This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

# Preface

This manual provides information about the error messages you may encounter when installing and using Oracle Fusion Middleware components. It augments the message texts by providing additional cause and action information. For more information on error messages in Oracle Application Server, browse the documentation on the Oracle Technology Network (OTN) at <http://www.oracle.com/technology/products/ias/index.html>.

## Audience

This manual is intended for anyone who uses Oracle Fusion Middleware and requires more information about an error message encountered in the product.

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

---

---

## FED-10104 to FED-18084

**FED-10104: A name identifier update using protocol version {0} cannot be performed on a federation created with protocol version {1}**

**Cause:** Unable to perform a name identifier update with the current version.

**Action:** Try using a different protocol version.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10105: Attribute Service location not found in provider metadata for {0}**

**Cause:** Attribute service location was not in the provider metadata.

**Action:** Verify that the provider metadata contains the attribute service location.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10106: AssertionID service location not found in provider metadata for {0}**

**Cause:** AssertionID service location was not in the provider metadata.

**Action:** Verify that the provider metadata contains the AssertionID service location.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10108: Cannot create federation with opaque name identifier: invalid data store**

**Cause:** An opaque name identifier was used without a federation data store.

**Action:** Use a federation data store when an opaque identifier is used or configure Oracle Identity Federation to use a non-opaque Name ID.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10109: The nameid user store attribute has not been set for partner {0}.**

**Cause:** Assertion to user record via NameId is enabled but no user attribute was specified.

---

**Action:** Specify a userstore attribute to which the name identifier value should be mapped.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10110: Cannot find service provider metadata for Affiliation={0};affiliationID type={1}**

**Cause:** The federation did not contain a service provider that is part of the affiliation.

**Action:** Import the metadata of a service provider that is a member of the affiliation.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10111: Cannot find provider metadata for providerID={0}; providerID type={1}**

**Cause:** There was no metadata available for the provider with the given ID.

**Action:** Verify that the provider ID is correct or that the provider is included in the federation.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10112: No default identity provider was set for the single sign-on operation.**

**Cause:** The default single sign-on identity provider configuration property was not set.

**Action:** Set the default single sign-on identity provider in the Oracle Identity Federation configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10113: Federation termination protocol not enabled**

**Cause:** The federation termination protocol was not enabled.

**Action:** Verify that the federation termination protocol is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10114: NameIDPolicy not supported: {0}**

**Cause:** The NameIDPolicy requested is not supported or not enabled.

**Action:** Check that the requested name identifier format is supported and enabled.

**Level:** 1

---

**Type:** ERROR

**Impact:** Configuration

**FED-10115: Cannot find the AssertionConsumerServiceURL in the requester metadata.**

**Cause:** Could not find the AssertionConsumerServiceURL in the requester's provider metadata.

**Action:** Verify that the AssertionConsumerServiceURL is present in the provider metadata.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10117: Provider is not enabled: {0}**

**Cause:** The peer provider is not enabled in the federation.

**Action:** Verify that the provider is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10118: Single sign-on binding unknown: {0}**

**Cause:** The single sign-on binding is not one of the known bindings.

**Action:** Verify that the single sign-on binding is one of the bindings known by Oracle Identity Federation.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10119: The specified binding ({0}) for single sign-on with {1} is not supported by the peer provider.**

**Cause:** The binding specified is not one of the bindings supported by the peer provider.

**Action:** Verify that the binding specified is supported by the peer provider.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10120: Unable to find a suitable binding to send the request.**

**Cause:** Oracle Identity Federation could not find a binding to send the request.

**Action:** Verify that Oracle Identity Federation and the remote providers have a common binding for the profile.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

- 
- FED-10121: Unable to start identity provider-initiated single sign-on: Unknown metadata version.**  
**Cause:** The service provider metadata version was not recognized.  
**Action:** Verify that the metadata version is one of the versions supported by the identity provider.
- Level:** 1  
**Type:** ERROR  
**Impact:** Configuration
- FED-10122: Unable to start identity provider-initiated single sign-on: SP {0} does not belong to affiliation {1}.**  
**Cause:** The target service provider was not part of the affiliation.  
**Action:** Check the provider federation to verify that the target service provider is in the affiliation.
- Level:** 1  
**Type:** ERROR  
**Impact:** Configuration
- FED-10123: Unknown NameIDPolicy {0}**  
**Cause:** The NameIDPolicy is not one of the known policies.  
**Action:** Verify that the NameIDPolicy is one of the policies that is accepted by Oracle Identity Federation.
- Level:** 1  
**Type:** ERROR  
**Impact:** Configuration
- FED-10124: User cannot be located for federation with provider ID {0} name identifier {1} and message: {2}**  
**Cause:** Federation does not exist between the user, Oracle Identity Federation and the given peer provider.  
**Action:** Verify that the federation exists, or configure the server to create one.
- Level:** 1  
**Type:** ERROR  
**Impact:** Configuration
- FED-10125: AssertionID responder functionality is not enabled.**  
**Cause:** The AssertionID responder functionality has been disabled in the Oracle Identity Federation configuration.  
**Action:** Enable the AssertionID responder functionality.
- Level:** 1  
**Type:** ERROR  
**Impact:** Configuration
- FED-10126: Attribute Query requester functionality is not enabled.**  
**Cause:** The Attribute Query requester functionality has been disabled in the Oracle Identity Federation configuration.

---

**Action:** Enable the AttributeQuery requester functionality.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10127: AssertionID requester functionality is not enabled.**

**Cause:** The AssertionID requester functionality has been disabled in the Oracle Identity Federation configuration.

**Action:** Enable the AssertionID requester functionality.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10128: Attribute Query responder functionalities are not enabled.**

**Cause:** The Attribute Query responder functionality has been disabled in the Oracle Identity Federation configuration.

**Action:** Verify that the Attribute Query responder functionality is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10129: Authentication Query responder functionalities are not enabled.**

**Cause:** The Authentication Query responder functionality has been disabled in the Oracle Identity Federation configuration.

**Action:** Verify that the Authentication Query requester functionality is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10130: No metadata exists for protocol {0} used by provider {1}**

**Cause:** Metadata for this provider was not found.

**Action:** Load metadata for the provider.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10131: Unknown service provider: {0}**

**Cause:** The service provider is not in the federation.

**Action:** Verify the trusted provider federation configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10132: Single sign-on functionality is not enabled**

---

**Cause:** The single sign-on functionality has been disabled in the Oracle Identity Federation configuration.

**Action:** Verify that the single sign-on functionality is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10133: Identity provider functionality is not enabled.**

**Cause:** The identity provider functionality has been disabled in the Oracle Identity Federation configuration.

**Action:** Verify that the identity provider functionality is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10134: Incoming authentication request uses a protocol profile which is not enabled: {0}**

**Cause:** Protocol profile has not been enabled in the Oracle Identity Federation configuration.

**Action:** Verify that the profile used for the authentication request is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10135: Incoming request uses a protocol profile which is not enabled: {0}**

**Cause:** Protocol profile has not been enabled in the Oracle Identity Federation configuration.

**Action:** Verify that profile used for the incoming request is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10136: Incoming assertion uses a protocol profile which is not enabled: {0}**

**Cause:** Protocol profile has not been enabled in the Oracle Identity Federation configuration.

**Action:** Verify that the profile used in the assertion is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10139: Register Name Identifier protocol is disabled.**

**Cause:** The Register Name Identifier protocol has been disabled in the Oracle Identity Federation configuration.

**Action:** Verify that the Register Name IdentifierProtocol is enabled.

**Level:** 1

---

**Type:** ERROR

**Impact:** Configuration

**FED-10140: SAML 1.0 protocol functionality is not enabled.**

**Cause:** The SAML version 1.0 protocol has been disabled in the Oracle Identity Federation configuration.

**Action:** Verify that the SAML version 1.0 protocol is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10141: SAML 1.1 protocol functionality is not enabled.**

**Cause:** The SAML version 1.1 protocol has been disabled in the Oracle Identity Federation configuration.

**Action:** Verify that the SAML version 1.1 protocol is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10142: SAML 2.0 protocol functionality is not enabled.**

**Cause:** The SAML version 2.0 protocol has been disabled in the Oracle Identity Federation configuration.

**Action:** Verify that the SAML version 2.0 protocol is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10143: Service provider functionality is not enabled**

**Cause:** Service provider functionality has been disabled in the Oracle Identity Federation configuration

**Action:** Verify that service provider functionality is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10169: EventFactory was not found for {0}.**

**Cause:** EventFactory for this class was not registered.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FED-10178: Metadata version parameter unknown: {0}**

**Cause:** The metadata version parameter is unknown.

**Action:** Check that the metadata version parameter is correct.

---

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10187: Logout configuration error: webContext (= {0}) and/or relativePath (= {1}) for logout are incorrect.**

**Cause:** The webContext and/or relativePath for logout were incorrectly configured.

**Action:** Verify that the webContext and relativePath for logout are correctly configured.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10188: Invalid name identifier format**

**Cause:** The name identifier format is invalid, or custom name ID format is disabled.

**Action:** Verify that the name identifier format is valid, or that customizable name ID format is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10189: Attribute authority does not support any appropriate name identifier formats.**

**Cause:** The attribute authority does not support the requested subject name identifier format.

**Action:** Either use a subject format other than "userid", or use a different attribute authority.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10191: The service provider integration module is not enabled: {0}.**

**Cause:** The service provider integration module is disabled in the Oracle Identity Federation configuration.

**Action:** Enable the appropriate service provider integration module.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10195: Authentication engine configuration error: WebContext={0}; RelativePath={1}**

**Cause:** The Web Context and/or the Relative Path properties of the authentication engine configuration were not set.

**Action:** Check that the authentication engine configuration defines the required web context and relative path.

---

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10196: Service provider integration module configuration error:**

**WebContext={0} ; RelativePath={1}**

**Cause:** The Web Context and/or the Relative Path properties of the service provider integration module configuration were not set.

**Action:** Check that the service provider integration module configuration defines the required web context and relative path.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10197: The service provider anonymous user ID was not set.**

**Cause:** The Oracle Identity Federation server needed to create a session of type anonymous but the Anonymous User ID is not set in the configuration.

**Action:** Set the Anonymous User ID in the Oracle Identity Federation configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10205: OpenID 2.0 protocol functionality is not enabled.**

**Cause:** The OpenID version 2.0 protocol has been disabled in the Oracle Identity Federation configuration.

**Action:** Verify that the OpenID version 2.0 protocol is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-10206: OAuth 2.0 protocol functionality is not enabled.**

**Cause:** The OAuth version 2.0 protocol has been disabled in the Oracle Identity Federation configuration.

**Action:** Verify that the OAuth version 2.0 protocol is enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FED-11002: Cannot retrieve the unique user federation ID from the federation record.**

**Cause:** Could not retrieve the unique user federation ID from the federation record.

**Action:** Verify that the federation record is correctly formatted.

**Level:** 1

**Type:** ERROR

---

**Impact:** Data

**FED-12006: Unsupported attribute value type Object {0}**

**Cause:** Attribute value object received from the peer provider was not of a supported type.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**FED-12016: Message Creation Exception: unable to create the message: {0}**

**Cause:** Could not create the protocol message.

**Action:** Check the Oracle Identity Federation logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FED-12020: Translation Exception: unable to translate message: {0}.**

**Cause:** There was a problem marshalling or unmarshalling the message.

**Action:** Check the Oracle Identity Federation logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FED-12037: SAML Artifact Exception: {0}**

**Cause:** An error occurred while creating or parsing a SAML Artifact.

**Action:** Check the Oracle Identity Federation logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FED-12038: SAML Protocol Exception: {0}**

**Cause:** An error occurred while creating or parsing a SAML Protocol message.

**Action:** Check the Oracle Identity Federation logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FED-12042: Error while generating Oracle Identity Federation provider metadata.**

**Cause:** An error occurred while creating the Oracle Identity Federation provider metadata.

**Action:** Check logs and configuration, or contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** ERROR

---

**Impact:** Other

**FED-12081: Error while generating Oracle Identity Federation XRDS metadata.**

**Cause:** An error occurred while creating the Oracle Identity Federation XRDS metadata.

**Action:** Check logs and configuration, or contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FED-12085: Identity Provider Discovery service page disabled**

**Cause:** The IdP Discovery service page is disabled

**Action:** Update the configuration to enable that service if needed

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FED-12086: The credentials provided during the registration data retrieval operation could not be validated**

**Cause:** The credentials provided by the requesting client could not be validated

**Action:** Ensure that the client is sending the correct credentials

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FED-13000: Cannot complete the logout process.**

**Cause:** Oracle Identity Federation could not complete the logout process, due to a lack of profile support from the service providers.

**Action:** Perform the logout process using another binding or check that the various peer providers support appropriate logout profiles.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**FED-13008: Cannot create temporary federations.**

**Cause:** Temporary federation store is unavailable.

**Action:** Check configuration of data store. Make sure the data store is up and has space available.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Programmatic

**FED-13018: Cannot create a permanent federation record with a transient data store.**

**Cause:** Could not create a permanent federation due to the store being unavailable.

---

**Action:** Check configuration of data store. Make sure the data store is up and has space available.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Programmatic

**FED-13019: The Authentication Engine ID and Service Provider Engine ID are null.**

**Cause:** The engine did not return an authentication engine ID or a service provider engine ID.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**FED-13020: Both the Authentication Engine ID and Service Provider Engine ID are set.**

**Cause:** The engine returned both an authentication engine ID and an service provider engine ID, where only one should be set.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**FED-13021: Cannot retrieve session during logout flow.**

**Cause:** The session could not be retrieved.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**FED-15005: Name identifier registration is already in progress.**

**Cause:** A name identifier registration was in progress when a new registration was initiated.

**Action:** Wait until the name identifier registration finishes.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15006: The single sign-on Assertion has been marked as logged out: {0}.**

**Cause:** A non-expired logout request containing the Assertion SessionIndex invalidated the single sign-on assertion.

**Action:** Perform single sign-on again.

**Level:** 1

**Type:** ERROR

---

**Impact:** Requests/Responses

**FED-15007: The single sign-on Assertion has been marked as logged out: {0}.**

**Cause:** A non-expired logout request with no SessionIndex invalidated the single sign-on Assertion.

**Action:** Perform single sign-on again.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15008: A SAML 2.0 name identifier update cannot be performed on a non-SAML 2.0 federation record.**

**Cause:** Tried to perform a SAML 2.0 name identifier update.

**Action:** Try a different protocol version.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15009: An error occurred while dereferencing the SAML 2.0 Artifact: {0} - {1}**

**Cause:** A problem occurred with the SAML 2.0 Artifact.

**Action:** Verify the contents of the SAML 2.0 Artifact.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15010: Artifact not present**

**Cause:** The artifact was not present in the request.

**Action:** Verify that the artifact is set in the request

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15011: Cannot find the authentication request associated with the assertion: {0}.**

**Cause:** The assertion was replayed.

**Action:** Verify that the assertion has not been replayed.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15012: Cannot select the binding to use to send the request.**

**Cause:** Either the profile was not supported by the remote server, or could not agree with the Oracle Identity Federation server on a common binding.

**Action:** Verify that the remote server and the Oracle Identity Federation server have a common binding.

**Level:** 1

---

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15013: Cannot select the binding to use to send the response.**

**Cause:** Either the profile was not supported by the remote server, or could not agree with the Oracle Identity Federation server on a common binding.

**Action:** Verify that the remote server and the Oracle Identity Federation server have a common binding.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15015: Error encountered while parsing XML element {0}, child of {1} in incoming XML message.**

**Cause:** Could not parse an XML element from the incoming XML message.

**Action:** Verify that the incoming XML message is valid and correctly formatted.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15018: Error while decoding the authentication result: user ID missing.**

**Cause:** The user ID was missing in the result returned by the authentication process.

**Action:** Verify that the user ID is valid.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15020: Name identifier format not supported or missing for attribute responder: {0}**

**Cause:** The name identifier format for the attribute responder was unknown or not accepted.

**Action:** Verify that the name identifier format is one of the formats that is accepted by Oracle Identity Federation.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15021: Name identifier format not supported or missing for authentication responder: {0}**

**Cause:** The name identifier format for the authentication responder was unknown or not accepted.

**Action:** Verify that the name identifier format is one of the formats that is accepted by Oracle Identity Federation.

**Level:** 1

**Type:** ERROR

---

**Impact:** Requests/Responses

**FED-15022: Error processing response message.**

**Cause:** Was unable to process the response message.

**Action:** Check the Oracle Identity Federation logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15024: Query received is not an Attribute Query.**

**Cause:** Internal server error; expected an AttributeQuery message, but received a different message.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15025: Query received is not an Authentication Query.**

**Cause:** Internal server error; expected an AuthenticationQuery message, but received a different message.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15026: Issuer is not set in the incoming assertion request message: the provider is unknown**

**Cause:** The issuer attribute was not set in the assertion request message.

**Action:** Verify that the issuer attribute is set in the assertion request message.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15027: Issuer is not set in the incoming attribute query message: the provider is unknown**

**Cause:** The issuer attribute was not set in the attribute query message.

**Action:** Verify that the issuer attribute is set in the attribute query message.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15028: Issuer is not set in the incoming authentication query message: the provider is unknown**

**Cause:** The issuer attribute was not set in the authentication query message.

**Action:** Verify that the issuer attribute is set in the authentication query message.

---

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15032: No service provider federation found for provider {0} and name identifier format {1} and name identifier value {2}**

**Cause:** Unable to find the service provider federation corresponding to this provider and name identifier in the federation data store.

**Action:** Check the federation data store to verify that a user identity federation exists with the provider ID and name identifier submitted in the query.

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15033: Outgoing assertion protocol profile is not supported or not enabled: {0}**

**Cause:** The outgoing assertion protocol profile was not supported, or enabled.

**Action:** Verify that the assertion protocol profile is supported by Oracle Identity Federation.

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15034: Profile is unknown: {0}**

**Cause:** The profile was unknown.

**Action:** Verify that the profile version is correct.

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15035: Provider ID is missing from the authentication request**

**Cause:** The provider ID was missing from the authentication request.

**Action:** Verify that the provider ID is present in the authentication request.

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15037: Request destination is invalid**

**Cause:** The request destination was not a valid URL.

**Action:** Verify that the request destination is a valid URL and correspond to the URL where the request was posted.

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15038: Response destination is invalid**

---

**Cause:** The response destination was not a valid URL.

**Action:** Verify that the response destination is a valid URL and correspond to the URL where the response was posted.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15039: Response does not correspond to any requests**

**Cause:** The response was replayed

**Action:** verify that the response is not replayed

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15041: Cannot process the incoming request**

**Cause:** Single sign-on is required with peer provider in order to fulfill the current request.

**Action:** Perform single sign-on before attempting to execute the protocol operation.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15042: The InResponseTo header does not correspond to a ManageNameID request.**

**Cause:** The InResponseTo pointed to a message other than ManageNameID.

**Action:** Check with the peer provider.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15043: The received assertion does not contain an AuthenticationStatement: {0}**

**Cause:** The assertion did not contain an authentication statement.

**Action:** Contact the peer provider for more details on why the assertion does not contain an authentication statement, and examine the assertion for possible information.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15044: The response does not contain any assertions: {0}**

**Cause:** The identity provider did not include any assertions in the response.

**Action:** Check that the identity provider includes an assertion with the response.

**Level:** 1

---

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15055: Invalid version format in the active identity provider federation entry: {0}**

**Cause:** The version format was incorrect.

**Action:** Verify that the version parameter is in a valid format.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15061: Unknown message: {0}**

**Cause:** A protocol message was sent on the incorrect service URL.

**Action:** Verify that the message sent to the service URL is of correct type.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15062: Authentication request destination is invalid**

**Cause:** The authentication request destination was not a valid URL.

**Action:** Verify that the authentication responder functionalities are enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15063: Authentication request is expired.**

**Cause:** The authentication request has expired or is not yet valid.

**Action:** Verify the time settings between this server and the peer provider are synchronized. Alternatively the server clock drift can be increased in the Oracle Identity Federation configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15064: Destination URL cannot be validated: {0}**

**Cause:** Destination URL could not be validated.

**Action:** Verify that the URL is correct.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15065: The destination field ({0}) from the SAML 2.0 message does not match the actual request URL {1}**

**Cause:** The message was submitted on a URL that is different from the URL that was specified by the remote provider in the destination field.

**Action:** Contact remote provider.

---

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15067: Invalid response.**

**Cause:** Protocol response was corrupt.

**Action:** Verify that an XML message is well-formed and correct.

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15070: The response cannot be validated.**

**Cause:** Message does not follow the configuration requirements.

**Action:** Check previous error messages for more information.

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15071: The server is not included in the AudienceRestrictionCondition.**

**Cause:** The value of the provider ID entry in the federations for the identity provider was incorrect.

**Action:** Verify that the federations entry corresponding to the assertion consumer is correct.

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15072: Unknown version in factory request.**

**Cause:** The protocol version sent back from the peer provider is not valid.

**Action:** Verify that the peer provider is configured to the correct protocol version.

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15073: The profile is not supported.**

**Cause:** The profile is not supported or is not enabled.

**Action:** Verify that the profile is supported by Oracle Identity Federation.

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15074: The user authenticated at identity provider is different from the user specified in the request message.**

**Cause:** For security reasons, the user authenticated at the identity provider must be the same user that was specified in the request.

---

**Action:** Verify that the user authenticated at the identity provider is the same user as indicated in the request.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15075: User from existing session ({0}) is different from user received in single sign-on assertion ({1}) for message: {2}.**

**Cause:** The user from the existing session was different than the user in the assertion.

**Action:** Action is not allowed.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15076: Cannot validate the SubjectConfirmation's InResponseTo field with the authentication request for message {0}**

**Cause:** The value of the InResponseTo field did not correspond to an authentication request.

**Action:** Contact administrator, remote server, or Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15078: Unsupported protocol.**

**Cause:** Protocols supported are Liberty 1.x, SAML1.x/2.0 and WS-Federation.

**Action:** Ensure the protocol used is either Liberty 1.x or SAML1.x/2.0 or WS-Federation.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15080: The user previously performed a single sign-on operation with a protocol version ({0}) different from SAML2.0.**

**Cause:** The federation was created with a single sign-on of different protocol version.

**Action:** Single sign-on can only be performed with same protocol version for the particular service provider

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15081: User tried to initiate protocol with a federation belonging to another user.**

**Cause:** User tried to initiate protocol with a federation belonging to another user.

**Action:** Cannot initiate protocol as another user.

---

**Level: 1**

**Type: ERROR**

**Impact: Requests/Responses**

**FED-15086: Multiple users are found during attribute responder operation for name identifier: {0} and name identifier format = {1}.**

**Cause:** Multiple users were present in the user data store which satisfies the search criteria of name identifier value.

**Action:** Check the data store and correct any errors.

**Level: 1**

**Type: WARNING**

**Impact: Requests/Responses**

**FED-15088: Multiple users are found during automatic account linking for name identifier: {0} name identifier format: {1} and message: {2}.**

**Cause:** Multiple users were present in the user data store which satisfies the search criteria of name identifier value.

**Action:** Check the data store and correct any errors.

**Level: 1**

**Type: WARNING**

**Impact: Requests/Responses**

**FED-15089: User was not found during attribute responder operation for name identifier: {0} and name identifier format = {1}.**

**Cause:** User was not present in the user data store which satisfies the search criteria of name identifier value.

**Action:** Check the data store and correct any errors.

**Level: 1**

**Type: WARNING**

**Impact: Requests/Responses**

**FED-15091: User was not found during automatic account linking for name identifier: {0} name identifier format: {1} and message: {2}.**

**Cause:** User was not present in the user data store which satisfies the search criteria of name identifier value.

**Action:** Check the data store and correct any errors.

**Level: 1**

**Type: WARNING**

**Impact: Requests/Responses**

**FED-15092: RegisterNameIdentifier was not successful.**

**Cause:** Status of RegisterNameIdentifier response was in error.

**Action:** Check global name identifier format of this Oracle Identity Federation server or with the uploaded peer provider metadata.

**Level: 1**

**Type: WARNING**

---

**Impact:** Requests/Responses

**FED-15093: A federation for this user does not exist locally: {0}.**

**Cause:** The identity provider sent a federation name identifier, but the federation was not found locally.

**Action:** Enable auto account linking property for SAML20 protocol to create the federation for this user. Enable allow federation creation property to create the federation for this user.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

**FED-15097: The identity provider sent an assertion with version 2.0 different from the existing single sign-on version: {0} with message: {1}.**

**Cause:** Existing session was not of the single sign-on version 2.0.

**Action:** Logout the user to delete the existing session.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

**FED-15099: The wtrealm parameter is empty.**

**Cause:** A WS-Federation signin request was received with an empty wtrealm parameter.

**Action:** Verify that the wtrealm parameter is not empty.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15100: There is no assertion consumer URL in the requester's configuration.**

**Cause:** There was no assertion consumer URL in the requester configuration.

**Action:** Enter the assertion consumer URL of the requester in the Oracle Identity Federation configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15101: WS-Federation protocol is not enabled.**

**Cause:** The WS-Federation protocol was not enabled in the Oracle Identity Federation configuration.

**Action:** Enable the WS-Federation protocol in the Oracle Identity Federation configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15102: Default name identifier format for SAML 1.x assertion cannot be processed: {0}**

---

**Cause:** The default name identifier format cannot be processed.

**Action:** Verify that the default name identifier format is correct in the Oracle Identity Federation configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15103: Default name identifier format for SAML 1.1 assertion cannot be processed: {0}**

**Cause:** The default name identifier format cannot be processed.

**Action:** Verify that the default name identifier format is correct in the Oracle Identity Federation configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15104: The user previously performed a single sign-on operation with a protocol version ({0}) different from WS-Fed 1.1.**

**Cause:** The user previously performed a single sign-on operation with a protocol version other than WS-Federation 1.1

**Action:** No action.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15105: The identity provider sent an assertion with WS-Fed version 1.1 different from the existing single sign-on version: {0}.**

**Cause:** The single sign-on version in the assertion was different than the existing single sign-on version.

**Action:** Verify that the peer provider is configured to the correct protocol version.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

**FED-15106: Multiple users were found during attribute based authentication using NameID mapping for name identifier: {0} name identifier format: {1} and message: {2}.**

**Cause:** Multiple users were present in the user data store which satisfies the search criteria of name identifier value.

**Action:** Check the data store and correct any errors.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

---

**FED-15107: Multiple users were found during attribute based authentication using Attribute mapping for name identifier: {0} name identifier format: {1} and message: {2}.**

**Cause:** Multiple users were present in the user data store which satisfies the search criteria of attribute values.

**Action:** Check the data store and correct any errors.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

**FED-15108: User was not found during attribute based authentication using NameID mapping for name identifier: {0} name identifier format : {1} and message : {2}.**

**Cause:** User was not present in the user data store which satisfies the search criteria of name identifier value.

**Action:** Check the data store and correct any errors.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

**FED-15109: User was not found during attribute based authentication using Attribute Mapping for name identifier: {0} and name identifier format : {1} and message : {2}.**

**Cause:** User was not present in the user data store which satisfies the search criteria of attribute values.

**Action:** Check the data store and correct any errors.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

**FED-15110: User mapping based on name identifier and attribute features are not enabled for attribute based authentication for name identifier: {0} name identifier format: {1} and message: {2}.**

**Cause:** User mapping based on name identifier and attribute features were not enabled for attribute based authentication.

**Action:** Verify that user mapping based on NameID and attribute features are enabled for attribute based authentication.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15111: The message is not a request security token response: {0}.**

**Cause:** The message received from the identity provider was not a Request Security Token Response.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

---

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15112: The message contains an assertion with an empty issuer attribute: {0}.**

**Cause:** The message contained an assertion with an empty issuer attribute.

**Action:** Verify that the peer provider is configured to use the correct provider ID for the issuer.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15113: The action parameter (wa={0}) is not one of the actions currently recognized by the identity provider.**

**Cause:** The value of the action parameter was not one of the values recognized by Oracle Identity Federation.

**Action:** Verify that the peer provider is using the correct version of the WS-Federation protocol.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15114: Unknown WS-Federation request message: {0}**

**Cause:** The WS-Federation Request message contained in the wreq parameter is unknown or incorrect.

**Action:** Contact remote provider.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15115: Error while interacting with remote providers via SOAP protocol.**

**Cause:** An error occurred while sending or receiving a SOAP message to a remote provider.

**Action:** Check with the peer provider.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15116: The identity provider discovery service returned an empty string as the identity provider.**

**Cause:** The discovery service returned the empty string as the identity provider's provider ID.

**Action:** The identity provider's providerID parameter should either be missing or contain a value. Check with the discovery service

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

---

**FED-15117: The identity provider discovery service returned an empty or null refid.**

**Cause:** The discovery service did not include the required refID parameter.

**Action:** Check with the discovery service

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15118: Could not find provider ID for issuer of request.**

**Cause:** Oracle Identity Federation cannot identify the SOAP requester as it did not authenticate via HTTP Basic/SSL Client.

**Action:** Configure OHS so that it protects the SAML 1.x SOAP URL to require HTTP basic authentication or SSL client authentication

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15119: Incoming message does not contain a SAML 1.x Request.**

**Cause:** The incoming SOAP Request does not contain a SAML 1.x request and Oracle Identity Federation was expecting one.

**Action:** Verify that the SOAP Requestor is sending a SAML 1.x Request; verify that the SOAP Requestor is not sending a non SAML 1.x message to the SAML 1.x SOAP URL

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15120: UserID was not sent from user provisioning system.**

**Cause:** Request from user provisioning system does not contain UserID attribute.

**Action:** Verify that request from user provisioning system contains UserID attribute

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15121: Attribute response is malformed.**

**Cause:** The attribute response was malformed.

**Action:** Verify that the attribute response is not malformed.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15122: Unknown identity provider: {0}**

**Cause:** The identity provider is unknown.

**Action:** Verify that the identity provider is in the federations configuration.

**Level:** 1

---

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15123: Invalid subject format for protocol version SAML 1.x**

**Cause:** The subject format was invalid.

**Action:** Verify that the peer provider is using the correct subject format.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15124: Provider federation does not exist for userID: {0}.**

**Cause:** Provider federation has been deleted or the userID is not valid.

**Action:** Check the request or retry.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15125: Single sign-on response was not signed.**

**Cause:** The single sign-on response signature requirements were not met.

**Action:** Verify that a signature was present in the single sign-on response and that Oracle Identity Federation is using the correct certificate for signature validation.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15128: An internal error occurred while processing the credentials**

**Cause:** The authentication engine did not return the required refID parameter.

**Action:** Check that the authentication flow correctly sent the refID parameter to the Oracle Identity Federation server

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15130: AssertionID parameter not present**

**Cause:** The AssertionID was not present in the request.

**Action:** Verify that the AssertionID is set in the request

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15132: Unknown refID**

**Cause:** User previously accessed the Oracle Identity Federation server with a different host name than the one in the current request and cookies were not transmitted.

**Action:** Use the same hostname and fully qualified domain URL to access the Oracle Identity Federation server.

---

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15133: Unknown FedID: {0}**

**Cause:** No federation record exists with specified fedID in the configured federation data store.

**Action:** Check federation data store configuration and verify that federation record with specified fedID exists in data store.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15134: The service provider could not map the identity provider response to a user**

**Cause:** The Oracle Identity Federation service provider was not able to map the response from the identity provider to a user record.

**Action:** Check the message sent from the identity provider and error logs in the service provider.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15135: "Unknown Identity Provider; SuccinctID:{0}"**

**Cause:** The identity provider is unknown.

**Action:** Verify that the identity provider is in the federations configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15136: Unsolicited OpenID Response: {0}**

**Cause:** The OpenID Response received is unsolicited and the OP is not trusted

**Action:** Contact the OP as the Oracle Identity Federation Server does not support unsolicited responses

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15137: Nonce missing from Response**

**Cause:** The Response did not contain a Nonce element

**Action:** Contact the OP

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

---

**FED-15138: The OP sent an authentication response with version OpenID 2.0 different from the existing SSO version: {0} for message: {1}**

**Cause:** Existing session was not of the single sign-on version OpenID 2.0

**Action:** Logout the user to delete the existing session.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

**FED-15139: OpenID Association Failed with ProviderID: {0}**

**Cause:** The OpenID Association operation failed.

**Action:** Check the logs for more detailed error messages, and correct the problem related to the error.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15140: OpenID Signature Verification Failed with ProviderID: {0}**

**Cause:** The Signature Verification of the OpenID Message failed

**Action:** Check the logs for more detailed error messages, and contact the OP

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15141: OpenID Direct Message Verification Failed with ProviderID: {0}**

**Cause:** The OpenID Direct Verification operation failed while validating a response

**Action:** Check the logs for more detailed error messages, and contact the OP

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15142: OpenID XRDS processing failed with ProviderID: {0}**

**Cause:** The XRDS document could not be retrieved

**Action:** Check the logs for more detailed error messages, and contact the OP

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15143: OpenID ClaimedID verification failed against the OP XRDS document for message: {0}**

**Cause:** The XRDS document downloaded from the ClaimedID location does not match the OP's information

**Action:** Check the logs for more detailed error messages, and contact the OP

**Level:** 1

---

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15144: The OpenID RP is unknown**

**Cause:** The OpenID RP is not a known partner: either the RP was not provisioned or Oracle Identity Federation IdP is not configured to interact with Generic OpenID RPs

**Action:** Add the OpenID RP or the configure Oracle Identity Federation IdP to interact with Generic OpenID RPs if needed

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15145: The Federation SSO operation with the Identity Provider partner {0} failed with the following status: top status={1} secondary status={2} and message={3}**

**Cause:** The Federation SSO operation failed to complete.

**Action:** Check the message sent from the identity provider and error logs in the service provider.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15146: OAuth Access Token Request operation failed with partner {0} for the Access Token URL {1}**

**Cause:** The Access Token message exchange failed

**Action:** Check the logs for more detailed error messages and contact the partner

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15147: OAuth Access Token Request operation failed with partner {0} for the resource {1}**

**Cause:** An error occurred while retrieving user data from the partner resource

**Action:** Check the logs for more detailed error messages and contact the partner

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15148: The OAuth Partner sent an authentication response with version OAuth 2.0 different from the existing SSO version: {0} for message: {1}**

**Cause:** Existing session was not of the single sign-on version OAuth 2.0

**Action:** Logout the user to delete the existing session.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

---

**FED-15149: The partner did not return a success response: {0}**

**Cause:** The federation partner returned an error.

**Action:** Check the message and contact if necessary the partner.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-15150: The identity provider sent an assertion with version 1.1 different from the existing single sign-on version: {0} with message: {1}.**

**Cause:** Existing session was not of the single sign-on version 1.1.

**Action:** Logout the user to delete the existing session.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

**FED-15151: Unsolicited OAuth Response: {0}**

**Cause:** The OAuth Response received is unsolicited and the IdP is not trusted

**Action:** Contact the IdP as the Oracle Identity Federation Server does not support unsolicited responses

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FED-18002: The assertion has already been processed: {0}**

**Cause:** The assertion has been replayed.

**Action:** Verify that the assertion is not replayed.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18004: Attribute authority is not trusted.**

**Cause:** The attribute authority is not marked as trusted in the federations.

**Action:** Configure the peer provider as a trusted provider to enable protocol exchanges.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18005: Identity provider is not trusted: {0}**

**Cause:** The identity provider is not marked as trusted in the federations.

**Action:** Verify configuration of the provider in the federations settings of the Oracle Identity Federation configuration.

**Level:** 1

**Type:** ERROR

---

**Impact:** Security

**FED-18006: Message cannot be validated : {0}.**

**Cause:** Incoming message is invalid.

**Action:** Please check previous log entries for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18007: Message has expired or is not yet valid.**

**Cause:** The message validity period has expired.

**Action:** Verify the time settings between this server and the peer provider are synchronized. Alternatively, the server clock drift can be increased in the Oracle Identity Federation configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18008: Message is not signed.**

**Cause:** The message was not signed.

**Action:** Verify that the message is signed.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18010: The service provider is not part of the affiliation.**

**Cause:** The provider is not part of the affiliation.

**Action:** Verify that the provider is part of the affiliation in the federations

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18011: Service provider is not trusted.**

**Cause:** Service provider is not in the federations configuration.

**Action:** Verify configuration of the federations

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18012: Assertion cannot be validated: {0}.**

**Cause:** Assertion could not be validated.

**Action:** Check the message to verify that the assertion is valid, and after check with the peer provider that sent the assertion.

**Level:** 1

**Type:** ERROR

---

**Impact:** Security

**FED-18013: Assertion cannot be validated; confirmation method is missing for message: {0}.**

**Cause:** The confirmation method was missing from the assertion.

**Action:** Check the message to verify that the assertion is valid, and after check with the peer provider that sent the assertion.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18014: Assertion cannot be validated; InResponseTo is missing for message: {0}.**

**Cause:** The InResponseTo attribute was missing from the assertion.

**Action:** Check the message to verify that the assertion is valid, and after check with the peer provider that sent the assertion.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18015: Assertion cannot be validated; recipient is missing for message: {0}.**

**Cause:** The recipient was missing from the assertion.

**Action:** Check the message to verify that the assertion is valid, and after check with the peer provider that sent the assertion.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18016: Assertion cannot be validated; validity time is missing for message {0}.**

**Cause:** The validity time was missing from the assertion.

**Action:** Check the message to verify that the assertion is valid, and after check with the peer provider that sent the assertion.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18017: The AssertionConsumerServiceURL found in the authentication request message cannot be validated.**

**Cause:** URL was not one of the assertion consumer support URL found in the metadata.

**Action:** Verify that the URL is correct.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18018: Assertion has expired or is not yet valid: {0} for message: {1}**

---

**Cause:** The assertion validity period has expired.

**Action:** Verify the time settings between this server and the peer provider are synchronized. Alternatively, the server clock drift can be increased in the admin console.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18020: Authentication request is not signed.**

**Cause:** Authentication request was not signed.

**Action:** Authentication request needs to be signed.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18027: Evaluation of the assertion's conditions failed.**

**Cause:** Assertion conditions were not valid.

**Action:** Check logs for more detailed error messages.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18035: URL query signature verification failed.**

**Cause:** The message or signature may have been tampered with.

**Action:** Contact administrator to investigate transport error or possible security incident.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18038: Signature verification failed.**

**Cause:** The message or signature may have been tampered with.

**Action:** Contact administrator to investigate transport error or possible security incident.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18040: Cannot locate temporary federations.**

**Cause:** The temporary federation did not exist, possibly expired.

**Action:** No Action.

**Level:** 1

**Type:** ERROR

**Impact:** Security

---

**FED-18043: Unexpected recipient: {0} for message: {1}**

**Cause:** The recipient in the assertion did not match the configured provider.

**Action:** Contact remote provider to verify the provider information.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18045: Unsupported liberty version: {0}**

**Cause:** The version of liberty was not supported.

**Action:** The supported versions of liberty are 1.1 and 1.2.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18046: Unknown descriptor type: {0}**

**Cause:** Unknown descriptor type .

**Action:** Contact remote provider for verifying the metadata.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18051: Authentication instant was not sent from the authentication engine.**

**Cause:** The authentication engine did not send an authentication instant.

**Action:** Check the authentication engine implementation.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**FED-18052: Authentication mechanism was not sent from the authentication engine.**

**Cause:** The authentication engine did not send an authentication mechanism.

**Action:** Check the authentication engine implementation.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**FED-18056: Authentication error, the authentication mechanism is not enabled: {0}**

**Cause:** The Authentication Mechanism used to authenticate the user is disabled.

**Action:** A user tried to use a disabled authentication mechanism/engine to login.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18057: Authentication error, the authentication engine is not enabled: {0}**

**Cause:** The Authentication Engine used to authenticate the user is disabled.

---

**Action:** A user tried to use a disabled authentication mechanism/engine to login.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18058: Service provider engine error, the service provider engine is not enabled: {0}**

**Cause:** The service provider engine used to integrate with the AAA server is disabled.

**Action:** Enable the service provider engine.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18059: User from existing session ({0}) is different from user locally authenticated ({1})**

**Cause:** A user already authenticated in Oracle Identity Federation re-authenticated but with a different user ID.

**Action:** Check the user's activity and session status, and report a possible security incident to the administrator.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18060: User has already existing session with SessionID={0} and the authentication engine specified a different SessionID={1}**

**Cause:** A user already authenticated in Oracle Identity Federation with a SessionID that is different from the one specified by the authentication engine

**Action:** Check the authentication engine implementation to be sure that it returns the correct SessionID.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18082: Authentication failed: requested authentication method could not be fulfilled by Identity Provider**

**Cause:** The authentication mechanism needs to be set to fulfill the requested authentication method by Service Provider.

**Action:** Contact the Service provider and set the authentication mechanisms in the Oracle Identity Federation configuration for IdP.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18083: Authentication failed: unknown user attribute for Oracle Access Manager 11g authentication engine: {0}**

---

**Cause:** The Oracle Identity Federation configuration specifies an unknown HTTP Header containing the UserID.

**Action:** Check the Oracle Identity Federation configuration for which HTTP Header used by Oracle Access Manager 11g to hold the UserID is specified.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FED-18084: The Partner is not configured to use the Test SP Engine: {0}**

**Cause:** The partner has not been configured to be used with the Test SP Engine.

**Action:** Configure the Partner.

**Level:** 1

**Type:** ERROR

**Impact:** Security

## FEDSTS-10102 to FEDSTS-20100

**FEDSTS-10102: The LDAP connection settings have not been configured.**

**Cause:** The configuration properties for LDAP connection have not been set.

**Action:** Enter the LDAP connection settings in the Oracle Identity Federation / Oracle Secure Token Service Data Stores configuration..

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FEDSTS-10107: Federation does not exist: cannot complete the requested operation**

**Cause:** Federation does not exist for the user with the peer provider.

**Action:** Verify that the federation exists, or configure the server to create one.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FEDSTS-10146: Could not locate the X.509 certificate for {0}, for use {1}**

**Cause:** The X.509 certificate for the given provider and for the specified use was not found.

**Action:** Check the metadata and the configuration for the given provider.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FEDSTS-10152: LDAP BindDN or password is incorrect.**

**Cause:** The LDAP BindDN or password was configured incorrectly.

**Action:** Check the LDAP configuration entry for BindDN and bind password.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10158: Unable to find the exception handler mapping for the exception {0}.**

**Cause:** ExceptionHandler mapping for this exception was missing in the configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

---

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10159: Unable to find the request handler mapping for this URL {0}.**

**Cause:** RequestHandler mapping for this URL was missing in the configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10160: Unable to find the response handler mapping for this event response {0}.**

**Cause:** ResponseHandler mapping for this EventResponse cannot be found in configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10161: Unable to locate a mapping for {0}.**

**Cause:** Mapping for this class could not be located.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10164: Invalid peer provider configuration for: {0}**

**Cause:** Metadata for this peer provider is invalid.

**Action:** Load metadata for this peer provider.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10168: DiscoveryProvider was not found for {0}.**

**Cause:** A DiscoveryProvider for this type of provider is not configured.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10170: Handler was not found for URL: {0}.**

**Cause:** Handler for this response is missing from configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

---

**Level: 1**

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10174: Property was not found: {0}.**

**Cause:** Property is not set in configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level: 1**

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10175: First package-search-order is used as default package search order.**

**Cause:** Group of package-search-order was found in configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level: 1**

**Type:** WARNING

**Impact:** Configuration

**FEDSTS-10179: Mapping was not defined for action {0}**

**Cause:** Mapping for the specified action was not defined in the configuration.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level: 1**

**Type:** ERROR

**Impact:** Configuration

**FEDSTS-10180: Business Processing Plugin error: {0} does not implement  
OperationListener**

**Cause:** Business Processing Plugin configuration is incorrect.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level: 1**

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10181: Property is not type of Boolean: {0}**

**Cause:** Property was not correctly set in configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level: 1**

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10182: Property is not of type Long: {0}**

**Cause:** Property was not correctly set in configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level: 1**

---

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10183: Property is not of type Set: {0}**

**Cause:** Property was not correctly set in configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10184: Property is not of type List: {0}**

**Cause:** Property was not correctly set in configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10185: Property is not of type Map: {0}**

**Cause:** Property was not correctly set in configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10186: Property is not of type String: {0}**

**Cause:** Property was not correctly set in configuration file.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10203: Property could not be retrieved from the Credential Store**

**Framework:** {0}

**Cause:** The Credential Store Framework did not refresh.

**Action:** Set the credentials again using Enterprise Manager or restart the WLS Managed Server where Oracle Identity Federation / Oracle Secure Token Service is running.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-10208: Namespace missing in Attribute: {0}**

**Cause:** Namespace missing in Attribute configuration.

**Action:** Enter the namespace for the attribute in Attribute mapping

**Level:** 1

---

**Type:** WARNING

**Impact:** Configuration

**FEDSTS-10503: The load of configuration for instance{0} failed for element {1} :{2}**

**Cause:** The configuration file may be invalid or the instance and element may not be present

**Action:** Check the configuration file for validity and make sure the instance and the element exist

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**FEDSTS-10508: Oracle Identity Federation / Oracle Secure Token Service is disabled**

**Cause:** The Oracle Identity Federation / Oracle Secure Token Service is disabled

**Action:** Check the configuration and enable Oracle Identity Federation / Oracle Secure Token Service if required

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Configuration

**FEDSTS-11005: Error while deserializing data, mismatched classes while reading database records: expected {0}, got {1}**

**Cause:** The data could not be deserialized.

**Action:** Check that the entry contains valid data.

**Level:** 1

**Type:** ERROR

**Impact:** Data

**FEDSTS-11008: RequestHandlerMapping {0} already exists.**

**Cause:** RequestHandlerMapping was already present.

**Action:** No Action.

**Level:** 1

**Type:** WARNING

**Impact:** Data

**FEDSTS-11009: ResponseHandlerMapping {0} already exists.**

**Cause:** ResponseHandlerMapping was already present.

**Action:** No Action.

**Level:** 1

**Type:** WARNING

**Impact:** Data

**FEDSTS-11010: Replacement RequestHandlerMapping is: {0}.**

**Cause:** RequestHandlerMapping was replaced with the new RequestHandlerMapping.

**Action:** No Action.

---

**Level:** 1

**Type:** WARNING

**Impact:** Data

**FEDSTS-11011: Replacement ResponseHandlerMapping is: {}.**

**Cause:** ResponseHandlerMapping was replaced with the new ResponseHandlerMapping.

**Action:** No Action.

**Level:** 1

**Type:** WARNING

**Impact:** Data

**FEDSTS-11013: SQL error while interacting with the database.**

**Cause:** SQL query may not have been properly formed.

**Action:** Check log entries and database connection configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Data

**FEDSTS-11014: Could not add an SQL operation to the Batch Queue**

**Cause:** The SQL operation could not be added because the batch queue might be full

**Action:** Tune the RBDMS, the JDBC Datasource and the queue settings

**Level:** 1

**Type:** ERROR

**Impact:** Data

**FEDSTS-11700: Cannot connect to the LDAP server.**

**Cause:** The LDAP credentials were incorrect.

**Action:** Verify the LDAP credentials in the Oracle Identity Federation / Oracle Secure Token Service configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Network

**FEDSTS-11703: Exception while trying to connect to LDAP server.**

**Cause:** Oracle Identity Federation / Oracle Secure Token Service could not open a connection to the LDAP server.

**Action:** Verify the connection settings in the Oracle Identity Federation / Oracle Secure Token Service configuration and that LDAP server is up.

**Level:** 1

**Type:** ERROR

**Impact:** Network

**FEDSTS-11704: Cannot close LDAP connection.**

---

**Cause:** Problem while closing the LDAP connection.

**Action:** Check the LDAP server logs.

**Level:** 1

**Type:** WARNING

**Impact:** Network

**FEDSTS-12000: XML time value is empty.**

**Cause:** An empty string was passed in as an XML time value attribute.

**Action:** Verify that none of the time value attributes are empty.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12003: Unsupported handler parameter type: {0}**

**Cause:** Parameter type was not supported.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Other

**FEDSTS-12007: Data Object {0} is no longer valid.**

**Cause:** Object was destroyed.

**Action:** No Action.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**FEDSTS-12009: Multiple certificates are found for the public key, attempting to select a valid one.**

**Cause:** Multiple certificates were present in the certificate store.

**Action:** No Action.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**FEDSTS-12010: Previous RequestHandlerMapping is replaced with the new RequestHandlerMapping for URL {0}.**

**Cause:** New RequestHandlerMapping was found for this URL.

**Action:** No Action.

**Level:** 1

**Type:** WARNING

**Impact:** Other

---

**FEDSTS-12011: Previous ResponseHandlerMapping is replaced with the new ResponseHandlerMapping for URL {0}.**

**Cause:** New ResponseHandlerMapping was found for this URL.

**Action:** No Action.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**FEDSTS-12012: Unsupported type for attribute value {0}, type={1}**

**Cause:** One of the retrieved values for the attribute was of an unsupported type.

**Action:** No Action.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**FEDSTS-12013: Discovery Create Exception: unable to create object in the repository: {0}**

**Cause:** Unable to create a data object in the repository.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12014: Discovery Finder Exception: unable to locate object in the repository: {0}**

**Cause:** Unable to locate a data object in the repository.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12015: Federation Exception: error while accessing or creating the federation record of a user: {0}**

**Cause:** An error occurred while accessing or creating the federation record of a user.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12017: Communication Exception: unable to communicate with directory or naming service: {0}**

**Cause:** Could not communicate with directory or naming service.

---

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12018: Duplicate Entry Exception: duplicate entry in the data store: {0}**

**Cause:** There was a duplicate entry in the data store.

**Action:** Check the data store for duplicate entries.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12026: No Such Algorithm Exception: cryptographic algorithm was not recognized: {0}**

**Cause:** JCE provider was incorrectly configured.

**Action:** Check that the JCE provider is configured correctly.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12028: Notification Processing Exception: could not call the notifier: {0}.**

**Cause:** Could not process the notification.

**Action:** Please check any plugins or listeners, or contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12029: Attribute Processing Exception: error when processing attributes for mapping and filtering: {0}**

**Cause:** Could not process attributes for mapping and filtering.

**Action:** Check the configuration for assertion attribute mapping and filtering.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12030: IOException: {0}**

**Cause:** There was an error during Input/Output an operation.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

---

**FEDSTS-12031: NamingException: error while interacting with an LDAP server or JNDI module**

**Cause:** There was an error during interaction with an LDAP or JNDI module

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12032: InterruptedException: thread interrupt occurred during sleep() {0}**

**Cause:** Thread interrupt occurred during sleep() method.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**FEDSTS-12033: Invocation Target Exception: error while invoking method {0}**

**Cause:** There was an error while invoking a method.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12034: No Such Method Exception: a particular method could not be found {0}**

**Cause:** There was an error while finding a method.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12036: Persistence Exception: error while creating or modifying data in the backend store {0}**

**Cause:** Could not create or modify data in the backend store.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12040: Unsupported Encoding Exception: {0}**

**Cause:** The specified character encoding was not supported.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

---

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12041: Unknown Provider Exception: {0}**

**Cause:** The specified peer provider was not known.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12043: Discovery Registration Exception: {0}**

**Cause:** An error occurred while registering a Discovery Provider.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12044: No Such Discovery Provider Exception: {0}**

**Cause:** Could not find the specified Discovery Provider.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12045: Parser Configuration Exception: {0}**

**Cause:** An error occurred while parsing an XML document.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12046: Parser Configuration Exception: {0}**

**Cause:** An error occurred while parsing.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12047: SAX Exception: {0}**

---

**Cause:** An error occurred while handling XML documents.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12048: SOAP Exception: {0}**

**Cause:** An error occurred while handling SOAP messages.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12049: Event Exception: {0}**

**Cause:** An error occurred while processing an Event.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12050: Action Listener Init Exception: {0}**

**Cause:** An error occurred during Action Listener initialization.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12051: Mapping Exception: {0}**

**Cause:** An error occurred while accessing handler mappings.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12052: No Such Target Exception: {0}**

**Cause:** An error occurred while setting up handler mappings.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

---

**Type:** ERROR

**Impact:** Other

**FEDSTS-12053: SAX Parse Exception: {0}**

**Cause:** An error occurred while parsing an XML document.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12054: Malformed URL Exception: {0}**

**Cause:** Either no legal protocol could be found in a specification string or the string could not be parsed.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12055: No Such Mapping Exception: {0}**

**Cause:** Could not find the handler mapping.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12056: Class Not Found Exception: {0}**

**Cause:** Tried to load class with specified name but could not find definition for such class.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12057: Instantiation Exception: {0}**

**Cause:** Tried to load an interface or an abstract class.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12058: Illegal Access Exception: {0}**

---

**Cause:** Tried to use a field, method, or constructor using reflection, whose definition is not accessible.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12059: Action Registry Exception: {0}**

**Cause:** An error occurred while registering Action Listener.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12060: Service Locator Exception: {0}**

**Cause:** Could not allocate Service Locator.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12061: Algorithm Identifier Exception: {0}**

**Cause:** Inappropriate or unsupported parameters were provided to an algorithm, or an unknown algorithm was requested.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12062: Audit Exception: {0}**

**Cause:** An error occurred while auditing an event.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12063: OPSS Exception: {0}**

**Cause:** An error occurred while using Oracle Platform Security Services libraries.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

---

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12064: Exception: {0}**

**Cause:** An error occurred.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12065: Target Exception: {0}**

**Cause:** An error occurred while handling the Target of a Servlet handler.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12066: Servlet Exception: {0}**

**Cause:** An error occurred while initializing or using Servlet.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12067: An HTTP error occurred during SOAP Exchange.**

**Cause:** An HTTP error occurred in SOAP Exchange.

**Action:** Check Oracle Identity Federation / Oracle Secure Token Service logs for HTTP error code.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12069: Length of input exceeds maximum.**

**Cause:** Length of input exceeds maximum allowed length.

**Action:** Check that the incoming request is correctly formatted.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12070: No HTTP Message Sender Created**

**Cause:** Could not create the http message sender.

---

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information. Check that http client jar is in the classpath.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12071: A Directory error occurred**

**Cause:** An error occurred while interacting with the Identity Provider module

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12074: PrivilegedActionException: {0}**

**Cause:** PrivilegedExceptionAction while validating Kerberos Token

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12075: LoginException: {0}**

**Cause:** A LoginException occurred while validating kerberos token

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12076: SmeSessionTimeoutException: {0}**

**Cause:** SME session timed out

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12077: Illegal Argument Exception: {0}**

**Cause:** The specified object argument is illegal

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

---

**Impact:** Other

**FEDSTS-12078: Library Exception: {0}**

**Cause:** An exception occurred while creating library instance

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12079: ResponseHandlerException: {0}**

**Cause:** An exception occurred for the response handler in the library instance

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12080: RequestHandlerException: {0}**

**Cause:** An exception occurred for the request handler in the library instance

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12082: Error while initializing session and user attribute value providers.**

**Cause:** Unknown error while initializing attribute value providers

**Action:** Check logs and take appropriate action.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**FEDSTS-12083: Error while tokenizing attribute value expression.**

**Cause:** Invalid attribute value expression.

**Action:** Fix the attribute value expression to contain valid tokens.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12084: Error while translating attribute value expression.**

**Cause:** Invalid attribute value expression.

**Action:** Fix the attribute value expression to contain valid tokens.

**Level:** 1

**Type:** ERROR

---

**Impact:** Other

**FEDSTS-12503: Certificate Exception: {0}.**

**Cause:** A certificate exception occurred, indicating a problem with one of the certificates.

**Action:** Check logs and exception message for more information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-12523: Crypto Exception: {0}.**

**Cause:** A crypto exception has occurred during token issuance.

**Action:** Check logs and exception message for more information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**FEDSTS-13003: Remove operation not supported.**

**Cause:** The Iterator method remove() was invoked, but is not supported by the implementation.

**Action:** Replace the remove operation with alternate remove option.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**FEDSTS-13004: EntrySet operation not supported.**

**Cause:** The SoftHashMap method entrySet() was invoked, but is not supported by the implementation.

**Action:** Replace the call to entrySet() with alternate option.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**FEDSTS-13006: Internal Error: Unable to register {0} as a provider for {1}**

**Cause:** Unable to register Discovery Provider.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**FEDSTS-13009: Cannot have an empty response name.**

**Cause:** Response name was empty.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

---

**Type:** INCIDENT\_ERROR

**Impact:** Programmatic

**FEDSTS-13010: Cannot locate class with root name of {0}**

**Cause:** Could not locate class.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Programmatic

**FEDSTS-13011: Deregistering object failed.**

**Cause:** Deregistered object does not match expected object.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Programmatic

**FEDSTS-13013: Internal Server Error**

**Cause:** Internal Server Error

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Programmatic

**FEDSTS-13014: Servlet cannot be configured.**

**Cause:** Servlet configuration failed.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Programmatic

**FEDSTS-13017: Initializing {0}**

**Cause:** An internal error has occurred.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Programmatic

**FEDSTS-13022: Metric End event occurred for event {0} before respective event start**

**Cause:** End/Abort event occurred before respective start event

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service logs for more specific information.

**Level:** 1

---

**Type:** NOTIFICATION

**Impact:** Programmatic

**FEDSTS-15002: Cannot find User for UserID {0} in User Data Store.**

**Cause:** The user ID was incorrect or the user record does not exist.

**Action:** Verify that the user ID is correct.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15003: No value in user record for NameIDPolicy requested: {0}**

**Cause:** There was no value for the requested name identifier type.

**Action:** Verify that name identifier is correct and that the attribute for the requested name identifier exists.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15040: SSL client certificate required to access SOAP service URL**

**Cause:** No SSL Certificate was presented when accessing the SOAP service.

**Action:** Contact the client to notify that an SSL Certificate is required when accessing the SOAP service.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15046: Unexpected confirmation method: {0} for message: {1}**

**Cause:** Oracle Identity Federation / Oracle Secure Token Service did not recognize the specified confirmation.

**Action:** Check that the confirmation method included in the Assertion is valid.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15048: Unknown condition in assertion: {0}.**

**Cause:** Oracle Identity Federation / Oracle Secure Token Service did not recognize the specified condition.

**Action:** Check that the condition included in the assertion is valid.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15049: The contents of the SOAP request body are null. Closing the connection.**

**Cause:** The Oracle Identity Federation / Oracle Secure Token Service server encountered an error while trying to deserialize the incoming message.

---

**Action:** Check that the message is correctly formatted.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15052: A time value is invalid**

**Cause:** A string was passed in as a time value that was in an invalid format.

**Action:** Verify that all of the time value attributes are in the correct format.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15056: Invalid version number: {0}**

**Cause:** The version format was incorrect.

**Action:** Verify that the version format is correct. Version should consist of a major part and a minor part separated by a period.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15057: Invalid version: {0}, majorVersion={1}, minorVersion={2}**

**Cause:** Either the major or the minor version was negative.

**Action:** Verify that both the major and minor versions are non-negative.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15058: Error while processing the SOAP envelope.**

**Cause:** Oracle Identity Federation / Oracle Secure Token Service could not process the incoming SOAP envelope.

**Action:** Check that the SOAP envelope format is correct.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15060: Unknown message parameter: {0}**

**Cause:** One of the message parameters was not recognized.

**Action:** Verify that all of the message parameter names are recognized by Oracle Identity Federation / Oracle Secure Token Service.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15083: There is no value for a parameter.**

**Cause:** Parameter was sent without a value.

---

**Action:** Ensure that the parameters are passed with valid value.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Requests/Responses

**FEDSTS-15084: The response handler expects an event response that implements Target.**

**Cause:** EventResponse object was not of the type Target.

**Action:** Pass EventResponse object of the type Target to the response handler.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Requests/Responses

**FEDSTS-15085: Throwing a runtime exception.**

**Cause:** An internal error has occurred.

**Action:** Contact Oracle Support Services to rectify the issue.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Requests/Responses

**FEDSTS-15098: Unknown condition ignored: {0}.**

**Cause:** Peer provider sent a message which contains unknown conditions in the message.

**Action:** Check with the peer provider.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

**FEDSTS-15131: Certificate was missing when trying to verify digital signature.**

**Cause:** Certificate missing when trying to verify incoming signature.

**Action:** Verify that the requester specified its identity when making the request, either in the message or by authenticating to the Oracle Identity Federation / Oracle Secure Token Service server via SSL or HTTP Basic Authentication

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15536: Certificate Validation failed for certificate {0}**

**Cause:** The certificate could not be validated

**Action:** Check the certificate and/or add the necessary Trust Anchor

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15539: The partner identified by {0} is unknown**

---

**Cause:** The referenced entity is not a partner

**Action:** Create a partner entry if necessary

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15540: The partner is not trusted: {0}**

**Cause:** The partner is not marked as trusted

**Action:** Verify the configuration of the partner

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**FEDSTS-15542: The mapping of the AppliesTo element from the WS-Trust Request to a Relying Party Partner failed: could not map {0}**

**Cause:** The location referenced in the AppliesTo element could not be mapped to Resource URL of one of the Relying Party Partners defined in Oracle Identity Federation / Oracle Secure Token Service

**Action:** If the location referenced in the AppliesTo element should have been mapped to a Relying Party Partner then verify that the Resource URLs defined for this Partner in Oracle Identity Federation / Oracle Secure Token Service are correct.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Requests/Responses

**FEDSTS-18003: Assertion is not signed.**

**Cause:** The assertion was not signed.

**Action:** Verify that the assertion was signed.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18009: Provider is unknown: {0}**

**Cause:** The provider is not known.

**Action:** Verify that the provider exists in the list of federations

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18026: Error while reading the client SSL certificate**

**Cause:** Client SSL certificate is corrupt.

**Action:** Obtain a new client SSL certificate.

**Level:** 1

---

**Type:** ERROR

**Impact:** Security

**FEDSTS-18034: Untrusted server certificate chain.**

**Cause:** Certificate Authority certification keystore in JRE did not contain the Certificate Authority certificate.

**Action:** Add the Certificate Authority certificate of the LDAP server to the Certificate Authority certs keystore of the JRE.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18041: Illegal UTF encoding**

**Cause:** The UTF encoding was not supported.

**Action:** Verify the UTF encoding to be a valid one.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18047: Certificate {0} is replaced with the certificate {1}.**

**Cause:** Old certificate was replaced with the newer one.

**Action:** Ensure correct certificate is uploaded for normal functioning of the Oracle federation server.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**FEDSTS-18048: The certificate corresponding to the private key is expired: {0}**

**Cause:** The certificate was expired.

**Action:** Use the certificate with the correct validity period.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**FEDSTS-18049: Public key algorithm is not known:{0}.**

**Cause:** Public key algorithm was unknown.

**Action:** Use the correct certificate with the correct public key algorithm.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**FEDSTS-18050: User is not authenticated.**

**Cause:** User was not authenticated.

**Action:** Login to the server using the correct user.

**Level:** 1

---

**Type:** WARNING

**Impact:** Security

**FEDSTS-18055: Unknown pseudo-random number generator configured. Using Java default.**

**Cause:** Default pseudo-random number generator configured is unknown.

**Action:** No Action.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Security

**FEDSTS-18066: Authentication failed**

**Cause:** The authentication process failed, the credentials could not be validated.

**Action:** Check the connection settings.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**FEDSTS-18073: An error occurred during a cryptographic operation: {0}**

**Cause:** The Oracle Identity Federation / Oracle Secure Token Service encountered an error while invoking the crypto engine for signature creation/verification, encryption/decryption operations.

**Action:** Check the logs for more detailed error messages, and correct the problem related to the error.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18074: Signature verification failed for provider ID {0}**

**Cause:** The signature might be have been spoofed.

**Action:** Contact Administrator to verify

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18075: Decryption operation failed for message sent by provider ID {0}**

**Cause:** The message is not intended for Oracle Identity Federation / Oracle Secure Token Service.

**Action:** Contact Administrator to verify

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18076: Security services exception: {0}**

**Cause:** An error occurred while verifying/signing/encrypting/decrypting a message.

---

**Action:** Please check previous log entries for more specific information.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18077: XML decryption error: EncryptedData element not found**

**Cause:** The XML EncryptedData element was not found when trying to decrypt the incoming data.

**Action:** Check the message and contact the remote server administrator if necessary.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18078: XML decryption error: could not get the decryption secret key**

**Cause:** The key to decrypt the EncryptedData element could not be retrieved.

**Action:** Check the message and contact the remote server administrator if necessary.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18079: The return URL could not be validated: {0}**

**Cause:** The specified return URL could not be validated against the list of approved hostnames/domains.

**Action:** Check if the return URL points to a valid host name/domain, and update if necessary the list of approved host names/domains. If the return URL is not recognized or invalid, do not update the list of approved host names/domains.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18080: Could not retrieve key from the key store. Please verify that the key password is equal to the key store password.**

**Cause:** Invalid key or key password is not equal to the key store password.

**Action:** Verify that the key is valid and the key password is equal to the key store password.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-18081: Authentication Failed - HTTP Header not set in order to authenticate the user**

**Cause:** The HTTP Header was not set in order to authenticate the user.

---

**Action:** Check the User's browser, Agent used in the deployment, the Oracle Identity Federation / Oracle Secure Token Service configuration and whether or not the user was authenticated by the Web Access Management

**Level:** 1

**Type:** ERROR

**Impact:** Security

**FEDSTS-20000: Cannot open the key store.**

**Cause:** Invalid or unsupported key store, or incorrect password. During installation, this error is expected.

**Action:** Verify that password is correct and the store is a valid PKCS #12 PFX wallet or Java KeyStore file. During installation, this error can be ignored.

**Level:** 1

**Type:** ERROR

**Impact:** Session

**FEDSTS-20100: The Oracle Identity Federation / Oracle Secure Token Service transient data store cleanup process was unexpectedly terminated.**

**Cause:** The cleanup process could not connect the Oracle Identity Federation / Oracle Secure Token Service transient data store, or an error occurred while destroying expired entries.

**Action:** Check the Oracle Identity Federation / Oracle Secure Token Service transient data store.

**Level:** 1

**Type:** ERROR

**Impact:** Threads

## OAAM-00000 to OAAM-94100

**OAAM-00000: Invalid message.**

**Cause:** Unable to find message definition.

**Action:** Report to administrator.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-00001: A system internal error occurred. The system cannot complete the operation at this time.**

**Cause:** A system internal error occurred. The error may be the result of a constraint or the unavailability of resources.

**Action:** Try again. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-00002: The operation is not allowed.**

**Cause:** The user may not have sufficient privileges.

**Action:** Report to the administrator about insufficient privileges.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-00003: Database error.**

**Cause:** The database may not be available.

**Action:** Try again. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-00004: Insufficient context data. Required: {0}.**

**Cause:** The expected context information is not provided.

---

**Action:** Report to the administrator about the insufficient context data.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-00005: Database error. Exception message is {0}.**

**Cause:** The error may have resulted from the unavailability of the database or a database querying exception.

**Action:** Report the database error message to the administrator.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-01001: Property name is required.**

**Cause:** The property name is missing from the data.

**Action:** Make sure that the property name is provided for the operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-01002: Property value is required.**

**Cause:** The property value is missing from the data.

**Action:** Make sure the property value is provided for the operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-01003: Property with name {0} already exists.**

**Cause:** The property with the name already exists.

**Action:** Use a different property name and try again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-01004: Property with name {0} does not exist.**

**Cause:** The property with the name was not found in the system.

**Action:** Make sure the property name provided is correct and then retry the operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-01005: Property search query is required to search properties.**

**Cause:** The property search query was not provided for the search.

---

**Action:** Make sure that the valid property search query is provided.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-01006: Cannot delete property {0} because it is a {1} type of property.**

**Cause:** Property cannot be deleted. System- and file-based properties cannot be deleted. Only properties saved in the database can be deleted.

**Action:** System-based properties cannot be deleted. Only properties saved in the database and files can be deleted.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-01007: Cannot modify property {0} because it is a {1} type of property.**

**Cause:** Property cannot be changed. System-based properties cannot be changed. Only properties saved in the database and files can be changed.

**Action:** System-based properties cannot be changed. Only properties saved in the database and files can be changed.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-01101: Object type was not specified for finding usage.**

**Cause:** The required object type was not specified for finding usage.

**Action:** The object type must be specified to find the usage information. Specify non-null integer value and retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-01102: Object unique key was not specified for finding usage.**

**Cause:** The required object unique key (primary key) was not specified for finding usage.

**Action:** The object unique (primary) key must be specified to find the usage. Specify a non-null long value and retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-01103: Usage cannot be computed for object type {0}.**

**Cause:** Usage API supports certain types of objects. The specified object is not specified by the Usage API.

**Action:** Specify the object type, which can be referenced by other objects in the system.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-01104: Usage information for the primary object of type {0} with a unique ID of {1} cannot be determined.**

**Cause:** Usage API is trying to find the usage of an object that does not exist.

**Action:** A unique ID of the object was provided, which was not found in the system. Make sure that the unique ID and the object are correct and retry this operation.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-10011: Valid Application name or user group name is required.**

**Cause:** null

**Action:** null

**Level: 1**

---

Type: ERROR

Impact: Process

**OAAM-10301: Note cannot be null or empty.**

Cause: Note cannot be null or empty string.

Action: Provide a valid note.

Level: 1

Type: ERROR

Impact: Process

**OAAM-10302: Closed case {0} cannot be escalated.**

Cause: Closed case {0} cannot be escalated.

Action: Reopen the closed case before trying to escalate it.

Level: 1

Type: ERROR

Impact: Process

**OAAM-10303: The Case {0} is not a CSR case; therefore, it cannot be escalated.**

Cause: The Case {0} is not a CSR case; therefore, it cannot be escalated.

Action: The case type for case {0} should be changed to CSR for escalation.

Level: 1

Type: ERROR

Impact: Process

**OAAM-10304: Query cannot be null.**

Cause: Query cannot be null.

Action: Provide a valid query object.

Level: 1

Type: ERROR

Impact: Process

**OAAM-10305: No query expression found.**

Cause: No query expression found.

Action: Provide the required parameters for the query expression.

Level: 1

Type: ERROR

Impact: Process

**OAAM-10306: No records found.**

Cause: No records found.

Action: Change the criteria before performing the operation.

Level: 1

Type: ERROR

Impact: Process

---

**OAAM-10307: No linked sessions found.**

**Cause:** No linked sessions found.

**Action:** For the given case, no linked sessions were found.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-10308: No sessions to link.**

**Cause:** No sessions to link.

**Action:** Provide sessions to link.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-10309: No sessions to unlink.**

**Cause:** No sessions to unlink.

**Action:** Provide sessions to unlink.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11111: User not authorized to access the method {0}.**

**Cause:** User is not authorized to access the method {0}.

**Action:** Retry accessing the method {0} with valid authorization.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11112: Session ID of Admin users is required for case action.**

**Cause:** Session ID was not provided for performing the case action.

**Action:** Retry the same case action and provide the valid Admin user Session ID for that API call.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11113: Choose the action template for creating action instance.**

**Cause:** Action template was not provided for performing the action instance creation.

**Action:** Retry the same action instance creation by choosing valid action template.

**Level:** 1

**Type:** ERROR

**Impact:** Process

---

**OAAM-11114: Subaction ID is required for case action.**

**Cause:** Subaction was not provided for performing the case action.

**Action:** Retry the same case action and provide the valid Subaction ID for that API call. The Subaction ID is the case action enumeration.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11115: New status required for case change status action.**

**Cause:** New status was not provided for performing the change status case action.

**Action:** Retry the same case action and provide the valid new status (Integer object) for that API call. New status is the case status enumeration.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11116: Reopen the closed case before trying to edit: Case ID {0}**

**Cause:** The case is in the Closed state. In this state, the case disposition or expiration cannot change.

**Action:** The case is closed. In the Closed state, the disposition, severity, or expiration cannot be changed. To change these attributes, change the status of the case along with new severity, expiration time, or disposition

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11117: Case with ID {0} is expired. It cannot be edited.**

**Cause:** The case is in the Expired state. In this state, the case disposition or expiration date cannot be changed.

**Action:** The case is expired, and in the Expired state, its disposition, severity, or expiration cannot be changed. Reopen the case first and then try this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11120: Case reset action cannot be completed because: {0}.**

**Cause:** Case reset action cannot be performed because of the reason provided by the error message.

**Action:** Retry the same case action after fixing the issue.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11121: Challenge question-related case action cannot be performed because: {0}.**

---

**Cause:** Challenge question-related case action cannot be performed because of the reason provided by the error message.

**Action:** Retry the same case action after fixing the issue.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11122: The customer's registration profile is not active and hence cannot be reset.**

**Cause:** The customer's registration profile have already been reset.

**Action:** Cannot reset customer's registration profile since they are not active.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11123: Cannot reset user's image, as it is not set.**

**Cause:** User does not have the image set.

**Action:** Cannot reset the user's image because the user is not registered or the image is not active for the user.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11124: Cannot reset the user's phrase, as it is not set.**

**Cause:** The user does not have a phrase set.

**Action:** Cannot reset the user's phrase because either the user is not registered or the phrase is not active for the user.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11125: OTP reset action cannot be performed with cases that are not CSR cases.**

**Cause:** For OTP reset actions that are performed with cases, the case has to be a CSR case. OTP reset cannot be performed with a case of any other type.

**Action:** Create a CSR case for the user and then try to do the OTP-related resets.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11126: OTP reset action cannot be performed with case in an incorrect state.**

**Cause:** For OTP reset actions that are performed with cases, the case has to be in the correct state. An OTP reset cannot be performed with a case in the Closed, Escalated, or Expired state.

**Action:** Change the state of the case to Open, New, or Pending and then retry the operation.

---

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11127: OTP reset profile attempted for user who does not have OTP profile enabled.**

**Cause:** The user's OTP profile is not enabled. For such users, the OTP profile reset cannot be performed.

**Action:** Make changes to the user's preferences to register the OTP profile and then try this operation again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11129: OTP reset keypad attempted for user who does not have OTP keypad enabled.**

**Cause:** The user's OTP keypad is not enabled. For such users, the OTP keypad reset cannot be performed.

**Action:** Make the changes to the users preferences to register the OTP keypad and then try this operation again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11130: Authentication pad is already reset.**

**Cause:** Authentication pad is already reset.

**Action:** No action required to reset.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11131: OTP failure counter for user is already in reset state. It may be possible that the user does not OTP enabled.**

**Cause:** The user's OTP failure counter is already at zero. It is already in reset state. For such users, an OTP failure counter reset cannot be performed.

**Action:** Make sure that the user is registered for OTP and that the OTP failure counter is not at zero.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-11132: OTP reset cannot be performed at this time because of an error. Try the reset again.**

**Cause:** The OTP reset operation experienced a system error. Try the operation again.

**Action:** The OTP reset encountered an error. Make sure the user is registered for OTP and try the operation again.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-11133: Access to link specified sessions to case is denied.**

**Cause:** Attempt was made to link the sessions of some users for which the agent does not have access.

**Action:** Add the administrative user to the user group in the security set up for the OAAM administrative application.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-11134: User does not access to create a case for user belonging to user group {0}.**

**Cause:** Attempt was made to create a case for user belonging to the user group for which the administrative user does not have access.

**Action:** Add the administrative user to the user group in the security set up for the OAAM administrative application.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-15001: Enter Organization ID and User name, or only User ID.**

**Cause:** A combination of Organization ID and User name or User ID are allowed.

**Action:** Enter Organization ID and User name, or User ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-15002: Organization ID is required.**

**Cause:** Organization ID is not entered.

**Action:** Enter Organization ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-15100: An attempt was made to change the status of expired cases. Select an extension duration to continue.**

**Cause:** The status of expired cases cannot be changed.

**Action:** Select an extension duration so that the cases are no longer expired. Then, change the status.

**Level: 1**

**Type: ERROR**

**Impact: Process**

---

**OAAM-15101: An attempt was made to extend the expiration of a closed case. Select a status other than close to continue.**

**Cause:** null

**Action:** null

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20000: Policy name cannot be null or empty.**

**Cause:** Policy name cannot be null or empty.

**Action:** Provide a valid policy name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20001: Policy weight must be between {0} and {1}.**

**Cause:** Policy weight must be between {0} and {1}.

**Action:** Ensure that the policy weight is between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20002: Policy description cannot be null or empty.**

**Cause:** Policy description cannot be null or empty.

**Action:** Provide a valid policy description.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20003: A policy with name {0} already exists.**

**Cause:** A policy with name {0} already exists.

**Action:** A policy with name {0} exists. Use a different name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20004: Policy ID cannot be null.**

**Cause:** Policy ID cannot be null.

**Action:** Provide a non-null Policy ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20005: Policy with Policy ID {0} does not exist.**

---

**Cause:** Policy with Policy ID {0} does not exist.

**Action:** Provide a valid Policy ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20009: Rule ID cannot be null.**

**Cause:** Rule ID cannot be null.

**Action:** Provide a non-null Rule ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20010: Rule with the given ID not found.**

**Cause:** Rule with the given ID not found.

**Action:** Provide a valid Rule ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20011: Profile rule map for the given Map ID not found.**

**Cause:** Profile rule map for the given Map ID not found.

**Action:** Provide a valid profile rule Map ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20012: Profile for the given Map ID not found.**

**Cause:** Profile for the given Map ID not found.

**Action:** Provide a valid Map ID with profile.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20013: Profile Rule Map ID cannot be null.**

**Cause:** Profile Rule Map ID cannot be null.

**Action:** Provide a non-null Profile Rule Map ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20014: Rule Condition Map ID cannot be null.**

**Cause:** Rule Condition Map ID cannot be null.

**Action:** Provide a non-null Rule Condition Map ID.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20015: Rule parameter value not found.**

**Cause:** Rule parameter value not found.

**Action:** Provide a valid Map ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20016: Rule parameter not found.**

**Cause:** Rule parameter not found.

**Action:** Provide a valid Map ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20017: The following policies depend on some of the policies being deleted: {0}.**

**Cause:** The following policies depend on some of the policies being deleted: {0}.

**Action:** Remove the dependency. The policies cannot be deleted until the dependency is removed.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20018: Rule parameter value was not found for the given rule parameter. The rule may not work as expected unless the error is fixed.**

**Cause:** Rule parameter value was not found for the given rule parameter.

**Action:** When a rule is added to a policy, the value of each rule parameters is kept. The system was not able to find a corresponding value for the rule parameter in the policy data. Verify the rule and its details. Make sure the migration had no errors if this rule had been migrated from the previous release.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20019: Rule name cannot be null.**

**Cause:** Rule name cannot be null.

**Action:** Provide a valid rule name.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20020: Rule description cannot be null.**

---

**Cause:** Rule description cannot be null.

**Action:** Provide a valid rule description.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20021: Rule score must be between {0} and {1}.**

**Cause:** Rule score must be between {0} and {1}.

**Action:** Provide a rule score value between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20022: Rule weight must be between {0} and {1}.**

**Cause:** Rule weight must be between {0} and {1}.

**Action:** Provide a rule weight between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20023: Minimum device score must be between {0} and {1}.**

**Cause:** The minimum device score must be between {0} and {1}.

**Action:** Provide a minimum device score between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20024: Maximum device score must be between {0} and {1}.**

**Cause:** The maximum device score must be between {0} and {1}.

**Action:** Provide a maximum device score between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20025: Maximum device score must not be less than the minimum device score.**

**Cause:** The maximum device score must not be less than the minimum device score.

**Action:** Provide a maximum device score that is more than or equal to the minimum device score.

**Level:** 1

**Type:** ERROR

**Impact:** Process

---

**OAAM-20026: Minimum country score must be between {0} and {1}.**

**Cause:** Minimum country score must be between {0} and {1}.

**Action:** Provide a minimum country score value between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20027: Maximum country score must be between {0} and {1}.**

**Cause:** Maximum country score must be between {0} and {1}.

**Action:** Provide a maximum country score value between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20028: Maximum country score must not be less than minimum country score.**

**Cause:** Maximum country score must not be less than minimum country score.

**Action:** Provide a maximum country score that is more than or equal to the minimum country score.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20029: Minimum state score must be between {0} and {1}.**

**Cause:** Minimum state score must be between {0} and {1}.

**Action:** Provide a minimum state score value between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20030: Maximum state score must be between {0} and {1}.**

**Cause:** Maximum state score must be between {0} and {1}.

**Action:** Provide a maximum state score value between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20031: Maximum state score must not be less than the minimum state score.**

**Cause:** Maximum state score must not be less than the minimum state score.

**Action:** Provide a maximum state score that is more than or equal to the minimum state score.

**Level:** 1

**Type:** ERROR

**Impact:** Process

---

**OAAM-20032: Minimum city score must be between {0} and {1}.**

**Cause:** Minimum city score must be between {0} and {1}.

**Action:** Provide a minimum city score value between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20033: Maximum city score must be between {0} and {1}.**

**Cause:** Maximum city score must be between {0} and {1}.

**Action:** Provide a maximum city score value between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20034: Maximum city score must not be less than the minimum city score.**

**Cause:** Maximum city score must not be less than the minimum city score.

**Action:** Provide a maximum city score that is more than or equal to the minimum city score.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20035: A rule with name {0} already exists in this policy.**

**Cause:** A rule with name {0} already exists in this policy.

**Action:** Provide a different rule name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20036: Policy rule map with ID {0} does not exist.**

**Cause:** Policy rule map with ID {0} does not exist.

**Action:** Create the appropriate policy-rule mapping.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20037: Condition ID cannot be null.**

**Cause:** Condition ID cannot be null.

**Action:** Provide a valid Condition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20038: Condition with Condition ID {0} does not exist.**

---

**Cause:** Condition with Condition ID {0} does not exist.

**Action:** Provide a valid Condition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20039: {0} is not a valid run mode.**

**Cause:** {0} is not a valid run mode.

**Action:** Provide a valid run mode.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20040: {0} is not a valid policy type.**

**Cause:** {0} is not a valid policy type.

**Action:** Provide a valid policy type.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20041: Select checkpoint.**

**Cause:** Select checkpoint.

**Action:** Provide a valid checkpoint.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20042: Destination policy cannot be the same as the source policy.**

**Cause:** The destination policy cannot be the same as the source policy.

**Action:** Provide a destination policy that is different from the source policy.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20043: Override with Override ID {0} does not exist.**

**Cause:** Override with Override ID {0} does not exist.

**Action:** Provide a valid Override ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20044: Override with Override ID {0} does not belong to Policy ID {1}.**

**Cause:** Override with Override ID {0} does not belong to Policy ID {1}.

**Action:** Provide an Override ID that belongs to the specified policy.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20045: Override ID cannot be null or empty.**

**Cause:** Override ID cannot be null or empty.

**Action:** Provide a valid Override ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20046: Column ID cannot be null or empty.**

**Cause:** Column ID cannot be null or empty.

**Action:** Provide a valid Column ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20047: Rule set result with Column ID {0} does not belong to Policy ID {1}.**

**Cause:** Rule set result with the Column ID {0} does not belong to the Policy ID {1}.

**Action:** Provide a Column ID that belongs to the specified policy.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20048: The provided overrides set is not complete for this policy.**

**Cause:** The provided ordered Override IDs array does not contain all the Override IDs for the policy.

**Action:** Provide an array that has all the Override IDs for the policy.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20049: Override cannot be added for policy with Policy ID = {0} since no rules have been added to the policy.**

**Cause:** Override cannot be added for policy with Policy ID = {0} since no rules have been added to the policy.

**Action:** For adding override the policy should have a rule.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20050: Condition ID list provided is null or empty.**

**Cause:** Condition ID list provided is null or empty.

**Action:** Provide a non-null and non-empty list.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20051: Rule ID is null or rule for the given ID not found.**

**Cause:** Rule ID is null or rule for the given ID not found.

**Action:** Provide a valid non-null rule.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20052: Rule condition for the given Rule Condition ID not found.**

**Cause:** Rule condition for the given Rule Condition ID not found.

**Action:** Provide a valid and existing Rule Condition ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20053: Policy Rule Map cannot be null.**

**Cause:** Policy Rule Map cannot be null.

**Action:** Provide a non-null Policy Rule Map.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20054: Number of conditions does not match the number of conditions that exists.**

**Cause:** Number of conditions does not match the number of conditions that exists.

**Action:** Provide the same number as the conditions available.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20055: Condition Map provided does not exist.**

**Cause:** Condition Map provided does not exist.

**Action:** Provide a valid and existent Condition Map ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20056: Group is already linked and cannot be linked again.**

**Cause:** Group is already linked and cannot be linked again.

**Action:** Provide a valid and unlinked group for linking.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20057: Group ID cannot be null.**

**Cause:** Group ID cannot be null.

**Action:** Provide a valid and non-null Group ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20058: Some groups are not linked; therefore, they cannot be unlinked.**

**Cause:** Some of the groups are not linked; therefore, they cannot be unlinked.

**Action:** Provide only linked groups for unlinking.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20059: The condition type for condition {0} is not compatible with the checkpoint for policy {1}.**

**Cause:** The condition type for condition {0} is not compatible with the checkpoint for policy {1}.

**Action:** Provide a condition where the condition type is compatible with the checkpoint of the policy.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20060: The condition, {0}, being deleted is associated with one or more policies; therefore, it cannot be deleted.**

**Cause:** The condition, {0}, being deleted is associated with one or more policies; therefore, it cannot be deleted.

**Action:** Remove the condition from the policies before deleting the condition.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-20061: The policy type and checkpoint for the policy {0} do not match that of the parent policy {1}.**

**Cause:** The policy type and checkpoint for the policy {0} do not match with that of the parent policy {1}.

**Action:** Ensure that the policy type and checkpoint for the child policy is the same as that of the parent policy.

**Level: 1**

**Type: ERROR**

---

**Impact:** Process

**OAAM-20062: Score must be between {0} and {1}.**

**Cause:** The score must be between {0} and {1}.

**Action:** Provide a score between {0} and {1}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20063: {0} is not a valid result type.**

**Cause:** {0} is not a valid result type.

**Action:** Provide a valid result type.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20064: {0} is not a valid rule result.**

**Cause:** {0} is not a valid rule result.

**Action:** Provide a valid value for rule result.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20065: Rule results for columns {0} and {1} are the same.**

**Cause:** Rule results for columns {0} and {1} are the same.

**Action:** Provide different rule results for each column.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20066: Filter key type was not provided for retrieving the filter key.**

**Cause:** The filter key type must be provided as an Integer value. The error occurred because the value was not provided to get the correct filter based on the key type.

**Action:** Provide a non-null value for the filter key type and retry the operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20067: Transaction Definition ID was not provided for retrieving the filter key.**

**Cause:** The Transaction Definition ID provided must be a Long value. The error occurred because the value was not provided to get the correct filter based on the filter key type and transaction definition.

**Action:** Provide a non-null value for the Transaction Definition ID and retry this operation.

---

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20068: Transaction not found for the given Transaction Definition ID.**

**Cause:** The Transaction Definition ID provided did not match with any of the transaction definitions in the system.

**Action:** Provide a valid Transaction Definition ID and retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20069: Filter condition key was not provided.**

**Cause:** The filter condition lookup key provided was either null or empty.

**Action:** Provide a valid filter condition lookup key string and retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20070: Condition filter was not found based on filter condition key {0}.**

**Cause:** The filter key provided does not match any condition filter.

**Action:** Provide a correct condition filter descriptor key and then retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20071: The provided filter key is invalid.**

**Cause:** The filter key provided was either null or empty.

**Action:** Provide a valid lookup string. Also note that any spaces at the beginning and end of the lookup string will be ignored.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20072: No filter descriptor was found for key {0}.**

**Cause:** There is no filter key descriptor that match the key provided.

**Action:** Provide a lookup string that matches one of the filter keys in the system. Make sure the format is right and there are no typographical errors.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20073: Number of rule set results is not equal to the number of rules in the policy.**

---

**Cause:** Number of RuleSetResults is not equal to the number of rules in the policy.

**Action:** Number of RuleSetResults should be equal to the number of rules in the policy.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20074: Filter key descriptor is invalid.**

**Cause:** The filter key provided was either null or empty.

**Action:** Provide a lookup string that is not null or empty. Also note that any spaces at the beginning and end of the lookup string will be ignored.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20075: A rule must have at least one condition. The current action tries to delete all conditions in this rule. Make sure at least one condition is not selected for deletion.**

**Cause:** A rule must have at least one condition. The current action tries to delete all the conditions in this rule.

**Action:** Make sure at least one condition is not selected for deletion.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-20076: Encryption is not supported for numeric data fields.**

**Cause:** Attempt was made to set the numeric data field as encrypted. Encryption is not supported for numeric data fields.

**Action:** Make sure the data fields selected for encryption do not include numeric data fields. Unselect the numeric data fields and then try the encryption operation again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30001: Group data is required to complete this operation.**

**Cause:** The operation needs group data and that data was not provided.

**Action:** Provide valid group data and retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30002: A group with name {0} already exists.**

**Cause:** Group by the name and value type already exists.

**Action:** Try a different group name for the given type of group.

---

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30003: Group type {0} not found.**

**Cause:** The group type provided for the operation was not correct.

**Action:** Try a different group type. Group types can be found in value.type.enum through the system enumerations user interface.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30004: Group name is incorrect.**

**Cause:** The group name is incorrect. It is not a valid group name.

**Action:** Provide an alphanumeric string as the group name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30005: Group description is incorrect.**

**Cause:** The group description is incorrect. It is not a valid group description.

**Action:** Provide an alphanumeric string for the group description.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30006: Group cache type is incorrect.**

**Cause:** The group cache type is incorrect. It is not a valid group cache type.

**Action:** Provide a correct cache type. Refer to cache type enumeration for possible values.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30007: Group with given information not found: {0}.**

**Cause:** Group with given information not found.

**Action:** Provide the correct information so the group can be retrieved. You can search for the groups in the system.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30008: Group type cannot be changed.**

**Cause:** The group type is part of the basic function in the way that the group is used in the system. The group type cannot be changed at this time.

---

**Action:** Create another group with the required value type and then use it.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30009: Group type {0} not found.**

**Cause:** The group type provided for the operation was not correct.

**Action:** Try a different group type. Group types can be found in `value.list.type.enum` through the system enumerations user interface.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30010: Group type cannot be changed.**

**Cause:** The group type is part of the basic function in the way that the group is used in the system. The group type cannot be changed at this time.

**Action:** Create another group with the required type and then use it.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30011: Group element {0} is invalid for this group.**

**Cause:** The group element is null or the group element type is not compatible with the group type.

**Action:** Provide an element that is compatible with the group type.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30012: List of groups is required for this operation.**

**Cause:** A list of groups required for this operation was found to be null.

**Action:** Provide a valid list of groups and then retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30013: List of groups has invalid group information.**

**Cause:** A list of groups required for this operation contains some group-related information that is incorrect.

**Action:** Provide a valid list of groups with non-null Group IDs. Any duplicates in the list will be ignored.

**Level:** 1

**Type:** ERROR

**Impact:** Process

---

**OAAM-30014: Query returned multiple groups from different group types.**

**Cause:** The query returned multiple groups of mixed type.

**Action:** Use more specific search criteria to limit the number of groups returned.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30015: Group element with given information not found {0}.**

**Cause:** Group element with given information not found.

**Action:** Provide correct information so the group element can be retrieved. You can use the searchGroupElements feature to find group elements in the system.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30016: Element {0} is not a member of group {1}.**

**Cause:** Element is not a member of the group.

**Action:** Provide a correct combination of element and group.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30017: The group {0} cannot be deleted, because it is linked to the following policies {1}.**

**Cause:** Policies are linked to this group; therefore, the group cannot be deleted.

**Action:** The group is linked to policies and might contain session and transaction data associated with this group. Hence this group cannot be deleted.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30018: The group {0} cannot be deleted, because it is used by rules.**

**Cause:** Policies use this group as a parameter value in their rules; therefore, the group cannot be deleted.

**Action:** Remove the group name or ID as a value of the rule parameter(s) and then retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30019: The group {0} cannot be deleted, because it is used by user groups.**

**Cause:** Some user groups use this group; therefore, the group cannot be deleted.

**Action:** Remove the group name or ID from those user groups and then retry this operation.

**Level:** 1

---

**Type:** ERROR

**Impact:** Process

**OAAM-30020: The IP Cluster object cannot be null.**

**Cause:** The OARMIPCluster object cannot be null.

**Action:** Pass a non-null OARMIPCluster object.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30021: The label for IP cluster cannot be null.**

**Cause:** The label for IP cluster cannot be null.

**Action:** Pass a non-null label for IP cluster.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30022: IP cluster with label {0} already exists.**

**Cause:** IP cluster with label {0} already exists.

**Action:** Provide a different label for IP cluster.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30023: Invalid IP address range. From IP Address cannot be greater than To IP Address.**

**Cause:** Invalid IP address range. From IP Address cannot be greater than To IP Address.

**Action:** Provide a From IP Address that is less than To IP Address.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30024: The IP address {0} is invalid.**

**Cause:** The IP address {0} is invalid.

**Action:** Provide a valid IP address.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30025: The list of Cluster IDs cannot be null.**

**Cause:** The list of Cluster IDs cannot be null.

**Action:** Provide a non-null list of Cluster IDs.

**Level:** 1

---

**Type:** ERROR

**Impact:** Process

**OAAM-30026: The IP cluster with Cluster ID {0} does not exist.**

**Cause:** The IP cluster with Cluster ID {0} does not exist.

**Action:** Provide a valid Cluster ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30027: The IP cluster with Cluster ID {0} is being used by one or more groups and cannot be deleted.**

**Cause:** The IP cluster with Cluster ID {0} is being used by one or more groups and cannot be deleted.

**Action:** Remove the IP cluster from the groups and then try to delete it.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30028: Duplicate element {0} cannot be added to group {1}.**

**Cause:** The element is already present in the group. Duplicate elements cannot be added to the group.

**Action:** Add a different element to the group.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30029: The {0} group cannot be deleted because it is being used by one or more policies.**

**Cause:** The group cannot be deleted because it is being used by one or more policies.

**Action:** The group cannot be deleted because it is being used by one or more policies.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30030: The IP Range {0} cannot be created because a similar IP Range already exists.**

**Cause:** IP Ranges being created have duplicate entries.

**Action:** Ensure to enter a unique IP Range.

**Level:** 1

**Type:** ERROR

**Impact:** Process

---

**OAAM-30031: The user cannot be removed from the group(s) {0} because they are primary user groups.**

**Cause:** The user cannot be removed from the groups because they are primary user groups.

**Action:** Select other groups and retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-30032: The group {0} cannot be deleted, because it is used by policies.**

**Cause:** Policies use this group as a parameter value in trigger combinations; therefore, the group cannot be deleted.

**Action:** Remove the group name or ID as a value from policy trigger combinations and then retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-35001: {0} is a duplicate of enumeration {1}. Enter another {2}.**

**Cause:** Enumeration already exists in the database. Duplicate enumerations cannot be added.

**Action:** Enter a unique enumeration and retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-35002: Default Property cannot be deleted.**

**Cause:** Default Property cannot be deleted.

**Action:** Select another property and retry this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40001: Import failed error: {0}.**

**Cause:** Import failed error: {0}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40002: Invalid profile type: {0}.**

**Cause:** Invalid profile type: {0}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

---

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40003: Invalid policy type: {0}.**

**Cause:** Invalid policy type: {0}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40004: No policy data for policy: {0}.**

**Cause:** No policy data for policy: {0}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40005: Policy already exists in the database with name {0}.**

**Cause:** The policy already exists in the database with the name {0}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40006: Import failed, no group: {0}, rule instance: {1}.**

**Cause:** Import failed, no group: {0}, rule instance: {1}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40007: Import failed. Unable to set Override action: {0}.**

**Cause:** Import failed. Unable to set Override action: {0}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40008: Import failed. Unable to set Override alert: {0}.**

---

**Cause:** Import failed. Unable to set Override alert: {0}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40009: Bad rule data, policy: {0}, Rule Global ID: {1}.**

**Cause:** Bad rule data, policy: {0}, Rule Global ID: {1}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40010: Policy: {0} Rule Global ID: {1} not present.**

**Cause:** Policy: {0} Rule Global ID: {1} not present.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40011: Import failed. Unable to set Alert group: {0}, rule instance: {1}.**

**Cause:** Import failed. Unable to set Alert group: {0}, rule instance: {1}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40012: Import failed. Unable to set Action group: {0}, rule instance: {1}.**

**Cause:** Import failed. Unable to set Action group: {0}, rule instance: {1}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40013: Import failed. Unable to set Exclude group: {0}, rule instance: {1}.**

**Cause:** Import failed. Unable to set Exclude group: {0}, rule instance: {1}.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

---

**Type:** ERROR

**Impact:** Process

**OAAM-40014: Question category not found.**

**Cause:** The question category was not found.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40015: Validation not found.**

**Cause:** The validation was not found.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40016: Question locale not found.**

**Cause:** The question locale was not found.

**Action:** Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40017: Question with Question ID {0} not found.**

**Cause:** The question with the Question ID was not found.

**Action:** Provide a valid Question ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40018: Configurable action with Action ID {0} not found.**

**Cause:** The configurable action with the Action ID was not found.

**Action:** Provide a valid Action ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40019: Transaction with Transaction ID {0} not found.**

**Cause:** The transaction with the Transaction ID was not found.

**Action:** Provide a valid Transaction ID.

**Level:** 1

---

Type: ERROR

Impact: Process

**OAAM-40020: Pattern with Pattern ID {0} not found.**

Cause: The pattern with the Pattern ID was not found.

Action: Provide a valid Pattern ID.

Level: 1

Type: ERROR

Impact: Process

**OAAM-40021: Entity with Entity ID {0} not found.**

Cause: The entity with the Entity ID was not found.

Action: Provide a valid Entity ID.

Level: 1

Type: ERROR

Impact: Process

**OAAM-40022: Group with List ID {0} not found.**

Cause: The group with the List ID was not found.

Action: Provide a valid List ID.

Level: 1

Type: ERROR

Impact: Process

**OAAM-40023: Policy set with Policy Set ID {0} not found.**

Cause: The policy set with Policy Set ID was not found.

Action: Provide a valid Policy Set ID.

Level: 1

Type: ERROR

Impact: Process

**OAAM-40024: Answer hint with Answer Hint ID {0} not found.**

Cause: The answer hint with the Answer Hint ID was not found.

Action: Provide a valid Answer Hint ID.

Level: 1

Type: ERROR

Impact: Process

**OAAM-40025: Validation with Validation ID {0} not found.**

Cause: Validation with Validation ID not found.

Action: Provide a valid Validation ID.

Level: 1

Type: ERROR

Impact: Process

---

**OAAM-40026: Task group with Group ID {0} not found.**

**Cause:** Task group with Group ID not found.

**Action:** Provide a valid Group ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40027: A configurable action with the name {0} already exists.**

**Cause:** A configurable action with the name already exists.

**Action:** Change the name of the existing configurable action.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40028: One or more files in the ZIP file are invalid XML files.**

**Cause:** One or more files in the ZIP file are invalid XML files.

**Action:** One or more files in the ZIP file are invalid XML files.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40029: Import content has system properties. System properties are not imported as part of this Import action.**

**Cause:** System properties are not imported as part of Import Properties. System type properties may exist in the import data; they are not imported as part of this Import action.

**Action:** This is not an error. It is only an informative message about the system properties. System properties are considered to be specific to the system or environment where the OAAM product runs. Such properties are not imported by other OAAM servers even when they are part of the data being imported. No user action is required.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40030: Import ignored the following system properties: {0}**

**Cause:** System properties, which were not imported as part of import properties, are listed here.

**Action:** This is not an error. It is only an informative message about the system properties that were not imported. No user action is required.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40031: Export list has some properties that are system properties. System properties are not exported in this Export action.**

---

**Cause:** System properties are not exported as part of Export Properties. There may be some system type properties in the export list. They are not exported as part of this export.

**Action:** This is not an error. It is only an informative message about the system properties. System properties are considered to be specific to the system or environment where OAAM product runs. Such properties are not exported by OAAM servers even when they are part of the list of properties being imported. No user action is required.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40032: Export has ignored the following system properties: {0}**

**Cause:** System properties, which are not exported as part of Export Properties, are listed here.

**Action:** This is not an error. It is only an informative message about the system properties which are not exported. No user action is required.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40033: File provided does not appear to be correct for Import action.**

**Cause:** The file provided for import may not be correct. The file may not be the one that was exported from OAAM, or it may contain data that cannot be imported into OAAM.

**Action:** Check that the file was obtained from another OAAM export. See if the file is not empty, and is readable and a valid ZIP file.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40034: File import error. Check the log for details.**

**Cause:** A file import error occurred. Invalid import files were found in the ZIP file.

**Action:** Check whether the ZIP file contains valid import files.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40035: Unknown error during import operation. Check the log for details.**

**Cause:** Invalid import files may exist in the ZIP file.

**Action:** Check if the ZIP file contains invalid import files.

**Level:** 1

**Type:** ERROR

**Impact:** Process

---

**OAAM-40501: Snapshot name cannot be null or empty.**

**Cause:** Snapshot name cannot be null or empty.

**Action:** Provide a snapshot name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40502: Snapshot description cannot be null or empty.**

**Cause:** Snapshot description cannot be null or empty.

**Action:** Provide a valid Snapshot description.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40503: Snapshot identifier cannot be null.**

**Cause:** Snapshot identifier cannot be null. This API requires a valid snapshot identifier.

**Action:** Provide a valid snapshot identifier.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40504: Snapshot with snapshot identifier {0} does not exist.**

**Cause:** Snapshot with given snapshot identifier does not exist.

**Action:** Ensure that you provide the correct snapshot identifier for this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40505: List of snapshots was not found.**

**Cause:** List of snapshot identifiers was not found. The list is a mandatory parameter when performing this operation in the interface.

**Action:** Provide the correct list of snapshot identifiers and retry the operation. The list is a mandatory parameter and cannot be null.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-40506: Snapshot data provided does not appear correct.**

**Cause:** Snapshot data bytes do not appear correct.

**Action:** Ensure that the snapshot bytes array is not null and that the array represents the correct snapshot data. Make sure the byte data from the saved snapshot ZIP file is represented, and then retry the operation.

**Level:** 1

---

**Type:** ERROR

**Impact:** Process

**OAAM-50001: The fully-qualified transaction key must be a valid string.**

**Cause:** The transaction key supplied to look up the transaction definition is not correct. It should be a non-empty string.

**Action:** Verify that the transaction key provided is correct and a non-empty string.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50002: Transaction definition was not found for the key {0}.**

**Cause:** The key provided does not match any transaction definition.

**Action:** Verify that the transaction key provided is correct and a non-empty string.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50003: Transaction Definition ID is null.**

**Cause:** Transaction Definition ID is null.

**Action:** Provide a valid Transaction Definition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50004: Transaction Definition ID is invalid or non-existent.**

**Cause:** Transaction Definition ID is invalid or non-existent.

**Action:** Provide a valid and existent Transaction Definition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50005: Transaction name is null or invalid.**

**Cause:** Transaction name is null or invalid.

**Action:** Provide a valid transaction name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50006: Transaction definition cannot be null.**

**Cause:** Transaction definition cannot be null.

**Action:** Provide a valid transaction definition object.

**Level:** 1

---

**Type:** ERROR

**Impact:** Process

**OAAM-50007: Transaction Definition ID is null.**

**Cause:** Transaction Definition ID is null.

**Action:** Provide a non-null Transaction Definition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50008: Transaction Definition ID is either invalid or does not exist.**

**Cause:** Transaction Definition ID is either invalid or does not exist.

**Action:** Provide valid Transaction Definition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50009: Transaction definition could not be updated.**

**Cause:** Transaction definition could not be updated.

**Action:** Check error log for details.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50010: Transaction Definition ID list is null or empty.**

**Cause:** Transaction Definition ID list is null or empty.

**Action:** Provide a valid Transaction Definition ID list.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50011: Transaction definition for the given transaction definition {0} not found.**

**Cause:** Transaction definition for the given transaction definition {0} not found.

**Action:** Provide a valid Transaction Definition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50012: Transaction input data mapping is missing for transaction {0}.**

**Cause:** Transaction input data mapping is missing for transaction {0}.

**Action:** Provide transaction input data mapping to activate the transaction {0}.

**Level:** 1

**Type:** ERROR

---

**Impact:** Process

**OAAM-50013: Transaction definition for the given transaction definition {0} not found.**

**Cause:** Transaction definition for the given transaction definition {0} not found.

**Action:** Provide a valid transaction definition.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50014: Transaction input data mapping is missing for transaction {0}.**

**Cause:** Transaction input data mapping is missing for transaction {0}.

**Action:** Provide transaction input data to activate the transaction {0}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50015: Source data is missing for transaction {0}.**

**Cause:** Source data is missing for transaction {0}.

**Action:** Provide the required source data to activate transaction {0}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50016: Transaction data mapping is missing for transaction {0}.**

**Cause:** Transaction data mapping is missing for transaction {0}.

**Action:** Provide transaction data mapping to activate transaction {0}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50017: Transaction data mapping is missing for transaction {0}.**

**Cause:** Transaction data mapping is missing for transaction {0}.

**Action:** Provide transaction data mapping to activate transaction {0}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50018: Entity mapping could not be found for transaction {0}.**

**Cause:** Entity mapping could not be found for transaction {0}.

**Action:** Make sure all entities are mapped before activating transaction {0}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

---

**OAAM-50019: Transaction and entity mapping is missing for transaction {0}.**

**Cause:** Transaction and entity mapping is missing for transaction {0}.

**Action:** Provide transaction and entity mapping to activate transaction {0}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50020: Transaction Entity Definition Map ID cannot be null.**

**Cause:** Transaction Entity Definition Map ID cannot be null.

**Action:** Provide a valid Transaction Entity Definition Map ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50021: Transaction Definition ID missing while creating transaction entity map.**

**Cause:** Transaction Definition ID missing while creating transaction entity map.

**Action:** Provide a valid Transaction Definition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50022: Entity Definition ID missing while creating transaction entity map.**

**Cause:** Entity Definition ID missing while creating transaction entity map.

**Action:** Provide a valid Entity Definition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50023: Entity definition validation failed. Operation cannot be performed.**

**Cause:** Entity definition validation failed. Operation cannot be performed.

**Action:** Provide a valid entity definition.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50024: Entity name validation failed.**

**Cause:** Entity name validation failed.

**Action:** Provide a valid and unique entity name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50025: Invalid entity relation.**

---

**Cause:** Invalid entity relation.  
**Action:** Provide a valid entity relation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50026: Invalid display order.**

**Cause:** Invalid display order.

**Action:** Provide a valid display order.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50027: Duplicate entity name.**

**Cause:** Duplicate entity name.

**Action:** Provide a valid and unique entity name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50028: Invalid and non-unique entity relation.**

**Cause:** Invalid and non-unique entity relation.

**Action:** Provide a valid and unique entity relation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50029: Invalid and non-unique display order.**

**Cause:** Invalid and non-unique display order.

**Action:** Provide a valid and unique display order.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50030: Transaction Definition ID missing while updating transaction entity map.**

**Cause:** Transaction Definition ID missing while updating transaction entity map.

**Action:** Provide a valid and non-null Transaction Definition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50031: Entity Definition ID missing while updating transaction entity map.**

**Cause:** Entity Definition ID missing while updating transaction entity map.

---

**Action:** Provide a valid and non-null Entity Definition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50032: Transaction delete is not allowed.**

**Cause:** Transaction delete is not allowed.

**Action:** Select a valid transaction for delete.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50033: Data element definition cannot be null.**

**Cause:** Data element definition cannot be null.

**Action:** Provide a valid data element definition.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50034: Data element definition array cannot be null or empty.**

**Cause:** Data element definition array cannot be null or empty.

**Action:** Provide a non-null and valid data element definition array.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50035: Attribute validation failed.**

**Cause:** Attribute validation failed.

**Action:** Provide a valid attribute.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50036: Creating the attribute failed.**

**Cause:** Creating the attribute failed.

**Action:** Provide the valid entry for creating the attribute.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50037: Attribute not found.**

**Cause:** Attribute not found.

**Action:** Provide a valid and non-null attribute.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50038: Cannot find a matching data element definition.**

**Cause:** Cannot find a matching data element definition.

**Action:** Provide a valid entry with a matching data element definition.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50039: No attribute found to delete.**

**Cause:** No attribute found to delete.

**Action:** Provide a valid attribute to delete.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50040: Source validation failed.**

**Cause:** Source validation failed.

**Action:** Provide valid source data.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50041: Cannot find a matching transaction data mapping.**

**Cause:** Cannot find a matching Transaction Data Mapping ID.

**Action:** Provide a valid and matching Transaction Data Mapping ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50042: Transaction data mapping is null or empty.**

**Cause:** Transaction data mapping IDs are null or empty.

**Action:** Provide a non-null or valid Transaction Data Mapping ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50043: No transaction mapping found to delete.**

**Cause:** No transaction mapping found to delete.

**Action:** Transaction should have one or more mappings to delete.

**Level: 1**

**Type: ERROR**

---

**Impact:** Process

**OAAM-50044: No entity mapping found to delete.**

**Cause:** No entity mapping found to delete.

**Action:** Entity should have one or more mappings to delete.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50045: Transaction name is null or empty.**

**Cause:** Transaction name is null or empty.

**Action:** Provide a valid and non-null transaction name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50046: Transaction key is null or empty.**

**Cause:** Transaction key is null or empty.

**Action:** Provide a valid and non-null transaction key.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50047: Transaction description is null or empty.**

**Cause:** Transaction description is null or empty.

**Action:** Provide a valid and non-null transaction description.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50048: Duplicate transaction name or transaction key; validation failed.**

**Cause:** Validation failed because of a duplicate transaction name or transaction key.

**Action:** Provide a valid and unique transaction name or transaction key.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50049: Transaction entity map for the ID {0} does not exist.**

**Cause:** Transaction entity map for the ID does not exist.

**Action:** Provide a valid Transaction Entity Map ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

---

**OAAM-50050: Transaction Entity Map ID cannot be null.**

**Cause:** Transaction Entity Map ID cannot be null.

**Action:** Provide a valid and non-null Transaction Entity Map ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50102: Display/name scheme is not set for entity {0}.**

**Cause:** Display/name scheme is not set for entity.

**Action:** Set the display/name scheme before activation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50103: ID scheme is not set for entity {0}.**

**Cause:** ID scheme is not set for entity.

**Action:** Set the ID scheme before activation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50104: No data element definitions exist for entity {0}.**

**Cause:** No data element definitions exist for entity.

**Action:** Add data element definitions before activating.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50105: Row and Column values are not unique/valid for data element {0} for entity {1}.**

**Cause:** Row and Column values are not unique/valid for data element for entity.

**Action:** Provide unique Row and Column values for data elements within an entity.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50106: There is more than one data element with the same internal identifier, {0}, for entity {1}.**

**Cause:** There is more than one data element with the same internal identifier for the same entity.

**Action:** Provide a unique internal identifiers for data element definitions within an entity.

**Level:** 1

---

**Type:** ERROR

**Impact:** Process

**OAAM-50107: Index for numeric data elements is not between {0} and {1} for entity {2}.**

**Cause:** Index for numeric data elements is not between {0} and {1} for entity {2}.

**Action:** Ensure that index for numeric data elements is between {0} and {1} for entity {2}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50108: Index for non-numeric data elements is not between {0} and {1} for entity {2}.**

**Cause:** Index for non-numeric data elements is not between {0} and {1} for entity {2}.

**Action:** Ensure that index for non-numeric data elements is between {0} and {1} for entity {2}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50109: No display scheme elements are available for entity {0}.**

**Cause:** No display scheme elements have been added for entity {0}.

**Action:** Add display scheme elements before activating.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50110: There is more than one display data element with the same internal ID, {0}, for entity {1}.**

**Cause:** There is more than one display data element with the same internal ID, {0}, for entity {1}.

**Action:** Entity should not have more than one display data element with the same internal ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50111: There is more than one display data element with the same order, {0}, for entity {1}.**

**Cause:** There is more than one display data element with the same order, {0}, for entity {1}.

**Action:** Correct the ordering for the display data elements for entity {1}.

**Level:** 1

**Type:** ERROR

---

**Impact:** Process

**OAAM-50112: No ID scheme elements are available for entity {0}.**

**Cause:** No ID scheme elements have been added for entity {0}.

**Action:** Add ID scheme elements before activating.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50113: There is more than one ID scheme data element with the same internal ID, {0}, for entity {1}.**

**Cause:** There is more than one ID scheme data element with the same internal ID, {0}, for entity {1}.

**Action:** The entity should not have more than one ID scheme data element with the same internal ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50114: There is more than one ID scheme data element with the same order, {0}, for entity {1}.**

**Cause:** There is more than one ID scheme data element with the same order, {0}, for entity {1}.

**Action:** The entity should not have more than one ID scheme data element with the same order.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50115: Database error.**

**Cause:** Database error.

**Action:** Database error.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50116: Entity Name field cannot be blank.**

**Cause:** Entity Name field cannot be blank.

**Action:** Provide an entity name for the Entity Name field.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50117: Entity Key field cannot be blank.**

**Cause:** Entity Key field cannot be blank.

**Action:** Provide an entity key in the Key field.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50118: Entity Description field cannot be blank.**

**Cause:** Entity Description field cannot be blank.

**Action:** Provide an entity description in the Description field.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50119: Another entity definition with the same name already exists.**

**Cause:** Another entity definition with the same name already exists.

**Action:** Provide a unique name for the entity definition.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50120: Internal ID field of data elements cannot be blank.**

**Cause:** Internal ID field of data elements cannot be blank.

**Action:** Provide an internal ID for data elements.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50121: Data Type field of the data elements of the entity cannot be blank.**

**Cause:** Data Type field of the data elements of the entity cannot be blank.

**Action:** Provide a data type for data elements of the entity.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50122: Row number of the data elements of the entity cannot be less than zero.**

**Cause:** Row number of the data elements of the entity cannot be less than zero.

**Action:** Provide positive integers as row numbers for the data elements of the entity.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50123: Column number of data elements of the entity cannot be less than zero.**

**Cause:** Column number of data elements of the entity cannot be less than zero.

---

**Action:** Provide a positive integer as the column number for data elements of the entity.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50124: Internal ID of the data element of the entity should be unique.**

**Cause:** Internal ID of data element of the entity should be unique.

**Action:** Ensure that the internal ID of the data element of the entity is unique.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50125: Name of data element of the entity should be unique.**

**Cause:** Name of data element of the entity should be unique.

**Action:** Ensure that the name of the data element of the entity is unique.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50126: More than one data element definition exists with the same row and column.**

**Cause:** More than one data element definition exists with the same row and column.

**Action:** Ensure that row and column values are unique for the data element definitions.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50127: Validation error: Data element definition identifier should not be set for creating a new data element definition.**

**Cause:** Validation error: Data element definition identifier should not be set for creating a new data element definition. The identifier is generated by the system for the new data element.

**Action:** Validation error: Data element definition identifier should not be set for creating a new data element definition. The identifier is generated by the system for the new data element.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50128: Column value for numeric data elements should be between {0} and {1}.**

**Cause:** Column value for numeric data elements should be between {0} and {1}.

**Action:** Column value for numeric data elements should be between {0} and {1}.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50129: Column value for non-numeric data elements should be between 1 and {0}.**

**Cause:** Column value for non-numeric data elements should be between 1 and {0}.

**Action:** Column value for non-numeric data elements should be between 1 and {0}.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50130: The entity {0} cannot be disabled because it is used by one or more active transactions.**

**Cause:** The entity {0} cannot be disabled because it is used by one or more active transactions.

**Action:** The entity {0} cannot be disabled because it is used by one or more active transactions.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50131: The entity {0} cannot be deleted because it is used by one or more active transactions.**

**Cause:** The entity {0} cannot be deleted because it is used by one or more active transactions.

**Action:** The entity {0} cannot be deleted because it is used by one or more active transactions.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50132: Entity Definition ID cannot be null.**

**Cause:** Entity Definition ID cannot be null.

**Action:** Entity Definition ID cannot be null.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50133: Data profile definition not found for the Entity Definition ID.**

**Cause:** Data profile definition not found for the Entity Definition ID.

**Action:** Data profile definition not found for the Entity Definition ID.

**Level: 1**

**Type: ERROR**

---

**Impact:** Process

**OAAM-50134: Data Definition ID does not match with Data Definition ID of the data profile.**

**Cause:** Data Definition ID does not match with Data Definition ID of the data profile.

**Action:** Data Definition ID does not match with Data Definition ID of the data profile.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50135: Unable to create external ID data definition for the Entity Definition ID.**

**Cause:** Unable to create external ID data definition for the Entity Definition ID.

**Action:** Unable to create external ID data definition for the Entity Definition ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50136: The element with Element ID {0} cannot be deleted because it is used by one or more active transactions.**

**Cause:** The element with Element ID {0} cannot be deleted because it is used by one or more active transactions.

**Action:** The element with Element ID {0} cannot be deleted because it is used by one or more active transactions.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50137: Data element having Data Definition Element ID {0} does not exist.**

**Cause:** Data element having Data Definition Element ID {0} does not exist.

**Action:** Data element having Data Definition Element ID {0} does not exist.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50138: Identification scheme cannot be null.**

**Cause:** Identification scheme cannot be null.

**Action:** Identification scheme cannot be null.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50139: Data Definition Element ID cannot be null.**

**Cause:** Data Definition Element ID cannot be null.

---

**Action:** Data Definition Element ID cannot be null.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50140: System error occurred while loading entities.**

**Cause:** System error occurred while loading entities.

**Action:** System error occurred while loading entities.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50141: Error loading object {0} with primary key {1} from database. {2}.**

**Cause:** Error loading object {0} with primary key {1} from database. {2}.

**Action:** Error loading object {0} with primary key {1} from database. {2}s.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50142: Error inserting object {0} to database.**

**Cause:** Error inserting object to database. Database may not be available.

**Action:** Error inserting object to database. Try the operation again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50200: Configurable Action ID provided is invalid or does not exist.**

**Cause:** Configurable Action ID provided is invalid or does not exist.

**Action:** Provide a valid and existent Configurable Action ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50201: Configurable Action ID cannot be null.**

**Cause:** Configurable Action ID cannot be null.

**Action:** Provide a non-null Configurable Action ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50202: Action parameters mismatch.**

**Cause:** Action parameters mismatch.

**Action:** Provide a valid action parameter.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50203: Action name provided cannot be null.**

**Cause:** Action name provided cannot be null.

**Action:** Provide a non-null action name.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50204: Java Class Name provided cannot be null.**

**Cause:** Java Class Name provided cannot be null.

**Action:** Provide a non-null Java class name.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50205: Duplicate action.**

**Cause:** Duplicate action.

**Action:** Provide a unique value to create a valid action.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50206: Configurable action cannot be deleted as it is currently used by one or more Action Instances.**

**Cause:** Configurable action cannot be deleted as it is currently used by one or more Action Instances.

**Action:** Select a valid configurable action that is not in use.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50207: Invalid or non-existent Action ID.**

**Cause:** Invalid or non-existent Action ID.

**Action:** Provide a valid and existent Action ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50208: Action ID list provided cannot be null or empty.**

**Cause:** Action ID list provided cannot be null or empty.

**Action:** Provide a non-null and valid Action ID list.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50209: Action ID provided cannot be null.**

**Cause:** Action ID provided cannot be null.

**Action:** Provide a non-null Action ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50210: Action Instance ID provided is invalid or non-existent.**

**Cause:** Action Instance ID provided is invalid or non-existent.

**Action:** Provide a valid and existent Action Instance ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50211: Action Instance ID cannot be null.**

**Cause:** Action Instance ID cannot be null.

**Action:** Provide a non-null Action Instance ID.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50212: Execution Order should be unique for synchronous actions.**

**Cause:** Execution Order should be unique for synchronous actions.

**Action:** Provide unique execution order for each synchronous action.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50213: Action Instance name is a duplicate.**

**Cause:** Action Instance name is a duplicate.

**Action:** Provide a unique action instance name.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50214: Action instance association is not allowed.**

**Cause:** Action instance association is not allowed.

**Action:** Select the valid instance and parameters for the association.

**Level: 1**

**Type: ERROR**

---

**Impact:** Process

**OAAM-50215: Invalid or non-existent Action Instance ID {0}.**

**Cause:** Invalid or non-existent Action Instance ID {0}.

**Action:** Provide a valid and existing Action Instance ID.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50216: Value {1} provided for the parameter name {0} is not a valid Boolean value.**

**Cause:** Value {1} provided for the parameter name {0} is not a valid Boolean value.

**Action:** Provide a valid Boolean value for the parameter name {0}. It can be true or false only.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50217: Value {1} provided for the parameter name {0} is not a valid Integer value.**

**Cause:** Value {1} provided for the parameter name {0} is not a valid Integer value.

**Action:** Provide a valid Integer value for the parameter name {0}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50218: Value {1} provided for the parameter name {0} is not a valid Long value.**

**Cause:** Value {1} provided for the parameter name {0} is not a valid Long value.

**Action:** Provide a valid Long value for the parameter name {0}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50219: Value {1} provided for the parameter name {0} is not a valid Date value.**

**Cause:** Value {1} provided for the parameter name {0} is not a valid Date value.

**Action:** Provide a valid Date value for the parameter name {0}.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-50220: Action parameter value validation failed.**

**Cause:** The action parameter value validation failed.

**Action:** Verify all the parameter values for its data type are valid.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50221: Nonexistent or invalid Parameter ID {0} with the parameter name {1}.**

**Cause:** Nonexistent or invalid Parameter ID {0} with the parameter name {1}.

**Action:** Provide a valid existing parameter and value.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-50222: Unable to load configurable action class {0}. Ensure the class is made available in the class path.**

**Cause:** Unable to load configurable action class {0}. Ensure the class is made available in the class path.

**Action:** Provide a valid class name with the class already in the class path.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-60001: Pattern ID cannot be null.**

**Cause:** Pattern ID cannot be null.

**Action:** Pattern ID cannot be null.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-60002: Pattern with the name {0} already exists.**

**Cause:** Pattern with the name {0} already exists.

**Action:** Pattern with the name {0} already exists.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-60003: Comparison value is required.**

**Cause:** Comparison value is required.

**Action:** Comparison value is required.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-60004: The value {0} is invalid.**

**Cause:** The value {0} is invalid.

**Action:** The value {0} is invalid.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-60005: The value {0} is not a valid Integer value.**

**Cause:** The value {0} is not a valid Integer value.

**Action:** The value {0} is not a valid Integer value.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-60006: The value {0} is not a valid Long value.**

**Cause:** The value {0} is not a valid Long value.

**Action:** The value {0} is not a valid Long value.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-60007: The value {0} is not a valid Boolean value.**

**Cause:** The value {0} is not a valid Boolean value.

**Action:** The value {0} is not a valid Boolean value.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-60008: The value {0} is not a valid Float value.**

**Cause:** The value {0} is not a valid Float value.

**Action:** The value {0} is not a valid Float value.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-60009: The value {0} is not a valid Date value.**

**Cause:** The value {0} is not a valid Date value.

**Action:** The value {0} is not a valid Date value.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-60010: The value {0} is not a valid Double value.**

**Cause:** The value {0} is not a valid Double value.

**Action:** The value {0} is not a valid Double value.

**Level: 1**

**Type: ERROR**

---

**Impact:** Process

**OAAM-60011: Entered values overlaps with {0}-{1} range.**

**Cause:** Entered values overlaps with {0}-{1} range.

**Action:** Entered values overlaps with {0}-{1} range.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-60012: The attribute already exists.**

**Cause:** The attribute already exists.

**Action:** The attribute already exists.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-60013: Pattern parameter with Parameter ID {0} does not exist.**

**Cause:** Pattern parameter with the Parameter ID {0} does not exist.

**Action:** Pattern parameter with the Parameter ID {0} does not exist.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-60014: Parameter ID cannot be null.**

**Cause:** Parameter ID cannot be null.

**Action:** Parameter ID cannot be null.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-60015: Data has already been collected for this pattern. Changing this pattern will potentially render that data inaccurate.**

**Cause:** Data has already been collected for this pattern. Changing this pattern will potentially render that data inaccurate.

**Action:** Data has already been collected for this pattern. Changing this pattern will potentially render that data inaccurate.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-60016: Pattern is associated with active policies - {0}.**

**Cause:** Pattern is associated to the active policies - {0}.

**Action:** Pattern is associated to the active policies - {0}.

**Level:** 1

**OAAM-70020: No validation available in Global Validation list for delete.**

**Cause:** No validation available in Global Validation list for delete.

**Action:** No validation available in Global Validation list for delete.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70021: Configuration value {0} is not a positive number.**

**Cause:** Configuration value should be a positive number.

**Action:** Provide a positive number for the configuration value.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70022: Configuration value {0} cannot exceed the category count.**

**Cause:** Configuration value cannot exceed the category count.

**Action:** Provide the configuration value within the allowed category count.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70023: No validation available in Global Validation list for delete.**

**Cause:** No validation available in Global Validation list for delete.

**Action:** No validation available in Global Validation list for delete.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70024: Insufficient questions in the system for configuring {0} questions for each user with {1} questions per menu.**

**Cause:** There are not enough questions in the system for each user to register for the number of questions per menu.

**Action:** Import/create more questions so that the number of questions that user needs to register multiplied by the questions per menu is less than the total number of questions available.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70025: Too few questions are being configured for users. Try to register at least {0} questions for the user.**

**Cause:** You have tried to set the number of questions too low. This can lead to security vulnerability.

**Action:** For the best mix of security and usability, register at least three and at most five or so questions. These settings are dependent on your particular system implementation.

---

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70026: Too many questions are being configured for users. Try to register at most {0} questions for user.**

**Cause:** You have tried to set the number of questions too high. This can lead to usability issues.

**Action:** For the best mix of security and usability, register at least three and at most five questions. These settings are dependent on your particular system implementation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70027: Selected category {0} cannot be updated to the given status.**

**Cause:** Selected category {0} cannot be updated to the given status.

**Action:** Selected category {0} cannot be updated to the given status. Select a different category.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70028: Categories' status cannot be updated. This will lead to too few active categories.**

**Cause:** Categories cannot be updated. This will result in very few categories being available for the registration logic.

**Action:** Make sure registration logic and available active categories are consistent with this change. One way to do this will be update the registration logic first and then try this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70029: Categories cannot be deleted. This will lead to too few active categories.**

**Cause:** Categories cannot be deleted. This will result in very few categories being available for the registration logic.

**Action:** Make sure registration logic and available active categories are consistent with this change. One way to do this will be update the registration logic first and then try this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70030: Category name {0} already exist. Provide a unique category name.**

**Cause:** Category name {0} already exist. Provide a unique category name.

---

**Action:** Provide a valid and unique category name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70031: Failed to deactivate selected Categories.**

**Cause:** Failed to deactivate selected Categories. When category is deactivated the questions belonging to that category are also impacted. Some questions cannot be updated to the given status.

**Action:** Make sure that the questions in selected categories can be updated to the given status.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70032: Failed to delete the selected groups. One or more of the groups are in use.**

**Cause:** Failed to delete the selected groups. One or more of the groups are in use.

**Action:** Remove the usages of the group and delete it.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70033: Validation search query cannot be null.**

**Cause:** Validation search query object passed is null.

**Action:** Make sure to pass non-null search query object.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70034: Validations marked for deletion {0} are also used being as global validations.**

**Cause:** Validations marked for deletion are also used being as global validation.

**Action:** Manage global validations from Registration Logic page.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70035: Validation list for delete operation contains null value(s).**

**Cause:** One or more of the validation IDs sent for deletion contain null values.

**Action:** Make sure no null values are sent in validation ID lists.

**Level:** 1

**Type:** ERROR

**Impact:** Process

---

**OAAM-70036: Question {0} does not exist. It may have been deleted.**

**Cause:** Question {0} does not exist. It may have been deleted.

**Action:** Question {0} does not exist.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70501: User ID cannot be null**

**Cause:** User ID cannot be null

**Action:** User ID cannot be null

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70502: User with User ID, {0}, does not exist**

**Cause:** User with User ID, {0}, does not exist

**Action:** User with User ID, {0}, does not exist

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70601: IP Address cannot be null**

**Cause:** IP Address cannot be null

**Action:** IP Address cannot be null

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70701: Device ID cannot be null**

**Cause:** Device ID cannot be null

**Action:** Device ID cannot be null

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70702: Device with Device ID, {0}, does not exist**

**Cause:** Device with Device ID, {0}, does not exist

**Action:** Device with Device ID, {0}, does not exist

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70801: Finger Print ID cannot be null**

**Cause:** Finger Print ID cannot be null

---

**Action:** Finger Print ID cannot be null

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70802: Finger Print with Finger Print ID, {0}, does not exist**

**Cause:** Finger Print with Finger Print ID, {0}, does not exist

**Action:** Finger Print with Finger Print ID, {0}, does not exist

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70901: Alert ID cannot be null**

**Cause:** Alert ID cannot be null

**Action:** Alert ID cannot be null

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70902: Alert with Alert ID, {0}, does not exist**

**Cause:** Alert with Alert ID, {0}, does not exist

**Action:** Alert with Alert ID, {0}, does not exist

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-80001: Invalid IP address value {0}**

**Cause:** Invalid IP address {0}. Validation failed.

**Action:** Enter a valid IP address; the value {0} is invalid

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-90001: Task name {0} already exist. Provide a unique task name.**

**Cause:** Task name {0} already exist. Provide a unique task name.

**Action:** Provide a valid and unique task name.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-90002: Task type {0} not found. Provide an existing task type.**

**Cause:** Task type {0} not found. Provide an existing task type.

**Action:** Provide a valid and existing task type.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-90003: Task status {0} not found. Provide an existing task status.**

**Cause:** Task status {0} not found. Provide an existing task status.

**Action:** Provide a valid and existing task status.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-90004: Task name {0} is not alpha numeric. Provide an alpha numeric task name.**

**Cause:** Task name {0} is not alpha numeric. Provide an alpha numeric task name.

**Action:** Provide a valid and alpha numeric task name.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-90005: Task priority {0} not found. Provide an existing task priority.**

**Cause:** Task priority {0} not found. Provide an existing task priority.

**Action:** Provide a valid and existing task priority.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-90006: Schedule type {0} is invalid. Type has to be either onetime or recurring.**

**Cause:** Schedule type {0} is invalid. Type has to be either onetime or recurring.

**Action:** Provide a valid Schedule type and should be either onetime or recurring.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-90007: Cancel duration type {0} not found. Provide an existing duration type.**

**Cause:** Cancel duration type {0} not found. Provide an existing duration type.

**Action:** Provide a valid and existing duration type.

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-90008: Cancel duration unit {0} not found. Provide an existing duration unit.**

**Cause:** Cancel duration unit {0} not found. Provide an existing duration unit.

**Action:** Provide a valid and existing duration unit.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-90009: Start date is required for schedule.**

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-90018: Schedule cannot be null.**  
**Cause:** Schedule was not selected.  
**Action:** Select a Schedule, and try again.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-90019: Rollup unit {0} not found. Provide an existing rollup unit.**  
**Cause:** User specified an invalid rollup unit.  
**Action:** Provide a valid and existing rollup unit.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-90020: Job name cannot be null.**  
**Cause:** User did not specify a job name.  
**Action:** Provide a job name.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-92000: Job Instance ID's are required.**

---

**Cause:** No Job Instances were selected.

**Action:** Select one or more Job Instances, and try again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-92001: Job Instance ID's cannot be null.**

**Cause:** Job Instance was not selected.

**Action:** Select one or more Job Instances, and try again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-92002: Job Instance with Job instance ID {0}, does not exist.**

**Cause:** Invalid Job Instance ID {0} was selected. It may have been deleted.

**Action:** Refresh the list of Job Instances, then select one or more valid Job Instances and try again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-92100: Job Instance named "{0}" cannot be paused. Current status is "{1}".**

**Cause:** Job Instances in "{1}" status cannot be paused.

**Action:** Select another action.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-92101: Job Instance named "{0}" cannot be resumed. Current status is "{1}".**

**Cause:** Job Instances in "{1}" status cannot be resumed.

**Action:** Select another action.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-92102: Job Instance named "{0}" cannot be canceled. Current status is "{1}".**

**Cause:** Job Instances in "{1}" status cannot be canceled.

**Action:** Select another action.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-93000: Job ID's are required.**

**Cause:** No Job were selected.

---

**Action:** Select one or more Jobs, and try again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-93001: Job ID cannot be null.**

**Cause:** Job was not selected.

**Action:** Select one or more Job, and try again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-93002: Job with Job ID {0}, does not exist.**

**Cause:** Invalid Job ID {0} was selected. It may have been deleted.

**Action:** Refresh the list of Jobs, then select one or more valid Jobs and try again.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-93003: Job named "{0}" cannot be processed now.**

**Cause:** There exists Job of same type in Running status.

**Action:** Try after some time.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-93100: Job named "{0}" cannot be enabled. Current status is "{1}".**

**Cause:** Job in "{1}" status cannot be enabled.

**Action:** Select another action.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-93101: Job named "{0}" cannot be disabled. Current status is "{1}".**

**Cause:** Job in "{1}" status cannot be disabled.

**Action:** Select another action.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-93102: Job named "{0}" cannot be deleted. Current status is "{1}".**

**Cause:** Job in "{1}" status cannot be deleted.

**Action:** Select another action.

---

**Level: 1**

**Type: ERROR**

**Impact: Process**

**OAAM-93103: Job with Job Name {0} cannot be deleted. The job has already Run.**

**Cause:** Job {0} cannot be deleted.

**Action:** Try disabling the job instead of deleting.

**Level: 1**

**Type: ERROR**

## OAM-00001 to OAM-36105

**OAM-00001: Cannot parse the session token.**

**Cause:** The session token appears to be invalid.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-00002: Error occurred while handling the request.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-00003: Request-Response handler configuration is incomplete.**

**Cause:** A request handler mapping was missing.

**Action:** Add the missing handler mapping to the configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-00004: Cannot initialize the Diagnostic Engine.**

**Cause:**

**Action:**

**Level:** 15

**Type:** INFO

**Impact:** Other

**OAM-00005: Cannot locate the custom login page.**

**Cause:** The custom login page was not found.

**Action:** Verify the configuration.

**Level:** 15

---

**Type:** ERROR

**Impact:** Other

**OAM-00006: Cannot locate the configuration of the custom login page.**

**Cause:** The custom custom login page was not specified in the configuration.

**Action:** Add the custom login page location to the configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-00007: Cannot edit the custom login page**

**Cause:** The file permissions of the custom login page do not allow write access.

**Action:** Change the file permissions to allow write access.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-00008: Cannot close the custom login page**

**Cause:** The source code of the custom login page does not support closing of the login page.

**Action:** Check the custom login page source code.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-00009: Unable to parse the redirection URL**

**Cause:** An error occurred while parsing the redirect URL due to bad encoding or invalid format.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-00010: Cannot add query params to map for logout redirection**

**Cause:** URLDecoder throwing UnsupportedEncodingException

**Action:** Check the AMLogoutResponseHandler - getQueryParam method code.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-00011: Cannot parse the request token sent from client with User Agent {0} and IP Address {1}.**

**Cause:** The request token appears to be invalid.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

---

**Type:** ERROR

**Impact:** Other

**OAM-000012: Cannot construct the request token.**

**Cause:** Could not create OAM request token.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-000013: Cannot construct OAM session token.**

**Cause:** Could not create SSO Session token.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-000014: {0} set in {1} must be an integer greater-than or equal to zero.**

**Cause:** SwitchGetToPostLimit was set incorrectly for the authentications scheme.

**Action:** Correct the SwitchGetToPostLimit challenge parameter within the authentication scheme.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAM-02001: Retrieve SSO session operation failed.**

**Cause:** Cannot retrieve the SSO session from the request context. Session might have expired.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02002: Error while processing the submitted credentials.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02003: Error while processing credential collection.**

**Cause:** An internal error occurred.

**Action:** Check the authentication scheme configuration.

**Level:** 15

---

Type: ERROR

Impact: Other

**OAM-02004: Error while processing authorization request.**

Cause: An internal error occurred.

Action: For more details, start logging at the FINE level.

Level: 15

Type: ERROR

Impact: Other

**OAM-02005: Error while parsing the SSO session token.**

Cause: Error while parsing the SSO session token. Wrong session token format.

Action: Retry. If the error persists verify the key roll-over configuration.

Level: 15

Type: ERROR

Impact: Other

**OAM-02006: Insufficient authentication level to access the resource.**

Cause: An insufficient authentication level was used to access the resource.

Action: Step up the authentication level by re-authenticating to the required level.

Level: 15

Type: ERROR

Impact: Other

**OAM-02007: Insufficient privileges. Authorization Denied.**

Cause: Insufficient privileges.

Action: Check the authorization permissions.

Level: 15

Type: ERROR

Impact: Other

**OAM-02008: Password expired. Authentication failed.**

Cause: Insufficient privileges.

Action: Check the authorization permissions.

Level: 15

Type: ERROR

Impact: Other

**OAM-02009: Password reset required. Authentication failed.**

Cause: Insufficient privileges.

Action: Check the authorization permissions.

Level: 15

Type: ERROR

Impact: Other

---

**OAM-02010: User account is locked. Authentication failed.**

**Cause:** Insufficient privileges.

**Action:** Check the authorization permissions.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02011: No user account found. Authentication failed.**

**Cause:** Insufficient privileges.

**Action:** Check the authorization permissions.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02012: No user name password combination found. Authentication failed.**

**Cause:** Insufficient privileges.

**Action:** Check the authorization permissions.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02013: Password Policy action not supported by the client. Authentication failed.**

**Cause:** Insufficient privileges.

**Action:** Check the authorization permissions.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02052: SME Adapter initialization Failed.**

**Cause:** SME adapter initialization failed.

**Action:** Verify the SME configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02053: Component {1} initialization Failed.**

**Cause:** Component initialization failed.

**Action:** Verify the server configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02054: SSO session creation failed.**

---

**Cause:** Session Management Engine error.  
**Action:** Check Session Management Engine error logs.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02055: Retrieve SSO session operation failed.**

**Cause:** Session might be expired.

**Action:** If the problem persists contact the administrator.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02056: An error occurred while parsing the server token.**

**Cause:** TPE token parsing failed.

**Action:** check Token Processing Engine logs.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02057: Wrong Flow Controller configuration for {1}**

**Cause:** Wrong Flow controller configuration

**Action:** Check flow controller class name and configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02058: Event Flow goes in infinite loop.**

**Cause:** Wrong configuration or too many allowed login attempts.

**Action:** Check event flow configuration and login attempt configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02059: Flow Controller Cannot handle Event**

**Cause:** Wrong Flow controller configuration

**Action:** Check error log more details.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02060: Flow Controller :{0} Cannot handle Event :{1}**

**Cause:** Wrong Flow controller configuration

**Action:** Check event to flow controller mapping.

---

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAM-02061: Event Handler error.**

**Cause:** Wrong event handler configuration  
**Action:** Check error log more details.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAM-02062: Event Handler cannot handle the event.**

**Cause:** Wrong event handler configuration  
**Action:** Check event to event handler controller mapping.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAM-02063: Event Handler :{0} Cannot handle Event :{1}**

**Cause:** Wrong event handler configuration  
**Action:** Check event to event handler controller mapping.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAM-02064: Authentication Error during policy matching.**

**Cause:** Authentication Error  
**Action:** Check error log more details.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAM-02065: Configuration Service Adapter initialization Failed.**

**Cause:** SConfiguration Service failed.  
**Action:** Verify the system configuration file

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAM-02066: Event Factory is not configured create the requested event.**

**Cause:** Wrong event factory configuration  
**Action:** Check error log more details.

**Level:** 15  
**Type:** ERROR

---

**Impact:** Other

**OAM-02067: Wrong event configuration. No event handler specified for event {0}.**

**Cause:** Wrong event factory configuration

**Action:** Check error log more details.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02068: Error occurred while configuring the request cache.**

**Cause:** Wrong request cache handler class configuration.

**Action:** Check error log more details.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02069: Error occurred while loading cache handler for class Name {0}**

**Cause:** Wrong request cache handler class configuration.

**Action:** Check error log more details.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02070: An error occurred while loading server aliases.**

**Cause:** TPE token parsing failed.

**Action:** check system configuration if the aliases are set up properly logs.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02071: No host configuration found for the alias {0}.**

**Cause:** TPE token parsing failed.

**Action:** check system configuration if the aliases are set up properly logs.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02072: Ignoring failure during Identity Store operation.**

**Cause:** Operation to read or update user attribute in Identity Store resulted in exception.

**Action:** Check the availability of configured Identity Store.

**Level:** 15

**Type:** WARNING

**Impact:** Other

---

**OAM-02073: Error while checking if the resource is protected or not.**

**Cause:** TPE token parsing failed.

**Action:** check system configuration if the aliases are set up properly logs.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02074: Error while checking if the resource {0} is protected or not.**

**Cause:** TPE token parsing failed.

**Action:** check system configuration if the aliases are set up properly logs.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-02075: Component {0} initialized successfully.**

**Cause:** None

**Action:** None

**Level:** 15

**Type:** INFO

**Impact:** Other

**OAM-02076: {0} Engine initialized successfully.**

**Cause:** None

**Action:** None

**Level:** 15

**Type:** INFO

**Type:** ERROR

**Impact:** Other

**OAM-14002: OAM Server configuration update failed.**

**Cause:** Failed to update OAM Policy or System Configuration.

**Action:** Check the OAM Server MBean logs.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-14003: Invalid HostIdentifier configuration for AppDomain {0} in OAM Policy.**

**Cause:** Definition of HostIdentifier for application domain was invalid.

**Action:** Re-check Application Domain configuration in OAM Policy.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-14005: Validation of a input parameter failed.**

**Cause:** One of the input parameter value was illegal.

**Action:** Check the OAM Server MBean logs.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-14007: Cannot retrieve OAM Server configuration for {0}.**

**Cause:** Cannot retrieve data from OAM System configuration.

**Action:** Check the OAM Server MBean logs.

**Level:** 15

**Type:** ERROR

**Impact:** Other

---

**OAM-14008: Partner configuration for {0} already exist in system config.**

**Cause:** A partner is already configured.

**Action:** Delete existing partner or create partner with a different id.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-14009: Application Domain not found in OAM Policy {0}.**

**Cause:** None

**Action:** None

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-14100: Host Information is already registered in OAM HostIdentifier with host {0} and port {1}.**

**Cause:** None

**Action:** None

**Impact:** Other

**OAM-16001: Cannot parse the session token.**

**Cause:**

**Action:**

**Level:** 15

**Type:** ERROR

---

**Impact:** Other

**OAM-18001: User Identity Store Configuration is not valid.**

**Cause:** The user identity store configuration was missing, or was invalid.

**Action:** Verify the user identity store configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18002: Error while reading User Identity Store Configuration.**

**Cause:** An internal error occurred.

**Action:** For more details, start foundation config logging at FINE level.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18003: Error while reading User Identity Store Configuration attribute "{0}".**

**Cause:** An internal error occurred.

**Action:** For more details, start foundation config logging at FINE level.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18004: User Identity Store name passed as NULL during user identity store read operation.**

**Cause:** User Identity Store name passed to read operation was null.

**Action:** Rerun with actual object.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18005: User Identity Store ID passed as blank during user identity store read operation.**

**Cause:** User Identity Store ID passed to read operation was blank.

**Action:** Rerun with a valid ID.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18006: Map of Properties passed as NULL during user identity store create operation.**

**Cause:** Map of Properties passed to create operation was null.

**Action:** Rerun by passing Map of properties.

**Level:** 1

**Type:** ERROR

---

**Impact:** Other

**OAM-18007: Empty Map of Properties passed during user identity store create operation.**

**Cause:** Map of Properties passed to create operation was empty.

**Action:** Rerun by passing Map of properties.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18008: NULL passed during user identity store modify operation.**

**Cause:** Object passed to modify operation was null.

**Action:** Rerun with actual object.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18009: Validation Failure - an User Identity Store named "{0}" already exists.**

**Cause:** User Identity Store names must be unique.

**Action:** Choose a different name for this User Identity Store.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18010: Exception while encrypting the credential for User Identity Store.**

**Cause:** Exception while encrypting the credential for User Identity Store.

**Action:** For more details, start foundation config logging at FINE level.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18011: Validation Failure - User Identity Store "{0}" is referred in following authentication schemes : "{1}".**

**Cause:** User Identity Store is referred in authentication schemes.

**Action:** Delete or change the reference of this User Identity Store from the authentication schemes that refer to it.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18012: Exception while processing the User Identity Store properties.**

**Cause:** An internal error occurred, Unknown type found while processing.

**Action:** For more details, start foundation config logging at FINE level.

**Level:** 1

**Type:** ERROR

---

**Impact:** Other

**OAM-18013: Exception while processing the User Identity Store properties.**

**Cause:** An internal error occurred, type found as NULL while processing.

**Action:** For more details, start foundation config logging at FINE level.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18014: Validation Failure - NULL Value passed for property "{0}".**

**Cause:** Value found as NULL for a property.

**Action:** Rerun with the value of property set.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18015: Server Configuration is not valid.**

**Cause:** The server configuration was missing, or was invalid.

**Action:** Verify the server configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-18016: Cannot initialize the Data Sources Manager.**

**Cause:** Configuration store instance found null.

**Action:** For more details, start logging at the FINE level.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18017: Cannot initialize the Authentication Modules Manager.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18018: Cannot initialize the Server Manager.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-18019: Create : {0} : paramList=[{1}].**

**Impact:** Other  
**OAM-18027: Read All : {0}.**  
**Cause:**  
**Action:**  
**Level:** 15  
**Type:** NOTIFICATION  
**Impact:** Other  
**OAM-18028: After Read All : {0} : list is : {1}.**  
**Cause:**  
**Action:**  
**Level:** 15  
**Type:** NOTIFICATION  
**Impact:** Other  
**OAM-18029: Validation Failure : "{0}" attributes missing in User Identity Store.**  
**Cause:** The required attributes were not present in the user identity store.  
**Action:** Add the attributes to the user identity store and rerun the operation.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Other  
**OAM-18030: Validation Failure : "{0}" attributes missing in OAM Server Instance.**  
**Cause:** The required attributes were not specified for the server instance.  
**Action:** Add the attributes to the server instance and rerun the operation.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Other  
**OAM-18031: Validation Failure : "{0}" attributes missing in {1} Authentication Module.**  
**Cause:** The required attributes were not specified for the authentication module.  
**Action:** Add the attributes to the authentication module and rerun the operation.  
**Level:** 1

---

Type: ERROR

Impact: Other

**OAM-18032: Validation Failure - Object not found for deletion.**

**Cause:** The object supplied for deletion has been deleted, or does not exist.

**Action:** Use the correct data and rerun the operation.

Level: 1

Type: ERROR

Impact: Other

**OAM-18033: Validation Failure : {0} Module cannot be deleted. (Referred in Scheme).**

**Cause:** The module was being referred to in a scheme.

**Action:** Remove the reference from the scheme and then delete the module.

Level: 1

Type: ERROR

Impact: Other

**OAM-18034: Authentication module configuration is not valid.**

**Cause:** The authentication module configuration was missing, or was invalid.

**Action:** Verify the authentication module configuration.

Level: 15

Type: ERROR

Impact: Other

**OAM-18035: Validation Failure - a server Instance named "{0}" already exists.**

**Cause:** Same name used for creating a new server instance.

**Action:**

Level: 15

Type: ERROR

Impact: Other

**OAM-18036: OAM Server name passed as NULL during oam server update operation.**

**Cause:** An internal error occurred.

**Action:**

Level: 1

Type: ERROR

Impact: Other

**OAM-18037: OAM Server id passed as NULL during oam server update operation.**

**Cause:** User Identity Store name passed to read operation was null.

**Action:**

Level: 1

---

Type: ERROR

Impact: Other

**OAM-18038: The response cookie configuration for update is invalid.**

**Cause:** Invalid OSSO Proxy configuration found during configuration update.

**Action:** Check the parameter passed during OSSO-Proxy configuration update.

Level: 1

Type: ERROR

Impact: Other

**OAM-18039: The global response cookie configuration cannot be deleted.**

**Cause:** The global OSSO response cookie configuration delete is not allowed.

**Action:** Check the parameter passed during OSSO-Proxy configuration update.

Level: 1

Type: ERROR

Impact: Other

**OAM-18040: Error while reading {0} Authentication Module Configuration.**

**Cause:** An internal error occurred.

**Action:** For more details, start foundation config logging at FINE level.

Level: 1

Type: ERROR

Impact: Other

**OAM-18041: Error while reading OAM Server Instance Configuration.**

**Cause:** An internal error occurred.

**Action:** For more details, start foundation config logging at FINE level.

Level: 1

Type: ERROR

Impact: Other

**OAM-18042: The Unique ID for server is null.**

**Cause:** An internal error occurred.

**Action:** For more details, start foundation config logging at FINE level.

Level: 1

Type: ERROR

Impact: Other

**OAM-18043: The OAM server is null.**

**Cause:** An internal error occurred.

**Action:** For more details, start foundation config logging at FINE level.

Level: 1

**Impact:** Other

**OAM-30014: GlobalPassphrase retrieved from server configuration is null. Registration failed.**

**Cause:** An internal error occurred. Error in retrieving globalPassphrase.  
**Action:**

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**OAM-30015: Error in decrypting the encrypted globalPassphrase. Registration failed.**

**Cause:** An internal error occurred. Error in decrypting the retrieved globalPassphrase.  
**Action:**

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**OAM-30016: Error in obfuscating the decrypted globalPassphrase. Registration failed.**

**Cause:** An internal error occurred. Error in obfuscating the decrypted globalPassphrase.  
**Action:**

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**OAM-30017: Internal error occurred. One of the mandatory response parameters is null. Registration failed.**

**Cause:** An internal error occurred. One or more of the mandatory response fields is empty.  
**Action:**

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**OAM-30018: Internal error occurred. No response generated, due to either bad input or backend failure. See log file for details.**

**Cause:** An internal error occurred. No response generated due to backend failure.  
**Action:** See log file for details.

**Level:** 1  
**Type:** ERROR

---

**Impact:** Other

**OAM-30019: Exception encountered either while creating or writing to the native config file : {0}**

**Cause:** An internal error occurred during creation of native config file

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30020: Exception encountered while writing to the output password file : {0}**

**Cause:** An internal error occurred during creation of output password.xml file

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30021: Error in obfuscating the OSSO agent's output config file (osso.conf). Registration failed.**

**Cause:** An internal error occurred. Error in obfuscating the created osso.conf config file.

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30022: Error in creating the credential store (wallet) : {0}**

**Cause:** An internal error occurred. Error in creating the creating the credential store (wallet).

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30023: Error in storing the secretKey in the credential store (wallet): {0}**

**Cause:** An internal error occurred. Error in storing the secretkey in the credential store (wallet).

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30024: Error occurred while parsing the XML file. Error message is : "{0}" at column number : "{1}" and at line number : "{2}"**

**Cause:** The XML file provided is invalid or not well-formed.

---

**Action:** Try again after verifying syntax and well-formedness of the XML as per the schema.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30025: Malformed registration request xml string : "{0}" - {1}**

**Cause:** The XML request string generated is malformed.

**Action:** Internal error during parsing. Check the input request xml and try again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-30026: {0}**

**Cause:**

**Action:**

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAM-30027: Error in unmarshalling operation : {0}**

**Cause:** Error in unmarshalling the XML data.

**Action:** Try again after verifying syntax and well-formedness of the XML as per the schema.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30028: Error in setting the validation schema : {0}**

**Cause:** Error in setting the validation schema

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30029: Error in setting the validation event handler : {0}**

**Cause:** Error in setting the validation event handler

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30030: Error in marshalling operation : {0}**

**Cause:** Error in marshalling the data.

---

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30031: The character encoding being used is not supported : {0}**

**Cause:** Internal error. Unsupported character encoding being used.

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30032: Exception encountered while writing to the certificate file : "{0}". Error message is: {1}**

**Cause:** An internal error occurred during creation of output password.xml file

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30033: Certificates could not be retrieved from the server location.**

**Registration failed: {0}**

**Cause:** An internal error occurred. Error in retrieving the certificates.

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30034: Error while reading the certificate file stream. Registration failed: {0}**

**Cause:** An internal error occurred. Error in retrieving the certificates.

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30035: Server instance is not running for the security mode specified: "{0}".**

**Cause:** Server instance not running for the security mode specified.

**Action:**

**Level:** 1

**Type:** WARNING

**Impact:** Other

**OAM-30036: Internal server error. No server instances are running.**

**Cause:** Internal server error occurred. No server instances exist.

---

**Action:**  
**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**OAM-30037: Server instance is not running for the security mode specified: "{0}".  
Try again using a different security mode.**  
**Cause:** Server instance not running for the security mode specified  
**Action:** Try again using a different security mode

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**OAM-30038: Internal server error. There are no server instances running.  
Registration failed. Please try again later.**

**Cause:**  
**Action:**

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**OAM-30039: Default security mode picked up for agent is: "{0}".**

**Cause:**  
**Action:**

**Level:** 15  
**Type:** NOTIFICATION  
**Impact:** Other

**OAM-30040: Could not retrieve the timeout cookie name and timeout cookie key  
information from the server configuration. Registration failed.**

**Cause:** An internal error occurred. Error in retrieving timeout cookie name and  
timeout cookie key for the agent.  
**Action:**

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**OAM-30041: Error while generating the cipher key or mask for the agent.  
Registration failed: {0}**

**Cause:** An internal error occurred. Error in generating the cipher key or mask for  
the agent.  
**Action:**

**Level:** 1  
**Type:** ERROR

---

**Impact:** Other

**OAM-30042: Error in decrypting the secret key while passing back in the response. Registration failed.**

**Cause:** An internal error occurred. Error in decrypting the secretkey while passing back in the response.

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30043: Agent type in the request is either null or unidentified. Please try again after verifying the agent type.**

**Cause:** Agent type that is passed in the request object is invalid.

**Action:** Try again after checking the agent type that is specified.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30044: Internal error while encrypting/obfuscating the password. Registration failed: {0}**

**Cause:** An internal error occurred. Error in encrypting/obfuscating the password.

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30045: The hostIdentifier string: "{0}" has already been added to an existing hostIdentifier called: "{1}". Try again after deleting the host entry from the existing hostIdentifier or registering with a new hostIdentifier name.**

**Cause:** The hostIdentifier string specified is already registered under a different hostIdentifier name.

**Action:** Try again after deleting the host entry from the existing hostIdentifier or registering with a new hostIdentifier name.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30046: {0} mode failed. Agent does not exist.**

**Cause:** Agent is not found.

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30047: Agent is found, but application domain does not exist. Agent could be in different application domain.**

---

**Cause:** The Application Domain is not found.

**Action:** For validation, application domain name is agent name.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30048: Url is not valid. Ensure that URL is of the format**

**http://example.domain.com:port or https://example.domain.com:port, where port number is optional.**

**Cause:** Url is not valid.

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30049: Exception encountered while creating the logout.html script file : {0}**

**Cause:** An internal error occurred while creating the logout.html script file

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30050: In DELETEMODE, agent profile deleted successfully, however,**

**artifacts output directory was not present or could not be deleted for the agent name: "{0}" at the output folder location: "{1}". Please delete the folder manually.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAM-30051: In DELETEMODE, agent profile and artifacts output directory was**

**successfully deleted for the agent name: "{0}" at the server side output folder location: "{1}".**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAM-30052: Exception encountered while updating agent profile. Update of agent failed. {0}**

**Cause:** An internal error occurred while updating agent profile

**Action:**

**Level:** 1

---

**Type:** ERROR

**Impact:** Other

**OAM-30053: Application domain does not exist. Policy update failed.**

**Cause:** The Application Domain is not found.

**Action:** Verify that the application domain you want to update exists and then try again.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30054: Host identifier does not exist or is empty. {0} mode failed.**

**Cause:** The Hostidentifier is not found.

**Action:** Verify that the hostidentifier you want to update exists and then try again.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30055: The host: "{0}" and port: "{1}" is already present under the hostIdentifier: "{2}" and was not added again.**

**Cause:** The hostPortVariation specified is already registered under an existing hostidentifier name, so it will not be added again.

**Action:**

**Level:** 1

**Type:** WARNING

**Impact:** Other

**OAM-30056: Application domain already exists. policyCreate mode failed. Use policyUpdate mode to update existing application domains.**

**Cause:** For policyCreate mode, application Domain already exists.

**Action:** Try again using policyUpdate mode to update existing application domains.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30057: Create policy resource exception. {0} URI={1}**

**Cause:** create resource failed. resouce/uri format is not valid.

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30058: Agent name {0} exceeds maximum allowed length of {1} characters.**

**Cause:** The name of the agent being created was too long.

---

**Action:** Try again using a shorter name.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30059: The user-specified managed server name/id: "{0}" does not exist. Registration failed. Please try again after specifying valid server name.**

**Cause:** The user-specified managed server name/id is invalid.

**Action:** Try again after providing a valid server name.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30060: Internal server error. The location "{0}" is invalid or does not exist in configuration. Registration failed.**

**Cause:** Internal server error. The specified location in the config file is invalid or not existing.

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAM-30061: isFusionAppRegistration flag was set to "{0}" and SSOOnlyMode field was set to true.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAM-30062: isFusionAppRegistration flag was set to "{0}" and denyOnNotProtected field was set to false(0).**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAM-30063: Agent type mismatch: Incoming agent request is of type: "{0}" , but the existing agent profile type in the server is: "{1}". Registration failed. Please try again after using agent name of the same type.**

**Cause:** Incoming agent type does not match with the agent type already registered in the server.

**Action:** Verify that the agentName belongs to the same type and try again.

**Level:** 1

---

Type: ERROR

Impact: Other

**OAM-30064: Agent version mismatch: Incoming agent request is of the correct type: "{0}" , but the version is: "{1}" , while the existing agent version in the server is: "{2}". Registration failed. Please try again after using agent name of the same version.**

**Cause:** Incoming agent type is the same, however, does not match the agent version already registered in the server.

**Action:** Verify that the agentName belongs to the same version and try again.

Level: 1

Type: ERROR

Impact: Other

**OAM-30065: Registration failed. Error in finding or reading the template file {0} for agent:{1} of type:{2}. - {3}**

**Cause:** An internal error occurred: the template file was not found or could not be opened.

**Action:**

Level: 1

Type: ERROR

Impact: Other

**OAM-30066: Warning: The host:port variation - {0}:{1} is not present under the hostIdentifier - {2} and so was not deleted.**

**Cause:** The host:port variation is not present under the given hostIdentifier

**Action:** Verify that the host:port variation you are passing is actually present

Level: 1

Type: WARNING

Impact: Other

**OAM-30067: Warning: HostIdentifier {0} cannot be empty, so added this host:port entry back to it - {1}:{2}**

**Cause:** The hostIdentifier cannot be empty, so cannot delete all host:port entries under it

**Action:** Adds the last entry being deleted back to the hostIdentifier

Level: 1

Type: WARNING

Impact: Other

**OAM-30068: Warning: None of the given host:port variations are present for the hostIdentifier- {0} , so nothing to delete.**

**Cause:** None of the specified host:port variations are present under the hostIdentifier

**Action:** Check the host:port variations list being passed and try again

Level: 1

## OAMSSA-00001 to OAMSSA-22030

**OAMSSA-00001: Service provider configuration {0} is not valid.**

**Cause:** The service provider configuration in the system configuration was invalid.

**Action:** Verify the identity and registration service provider configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-00002: Cannot instantiate service provider.**

**Cause:** The service provider configuration was invalid.

**Action:** Verify the identity and registration service provider configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-00003: Identity service configuration is not valid.**

**Cause:** The identity service configuration was invalid.

**Action:** Verify the identity service configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-00004: User self service configuration is not valid.**

**Cause:** The user self service configuration was invalid.

**Action:** Verify the user self service configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-00005: Identity Manager Integration is enabled {0}.**

**Cause:**

**Action:**

**Level:** 15

---

**Type:** INFO  
**Impact:** Other  
**OAMSSA-00006: User Self Service is enabled {0}.**  
**Cause:**  
**Action:**  
**Level:** 15  
**Type:** INFO  
**Impact:** Other  
**OAMSSA-00007: Policy Evaluation result {0}.**  
**Cause:**  
**Action:**  
**Level:** 15  
**Type:** INFO  
**Impact:** Other  
**OAMSSA-00008: Constructed URL {0}.**  
**Cause:**  
**Action:**  
**Level:** 15  
**Type:** INFO  
**Impact:** Other  
**OAMSSA-02001: Session not found for sessionid: {0}**  
**Cause:** Requested session object has expired, has been deleted, or does not exist.  
**Action:** Verify that the session exists before making the call.  
**Level:** 15  
**Type:** ERROR  
**Impact:** Other  
**OAMSSA-02002: Session not found for userid: {0} identity domain: {1} and sessionindex: {2}**  
**Cause:** The requested session object has expired, has been deleted, or does not exist.  
**Action:** Verify that the session exists before making the call.  
**Level:** 15  
**Type:** ERROR  
**Impact:** Other  
**OAMSSA-02003: Cannot find method {0} on class {1}**  
**Cause:** An attempt was made to access a method that does not exist.  
**Action:** Verify that the method exists before making the call.  
**Level:** 15

---

**Type:** ERROR

**Impact:** Other

**OAMSSA-02004: Cannot to execute method {0} on class {1}**

**Cause:** An attempt to execute a method that is not supported.

**Action:** Use a supported method.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02005: Cannot to get SessionManager for type: {0}**

**Cause:** An invalid type was specified.

**Action:** Verify that the type is supported before making the call.

**Level:** 30

**Type:** ERROR

**Impact:** Other

**OAMSSA-02006: SessionManager type not present: {0}**

**Cause:** The requested implementation was not specified in configuration files.

**Action:** Add the SessionManager type to the configuration files

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02007: Factory class does not have factory methods.**

**Cause:** Factory class does not have factory methods.

**Action:** None.

**Level:** 15

**Type:** INFO

**Impact:** Other

**OAMSSA-02008: Cannot instantiate the persistence access implementation for class {0}.**

**Cause:** An attempt was made to instantiate an invalid persistence access implementation.

**Action:** Verify the settings in the configuration file.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02009: Cannot extract attribute for method {0}.**

**Cause:** An incorrect method was used to extract an attribute value.

**Action:** Use the correct API call.

**Level:** 15

- 
- Type:** ERROR  
**Impact:** Other
- OAMSSA-02010: UpdateProcessor is in invalid mode for entry {0}.**  
**Cause:** UpdateProcessor serialization failure.  
**Action:** Verify the configuration files, and the deployment.
- Level:** 15  
**Type:** ERROR  
**Impact:** Other
- OAMSSA-02011: Cannot update attribute for method {0}.**  
**Cause:** An incorrect method was used to update the attribute value.  
**Action:** Use the correct API call.
- Level:** 15  
**Type:** ERROR  
**Impact:** Other
- OAMSSA-02012: Session count for user {0} has reached the maximum session limit per user.**  
**Cause:** Session count for user has reached the maximum session limit per user.  
**Action:** Log out of some of the sessions before attempting to create new sessions.
- Level:** 15  
**Type:** ERROR  
**Impact:** Other
- OAMSSA-02013: SME expired session reaper thread not started.**  
**Cause:** Database configuration may be in correct  
**Action:** Verify that the server started without errors.
- Level:** 15  
**Type:** WARNING  
**Impact:** Other
- OAMSSA-02014: Session {0} not deleted.**  
**Cause:** Database configuration may be in correct  
**Action:** Verify Data Source Name and database configuration
- Level:** 15  
**Type:** ERROR  
**Impact:** Other
- OAMSSA-02015: Session attribute type {0} for key {1} is not supported. Attribute will be ignored.**  
**Cause:** Data in database is corrupted due to unknown cause, or session is updated with unsupported data type properties.  
**Action:** Correct the session client api usage.
- Level:** 15

---

Type: ERROR

Impact: Other

**OAMSSA-02016: Session object for sessionid {0} was not loaded.**

**Cause:** Database configuration may be in correct

**Action:** Verify Data Source Name and database configuration

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-02017: Session object for sessionid {0} was not saved.**

**Cause:** Database configuration may be incorrect

**Action:** Verify Data Source Name and database configuration

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-02018: Session attribute value {0} for key {1} is not serializable. Attribute will be ignored.**

**Cause:** Session attribute value is invalid.

**Action:** Correct the session client api usage.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-02019: Session attribute key is null for userid {0} in session {1}.**

**Cause:** Session attribute key is null.

**Action:** Correct the session client api usage.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-02020: Grant for impersonation of user {0} by user {1} does not exist, or has expired.**

**Cause:** Impersonation grant does not exist, or has expired.

**Action:** Verify impersonation grant information.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-02021: Session exists for user {0} and sessionindex {1}.**

**Cause:** Session object already exists.

**Action:** Use the existing session.

Level: 15

---

**Type:** ERROR

**Impact:** Other

**OAMSSA-02022: Session {0} is not an impersonation session.**

**Cause:** Session is not impersonation session.

**Action:** Ensure that impersonation operations are done on an impersonation session.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02023: Session {0} for user {1} index {2} is already impersonating. Further impersonations not allowed.**

**Cause:** Impersonating sessions can not chain impersonation.

**Action:** Ensure that impersonation requests are done on non-impersonating sessions.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02024: Session {0} timed out.**

**Cause:** Session is inactive

**Action:** Re-authenticate user.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02025: Session attribute domain definition {0} is not supported. Default domain value of {1} used.**

**Cause:** Invalid configuration

**Action:** Correct the search attribute definition

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02026: QueryDescriptor has invalid value. {0} is {1}.**

**Cause:** Invalid search input

**Action:** Correct the search attribute definition

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02027: Search request failed. {0}.**

**Cause:** Search operation failed for provided cause.

**Action:** Correct the cause of the failure.

---

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-02028: Failed to transform the search request into a valid query.**

**Cause:** The search request was not transformed into a search query.

**Action:** Correct the cause of the failure.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-02029: Search request resulted in a null result object.**

**Cause:** The search request failed with no results.

**Action:** Correct the cause of the failure.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-02030: Selection list generation failed for extractor {0}.**

**Cause:** Selection list transformation not supported for extractor or attribute.

**Action:** Verify supported attributes used in the session search

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-02031: Where clause generation failed for extractor {0}.**

**Cause:** Extractor transformation not supported for extractor or attribute.

**Action:** Verify supported attributes used in the session search

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-02032: Selection list initialization failed for operation {0}.**

**Cause:** Selection list transformation initialization failed.

**Action:** Verify supported selection initialization for failed operations.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-02033: Initialization of search failed.**

**Cause:** Initialization of search failed

**Action:** Verify libraries and jar versions.

**Level:** 15  
**Type:** ERROR

---

**Impact:** Other

**OAMSSA-02034: Conversion of database value to boolean failed. Defaulting {0} to {1}.**

**Cause:** Database column mapping incorrect, or database column type incorrect.

**Action:** Verify database field configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02035: Unsupported session store version detected. Required "{0}" but found "{1}".**

**Cause:** The version of session store is not compatible with OAM version.

**Action:** Make sure OAM is configured to talk to correct version of session store.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02036: Ignoring declaration for invalid search attribute. {0}**

**Cause:** Invalid attribute definition in configuration.

**Action:** Verify the configuration of the search attributes.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02037: The background delete thread has become unresponsive. Falling back to foreground session deletion.**

**Cause:** The background delete thread has become unresponsive.

**Action:** Verify health of the JDBC data source connection.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02038: Failed to put session {0} on queue {1}.**

**Cause:** Resource bounds exceeded.

**Action:** Correct cause of server overload.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02039: Session store write restored at wait queue size {0}. Current limit on queue size is {1}.**

**Cause:** Load on background write queue has reduced.

**Action:** No action required.

**Level:** 15

---

**Type:** INFO

**Impact:** Other

**OAMSSA-02040: Session store write disabled at wait queue size {0}. Current limit on queue size is {1}.**

**Cause:** Load on background write queue has reached upper bound.

**Action:** Examine sources of loading.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAMSSA-02041: Client lease for session {0} has expired.**

**Cause:** Session update lease has expired.

**Action:** Examine use case of session update to eliminate updates using old session objects.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02042: Credentials for session {0} have expired.**

**Cause:** Session credential has expired.

**Action:** Perform credential validation.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAMSSA-02043: Session object expected. Null value found.**

**Cause:** Invalid input.

**Action:** Invoke method with valid input.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02044: Session update context object expected. Null value found.**

**Cause:** Invalid input.

**Action:** Invoke method with valid input.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-02045: Request to encode {0} numbers exceed maximum limit of {1}.**

**Cause:** Invalid input.

**Action:** Invoke method with valid input.

**Level:** 15

---

Type: ERROR

Impact: Other

**OAMSSA-02046: Credential validation date cannot be null.**

Cause: Invalid input.

Action: Invoke method with valid input.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-04001: Operation {0} is not supported.**

Cause: The requested operation was not supported.

Action: Use a supported operation.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-04002: Incorrect number of parameters {0} passed for operation {1}**

Cause: An incorrect number of parameters was passed to the expression builder.

Action: Pass the correct number of parameters required for the expression.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-04003: Unable to get data store instance.**

Cause: An invalid configuration file was supplied.

Action: Verify the configuration file.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-04004: Cannot get extractor list from passed configuration.**

Cause: An incorrect extractor list was supplied.

Action: Verify the supplied configuration.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-04005: Data store established but data connection cannot be made.**

Cause: Database connection information was invalid.

Action: Verify configuration files.

Level: 15

Type: INFO

Impact: Other

---

**OAMSSA-04006: Cannot get connection from data source.**

**Cause:** Data source configuration was invalid.

**Action:** Verify configuration files.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04007: Key is not unique: {0}**

**Cause:** The key in the database was not unique.

**Action:** Verify data integrity.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04008: Data source definition not found. Store will be in-memory only.**

**Cause:**

**Action:**

**Level:** 15

**Type:** INFO

**Impact:** Other

**OAMSSA-04009: Invalid parameter type passed to construct {0}**

**Cause:** The function parameter type was invalid.

**Action:** Verify client implementation.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04010: OAM Configuration for Coherence property {0} not found. Default configuration will be used.**

**Cause:** No overrides were specified.

**Action:** None.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04011: Cannot resolve address for server instance {0}.**

**Cause:** Server Instance listed in the Configuration is invalid.

**Action:** Correct the configuration and rerun the operation.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAMSSA-04012: Cannot set local host values for this server instance.**

---

**Cause:** Unable to set permissions for local host.

**Action:** Please verify the network configuration and rerun this operation.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAMSSA-04013: Coherence property type update is not supported for property {0}. Supported types include String, Integer, Boolean.**

**Cause:** An unsupported Coherence configuration property type was specified.

**Action:** Use a supported Coherence configuration property type.

**Level:** 15

**Type:** INFO

**Impact:** Other

**OAMSSA-04014: Cannot set override properties for Coherence due to exception.**

**Cause:** The supplied Coherence configuration properties are invalid.

**Action:** Correct the configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04015: Datasource not found for provided name {0}.**

**Cause:** The supplied Datasource name is invalid.

**Action:** Correct the configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04016: Cannot store key {0} in data store.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04017: Cannot erase key {0} in data store.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04018: Cannot get Iterator of keys from data store.**

**Cause:** An internal error occurred.

---

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04019: Cannot acquire distribution lock.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04020: Distribution version is {0}. Version requested for distribution is {1}.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04023: Cannot initialize configuration.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04024: Stale data exception encountered for config version {0}.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04032: Incorrect type of parameters {0} passed for operation {1}.**

**Cause:** An invalid parameter type was passed to the expression builder.

**Action:** Pass the correct parameters required for the expression.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04033: Failed to get encryption key.**

**Cause:** Shared Key for encryption not found.

**Action:** Verify that installation completed without errors.

---

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04034: Invalid configuration map path {0}**

**Cause:** Provided configuration map path is invalid.

**Action:** Ensure that the passed configuration map path is a valid path.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04035: Operation {0} supports {1} operand(s) only.**

**Cause:** Number of operands supplied for operation is incorrect.

**Action:** Correct the API call with the required number of operands.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04036: Criterion type {0} does not support operation {1}.**

**Cause:** Criterion does not support requested operation.

**Action:** Correct the API call with supported operand.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04037: Extraction of attribute {0} failed.**

**Cause:** Extraction of attribute failed.

**Action:** Correct the API call with supported attribute extractor.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04038: The passed Criterion object type {0} is not supported by transformer type {1}.**

**Cause:** Invalid parameter type.

**Action:** Correct the API call with supported criterion type.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04039: Transform for operation {0} not found.**

**Cause:** Operation transformation class not defined.

**Action:** Correct the transformation properties file.

**Level:** 15

---

Type: ERROR

Impact: Other

**OAMSSA-04040: Criterion {0} does not contain operation.**

Cause: Criterion does not contain operation.

Action: Correct the configuration to make the correct API call.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-04041: Failed to read the operation to transforms mapping configuration.**

Cause: Unable to read the operation to transforms mapping.

Action: Correct the configuration to make the correct API call.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-04042: Invalid mapping {0} found for operation {1}.**

Cause: Invalid operation to transform mapping.

Action: Correct the configuration to make the correct API call.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-04043: Null parameter value not supported.**

Cause: Invalid parameter provided

Action: Correct the API call invocation.

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-04044: Failed to sort on field {0}.**

Cause: Invalid sort field.

Action: Invoke the search operation with Comparable sort fields

Level: 15

Type: ERROR

Impact: Other

**OAMSSA-04045: Failed to read the attribute to operations mapping configuration.  
Using defaults.**

Cause: Unable to read the attribute to operations mapping properties file.

Action: Correct the configuration to make the correct API call.

Level: 15

Type: ERROR

---

**Impact:** Other

**OAMSSA-04046: Invalid mapping {0} found for attribute type {1}.**  
**Cause:** Invalid attribute type to operations mapping.  
**Action:** Correct the configuration to make the correct API call.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04047: Service {0} is not running.**  
**Cause:** Service has failed to start up or during operations.  
**Action:** Attempt to restart server.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04048: Cache member joined: {0}, service: {1}.**  
**Cause:** Cache cluster member has joined the service.  
**Action:** None

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-04049: Cache member leaving: {0}, service: {1}.**  
**Cause:** Cache cluster member is leaving the service.  
**Action:** None

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-04050: Cache member left: {0}, service: {1}.**  
**Cause:** Cache cluster member has left the service.  
**Action:** None

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-04051: Listener in {0}, Thread {1} before lock, dist version {2} config version {3}.**

**OAMSSA-04503: Distribution event of version {0} received for config of version {1}.**

---

**Cause:** An internal error occurred.  
**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04504: Received null object as distribution event.**

**Cause:** A null object was received as the distribution event.

**Action:** Verify the distributed data at the origin.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04505: Cannot handle distribution notification.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04506: Cannot acquire lock for configuration update.**

**Cause:** Unable to acquire lock for configurable update.

**Action:** Identify source of contention and remove it.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04507: Cannot upload physical file change to configuration.**

**Cause:** Unable to upload physical file change to configuration.

**Action:** Verify that the physical file is well formed.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04508: Mxbean attribute is null.**

**Cause:** The Mxbean attribute was null.

**Action:** Size of document may be large causing this failure.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04509: Cannot handle config change notification.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

---

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04510: Starting upgrade from {0} to {1} ...**

**Cause:**

**Action:**

**Level:** 15  
**Type:** NOTIFICATION  
**Impact:** Other

**OAMSSA-04511: Running {0} ...**

**Cause:**

**Action:**

**Level:** 15  
**Type:** NOTIFICATION  
**Impact:** Other

**OAMSSA-04512: Finished upgrade from {0} to {1}.**

**Cause:**

**Action:**

**Level:** 15  
**Type:** NOTIFICATION  
**Impact:** Other

**OAMSSA-04513: Source configuration path {0} is not specified, or is an invalid value.**

**Cause:** Configuration path not specified for upgrade source, or is invalid value.

**Action:** Provide a valid configuration path.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04514: Destination configuration path {0} is not specified, or is an invalid value.**

**Cause:** Configuration path not specified for upgrade destination, or is invalid value.

**Action:** Provide a valid configuration path.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04515: Configuration path {0} is not a valid file.**

**Cause:** Provided path does not resolve into a valid file.

**Action:** Provide a path to a valid configuration file.

---

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04516: Initialization of configuration copy failed {0}.**

**Cause:** Configuration initialization failed.

**Action:** Verify the contents of the configuration file.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04517: configuration upgrade failed for component {0}.**

**Cause:** Configuration upgrade failed.

**Action:** Rectify the cause of the failure.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04518: Failed to build configuration build settings.**

**Cause:** Configuration setting for upgrade is not valid.

**Action:** Rectify the cause of the failure.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04519: Upgrade action request {0} is not valid.**

**Cause:** Requested upgrade action invalid.

**Action:** Rectify the action request.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04520: Destination configuration does not support data type {0} requested at path {1}.**

**Cause:** Provided configuration map value is not supported in destination configuration.

**Action:** Transform the map value to a supported data type.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-04521: Destination configuration path {0} overwrites value {1} at element {2}.**

**Cause:** Destination path will overwrite value.

**Action:** Change upgrade instructions to prevent path from overwriting values.

---

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04522: Map destination path {0} will overwrite preserved path {1}.**

**Cause:** Destination path will overwrite value.

**Action:** Change upgrade instructions to prevent path from overwriting values.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04523: Exception occurred during write of configuration for examination.**

**Cause:** Failure to write configuration for examination.

**Action:** Correct the cause of the associated exception.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04524: Failed to create path {0}.**

**Cause:** Creation of folder or file specified by path failed.

**Action:** Verify that the path can be written to, and that sufficient disk space exists.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-05001: Unable to read configuration setting {0}, during Journal initialization.**

**Cause:** An internal error occurred while initializing a Journal.

**Action:** For more details, start logging at FINE level.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-05002: Invalid value {0} for parameter {1} was passed for Journal operation {2}, in instance {3}.**

**Cause:** An invalid parameter value was passed to the Journal operation.

**Action:** For more details, start logging at FINE level.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-05003: Unable to acquire lock on journal data for operation {0}, in instance {1}.**

**Cause:** A lock might have already been acquired by another thread, or there was an internal failure.

---

**Action:** For more details, start logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-05004: Journal entry with version {0} already exists in instance {1}.**

**Cause:** A journal entry with the version already exists.

**Action:** Use a different version for the journal entry.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-05005: Journal entry for version {0} does not exist in instance {1}.**

**Cause:** A journal entry for the version doesn't exist.

**Action:** Check version of the journal entry.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-05006: Unable to read Journal implementation name for instance {0} , using default name {1} instead.**

**Cause:** Journal implementation name is not set in journal config setting.

**Action:** For more details, start logging at FINE level.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAMSSA-05007: Journal configuration setting for instance {0} , key = {1}, value = {2}.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-05008: Journal data in instance {0}: type = {1}, value = {2}.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-05009: Source is not a OAM11gR1 config file, version expected: "{0}", found: "{1}".**

**Cause:** The source OAM config file does not belong to a OAM 11gR1 instance.

---

**Action:** Make sure config file from OAM 11gR1 instance is passed as source for upgrade.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-05501: Configuration for REST services not found.**

**Cause:** Configuration file does not contain REST configuration

**Action:** Configure OAM for REST services.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-05502: Class declaration {0} is invalid.**

**Cause:** REST class declaration is invalid.

**Action:** Correct the class declaration.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAMSSA-06001: Policy Service: {0} : {1} : {2} : {3}.**

**Cause:**

---

**Impact:** Other

**OAMSSA-06011: After Read All : {0} : list is : {1}.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06012: Initialize Parameter list is {0}.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06013: PolicyRuntime :: paramName="{0}", paramDetail="{1}".**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06014: Unable to initialize Policy Runtime Provider.**

**Cause:** An invalid configuration.

**Action:** Try again by setting proper configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06015: Exception encountered while processing get authentication scheme request!**

**Cause:** An internal exception occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06016: Unable to reload the policy data for runtime.**

**Cause:** An internal exception occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

---

**OAMSSA-06017: Exception encountered while creating runtime responses.**

**Cause:** An internal exception occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06018: Unable to load cache.**

**Cause:** An internal exception occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06019: Unable to load host identifiers from policy store.**

**Cause:** An internal exception occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06020: Exception encountered while evaluating authentication policy.**

**Cause:** An internal exception occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06021: Unable to obtain conditions from authorization policy.**

**Cause:** No conditions were found.

**Action:** Check if policy has conditions and try again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06022: Unable to obtain InetAddress from given IP Address.**

**Cause:** An invalid IP Address was supplied.

**Action:** Check if the IP Address is valid (Only IP version 4 is supported). Try again with valid IP Address.

**Level:** 15

**Type:** ERROR

**Impact:** Other

---

**OAMSSA-06023: Unable to determine the host identifier matching the request.**

**Resource:** {0}.

**Cause:** No host identifier was configured for incoming resource.

**Action:** Update the policy, add the host identifier to the given resource and try again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06024: Unable to process Runtime Resource for getting URL path.**

**Cause:** An invalid incoming resource URL.

**Action:** Correct the resource URL and try again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06025: Exception encountered while adding to the bucket.**

**Cause:** An internal exception occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06026: Object {0} with the name already exists.**

**Cause:** That name has already been used to create an object.

**Action:** Modify the name and try to create the object once again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06027: Error while creating input stream for the policy file.**

**Cause:** An internal error occurred. One of the many cause can be policy file not found.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06028: Error while creating a new policy distributor instance.**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

---

**OAMSSA-06029: ID of an element cannot be NULL.**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06030: Error while retrieving DATA SOURCE and RESPONSE TYPE values from policy.xml!**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06031: Error while retrieving the condition type.**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06032: Error while creating jaxb marshaller/unmarshaller.**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06033: Error while unmarshalling. Data may be corrupt in policy.xml**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06034: Policy data write failed with exception.**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06035: Error while creating input stream for policy file.**

---

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06036: Cannot find the file "{0}" in the classpath or on the filesystem**

**Cause:** The policy file was not in the classpath.

**Action:** Add policy file to the classpath and run the program again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06037: XML data validation Error. Data in the input XML String maybe corrupt.**

**Cause:** The policy file was invalid.

**Action:** Validate policy file against the schema and run the program again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06038: Validation Error while unmarshalling. Data in the input XML String maybe corrupt.**

**Cause:** The policy file was invalid.

**Action:** Validate policy file against the schema and run the program again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06039: Cannot create temporal condition. Require either DayOfWeek or TimeOfDay.**

**Cause:** The attribute required to create a temporal condition was not valid.

**Action:** Either DayOfWeek or TimeOfDay is missing. Add the required attribute and run the program again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06040: Invalid condition type "{0}" found in the policy store.**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

---

**OAMSSA-06041: Unable to distribute policy changes.**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06042: Null passed during modify operation.**

**Cause:** Object passed to modify operation was null.

**Action:** Rerun with actual object.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06043: Name cannot be null.**

**Cause:** During object creation, name value was null.

**Action:** Rerun the operation with a valid name.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06044: Name {0} exceeds maximum allowed length of {1} characters.**

**Cause:** During object creation, invalid name attribute was passed.

**Action:** Rerun the operation with a valid name attribute.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06045: An object of this type named "{0}" already exists.**

**Cause:** Policy object names must be unique for each object type and scope (global or domain).

**Action:** Choose a different name for this object.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06046: Mandatory attribute "{0}" is missing.**

**Cause:** A required attribute was missing during policy object creation.

**Action:** Rerun the operation with the required attribute. When authn-level is the required attribute, set a positive value and rerun the operation.

**Level:** 15

**Type:** ERROR

**Impact:** Other

---

**OAMSSA-06047: "name" or "description" attribute missing in Module Property.**

**Cause:** A name or description attribute was missing in a module property.

**Action:** Rerun the operation with required attribute set.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06048: Policy Object: {0} no longer exists.**

**Cause:** Policy object requested for removal was not found in the store; likely it has already been removed by another administrator.

**Action:** None, the object has been removed.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06049: Module cannot be deleted. (Referred in Scheme).**

**Cause:** Module is being referred to in the scheme.

**Action:** Remove the reference from the scheme and then delete the module.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06050: NULL passed during isDefaultAuthnScheme operation.**

**Cause:** Null passed while performing the default authn scheme operation.

**Action:** Rerun the operation with the valid scheme.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06051: One of the challenge parameter key values is empty.**

**Cause:** A challenge param key value was empty.

**Action:** Set the proper key value and then rerun the operation.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06052: Challenge Redirect URL is invalid.**

**Cause:** An invalid Challenge Redirect URL was entered.

**Action:** Rerun the operation with valid challenge URL value.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06053: Challenge URL is null.**

---

**Cause:** The URL entered is null.

**Action:** Re-run the operation with a valid URL value.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06054: Scheme referring to invalid authentication module.**

**Cause:** The scheme was referring to an invalid authentication module.

**Action:** Rerun the operation after setting a valid authentication module.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06055: Scheme cannot be deleted. Referenced in an existing authentication policy.**

**Cause:** The scheme is being referred to in a policy.

**Action:** Remove the reference from the policy and then delete the scheme.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06056: Default authentication scheme cannot be deleted.**

**Cause:** An attempt was made to delete the default authentication scheme, which is not allowed.

**Action:** Rerun the operation with another authentication scheme.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06057: Invalid host format.**

**Cause:** The host format was invalid.

**Action:** Rerun the operation with a valid host.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06058: Host "{0}" already exists under host identifier "{1}".**

**Cause:** The host is already part of a host identifier.

**Action:** Remove the host from the other host identifier and then retry.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06059: Host Identifier cannot be deleted. (Referred to in a resource).**

---

**Cause:** Host is being referred to in a resource.

**Action:** Remove the reference from the resource and then delete the host.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06060: Resource "{0}" does not exist in the application domain.**

**Cause:** Resource does not exist in the application domain.

**Action:** Use a valid resource that exists in the application domain.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06061: Resource "{0}" cannot be added to this policy, as it is already referenced by {1} Policy "{2}".**

**Cause:** A resource can only be associated with a single policy of a given type.

**Action:** Remove the resource from the named policy and try again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06062: A resource type name cannot start with a number.**

**Cause:** Resource type names must start with a letter.

**Action:** Remove the numeric characters from the start of the name.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06063: Invalid operation format.**

**Cause:** The operation list was invalid.

**Action:** Rerun the operation with a valid operation list.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06064: HostIdentifier is null.**

**Cause:** A null HostIdentifier was passed to the operation.

**Action:** Rerun the operation with a valid host identifier.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06065: Invalid HostIdentifier.**

**Cause:** No HostIdentifier was found in the policy.

---

**Action:** Rerun the operation with a valid host identifier.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06066: Unable to fetch HostIdentifier manager.**

**Cause:** An internal error occurred..

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06067: Resource URL format is not valid.**

**Cause:** URL \* was not followed by a .extension, or URL pattern (\*any string) \* was not followed by a character string, or URL \* was preceded by a string (e.g. checking\*.jsp is invalid), or URL pattern was invalid (e.g. "... " pattern is only allowed once).

**Action:** Rerun the operation with a valid resource url.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06068: Cannot delete resource, as it is referenced by {0} Policy "{1}".**

**Cause:** A resource currently in use cannot be deleted.

**Action:** Delete the resource from the named policy and try again.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06069: Token issuance policies can not contain responses.**

**Cause:** Token issuance policies can not contain responses.

**Action:** Remove the responses.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06070: Unable to obtain policy manager for application domain id: "{0}"**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06071: Temporal condition validation failure for {0}.**

---

**Cause:** Missing day of the week or time of the day required to create temporal condition, or no day selected in day of the week condition, or begin and end time not supplied for temporal condition, or end time is less than begin time.

**Action:** Rerun the operation with a valid Temporal condition.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06072: Identity condition validation failure for {0}.**

**Cause:** User or group list was not supplied for identity condition creation, or users list was empty, or group list was empty.

**Action:** Rerun the operation with a valid Identity condition.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06073: IP4Range condition validation failure for {0}.**

**Cause:** A null value was present in either start or end range.

**Action:** Rerun the operation with valid a IP4Range condition.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06074: {0} does not exist, id = {1}**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06075: Unable to obtain a host identifier for the input name : hostIdName = {0}.**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06076: Time of Day condition is not created as either begin time or end time is missing.**

**Cause:** An internal error occurred.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

- 
- Impact:** Other
- OAMSSA-06077: Cannot create condition object.**  
**Cause:** An internal error occurred.  
**Action:** For more details, start policy logging at FINE level.

**OAMSSA-06215: Could not find hostIdentifier for name: {0}.**

---

**Cause:** Given host identifier name was not found in the store.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06216: Could not find store entry for application domain Id: {0}.**

**Cause:** No entry was found in the store for the given application domain Id.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06217: Excluded resource: {0} is not associated with the exclusion policy.**

**Cause:** An excluded resource in the store was not associated with the exclusion policy.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06218: Invalid store resource name {0}.**

**Cause:** The store resource name entry was found to be invalid.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06219: Invalid operation name: {0}, operation name cannot end with string: {1}.**

**Cause:** The resource type operation name is invalid.

**Action:** Modify the operation name for the resource type.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06221: Exception while decrypting OES credentials.**

**Cause:** An exception occurred while decrypting store credentials.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

---

**OAMSSA-06222: Could not find the exclusion policy in the store from which to remove resource: {0}.**

**Cause:** The exclusion policy was not found in the store from which the resource was requested to be removed.

**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**Cause:**  
**Action:**  
**Level:** 15  
**Type:** NOTIFICATION  
**Impact:** Other

**OAMSSA-06251: Unsupported policy store version detected. Required "{0}" but found "{1}".**

**Cause:** The version of policy store is not compatible with OAM version.  
**Action:** Make sure OAM is configured to talk to correct version of policy store.  
**Level:** 15  
**Type:** ERROR  
**Impact:** Other

---

**OAMSSA-06252: The policy store is not available; please see the log file for more details.**

**Cause:** Policy store could not be instantiated. Database schema may be out of date

**Action:** In case of database schema errors schema needs to be updated.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06253: Database schema is not valid.**

**Cause:** Database schema is missing or requires update.

**Action:** Update the database schema.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06254: Profiling started, strategy: {0}, amount: {1}, mechanism: {2}**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06255: Profiling report for {0}: {1} ops, {2}/{3}/{4} avg/min/max (ms)**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06256: Profiling ended.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06257: All hosts from R1 host identifier {0} would be migrated to PS1 host identifier {1}.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

---

**OAMSSA-06258: The authentication scheme of authentication policy {0} would be modified to {1}.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06259: Extra resource(s) were found in R1 {1} Protected policy. The following will need to be recreated manually after the upgrade is complete: {0}.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06260: The LDAP filter {0} match for user {1} and identity domain {2} failed.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06261: The LDAP filter search not executed because there was no DN for user {0}.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06262: The LDAP filter {0} match for user {1} and identity domain {2} was successful.**

**Cause:**

**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-06263: No user identity provider for domain {0} could be found.**

**Cause:** No user identity provider could be found for the given domain.

**Action:** Check if the relevant userstore configuration was deleted.

**Level:** 15

---

**Type:** ERROR

**Impact:** Other

**OAMSSA-06264: Error getting the user identity provider for domain {0}.**

**Cause:** Unknown error while fetching the user identity provider for the given domain.

**Action:** Check the relevant userstore configuration

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06265: The IP4 Address {0} is not valid.**

**Cause:** The IP4 address specified is invalid.

**Action:** Specify a valid IP4 address. This should be in the dotted decimal format xxx.xxx.xxx.xxx, where xxx is a number between 0 and 255.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06266: The "From" address {0} in the IP4 range is greater than the "To" address {1}.**

**Cause:** The From address in the IP4 range is greater than the "To" address in the IP4 range.

**Action:** Update the IP4 range so that the "To" address is greater than the "From" address.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06267: Condition {0} does not contain any attributes.**

**Cause:** Attribute list was not supplied for condition creation.

**Action:** Rerun the operation with a valid attribute list.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06268: Condition {0} contains an unset attribute name.**

**Cause:** An attribute name was not supplied for condition.

**Action:** Rerun the operation with a valid attribute name.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06269: Condition {0} contains an unset attribute value.**

**Cause:** An attribute value was not supplied for condition.

**Action:** Rerun the operation with a valid attribute value.

---

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-06270: Resource type {0} cannot be created as read-only, or modified if already read-only.**

**Cause:** A policy admin cannot create/update/delete read-only resource type without permission to do so.

**Action:** Do not attempt to manipulate a read-only resource type.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-06271: One or more operations cannot be created as read-only, or modified if already read-only.**

**Cause:** A policy admin cannot create/update/delete read-only operation(s) without permission to do so.

**Action:** Do not attempt to manipulate a read-only operation within a resource type.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-06272: Operation {0} can not be used, because it does not exist for the type of this resource.**

**Cause:** An invalid operation, one which does not exist for the resource's type, was used.

**Action:** Ensure that the operations added to a resource are a subset of those defined for its resource type.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-06273: Policy contains more than one rule for rule effect "{0}".**

**Cause:** More than the allowed single rule per rule effect was present..

**Action:** Create the policy using a single rule per rule effect.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-06274: At least one of the policy rules must hold conditions selected for evaluation.**

**Cause:** A policy using the simple rule mode needs one or more of the rules to contain conditions.

**Action:** Select conditions on at least one of the rules.

**Level:** 15

---

**Type:** ERROR

**Impact:** Other

**OAMSSA-06275: Invalid condition name "{0}" specified in "{1}" rule.**

**Cause:** A condition name was used within a rule, when no condition by that name exists.

**Action:** Use names of conditions which exist when creating rules.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06276: The same rule mode must be used across all rules contained in a policy.**

**Cause:** More than one rule mode was used within the policy's rules.

**Action:** Use only one rule mode within a policy.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06277: Unable to process policy rule expression "{0}".**

**Cause:** Policy rule expression processing failed.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06278: At least one of the policy rules must hold an expression for evaluation.**

**Cause:** A policy using the expression rule mode needs one or more of the rules to contain expressions.

**Action:** Create a valid rule expression on at least one of the rules.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06279: Unexpected token "{0}" encountered at line "{1}", column "{2}" in the rule expression.**

**Cause:** Rule expression contains invalid syntax.

**Action:** Use a valid rule expression in rules within a policy.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06280: Number of open and close braces do not match in the rule expression.**

**Cause:** Rule expression contains invalid syntax.

---

**Action:** Use a valid rule expression in rules within a policy.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06281: Unable to escape special characters for condition name "{0}" to be used in rule expression.**

**Cause:** Internal error encountered while processing condition name.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06282: Unable to remove previously escaped special characters for a condition name "{0}" that is used in the rule expression.**

**Cause:** Internal error encountered while processing condition name.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06283: Condition name "{0}" used at line "{1}", column "{2}" in rule expression is not defined in the policy.**

**Cause:** Rule expression refers to a condition which has not been defined within the policy.

**Action:** Use a valid rule expression in rules within a policy.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06284: Both a query string and query parameters are specified for the resource.**

**Cause:** A resource can have a query string or parameters specified, but not both.

**Action:** Remove either the query string or the query parameters from the resource.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06285: Exception encountered during policy rule evaluation. Condition "{0}" does not exist in authorization policy.**

**Cause:** Internal error encountered while evaluating policy rule.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

---

**Impact:** Other

**OAMSSA-06286: Rule expression token must have a type.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAMSSA-06287: An HTTP runtime resource must contain a host name.**

**Cause:** The resource associated with the runtime request did not contain a host name..

**Action:** Create the request with a valid resource.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06288: An HTTP runtime resource must contain a valid port number.**

**Resource:** "{0}".

**Cause:** The resource associated with the runtime request did not contain a valid port.

**Action:** Create the request with a valid port, between 0 and 65535 inclusive.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06289: This resource already exists, within domain "{0}".**

**Cause:** Resources belong to different application domains, but must be globally unique.

**Action:** Either modify or remove the conflicting resource, or the elements of the one being created.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06301: Response tokenization failed for policy: "{0}" in domain: "{1}".**

**Response details:** "{2}".

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-06302: Error thrown during response processing:**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

---

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-06303: No provider registered to handle namespace: "{0}".**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-06304: Provider failed to retrieve value for policy: "{0}" in domain: "{1}".**

**Response details:** "{2}".

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08011: Unknown file notification error.**

**Cause:** File notifier error.

**Action:** Verify file change notification listeners.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08012: Stale data exception encountered for configuration version {0}.**

**Cause:** File version is old.

**Action:** Refresh to the latest file version.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08013: Configuration update failed with errors.**

**Cause:** Configuration update failed.

**Action:** Correct the cause of update failure.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08014: Configuration path is null.**

**Cause:** Request path value is null.

**Action:** Provide the path parameter in method call.

---

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08015: Configuration initial load failed for {0}.**

**Cause:** Initial load of configuration failed.

**Action:** Verify that the configuration file exists and is valid.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08016: Configuration does not exist for path {0}.**

**Cause:** Configuration for the path was null.

**Action:** Verify the path provided.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08017: Element {0} is not a map.**

**Cause:** Configuration for the path was invalid.

**Action:** Verify the path.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08018: Instance identifier is null.**

**Cause:** The input parameter was invalid.

**Action:** Validate the input parameter.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08019: Component at path {0} must contain Global, Profile, and Instance sections.**

**Cause:** The configuration path was invalid.

**Action:** Validate the input parameter.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08020: File is locked for updates by context {0}.**

**Cause:** An attempt was made to update a locked file.

**Action:** Release the lock before updating file from another context.

**Level:** 15

---

**Type:** ERROR

**Impact:** Other

**OAMSSA-08021: Cannot acquire notification lock.**

**Cause:** Lock is being held by other configuration service instances.

**Action:** Retry after a delay.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08022: Cannot apply compensating transaction on version:{0}.**

**Cause:** Failure is due to a cause that does not allow restoration of original values.

**Action:** Verify file system.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08023: Instance at {0} does not specify a {1}.**

**Cause:** Server instance definition incorrect.

**Action:** Correct the definition in the configuration file.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08024: Element type of xsd:string required at path {0}{1}{2}.**

**Cause:** Server instance profile type should be of type string.

**Action:** Correct the definition in the configuration file.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08025: Profile {0} specified by {1} does not exist.**

**Cause:** Server instance profile does not exist.

**Action:** Correct the definition in the configuration file.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08026: Profile {0} specified by {1} should be of type htf:map.**

**Cause:** Server instance profile should be of type map.

**Action:** Correct the definition in the configuration file.

**Level:** 15

**Type:** ERROR

**Impact:** Other

---

**OAMSSA-08027: Global section under {0} should be of type htf:map.**

**Cause:** Server global section should be of type map.

**Action:** Correct the definition in the configuration file.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08028: Error parsing the configuration file {0}.**

**Cause:** Error parsing the configuration file.

**Action:** Verify the configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08029: Configuration file open error {0}.**

**Cause:** An error occurred when opening the file.

**Action:** Verify the file location. Ensure that it is on the classpath or that its location is defined as a system property.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08030: Cannot get xml for configuration.**

**Cause:** Cannot get xml for configuration.

**Action:** Correct the error indicated by the exception.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08031: Cannot load configuration from InputStream.**

**Cause:** Cannot load configuration from InputStream.

**Action:** Correct the error indicated by the exception.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08032: Configuration event dispatch failed.**

**Cause:** Dispatch of the configuration event failed.

**Action:** Correct the error indicated by the exception.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08033: Setting handler not found for type: {0}.**

---

**Cause:** Configuration setting does not have a corresponding handler.

**Action:** Verify that the setting type is defined correctly.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08051: Configuration file is not loaded.**

**Cause:** Configuration file was not loaded. See exception for cause.

**Action:** Correct the configuration file if it is badly formed.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08052: Configuration model is not found for object type {0}.**

**Cause:** Configuration file was not loaded. See exception for cause.

**Action:** Correct the configuration file if it is badly formed.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAMSSA-08053: Error during construction of configuration model instantiation.**

**Cause:** Invalid configuration data.

**Action:** Verify the configuration data for correctness.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08054: Configuration file is not saved.**

**Cause:** Configuration file was not saved. See exception for cause.

**Action:** Correct the configuration file if it is badly formed.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08055: Configuration file does not support List of Lists construct. Ignoring element {0}.**

**Cause:** Configuration file has an unsupported data construct.

**Action:** Correct the configuration file if it is badly formed.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAMSSA-08056: Path {0} and key set in the CompositeData {1} do not match.**

**Cause:** Call made with inconsistent data.

---

**Action:** Correct the parameters of the call.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08057: Single valued data type found for multi-valued property on key {0}.**

**Cause:** Call made on invalid data type

**Action:** Correct the parameters of the call.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08058: Multi-valued data type found for single valued property on key {0}.**

**Cause:** Call made on invalid data type.

**Action:** Correct the parameters of the call.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08059: Operation returned type {0}. Expecting type {1}.**

**Cause:** Property type accessed not found.

**Action:** Use the correct operation for the type.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08060: Cannot apply document to configuration. Exception message is {0}.**

**Cause:** Document application failed.

**Action:** Use the correct operation for the type.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08061: Jar definitions provided for path {0} are invalid.**

**Cause:** The path does not exist, or the jars are missing.

**Action:** Correct the configuration file with the right values.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08062: Jar definition {0} provided is invalid.**

**Cause:** The path does not exist, or the jar is missing.

---

**Action:** Correct the configuration file with the right value.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08063: Distribution event of version {0} received for configuration of version {1}.**

**Cause:** Distribution values are not updated with latest configuration settings.

**Action:** Restart the server to ensure that it is synchronized with other servers.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08064: Received null object as distribution event.**

**Cause:** Some server has not placed the document on the distributor.

**Action:** Locate the server and restart it.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08065: Cannot handle distribution notification.**

**Cause:** An unexpected failure.

**Action:** Diagnose the problem from the stacktrace and address it.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08066: Cannot find the map for key {0}**

**Cause:** An attempt was made to add a value to a map that does not exist.

**Action:** Ensure that the map exists before adding the property for the map

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08067: Invalid data {0} provided for time interval**

**Cause:** Invalid data provided for construction of time interval.

**Action:** Correct the data in the configuration file.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08068: Invalid data {0} provided for memory size.**

**Cause:** Invalid data provided for construction of memory size.

**Action:** Correct the data in the configuration file.

---

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08069: Configuration MBean not initialized.**

**Cause:** Initialization failure during MBean startup.

**Action:** Verify the exceptions at startup and correct the cause of the error.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08070: Setting properties at path {0} not supported**

**Cause:** path provided is invalid

**Action:** Correct the path provided.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08071: Unsupported configuration store version detected. Required "{0}" but found "{1}".**

**Cause:** The version of config store is not compatible with OAM version.

**Action:** Make sure OAM is configured to talk to correct version of config store.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08072: Applying configuration update at path {0}. Current version of configuration {2}. Change initiated on this node: {1}**

**Cause:**

**Action:** None

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-08073: Error occurred while accessing the System Identity Store.**

**Cause:** Failure while processing the configuration or when accessing the System Identity Store.

**Action:** Verify the System Identity Store configuration and that the directory is up and running.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-08074: User {0} is not authorized to invoke operation on the Oracle Access Management MBeans**

---

**Cause:** The user does not have the privileges to access the MBeans.

**Action:** Verify the System Identity Store configuration to ensure the correct privileges are set.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-10001: SSO server token parsing failed.**

**Cause:** The SSO server token was invalid.

**Action:** Verify the server token key size and algorithm configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-10002: SSO server token Marshaling failed.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-10003: SSO Session is not valid.**

**Cause:** The SSO session was missing, has been deleted, or has expired.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-10004: Initialization of the SME adapter failed.**

**Cause:**

**Action:**

**Level:** 1

**Type:** INFO

**Impact:** Other

**OAMSSA-10005: Initialization of the PAT Adapter failed.**

**Cause:**

**Action:**

**Level:** 15

**Type:** INFO

**Impact:** Other

**OAMSSA-10006: Initialization of the SSO Engine is complete.**

**Cause:**

---

**Action:**

**Level:** 15

**Type:** INFO

**Impact:** Other

**OAMSSA-10007: Created session with session Id {0}.**

**Cause:**

**Action:**

**Level:** 15

**Type:** INFO

**Impact:** Other

**OAMSSA-10008: Retrieved session with session Id {0}.**

**Cause:**

**Action:**

**Level:** 15

**Type:** INFO

**Impact:** Other

**OAMSSA-10009: SSO request token parsing failed.**

**Cause:** The SSO request token was invalid.

**Action:** Verify the request token is invalid or truncated.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-10010: SSO request token Marshaling failed.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-12001: CSS Toolkit location {0} is invalid.**

**Cause:** The CSS Toolkit location does not exist, or was not valid.

**Action:** Verify the CSS Toolkit location in the configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-12002: CSS Configuration is not valid.**

**Cause:** The CSS configuration in the configuration was invalid.

**Action:** Verify the CSS Toolkit location and configuration.

---

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-12003: Cannot initialize CSS Authentication Module.**

**Cause:** The CSS Authentication module configuration was invalid.

**Action:** Check the CSS Authentication module configuration. Verify the Identity store properties like DN, User and Search-bases.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-12004: Authentication using CSS Authentication Module failed.**

**Cause:** An internal error occurred.

**Action:** Check the CSS Authentication module configuration. Verify the Identity store properties like DN, User and Search-bases.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-12005: Authentication Subject {0}.**

**Cause:**

**Action:**

**Level:** 15  
**Type:** INFO  
**Impact:** Other

**OAMSSA-12006: Server Instance Name {0}.**

**Cause:**

**Action:**

**Level:** 15  
**Type:** INFO  
**Impact:** Other

**OAMSSA-12101: Unable to register metrics for Authentication Engine with DMS.**

**Cause:**

**Action:**

**Level:** 15  
**Type:** NOTIFICATION  
**Impact:** Other

**OAMSSA-12102: Failed to initialize Authentication Engine Controller.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

---

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAMSSA-12103: Unable to connect to User Identity Store.**

**Cause:** The User Identity store was not running or the configuration was not valid.

**Action:** Verify that User Identity store is running and the configuration is valid.

**Level:** 15

**Type:** WARNING

**Impact:** Other

**OAMSSA-12104: Authentication Module Executor is unable to get configuration parameters.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Other

**OAMSSA-12105: Cannot initialize authentication scheme executor.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Other

**OAMSSA-12106: Authentication Failed.**

**Cause:** The authentication was not successful.

**Action:** For more details, start logging at the FINE level.

**Level:** 1

**Type:** TRACE

**Impact:** Other

**OAMSSA-12107: Invalid SPNEGO token in the request.**

**Cause:** The SPNEGO token in the incoming request was either invalid or missing.

**Action:** For more details, start logging at the FINE level.

**Level:** 1

**Type:** SEVERE

**Impact:** Other

**OAMSSA-12108: Invalid CallbackHandler in SPNEGO LoginModule.**

**Cause:** The CallbackHandler was not initialized properly.

**Action:** Verify the configuration.

---

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Other

**OAMSSA-12109: Invalid Subject in SPNEGO LoginModule.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 1

**Type:** INCIDENT\_ERROR

**Impact:** Other

**OAMSSA-12110: Currently only value {0} is supported for parameter {1}.**

**Cause:** An invalid value was supplied for a parameter.

**Action:** Rerun the operation with a valid parameter value.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**OAMSSA-12111: No user found in User Identity Store for the User certificate with certificate attribute {0} value {1}.**

**Cause:** The mapping of the user certificate to an user entry was incorrectly configured.

**Action:** Verify the configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAMSSA-12112: Cannot find the certificate of the OCSP server.**

**Cause:** No OCSP server certificate was present in the keystore.

**Action:** Ensure that correct value is configured for the parameter OCSP\_SERVER\_CERT\_ALIAS.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAMSSA-12113: Initialization of the X509ModuleExecutor failed.**

**Cause:** The keystore file was missing, or could not be read.

**Action:** Verify the configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAMSSA-12114: Initialization of the X509ModuleExecutor failed.**

**Cause:** An internal error occurred.

---

**Action:** Verify the configuration setting for the CERTMAPPERCLASS parameter of X509 Authentication Module and ensure that the class is present in the classpath.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAMSSA-12115: Initialization of the X509ModuleExecutor failed.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAMSSA-12116: Cannot find the user certificate.**

**Cause:** An internal error occurred.

**Action:** Verify the configuration and rerun this operation using a valid user certificate.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**OAMSSA-12117: Cannot validate the user certificate.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAMSSA-12118: Cannot load the configuration for authentication module {0}.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level. Check the log file and correct the error.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAMSSA-12119: Multiple users found in User Identity Store for the User certificate with certificate attribute {0} value {1}.**

**Cause:** The mapping of the user certificate to an user entry was incorrectly configured.

**Action:** Verify the configuration.

**Level:** 1

**Type:** ERROR

---

**Impact:** Other

**OAMSSA-12120: Failed to map DN against identity store.**

**Cause:** DN not found in Ldap store.

**Action:** Check DN and re-run the test.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-12121: Failed to map GUID against identity store.**

**Cause:** GUID not found in Ldap store.

**Action:** Check GUID and re-run the test.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Other

**OAMSSA-12122: Unable to find the mapper class for DAPModuleExecutor.**

**Cause:** Unable to find the mapper class.

**Action:** Check the DAP Module mapper class configuration

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-12123: Initialization of the DAPModuleExecutor failed.**

**Cause:** DAPModule init failed.

**Action:** Check the DAP Module configuration.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-12124: No user found in User Identity Store for the DAP Token with username value {0}.**

**Cause:** Username could not be found in the identity store.

**Action:** Check the incoming DAP assertion token.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-12125: No username found in DAP assertion token.**

**Cause:** No username found in request.

**Action:** Check the incoming DAP assertion token.

**Level:** 15

**Type:** ERROR

**Impact:** Other

---

**OAMSSA-12126: Cannot assert the username from DAP token.**

**Cause:** Cannot assert the username from DAP token

**Action:** Check the incoming DAP assertion token.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-12127: Retrieved Authentication Scheme {0}.**

**Cause:**

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Other

**OAMSSA-20045: Error validating Group Search Base : {0}.**

**Cause:** Test Connection failed validation of group search base.

**Action:** None.

**Level:** 15

---

**Type:** ERROR

**Impact:** Other

**OAMSSA-20046: Group Search Base not found or has 0 elements or Role Security Admin is invalid.**

**Cause:** Test Connection failed getting more than 0 entries in group search base.

**Action:** Check group search base in directory for entries, specifically OAM Role Security Admin.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-20047: No entries were found under the User Search Base : {0} with attribute : {1}.**

**Cause:** Test Connection failed getting more than 0 entries in user search base with the specified user name attribute.

**Action:** Check user search base in directory for entries or provide correct user name attribute.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-20048: Invalid User Name Attribute : {0}.**

**Cause:** User Name Attribute was invalid.

**Action:** Check if User Name Attribute is valid.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-20049: Subscriber Name : {0} : has no entries.**

**Cause:** Test Connection failed validation of Subscriber Name in directory.

**Action:** Check to see if the subscriber name attribute exists in directory.s

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-20050: Subscriber Name not found or has 0 elements.**

**Cause:** Test Connection failed getting more than 0 entries in subscriber name.

**Action:** Check subscriber name in directory for entries.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-20051: Failure testing connection : {0}**

**Cause:** Test Connection failed.

**Action:** Check parameters, entries, server.

---

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-20052: Authentication failed since user is locked in LDAP.**

**Cause:** Authentication failure due to user locked in LDAP. Native attribute of LDAP is modified to lock the user.

**Action:** Contact LDAP Administrator to unlock the user in identity store.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-20053: Failure matching parameters : {0}**

**Cause:** Error matching config parameters to check if update is required.

**Action:** Check parameters, server.

**Level:** 15

**Type:** ERROR

**Impact:** Other

**OAMSSA-20054: Invalid Role Security Admin : {0}**

**Cause:** Invalid Role Security Admin specified.

**Action:** Check Role Security Admin parameter.

**Level:** 15

## STS-10506 to STS-15541

**STS-10506: Username Token Password type {0} is not recognized**

**Cause:** The password type has not been configured in the sts configuration file

**Action:** Create a mapping for the passwordtype in the usernametokenpasswordtypeuris map

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**STS-10507: Multiple partners {2} were returned during the token mapping operation with Attribute ID={0} and Token Value={1}**

**Cause:** Multiple partner entries have the same identification strings

**Action:** Update the configuration for the partners so that there is no conflict

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**STS-12500: Xpath Exception: {0}.**

**Cause:** An Xpath exception occurred while trying to locate desired xml element.

**Action:** Verify that incoming xml message was correct.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12501: JAXB Exception: {0}.**

**Cause:** A JAXB exception occurred while trying to parse the xml element.

**Action:** Verify that the xml message was correct.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12507: Invalid Key Exception: {0}.**

**Cause:** An invalid key exception has occurred.

**Action:** Verify that all the keys present in all the certificates are valid (correct length, format, etc).

---

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12508: Signature Exception: {0}.**

**Cause:** A signature exception has occurred, certificate signature could not be verified.

**Action:** Check logs and exception message for more information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12510: Signing template configured in the template is missing.**

**Cause:** An error occurred due to missing signing template.

**Action:** Check configuration to add the missing signing template or check the template to specify an existing signing template.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12511: Encryption template configured in the validation template is missing.**

**Cause:** An error occurred due to missing encryption template.

**Action:** Check configuration to add the missing encryption template or check the validation template to specify an existing signing template.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12512: Token processing Exception: {0}**

**Cause:** An exception has occurred during token processing.

**Action:** Check logs and exception message for more information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12513: Keysource Exception: {0}.**

**Cause:** A keysource exception has occurred during token processing

**Action:** Check logs and exception message for more information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12514: No authenticator was found for authentication type: {0}.**

**Cause:** AuthenticationType specified for UsernameToken validation is invalid in template

---

**Action:** Check the authentication type in validation template

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12515: No validation template found.**

**Cause:** Validation template was not found

**Action:** Check configuration to add validation template

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12516: Unknown token: {0}.**

**Cause:** Token is not known type

**Action:** Check the token type in the message

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12517: Unknown name id format: {0}**

**Cause:** Name ID format is not known

**Action:** Check the nameid format

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12518: User was not mapped.**

**Cause:** The user could not be mapped.

**Action:** Check the logs for more information

**Level:** 1

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12521: Requester providerID not found.**

**Cause:** The requester provider was not found.

**Action:** Check the logs for more information

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12531: Requested claims have been filtered due to policies**

**Cause:** The Requester or Recipient Partner profiles filtered out some requested claims

**Action:** Check the list of attributes that can be requested by a Requester in the partner profiles of the Requester and Recipient

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12532: WSS Token Error: {0}.**

**Cause:** Custom token not correctly defined in configuration

**Action:** Check that the custom token is configured correctly in the server

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-12533: Invalid Token Mapping Action for None Token Type: {0}**

**Cause:** Token Mapping Action is not valid

**Action:** The token mapping action should be none or maprequesterbindingdata for tokentype none

**Level:** 1

**Type:** ERROR

**Impact:** Other

**STS-15504: Validation template cannot be used to process the following type of token: {0}**

**Cause:** The validation template is configured to process a token type different from the one presented

**Action:** Check that the validation template is configured for the correct protocol type

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

---

**STS-15505: Token is missing during validation processing with validation template {0}**

**Cause:** The security token is missing in the incoming request

**Action:** Check that the request is providing the expected security token for the validation template

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15506: Missing data for SAML Authentication Statement**

**Cause:** The authentication instant is missing

**Action:** Check that the token was validated correctly and that an authentication mechanism was set by the validation module

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15507: Digest Password Type not supported for Username Token Validation**

**Cause:** The Username Token contains a Password of type Digest

**Action:** Contact the client to request the password to be of type Text in the Username Token

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15508: Authorization Failure for Relying Party {0}, Requester {1} and User {2}**

**Cause:** The authorization policy evaluation failed for the specified parameters

**Action:** Check the configuration and/or policy for any errors

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15509: Assertion ID is missing**

**Cause:** The SAML Assertion in the Validation Request has AssertionID missing

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15510: Invalid SAML version in the token**

**Cause:** THE SAML Version specified in the token is not valid

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

---

**Impact:** Requests/Responses

**STS-15511: Issuer information is missing**

**Cause:** Issuer information in the token to be validated is missing

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15512: Invalid issue instant**

**Cause:** Token Issue instant is not valid

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15513: NOT\_BEFORE Condition failed for the token**

**Cause:** NOT\_BEFORE condition for the token validity failed

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15514: NOT\_ONAFTER Condition for the token failed**

**Cause:** NOT\_ONAFTER condition for the token validity failed

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15515: Authentication Time is invalid**

**Cause:** Authentication time for the token is not valid

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15516: Subject is invalid**

**Cause:** Subject for the token is not Valid

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15517: Authentication Method is not specified**

---

**Cause:** Authentication Method is not specified in the token

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15518: Authentication Instant is missing**

**Cause:** Authentication Instant is missing in the token

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15519: Authentication Context is missing**

**Cause:** Authentication Context is not specified in the token

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15520: Subject Confirmation NOT\_ONBEFORE condition failed**

**Cause:** The assertion not before condition was not satisfied

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15521: Subject Confirmation NOT\_ONAFTER condition failed**

**Cause:** The subject confirmation not on or after condition was not satisfied

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15522: Authentication Statement NOT\_ON\_AFTER condition failed**

**Cause:** The authentication statement not on or after condition was not satisfied

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15523: Creation Date could not be parsed**

**Cause:** The created date format could not be parsed

**Action:** Check the logs and Exception for more information

---

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15524: Creation Time is not valid**

**Cause:** The created time was before the valid period

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15525: Nonce was already used**

**Cause:** The nonce in the message was previously used

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15526: No Username in the token**

**Cause:** There is no user name in the token

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15527: Invalid Nonce Encoding**

**Cause:** The nonce encoding type is invalid

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15528: Nonce could not be decoded**

**Cause:** Nonce could not be decoded

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15530: Token could not be prased**

**Cause:** The token could not be parsed

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

---

**Impact:** Requests/Responses

**STS-15531: Token Type {0} is invalid**

**Cause:** Token Type is not valid

**Action:** Check that the token type in the SOAP request is valid

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15532: Signature in the token could not be verified**

**Cause:** Signature in the token could not be verified

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15533: Nonce Encoding is neither null nor default**

**Cause:** Nonce Encoding is neither null nor default

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15534: Message could not be decrypted**

**Cause:** The message could not be decrypted

**Action:** Check the logs and Exception for more information

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15535: SAML 1.1 Assertion does not contain any statements**

**Cause:** No Attribute Statement and no Authentication Statement are included in the Assertion, even if Oracle Secure Token Service is configured to include an Attribute Statement

**Action:** Check that at least one attribute can be used to populate the Attribute Statement

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15538: WSS token validation failed for ValidationTemplateID: {0} and Message {1}**

**Cause:** Invalid WSS token

**Action:** Provide valid WSS token.

**Level:** 1

---

**Type:** ERROR

**Impact:** Requests/Responses

**STS-15541: WSTrust token validation failed for ValidationTemplateID: {0} and Message {1}**

**Cause:** Invalid WSTrust token

**Action:** Provide valid WSTrust token.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses
