Solaris 2.5.1 Hardware: 4/97 on Sun
Hardware Documentation Roadmap

Contents of Solaris 2.5.1 Hardware: 4/97 on Sun Hardware Documentation Set

This documentation roadmap describes the manuals that are part of the Solaris™ 2.5.1 Hardware: 4/97 on Sun Hardware AnswerBook set.

The software for this AnswerBook™ set is provided on the SMCC Updates CD included in the media kit that contains other Solaris 2.5.1 Hardware: 4/97 software. This SMCC-specific AnswerBook set is titled Solaris 2.5.1 Hardware: 4/97 on Sun Hardware AnswerBook, and is provided in a software package named SUNWabhdw. Refer to the SMCC SPARC Hardware Platform Guide in the media kit that accompanies the SMCC Updates CD for information about installing the Solaris 2.5.1 Hardware: 4/97 on Sun Hardware AnswerBook set.

Note – For information about using the AnswerBook navigator and viewer, see the Solaris User’s Guide in the Solaris 2.5 User AnswerBook set. For information about administration of AnswerBook sets, see the System Administration Guide, Volume I in the Solaris 2.5 System Administrator AnswerBook set.

General Manuals

The following manuals may be of interest to users of any SMCC systems.

- Solaris Reference Manual for SMCC-Specific Software

  Read this to find a compilation of manual pages (man pages) provided in packages on the SMCC Updates CD. (The SMCC SPARC Hardware Platform Guide provides instructions for installing these additional man pages on your system.) This manual also includes texts of some recent man pages that are provided on the Solaris 2.5.1 Hardware: 4/97 CD, but are otherwise not available in other Solaris Reference Manual volumes (either printed or in AnswerBook form).
• Solaris Handbook for SMCC Peripherals
   Read this if you are installing SMCC drives that are used with this release of the Solaris operating environment. This manual covers issues such as configuring SCSI addresses for each drive on your system.

• Using Power Management
   Read this for information about using Power Management™ features to reduce power usage with your sun4m and sun4u desktop hardware. This manual also includes material specifically about Power Management on the SPARCstation™ Voyager™.

   This manual is also available in the Solaris 2.5.1 Hardware: 4/97 on Sun Hardware AnswerBook online set in translations that match the following localized versions of the graphical user interface for Power Management:

   • French: Utilisation de Power Management
   • German: Arbeiten mit Power Management
   • Italian: Uso di Power Management
   • Spanish: Utilización de Power Management
   • Swedish: Använda strömförsörjningsprogrammet

• SunVTS 2.0 User’s Guide
   Read this for general instructions on using the SunVTS™ diagnostic software.

• SunVTS 2.0 Test Reference Manual
   Read this for detailed information about each test that is provided with the SunVTS diagnostic software.

• SunVTS 2.0.1 Test Supplement
   Read this for detailed information about tests that have been added since the SunVTS 2.0 release. This also includes explanations of error messages that are generated by these tests.

• SunVTS 2.0 Quick Reference Card
   Read this as a reminder of the commands used to start the SunVTS software and the options available through the graphical user interface or command line.
• **Solstice SyMON 1.3 User’s Guide**

   Read this to install and operate the Solstice™ SyMON™ administrative tool (supplied on the SMCC Updates CD), which monitors the performance of a server and runs SunVTS tests.

• **SMCC NFS Server Performance and Tuning Guide**

   Read this if you are the system administrator of SMCC hardware that is used as an NFS™ server.

### Platform Notes

The following manuals apply to specific SMCC hardware systems and devices. Examine this list to determine which manuals provide supplemental information relevant to the hardware you use.

• **Platform Notes: SMCC Frame Buffers**

   Read this for information on using features of the TurboGXplus™, ZX, SX, Creator, and m64 Graphics Accelerator frame buffers. This manual also explains how to configure multiple monitors on a system.

• **Platform Notes: Ultra Enterprise 3000, 4000, 5000 and 6000 Systems**

   Read this for information specific to these Ultra™ Enterprise™ servers, such as new OpenBoot™ commands that can be used with the firmware in those machines.

• **Platform Notes: The hme FastEthernet Device Driver**

   Read this to configure the hme FastEthernet device driver for use with hardware such as the Ultra 1 Series systems, Ultra 2 Series systems, Ultra Enterprise 3000, 4000, 5000, and 6000 systems, SunSwift™ SBus Adapter, and SunFastEthernet™ Adapter 2.0.

• **Platform Notes: Using the Standard SPARCstorage Array Software**

   Read this to use the SPARCstorage™ Array with the software provided in this Solaris release.

• **RAID Manager Installation Guide**

   Read this to install and start up the RAID Manager software that is used with an RSM Array™ 2000 storage system.
• **RAID Manager User’s Guide**

  Read this to use the RAID Manager software for configuring, status checking, recovery, maintenance, and tuning of an RSM Array™ 2000 storage system.

• **Platform Notes: SPARCstation 10SX and SPARCstation 20 System Configuration Guide**

  Read this if you are a developer who wants to take advantage of the graphics memory features of these systems.

• **Platform Notes: SPARCstation Voyager Software Guide**

  Read this for information about using software provided on the SMCC Updates CD for use with this nomadic computer. Also refer to this if you are a system administrator supporting users with SPARCstation Voyager systems.

### Manuals Organized by Primary Audience

Solaris manuals are aimed at three main categories of readers:

- **End Users**
- **Administrators** (who also refer to manuals for End Users)
- **Developers** (who also refer to manuals for End Users and Administrators)

Each of the manuals in this documentation set is listed under its primary audience.

### Manuals for End Users

- **Using Power Management**
- **Solaris Handbook for SMCC Peripherals**
- **Platform Notes: SMCC Frame Buffers**
- **Platform Notes: The hme FastEthernet Device Driver**
- **Platform Notes: SPARCstation Voyager Software Guide**
Manuals for Administrators

- Solaris Reference Manual for SMCC-Specific Software
- SunVTS 2.0 User’s Guide
- SunVTS 2.0 Test Reference Manual
- SunVTS 2.0.1 Test Supplement
- SunVTS 2.0 Quick Reference Card
- Solstice SyMON 1.3 User’s Guide
- SMCC NFS Server Performance and Tuning Guide
- Platform Notes: Ultra Enterprise 3000, 4000, 5000 and 6000 Systems
- Platform Notes: Using the Standard SPARCstorage Array Software
- RAID Manager Installation Guide
- RAID Manager User’s Guide

Manuals for Developers

- Platform Notes: SPARCstation 10SX and SPARCstation 20 System Configuration Guide

Additional Information Sources

The following documents, not included in the Solaris on Sun Hardware AnswerBook set, are also relevant to users of SMCC hardware.

Installation Information

For information about installing the Solaris operating environment on SMCC hardware, see the SMCC SPARC Hardware Platform Guide and other documentation provided with your Solaris media. Be sure to check these documents to determine if there are special instructions for installing or using your SMCC hardware with this Solaris release.
**Ultra Enterprise 10000 AnswerBook Sets**

The Ultra Enterprise 10000 server is supplied with additional software, which is covered in manuals contained in the following AnswerBook sets:

- *Ultra Enterprise 10000 SSP 3.0 AnswerBook*
- *Alternate Pathing 2.0 AnswerBook*
- *Dynamic Reconfiguration AnswerBook*
Ordering Sun Documents

The SunDocs™ Order Desk is a distribution center for Sun Microsystems technical documents. You can use major credit cards and company purchase orders. You can order documents in the following ways:
