Copyright 2008 Sun Microsystems, Inc., 4150 Network Circle, Santa Clara, California 95054, U.S.A. All rights reserved.

Sun Microsystems, Inc. has intellectual property rights relating to technology embodied in the product that is described in this document. In particular, and without limitation, these intellectual property rights may include one or more of the U.S. patents listed at <http://www.sun.com/patents>, and one or more additional patents or pending patent applications in the U.S. and in other countries.

This document and the product to which it pertains are distributed under licenses restricting their use, copying, distribution, and decompilation. No part of the product or of this document may be reproduced in any form by any means without prior written authorization of Sun and its licensors, if any.

Third-party software, including font technology, is copyrighted and licensed from Sun suppliers.

Parts of the product may be derived from Berkeley BSD systems, licensed from the University of California. UNIX is a registered trademark in the U.S. and other countries, exclusively licensed through X/Open Company, Ltd.

Sun, Sun Microsystems, the Sun logo, AnswerBook2, docs.sun.com, SunVTS, Sun Enterprise Authentication Mechanism, and Solaris are trademarks, registered trademarks, or service marks of Sun Microsystems, Inc. in the U.S. and other countries.

All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. in the U.S. and other countries. Products bearing SPARC trademarks are based upon an architecture developed by Sun Microsystems, Inc.

The OPEN LOOK and Sun trademark Graphical User Interface was developed by Sun Microsystems, Inc. for its users and licensees. Sun acknowledges the pioneering efforts of Xerox in researching and developing the concept of visual or graphical user interfaces for the computer industry. Sun holds a non-exclusive license from Xerox to the Xerox Graphical User Interface, which license also covers Sun's licensees who implement OPEN LOOK GUIs and otherwise comply with Sun's written license agreements.

DOCUMENTATION IS PROVIDED "AS IS" AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

Copyright 2008 Sun Microsystems, Inc., 4150 Network Circle, Santa Clara, Californie 95054, États-Unis. Tous droits réservés.

Sun Microsystems, Inc. a les droits de propriété intellectuels relatants à la technologie incorporée dans le produit qui est décrit dans ce document. En particulier, et sans la limitation, ces droits de propriété intellectuels peuvent inclure un ou plus des brevets américains énumérés à <http://www.sun.com/patents> et un ou les brevets plus supplémentaires ou les applications de brevet en attente dans les Etats-Unis et dans les autres pays.

Ce produit ou document est protégé par un copyright et distribué avec des licences qui en restreignent l'utilisation, la copie, la distribution, et la décompilation. Aucune partie de ce produit ou document ne peut être reproduite sous aucune forme, parquelque moyen que ce soit, sans l'autorisation préalable et écrite de Sun et de ses bailleurs de licence, s'il y ena.

Le logiciel détenu par des tiers, et qui comprend la technologie relative aux polices de caractères, est protégé par un copyright et licencié par des fournisseurs de Sun.

Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie. UNIX est une marque déposée aux Etats-Unis et dans d'autres pays et licenciée exclusivement par X/Open Company, Ltd.

Sun, Sun Microsystems, le logo Sun, AnswerBook2, docs.sun.com, SunVTS, Sun Enterprise Authentication Mechanism, et Solaris sont des marques de fabrique ou des marques déposées de Sun Microsystems, Inc. aux Etats-Unis et dans d'autres pays.

Toutes les marques SPARC sont utilisées sous licence et sont des marques de fabrique ou des marques déposées de SPARC International, Inc. aux Etats-Unis et dans d'autres pays. Les produits protant les marques SPARC sont basés sur une architecture développée par Sun Microsystems, Inc.

L'interface d'utilisation graphique OPEN LOOK et Sun trademark a été développée par Sun Microsystems, Inc. pour ses utilisateurs et licenciés. Sun reconnaît les efforts de pionniers de Xerox pour la recherche et le développement du concept des interfaces d'utilisation visuelle ou graphique pour l'industrie de l'informatique. Sun détient une licence non exclusive do Xerox sur l'interface d'utilisation graphique Xerox, cette licence couvrant également les licenciées de Sun qui mettent en place l'interface d'utilisation graphique OPEN LOOK et qui en outre se conforment aux licences écrites de Sun.

LA DOCUMENTATION EST FOURNIE "EN L'ÉTAT" ET TOUTES AUTRES CONDITIONS, DECLARATIONS ET GARANTIES EXPRESSES OU TACITES SONT FORMELLEMENT EXCLUES, DANS LA MESURE AUTORISEE PAR LA LOI APPLICABLE, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE A LA QUALITE MARCHANDE, A L'APTITUDE A UNE UTILISATION PARTICULIERE OU A L'ABSENCE DE CONTREFAÇON.

SunVTS 7.0 Patch Set 1 Software Release Notes

The SunVTS™ 7.0 Patch Set 1 software is designed for the Solaris™ 10 5/08 or later operating system (OS) and is compatible with the Solaris 10 or later OS.

Topics include:

- [“SunVTS Support for the Solaris OS on x86-Based Systems” on page 2](#)
- [“Software Notes” on page 4](#)
- [“Feedback and Support” on page 7](#)

Note – All tests released in SunVTS 7.0 are documented in the *SunVTS 7.0 Software User’s Guide*.

For the latest version of this document (820-5045) and other SunVTS documentation, go to: <http://docs.sun.com/app/docs/prod/test.validate>

This release includes the EOL announcement of `atmtest`.

SunVTS Support for the Solaris OS on x86-Based Systems

Note – In this document these x86 related terms mean the following: “x86” refers to the larger family of 64-bit and 32-bit x86 compatible products, “x64” points out specific 64-bit information about AMD64 or EM64T systems.

SunVTS is supported and tested on the following Sun x86 platforms:

- Sun Fire V20z system
- Sun Fire V40z system
- Sun Fire B100 system
- Sun Fire B200 system
- Sun Fire x4100 system
- Sun Fire x4100 M2 system
- Sun Fire x4200 system
- Sun Fire x4200 M2 system
- Sun Fire x4500 system
- Sun Fire x4540 system
- Sun Fire x4600 system
- Sun Fire x4600 M2 system
- Sun Blade x8400 system
- Netra CP3020 system
- Sun Blade x6220 (A92) system
- Sun Blade x6240 system
- Sun Blade x6420 system
- Sun Blade x6440 system
- Sun Blade x8450 system

Note – If you run SunVTS on unsupported platforms, a warning message will be displayed stating that the platform is not supported. Nevertheless, testing would be allowed to move forward.

You must install the x86 version of the SunVTS packages to perform SunVTS on x86 platforms. The software packages use the same names as in the SPARC® environment. The SunVTS packages delivered separately for both x86 and SPARC Solaris platforms are as follows:

- `SUNWvts` – Contains the SunVTS core framework that includes the kernel and user interface.
- `SUNWvtsmn` – Contains the SunVTS online manual pages
- `SUNWvtsr` – Contains the SunVTS framework configuration files in the root partition (superuser).
- `SUNWvtss` – Contains SunVTS server and browser user interface (BUI).
- `SUNWvtsts` – Contains the SunVTS test binaries.

The SunVTS components available for x86 Solaris platforms are as follows.

Infrastructure:

- `sunvts`
- `vtsk`
- `vts_cmd`
- `vtstty`
- `vtsui`
- `vtsprobe`

Software Notes

Install and Uninstall Using the Same Program

Use `pkgadd` for installation and `pkgrm` to uninstall.

Open Issues

CR 6674267: `IOPORTS` test should be disabled by default for x86/x64 platforms

Solaris 10 5/08 SunVTS 7.0 `IOPORT` test is not applicable to x86 platforms because the `tty` serial ports are used on the SP/serial port internally. The current default SunVTS 7.0 menu turns on `IOPORT` test by default.

Workaround: None.

CR 6678555: `l2sramtest` and `systest` cannot get a system pass after 19 hours of testing

The `l2sramtest` and `systest` tests do not produce a system pass after 19 hours of testing.

Workaround: None.

CR 6677883: SunVTS 7.0ps1: `vtsprobe` displays garbage value for `netlbttest`

`vtsprobe` displays an unreadable value for the Ethernet Loopback Test (`netlbttest`).

Workaround: None.

CR 6689260: SunVTS 7.0ps1 Bootable DVD – system hangs when tests are run in System Exerciser [SL-3 and SL-4]

From the SunVTS 7.0ps1 bootable DVD, the system hangs when tests are run in the System Exerciser test mode. This hang occurs when selecting Network tests in SL-3 and SL-4.

Workaround: Do not select Network Test in SL-3 and SL-4.

CR 6692649: SunVTS 7.0: vtsprobe does not probe on “unknown” hostname

SunVTS 7.0 vtsprobe does not probe when selecting “unknown” for a hostname.

Workaround: None.

CR 6693026: ./startsunvts[4]: /var/sunvts/logs/sunvts.startup: cannot create on a new reos system

./startsunvts[4]: /var/sunvts/logs/sunvts.startup cannot be created on a new reos system, that is, on initial rebuilding of the Sun operating system.

Workaround: Do the following:

On SPARC platforms:

```
# cd /usr/sunvts/bin/sparcv9
# ./vtsk &
# cd ..
# ./vtstty
```

On x86 platforms:

```
# cd /usr/sunvts/bin/64
# ./vtsk &
# cd ..
# ./vtstty
```

CR 6693205: P1 driver/e1000g running SunVTS 7.0 on Solaris 10 5/08 causes unix:cmi_mca_panic on x86 platforms

This occurs on 4 port e1000g boards only on Sun Fire x4500 and Sun Fire x4600 systems. Under heavy network loopback stress testing, using SunVTS 7.0 and SunVTS 7.0ps1 on these systems with Solaris 10 5/08 may cause "Unrecoverable Machine-Check Exception" unix:cmi_mca_panic.

Workaround: None.

CR 6694922: Bootable SunVTS 7.0 fails to configure the igb interfaces for the nettest

Bootable SunVTS 7.0 fails to configure igb interfaces for the Network Hardware Test (nettest).

Workaround: None.

CR 6698394: bmcenvironment should not fail when sensor thresholds are not applicable

As base management controller (BMC) sensor thresholds are undefined, a warning occurs when a certain limit is exceeded. A Warning message such as that shown below is displayed:

```
05/05/08 17:31:05 ctech59a SunVTS7.0ps1: VTSID 2035
Environment.bmcenvironment.WARNING bmc: Warning: "32" sensors report a
warning condition 05/05/08 17:31:06 ctech59a SunVTS7.0ps1: VTSID 7012
vtsk.INFO : *Failed test* Environment. BMC(bmcenvironment) passes: 0
errors: 1
```

This Warning message does not indicate a failure but that the test is reporting a warning reflecting that sensor thresholds are not defined.

Workaround: None.

CR 6699736: `fptest` fails to run on Sun LX50 (x86 32-bit machine)

Occurs only on 32-bit pre-SSE2 systems. The tests will not be loaded by the dynamic loader.

Fixed in next release.

CR 6699739: `systest` fails to run on Sun LX50 (x86 32-bit machine)

Occurs only on 32-bit pre-SSE2 systems. The tests will not be loaded by the dynamic loader.

Fixed in next release.

Feedback and Support

You can request Sun support and provide feedback to Sun at the following email address:
