Sun Microsystems, Inc. has intellectual property rights relating to technology that is described in this document. In particular, and without limitation, these intellectual property rights may include one or more of the U.S. patents listed at <http://www.sun.com/patents> and one or more additional patents or pending patent applications in the U.S. and in other countries.

This document and the product to which it pertains are distributed under licenses restricting their use, copying, distribution, and decompilation. No part of the product or of this document may be reproduced in any form by any means without prior written authorization of Sun and its licensors, if any.

Third-party software, including font technology, is copyrighted and licensed from Sun suppliers.

Parts of the product may be derived from Berkeley BSD systems, licensed from the University of California. UNIX is a registered trademark in the U.S. and in other countries, exclusively licensed through X/Open Company, Ltd.

Sun, Sun Microsystems, the Sun logo, Java, AnswerBook2, docs.sun.com, and Solaris are trademarks or registered trademarks of Sun Microsystems, Inc. in the U.S. and in other countries.

All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. in the U.S. and in other countries. Products bearing SPARC trademarks are based upon an architecture developed by Sun Microsystems, Inc.

The OPEN LOOK and Sun™ Graphical User Interface was developed by Sun Microsystems, Inc. for its users and licensees. Sun acknowledges the pioneering efforts of Xerox in researching and developing the concept of visual or graphical user interfaces for the computer industry. Sun holds a non-exclusive license from Xerox to the Xerox Graphical User Interface, which license also covers Sun's licensees who implement OPEN LOOK GUIs and otherwise comply with Sun's written license agreements.

StorageTek is a trademark of Storage Technology Corporation.

This product includes software developed by the Apache Software Foundation (<http://www.apache.org/>).

U.S. Government Rights—Commercial use. Government users are subject to the Sun Microsystems, Inc. standard license agreement and applicable provisions of the FAR and its supplements.

DOCUMENTATION IS PROVIDED "AS IS" AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

Copyright 2008 Sun Microsystems, Inc., 4150 Network Circle, Santa Clara, California 95054, Etats-Unis. Tous droits réservés.

Sun Microsystems, Inc. a les droits de propriété intellectuels relatifs à la technologie qui est décrit dans ce document. En particulier, et sans la limitation, ces droits de propriété intellectuels peuvent inclure un ou plus des brevets américains énumérés à <http://www.sun.com/patents> et un ou les brevets plus supplémentaires ou les applications de brevet en attente dans les Etats-Unis et dans les autres pays.

Ce produit ou document est protégé par un copyright et distribué avec des licences qui en restreignent l'utilisation, la copie, la distribution, et la décompilation. Aucune partie de ce produit ou document ne peut être reproduite sous aucune forme, par quelque moyen que ce soit, sans l'autorisation préalable et écrite de Sun et de ses bailleurs de licence, s'il y en a.

Le logiciel détenu par des tiers, et qui comprend la technologie relative aux polices de caractères, est protégé par un copyright et licencié par des fournisseurs de Sun.

Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie. UNIX est une marque déposée aux Etats-Unis et dans d'autres pays et licenciée exclusivement par X/Open Company, Ltd.

Sun, Sun Microsystems, le logo Sun, Java, AnswerBook2, docs.sun.com, et Solaris sont des marques de fabrique ou des marques déposées de Sun Microsystems, Inc. aux Etats-Unis et dans d'autres pays.

Toutes les marques SPARC sont utilisées sous licence et sont des marques de fabrique ou des marques déposées de SPARC International, Inc. aux Etats-Unis et dans d'autres pays. Les produits portant les marques SPARC sont basés sur une architecture développée par Sun Microsystems, Inc.

L'interface d'utilisation graphique OPEN LOOK et Sun™ a été développée par Sun Microsystems, Inc. pour ses utilisateurs et licenciés. Sun reconnaît les efforts de pionniers de Xerox pour la recherche et le développement du concept des interfaces d'utilisation visuelle ou graphique pour l'industrie de l'informatique. Sun détient une licence non exclusive de Xerox sur l'interface d'utilisation graphique Xerox, cette licence couvrant également les licenciées de Sun qui mettent en place l'interface d'utilisation graphique OPEN LOOK et qui en outre se conforment aux licences écrites de Sun.

LA DOCUMENTATION EST FOURNIE "EN L'ÉTAT" ET TOUTES AUTRES CONDITIONS, DECLARATIONS ET GARANTIES EXPRESSES OU TACITES SONT FORMELLEMENT EXCLUES, DANS LA MESURE AUTORISÉE PAR LA LOI APPLICABLE, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE À LA QUALITÉ MARCHANDE, A L'APTITUDE A UNE UTILISATION PARTICULIÈRE OU A L'ABSENCE DE CONTREFAÇON.

Summary of Changes

ACSLS 7.3 EC released document table

EC	Date	Edition	Revision	Description
EC000249	March 2008	First	A	ACSLS 7.3 provides support for the SL3000.

Summary of Changes

ACSLS Quick Reference

1

Throughout this quick reference, underlines show valid command and keyword abbreviations. For example, aud is an abbreviation of the audit command. Brackets [] enclose optional parameters. A vertical bar (|) separates parameter choices.

Command Identifiers

Each command identifier corresponds to a type and consists of one or more components separated by commas.

<i>acs_id</i>	acs(0-31)	
<i>cap_id</i>	acs(0-31),lsm(0-99),cap(0-11) An asterisk (*) in a <i>cap_id</i> does the following:	
	acs,lsm,*	causes ACSLS to select the highest priority available CAP in the LSM.
	acs,*	causes ACSLS to select the highest priority available CAP in the ACS
	*	for an enter request causes ACSLS to select the CAP in the ACS with the most free cells.
	*	for an eject request causes ACSLS to select the highest priority CAP in each ACS with a volume designated for ejection.
<i>cell_id</i>	acs(0-31),lsm(0-99),panel(0-50),row(0-41),column(0-23)	
<i>drive_id</i>	acs(0-31),lsm(0-99),panel(0-50),drive(0-31)	
<i>drive_type</i>	Up to 10 characters transport type identifier; can be any combination of numbers (0-9) or letters (A-Z).	
<i>lock_id</i>	decimal number (0-32767)	
<i>lsm_id</i>	acs(0-31),lsm(0-99)	
<i>media_type</i>	Up to 10 characters media type identifier; can be any combination of numbers (0-9) or letters (A-Z). Spaces are not allowed. A common media type is the STK1R.	
<i>owner_id</i>	volume owner	
<i>panel_id</i>	acs(0-31),lsm(0-99),panel(0-50)	
<i>pool_id</i>	decimal number (0-65535) Specifying an asterisk (*) for the <i>pool_id</i> reassigns a volume to its current <i>pool_id</i>	
<i>port_id</i>	acs(0-31),port(0-15)	

<i>request_id</i>	unique decimal number (0-65535) assigned by the ACSLS.
<i>subpanel_id</i>	acs(0-31),lsm(0-99),panel(0-50),startrow(0-41),startcolumn(0-23),endrow(0-41),endcolumn(0-23)
<i>vol_id</i>	Six-character identifier consisting of any combination of numbers (0-9), letters (A-Z, a-z, or mixed case (except for use in volrpt)), dollar sign (\$), pound sign (#), and leading and/or trailing spaces (). Use single or double quotes to enclose <i>vol_ids</i> with leading or trailing spaces. <i>Do not</i> specify <i>vol_ids</i> with embedded spaces.
<i>volrange</i>	<p>Specifies an ascending range of volumes separated by a dash.</p> <p>For volranges in query, enter, and eject commands:</p> <p>If it is a numeric range, specify only the right most numeric portions of the <i>vol_ids</i> as the range. All preceding characters <i>must</i> be identical. The display commands support full alphanumeric volranges and allow wildcards '*' and '-'.</p>

Auditing the Library

Audit the entire library - updates library configuration	<u>audit cap_id server</u>
Audit an ACS	<u>audit cap_id acs acs_id</u>
Audit an LSM	<u>audit cap_id lsm lsm_id</u>
Audit an LSM panel	<u>audit cap_id panel panel_id</u>
Audit an LSM subpanel	<u>audit cap_id subpanel subpanel_id</u>

Configuration

Run the configuration script	<u>acsss_config</u>
Display values of dynamic options	<u>dv_print</u>
Display values of static options	<u>dv_config -s</u>
Display values of dynamic and static options	<u>dv_config -d</u>

Configuration - Dynamic

ACS Add a new ACS Reconfigure an existing ACS	config acs new config acs <i>acs_id</i>
Drives Reconfigure all drives on an existing drive panel. This includes adding drives, updating drive types and serial numbers for existing drives, and deleting drives that were removed from the database.	config drive(s) <i>panel_id</i>
LSMs Reconfigure an existing LSM and all its components, which include CAPs and panels. Note: Use config acs to add or delete an LSM in an ACS	config lsm <i>lsm_id</i>
Ports Reconfigure port connections to an ACS.	config port(s) <i>acs_id</i>

Displaying Status

Display CAP information	<u>display</u> cap cap_id ... [-status cap_status ...] [-priority cap_priority ...] [-state cap_state ...] [-manual - automatic] [-condition cap_condition ...] [[-c] [-f field ...] [-s sortfield ...] [-n nnn]]
Display cell information	<u>display</u> cell cell_loc ... [-status cell_status ...] [[-c] [-f field ...] [-s sortfield ...] [-n nnn]]
Display drive information	<u>display</u> drive drive_id ... [-status drive_status ...] [-state drive_state ...] [-type drive_type ...] [-volume vol_id ...] [-lock lock_id...] [-serial drive_serial# ...] [-condition drive_condition ...] [[-c] [-f field ...] [-s sortfield ...] [-n nnn]]
Display lock information	<u>display</u> lock lock_id ... [-user user_id ...] [[-c] [-f field ...] [-s sortfield ...] [-n nnn]]
Display LSM information	<u>display</u> lsm lsm_id ... [-status lsm_status ...] [-state lsm_state ...] [-free_cells cell_count ..] [-type lsm_type ...] [-serial lsm_serial# ...] [-condition lsm_condition] [-door_open -door_closed] [[-c] [-f field ...] [-s sortfield ...] [-n nnn]]
Display panel information	<u>display</u> panel panel_id ... [-type panel_type ...] [[-c] [-f field ...] [-s sortfield ...] [-n nnn]]
Display pool information	<u>display</u> pool pool_id ... [-low_water low_water_mark ... -high_water high_water_mark...] [-overflow -no_overflow] [[-c] [-f field .] [-s sortfield ...] [-n nnn]]
Display port information	<u>display</u> port port_id ... [-online -offline] [-name port_name ...] [[-c] [-f field ...] [-s sortfield ...] [-n nnn]]
Display volume information	<u>display</u> volume vol_id ... [-acs acs_id ... -home home_loc ... -drive drive_loc ...] [-data -scratch -clean] [-media media_type ...] [-pool pool_id...] [-standard -virtual] [-status vol_status ...] [-entry entry_date ...] [-access access_date ...] [-lock lock_id ...] [[-c] [-f field ...] [-s sortfield ...] [-n nnn]]

Maintaining the Database

Export database table data and ACSLS control database files to tape or a file. Use when reinstalling ACSLS or upgrading to a new ACSLS version using the same database.	db_export.sh -f [<i>db_file</i> <i>tape_device</i>]
Import database table data and ACSLS control database files from the export tape or file. Use when reinstalling ACSLS or upgrading to a new ACSLS version using the same database.	db_import.sh -f [<i>db_file</i> <i>tape_device</i>]
Back up the database	bdb.acsss -f [<i>backup_file</i> <i>tape_device</i>]
Start up or shuts down the database	db_command start stop status log_normal log_verbose log_level stop_force
Recover the database after a database failure	rdb.acsss

Managing CAPS

Display CAP status	<u>query cap</u> <i>cap_id</i> ... <u>all</u> or <u>display cap</u> <i>cap_id</i> ... *
Set CAP's entry mode (manual or automatic)	<u>set cap mode</u> <u>manual</u> <u>automatic</u> <i>cap_id</i>
Set CAP's automatic selection priority	<u>set cap priority</u> <i>cap_priority</i> <i>cap_id</i>
Make manual mode CAP ready to enter labelled carts	<u>enter</u> <i>cap_id</i>
Make multiple CAPs in an LSM ready	<u>enter</u> <i>lsm_id</i>
Make CAP ready to enter unlabeled carts into library	<u>venter</u> <i>cap_id</i> <i>vol_id</i>

Managing Dual LMU

Display LMU and port status for both single-LMU and dual-LMU ACS configurations	<u>query lmu acs_id ... all</u>
Manually switch ACS management from the ACS's master LMU to the standby LMU	<u>switch lmu acs_id</u>

Managing Locks

Set your lock ID	<u>set lock lock_id</u>
Display your current lock ID or user ID	<u>show lock user</u>
Lock a volume or drive (to your current lock ID)	<u>lock drive volume identifier</u>
Remove active locks (to your current lock ID) on specified drives or volumes or all active locks	<u>unlock drive volume identifier ... all</u>
Remove all active and pending locks on specified drives or volumes	<u>clear lock drive volume identifier</u>

Managing Scratch Pools/Volumes

Create or modify scratch pools	<u>define pool</u> <i>low_water_mark high_water_mark pool_id ...[overflow]</i>
Display scratch pool attributes	<u>query pool</u> <i>pool_id ... all</i>
Display the status of scratch volumes in a pool	<u>query scratch pool_id ... all</u>
Set volume's scratch attribute and assign the volume to a scratch pool	<u>set scratch pool_id vol_id volrange</u>
Change volume from scratch to data	<u>set scratch off</u> <i>pool_id vol_id volrange</i>
Delete an empty scratch pool	<u>delete pool</u> <i>pool_id ... all</i>
Mount a scratch volume from a specified pool (single media libraries)	<u>mount * drive_id pool_id</u>
Mount a scratch volume from the common pool (single media libraries)	<u>mount * drive_id</u>
Mount a scratch volume from a specified pool with specific media type	<u>mount * drive_id pool_id media media_type</u>
Mount a scratch volume from a specific pool, media type based on scratch preferences defined	<u>mount * drive_id pool_id media *</u>
Mount a scratch volume from common pool, media type based on defined scratch preferences	<u>mount * drive_id media *</u>
Mount a scratch volume from common pool with specified media type	<u>mount * drive_id media media_type</u>
Display scratch pool information for a specific pool or for all pools	<u>display pool</u> <i>pool_id ... *</i>

Display status of media-compatible transports for a specified scratch pool (or volume media type within the pool)	<code>query <u>mount</u> * <i>pool_id</i> ... [<u>media</u> <i>media_type</i> <u>media</u> *]</code>
---	--

Managing Volumes

Mount a data volume or cleaning cartridge	<code><u>mount</u> <i>vol_id</i> <i>drive_id</i> [<u>bypass</u>] [<u>readonly</u>]</code>
Dismount a data volume or cleaning cartridge	<code><u>dismount</u> <i>vol_id</i> <i>drive_id</i> [<u>force</u>]</code>
Create a volume report	<code>vol rpt [-s vol loc use] [-d] [-f <i>filename</i>] [-z] [-a -l -v <i>identifier_list</i>]</code>
Use Display for dynamic reporting of library components and/or volumes.	See Display commands.
Set volume ownership	<code><u>set owner</u> <i>owner_id</i> <u>volume</u> <i>vol_id</i> <u>volrange</u></code>
Eject volumes from the library	<code><u>eject</u> <i>cap_id</i> <i>vol_id</i> <u>volrange</u> ...</code>
Move volumes to a specified LSM	<code>move <i>vol_id</i> <i>lsm_id</i></code>
Delete a volume in an offline LSM	<code>del_vol <i>vol_id</i> -n -q</code>
Move multiple cartridges to one or more LSMs.	<code>moving.sh -f <i>vol_list_file</i> -t <i>lsm_id</i>...</code>
Set cleaning cartridge attributes	<code><u>set clean</u> <i>max_usage</i> <i>vol_id</i> <u>volrange</u></code>
Set cleaning attributes back to data cartridges	<code><u>set clean</u> off <i>vol_id</i> <u>volrange</u></code>
Display volume information for cleaning cartridges	<code><u>display</u> <u>volume</u> <i>vol_id</i> <u>vol_range</u> *-clean</code>

Query Status

ACSLS and library status	<code>query <u>server</u></code>
ACS status	<code>query <u>acs acs_id ... all</u></code>
LSM status	<code>query <u>lsm lsm_id ... all</u></code>
CAP status	<code>query <u>cap cap_id ... all</u></code>
Transport status	<code>query <u>drive drive_id ... all</u></code>
LMU and port status for both single-LMU and dual-LMU ACS configurations	<code>query <u>lmu acs_id ... all</u></code>
Media-compatible transports for a specified data volume	<code>query <u>mount vol_id</u></code>
Media-compatible transports for a specified scratch pool (or volume media type within the pool)	<code>query <u>mount * pool_id ... [media media_type media *]</u></code>
Port status	<code>query <u>port port_id all</u></code>
Location of a volume	<code>query <u>volume vol_id ... all</u></code>
Cleaning cartridge status	<code>query <u>clean vol_id ... all</u></code>
Scratch volumes in a pool	<code>query <u>scratch pool_id ... all</u></code>
Scratch pool attributes	<code>query <u>pool pool_id ... all</u></code>
Request status	<code>query <u>request request_id ... all</u></code>
Display the lock status of a transport or volume	<code>query <u>lock drive volume identifier ... all</u></code>
Display cleaning cartridge attributes	<code>query <u>clean vol_id... all</u></code>

Varying Library Components

Change the state of an ACS	<u>vary acs</u> <i>acs_id</i> ... <u>online</u> <u>offline</u> <u>diagnostic</u> [force]
Change the state of an LSM	<u>vary lsm</u> <i>lsm_id</i> ... <u>online</u> <u>offline</u> <u>diagnostic</u> [force]
Change the state of a CAP	<u>vary cap</u> <i>cap_id</i> ... <u>online</u> <u>offline</u> <u>diagnostic</u> [force]
Change the state of a transport	<u>vary drive</u> <i>drive_id</i> ... <u>online</u> <u>offline</u> <u>diagnostic</u> [force]
Change the state of a port	<u>vary port</u> <i>port_id</i> ... <u>online</u> <u>offline</u>
