# Sun Java™ System Web Proxy Server Release Notes for Microsoft Windows

Version 4.0.1

Part Number 819-4278-10

These release notes contain important information available at the time of the release of the Sun Java System Web Proxy Server 4.0.1 product component, hereafter referred to as Proxy Server 4.0.1. Platform summary and known problems are addressed here. Please read this document and associated documents before you begin using the Sun product.

This document contains the following sections:

- Release Notes Revision History
- About Web Proxy Server 4.0.1
- Bugs Fixed in This Release
- Important Information
- Known Issues and Limitations
- How to Report Problems and Provide Feedback
- Additional Sun Resources

#### Release Notes Revision History

**Table 1** Revision History

Date	Description
February 2006	Revenue release.
November 2005	Beta release.

#### About Web Proxy Server 4.0.1

The Sun Java System Web Proxy Server supports HTTP caching and platform acceleration for high performance Internet and Intranet environments. The primary functions of the Sun Java System Web Proxy Server are Proxying, Caching, Authentication, Filtering, Access Control, Logging & Reporting.

The following enhancement has been made in Proxy Server 4.0.1:

#### NSS 3.10.1 and NSPR 4.5.2 Support

Proxy Server 4.0.1 supports Network Security Services (NSS) 3.10.1 and Netscape Portable Runtime (NSPR) 4.5.2.

This section covers the following:

Hardware and Software Requirements

#### Hardware and Software Requirements

This section specifies the Platform Requirements and Supported Browsers for Web Proxy Server 4.0.1

This section includes the following topics:

- Platform Requirements
- Supported Browsers

#### Platform Requirements

The following table summarizes the Proxy Server 4.0.1 platform requirements.

**Table 2** Platform Requirements for Proxy Server 4.0.1

Operating System	Minimum	Recommended	Recommended
	Memory	Memory	Disk Space*
Microsoft Windows 2000 Server	256 MB	512 MB or	512 MB or
Service Pack 4		higher	higher
Microsoft Windows 2000	256 MB	512 MB or	512 MB or
Advanced Server		higher	higher
Microsoft Windows 2003	256 MB	512 MB or	512 MB or
Enterprise Server		higher	higher

<sup>\*</sup>Depends on cache capacity setting. The default cache capacity setting is 2GB

#### Supported Browsers

The following table lists the browsers that are supported with Proxy Server 4.0.1

**Table 3** Supported Browsers for Proxy Server 4.0.1

Browser	Version
Microsoft Internet Explorer	6.0

Mozilla™	1.4.1, 1.7.2

# Bugs Fixed in This Release

This section lists the most important issues fixed in the following release:

The following table lists the bugs fixed in Sun Java System Web Proxy Server 4.0.1

**Table 4** Fixed Bugs in Sun Java System Web Proxy Server 4.0.1

Bug ID	Summary
6357813	WPS admin console is not accessible in Spanish

#### Important Information

This section covers the following:

- Accessing the Documentation
- Accessibility Features for People With Disabilities

#### Accessing the Documentation

The Sun Java System Web Proxy Server 4.0.1 documentation is provided in a number of ways:

- Manuals—You can view the Proxy Server 4.0.1 manuals and release notes in HTML and in printable PDF formats.
- Online help—Click the Help button in the graphical interface to launch a context-sensitive help window.

#### Accessibility Features for People With Disabilities

To obtain accessibility features that have been released since the publishing of this media, consult Section 508 product assessments available from Sun upon request to determine which versions are best suited for deploying accessible solutions. Updated versions of applications can be found at: http://sun.com/software/javaenterprisesystem/get.html.

For information on Sun's commitment to accessibility, visit http://sun.com/access.

#### **Known Issues and Limitations**

This section lists the known issues and limitations at the time of the Sun Java System Web Proxy Server 4.0.1 release.

## Proxy adminserver does not display the correct message while creating instance with lengthy serverid in Windows (6347170)

In Add server tab of admin server, when you enter the server ID with maximum 280 characters and click ok, "Page cannot be displayed" error message occurs, instead of the message "File name too long."

## How to Report Problems and Provide Feedback

If you have problems with Sun Java System Web Proxy Server 4.0.1, contact Sun customer support using one of the following mechanisms:

- Sun Software Support services online at http://www.sun.com/service/support/software
- The telephone dispatch number associated with your maintenance contract

Please include the following information:

- Description of the problem, including the situation where the problem occurs and its impact on your operation
- Machine type, operating system version, and product version, including any patches and other software that might be affecting the problem
- Detailed steps on the methods you have used to reproduce the problem
- Any error logs or core dumps

Sun is interested in improving its documentation and welcomes your comments and suggestions. You can submit your comments by going to: http://docs.sun.com/app/docs/form/comments
