This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software or hardware and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

# Send Us Your Comments

## Oracle Strategic Network Optimization Installation Guide, Release 12.2

### Part No. E48786-01

Oracle welcomes customers' comments and suggestions on the quality and usefulness of this document. Your feedback is important, and helps us to best meet your needs as a user of our products. For example:

- Are the implementation steps correct and complete?
- Did you understand the context of the procedures?
- Did you find any errors in the information?
- Does the structure of the information help you with your tasks?
- Do you need different information or graphics? If so, where, and in what format?
- Are the examples correct? Do you need more examples?

If you find any errors or have any other suggestions for improvement, then please tell us your name, the name of the company who has licensed our products, the title and part number of the documentation and the chapter, section, and page number (if available).

Note: Before sending us your comments, you might like to check that you have the latest version of the document and if any concerns are already addressed. To do this, access the new Oracle E-Business Suite Release Online Documentation CD available on My Oracle Support and [www.oracle.com](http://www.oracle.com). It contains the most current Documentation Library plus all documents revised or released recently.

Send your comments to us using the electronic mail address: [appsdoc\\_us@oracle.com](mailto:appsdoc_us@oracle.com)

Please give your name, address, electronic mail address, and telephone number (optional).

If you need assistance with Oracle software, then please contact your support representative or Oracle Support Services.

If you require training or instruction in using Oracle software, then please contact your Oracle local office and inquire about our Oracle University offerings. A list of Oracle offices is available on our Web site at [www.oracle.com](http://www.oracle.com).

---

# Preface

## Intended Audience

Welcome to Release 12.2 of the *Oracle Strategic Network Optimization Installation Guide*.

See Related Information Sources on page vii for more Oracle E-Business Suite product information.

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

This product includes software developed by the University of California, Berkeley and its contributors.

Neither the name of the University nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE REGENTS AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE REGENTS

OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

### **Tool Command Language (TCL)**

This software is copyrighted by the Regents of the University of California, Sun Microsystems, Inc., Scriptics Corporation, ActiveState Corporation and other parties. The following terms apply to all files associated with the software unless explicitly disclaimed in individual files.

The authors hereby grant permission to use, copy, modify, distribute, and license this software and its documentation for any purpose, provided that existing copyright notices are retained in all copies and that this notice is included verbatim in any distributions. No written agreement, license, or royalty fee is required for any of the authorized uses. Modifications to this software may be copyrighted by their authors and need not follow the licensing terms described here, provided that the new terms are clearly indicated on the first page of each file where they apply.

IN NO EVENT SHALL THE AUTHORS OR DISTRIBUTORS BE LIABLE TO ANY PARTY FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF THIS SOFTWARE, ITS DOCUMENTATION, OR ANY DERIVATIVES THEREOF, EVEN IF THE AUTHORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

THE AUTHORS AND DISTRIBUTORS SPECIFICALLY DISCLAIM ANY WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. THIS SOFTWARE IS PROVIDED ON AN "AS IS" BASIS, AND THE AUTHORS AND DISTRIBUTORS HAVE NO OBLIGATION TO PROVIDE MAINTENANCE, SUPPORT, UPDATES, ENHANCEMENTS, OR MODIFICATIONS.

GOVERNMENT USE: If you are acquiring this software on behalf of the U.S. government, the Government shall have only "Restricted Rights" in the software and related documentation as defined in the Federal Acquisition Regulations (FARs) in Clause 52.227.19 (c) (2). If you are acquiring the software on behalf of the Department of Defense, the software shall be classified as "Commercial Computer Software" and the Government shall have only "Restricted Rights" as defined in Clause 252.227-7013 (c) (1) of DFARs. Notwithstanding the foregoing, the authors grant the U.S. Government and others acting in its behalf permission to use and distribute the software in accordance with the terms specified in this license.

### **Independent JPEG Group**

This product includes software developed by the Independent JPEG Group. Copyright (c) 1991-1998 The authors make NO WARRANTY or representation, either express or

implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.

### **Henry Spencer's Regular Expression Library (REGEX)**

This product includes software developed by Henry Spencer. Copyright (c) 1992, 1993, 1994, 1997 This software is not subject to any license of the American Telephone and Telegraph Company or of the Regents of the University of California. Permission is granted to anyone to use this software for any purpose on any computer system, and to alter it and redistribute it, subject to the following restrictions:

- The author is not responsible for the consequences of use of this software, no matter how awful, even if they arise from flaws in it.
- The origin of this software must not be misrepresented, either by explicit claim or by omission. Since few users ever read sources, credits must appear in the documentation.
- Altered versions must be plainly marked as such, and must not be misrepresented as being the original software. Since few users ever read sources, credits must appear in the documentation.
- This notice may not be removed or altered.

### **XBAE**

Copyright (c) 1991, 1992 Bell Communications Research, Inc. (Bellcore)

Copyright (c) 1995-99 Andrew Lister

All Rights Reserved.

Permission to use, copy, modify and distribute this material for any purpose and without fee is hereby granted, provided that the above copyright notices and this permission notice appear in all copies, and that the name of any author not be used in advertising or publicity pertaining to this material without the specific, prior written permission of an authorized representative of Bellcore and current maintainer.

BELLCORE AND OTHER CONTRIBUTORS MAKE NO REPRESENTATIONS AND EXTEND NO WARRANTIES, EXPRESS OR IMPLIED, WITH RESPECT TO THE INFORMATION, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR ANY PARTICULAR PURPOSE, AND THE WARRANTY AGAINST INFRINGEMENT OF PATENTS OR OTHER INTELLECTUAL PROPERTY RIGHTS. THE SOFTWARE IS PROVIDED "AS IS", AND IN NO EVENT SHALL ANY AUTHOR OR ANY OF THEIR AFFILIATES BE LIABLE FOR ANY DAMAGES, INCLUDING ANY LOST PROFITS OR OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES RELATING TO THE INFORMATION.

### **Oracle**

Oracle takes no responsibility for its use or distribution of any open source or shareware software or documentation and disclaims any and all liability or damages resulting from use of said software or documentation.

## Integration Repository

The Oracle Integration Repository is a compilation of information about the service endpoints exposed by the Oracle E-Business Suite of applications. It provides a complete catalog of Oracle E-Business Suite's business service interfaces. The tool lets users easily discover and deploy the appropriate business service interface for integration with any system, application, or business partner.

The Oracle Integration Repository is shipped as part of the E-Business Suite. As your instance is patched, the repository is automatically updated with content appropriate for the precise revisions of interfaces in your environment.

You can navigate to the Oracle Integration Repository through Oracle E-Business Suite Integrated SOA Gateway.

## Do Not Use Database Tools to Modify Oracle E-Business Suite Data

Oracle **STRONGLY RECOMMENDS** that you never use SQL\*Plus, Oracle Data Browser, database triggers, or any other tool to modify Oracle E-Business Suite data unless otherwise instructed.

Oracle provides powerful tools you can use to create, store, change, retrieve, and maintain information in an Oracle database. But if you use Oracle tools such as SQL\*Plus to modify Oracle E-Business Suite data, you risk destroying the integrity of your data and you lose the ability to audit changes to your data.

Because Oracle E-Business Suite tables are interrelated, any change you make using an Oracle E-Business Suite form can update many tables at once. But when you modify Oracle E-Business Suite data using anything other than Oracle E-Business Suite, you may change a row in one table without making corresponding changes in related tables. If your tables get out of synchronization with each other, you risk retrieving erroneous information and you risk unpredictable results throughout Oracle E-Business Suite.

When you use Oracle E-Business Suite to modify your data, Oracle E-Business Suite automatically checks that your changes are valid. Oracle E-Business Suite also keeps track of who changes information. If you enter information into database tables using database tools, you may store invalid information. You also lose the ability to track who has changed your information because SQL\*Plus and other database tools do not keep a record of changes.

---

# Installing Strategic Network Optimization for Windows

This chapter covers the following topics:

- About this Document
- Installing the Application
- Setting Environment Variables for Start-Up Scripts
- Setting the HOME Environment Variable
- Uninstalling Strategic Network Optimization

## About this Document

This document applies to Oracle Strategic Network Optimization 12.1. Information in this document pertains to Oracle Strategic Network Optimization on Windows and UNIX.

## Installing the Application

### Preinstallation Requirements

You must determine your deployment method, hardware, and software requirements prior to installing Strategic Network Optimization.

**Note:** For more information about deployment methods, hardware, and software requirements, see Oracle Value Chain Planning 12.2 Hardware and Software Guide, and the Minimum Technical Requirements.

To install Strategic Network Optimization for Windows, perform the following:

1. Log in as the administrator.
2. Launch the install.exe file.
3. In the Introduction window, Click Next. The install program starts.
4. In the Choose SCP Suite Folder window, specify the installation directory and click Next.

Strategic Network Optimization is installed in a \scp\12.1\sno directory under the directory that you specify. Strategic Network Optimization startup scripts are stored in \scp\12.1\common\start under the directory that you specify.

5. Review the information on the Pre-Installation Summary window and ensure that you have enough disk space for the installation.

To continue with the installation, click Install.

6. In the Install Complete window click Done.

If errors occur during installation, they are logged in the file Strategic\_Network\_Optimization\_12.1\_InstallLog.log in \scp\12.2 under the directory that you specify.

## Starting Strategic Network Optimization

From the Start menu, choose Programs, Oracle Value Chain Planning 12.1, Strategic Network Optimization, and Strategic Network Optimization.

## Setting Environment Variables for Start-Up Scripts

If you are running Strategic Network Optimization using your own start-up scripts, you must specify the location of some Strategic Network Optimization files by setting the following environment variable:

- LINXHOME (specifies the location of the current version of SNO)

You must also specify the location of the shared libraries by modifying the PATH environment variable:

- PATH (specifies the location of shared libraries)

There is a common installation directory that can be used to simplify the environment variables. For example, if the directory specified during installation is \numetrix, then there is a directory named scp installed below it. You can define an environment variable named SCP\_HOME that points to \numetrix\scp to simplify environment variable paths.

To run Strategic Network Optimization 12.1 with your own start-up scripts, add the

following environment variables to these scripts:

```
set SCP_HOME= directory specified during installation\scp
set SCP_COMMON= %SCP_HOME%\12.1\common
set LINXHOME= %SCP_HOME%\12.1\sno
```

You must also specify the location of the shared libraries by modifying the PATH environment variable:

```
set PATH=%SCP_COMMON%\bin;%SCP_COMMON%\bin_64;%PATH%
```

To use the SCBM connector, you must specify the following environment variable:

```
set TCL_LIBRARY= %SCP_COMMON%\lib\tcl8.4
```

For the default publishing profiles to function properly, you must specify the following environment variable:

```
set PROFILEIODIR= %SCP_COMMON%\lib\sno\metadata
```

## Setting the HOME Environment Variable

Strategic Network Optimization uses the HOME environment variable to specify the user's home directory which contains the following items:

- the linx.smart file
- the linx.startup file
- the linx.ini file which stores recently used files
- the sno.profiles file which stores publishing profiles

Set the HOME environment from the Windows control panel.

To set the HOME environment variable:

1. From the Start menu, choose Settings, and then choose Control Panel.
2. In the Control Panel window, double-click the System icon.
3. Click the Advanced tab, and then click the Environment Variables button.
4. On the Environment tab, type HOME in the Variable field.
5. In the Value field, type the user's home directory path.
6. Click Set, and then click OK.

If the HOME environment variable is not set, Strategic Network Optimization uses the LINXHOME environment variable to write out these files.

## Uninstalling Strategic Network Optimization

Before uninstalling Strategic Network Optimization, ensure that the directory that you want to remove does not contain files that you want to keep and that no users are accessing that version.

To uninstall Strategic Network Optimization, perform the following:

1. Log in as the administrator.
2. From the Start menu, choose Settings, and then choose Control Panel.
3. Double-click Add/Remove Programs.
4. Choose Strategic Network Optimization 12.1, and then click Change/Remove.  
An InstallAnywhere window appears while the system prepares to uninstall Strategic Network Optimization.
5. In the Introduction window, click Uninstall.
6. In the Uninstall Complete window, a list of directories that were not removed is presented. This occurs when files have been modified or added in these directories since the installation. To exit from the InstallAnywhere window, click Done.

---

# Installing Strategic Network Optimization for UNIX

This chapter covers the following topics:

- Installing the Application
- Starting Strategic Network Optimization
- Setting Environment Variables for Start-up Scripts
- Setting the HOME Environment Variable
- Uninstalling Strategic Network Optimization

## Installing the Application

### Preinstallation Requirements

You must determine your deployment method, hardware, and software requirements prior to installing Strategic Network Optimization.

**Note:** For more information about deployment methods, hardware, and software requirements, see Oracle Value Chain Planning 12.2 Hardware and Software Guide, and the Minimum Technical Requirements.

To install the application on a UNIX platform, perform the following:

1. Change to the directory where the install.exe file is located.
2. Change to the platform directory (HP, IBM, Sun, or Linux).
3. On the HP, IBM, or Linux platform, enter the following command:

```
./install.bin
```

On the Sun platform, enter the following command:

```
ksh ./install.bin
```

An InstallAnywhere window appears while the system prepares to install Strategic Network Optimization.

4. Click Next.
5. In the Choose SCP Suite Folder window, specify the installation directory.
6. Click Next.
7. Review the information on the Pre-Installation Summary window and ensure that you have enough disk space for the installation. To continue with the installation, click Install.
8. In the Install Complete window, click Done.

Strategic Network Optimization is installed in a /scp/12.1.3/sno directory under the directory that you specify. Strategic Network Optimization startup scripts are stored in /scp/12.1.3/common/start under the directory that you specify. You cannot use spaces in the directory path.

If errors occur during installation, they are logged in Strategic\_Network\_Optimization\_12.1\_InstallLog.log file in /scp/12.1 under the directory that you specify.

## Starting Strategic Network Optimization

After installing Strategic Network Optimization, you can run the system. To start Strategic Network Optimization, perform the following:

1. Navigate to /scp/12.1.3/common/start in the directory that you specified during installation.
2. Enter the following command:  

```
./run_sno_sno.sh
```

To start Strategic Network Optimization in batch mode, perform the following:

1. Navigate to /scp/12.1.3/common/start in the directory that you specified during installation.
2. Enter the following command:  

```
./run_sno_snocon.sh
```

## Setting Environment Variables for Start-up Scripts

If you are running Strategic Network Optimization using your own start-up scripts, you must specify the location of some Strategic Network Optimization files by setting the following environment variable:

- LINXHOME (specifies the location of the current version of SNO)

You must also specify the location of the shared libraries by using one of the following environment variables, depending on the platform you are using:

- On the HP, Sun, or Linux platform:

```
LD_LIBRARY_PATH
```

- On the IBM platform:

```
LIBPATH
```

There is a common installation directory that can be used to simplify the environment variables. For example, if the directory specified during installation is /numetrix, then there is a directory named scp installed below it. You can define an environment variable named SCP\_HOME that points to /numetrix/scp to simplify environment variable paths.

To run Strategic Network Optimization 12.1 with your own start-up scripts, add the following environment variables to these scripts:

```
export SCP_HOME= directory specified during installation/scp
export SCP_COMMON= $SCP_HOME/12.1/common
export LINXHOME= $SCP_HOME/12.1/sno
```

You must also specify the location of the shared libraries by using one of the following environment variables, depending on the platform you are using:

On the HP, Sun, or Linux platform:

```
export
LD_LIBRARY_PATH=${SCP_COMMON}/bin:${SCP_COMMON}/bin_64:${LD_LIBRARY_PATH}
```

On the IBM platform:

```
export LIBPATH=${SCP_COMMON}/bin:${SCP_COMMON}/bin_64:${LIBPATH}
```

To use the SCBM connector, you must specify the following environment variable:

```
export TCL_LIBRARY= $SCP_COMMON/lib/tcl8.4
export PATH= $SCP_COMMON/bin:$PATH
```

On the HP platform:

```
export SHLIB_PATH=${SCP_COMMON}/bin:${SCP_COMMON}/bin_64:${SHLIB_PATH}
```

On the Sun platform:

```
export
LD_LIBRARY_PATH_64=${SCP_COMMON}/bin:${SCP_COMMON}/bin_64:${LD_LIBRARY_P
ATH_64
```

For the default publishing profiles to function properly, specify the following environment variable:

```
export PROFILEIODIR= $SCP_COMMON/lib/sno/metaData
```

## Setting the HOME Environment Variable

Strategic Network Optimization uses the HOME environment variable to specify the user's home directory which contains the following items:

1. the sno.smart file
2. the linx.startup file
3. the sno.ini file which stores recently used files
4. the sno.profiles file which stores publishing profiles

If you want to run Strategic Network Optimization using a custom start-up script, set the HOME environment variable by entering the following:

```
export HOME= path to homedirectory
```

where *path to home directory* is the path to the location of the files listed above.

If the HOME environment variable is not set, Strategic Network Optimization uses the LINXHOME environment variable to write out these files.

## Uninstalling Strategic Network Optimization

Before uninstalling Strategic Network Optimization, ensure that the directory that you want to remove does not contain files that you want to keep and that no users are accessing that version.

To uninstall Strategic Network Optimization, perform the following:

1. Log in as the root user.
2. Enter the following:

```
cd install-path/scp/12.1/sno/uninstall
```

where *install-path* is the directory path for the application.

3. On the HP or IBM platform, run the following executable:

```
./Uninstall_sno
```

On the Sun platform, run the following executable:

```
ksh ./Uninstall_sno
```

An InstallAnywhere window appears while the system prepares to uninstall Strategic Network Optimization.

4. In the Introduction window, click Uninstall.

All of the files are removed except for files that have been modified or added since the installation.

5. In the Uninstall Complete window, a list of directories that were not removed is presented. This occurs when files have been modified or added in these directories since the installation. To exit from the InstallAnywhere window, click Done.

6. To remove the directories that were not removed during uninstall, enter the following:

```
cd /install-path/scp/12.1
```

7. For prompts prior to deletion, enter the following:

```
rm -r sno
```

For immediate deletion, enter the following:

```
rm -Rf sno
```

The version directory is removed.

8. If Strategic Network Optimization is the only Supply Chain Planning application installed, enter the following:

```
cd /install-path
```

```
rm -Rf scp
```

The domain would continue to use /mydomain/logs for its log files.

---

## Viewing the Online Help

### Online Help Overview

Oracle Value Chain Planning 12.2 online help is delivered in Adobe Portable Document Format (PDF). The PDF file retains the formatting of printed documentation, including all of the screen images and graphics, and you can print individual pages or the whole document. The help file enables you to find information by searching for a topic, a word, or a string of text. Many sections also contain See and See Also cross-references that take you to related information with one click of the mouse.

To view the PDF file, you need Adobe Acrobat Reader version 6.0.2 or higher, which is not distributed with the Oracle software. However, the Reader is free and you can download the version appropriate for your system from the Adobe web site ([www.adobe.com](http://www.adobe.com)).

Oracle does not provide support for the Adobe Acrobat Reader. If you need help downloading it, please check with your system administrator or contact Adobe Systems Incorporated. For information on using the Reader, please refer to its online help.

Adobe and Acrobat Reader are trademarks of Adobe Systems Incorporated.

### Setting the System Environment Variable in UNIX

To set the environment variable in UNIX, perform the following:

1. Navigate to your home directory.
2. Edit your `.profile` file to include the path to the Adobe Acrobat Reader.

For example:

```
PATH=adobe path:$PATH
```

where *adobe path* is the path where the Adobe Acrobat Reader executable is saved.

The name of the executable is `acroread`.
