

Caution – **** IMPORTANT **** Read this document before you install this Field Replaceable Unit.

Before you install this FRU, you must confirm that the firmware on this FRU matches the switch firmware it is replacing, and that it supports the installed configuration.

Firmware Version Check

Caution – The firmware version check and update, if needed, must be complete ****BEFORE**** you connect the FRU to the SAN.

New FRUs

For FRU's that have not been used, you can verify the switch firmware level with the switch part number in Table 1 below.

Note – This method is reliable only for FRUs that are just out of the box.

Table 1 Sun StorEdge Network FC Switch FRU P/N and Firmware Levels

Internal Project	Product Revision ^a	Sun P/N	Switch Firmware Level	Firmware File
8-port Switch				
Cobra	1.0	370-4035-01 Rev 50	3.02.67	m08030267.flc
Mamba	2.0/2.1	370-4035-02 Rev 50	3.02.51	m08b30351.flc
Python	3.0	370-4035-03 Rev 50	3.04.60	m08030460..flc
16-port Switch				
Mamba	2.0/2.1	370-4276-01 Rev 50	3.03.51	m16b30351.flc
Python	3.0	370-4276-02 Rev 50	f3.04.60	m16030460.flc

a. Sun StorEdge network FC Switch revision number

Existing or Used FRU

If you cannot verify the firmware level using the part number or if you know that the firmware must be updated, you must download a patch.

1. **Connect the switch to a Solaris workstation that is outside the SAN.**
2. **From SunSolve download patch 110696-xx. At the time of this release, the minimum patch level is 110696-03.**
This patch will download the following files:
 - current switch GUI
 - current switch firmware files for 8-port and 16-port switches
 - FC Switch 2.0/2.1 (Mamba version) switch firmware files for 8-port and 16-port switches

The patch *read-me* provides the procedure for the firmware update.

Accessing Sun Documentation Online

The docs.sun.comsm web site enables you to access Sun technical documentation on the Web. You can browse the docs.sun.com archive or search for a specific book title or subject at:
