Sun will not be responsible or liable for any actual or alleged damage or loss caused by or in connection with the use of or reliance on any such content, goods, or services that are available on or through such sites or resources.

Release Notes Revision History

Table 1 Revision History

Date	Description of Changes
February, 2005	Initial release of Sun Java™ System Administration Server Release Notes for Microsoft Windows.
July 2005	Release of RR version of Sun Java™ System Administration Server Release Notes for Microsoft Windows.

About Administration Server 5.2 2005Q1

Administration Server and Server Console are provided by the Sun Java Enterprise System installer as a single installable component for managing your Sun Java System server software. Server Console is a stand-alone Java application that works in conjunction with an instance of Directory Server and an instance of Administration Server. It acts as the front-end management application for Sun Java System software, finding all servers and applications registered in your configuration directory, displaying them in a graphical interface, and allowing you to manage and configure them, as well as add or edit user information.

This section includes:

- What's New in Administration Server 5.2 2005Q1
- Hardware and Software Requirements

What's New in Administration Server 5.2 2005Q1

Administration Server 5.2 2005Q1 is a maintenance release of Administration Server 5.2 2004Q2. No new features have been introduced in this release of the product.

For information about the bugs fixed in Administration Server 5.2 2005Q1, see "Important Information" on page 3.

The Administration Server commands are now documented as man pages. For more information, see "Documentation Notes" on page 4.

Hardware and Software Requirements

The following software is required for Administration Server 5.2 2005Q1.

CAUTION As Administration Server is installed to manage other servers, the RAM and disk space provisions for those other servers need to be added to the following provision to obtain realistic, overall requirements.

Table 2 Windows Hardware and Software Requirements

Component	Platform Requirement
Operating System	Windows 2000 Advanced Server, Service Pack 4
RAM	512 Mbytes
Disk Space	50 Mbytes

NOTE Administration Server 5.2 has been validated with Windows 2000

Bugs Fixed in This Release

None.

Important Information

This section covers the following Topics:

- Installation Notes
- Documentation Notes

Installation Notes

For information about installation information, see the following sections:

General Installation Information

If you run Administration Server as Administrator, all commands initiated by the administration user will also be run as Administrator. The same rules of confidentiality and security to the administration password must applicable to the Administrator of your server.

Documentation Notes

Product Version Number

In some parts of the Administration Server documentation and console, the version number of the product is referred to as 5.2. Administration Server 5 2005Q1 is a maintenance release of Administration Server 5.2.

Localized Documentation

Localized documentation is posted to http://docs.sun.com/ as it becomes available.

Known Issues and Limitations

This section describes the known issues and limitations of Admin Server 5.2 2005Q1 for Windows. For a list of the known issues and limitations in the component, refer to the following Release Notes: http://docs.sun.com/app/docs/doc/817-7610.

Error message not displayed (6215658)

After Admin Server is SSL enabled, it prompts to restart in the command mode. When you ignore the promt and try to restart from the Admin Server tasks “Restart Button,” the server fails to restart but pretends to restart. A proper error message is not displayed.

Work Around

None.

Redistributable Files

Sun Java System Administration Server 5.2 2005Q1 does not contain any files which you can redistribute.

How to Report Problems and Provide Feedback

If you have problems with Sun Java System Administration Server, contact Sun customer support using one of the following mechanisms:

- Sun Software Support services online at
  http://www.sun.com/service/sunone/software

  This site has links to the Online Support Center, and ProductTracker, as well as to maintenance programs and support contact numbers.
- The SunSolve support website at
  http://sunsolve.sun.com

  This site includes patches, support documents, security information, and the Sun System Handbook.
- The telephone dispatch number associated with your maintenance contract

So that we can best assist you in resolving problems, please have the following information available when you contact support:

- Description of the problem, including the situation where the problem occurs and its impact on your operation
- Machine type, operating system version, and product version, including any patches and other software that might be affecting the problem
- Detailed steps on the methods you have used to reproduce the problem
- Any error logs or core dumps
