Preface

The *ActiveX Migration Guide* provides information on migrating to the new AutoVue Desktop Deployment ActiveX wrapper from the Desktop Version ActiveX solution.

For the most up-to-date version of this document, go to the AutoVue Documentation Web site on the Oracle Technology Network at http://www.oracle.com/technetwork/documentation/autovue-091442.html.

Audience

This document is intended for those who wish to migrate to the newest release of Oracle AutoVue's ActiveX wrapper. This guide serves as a good starting point for developers and professional services to become more familiar with the ActiveX wrapper.

Documentation Accessibility

Our goal is to make Oracle products, services, and supporting documentation accessible to all users, including users that are disabled. To that end, our documentation includes features that make information available to users of assistive technology. This documentation is available in HTML format on the Oracle Technology network, and contains markup to facilitate access by the disabled community. Accessibility standards will continue to evolve over time, and Oracle is actively engaged with other market-leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers. For more information, visit the Oracle Accessibility Program Web site at http://www.oracle.com/accessibility/.

Accessibility of Code Examples in Documentation

Screen readers may not always correctly read the code examples in this document. The conventions for writing code require that closing braces should appear on an otherwise empty line; however, some screen readers may not always read a line of text that consists solely of a bracket or brace.

Accessibility of Links to Extern Web Sites in Documentation

This documentation may contain links to Web sites of other companies or organizations that Oracle does not own or control. Oracle neither evaluates nor makes any representations regarding the accessibility of these Web sites.

TTY Access to Oracle Support Services

Oracle provides dedicated Text Telephone (TTY) access to Oracle Support Services within the United States of America 24 hours a day, 7 days a week. For TTY support, call 800.446.2398. Outside the United States, call +1.407.458.2479.

Introduction

This ActiveX migration guide provides essential information for system integrators who wish to migrate to the new Oracle AutoVue Desktop Deployment ActiveX wrapper from the Oracle AutoVue Desktop Version ActiveX solution. This new ActiveX control can be used to integrate Oracle AutoVue Desktop Deployment with your application.

Note: Desktop Deployment ActiveX and Oracle AutoVue Desktop Deployment cannot run concurrently.

For more detailed descriptions of the methods mentioned in this document, refer to the ActiveXAPI.html document that is located at <AutoVue Desktop Deployment Installation>\docs.

Deployment

To properly deploy the ActiveX wrapper integration with your application, you must take note of the following:

- AutoVue ActiveX Control (jVueAX.ocx) is shipped as part of AutoVue Desktop Deployment and is registered with Windows during installation.
- The Desktop Version ActiveX contained 4 controls: "AutoVueX", "AvMarkupX", "AvPrintX" and "AvCompareX". The new Desktop Deployment ActiveX has a single control: "AutoVue ActiveX".
- AutoVue Desktop Deployment contains Java-based technology. As a result, Java Virtual Machine
 will be loaded into the process of the application that integrates with the ActiveX. The location
 and initialization of the JVM are handled by the autovue.jre.path and autovue.cmdline keys,
 respectively, in autovue.properties.
- All the JARs and native binaries needed by the ActiveX are located in the <AutoVue Desktop Deployment installation directory>\bin directory.
- Integration to a 64-bit Windows application is not supported as the ActiveX wrapper contains 32-bit native binaries.

Initialization

When calling the *initActiveX* method, you have the option to pass client parameters (for example, a GUI customization parameter). To do so, you must first call the *setValue* method to pass the parameters and then make a call to *initActiveX*.

The GUI customization parameter, GUIFILE, contains definitions of the application UI. These definitions must be created and placed in the <AutoVue Desktop Deployment installation>\Profiles directory. Note that you must set the GUIFILE parameter to the filename of the GUI file.

Markups

By default, Oracle AutoVue Desktop Deployment stores markups in an avred sub-folder at the location of the document marked up by AutoVue. This behavior is the same as the default behavior of AutoVue

Desktop Version. To save markups at a central location, you must set jvueserver.markups.local.directory to a path where you want to store all the markup files.

Configurations

AutoVue Desktop Version ActiveX control uses a configuration file "<%WINDIR%>\avx.ini". In contrast, AutoVue Desktop Deployment ActiveX stores configurations at <*AutoVue installation directory*>*Profiles*\<*username*>.ini. There's also an INI option in autovue.properties to specify a custom location for profiles.

You can also set options in files default.ini or allusers.ini. The first time a user launches AutoVue, the contents of default.ini are written to <username>.ini. The contents of allusers.ini are written to <username>.ini every time a user launches AutoVue.

Refer to the *Viewing Configuration Guide* for more information on INI files and INI options. Refer to *AutoVue Desktop Deployment Installation and Configuration Guide* for additional information on configuring AutoVue.

A migration guide is available for customers that are planning to move from the Desktop Version to the Desktop Deployment. Contact an Oracle Customer Support representative for a copy of the migration guide.

APIs

The Desktop Version contains the following controls:

- AutoVueX
- AvMarkupX
- AvPrintX
- AvCompareX

The tables in following sections map Desktop Version ActiveX Controls' methods and properties to an equivalent Desktop Deployment ActiveX API.
