Primary Author: David Christie

The Programs (which include both the software and the documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable.

U.S. GOVERNMENT RIGHTS

Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are “commercial computer software” or “commercial technical data” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software—Restricted Rights (June 1987). Oracle Corporation, 500 Oracle Parkway, Redwood City, CA 94065.

The Programs are not intended for use in any nuclear, aviation, mass transit, medical or other inherently dangerous applications. It shall be the licensee’s responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

Oracle is a registered trademark of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

Release Notes

Oracle Configuration Controls Governor (CCG) monitors setup data in business-management applications. It can take “snapshots” that document application setups; compare snapshots with one another, to show how application setups differ; and employ change tracking to monitor those changes.

Version 5.5.1 of CCG can monitor setup data in Oracle E-Business Suite version 12.1.x. Along with CCG, Oracle offers “metadata objects” — information about ERP objects for which CCG may take or compare snapshots, or track changes. In version 5.5.1, these include R12.1.x objects, and the *Metadata for Oracle E-Business Suite Reference Guide* is updated to document those objects.

In addition, CCG 5.5.1 resolves the following bugs:

- Issue 8264664: Category code change did not show in change tracking.
- Issue 8482754: Change tracker failed to track changes in Description field of Order Management Transaction types.
- Issue 8531338: Invalid function in E-Business Suite 12.0.4 for PO Document types.
- Issue 8653879: Invalid objects in AM_AGENT schema of target instance.
- Issue 8579092: The PA AutoAccounting rule trigger was not firing correctly.
