Preface

This document describes the Oracle Utilities Mobile Workforce Management Business Intelligence metrics (such as dashboards, analyses, and subject areas) available in Release 2.4.0 of Oracle Utilities Advanced Spatial and Operational Analytics. These metrics are used in the pre-built analyses, and/or available for customers to use via Oracle Answers in building new analyses or extending existing analyses.

Audience

This guide is intended for all users of Oracle Utilities Mobile Workforce Management Business Intelligence.

Typographical Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Chapter 1

Dashboard Content Reference

This chapter describes metrics available in Mobile Workforce Analytics of Oracle Utilities Advanced Spatial and Operational Analytics v2.4.0. The analytics enable utilities customers to monitor and measure crew optimization, and also measure the activity response time and route effectiveness.

The analyses are grouped by the following dashboards:

- **Overview**
- **Activities**
- **Appointments**
- **Emergencies**
- **Travel**
- **Crew**

Note: The data source indicator needs to be configured on the source application as mentioned in the section “Note for Data Source Indicator” in Chapter 3, in *Oracle Utilities Advanced Spatial and Operational Analytics Administration Guide*.

Overview

The Overview dashboard gives a snapshot of various entities of Oracle Utilities Mobile Workforce Management. The dashboard provides you with a quick update on the status of how well the crew organization is doing, and the user, crew's use of time, punctuality, and about overtime. It also lists down various details on emergencies, travel, and appointments.

Click **Dashboards**, expand **Mobile Workforce Analytics**, and then click **Overview** to access this dashboard.

Dashboards

Overview provides the following dashboard pages:

- **Overview - KPI**
- **Overview - Crew**
- **Overview - Activities**

Overview - KPI

The Overview - KPI dashboard page provides you with a quick update on the status of how the Service Organization is doing overall on its key performance indicators.

- **Utilization Rate**

Property	Value
Subject Area	MWM - Field Activity
Measure	Meeting Appointments Rate

This analysis shows the utilization rate (time spent working / total capacity) for the current month and current year. The utilization time represents wrench time.

Click the gauge to drill down to **Productive Vs Non-Productive Time** dashboard page in Meter Data Analytics.

- **Task Completion Rate**

Property	Value
Subject Area	MWM - Field Activity
Measure	Task Completion Rate

This analysis shows the task completion rate (tasks completed / tasks scheduled) for the current month and current year. Click the gauge to drill down to **Activities Scheduled Vs Completed** dashboard page.

- **First Pass Completion Rate**

Property	Value
Subject Area	MWM - Field Activity
Measure	First Pass Completion Rate

This analysis shows the first pass completion rate (percentage of tasks completed the first time) for the current month and current year. Click the gauge to drill down to **Activities Distribution** dashboard page.

- **Meeting Appointments Rate**

Property	Value
Subject Area	MWM - Field Activity
Measure	Meeting Appointments Rate

This analysis shows the meeting appointment rate (percentage of appointments that were kept on time) for the current month and current year. Click the gauge to drill down to **Appointments Scheduled and Completed** dashboard page.

Overview - Crew

The Overview - Crew dashboard page provides you with a quick update on the status of how the Crew organization is doing. It explains the user, crew's use of time, punctuality, and the overtime.

- **Non Productive Time**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	% of Total

This analysis shows non-productive time as a percentage of total time for all crews over three months. It gives a quick insight into usage of crew time and helps to identify any dramatic difference between past two months.

Click the graph to drill down to **Performance** dashboard page for utilization details.

- **On Time Shifts**

Property	Value
Subject Area	MWM - Completed Shifts
Measure	% of Total

This analysis shows the percentage of shifts on time (shifts which do not have either late logon or early log off). Click the gauge to drill down to **Shift Timeliness** dashboard page.

- **Overtime**

Property	Value
Subject Area	MWM - Completed Shifts
Measure	% of Actual

This analysis shows overtime as a percentage of actual duration, over three months. Click the graph to drill down to **Crew Overtime** dashboard page.

- **Travel**

Property	Value
Subject Area	MWM - Completed Shifts
Measure	Estimated Total Mileage, Actual Total Mileage

This analysis shows the total miles estimated and actual miles travelled across all shifts, over three months. Click the graph to drill down to **Mileage** dashboard page.

Overview - Activities

The Overview - Activities dashboard page provides you with a quick update on the status of activities, emergencies, and also appointments.

- **Activities Scheduled and Completed**

Property	Value
Subject Area	MWM - Activity
Measure	Activities Scheduled, Activities Completed

This analysis shows the number of activities scheduled and completed for over three months. Click the graph to drill down to **Activities Distribution** dashboard page for more specific details.

- **Emergencies - % of Total Activities**

Property	Value
Subject Area	MWM - Activity
Measure	Emergency Count

This analysis shows the number of emergencies handled in a month, over three months. Click the graph to drill down to **Daily Emergencies** dashboard page for more specific details.

- **Emergencies - Missed Response Time Target**

Property	Value
Subject Area	MWM - Activity
Measure	% of Total

This analysis shows the percentage of emergencies that missed SLA for a specific task type. Click the graph to drill down to **Emergencies** dashboard page.

- **Average Appointment Close Rate**

Property	Value
Subject Area	MWM - Activity
Measure	Average Appointment Close Rate

This analysis shows the appointment close rate (percentage of total scheduled appointments which were closed) for three months. Click the graph to drill down to **Appointments** dashboard page.

Activities

The Activities dashboard provides key performance indicators (KPIs) for the Oracle Utilities Mobile Workforce Management activities. This dashboard provides statistics on various commands issues to help utilities monitor crew optimization.

Click **Dashboards**, expand **Mobile Workforce Analytics**, and then click **Activities** to access this dashboard.

Dashboards

Activities provides the following dashboard pages:

- **Activities Distribution**
- **Multi-Attempt Activities**
- **Deviations**
- **Canceled and Incomplete**
- **Activities Map**
- **Activity Details**

Activities Distribution

The Activities Distribution dashboard page provides a snapshot of the activity distribution based on the criteria you select. You usually define generic criteria (such as calendar year and month, and activity type category) here before compiling the analysis.

- **Activities Scheduled vs Completed**

Property	Value
Subject Area	MWM - Activities Fact
Measure	Completed & Scheduled

This analysis displays the count of activities (both scheduled and completed), for the last 15 months. Scheduled activities in a month are open activities till that month, and completed activities are the activities completed in that month. The data helps to analyze the work load balance.

The table shows the number of scheduled and completed activities, and also the percentage of completion per each month. Click the table link to drill down to **Activity Details** dashboard page for specific details in that month.

- **Completed Activities Distribution**

Property	Value
Subject Area	MWM - Activities Fact
Measure	% of Total completed Activities

This analysis shows the percentage of completed activities by service category. Click the pie chart to view master detail implementation in the table. The table displays a list of completed activities by service category (selected in the pie chart) and task types within each service area hierarchy.

Click the table link to drill down to **Activity Details** dashboard for granular details.

Multi-Attempt Activities

Property	Value
Subject Area	MWM - Activities Fact
Measure	Number of multi attempts, Activities

This analysis shows the percent of total activities in each service category that took more than one attempt to complete an activity.

Click the pie chart to view master detail implementation in the table. The table displays a list of completed activities and the number of attempts for each activity to be complete by service category (selected in the pie chart) and task types within each service area hierarchy. Click the table link to drill down to **Activity Details** dashboard for granular details.

Deviations

The Deviations dashboard page provides a snapshot of work duration across various duration deviation buckets and service categories. Use this data to analyze how well the company is estimating travel and work durations.

- **Duration Deviation Distribution**

Property	Value
Subject Area	MWM - Activities Fact
Measure	Activities completed by duration deviation

This analysis shows the percentage of completed activities across various duration deviation buckets per month. Each activity is associated with a duration deviation bucket.

Click a segment on the pie chart to view the data on the **Duration Deviation by Service Category** pie chart.

- **Duration Deviation Trend**

Property	Value
Subject Area	MWM - Activities Fact
Measure	Number of Activities

Deviation is the difference between the estimated duration and actual duration. This analysis shows the number of activities per month per duration deviation bucket, for the last 15 months.

- **Duration Deviation by Service Category**

Property	Value
Subject Area	MWM - Activities Fact
Measure	Number of Activities, Task type

This analysis shows the percentage of completed activities, per service category, for the deviation duration bucket selected in **Duration Deviation Distribution** analysis.

Click the pie chart to view master detail implementation in the table. The table displays a list of completed activities and their respective activity type by service category (selected in the pie chart) within each service area hierarchy. Click the table link to drill down to **Activity Details** dashboard for granular details.

Canceled and Incomplete

The Canceled and Incomplete dashboard page provides a snapshot on how many new activities are created, completed, and canceled daily, and also the frequency and reasons for not completing activities on time.

- **Canceled Activities**

Property	Value
Subject Area	MWM - Activities Fact
Measure	% of activities cancelled

This analysis shows the distribution of activities cancelled in that month. It helps to identify the reasons for activities being cancelled.

The pie chart shows the percentage of cancelled activities per reason bucket.

- **Incomplete Activities by Reason**

Property	Value
Subject Area	MWM - Activities Fact
Measure	% number incomplete

This analysis shows the distribution of incomplete activities for the selected reason, per month. The pie chart shows incomplete activities across cancellation reasons. The top 5 reasons are shown in separate segments and the rest are combined into one segment.

Activities Map

The Activities Map dashboard page provides a spatial representation of open activities till the selected month.

Click the color-coded area on the map to display the postal code of that geographical region and the number of open activities per month in that region. Use the slider to set the color code for various regions and also to view data for a specific month.

The map also shows pie charts, one per postal code. Click the pie chart to display the number of activities in each work duration bucket.

Click the postal code link to drill down to **Multi-Attempt Activities, Deviations, Canceled and Incomplete** dashboard pages.

Activity Details

The Activity Details dashboard page displays the details of activities, such as activity type, crew, number of attempts, work duration deviation, and more. Click a table link to drill down to Oracle Utilities Mobile Workforce Management for details about the selected activity.

Appointments

The Appointments dashboard provides key performance indicators (KPIs) for the Oracle Utilities Mobile Workforce Management appointments for crew. The dashboard provides a snapshot of number of appointments which are scheduled, closed, and missed. These metrics help in identifying any anomalies about work management and resource management.

Click **Dashboards**, expand **Mobile Workforce Analytics**, and then click **Appointments** to access these dashboards.

Dashboards

Appointments provides the following dashboard pages:

- **Appointments**
- **Missed Appointments**
- **Appointments Map**
- **Appointment Details**

Appointments

The Appointments dashboard page provides a monthly analysis on the appointments scheduled and closed.

- **Appointments Scheduled & Closed**

Property	Value
Subject Area	MWM - Activities Fact
Measure	Number of Appointments

This analysis displays the number of appointments scheduled and closed till that month. The graph also shows the average appointments closed in a month.

The table shows the number of appointments scheduled and closed in a month, and also the percentage of appointments closed in that month. Click the table link to drill down to **Appointment Details** dashboard page for granular details.

Missed Appointments

The Missed Appointments dashboard page provides a snapshot of appointments missed due to various reasons.

- **Missed Appointments**

Property	Value
Subject Area	MWM - Activities Fact
Measure	Missed Appointments

This analysis shows the percentage of appointments missed out till that month for each lateness category, over 15 months. Use the slider to select the lateness category for which to view the details.

Click the graph to drill down to **Appointment Details** dashboard page to view specific details.

- **Missed Appointments by Activity Type**

Property	Value
Subject Area	MWM - Activities Fact
Measure	Missed Appointments

This analysis shows the distribution of missed appointments by activity type across different late buckets, in a month. It helps to identify the reason behind an appointment getting missed.

- **Crews with Most Missed Appointments**

Property	Value
Subject Area	MWM - Crew Tasks Fact
Measure	Missed Appointments

This analysis shows the top 5 crews with highest count of missed appointments. It helps to analyze the reasons for that crew to keep missing appointments so often.

- **Postal Codes with Most Missed Appointments**

Property	Value
Subject Area	MWM - Crew Tasks Fact
Measure	<no measures>

This analysis shows the top 5 postal codes with highest count of missed appointments.

Appointments Map

The Appointments Map dashboard page provides a snapshot of the number of appointments being scheduled on each day of the week and how are open yet.

- **Appointments Map**

Property	Value
Subject Area	MWM - Activities
Measure	<no measures>

This analysis provides a spatial representation of open appointments till the selected month.

Click the color-coded area on the map to display the postal code of that geographical region, the total number of appointments in that region, and the number of open appointments per month in that region. Use the slider to set the color code for various regions and also to view data for a specific month.

The map also shows pie charts, one per postal code. Click the pie chart to display the number of appointments in each appointment time bucket.

Click the postal code link to drill down to **Appointments** and **Missed Appointments** dashboard pages.

- **Appointments by Day of Week**

Property	Value
Subject Area	MWM - Activities
Measure	Number of Appointments

This analysis shows the total number of scheduled appointments for each day of the week for the selected month. Each day's total is further shown in time buckets.

Appointment Details

This analysis shows a list of missed appointments with associated details, such as crew, time of day, SLA status, and more. Click the table link to drill down to Oracle Utilities Mobile Workforce Management for more details.

Property	Value
Subject Area	MWM - Activities
Measure	<no measures>

Emergencies

The Emergencies dashboard provides key performance indicators (KPIs) for the Oracle Utilities Mobile Workforce Management emergencies. This dashboard gives a snapshot of how emergencies are distributed across time periods and how well are they handled.

Click **Dashboards**, expand **Mobile Workforce Analytics**, and then click **Emergencies** to access the dashboard.

Dashboards

Emergencies provides the following dashboard pages:

- **Emergencies**
- **Daily Emergencies**
- **Emergency Response Analysis**
- **Emergency Response Time**
- **Emergency Details**

Emergencies

- **Emergencies**

Property	Value
Subject Area	Emergencies
Measure	<no measures>

This analysis provides a spatial representation of emergencies for the selected month, over 15 months.

Click the color-coded area on the map to display the postal code of that geographical region, the number of emergencies in that region, and the average response time for each emergency. Use the slider to set the color code for various regions and also to view the data for a specific month.

Click the postal code link to view master detail implementation in **Emergencies by Month** and **Average Percentage of Emergencies Per Month** analyses.

The table displays the number of emergencies, service area hierarchy, and the service category per postal code. Click the table link to drill down to **Emergency Details** dashboard page.

- **Emergencies by Month**

Property	Value
Subject Area	MWM - Activities
Measure	Number of Emergencies

This analysis shows the emergency distribution for each month per activity type. It helps identify the trend in the number of emergencies and how they are distributed across activity types. Move the slider to display data per postal code.

Click the graph to drill down to **Daily Emergencies** dashboard page for specific details for the respective activity type.

- **Average Percentage of Emergencies Per Month**

Property	Value
Subject Area	MWM - Activities
Measure	Number of Emergencies

This analysis provides the average percentage of emergencies per month, over two years.

Daily Emergencies

Property	Value
Subject Area	MWM - Activities
Measure	Number of Emergencies

This analysis shows the number of emergencies for each day of the selected month. The table displays the number of emergencies along with service category and activity type for each day of the month. Click the table link to drill down to **Emergency Details** dashboard page.

Emergency Response Analysis

The Emergency Response Analysis dashboard page helps to understand out of all emergencies, how many are handled on time, are late, and also the distribution per lateness categories.

- **Emergency Response Met vs Missed**

Property	Value
Subject Area	MWM - Activities
Measure	% of Total Missed SLAs

This analysis shows emergencies for the selected period as either missed or met SLA. Click the pie chart to drill down to **Emergency Details** dashboard page for granular details.

- **Emergency Response Trend**

Property	Value
Subject Area	MWM - Activities
Measure	% of Total Missed SLAs

This analysis shows the percentage of emergencies whose response time overshoot the threshold time. Click the graph to drill down to **Emergency Details** dashboard page for specific details in that month.

- **Emergency Responses - On Time or Early**

Property	Value
Subject Area	MWM - Activities
Measure	% of Total Missed SLAs

This analysis shows emergencies for the selected period as either on time or early per lateness buckets.

- **Emergency Responses - Late**

Property	Value
Subject Area	MWM - Activities
Measure	% of Total Missed SLAs

This analysis shows emergencies whose response time overshoot the threshold time, per lateness bucket.

Emergency Response Time

The Emergency Response Time dashboard page gives a snapshot of the response times of crew as either early or late.

- **Emergency Responses Missed By Activity Type**

Property	Value
Subject Area	MWM - Activities
Measure	Number of Emergencies

This analysis shows the count of emergencies which missed their SLA as a percentage of all emergencies in the selected time period for each task type in the dataset.

- **Emergency Response Time - By Day Of The Week**

Property	Value
Subject Area	MWM - Activities
Measure	Response Time

This analysis shows how response time varies with different day of the week. The total response time is shown in four stacks - each stack indicating a specific time bucket. Average for each stack for each week day is calculated for the selected period and displayed when you hover the graph.

- **Top 10 Crews with Highest Average Emergency Response Time**

Property	Value
Subject Area	MWM - Activities

Property	Value
Measure	Highest Average Response Time

This analysis shows top 10 crews with highest average response time across all emergencies they attended in the selected data set.

- **Top 10 Postal Codes with Highest Average Emergency Response Time**

Property	Value
Subject Area	MWM - Activities
Measure	Highest Average Response Time

This analysis shows top 10 postal codes with highest average response time across all emergencies associated with them in the data set.

- **Response Time Trend**

Property	Value
Subject Area	MWM - Activities
Measure	Average Response Time, Moving Response Time

This analysis gives a snapshot of how the average response time is trending for a specific task type. It shows the monthly average response time for all emergencies, by default, for the selected year. The graph also shows moving average of the average response time.

Emergency Details

The Emergency Details dashboard page shows a list of emergencies with detailed information. The details on this page change based on the dashboard page from where you are navigating to this analysis.

Click the table link to drill back to Oracle Utilities Mobile Workforce Management.

Property	Value
Subject Area	MWM - Activities
Measure	<no measures>

Travel

The Travel dashboard gives an overview of various entities of Oracle Utilities Mobile Workforce Management. The dashboard provides a quick update on the status of how the Crew organization is doing. It also lists down various details on emergencies, travel, and appointments.

Click **Dashboards**, expand **Mobile Workforce Analytics**, and then click **Travel** to access the dashboard.

Dashboards

Travel provides the following dashboard pages:

- **Mileage**
- **Mileage Deviation Comparison**
- **Travel Time**
- **Travel Details**

Mileage

The Mileage dashboard page helps to verify if our estimation is correct or if vehicles being driven are more than necessary. The page also provides details about tasks and crews associated with deviation distributed across deviation categories.

- **Average Miles per Vehicle**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	Avg Actual Miles, Avg Estimated Miles

This analysis shows average miles per vehicle for the selected period, for the last 15 months. The graph displays both the estimated and the actual details to analyze the estimation.

- **Mileage Deviation Distribution**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	% of Total

This report shows the percentage of shifts that are associated with each of the travel time duration deviation buckets. The pie chart shows how the tasks with deviation are distributed across deviation categories.

Click the pie chart to display master-detail relation; the view of bar graph in **Top 10 Crews** analysis changes on clicking a pie section.

- **Top 10 Crews**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	Number of Shifts

This analysis shows the top 10 crews with most tasks in the selected deviation bucket. It helps to identify which crew is mostly associated with each deviation category.

- **Mileage Deviation Distribution Details**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	<no measures>

This analysis displays the details mileage deviation distribution for a crew, such as deviation buckets and count of shifts.

Mileage Deviation Comparison

This analysis shows the deviation between estimated and actual as a percentage of estimate. You can choose two specific crews to compare deviation in mileage across months, for the last 15 months.

Property	Value
Subject Area	MWM - Completed Shift
Measure	Mileage Deviation

Travel Time

- **Travel Time Estimate Vs Actual**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	Actual Travel Time, Estimated Travel Time

This analysis compares the estimated travel time and actual travel time per month, over 15 months. Click the graph to drill down to **Travel Details** dashboard page for granular details in the selected month.

- **Travel Duration Deviation**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	% of Total

This analysis shows the percentage of activities that are associated with each of the travel time duration deviation buckets. The table displays the number of activities associated with each travel duration deviation bucket and also the crew details. Click the table link to drill down to **Travel Details** dashboard page for specific details.

- **Top 10 Crews**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	Number of Activities

This analysis shows top 10 crews with highest number of tasks in the selected deviation bucket. Use the slider to select the required deviation bucket.

Click the graph to drill down to **Travel Details** dashboard page for specific details about the crews in the selected deviation bucket.

- **Top 10 Postals**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	Number of Activities

This analysis shows the top 10 postal codes with highest number of tasks in the selected deviation bucket. Use the slider to select the required deviation bucket.

Click the graph to drill down to **Travel Details** dashboard page for specific details about the crews in the selected deviation bucket.

Travel Details

The Travel Details dashboard page shows list of crews with detailed information. The table displays details such as crew shift, the service area, estimated and actual durations, and also deviations (if any) for a particular crew.

Click the table link to drill back to Oracle Utilities Mobile Workforce Management.

Property	Value
Subject Area	MWM - Completed Shift
Measure	<no measures>

Crew

The Crew dashboard provides key performance indicators (KPIs) for the Oracle Utilities Mobile Workforce Management crew. This dashboard gives a snapshot of the crew performance, and also an insight based on comparison analysis, Top N and deviation reports, and the trend in number of shifts.

Click **Dashboards**, expand **Mobile Workforce Analytics**, and then click **Crew** to access the dashboard.

Dashboards

Crew provides the following dashboard pages:

- **Performance**
- **Productivity Analysis**
- **Crew Comparison**
- **Shift Timeliness**
- **Top N - Shift Timeliness**
- **Least Productive Time**
- **Most Productive Time**
- **Most Idle Time**
- **Crew Overtime**
- **Idle Time Details**
- **Shift Details**
- **Overtime Details**

Performance

The Performance dashboard page provides an overview of crew performance.

- **Productive Vs Non Productive Time**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	Time In Minutes

This analysis compares the productive and non-productive time per month, over 15 months, at the highest level of crew hierarchy. It helps in analyzing the trend for productive and non productive crew time and thus calculate the utilization percentage.

Productivity Analysis

The Productivity Analysis dashboard page gives a snapshot about the time being spent on various buckets.

- **Productive Time**

Property	Value
Subject Area	MWM - Shift Overview

Property	Value
Measure	Average Productive Time, % of Total

This analysis shows the distribution of productive time spent across various time buckets. Click the pie chart or the table link to drill down to **Travel Task Details** dashboard page.

- **Non-Productive Time**

Property	Value
Subject Area	MWM - Shift Overview
Measure	Average Productive Time, % of Total

This analysis shows the distribution of non-productive time spent across various time buckets. Click the pie chart or the table link to drill down to **Travel Task Details** dashboard page.

Crew Comparison

- **Crew Comparison**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	Time in minutes for selected crew

This analysis presents the total time spent in each time bucket in various crew hierarchy levels. The graph shows comparison of time spent by the selected crews against each time bucket. You can select two crews at any time.

Shift Timeliness

The Shift Timeliness dashboard page provides details about late starting or early ending shifts.

- **Late Shift Start - Trend**

Property	Value
Subject Area	MWM - Completed Shift
Measure	Shift Count

This analysis shows the distribution of late shift start across various late shift buckets, for the last 15 months. Click the graph or table link to drill down to **Shift Details** dashboard page for specific details about the shifts in that lateness bucket.

- **Early Shift Finish - Trend**

Property	Value
Subject Area	MWM - Completed Shift
Measure	Shift Count

This analysis shows the distribution of early shift finish across the various late shift buckets, over 15 months. Click the graph or table link to drill down to **Shift Details** dashboard page for specific details about the shifts in that lateness bucket.

Top N - Shift Timeliness

The Top N - Shift Timeliness dashboard page provides details about the top N crews who either start their shift late or finish their shift early.

- **Top N Crews with Most Late Shift Start**

Property	Value
Subject Area	MWM - Completed Shift
Measure	% Of Total Shifts

This analysis shows the top N crews with most number of shifts with late start, for the selected month.

The pie chart displays the distribution of late shifts for the selected crew across the lateness buckets. Click the chart to drill down to **Shift Details** dashboard page for specific details about the shifts in that lateness bucket.

The table displays the Top N crew details. Click the table link to drill down to **Shift Details** dashboard page for specific details.

- **Top N Crews with Most Early Shift Finish**

Property	Value
Subject Area	MWM - Completed Shift
Measure	% Of Total Shifts

This analysis shows the top N crews with most number of shifts with early finish, for the selected month. The data set is for the selected time period. Default for the time period is current month. Click the chart to drill down to **Shift Details** dashboard page for specific details about the shifts in that lateness bucket.

The table displays the Top N crew details. Click the table link to drill down to **Shift Details** dashboard page for specific details.

Least Productive Time

The Least Productive Time dashboard page gives an overview of the top N crews with least productive time.

- **Crew with Least Productive Time**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	% Total, Average Productive Time

This analysis shows the top N crews with least productive time. The graph also displays the average productive time across crews.

- **Non-Productive Time**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	Non Productive Time

This analysis shows the non-productive time distribution for selected crew. Use the slider to select the specific crew, and the pie chart changes to reflect the data for that specific crew.

Most Productive Time

The Most Productive Time dashboard page provides an overview of the top N crews with most productive time.

- **Crew with Most Productive Time**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	% Total, Average Productive Time

This analysis shows the top N crews with most productive time as percentage of total. The graph also displays the average productive time across crews.

- **Productive Time (Most)**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	Productive Time

This analysis displays the productive time distribution for the selected crew. Use the slider to select the specific crew, and the pie chart changes to reflect data for that specific crew.

Most Idle Time

The Most Idle Time dashboard page provides a snapshot of crews with idle time.

- **Crew with Highest Idle Time**

Property	Value
Subject Area	MWM - Crew Tasks
Measure	% Of Total

This analysis shows the top N crews in the selected hierarchy with highest idle time. The graph also displays the average idle time for selected crews. Click the graph to drill down to **Idle Time Details** dashboard page for granular details.

Crew Overtime

The Crew Overtime dashboard page provides details about any overtime put in by a crew.

- **Top N Most Overtime**

Property	Value
Subject Area	MWM - Completed Shift
Measure	Overtime Hrs

This analysis shows the top N crews with most overtime hours for the selected period. The graph also shows the average overtime duration for the selected crew. Click the graph to drill down to **Overtime Details** dashboard page.

- **Overtime Trend**

Property	Value
Subject Area	MWM - Completed Shift
Measure	Overtime Hrs, Planned Hrs
