Ce produit ou document est protégé par un copyright et distribué avec des licences qui en restreignent l'utilisation, la copie, la distribution, et la décompilation. Aucune partie de ce produit ou document ne peut être reproduite sous aucune forme, par quelque moyen que ce soit, sans l'autorisation préalable et écrite de Sun et de ses bailleurs de licence, s'il y en a. Le logiciel détenu par des tiers, et qui comprend la technologie relative aux polices de caractères, est protégé par un copyright et licencié par des fournisseurs de Sun.

Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie. UNIX est une marque déposée aux Etats-Unis et dans d'autres pays et licenciée exclusivement par X/Open Company, Ltd. La notice suivante est applicable à Netscape Communicator™ : Copyright 1995 Netscape Communications Corporation. All rights reserved.

Sun, Sun Microsystems, le logo Sun, AnswerBook, Java, le logo Java Coffee Cup, Netra et Solaris sont des marques de fabrique ou des marques déposées, ou marques de service, de Sun Microsystems, Inc. aux Etats-Unis et dans d'autres pays. Toutes les marques SPARC sont utilisées sous licence et sont des marques de fabrique ou des marques déposées de SPARC International, Inc. aux Etats-Unis et dans d'autres pays. Les produits portant les marques SPARC sont basés sur une architecture développée par Sun Microsystems, Inc.

L'interface d'utilisation graphique OPEN LOOK et Sun™ a été développée par Sun Microsystems, Inc. pour ses utilisateurs et licenciés. Sun reconnaît les efforts de pionniers de Xerox pour la recherche et le développement du concept des interfaces d'utilisation visuelle ou graphique pour l'industrie de l'informatique. Sun détient une licence non exclusive de Xerox sur l'interface d'utilisation graphique Xerox, cette licence couvrant également les licenciés de Sun qui mettent en place l'interface d'utilisation graphique OPEN LOOK et qui en outre se conforment aux licences écrites de Sun.

CETTE PUBLICATION EST FOURNIE "EN L'ETAT" ET AUCUNE GARANTIE, EXPRESSE OU IMPLICITE, N'EST ACCORDEE, Y COMPRIS DES GARANTIES CONCERNANT LA VALEUR MARCHANDE, L'APTITUDE DE LA PUBLICATION A REpondre A UNE UTILISATION PARTICULIERE, OU LE FAIT QU'ELLE NE SOIT PAS CONTREFAISANTE DE PRODUIT DE TIERS. CE DENI DE GARANTIE NE S'APPLIQUERAIT PAS, DANS LA MESURE OU IL SERAIT TENU JURIDIQUEMENT NUL ET NON AVENU.

Introduction

These Product Notes contain the following sections:

- “Reinstalling the Solaris Operating Environment” on page 4
- “Reinstalling the Lights-Out Management (LOM) Software” on page 4
- “Jumper Settings” on page 5
- “Product Limitations” on page 6

Reinstalling the Solaris Operating Environment

The Netra T1 server is supplied with the Solaris 8 Operating Environment preinstalled.

If for any reason you decide to reinstall the Solaris 8 Operating Environment (for example, if you need to repartition your root disk or recover from a failure) follow the instructions in the *Solaris 8 Installation Guide* (806-0955-10) and the *Solaris 8 Advanced Installation Guide* (806-0957-10).

Note – To install a version of Solaris 8 that is earlier than Solaris 8 Update 4 (4/01), you must purchase a special auxiliary CD (X7086A).

Reinstalling the Lights-Out Management (LOM) Software

If you reinstall Solaris 8 and you intend to use the Lights-Out Management facilities, you must re-install the Netra Lights-Out Management software from the CD entitled *Software Supplement for the Solaris 8 Operating Environment*. This CD is included amongst the CDs supplied with Solaris 8.

If you do not reinstall the Lights-Out Management software as described here, the LOMlite2 facilities will not be available and layered applications that are dependent on them (for example, Sun Management Center and the Sun Netra SNMP agent) will not function correctly.

The LOMlite2 software is in the following directory:

- /Netra_t_Lights_Out_Management_2.0.

The three packages you need are:

- SUNWlomm
- SUNWlomr
- SUNWlomu

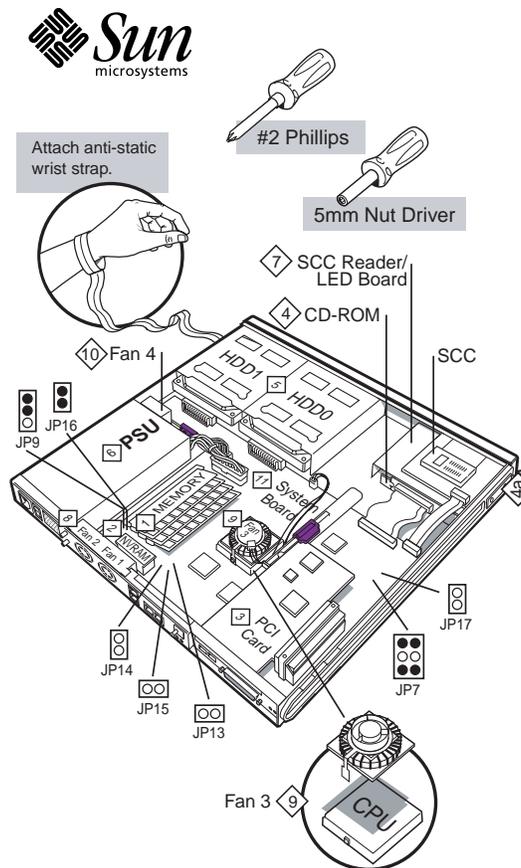

When you have reinstalled the Lights-Out Management software, you must apply patch 110208-09 (or later) from www.sunsolve.sun.com.

Jumper Settings

The service label inside the top cover of the Netra T1 server contains two errors in the jumper information, as shown in the table below:

Jumper No.	Incorrect information	Correct information
JP9	2-pin	3-pin
JP16	3-pin	2-pin

The diagram below shows the jumpers correctly.

Product Limitations

In SunVTS, `sutest` cannot be used to test the LOM port (`ttya`) of the Netra T1 server because of restrictions on baud rate control within the LOM firmware. To check the LOM (`ttya`) serial port, connect a console and verify two-way communication by issuing commands and observing response at either the OBP, LOM, or Unix level. The LOM serial port speed is set at boot-time by the OBP `ttya-mode` property value. The default setting is 9600 baud.
