```

# Installation Instructions

iPlanet Portal Server 3.0 Service Pack 1 software package is available from the iPlanet.com web page:

```
http://iplanet.com/downloads/patches
```

---

**NOTE** If the iPlanet Portal Server 3.0 installation contains Gateway and Platform servers, the `iPS3.0SP1-01` package must be installed on both servers.

---

1. Download the Service Pack 1 package to the computer where the service pack will be installed.
2. In a terminal window, become root.
3. Run the `tar` command to extract the package contents.

```
# tar xf iPS3.0SP1-01.tar
```

4. Change directories and run the `installpatch` command (shown in bold text), to install the software on the system.

```
# cd IPS3.0SP1-01
# ./installpatch .

WARNING: /usr/sbin/patchadd is being used to install this patch.
Installpatch will be removed from Solaris patches in
the next release of Solaris.

New versions of /usr/sbin/patchadd and /usr/sbin/patchrm exist
that provide essential bug fixes and a speed enhancement.
Please install patch 106125 for significant patch
installation improvements.

Checking installed patches...
Verifying sufficient filesystem capacity (dry run method)...
Installing patch packages...

Patch number IPS3.0SP1-01 has been successfully installed.
See /var/sadm/patch/IPS3.0SP1-01/log for details
Executing postpatch script...
updating domain URL list...
Operation completed successfully.
updating iwtGateway schema...
Operation completed successfully.
updating iwtGateway attributes...
Operation completed successfully.

Patch packages installed:
  SUNWwtds
  SUNWwtdt
  SUNWwtgwd
  SUNWwtmf
  SUNWwtm
  SUNWwtsdd
  SUNWwtsvd
```

5. Restart the servers.

```
# /etc/init.d/ipsserver start
# /etc/init.d/ipsgateway start
```
