Oracle Functional Testing Suite Advanced Pack for Oracle E-Business Suite ? Property Manager Reference Guide, Release 12.2.8

Part No. E56963-05

Oracle welcomes customers' comments and suggestions on the quality and usefulness of this document. Your feedback is important, and helps us to best meet your needs as a user of our products. For example:

- Are the implementation steps correct and complete?
- Did you understand the context of the procedures?
- Did you find any errors in the information?
- Does the structure of the information help you with your tasks?
- Do you need different information or graphics? If so, where, and in what format?
- Are the examples correct? Do you need more examples?

If you find any errors or have any other suggestions for improvement, then please tell us your name, the name of the company who has licensed our products, the title and part number of the documentation and the chapter, section, and page number (if available).

Note: Before sending us your comments, you might like to check that you have the latest version of the document and if any concerns are already addressed. To do this, access the new Oracle E-Business Suite Release Online Documentation CD available on My Oracle Support and www.oracle.com. It contains the most current Documentation Library plus all documents revised or released recently.

Send your comments to us using the electronic mail address: appsdoc_us@oracle.com

Please give your name, address, electronic mail address, and telephone number (optional).

If you need assistance with Oracle software, then please contact your support representative or Oracle Support Services.

If you require training or instruction in using Oracle software, then please contact your Oracle local office and inquire about our Oracle University offerings. A list of Oracle offices is available on our Web site at www.oracle.com.

Preface

Intended Audience

Welcome to Release 12.2.8 of the *Oracle Functional Testing Suite Advanced Pack for Oracle E-Business Suite – Property Manager Reference Guide.*

This guide is meant for implementers and testers of Oracle E-Business Suite applications. The document can also be referenced by end users to get information about the test flows.

This guide assumes you have a working knowledge of the following:

- The principles and customary practices of your business area.
- Computer desktop application usage and terminology.

See Related Information Sources on page viii for more Oracle E-Business Suite product information.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

Related Information Sources

You can choose from many sources of information, including online documentation, training, and support services, to increase your knowledge and understanding of Oracle Application Testing Suite.

Online Documentation

All Oracle Application Testing Suite documentation is available online (HTML or PDF).

- **PDF** - See the Oracle E-Business Suite Documentation Library for current PDF documentation for your product with each release. The Oracle E-Business Suite Documentation Library is also available on My Oracle Support and is updated frequently

- **Release Notes** - For information about changes in this release, including new features, known issues, and other details, see the release notes for the relevant product, available on My Oracle Support.

Guides Related to This Product

Oracle E-Business Suite User's Guide

This guide explains how to navigate, enter and query data, and run concurrent requests using the user interface (UI) of Oracle E-Business Suite. It includes information on setting preferences and customizing the UI. In addition, this guide describes accessibility features and keyboard shortcuts for Oracle E-Business Suite.

Oracle Functional Testing Flow Builder Starter Pack Reference Guide for E-Business Suite Release 12.2

This guide describes each flow, thereby providing an insight about the purpose of the flow and the core setups required to execute the flow. These test flows are built using Oracle E-Business Suite of applications on Release 12.2 with a sample database, which is required to run these flows.

Oracle Functional Testing Flow Builder User's Guide

Oracle Flow Builder (OFB) is a keyword-driven testing application that business analysts and Quality Assurance engineers use to build business test automation flows. The test automation flows can be translated into executable OpenScript scripts.

Technical QA engineers or IT users define or update components by making use of the keywords for Oracle E-Business Suite of applications. Functional QA engineers or business analysts then assemble the components together to define a business process, or "flow" and generate OpenScript scripts to automate testing of the application

Training and Support

Training

Oracle offers a complete set of training courses to help you master your product and reach full productivity quickly. These courses are organized into functional learning paths, so you take only those courses appropriate to your job or area of responsibility.

You have a choice of educational environments. You can attend courses offered by Oracle University at any of our many Education Centers, you can arrange for our trainers to teach at your facility, or you can use Oracle Learning Network (OLN), Oracle University's online education utility. In addition, Oracle training professionals can tailor standard courses or develop custom courses to meet your needs. For example, you may want to use your organization structure, terminology, and data as examples in a customized training session delivered at your own facility.

Support

From on-site support to central support, our team of experienced professionals provides the help and information you need to keep your product working for you. This team includes your Technical Representative, Account Manager, and Oracle's large staff of consultants and support specialists with expertise in your business area, managing an Oracle server, and your hardware and software environment.

Do Not Use Database Tools to Modify Oracle E-Business Suite Data

Oracle STRONGLY RECOMMENDS that you never use SQL*Plus, Oracle Data Browser, database triggers, or any other tool to modify Oracle E-Business Suite data unless otherwise instructed.

Oracle provides powerful tools you can use to create, store, change, retrieve, and maintain information in an Oracle database. But if you use Oracle tools such as SQL*Plus to modify Oracle E-Business Suite data, you risk destroying the integrity of your data and you lose the ability to audit changes to your data.

Because Oracle E-Business Suite tables are interrelated, any change you make using an Oracle E-Business Suite form can update many tables at once. But when you modify Oracle E-Business Suite data using anything other than Oracle E-Business Suite, you may change a row in one table without making corresponding changes in related tables. If your tables get out of synchronization with each other, you risk retrieving erroneous information and you risk unpredictable results throughout Oracle E-Business Suite.

When you use Oracle E-Business Suite to modify your data, Oracle E-Business Suite

automatically checks that your changes are valid. Oracle E-Business Suite also keeps track of who changes information. If you enter information into database tables using database tools, you may store invalid information. You also lose the ability to track who has changed your information because SQL*Plus and other database tools do not keep a record of changes.

1

Introduction

Overview

The Oracle Functional Testing Suite Advanced Pack for Oracle E-Business Suite, referred to as advanced pack in this guide, provides components for testing features of different products delivered as part of Oracle E-Business Suite Release 12.2. The components delivered in the advanced pack for Oracle Property Manager are documented cumulatively in this guide. These flows are available over the Oracle Flow Builder Starter Pack in Release 12.4.0.2 of the Oracle Application Testing Suite for Oracle E-Business Suite.

For information about the components delivered in the Oracle Flow Builder Starter Pack, see the Oracle Functional Testing Flow Builder Starter Pack Reference Guide for E-Business Suite Release 12.2.

Oracle Property Manager Attributes

This section provides information on the common prerequisites, profile options, and data setups required for executing the Oracle Property Manager flows. Flow specific requirements are documented along with the flow in the subsequent chapter.

Prerequisites

None.

Profile Options

Not applicable.

Predefined Data

Not applicable.

Setup Data

Oracle Property Manager Flows

Overview

Oracle Property Manager provides the ability to manage major real estate tasks, including creation and administration of property, lease administration and office space allocation.

The following sections describe the flows in the Oracle Property Manager advanced pack.

Property Manager Amend Lease Flow

Lease amendments are created to cover changes or additions to the terms of a lease. The amend lease feature is used to modify lease information when the approval status of the lease is Final.

The Property Manager Amend Lease Flow covers the different lease amendment scenarios and related normalization calculation verification for the amendment. The following amend scenarios are included in this flow:

- Lease Amendment with Extend Term
- Lease Amendment with Contract Term
- Lease Amendment with Status Rollover to Month-to-Month
- Lease Amendment with Renormalize as No and with Cut Off Date Entry

Attributes

This section provides information on prerequisites, profile options, and data setups required to execute the Property Manager Amend Lease flow.

Technical Name

PN_Amend_Lease

Prerequisites

None.

Profile Options

Not applicable.

Predefined Data

The following predefined data must be used:

Window Name	Field Name	Field Value
User	User Name	operations
	Password	welcome
Responsibilities	Responsibility Name	Property Manager, Vision Operations (USA)

Setup Data

The following data must be set up:

Window Name	Field Name	Field Value	Comments
Property	Tenure	Mixed	Lookup Type: PN_TENURE_TYPE
Billing	Tenure	Mixed	Lookup Type: PN_TENURE_TYPE
Lease	Type	Operating Lease	Lookup Type: PN_LEASE_TYPE

Window Name	Field Name	Field Value	Comments
Lease	Term Template	PN-Pay Norm TX NO	Payment term template should contain account distribution for Expense, Liability, and Accrued liability.
Lease	Usage	Office Space	Lookup Type: PN_TENANCY_USAGE_TYPE
Lease	Purpose	Rent	Lookup Type: PN_PAYMENT_PURPOSE_TYPE
Lease	Type	Base Rent	Lookup Type: PN_PAYMENT_TERM_TYPE
Lease	Supplier	PN-Supplier1	
Lease	Supplier Site	Main Site	
Term Details	GL Account	01-110-7440-0000-000	
Term Details	GL Account	01-000-2210-0000-000	
Term Details	GL Account	01-000-2225-0000-000	

Property Manager Rent Increase Flow

The rent increase feature helps to calculate rent increases based on fixed percentages or a specified index. The Property Manager Rent Increase flow covers the creation of rent increase agreement with the following parameters:

- Reference Period as Basis Year
- Negative Rent as Ignore
- Spread Frequency as Monthly
- Basis Type as Fixed

- Index Finder as Always Finder Date
- Increase On as Base Rent
- Relation Ship as Lessor of, Greater of and Index Only

The rent increase period is generated, and it calculates the rent increase term (billing term). This flow also covers the creation, approval, and verification of rent increase term.

Attributes

This section provides information on prerequisites, profile options, and data setups required to execute the Property Manager Rent Increase flow.

Technical Name

PN-01_Rent_Increase_05

Prerequisites

None.

Profile Options

The following profile options must be set:

Profile Option Name	Profile Option Value
PN: End Date for Base Year Reference Rent Increase Terms	Assessment Period End
PN: Rent Increase Term End Date	End of Lease
PN: Rent Increase Calculated after Assessment Date	Single Term

Predefined Data

The following predefined data must be used:

Window Name	Field Name	Field Value
User	User Name	operations
	Password	welcome
Responsibilities	Responsibility Name	Property Manager, Vision Operations (USA)

Setup Data

The following data must be set up:

Window Name	Field Name	Field Value	Comments
Lease	Office Location	PN-B1-1-107	Location should be available within the lease dates.
Lease	Term Template	PN-Pay-Norm TX NO	Payment term template should contain account distribution for Expense, Liability and Accrued liability.
Lease	Supplier Name	PN-Supplier-1	
Lease	Supplier Site	MAIN SITE	
Rent Increase	Index Type	PN Index 1	Index History contains monthly index defined for the entire period of Rent Increase.
Lease	Purpose	Rent, Insurance, Operating Expense	Lookup Type: PN_PAYMENT_PURPOSE_TYPE

Window Name	Field Name	Field Value	Comments
Lease	Type	Base Rent, Cleaning, Escalation	Lookup Type: PN_PAYMENT_TERM_TYPE

Property Manager Tenant Common Area Maintenance (TCAM) Flow

Operating expense feature helps tenants pay their landlord a prorata share of the tenant common area maintenance for the property on lease. The Property Manager Tenant Common Area Maintenance flow covers the following:

- Creation of Expense Lease
- Creation of Operating Expense Agreement with Prorata basis, Expense Group, and Caps Setup
- Calculation of Estimated Payment
- Calculation and Verification of Payment Term and Catch-up Term
- Creation and Verification of Reconciliation
- Reconciliation Term Creation
- Verification in Lease Payment for Estimated Payment Term, Catch-up Term and Reconciliation Term

Attributes

This section provides information on prerequisites, profile options, and data setups required to execute the Property Manager Tenant Common Area Maintenance flow.

Technical Name

PN-01_TCAM_07

Prerequisites

None.

Profile Options

Not applicable.

Predefined Data

The following predefined data must be used:

Window Name	Field Name	Field Value
User	User Name	operations
	Password	welcome
Responsibilities	Responsibility Name	Property Manager, Vision Operations (USA)

Setup Data

The following data must be set up:

Window Name	Field Name	Field Value	Comments
Lease	Term Template Name	PN-Pay-Norm TX NO	Payment Term template should contain account distribution for Expense, Liability and Accrued liability.
Lease	Office Location	PN-B1-1-109	Location should be available within the lease dates.
Lease	Supplier name	Capp Consulting	
Lease	Purpose	Rent	
Lease	Type	Base Rent	

Page Name	Field Name	Field Value	Comments
Operating Expense Agreement	Term Template Name	PN-Pay-Norm TX NO	Payment term template should contain account distribution for Expense, Liability and Accrued liability.
Operating Expense Agreement	Purpose	Rent	
Operating Expense Agreement	Type	Base Rent	
Operating Expense Agreement	Standard Group Name	Common Area Maintenance	
Operating Expense Agreement	Standard Group Name	Utilities	
Operating Expense Agreement	Standard Group Name	Tax	
Operating Expense Agreement	Standard Group Name	Security	

Property Manager Variable Rent Flow

The variable rent feature enables you to calculate rent based on a variety of factors such as sales volumes, utility consumption, hours, and services provided.

The Property Manager Variable Rent flow covers the creation of variable rent agreement with the following calculation methods:

1. Cumulative
2. Non-Cumulative
3. True Up
4. Year to Date

This flow also covers the following partial year method combinations:

1. Combined Sales without Break Point Proration
2. First Year and Last Year
3. Combined Sales with Breakpoint Proration
4. Standard

The flow also handles Constraints, Allowances and Abatements (both fix and recurring). With the above combinations in variable rent agreement, variable rent is calculated and approved.

Attributes

This section provides information on prerequisites, profile options, and data setups required to execute the Property Manager Variable Rent flow.

Technical Name

PN-01_Variable_Rent_04

Prerequisites

None.

Profile Options

The following profile options must be set:

Profile Option Name	Profile Option Value
PN: Volume status default	Approved
PN: Show Calculate and Calculate All Buttons for Variable Rent	Yes

Predefined Data

The following predefined data must be used:

Window Name	Field Name	Field Value
User	User Name	operations

Window Name	Field Name	Field Value
	Password	welcome
Responsibilities	Responsibility Name	Property Manager, Vision Operations (USA)

Setup Data

The following data must be set up:

Window Name	Field Name	Field Value	Comments
Lease, Variable Rent Agreement	Term Template Name	PN-Pay-Norm TX NO	Payment term template should contain account distribution for Expense, Liability and Accrued liability.
Lease, Variable Rent Agreement	Office Location	PN-B1-1-106	Location should be available within lease dates.
Lease	Supplier name	PN-Supplier-1	
Variable Rent Agreement	Break point Channel	Direct	
Variable Rent Agreement	Break Point Category	Clothing	
Lease, Variable Rent Agreement	Purpose	Rent, Insurance, Depreciation	Lookup Type: PN_PAYMENT_PURPOSE_TYPE
Lease, Variable Rent Agreement	Type	Base Rent, Cleaning, Insurance, Depreciation, Rent	Lookup Type: PN_PAYMENT_TERM_TYPE

Page Name	Field Name	Field Value
System Option	Variable Rent Auto Generation option	No

Property Manager Recovery Flow

The recovery feature helps landlords to calculate, recover, and reconcile expenses such as those of common area maintenance expenses from tenants. This feature is important to any landlord who has multiple tenants in a single property, and any tenant who shares a property with other tenants.

The Property Manager Recovery flow covers the recovery and verification of the following types of recoverable costs:

- Common area maintenance costs
- Insurance

Attributes

This section provides information on prerequisites, profile options, and data setups required to execute the Property Manager Recovery flow.

Technical Name

PN-01_Recovery_06

Prerequisites

None.

Profile Options

Not applicable.

Predefined Data

The following predefined data must be used:

Window Name	Field Name	Field Value
User	User Name	operations

Window Name	Field Name	Field Value
	Password	welcome
Responsibilities	Responsibility Name	Property Manager, Vision Operations (USA)

Setup Data

The following data must be set up:

Window Name	Field Name	Field Value	Comments
Lease	Office Location	PN-B1-1-108	Location should be available within lease dates.
Lease	Term Template	PN-Bill-Norm TX NO	Billing term template should contain account distribution for Revenue, Receivables and Accrued Revenue.
Lease	Customer Name	PN-Customer-1	
Lease	Purpose	Rent, Insurance, Depreciation	Lookup Type: PN_PAYMENT_PURPOSE_TYPE
Lease	Type	Base Rent, Cleaning, Insurance, Depreciation, Rent	Lookup Type: PN_PAYMENT_TERM_TYPE
Lease	Recovery Type	Major	Lookup Type: PN_RECOVERY_TYPE
Lease	Recovery Space Standard	Exterior	Lookup Type: PN_RECOVERY_SPACE_STD_TYPE

A

Components in Oracle Property Manager

Overview

This section contains components of Oracle Property Manager.

Components in Oracle Property Manager

Product	Feature Name	Component Name	Search Tags	Description
Oracle Property Manager	Lease Management	Edit_Lease_Amend_Lease	Amend Lease	Amend the Existing Lease
Oracle Property Manager	Lease Management	Edit_Lease_Approve_Terms	Edit Lease	Approve the Payment Terms
Oracle Property Manager	Lease Management	Edit_Lease_Finalize_Lease	Edit Lease	Finalize the Lease
Oracle Property Manager	Lease Management	Edit_Lease_Location	Edit Lease Location	Edit the lease by adding the New Location to the Existing
Oracle Property Manager	Lease Management	Edit_Lease_Payment	Edit Lease Payment	Edit the lease by adding the New payment to the Existing

Product	Feature Name	Component Name	Search Tags	Description
Oracle Property Manager	Lease Management	Edit_Lease_Status	Lease	Change the Lease Status
Oracle Property Manager	Lease Management	Lease_Create	Lease - New	Create Lease
Oracle Property Manager	Lease Management	Lease_Create_Location	Lease - New	Create Lease Locations
Oracle Property Manager	Lease Management	Lease_Create_Terms	Lease - New	Create Lease Terms
Oracle Property Manager	Lease Management	Lease_Export_Payable_Receivabl	Export Billings to Receivables	Export the Terms to Payables/ Receivables
Oracle Property Manager	Lease Management	Verify_Exp_Normalization_Calcs	Revenue Lease Normalization Calculations	Verify Expense Lease Normalization Calculations
Oracle Property Manager	Lease Management	Verify_Lease_Expt_Payble_Recva	Export Billings to Receivables	Verify the Lease terms exported to Payables/Receivables
Oracle Property Manager	Lease Management	Verify_Lease_Imprt_Paybl_Rece	Export Billings to Receivables	Verify the Lease terms imported to Payables/Receivables
Oracle Property Manager	Lease Management	Verify_Lease_Status	Lease	Verify the Lease Status
Oracle Property Manager	Lease Management	Verify_Lease_TermDetail	Edit Lease	Verify the Term Details Window
