Do Not Use Database Tools to Modify Oracle E-Business Suite Data

Oracle **STRONGLY RECOMMENDS** that you never use SQL*Plus, Oracle Data Browser, database triggers, or any other tool to modify Oracle E-Business Suite data unless otherwise instructed.

Oracle provides powerful tools you can use to create, store, change, retrieve, and maintain information in an Oracle database. But if you use Oracle tools such as SQL*Plus to modify Oracle E-Business Suite data, you risk destroying the integrity of your data and you lose the ability to audit changes to your data.

Because Oracle E-Business Suite tables are interrelated, any change you make using an Oracle E-Business Suite form can update many tables at once. But when you modify Oracle E-Business Suite data using anything other than Oracle E-Business Suite, you may change a row in one table without making corresponding changes in related tables. If your tables get out of synchronization with each other, you risk retrieving erroneous

information and you risk unpredictable results throughout Oracle E-Business Suite.

When you use Oracle E-Business Suite to modify your data, Oracle E-Business Suite automatically checks that your changes are valid. Oracle E-Business Suite also keeps track of who changes information. If you enter information into database tables using database tools, you may store invalid information. You also lose the ability to track who has changed your information because SQL*Plus and other database tools do not keep a record of changes.

Setting Up Globalization Flexfields for Custom Responsibilities

Setting Up Globalization Flexfields

In Release 10.7 10SC Production 16, globalization flexfields were added into the setup and transaction windows of many Oracle Applications products. These new flexfields are used to enable country-specific and regional features that were built as a part of Oracle Applications' continuing effort to increase worldwide functional depth.

Adopt these examples as your standard when you create custom responsibilities and menus that provide access to globalization flexfield functionality.

This chapter shows examples of how to create custom menus and responsibilities when you use regional or country-specific features, and also demonstrates how to set the required profile variables at the responsibility level. The examples show the setup for a new Greek Receivables responsibility.

The examples apply to both Forms-based applications and Oracle Applications Framework applications.

Creating New Menus

You must include the *JG Global Flexfield enabled flag* form function in your Oracle Financials for Europe menu hierarchy to enable globalization flexfield features.

This table describes sample information to enter in the Menus window for a new Greek Receivables responsibility. You can add the *JG Global Flexfield enabled flag* form function, however, to any menu where you require globalization flexfields enabled.

Menu: JE_GR_AR_NAVIGATE_GUI

Seq	Navigator Prompt	Submenu	Function	Description
1	Receivable Localization	JG_AR_NAVIG ATE_GUI		Shared Receivables Localizations menu
2	Customer Turnover		Customer Turnover Exclusion	Customer Turnover Data Exclusion Report
4	Other	FND_OTHER 4.0		Other
10			JG Global Flexfield enabled	
11	Standard	AR_NAVIGATE _GUI		

Note: You do not have to include the *JG Global Flexfield enabled flag* form function in the top menus for Oracle Financials for the Americas and Oracle Financials for Asia/Pacific, as the form function is already defined for these menus.

Creating New Responsibilities

For each custom responsibility that uses windows with country-specific or regional features, ensure that the application is set to your regional application.

This table describes sample information to enter in the Responsibilities window for the Greek Receivables responsibility.

Responsibility: Greek AR Localizations

Field	Value
Responsibility Name	Greek AR Localizations
Application	European Localizations

Field	Value
Responsibility Key	GREEK_AR_LOCALIZATIO-700221662
Description	Greek AR Localizations
Available From	Oracle Applications
Data Group Name	Standard
Data Group Application	European Localizations
Menu	JE_GR_AR_NAVIGATE_GUI
Request Group Name	Greek AR Reports
Request Group Application	European Localizations

Setting Profile Options

For each custom responsibility that uses windows with country-specific or regional features, and that belongs to a non-Multi-Org product (such as Assets or General Ledger), you must set the JG: Application, JG: Product, and JG: Territory profile options.

Note: You do not need to set these profile options for Multi-Org products, such as Payables and Receivables. Multi-Org products make use of the Organization field.

JG: Application

JG: Application is used to determine which Oracle Applications product the responsibility is associated with. The list of values for this profile option consists of a complete list of Oracle Applications products.

For the Greek Receivables responsibility example, the Greek AR Localization responsibility is associated with Oracle Receivables.

JG: Territory

JG: Territory is used to determine which country the responsibility is associated with. The list of values for this profile option consists of a list of countries.

For the Greek Receivables responsibility example, the Greek AR Localization responsibility is associated with Greece.

JG: Product

JG: Product is used to determine which Global Financials product the responsibility is associated with. The list of values for this profile option consists of a list of Global Financials products.

For the Greek Receivables responsibility example, the Greek AR Localization responsibility is associated with European Localizations.

Using Globalization Flexfields

Oracle Global Financials use globalization flexfields to enter country-specific information into core windows.

To display globalization flexfields:

1. Select Show Field in the Folders menu.
2. Select () from the list of fields.

Oracle Financials displays the globalization flexfield window and adds the globalization flexfield column, labeled with (), to the core window.

Once the globalization flexfield column is added to the core window, you can access the globalization flexfield window at any time by clicking in the column.

Windows that Use Globalization Flexfields

This table lists the Oracle Applications windows that use globalization flexfields and the corresponding menus for which globalization flexfields must be enabled:

Oracle Financials for Asia/Pacific Post-Install Steps

Asia/Pacific Post-Install Steps

Complete these post-install steps for Oracle Financials for Asia/Pacific installations.

1. Attach core Financials menus to localization menus.
2. Attach new responsibilities to users.
3. Insert a record into the RA_SITE_USES table.
4. Japan: Create historical subledger balances.

Attach Core Financials Menus to Localization Menus

A responsibility and menu hierarchy were created for each country that has localization features; however, the menus for these responsibilities do not include any core Financials product menus. You must add core Financials product menus to the Oracle Financials for Asia/Pacific localization menus to use core functionality.

Use the Menus window to add core Financials product menus to the base menus for the responsibilities listed in this table:

Localization Responsibility	Localization Base Menu
Australian Assets	JA_AU_FA_NAVIGATE_GUI
Australian Inventory	JA_AU_INV_NAVIGATE_GUI

Localization Responsibility	Localization Base Menu
Australian Purchasing	JA_AU_PO_NAVIGATE_GUI
Korean Payables	JA_ZZ_AP_NAVIGATE_GUI
Korean Receivables	JA_KR_AR_NAVIGATE_GUI
Singaporean General Ledger	JA_SG_GL_NAVIGATE_GUI
Singaporean Payables	JA_SG_AP_NAVIGATE_GUI
Singaporean Receivables	JA_SG_AR_NAVIGATE_GUI
Taiwanese Payables	JA_TW_AP_NAVIGATE_GUI
Taiwanese Receivables	JA_TW_AR_NAVIGATE_GUI

Use this table to determine which core Financials menu to add to the localization base menu for each of the responsibility types:

For this responsibility type. . .	Add this menu. . .
Oracle Assets	FA_MAIN
Oracle General Ledger	GL_SUPERUSER
Oracle Inventory	INV_NAVIGATE
Oracle Payables	AP_NAVIGATE_GUI12
Oracle Purchasing	Purchasing SuperUser GUI
Oracle Receivables	AR_NAVIGATE_GUI

Attach New Responsibilities to Users

You can access new responsibilities once you have installed localizations. The localized responsibilities for each country are organized by product.

Each localized responsibility has a localized menu and request group that provide

access to country-specific functionality. Menus in country-specific responsibilities provide access to the country's windows; request groups provide access to the country's reports.

You must attach relevant responsibilities to the applications users to access localization functionality. If you create custom menus, use the country-specific menus attached to the localization responsibilities listed in Step 1. Attach Core Financials Menus to Localization Menus as a guide for granting users access to localization functionality.

To create new applications users, or to add or modify responsibilities for existing applications users:

1. Log on to the System Administrator responsibility.
2. Navigate to the Users window.
3. Enter information for your users.

You should use country-specific responsibilities only when the relevant countries are fully installed. All functionality is designed and built for a specific country. Oracle supports country-specific functionality only for intended countries; functionality built for one country but used for another is not supported.

If you are using other base product responsibilities, or you have customized your own, refer to Appendix A, Oracle Financials for Asia/Pacific Request Groups, page A-1 as a guide for implementing your report security groups.

Insert a Record into the RA_SITE_USES Table

If you plan to use the Customer Balances Detail, Customer Balances Detail (180), or Customer Balances Summary subledger report, you must insert a record into the RA_SITE_USES table. Run this script to insert this record into the RA_SITE_USES table:

```
$ cd $JG_TOP/admin/sql
$ sqlplus <APPS username>/<APPS password> @jgzzisui.sql
```

Create Historical Subledger Balances

If you plan to use Oracle Financials for Asia/Pacific in Japan, then for subledger reporting you may need to retroactively create the summary balances for accounting periods that are already closed. This process is normally manually run after the accounting periods are closed. If you are installing localizations on an installation that already has closed accounting periods in Oracle Receivables or Oracle Payables, you may want to retroactively create the balances.

To retroactively create balances, use these concurrent programs created for opening and closing accounting periods in the Oracle Payables and Oracle Receivables subledgers:

- Subledger Balance Maintenance for Receivables Accounting Periods

- Subledger Balance Maintenance for Payables Accounting Periods

You can access these programs from all localization responsibilities that were created as part of the installation or upgrade. Run each program once for each set of books. Use these programs to close all subledger periods that correspond to previously opened Oracle Payables and Oracle Receivables accounting periods that are now closed. You do not have to re-open the subledger balance periods first.

This table illustrates an example for Oracle Payables:

Period	Status
Nov-96	Never Opened
Dec-96	Closed
Jan-97	Closed
Feb-97	Open
Mar-97	Never Opened

Run the concurrent program Subledger Balance Maintenance for Payables Accounting Periods with the values listed in this table:

Parameter	Value
Period From:	Dec-96
Period To:	Jan-97
Open/Close:	Close

Warning: Running these balance-creation programs effectively mimics the subledger to General Ledger posting programs. These programs may take a considerable amount of time to complete on some large systems as a result. If you wish to create historical balances on an implementation with especially large transaction numbers, you might need assistance from Oracle Consulting Services.

A responsibility and menu hierarchy were created for each country that has localization features; however, the menus for these responsibilities do not include any core Financials product menus. You must add core Financials product menus to the Oracle Financials for the Americas localization menus to use core functionality.

Use the Menus window to add core Financials product menus to the base menus for the responsibilities listed in this table:

Note: The Brazilian Inventory responsibility already accesses the standard product menu.

Use this table to determine which core Financials menu to add to the localization base menu for each of the responsibility types:

For this responsibility type. . .	Add this menu. . .
Oracle Assets	FA_MAIN
Oracle General Ledger	GL_SUPERUSER
Oracle Inventory	INV_NAVIGATE
Oracle Payables	AP_NAVIGATE_GUI12
Oracle Purchasing	Purchasing SuperUser GUI
Oracle Receivables	AR_NAVIGATE_GUI

Example: Add Oracle Payables base menu to Argentine Payables base menu

This example shows how to add a core Financials product menu to a localization base menu.

1. Navigate to the Menus window from the System Administrator responsibility.
2. Query the localization menu. In this example, query the JL_AR_AP_NAVIGATE_GUI12 Argentine Payables menu.
3. Enter the appropriate core Financials menu in the Submenu field. In this example, enter *AP_NAVIGATE_GUI12* for Oracle Payables.
4. Enter appropriate values in the Navigator Prompt and Description fields. In this example, enter *Oracle Payables*.

Attach New Responsibilities to Users

You can access new responsibilities once you have installed localizations. The localized responsibilities for each country are organized by product.

With the exception of the Brazilian Inventory responsibility, which accesses the standard product menu, each localized responsibility has a localized menu and request group that provide access to country-specific functionality. Menus in country-specific responsibilities provide access to the country's windows; request groups provide access to the country's reports.

You must attach relevant responsibilities to the applications users to access localization functionality. If you create custom menus, use the country-specific menus attached to the localization responsibilities listed in *Attach Core Financials Menus to Localization Menus* as a guide for granting users access to localization functionality.

To create new applications users, or to add or modify responsibilities for existing applications users:

1. Log on to the System Administrator responsibility.
2. Navigate to the Users window.
3. Enter information for your users.

You should use country-specific responsibilities only when the relevant countries are fully installed. All functionality is designed and built for a specific country. If you are using other base product responsibilities, or you have customized your own, refer to Appendix B, Oracle Financials for the Americas Request Groups, page B-1 as a guide for implementing your report security groups.

Enable the Invoice Distribution Withholdings Window

If you plan to use the withholding tax solution that was built for Oracle Payables for Argentina or Oracle Payables for Colombia, your system administrator must enable the Invoice Distribution Withholdings window off the Tools menu for your Argentine or Colombian Payables responsibilities.

To enable the Invoice Distribution Withholdings window:

1. Navigate to the Menus window.
2. In the Menu field, query the localization base menu that you want. Use JL_AR_AP_NAVIGATE_GUI12 for Argentina or JL_CO_AP_NAVIGATE_GUI12 for Colombia.
3. Navigate to a new line.
4. In the Function column, enter the menu function *Define Invoice Distribution Withholdings*.

Attach New Responsibilities to Users

You can access new responsibilities once you have installed localizations. The localized responsibilities for each country are organized by product.

Each country has localized responsibilities that provide access to all windows and reports relevant to that country, as well as to regional localization functionality which is included with all European responsibilities. Menus in country-specific responsibilities provide access to the country's windows; request groups provide access to the country's reports.

You must attach the relevant responsibilities to the applications users to access localization functionality. If you create custom menus, use the country-specific menus attached to the localization responsibilities listed in Step 1. Attach Core Financials Menus to Localization Menus as a guide for granting users access to localization functionality.

To create new applications users, or to add or modify responsibilities for existing applications users:
