max</code> value.</p> <p data-bbox="362 548 1229 626">A platform operator does not need to be in all <code>domNadm</code> groups. But if this situation is desired, you can get around the 16-group limit by setting the <code>ngroups_max</code> variable in <code>/etc/system</code> to a maximum of 32.</p> <p data-bbox="362 637 498 659">[CR 6872614]</p>
Page 36, "About the Platform Administration Module"	<p data-bbox="362 725 618 748">Add the following Note:</p> <p data-bbox="362 758 1205 836"><b>Note</b> - Full active platform management is possible only when using the Java Console. The Web Console enables you to monitor all elements, and to set actions and thresholds.</p> <p data-bbox="362 847 498 869">[CR 6872614]</p>
