Product Notes for Sun Blade 1000 Sun Enterprise 280R

The Sun Blade 1000 and Sun Enterprise 280R systems require either:

- the Solaris 8 7/01 Operating Environment or a later release, or
- installation of the following patches, in the sequence indicated.

If your system has the Solaris 8 4/01 Operating Environment or an earlier release installed, choose either Patch Option 1 or 2 and then follow the steps for installation.

You can find the latest versions of these publicly available patches at

<http://www.sun.com/bigadmin/patches/>

If your system requires patching prior to patch 108528-09 being available, choose Patch Option 1.

TABLE 1 Patch Option 1

Patch Number	Description
108528-08	SunOS 5.8 Kernel Update Patch Note: If you have already installed this patch, do not reinstall it.
111433-02	Supplemental Kernel Update Patch

TABLE 2 Patch Option 2

Patch Number	Description
108528-09 or newer	SunOS 5.8 Kernel Update Patch

Follow these steps to ensure correct patch installation:

1. Check for patch 111459-01 on your system and remove this patch if it is present.

Use the `patchadd -p` command to check for the presence of this patch. If patch 111459-01 is present, remove it using the `patchrm` utility.

For Solaris 8 releases, refer to the man pages for instructions on using the `patchrm` utility provided with Solaris.

2. Patch Option 1: Download and install patch 108528-08 and then 111433-02.

If you have already installed patch 108528-08, do not reinstall it. Use the `patchadd -p` command to check for the presence of this patch.

For Solaris 8 releases, refer to the man pages for instruction on using the `patchadd` utility provided with Solaris.

Review the individual patch README file included with this patch. Reboot the system after patch installation.

3. Patch Option 2: Download and install patch 108528-09 or newer.

Do not install any version of patch 111433. If any version of patch 111433 is already present on the system, you must remove it before installing patch 108528-09 or newer.

Use the `patchadd -p` command to check for the presence of patch 111433. If patch 111433-0x is present, remove it using the `patchrm` utility.

For Solaris 8 releases, refer to the man pages for instruction on using the `patchrm` and `patchadd` utilities provided with Solaris.

Review the individual patch README file included with the 108528-09 patch. Reboot the system after patch installation.
