Sun Microsystems, Inc. has intellectual property rights relating to technology that is described in this document. In particular, and without limitation, these intellectual property rights may include one or more of the U.S. patents listed at <http://www.sun.com/patents> and one or more additional patents or pending patent applications in the U.S. and in other countries.

This document and the product to which it pertains are distributed under licenses restricting their use, copying, distribution, and decompilation. No part of the product or of this document may be reproduced in any form by any means without prior written authorization of Sun and its licensors, if any.

Third-party software, including font technology, is copyrighted and licensed from Sun suppliers.

Parts of the product may be derived from Berkeley BSD systems, licensed from the University of California. UNIX is a registered trademark in the U.S. and in other countries, exclusively licensed through X/Open Company, Ltd.

Sun, Sun Microsystems, the Sun logo, AnswerBook2, docs.sun.com, Sun StorEdge, Java, Sun Blade, SunSolve, StorageTek, and Solaris are trademarks or registered trademarks of Sun Microsystems, Inc. in the U.S. and in other countries.

All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. in the U.S. and in other countries. Products bearing SPARC trademarks are based upon an architecture developed by Sun Microsystems, Inc.

Mozilla is a trademark or registered trademark of Netscape Communications Corporation in the United States and other countries.

The OPEN LOOK and Sun™ Graphical User Interface was developed by Sun Microsystems, Inc. for its users and licensees. Sun acknowledges the pioneering efforts of Xerox in researching and developing the concept of visual or graphical user interfaces for the computer industry. Sun holds a non-exclusive license from Xerox to the Xerox Graphical User Interface, which license also covers Sun's licensees who implement OPEN LOOK GUIs and otherwise comply with Sun's written license agreements.

U.S. Government Rights—Commercial use. Government users are subject to the Sun Microsystems, Inc. standard license agreement and applicable provisions of the FAR and its supplements.

DOCUMENTATION IS PROVIDED "AS IS" AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

Copyright 2006 Sun Microsystems, Inc., 4150 Network Circle, Santa Clara, Californie 95054, Etats-Unis. Tous droits réservés.

Sun Microsystems, Inc. a les droits de propriété intellectuels relatifs à la technologie qui est décrite dans ce document. En particulier, et sans la limitation, ces droits de propriété intellectuelle peuvent inclure un ou plus des brevets américains énumérés à <http://www.sun.com/patents> et un ou les brevets plus supplémentaires ou les applications de brevet en attente dans les Etats-Unis et dans les autres pays.

Ce produit ou document est protégé par un copyright et distribué avec des licences qui en restreignent l'utilisation, la copie, la distribution, et la décompilation. Aucune partie de ce produit ou document ne peut être reproduite sous aucune forme, par quelque moyen que ce soit, sans l'autorisation préalable et écrite de Sun et de ses bailleurs de licence, s'il y en a.

Le logiciel détenu par des tiers, et qui comprend la technologie relative aux polices de caractères, est protégé par un copyright et licencié par des fournisseurs de Sun.

Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie. UNIX est une marque déposée aux Etats-Unis et dans d'autres pays et licenciée exclusivement par X/Open Company, Ltd.

Sun, Sun Microsystems, le logo Sun, AnswerBook2, docs.sun.com, Sun StorEdge, Java, Sun Blade, SunSolve, StorageTek, et Solaris sont des marques de fabrique ou des marques déposées de Sun Microsystems, Inc. aux Etats-Unis et dans d'autres pays.

Toutes les marques SPARC sont utilisées sous licence et sont des marques de fabrique ou des marques déposées de SPARC International, Inc. aux Etats-Unis et dans d'autres pays. Les produits portant les marques SPARC sont basés sur une architecture développée par Sun Microsystems, Inc.

Mozilla est une marque de Netscape Communications Corporation aux Etats-Unis et à d'autres pays.

L'interface d'utilisation graphique OPEN LOOK et Sun™ a été développée par Sun Microsystems, Inc. pour ses utilisateurs et licenciés. Sun reconnaît les efforts de pionniers de Xerox pour la recherche et le développement du concept des interfaces d'utilisation visuelle ou graphique pour l'industrie de l'informatique. Sun détient une licence non exclusive de Xerox sur l'interface d'utilisation graphique Xerox, cette licence couvrant également les licenciées de Sun qui mettent en place l'interface d'utilisation graphique OPEN LOOK et qui en outre se conforment aux licences écrites de Sun.

LA DOCUMENTATION EST FOURNIE "EN L'ÉTAT" ET TOUTES AUTRES CONDITIONS, DECLARATIONS ET GARANTIES EXPRESSES OU TACITES SONT FORMELLEMENT EXCLUES, DANS LA MESURE AUTORISÉE PAR LA LOI APPLICABLE, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE À LA QUALITÉ MARCHANDE, À L'APTITUDE À UNE UTILISATION PARTICULIÈRE OU À L'ABSENCE DE CONTREFAÇON.

Sun StorageTek PCI Express Enterprise 4 Gb FC Host Bus Adapters Emulex Release Notes

This document contains the latest supplementary information for the Sun StorageTek™ PCI Express Enterprise 4 Gb Fibre Channel (FC) Single and Dual Port Host Bus Adapter (HBA) (SG-XPCIE1FC-EM4, SG-XPCIE2FC-EM4). Use it with the latest version of the *Sun StorageTek PCI Express Enterprise 4 Gb FC Host Bus Adapters Emulex Installation Guide* (part number 819-4810-10 or later).

It contains the following sections:

- “[Features in This Release](#)” on page 2
 - “[Solaris 10 Operating Systems](#)” on page 2
 - “[Red Hat Enterprise Linux and SuSE Linux Enterprise Server Systems](#)” on page 5
 - “[Windows 2000 and Windows Server 2003 Systems](#)” on page 6
-

Note – Sun is not responsible for the availability of third-party Web sites mentioned in this document. Sun does not endorse and is not responsible or liable for any content, advertising, products, or other materials that are available on or through such sites or resources. Sun will not be responsible or liable for any actual or alleged damage or loss caused by or in connection with the use of or reliance on any such content, goods, or services that are available on or through such sites or resources.

Features in This Release

This HBA consists of a single-slot PCI Express bus expansion board that connects a 4-lane PCI Express bus to either one or two optical ports. For dual port adapters, the two channels operate independently; each supports a separate FC bus operating at 4 Gbits/sec. Each channel is also backward-compatible with 2.125 Gbits/sec and 1.0625 Gbits/sec FC ports.

Small-Form Factor (SFF) LC-duplex connectors are used to connect to the external FC ports. The FC bus operates in short-wave, multi-mode. One Emulex Zephyr ASIC is used to support the one or two independent FC ports.

Supported Operating Systems

You can use the Sun StorageTek PCI Express Enterprise 4 Gb FC Single and Dual Port HBA with the following operating systems (OSs):

- Solaris 10
 - To use the adapter with this OS, you must use the Sun driver as described in [“Solaris 10 Operating Systems” on page 2](#).
- Red Hat Enterprise Linux and SuSE Linux Enterprise Server OSs
 - To use the adapter with these OSs, you must use the Emulex driver as described in [“Red Hat Enterprise Linux and SuSE Linux Enterprise Server Systems” on page 5](#)
- Windows 2000 and Windows Server 2003
 - To use the adapter with this OS, you must use the Emulex driver as described in [“Windows 2000 and Windows Server 2003 Systems” on page 6](#).

Solaris 10 Operating Systems

This section contains the following information about using the Sun StorageTek PCI Express 4 Gb FC Single and Dual Port HBA with the Solaris OS:

- [“System Requirements” on page 3](#)
- [“Known Issues and Bugs” on page 4](#)

System Requirements

The following hardware and software are qualified with the Solaris 10 OS.

Minimum OS Levels

- Solaris 10 for SPARC and x64/x86 OS with the Solaris 10 recommended patch cluster.

For required packages and patches, consult the Installation Guide 819-4810-xx

Host Platform Support

- Sun Fire T1000/T2000
- Sun Fire X2100 server (x64)

Storage System Support

- Sun StorEdgeTM 3510 and 3511 FC Arrays
- Sun StorEdgeTM 6020, 6120, and 6320 Arrays
- Sun StorEdgeTM 6130 Array
- Sun StorEdge 6920 system
- Sun StorEdge C4 tape library
- Sun StorEdge L25, L100 tape libraries
- Sun StorEdge L500 tape library
- Sun StorEdge L180, L700 tape libraries
- Sun StorEdge L5500, L8500 tape libraries

Fibre Channel Switch Support

FC switch support is shown in [TABLE 1](#).

TABLE 1 Fibre Channel Switch Support

Switch	Minimum Firmware Version
QLogic SANbox 5200 2 Gb switch	4.2.05
Sun StorEdge Network 2 Gb switch	4.2.05
Sun StorEdge Network 2 Gb Brocade SilkWorm 3200 and 3800 switches	3.2.0a

TABLE 1 Fibre Channel Switch Support (*Continued*)

Switch	Minimum Firmware Version
Sun StorEdge Network 2 Gb Brocade SilkWorm 3250 and 3850 switches	4.4.0e
Sun StorEdge Network 2 Gb Brocade SilkWorm 3900 switch	4.4.0e
Sun StorEdge Network 2 Gb Brocade SilkWorm 12000 and 24000 Core Fabric switches	4.4.0e
Sun StorEdge Network 4 Gb Brocade SilkWorm 4100 switch	5.0.3
Sun StorEdge Network 4 Gb Brocade SilkWorm 48000 and 200E	5.0.3
Sun StorEdge Network 2 Gb McDATA Spheron 4300 switch	7.01
Sun StorEdge Network 2 Gb McDATA Spheron 4500 switch	7.01
Sun StorEdge Network 2 Gb McDATA Intrepid 6064 director	7.01
Sun StorEdge Network 2 Gb McDATA Intrepid 6140 director	7.01

Known Issues and Bugs

The following issues and bugs have not been resolved in this release.

Known Issues

The following issue has been identified in this release and will be fixed in the next Solaris 10 Update release:

None.

Known Bugs

The following bugs are under investigation at the time of the release:

- **CR 6352189:** OBP>probe gives unexpected output for unmapped channel/SE35xx

Description: OBP> probe-scsi-all gives the unexpected output to the unmapped channel of SE3511 (m31).

This channel 0 of SE3511 is connected directly (DAS) to a port of Summit-E HBA (FCode 5.01a9) without switch and no LUN is mapped to this channel 0 yet.

Workaround: Send the probe-scsi-all command a second time (without an intervening reset). A valid list of attached devices will be displayed.

Red Hat Enterprise Linux and SuSE Linux Enterprise Server Systems

The Linux drivers and HBA diagnostic and management utilities supporting the Sun StorageTek Enterprise PCI Express 4 Gb FC Single and Dual Port HBAs with the Linux OS are available for download at the Sun designated page at:

<http://emulex.com/ts/docuem/sun/summit.html>

Drivers that support the Linux 2.4 and 2.6 kernels are provided. The Linux 2.4 kernel is used in Red Hat Enterprise Linux (RHEL) 3. The Linux 2.6 kernel is used in RHEL 4 and SLES 9. Consult the Sun hardware platform documentation to verify which Linux releases are supported.

This section contains the following information about using the StorageTek Enterprise PCI Express 4 Gb FC Single and Dual Port HBAs in Red Hat Enterprise Linux and in SuSE Linux Enterprise operating systems:

- System Requirements below
- “[Known Issues and Bugs](#)” on page 6

System Requirements

The following hardware and software are qualified with the Red Hat Enterprise Linux and with the SuSE Linux Enterprise server systems:

Minimum OS Levels

- Red Hat Enterprise Linux (RHEL) 3
- Red Hat Enterprise Linux (RHEL) 4
- SuSE Linux Enterprise Server (SLES) 9

Host Platform Support

- Sun Fire X2100 server (x64)

Storage System Support

The storage systems supported for Red Hat Enterprise Linux and SuSE Linux Enterprise Server Systems are the same as those listed for “[Solaris 10 Operating Systems](#)” on page 2.

Fibre Channel Switch Support

FC switch support is shown in [TABLE 1](#). It is the same as those listed for Solaris 10 Operating Systems on page “[Fibre Channel Switch Support](#)” on page 3.

Known Issues and Bugs

There are no known HBA issues or bugs for Linux operating systems at this time.

Windows 2000 and Windows Server 2003 Systems

The host adapter device driver for running the Windows 2000 and Windows Server 2003 OS is available for download at the Emulex website:

<http://emulex.com/ts/docuem/sun/summit.html>

This section contains the following information about using the StorageTek Enterprise PCI Express PCI Express 4 Gb FC Single and Dual Port HBAs in Windows 2000 and Windows Server 2003 operating systems:

- [“System Requirements” on page 7](#)
- [“Known Issues and Bugs” on page 7](#)

System Requirements

The following hardware and software are qualified with the Windows 2000 and Windows Server 2003 OSs:

Host Platform Support

- Sun Fire X2100 server (x64)

Storage Systems Support

The storage systems supported for the Windows 2000 and the Windows Server 2003 operating systems are the same as those listed for “[Solaris 10 Operating Systems](#)” on [page 2](#).

Fibre Channel Switch Support

The FC switches supported for the Windows 2000 and Windows Server 2003 operating systems are the same as those listed for Solaris 10 Operating Systems on page “[Fibre Channel Switch Support](#)” on [page 3](#).

Known Issues and Bugs

There are no known HBA issues or bugs for the Windows 2000 and Windows Server 2003 operating systems at this time.

Service Contact Information
