# Tower Stand Installation Instructions

Use these instructions to install your system or disk chassis in the tower stand.

> ⚠ **Warning – The installation requires two people to lift the chassis and move the assembly. Use care to avoid back injury. A fully-loaded chassis weighs between 85 and 100 pounds.**

## Kit Contents

The kit contains the following items:

- 1 stand, 540-2485-XX
- 1 air filter, 250-1196-XX
- 4 plastic cover plugs, 330-1589-XX

## Tools Required

You need a medium phillips screwdriver for installation and a slotted screwdriver for removal.

## Installation

Before proceeding make sure that the power is off and cables removed from the chassis. Instructions are provided in the installation manual that was shipped with the chassis.
