

Transporting Products With a Miscellaneous (Class 9) Dangerous Goods Classification

For air transport purposes only, this product is classified as Class 9 “Dangerous Goods in Apparatus” under the Dangerous Goods Regulations published by the International Air Transport Association (IATA). This product is classified this way for air transportation because it includes a component that contains a flammable liquid (acetonitrile). Class 9 is the least restrictive level of Dangerous Goods classified under the IATA regulations.

Compliance with IATA regulations is mandatory, and all airlines strictly adhere to them. All persons who tender goods that are classified “Dangerous Goods in Apparatus” must do so in compliance with IATA Regulations. This includes following all labeling, identification, documentation, and training requirements.

Based on the classification of this product, this shipment has been labeled and shipped as follows:

PROPER SHIPPING NAME: DANGEROUS GOODS IN APPARATUS
UNITED NATIONS IDENTIFICATION NUMBER: UN 3363
LABEL: CLASS 9 - MISCELLANEOUS

Please note that if you (or any other person or entity) reships or forwards this product by air, you (or any other person or entity) *must* comply with all IATA regulations.

For information, refer to the Dangerous Goods Regulations document, which is available at the IATA web site:

<http://www.iata.org>

The IATA regulations have been enacted into U.S. law as part of the Department of Transportation (DOT) regulations found in Title 49 of the Code of Federal Regulations (49 CFR).
