Preface

The Solaris 10 10/09 Package List lists and describes the packages included in the Solaris 10 10/09 Operating System (Solaris OS). The list includes information about the software groups that contain each package.

Note – This Oracle Solaris release supports systems that use the SPARC and x86 families of processor architectures. The supported systems appear in the Oracle Solaris OS: Hardware Compatibility Lists (http://www.sun.com/bigadmin/hcl). This document cites any implementation differences between the platform types.

In this document these x86 related terms mean the following:

- x86 refers to the larger family of 64-bit x86 compatible products.
- x64 relates specifically to 64-bit x86 compatible CPUs.

For supported systems, see the Oracle Solaris OS: Hardware Compatibility Lists.

Who Should Use This Book

This book is intended for system administrators responsible for installing the Solaris software.

This chapter lists and describes the packages that support languages in the Solaris 10 10/09 software.

The languages package list is divided into the following platform-specific tables.
- “SPARC: Solaris 10 10/09 Languages Packages for SPARC Based Systems” on page 121
- “x86: Solaris 10 10/09 Languages Packages for x86 Based Systems” on page 149

SPARC: Solaris 10 10/09 Languages Packages for SPARC Based Systems

The following table lists the languages packages for the Solaris 10 10/09 software for SPARC based systems.
