License Restrictions Warranty/Consequential Damages Disclaimer

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

Warranty Disclaimer

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

Restricted Rights Notice

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

Hazardous Applications Notice

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Third Party Content, Products, and Services Disclaimer

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Contents

Preface

PeopleSoft Contributor Relations Preface	xxv
PeopleSoft Products	xxv
PeopleSoft Campus Solutions Application Fundamentals	xxv
PeopleBook Structure	xxv
PeopleBooks and the PeopleSoft Online Library	xxviii
Common Elements Used in This PeopleBook	xxviii

Chapter 1

Getting Started with Contributor Relations	1
Contributor Relations Overview	1
Contributor Relations Business Processes	1
Contributor Relations Integrations	2
Contributor Relations Implementation	2

Chapter 2

Setting Up Your Contributor Relations Framework	5
Completing a PeopleSoft Contributor Relations Installation	5
Page Used to Complete a PeopleSoft Contributor Relations Installation	5
Setting Up Contributor Relations Installation Defaults	5
Setting Up Institution Defaults	9
Pages Used to Set Up Institution Defaults	10
Setting Up Institution Default Values	10
Setting Up Bio Bit and Bio Brief Reports	12
Setting Up Additional Default Values for the Institution	13
Defining Name Display Settings	15
Understanding Name Display	15
Pages Used to Define Name Display Settings	15
Defining a Name Display Type	15
Configuring Name Display Rules	16
Adding Resources	18
Understanding Resources	19
Pages Used to Add Resources	21

Defining Roles	22
Defining Staff and Volunteers	24
Defining Units	25

Chapter 3

General Functions Used Throughout the System	27
Linking a Spouse to a Constituent Record	27
Working with Worksets	27
Understanding Worksets	28
Pages Used to Work with Worksets	28
Creating a Workset	28
Joining Worksets	29
Building a Workset From a Page in the System	30
Creating Service Indicators	31
Reviewing Constituent Type and Class Year	31
Sending Email Notifications	31
Pages Used to Send Email Notifications	31
Creating and Viewing Attachments	32
Understanding Attachments	32

Chapter 4

Setting Up Constituent Data	35
Prerequisites	35
Defining Constituent Types	36
Understanding Constituent Types	36
Page Used to Define Constituent Types	37
Setting Constituent Types Values	38
Defining Involvement Categories	38
Page Used to Define Involvement Categories	38
Setting Involvement Category Definitions	39
Defining Involvement Types	39
Page Used to Define Involvement Types	40
Setting Involvement Types Values	40
Defining Involvement Codes	41
Understanding Involvement Codes	41
Page Used to Define Involvement Codes	41
Setting Involvement Codes Values	41
Defining Person and Organization Relationships	42
Page Used to Define Person and Organization Relationships	43
Defining Person/Org Relationships Values	43

Defining Organization Reciprocal Relationships	43
Page Used to Define Organization Reciprocal Relationships	44
Setting Reciprocal Relationship Values	44
Setting Up Contact Types	44
Setting Up Attachment Types	44
Page Used to Set Up Attachment Types	45
Defining Attachment Types	45

Chapter 5

Setting Up Prospects	47
Prerequisites	47
Setting Up Prospect Identifiers	47
Pages Used to Set Up Prospect Identifiers	48
Defining Asset Types	49
Defining Rating Types	50
Defining Rating Origins	50
Defining Rating Categories	51
Defining Rating Indicators	52
Defining Action Types	53
Defining Action Contact Types	54
Defining Action Status Codes	55
Defining Action Results	56
Defining Donor Appreciation Items	58

Chapter 6

Setting Up Initiatives	59
Understanding Initiatives	59
Prerequisites	59
Understanding General Initiatives	61
Understanding Campaigns	62
Understanding Membership Initiatives	62
Understanding Volunteer Efforts	63
Understanding Event Initiatives	63
Understanding Other Initiatives	63
Defining Initiative Types	63
Page Used to Define Initiative Types	63
Defining Initiative Types	64
Defining Audiences	65
Pages Used to Define Audiences	65
Setting Up Attribute Types	65

Setting Up Audience Criteria	67
Defining Initiative Goal Types	71
Page Used to Define Initiative Goal Types	71
Defining Goal Types	71
Defining Methods	72
Page Used to Define Methods	72
Setting Up Communication Methods	72
Using Action Components for Initiative Setup	73
Defining Action Types for Initiatives	73
Defining Action Contact Types for Initiatives	73
Defining Action Status Codes for Initiatives	73
Defining Action Results for Initiatives	74
Defining Budget Categories	74
Page Used to Define Budget Categories	74
Setting Up Budget Categories	74
Setting Up Appeal Information	75
Pages Used to Set Up Appeal Information	75
Setting Up Appeal Types	75
Setting Up Appeals	76
Setting Up Appeal Details	77
Setting Up Campaigns	78
Pages Used to Set Up Campaigns	78
Defining Donor Phases	79
Setting Up an Anticipated Gift Table	79
Defining Reporting Rules	81
Setting Up Membership Initiatives	83
Pages Used to Set Up Membership Initiatives	83
Setting Up Membership Types	83
Setting Up Membership Categories	84
Setting Up Volunteer Efforts	85
Common Elements Used in This Section	85
Pages Used to Set Up Volunteer Efforts	86
Setting Up Volunteer Resources	87
Defining Areas of Responsibility	87
Defining Assignment Types	87
Defining Leadership Types	88
Defining Volunteer Initiative Goals	89
Structuring the Leadership Group	90
Defining Subgroups	91
Setting Up Event Initiatives	92

Chapter 7

Setting Up Commitment Management	93
Prerequisites	93
Defining Gift Types	95
Page Used to Define Gift Types	95
Setting Up Gift Types	95
Defining Tender Types	96
Page Used to Define Tender Types	96
Setting Up Tender Types	96
Defining Designation Types	97
Understanding Designation Types	98
Page Used to Define Designation Types	98
Setting Up Designation Types	98
Defining Matching Gift Types for Designations	98
Understanding Matching Gift Types for Designations	99
Page Used to Define Matching Gift Types for Designations	99
Setting Up Matching Gift Types	99
Defining Designation Funds	100
Understanding Designation Funds	100
Page Used to Define Designation Funds	100
Setting Up a Designation Fund	100
Defining Recognition Types	104
Page Used to Define Recognition Types	104
Setting Up Recognition Types	104
Defining Adjustment Reasons	105
Page Used to Define Adjustment Reasons	105
Setting Up Adjustment Reasons	105
Preparing for Session Posting	106
Understanding Session Posting	106
Setting Up Item Types	107
Completing Item Type Initial Setup	108
Defining a GL Interface	109
Preparing for Acknowledgement Letters and Receipts	112
Defining Acknowledgement Rules	113
Common Elements Used in This Section	114
Pages Used to Define Acknowledgement Rules	114
Setting Up Acknowledgements	115
Continuing Acknowledgement Setup	116
Completing Acknowledgement Setup	117
Defining an Organization's Matching Gift Rules	117
Page Used to Define an Organization's Matching Gift Rules	117

Setting Up Matching Gift Rules, Restrictions, and Required Information	118
Defining Giving Club Information	122
Pages Used to Define Giving Club Information	122
Defining Giving Clubs	123
Defining Giving Club Levels	125
Setting Up Credit Card Processing	126
Pages Used to Set Up Credit Card Processing	126
Setting Up a Connection with a Third-Party Processor	127
Defining Payment Methods	127
Defining Credit Card Types	127
Defining Connection Parameters for a Third-Party Processor	128
Setting Up Self-Service Online Giving and Pledges	130
Pages Used to Set Up Self-Service Online Giving and Pledges	131
Defining Involvement Settings	132
Defining Web Designations	134
Defining Web Appeals	136
Defining Web Campaigns	137
Entering a Web Campaign Narrative	139
Defining Campaign Linked Designations	140
Defining Campaign Linked Appeals	141
Defining Giving Vehicles	142

Chapter 8

Managing Constituent Data	145
Searching for Records	146
Understanding Records	146
Pages Used to Search for Records	146
Using Search/Match Functionality	146
Adding People to the System	149
Pages Used to Add People to the System	149
Managing Addresses and Phone Numbers	150
Pages Used to Manage Addresses and Phone Numbers	150
Updating Linked Addresses	151
Reviewing Address Data	151
Entering Electronic Addresses	151
Tracking External System IDs	151
Managing Names	151
Maintaining Constituent Types	151
Understanding Constituent Types	152
Pages Used to Maintain Constituent Types	152
Assigning Constituent Types	152
Tracking Religious Preferences	153

Maintaining Photos	153
Adding Constituent Types to Graduates	154
Page Used to Add Constituent Types to Graduates	154
Running the Graduates to Alumni Process	154
Maintaining Degree Information	155
Pages Used to Maintain Degree Information	156
Maintaining External Degree Information	156
Viewing an Academic Summary	158
Setting a Constituent's Preferred Year	158
Entering Internal Legacy Degree Information	159
Maintaining Work Experience Information	160
Pages Used to Maintain Work Experience Information	160
Creating Constituent Attachments	161
Understanding Constituent Attachments	161
Page Used to Create Constituent Attachments	162
Creating Attachments	162
Adding Organizations	163
Entering Location Data for Organizations	164
Entering Department Data for Organizations	164
Entering Contact Data for Organizations	164
Maintaining an Organization's Financial Information	164
Page Used to Maintain Organization Financial Information	164
Entering an Organization's Financial Information	165
Defining an Organization's Foundation Information	166
Pages Used to Define Organization Foundation Information	167
Defining Basic Foundation Information	167
Defining Foundation Support Information	169
Defining Proposal Information	170
Viewing an Organization's Foundation Information	171
Pages Used to View an Organization's Foundation Information	172
Reviewing Foundation Information	172
Filtering Foundation Records	173
Defining an Organization's Matching Gift Rules	174
Viewing an Organization's Matching Gift Rules	175
Reviewing an Organization's Data	175
Viewing an Organization's Employee List	175
Page Used to View an Organization's Employee List	175
Viewing Employee Lists	175
Viewing a Person Profile	176
Understanding Person Profile Views	176
Page Used to View a Person Profile	177
Viewing General Person Profile Information	177
Viewing a Biographic Profile	180
Viewing a Commitment Profile	184
Viewing a Participation Profile	185

Viewing an Organization Profile	186
Understanding Organization Profile Views	186
Page Used to View an Organization Profile	187
Viewing a General Organization Profile	187
Viewing Organization Details	190
Viewing Organization Financial Details	192
Viewing Commitments	193
Viewing Organization Participation	194
Viewing a Prospect Profile	195
Understanding Prospect Profile Views	196
Page Used to View a Prospect Profile	197
Viewing a General Prospect Profile	197
Viewing Prospect Management Details	199
Viewing Prospect Philanthropic Interests	202
Updating a Donor's Record or Adding a Donor	203
Viewing a Constituent's Audience History	203
Page Used to View a Constituent's Audience History	203
Reviewing Audience History	204
Maintaining Involvement Information	204
Understanding Involvement	205
Pages Used to Maintain Involvement Information	205
Adding Involvement Records	207
Filtering Involvement Records	208
Creating an Involvement Roster	208
Establishing Relationships	209
Understanding Relationships	210
Common Elements Used in This Section	210
Pages Used to Establish Relationships	210
Establishing a Person-to-Person Relationship	212
Establishing an Organization-to-Organization Relationship	212
Establishing a Person-to-Organization Relationship	212
Establishing an Organization-to-Person Relationship	213

Chapter 9

Managing Prospects	215
Understanding Prospect Management	215
Prerequisites	215
Prospect Management	215
Creating Resource Assignments	215
Common Elements Used in This Section	216
Pages Used to Create Resource Assignments	216
Creating Mass Assignments	219

Creating Individual Staff Assignments	221
Creating Individual Volunteer Assignments	222
Creating Individual Unit Assignments	223
Viewing the Prospects Assigned to a Resource	223
Viewing Resource Assignments	224
Generating the Role Assignments Report	225
Creating Prospect Strategies	227
Understanding Prospect Strategies	227
Pages Used to Create Prospect Strategies	228
Creating an Overall Cultivation Strategy	229
Viewing Actions Linked to a Strategy	231
Viewing a Strategy Summary	232
Viewing Prospect Strategy Details	232
Tracking Prospect Data	232
Common Element Used in This Section	232
Pages Used to Track Prospect Data	233
Creating a Biographic Narrative	235
Maintaining Personal Assets	236
Viewing Personal Assets	238
Maintaining Ratings	238
Filtering Ratings	240
Viewing Ratings	241
Viewing a Prospect's Philanthropic Interests	242
Preparing and Generating a Biographic Profile Report	242
Implementing a Prospect Plan	243
Understanding Prospect Plans	244
Pages Used to Implement a Prospect Plan	244
Clearing a Prospect for Cultivation	249
Creating Mass Actions	250
Creating Actions for Individual Prospects	254
Entering Action Results	256
Maintaining Donor Appreciation Items	259
Viewing a List of Appreciation Items Given	260
Viewing Donor Appreciation Details	261
Viewing Clearances for a Prospect	261
Filtering Prospect Actions	262
Viewing Existing Actions for a Prospect	264
Managing an Action List	265
Viewing Action Details	266
Viewing Contact Reports	267
Viewing Contact Report Details	268
Viewing To Do Lists	268

Chapter 10

Managing Planned Giving Prospects	271
Understanding Planned Giving Prospect Management	271
Common Elements Used in This Chapter	271
Tracking Bequests	273
Understanding Bequests	273
Pages Used to Track Bequests	274
Defining Bequest Details	274
Defining Constituent Bequest Details	276
Defining Institutional Bequest Information	278
Tracking Trusts	279
Pages Used to Track Trusts	279
Defining Trust Details	280
Defining Trust Gift Information	281
Defining Trust Account Information	282
Defining Trust Beneficiaries	283
Defining Institutional Trust Information	284
Tracking Gift Annuities	285
Pages Used to Track Gift Annuities	286
Defining Gift Annuity Details	286
Defining Gift Annuity Beneficiaries	287
Defining Institutional Gift Annuity Information	288
Tracking Pooled Income Funds	289
Pages Used to Track Pooled Income Funds	290
Defining Pooled Income Fund Details	290
Defining Pooled Income Fund Beneficiaries	292
Defining Institutional Pooled Income Fund Information	293
Working with a Planned Giving Profile	294
Pages Used to Work with a Planned Giving Profile	295
Viewing a Planned Giving Profile	295
Viewing Bequest Details	296
Viewing Trust Details	298
Viewing Gift Annuity Details	300
Viewing Pooled Income Fund Details	301

Chapter 11

Managing Initiatives	305
Understanding Initiative Management	305
Prerequisites	305

Initiative Management	305
Defining an Initiative	306
Pages Used to Define an Initiative	306
Creating an Initiative	307
Defining an Initiative Audience	309
Understanding Audiences	310
Pages Used to Define an Initiative Audience	310
Defining the Audience	311
Building and Merging the Audience	313
Linking Related Initiatives	314
Page Used to Link Related Initiatives	315
Assigning Related Initiatives	315
Assigning Initiative Resources	316
Page Used to Assign Initiative Resources	316
Assigning Initiative Resources	317
Defining a Public Relations Plan	318
Page Used to Define a PR Plan	319
Defining a Public Relations Plan	319
Creating Initiative Attachments	321
Page Used to Create Initiative Attachments	322
Creating Attachments	322
Creating an Initiative Budget and Tracking Expenses	323
Pages Used to Create a Budget and Track Expenses	323
Creating a Budget	324
Tracking Budget Expenses	325
Creating Initiative Actions	326
Pages Used to Create Initiative Actions	327
Entering Initiative Action Information	328
Adding Action Information	329
Viewing Initiative Action Summary Information	330
Pages Used to View Action Summary Information	331
Viewing To Do Lists	331
Viewing Initiative Action Summary Information	331
Viewing Action Details	332
Viewing Related Goals	332
Page Used to View Related Goals	332
Viewing Related Goal Information	332
Viewing Responsible Staff for Related Initiatives	333
Page Used to View Responsible Staff for Related Initiatives	333
Using Mass Change for Initiative and Membership Letters	333
Understanding Mass Change	334
Understanding the Initiative Mass Change Template	334
Understanding the Membership Mass Change Template	336
Pages Used to Use Mass Change for Initiative and Membership Letters	338
Selecting Student Administration Criteria	338

Selecting Criteria and Defaults	339
Running the Mass Change SQR Process (MASSCHNG)	340

Chapter 12

Managing Campaigns	343
Understanding Campaign Management	343
Prerequisites	343
Campaign Management	343
Managing General Initiative Information	345
Setting Campaign Initiative Goals	345
Pages Used to Set Campaign Initiative Goals	345
Setting Intermediate Goals for Campaigns	346
Setting Annual Goals	347
Setting Department Goals	348
Setting Unit Goals	349
Viewing a Prospect List	349
Pages Used to View a Prospect List	350
Viewing Prospects	350
Generating the Campaign Progress Report	350
Page Used to Generate the Campaign Progress Report	351
Generating Campaign Progress Reports	351
Viewing the Top Donors to a Campaign	352
Page Used to View Top Donors to a Campaign	352
Viewing Top Donor Summaries	352
Viewing a Summary of Campaign Initiatives	353
Pages Used to View a Summary of Campaign Initiatives	353
Viewing Campaign Summary Information	353
Viewing Initiative Details	354

Chapter 13

Managing Membership	357
Understanding Membership	357
Prerequisites	357
Common Elements Used in This Chapter	357
Membership Management	358
Managing General Initiative Information	358
Creating a Member Organization	359
Understanding Member Organizations	359
Pages Used to Create a Member Organization	359
Defining the Member Organization	360

Setting Member Criteria	361
Defining Membership Objectives	362
Defining Membership Dues	363
Assigning Membership Resources	366
Building and Merging Membership Lists	367
Page Used to Build Membership Lists	368
Building and Merging Member Lists	368
Defining Membership Initiative Goals	370
Pages Used to Define Membership Initiative Goals	370
Setting Intermediate Goals for Membership Initiatives	370
Setting Annual Goals for Membership Initiatives	371
Entering Member Dues	373
Understanding Membership Dues	373
Understanding Gift Processing in Membership Sessions	373
Common Element Used in This Section	374
Pages Used to Enter Member Dues	375
Entering Dues Payment Detail	375
Entering Tender Type Details	381
Assigning Membership Designations and Associating Others with a Membership	385
Processing Member Credit Card Transactions	388
Adjusting Membership Dues Payments	388
Understanding Membership Dues Payment Adjustments	388
Pages Used to Adjust Membership Dues Payments	388
Selecting Posted Dues Transactions to be Adjusted	389
Adjusting Dues Payment Details	390
Adjusting Designation and Associated Constituent Information	391
Preparing for Membership Letters	394
Viewing Membership Progress	394
Page Used to View Membership Progress	394
Viewing Membership Progress	394
Viewing Membership History	396
Pages Used to View Membership History	396
Viewing Membership Benefit History	397
Page Used to View Membership Benefit History	397
Viewing a Membership Summary or a Supervisor's Membership Summary	397
Page Used to View a Membership Summary or a Supervisor's Membership Summary	398
Viewing Membership Summary Information	398

Chapter 14

Managing Volunteers	399
Understanding Volunteer Management	399
Prerequisites	399

Volunteer Management	399
Managing General Initiative Information	400
Assigning Volunteers to Roles	400
Pages Used to Assign Volunteers to Roles	400
Assigning Volunteers to Roles Within the Structure	401
Creating Subgroup Assignments	402
Assigning Volunteers to Specific Tasks	402
Prerequisites	403
Pages Used to Assign Volunteers to Specific Tasks	403
Assigning Volunteers and Groups to Tasks	403
Entering Constituent Data and Volunteer Evaluations	404
Creating a Biographical Bit or Brief	406
Reviewing Volunteer History	406
Pages Used to View Volunteer History	406
Reviewing Volunteer Involvement	407
Reviewing Volunteer Audience History	408

Chapter 15

Managing Event Initiatives	409
Understanding Event Initiative Management	409
Prerequisites	409
Event Initiative Management	409
Managing General Initiative Information	410
Preparing for Initiative Letters	410
Setting Intermediate Goals for Events	410
Page Used to Set Intermediate Goals for Events	411
Setting Event Goals	411
Creating Events	412
Assigning Meeting Details	412
Tracking Event Attendance	412
Creating Event Templates	412
Reviewing Events, Meetings, and Attendees	413
Viewing a To Do List	413

Chapter 16

Managing Other Initiatives	415
Understanding Other Initiatives	415
Prerequisites	415
Other Initiative Management	415
Managing General Initiative Information	415

Preparing for Initiative Letters	416
Setting Intermediate Goals	416
Page Used to Set Intermediate Goals	416
Setting Other Initiative Goals	416
Viewing To Do Lists	417

Chapter 17

Entering Commitments	419
Understanding the Gift and Pledge Process	419
Common Elements Used in This Chapter	420
Creating and Working with Sessions	421
Managing Sessions	421
Pages Used to Manage Sessions	422
Initializing and Balancing the Session	422
Selecting Session Defaults	425
Viewing Session Details and Selecting Transactions to Edit or Delete	426
Viewing a Session Tree	428
Entering Gifts and Pledge Payments	428
Understanding Gifts and Pledge Payments	429
Pages Used to Enter Gifts and Pledge Payments	429
Entering a Gift or Pledge Transaction	431
Creating Soft Gift Entries	437
Entering Tender Type Details	439
Entering Tribute Details	443
Identifying Potential Matching Gifts	445
Applying Matching Gifts	445
Receiving a Scheduled Pledge	447
Updating or Adding a Constituent Who is a Person	447
Updating or Adding a Constituent Who is an Organization	449
Loading Mass Gift and Pledge Transactions	451
Page Used to Load Mass Gift and Pledge Transactions	451
Loading Gifts and Pledges	451
Viewing Gift Session Transactions	454
Pages Used to View Gift Session Transactions	455
Viewing a Gift Summary	456
Viewing Gift Details	457
Viewing a Supervisor's Gift Session Summary	457
Adjusting Gifts and Matching Gifts	457
Understanding Gift Adjustment	458
Page Used to Adjust Gifts and Matching Gifts	458
Selecting a Transaction to Adjust	459
Entering a Gift Adjustment Transaction	459

Adjusting Matching Gift Information	461
Editing Matching Gift Information	461
Changing a Gift's Type	462
Adjusting Gift and Membership Credit Card Payments	462
Entering Conditional Pledges	465
Understanding Conditional Pledges	465
Pages Used to Enter Conditional Pledges	465
Entering Conditional Pledge Detail	466
Assigning Conditional Pledge Designations	467
Assigning Conditional Pledge Recognition	469
Entering Pledges	470
Understanding Pledges	470
Pages Used to Enter Pledges	471
Entering a Pledge Transaction	472
Determining a Pledge Payment Schedule Within a Session	475
Adjusting a Pledge Payment Schedule For a Constituent	477
Viewing Pledges	478
Pages Used to View Pledges	478
Viewing a Pledge Summary	479
Viewing Pledge Details	480
Viewing a Supervisor's Pledge Summary	480
Viewing an Open Pledge Register	480
Viewing a Pledge Payment Schedule	481
Adjusting Pledges	481
Understanding Pledge Adjustment	482
Pages Used to Adjust Pledges	482
Entering a Pledge Adjustment Transaction	483

Chapter 18

Processing Commitments	485
Understanding Credit Card Processing	485
Accessing the Credit Card Payment Pages	486
Common Elements Used in This Chapter	487
Queuing Sessions for Posting	488
Page Used to Queue Sessions for Posting	488
Queuing Balanced Sessions	488
Processing and Posting Sessions	489
Understanding Session Processing and Posting	489
Understanding the GL Interface Process	492
Understanding the Constituent Accumulators Process	494
Pages Used to Process and Post Sessions	496
Running the GL Interface Job (AVPOST and AVPOST2)	496

Running the GL Interface File Extract COBOL Process (AVPACCTL)	497
Running the Constituent Accumulators Process (AVPOST)	498
Viewing a Journal Generator Template	498
Processing Credit Card Transactions	499
Understanding Credit Card Transaction Processing	499
Pages Used to Process Credit Card Transactions	503
Selecting Gift and Membership Transactions for Processing	503
Authorizing Gift and Membership Transactions	505
Capturing Gift and Membership Transactions	506
Authorizing and Capturing Transactions as a Single Process	507
Handling Denied CyberSource Transactions	507
Purging Credit Card Security Data	507
Understanding Credit Card Security Code Purging	507
Pages Used to Purge Credit Card Security Data	508
Purging Security Codes for Gifts and Memberships	508
Reviewing Electronic Payment Results	509
Pages Used to Review Electronic Payment Results	509
Preparing to Run the EP Processing Audit	509
Generating the EP Processing Audit Report	509
Viewing EP Processing Audit Information Online	511
Working with Denied Credit Card Transactions	512
Understanding Denied Credit Card Transactions	512
Pages Used to Work with Denied Credit Card Transactions	513
Selecting Denied Gift and Membership Transactions for Processing	513
Authorizing and Capturing Denied Gift and Membership Transactions	514
Reviewing Credit Card Activity	515
Pages Used to Review Credit Card Activity	515
Selecting Gift and Membership Transactions for Review	515
Reviewing Gift and Membership Transactions	516
Reviewing Credit Card Processing Messages	518
Viewing Accounting Lines	519
Page Used to View Accounting Lines	519
Viewing Generated Accounting Lines	519
Viewing Suspended Sessions	521
Page Used to View Suspended Sessions	521
Viewing Suspended Session Information	521
Viewing Information About and Transferring Sessions	524
Pages Used to View Information About and Transfer Sessions	524
Filtering Sessions	525
Viewing a Session Summary	526
Transferring Sessions	527
Reopening and Editing Expected Counts and Amounts for Sessions	527
Managing the Acknowledgement Process	528
Understanding How the Acknowledgement Generation Process Works	529
Understanding Joint Acknowledgements and Spousal Relationships	530

Processing Acknowledgement Letters	531
Page Used to Process Acknowledgement Letters	532
Processing Acknowledgements Automatically Using a COBOL Process (AVPACKNL)	532
Generating Acknowledgement Letters	532
Working with Manually Generated Acknowledgements	533
Pages Used to Work with Manually Generated Acknowledgements	533
Viewing Acknowledgements in Suspense	534
Viewing Acknowledgement Details	534
Transferring an Acknowledgement	536
Viewing Acknowledgement Lists	536
Managing Joint Communications	537
Handling Matching Gifts	538
Understanding Matching Gifts	538
Understanding Matching Gift Processing and Foreign Currencies	539
Pages Used to Handle Matching Gifts	540
Viewing an Organization's Matching Gift Rules	541
Viewing Outstanding Matching Gifts	545
Viewing Expected Matching Gifts	545
Viewing Matching Gifts for People	546
Viewing Matching Gifts for Organizations	547
Managing Giving Clubs	548
Understanding Giving Clubs	548
Pages Used to Manage Giving Clubs	548
Manually Generating Giving Club Memberships	549
Generating Giving Club Memberships	551
Tracking Giving Club Progress	554
Viewing a Giving Club Summary	554
Viewing a Giving Club Membership Summary	555
Generating CAE Reports	555
Page Used to Generate CAE Reports	556
Running a CAE Report	556

PeopleSoft Contributor Relations Preface

This preface discusses:

- PeopleSoft products.
- PeopleSoft Campus Solutions application fundamentals.
- PeopleBook structure.
- Common elements used in this PeopleBook.

Important! This PeopleBook documents only page elements that require additional explanation. If a page element is not documented with the process or task in which it is used, then either it requires no additional explanation or it is documented with common elements for the section, chapter, PeopleBook, or product line.

PeopleSoft Products

This PeopleBook refers to the following PeopleSoft product: PeopleSoft Contributor Relations.

PeopleSoft Campus Solutions Application Fundamentals

Additional, essential information describing the setup and design of the system appears in two companion volumes of documentation called *PeopleSoft Campus Solutions 9.0 Application Fundamentals PeopleBook* and *PeopleSoft Campus Community Fundamentals 9.0 PeopleBook*. Each PeopleSoft product line has its own version of this documentation.

Note. One or more pages in Contributor Relations operate in deferred processing mode. Deferred processing is described in the preface in the *PeopleSoft Campus Solutions 9.0 Application Fundamentals PeopleBook*

PeopleBook Structure

PeopleSoft PeopleBooks follow a common structure. By understanding this structure, you can use this PeopleBook more efficiently.

The PeopleBooks structure conveys a task-based hierarchy of information. Each chapter describes a process that is required to set up or use the application. Chapter sections describe each task in the process. Subsections within a section describe a single step in the process task.

Some PeopleBooks may also be divided into parts. PeopleBook parts can group together similar implementation or business process chapters within an application or group together two or more applications that integrate into one overall business solution. When a book is divided into parts, each part is divided into chapters.

The following table provides the order and descriptions of chapters in a PeopleBook:

Chapters	Description
Preface	This is the chapter you're reading now. It explains: • How to use the Application Fundamentals book. • How PeopleBooks are structured. • Common elements used in the PeopleBook, if necessary.
Getting Started With...	This chapter discusses product implementation guidelines. It explains: • The business processes documented within the book. • Integrations between the product and other products. • A high-level documentation to how our documentation maps to the overall implementation process; it doesn't offer step-by-step guidance on how to perform an actual implementation.
Navigation	(Optional) Some PeopleSoft applications provide custom navigation pages that contain groupings of folders that support a specific business process, task, or user role. When an application contains custom navigation pages, this chapter provides basic navigation information for these pages. Note. Not all applications have delivered custom navigation pages.
Understanding...	(Optional) This is an introductory chapter that broadly explains the product and the functionality within the product.

<i>Chapters</i>	<i>Description</i>
Setup and Implementation	This can be one or more chapters. These chapters contain documentation to assist you in setting up and implementing the product. For example, if functionality X is part of a product, this chapter would be devoted to explaining how to set up functionality X, not necessarily how to use functionality X. You would look to the corresponding business process chapter to learn how to use the functionality. Note. There may be times when a small amount of business process information is included in a setup chapter if the amount of business process documentation was insufficient to create a separate section in the book.
Business Process	This can be one or more chapters. These chapters contain documentation that addresses specific business processes with each chapter generally devoted to a specific functional area. For example, if functionality X is part of a product, this chapter would be devoted to explain how the functionality works, not necessarily how to set up functionality X. You would look to the corresponding setup and implementation chapter to learn how to set up the functionality. Note. There may be times when a small amount of setup and implementation information is included in a business process chapter if the amount of setup and implementation documentation was insufficient to create a separate chapter in the book.
Appendixes	(Optional) If the book requires it, one or more appendixes might be included in the book. Appendixes contain information considered supplemental to the primary documentation.
Delivered Workflow Appendix	(Optional) The delivered workflow appendix describes all of the workflows that are delivered for the application. Note. Not all applications have delivered workflows.
Reports Appendix	(Optional) This appendix contains an abbreviated list of all of the product's reports. The detailed documentation on the use of these reports is usually included in the related business process chapter.

PeopleBooks and the PeopleSoft Online Library

A companion PeopleBook called *PeopleBooks and the PeopleSoft Online Library* contains general information, including:

- Understanding the PeopleSoft online library and related documentation.
- How to send PeopleSoft documentation comments and suggestions to Oracle.
- How to access hosted PeopleBooks, downloadable HTML PeopleBooks, and downloadable PDF PeopleBooks as well as documentation updates.
- Understanding PeopleBook structure.
- Typographical conventions and visual cues used in PeopleBooks.
- ISO country codes and currency codes.
- PeopleBooks that are common across multiple applications.
- Common elements used in PeopleBooks.
- Navigating the PeopleBooks interface and searching the PeopleSoft online library.
- Displaying and printing screen shots and graphics in PeopleBooks.
- How to manage the locally installed PeopleSoft online library, including web site folders.
- Understanding documentation integration and how to integrate customized documentation into the library.
- Application abbreviations found in application fields.

You can find *PeopleBooks and the PeopleSoft Online Library* in the online PeopleBooks Library for your PeopleTools release.

Common Elements Used in This PeopleBook

Start DateandEnd Date	Enter a start and end date for the action, campaign, initiative, role assignment, and so on. When you click the prompt button for this field, the pop-up calendar appears. Use the arrow keys at the bottom of the calendar to locate the appropriate month and year, then click the specific date. The start date populates by default to the current date, but can be overridden.
Person/Org	Select either <i>Person</i> or <i>Organization</i> to determine the constituent you want to work with or view information about.
Currency Code	Select a currency code for the values you enter on a page, which may differ from your institution's or business unit's default currency.

Amount/Pct/Total (amount/percent/total)	The format of this field changes depending on whether you are tracking percentages, amounts, or total numbers. Enter the appropriate amount.
Time Frame	Select <i>Current</i> , <i>Historical</i> , or <i>All</i> to determine the time frame for which you want to view information. If you select <i>All</i> , current records appear as well as those for which the end date has passed.
Cnst Type (constituent type)	View the relationships a constituent has with your institution, such as <i>Alumni</i> , <i>Friend</i> , <i>Parent</i> , <i>Faculty</i> , <i>Staff</i> and so on. These values are shipped with the system in the Constituent Type table and should not be altered.

Chapter 1

Getting Started with Contributor Relations

This chapter discusses:

- Contributor Relations overview.
- Contributor Relations business processes.
- Contributor Relations integrations.
- Contributor Relations implementation.

Contributor Relations Overview

Contributor Relations enables you to enter, track, and maintain biographic and demographic information about your constituents, as well as create and monitor comprehensive strategic and cultivation activity plans for prospects. For all prospects in the system, you can create, manage, and evaluate fund-raising efforts such as campaign initiatives, membership programs, and volunteer activities. You can track and acknowledge all types of commitments made by constituents and analyze donors' giving. In addition, you can manage and process gift payments made by credit card and through online giving sessions. Self-service Involvement enables online gifts and pledges for constituents and Self-Service Outreach provides tools for development officers at an institution.

This PeopleBook reviews the concepts behind Contributor Relations business processes and presents procedures for setting up and using this part of the PeopleSoft Campus Solutions system.

Contributor Relations Business Processes

Contributor Relations provides these business processes:

- Manage prospects and planned giving prospects.
- Manage campaigns and other initiatives.
- Enter and process commitments.

We discuss these business processes in the business process chapters in this PeopleBook.

Contributor Relations Integrations

The following graphic illustrates the other PeopleSoft applications that Contributor Relations integrates with and the flow of data between those applications:

Contributor Relations integrations between other PeopleSoft applications

We discuss integration considerations in the implementation chapters in this PeopleBook. Supplemental information about third-party application integrations is located on the My Oracle Support website.

Contributor Relations Implementation

PeopleSoft Setup Manager enables you to generate a list of setup tasks for your organization based on the features that you are implementing. The setup tasks include the components that you must set up, listed in the order in which you must enter data into the component tables, and links to the corresponding PeopleBook documentation.

Other Sources of Information

In the planning phase of your implementation, take advantage of all PeopleSoft sources of information, including the installation guides, data models, business process maps, and troubleshooting guidelines.

Chapter 2

Setting Up Your Contributor Relations Framework

This chapter discusses how to:

- Complete a PeopleSoft Contributor Relations installation.
- Set up institution defaults.
- Define name display settings.
- Add resources.

Completing a PeopleSoft Contributor Relations Installation

To set up Contributor Relations installation defaults, use the Contributor Rel Installation component (AV_INSTALLATION).

This section discusses how to set up Contributor Relations installation defaults.

Page Used to Complete a PeopleSoft Contributor Relations Installation

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
CR Installation	AV_INSTALLATION	Set Up SACR, Install, Contributor Rel Installation	Define system-wide business rules for many functional areas within the Contributor Relations system. In addition, specify the most recently used numbers for strategies, assets, ratings, actions, gifts, sessions, and so forth to eliminate problems with duplicate data after the conversion is complete.

Setting Up Contributor Relations Installation Defaults

Access the CR Installation page (Set Up SACR, Install, Contributor Rel Installation).

CR Installation page

Assignment Role Option

Use this group box to determine how roles are made available in fields throughout the system.

Defined

Select this option if resources can only be assigned with the roles that you select for them on the Staff Roles, Unit Roles, or Volunteer Roles pages.

For example, if staff member Darla Perkins is a Prospect Manager, you must first define *Prospect Manager* as a staff role, and then select that role for Darla Perkins on the Staff Roles page. Then, if this is her only defined role, only the *Prospect Manager* role will appear as an available option when Darla Perkins is selected.

Class

Select this option if all the roles defined for a resource type are available to every person or unit that is part of that resource type.

For example, if you define the role of *Prospect Manager* and select the Staff check box on the Define Roles page, then all the staff members at the institution can be assigned as Prospect Managers, regardless of whether they have been assigned that role.

All Select this option if any resource at the institution (whether staff, unit, or volunteer) can be assigned to any defined role. This option enables you to assign a unit as a Prospect Manager; no restrictions prevent you from doing so.

Spouse Recognition Split

Use the Spouse Recognition Split group box to set up the default hard and soft credit splits that occur when a person gives a gift and credits the spouse. These values are used to calculate spouse recognition on the Recognition page, but they can be overwritten.

Donor Record	Select a credit type and the percent of the gift to allocate to that credit type as the default for the donor who makes the commitment.
Donor Record 2	(Optional) Select a credit type and the percent of the gift to allocate to that credit type as the default.
Spouse Record	Select a credit type and the percent of the gift to allocate to that credit type as the default for the spouse's recognition.
Spouse Record 2	(Optional) Select a credit type and the percent of the gift to allocate to that credit type as the default.

Note. The two rows of donor recognition defaults and two rows of spouse recognition defaults enable you to set up both a hard credit and soft credit recognition default for each person. The total percentage of hard credit types between the donor record and the spouse record must equal 100 percent.

Default Soft Credit Type, Payment Schedule, Pledge Feed, and Pledge Payment Override

You can determine the default type of soft credit recognition that will appear in the Default Soft Credit Type field when entering gift and pledge recognition information. Soft credits are defined by your institution.

Default Soft Credit Type	Select the soft credit type that will appear by default in the Soft Credit field when entering gift and pledge recognition information. This default can be overwritten. The valid soft credits at your institution appear in this prompt dialog box. <i>Hard Credit</i> is a delivered credit type. All other credit types are considered soft credit.
Payment Schedule	Select the payment schedule that will appear by default in the Payment Schedule field on the Pledge Detail page when entering a pledge. This default can be overridden. Field values are delivered with the system as translate values. Do not modify these values in any way. Any modifications to these values require a substantial programming effort.

Feed Gift to GL and Feed Pledge to GL

Select these check boxes for the ability to send gifts and pledges to the financial system for recording as a receivable. This process is not automatic. Selecting this check box activates the Feed Pledge check box on the Gift Entry and Adjust Gift Entry pages. The decision to send a particular gift or pledge occurs when you enter each transaction individually. The system includes only pledges with the Feed Pledge check box selected in the AV_ACCTG_LN record that is created through the GL Interface process.

Allow Pledge Payment Override

Select this check box to allow data entry staff to change recognition or designation information for a pledge at the time of pledge payment.

Important! Pledge payment overrides can only be made if the pledge has not been sent to the financial system.

Contact Reports

You determine whether contact reports are required for each completed action in the system.

Require Contact Report

Select this option if contact reports are required for each completed action at the institution. When you select this check box, you are required to write a contact report before saving an action as *Completed*.

Financials Release

Identify the version of financial software in use at your institution.

Your selection determines which path the Contributor Relations system uses to transfer accounting line information. The values 7.5 and *Other* trigger a flat-file approach, in which the system creates a flat file that can be picked up and used both by older versions of PeopleSoft Financials and by an external financial application. The value 8.4 or 8.8 triggers an integrated messaging interface.

Name Display Type

Select a particular Name Display Type for the system to use to generate display names throughout the headers of Contributor Relations pages. Only current, active, effective-dated Name Display Types appear in this list. You can define the properties for a display name on the Name Display Type setup component.

Note. If you do nothing to implement this functionality, there is no impact on how the system displays names throughout Contributor Relations.

Last Record Numbers

You can enter the last record number that was assigned to items such as strategies, actions, gifts, and so on. When you create new records in the system, they are numbered consecutively beginning with the number that follows the one that you enter here. As new records are added, the last record numbers on this page increase so that you always know the number of the last record entered.

Important! After you set these numbers, you should never reset them or decrease them. Resetting or decreasing these numbers could result in duplicate key errors. However, you can increase these numbers.

Enter these default values:

- The last number assigned to the most recent prospect strategy in the Strategy Number field.
- The last number assigned to the most recent personal asset in the Asset Number field.
- The last number assigned to the most recent prospect rating in the Rating Number field.
- The last number assigned to the most recent constituent action in the Action Number field.
- The last number assigned to the most recent initiative action in the Initiative Action Number field.
- The last number assigned to the most recent commitment in the Gift Number field.
- The last number assigned to the most recent session in the Session Number field.
- The last number assigned to the most recent organization relationship record in the Relation Number field.
- The last number assigned to the most recent planned gift in the Planned Giving Number field.
- The last number assigned to the most recent volunteer group in the Volunteer Group field.
- The last number assigned to the most recent volunteer structure in the Volunteer Structure Number field.
- The last number assigned to the most recent membership in a member organization in the Membership Number field.
- The last number assigned to the most recent membership dues payment in the Membership Payment Number field.
- The last number assigned to the most recent online gift or pledge in the Last Receipt Number field.
- The last number assigned to the most recent credit card transaction processed in the Last Reference Number field.

Setting Up Institution Defaults

To set up institution defaults that are used throughout the system, use the Institution Defaults component (AV_INSTALL_INST).

This section discusses how to:

- Set up institution default values.
- Set up the Bio Bit and Bio Brief reports.
- Set up additional default values for the institution.

Pages Used to Set Up Institution Defaults

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Institution Installation	AV_INSTALL_INST	Set Up SACR, Product Related, Contributor Relations, Install Contributor Relations, Institution Defaults, Institution Installation	Set institution default values that are used throughout the system.
Bio Bit Setup	AV_BIO_BIT_SP	Click the Bio Bit button on the Institution Installation page.	Select the attributes to include in the standard Bio Bit report that is generated by the institution.
Bio Brief Setup	AV_BIO_BIT_SP	Click the Bio Brief button on the Institution Installation page.	Select the attributes to include in the standard Bio Brief report that is generated by the institution.
Institution Installation 2	AV_INSTALL_INST2	Set Up SACR, Product Related, Contributor Relations, Install Contributor Relations, Institution Defaults, Institution Installation 2	Set up acknowledgement and receipt defaults for your institution.

Setting Up Institution Default Values

Access the Institution Installation page (Set Up SACR, Product Related, Contributor Relations, Install Contributor Relations, Institution Defaults, Institution Installation).

Institution Installation		Institution Installation 2	
Institution: PSUNV PeopleSoft University			
Distribute Overpayment ☐ Next Payment ☒ Equally ☐ Ignore		Distribute Underpayment ☒ Next Payment ☐ Equally	
Membership Allow Gifts in Membership ☒ Membership Days: 60		Financials Link SetID: MODEL Calendar ID: 01 Clearing Account: 000001000055 Maximum Retrieval: 9999 Bio Bit Bio Brief	
Alumni Member Organization Member Organization Code: ALUMASSN Alumni Association			

Institution Installation page

Distribute Overpayment

Use this group box to determine how pledge overpayments are distributed.

Next Payment	Select this option to deduct the amount of the overpayment from the next scheduled pledge payment.
Equally	Select this option to evenly distribute the overpayment throughout all remaining expected pledge payments.
Ignore	Select this option to retain the pledge schedule as is, without being affected by the additional amount paid by the donor.

Distribute Underpayment

Select the appropriate option from this group box to determine how pledge underpayments are distributed.

Next Payment	Select this option to add the amount of the underpayment to the next scheduled pledge payment.
Equally	Select this option to evenly add the underpayment throughout all remaining pledge payments.

Financials Link

SetID	This value appears by default throughout the system. It is used when entering gift annuities, pooled income funds, or trusts in planned giving. It is also used to determine the calendar that defines the fiscal year in commitment and membership entry.
Calendar ID	Select the default ID for the institutional calendar that determines the fiscal year.
Clearing Account	Enter the default clearing account to be used when processing membership and gift transactions. The clearing account holds refunds for donors. The available values for this field include all the valid item types that you can use for a clearing account. Clearing accounts must have a journal set of 0 with an indicator of <i>credit</i> . When a refund is manually issued, this clearing account should be debited and the tender account should be credited.

Membership

Allow Gifts in Membership	Enables you to enter additional gifts on the Membership Entry page.
Membership Days	Enter the number of days before a membership period ends. This number represents the period of time during which payments are credited to the next membership period. For example, a member organization resets membership every June 1, and you set the Membership Days field to 31 days. Therefore, any dues payments that are received for that membership organization after May 1 are credited toward the next membership period.

Other Page Elements

Maximum Retrieval	Enter the maximum number of records that the system retrieves on the involvement roster at one time. If this number is exceeded, the system displays a warning message telling the user that additional records exist but cannot be retrieved without limiting the search criteria.
Bio Bit	Click to access the Bio Bit Setup page, where you select the attributes to include in the standard Bio Bit report.
Bio Brief	Click to access the Bio Brief Setup page, where you select the attributes to include in the standard Bio Brief report.

Setting Up Bio Bit and Bio Brief Reports

Access the Bio Bit Setup page or the Bio Brief Setup page (Click the Bio Bit button on the Institution Installation page).

Select the check boxes next to the attributes that you want to include in the standard Bio Brief report. The report that you define here prints when a you select a Bio Brief rather than a specialized report on the Biographic Profile page.

Setting Up Additional Default Values for the Institution

Access the Institution Installation 2 page (Set Up SACR, Product Related, Contributor Relations, Install Contributor Relations, Institution Defaults, Institution Installation 2).

Institution Installation		Institution Installation 2

			Pledge Days: 60
Attachment Type			
Attachment Type:			

Institution Installation 2 page

Receipt

Event ID Select the event ID that contains the letter code for the default receipt that your institution issues.

Acknowledgement Priority

Enter numbers to represent the priority for sending acknowledgement letters. The priority that you set determines which acknowledgement setup parameters the system reviews first to determine which letter a donor receives. This priority is used in the Acknowledgements COBOL process to produce a single letter for the commitment.

Acknowledgement

Soft Credit

Select to send acknowledgement letters for soft credit. The system sends acknowledgement letters to donors with only soft credit on a gift based on the rules set up on the Acknowledgement Setup pages. If a donor has soft credit on a gift, no soft credit acknowledgement is produced unless this option is selected. The system never generates a receipt for recognition of soft credit only, even if this option is selected or the gift is joint with a hard credit donor.

Adjusted Gift and Adjusted Pledge

Select to indicate that you want the system to generate acknowledgements for adjusted gifts or adjusted pledges.

If you select either of these two check boxes, the system generates acknowledgements for adjustments based on the rules from the Acknowledgement Setup2 page. If you clear these check boxes, the system does not require acknowledgement rules for adjustments on the Acknowledgement Setup2 page.

Note. If a designation has its own acknowledgement defined, the system creates a letter acknowledging a gift to that designation as well.

To Do List

Reminder Days

Enter the number of days before the planned date of an action that the item should appear on the current view of the assigned resource's to do list.

Currency Default

Base Currency

Although business units may operate under different default currencies, all calculations performed by the system translate to the institution base currency that you select here. To protect historical data, you cannot make further changes after you select a value for this field and save this page.

Rate Type

Select the exchange rate to use when translating amounts to the base currency. Examples of rate type are *Official Rate*, *Spot Market Rate*, and *Free Market Rate*. To protect historical data, you cannot make further changes after you select a value for this field and save this page.

Action Commitments

This group box enables you to determine how far back in time your institution wants the system to go when returning gifts and pledges for display on the Action Results page. The system will display all gifts with an age of [current date] minus [Gift Days value]. The same rule applies to Pledge Days. The default value for both fields is set to 60 but can be changed to include gifts or pledges beyond 60 days.

Defining Name Display Settings

To define how the system displays names throughout Contributor Relations pages, use these components: Name Display Type (SCC_NMD_TYP_TBL) and Name Display Type Parameters (SCC_NMD_TYP_PRM).

This section provides an overview of name display and discusses how to:

- Define a name display type.
- Configure name display rules.

Understanding Name Display

The Name Display framework provides a configurable solution that allows institutions to define how a display name will appear throughout the Contributor Relations product. This functionality specifically focuses on how a display name appears at the top of the page (at Level 0), not elsewhere on the page. Note that this functionality only impacts pages accessed through the Contributor Relations menu; the style and formatting does not follow to a component accessed from a link within a component or which results in a transfer to a component not on the Contributor Relations menu.

Pages Used to Define Name Display Settings

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Name Display Type	SCC_NMD_TYP_TBL	Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Name Display Type Setup	Set the various display properties for a display name.
Name Display Type Parameters	SCC_NMD_TYP_PRM	Click the Edit Parameters button on the Name Display Type page.	Further configure how the system will display names throughout Contributor Relations.

Defining a Name Display Type

Access the Name Display Type page (Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Name Display Type Setup).

Name Display Type

Name Display Type: DEMO STRONG

Name Display Type		Find View All	First 1 of 1 Last
*Effective Date:	04/21/2010	*Status:	Active
*Description:	Demo Strong	*Style:	STRONG
Short Description	DemoStrong	Edit Parameters	

Name Display Type page

There are four delivered Style choices: *PABOLDBLUETEXT*, *PABOLDTEXT*, *PSTEXT*, and *STRONG*; *PSTEXT* is the default value. The system always applies the style you select here to a display name, regardless of any additional parameters. After saving this page, click the Edit Parameters button to access the Name Display Type Parameters page, where you can further define how names will appear.

Configuring Name Display Rules

Access the Name Display Type Parameters page (Click the Edit Parameters button on the Name Display Type page).

Name Display Type Parameters (2 of 2)

Name Types

Name Type

Select a name type, which is defined on the Name Type Table page. You can assign multiple name types (such as Primary, Preferred, and Legal) to each Name Display Type. The value selected here determines which name type the system displays for a person's record on the Name Display subpage at Level 0 in a component.

Order

Rank the Name Type in the Name Type hierarchy for the Name Display Type. The system uses this hierarchy in the Display Name resolution process, and determines the particular name display options to use for a display name.

Default Name Field

Select from three delivered options: *Use Formal Name*, *Use Name*, or *Use Name Display*. If no Country Rules are specified, the Default Name Field value is used to derive the Display Name.

Country Rules

You can define multiple sets of country rules for each Name Type. For example, your institution might define English country rules for the primary name type and Belgian country rules for the preferred name type. If you specify country rules, then you must select an option in the Name Field group box.

Format Using	The system only displays PeopleSoft-supported countries in this list.
Test EmplID	Add person IDs to this grid, which allows you to select test IDs to see how a name will actually display on a page based on the rules entered. You can only add IDs whose names include parts associated with the country.

Name Field

Use the fields in this group box to override the Default Name Field option in the Name Types group box and customize names for a specific country format. You can define the name's appearance part by part, as you go; the appearance of each ID added to the Name Display Test group box will refresh on any field change you make.

There are four options in this group box: Use Name Display, Use Formal Name, Use Name, and Use Name Parts. If you select the Use Name Parts option, the Name Parts grid appears. The grid displays Name Fields specific to the country selected.

Part Type	Available options are: <i>Name Field</i> , <i>Space</i> , or <i>User Defined</i> . <i>Name Field</i> : contains values that are dependent on the selected country format such as First Name, Middle Name, Last Name. <i>Space</i> : allows you to add a single space between other part types. Spaces can only be specified from Part 2 onward. <i>User Defined</i> : allows you to define other characters (such as commas or periods), or a character string up to 35 characters long.

Name Field	The values that appear in this column are country-specific, based on your selection in the Format Using field.

Dependency	Enter a number to specify a dependent Part, so that parts will only be displayed when their dependent parts contain a value. For example, if a prefix is listed but a person has no prefix associated with their name record, the system ignores the entire prefix (name part, punctuation, and spaces) and moves to the next part in the list.

Ignore Criteria

This group box is hidden by default; select the Ignore Rules check box to make it appear. Use the fields here to ignore any Name Field parts of a name. For example, you can make selections here to remove any special characters (such as * or !) used as placeholders for people with single names in your database.

Adding Resources

To add resources, use these components: Roles (AV_PRPS), Staff (AV_STAFF), Volunteers (AV_VOLUNTEERS), and Units (AV_UNIT_TBL).

This section provides an overview of resources and discusses how to:

- Define roles.
- Define staff and volunteers.
- Define units.

Understanding Resources

You can add staff members, volunteers, and business units to the system and you can assign the roles they play at your institution. Resources are used throughout the system for managing prospects, controlling gift sessions, and so on.

Important! A person must have an ID in the system before she or he can be added as a staff member or volunteer. Adding a person is required to enable access to functions throughout the Contributor Relations system. You should carefully decide on the roles at your institution and assign resources to the roles.

This table lists the editable pages that are affected by roles throughout the Contributor Relations system. The values in the Role field depend on how you assign roles. In some cases, the values also depend on the settings on the CR Installation page. Titles preceded by an asterisk contain a Role field that is dependent on the settings on the CR Installation page.

*Description: Campaign Manager

Short Description: Campaigns

*Purpose Type: Assignment

☒ Staff
☐ Volunteer
☐ Unit

Roles page

A role is a description of the undertakings in which a resource participates at your institution. Examples of roles include Prospect Manager, Solicitor, Campaign Manager, and so on. Roles are used throughout the system in assigning resources to prospects and initiatives.

This table lists values that are required in the PURPOSE_CD field that resides in the AV_PRPS_TBL table:

Code	Value	Where Used	Purpose
PM	Prospect Manager	Prospect Management	Only one prospect manager can be assigned to a constituent for a specific period. Assignment periods must be unique.
SOL	Solicitor	Prospect Management	When assigning solicitors, only staff or volunteers who are identified as a solicitor appear as available values.

Code	Value	Where Used	Purpose
<i>GPS</i>	Gift and Pledge Supervisor	Session Management	Assigning the GPS role to an individual gives special authority in session management to reopen session expected amounts and counts, reopen a balanced session, or transfer sessions among users on the Session Summary page.
<i>GE</i>	Gift Entry Operator	Session Management	Assigning the GE role to a user provides the ability to access the user's sessions in session management and on the Session Summary page. The user cannot view another user's sessions. This limitation is based on user ID.
<i>GCA</i>	Giving Club Administrator	Giving Club Management	Only a user with this role can add members to a giving club.
<i>MS</i>	Membership Supervisor	Membership Management	Assigning the MS role to an individual gives special authority in session management to reopen membership session expected amounts and counts, reopen a balanced membership session, or transfer membership sessions among users on the Session Summary page.

Purpose Type

Select *Administrative* when creating internal assignments, such as Gift and Pledge Supervisor, that are not used when assigning a resource to a prospect. Select *Assignment*, such as Prospect Manager, to assign a resource to a prospect.

Staff

Select this check box to indicate that this role applies to staff resources. For example, if a Prospect Manager must always be a staff member, select this check box and clear the others.

Volunteer Select this check box to indicate that this role applies to volunteer resources.

Unit Select this check box to indicate that this role applies to unit resources.

Warning! The Staff, Volunteer, and Unit check boxes only affect the system if you have selected the Class option on the CR Installation page. When you select the Class option, you indicate that all the role codes for a resource type are available to every person or unit that is part of that resource type. For example, if you define the role of Prospect Manager and select the Staff check box, then all the staff members at the institution can be assigned as prospect managers. If you select the Defined option on the CR Installation page, then resources can only be assigned to prospects for the roles that you select for them on the Staff Roles, Unit Roles, or Volunteer Roles pages. For example, if staff member Darla Perkins is a Prospect Manager, you must first define Prospect Manager as a role code, and then select that role code for Darla Perkins on the Staff Roles page. You should select the appropriate Staff, Volunteer, or Unit check box on this page, regardless of the option that you select on the CR Installation page. If you do so and your institution decides to switch from Defined to Class installation mode, your role codes will already be set up.

Defining Staff and Volunteers

Access the Define Staff or the Define Volunteers page (Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Resources, Staff or Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Resources, Volunteers).

Units page

The units that you define here are used by this application only; they are different from the business units that are used to differentiate between sectors of your institution throughout the system. Using prospect management functionality, you have the ability to assign institutional units to prospects for particular cultivation purposes. Common examples of units include *Annual Fund*, *College of Fine Arts*, and *Development Office*.

Department

Select the department at your institution to which the unit belongs.

Note.

This field is optional and is provided for use in reports only.

Unit Roles

Role

Select one or more roles to associate with the resource. The description of the role appears to the right of the code.

Important! The system uses individual unit roles if you select the Defined installation mode for assignments on the CR Installation page.

Chapter 3

General Functions Used Throughout the System

This chapter discusses how to:

- Link a spouse to a constituent record.
- Work with worksets.
- Create service indicators.
- Modify constituent type and class year.
- Send email notifications.
- Create and view attachments.

Linking a Spouse to a Constituent Record

When you have established the constituent's relationship with the spouse, the Spouse link appears in the top right-hand corner of many pages when the constituent's record is retrieved.

Click to retrieve the constituent's spousal record on the current page. When the spouse record is retrieved, that record carries forward as you navigate from page to page.

To return to the constituent's record, click the link. This link acts as a toggle switch, enabling you to move back and forth between spouse records.

Working with Worksets

This section provides an overview of worksets and discusses how to:

- Create a workset.
- Join worksets.
- Build a workset from a page in the system.

Understanding Worksets

On many pages throughout the system you can create worksets, or groups of records that you review or update simultaneously. Worksets are a powerful tool when your work revolves around a group of constituents, because you do not have to retrieve each record individually to review or update information. Worksets can contain both people and external organizations within a single workset.

You can load a workset into a page to work with a set of records at one time, rather than individually accessing each record. You can also save, update, join, and reuse worksets.

Pages Used to Work with Worksets

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Manage Worksets	AV_WORKSET	Contributor Relations, Constituent Information, Workset, Manage Worksets	Create or update worksets.
Join Worksets	AV_WSET_JOIN	Contributor Relations, Constituent Information, Workset, Join Worksets	Join two or more worksets by either adding the records from two worksets together or by excluding the records in the worksets that are not common.

Creating a Workset

Access the Manage Worksets page (Contributor Relations, Constituent Information, Workset, Manage Worksets).

Manage Worksets

Workset Code: BOTH

Total Members: 6

Join Worksets page

Workset To Be Built

Workset Code	Select the code for the first workset in the set to join. You define workset codes when you create a workset.
Description	The description of the workset that appears when you press TAB from the Workset Code field. The resulting joined workset inherits the name of the workset that you select.
Method	Select a method for joining the two worksets. <i>Add:</i> Select to add the records in the selected workset to the records in another workset without excluding any records. <i>Exclusive:</i> Select to remove nonmatching records from both worksets.
Build	Click to create the workset.

Worksets To Be Joined

Workset Code	Select the code for each workset to be joined.

Building a Workset From a Page in the System

There are several pages in Contributor Relations that you can use to build a workset:

- Prospect List
- Employee List
- Involvement Roster
- Acknowledge Suspense
- Acknowledgement List
- Top Donors
- Giving Club Membership Summary
- Resource Assignments

To build a workset while you are using one of these pages:

1. Select the Workset check box to include the prospect in a workset.
2. To include all the records on the page, click *All*.
3. To create a new workset, add to an existing workset, or override an existing workset with the selected prospects, type or select the short name for the workset in the Workset field.

If you are creating a new workset, type text describing the workset in the Description field.

4. Select *Add* to add the selected prospects to an existing workset without changing the existing workset records.
5. Select *Overwrite* to overwrite the records in an existing workset with the records that you selected.
6. Select *Exclusive* to remove records from an existing workset that do not match the records that you selected.
7. Click Build to create the workset.

Creating Service Indicators

You can create and review service indicators, or tags that provide important information about a constituent. For example, service indicators might be *Verified Deceased*, *Do Not Call*, *Do Not Solicit*, *Do Not Mail*, and so on.

The pages and process that you use to create and review service indicators are identical to those used in the PeopleSoft Campus Community application.

Reviewing Constituent Type and Class Year

On many pages in Contributor Relations, the system displays a person's constituent type as a link, as well as class year. When you click the Constituent Type link, you access the Constituent Type Summary page, where you can review historical constituent types for that person. Click the Class Year link to display the constituent's Academic Information Summary page.

Sending Email Notifications

On many pages in Contributor Relations, you have the option to send an email to constituents. For example, after reviewing a person's Person Profile, you might send an email to the constituent to request an information update, or to invite the constituent to participate in a special event of interest, based on information on their record.

Pages Used to Send Email Notifications

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Send Notification	PT_WF_NOTIFY	Click the Notify button on any page in the system where it is available.	Enter email details, such as addresses and message content.
Send Notification - Lookup Address	PT_WF_NOTIFY_LOOKUP	Click the Lookup Recipient link on the Send Notification page.	Create an email recipient list or search for email addresses.

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Send Notification - Delivery Options	PT_WF_NOTIFY_DOPTNS	Click the Delivery Options link on the Send Notification page.	View or change the delivery method of the email.

Creating and Viewing Attachments

This section provides an overview of new attachment functionality in Contributor Relations and discusses how to create and view attachments throughout the system.

Understanding Attachments

File attachments provide the ability to upload, modify, view and delete files in several areas of the product. The following table provides a high-level overview of where file attachments can be used in Contributor Relations:

<i>Area</i>	<i>Functionality</i>
Persons and Organizations	A number of components can manage an overall set of file attachments for both people and organizations. Each attachment uploaded is assigned an attachment type. This type is defined by the user and is used for grouping and filtering attachments. The Person Profile and Organization Profile pages list the attachments created for the constituent where they can be subsequently downloaded and viewed on demand.
Gift Entry and Pledge Entry	Files can be attached to individual gift and pledges within a session. Attachments in posted gift and pledge sessions can be viewed and managed without the need to create an adjusted session.
Planned Giving	Files can be attached to individual bequests, trusts, gift annuities, and pooled income funds. The planned giving profile and prospect profile components list the attachments where they can be subsequently downloaded and viewed on demand.
Prospects	A common set of attachments can be managed for a prospect using the Prospect Attachments components. The attachments created can be viewed from the Prospect Profile page. Attachments can also be added to Strategies.
Designations	Attachments can be created and managed for each individual designation fund. Any attachments created can be viewed using the designation fund details components.

Area	Functionality
Action Entry	Attachments can be created and managed for each individual action assigned to people and organizations in Contributor Relations. The attachments created can be viewed using the Action Details secondary page.
Matching Gift	Attachments can be created and managed using the Matching Rules component. The attachments created can be viewed using the View Matching Rules component.
Initiatives	Attachments can be created and managed for each initiative (campaign, event, membership, volunteer, and other initiatives). The campaign attachments created can be viewed from the Campaign Summary component.

There are four categories of attachments that you can create and view:

- Constituent attachments.
- Transactional attachments.
- Planned giving attachments.
- Initiative attachments.

Chapter 4

Setting Up Constituent Data

This chapter lists prerequisites and discusses how to:

- Define constituent types.
- Define involvement categories.
- Define involvement types.
- Define involvement codes.
- Define person and organizational relationships.
- Define organization reciprocal relationships.
- Set up contact types.
- Set up attachment types.

Note. This portion of Contributor Relations is intended to expand on the functionality provided in PeopleSoft Campus Community to further meet the needs of development officers in accessing information.

Prerequisites

Nothing is more important than knowing who your constituents are. Constituents provide resources, support and promote programs, and *advance* your institution through their gifts of time, ideas, and financial support.

Before you begin the process of setting up the system for processing people and organization data, consider the following questions:

- How do you plan to set up staff members and roles?

Consider creating a spreadsheet that includes staff member names, job titles, and roles.

- How does your institution want to assign roles to staff, volunteer, and unit resources for prospect and initiative management?
- What relationships between people and organizations does your institution record?
- What relationships between organizations does your institution track?
- How do you want to use service indicators?

The values that you set up are used for both people and organizations.

- What constituent involvement does your institution track?

Consider creating a spreadsheet of involvement categories, types, and codes to refine your scheme before entering it in the system.

- What type of contacts does your institution use at organizations?

Defining Constituent Types

To set up constituent types, use the Constituent Types component (AV_CTYP_CD_TBL).

This section provides an overview of constituent types and discusses how to set up constituent data.

Understanding Constituent Types

Constituent types describe the relationships between a constituent and an institution. When you define constituent types, the number you enter in the Constituent Type field defines the order of priority for the type according to CASE.

Constituent types are shipped with the system and should only be changed if CASE codes change because the system uses them to produce the annual CASE gift income report.

Constituent Types Required Values

The following table describes the values that are required in the CNST_TYPE field that resides in the AV_CTYP_CD_TBL table:

<i>Code</i>	<i>Value</i>
1	Alumni
2	Alumni, Non-Degreed
3	Student
4	Parent
5	Friend
6	Faculty
7	Staff

<i>Code</i>	<i>Value</i>
8	Non-Alum Spouse of Alumni
9	Other Person Type
10	Corporation
11	Corporate Foundation
12	Foundation
13	Personal, Family Foundation
14	Fund-Raising Consortia
15	Association
16	Religious Organization
17	Government
18	Government Foundation
19	Other Organization Type

Important! When you define constituent types, the number that you enter in the Constituent Type field defines the priority for the type according to CASE. When people and organizations have multiple constituent types assigned to them, the type with the highest priority (lowest constituent type number) appears throughout the system.

Page Used to Define Constituent Types

Description: Alumni

Short Description: Alumni

Define Constituent Types page

Examples of constituent types are alumni, friend, parent, and faculty.

ID Type

Specify whether this constituent type applies to people or organizations. Available options are *Person* and *Org ID*. If a constituent type can apply to both people and organizations, enter the constituent type twice, selecting *Person* for one ID type, and then selecting *Org ID* for the other ID type.

Defining Involvement Categories

To set up involvement categories, use the Involvement Categories component (AV_INVLV_C_TBL).

This section discusses how to define involvement categories.

Page Used to Define Involvement Categories

Page Name	Definition Name	Navigation	Usage
Involvement Categories	AV_INVLV_C_TBL	Set Up SACR, Product Related, Contributor Relations, Constituent Information, Involvement Categories	Define the various categories used to sort involvement information.

Setting Involvement Category Definitions

Access the Involvement Categories page (Set Up SACR, Product Related, Contributor Relations, Constituent Information, Involvement Categories).

The screenshot shows the 'Involvement Categories' page. At the top, the title 'Involvement Categories' is displayed. Below it, the 'Involvement Category:' is set to 'ACAD'. The page has a navigation bar with 'Find | View All' and 'First 1 of 1 Last'. The main form contains the following fields:

- *Effective Date:** 01/01/1900 (with a calendar icon)
- *Status:** Active (dropdown menu)
- *Description:** Academic (text input)
- Short Description:** Academic (text input)

Involvement Categories page

Involvement refers to a constituent's activities, affiliations, interests, and awards and honors. When you create an involvement record, you identify the involvement type, a description of the involvement, a category, an institution, and start and end dates. Examples of involvement categories are professional, charitable, academic, social, and religious.

Involvement Categories Required Values

The following values are required in the AV_CTGY_CD field that resides in the AV_INVLV_C_TBL table:

Code	Value
CHAR	Charitable

Defining Involvement Types

To set up involvement types, use the Involvement Types component (AV_INVLV_T_TBL).

This section discusses how to define involvement types.

Page Used to Define Involvement Types

Page Name	Definition Name	Navigation	Usage
Involvement Types	AV_INVLV_T_TBL	Set Up SACR, Product Related, Contributor Relations, Constituent Information, Involvement Types	Define the various types of constituent involvement to track.

Setting Involvement Types Values

Access the Involvement Types page (Set Up SACR, Product Related, Contributor Relations, Constituent Information, Involvement Types).

Involvement Types page

Examples of involvement types are activities, interests, awards and honors, and affiliations.

Use Date Received

Select if the involvement type is associated with a particular date, rather than a date range. For example, an honor or award is received on one date, and does not involve a date range. If you select this check box, the Date Received field on the Involvement page is available for input and the Start Date and End Date fields are not available for input.

Use Start/End Dates

Select if the involvement type is associated with a date range. For example, an affiliation with a club or other organization can span a date range. If you select this check box, the Start Date and End Date fields on the Involvement page are available for input and the Date Received field is not available for input.

Defining Involvement Codes

To set up involvement codes, use the Involvement Codes component (AV_INVLV_CD_TBL).

This section provides an overview of involvement codes and discusses how to set involvement code values.

Understanding Involvement Codes

Involvement is a constituent's participation tracked as activities, affiliations, interests, and awards and honors. When you create an involvement record, you identify the involvement type, a code for the actual involvement and its related description, a category such as charitable or political, an institution, and start and end dates. For example, you might set up an involvement code called GOLF, for which the related description might read "Avid Golfer."

Page Used to Define Involvement Codes

Person Description: Member

Org Description: Member

Person/Org Relationships setup page

Person Description

Enter the relationship that the person has with the organization. For example, if you are defining a relationship between a trustee and a foundation, the description of the person that you enter is *Trustee*.

Org Description

Enter the relationship that the organization has with the person. For example, if you are defining a relationship between a trustee and a foundation, the description of the organization that you enter is *Trustee*.

Note. Because the relationship always depicts the person's role in relation to the organization, the setup values on this page should always reflect the person's relationship type for both person and organization. Using this convention, regardless of whether you are reviewing the record of the person or the organization, you will understand the relationship that the person has to that organization.

Defining Organization Reciprocal Relationships

To set up organization reciprocal relationships, use the Org Reciprocal Relationships component (AV_ORG_RELATE_TBL).

This section discusses how to define organization reciprocal relationships.

Page Used to Define Organization Reciprocal Relationships

Page Name	Definition Name	Navigation	Usage
Reciprocal Relationship	AV_ORG_RELATE_TBL	Set Up SACR, Product Related, Contributor Relations, Constituent Information, Org Reciprocal Relationships	Set up the valid reciprocal relationships that you can create when you establish relationships between organizations.

Setting Reciprocal Relationship Values

Access the Reciprocal Relationship page (Set Up SACR, Product Related, Contributor Relations, Constituent Information, Org Reciprocal Relationships).

Chapter 5

Setting Up Prospects

This chapter lists prerequisites and discusses how to set up prospect identifiers.

Prerequisites

Before you set up Contributor Relations to manage prospects, consider the following questions:

- How are setIDs, record groups, and business units set up at your institution?

Define the donor appreciation items by setID.

- Do your business rules specify that a contact report is required for each completed action?

Specify this option on the CR Installation page.

- Which elements do you want to include in standard biographic (bio bit and bio brief) reports?

Review the standard bio bit and bio brief reports to determine which elements to set up as standard for each report. Each user can define custom bio bit and bio brief reports in addition to the standard reports that you format for your operations as a whole.

- How do you plan to assign resources?

Set up parameters for resource assignments using the CR Installation page.

Setting Up Prospect Identifiers

To set up prospect identifiers, use these components: Asset Types (AV_ASSET_TBL), Rating Types (AV_R_TYPE_TBL), Rating Categories (AV_R_CAT_TBL), Rating Indicators (AV_R_IND_TBL), Action Types (AV_ACTN_TYPE_TBL), Action Contact Types (AV_ACTN_CNTC_TBL), Action Status Codes (AV_ACTN_STAT_TBL), Action Results (AV_ACTN_RSLT_TBL), Appreciation Items (AV_ITEM_TBL), Trust Categories (AV_TRUST_C_TBL), Trust Terms (AV_TRUST_R_TBL), Trust Types (AV_TRUST_T_TBL).

This section discusses how to:

- Define asset types.
- Define rating types.
- Define rating origins.

- Define rating categories.
- Define rating indicators.
- Define action types.
- Define action contact types.
- Define action status codes.
- Define action results.
- Define donor appreciation items.

Pages Used to Set Up Prospect Identifiers

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Assets	AV_ASSET_TBL	Set Up SACR, Product Related, Contributor Relations, Prospect Management, Asset Types	Define the types of assets that your institution tracks.

Short Description: Boat

Assets page

Assets are items of value owned by a prospect. Assets that are typically tracked include real estate, fine art, and securities.

Defining Rating Types

Access the Rating Types page (Set Up SACR, Product Related, Contributor Relations, Prospect Management, Rating Type).

Rating Types

Rating Type: STAFF

Find | View All First 1 of 1 Last

*Effective Date: 01/01/1900

*Status: Active

*Rating Origin: INST

*Description: Staff

Short Description: Staff

Rating Types page

Rating types indicate the type of entity that is providing a prospect's rating. Examples of rating types are *Peer*, *Vendor*, and *Staff*. For example, if an institution purchases census information from an outside party, the rating type that is associated with those ratings would probably be *Vendor* because the information comes from an outside source.

Defining Rating Origins

Access the Rating Origin page (Set Up SACR, Product Related, Contributor Relations, Prospect Management, Rating Origin).

Rating Origin

Rating Origin: INST

Find | View All First 1 of 1 Last

Short Description: Gift Capac

Create a New Indicator

Valid Indicators

Find | View All First 1 of 1 Last

DM3	\$1,000,000 - \$1,499,999

Rating Categories page

Rating categories are descriptive classifications of a rating and are defined by your institution. They are used in prospect management to qualify prospects for giving. You assign ratings to a constituent on the Ratings page.

Examples of rating categories are *Household Income*, *Gift Capacity*, and *Overall Readiness*.

- Valid Indicators**

Valid indicators allow the appropriate values to appear for the category when entering a rating on the Ratings Indicator Page. Select the indicators that are applicable to the ratings category. For example, if the Ratings Category is *Survey Results*, only those ratings indicators pertinent to surveys would be valid indicators.
- Create a New Indicator**

Click to access the Rating Indicators page, where you can add a new rating indicator code.

Defining Rating Indicators

Access the Rating Indicators page (Set Up SACR, Product Related, Contributor Relations, Prospect Management, Rating Indicators).

Rating Indicators

Indicator Code:50-100

☐ Valid Values

Rating Indicators page

Rating indicators are the names and descriptions of a specific screening indicator used by the institution. They are used in prospect management to help qualify the potential of a prospect to support the philanthropic organization. Assign ratings to a constituent on the Ratings page.

Examples of rating indicator descriptions are *75,000-100,000 for Household Income*, *Lifestyle-01B for a vendor rating*, and *25,000+ for Giving Capacity*.

- Valid Values** Select this check box to indicate that the indicator code requires certain values to be returned in the Value field on the Ratings page. If you select this check box, the system displays the Valid Values group box.
- Valid Value and Description** Enter a brief description of the valid value for the indicator code. Valid Values allow the indicator to be refined to a more specific level than the indicator itself. For example, the rating indicator may be Self-employed and the valid values may be Owner, Consultant, Proprietor.
- Vendor Code** Select this check box to indicate whether the value is supplied by a vendor.

Defining Action Types

Access the Action Types page (Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Actions, Action Types).

*Description: Ask

Short Description: Ask

☒ Constituent Action

☒ Initiative Action

Valid Result Codes

Find | View All First 1 of 1 Last

PLEDGE	Pledge

Add All Result Codes

Action Types page

An action type is the form of action that is taken with a particular donor prospect or for a particular initiative. For donor prospects, action types might include an ask, invitation, information gathering, or presentation proposal. For initiatives, action types might include a design session, vendor selection, or layout meeting.

When you create an action, you associate it with an action type. You can then track the information that is specific to that action type. For example, if the action type is *Ask*, you can enter an ask amount.

Valid Result Codes

Action types have certain expected outcomes. Result codes might be Accepted, Rejected, Submitted, Gift, or Pledge, for example. However, these are not all valid for every action type. Valid Result Codes are linked directly to Action Types.

Add All Result Codes

Select the Add All Result Codes button to add all existing result codes to the action type. Once all are selected, the user may delete rows that are not pertinent. This is useful if more result codes apply than do not.

Action Type Required Values

The following table describes the values that are required in the ACTN_TYPE_CD field that resides in the AV_ACTN_TYP_TBL table:

<i>Code</i>	<i>Value</i>
ASK	Ask

Action Type Code

Displays the code for the action type.

Note. This value comes from the ACTN_TYPE_CD field in the AV_ACTN_TYP_TBL table.

Constituent Action

Select if the action type applies to actions that are associated with prospects or constituents.

Initiative Action

Select if the action type applies to actions that are generated through an initiative.

The selections that you make on this page determine the values in the Action Type field prompt when you create an action.

Defining Action Contact Types

Access the Action Contact Type page (Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Actions, Action Contact Types).

Action Contact Type

Contact Type Code: PHONE

Find | View All First 1 of 1 Last

*Effective Date: 01/01/1900

*Status: Active

*Description: Telephone Call

Short Description: Phone Call

☒ Constituent Action

☒ Initiative Action

☒ Volunteer

Action Contact Type page

When you create an action or a volunteer assignment in Contributor Relations, you select a contact type. The contact type determines whether the person performs the action using a telephone call, a letter, an email, a personal visit, or some other method. For the purpose of managing prospects, a contact type could be a personal visit. For the purpose of managing initiatives, a contact type could be a meeting or phone call.

The selections that you make on this page determine the available values in the Contact Type field on the Volunteer Assignments 2 page, which you use when creating an action or a volunteer assignment.

Constituent Action	Select if the contact type applies to prospect actions.
Initiative Action	Select if the contact type applies to actions that are generated through an initiative.
Volunteer	Select if the contact type applies to volunteer assignments.

Defining Action Status Codes

Access the Action Status page (Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Actions, Action Status Codes).

Action Status

Action Status: CMP

Find | View All First 1 of 1 Last

*Effective Date: 01/01/1900

*Status: Active

*Description: Complete

Short Description: Complete

☒ Constituent Action

☒ Initiative Action

Action Status page

As you create, schedule, and complete an action, its status changes. This page enables you to define the status codes that appear in the Action Status prompt dialog boxes throughout the system.

The selections that you make on this page determine the values in the Action Status field on the Prospect Action page, which you use when creating an action.

Action Status Codes Required Values

The following values are required in the ACTN_STAT_CD field that resides in the AV_ACTN_STA_TBL table:

Code	Value
CMP	Complete
SCH	Scheduled

Constituent Action Select if the action status applies to prospect actions.

Initiative Action Select if the action status applies to actions that are generated through an initiative.

Examples of action status include scheduled, on hold, and suspended.

Defining Action Results

Access the Action Results page (Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Actions, Action Results).

Action Results

Result Code: DECL

Find | View All

***Effective Date:** 01/01/1900

***Status:** Active

***Description:** Declined

Short Description: Declined

☒ **Constituent Action**
☒ **Initiative Action**

Action Results page

The selections that you make on this page determine the values in the Result field on the Action Results page (Contributor Relations, Prospect Management, Stewardship Plans, Constituent Actions, Actions-Person (or Actions-Org), Action Results tab, or Self Service, Outreach, My Prospects, My Stewardship Plans, Complete an Action) used when completing a prospect action.

Constituent Action Select if the action result applies to prospect actions. Examples include accepted, proposal presented, gift, pledge, and declined.

Initiative Action Select if the action result applies to actions that are generated through an initiative. Examples of action results include confirmed, contract pending, and vendor selected.

Action Results Required Values

The following values are required in the ACTN_RSLT_CD field that resides in the AV_ACTN_RSLT_TBL table:

Code	Value
DECL	<i>Declined</i>
GIFT	<i>Gift</i>
PLEDGE	<i>Pledge</i>

Note. Use the ACTN_RSLT_CD field for reporting action results in the Campaign Progress report.

Defining Donor Appreciation Items

Access the Donor Appreciation Items page (Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Appreciation Items).

Donor Appreciation Items

SetID: MODEL Item Code: AER01

Find | View All First 1 of 1 Last

*Effective Date: 01/01/1900

*Status: Active

*Item Description: Aerial Photo of Campus

Item Value: 6.66 Currency Code: USD

*Item Category: Donor Appreciation

Donor Appreciation Items page

Donor appreciation items are keyed by setID, so different business units can present different items to donors. A gift from a business unit might differ in look and cost, depending on the location that distributes it.

Examples of appreciation items are key chains, T-shirts, and pens.

Item Category

Select the item category to indicate whether the item is distributed for donor appreciation or as a membership benefit. The item category determines whether the item appears as an available item on the Donor Appreciation page or as a standard benefit on the Member Dues page.

Note. If you use the same item for both purposes, the item should be entered twice with different codes so that it appears correctly as an available option.

Chapter 6

Setting Up Initiatives

This chapter provides an overview of initiatives and discusses how to:

- Define initiative types.
- Define audiences.
- Define initiative goal types.
- Define methods.
- Use action components for initiative setup.
- Define budget categories.
- Set up appeal information.
- Set up campaigns.
- Set up membership initiatives.
- Set up volunteer efforts.
- Set up event initiatives.

Understanding Initiatives

This section lists prerequisites and discusses initiatives in general, as well as specific initiative types.

Prerequisites

In general, before you set up initiatives in the system, consider these questions:

- What type of goals does the institution track for initiatives?

Goal types will differ, depending on the initiative type, but may be number of attendees, volunteers, or members, or percent increase over the previous year.

- What types of audiences do you appeal to for each initiative that the institution runs?

Create a spreadsheet of attributes and audiences for each of the initiatives to help you plan the setup. An attribute is the system field or view containing the information that you use to segment the audience.

- What communication methods do you use to evoke participation in the initiatives?

Examples of methods are letters, emails, and personal visits, which are set up as communication methods.

- What types of appeals do you use to reach constituents during initiatives?

Appeal types are categories of appeals such as direct mail, phonathons, and personal solicitations. What specific appeals does the institution use for each type of initiative? Create a spreadsheet of each appeal and its type to use when you go live and as part of the conversion of gifts and pledges. Appeals can be linked to all types of initiatives and to gifts and pledges, depending on the check boxes selected on the Setup Appeal Code page.

- What categories of expenses do you track for the initiative budgets?

These are set up as budget categories.

- What aspects of actions do you want to track?

You can track four aspects of actions with the system. These action components are used for both initiatives and prospect management. You must set them up carefully. Create a spreadsheet of all four action components. Make sure that each action type can be linked to appropriate action contact types, statuses, and results.

- Action types are the general kinds of actions that you use when tracking initiatives and prospects, such as an ask or cultivation.
- Action contact types are the specific actions that the initiative staff engages in for initiatives, such as mass mailings, phonathon calls, and personal visits.
- Action status and action results are necessary for each action type and action contact type.
- What types of contact does your staff have with constituents, and for what purposes?

Create a spreadsheet of all four action components.

- What types of communications does the institution engage in for each initiative?

Much setup is necessary to produce communications from the system that are tailored to the needs of the company. Communications is part of PeopleSoft Campus Community, which is shared by all areas on campus. You might establish some naming conventions for each office that uses communications, to make communications more manageable.

In addition to the questions above, which are prerequisites for setting up any type of initiative, you should consider additional questions for each major type of initiative.

Before you set up the system to manage a campaign, consider this question: What phases, such as leadership gifts, major gifts, and general campaign gifts, do your campaigns encompass?

Before you set up the system to manage memberships, consider these questions:

- How are setIDs, record groups, and business units set up at your institution?

Membership types and membership categories are defined by setID. When you set up membership organizations and view information by business unit, the values that you see depend upon the values that you define for the setID and the setID that you associate with the AV01_MBR record group.

and *PeopleSoft Campus Solutions 9.0 Application Fundamentals PeopleBook*, "Securing Contributor Relations," Defining and Securing PeopleSoft Contributor Relations Business Units and SetIDs.

- Does your institution allow gift entry to be completed when membership dues are processed?

You specify this information on the Institution Installation page.

- How many days before a membership period ends do you need to roll dues over to the following year's membership period?

You specify this information on the Institution Installation page.

- What types of memberships can constituents have with a member organization?

Examples of membership types are life, annual, and sustaining.

- What are the various categories for membership in an organization?

Examples of membership categories are single, joint, family, and complimentary.

Before you set up the system to manage volunteers, consider the following:

- What phases do your volunteer initiatives encompass?
- What specific appeals does your institution use for volunteer recruitment?

Examples of volunteer appeals are an invitation to participate in a career network or a request to help with the annual alumni phonathon. Create a spreadsheet of each appeal and its type. You can link appeals to all types of initiatives.

- What responsibilities does your institution assign to volunteers?

These are set up as areas of responsibility. Responsibilities include programs, food, and entertainment.

- What areas of responsibility do you want to categorize?

For instance, event logistics might be an assignment type that comprises registration, entertainment, food, and program.

- What volunteer structures does your institution use to accomplish its goals?

You can set up leadership types that act as templates. When you create a new leadership structure for an initiative or member organization, you can import the volunteer structure. Examples of leadership types are *Board of Directors*, *Reunion Committee*, and *Fund Raising Team*.

Before you set up the system to manage events, consider this question: What phases do your event initiatives encompass?

Understanding General Initiatives

When developing a strategic plan for Contributor Relations, an institution must identify the initiatives that will be the basis from which the plan will be carried out. An initiative is any organized effort with an expressed purpose. It can be a campaign, a membership initiative, an organized volunteer effort, an event initiative, or any other type of initiative defined by the institution. Initiatives can consist of multiple parts with other initiatives related to them, enabling the institution to track individual parts or the initiative as a whole.

To create an initiative, regardless of its type, you:

- Define a time frame.

- Define participation and financial goals.
- Assign responsible resources.
- Define the target audiences.
- Determine how this function relates to others at the institution.
- Develop a communications or public relations plan to reach the target audiences.

The four main initiative types are:

- Campaign

An organized institutional effort targeted to a specific constituency that occurs over a specified period of time, with specific purposes and goals.

- Membership initiative

A campaign focused primarily on membership.

- Volunteer effort

After you create an initiative or define a membership organization, you can create the volunteer structure necessary for the effort to succeed. You then assign volunteers to the positions within the volunteer structure and assign additional volunteers to perform specific tasks.

- Event

Any occurrence that you set up to achieve a particular result.

Events are one of the most effective ways for the institution to reach both existing and new constituents.

Understanding Campaigns

A campaign is an organized institutional effort targeted to a specific constituency that occurs over a specified period of time, with specific purposes and goals. Although all initiatives in Contributor Relations share common setup pages, a campaign initiative has its own audience, resources, related initiatives, and PR plan. Some initiatives, such as campaigns, require additional setup that is specific to their purpose.

Understanding Membership Initiatives

A membership initiative is a campaign focused primarily on membership. Although all initiatives in Contributor Relations share common setup pages, a membership initiative has its own audience, resources, related initiatives, and PR plan. Some initiatives, such as membership initiatives, require additional setup that is specific to their purpose.

Understanding Volunteer Efforts

After you create an initiative or define a membership organization, you can create the volunteer structure necessary for the effort to succeed. You then assign volunteers to the positions within the volunteer structure and assign additional volunteers to perform specific tasks. Volunteer efforts are associated with both volunteer initiatives and member organizations, and are set up as initiatives. Although all initiatives in Contributor Relations share some common setup pages, a volunteer effort has its own audience, resources, related initiatives, and PR plan. Some initiatives, such as volunteer efforts, require additional setup that is specific to their purpose. The volunteer-specific setup is covered in this chapter; overview information for all types of initiatives is discussed elsewhere in this PeopleBook.

Understanding Event Initiatives

An event initiative is any occurrence that you set up to achieve a particular result. It is a combination of processes. Events are one of the most effective ways for the institution to reach both existing and new constituents.

Although all initiatives in Contributor Relations share some common setup pages, an event initiative has its own audience, resources, related initiatives, and PR plan. Some initiatives, such as events, require additional setup that is specific to their purpose. The event-specific setup is covered in this chapter; overview information applicable to all initiatives is located elsewhere in this PeopleBook.

Understanding Other Initiatives

Other-type initiatives refer to initiatives that do not fall within the boundaries of a campaign, event initiative, membership initiative, or volunteer effort. Although all initiatives in Contributor Relations share some common setup pages, other-type initiatives have their own audiences, resources, related initiatives, and PR plans. Setup information applicable to all initiatives is located elsewhere in this PeopleBook.

Defining Initiative Types

To set up initiative types, use the Initiative Type Table component (AV_INTV_TYPE_TABLE).

Before you can create and manage an initiative, you must define the types of initiatives used by the institution.

This section discusses how to define initiative types.

Page Used to Define Initiative Types

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Initiative Types	AV_INTV_TYPE_TABLE	Set Up SACR, Product Related, Contributor Relations, Initiatives, Initiative Type Table	Define institution-specific initiative types.

Defining Initiative Types

Access the Initiative Types page (Set Up SACR, Product Related, Contributor Relations, Initiatives, Initiative Type Table).

The screenshot shows the 'Initiative Types' page. At the top, the 'Initiative Type' is set to 'CAMPAIGN'. Below this is a table with the following fields:

Initiative Type: CAMPAIGN	
*Effective Date:	01/01/1900
*Status:	Active
*Description:	Campaign
Short Description:	Campaign

Navigation links at the top right include 'Find | View All', 'First', '1 of 1', and 'Last'. There are also '+' and '-' buttons on the right side of the table.

Initiative Types page

There are five delivered initiative types, which you should not modify. Institutions can define additional initiative types that fulfill their needs. Institution-defined initiative types are classified as *OTHER*.

Initiative Type Required Values

These values are required in the INTV_TYPE field that resides in the AV_INTV_TYPE_TBL table:

Code	Value
CAMPAIGN	Campaign
EVENT	Event
VOLUNTEER	Volunteer
MEMBERSHIP	Membership
OTHER	Other Initiative

The system treats any initiative types that you add in addition to those listed in the preceding table as Other Initiative types. Other Initiative types appear as options in the Initiative Type field on the Other Initiatives page.

Defining Audiences

To set up audiences, use the Attribute Type component (AV_ATTR_TYP), and the Audience Criteria component (AV_AUD_CRIT).

The values that you define here are used when creating an initiative audience.

This section discusses how to:

- Set up attribute types.
- Set up audience criteria.

Pages Used to Define Audiences

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Attribute Type	AV_ATTR_TYP_TBL	Set Up SACR, Product Related, Contributor Relations, Initiatives, Attribute Type	Set up the various attributes in the system from which to build audiences. For example, you might include involvement information as a possible attribute type that is used to build an audience of constituents.
Audience Criteria	AV_AUD_CRIT	Set Up SACR, Product Related, Contributor Relations, Initiatives, Audience Criteria	Create selection criteria statements or statements that provide the variables needed to identify qualified audience members when a COBOL process is run. When you assign an audience to an initiative or member organization, the actual list of audience members is generated through this COBOL process.

Setting Up Attribute Types

Access the Attribute Type page (Set Up SACR, Product Related, Contributor Relations, Initiatives, Attribute Type).

Attribute Type

Attribute Code: INVLV
Person / Organization: Person

Attribute Type

Find | View All First 1 of 1 Last

*Effective Date: 01/01/1900
*Status: Active
Description: Campus/Community Involvement
Short Description: Involvement
Attribute Prompt Table: AV_INVLV_CD_TBL
*Attribute Process Table: AV_INVLV_TBL

[Attribute Field](#) INVLV_CD

Attribute Type page

An attribute type is a characteristic that you can use to identify someone to communicate with in the system for an initiative or member organization.

Attribute Prompt Table

Enter a table or view name, which the system uses to populate the options in the Valid Value field on the Audience Criteria page. If you leave this field blank, the Valid Value field becomes a free-form field, and you can enter any value. However, you won't know if the value that you enter is valid until you run the process.

You might not want to use a prompt table that does not have a setup page associated with it, such as POSTAL_CODE or CLASS_YEAR. System performance improves if you add the free-form value rather than prompting against a large table.

Attribute Process Table

Enter a table name. This table contains the attribute that appears on the constituent's record.

Warning! If you are defining an attribute for a person, the EMPLID field must exist in the Attribute Process table. If you are defining an attribute for an organization, the EXT_ORG_ID field must exist in the Attribute Process table.

Attribute Field

Click this link to select the actual field in the process table where the attribute resides on a constituent's record.

The system supports these types and lengths of fields for attribute types:

Type	Maximum Field Length
Character	15
Number	10

Type	Maximum Field Length
Signed Number (decimal fields)	12.2
Date	10

The system searches for the attribute that you selected in the locations that you entered in the previous fields. The system generates an actual audience through the Initiative Audience Build COBOL process (AVPINT), which retrieves the attributes that you select. You can access the Initiative Audience Build page to run this process.

Example

To maximize the potential of audience attributes, a view could be created for all mailable alumni by selecting people who have constituent types of 1 and 2, an active address, and no date of death. By using this view as the first row in an audience criteria record, multiple tables are combined in a single view, leaving five more rows in audience criteria to narrow the audience selection.

Another way to maximize audience attributes is to create worksets and use the AV_WORKSET_MBR record as the process table to select members into an audience.

Attribute Type

Attribute Code: WRKSET Person / Organization: Person

Audience Criteria page using the Population Selection process

Audience Detail Common Fields

Approved

Select to indicate that the audience criteria is approved for use. Select only if you have completed the test search (by clicking the Test Search button) and are sure that you entered the selection criteria correctly.

Important! The audience that you define appears as an Audience option when assigning an audience to an initiative or member organization, if you selected the Approved check box.

Description

Enter a descriptive name for the audience. You can enter up to 60 characters in this field. This is a required field.

Selection Process

When you add a new audience criteria using the Audience Criteria search page, your selection process options here depend on the value you enter in the Person/Organization field. If you select *Person* or *Organization* in that field, you can select either the *Build/Merge Process* or *Population Selection* on this page. If you select *Both*, you must use the Population Selection process.

Population Selection

Select this option to use flexible methods to load audience data into the system. This group box appears when the *Population Selection* process is selected.

Population selection is a method for selecting the IDs to process for a specific transaction. The Population Selection group box is a standard group box that appears on run control pages when the Population Selection process is available or required for the transaction. Selection tools are available based on the selection tools that your institution selected in the setup of the Population Selection process for the application process and on your user security. Fields in the group box appear based on the selection tool that you select. The fields behave the same way from within the group box on all run control pages and application processes.

If your institution uses a specific delivered selection tool (PS Query, Equation Engine equation, or external file) to identify IDs for a specific transaction, you must use it.

Warning! Any query you select for audience criteria cannot contain prompts.

Selection Criteria

Select this option to combine various attributes to narrow the audience. To retrieve the expected results, place the largest set of records in the first row, because the system selects that population first. Subsequent rows select populations from within the first group. For example, to select all alumni in Denver or Miami, first select all constituents with alumni as the constituent type, then select those with Denver postal codes, and then select those with Miami postal codes.

(	Select if the selection statement requires parentheses to separate it from subsequent selection criteria. If more than one opening parenthesis is selected, an initial opening parenthesis and subsequent closing parenthesis are assumed as part of the selection statement. Every opening parenthesis requires a closing parenthesis.
Attribute Type	Select an attribute type. The institution can define attribute types, but the setup must include a process table that includes the information on a constituent's record and, if appropriate, a prompt table for values.
Oper (operator)	Select an operator for the selection criteria statement. Values are: =, <, <=, <>, >, and >=. = includes all constituents with the attribute on their records. <> includes all constituents without the attribute on their records. Use <, <=, >, and >= to select a range, such as for an attribute of gift amount or postal code.
Valid Value	If you select a single value for the attribute type, only the constituents that share that specific value are included in the audience selection. To specify a value range, select the Range check box and enter the valid from and valid to range for the attribute in the Valid From and Valid To fields.
)	Select to indicate the end of a selection criteria statement.
Logical	Select (<i>AND</i>) to indicate that both attribute types are required or (<i>OR</i>) to indicate that either attribute type is acceptable.
Test Search	Click to run a background process that determines how many constituents would be included in the audience based on the criteria that you selected.

Note. You can create up to six rows of selection criteria. A single criterion can be based on a view that combines multiple attributes in a single view. For example, mailable alumni could be based on a process view that combines constituents with a constituent type of 1 or 2 who have active addresses and do not have a date of death. Further, other views combining multiple process tables can be used in the additional five criteria rows to expand the selection ability of the audience process.

Technical Information for Build/Merge Process

These rules apply when you specify audience criteria:

- The ID or EXT_ORG_ID is selected from the first table that you specify in the Selection Criteria group box.

For example, if you selected an attribute from the Involvement table as the first row of criteria and included an attribute from the Ethnicity table, then the result would include anyone in the Involvement table who also matched the ethnicity type in the second row of criteria. All IDs come from the table associated with the first row of criteria.

- All attribute types using the *OR* operator must be grouped together with parentheses in the Selection Criteria group box.
- Whenever two different attribute types are immediately linked by *AND*, they are joined by their ID or EXT_ORG_ID.
- When you link two values with *OR*, they must be part of the same attribute.

For example, you cannot select all constituents with a constituent type of *Alumnus* or an ethnicity of *African American*. In cases such as these, create two separate audiences and assign them both to the initiative or member organization to achieve the results that you want.

- When no prompt values are available, enter dates, using the format MM/DD/CCYY.

Round decimal numbers to whole numbers. Do not enter decimal points.

Defining Initiative Goal Types

To set up goal types, use the Goal Type Table component (AV_GOAL_TYPE_TABLE).

This section discusses how to define goal types for the initiative.

Page Used to Define Initiative Goal Types

Using Action Components for Initiative Setup

The Prospect Management feature in Contributor Relations contains four action components that are useful when you set up an initiative: action types, action contact types, action status codes, and action results. Use these components with campaigns, membership initiatives, and event initiatives, as well as for prospect management.

This section discusses how to:

- Define action types for initiatives.
- Define action contact types for initiatives.
- Define action status codes for initiatives.
- Define action results for initiatives.

Defining Action Types for Initiatives

Use the Action Types page to define general types of actions taken for a particular initiative, such as an ask.

Defining Action Contact Types for Initiatives

Use the Action Contact Types page to define the actions that the initiative staff can engage in. When you create an assignment, you select the contact type. The contact type determines whether the action will occur through a telephone call, letter, email, personal visit, and so on.

Defining Action Status Codes for Initiatives

Use the Action Status page to define the status codes that appear in the Action Status prompt dialog boxes throughout the system. Action status codes and action results are necessary for each action type and action contact type.

Defining Action Results for Initiatives

Use the Action Results page to define the values in the Result field on the page used when completing an initiative action. Action status codes and action results are necessary for each action type and action contact type.

Defining Budget Categories

To set up budget categories, use the Budget Table component (AV_BUDGET_TABLE).

This section discusses how to define the valid categories within an initiative budget.

Page Used to Define Budget Categories

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Budget Table	AV_BUDGET_TABLE	Set Up SACR, Product Related, Contributor Relations, Initiatives, Budget Table	Define the categories within an initiative budget.

Budget Table page

When creating a budget, you can allocate funds to each category that you include in an initiative budget. Budget expenses are subsequently applied to the categories within the established initiative budget.

Setting Up Appeal Information

To set up appeals, use the Appeal Type Table component (AV_APPEAL_TYPE_TBL) and the Appeal Code Table component (AV_MTVTN_TBL).

This section discusses how to:

- Set up appeal types.
- Set up appeals.
- Set up appeal details.

Pages Used to Set Up Appeal Information

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Appeal Types	AV_APPEAL_TYPE_TBL	Set Up SACR, Product Related, Contributor Relations, Initiatives, Appeal Type Table	Set up appeal types by defining the vehicles that are used to communicate an appeal or request, such as a phone call, a visit, and so on.
Appeal	AV_MTVTN_TBL	Set Up SACR, Product Related, Contributor Relations, Initiatives, Appeal Code Table	Set up appeals or specific activities that generate commitments at the institution.
Appeal Detail	AV_MTVTN2_TBL	Set Up SACR, Product Related, Contributor Relations, Initiatives, Appeal Code Table, Appeal Detail	Set up appeal details by defining the expected results and benefits for particular appeals.

Setting Up Appeal Types

Access the Appeal Types page (Set Up SACR, Product Related, Contributor Relations, Initiatives, Appeal Type Table).

***Status:** Active

***Description:** Alumni Annual Membership Appea

Short Description: Alumni Ann

Appeal Type: Phonathon

☐ Campaign Appeal

☒ Membership Appeal

☐ Event Appeal

☐ Volunteer Appeal

☐ Other Appeal

Appeal page

Examples of appeals are an annual phonathon, a publication insert, a capital campaign flyer, an honor roll, and so on.

- Appeal Type**

Select a vehicle that is used to communicate the appeal, such as phonathon, direct mail, and so on.
- Campaign Appeal**

Select to indicate that this appeal is a campaign appeal.
- Event Appeal**

Select to indicate that this appeal is an event appeal.
- Membership Appeal**

Select to indicate that this appeal is a membership appeal.
- Volunteer Appeal**

Select to indicate that this appeal is a volunteer appeal.

Other Appeal

Select to indicate that this appeal is an other appeal.

When you select one or more of these check boxes, the appeals appear as values in the Appeal field when entering an appeal code throughout the system. Campaign appeals appear in Gift and Pledge Entry. Membership and campaign appeals appear in Membership Entry.

In the previous example, ALUMAN appears only in the Membership Initiatives and Membership Entry components. When you select more than one check box, this appeal appears as a value in the Appeal field for initiatives whose type is the same as any you selected here. For example, if you also selected Campaign Appeal, the ALUMAN appeal would appear as available options in Appeal fields for all campaigns as well as in the Membership Initiatives component.

Setting Up Appeal Details

Access the Appeal Detail page (Set Up SACR, Product Related, Contributor Relations, Initiatives, Appeal Code Table, Appeal Detail).

Appeal Detail page

Appeal Goal

Enter the amount of revenue that you expect this appeal to generate.

Number of Pieces

Enter the number of pieces or contacts that you expect to make through the appeal. For example, if the appeal involves sending a letter, this value should be the total number of letters that you expect to send.

Appeal Budget

Enter the overall expense budget for the appeal.

Institution

Select the institution associated with the initiative.

Initiative Type and Initiative

Select each initiative type and initiative that uses the appeal.

Note. If a membership appeal is attached to initiatives, the Membership Progress page for the initiative displays the appeal and its results for that initiative.

Setting Up Campaigns

To set up campaigns, use the Campaign Donor Phase Table component (AV_DONOR_PHASE_TBL).

This section discusses how to:

- Define donor phases.
- Set up an anticipated gift table.
- Define reporting rules.

Pages Used to Set Up Campaigns

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Donor Phase Table	AV_DONOR_PHASE_TBL	Set Up SACR, Product Related, Contributor Relations, Initiatives, Campaign Donor Phase Table	Define the valid donor phases used to create gift tables for campaigns at an institution. Phases identify the various gift (such as major gifts or leadership gifts) levels that you track.
Gift Table	AV_CMPGN_GIFT_TBL	Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Gift Table	Estimate the number of donors and prospects that you need at each gift level to reach a campaign goal.
Reporting Rules	AV_CAMPAIGN_TABLE	Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Reporting Rules	Define the rules used in reporting campaign activity to the Council for the Advancement and Support of Education (CASE). Rules can vary from campaign to campaign, but cannot vary within a single campaign. After a campaign initiative is approved, the rules that you define cannot be altered. You use the approval process when you print the CASE campaign report.

Defining Donor Phases

Access the Donor Phase Table page (Set Up SACR, Product Related, Contributor Relations, Initiatives, Campaign Donor Phase Table).

Donor Phase Table	
Donor Phase:	GC
Find View All First 1 of 1 Last

*Donor Phase	*Gift Level	*Nbr Donors	Nbr Prspcts	Total
Leadership Gifts	1,000,000.00	5	10	500,000.00
General Campaign	200,000.00	3,000	10,000	1,000,000.00
Financial Goal:		5,000,000.00 USD	Gift Table Total: 1,500,000.00	

Gift Table page

Created By	Select the ID number of the person creating the gift table. The default value is the ID of the person entering the gift table information but can be overridden.
Donor Phase	Select which section of the campaign, such as <i>Major Gifts</i> , <i>Leadership Gifts</i> , <i>Special Gifts</i> , or <i>General Campaign</i> is being defined in the gift table. Donor phases are defined by your institution.
Gift Level	Enter the minimum amount of a gift required at this level. Gift levels cannot be duplicated, and the amount generally decreases by donor phase when you create a table from the major gifts level down to the general campaign level.
Nbr Donors (number of donors)	Enter the number of donors needed at this gift level for the campaign to be successful. This number generally increases with lower gift levels. For example, you can project a need for five major gifts, and a need for 5,000 general campaign gifts.
Nbr Prspcts (number of prospects)	Enter the number of prospects needed at this gift level to generate the required number of donors. This number generally increases with lower gift levels and is generally greater than the number of donors.
Total	Enter the amount expected from the gift level.
Financial Goal	Displays the financial goal of a campaign.
Gift Table Total	Displays the sum of the Total column.

Example

This is an example of a standard gift table for a 25,000,000 USD campaign:

<i>Phase</i>	<i>Gift Level (USD)</i>	<i>Nbr Donors</i>	<i>Nbr Prosp</i>	<i>Total (USD)</i>
Major Gifts	2,500,000	1	5	2,500,000
	1,000,000	4	10	4,000,000
	500,000	4	10	2,000,000
	250,000	6	15	1,500,000
	150,000	10	20	1,500,000
	100,000	23	46	2,300,000

<i>Phase</i>	<i>Gift Level (USD)</i>	<i>Nbr Donors</i>	<i>Nbr Prosp</i>	<i>Total (USD)</i>
Special Gifts	50,000	42	84	2,100,000
	25,000	54	110	1,350,000
	10,000	135	350	1,350,000
General Campaign	5,000	420	1,000	2,100,000
	1,000	2,100	5,000	2,100,000
	50	33,000	60,000	2,200,000
Total		35,799	66,650	25,000,000

Defining Reporting Rules

Access the Reporting Rules page (Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Reporting Rules).

Reporting Rules

Campaign: ANNFUND Annual Fund Campaign **Institution:** PSUNV

☒ Single Unit
☐ Multiple Units
☐ Comprehensive

Life Insurance
☒ Do Not Include Life Insurance
☐ Cash Surrender Value Only
☐ Face Value/Present Value
☐ Realized Death Benefit Only

Advance-Gifts Phase in Totals
☒ Featured Objectives Only ☐ All Gifts Rcvd by Institution

Reporting Rules page

Note. The rules that you establish on this page are used for CASE campaign reporting. Setting up these rules enables you to create your own version of these reports; it does not affect the data that you view on inquiry pages throughout the system.

Campaign Scope

Single Unit	Select to have only one unit (school, center) reflected in the campaign scope.
Multiple Units	Select to have more than one but not all units reflected in the campaign scope.
Comprehensive	Select to have all units reflected in the campaign scope.

Maximum Pledge Payment Period

This selection indicates an institution's preference for how long a pledge can be outstanding. When a campaign is in the post-campaign reporting phase, any pledges that have exceeded the maximum payment period and are not yet fulfilled should be subtracted from campaign totals. Select *Other* to indicate a maximum payment period greater than five years. Enter an explanation if you select *Other*. CASE recommends that no campaign period exceed seven years in duration.

Bequests

Include Bequests	Select this option to include in campaign totals only those bequests that meet the following criteria: • The will must have a specified amount or percentage of the estate, and the prospect's donor record must reflect a future value of the estate. • A written commitment to the institution must be on file.
Include Bequests by Exception	Select this option to include in campaign totals only those bequests that are specifically selected for inclusion.

Life Insurance

Indicate the institution's preference for accepting life insurance as contributions to the campaign. If you select any option other than *Do Not Include Insurance*, life insurance that has not been realized is included in campaign totals based on the selected value.

Cash Surrender Value	Select to have the life insurance counted as a current outright gift.
Face Value/Present Value	Select to have the life insurance reported as deferred gifts.
Realized Death Benefit Only	Select to have the life insurance reported in campaign totals if they have not been reported in another campaign.

Advance-Gifts Phase in Totals

Featured Objectives Only Select this option to include in campaign totals only those gifts received by the institution in support of the campaign or its related initiatives.

All Gifts Rcvd by Institution Select this option to include in campaign totals any gift received by the institution during the specified campaign period.
(all gifts received by institution)

Important! All gifts to campaigns are counted. No featured objective totals are calculated.

Setting Up Membership Initiatives

To set up membership initiatives, use the Membership Type component (AV_MBR_TYP) and the Membership Category component (AV_MBR_CAT).

This section discusses how to:

- Set up membership types.
- Set up membership categories.

Pages Used to Set Up Membership Initiatives

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Membership Type	AV_MBR_TYP_PNL	Set Up SACR, Product Related, Contributor Relations, Membership Organizations, Membership Type	Define the various types of memberships that constituents can have with a member organization.
Membership Category	AV_MBR_CAT_PNL	Set Up SACR, Product Related, Contributor Relations, Membership Organizations, Membership Category	Define the various classifications for membership in an organization.

Setting Up Membership Types

Access the Membership Type page (Set Up SACR, Product Related, Contributor Relations, Membership Organizations, Membership Type).

Setting Up Volunteer Efforts

To set up volunteer efforts, use the Areas of Responsibility component (AV_AREA_TYP_TBL), Assignment Types component (AV_ASGN_TYP_TBL), and the Leadership Types component (AV_LDR_TYPE_TBL).

This section discusses how to:

- Set up volunteer resources.
- Define areas of responsibility.
- Define assignment types.
- Define leadership types.
- Define volunteer initiative goals.
- Structure the leadership group.
- Define subgroups.

Common Elements Used in This Section

Role	Select the overall function needed for each position in the leadership structure. Your institution defines roles.
Nbr Needed (number needed)	Enter the number of volunteers needed in the role or capacity that you selected.
Term Length	Select the expected length of service for volunteers serving in this capacity. The values <i>Less Than One Year</i> and <i>1-15 Years</i> are delivered with the system. The default value for this field is <i>Less Than One Year</i>. Values for this field are delivered with the system as translate values. You can modify these translate values.
Selection Process	Indicate whether volunteers are elected or appointed to the position. This default value for this field is <i>Appointed</i> .
Required	Specify whether the position must be filled. You can enter two lines for each role; one for the number of required positions and one for the number of additional positions that can be filled.

Pages Used to Set Up Volunteer Efforts

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Area of Responsibility	AV_AREA_TYP_TBL	Set Up SACR, Product Related, Contributor Relations, Initiatives, CR Volunteers, Areas of Responsibility	Define the valid areas of accountability assigned to volunteers.

06/06/2006	% Participation	Pers		55.00

Volunteer Goals page

- Financial Goal and % Particptn Goal (percent participation goal)

The system displays the financial goal and the participation percentage goal for the initiative. These goals are defined on the initial page on which the initiative is defined.

Target Date

Enter the date by which the goal may be reached.

Goal Type

Select the measurement by which you track the progress toward the goal.

Audience Code

Specify the population to which the goal pertains. Available options include all of the populations that are defined by the institution on the Audience page with the type of *Segmentation* for this initiative.
- Structuring the Leadership Group
- After you have created an initiative or set up a membership organization at your institution, you might want to define the volunteer structure that is necessary for the effort to succeed. Volunteer structures outline the various leadership roles for volunteers within a group and specify how many volunteers are needed to fill each role. In addition, volunteer structures can contain subgroups or groups of volunteers that report to the initial leadership group.

Access the Volunteer Structure page (Contributor Relations, Initiatives, Volunteer Initiatives, Initiative Volunteers, Initiative Volunteer Structure).

Vice-Chairperson	1	One Year	Appointed	☐	

Volunteer Structure page

- Leadership Group** Enter the name of the leadership group or the highest level of volunteer leadership for the initiative or member organization (up to 50 characters).
- Leadership Type** Select a volunteer structure defined on the Leadership Type page.
- Build Default Structure** Click to populate the Volunteer Structure Detail group box with the template structure specified by the leadership type that you selected. You can edit the structure if you use this choice.

If you do not use the default structure, make selections and enter values in the Role, Number Needed, Term Length, Selection Process, and Required areas of the page.

Important! If you select the Required check box, the system prevents you from saving the volunteer structure without assigning a volunteer to the position.

Defining Subgroups

Access the Sub-Groups page (Contributor Relations, Initiatives, Volunteer Initiatives, Initiative Volunteers, Initiative Volunteer Sub-Group).

Sub-Groups page

Subgroups are committees or groups of individuals that report directly to the leadership group.

Vol Sub-Group (volunteer subgroup) Enter a name for the volunteer subgroup (up to 50 characters).

Leadership Type Select a volunteer structure defined on the Leadership Type page.

Build Default Structure Click to populate the Sub-Group Structure group box with the structure template specified by the leadership type that you selected. You can edit the structure if you make this selection.

If you do not use the default structure, make selections and enter values in the Role, Number Needed, Term Length, Selection Process, and Required areas of the page.

Important! If you select the Required check box, the system prevents you from saving the volunteer structure without first assigning a volunteer to the position.

Setting Up Event Initiatives

To set up an event initiative, you must set up event types. Access the Event Type Table page in Campus Community to define the specific types of events at your institution, and to specify the event types that you want to use as default values in your system.

Chapter 7

Setting Up Commitment Management

This chapter lists prerequisites for the gift and pledge process and discusses how to:

- Define gift types.
- Define tender types.
- Define designation types.
- Define matching gift types for designations.
- Define designation funds.
- Define recognition types.
- Define adjustment reasons.
- Prepare for session posting.
- Prepare for acknowledgement letters and receipts.
- Define acknowledgement rules.
- Define an organization's matching gift rules.
- Define giving club information.
- Set up credit card processing.
- Set up self-service online giving and pledges.

Prerequisites

Before you begin the process of setting up the system for gift and pledge processing, consider the following:

- How are setIDs, record groups, and business units set up at your institution?

Designation types, designation funds, tender types, and appeals are defined by setID. When you enter transactions and view information by business unit, the available values depend upon the values you define for the setID and which setID you associate with the Record Group for the business unit.

See *PeopleTools documentation*.

- What types of pledges are most common at your institution?

What pledge reminder schedule do these pledges typically have? Set up the most common reminder schedule as your default.

- Does your institution feed certain key pledges to the General Ledger during capital campaigns?

You can elect whether or not to allow pledges to be fed to the GL Ledger using the Contributor Relations Installation page.

- Do you enable your gift processors to override pledge details?

If you enable your gift processors to override pledge details such as designation funds during the processing of pledge payments, you can set this up as the default using the Contributor Relations Installation page.

- For what reasons does your gift processing staff adjust gifts and pledges?

These reasons are set up in the system as adjustment reasons.

- How do you plan to set up item types?

Since item types are shared with PeopleSoft Student Financials, your fund-raising department should request a range of item types to use. If your institution uses designation numbers, a convenient way to keep item types and designation funds in sync is to begin the item types with the range of your department and end them with the corresponding designation fund numbers.

- What are the ways your institution accepts gift payments?

These are set up in the system as tender types, such as cash, check, and credit card.

- How do you want to categorize designation funds?

Designation types are convenient ways of grouping designation funds for reporting purposes. Create a spreadsheet of all the categories of designation funds to use as designation types.

- What types of acknowledgements do you want to produce?

Create a spreadsheet of all the types of acknowledgements your institution sends to donors. Set these up as letter codes. Clone delivered letters for your gift receipt and for each of your acknowledgement letters. Also, create an Event ID for each acknowledgement type.

Your acknowledgement scheme must be carefully thought through to take advantage of all that the Contributor Relations system has to offer. You create standard default acknowledgement rules on the Acknowledgement Setup pages. In addition, you can set up special acknowledgements rules for each designation and for giving clubs.

- How do you want to assign staff roles?

All staff members who process gifts and pledges must be set up as Gift Entry personnel. All staff members who have supervisory responsibility for gift and pledge entry must be set up as Gift/Pledge Supervisors. All staff members who add giving club membership manually must be set up as Giving Club Administrators.

Defining Gift Types

To set up gift types, use the Gift Types component (AV_GFT_TYPE_TBL).

This section discusses how to set up gift types at your institution. You use gift types on the Gift Entry and Gift Adjustment pages.

Page Used to Define Gift Types

Page Name	Definition Name	Navigation	Usage
Gift Types	AV_GFT_TYPE_TBL	Set Up SACR, Product Related, Contributor Relations, Session Management, Gift Types	Set up the various types of gifts that donors make to the institution.

Setting Up Gift Types

Access the Gift Types page (Set Up SACR, Product Related, Contributor Relations, Session Management, Gift Types).

Gift Types page

The following values are required in the GIFT_TYPE field that resides in the AV_GFT_TYPE_TBL table:

Code	Value
GIFT	Gift
MG	Matching Gift

Code	Value
GIK	Gift-In-Kind
PP	Pledge Payment

CAE Type (Council for Aid to Education type)

Select the gift type that you are defining. The Council for Aid to Education (CAE) establishes the CAE gift types, which you use to produce the CAE report.

Gift In Kind gift types that do not have a *Real Estate* tender type assigned to them are reported in Part IV of the CAE report (II, C2a, Number and dollar value of company products).

Defining Tender Types

To set up tender types, use the Tender Types component (AV_GFT_TNDR_TBL).

This section discusses how to set up tender types at your institution.

Page Used to Define Tender Types

Page Name	Definition Name	Navigation	Usage
Tender Types	AV_GFT_TNDR_TBL	Set Up SACR, Product Related, Contributor Relations, Session Management, Tender Types	Set up the monetary forms in which gifts are received. Examples are cash, credit card, check, and so on.

Setting Up Tender Types

Access the Tender Types page (Set Up SACR, Product Related, Contributor Relations, Session Management, Tender Types).

Tender Types

SetID: MODEL Tender Type: CHK

*Description: Check

Short Description: Check

Special Fields: Check

Item Type: 000001000051 Tender - Check

☐ CAE Real Estate

Tender Types page

Special Fields

Select *Credit Card* or *Check* if additional fields should appear when the tender type you are entering is selected during transaction entry. If you select *Credit Card*, fields for the card type, number, holder, and expiration date appear. If you select *Check*, a check number field appears.

Select *Allow Zero Amount* in this field to enable gifts to be entered on the Gift Entry page with no monetary value to the institution.

Note. When you enter a gift with a tender type that has the *Allow Zero Amount* field value selected, the Tender Detail button on the Gift Entry page does not appear for that gift. If any other gift is entered in the same session with a tender type that has a special field value of *Check* or *Credit Card*, then the Tender Detail button appears.

Item Type

Enter the item type to be used when processing a transaction with this tender to the financial system.

CAE Real Estate (Council for Aid to Education real estate)

Select if the tender type represents a property gift that you want included in the CAE report. When selected, this check box separates gifts-in-kind, such as equipment and applications, from other property, such as real estate. Gifts of property are reported in Part IV of the CAE report (II, C2b, Number and dollar value of other property).

Defining Designation Types

To set up designation types, use the Designation Types component (AV_INST_TYP).

This section provides an overview of designation types and discusses how to set up valid designation types.

Understanding Designation Types

Designations are the projects, funds, or areas at the institution that receive appropriation from gift, pledge, or membership transactions. Designations are set up as allocation accounts that are linked to specific item types in the institution's financial structure.

When you define a designation fund, you can specify the type of designation for this particular fund. Examples of designation types are *Graduate School*, *Law School*, and so on. Designation types are used for custom reporting about designations that share a designation type. Designation types may vary from the standard CASE, FASB, and Matching Gift types.

Page Used to Define Designation Types

*Status: Active

*Description: Athletics

Short Description: Athletics

Designation Types page

Important! Use a designation type of *None* for those designations that do not match any of the other designation types.

Defining Matching Gift Types for Designations

To set up matching gift types, use the Matching Gift Types component (AV_MTCH_GFT_TYP).

This section provides an overview of matching gift types for designations and discusses how to set up valid matching gift types.

Understanding Matching Gift Types for Designations

The values you define on the Matching gift Types page are used when defining designation funds. When you define a designation fund, you can specify the types of matching gifts that matching gift companies do not match.

Matching gift types that are not matched by matching gift companies are found in the CASE Matching Gift Details book.

This table lists the values that are delivered based on CASE matching gift rules:

<i>For Designations</i>	<i>For Gift Types</i>
Athletic activities/program	Premiums for life insurance policies
Athletic scholarships	Deferred gifts
Athletic building projects	Gifts-in-kind
Non-athletic scholarships	Gifts of securities
Non-athletic building funds	Volunteer time

Defining Designation Funds

To set up designation funds, use the Designation Funds component (AV_DESIGNATIONS).

This section provides an overview of the page used to define designation funds and discusses how to set up designation funds.

Understanding Designation Funds

The Designation Funds page helps you set up the specific allocation accounts for commitments made to an institution. Designations are the projects, funds, or areas at the institution that receive appropriation from gift, pledge, or membership transactions. Designations are linked to specific item types in the institution's financial structure. Designation Funds are defined for each setID at your institution.

Page Used to Define Designation Funds

Page Name	Definition Name	Navigation	Usage
Designation Funds	AV_DESIGNATION	Set Up SACR, Product Related, Contributor Relations, Session Management, Designation Funds	Set up designations to receive gifts from donors, and assign designation categories used when generating the CAE report. Also set up default acknowledgement, tribute, and original donor values used during gift entry.

Setting Up a Designation Fund

Access the Designation Funds page (Set Up SACR, Product Related, Contributor Relations, Session Management, Designation Funds).

Designation Funds page (2 of 2)

Designation Name

Enter the full name of the designation fund.

CASE Type (Council for the Advancement and Support of Education type)

Select the specific purpose of the designation fund as defined by the Council for the Advancement and Support of Education (CASE). Valid CASE types are *Current Restricted*, *Current Unrestricted*, *Endowment & Similar*, *Loan Funds*, *Non-Gift*, and *Plant Funds*.

CASE type values are delivered with the system as translate values, and they are used to generate the CAE report. Do not modify these translate values in any way. Any modifications to these values require a substantial programming effort.

Note. This field supports Part IA and Part II of the CAE report.

CASE Purpose (Council for the Advancement and Support of Education purpose)

Select the specific utilization category of the designation fund as defined by the CASE. Valid CASE purposes are *Academic Divisions*, *Athletics*, *Chairs*, *Equipment*, *Faculty/Staff Compensation*, *Financial Aid*, *Land & Buildings*, *Library*, *Non-Gift*, *Other Restricted Purpose*, *Prizes*, *Public Service & Ext.*, *Special Programs*, *Student Projects*, *Research*, and *Unrestricted*.

CASE purpose values are delivered with the system as translate values, and they are used to generate the CAE report. Do not modify these translate values in any way. Any modifications to these values require a substantial programming effort.

Note. This field supports Part II of the CAE report.

FASB Type (Financial Accounting Standards Board type)

Select the accounting category for the designation fund as defined by the Financial Accounting Standards Board (FASB). This value is used to generate the CAE report.

Note. This field supports Part I of the CAE report.

Match Gift Type (matching gift type)

Select the category to determine if matching gift companies match gifts to this designation. The CASE Matching Gift Details book provides the following eligibility categories: *Athletic Activities Programs*, *Athletic Building Funds*, *Athletic Scholarships*, *Non Athletic Building Funds*, and *Non Athletic Scholarships*.

Note. Define a matching gift type of *None* for those gifts that do not match any of the other matching gift types; this field is required and cannot be left blank. *None* indicates that matching gift companies put no restrictions on this designation.

Designation Type

Select the type of account to which the designation applies. Designation types are defined by your institution and can be used for running reports on various account groupings. Examples of designation types are *Law School*, *Athletic Accounts*, and so on.

Note. Include a designation type of *None* for those designations that do not match any of the other designation types; this field is required and cannot be left blank. Designation types are defined by your institution and assist in categorizing accounts for internal purposes.

Item Type	Enter the specific reference to the chart of accounts within PeopleSoft Student Financials.
Responsible	Enter the staff member responsible for managing this designation fund.
Formal Description	Enter a long designation description, up to 254 characters. The value you enter here can be used when you generate acknowledgements. The Letter Generator process (CCLTRGEN) includes this field in the Comma Separated Values (.csv) data file that it creates to generate both joint and individual letters. The field name is "DesigFormalxxx." To use this field in acknowledgements, modify the acknowledgement template.
Campus, Acad Org (academic organization), and Department	Select the value associated with this designation. The valid departments include those associated with the setID you select for this designation.

Attachments

Click the View link to open the attachment in a new window. Click the Add Attachment button to upload a new attachment from within the component.

Acknowledgements

You are not required to enter an event ID or a role. However, you may only enter one or the other. The system creates an acknowledgement communication record for a donor for each designation to which a gift is allocated if an event ID is entered.

Event ID	Select the event ID associated with the letter code to use for gifts and pledges made to this designation. To use the event IDs for acknowledgement letters selected on the Acknowledgement Setup pages rather than a specific letter for this designation, leave this field blank.
Role	If applicable, select the role for the type of person who should receive notification of the acknowledgement. Role codes are descriptions of undertakings people take on at your institution. Examples are <i>Prospect Manager</i> , <i>Campaign Manager</i> , <i>Gift and Pledge Supervisor</i> , and so on. To use the acknowledgement role selected on the acknowledgement setup pages rather than a specific role for this designation, leave this field blank.

Tribute Recipient

ID and Name	If the designation fund is set up in honor or in memory of a person, select the ID and name of the tribute recipient for this designation fund. If the person does not have an ID in the system, type their name.

Note. The system does not make sure you do not enter a name or ID as a tribute recipient on more than one line. Be careful not to enter duplicate values.

Original Donor

ID Type	Select whether the original donor is a <i>Person</i> or an <i>Org</i> (organization).
IDandName	Enter the ID of the original donor to the designation fund. The person or organization must have an ID in the system. The name appears to the right.

Defining Recognition Types

To set up recognition types, use the Recognition Types component (AV_RCG_TYPE_TBL).

This section discusses how to set up credit recognition types.

Page Used to Define Recognition Types

Page Name	Definition Name	Navigation	Usage
Recognition Types	AV_RCG_TYPE_TBL	Set Up SACR, Product Related, Contributor Relations, Session Management, Recognition Types	Set up the various types of credit recognition that donors can receive when making commitments.

Setting Up Recognition Types

Access the Recognition Types page (Set Up SACR, Product Related, Contributor Relations, Session Management, Recognition Types). Recognition types are used during the gift and pledge entry acknowledgement processes to recognize donors who made commitments to the institution.

Recognition Types

Recognition Type: H

Short Description: Error

Adjustment Reasons page

Examples of common adjustment reasons are *Data Entry Error*, *Donor Request*, and so on.

Preparing for Session Posting

This section provides an overview of session posting and discusses how to:

- Set up item types.
- Complete item type initial setup.
- Define a GL interface.

Note. You must set up both a journal source and a journal generator template for Contributor Relations.

See Also

PeopleSoft Financials, Service Automation and Supply Chain Management Application Fundamentals 9.0 PeopleBook

Understanding Session Posting

Before processing transactions to an institution's financial system, you must set up designations, item types, and journal sets properly.

When you set up institution defaults using the Institution Installation page, you select the setID used to link to PeopleSoft Student Financials. This setID is used to retrieve detail calendars and item types from Student Financials.

In simple terms, designations are a representation of accounts or fund codes at your institution. When a gift or pledge payment is applied to a designation, that designation updates the actual account associated with it through the GL Interface.

Designations are tied to an item type in Student Financials. You define chartfields and item types using the Student Financials system, and then associate them with designations in Contributor Relations when you define designation funds using the Designation Funds page.

In PeopleSoft Financials, you must:

- Set up budget periods.
- Define journal entry definitions.
- Define a journal source.
- Define journal generator template defaults.

Note. You must set up both a journal source and a journal generator template for Contributor Relations.

See Also

PeopleSoft Financials, Service Automation and Supply Chain Management Application Fundamentals 9.0 PeopleBook

Setting Up Item Types

Item types are classifications of charges and credits. Specifying item types differentiates the various debits and credits when you apply them to an account. Your institution's policies govern how item types are defined. The item type also contains the General Ledger Interface information, which is used to transmit the transaction from Contributor Relations to the General Ledger system.

An item type may have multiple journal sets. Journal sets enable you to generate a set of balanced entries into your journals.

Journal sets may be defined for Gift, Pledge, Pledge Payment, or Tender/Clearing account transactions. Each journal set requires different debit and credit definitions. For Contributor Relations, journal set fields must be defined with a specific value based on the type of transaction for which you are setting up the GL Interface. This table defines the values that must exist; otherwise, the posting process will not work:

<i>Journal Set</i>	<i>Data Entry Type</i>	<i>DB/CR Indicator</i>
0	Tender and AP Clearing Account	Always Debit to tender and CR to clearing account
1	Gift	Always Credit to designation account
2	Pledge	Always Debit to accounts receivable/Credit to designation account
3	Pledge Payment	Always Credit to accounts receivable

For example, when you enter a gift transaction into the system, you select a tender type that is tied to an item type with a journal set of 0, which represents the debit side of the transaction. Then, you select one or more designations that are each tied to an item type with a journal set of 1 (Gift), which specifies the credit side of the transaction.

If your institution plans to feed pledges, a pledge transaction has a debit to accounts receivable with a journal set of 2 and a credit to a designation account with a journal set of 2 (requiring two rows in the GL interface record).

If your institution plans to feed pledges, a pledge payment has a credit to accounts receivable with a journal set of 3. The tender entered during gift entry provides the debit side of the transaction.

Note. If you do not intend to feed pledges to the financial system, you do not need to create journal sets 2 and 3 for Contributor Relations item types. In this instance, an item type for a designation would have only a single row with a journal set of 1 and *Credit* in the DB/CR field.

Completing Item Type Initial Setup

Use the Initial Setup page (ITEM_TYPE_TBL) to begin the process of setting up item types at your institution. The Initial Setup page is part of PeopleSoft Student Financials (Set Up SACR, Product Related, Student Financials, Item Types, Item Types, Initial Setup).

The screenshot displays the 'Initial Setup' page for item types. At the top, there are tabs for 'Initial Setup', 'Amount Edits', 'Miscellaneous', 'External Awards', 'Posting Restrictions', 'Account Types', and 'GL Interface'. The 'Initial Setup' tab is active. Below the tabs, the 'SetID' is 'PSUNV' and the 'Item Type' is '000001000021'. The 'Effective Date' is '01/01/1900' and the 'Status' is 'Active'. The 'Description' is 'Annual Fund' and the 'Short Desc' is 'Annual Fun'. There are three keyword fields, all empty. Below the keywords, there are checkboxes for 'Tuition Deposit' (unchecked), 'GL Interface Required' (checked), and 'Course Class Specific' (unchecked). On the right, the 'Classification' section contains two columns of radio buttons. The first column includes 'Application Fee', 'Billing', 'Charge', 'Contributor Relations' (selected), 'Deposit', 'Financial Aid', 'GL Interface Only', and 'Interest'. The second column includes 'Payment', 'Pay Plan Credit', 'Pre-Paid Tuition', 'Transfers', 'Refund', 'Waiver', 'Withholding', and 'Write-off'. At the bottom, the 'Accounting Date Options' section shows 'Accounting Date Control' set to 'Run Date' and an empty 'Accounting Date ID' field.

Initial Setup page

G/L Interface Required

Select this check box to indicate that both a credit and debit side of each transaction are required.

Accounting Date Control

If you select the GL Interface Required check box, this field becomes active. Specify the accounting date of the item type. Select from the following values:

Run Date: Select to use the current date as the accounting date.

Item Effective Date: Select to use the applicable gift date, pledge effective date, or membership start date as the accounting date.

The Accounting Date Control value that you select affects the Journal Line Date field on the Accounting Line page (Contributor Relations, Session Management, Supervise Sessions, Accounting Line Summary) as generated by the Contributor Relations GL Interface process.

Note. For both sides of your institution's dual line accounting to be generated correctly in the GL Interface process, you must select the Accounting Date Control for both tender and designation item types on the Item Type Setup page.

Classification

Make sure the Contributor Relations classification is selected. This selection enables the specific processing of item types as required by the system and enables the GL Interface page to save with journal sets that do not have both a debit and credit.

Defining a GL Interface

Use the GL Interface page to map an item type to a specific General Ledger account. When the General Ledger interface process is run, the transactions for the item type are entered in the GL Accounts you define on this page.

Enter an effective date. You must insert a new effective-dated row to change the budget period associated with this item type. The effective date must fall on or after the effective date for the associated budget period.

Note. To change the setID for which values the system displays on this page, select PeopleTools, Utilities, Administration, Table Set Control and then change the setID for FS-05 to the setID for which to view values.

The Term and Session fields are unavailable for input when the item type classification is set to Contributor Relations.

Contributor Relations uses the Journal Sets on the GL Interface page in combination to create dual-line accounting entries. Tender and clearing account item types should always be created with a journal set of 0 and one debit row for the tender account or clearing account. Gift designation item types should always be entered with a journal set of 1 and a credit row or rows for the designation account or accounts. Pledge designation item types should always be entered with a journal set of 2 and should have one debit row for the Accounts Receivable account and one credit row for the designation account. Pledge payment item types should be created with a journal set of 3 and one credit row to the Accounts Receivable account.

The following scenarios illustrate what occurs in GL Interface when the various journal sets are called.

Scenario 1

Donor makes a gift of 100 USD to a single designation:

Tender Asset Account		Designation Account		→ Offsetting 100 US DB/100 US CR
Journal Set 0		Journal Set 1		
Debit	Credit	Debit	Credit	
100.00			100.00	

Scenario 1, in which the gift results in a Tender Asset Account debit of 100.00 USD and a Designation Account credit of 100.00 USD

Scenario 2

Donor makes a gift of 100 USD to two designations:

Tender Asset Account		Designation Account 1		}	→	Offsetting 100 USD DB/ 2 -50 USD CR
Journal Set 0		Journal Set 1				
Debit	Credit	Debit	Credit			
100.00			50.00			
		Designation Account 2		}	→	
		Journal Set 1				
		Debit	Credit			
			50.00			

Scenario 2, in which the gift results in a Tender Asset Account debit of 100.00 USD and two Designation Account credits of 50.00 USD each

Scenario 3

Donor makes a semiannual pledge of 1000 USD to a single designation that is fed to the GL (multiple designations would be credited, as in Scenario 2):

Accounts Receivable		Designation Account		→ Offsetting 1000 USD DB/ 1000 USD CR
Journal Set 2		Journal Set 2		
Debit	Credit	Debit	Credit	
1000.00			1000.00	

Scenario 3 (1 of 3), in which the pledge results in an Accounts Receivable debit of 1000.00 USD and a Designation Account credit of 1000.00 USD

Donor makes a semiannual pledge payment of 500 USD for the previous pledge:

Accounts Receivable		Tender Asset Account		→	Offsetting 500 USD CR/ 500 USD DB
Journal Set 3		Journal Set 0			
Debit	Credit	Debit	Credit		
	500.00	500.00			
	500.00	500.00			

Scenario 3 (2 of 3), in which the pledge payment results in two Accounts Receivable credits of 500.00 USD each and two Tender Asset Account debits of 500.00 USD each

Donor makes final pledge payment of 500 USD for the previous pledge:

Accounts Receivable		Tender Asset Account		→	Offsetting 500 USD CR/ 500 USD DB
Journal Set 3		Journal Set 0			
Debit	Credit	Debit	Credit		
	500.00	500.00			
↓		↓			
Offsetting 1000 USD DB/ 2- 500 CRs to zero out receivable		Offsetting 1000 USD CR/ 2- 500 USD DBs to offset designation's expected credit. Tender now equals designation credit and pledge payment reflects activity similar to a gift with a tender/designation journal set combination.			

Scenario 3 (3 of 3), in which the pledge payment results in an Accounts Receivable credit of 500.00 USD and a Tender Asset Account debit of 500.00 USD

Scenario 4

The donor's gift in Scenario 1 is adjusted because the gift should have been 10 USD not 100 USD:

Tender Asset Account		Designation Account		→	Offsetting 100 USD DB/100 USD CR of original gift
Journal Set 0		Journal Set 1			
Debit	Credit	Debit	Credit		
100.00			100.00		

Scenario 4 (1 of 4), in which the gift results in a Tender Asset Account debit of 100.00 USD and a Designation Account credit of 100.00 USD

Original gift is backed out with offsetting reversal entries that takes the original gift to zero:

Tender Asset Account		Designation Account		→ Offsetting reversal offsets original gift to zero.
Journal Set 0		Journal Set 1		
Debit	Credit	Debit	Credit	
	100.00	100.00		

Scenario 4 (2 of 4), which the reversal results in a Tender Asset Account credit of 100.00 USD and a Designation Account debit of 100.00 USD

The refund amount is entered to be offset when a refund is generated manually:

Tender Asset Account		Clearing Account		Offsetting 90 USD DB to the tender account and 90 USD CR to the clearing account will be zeroed out with reversing entries when the refund is manually generated.
Journal Set 0		Journal Set 0		
Debit	Credit	Debit	Credit	
90.00			90.00	
Tender Asset Account		Clearing Account		
Journal Set 0		Journal Set 0		
Debit	Credit	Debit	Credit	
90.00			90.00	

Scenario 4 (3 of 4), in which the offsetting 90.00 USD debit to the tender account and the 90.00 USD credit to the clearing account will be zeroed out with reversing entries when the refund is manually generated

The new corrected gift is created:

Tender Asset Account		Designation Account		→ Offsetting 10 USD DB /10 USD CR of correct gift
Journal Set 0		Journal Set 1		
Debit	Credit	Debit	Credit	
10.00			10.00	

Scenario 4 (4 of 4), in which the corrected gift results in a Tender Asset Account debit of 10.00 USD and a Designation Account credit of 10.00 USD

Preparing for Acknowledgement Letters and Receipts

Various pages in the system affect the setup of acknowledgement letter processing:

- On the Institution Installation 2 page, you select an Event ID to identify your institution's default receipt.

You also enter numbers to represent the priority the system looks at when identifying which acknowledgment letter to send to a donor. Finally, you select check boxes to indicate whether to acknowledge soft credits, adjusted gifts, and adjusted pledges.

- On the Recognition Types page, the system has included code to ensure that hard credits are always given top priority when determining what to acknowledge.

If you select the Soft Credits check box on the Institution Installation 2 page to acknowledge soft credit, that soft credit is only acknowledged when no hard credit exists for the donor of the gift.

- On the Designation Funds 2 page, you can select an event ID or a role to associate with a specific designation fund.

When the acknowledgement process runs, it checks to see if the commitment has been allocated to a designation fund that requires a separate acknowledgement. If so, it creates a communications record for the letter or assigns the acknowledgement to the ID of the person with the role.

- On the Acknowledgement Setup pages, you define the rules that determine what acknowledgement letter is sent to a donor in a particular situation.

The five items you prioritized on the Institution Installation 2 page are now assigned event IDs or roles.

Defining Acknowledgement Rules

To set up acknowledgement rules, use the Acknowledgement Setup component (AV_ACKNLDG_SETUP).

This section lists common elements and discusses how to:

- Set up acknowledgements.
- Continue Acknowledgement setup.
- Complete Acknowledgement setup.

Note. The rules you set up here enable the system to determine which letter a donor should receive or whether the acknowledgement should be assigned to a role so that a configurable acknowledgement can be produced. Acknowledgements assigned to a role can be viewed on the Acknowledgement List page for the resources assigned to that role. You set the priority in which the system looks at these rules using the Acknowledgement Priority group box on the Institution Installation 2 page.

Common Elements Used in This Section

No Receipt

This check box applies only to acknowledgement rules for gifts. The acknowledgement process never generates receipts for pledges. Select this check box for gift acknowledgements in either of the following situations:

- When you want the donor to receive another acknowledgement letter, in lieu of a receipt.

In this instance, you would select the No Receipt check box and select an event ID for a communication other than a receipt. The system will suppress the default receipt for gifts in this example.

- When you want the donor to receive an acknowledgement receipt only (no overall acknowledgement letter).

In this instance, you would select the check box and select the event ID for your default receipt.

Note. The system clears the No Receipt check box by default, acknowledging all gifts with a receipt (unless you specify otherwise).

Event ID and Role

Identify the event associated with the letter to send in the situation. Select the role for the type of person at your institution responsible for the action. Roles are descriptions of undertakings people take on at the institution.

You can either enter an event ID or select a role. Selecting a value for one field clears the other field.

Pages Used to Define Acknowledgement Rules

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Acknowledgement Setup1	AV_ACKNLDG_SETUP	Set Up SACR, Product Related, Contributor Relations, Session Management, Acknowledgement Setup, Acknowledgement Setup1	Set up acknowledgement rules based on service indicators and gift amounts.
Acknowledgement Setup2	AV_ACKNLDG_SETUP2	Set Up SACR, Product Related, Contributor Relations, Session Management, Acknowledgement Setup, Acknowledgement Setup2	Set up acknowledgement rules based on transaction adjustments, gifts in honor of a person, and gifts in memory of a person.

Page Name	Definition Name	Navigation	Usage
Acknowledgement Setup3	AV_ACKNLDG_SETUP3	Set Up SACR, Product Related, Contributor Relations, Session Management, Acknowledgement Setup, Acknowledgement Setup3	Set up acknowledgement rules based on deceased individuals and anonymous donors.

Setting Up Acknowledgements

Access the Acknowledgement Setup1 page (Set Up SACR, Product Related, Contributor Relations, Session Management, Acknowledgement Setup, Acknowledgement Setup1).

Acknowledgement Setup1 | Acknowledgement Setup2 | Acknowledgement Setup3

Institution: PSUNV PeopleSoft University

Service Indicator Find | View All First 1-3 of 4 Last

Service Indicator	*Type	Priority	Receipt	Event ID	Role
Planned Giving	Gift	3	☐		
President	Gift	1	☐		President's Office
Planned Giving	Pledge	4	☐		

Gift Amount Find | View All First 1-3 of 12 Last

From Amount	To Amount	USD	*Type	Receipt	Event ID	Role
100.00	999.99	USD	Gift	☐		
100.00	999.99	USD	Pledge	☐		
1,000.00	9,999.99	USD	Gift	☐		

Acknowledgement Setup1 page

The system looks at service indicators set on this page for both people and organizations when generating acknowledgements.

Service Indicator

Service Indicator and Type

Select a service indicator and an acknowledgement type. For example, you can select *Major Donor* and *Gift* from the fields to set up rules for acknowledging major donors' gifts.

Priority

Enter a service indicator priority. The value you enter determines the priority used to select which acknowledgement a donor receives. For example, say you indicate *President* as priority 1 and *Planned Giving* as priority 2. If a donor is both in the president's club and a planned giving donor and these service indicators are attached to the donor's record, the letter defined for *President* is the one the donor receives.

Gift Amount**From Amount, To Amount, and Type**

Enter an amount range and a commitment type. The amounts you enter define the monetary range for which to set up acknowledgement rules, and the commitment type indicates whether the rules apply to gifts or pledges.

Continuing Acknowledgement Setup

Access the Acknowledgement Setup2 page (Set Up SACR, Product Related, Contributor Relations, Session Management, Acknowledgement Setup, Acknowledgement Setup2).

Acknowledgement Setup1		Acknowledgement Setup2		Acknowledgement Setup3

Defining an Organization's Matching Gift Rules

The Matching Rules component enables you to define the matching gift rules for an organization. You can maintain information about minimum match amounts and match ratios, the designations for which gifts can be matched, the annual matching gift budget, required information and contacts, and any matching gift restrictions the organization has.

This section discusses how to set up matching gift rules, restrictions, and required information.

Page Used to Define an Organization's Matching Gift Rules

Page Name	Definition Name	Navigation	Usage
Matching Gift Rules	AV_MTCH_ORG_RULES	- Contributor Relations, Session Management, Matching Gifts, Add/Update Matching Rules, Matching Gift Rules - Contributor Relations, Session Management, Matching Gifts, Matching Rules - Workset	Enter information about an organization's match amount, ratio, and budget rules; eligible and ineligible designation type, gift types, alumni statuses, and employee statuses; and contacts for an organization's matching gift program.

Setting Up Matching Gift Rules, Restrictions, and Required Information

Access the Matching Gift Rules page (Contributor Relations, Session Management, Matching Gifts, Add/Update Matching Rules, Matching Gift Rules).

Matching Gift Rules page (2 of 2)

Minimum Match Amount

Enter a minimum amount for gifts that the organization matches. The organization only matches gifts that are equal to or greater than the amount in this field. If the gift meets this amount, the matching gift program then considers if it is given to an appropriate designation (set up on the Restrictions page). If the gift passes this test, then the matching gift program considers the matching ratios.

Currency Code

Note. The currency you select here applies to all amount fields on this page.

The following fields are informational only and are not used in the automated matching gift process:

MG Designation Type

(matching gift designation type)

Indicate the designation to which matching gift funds must be applied when they are received. Values for this field include *Any Eligible*, *Donor's Designation*, and *Gen'l Operating Budget*. This field information only field enables you to determine to what designations a matching gift company's payment should be allocated.

Values for this field are delivered with the system as translate values. You can modify these translate values.

Receipts

Select the appropriate option for receipts. *Periodically* means receipts may be combined and sent to the organization periodically. *Each Gift* means the organization requires a receipt from the institution for each company gift. This field is not included in automated acknowledgement process.

Values for this field are delivered with the system as translate values. You can modify these translate values.

Distribution Schedule	Determine the frequency with which organizations make matching gift payments to your institution. Values include: <i>Annually</i>, <i>Continuously</i>, <i>Monthly</i>, <i>Quarterly</i>, and <i>Semiannually</i>. Values for this field are delivered with the system as translate values. You can modify these translate values.
Distribution Date	Enter a value if the organization only matches gifts once a year on a specific date. Enter the date as mm/dd.
Deadline Date	Enter the date on which a completed matching gift form must be received by the organization in order for it to match the gift. Enter the date as mm/dd.
Payroll Eligibility	Select if the organization offers employees the option of having payroll deduction gifts matched through its matching gift program.
Duplicate Match	Select if the organization matches gifts that are matched by other organizations. For example, if a donor's gift is also matched by his or her spouse's employer, the donor's employer matches the gift as well.
Required Information	Select the items an organization must receive prior to matching a gift. Examples are <i>Matching Gift Form</i>, <i>Original Check to Company</i>, <i>Donor Calls Company</i>, and <i>Receipt</i>. Values for this field are delivered with the system as translate values. You can modify these translate values.
Comment	Enter any additional information about the organization's matching gift program. You can use this field to compile complex facts as appropriate for matching gift organizations so that you have access to specific decision-making information. This is a free-form text field.

Annual Matching Gift Budget

Overall Total	Enter the organization's total annual matching gift budget. This amount represents the total amount the organization will donate in matching gift payments to your institution as well as other institutions for the current year.
Donor/Institution Total	Enter the maximum monetary amount the organization will match toward one donor's gifts to your institution this year.
Institution Total	Enter the maximum monetary amount the organization will give to your institution in matching gift payments this year.
Donor Total	Enter the maximum amount the organization will pay in matching gifts for donations made by one donor to your institution as well as other institutions this year.

Match Detail

The following fields are used in the automated matching gift process.

Ratio and To Ratio	Enter the formula by which an organization calculates the amount it matches for each regular donor gift to your institution. Ratio ranges can include fractions such as 1.25:1. This field is used in the automatic calculation of the expected matching gift amount. You can enter multiple match ratios as long as the amount ranges associated with each ratio do not overlap.
Minimum Match Amount and Maximum Match Amount	For each ratio, enter a minimum amount and maximum amount. These fields are used in the automatic calculation of the expected matching gift amount. For example, if the matching gift organization matches 100 percent of gifts from 25 to 25,000 USD, then the first minimum amount field on this page should be set to 25 USD and the first Ratio Minimum Amount field should be left blank or set to 0 USD. The maximum amount field should include the cap for the match ratio, or 25,000 USD. The system calculates that all qualified gifts are met at 100 percent up to 25,000 USD. If the organization matches gifts larger than 25,000 USD at a different ratio (perhaps 0.5:1) then the minimum amount for the next ratio would be 25,000.01 with the appropriate cap entered in the maximum amount field.

Restrictions

Ineligible Designation Types	Select the designation types that are not eligible for an organization's matching gift program. This field is used in the automatic calculation of the expected matching gift amount.
Ineligible Gift Types	Select the ineligible gift types that your organization does not match, such as dues or deferred gifts. This field is used in the automatic calculation of the expected matching gift amount.
Eligible Alumni Status	Select the appropriate eligible alumni status. Alumni status refers to the status a donor must have as a formal student of your institution in order for the organization to match gifts made to your institution. Values for this field include <i>Alumnus</i>, <i>Attendance Requirement</i>, <i>Child or Spouse Attended</i>, and <i>Graduate</i>. Values for this field are delivered with the system as translate values. You can modify these translate values.

Eligible Employee Status

Select the appropriate eligible employee status. Employee status refers to the status a donor must have as an employee at the organization for it to match gifts. Values for this field include *All Employees, All Full-Time Employees, Employees in US or Possessions, Full-Time Salaried Employees, Non-Employee Directors, Period of Service, Permanent Part-Time, Retired Employees, Spouses of Eligible Employees, Spouses of Eligible Retirees, and Widows/Widowers of Eligible Retirees.*

Values for this field are delivered with the system as translate values. You can modify these translate values.

Attachments

You can view existing attachments to the organization's matching gift rules record and add new ones. Click the View link to open the attachment in a new window. Click the Add Attachment button to upload a new attachment from within the component.

Matching Gift Contacts

This group box displays the name of each organization contact at the organization with an ORG_CONTACT code of MG or matching gift coordinator, and his or her job title and telephone numbers. The ORG_CONTACT code is a delivered value and should not be deleted.

Contacts

Click this button to access the page where contact information can be updated.

Contact Information

This area displays phone types and phone numbers for matching gift contacts.

Defining Giving Club Information

This section discusses how to:

- Define giving clubs.
- Define giving club levels.

Pages Used to Define Giving Club Information

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Giving Club Rules	AV_GCLUB_TBL	Contributor Relations, Session Management, Giving Clubs, Giving Club Management, Giving Club Rules	Define the giving clubs at your institution.

Page Name	Definition Name	Navigation	Usage
Giving Club Levels	AV_GCLUB_LVL	Contributor Relations, Session Management, Giving Clubs, Giving Club Management, Giving Club Levels	Define the various membership levels for a club based on a donor's giving.

Defining Giving Clubs

Access the Giving Club Rules page (Contributor Relations, Session Management, Giving Clubs, Giving Club Management, Giving Club Rules).

Giving Club Rules **Giving Club Levels**

Giving Club: ANNUAL **Institution:** PSUNV

Name: Annual Giving Club **Start Date:** 01/01/1900

Description: Annual Giving Club **End Date:**

Administrator: AV0027 Boudreaux, Lisele **Status:** Active

MEDBU	ANNUALFUND	+	-

Giving Club Rules page

- Name** Name the giving club (up to 30 characters).
- Administrator** Select a valid club administrator at your institution. Administrators are defined when you create Staff Assignments of Giving Club Administrator (GCA). This value is delivered in the AV_PRPS_TBL and should not be deleted.
- Campaign** Select the campaign to associate with this giving club, if applicable. A campaign is an organized institutional effort targeted to a specific constituency that occurs over a specified period of time with specific purposes and goals. This prompt box contains a list of all the campaigns defined at your institution.

Club Rules

Reset Membership at Fiscal Yr (reset membership at fiscal year)	Select to make the system recalculate and regenerate membership at the beginning of each new fiscal year.
Notify Staff Assigned to Donor	Select to have the ability to set up workflow to send a notification to the assigned staff when a donor is added to the giving club. Your institution would set up the appropriate workflow to generate notifications.
Special Acknowledgement	Select to have each new member of the giving club receive a custom acknowledgement letter announcing his or her membership status. This field is not used currently in the automated acknowledgement process.

Include in Calculations

Hard Credits	Select to include hard credit when calculating a donor's eligibility for this giving club.
Soft Credits	Select to include soft credit when calculating a donor's eligibility for this giving club.
Matching Gifts	Select to include matching gifts when calculating a donor's eligibility for this giving club.
Spouse Giving	Select to include spouse giving when calculating a donor's eligibility for this giving club.

Eligible Designations

All	Select to include all designations in giving club calculations.
Type	Select to include particular designations such as Law School, Scholarships, and so on. These values are defined on the Designation Type page.
Specific	Select to include specific designations in giving club calculations.

Remaining Fields

Business Unit	If you select <i>Type</i> or <i>Specific</i> , select the business unit associated with the designations to include in giving calculations. This field populates by default to the default business unit you selected when setting up user defaults.

- Type Code

If you select *Type*, select a designation type from the list of valid designation types at your institution. The designation types for the setID associated with the business unit you select appear in the prompt box.
- Designation

If you select *Specific*, select each designation to which gifts count toward a donor's giving club membership eligibility. The designations associated for the setID with the business unit you select appear in the prompt box.

Defining Giving Club Levels

Access the Giving Club Levels page (Contributor Relations, Session Management, Giving Clubs, Giving Club Management, Giving Club Levels).

Benefit

Aerial campus photo

Giving Club Levels page

- Level

Name the giving club (up to 10 characters). Level names are usually very specific for each institution, but an example might include a giving club with levels of *Bronze*, *Silver*, *Gold*, and *Platinum*.
- Members

Displays the number of members in the club at this level.
- Minimum and Maximum

Enter a giving amount range. This range determines the low and high end giving totals that make donors eligible for this giving club level. For multiple levels there can be no gaps in the ranges. If all gifts above a certain level qualify a donor for membership in the club at the highest level, the maximum amount for this level should be left blank.

Benefits

Enter descriptions of any giving level benefits associated with this giving club level. Benefits are privileges given to the members of the giving club at a particular level. Examples might be library privileges, event tickets, and other donor appreciation items. The information you enter in this field is for your reference only. No benefits processing occurs as a result of your entry.

Setting Up Credit Card Processing

To set up credit card processing, use the Credit Card Type component (AV_CR_CARD_TYPE), Merchant Table component (AV_MERCHANT_TBL), and Business Unit CR component (AV_BUS_UNIT).

Before you can enter gift or membership payments, or enable self-service online giving, you must set up the system for credit card processing.

This section discusses how to:

- Set up a connection with a third-party processor.
- Define payment methods.
- Define credit card types.
- Define connection parameters for a third-party processor.

Pages Used to Set Up Credit Card Processing

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Credit Card Type	AV_CR_CARD_TYPE	Set Up SACR, Product Related, Contributor Relations, Session Management, Credit Card Type	Define which credit cards are acceptable for credit card processing for each setID.
CR Merchants (Contributor Relations merchants)	AV_MERCHANT_TBL	Set Up SACR, Product Related, Contributor Relations, Session Management, Merchant Table	Specify site-specific service provider information for each institution in your organization. This information is sent to the defined service provider as part of every credit card transaction.
Business Unit CR (business unit Contributor Relations)	AV_BUS_UNIT_TBL	Set Up SACR, Product Related, Contributor Relations, Install Contributor Relations, Business Unit CR	Associate a merchant table with a business unit. There is a 1:1 relationship between a Merchant ID and Business Unit.

Setting Up a Connection with a Third-Party Processor

To accept credit card payments over the internet, you must have an account with a merchant bank that offers internet credit card processing. In addition, you must establish a relationship with a credit card processing agency, such as CyberSource, and provide the identifying numbers for your bank account. After you have established these two relationships, you must configure the system to connect with the credit card processing agency.

CyberSource supports all major credit cards including: Visa, MasterCard, American Express, Discover/Novus, Diners Club, Carte Blanche, EuroCard, JCB, Visa delta, EDC/Maestro, Style, and various private label cards.

"PeopleSoft Credit Card Interlink Installation and Technical Notes" on My Oracle Support

Defining Payment Methods

To specify credit card payments, you must use the Tender Types page to define a credit card tender type. The Tender Types page enables you to set up the monetary forms in which your organization receives gifts.

Defining Credit Card Types

Access the Credit Card Type page (Set Up SACR, Product Related, Contributor Relations, Session Management, Credit Card Type).

Credit Card Type	
SetID: GLAKE	Credit Card Type: 01
Credit Card Name:	VISA
Credit Card Number Length:	16 Credit Card Status: Active
Credit Card Valid Prefixes:	4
Use Check Digit Algorithm:	Y

Credit Card Type page

Credit Card Name

Enter the credit card name. This name becomes an available value on the Tender Type Detail page and the Make a Donation - Payment Information page and also is available in self-service Involvement functionality.

Credit Card Number Length	Enter the number of digits for this credit card number. Users must enter a credit card account number for this credit card that is equal in length to the value you specify. Separate valid card length values with a comma. Common number length values are as follows: • Visa: 13 or 16 • MasterCard: 16 • American Express: 15 • Discover/Novus: 16
Credit Card Status	Select <i>Active</i> to make this credit card available for selection on credit card entry pages. Select <i>Inactive</i> to make this credit card unavailable for selection on credit card entry pages.
Credit Card Valid Prefixes	Enter all valid prefix numbers for this credit card. Separate valid prefixes with a comma. Common prefix values are as follows: • Visa: 4 • MasterCard: 51, 52, 53, 54, or 55 • American Express: 37 or 34 • Discover/Novus: 6011
Use Check Digit Algorithm	Select <i>Y</i> (yes) to have the system check the validity of the credit card numbers during the credit card entry process. Select <i>N</i> (no) to not have the system check credit card numbers for validity.

Defining Connection Parameters for a Third-Party Processor

Access the CR Merchants page (Set Up SACR, Product Related, Contributor Relations, Session Management, Merchant Table).

CR Merchants	
Merchant ID:	CR_MERCHANT
*Description:	Contributor Relations Merchant
*Payment Merchant:	CyberSource Int Broker 1
☒ Security Code Supported

☒ Security Code - Self Service	☒ Security Code - Batch
Credit Card Tracing:	Production
Default Options	
*Type of Name:	Primary
*Phone Type:	Home
*Address Type:	Home
*Email Type:	Home
*Email Address:	ps@ps.com

CR Merchants page

Payment Merchant

Select a third-party payment merchant to be used for processing credit card transactions. There are no delivered values for this field.

Consult the *Campus Solutions 9.0 Electronic Payment Integration Developer's Reference Guide* on the My Oracle Support website to determine how to set up your electronics payments implementation. The document explains how to set up the lower levels of the Integration Broker-based solutions, up to and including the payment merchant, which is referred to in this section.

Payment merchants are defined on the Payment Merchant page (Set Up SACR, Common Definitions, Electronic Payments, Payment Merchant).

Security Code Supported

This read-only check box field reflects the setting of the corresponding field on the underlying Payment Merchant page. It controls the display of the Security Code entry field and the What is a security code? link on the self-service and session entry pages. When this check box is selected, the Security Code - Self Service and Security Code - Batch check boxes appear on this page.

Credit Card

Security Code - Self Service

Select this check box to enable the display of the Security Code field and associated message in the self-service Involvement payment pages.

Security Code - Batch	Select this check box to enable the display of the Security Code field and associated message in the Tender Type Detail pages for gift and membership entry.
Credit Card Tracing	Select a control for the output files the system produces during each transaction. Your choices are: • <i>Connect with Trace</i>: Connect with service provider and produce a trace file in C:\temp directory. • <i>No Connect with Trace</i>: Do not connect with service provider, but produce a trace file in C:\temp directory. • <i>Production</i>: No tracing of any kind. • <i>Vendor Trace</i>: Connect with service provider and turn on service provider tracing.
Default Options	
Type of Name	Select the type of name (<i>Primary, Preferred, Legal</i> , and so on) that will be used as the default when the name fields are initially populated on the Credit Card Entry page. Name type is specified on the Names page.
Phone Type	Select the type of phone (<i>Business, Home</i> , and so on) that will be used as the default when the name fields are initially populated on the Credit Card Entry page. Phone type is specified on the Phone Detail page.
Address Type	Select the type of address (<i>Primary, Preferred, Business</i> , and so on) that will be used as the default when the name fields are initially populated on the Credit Card Entry page. Address type is specified on the Addresses page.
Email Type	Select the type of email address (<i>Home, Business</i> , and so on) that will be used as the default when the name fields are initially populated on the Credit Card Entry page. Email type is specified on the Electronic Addresses page.
Email Address	CyberSource requires an email address to be sent with each transaction. If an ID does not have an email address, the email address entered in this field is sent with the transmission.

Setting Up Self-Service Online Giving and Pledges

To set up self-service online giving and pledges, use the Involvement component (AV_INST_WEB_INV) and the Giving Vehicles component (AV_GIVE_VEHICLE).

In addition to credit card interface setup requirements, you must complete eight pages to set up the system for online giving. These same pages enable you to set up self-service online pledge capability.

This section discusses how to:

- Define Involvement settings.
- Define web designations.
- Define web appeals.
- Define web campaigns.
- Enter a web campaign narrative.
- Define campaign linked designations.
- Define campaign linked appeals.
- Define giving vehicles.

Although the pages above are not required by record definition or by code, self-service donors cannot make a gift or pledge unless information has been set up on those pages.

Pages Used to Set Up Self-Service Online Giving and Pledges

Page Name	Definition Name	Navigation	Usage
Involvement Setup	AV_INST_WEB_INV	Set Up SACR, Common Definitions, Self Service, Involvement, Involvement, Involvement Setup	Set institution-specific settings for online gift and pledge sessions.
Web Designations	AV_INST_WEB_DES	Set Up SACR, Common Definitions, Self Service, Involvement, Involvement, Web Designations	Set up the web designations available to self-service donors during online gift and pledge sessions.
Web Appeals	AV_INST_WEB_MTVTN	Set Up SACR, Common Definitions, Self Service, Involvement, Involvement, Web Appeals	Set up the web appeals available to self-service donors during online gift and pledge sessions.
Web Campaigns	AV_INST_WEB_CMP	Set Up SACR, Common Definitions, Self Service, Involvement, Involvement, Web Campaigns	Set up web campaigns available to self-service donors during online gift and pledge sessions. To facilitate campaign-specific giving, link available designations and appeals to each campaign.
Web Campaign Narrative	AV_WEB_CMP_NARR_SP	Click the Narrative link on the Web Campaigns page.	Provide donors with more descriptive information about your available web campaigns.

Page Name	Definition Name	Navigation	Usage

Involvement Setup page (2 of 2)

Constituent Type Select the constituent type assigned to the visitor when the system is processing a self-service gift or pledge and the donor does not have an existing constituent type. Examples include *Friend, Alumni, Faculty, Parent, Staff*, and so on. These values are defined by the organization on the Constituent Type page.

Payable to name Enter the institution or department name to which the donation or pledge will be sent.

Online Gifts, Linked Gifts, Online Pledges These three check boxes control the links that appear on the Donations - Ways to Give page:

Online Gifts: If selected, the system displays the Make your gift securely online link. This link takes donors directly to the Make a Donation - Welcome page to start the online giving process.

Linked Gifts: If selected, the system displays the Invest in existing campaigns link. This link takes donors to the Donations - Campaigns page, where they receive web-specific campaign information and can choose whether to make a gift or a pledge to the campaign.

Online Pledges: If selected, the system displays the Make a pledge online link. This link takes donors to the Make a Donation - Welcome page to start the online pledge process.

Default Payment Schedule Select the default payment schedule value to appear on the Make a Donation - Payment Information page for pledges. Delivered values are *Semi-Annual, Annual, Bi-Monthly, Monthly, Quarterly, and Weekly*.

Mail in address information

The address information you define here appears on the Donations - Ways to Give page and on the Mail In Donation Form. Mail in address information is used by online visitors who prefer to make a gift or pledge through the mail.

Additional information contact

You must enter either a staff ID or an email ID in this section.

User ID	Select the ID of a staff member that corresponds to the email address that you want to appear as a link on the Donations - Ways to Give page to be used for inquiries. Only staff members set up as PeopleSoft users with email addresses appear in the list.
Email ID	Enter an email address to be used for inquiries. If the staff ID entered above has a defined email address, the system populates it by default.

Session defaults

User ID	Enter the user ID assigned to the online gift or pledge sessions. When a gift entry user creates a session, their ID is associated with that session. They can only view or change sessions that they have entered, unless given more access through their defined role. Only users with the role of gift entry operator or gift and pledge supervisor appear in the list.
Business Unit	Select the default business unit that the system assigns to the online gift or pledge session. For online giving, this business unit must have an assigned merchant ID to correctly authorize online donations. Use the Business Unit CR page to associate a merchant table with a business unit.
Session Count	Enter a maximum number of gifts or pledges to be included in a single self-service session. The minimum number of gifts in a session is <i>1</i> .
Tender Type	Select the tender type assigned to the self-service gift for online giving. Only tender types with a Special Fields value of <i>Credit Card</i> appear in the list.

Note. This field does not apply to pledges.

Web Designations page

Available Designations

Sequence	Enter a numeric identifier for all unique combinations of designation business unit and designation.
Designation Business Unit	Enter the operational unit to which the gift or pledge is designated.
Designation	Enter the designation or fund for distribution.
Description	Describe the designation (up to 80 characters). The system populates the long description as defined for the designation, but you can edit the text. The descriptions appear as available values on the Make a Donation - Gift Information and Make a Donation - Pledge Information pages.
Gifts	Select to make the designation available for self-service gifts. If this check box is selected for a designation, it appears when donors apply their gift to specific funds, rather than to the institution's greatest need.
Pledges	Select to make the designation available for self-service pledges. If this check box is selected for a designation, it appears when donors apply their pledge to specific funds, rather than to the institution's greatest need.

Important! You must save the designations entered above, for the system to populate the list of available default gift and pledge designations below.

Default Gift Designation

The sequence number of the designation you select here becomes the default designation business unit and designation for a gift. The default designation also appears on the Make a Donation - Gift Information page. If a donor does not select a specific designation fund and selects the option to *Apply my gift to the greatest need*, the donation goes to this assigned default designation.

Default Pledge Designation

The sequence number of the designation you select here becomes the default designation business unit and designation for a pledge. The default designation also appears on the Make a Donation - Pledge Information page. If a donor does not select a specific designation fund and selects the option to *Apply my pledge to the greatest need*, the donation goes to this assigned default designation.

If you do not select a default pledge designation here, donors will be required to select pledge distribution information on the Make a Donation - Pledge Information page.

Defining Web Appeals

These methods appear under the Other Ways to Give heading on the Ways to Give page.

Giving Code	Displays the unique identifying code entered when the vehicle was created on the Add a New Value page.
Description	Enter a short description of the giving vehicle (up to 30 characters), which appears as a subtitle on the Ways to Give page.
Description	Enter a longer description of the alternative giving method. This text follows the short title displayed on the Ways to Give page.

Additional information contact

User ID	Select the ID of the defined staff member listed as a contact name for inquiries about this giving vehicle.
Email ID	Enter the email address to be used for inquiries about this giving vehicle. The system populates this field.

Chapter 8

Managing Constituent Data

This chapter discusses how to:

- Search for records.
- Add people to the system.
- Manage addresses and phone numbers.
- Track external system IDs.
- Manage names.
- Maintain constituent types.
- Track religious preferences.
- Maintain photos.
- Add constituent types to graduates.
- Maintain degree information.
- Maintain work experience information.
- Create constituent attachments.
- Add organizations.
- Enter location data for organizations.
- Enter department data for organizations.
- Enter contact data for organizations.
- Maintain an organization's financial information.
- Define an organization's foundation information.
- View an organization's foundation information.
- Define an organization's matching gift rules.
- View an organization's matching gift rules.
- Review an organization's data.
- View an organization's employee list.

- View a person profile.
- View an organization profile.
- View a prospect profile.
- Update a donor's record or add a donor.
- View a constituent's audience history.
- Maintain involvement information.
- Establish relationships.

Searching for Records

This section provides an overview of records and discusses how to use Search/Match functionality.

Understanding Records

Contributor Relations uses Search/Match functionality to search for constituent records. The search and results pages are identical to those used by Campus Community, and they enable you to search for specific people based on basic information such as name and address. Use this page to ensure that a person does not already have an existing record before you add the person to the system.

Pages Used to Search for Records

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Search Criteria	HCR_SM_SEARCH	Contributor Relations, Constituent Information, People, Search/Match	Specify sets of criteria and arrange them in order for searching for duplicate or multiple records.
Search Results	HCR_SM_RESULTS	Click the Search button on the Search Criteria page.	View search results that are based on the criteria you entered on the Search Criteria page.

Using Search/Match Functionality

To avoid entering duplicate personal records, use Search/Match functionality any time that you are entering a new person in the database. Search/Match criteria is utilized when you save a *new* person, but if a potential duplicate is detected, use Search/Match anyway to investigate the existing person records. Start with Search/Match to look for the person before adding them to the database. Search/Match also is used to search for external organizations.

To set up Search/Match for Contributor Relations, use the delivered search parameters and result codes. These predefined sample searches are PSCS_CR SEARCH for Person and Org. These delivered search parameters enable you to include fields specific to Contributor Relations in your search results set.

Example

Here is an example of Contributor Relations-specific Search/Match functionality that an institution might use:

Search Results page

Adding People to the System

This section lists the pages used to add people to the system. These pages maintain all biographical information about the constituent.

Note. Contributor Relations uses Campus Community pages to maintain biographical information.

Pages Used to Add People to the System

Page Name	Definition Name	Navigation	Usage
Biographical Details	SCC_BIO_DEMO_PERS	Contributor Relations, Constituent Information, People, Add/Update a Person, Biographical Details	Enter biographical information, such as name, addresses, phone, email, gender, citizenship information, and marital status.
Regional	SCC_BIO_DEMO_REG	Contributor Relations, Constituent Information, People, Add/Update a Person, Regional	Enter regional biographical information, organized by country.

Managing Addresses and Phone Numbers

This section discusses how to:

- Update linked addresses.
- Review address data.
- Enter electronic addresses.

Note. Contributor Relations uses Campus Community pages to maintain addresses and phone numbers. You can use these pages to update linked addresses, track electronic addresses, and view address data.

Pages Used to Manage Addresses and Phone Numbers

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Update Linked Addresses	RUNCTL_ADDRLINK	• Campus Community, Personal Information, Biodemo Processes, Update Linked Addresses • Contributor Relations, Constituent Information, People, Process Biodemo Information, Update Linked Addresses	Update linked addresses.
Addresses	ADDRESSES_89	Campus Community, Personal Information, Biographical, Addresses/Phones, Addresses	View or update a list of all addresses in the system for an individual.
Electronic Addresses	E_ADDR_PERS	Campus Community, Personal Information, Biographical, Addresses/Phones, Electronic Addresses	Enter or review email and URL addresses for an individual.
Seasonal Addresses	CC_ADDR_SEASONAL	Campus Community, Personal Information, Biographical, Addresses/Phones, Seasonal Addresses	Enter or review seasonal addresses for an individual.

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Phones	PHONE_PERS	Campus Community, Personal Information, Biographical, Addresses/Phones, Phones	Enter or review phone details for an individual.

Updating Linked Addresses

When you update the address for someone who is linked to an individual, the address for the linked entity is not changed in the database on the Addresses page for the primary individual until you run the Update Linked Addresses process. When you run the process, the system finds the primary individual and updates the address data.

Reviewing Address Data

Access the Addresses page to view information about a constituent who is a person.

Entering Electronic Addresses

Access the Electronic Addresses page to maintain information about a constituent's email and URL addresses. You can specify a type for each address, such as work and home.

Tracking External System IDs

Use the External System IDs page to track constituent IDs by a number other than the Contributor Relations ID.

Managing Names

Use the Names page to specify a name type and name part for each full name and name part that an individual may use.

Maintaining Constituent Types

This section provides an overview of constituent types and discusses how to assign constituent types.

Understanding Constituent Types

Constituent types are the relationships that exist between a constituent and your institution. Constituent types are used extensively in reporting and in completing many business processes.

Pages Used to Maintain Constituent Types

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Constituent Type	AV_CNST_TYPE_TBL AV_CNST_TYPE_TBL_W	- Contributor Relations, Constituent Information, People, Relationships, Constituent Types - Contributor Relations, Constituent Information, Workset, Workset Constituent Info, Relationships - Workset, Constituent Types - Workset	Assign constituent types to a constituent.
Constituent Type Summary	AV_CNST_TYPE_INQ AV_CNST_TYPE_INQ_W	- Contributor Relations, Constituent Information, People, Relationships, Constituent Type Summary - Contributor Relations, Constituent Information, Workset, Workset Constituent Info, Constituent Type Summary	View a list of all the constituent types assigned to a constituent.

Assigning Constituent Types

Access the Constituent Type page (Contributor Relations, Constituent Information, People, Relationships, Constituent Types).

Constituent Type

Shawn Gallegher
ID: AV0001

Constituent Type: Alumni
Year: 2001 PSUNV
Prospect Manager: Mario Capozzelli

Find | View All First 1-5 of 5 Last

*Constituent Type	Start Date	Past
1 Alumni	07/20/1998	☐
3 Student	07/20/1998	☒
4 Parent	07/20/1998	☐
6 Faculty	07/20/1998	☐
7 Staff	07/20/1998	☒

Constituent Type page

Your selections on this page indicate the relationships that exist between a constituent who is a person and your institution. An organization can be assigned one constituent type. You can assign an organization's constituent type on the Organization Financial Information page.

Past Select if the constituent no longer has a relationship with your institution. For example, if a constituent has a value of *Parent* and the child graduates, then select the Past option for the constituent type of *Parent*.

Note. When constituent types are assigned to a constituent, you cannot delete the last remaining constituent type assignment. For example, if a constituent is assigned values of *Alumni* and *Parent*, you can delete one of these constituent types, but one must remain in the system.

Tracking Religious Preferences

Use the Religious Preference page to indicate a constituent's religion, if any. You can view a constituent's religious preference on the Person Profile page.

Maintaining Photos

You can store photographs of your constituents. Photographs are stored the same way that they are stored in any Microsoft Windows application.

Adding Constituent Types to Graduates

This section discusses how to run the Graduates to Alumni Application Engine process (AV_CONF_ALUM).

Contributor Relations provides a job process that searches for a group of graduates and adds to their records a constituent type of *Alumni*, based on each graduate's program completion date. Running the process also generates a report that lists the search results and notes any record changes.

Page Used to Add Constituent Types to Graduates

Page Name	Definition Name	Navigation	Usage
Graduates To Alumni	AV_RUNCTL_CONFR	Contributor Relations, Constituent Information, People, Process Biodemo Information, Graduates to Alumni	Run the process that adds a constituent type of <i>Alumni</i> to a graduate. The criteria entered on this page determine which graduates are selected for the process.

Running the Graduates to Alumni Process

Access the Graduates To Alumni page (Contributor Relations, Constituent Information, People, Process Biodemo Information, Graduates to Alumni).

Graduates To Alumni

Run Control ID: 2004_2005 [Report Manager](#) [Process Monitor](#) Run

☒ Report Only

*Academic Institution: PSUNV PeopleSoft University

*Academic Career: Undergraduate

*Completion Term: 0535 2005 Winter Qtr

Constituent Type: Alumni

Graduates To Alumni page

Report Only

Select to generate the Graduates To Alumni report (AV702) without making any changes to the Constituent Type table (PS_AV_CNST_TYP_TBL). Clear to both generate the report and add the graduates to the Constituent Type table with a constituent type of *Alumni*.

Academic Institution	Enter the associated academic institution for the graduates.
Academic Career	Select the associated academic career for the graduates. These values are defined by the institution.
Completion Term	Enter the term in which the graduates were granted or will be granted their degrees. These values are defined by the institution.
Constituent Type	Displays <i>Alumni</i> , the only constituent type that is assigned by this process.

When users run this process, the system does the following:

1. Gathers all records that meet the institution, academic career, and completion term criteria from the Graduates to Alumni page, where the value in the Degree Confer Date field is not *Null* and the value in the Degree Status field is *Active*.
2. Determines whether these records already have a constituent type of *Alumni*.
3. If the Report Only check box is cleared, the system updates the Constituent Type table where required.

If the person is not already assigned a constituent type of *Alumni* (type = 1), then a record is inserted for the current date with a constituent type of 1.
4. Regardless of whether the Report Only check box is selected, the system generates the Graduates To Alumni report AV702.

Maintaining Degree Information

This section discusses how to:

- Maintain external degree information.
- View an academic summary.
- Set a constituent's preferred year.
- Enter internal legacy degree information.

The system enables you to enter and track external degree information, or information about degrees earned from institutions other than your own. In addition, you can view information about both internal and external degrees.

Pages Used to Maintain Degree Information

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
External Degrees	AV_EXT_DEGR AV_EXT_DEGR_W	Contributor Relations, Constituent Information, People, Academic Information, External Degrees	Add information about degrees that a constituent earned at institutions other than your own.
Academic Information Summary	AV_ACAD_SUMM	Contributor Relations, Constituent Information, People, Academic Information, Academic Information Summary	View a summary of information about a constituent's internal, external, and legacy degrees.
Preferred Class Year	AV_INT_DEGREE	Contributor Relations, Constituent Information, People, Academic Information, Class Year, Preferred Class Year	Enter a constituent's class year at your institution. Preferred year appears on pages throughout the system when a person is the Level 0 key.
Internal Legacy Degrees	AV_LEGACY_DEG	Contributor Relations, Constituent Information, People, Academic Information, Class Year, Internal Legacy Degrees	Enter information about degrees earned at your institution without setting up the entire academic structure for each degree.

Maintaining External Degree Information

Access the External Degrees page (Contributor Relations, Constituent Information, People, Academic Information, External Degrees).

External Degrees page

Org ID (organization ID)	Select the institution from which the constituent earned the external degree.
Degree Nbr (degree number)	This value is automatically calculated by the system. The first record that you enter has a degree number of 1, the next 2, and so on.
Data Source	Select the name of the organization from which you obtained information about the degree. Data source values are delivered with the system as translate values. You can modify these translate values.
Degree	Select the type of external degree received or in progress. Degrees are defined on the Degree Table page. Note. To enter a degree that is not defined in the Degree table, leave the Degree field blank and type the appropriate information in the Description field.
Honors Category	If the person received an honor for this degree, select the appropriate value. Honors categories are delivered with the system as translate values. You can modify these translate values.
Degree Status	Select the current status of the degree. Degree statuses are delivered with the system as translate values. You can modify these translate values.

External Subject Area/Field of Study

If the constituent concentrated on specific subject areas or fields for this degree, enter them in these fields. You may prompt on these fields to access values from the External Subject table. Or, if you prefer to enter an external subject area that is not defined in the system, leave the field blank, tab to the related description field, and enter any text.

External Career

Select any external careers for the constituent. External careers are delivered with the system as translate values. You can modify these translate values.

Data Nbr (data number)

If this degree information is related to a particular transcript or source of information, enter the data number of the transcript or other source, from the External Data page. You cannot make a link to a data number until the External Data page is saved.

Org Primary Location
(organization primary location)

Click to view the primary address of the school to which this degree is related. On that page, click the Detail button to view additional information about the school.

Viewing an Academic Summary

Access the Academic Information Summary page (Contributor Relations, Constituent Information, People, Academic Information, Academic Information Summary).

Maintaining Work Experience Information

This section lists the pages used to maintain a constituent's work experience information.

Pages Used to Maintain Work Experience Information

Page Name	Definition Name	Navigation	Usage
Work Experience	PRIOR_WORK_EXP	- Contributor Relations, Constituent Information, People, Relationships, Work Experience - Contributor Relations, Constituent Information, Workset, Workset Constituent Info, Work Experience - Workset	View information about a constituent's current and past employment.

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Work Experience	AV_EMPL_HIST	Contributor Relations, Constituent Information, People, Relationships, Work Experience History	View a constituent's employment history.
Employment History Detail	AV_EMPL_HIST_SP	Click the Detail link on the Work Experience inquiry page.	View detailed information about an employee's record.
Organization Locations	AV_ORG_LOC_DTL_SP	Click the Locations button on the Employment History Detail page.	View information about an organization's physical locations.
Phone Detail	AV_EMP_PHONE_SP	Click the Phones button on the Employment History Detail page.	View a list of all the valid phone numbers for an organization.
Email/URL	AV_EMP_EMAIL_SP	Click the Email/URL button on the Employment History Detail page.	View the email addresses and URL addresses for an organization.

Creating Constituent Attachments

This section provides an overview of constituent attachments discusses how to create and view attachments to constituent records.

Understanding Constituent Attachments

When you create an attachment to a person, organization, or prospect level, you are attaching the file to the highest level of the record; this is the most global level at which you can attach a file. However, prospects are slightly different because menu security can be assigned to prospect records, restricting access to prospect attachments.

Page Used to Create Constituent Attachments

Page Name	Definition Name	Navigation	Usage
Constituent Attachments	AV_CNST_ATCH AV_CNST_ATCH_E	- Contributor Relations, Constituent Information, People, Person Attachments - Contributor Relations, Constituent Information, People, Organization Attachments	Create and view attachments to a person or organization record.

Creating Attachments

Access the Constituent Attachments page (Contributor Relations, Constituent Information, People, Person Attachments).

Constituent Attachments page, Audit tab

The Audit tab displays all updates to attachments, including user name and date/time. You can also filter attachments by a Document Date Range.

Adding Organizations

Use the Organization Table component to add external organizations to the system.

Entering Location Data for Organizations

Use the Location Detail component to enter information about the addresses and phone numbers of the organizations in the system. Organization locations should be entered before organization departments and organization contacts.

Entering Department Data for Organizations

Use the Organization Department Detail component to record information at the department level for an organization. Organization departments should be entered after organization locations and before organization contacts.

Entering Contact Data for Organizations

Use the Contact Detail component to maintain information about the contacts that your institution uses at a particular organization. You may have several contacts at one organization that are used for specific purposes, such as a Matching Gift contact and a Community Relations contact.

Maintaining an Organization's Financial Information

This section discusses how to enter an organization's financial information.

Page Used to Maintain Organization Financial Information

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Organization Financial Info (organization financial information)	AV_ORG_FIN_INFO AV_ORG_FIN_INFO_W	- Contributor Relations, Constituent Information, Organization, Organization Information, Organization Financial Info - Contributor Relations, Constituent Information, Workset, Workset Constituent Info, Organization Financial Info	Maintain information about an organization's financial history and other statistical information about the organization.

Entering an Organization's Financial Information

Access the Organization Financial Info page (Contributor Relations, Constituent Information, Organization, Organization Information, Organization Financial Info).

The screenshot shows the 'Organization Financial Info' page for Ford Motor Company (ID: AV1000). The page is divided into two main sections: 'Organization Information' and 'Financial Information'.

Organization Information:

- Constituent Type:** Corporation
- Institution:** PSUNV
- Prospect Manager:** NONE
- Employee Count:** 63575

- Contributions Total:** 0.00 USD
- Date:** (empty field)

Organization Financial Info page

Employee Count	Enter the number of people currently employed at the organization.
Alumni Count	Displays the total number of alumni who are employees of the organization. The system calculates the total of alumni based on both the number of work experience records and the number of relationships related to an organization ID. Define these relationships on the Person/Org Relationships page.
Stck Exch (stock exchange)	Select the name of the stock exchange in which the organization's stock trades, if applicable. Values are: <i>AMEX</i> , <i>NASDAQ</i> , and <i>NYSE</i> .
Symbol	Enter the stock exchange symbol under which the organization's stock trades, if applicable. You can enter up to 10 characters.
Description	Enter a description of the organization and the type of business it runs. You can enter up to 30 characters.
SIC	Select the Standard Industrial Code for the organization.
Fiscal Year	Enter the four-digit fiscal year for which you are recording financial information.

From Date and To Date	Select the from date and to date that define the fiscal year that you selected. The fiscal year should reflect the organization's fiscal year and not necessarily that of your institution. If information on this page is entered in a currency other than base currency, the system calculates conversion based on the exchange rates on the date in the To Date field.
Revenue Amount	Enter the total amount that the organization received in revenues during the fiscal year.
Base	Click to convert the amounts on this page to your institution's base currency. The system converts the values by using the exchange rate that is in effect on the date that you selected. The button label changes to Entry. Click the button again to toggle back to entry mode, where you can change the values.
Expenses Amount	Enter the total amount that the organization incurred as expenses during the fiscal year.
Profit/Loss Amount	Displays the organization's profit or loss for the fiscal year that you selected, based on revenue minus expenses.
Assets Amount	Enter the total worth of all assets held by the organization during the fiscal year.
Liability Amount	Enter the total amount of all liabilities owed by the organization during the fiscal year.
Equity Amount	Displays the organization's total equity for the fiscal year that you entered, based on assets minus liability.
Source Description and Date	Enter the person or publication that provides organization financial information to your institution, and the date on which organization financial information was obtained.
Contributions Total	Enter the total amount of all contributions made by the organization to your institution and other entities during the fiscal year.

Defining an Organization's Foundation Information

Use the Organization Foundation component to define and manage foundation-specific information for external organizations that may be approached for foundation support. You can track and view foundation interests and proposal requirements.

This section discusses how to:

- Define basic foundation information.
- Define foundation support information.

- Define proposal information.

Pages Used to Define Organization Foundation Information

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Foundation	AV_ORG_FND_INFO	Contributor Relations, Constituent Information, Organizations, Organization Information, Organization Foundation Information	The Foundation Information component assists in tracking philanthropic foundations that support or may support your institution. It also enables you to track specific interests of the foundation that can later be used to identify prospects for particular funding projects.
Support Areas	AV_ORG_FND_SUPP	Contributor Relations, Constituent Information, Organizations, Organization Information, Organization Foundation Information, Support Areas	Store data that can be used to data mine for foundation donors that have a good potential for funding a proposal for a specific project.
Proposal Info (proposal information)	AV_ORG_FND_PROP	Contributor Relations, Constituent Information, Organizations, Organization Information, Organization Foundation Information, Proposal Info	Enter information related to the application process for the foundation.

Defining Basic Foundation Information

Access the Foundation page (Contributor Relations, Constituent Information, Organizations, Organization Information, Organization Foundation Information).

Foundation page

Basic Information

Parent Company Select the external organization that is the parent of the foundation. The Create Relationship link enables you to create an organization-to-organization relationship if one is not defined in the system.

Established The date on which the organization was established.

Foundation Indicate whether a foundation is company-sponsored, private, family-based, and so on. *Corporate*, *Family*, and *Private* are delivered values.

Purpose and Activities

Enter a brief description of the reason for the foundation's existence and the types of activities in which it engages.

Financial Information

Use the fields in this group box to enter the foundation's financial data.

Fiscal Year	The financial reporting year for which the financial data is pertinent.
From Date and To Date	The first and last date of the fiscal year to which the data pertains.
Assets Amount	The financial holdings of the foundation.
Expenditures Amount	The amount of expenses the foundation had in the related year.
Distribution Amount	The amount of funding available to be distributed as grants or funded proposals.
Date	The date the information was obtained from the source.
Source	The originator of the foundation financial information, for example the Foundation Directory.
Grants Amount	The amount actually funded, which may differ from the distribution amount if all funding is not awarded.
Highest Grant Amount	The largest grant awarded by the foundation.
Lowest Grant Amount	The smallest grant awarded by the foundation.
Average Grant Amount	The typical amount of a grant or proposal funded by the foundation.

Defining Foundation Support Information

Access the Support Areas page (Contributor Relations, Constituent Information, Organizations, Organization Information, Organization Foundation Information, Support Areas).

Proposal Info page

Contact Type and Contact	The organization contact that is responsible for proposal reviews for the foundation.
Deadlines	The months and dates, such as March 15, each year that the foundation sets as the cutoff date for submitting proposals for consideration by the foundation.
Board Meeting Dates	The months and dates, such as March 15, when the foundation board meets to review proposals.
Notification Dates	The months and dates, such as March 15, by which the foundation will notify applicants of the success of their submitted proposals.

Viewing an Organization's Foundation Information

Use the Review Organization Foundation and Foundation Summary components to view foundation information entered in the system. You can review the data that was entered in the Organization Foundation component and you can also filter and review foundation information based on your criteria.

This section discusses how to:

- Review foundation information.
- Filter foundation records.

Pages Used to View an Organization's Foundation Information

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>

Defining an Organization's Matching Gift Rules

Use the Matching Rules component to define the matching gift rules for an organization. You can maintain information about minimum match amounts and match ratios, the designations for which gifts can be matched, the annual matching gift budget, required information and contacts, and any matching gift restrictions that the organization has.

Viewing an Organization's Matching Gift Rules

Use the Matching Rules inquiry component to view the matching gift rules for an organization. You can view information about minimum match amounts and match ratios, the designations for which gifts can be matched, the annual matching gift budget, required information and contacts, and any matching gift restrictions that the organization has.

Reviewing an Organization's Data

When you have entered the organization, location, department, and contact information for an organization, you can review that information quickly and easily through Campus Community pages.

Viewing an Organization's Employee List

This section discusses how to view employee lists.

Page Used to View an Organization's Employee List

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Employee List	AV_EMPL_LIST_E AV_EMPL_LIST_W	- Contributor Relations, Constituent Information, Organizations, Relationships, Employee List - Contributor Relations, Constituent Information, Workset, Workset Constituent Info, Employee List	View a list of all the constituents in the system who are employed by an organization. You can view both current and historical lists of an organization's employees.

Viewing Employee Lists

Access the Employee List page (Contributor Relations, Constituent Information, Organizations, Relationships, Employee List). Each employee name appears as a link. Click any name link to access the Person Profile page for that employee and read more about the person.

Click the Details button to view detailed information about a specific employment record on the Employment History Detail page.

You can build a workset from this page.

Viewing a Person Profile

Profiles for people and organizations enable you to view a summary of information in the system about a particular constituent. The system includes both a Person Profile and an Organization Profile page.

This section provides an overview of person profile views and discusses how to:

- View general person profile information.
- View a biographic profile.
- View a commitment profile.
- View a participation profile.

Understanding Person Profile Views

Each profile view contains several data regions with summary information. This table lists each data region and the profile view that contains it:

<i>Data Region</i>	<i>Profile View</i>
Biographic Information	Biographic
Address	Biographic
Phone Numbers	Biographic
Email Addresses	Biographic
Work Experience	Biographic
Academic Information	Biographic
Relationships	Biographic
Relationship Academic Information	Biographic
Organization Contacts	Biographic
Lifetime Giving	Commitment

Data Region	Profile View
Historical Giving	Commitment
Involvement	Participation
Volunteer Activities	Participation
Memberships	Participation

As you collapse and expand each profile view, the system populates the data regions within the view.

Page Used to View a Person Profile

Page Name	Definition Name	Navigation	Usage
Person Profile	AV_PRSN_PROFILE AV_PRSN_PROFILE_W	- Contributor Relations, Constituent Information, People, Person Profile - Contributor Relations, Constituent Information, Workset, Workset Constituent Info, Person Profile - Workset - Self Service, Outreach, View Prsn, Person Profile - Self Service, Outreach, View Lists, Person Profile	View summary information about a constituent who is a person, without having to navigate through the menus in the system.

Viewing General Person Profile Information

Access the Person Profile page (Contributor Relations, Constituent Information, People, Person Profile).

☐ Clearance Required

Prospect Manager: Alan Franken

Person Profile page (1 of 5)

The default settings that determine what you see—which profile views expand, as well as the address, phone, and email views that appear—are defined on the Operator Defaults page.

Common Fields

Some fields on this page are not dependent on which profile view is expanded. The system always displays the following information at the top of the page: constituent name, ID, constituent type, class year, institution, spouse button (if a spousal relationship exists), 3Cs buttons, and a button to access the FERPA Bio Demo page.

Constituent Type	Click to access the Constituent Type Summary page, which lists all types assigned to a constituent.
Year	If academic information exists for the constituent in the system, the class year appears as a link. Click the link to access the Academic Information inquiry component. If no class year exists but the system has academic information for the constituent, then <i>None</i> appears here as a link. Click the link to access the Academic Information inquiry component.
Profile View	Select a profile view— <i>Biographic</i> , <i>Commitment</i> , or <i>Participation</i> —to expand it below and populate its data regions. Click the arrow next to the name of the region to expand or collapse data regions manually.
Printer Friendly Version	Click to access a read-only version of the page that expands all rows of all populated data regions. You can print this page using your browser's print functionality. Click the Return button to return to the Person Profile page.
Expand All and Collapse All	Click to either expand or collapse all data regions below.
Clearance Required	If this check box is selected, clearance is required before contacting the constituent. Set Clearances on the Clearance page.

Prospect Manager

Displays the name of the constituent's assigned prospect manager. Prospect managers are assigned on the Staff Assignment, Volunteer Assignment, and Unit Assignment pages.

If the prospect manager has an active email address on the Electronic Addresses page, the name appears as a link. Click the link to launch your email application and send a message to that person.

Additional Information

The system displays messages at the bottom of the page based on the following conditions:

Note. Where no data exists, the system hides the data region.

<i>Data Region</i>	<i>Condition</i>	<i>Message</i>
Membership	No data exists.	No Membership History on file.
	Data exists, but user does not have access to the Person Membership History page from any menu.	Membership History on file.
Lifetime Giving Historical Giving	No data exists.	No Giving Information on file.
	Data exists, but user does not have access to the Person Giving Profile page from any menu.	Giving Information on file.
Work Experience	No data exists.	No Work Experience on file.
Academic Information	No data exists.	No Academic Information on file.
Relationships	No data exists.	No Relationship information on file.
Relationship Academic Information	No data exists.	No Academic Information is on file for any related person.
Attachments	No attachments exist.	No Constituent Attachments on file.
Organization Contacts	No data exists.	Not an Organization Contact.

<i>Data Region</i>	<i>Condition</i>	<i>Message</i>
Involvement	No data exists.	No Involvement information on file.
Volunteer Activities	No data exists.	No Volunteer Activity information on file.

The system also displays messages in this area related to the following information:

<i>Additional Information</i>	<i>Condition</i>	<i>Message</i>
Academic Information	No data exists, and the Class Year link is inactive.	No Academic Information on file.
Planned Giving	No data exists.	No Planned Giving Donor information on file.
	Data exists.	Planned Giving Donor information on file.
Ratings	No data exists.	No Ratings information on file.
	Data exists.	Ratings information on file.
Assigned Resources	No data exists.	No Resources are assigned to constituent.
	Data exists.	Resources are assigned to constituent.

Person Profile page (3 of 5)

This table lists the information sections in this view and the pages from which the system derives the information:

Information Section	Page
Address	Addresses
Phone / Email	Phone Numbers Electronic Addresses
Biographic Information	Bio/Demo Data Religious Preferences Relationships Decedent Data
Work Experience	Work Experience
Academic Information	Academic Information Summary
Relationships	Relationships Person to Org Relationships
Attachments	Constituent Attachments
Organization Contacts	Organization Contacts Organization Contact Detail

Biographic Information

This data region displays compiled biographical data, including date of death.

Date of Death

If the constituent is deceased, and the Decedent Data page contains a date of death, the system displays it here.

Address

If the most current address is inactive, it will appear in the grid.

Address Type	Select the type of address that you want to appear. The system displays active addresses; inactive addresses will not appear. If a seasonal address is in effect, the system indicates that by displaying a "Seasonal" message.

Phone Numbers

Phone Type	Select the type of phone information that you want to appear.
Preferred	The check box is selected next to the preferred phone number on file in the system.

Email Addresses

Email Type	Select the type of email address information that you want to appear.
Email Address	If the constituent has an active email address in the system, it appears as a link. Click the link to launch your email application and send a message to the constituent.
Preferred	The check box is selected next to the preferred email address on file in the system.

Work Experience

Employer	Click a link to access the Employment History Detail page for the constituent.

Academic Information

This grid displays a combined view of all degree information about this constituent. This information includes both internal and external degrees .

Relationships

Relationship	Click a link to access the Relationship Detail page for the constituent.
	Click this button to access the Person Profile page for the other person in the relationship or the Organization Profile page for a related organization.

Note. If an existing relationship is a *Joint* relationship, it is noted next to the Relationship link.

Relationship Academic Information

This grid displays a combined view of all degree information in the system for people who are related to this constituent. This information includes both internal and external degrees.

Attachments

Click the View link to open the attachment in a new window.

Organization Contacts

Organization Name Click a linked name to access the Organization Contact Detail page for the constituent.

Click this button to access the Organization Profile page of the organization for which the constituent is a contact.

Viewing a Commitment Profile

Access the Person Profile page, Commitment Profile view.

Viewing an Organization Profile

This section provides an overview of organization profile views and discusses how to:

- View a general organization profile.
- View organization details.
- View organization financial details.
- View commitments.
- View organization participation.

Understanding Organization Profile Views

Each profile view contains several data regions with summary information. The table below lists each data region and the profile view that contains it:

<i>Data Region</i>	<i>Profile View</i>
Location	Organization Detail
Organization Departments	Organization Detail
Organization Contacts	Organization Detail
Relationships	Organization Detail

<i>Data Region</i>	<i>Profile View</i>
Organization Attributes	Organization Financial Info
Organization Financial Information	Organization Financial Info
Lifetime Giving	Commitment
Historical Giving	Commitment
Matching Gifts	Commitment
Involvement	Participation
Memberships	Participation

As you collapse and expand each profile view, the system populates the data regions within the view.

Page Used to View an Organization Profile

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Organization Profile	AV_ORG_PROFILE AV_ORG_PROFILE_W	- Contributor Relations, Constituent Information, Organizations, Organization Profile - Contributor Relations, Constituent Information, Workset, Workset Constituent Info, Organization Profile	View summary information about a constituent that is an organization, without having to navigate through the menus in the system.

Viewing a General Organization Profile

Access the Organization Profile page (Contributor Relations, Constituent Information, Organizations, Organization Profile). The default settings that determine what you see—which profile views expand, as well as the address, phone, and email views that appear—are defined on the Operator Defaults page.

The screenshot shows the 'Organization Profile' page for 'Organization Testing Corp'. At the top, there are two tabs: 'Organization Profile' (selected) and 'Prospect Profile'. Below the tabs, the organization's name 'Organization Testing Corp' is displayed in large blue text. To the right of the name is the ID 'AV5555'. Below the name, it says 'Constituent Type: Corporation'. To the right of this, it says 'Institution: PSUNV'. There are three icons: a phone, a calendar, and a speech bubble, followed by a red star. Below the main information, there is a 'Profile View:' section with a dropdown menu set to 'Organization Detail'. To the left of this is a link for 'Printer Friendly Version'. To the right are two buttons: 'Expand All' and 'Collapse All'. Further right is a 'Clearance Required' checkbox, which is checked. Below that is the 'Prospect Manager:' field, which contains the name 'Mario Capozzelli'.

Organization Profile page (1 of 5)

Common Fields

Some fields on this page are not dependent on which profile view is expanded. The system always displays the following information at the top of the page: constituent name, ID, constituent type, institution, and 3Cs buttons.

Profile View

Select a profile view—*Organization Detail*, *Organization Financial Info*, *Commitment*, or *Participation*—to expand it below and populate its data regions. Click the arrowhead next to the name of the region to manually expand or collapse data regions.

Printer Friendly Version

Click to access a read-only version of the page that expands all rows of all populated data regions. You can print this page using your browser's print functionality.

Click the Return button to return to the Organization Profile page.

Expand All and Collapse All

Click to either expand or collapse all data regions below.

Clearance Required

If this check box is selected, clearance is required before contacting the organization. Clearances are set on the Clearance page.

Prospect Manager

Displays the name of the organization's assigned prospect manager. Prospect managers are assigned on the Staff Assignment, Volunteer Assignment, and Unit Assignment pages.

If the prospect manager has an active email address on the Electronic Addresses page, the name appears as a link. Click the link to launch your email application and send a message to that person's preferred email address.

Additional Information

The system displays messages at the bottom of the page based on the following conditions:

Note. Where no data exists, the system hides the data region.

<i>Data Region</i>	<i>Condition</i>	<i>Message</i>
Location	No data exists.	No Locations on file
Organization Departments	No data exists.	No Organization Departments on file
Organization Contacts	No data exists.	No Organization Contacts on file
Relationships	No data exists.	No Relationships on file

Membership Organization Click a link to access the Membership Detail page for the organization.

Note. If business unit security is active, the system only displays member organizations for accessible business units.

Viewing a Prospect Profile

Contributor Relations provides a Prospect Profile page that presents a 360-degree view of a prospect's connections with your institution. The page contains a large amount of information as well as links to other pages in the system to enable you to find more detailed information. The data regions available on the page will change, depending on whether the prospect is a person or an organization.

This section provides an overview of prospect profile views and discusses how to:

- View a general prospect profile.
- View prospect management details.
- View prospect philanthropic interests.

Note. If prospect management security is active, the system may not display this page at all. Instead, the system displays messages in the Additional Information group box at the bottom of the Person Profile or Organization Profile page. These messages provide information about the amount and type of prospect information in the system, but reveal no details.

Understanding Prospect Profile Views

Each profile view contains several data regions with summary information. The table below lists each data region and the profile view that contains it:

<i>Data Region</i>	<i>Profile View</i>
Assigned Resources	Prospect Management
Clearances	Prospect Management
Strategies	Prospect Management
Recent Actions	Prospect Management
Next Actions	Prospect Management
Ratings	Prospect Management
Charitable Involvement	Philanthropic Interests
Designations Supported	Philanthropic Interests
Personal Assets	Prospect Management (people only)
Planned Giving	Philanthropic Interests (people only)

As you collapse and expand each profile view, the system populates the data regions within them.

Audience History page

Audience	Lists the name of the initiative audience to which the constituent belongs.
Audience Type	Indicates whether the audience is for the purpose of <i>Administration</i> , <i>Segmentation</i> , or <i>Reporting</i> .
Initiative	Lists the name of the initiative to which the audience is associated.
Initiative Type	Indicates whether the initiative is a campaign, volunteer effort, event, membership effort, or other type.

Maintaining Involvement Information

This section provides an overview of involvement and discusses how to:

- Add involvement records.
- Filter involvement records.
- Create an involvement roster.

Understanding Involvement

The Involvement component of Contributor Relations enables you to maintain information about a constituent's activities, affiliations, interests, and awards and honors. When you create an involvement record, you identify the involvement type, a description of the involvement, a category such as charitable or political, an institution, and start and end dates.

Pages Used to Maintain Involvement Information

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Involvement	AV_INVLV AV_INVLV_E AV_INVLV_W	- Contributor Relations, Constituent Information, People, Biographic Information, Involvement - Contributor Relations, Constituent Information, Organizations, Participation, Involvement - Contributor Relations, Constituent Information, Workset, Involvement	Add new involvement records for a constituent.
Involvement Filter	AV_INVLV_FLTR AV_INVLV_FLTR_E AV_INVLV_FLTR_W	- Contributor Relations, Constituent Information, People, View Person Information, Participation, Involvement Summary, Involvement Filter - Contributor Relations, Constituent Information, Organizations, Participation, Involvement Summary, Involvement Filter - Contributor Relations, Constituent Information, Workset, Workset Constituent Info, Involvement Summary, Involvement Filter	Filter the types of involvement that you view on the Involvement Summary page.

Page Name	Definition Name	Navigation	Usage

Establishing Relationships

This section provides an overview of relationships, lists common elements, and discusses how to:

- Establish a person-to-person relationship.
- Establish an organization-to-organization relationship.

- Establish a person-to-organization relationship.
- Establish an organization-to-person relationship.

Understanding Relationships

You can establish relationships between two people, two organizations, or a person and an organization.

The relationships that you establish can be reciprocal—that is, when you indicate a relationship in one record, the system creates the relationship in the corresponding record. For example, if you are working with Shawn Gallagher and you create a relationship for him as a trustee of Ford Motor Foundation, the system automatically creates the corresponding relationship in Ford Motor Company's record.

Common Elements Used in This Section

Relationship Nbr (relationship number)	The system automatically generates a relationship number when you establish and save a relationship.
Related ID	Enter the ID of the person or organization to which this constituent is related. Select a related ID if the organization exists in the system.
Relationship	Select the nature of the relationship, such as person to organization, organization to organization, or organization to person. Relationship types are shipped with the system as translate values. Do not modify these translate values. Any modifications to these values requires substantial programming.
Source Description	Enter the name of the person or publication that provides your institution with information about this relationship.

Pages Used to Establish Relationships

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Relationships	AV_RELATIONSHIPS_E	Contributor Relations, Constituent Information, Organizations, Relationships, Org to Org Relationships	Record information about a relationship between two organizations.
Address Detail	AV_ADDRESS_SP AV_ADDRESS_2_SP	You can access the Address Detail page through multiple navigation paths. A frequently used path is: Click the Address link on the Relationships page.	Enter and view address information for a person or organization for which no record exists in the system.

Chapter 9

Managing Prospects

This chapter provides an overview of prospect management and discusses how to:

- Create resource assignments.
- Create prospect strategies.
- Track prospect data.
- Implement a prospect plan.

Understanding Prospect Management

This section lists prerequisites and discusses prospect management.

Prerequisites

Before you can assign staff members, volunteers, and business unit resources to manage prospects, you must set them up and assign them to roles at your institution.

Prospect Management

To manage prospects effectively, you must evaluate constituents, create comprehensive cultivation-activity plans, and constantly monitor and revise those plans. Contributor Relations enables you to do this by maintaining extensive prospect information and providing tools that you can use to effectively implement and manage cultivation plans.

You can assign prospects to the staff members, volunteers, and units that are responsible for prospect management. For each assignment that you create, you can assign an institution-defined role or a reason for the assignment. Roles are the undertakings (such as Prospect Manager, Campaign Manager, Solicitor, and so on) that are assumed by the assigned resources at your institution.

Creating Resource Assignments

You can assign prospects to resources in two ways:

- Create *mass* assignments, whereby you assign a group of prospects to a particular resource and role.

- Create *individual* assignments, whereby you assign a single prospect to a resource.

This section lists common elements and discusses how to:

- Create mass assignments.
- Create individual staff assignments.
- Create individual volunteer assignments.
- Create individual unit assignments.
- View the prospects assigned to a resource.
- View resource assignments.
- Generate the Role Assignments report.

Common Elements Used in This Section

Campaign

Select an organized institutional effort (targeted to a specific constituency) that occurs over a specified period with specific purposes and goals. When you select a campaign, its description appears to the right of this field.

Role

Select the role that the resource plays in the cultivation process. Roles are determined by your institution. Values include *PM* (Prospect Manager), *SOL* (Solicitor), and *CM* (Campaign Manager).

The list of available role values for each assignment is affected by the selections you made in the Assignment Role Option group box on the CR Installation page.

Note. Each prospect can have only one resource at a time assigned to the *PM* role.

Pages Used to Create Resource Assignments

Creating Mass Assignments

Access the Mass Assign Staff, Mass Assign Units, or Mass Assign Volunteers page (Contributor Relations, Prospect Management, Prospect Resources, Mass Assignments, Mass Staff Assignments). The Mass Assign Staff page is shown; the appearance of the other pages will differ somewhat.

Mass Assign Staff			
*Institution:	PSUNV	PeopleSoft University	
Staff ID:	AV0007	Whitney, Christopher	
Role:	CM	Campaign Manager	
Campaign:	SCHOLARSHF	Scholarship Campaign	
*Start Date:	06/23/2004	End Date:	12/31/2005

Persons Assigned		Organizations Assigned	
ID	Name	External Org ID	Description
1 AV0001	Gallegher, Shawn	1 AV2000	Lambert Manufacturing

Mass Assign Staff page

This page enables you to assign a group of prospects to a resource for the same reason. When you create mass assignments, the system:

- Generates an assignment record for each prospect in the group.
- Adds each prospect into the resource's MYPROS workset.

and *PeopleSoft Campus Self Service 9.0 PeopleBook*, "Using Self-Service Outreach," Creating and Maintaining the My Prospects Workset.

Institution

Select the institution associated with the resource that you are assigning.

Note. If your security access limits you to one academic institution, this field does not appear.

Staff ID, Volunteer ID, or Unit ID

Enter the ID of the resource for which you are creating mass assignments. Select a staff ID, a volunteer ID, or a unit ID, depending on the resource type for which you are creating assignments.

Role

The values that you selected in the Assignment Role Option group box of the CR Installation page affect the IDs that are available for this field.

If *Defined* was selected on the CR Installation page, only roles assigned to the selected ID appear here.

If *Class* was selected, only roles for the ID type selected (staff, volunteer, or unit) appear here.

If *All* was selected, all roles defined in the system appear, regardless of their ID or type.

Workset Code

If you are entering mass assignments for a workset, enter the workset code for the workset to which to apply the assignment. The IDs and names of each constituent in the workset appear in the lower portion of this page.

Persons Assigned

ID and Name

Identify each prospect to be assigned to the resource and role that you selected. When you enter an ID, the person's name appears.

Organizations Assigned

External Org ID (external organization ID) and Description

Identify each external organization to be assigned to the resource and role that you selected. When you enter an ID, its description appears.

Workset Members

ID and Name

When you select a workset code, the ID or name of each constituent in the workset appears.

Creating Individual Staff Assignments

Access the Staff Assignment page (Contributor Relations, Prospect Management, Prospect Resources, Assign Prospect Resources, Staff Assignment).

End Date:

Staff Assignment page

Staff ID, Volunteer ID, or Unit

Depending on which page you access, enter the staff ID, the volunteer ID, or the unit ID for the resource that you are assigning to a prospect.

Spouse Link

Select to indicate that the prospect's spouse is to receive the same resource assignment. The assignment is made on the corresponding report and display pages, but it is not included in the assignment totals for those pages.

Note. If this check box is unavailable for entry, one of the following is true:

- The prospect does not have a spousal relationship established in the system.
- The prospect or the prospect's spouse is deceased.

If you select this check box, the application copies the assignment to the spouse's record. If the assignment already exists on that record, only the link is established. If the assignment is for the role of Prospect Manager, the spouse cannot have another current Prospect Manager assignment. If a current Prospect Manager assignment exists on the spouse's record, an error message appears and the system does not copy the assignment.

Creating Individual Volunteer Assignments

Access the Volunteer Assignment page (Contributor Relations, Prospect Management, Prospect Resources, Assign Prospect Resources, Volunteer Assignment).

Volunteer Assignment page

Although this page contains the same fields as the Staff Assignment page, volunteer assignment differs slightly. Volunteer IDs are not necessarily staff members; they are the IDs of people being assigned to a prospect or action in a role for a specified period of time.

Note. You must set up an ID on the Volunteers page in order for it to appear as a valid Volunteer ID on this page.

Creating Individual Unit Assignments

Access the Unit Assignment page (Contributor Relations, Prospect Management, Prospect Resources, Assign Prospect Resources, Unit Assignment).

Staff Assignment Volunteer Assignment **Unit Assignment**

☒ Summary
☐ Detail

Role Assignments page

Institution

Select the institution for which to generate a report. The report contains information about assignments only for the institution that you select.

Assigned Resource

Select the resource type for which to generate a list of assignments. You can select *Staff*, *Volunteer*, or *Unit*.

The values in this field are delivered with the system as translate values. Do not modify these values in any way. Any modifications to these values will require a substantial programming effort.

Sort By

Select the sort order for the list of resources that appears on the report. You can sort by *Count*, *ID*, or *Name*.

If you select *Count*, the Role Assignments report will order the staff IDs by the highest number of assignments.

If you select *ID*, the report will list the staff by their ID numbers.

If you select *Name*, the report will list the staff in alphabetical order.

Note. The values in the Sort By and Sort Order fields will appear on the report, so you'll know how you chose to sort this information.

The sort by values are delivered with the system as translate values. Do not modify these values in any way. Any modifications to these values will require a substantial programming effort.

Sort Order

Specify whether to view the information on the report in *Ascending* or *Descending* order.

Descending order means that the values in the Sort By field will be sorted from highest value to lowest value. Ascending order means that the values will be sorted from lowest value to highest value.

Report Type

Select the type of report to generate.

Select *Summary* to produce a one-page report that includes the ID and name of the assigned resource, and the number of assignments he or she has that meet the parameters that you set for the report.

Select *Detail* to produce a one-page summary and a separate page for each resource. The separate page will include the ID and name of each prospect assigned, the associated campaign, start date, end date, and whether the spouse's record is linked.

Creating Prospect Strategies

This section provides an overview of prospect strategies and discusses how to:

- Create an overall cultivation strategy.
- View actions linked to a strategy.
- View a strategy summary.
- View prospect strategy details.

Understanding Prospect Strategies

Strategies are overall plans for the cultivation of a prospect. You can have multiple strategies for each prospect. You use the Prospect Strategy component to create strategies.

You can link strategies to a prospect's spouse and to the prospect actions that you have created. For example, if the cultivation goal for Shawn Gallagher focuses on board member involvement and cultivation toward a major gift to a campaign, you can link the entire strategy to the record of Shawn's spouse. Also, if you create an action to invite Shawn Gallagher to an event that promotes the campaign, you can associate that action with his strategy.

Prospect Strategy page

Overall Status

Select the status of cultivation in which the prospect is currently involved. Values include *Active*, *In Negotiation*, *Prospect*, *Suspect*, and *Ultimate Gift*. Values for this field are delivered with the system as translate values. You can modify these translate values.

Strategy Name

Enter a descriptive title for the strategy that you are creating.

Spouse Link

Select to link the strategy to the prospect's spouse. When you link a strategy to a spouse's record, any updates that you make to the strategy on one prospect's record are automatically updated on the linked record.

If you clear this check box, the strategy is no longer linked to the spouse's record. Clearing the check box creates a disconnect between the two spouse strategies. Changes to one record no longer change the other.

Note. If a constituent does not have a spousal relationship in the system, this check box is unavailable for selection.

Strategy Status

Select the current state of progression for the strategy. Values for this field are delivered with the system as translate values. You can modify these translate values.

Add Action

Click to access the Actions component, where you can add actions that are related to the strategy that you have created.

Note. You must save the prospect's strategy before this button becomes active.

Description

Describe the strategy.

Initiative Type

Select the type of initiative to relate to the prospect strategy. This selection narrows the choices that appear when you select an initiative.

Initiative

Select an initiative to relate to the prospect strategy. When you select an initiative, its descriptive name appears to the right of this field.

Viewing Actions Linked to a Strategy

Access the Linked Actions page (Contributor Relations, Prospect Management, Stewardship Plans, Prospect Strategy, Strategy - Person, Linked Actions).

Tracking Prospect Data

You can maintain information about a prospect's ratings, personal assets, and philanthropic interests. In addition, you can generate Bio Bit and Bio Brief reports that summarize information about a prospect.

This section lists a common element and discusses how to:

- Create a biographic narrative.
- Maintain personal assets.
- View personal assets.
- Maintain ratings.
- Filter ratings.
- View ratings.
- View a prospect's philanthropic interests.
- Prepare and generate a biographic profile report.

Common Element Used in This Section

Click to access the Display in Other Currency page, where you can view the amount in another currency and obtain exchange rate information.

Pages Used to Track Prospect Data

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Narrative	AV_BIO_BIT_RPT2 AV_BIO_BIT_RPT2_E AV_BIO_BIT_RPT2_W	- Contributor Relations, CR Reports, Biographic Reports, Biographic Profile, Narrative - Contributor Relations, CR Reports, Biographic Reports, Biographic Profile - Org, Narrative - Contributor Relations, CR Reports, Biographic Reports, Biographic Profile - Workset, Narrative	Write a longer description about a prospect's involvement with the institution for a Bio Brief report.
Personal Assets	AV_PRSN_ASSET AV_PRSN_ASSET_W	- Contributor Relations, Prospect Management, Prospect Research, Personal Assets - Contributor Relations, Prospect Management, Prospect Research, Personal Assets - Workset	Track information about the assets, such as securities, real estate, fine art, automobiles, heirlooms, and so on, that are owned by a prospect. The organizational records that are contained in a workset do not appear on this page because personal asset information pertains only to people.
Display In Other Currency	AV_CURRENCY_OTHER	- You can access the Display in Other Currency page through multiple navigation paths. One frequently used path is: - Click the Display in Other Currency button on the Personal Assets page.	View information about the exchange of a monetary value from one currency to another.

You can generate a standard report or a customized report.

Creating a Biographic Narrative

Access the Narrative page (Contributor Relations, CR Reports, Biographic Reports, Biographic Profile, Narrative).

The screenshot shows a web application interface with two tabs at the top: "Biographic Profile" and "Narrative". The "Narrative" tab is selected. Below the tabs, there is a "Run Control ID: 1" label. To the right are links for "Report Manager" and "Process Monitor", and a yellow "Run" button. The main content area displays constituent information: "Gallegher, Shawn" with "ID: AV0001", "Constituent Type: Alumni" with "Year: 2001", and "Institution: PSUNV". There are three small icons (phone, calendar, speech bubble) to the right of the ID. Below this information is a large, empty text area with a blue header bar labeled "Narrative".

Narrative page

If you are preparing a biographic profile, enter a narrative about the constituent. The Narrative field should contain information that is more descriptive than information in the summary area on the Biographic Profile page. This field might be used by a president to detail a personal request or to provide a more detailed history of the constituent.

The information that you enter in this field appears on all Bio Brief reports for all users who include narrative information in the Bio Bit, Bio Brief, or custom reports.

The Bio Bit and Bio Brief reports include information about the prospect based on the criteria that are set up for the report.

Maintaining Personal Assets

Ratings page

Rating Category

Select the type of rating that you are entering. Rating categories are defined on the Rating Categories page.

Rating Type

Indicate the type of source that provided the rating information to your institution. Rating types are defined on the Rating Types page.

Indicator

Select a code that describes the actual rating classification linked to a specific rating category. Indicators are defined on the Rating Indicators page. If the code requires additional values, the Value field appears.

Valid

Select a value that refines the indicator code to a more specific rating if the rating indicator requires it.

Rating Date

Enter the date on which rating information is provided. The default is today's date.

Potential Date

Enter the date on which a prospect may be qualified to give to your institution at a specified level.

From Amount and To Amount

Enter the minimum (from) and maximum (to) monetary ranges that specify a prospect's giving capacity or other rating that is measured in ranges of monetary amounts, like household income. A *to amount* is not required.

The monetary values in the From Amount and To Amount fields appear here in base currency if you entered them in a currency other than your institution's base currency.

Initiative Code

The campaign initiative to which the rating applies. This code allows ratings to be created independently for separate campaigns for the same prospect, for example.

Source

Enter the name of the person, vendor, or publication providing rating information to your institution. This field can be 60 characters long.

Click to spell check any comments you add to this page.

Filtering Ratings

Access the Rating Filter page (Contributor Relations, Prospect Management, Giving Capacity, Rating Summary, Ratings Filter).

Rating Summary		Rating Filter

Ratings Source Find View All First 1 of 1 Last Contains Search + -			

Rating Filter page

Note. The prompts on this page return only those values from existing ratings for this constituent.

Rating Type	This field returns the value <i>All</i> or any ratings types that occur on a rating for this prospect. Examples of rating types are <i>Peer</i> , <i>Staff</i> , and <i>Vendor</i> .
Rating Indicators	If you select <i>Specific</i> , the fields in the Indicators region appear, allowing you to select ratings indicators for the filter. If you select <i>All</i> , the region is hidden and all ratings indicators appear in the results.
Rating Category	Rating categories that apply to this constituent may be used as filter criteria. Examples of rating categories include charitable, academic, or survey.
Indicators	To limit the ratings listed in the Ratings Summary, you can filter by specific ratings indicators. Only those ratings indicators that have been applied to the prospect appear in the prompt. If you do not select a value, all ratings indicators that meet the remainder of the filter criteria appear in the results.
Rating Date and Potential Date	Enter dates to narrow the search results that the system retrieves.
Amount	Enter values in the From and To fields to narrow the search results that the system retrieves.
Ratings Source	Enter values in the <i>Begins With</i> , <i>Contains</i> , <i>Ends With</i> , or <i>Exact Match</i> fields to search for ratings source information.
Current, Historical, and All	The system retrieves results that meet the effective date criteria you select. <i>Current</i> : Only current effective-dated rows appear. <i>Historical</i> : Only rows with an effective date less than today appear. <i>All</i> : All rows, regardless of date, appear.
Search	Click to return results that meet your criteria. You can view these results on the Rating Summary page.

Viewing a Prospect's Philanthropic Interests

The Philanthropic Interests page gives a historical view of a constituent's past philanthropy (whether or not it is with your institution). This view helps your institution view patterns of philanthropy for this constituent in the past to better target this person in the future.

Philanthropic interests are derived from the charitable involvement and institutional giving that are recorded for a prospect. Involvement records with a category of *Charitable* appear in the Charitable Involvement area, and a summary of all the gifts made by the prospect appear in the Designation group box of this page.

Designation

This group box lists each designation, its business unit, and the total giving credits or hard credit gifts associated with it. The Recognition Credits column lists all soft credits for the designation. The system lists the dates of the first and most recent gifts to the designation, as well as the number of gifts that the prospect has made to the designation.

Preparing and Generating a Biographic Profile Report

Access the Biographic Profile page (Contributor Relations, CR Reports, Biographic Profile).

Biographic Profile page

Report Type

Bio Bit	Select to generate a standard bio bit report as defined by your institution.
Bio Brief	Select to generate a standard bio brief report as defined by your institution.
Custom	Select to use one of the customized reports defined for your user ID on the Operator Defaults page.

Summary

If you are preparing a bio bit, enter a report summary. The information that you enter in this field appears on all printed bio bit reports for all users if they include a summary in the report.

Implementing a Prospect Plan

This section provides an overview of prospect plans and discusses how to:

- Clear a prospect for cultivation.
- Create mass actions.
- Create actions for individual prospects.

- Enter action results.
- Maintain donor appreciation items.
- View a list of appreciation items given.
- View donor appreciation details.
- View clearances for a prospect.
- Filter prospect actions.
- View existing actions for a prospect.
- View action details.
- View contact reports.
- View contact report details.
- View to do lists.

Understanding Prospect Plans

After you create an overall strategy, you can determine the steps or actions that you plan to take to complete the strategy. You can create multiple actions, such as dinners, phone calls, and solicitations, for a prospect.

You can create actions in two ways: mass actions, for which you create one action and assign it to multiple prospects, or individual actions, for which you create an action that is associated with only one prospect.

If you bestow a gift on a prospect, use the application to track the gift, its value, and the date that it was given.

After a step in the cultivation process is complete, it is important to document the action taken and its result in a contact report, which is a written report that details an action and its result.

Because most of your staff members deal with actions for many prospects at one time, they need to track all the actions they're handling. The system provides a personalized *to do list* that lists all the actions on which you are working.

Mass Actions page (2 of 2)

After entering all of the mass action information, click the Process Actions button at the bottom of the page to apply the action. The system displays a Message Catalog message (14300,100) that identifies how many people and organization constituent action records were added.

Institution

Enter an institution.

Note. If your security access limits you to one academic institution, this field does not appear.

Action	Enter a descriptive title (up to 100 characters) for the action.
Description	Enter a description for the action.
Planned Date	Enter the date when the action is planned to occur. The default is today's date.
Expiration Date	Enter the date after which the action is considered to be expired.
Action Type	Select a classification for the action. Action types are defined on the Action Types page.
Contact Type	Enter the method of contact for the action.
Ask From and Ask To	If the action type that you selected is <i>Ask</i> , you are required to enter an amount in the Ask From field.
Status	Select the overall state of an action at a particular time. Action status codes are defined on the Action Status page.
Complete action	Click this link to access the Mass Action Completion page, where you can create and complete actions at one time.
Solicitor and Solicitor ID	If the action type you selected is <i>Ask</i> , you must select the type of resource that carries out the task and then select the solicitor's ID. Options include all the resources that are assigned the role of solicitor.
Responsible Person	Select the type of resource and ID of the person who is overseeing the action. The values for ID types are delivered with the system as translate values. Do not modify these values in any way. Any modifications to these values will require a substantial programming effort.
Others Assigned	
Assignment Type	Select the resource type from the values <i>Staff</i>, <i>Unit</i>, and <i>Volunteer</i> that is being assigned to the action. The values in this field are delivered with the system as translate values. Do not modify these values in any way. Any modifications to these values will require a substantial programming effort. The resource type you select determines the list of available options that appears in the Resource Assigned field.
Resource Assigned	Enter the ID number of the resource that is assigned to carry out an assignment. When you select an ID or unit code, the person or unit's name appears to the right of this field.
Role	Specify a role for other resources assigned to a mass action. When you select this role, the system populates the Role field on the Action Info page of the constituent action.

Initiatives

Enter Initiative Type and Initiative Code information associated with the action. The Initiatives group box behaves the same as constituent actions. Separate grids enable you to assign people and organizations to an action. Click the Add button to indicate how many new ID rows you want to add to the grid at one time, which facilitates quicker data entry.

Linked Constituents

In Mass Actions – Workset, you can select a Workset Code and selectively delete members of that workset if the action to be created does not apply.

Completing a Mass Action

Development officers and other users can use the functionality of the Mass Actions component (AV_MASS_ACTN) to capture unscheduled actions or enter and complete an action for a group of constituents.

To create a completed mass action:

1. Set the Status field to *Complete*.
2. Click the Complete action link.

Note. If you attempt to save the page before you click the link, the system displays a reminder message.

The Mass Action Completion page appears.

To complete a mass action:

1. Enter any information that you want to capture about the completed action.

The result code is a required field. The user's ID is the default for the Author ID field. Today's date is the default for the Complete Date and Report Date fields.

The common contact report information that you enter appears on all of the selected donors' records. If the Require Contact Report check box is selected on the CR Installation page, the system notifies you that you must enter some information in the Contact Report field.

2. Click OK.
3. Save the page.
4. On the Mass Actions page, assign the action to a list of constituents or to a workset.

Completed actions that you create here appear on the To Do List page. However, since they are complete, you can only view them in the *All* or *Historical* time frames. You can add or personalize donor-specific contact report information individually through your To Do List (To Do List, Details, Edit Action) or through the constituent's action summary (in Contributor Relations or in PeopleSoft Outreach).

Creating Actions for Individual Prospects

Access the Prospect Action page (Contributor Relations, Prospect Management, Stewardship Plans, Constituent Actions, Actions - Person, Prospect Action).

Prospect Action page (2 of 2)

Actions are the individual contacts that you have with a prospect throughout the cultivation process.

Prospect Manager	When using mass actions, the system displays the constituent's prospect manager, if one is assigned to the prospect in the system, at the time the action is created. This information appears on the Prospect Action page of the Actions and Actions-Org components.
Status	Select the overall state, such as <i>Scheduled</i> , <i>In Process</i> , or <i>Complete</i> , of an action at a particular time. Status values are defined on the Action Status page.
Action	Enter a description (up to 100 characters) of the action.
Description	Enter descriptive information (up to 254 characters) about the purpose and goal of the action.
Strategy	Select a prospect strategy to associate with the action. Selecting a strategy ties this action to a particular prospect strategy.
Planned Date	Enter the date on which the action is scheduled to occur. Today's date is the default.
Complete Date	If the action is complete, enter the completion date or the date on which the action occurred. Setting an action to <i>Complete</i> requires that you enter an action result code before the action can be saved. If the Require Contact Report check box is selected on the CR Installation page, then you are required to enter this information for the Contact Report when an action is complete.
Action Type	Select the classification, such as <i>Ask</i> , <i>Dinner</i> , or <i>Phone Call</i> , for the action. Action types are defined on the Action Types page.
Expiration Date	Enter the date on which the action is no longer valid, regardless of whether it is complete. If the expiration date has passed, the action does not appear in the current view of the To Do list.
Contact Type	Select the value that determines how the action is made, for example, by <i>Telephone Call</i> , <i>Letter</i> , <i>Email</i> , or <i>Personal Visit</i> . Contact types are defined on the Action Contact Type page.
Assignment Type and Responsible	Select the type of resource that carries out the task, and then enter the ID of the person who is overseeing the action. When you select an ID, the person's name appears to the right of this field.

Others Assigned

If you assign a staff resource in this area, the system adds the action to the staff member's to do list. If a person is assigned to this action through mass actions, the system populates that information here, along with the person's role.

Type and Resource Assigned	Select the type of resource that is assigned to the action and enter the ID of the resource assigned. The values for resource types are delivered with the system as translate values. Do not modify these values in any way. Any modifications to these values will require a substantial programming effort.
Role	Select the role or capacity of the resource that is assigned to the prospect for this action.

Initiatives

Initiative Type and Initiative Code	Enter the initiative type and the initiative code to relate to the action.

Ask Information

Ask From and Ask To	If the action type that you selected on the Prospect Action page is <i>Ask</i> , enter an ask amount range in these fields. The currency for these fields appears in the default currency for the institution. If the ask amount is not a range, enter only the ask from amount.
Solicitor	If the action type that you selected on the Prospect Action page is <i>Ask</i> , you must select the type of resource that carries out the task and then enter the solicitor's ID. Values include the resources that are assigned to the role of solicitor.

Action Results page

Before you can access the fields on this page, you must change the status of the action to *Complete* on the Prospect Action page.

Result Code

Select the result of the action from these values: *Gift*, *Pledge*, *Ask Again*, *Accepted*, and *Negotiate*. These codes are defined on the Action Results page.

Note. This field is required for a *Complete* action.

Expected Commitment

If the ask resulted in a commitment, enter the monetary amount, if known, that you expect to receive from the donor because of this action.

Actual Commitment	Displays the sum of gifts and pledges resulting from this action. If a gift is a pledge payment toward a pledge that is associated with the ask, it is not included in this total because that would count it twice.
Pledge Number	If the action that you are completing resulted in a pledge, enter the pledge number associated with the pledge that the prospect made. If you enter a pledge number, the amount that is associated with the commitment appears in the Commitment Amount field. This amount is derived from the gift entry component in the system.
Important! You can retrieve information about pledges that were made and recorded in the past 60 days.	

Action Commitments

Use this group box to associate gifts or pledges with a single action; you can specify more than one.

Action Gifts

The Result Code field value activates the prompt that creates the list of gifts that appear here, based on the Gift Days value on the Institution Installation 2 page.

Similarly, the Pledge Number field value activates the prompt that creates the list of pledges that appear here, based on the Pledge Days value on the Institution Installation 2 page.

Gift Number	Enter the gift number for any gifts the prospect made that are associated with the action.
Important! The Gift Amount field displays the entire amount of the gift, regardless of recognition or soft credit allocations. In the Gift Nbr field, you can retrieve information about all gifts that were given and recorded in the past 60 days.	
Detail	If you selected a pledge, click to view detailed information about the pledge on the Pledge Detail page. If you selected a gift, click to view detailed information about the gift on the Gift Detail page.
Author ID	Enter the name of the contact report author. This field populates by default to your user ID.
Report Date	Enter the date on which the contact report is created. This field populates by default to today's date.
Report	Describe the outcome of the action, including any biographic or demographic changes that you have learned about the action. This free-text field is required.

Link Report

ID Type	Select ID types of any additional prospects to link to this contact report.
ID	Enter the IDs of any additional prospects to link to this contact report. When a contact report is linked to a prospect, it appears in the Linked Reports group box on the Contact Report Summary page for that prospect.
Link	Click this button to link the contact report to the prospect's spouse. The system adds a record in the Link Report group box with the spouse's ID.

Technical Information

If your institution requires a contact report and the Require Contact Report check box is selected on the CR Installation page, then you cannot save a completed action without at least beginning a contact report. However, contact reports can be entered any time after an action is created; an action does not need to be complete in order to enter a report.

Action Filter page

Enter any combination of search criteria to narrow the list of actions that appear for the constituent. Click the Search button to display the search results on the Action List page. Selection of multiple criteria implies an *AND*, requiring the action to meet all criteria that is selected.

Note. The fields on this page are the same ones used to filter actions in the Action Summary – Person component.

Action Type Code Enter an action type code. The action type is a classification for the action. Values include *ASK*, *INVIT* (invitation), and *Phone Call*.

Action Status Enter an action status for the overall state of an action. Values are *Scheduled*, *In Process*, or *Complete*.

Responsible Person Enter the person who is overseeing the action to see only actions involving this resource.

Solicitor and Solicitor ID Select a solicitor type and enter an ID to see actions for a particular solicitor. The solicitor type indicates whether the resource is a staff member, a unit, or a volunteer. The solicitor is the resource who makes the actual ask to the prospect.

Important! Solicitors apply only to actions with the type *Ask*. If you select a solicitor, the Action Type Code field changes to *Ask*.

Search

Click to retrieve a list of the actions matching the criteria that you selected. The Action List page displays the list of actions meeting your criteria.

Item**Ask Amount From and Ask Amount To**

Enter a range for the ask amount. The Ask Amount From field contains the lowest amount in the range of actions to view; and the Ask Amount To field contains the highest amount. Ask amounts apply only to actions with the type *Ask*. If you enter an ask amount range, the value in the Action Type Code field changes to *Ask*.

Commitment Amount From and Commitment Amount To

Enter a range for the commitment amount. The Commitment Amount From field contains the lowest amount in the range of actions to view, and the Commitment Amount To field contains the highest amount. Commitment amounts apply only to actions that have the type *Ask*. If you enter a commitment amount range, the value in the Action Type Code field changes to *Ask*.

This filter value returns only actions that have commitment information on the Results page and that fall into the range that you entered.

Planned Date From and Planned Date To

Enter a planned from and to date range. The planned date is the date on which the action is tentatively scheduled to occur.

Complete Date From and Complete Date To

Enter a complete from and to date range. The complete date is the date on which the action is actually complete.

Viewing Existing Actions for a Prospect

Action Summary page

The fields on this page also appear on the Prospect Action page.

Managing an Action List

Access the Action List page (Contributor Relations, Prospect Management, Stewardship Plans, Constituent Actions, Action List - Person).

The screenshot displays the 'Action List' page for a constituent named Shaqua Johnson. At the top, there are tabs for 'Action List' and 'Action Filter'. Below the tabs, the constituent's name 'Shaqua Johnson' is shown, along with their ID 'AV0020'. To the right of the ID are several icons: a circular arrow, a document with a checkmark, a speech bubble, a red star, and a computer monitor. Below this, the 'Constituent Type' is 'Alumni', the 'Year' is '1977', and the 'Prospect Manager' is 'Alan Franken'. A 'Prospect Manager' field also shows 'Alan Franken'. Below this information is a table titled 'Actions'. The table has four columns: 'Select', 'Action Description', 'Status', and 'Planned Date'. There is one row in the table with a checkbox in the 'Select' column, the description 'Invite to Dean's Symposium', a status of 'Scheduled', and a planned date of '11/20/1998'. Above the table, there are links for 'Customize', 'Find', 'View All', and a grid icon. To the right of these links is a pagination control showing 'First', '1 of 1', and 'Last'. At the bottom of the page, there are three buttons: 'Delete', 'Add an Action', and 'Refresh'.

Action List page

Note. You can control access to this component through PeopleTools menu security.

Click the spouse rings icon to access an action list for the prospect's linked spouse, if one exists in the system.

Action Description Click a linked action description to access the Prospect Action page, where you can update the constituent's action. When you are finished, the system returns you to the action list.

Delete Click this button to remove the constituent's action from the system. You can only delete an action after all related data, such as assignments, strategies, and initiatives, have been removed from the action.

Add an Action Click this button to access the Prospect Action page, where you can create a new action for the constituent. When you are finished, the system returns you to the action list.

To delete a constituent action:

1. Click the Select check box next to the action to be removed.

2. Click the Delete button.

If the action has any related attributes, you receive an error message. The system dynamically creates the error message text to advise you of exactly what else must be removed from the action before the action itself can be removed. These error messages prevent orphan data from remaining in the system after the action has been removed.

Example of error message

If the action has no related attributes, you receive a warning message. Click OK to continue and completely remove the action from the system.

3. If you must remove related attributes before deleting the action, click the Action Description link and edit the action as appropriate on the pages of the Constituent Action component.
4. Click OK to return to the Action List page.

Viewing Action Details

Chapter 10

Managing Planned Giving Prospects

This chapter provides an overview of managing planned giving prospects, lists common elements, and discusses how to:

- Track bequests.
- Track trusts.
- Track gift annuities.
- Track pooled income funds.
- Work with a planned giving profile.

Understanding Planned Giving Prospect Management

To effectively manage prospects, you must quickly evaluate constituents, create comprehensive cultivation-activity plans, and constantly monitor and revise those plans. Contributor Relations enables you to do this by maintaining extensive prospect information and providing tools that you can use to effectively implement and manage cultivation plans.

Planned giving prospect management involves tracking planned giving prospects, or prospective donors, from the point of discovery through elevation to prospect, cultivation, and, subsequently to becoming a donor of one or more planned gifts to your institution.

For planned gifts, the information that you track is different from the information for standard gifts that are entered through gift and pledge sessions. With planned giving, you track basic gift information and translate present and future values for reporting and estimating the effect that today's gift will have on your institution when the gift matures.

You can enter data that is related to a particular planned gift, but no processing to your institution's financial system or interaction with external planned giving applications is supported.

Common Elements Used in This Chapter

For	Describe how the planned gift is to be distributed.

Business Unit	Select the business unit to which the planned gift is allocated. The Designation field displays the values that you defined for the setID that is associated with this business unit. If you have already selected a designation, then change the business unit, and your selections are backed out.
Designation	Select the designation to assign. Designations are funds at your institution to which donations can be allocated.
Type	Select a type for the intended distribution. Values are: <i>Interim</i>: The designation is a temporary holding site for the planned gift. <i>Ultimate</i>: The gift remains in the designation that you select. Values for this field are delivered with the system as translate values. You can modify these translate values.
Amount	Enter the amount to be distributed to the designation that you select.
ID and Name	Enter either an ID or a name. If you enter an ID, the Name field becomes display-only. If you enter a name, you cannot enter an ID.
Alliance	Select the value that describes the contact's connection to the planned gift. Values for this field are delivered with the system as translate values. You can modify these translate values.
Address	If the external contact does not have an ID in the system, click this link to enter address information on the Address Detail page for the external contact.
Staff ID	Select the staff ID of each staff member who is associated with the planned gift.
Role	Select the role of the assigned staff. Roles are determined by your institution and include values such as <i>Prospect Manager</i> , <i>Solicitor</i> , and <i>Campaign Manager</i> .
Inst Est Value (institution estimated value)	Enter the expected value to your institution of the planned gift.
Inst Actual Value	Enter the amount received by your institution.
Irrevocable	Select if the planned gift agreement cannot be revoked.
Campaign	Select the campaign associated with the planned gift. Campaigns are established by your institution. A campaign is an organized institutional effort that is targeted to a specific constituency that occurs over a specified period with specific purposes and goals.
Comments	Enter any additional comments about the planned gift.

Date of Birth and SSN (Social Security Number)	If you entered an ID, the person's date of birth and social security number appear, if they exist in the system. If you entered a name, you can enter this additional information. The Date of Birth field accepts both partial and complete dates. The system does not format this date field, so enter the date as it should appear.
Estimated Value	Enter the estimated value of the beneficiary's portion of the donor's planned gift.
Actual Value	Enter the beneficiary's or institution's payout.
Address	If the beneficiary does not have an ID in the system, click this link to enter address information for the beneficiary.
Item Type	Select an item type for each associated account at your institution. Item types are defined by your institution. The values from which you can select include the item types that are associated with your institution's default setID.
Type	Select the type of account that is being used to manage the trust. Values are: <i>Asset</i> , <i>Liability</i> , and <i>Reserve</i> . Values for this field are delivered with the system as translate values. You can modify these translate values.
Details	Click the link on any line to view more detailed information.

Tracking Bequests

This section provides an overview of bequests and discusses how to:

- Define bequest details.
- Define constituent bequest details.
- Define institutional bequest information.

Understanding Bequests

You can track:

- Information that is related to bequests that are made to benefit your institution, including original bequests and those that are made or amended in a codicil.
- Designations at your institution that benefit from the bequest.
- Estimated value, actual value, and maturity date of the bequest.
- External contacts and staff members at your institution who handle the bequest.

Pages Used to Track Bequests

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Bequest Detail	AV_BEQUEST_DTL	Contributor Relations, Prospect Management, Planned Giving, Bequests, Bequest Detail	Enter information about a constituent's bequest to your institution.
Bequest Detail 2	AV_BEQUEST_DTL2	Contributor Relations, Prospect Management, Planned Giving, Bequests, Bequest Detail 2	Enter additional information about a constituent's bequest to your institution.
Bequest Information	AV_BEQUEST_INFO	Contributor Relations, Prospect Management, Planned Giving, Bequests, Bequest Information	Enter information about the distribution, external contacts, and assigned staff of the planned gifts to your institution.

Defining Bequest Details

Access the Bequest Detail page (Contributor Relations, Prospect Management, Planned Giving, Bequests, Bequest Detail).

AV0024	Perkins, Darla	1,000,000.00 USD		

Bequest Detail page

This component enables you to track multiple bequest instruments that will benefit the institution on the demise of the donor.

Important! When you delete bequests at this level, the system deletes all child records as well.

Bequest Name	Name each bequest to differentiate multiple bequests from the same donor within the system. The name then appears on all pages of the component.
Bequest Date	Enter the date that the bequest was made or that your institution learned of the bequest. The default is the current date.
Est Maturity (estimated maturity)	Enter the estimated date of maturity.
Est Estate (estimated estate)	Enter the anticipated total value of the estate when the bequest matures.
Present Value	Restate the estimated estate, adjusted for future inflation.
Bequest Status	Select <i>Advised-Verbal</i> (the default), <i>Advised-Written</i> , <i>In Probate</i> , or <i>Matured</i> . The values for this field are delivered with the system as translate values. You can modify these translate values.
Status Dt (status date)	The system displays the date that the bequest status was most recently updated.
Act Maturity (actual maturity)	Enter the date of actual maturity.

Act Estate (actual estate)

Enter the total amount of the estate.

Benefit to Institution

Estimated Value and **Pct**
(percent)

Enter the estimated value of the bequest or the percentage of the bequest that benefits your institution.

Other Beneficiaries

Beneficiary or **Name**

Select the ID or enter the name of the beneficiary.

Estimated Value and **Pct**
(percent)

Enter the estimated value or the percentage of the estate that has been willed to the beneficiary whom you identified in the Beneficiary or Name field.

Defining Constituent Bequest Details

Bequest Detail 2 page

Assets

Asset Category

If assets are named in the will, you can select an asset category. Asset categories are defined on the Asset Types page.

Description

Enter a description (up to 60 characters) of the asset that is named in the will.

Asset Value

Enter the estimated monetary value of the asset.

Value Date

Enter the date on which the asset value was determined.

Codicils

Date

If the bequest has been amended, select the codicil date.

Action to Will

Enter a brief description of the action taken, such as beneficiary change, amount change, and so on.

Description

Enter a more detailed description of the amendment.

Installments

Expected Date

If the amount bequeathed is to be paid to your institution in installments, enter the expected date of each installment.

Expected Amount

If the amount bequeathed is to be paid to your institution in installments, enter the expected amount of each installment.

Actual Date and Actual Amount

When an installment is paid, enter the date and amount received.

Defining Institutional Bequest Information

Tracking Trusts

You can track information that is related to trusts and benefits your institution. You can track various types of trusts, their values, the gifts made to them, their beneficiaries, and so on.

In addition, you can indicate the designations that benefit from the trust and the external contacts and staff members who handle the trust at your institution.

This section discusses how to:

- Define trust details.
- Define trust gift information.
- Define trust account information.
- Define trust beneficiaries.
- Define institutional trust information.

Pages Used to Track Trusts

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Trust Detail	AV_TRUST_DTL	Contributor Relations, Prospect Management, Planned Giving, Trusts, Trust Detail	Enter information about a donor's trust that benefits your institution.
Trust Gift Information	AV_TRUST_GINFO	Contributor Relations, Prospect Management, Planned Giving, Trusts, Trust Gift Information	Record information about additional gifts made to an established trust.
Trust Account Information	AV_TRUST_AINFO	Contributor Relations, Prospect Management, Planned Giving, Trusts, Trust Account Information	Track accounts that are associated with a trust that benefits your institution.
Trust Beneficiary	AV_TRUST_BFCY	Contributor Relations, Prospect Management, Planned Giving, Trusts, Trust Beneficiary	Track information about the benefit that your institution expects to receive and additional beneficiaries to a trust.

Page Name	Definition Name	Navigation	Usage
Trust Information	AV_TRUST_INFO	Contributor Relations, Prospect Management, Planned Giving, Trusts, Trust Information	Enter information about the distribution, external contacts, and assigned staff of a planned gift to your institution.

Defining Trust Details

Access the Trust Detail page (Contributor Relations, Prospect Management, Planned Giving, Trusts, Trust Detail).

The screenshot displays the 'Trust Detail' page for a trust named 'Gallegher Family Trust'. The page is divided into several sections:

- Header:** Shows the constituent 'Shawn Gallegher' with ID 'AV0001', year '2001', and institution 'PSUNV'.
- Trust Detail Section:** Contains fields for:
 - *Trust Name:** Gallegher Family Trust
 - *Trust ID:** 347898
 - *Trust Type:** Remainder Trust
 - Trust Category:** Regular Trust
 - Trust Term:** Fixed Number of Years
 - Principal:** 4,000,000.00 USD
 - Payout Type:** Pct
 - Payout Term:** Annual
 - Trust Status:** Active
 - Inception Date:** 01/01/1980
 - Start Date:** 03/15/1982
 - Est Maturity:** 03/15/2040
 - Trustee Fees:** 500,000.00
 - Amount:** (empty)
 - Percent:** 5.00
- Trust Value Section:** Includes fields for Value Date, Market Value, Future Value, and Value Source, all currently empty.

Trust Detail page

Trust Name and Trust ID

Enter a trust name (up to 60 characters long) and trust ID (up to 20 characters long).

Note. The trust ID serves as an IRS tax ID number and should not be duplicated from one trust to another.

Trust Type

Select a trust type. Values are *Unitrust*, *Annuity Trust*, *Remainder Trust*, and *Charitable Lead Trust*. Trust types are defined on the Setup Trust Type page.

Trust Category

Select a trust category. Values are *Unitrust*, *Regular Trust*, *Net Income Trust*, *Net Income Trust with Make-Up*, and *Dry Charitable Remainder Trust*. Trust categories are defined on the Setup Trust Category page.

Trust Term	Select the term that must be met before the trust is paid out. Values are <i>Fixed Number of Years</i> , <i>One Life</i> , and <i>Two Lives</i> .
Principal	Enter the amount of money with which the trust was funded.
Trust Status	Select the current state of the trust. Values are <i>Active</i> , <i>Inactive</i> , <i>Matured</i> , and <i>Under Agreement</i> .
Inception Date	Select the date that the trust commitment with your institution was reached. This date may or may not be the same as the start date.
Est Maturity	Select the date that the trust will mature.
Trustee Fees	Enter the amount of any fees that must be paid to the trustee.
Payout Type	Select the payout type. Values are <i>Fixed Amount</i> and <i>Percent</i> . Values for this field are delivered with the system as translate values. You can modify these translate values.
Amount	If you selected a payout type of <i>Fixed Amount</i> , enter the amount of each payout in this field.
Payout Term	Select the frequency with which payouts are made. Values are <i>Annual</i> , <i>Bi-Annual</i> , <i>Bi-Month</i> , <i>Monthly</i> , and <i>Quarterly</i> . Values for this field are delivered with the system as translate values. You can modify these translate values.
Percent	If you selected a payout type of <i>Percent</i> , enter the percentage of the trust that is given in each payout.
Trust Value	
Value Date	Select the date the valuation is set.
Market Value	Enter the monetary value of the trust according to today's market.
Future Value	Enter the estimated monetary value of the trust on its maturity date.
Value Source	Enter a description (up to 25 characters) of the person or publication that provides information about the trust's valuation.

Defining Trust Gift Information

Access the Trust Gift Information page (Contributor Relations, Prospect Management, Planned Giving, Trusts, Trust Gift Information).

Tracking Gift Annuities

You can track information about gift annuities set up to benefit your institution. You can track various types of annuities, their rates, the assets that are used to fund them, the accounts that are associated with them, their beneficiaries, and their distribution.

This section discusses how to:

- Define gift annuity details.
- Define gift annuity beneficiaries.
- Define institutional gift annuity information.

Pages Used to Track Gift Annuities

Page Name	Definition Name	Navigation	Usage
Gift Annuity Details	AV_GIFTAN_DTL	Contributor Relations, Prospect Management, Planned Giving, Gift Annuities, Gift Annuity Details	Enter detailed information about a donor's gift annuity to your institution.
Gift Annuity Beneficiaries	AV_GIFTAN_BFCY	Contributor Relations, Prospect Management, Planned Giving, Gift Annuities, Gift Annuity Beneficiaries	Track information about the benefit that your institution expects to receive and additional beneficiaries to a trust.
Gift Annuity Information	AV_GIFTAN_INFO	Contributor Relations, Prospect Management, Planned Giving, Gift Annuities, Gift Annuity Information	Enter information about the distribution, external contacts, and assigned staff of a planned gift to your institution.

Defining Gift Annuity Details

Access the Gift Annuity Details page (Contributor Relations, Prospect Management, Planned Giving, Gift Annuities, Gift Annuity Details).

The screenshot displays the 'Gift Annuity Details' page within a software application. The page is divided into several sections:

- Header Section:** Contains the constituent name 'Gallegher, Shawn', ID 'AV0001', Year '2001', and Institution 'PSUNV'.
- Gift Annuity Detail Section:** This section contains the following fields:
 - *Gift Annuity Name:** Gallegher Family Annuity
 - *Gift Annuity Type:** Charitable (dropdown menu)
 - Inception Date:** 06/05/1996 (calendar icon)
 - Start Date:** 06/16/1997 (calendar icon)
 - Deferral Period:** 0
 - Rate:** 5.00
 - Gift Annuity Status:** Active (dropdown menu)
 - Asset Category:** LAND (dropdown menu) with a search icon and the text 'Land'.
 - Gift Amount:** 1,000,000.00 USD
 - Gift Annuity Date:** 06/11/1996 (calendar icon)
 - Reserve:** 100,000.00
 - Liability:** 175,000.00
- Account Information Section:** This section contains the following fields:
 - Item Type:** (dropdown menu)
 - Type:** (dropdown menu)

The page also features navigation tabs at the top: 'Gift Annuity Details' (selected), 'Gift Annuity Beneficiaries', and 'Gift Annuity Information'. At the bottom of each section, there are links for 'Find', 'View All', and 'First', '1 of 1', 'Last'.

Gift Annuity Details page

Gift Annuity Name	Enter the formal gift annuity name (up to 60 characters).
Gift Annuity Type	Select a gift annuity type, <i>Charitable</i> or <i>Deferred</i> . Values for this field are delivered with the system as translate values. You can modify these translate values.
Deferral Period	If you selected a gift annuity type of <i>Deferred</i> , enter the number of years that the annuity will be deferred.
Rate	Enter the rate at which payouts will be made to the donor over the term of the annuity. Your institution determines the rate based on the age of the donor at the time the gift is made.
Inception Date	Enter the date on which the gift annuity was established.
Gift Annuity Status	Select a gift annuity status: <i>Active</i> : Select to add a new gift annuity. <i>Inactive</i> : Select if your institution no longer recognizes this gift annuity.
Asset Category	Select the asset category that describes the assets used to fund the gift annuity. Asset categories are defined by your institution.
Gift Amount	Enter the gift amount of the contribution that was used to create the gift annuity.
Reserve	Enter the amount that your institution must carry to fund the annuity.
Gift Annuity Date	Enter the date that the contribution to fund the gift annuity was made to your institution.
Liability	Enter the amount that your institution is committed to pay out over the life of the gift annuity.

Tracking Pooled Income Funds

You can maintain information about the pooled income funds established at your institution for donors. For each donor who participates in a fund, you can track the units held, their value, additional gifts made, and so on. In addition, you can track information about the beneficiaries of the fund and distribution information.

This section discusses how to:

- Define pooled income fund details.
- Define pooled income fund beneficiaries.
- Define institutional pooled income fund information.

Pages Used to Track Pooled Income Funds

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Pooled Income Details	AV_PINC_DTL	Contributor Relations, Prospect Management, Planned Giving, Pooled Income Funds, Pooled Income Details	Enter information about a pooled income fund at your institution and the donor's contributions to the fund.
Pooled Income Beneficiaries	AV_PINC_BFCY	Contributor Relations, Prospect Management, Planned Giving, Pooled Income Funds, Pooled Income Beneficiaries	Track information about the benefit that your institution expects to receive and additional beneficiaries to a pooled income fund.
Pooled Income Information	AV_PINC_INFO	Contributor Relations, Prospect Management, Planned Giving, Pooled Income Funds, Pooled Income Information	Enter information about the distribution of the planned gift to your institution, external contacts, and assigned staff.

Chapter 11

Managing Initiatives

This chapter provides an overview of initiative management and discusses how to:

- Define an initiative.
- Define an initiative audience.
- Link related initiatives.
- Assign initiative resources.
- Define a public relations (PR) plan.
- Create initiative attachments.
- Create an initiative budget and track expenses.
- Create initiative actions.
- View initiative action summary information.
- View related goals.
- Viewing responsible staff for related initiatives.
- Use mass change for initiative and membership letters.

Understanding Initiative Management

This section lists prerequisites and discusses initiative management.

Prerequisites

Before you can manage any type of initiative, you must have completed its setup. All initiatives use a few common setup pages, and some initiatives require additional setup that is specific to their function.

Initiative Management

To manage any type of initiative (campaign, volunteer effort, membership initiative, event, or other type of initiative):

1. Create the initiative.

2. (Optional) Define the audience.
3. (Optional) Link related initiatives.
4. (Optional) Assign resources.
5. (Optional) Create a public relations (PR) plan.
6. (Optional) Create a budget.
7. (Optional) Track budget expenses.
8. (Optional) Create initiative actions.
9. (Optional) View action summary information.
10. (Optional) View related goals.
11. (Optional) View responsible staff for related initiatives.
12. (Optional) Create initiative or membership letters.

Defining an Initiative

This section discusses how to create any type of initiative.

Pages Used to Define an Initiative

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Campaign	AV_INTV_CMPGN_MAIN	Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Initiatives	Begin the process of defining a new campaign initiative at your institution.
Membership	AV_INTV_MEMBR_MAIN	Contributor Relations, Initiatives, Membership Initiatives, Membership Initiatives	Begin the process of defining a membership initiative at your institution.
Volunteers	AV_INTV_VOL_MAIN	Contributor Relations, Initiatives, Volunteer Initiatives, Manage Volunteer Initiatives, Volunteer Initiatives	Begin the process of defining a new volunteer initiative at your institution.
Event	AV_INTV_EVNT_MAIN	Contributor Relations, Initiatives, Event Initiatives, Manage Events, Event Initiatives	Begin the process of defining a new event initiative at your institution.

Page Name	Definition Name	Navigation	Usage
Other Initiatives	AV_INTV_OTHR_MAIN	Contributor Relations, Initiatives, Other Initiatives, Manage Other Initiatives, Other Initiatives	Begin the process of defining a new initiative at your institution that is not a campaign, membership initiative, event initiative, or volunteer effort.

Creating an Initiative

Depending on the type of initiative you want to create, access the Campaign, Membership, Volunteers, Event, or Other Initiatives page (Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Initiatives).

Campaign page

Fields Common to All Initiatives

Name Name the initiative, up to 60 characters.

Reporting Level

Enter a reporting level for the initiative. The highest reporting level is 1. The lowest reporting level is 999. You will receive an error message if you enter an incorrect reporting level.

A level 1 initiative cannot be related to another level 1 initiative of the same type. For example, a level 1 campaign cannot be related to another level 1 campaign. Reporting levels are critical when relating other initiatives to an initiative on the Related Initiatives page. Note that you cannot relate any campaigns to events. Events must be in context of the larger campaign; a campaign drives what is related to it.

Business Unit

Note. Your selection determines the values you can choose from when selecting a responsible department, creating department goals, selecting a public relations appeal, and selecting an appeal for a budget expense.

% Participtn Goal (percent participation goal) and
Financial Goal

Enter a participation goal percentage and a financial goal for the initiative. Goals indicate the amount of or percentage increase in participation that you expect to receive as a result of the initiative.

For campaign initiatives, these fields are used in the Campaign Progress Report. For memberships, these fields are used in the Membership Progress page.

Person

Select a responsible person for the initiative. This field populates by default to the user ID of the person defining the initiative, but can be overridden. To select a new responsible person, click the Quick Search button and select the appropriate ID. When a responsible person is selected, his or her name appears to the right of this field. Only one person can be responsible for an initiative at a given time.

Department

Select a responsible department for the initiative. The prompt box displays a listing of all the departments associated with the setID for the business unit that you select for this initiative.

If You Are Creating a Campaign Initiative**Phase**

Select a phase to indicate whether the initiative is currently *Private* or *Public*.

You may want to begin the campaign privately, identifying the pace-setting gifts that form the nucleus fund of the campaign. When the campaign has some momentum from the private phase, you can take it public to complete its goals.

If You Are Creating a Membership Initiative

Mbr Org (member organization)	Enter the member organization. This code identifies which member organization at your institution owns the membership initiative. The first initiative that you create might not have values in this field because no values might have been set up yet. If so, leave this field blank and return to complete it after you create the appropriate member organization.

If You Are Creating a Volunteer Initiative

Nbr Vol Goal (number of volunteers goal)	Enter the number of volunteers you want to be involved in the initiative.
Vol Pool Goal (volunteer pool goal)	Enter the number of constituents you must invite to participate to generate the number of volunteers goal.

If You are Creating an Event Initiative

Event ID	If you have already created this event on the Event page, select the event ID to link it to this event initiative. Otherwise, click the New ID button to create an event. After you create an event and save the Event page, the system creates an event ID and automatically enters the new ID here.
New ID	Click to create an event for this event initiative. When you click this button, the system automatically populates the Event page with key values that you entered here. To assist you in creating the event record, the system transfers the event code that you are defining to the Short Description field, the name that you enter to the Description field, and the institution that you select to the Institution field.
Attendance Goal	Enter a goal that states the expected number of constituents who will attend the event.

If You Are Creating an Other Initiative

Intv Type (initiative type)	Enter an initiative type. The type you enter should be one not defined by your institution as <i>Campaign</i> , <i>Membership</i> , <i>Volunteer</i> , or <i>Event</i> .

Defining an Initiative Audience

This section discusses how to define an audience for an initiative. Audiences are populations and sub-populations of constituents related to an initiative.

Understanding Audiences

You need an audience to communicate; the Audience page helps you identify the target market. There are three types of audiences:

- Reporting audience

An example is the need to report quarterly to the Board of Regents.

- Administrative audience

An example is the need to notify the group of people managing the initiative.

- Segmentation

An example is the group of alumni to which you want to send an invitation or appeal. This piece is tied to communications.

Pages Used to Define an Initiative Audience

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Audience	AV_INTV_CMPGN_AUD AV_INTV_EVNT_AUD AV_INTV_MEMBR_AUD AV_INTV_VOL_AUD AV_INTV_OTHR_AUD	• Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Initiatives, Audience • Contributor Relations, Initiatives, Membership Initiatives, Membership Initiatives, Audience • Contributor Relations, Initiatives, Volunteer Initiatives, Manage Volunteer Initiatives, Audience • Contributor Relations, Initiatives, Event Initiatives, Manage Events, Audience • Contributor Relations, Initiatives, Other Initiatives, Manage Other Initiatives, Other Initiatives, Audience	Define the target audiences, or populations and sub-populations of constituents related to an initiative.
Audience Detail	AV_AUD_CRIT_SP	Click the Audience Detail button on the Audience page.	View additional information about an audience.

Page Name	Definition Name	Navigation	Usage
Initiative Audience Build	AV_RUNCTL_INTV	Contributor Relations, Initiatives, Process Initiatives, Initiative Audience Build	Run the AVINTBM process for audiences. You can build the audiences that are used for initiatives, move audiences from the temporary table AV_INTV_TMP_TBL to the permanent table AV_INITIATIVES, or both.

Defining the Audience

Access the Audience page (Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Initiatives, Audience).

Note. Before assigning an audience to an initiative, you must create the audience by defining attribute types, then define audience criteria based on those attribute types.

The screenshot shows the 'Audience' page in a web application. At the top, there are tabs: 'Campaign', 'Audience' (selected), 'Related Initiative', 'Resources', and 'PR Plan'. Below the tabs, the page displays 'Campaign: ANNFUND Annual Fund Campaign' and 'Institution: PSUNV'. A 'Selection Process' section contains two radio buttons: 'Population Selection' (unselected) and 'Build/Merge Process' (selected). The main 'Audience' section features a table with the following data:

*Pers/Org	Audience	Description	Audience Type
Person	ENGLISH	English Department Alumni	Segmentatn

Below the table, there are input fields for 'Query Name' and 'Workset Name'. The page also includes navigation links 'Find | View All' and 'First 1 of 1 Last'.

Audience page

When you define an audience, you specify which particular group of constituents to reach through the initiative. For example, a reunion event might target all the constituents in the Class of 1990.

Use the audiences that you define to identify who receives particular messages as a result of the public relations plan and to set intermediate goals for the initiative. However, to actually build the audience for the initiative, you must use the Initiative Audience Build page.

Note. Audiences must be linked to an initiative to use Mass Change to assign communications to audience members.

Selection Process

The appearance of this page changes, depending on the selection process you select. If you select *Population Selection*, you can select audiences built using the Population Selection process on the Audience Criteria page. If you select *Build/Merge Process*, you can select audiences built using standard audience build/merge functionality.

Audience

Pers/Org

Select an option: *Person*, *Organization*, or *Both*. The value *Both* is only available if you selected the Population Selection process.

Audience

Make a selection from the prompt box containing a list of all the audiences for either persons or organizations defined by your institution. This list includes only those defined on the Audience Criteria page.

Audience Type

Select the reason that the audience you entered has been chosen. Values for this field (*Segmentation*, *Reporting*, and *Administrative*) are delivered with the system as translate values. *Segmentation* is a required value. Do not modify these values in any way. Any modifications to these values will require a substantial programming effort.

Use *Reporting* to report the progress of the campaign. Use *Administrative* to create an audience of those responsible for the campaign. Use *Segmentation* for marketing purposes.

Note. Segmentation is the only type available for setting campaign goals.

Select *Segmentation* to include this audience for this initiative in the list of Audience Code values on the Initiative Goals page and PR Plan page. *Reporting* and *Administration* are not relevant to the Initiative Goals page.

Query Name

If desired for future reference, enter the current query name used in your reporting tool when running reports on the audience. This field is only available if you chose to use the Build/Merge Process.

Workset Name

If you use a workset containing the members of the audience, enter the name. You can enter only those worksets that you have access to. This field is only available if you chose to use the Build/Merge Process.

Audience Detail

Click to open the Audience Detail page. This page displays the criteria that defines the audience. Review this information to ensure that you select the correct audience. This field is only available if you chose to use the Build/Merge Process.

Building and Merging the Audience

Access the Initiative Audience Build page (Contributor Relations, Initiatives, Process Initiatives, Initiative Audience Build).

Initiative Audience Build page

The Initiative Audience Build/Merge Application Engine process (AVINTBM) generates the actual list of audience members and builds the audience based on the selection process you select.

To build the audience initially, click Run to run the Initiative Audience Build process. This process builds the audiences that you select on this page and any defined audiences that have not previously been built.

Note. After you build an audience, audience members are not purged if they no longer meet the audience criteria.

After you run the Initiative Audience Build process you must manually purge the AV_INTV_TMP_TBL table if you want to edit the IDs selected to be included in the audience. This step is only available if you do not select the Merge into Initiative Audience check box when you run the process. If you select both the Build Temp Tables and Merge into Initiative Audience check boxes when running the process, the system builds the temp tables then immediately adds the IDs in the temporary tables to the AV_INITIATIVE table without allowing any edits to the selected IDs.

Selection Process

The AVINTBM process behaves differently, depending on whether you select *Population Selection* or *Build/Merge Process*. If you select the Build/Merge Process, the system launches the AVPINT Cobol process and builds the audiences using that process.

Note. For performance considerations, there is a maximum of 400 person/organization combinations of audience criteria per process instance. If the total member organizations to be built will result in more than 400 combinations, set up the member organizations in blocks and run the process after setting up each block of organizations. When rebuilding audiences, select them with this maximum in mind and run the process more than once, selecting different groups of audiences to be rebuilt. An example of a situation that would exceed the maximum is building, in one run, 101 organizations each having four audience criteria.

Processes to Run

Using the check boxes in this group box, you can build an audience, merge an audience, or both.

Build Temp Tables	Select this option to generate the actual list of audience members and store it in a temporary table called AV_INTV_TMP_TBL. When the records are in this table, they can be analyzed to determine if the audience list is acceptable.
Merge into Initiative Audience	Select this option to merge any audiences in the temporary table (AV_INTV_TMP_TBL) with the permanent table (AV_INITIATIVE).

Build Audience

The system displays audiences here that are ready to be built. If you select the Population Selection option, this grid will only show audiences built using the Population Selection process.

Rebuild Audience

If you have already built an audience, to rebuild it use this group box to enter your criteria. You must rebuild audiences based on the selection process you select. When you rebuild an audience, the process adds any additional constituents that meet the audience criteria since the time the audience was last built.

Linking Related Initiatives

This section discusses how to link additional, related initiatives to the one you are creating.

Page Used to Link Related Initiatives

Page Name	Definition Name	Navigation	Usage
Related Initiative	AV_INTV_CMPGN_RLTD AV_INTV_EVNT_RLTD AV_INTV_MEMBR_RLTD AV_INTV_VOL_RLTD AV_INTV_OTHR_RLTD	- Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Initiatives, Related Initiatives - Contributor Relations, Initiatives, Membership Initiatives, Membership Initiatives, Related Initiatives - Contributor Relations, Initiatives, Volunteer Initiatives, Manage Volunteer Initiatives, Related Initiatives - Contributor Relations, Initiatives, Event Initiatives, Manage Events, Related Initiatives - Contributor Relations, Initiatives, Other Initiatives, Manage Other Initiatives, Other Initiatives, Related Initiatives	Link the initiative you are creating or updating to existing active initiatives.

Assigning Related Initiatives

Access the Related Initiative page (Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Initiatives, Related Initiatives).

The screenshot shows the 'Related Initiative' page. At the top, there are tabs: Campaign, Audience, **Related Initiative**, Resources, and PR Plan. Below the tabs, it displays 'Campaign: ANNFUND Annual Fund Campaign' and 'Institution: PSUNV'. A table titled 'Related Initiatives' is shown with columns: *Type, Level, *Intv Cd, Initiative, Start Date, and End Date. The first row of the table contains the following data: *Type is '1 OTHER' with a search icon, Level is '1', *Intv Cd is 'INIT_OTHR' with a search icon, and Initiative is empty. To the right of the table are navigation buttons: 'First', '1 of 1', and 'Last'. Above the table, there are links for 'Customize', 'Find', and 'View All'.

Related Initiative page

You can link campaigns, volunteer efforts, membership initiatives, events, or other institution-defined initiative types as a subunit of an initiative.

Type	Select the initiative type to relate to the initiative with which you are working, such as <i>Campaign</i> , <i>Event</i> , <i>Membership</i> , <i>Other</i> , and <i>Volunteer</i> .
Level	Select the reporting level of the initiative to relate to the initiative that you are working with. Select a level from 1 to 999. Level 1 is the highest reporting level; you cannot relate same-type initiatives with the same reporting level.
Intv Cd (initiative code)	Select the initiative code for the initiative to relate to the initiative with which you are working.
	Important! Event, volunteer, membership, and other initiatives can be related to a campaign only when the campaign is retrieved on this page. This ensures the correct hierarchy for campaign reporting.

Assigning Initiative Resources

This section discusses how to assign initiative resources.

Page Used to Assign Initiative Resources

Page Name	Definition Name	Navigation	Usage
Resources	AV_INTV_CMPGN_RSRC AV_INTV_EVNT_RSRC AV_INTV_MEMBR_RSRC AV_INTV_VOL_RSRC AV_INTV_OTHR_RSRC	- Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Initiatives, Resources - Contributor Relations, Initiatives, Membership Initiatives, Membership Initiatives, Resources - Contributor Relations, Initiatives, Volunteer Initiatives, Manage Volunteer Initiatives, Resources - Contributor Relations, Initiatives, Event Initiatives, Manage Events, Resources - Contributor Relations, Initiatives, Other Initiatives, Manage Other Initiatives, Other Initiatives, Resources	Maintain information about the human resources that support an initiative.

Resources page

You assign the responsible person for an initiative on the initial definition page in the component, but you maintain information about other resources associated with the initiative on this page.

Responsible Manager

This is the person, above the responsible person, who should get reports and notifications related to the initiative. Only valid defined staff and units are available for assignment.

Staff Role

Enter the role of the responsible manager at the institution. Examples of staff roles are *Prospect Manager*, *Campaign Manager*, *Solicitor*, and so on. Roles are defined by your institution using the Roles page. Only valid defined staff and units are available for assignment.

Other Primary Staff Resources

Enter any other staff members who are participating in the initiative, such as the class giving officer or the reunion manager. Only valid defined staff and units are available for assignment.

Important! These resources only need to be linked here if the person's assignment has not been established as the responsible person for a related initiative.

Staff Role

Enter the role of the staff member at the institution. Examples of staff roles are *Prospect Manager*, *Campaign Manager*, *Solicitor*, and so on. Roles are determined by your institution.

Responsible Unit	Enter the name of the unit that is responsible for the initiative.
Unit Role	Enter the purpose of the unit at the institution. Roles are determined by your institution.
Resource Type	Assign a volunteer as a resource. Values include <i>Initiative</i> or <i>Mbr Org</i> (member organization).
Initiative Type	If you selected <i>Initiative</i> as a resource type, select an initiative type associated with the volunteer.
Initiative	If you selected <i>Initiative</i> as a resource type, select the initiative with which the volunteer is associated.
Mbr Org Code	If you selected <i>Mbr Org</i> as a resource type, select the code with which the volunteer is associated.
Volunteer Structure	To assign a volunteer as a resource, select a volunteer structure code for the volunteer. This prompt is only active if you have a defined volunteer structure assigned to this initiative. If you do not have a volunteer structure defined, click the New Vol button to create one.
New Vol (new volunteer)	Click to access the Volunteer Structure page, where you can structure a new volunteer leadership group to assign specifically to this initiative.

Defining a Public Relations Plan

This section discusses how to define a public relations plan for an initiative.

Page Used to Define a PR Plan

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
PR Plan (public relations plan)	AV_INTV_CMPGN_PLAN AV_INTV_EVNT_PLAN AV_INTV_MEMBR_PLAN AV_INTV_VOL_PLAN AV_INTV_OTHR_PLAN	- Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Initiatives, PR Plan - Contributor Relations, Initiatives, Membership Initiatives, Membership Initiatives, PR Plan - Contributor Relations, Initiatives, Volunteer Initiatives, Manage Volunteer Initiatives, PR Plan - Contributor Relations, Initiatives, Event Initiatives, Manage Events, PR Plan - Contributor Relations, Initiatives, Other Initiatives, Manage Other Initiatives, Other Initiatives, PR Plan	Define an overall plan for communicating the purpose and progress of an initiative to a variety of audiences.

Defining a Public Relations Plan

Access the PR Plan page (Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Initiatives, PR Plan).

The screenshot shows the 'PR Plan' page with the following details:

- Campaign:** ANNFUND (Annual Fund Campaign)
- Institution:** PSUNV
- Plan Details:**
 - Message:** (Empty text area)
 - *Method:** E-Mail
 - Frequency:** Quarterly
 - Appeal:** REPORT
 - Start Date:** (Calendar icon)
 - End Date:** (Calendar icon)
 - Action Type:** INFO
 - Give Info:** (Link)
 - Completed:** (Checkbox)
- Assigned To:**
 - *ID:** AV0027
 - Name:** Boudreaux, Lisele
 - Seq Nbr:** 1
- Audience:**
 - *Pers/Org:** Pers
 - Audience Type:** Reporting
 - Audience:** (Empty text field)

Buttons: Find, View All, First, 1 of 1, Last, Build Actions.

PR Plan page

When you create a public relations plan, the system generates a to do list record for the people assigned to particular steps or tasks within the plan. In addition, the public relations plan is written to the overall action plan for the initiative.

Message Enter information about the content of the actual communication that is sent.

Method Select how the message is delivered, such as an invitation, newsletter, meeting, report, email, and so on. Methods are defined by your institution using the Methods page.

Frequency Select how often a communication is sent. Frequencies include *Daily*, *Weekly*, *Monthly*, *Quarterly*, *Bi-Annually*, or *Annually*. The values for this field are delivered with the system as translate values. You can modify these translate values.

Important! The combination of frequency and start date establishes the dates that actions are triggered to a to do list for the people who are assigned the responsibility for carrying out the task

Appeal Select an appeal to relate the public relations plan to a specific appeal defined for the initiative. For example, *Annual Honor Roll* may be the message and the enclosed envelope for an additional gift may have a defined appeal to track. Appeals are defined by your institution using the Appeals page. Available options include all the valid appeals for the setID associated with the business unit that you select for the initiative.

Completed	Select to indicate that a communication has already been generated and sent and that the planned cycle (start date to end date) is complete or the step is no longer needed in the plan.
Audience Type and Audience	Select an audience type and an audience for the communication. Audiences include only those defined on the Audience page for this initiative.
Seq Nbr (sequence number)	Indicates which step you are creating in the public relations plan.
Build Actions	After you have specified a message, method, frequency, appeal, assigned ID, and audience, click this button. The system generates initiative actions that correspond with the public relations tasks. For example, if you create a task of sending a monthly letter to alumni, the system creates an initiative action for the assigned staff for each date that the letter is to be sent. This date is based on the start and end dates of the public relations plan step. Important! You can only build actions for a step once, so plan the steps carefully. Be certain that the dates and frequency—as well as the values in the Message, Appeal, and Responsible Person fields—are correct before directing the system to build actions. You do not have to build actions until you are ready. You can save the page and build the public relations plan actions later. After actions are built, any subsequent changes to an action require you to manually update them using the Initiative Action page.

Important! If you do not click the Build Actions button, you receive a message when you save the page asking to build actions for the initiative. If you click Yes, actions are created for all of the steps that have not yet been built. If you click No, the plan data is saved and no actions are created at this time. If you add steps to the public relations plan at a later date, the Build Actions button becomes active and you can build actions for the new steps. The actions that appear on the To Do List are determined by the setting you make in the Reminder Days field on the Institution Installation 2 page.

Creating Initiative Attachments

This section discusses how to create attachments for any type of initiative.

Creating an Initiative Budget and Tracking Expenses

This section discusses how to:

- Create a budget.
- Track budget expenses.

You can create a simple expense budget for an initiative. A budget can be broken down into budget categories, and a portion of the budget can be allocated to each category. In addition, you can track specific expenses associated with the initiative.

Note. Your Contributor Relations budget system does not support links to your institution's financial system.

Pages Used to Create a Budget and Track Expenses

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>

First 1-5 of 5 Last

*Budget Category	Category Budget	
Flowers	2,500.00	+ -
Printing/Publications	12,500.00	+ -
Postage	1,000.00	+ -
Meal Costs	20,000.00	+ -
Transportation Costs	3,000.00	+ -

Budget page

You can break down a budget into budget categories and allocate a portion of the budget to each category.

Overall Budget	Enter the total amount allocated as the expense budget for the initiative.
Budget Category	Enter the category to which you want to allocate a portion of the overall budget. Categories are defined by your institution using the Budget Table page. When you select a category, its description appears to the right of this field.
Category Budget	Enter the amount of the overall budget allocated to the category that you selected.

An error message appears if the total amount budgeted to specific categories does not equal the overall budget. You cannot save a budget that exceeds the overall budget.

Warning! The system does not prevent overspending of your budget. The Budget feature within Contributor Relations does not link to the Financials system.

Tracking Budget Expenses

Access the Budget Detail page (Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Budget Detail).

Budget Detail

Campaign: ANNFUND Annual Fund Campaign **Institution:** PSUNV

Overall Budget: 39,000.00 USD

Budget Detail						Find View All	First	1-2 of 2	Last
Start Date	*Budget Category	Description	Appeal		Expense Amount				
06/05/2006	Meals	Catering			12,750.00				
06/05/2006	Meals	Facility Rental			6,750.00				

Budget Detail page

Budget Category Select the category to which the expense or refund is assigned. Only those budget categories defined for the initiative type you are working with appear.

Description Describe the expense, entering up to 25 characters.

Appeal (Optional) If the expense relates to a specific appeal, select the appropriate one. Appeals are defined by your institution using the Appeals page. The appeals from which you can select are determined by the setID associated with the business unit that you select for the initiative.

You must link each expense with an appeal to accurately track expenses for that appeal.

Expense Amount Enter the amount of the expense. If you are entering a refund from a vendor, enter the item as a negative number.

Warning! When you save this page, a warning message appears if the total of the expenses exceeds the overall budget. However, click the OK button on the warning dialog box to save the budget detail. The system does not prevent you from overspending your budget.

Creating Initiative Actions

This section discusses how to:

- Enter initiative action information.
- Add action information.

Using Mass Change for Initiative and Membership Letters

This section provides overviews of mass change and the initiative and membership mass change templates, and also discusses how to:

- Select Student Administration criteria.
- Select criteria and defaults.
- Run the Mass Change SQR process.

Note. You must set up communications in the system prior to working with mass change.

Understanding Mass Change

Contributor Relations provides four mass change templates that enable you to generate communications for initiative audiences and membership organization members.

You can generate communications for audiences of a campaign appeal, membership campaign, volunteer program, event, and so on. When you create an initiative audience, you can run that audience through the mass change template and send a communication to those audience members who meet your selection criteria.

Or, you can select specific members of an organization based on their expiration date and send out renewal notices and membership cards. In addition, you can select recipients and mail benefits to those groups that have earned them.

Note. Templates for membership and initiative communications are shipped with the Contributor Relations system. You can modify templates for your institution.

Understanding the Initiative Mass Change Template

There are two mass change definitions in the initiative mass change process – CR-Intv-Delete and CR-Intv-Insert3CEngine.

The two mass change definitions are described below:

1. *CR-Intv-Delete*

The first portion of this definition deletes temporary initiative records from the ADM_TMP_MC, ADM_TMP2_MC, and EVNT_SPDKEY_MC tables if OPRID is equal to the person who selected the records and MC_DEFN_ID is equal to CR-Intv-Insert3CEngine. This criterion prevents the membership and initiative mass change functions from deleting records belonging to the other function.

2. CR-Intv-Insert3CEngine

This definition joins the AV_INITIATIVE table with the PERSONAL_DATA table based on EMPLID. This step is done to find the DT_OF_DEATH value for each record. If a person has a date of death, a communication record is not created when joint letter generator is run. In addition, the ADDRESSES table is checked and communication records are written only for those people who have an address with an effective status of *Active*. The records resulting from this join are inserted into the ADM_TMP_MC table.

Next, data from the EVNT_COMM_MC_VW is copied to the EVNT_SPDKEY_MC temporary table. This view breaks out the Comm Speed Key data for each Comm Key defined on the Event Definition Setup page. There may be one or more Comm Keys associated with the Event ID selected, thus creating one or more communication records for each Event ID. The following fields are then updated on the EVNT_SPDKEY_MC table:

Field Name	Value taken from this field
COMPLETED_COMM	ACTIVITY_COMPLETED
COMPLETED_DT	COMM_DT
COMPLETED_ID	COMM_ID

Note. Before this step can take place, you must define letter codes, communication context including a method and direction, and categories. These key values are combined to create communication Event IDs. You must also set up communication 3C groups and 3C group security.

Finally, the EVNT_SPDKEY_MC and ADM_TMP_MC tables are copied and joined in ADM_TMP2_MC.

You can select criteria based on the following fields to target your audience. At a minimum, you must select criteria for key fields. You should narrow the criteria by using all the fields. This ensures that you identify the correct records.

Table	Field	Key
AV_INITIATIVE	INSTITUTION	
AV_INITIATIVE	AV_AUDIENCE	Yes
AV_INITIATIVE	AUD_TYPE	Yes
AV_INITIATIVE	INTV_CD	Yes
AV_INITIATIVE	START_DT	

<i>Table</i>	<i>Field</i>	<i>Key</i>
AV_INITIATIVE	END_DT	
EVNT_3C_GRP_VW	EVENT_3CS_ID	

After the CR-Intv-Insert3CEngine step has run, run the 3C Engine and select your options for processing joint records. This generates all communication records for processing by the letter generator.

Understanding the Membership Mass Change Template

There are two mass change definitions in the membership mass change process – CR-Mbrshp-Delete and CR-Mbrshp-Insert3CEngine.

The two mass change definitions are described below:

1. *CR-Mbrshp-Delete*

The first portion of this definition deletes temporary membership records from the ADM_TMP_MC, ADM_TMP2_MC, and EVNT_SPDKEY_MC tables if OPRID is equal to the person who selected the records and MC_DEFN_ID is equal to CR-Mbrshp-Insert3CEngine. This criterion prevents the membership and initiative mass change functions from deleting records belonging to the other function.

2. CR-Mbrshp-Insert3CEngine

This definition joins the AV_MEMBER7_VW table with the PERSONAL_DATA table based on EMPL_ID. This step is done to find the DT_OF_DEATH value for each record. If a person has a date of death, a communication record is not created when joint letter generator is run. In addition, the ADDRESSES table is checked and communication records are written only for those people who have an address with an effective status of *Active*. The records resulting from this join are inserted into the ADM_TMP_MC table.

Next, data from the EVNT_COMM_MC_VW table is copied to the EVNT_SPDKEY_MC temporary table. This view breaks out the Comm Speed Key data for each Comm Key defined on the Event Definition Setup page. There may be one or more Comm Keys associated with the Event ID selected, thus creating one or more communication records for each Event ID. The following fields are then updated on the EVNT_SPDKEY_MC table:

<i>Field Name</i>	<i>Value taken from this field</i>
COMPLETED_COMM	ACTIVITY_COMPLETED
COMPLETED_DT	COMM_DT
COMPLETED_ID	COMM_ID

Note. Before this step can take place, you must define letter codes, communication context including a method and direction, and categories. These key values are combined to create communication Event IDs. You must also set up communication 3C groups and 3C group security.

Finally, the EVNT_SPDKEY_MC and ADM_TMP_MC tables are copied and joined in ADM_TMP2_MC.

You can select criteria based on the following fields to target your audience. At a minimum, you must select criteria for key fields. You should narrow the criteria by using all the fields. This ensures that you identify the correct records.

<i>Table</i>	<i>Field</i>	<i>Key</i>
AV_MEMBERSHIP	INSTITUTION	Yes
AV_MEMBERSHIP	AV_MBR_ORG_COD	Yes
AV_MEMBERSHIP	AV_DUES_LVL	
AV_MEMBERSHIP	AV_MBRSH_P_TYP	
AV_MEMBERSHIP	START_DT	

<i>Table</i>	<i>Field</i>	<i>Key</i>
AV_MEMBERSHIP	EXPIRATION_DT	
AV_MEMBERSHIP	MBR_TYPE	
AV_MEMBERSHIP	MOTIVATION_CD	
AV_MEMBERSHIP	SESSION_NO	
EVNT_3C_GRP_VW	EVENT_3CS_ID	

After the CR-Mbrshp-Insert3CEngine step has run, run the 3C Engine and select your options for processing joint records. This generates all communication records for processing by the letter generator.

Pages Used to Use Mass Change for Initiative and Membership Letters

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Student Administration	MC_DEFN_SA	Contributor Relations, Initiatives, Process Initiatives, Initiative Mass Change, Student Administration	Specify Campus Solutions-specific mass change parameters.

Execution Seq: 1 **Description:** Select recs/lnsr into Tmp Tbl

Criteria Find | View All First 1-2 of 6 Last

Field	Field Value
Audience Type Equal To	S
Audience Code Equal To	PARENTSINT

Defaults Customize | Find | View All First 1 of 1 Last

Field Label	Mass Change Field Value
1	

Criteria and Defaults page

Criteria

Set criteria values using SQL operators and values. For example, to select an audience type of Segmentation, you would select *Equal To* and enter a field value of S.

You must have a thorough understanding of your data and dependencies before selecting criteria. Many codes are not intuitive, and many fields are dependent upon others. For example, a dues level must be related to a specific member organization, but the prompts are not hierarchical.

Field

You can enter only one SQL operator per criteria. However, if you select a criteria option such as *In*, you can list multiple values by placing the cursor in the Field Value field and inserting rows.

Note. Do not run the mass change process from within this component. Run the process using the Run Mass Change page in PeopleSoft Campus Community.

Running the Mass Change SQR Process (MASSCHNG)

Access the Run Mass Change page (Campus Community, Communications, Mass Change - Communications, Run Mass Change). To generate mass communications changes for Contributor Relations, only use these fields:

Mass Change Run Type

Execute Single Mass Change To run each mass change definition individually, select *Execute Single Mass Change*.

If you select this option, you must run each of the four mass change definitions in the process separately.

Execute Mass Change Group To run more than one mass change definition at one time, select *Execute Mass Change Group* as the mass change run type.

If you select *Execute Mass Change Group* and you are running mass change for an initiative, run AV-Initiative-Step1 followed by AV-Initiative-Step2.

If you select *Execute Mass Change Group* and you are running mass change for a membership organization, run AV-Membership-Step1 followed by AV-Membership-Step2.

Note. You can verify the data by running an SQL statement against the temporary table or the communication table.

Mass Change Definition Enter the name of the mass change definition to run.

After the Mass Change process runs, data is written to the communications record. You can also run the Mass Change process from within the 3C Engine component.

Chapter 12

Managing Campaigns

This chapter provides an overview of campaign management and discusses how to:

- Manage general initiative information.
- Set campaign initiative goals.
- View a prospect list.
- Generate the campaign progress report.
- View the top donors to a campaign.
- View a summary of campaign initiatives.

Understanding Campaign Management

This section lists prerequisites and discusses campaign management.

Prerequisites

Before you can manage a campaign, you must have one set up. There are common initiative setup pages for this task, and also campaign-specific setup pages that enable you to complete campaign setup.

Campaign Management

A campaign is an organized institutional effort targeted to a specific constituency that occurs over a specified period of time with specific purposes and goals. Campaigns can be annual or multiyear. Many campaigns start in a silent, nonpublic phase that serves to identify the pace-setting gifts that form the nucleus fund of the campaign. After the momentum is created from this private phase, the campaign is taken public to complete the goals of the campaign. As a campaign moves through its strategic plan, you can track progress in its entirety and through annual, unit, and department goals.

The following diagram gives an overview of the Contributor Relations features that assist your institution with its campaign management processes, and their subtasks. These features are, in order: assess feasibility, define campaign strategy, implement plan, track assignments, track progress, and recognize participants.

Contributor Relations campaign management features

A campaign is one type of initiative in Contributor Relations. All initiative types share some common management pages. Some initiatives, such as campaigns, require additional management that is specific to their purpose. The campaign-specific management is covered in this chapter; refer to the following chapter for information about managing all types of initiatives.

Managing General Initiative Information

You manage campaigns in Contributor Relations by using the common initiative functionality found throughout the system. Initiatives are the common link between campaigns, events, volunteer efforts, and membership initiatives at your institution.

To manage a campaign, a campaign initiative must exist for each new campaign at your institution. Use the Campaign Initiative component to begin the process of defining a new campaign at your institution. When you create a campaign initiative, you also create, its audience, resources, any related initiatives, and a public relations plan. You can then use this chapter to manage the remaining campaign-specific functionality.

Setting Campaign Initiative Goals

Many campaign initiatives at your institution might have intermediate goals or milestones in addition to an overall goal. This section discusses how to:

- Set intermediate goals for campaigns.
- Set annual goals.
- Set department goals.
- Set unit goals.

Pages Used to Set Campaign Initiative Goals

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Initiative Goals	AV_INTV_CMPGN_GOAL	Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Goals, Initiative Goals	Set intermediate goals or milestone for an initiative.
Annual Goals	AV_CMPGN_ANNUAL	Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Goals, Annual Goals	Set goals for each year of the campaign cycle.
Department Goals	AV_CMPGN_DEPT_GOAL	Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Goals, Department Goals	Set campaign goals for specific departments at your institution.

Page Name	Definition Name	Navigation	Usage
Unit Goals	AV_CMPGN_UNIT_GOAL	Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Goals, Unit Goals	Set campaign goals for units that you have defined.

Setting Intermediate Goals for Campaigns

Access the Initiative Goals page (Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Goals, Initiative Goals). This page enables you to break down the initiative's overall goal into measurable milestones, to be used in custom reports.

Initiative Goals | Annual Goals | Department Goals | Unit Goals

Campaign: ANNFUND Annual Fund Campaign **Institution:** PSUNV

Financial Goal: 5,000,000.00 USD **% Particptn Goal:** 35.00

Intermediate Goals/Milestones Find | View All First 1 of 1 Last

*Target Date	*Goal Type	Pers/Org	Audience Code	Amount/Pct/Total
06/25/2004	Number Donors	Pers		

Initiative Goals page

Upon entering this page the Campaign name, Financial Goal, and % Particptn Goal (percent participation goal) for the initiative appear. Values for these fields are based on the values entered in the Campaign Initiatives component.

- Target Date** Select the target date or date by which the goal might be reached.
- Goal Type** Select the goal type or the measurement by which you track the goal's progress. Valid goal types are *% Income*, *Financial*, *% Participation*, *Number of Donors*, and *Number of Volunteers*. Your institution can define additional goal types.
- Audience Code** Select the audience code the goal pertains to. Only those populations defined by your institution with the type of *Segmentation* for this initiative on the Audience page are available. That signifies that they are part of a target audience for some kind of ask, such as an invitation or event.

Setting Annual Goals

Access the Annual Goals page (Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Goals, Annual Goals).

The screenshot displays the 'Annual Goals' page for a campaign named 'ANNFUND' (Annual Fund Campaign) at 'PSUNV'. The page includes tabs for 'Initiative Goals', 'Annual Goals' (selected), 'Department Goals', and 'Unit Goals'. Key campaign information is shown: Financial Goal of 5,000,000.00 USD and Length of Campaign of 1 year/0 month. The Campaign Year is set to 1. Below this, there are input fields for various goals: *Effective Date (07/01/1998), Dollar Goal (100000), Avg Gift Goal (1000), Pct Increase (25), Nbr Donors Goal (5000), Nbr Vol Goal (35), and Nbr Prspct Goal (3000). At the bottom, a table shows the goal for 'Alumni' with a Goal Amount of 500000 and Nbr Donors of 4000.

Annual Goals page

Campaigns can be one-year or multiyear efforts. When the start and end dates are saved for a campaign, the system creates an annual goals record for each year of the campaign. If the campaign dates change, the annual goals records change accordingly. For example, if a campaign is extended, additional annual goals records are created. If it is shortened, the number of annual goals records is reduced to the new shorter campaign period. However, the annual goals that have been entered are not redistributed over the new campaign period. They must be adjusted manually.

Goals should be set at the beginning of the campaign and should rarely change. The goals set here can be used in custom reports.

Campaign Year	Displays the year of the campaign as defined by the length of the campaign. For example, if this campaign lasts three years, then there should be annual goals for each year, and thus, three campaign years.
Dollar Goal	Enter the monetary portion of the overall goal that you expect to receive during this campaign year.
Avg Gift Goal (average gift goal)	Enter the expected gift when averaged out over all donors for this campaign year.
Pct Increase (percentage increase)	Enter the increase in overall giving from one year to the next.

Nbr Donors Goal (number of donors goal)	Enter the anticipated number of donors for this campaign year.
Nbr Vol Goal (number of volunteers goal)	Enter the anticipated number of volunteers who will be involved with the campaign during this goal year.
Nbr Prspct Goal (number of prospects goal)	Enter the anticipated number of prospects who will be available for contact during the campaign year.
Goal Amount	Enter the amount to receive from constituents who share a particular constituent type. Goals can be set by constituent type for each campaign year.
Nbr Donors (number of donors)	Enter the number of donors who share a particular constituent type from which to receive campaign contributions.

Setting Department Goals

Access the Department Goals page (Contributor Relations, Initiatives, Campaign Initiatives, Manage Campaigns, Campaign Goals, Department Goals).

Unit Goals page

Units are assigned by the institution. Like departments, they can be assigned a total dollar amount that is their goal to raise for the campaign year. However, units differ from departments in that they are information structures outside the formal department structure of your institution. An example might be a section of the department that might have specific goals for this campaign year such as a journalism lectureship that resides within the Communications department.

Unit Code

Select a unit code from the available options.

Goal Amount

Enter the portion of the overall campaign goal your institution expects to receive through giving to the unit that you selected for this campaign year.

Viewing a Prospect List

This section discusses how to view a prospect list.

Prospect List page

This page is useful to view prospect asks, both outstanding and completed.

You can build a workset from the prospects listed on this page.

Generating the Campaign Progress Report

This section discusses how to generate campaign progress reports.

Page Used to Generate the Campaign Progress Report

Page Name	Definition Name	Navigation	Usage
Campaign Progress Report	AV_RUNCTL_CAMPR	Contributor Relations, CR Reports, Giving Reports, Campaign Progress Report	Generate the Campaign Progress report for a specific institution and campaign.

Generating Campaign Progress Reports

The Campaign Progress report summarizes the progress of a campaign in relation to its goals. The report includes information about the financial goal, current gifts, deferred gifts, and so on. If you include related campaigns in the report, a campaign summary is generated that totals the progress for the campaign and its related campaigns of a lower reporting level together.

Access the Campaign Progress Report page (Contributor Relations, CR Reports, Giving Reports, Campaign Progress Report).

Campaign Progress Report

Run Control ID: PS [Report Manager](#) [Process Monitor](#) Run

*Institution: PeopleSoft University

*Campaign: Annual Fund Campaign

☒ Include Related Campaigns

Campaign Progress Report page

Institution Select the institution for which to generate a report.

Campaign Select the campaign for which to view progress. Campaigns are broad fund-raising efforts at your institution.

Include Related Campaigns

Select to include campaigns related to the campaign that you selected in the report. Any campaigns of a lower reporting level that you related to this campaign on the Related Initiatives page is included as a separate page in the report. The system also generates a summary of campaign progress that rolls up totals from all related campaigns.

Example: the Campaign 2001 is a level 1 campaign. Related to the Campaign 2001 are level 2 campaign Athletic Facilities and level 2 campaign Library Endowment.

If you select the Include Other Campaign check box, the Campaign Progress report generates four pages. The first three pages are individual progress reports for each campaign, and the final is a summary page including combined totals for all three campaigns.

When you click the Run button, Process Scheduler runs the AVCAMPRO process at user-defined intervals.

Viewing the Top Donors to a Campaign

This section discusses how to view a summary of the top donors assigned to a campaign.

Chapter 13

Managing Membership

This chapter provides an overview of membership and discusses how to:

- Manage general initiative information.
- Create a member organization.
- Build and merge membership lists.
- Define membership initiative goals.
- Enter member dues.
- Process membership credit card transactions.
- Adjust membership dues payments.
- Prepare for membership letters.
- View membership progress.
- View membership history.
- View membership benefit history.
- View a membership summary or a supervisor's membership summary.

Understanding Membership

This section lists prerequisites and common elements and discusses membership management.

Prerequisites

Before you can manage a membership initiative, you must set one up. There are common initiative setup pages for this task, and also membership-specific setup pages that enable you to complete setup.

Common Elements Used in This Chapter

ID Type	Identify the constituent as a <i>Person</i> or an <i>Organization</i> .

ID/Org ID (ID/organization ID)	Enter the ID of the constituent (either a person or an organization) or the person assigned to a task.
Add Mbr (add member)	If adding memberships, click to access the Membership Entry page, where you can add another membership payment or complimentary membership in the session. If adjusting memberships, click to access the Membership Adjustment Summary page, where you can select another membership payment number for adjustment.
Add Desig (add designation)	If your institution allows the entry of additional gifts in a membership session, click to add an additional row for designation information.

Membership Management

To involve the greatest number of constituents in the activities of an institution, it is often beneficial to create a membership organization that focuses on a particular interest area or support area. A member organization can be an alumni association, a chapter of a larger umbrella organization, or an organized group based on one or more common characteristics as defined by your institution. Member organizations may have a parent organization or child organizations.

Member organizations may or may not require a payment of dues to establish membership. Some organizations have a membership year that resets the membership at the beginning of a particular month each year. Some organizations have membership based strictly on the existence of a particular attribute on a record. These organization membership rosters are created through an automated process that links the constituent to the membership organization because the attribute exists. Dues and complimentary memberships are entered manually through membership entry.

If dues are collected for membership in an organization, they can be allocated to one or more designations, and a joint membership can be given to one or more people or organizations.

Membership is one type of initiative in Contributor Relations. All initiative types share some common management pages. Some initiatives, such as membership initiatives, require additional management that is specific to their purpose. The membership-specific management is covered in this chapter; refer to the following chapter for information about managing all types of initiatives.

Managing General Initiative Information

You manage membership initiatives in Contributor Relations by using the common initiative functionality found throughout the system. Initiatives are the common link among campaigns, events, volunteer efforts, and membership initiatives at your institution.

To manage a membership effort, a membership initiative must exist for each new effort at your institution. That means that you have defined the basic features of the initiative. Optionally, you can also set up its audience, resources, any related initiatives, and a public relations plan. You can then use this chapter to manage the remaining membership-specific functionality.

Creating a Member Organization

This section provides an overview of member organizations and discusses how to:

- Define the member organization.
- Set member criteria.
- Define membership objectives.
- Define membership dues.
- Assign membership resources.

Understanding Member Organizations

A member organization can be an alumni association, a chapter of a larger umbrella organization, or an organized group based on one or more common characteristics as defined by your institution. It can have a parent organization.

Member organizations may or may not require a payment of dues to establish membership. Some organizations have a membership year that resets the membership at the beginning of a particular month each year.

In other cases membership can be based strictly on the existence of a particular attribute on a constituent's record. In this instance organization membership rosters are generated through an automated process that links the qualifying constituents to the member organization.

Pages Used to Create a Member Organization

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Member Organization	AV_MBR_ORG	Contributor Relations, Member Organizations, Manage Member Organizations, Member Organization, Member Organization	Begin the process of defining a member organization at your institution.
Member Criteria	AV_MBR_CRIT	Contributor Relations, Member Organizations, Manage Member Organizations, Member Organization, Member Criteria	Specify the audiences that qualify for membership in a member organization if dues are not required.

Page Name	Definition Name	Navigation	Usage
Member Objectives	AV_MBR_OBJ	Contributor Relations, Member Organizations, Manage Member Organizations, Member Organization, Member Objectives	Define the aims of the member organization in terms of advancing your institution.
Member Dues	AV_MBR_DUES	Contributor Relations, Member Organizations, Manage Member Organizations, Member Organization, Member Dues	Define the dues, levels, designations, and benefits for member organizations that require payment of dues.
Member Resources	AV_MBR_RESOURCES	Contributor Relations, Member Organizations, Manage Member Organizations, Member Organization, Member Resources	Add information about any additional resources assigned to a member organization, other than the responsible person.

Defining the Member Organization

Access the Member Organization page (Contributor Relations, Member Organizations, Manage Member Organizations, Member Organization, Member Organization).

Member Organization		Member Criteria	Member Objectives	Member Dues	Member Resources
Business Unit: PSUNV Mbr Org: FINE ARTS Institution: PSUNV					
Mbr Org Name: Fine Arts Constituent Society					
Mission: Engage Fine Arts alumni in activities of the University and the Art Department					
Start Date: 07/15/1965		Reporting Level: 2			
End Date:		*Club Classification: Constituent Society

☐ Allow Comp Memberships					
☒ Membership Dues Required ☐ Membership Resets Each Year Month: January					

Member Organization page

Mbr Org Name (member organization name) Enter the formal name of the organization, up to 60 characters.

Mission	Enter the member organization's mission, which describes the history and purpose of the member organization. This is a free-form text field.
Reporting Level	Select the member organization's reporting level. The highest level is 1. A level 1 member organization cannot be related to another level 1 member organization.
Club Classification	Identify the member organization as a <i>Chapter</i> , <i>Alumni Association</i> , <i>Constituent Society</i> , or other classification. Your institution can define club classifications in the translate table record.
Charter Status	Indicate whether the club has been approved as a full chartered member organization for your institution.
Allow Comp Memberships (allow complimentary memberships)	Select to enable the ability to grant constituents complimentary membership in this member organization. In some cases, you may add constituents as a member of an organization although they do not meet the audience criteria for membership or they are not expected to pay membership dues. For example, a constituent may be a very active volunteer and you want to bestow a complimentary association membership. If selected, a complimentary check box appears on the Membership Entry page when you add a membership transaction for this member organization. When entering the membership transaction, you have the option of granting a complimentary membership.
Membership Dues Required	Select to require dues prior to a constituent's membership in the organization. If selected, at least one dues level on the Member Dues page must be completed for the member organization before the record can be saved. If cleared, you must select criteria on the Member Criteria page to build membership based on audiences.
Membership Resets Each Year	Select if annual membership in the organization is based on a set calendar beginning the same month each year.
Month	Select the month when the new membership year begins. This field populates by default to the first month in the business unit's calendar definition. If you select the Membership Resets Each Year check box, this field is required. If not, this field is inactive.

Setting Member Criteria

Access the Member Criteria page (Contributor Relations, Member Organizations, Manage Member Organizations, Member Organization, Member Criteria).

Member Organization		Member Criteria	Member Objectives	Member Dues	Member Resources

PSUNV						☐			
Dues Benefits Find View All First 1 of 1 Last									
Standard Benefit		Item Value		1st					
		0.00		☐					

Member Dues page

You must enter at least one row if the Membership Dues option is selected. If that option is cleared, you cannot enter data here; use the Member Criteria page instead.

Dues Level and Description Enter the dues level and a longer, more informative description.

Membership Type Indicate whether dues are *Annual Membership*, *Sustaining*, *Lifetime Membership*, or some other value that is defined by your institution. *Life* is a delivered value and should not be deleted. Use *Life* to designate any lifetime (nonexpiring) membership.

The available values depend on the values that you set up on the Membership Type page for the setID that is associated with this member organization's business unit.

Mbrshp Category
(membership category) Indicate whether the dues apply to a *Family*, *Single Person*, *Couple*, or other value. You define values on the Membership page. The value that you indicate here appears during membership entry when a member organization is selected and a dues level is set.

The available values depend on the values that you set up on the Membership Category page for the setID that is associated with this member organization's business unit.

Total Amount Enter the amount that the member must pay to be recognized at this dues level.

Duration	Enter the duration of the membership when purchased for this amount. This field populates by default to <i>12 Months</i> . If the membership type is <i>Life Member</i> , the system ignores duration on the Membership Entry page.
Payment Amount and Payment Years	If the member can purchase a membership and pay for it in installments over time, enter the amount for each payment and the number of years that are required to reach the membership dues balance.
Dues Designation	
BU (business unit)	Select the business unit to which the membership dues should be allocated. This prompt dialog box contains a list of all the valid business units at your institution. When you make a selection, the values in the Designation prompt dialog box change to display the values that you defined for this business unit's setID.
Note. If you have already selected a designation and then change the business unit, you must select a designation again.	
Designation	Select the funds at your institution to which memberships and donations can be allocated. The available values for each row include the designations that you defined for that business unit's setID.
Initiative	Select the membership or campaign initiative to which you want to assign member dues.
Designation Amt (designation amount)	Enter the amount or portion of the dues payment to be allocated to each designation.
Gift	When a portion of the dues is also a charitable contribution, select the designation that receives the contribution. When you enter a membership and select the gift option, the member's giving records are updated with the portion of the dues that has been identified here as a charitable contribution. Important! You must allocate exact portions of gift and nongift monies of the total dues amount.

Dues Benefits

Standard Benefit and Item Value

Select any specific benefits of membership. For example, if a member receives a lapel pin when joining the alumni association at the life member level, indicate that here. When you select a standard benefit, its monetary item value appears. When a membership is entered that has benefits defined here, the member's benefits summary is updated.

The available values depend on the values that you set up for the setID that is associated with this member organization's business unit. Items are defined on the Donor Appreciation Detail page.

1st (first)

Select if a benefit is to be distributed to a member only once. This option indicates that when the member renews membership at the same level, the member does not receive the same benefit again.

Assigning Membership Resources

Access the Member Resources page (Contributor Relations, Member Organizations, Manage Member Organizations, Member Organization, Member Resources).

Member Resources page

Responsible Mgr (responsible manager)

Select the responsible person's manager. The manager receives reports and notifications that are related to the member organization.

The responsible person is defined on the Member Organization page.

Department	Select the department that is associated with the member organization. This selection enables you to link the member organization to a department at your institution for reporting purposes.
Unit	Select the unit that is associated with a volunteer from the member organization. This selection enables you to associate the member organization with specific units that might not fall within the departmental structure of your institution. For example, a unit could be a subgroup of the English department that has alumni with a special interest in literary classics.
Rsrc Type (resource type)	To link the member organization with another member organization or an initiative, select either <i>Mbr Org</i> or <i>Initiative</i> . The fields in this row change depending on the selection that you make.
Mbr Org Code (member organization code) and Vol Structure (volunteer structure)	If you selected <i>Mbr Org</i> as a resource type, select the member organization code and the volunteer structure with which it is associated.
Intv Type (initiative type), Initiative , and Vol Structure (volunteer structure)	If you selected <i>Initiative</i> as a resource type, select the initiative type, initiative, and volunteer structure with which it is associated.
New Vol (new volunteer)	Click to create a new volunteer structure for the member organization when no other volunteer structure is responsible for the member organization.

Building and Merging Membership Lists

This section discusses how to build and merge member lists.

Note. In addition to running these processes, you can add constituents as complimentary members by entering the membership to a member organization that allows complimentary memberships through a membership session.

Page Used to Build Membership Lists

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Membership Audience Build	AV_RUNCTL_MBR	Contributor Relations, Member Organizations, Manage Member Organizations, Build Membership Audience	Run the Membership Audience Build/Merge Application Engine process (AVMBRBM). You can build the list of members for a member organization, move audiences from the temporary AV_MBR_TEMP_TBL table to the permanent AV_MEMBERSHIP table, or both.

Building and Merging Member Lists

Access the Membership Audience Build page (Contributor Relations, Member Organizations, Manage Member Organizations, Build Membership Audience).

Membership Organization

Pers/Org

Audience Code

Membership Audience Build page

If you are building the audience for the first time, click Run to run the Membership Audience Build process. This process rebuilds the membership audiences that you select on this page and builds any defined audiences that have not previously been built.

Selection Process

The AVMBRBM process behaves differently, depending on whether you select *Population Selection* or *Build/Merge Process*. Selecting *Population Selection* builds memberships only for those membership organizations using the Population Selection process as the setup method for the member audience. Similarly, selecting *Build/Merge Process* builds only memberships with audience criteria created using the Build/Merge option on the Audience Criteria setup page.

Processes to Run

Using the check boxes in this group box, you can build an member list, merge an list, or both.

Build Temp Tables

Select this option to generate the actual list of members and store it in the temporary table AV_MBR_TEMP_TBL. When the records are in this table, they can be analyzed using SQL to determine if the member list is acceptable.

Merge into Initiative Audience

Select this option to add the constituents as members of the member organization by merging any audiences in the temporary (AV_MBR_TEMP_TBL) table to the permanent (AV_MEMBERSHIP) table.

Build Audience

The system displays member audiences here that are ready to be built. If you select the Population Selection option, this grid shows only member audiences built using the Population Selection process.

Rebuild Audience

If you have already built a member list and want to rebuild it, use this group box to enter your criteria. When you rebuild a member audience, the process adds any additional members that meet the criteria since the time the member audience was last built.

Defining Membership Initiative Goals

This section discusses how to:

- Set intermediate goals for membership initiatives.
- Set annual goals for membership initiatives.

Pages Used to Define Membership Initiative Goals

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Initiative Goals	AV_INTV_MEMBR_GOAL	Contributor Relations, Initiatives, Membership Initiatives, Membership Goals, Initiative Goals	Set intermediate goals or milestones for an initiative.
Annual Goals	AV_MEMBR_ANNUAL	Contributor Relations, Initiatives, Membership Initiatives, Membership Goals, Annual Goals	Create annual or multiyear plans to increase the number of participating members for an organization.

Setting Intermediate Goals for Membership Initiatives

Access the Initiative Goals page (Contributor Relations, Initiatives, Membership Initiatives, Membership Goals, Initiative Goals).

Initiative Goals		Annual Goals	
Membership:	ALUMASSN	1999 Membership Drive	Institution: PSUNV
Financial Goal:	0.00 USD	% Particptn Goal:	0.00
Intermediate Goals/Milestones Find View All First 1 of 1 Last			
*Target Date	*Goal Type	Pers/Org	Audience Code
06/25/2004	Nbr of Members	Pers	
			Amount/Pct/Total
			5000 + -

Initiative Goals page

This page is used to set goals for the membership initiative, as opposed to the member organization.

Target Date	Select the date by which the goal may be reached. When you click the prompt button for this field, a calendar appears. Use the arrow keys at the bottom of the calendar to locate the appropriate month and year, and then click the specific date.
Goal Type	Select the measurement by which you track the goal's progress. Valid goal types are <i>% Income</i> , <i>Financial</i> , <i>% Participation</i> , <i>Number of Donors</i> , and <i>Number of Volunteers</i> . Your institution can define additional goal types.
Audience Code	Select the audience code to which the goal pertains. Available options include all the populations defined with the type of <i>Segmentation</i> for this initiative on the Audience page.

Setting Annual Goals for Membership Initiatives

Access the Annual Goals page (Contributor Relations, Initiatives, Membership Initiatives, Membership Goals, Annual Goals).

Initiative Goals		Annual Goals	
Membership:	ALUMASSN	1999 Membership Drive	Institution: PSUNV

*Membership Type	*Member Status	Amount	Nbr Members
		0.00	0

Annual Goals page

Use this page to set goals for the membership initiative to be used in customized reports.

- Dollar Goal** Enter the monetary amount of the overall goal that you expect to achieve during this membership campaign year from this membership initiative.
- Nbr Mbrshps Goal** (number of memberships goal) Indicates the expected number of memberships to be generated during this membership campaign year from this membership initiative.
- Mbrshp Pct Increase** (membership percent increase) Enter the increase in overall memberships from one year to the next that is expected from this membership initiative.
- Nbr Members Goal** (number of members goal) Enter the anticipated number of members for this membership campaign year from this membership initiative. This number should include joint members.
- Mbrs Pct Increase** (members percent increase goal) Enter the anticipated increase in members (including joint members) from one year to the next from this membership initiative.

Goal Detail

- Membership Type** Select the membership type for which you want to set a goal. Membership types are defined by your institution, but typically include values such as *Annual*, *Sustaining*, *Life*, and so on. The valid membership types are determined by the setID that is associated with the selected initiative's business unit.

Member Status	Select the status of the members from which memberships are received, such as <i>New</i> , <i>Lapsed</i> , <i>Renewed</i> , and so on. These values are defined by your institution.
Amount and Nbr Members (number of members)	Enter the monetary goal and the goal for the number of members.

Entering Member Dues

This section provides overviews of membership dues and gift processing in membership sessions, lists common elements, and discusses how to:

- Enter dues payment detail.
- Enter tender type details.
- Assign membership designations and associate others with a membership.

Understanding Membership Dues

When you enter membership dues, you open a membership session by using the Maintain Sessions page. This page is similar to the page that you use to open gift or pledge sessions, and the process is identical, with one exception. When you open a membership or adjust a membership session, a row appears on the Maintain Sessions page with a tender type of *Complimentary*. In some cases, you may want to add constituents as a member of an organization although they do not meet the audience criteria for membership or they are not expected to pay membership dues. For example, a constituent may be a very active volunteer and you want to give the constituent a complimentary association membership.

If you plan to enter complimentary memberships within the session, indicate the number of complimentary membership transactions that you plan to enter in the Expt Cnt (expected count) field for this row. For regular membership dues transactions, add a row and complete the Tender Type, Expt Cnt, and Expt Amt (expected amount) fields. Because complimentary memberships are entered through a membership session, your institution can track which users are granting memberships to constituents.

After you establish a session, enter dues by using a series of membership data entry pages.

If it complies with your institution's business practices, you can enter gift transactions as well as membership transactions into a membership session. To enable this feature, you must select the Allow Gifts in Membership check box on the Institution Installation page when you set up the system.

After you enter a membership session, you must balance and queue the session for posting.

Understanding Gift Processing in Membership Sessions

If any portion of a dues payment is a gift, or if your institution allows you to enter gifts into membership sessions, you must understand how these transactions are processed.

When a transaction includes both a membership dues payment and a gift, the membership portion of the transaction is written to the membership tables in the database. The gift portion of the transaction is written to gift tables in the database, and the donor receives hard credit for this portion.

For example, Mr. Jones writes a membership check for 1,000 USD for a lifetime membership at your institution. This payment includes 750 USD as nongift dues and 250 USD as a gift. After this transaction is processed, the Membership History page displays a lifetime dues payment of 1,000 USD. The Transaction Register page displays a gift of 250 USD with a hard credit to Mr. Jones.

In another example, Mr. Jones writes a membership check for 1,000 USD to your institution for a joint lifetime membership for Mrs. Jones and himself. This payment includes 750 USD as nongift dues and 250 USD as a gift. After the transaction is processed, the Membership History page displays a lifetime dues payment of 1,000 USD for both Mr. Jones and Mrs. Jones. The Transaction Register page displays a gift of 250 USD with a hard credit to Mr. Jones, and a gift of 250 USD with a soft credit to Mrs. Jones. Any additional joint members would also receive 100 percent soft credit for the gift portion of the transaction.

The following table represents the distribution of the lifetime membership check for 1,000 USD from Mr. and Mrs. Jones:

	<i>Without Joint</i>		<i>With Joint</i>			
Record	ID 1	Recog Type	ID 1	Recog Type	ID 2	Recog Type
AV_MEMBERSHIP	1,000	N/A	1,000	N/A	1,000	N/A
AV_MBR_DTL	1,000	N/A	1,000	N/A	N/A	N/A
AV_GIFT_DTL	250	N/A	250	N/A	N/A	N/A
AV_RECOGNITION	250	HARD	250	HARD	250	SOFT
AV_RCG_DES	250	HARD	250	HARD	250	SOFT

Common Element Used in This Section

Maintain Sessions

Click when you have finished entering transactions in a session. The system displays the Maintain Membership Sessions page, which enables you to balance the session.

Pages Used to Enter Member Dues

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Membership Entry	AV_MBR_ENTRY	- Contributor Relations, Session Management, Enter Memberships, Membership Entry - Click the Session Entry link on the Maintain Membership Sessions page.	Enter basic information about dues.
Tender Type Detail - Check page	AV_TENDER_DTL_SP	Click the Tender Detail button on the Gift Entry, Membership Entry, Gift Adjustment, or Membership Adjustment page.	Enter check information for gift or membership payments.
Tender Type Detail - Credit Card Entry	AV_CC_PAYMENT_SP	Click the Tender Detail button on the Gift Entry, Membership Entry, Gift Adjustment, or Membership Adjustment page.	Enter detailed credit card information for gift or membership payments.
What is a security code?	SSF_SS_PMT_CVV	Click the What is a security code? link on the Tender Type Detail - Credit Card page.	Learn more about security codes in credit card transactions.
Designations	AV_MBR_ENTRY2	- Contributor Relations, Session Management, Enter Memberships, Membership Entry, Designations - Click the Session Entry link on the Maintain Membership Sessions page (for adjustment sessions).	Apply payments to designations or allocation accounts at your institution.

Entering Dues Payment Detail

Access the Membership Entry page (Contributor Relations, Session Management, Enter Memberships, Membership Entry).

Membership History			

Membership Entry page

When you open a new session, this is the first page that appears. This page contains information about the appeal, dues level, amount, tender type, and so on.

If the currency code that you selected for this session on the **Maintain Session** page differs from the business unit's base currency, two new page controls appear on this page:

<i>Currency Code</i>	<i>Fields That Appear</i>	<i>Fields That Disappear</i>
Your business unit's base		Display in Other Currency button
		Base Amt
Any other currency	Display in Other Currency button	
	Base Amt	

Click to access the Update Information page to either update an existing member's record or add a new member to the system.

Because the ID Type field populates by default to *Person* on this page, the page used to add or update a person's record appears by default. To access the page used to add or update an organization's record, select *Organization* from the ID Type field, enter the organization's ID, and then click the Update Record button.

If you have not entered a donor's ID, you are prompted to enter one. You can either enter the donor's ID here or leave the prompt set to *NEW*. If you leave the prompt set to *NEW*, the system assumes that you are adding a new member and displays the pages for adding or updating a new constituent.

Year

If the member is an alumnus or alumna, the preferred class year appears.

Search

Click to access the Search/Match page, where you can search for a member.

Click to paste a carried ID found using Search/Match functionality.

Carry Transaction

Select to carry over values from this transaction to subsequent transactions in this session. If you select this check box, all information from this transaction appears by default in subsequent transactions, with the exception of ID, tender type fields for entry of check or credit card specific information, and recognition information. This feature is useful when entering a number of payments with the same member organization, member levels, and so on.

Membership Number

The membership number is set to *New* when you enter this page. When you select a member organization, the system checks to see if the constituent is already a member of the organization. If so, the system displays the existing membership number for the selected member organization. If not, the system assigns a new membership number.

Note. New membership numbers are assigned based on the last membership number on the CR Installation page.

Member Org (member organization)

Select the member organization that the member is joining. The available values for this field include all the member organizations for which the Allow Comp Memberships or Membership Dues Required check boxes are selected on the Member Organization page.

When you select a member organization for which the ID is already a member, the Level field is populated by default with the last dues level for the member, the Periods field populates by default to *1*, and the Total Amount field populates by default to the dues amount for the current dues level.

Level	Select the membership level at which a constituent joins the member organization. Levels are defined by your institution when you define the member organization. When you select a level, the system calculates the dues amount and total amount of the transaction based on the selections that you made on the Membership Dues page. If you are entering transactions in a currency other than base currency, the system populates the Base Amt field (in addition to the Dues Amt and Total Amt fields) and resets the exchange rate based on the data entry date when you edit this field. The system also recalculates designation information. If you enter additional gifts in this session and change the level, you must reenter those gifts.
Appeal	Select the specific acts or items that lead a member to join the member organization, such as a specific visit, phone call, letter, and so on. Appeals are defined by your institution. The available values include the appeals that you defined for the setID that is associated with the session's business unit.
Complimentary	If the membership organization that you selected is set up on the Member Organization page to allow complimentary memberships, this check box appears. Select to grant complimentary membership to the constituent or allow memberships with no payment. You can cancel complimentary memberships on the Member Adjust page. If you select this check box, the system hides the Dues Amount, Tender, and Total Amount fields. Additionally, you cannot edit any information on the Designations page.
Membership Status	This field populates based on the information that the system retrieves when you select a member organization. Values are: <i>New:</i> No previous membership exists for the selected member organization. <i>Renewed:</i> A membership exists for the selected member organization. The membership has an expiration date that is equal to or greater than the system date, or, for organizations whose expiration dates occur on the same day every year, the expiration date falls within the span of days specified in the Membership Days field on the Institution Installation page. <i>Reactivated:</i> A membership exists for the selected member organization. The membership's expiration date is less than the system date, minus the number of days specified in the Membership Days field on the Institution Installation page.
Membership Type and Membership Category	These fields appear after you enter payment information. The information in these fields is based on dues level.
Member Payment Number	This field populates by default to <i>NEW</i> when you enter a new membership payment. After you save the membership session, the system assigns a number to the transaction.

Dues Amount

When you select a dues level, the dues amount for that level appears, as defined on the Member Dues page. The dues amount is the amount of money that the constituent is paying to join the member organization.

If you enter transactions in a currency other than base currency, the system recalculates the total amount and any designation information for the transaction. If you enter additional gifts in this session and change this field, you must reenter those gifts.

Tender

Select a monetary form in which the payment is received. Examples are *Cash*, *Credit Card*, *Check*, and so on.

The available values depend on the values that you set up on the Tender Types page for the business unit's setID.

Depending on the tender type you select, click this button to enter its appropriate details on the Tender Type Detail page:

For *Check*, enter the check number on the page that appears.

For *Credit Card*, enter the constituent's credit card information on the page that appears.

If the credit card gift was mass loaded, the system populates address information, based on the Address Type field selected on the Mass Load Gift/Pledge page. Mass loaded credit card transactions are treated as though the user had entered the credit card gift online.

For *GIK*, enter the constituent's gift-in-kind details on the page that appears.

For *Security*, enter the description and details of the constituent's securities on the page that appears.

Periods

Enter the number of periods for which the member wants to pay membership dues. The system adjusts the total amount of the dues based on the number of periods that you select.

Note. If you enter a partial dues payment with a total amount that is less than the expected amount for the level, the system automatically calculates the new prorated period value and makes the Periods field display-only.

Total Amount

Dues totals are calculated by the system based on the dues amount times the number of periods for which the member is joining. This amount appears by default in the currency for the session. You can edit this field.

You can capture under- and overpayments in this field, to record partial membership payments or installment payments. Be sure that the membership payment amount in this field matches the Amount field on the Designations page. If you enter an underpayment, a warning message appears that the total amount does not match the dues amount. However, you can still save the page, and the system records the payment as a partial payment.

Note. If additional gift entries are allowed during a membership session, this amount may be overridden. To allow gifts in membership sessions, the Allow Gifts in Membership check box must be selected on the Institution Installation page.

Base Amount

If you enter this session using a currency other than base currency, the total amount for the transaction appears in your institution's base currency in this field.

Note. When you save transactions entered in a currency other than your institution's base, the amounts are converted to and stored in base currency. When you view information about these transactions on inquiry pages throughout the system, they appear in base currency. However, you can view detail about the transaction currency and exchange rate by accessing the related detail page.

If you are entering this session using a currency other than base currency, click to access the Display in Other Currency page, where you can view the amount in another currency and obtain exchange rate information.

If you change the exchange rate on the Display in Other Currency page, the total amount needed to match the dues amount changes. The system converts the dues amount based on the updated exchange rate and recalculates designation information. If you enter additional transactions in this session and change the exchange rate, you must reenter those transactions.

Expiration Date

The expiration date for membership appears. The system calculates this field based on the length of membership at various levels, as defined on the Member Dues page, multiplied by the periods. You can edit this field.

The system uses a different calculation, based on membership status:

New or Reactivated: Current date plus the duration for the dues code, as established on the Membership Dues page.

Renewed: The last expiration date plus the duration for the dues code, as established on the Membership Dues page.

If an organization resets at the same time each year, the expiration date is set to the last day of the month prior to the new organization year. If the membership is received prior to the end of the current organization year, and within the span of days specified for membership days on the Institution Installation page, the new expiration date is set to the last day of the month of the subsequent organization year.

Membership History

Click to view membership history for this person. The Membership History Prsn page appears.

Entering Tender Type Details

Access the Tender Type Detail page (Click the Tender Detail button on the Gift Entry, Membership Entry, Gift Adjustment, or Membership Adjustment page). This page changes depending on the tender type selected in the Special Fields field on the Tender Types setup page.

Tender Type Detail	
Check Number:	2010

Tender Type Detail - Check page

Tender Type Detail - Credit Card page

First Name	If entering a credit card payment for a person, enter the first name as it appears on the credit card. Include any middle initial after the first name in this field.
Last Name	If entering a credit card payment for a person, enter the last name as it appears on the credit card. Include any suffixes (such as Jr. or Sr.) after the last name in this field.
Organization Name	If entering a payment for an organization, enter the organization name.
Credit Card Type	Select the type of credit card that the credit card holder is using. These values are set up on the Credit Card Type page.
Credit Card Number	Enter the credit card holder's card number. The length of the credit card number is established on the Credit Card Type page.

Security Code	Enter the security code as it appears on the credit card. This field does not appear if the Security Code-Batch check box is cleared on the CR Merchant page.
What is a security code?	Click this link to access an explanatory page explaining the reason for using a security code as well as its location on a credit card. This field does not appear if the Security Code-Batch check box is cleared on the CR Merchant page.
Expiration Date	Enter the expiration month and year as they appear on the credit card.
Email Address	Enter the email address of the credit card holder, including the full domain name, in the form name@host.domain. For authorization and credit transactions, the third-party processor requires a value in this field. Email addresses are defined on the Electronic Addresses page. If you do not have an email address for the contributor, the system uses the default email address that you define on the CR Merchants page.
OK	Click to validate any changed information, save, and close the page. If you chose to use the check digit algorithm on the Credit Card Type page, the validation process checks for the appropriate number of digits in the card number. The system also checks for the appropriate prefix for the credit card type and validates the expiration date format, the amount (must be greater than 0 USD), and the address information. If there are any errors on this page, the system returns a message and prompts for corrections.
Cancel	Click to cancel the entry, ignore any changed information, and close the page without saving.

The Stock/Security Name carries over from the Security Information 1 tab.

- Day Low/Ask** Enter the lowest amount at which the stock/security traded on the day of transfer or, if no trades occurred, the Ask amount as reported by the stock exchange.
- Day High/Bid** Enter the highest amount at which the stock/security traded on the day of transfer or, if no trades occurred, the Ask amount as reported by the stock exchange.
- Public** Select this check box if the stock is publicly traded.

Assigning Membership Designations and Associating Others with a Membership

Access the Designations page (Contributor Relations, Session Management, Enter Memberships, Membership Entry, Designations).

The screenshot shows the 'Designations' tab in a software interface. At the top, it displays 'Business Unit: PSUNV', 'Session Number: 151', and 'Institution: PSUNV'. Below this is a 'Membership Detail' section with fields for 'Member Payment Number: NEW', 'ID: AV0007', and 'Whitney, Christopher'. A 'Designation Total' box shows 'Percent: 25.0000', 'Amount: 25.00 USD', 'Level: ANNL', and 'Total Amount: 100.00'. The 'Designation Detail' section has a table with columns: Business Unit, Designation, Initiative, Appeal, and Amount. The first row shows 'PSUNV', 'ALUMNIANNL', 'ALUMASSN', 'CALL', and '25.00'. Below the table is the text 'Alumni Assn Annual Memberships'. At the bottom is a 'Joint Records' section with fields for '*ID Type' (set to 'Person'), 'ID', and '*Member Type'. Navigation buttons like 'Find', 'View All', 'First', 'Last', and 'Add Membership' are visible throughout the interface.

Designations page

You can apply portions of a payment to multiple designations at your institution. For each designation, you must associate a specific membership or campaign initiative and appeal. In addition, you can indicate whether a membership is joint, given as a gift, or a referral. The people or organizations associated with the membership in these capacities are selected on this page.

When you access this page, the system displays the default designations, initiatives, appeals, and amount defined for the member organization on the Member Dues page. For dues, you can edit the Initiative and Amount fields.

If your institution opted to allow entry of additional gifts from this component, you can select additional designations. The amounts distributed among designations must equal 100 percent of the total amount received.

Business Unit

Select the business unit to which the additional gift is being allocated. For dues transactions, this field populates by default with the business unit that you selected when setting up the dues level for the organization and cannot be changed.

If you are adding a new designation row, valid values are all business units at your institution to which security access has been granted. When you make a selection, the available values in the designation and appeal fields change to those values that you defined for the business unit's setID.

If you have already selected a designation and appeal, and then change the business unit, you must select a designation and appeal again.

Designation

The designations that you defined for the member organization on the Membership Dues page appear on this page and cannot be edited. However, you can add additional records if your institution allows the entry of additional gifts in membership sessions.

If you are adding a designation, the available values are those designations that you defined for the business unit's setID.

Initiative

Select an initiative from the prompt dialog box, which contains all the current campaign and membership initiatives defined at the institutions to which you have security. The system displays the default initiative that you defined for the member organization on the Membership Dues page, but you can change this value.

Appeal

The appeal that you chose on the Membership Entry page is used for all designation entries from the Membership Dues page and cannot be edited here. To change the appeal, return to the Membership Entry page and select a new appeal code. You can add additional records if your institution allows the entry of additional gifts in membership sessions. In this case, the appeal field is editable.

If you are adding a designation row, the available values include the appeals that you defined for the business unit's setID.

Amount

Enter the payment to allocate to this designation. The dues amount that you entered on the Membership Dues page for the member organization appears on this page, but can be edited if your institution allows the entry of gifts in membership sessions.

Joint Records

Click to access the Update Information page to either update an existing joint member's record or add a new joint member to the system.

Because the ID Type field populates by default to *Person* on this page, the page used to add or update a person's record appears by default. To access the page used to add or update an organization's record, select *Organization* from the ID type field, enter the organization's ID, and then click the Update Record button.

If you have not entered a member's ID, you are prompted to enter one. You can either enter the member's ID here or leave the prompt set to *NEW*. If you leave the prompt set to *NEW*, the system assumes that you are adding a new member and displays the pages for adding or updating a new constituent.

Member Type

If the membership is *Joint*, a *Gift*, or a *Referral*, select the appropriate option. Gift and referral records are stored only for reference, to be used in audience criteria or in reports.

Processing Member Credit Card Transactions

If your membership sessions contain credit card payments, you must process those transactions. Use the pages in the following chapter to select membership transactions for processing, and authorize and capture the transactions.

Adjusting Membership Dues Payments

This section provides an overview of membership dues payment adjustments and discusses how to:

- Select posted dues transactions to be adjusted.
- Adjust dues payment details.
- Adjust designation and associated constituent information.

Understanding Membership Dues Payment Adjustments

When you adjust membership dues, you open a session, just as you would to adjust gifts or pledges. When a session is established, you select the membership transactions to adjust using the Membership Adjustment Summary page. Adjustment details are entered using the Membership Adjustment and Designation Adjustment pages.

When you create an adjustment transaction, a sequence number is created to indicate that there have been multiple actions on a particular member payment number. For example, the initial entry is sequence 1 on AV_MBR_DTL; the adjusted entry is sequence 2 on AV_ADJ_MBR_DTL; and the corrected entry is sequence 3 on AV_MBR_DTL.

Note. Adjusted transactions negate the original transaction and create a new transaction record, so you enter adjustment amounts just as you would if entering the correct original transaction.

For gifts entered through membership, fiscal year and gift date information on the GIFT record are based on the membership data entry date, not the membership start date. This also applies to any changes made through Membership Adjustment.

Pages Used to Adjust Membership Dues Payments

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Member Adjust Summary	AV_ADJ_MBR_SMRY	Contributor Relations, Session Management, Enter Memberships, Membership Adjustment, Member Adjust Summary	Select the membership transactions to adjust in this adjustment session.

Page Name	Definition Name	Navigation	Usage
Member Adjust	AV_ADJ_MBR	Contributor Relations, Session Management, Enter Memberships, Membership Adjustment, Member Adjust	Make adjustments to an existing membership transaction that you selected on the Membership Adjustment Summary page.
Designation Adjust	AV_MBR_ENTRY2	Contributor Relations, Session Management, Enter Memberships, Membership Adjustment, Designation Adjust	Make adjustments to assigned designations or to the links between the membership and other constituents.

Selecting Posted Dues Transactions to be Adjusted

Access the Member Adjust Summary page (Contributor Relations, Session Management, Enter Memberships, Membership Adjustment, Member Adjust Summary).

Member Adjust Summary Member Adjust Designation Adjust							
Business Unit: PSUNV		Session Number: 160		Institution: PSUNV		Maintain Sessions	
Adjust Member Payment

53	AV0001	Gallegher, Shawn	ALUMASSN	ANNL	25.00	25.00	USD

Member Adjust Summary page

Member Payment Number Enter the original number for the transaction to adjust. Available values include the existing posted membership payments for the ID that you select.

Note. You must enter an ID before selecting a membership payment number.

Note. You can further narrow the search by entering a member organization code and data entry date in the prompt dialog box. When you enter a member organization code, the system displays the existing dues transactions for the member organization that you select. When you enter a data entry date, the system displays the transactions entered on or after the date that you enter.

Add Adjustment Click to display the Membership Adjustment page, where you can change transaction information.

Important! The original transaction must be posted before you can adjust it. If a transaction does not appear in the Mbr Pmt Nbr field, it is likely part of an unposted session. If the session has not been queued, you can change the membership in the original session by reopening the session, if balanced.

Adjusted Member Payments

Click the link next to a row of transaction data to display that transaction on the Membership Adjustment page, where you can make changes.

Adjusting Dues Payment Details

Access the Member Adjust page (Contributor Relations, Session Management, Enter Memberships, Membership Adjustment, Member Adjust).

Member Adjust Summary		Member Adjust		Designation Adjust	
Business Unit: PSUNV		Session Number: 160		Institution: PSUNV Maintain Sessions	
Membership Detail Find View All First 1 of 1 Last					
	ID: AV0001	Gallegher, Shawn	Alumni	2001	
*Reason:	Data entry error		☐ Refund		Add Membership
Membership Number: 53					
*Member Org:	ALUMASSN	Alumni Association			
Level:	ANNL				
*Appeal:	CALL	Phone Call			
Dues Amount: 25.00 USD		Data Entry Date: 11/05/2004			
Tender: CHK	Check	Periods: 1		Start Date: 11/05/2004	
Total Amount: 25.00 USD		Expiration Date: 11/05/2005		Membership History	

Member Adjust page

Important! Adjusted transactions negate the original transaction and create a new transaction record, so enter adjustment amounts just as you would if entering the correct original transaction.

Refund	Select if the adjustment results in a refund to the member.
Membership Number	Displays the original membership number for the transaction to adjust. You selected this value on the Membership Adjustment Summary page. Existing information for the transaction is copied to the new transaction.
Expiration Date	This field is also editable for all lifetime members. You can use it to change the end date for both regular and complimentary lifetime memberships.

Important! The original transaction must be posted before you can adjust it. If a transaction does not appear in the Member Payment Number. field, it is likely part of an unposted session. If the session has not been queued, you can change the membership in the original session by reopening the session, if balanced.

Canceling a Membership

To cancel a membership:

1. Select an adjustment reason.
2. (Optional) Select the Refund check box.
3. Change the dues total amount to *0.00*.
4. Enter an expiration date for the membership.
5. Make any other adjustments to field values as necessary.
6. Click Save.

The system processes the adjustment as follows:

1. The system confirms that the membership is not complimentary.
2. The system searches for the last nonzero adjusted membership payment, or the last zero-amount complimentary membership payment, and designates that last payment as the current membership.

If the system does not find any membership payment, it deletes the membership record on the AV_MEMBERSHIP table. Member detail and adjusted member detail records remain for audit purposes.

3. The system performs these processing steps not only for the member but also for all joint memberships that are affected by the adjustment.

When you cancel a membership, it no longer appears in the constituent's membership history. The system does not display adjusted or deleted memberships.

Adjusting Designation and Associated Constituent Information

Access the Designation Adjust page (Contributor Relations, Session Management, Enter Memberships, Membership Adjustment, Designation Adjust).

Designation Adjust page

You can apply portions of a payment to multiple designations at your institution. For each designation, you must associate a specific membership or campaign initiative and appeal. In addition, you can indicate whether a membership is joint, given as a gift, or a referral. You select the people or organizations associated with the membership in these capacities.

When you access this page, the system displays the default designations, initiatives, appeals, and amount defined for the member organization on the Member Dues page. For dues, you can edit the Initiative and Amount fields.

If your institution opted to allow entry of additional gifts from this component, you can select additional designations. The amounts distributed among designations must equal 100 percent of the total amount received.

Designation Total

Percent

Displays the percentage of the membership dues amount that has been allocated to designations. Before you can save the page, this percent must equal 100.

The system displays less than 100 percent when the constituent donated more than the dues amount. For example, if the dues amount is 100 USD, and the constituent donated 100 USD in addition to the dues amount, the percentage is 50 until you allocate the extra 100 USD to a designation.

Amount

Displays the amount of the total membership dues or gift amount that has been allocated to designations.

Designation Detail

Business Unit

Select the designation business unit to which the gift payment is being allocated. For dues transactions, the system populates this field by default with the business unit that you selected for the session; the value cannot be changed.

If you are adjusting the designation row, the available values are all business units at your institution to which security access has been granted. When you make a selection, the values in the Designation and Appeal fields change to display the values that you defined for the business unit's setID.

If you have already selected a designation and appeal, and then change the business unit, your selections are backed out.

Designation

The designations that you defined for the dues level for the member organization on the Membership Dues page appear on this page and cannot be edited.

If your institution allows the entry of gifts in membership sessions and there are gifts included in the transaction that you are adjusting, you can edit this field. You can select additional designations or make changes to the designations for the gift portion of the transaction.

If you select a new designation, the available values are the designations that you defined for the business unit's setID.

Initiative

You can make changes to this field. The available values include all the current campaign and membership initiatives defined at the institutions to which you have security. The system displays the default initiative that you defined for the member organization on the Membership Dues page, but you can edit this value.

Appeal

The appeal that you chose on the Membership Adjustment page is used for all designation entries derived from the Membership Dues page and cannot be edited here. To change the appeal, return to the Membership Adjustment page and select a new appeal code.

If your institution allows the entry of gifts in membership sessions and there are gifts included in the transaction that you are adjusting, you can edit this field. You can select additional appeals or make changes to the appeals for the gift portion of the transaction.

If you select a new appeal, the available values include the appeals that you defined for the business unit's setID.

Amount

If your institution allows the entry of gifts in membership sessions, and there are gifts included in the transaction that you are editing, you can edit this field.

The system displays the dues amount that you entered on the Membership Dues page for the member organization, but you can edit it for increases only.

Joint Records

Member Type

Make any necessary changes to the Membership Type field to indicate whether the membership is *Joint*, a *Gift*, or a *Referral*.

Preparing for Membership Letters

The PeopleSoft system provides two mass change templates that enable you to generate communications specifically for membership organization members. Use these templates, along with the Audience Criteria and Defaults and run the 3C Engine with the Mass Change pages to generate communications for a membership audience.

In the 3C Engine component (Campus Community, 3C Engine, Run 3C Engine) you can process both the trigger and mass change at the same time on the 3C Engine Parameters page. Then, select a mass change group ID on the Mass Change page. You also have the option to edit the mass change definitions.

Note. By selecting the *Both* option on the 3C Engine Parameters page, the system runs the mass change and also uses the trigger created to write the communication record.

Viewing Membership Progress

This section discusses how to view membership progress.

Viewing a Membership Summary or a Supervisor's Membership Summary

This section discusses how to view membership summary information.

Page Used to View a Membership Summary or a Supervisor's Membership Summary

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Membership Summary, Supervisor Membership Summary	AV_MBRSHIP_SMRY	- Contributor Relations, Session Management, Supervise Sessions, Membership Sessions, Membership Session Summary - Contributor Relations, Session Management, Supervise Sessions, Membership Sessions, Supervisor Membership Summary	View information about the membership transactions in a session.

Viewing Membership Summary Information

You can view information about your own sessions on the Membership Summary page, and information about your staff's sessions on the Supervisor's Membership Summary page.

The membership number, start date, expiration date, ID and constituent name, dues amount, and total amount appear for each transaction in the session that you selected.

If the membership session that you selected is open, select a transaction and click the Edit Mbr (edit member) button to make changes to an existing transaction. Click the Details button to view detailed information about a particular transaction on the Membership Detail page.

Chapter 14

Managing Volunteers

This chapter provides an overview of volunteer management and discusses how to:

- Manage general initiative information.
- Assign volunteers to roles.
- Assign volunteers to specific tasks.
- Create a biographical bit or brief.
- Review volunteer history.
- Review volunteer audience history.

Understanding Volunteer Management

This section lists prerequisites and discusses volunteer management.

Prerequisites

Before you can manage a volunteer effort, you must have one set up. There are common initiative setup pages for this task, and also volunteer-specific setup pages that enable you to complete volunteer effort setup.

Before you can assign volunteers to tasks, roles, and projects, you must set up your system's volunteer data.

Volunteer Management

When you create an initiative or define a membership organization, you can create the volunteer structure necessary for the effort to succeed. You can then assign volunteers to the positions within the volunteer structure and assign additional volunteers to perform specific tasks.

A volunteer effort is one type of initiative in Contributor Relations. All initiative types share some common management pages. Some initiatives, such as volunteers, require additional management that is specific to their purpose. The volunteer-specific management is covered in this chapter; refer to the following chapter for information about managing all types of initiatives.

Managing General Initiative Information

You manage volunteer efforts in Contributor Relations by using the common initiative functionality found throughout the system. Initiatives are the common link between campaigns, events, volunteer efforts, and membership initiatives at your institution.

A volunteer initiative is used to manage a volunteer effort. It has its own audience, resources, related initiatives, and PR plan. Use the chapter referenced below to define the basics for the initiative. You can then use this chapter to manage the remaining volunteer-specific functionality.

Assigning Volunteers to Roles

One of the ways to link volunteers to a project is to assign them to a role within a leadership group.

This section discusses how to

- Assign volunteers to roles within the structure.
- Create subgroup volunteer assignments.

Pages Used to Assign Volunteers to Roles

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Volunteer Group Assignments	AV_VOL_GRP1_ASGN AV_VOL_GRP1_ASGN_M	• Contributor Relations, Initiatives, Volunteer Initiatives, Initiative Leadership, Volunteer Group Assignments • Contributor Relations, Initiatives, Volunteer Initiatives, Membership Org Volunteers, Member Organization Leadership, Volunteer Group Assignments	Begin the process of assigning volunteers to the positions outlined in the volunteer structure. When you save the Leadership Group and Sub-Group pages, the system populates this page with each position that you outlined in the structure so that you can assign volunteers to them.

Page Name	Definition Name	Navigation	Usage
Sub-Group Assignments	AV_VOL_GRP2_ASGN AV_VOL_GRP2_ASGN_M	- Contributor Relations, Initiatives, Volunteer Initiatives, Initiative Leadership, Sub-Group Assignments - Contributor Relations, Initiatives, Volunteer Initiatives, Membership Org Volunteers, Member Organization Leadership, Sub-Group Assignments	Begin the process of assigning volunteers to the subgroup positions outlined in the volunteer structure.

Assigning Volunteers to Roles Within the Structure

Access the Volunteer Group Assignments page (Contributor Relations, Initiatives, Volunteer Initiatives, Initiative Leadership, Volunteer Group Assignments). This page populates with the roles you defined on the Volunteer Structure page. Here, you can assign volunteers to fill each position outlined in the structure.

Sub-Group Assignments page

Scroll through the list of roles and term lengths and enter the Volunteer ID, Start Date, and (optional) End Date for each assignment to the volunteer structure.

Important! If a required position has not been filled when you save this page, a warning message appears. You can assign a volunteer to the required position or you can save without assigning a volunteer.

Assigning Volunteers to Specific Tasks

One of the ways to link volunteers or groups of volunteers to a project is to assign them to a specific volunteer task.

This section lists prerequisites and discusses how to:

- Assign volunteers and groups to tasks.
- Enter constituent data and volunteer evaluations.

Prerequisites

Before you can assign volunteers to projects, you must:

- Define assignment types on the Assignment Type page.
- Define a volunteer initiative on the Volunteers page.
- Set up contact types on the Contact Types page.

Pages Used to Assign Volunteers to Specific Tasks

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Volunteer Assignments 1	AV_VOL_ASGN1 AV_VOL_ASGN1_M	Contributor Relations, Initiatives, Volunteer Initiatives, Initiative Volunteers, Volunteer Assignments, Volunteer Assignments 1	Begin the process of assigning individuals and volunteer groups to specific tasks.
Volunteer Assignments 2	AV_VOL_ASGN2 AV_VOL_ASGN2_M	Contributor Relations, Initiatives, Volunteer Initiatives, Initiative Volunteers, Volunteer Assignments, Volunteer Assignments 2	Continue the process of assigning individuals and volunteer groups to specific tasks.

Assigning Volunteers and Groups to Tasks

Access the Volunteer Assignments 1 page (Contributor Relations, Initiatives, Volunteer Initiatives, Initiative Volunteers, Volunteer Assignments, Volunteer Assignments 1). You have already defined a volunteer leadership structure and volunteer roles; use this page to assign individuals and groups to specific tasks related to the initiative.

Volunteer Assignments 2 page

- ID** Enter the ID of the constituent the volunteer is to contact. The person's name appears to the right of this field.
- Contact Type** Select the type of communication that the volunteer is expected to have with the constituent. Contact types are defined by your institution. If you enter an ID, you must select a contact type.
- Completed** Select when the contact with the volunteer is complete.
- Effectiveness Rating** Record a volunteer's performance on a limited basis. Valid ratings are *Excellent*, *Good*, *Fair*, and *Poor*.
- Assign Again** Select to assign the volunteer again in the future.
- Potential Leader** Select if the volunteer has demonstrated potential as a leader.
- Future** Enter any recommendations for involving this volunteer further. This is a free-text field.

Creating a Biographical Bit or Brief

Use the Biographic Profile component to prepare and generate biographic reports about potential volunteers and constituents in the system. The Biographic Report page enables you to select criteria to include in the report, so you can create anything from a comprehensive report (used to qualify a volunteer) to a limited report about a constituent (for a volunteer to use during contacts).

Reviewing Volunteer History

This section discusses how to review volunteer history information.

Pages Used to View Volunteer History

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>

1 Annual Fund Campaign	Legislative			11/01/1998		7 years 7 months 6 days
2 Annual Fund Campaign	Arizona High Schools			07/01/1998		7 years 11 months 6 days

Volunteer History page

Search

Click to return all volunteer history records that fall within the time frame you selected.

Volunteer Group and Volunteer Sub Group

These columns display the group or subgroup to which the volunteer belongs.

Volunteer Role

Click the link to access the Volunteer Assignment Detail page, where you can view detailed information about the volunteer's activity.

Reviewing Volunteer Audience History

Use the Audience History page to view all of the target audiences to which a volunteer or potential volunteer belongs. Audiences are defined for both initiatives and membership organizations and are based on a variety of attributes. For example, an audience might consist of all constituents or volunteers who have an involvement of GOLF.

Chapter 15

Managing Event Initiatives

This chapter provides an overview of event initiative management and discusses how to:

- Manage general initiative information.
- Prepare for initiative letters.
- Set intermediate goals for events.
- Create events.
- Assign meeting details.
- Track event attendance.
- Create event templates.
- Review events, meetings, and attendees.
- View a to do list.

Understanding Event Initiative Management

This section lists prerequisites and discusses event initiative management.

Prerequisites

Before you can manage an event initiative, you must have one set up. There are common initiative setup pages for this task, and also event-specific setup pages that enable you to complete event initiative setup.

Event Initiative Management

Events can range from a simple banquet to a labor-intensive multi-day reunion, and their purpose can be either to generate significant revenue or solely to build your constituent community. No matter the goal, each event requires planning time and staff attention to ensure success. Contributor Relations provides the capability to effectively plan, manage, and track these events.

Contributor Relations Event Management functionality interfaces with the Event Management functions found in PeopleSoft Campus Solutions. The processes of creating events, assigning meeting details, tracking attendance, creating event templates, and tracking events are identical to the processes found in the Campus Solutions system.

In addition to the functionality provided through Campus Solutions, Contributor Relations provides the tools to define an event's structure or planning path.

An event initiative is one type of initiative in Contributor Relations. Although all initiative types share some common management pages, event initiatives have their own audience, resources, related initiatives, and PR plan. Some initiatives, such as events, require additional management that is specific to their purpose. The event-specific management is covered in this chapter; refer to the following chapter for information about managing all types of initiatives

Managing General Initiative Information

You manage events in Contributor Relations by using the common initiative functionality found throughout the system. Initiatives are the common link between campaigns, events, volunteer efforts, and membership initiatives at your institution.

To manage an event initiative, one must exist; that means that you have defined the basic features of the event initiative, its audience, resources, any related initiatives, and a public relations plan. You can then use this chapter to manage the remaining event initiative-specific functionality, including setting goals and managing the details of the event.

Preparing for Initiative Letters

PeopleSoft provides two mass change templates that enable you to generate communications specifically for initiative audiences. Use these templates, along with the audience criteria and defaults, and run the 3C Engine with the Mass Change pages to generate communications for an initiative audience.

You can use a one-stop approach in the 3C Engine component (Campus Community, 3C Engine, Run 3C Engine). Select to process *Both* the trigger and mass change at the same time on the 3C Engine Parameters page. Then, select a Mass Change Group ID on the Mass Change page. You also have the option to edit the mass change definitions.

Note. By selecting the *Both* option on the 3C Engine Parameters page, the system runs the mass change and also uses the trigger created to write the communication record.

Setting Intermediate Goals for Events

This section discusses how to set goals or milestones for an event.

Page Used to Set Intermediate Goals for Events

Page Name	Definition Name	Navigation	Usage
Event Goals	AV_INTV_EVNT_GOAL	Contributor Relations, Initiatives, Event Initiatives, Manage Event Initiatives, Event Goals	Set intermediate goals or milestones for an event.

Setting Event Goals

Access the Event Goals page (Contributor Relations, Initiatives, Event Initiatives, Manage Event Initiatives, Event Goals).

Event Goals

Event: 10YRREUN 10 Year Reunion **Institution:** PSUNV

Financial Goal: 0.00 USD **% Particptn Goal:** 0.00

Intermediate Goals/Milestones Find | View All First 1-4 of 4 Last

*Target Date	*Goal Type	Pers/Org	Audience Code	Amount/Pct/Total
06/06/2006 31	Attendance	Pers		250
07/25/2006 31	Attendance	Org		20
08/25/2006 31	% Participation			90.00
01/04/2007 31	Attendance			400

Event Goals page

Upon entering this page, the Financial Goal and % Particptn Goal for the event appear. These goals are defined on the Event Initiative page.

Target Date	Enter the date by which the goal may be reached
Goal Type	Select the measurement by which you track the goal's progress. Valid goal types are % <i>Income</i> , <i>Financial</i> , % <i>Participation</i> , <i>Number of Donors</i> , and <i>Number of Volunteers</i> . Your institution can define additional goal types.

<i>Target Date</i>	<i>Enter the date by which the goal may be reached</i>
Audience	Enter the audience code to which the goal pertains. The field contains a list of all the populations defined by your institution with the type of <i>Segmentation</i> for this initiative on the Audience page.
Amount/Pct/Total	Determine whether you are tracking percentages, amounts, or total numbers and enter the appropriate goal amount.

Creating Events

Use the Event and Event Template pages to initially create an event and set up any associated meetings. When you create a new Event the system assigns an Event ID to the event. This ID is the link between these pages and the pages used to structure an event.

The meetings you associate with an event can be receptions, dinners, golf tournaments, lectures, and so on.

Assigning Meeting Details

After you have added meetings to an event in the Meeting Template page you still need to add details about those meetings such as dates, times, and locations. This is done using the Meeting Detail pages. Meetings can also be added to an event using these pages.

Tracking Event Attendance

You have the option of tracking attendance at the meetings associated with an event. You probably want to track attendance for conferences, but not necessarily for department meetings.

Creating Event Templates

An event template is made up of definitions of the meetings that make up that event and the resources required by those meetings. It is not necessary to create event templates before creating events. However, event templates are useful if you organize a particular type of event often and that event tends to require the same resources and staff each time. Event templates are also useful in that they can act as guidelines for assigning staff and resources for events. Some event templates may have been set up during the setting up of your system. If the event template you want is not set up, you probably want to create one.

Important! You can create only one event template for each event type.

Reviewing Events, Meetings, and Attendees

After you have planned your events there are many ways you can review all of the event information. You can view:

- Events by facility.
- Meetings for an event.
- Attendees for an event.
- Attendees for a meeting.
- Meetings for a specific attendee.
- Events for a specific attendee.

Viewing a To Do List

Use the Staff, Volunteer, and Unit To Do List pages to view lists of all the actions a resource is responsible for during a particular time frame or for a particular designee.

Chapter 16

Managing Other Initiatives

This chapter provides an overview of other initiative management and discusses how to:

- Manage general initiative information.
- Prepare for initiative letters.
- Set intermediate goals.
- View to do lists.

Understanding Other Initiatives

This section lists prerequisites and discusses other initiative management.

Prerequisites

Before you can manage a type of other initiative, you must have one set up. There are common initiative setup pages for this task.

Other Initiative Management

The Other Initiatives portion of Contributor Relations provides the flexibility to manage initiatives that do not fall within the boundaries of a campaign, event, membership initiative, or volunteer effort. Other initiatives provide the flexibility to identify initiatives that are important only to your institution's business process, that cannot be categorized as one of the initiative categories above. An example would be an initiative created to send constituents a birthday greeting each year.

Other initiatives are one type of initiative in Contributor Relations. Other initiative types share common management pages with all initiatives. Refer to the following chapter for information about managing all types of initiatives.

Managing General Initiative Information

You manage other initiatives in Contributor Relations by using the common initiative functionality found throughout the system. Initiatives are the common link between campaigns, events, volunteer efforts, and membership initiatives at your institution.

To manage an initiative, one must exist for each new other initiative at your institution. That means that you have defined the basic features of the initiative, its audience, resources, any related initiatives, and a public relations plan. You can then use this chapter to manage the remaining initiative-specific functionality.

Preparing for Initiative Letters

PeopleSoft provides two mass change templates that enable you to generate communications specifically for initiative audiences. Use these templates, along with the Criteria and Defaults and Run Mass Change pages to generate communications for an initiative audience.

Setting Intermediate Goals

This section discusses how to set intermediate goals for an other initiative.

Page Used to Set Intermediate Goals

Other Initiative Goals page

Upon entering this page the Financial Goal and Participation Goal for the initiative appear. These goals are defined on the Other Initiatives page. However, some initiatives do not have goals because they exist to build goodwill; therefore you would not expect a return of any kind.

Target Date

Enter the date by which the goal may be reached.

Goal Type

Select the measurement by which you track the goal's progress.

Audience Code

Enter the audience code to which the goal pertains. Available options include all the populations defined for this initiative with the type of *Segmentation* on the Audience page.

Viewing To Do Lists

Access the Staff, Volunteer, and Unit To Do List pages to view lists of all the actions a resource is responsible for during a particular time frame or for a particular designee.

Chapter 17

Entering Commitments

This chapter provides an overview of the gift and pledge process, lists common elements, and discusses how to:

- Create and work with sessions.
- Manage sessions.
- Enter gifts and pledge payments.
- Load mass gift and pledge transactions.
- View gift session transactions.
- Adjust gifts and matching gifts.
- Adjust gift and membership credit card payments.
- Enter conditional pledges.
- Enter pledges.
- View pledges.
- Adjust pledges.

Understanding the Gift and Pledge Process

Using Contributor Relations, you can apply multiple designations, or allocation accounts, to a single gift or pledge. For each designation you apply, you select an associated campaign and appeal. You can also recognize one or more donors for a single gift or pledge in the form of hard or soft credits. Hard credits represent actual gift monies, while soft credits represent credits such as vehicle and memo credits. Gifts can also be designated in honor or memory of a particular person and tracked as such.

When entering pledges in Contributor Relations, you also set up a pledge payment schedule. Pledge payment schedules can be set up so that payments are due in regular increments of time such as weekly, monthly, and so on. Or, you can create an irregular payment schedule, where you specify the date and amount of each pledge payment.

In addition, many donations can be matched by employers or by other organizations with which the donor is affiliated. Using Contributor Relations, you can track information about the types of gifts organizations match, then have the system calculate a "best guess" of the potential matches for a particular gift. You can overwrite that "best guess" to reflect the actual matching amount expected for a gift, then track actual matching payments against your expectations.

After a session of gift or pledge transactions is posted, you can make necessary adjustments through an adjustment session. When you adjust a transaction, the system negates the original transaction you created, and stores the adjusted one.

In addition to creating sessions of transactions, you can create Conditional Pledges, which hold pledge information that only becomes valid when particular conditions are met. For example, if Shawn Gallagher pledges 40,000 USD to the 2005 Fund Campaign, but will only give that amount when you have raised 2,000,000 USD, his pledge is conditional. You can transfer the information you enter about conditional pledges to the actual pledge transaction after the conditions are met and the pledge is activated.

After transactions are entered in the system, you can track a donor's giving patterns and history. You can view giving information from a very high level, such as a commitment summary (which is a summary of a donor's total commitments and giving history), down to a very detailed level, such as a transaction register (which shows how a transaction is allocated to a designation). In addition, you can generate acknowledgement letters and receipts to recognize donor's gifts.

Common Elements Used in This Chapter

ID Type	Select whether the donor is a person or an organization.
ID or Org ID	Displays the donor's ID or enables you to enter the ID of the donor to work with. The donor's name or description may appear to the right.
Constituent	Displays the donor's name if it is a person, or description if it is an organization. The donor's highest priority constituent type may appear to the right.
Search	Click to access the Search Criteria page where you can search for a donor.
	Click to paste a carried ID found using Search/Match functionality.
Recognition	Select a type of credit the donor is receiving, such as <i>Hard</i> , <i>Soft</i> , <i>Vehicle</i> , and so on. Recognition types are defined by your institution, but always contain at least one hard credit type.
Anonymous	Select if the donor receiving recognition does not want public recognition for the gift. There is no automated process of anonymity in the system. However, the Anonymous check box on the Giving Profile is selected if any gift a donor makes is anonymous.
Description	Enter any descriptive text to track about the gift or pledge.
Maintain Sessions	Click to access the Maintain Sessions page where you can check expected and actual amount and balance the session.
Session Defaults	Click to view or update the defaults you set for this session using the Session Defaults page.
Session Details	Click to access the Session Details page where you can view information about all the transactions in the session. You can access specific transactions to update or delete them from this page.

Creating and Working with Sessions

Gift and pledge transactions are entered in sessions, which are groups of gifts, pledges, or adjustment transactions. When you create a session, you enter expected counts and amounts, and can select default values to carry throughout transactions in the session.

The gift and pledge process requires several steps to get gift and pledge transactions entered and in some cases ultimately posted to your institution's financial system. Portions of this process are most likely handled by a supervisor or an automatically scheduled process, while others are handled by the gift entry user.

Following are the steps required:

1. Open a gift or pledge session for a business unit.

This session can be a regular entry session or an adjustment session. Establish expected counts and amounts, and (optional) select session defaults.

2. Enter transactions into the session by following the processes for gift entry, pledge entry, gift adjustment, or pledge adjustment.

Assign each transaction to one or more designations and apply hard and soft recognition. Designations are funds at your institution to which donations and pledges can be allocated.

3. Balance the session, then queue it for posting using the Queue Sessions for Posting page.

4. Run the GL Interface process.

This process can be run manually, but most often it runs automatically using Process Scheduler. This process copies the transaction data from the system into a table called AV_ACCTG_LN. In this table the transactions are associated with the appropriate account in your institution's financial system based on the item types used when you set up designations.

5. For commitment transactions to appear on the Inquiry pages, you must then run the Accumulator process.

and [Chapter 18, "Processing Commitments," Understanding the Constituent Accumulators Process, page 494.](#)

Managing Sessions

This section discusses how to:

- Initialize and balance a session.
- Select session defaults.
- View session detail and select transactions to edit or delete.

[Balance](#) [Session Entry](#) [Session Matching Gifts](#)

Maintain Sessions page

Before you can enter gift, pledge, or adjustment transactions, you must create a new session. Sessions are essentially groups of like transactions within a business unit that balance together. Sessions are controlled by the user who creates them, but can be transferred between users by Gift and Pledge Supervisors.

Initializing the Session

Currency Code

Enter a currency code for the session. It defaults to the base currency for your business unit, but can be changed.

Note. You cannot mix currency codes within a session.

The currency code you select becomes the currency used for all transactions entered in this session. However, gift amounts are stored in your institution's base currency, and related inquiry pages display gift information in your institution's base currency. Additionally, you have the ability to view information about the currency in which the transaction was entered and the exchange rate.

Note. Pledge and Pledge Adjustment sessions can only be entered using the business unit's base currency. You cannot change the currency code in these instances.

Deposit Number

Enter a bank deposit number associated with this session. This field is informational only and is not tied to any processing; however, it can assist your institution during periodic bank statement reconciliation.

Tender Type

Select a tender type for which you enter transactions from the prompt box. The tender type represents all the transactions in a session that match the tender type when you enter actual totals.

Note. You can mix multiple tender types within a session.

The values that appear in the prompt box depend upon the values you set up for on the Tender Types page for the setID associated with the business unit for this session.

If you are establishing a pledge or pledge adjustment session, the tender type of *Pledge* automatically populates this field.

If you are establishing a membership or membership adjustment session, the tender type of *Complimentary* automatically populates the first row of this field. If you plan to enter complimentary memberships within the session, indicate the number of complimentary membership transactions you plan to enter in the expected count field for this row. For regular membership dues transactions, enter the tender type, expected count, and expected amount on additional rows just as you would with a gift session.

Expected Count

Enter the number of transactions you expect to enter in your session with the tender type you selected. The expected count must be at least 1.

Expect Amount (expected amount)

Enter the total amount of donations or pledges you expect to enter with the tender type you selected. You can enter an expected amount of zero to allow for zero-amount gifts such as gifts-in-kind.

Session Entry

Click to begin entering transactions. An intermediate page appears before the transaction entry page; click the Add button to add a transaction to the session.

Balancing the Session

After transactions are entered in the session, verify that the expected count and expected amount values match the actual count and actual amount values. The expected values are those you enter before adding transactions in the session, and the actual values are calculated by the system as transactions are entered and applied to the session. The expected and actual values must match for a session to balance. If these values do not match, the difference between the two is displayed in the difference count and difference amount fields.

If the expected and actual amounts do not match, you must return to the session and correct the imbalance.

Self-Service Session

If this check box is selected, indicates that this open session contains gifts created through self-service online giving.

Balance

Click to balance the session when transactions are entered and the expected totals equal actual totals. The system sends an alert if some expected matching gifts have not been made.

Session Matching Gifts

Click to run a COBOL process that analyzes all of the gifts made and generates any expected matching gifts.

Note. If the transaction does not balance and you suspect a data entry error, a person who has been assigned the role of GPS (gift and pledge supervisor) or MS (membership supervisor) supervisor in the system can reopen the counts and amounts to correct the error.

When the session balances, it is available to queue and post.

Selecting Session Defaults

Access the Session Defaults page (Contributor Relations, Session Management, Enter Gifts, Maintain Gift Sessions, Session Defaults). The page populates with user default values, defined on the Operator Defaults page. However, you can override the values as needed, or change defaults mid-session. Setting defaults here speeds transaction entry during a session.

Session Default			
Business Unit:	MEDBU	Medical Business Unit	Carry Transaction:
Designation:	MEDICALBLDG	Medical School Building Fund	
Initiative Code:	MED BLDG	Medical Building Campaign	
Appeal Code:	ANNUAL	Annual Fund	
Tender Type:	CHK	Check	

Balance Session Entry

Session Defaults page

Business Unit	Enter the default value to populate the Business Unit field when assigning designations for transactions in this session.
Designation	Enter the default value to populate the Designation field when assigning designations for transactions in this session.
Initiative Code	Enter the default value to populate the Campaign field when assigning designations for transactions in this session.
Appeal Code	Enter the default value to populate the Appeal field when assigning designations for transactions in this session.
Tender Type	Enter the default value to populate the Tender Type field when entering information on the Gift Entry page for transactions in this session. If you are creating a pledge session, the Tender Type field does not appear.

Carry Transaction

Select a transaction number to carry all the values from that transaction to subsequent transactions in the session. To do this, you must have established at least one transaction. When you select a transaction number, all information from the transaction populates into subsequent transactions, with the exception of donor ID, recognition, and tribute information. The values override any other session defaults you have selected on this page.

This feature is useful when entering a number of donations with the same amounts, designations, and so forth such as alumni membership dues.

Note. If you select a new business unit, the remaining fields on this page default to the values set as user defaults for that business unit; however, you can override these values.

Viewing Session Details and Selecting Transactions to Edit or Delete

Access the Session Detail page (Contributor Relations, Session Management, Enter Gifts, Maintain Gift Sessions, Session Detail). Not only can you view session details here, but you can also select transactions to edit or delete.

Maintain Sessions	Session Defaults	Session Detail	Session View
Business Unit:	GLAKE	Session Number:	178
Status:	Open	Last Modification Date:	06/05/2006
Date Opened:	06/05/2006	Balance Date:	
		Post Date:	
		Total Count:	2
		Total Amount:	1,000.00 USD

☐	335	AV4013	Fratt,Cooper	06/05/2006	CC	500.00

[Add Gift](#)

Session Detail page

Information about the session appears, including a total count and amount of the transactions in the session.

Select

Select the check box next to each transaction to mark it for deletion from the session.

Gift Number or Pledge Number	This field displays the number (depending on the type of session you are working with) associated with the transaction. If you are working in a gift or pledge entry session, click this link to access the Gift Entry or Pledge Entry page where you can update the transaction if the session status is <i>Open</i>. If you are working in a gift or pledge adjustment session, click this link to access the Gift Adjust or Pledge Adjust page, where you can make necessary changes to the transaction.
Gift Date or Pledge Date	Displays the date on which the gift or pledge was made to your institution.
Tender	Displays the tender in which the gift was made. Tender types are defined by your institution on the Tender Types page.
Gift Amount or Pledge Amount	Displays the monetary amount of the gift or pledge.
Delete	Click to remove the selected transactions from the session. All information related to the transaction will be deleted from the session. Deleting within an adjustment session removes the adjustment transaction, but the original gift or pledge transaction remains.
Add Gift or Add Pledge	If you are working with a gift or pledge entry session, click to add additional transactions to the session on the Gift Entry or Pledge Entry page.

Adjusting Gifts and Pledges

You can also use this page to select the donors and gift numbers for the transactions to adjust. Gifts or pledges to be adjusted must first be posted through the GL Interface process. If a transaction needs to be corrected and the session is open or balanced and not yet posted, update the open session or reopen the balanced session and edit the entry. A gift or pledge in a session that is queued must be posted to continue with the adjustment process.

To adjust a gift, enter *AG* in the Session Type field on the Session Filter page when creating a gift adjustment session. To adjust a pledge, enter *AP* in the Session Type field on the Session Filter page when creating a pledge adjustment session. You can then click the Session Details link on either the Gift Adjust or Pledge Adjust pages to access the Session Details page.

Gift Number or Pledge Number	After you enter an ID, enter the gift or pledge number associated with the transaction to adjust. The prompt provides a listing of transactions for the donor that are available for adjustment.
Add Adjustment	Click to add the transaction to the session for adjusting. The Adjust Gift or Adjust Pledge page appears.

Viewing a Session Tree

Access the Session View page (Contributor Relations, Session Management, Enter Gifts, Maintain Gift Sessions, Session View). This page displays all details of all gifts in the session, using a tree view structure.

Entering Gifts and Pledge Payments

This section provides an overview of gifts and pledge payments and discusses how to:

- Enter a gift or pledge transaction.
- Enter tender type details.
- Enter tribute details.

- Create soft gift entries.
- Identify potential matching gifts.
- Apply matching gifts.
- Receive a scheduled pledge.
- Update or add a constituent who is a person.
- Update or add a constituent who is an organization.

Understanding Gifts and Pledge Payments

After you've created a gift session, you can enter gift or pledge payment transactions into the session. Use the Gift Entry page to enter all the basic information pertaining to a transaction. In addition, you can update a donor's record, add a new donor, apply a matching gift, or apply a pledge payment using pages you access through links on the Gift Entry page.

To enter gift payments:

1. Initialize a session with the type of Gift, using the Maintain Sessions page.
and [Chapter 17, "Entering Commitments," Initializing and Balancing the Session, page 422.](#)
2. Select session defaults using the Session Defaults page.
and [Chapter 17, "Entering Commitments," Selecting Session Defaults, page 425.](#)
3. Enter transactions using the Gift Entry page.
and [Chapter 17, "Entering Commitments," Entering a Gift or Pledge Transaction, page 431.](#)
4. Balance, queue, and post the session.
and [Chapter 18, "Processing Commitments," Queuing Sessions for Posting, page 488.](#) and [Chapter 18, "Processing Commitments," Processing and Posting Sessions, page 489.](#)
5. (Optional) View the accounting lines generated for the gift session.
and [Chapter 18, "Processing Commitments," Viewing Accounting Lines, page 519.](#)

Gift Entry page

You can enter all the information necessary to store the transaction using this page and the pages accessed through links on this page.

Common Fields

Feed Gift

Clear this check box if you do not want to send the gift to the General Ledger. This check box is selected by default. This option is commonly used to record memo credits.

Click to access the Update Record page to either update an existing donor's record or add a new donor to the system.

Since the ID Type field on the Gift Entry page populates by default to *Person*, the page used to add or update a person's record appears by default. To access the page used to add or update an organization's record, select *Org* from the ID Type field, enter the organization's ID, then click the Update Record button.

If you have not entered a donor's ID, you will be prompted to enter one. You can either enter the donor's ID here or leave the prompt set to *NEW*. If you leave the prompt set to *New*, the system assumes you are adding a new donor and the pages for adding or updating a new donor appear.

Click to view the donor's history of commitments on the Transaction Register page.

After entering an ID, the Transaction Register page appears and displays information pertaining to the donor you selected.

Gift Detail

ID Type

Determine whether the donor is a person or an organization.

ID or External Org ID

Enter the ID number of the donor making the gift or pledge payment. When you enter an ID, the system automatically displays the name and constituent type. It also populates Recognition defaults for the user, including adding a row for any spouse on file.

Search

Click to access the Search/Match page where you can search for a donor.

Click to paste a carried ID found using Search/Match functionality.

Gift Amount

Enter the total amount of the donation. When you enter a gift amount, the system also populates the Amount and Charitable Amount fields in the Designations area, and also the Recognition and Amount fields in the Recognition area.

If you are entering this session using a currency other than the business unit's base currency, click to access the Display In Other Currency Page where you can view the amount in another currency and obtain exchange rate information.

Tender

Enter the monetary form in which the gift is received. Examples are *Cash*, *CC* (credit card), *CHK* (check), and so on.

The values that appear in the prompt box depend upon the values you set up for on the Tender Types page for the setID associated with the business unit for this session.

Tender populates by default to the tender you selected on the Session Defaults page for this session. If you do not select a default tender for the session, this field populates by default to the tender you selected on the CR Business Unit page as a default tender for the session business unit.

If you enter a tender type that has the *Allow Zero Amount* Special Field selected during setup, you can enter a Gift Amount of zero. Otherwise, the gift amount must be greater than zero.

Depending on the tender type you select, click this button to enter its appropriate details on the Tender Type Detail page:

For *Check*, enter the Check Number on the page that appears.

For *Credit Card*, enter the constituent's credit card information on the page that appears.

If the credit card gift was mass loaded, the system populates address information, based on the Address Type field selected on the Mass Load Gift/Pledge page. Mass loaded credit card transactions are treated as though the user had entered the credit card gift online.

For *GIK*, enter the constituent's gift-in-kind details on the page that appears.

For *Security*, enter the description and details of the constituent's securities on the page that appears.

Gift Type

Select the appropriate gift type from the valid gift types at your institution. Delivered gift types are *Gift*, *PP* (pledge payment), *GIK* (gift-in-kind), and *MG* (matching gift). Your institution can define additional gift types.

If you select *PP*, the Pledge field becomes active, so you can enter the number of the pledge associated with this payment.

Matching Gift is only a valid gift type when the donor is an organization.

Pledge

If this transaction is a pledge payment, select the associated pledge from the prompt box.

Gift Date

Enter the date on which the donation is given. This field populates by default to today's date.

Base Amount

If you are entering this session using a currency other than the business unit's base currency, the gift amount for the transaction appears in base currency in this field.

Note. When you save transactions entered in a currency other than your institution's base, the amounts are converted to and stored in base currency. When you view information about these transactions on inquiry pages throughout the system, they appear in base currency. However, you can view detail about the transaction currency and exchange rate by accessing the related detail page.

Matching Gifts

If the donor is a person:

Click to identify the organizations that might match this gift. You are prompted to run the matching gifts process. If you proceed, the system populates the Matching Gifts Page with its best guess at possible matches. If you do not run the automatic process, a blank Matching Gifts Page appears so you can manually enter an expected matching gift.

If the donor is an organization:

The Matching Gifts button does not appear unless the Gift Type is *MG*. Click to access the External Org Matching Gifts page where you can enter existing gifts to be matched. You can also instantly create a relationship with the organization and then create a matching gift for the person.

Important! You must assign designations and hard credit recognition prior to running the Matching Gifts process.

Open Pledges

If there are open pledges for the donor, this link is active. Click to view a list of the donor's outstanding pledges on the Open Pledge Register page.

Pledge Schedule

If there are open pledges for the donor, this link is active. Click to make modifications to the pledge payment schedule on the Pledge Schedule page.

Designations

You can apply donations to designations, or allocation accounts at your institution. For each designation you select, you must associate a specific campaign initiative and appeal. You can add the same designation to a gift, even if its associated campaigns are different.

When you enter this page, the system populates the Designations fields with values set on the Session Defaults page.

Business Unit

Enter the business unit that owns the designation, to which the gift or pledge payment is being allocated. The prompt box contains a list of all the valid business units at your institution, and populates by default to the value you selected from the Business Unit field on the Session Defaults page. When you make a selection, the values in the Designation and Appeal Code prompt boxes change to display the values you defined for the setID associated with this business unit. This is a required field.

If you have already selected a designation and appeal, then change the business unit, your selections are backed out.

Designation

Enter the designation to assign. Designations are funds at your institution to which donations and pledges can be allocated.

The values that appear in the prompt box include the designations you defined for the setID associated with the business unit you select on this page. The default value is the default designation you selected on the Session Defaults page.

Campaign

Enter a campaign, which is an organized institutional effort targeted to a specific constituency that occurs over a specified period of time with specific purposes and goals. The default value is the default initiative code you selected on the Session Defaults page.

Appeal Code

Enter an appeal code, which is the specific act or item that leads a donor to give, such as a visit, an annual phonathon, a letter, and so on.

The values that appear in the prompt box include the appeals you defined for the setID associated with the business unit you select on this page. The default value is the default appeal you selected on the Session Defaults page.

Amount

Enter an amount of the donation to allocate to this designation.

If you are entering gift transactions in a currency other than the business unit's base currency, the currency you selected is depicted on this page. However, for ease of reporting, designation information is stored by the system in base currency.

Charitable Amount

Enter the portion of the designated amount that is tax deductible.

Important! You can split the donation among several designations, but the total allocation must equal 100 percent of the gift amount. The designations you select for a pledge default when you enter payments for that pledge. Additionally, if the Pledge Payment Override Allowed flag is set, the user can edit the designations and recognition entries. If not, these fields fill by default from the pledge records and become unavailable for input.

Recognition

You can indicate which donors to recognize for a particular donation. Recognition can be assigned in the form of hard credit, or soft credits that are defined by your institution, such as memo and vehicle credits.

When your system is set up at your institution, you can define default recognition to split hard and soft credits between a donor and his or her spouse according to your institution's business practices. If these defaults exist, the system populates the Recognition fields.

Amount Enter an amount of the donation that gives this donor recognition.

If you are entering gift transactions in a currency other than the business unit's base currency, the currency you selected is depicted on this page. However, for ease of reporting, recognition information is stored by the system in base currency.

Important! You can split the recognition among several donors, but the total allocation of hard credit recognition must equal 100 percent of the gift amount. You can assign an unlimited percentage of soft credit for a single transaction.

Tribute

You can enter information about tributes, which are gifts made in honor or in memory of someone. You cannot enter a tribute amount that exceeds the amount of the gift or pledge being entered.

When you enter a pledge payment on the Gift Entry page during gift entry, the system displays all available tribute information associated with the pledge.

Tribute Type Select *In Memory* or *In Honor* to indicate whether the tribute is in memory of a deceased individual or in honor of an individual.

Name Identify the person receiving tribute or memorial recognition. It is not necessary to have an ID in the system to enter tribute and memorial information. If an ID does not exist, enter the person's name.

Notify Click to access the Tribute page, where you can attach staff IDs to the tribute.

Note. No workflow is delivered with the Tribute page.

Important! You cannot save a gift or pledge if the donor's ID has no constituent type assigned to it, as the CAE report requires a constituent type for each donor. If no constituent type is assigned, the system reminds you to assign one using the Update Record page.

Attachments

Click the View link to open the attachment in a new window. Click the Add Attachment button to upload a new attachment from within the component.

Creating Soft Gift Entries

This section discusses how institutions can enter soft dollar and soft credit-only gifts and pledges. These changes enable institutions to record gifts to the benefit of the donor.

Entering Soft Dollar Gifts and Pledges

The system allows you to make soft dollar gift entries that exceed the hard dollar gift or pledge amount. The system displays an informational warning, but still allows you to continue with the transaction.

In the Recognition group box on the appropriate gift or pledge page, you must enter a hard credit of 0 as well as the soft credit amount on zero-amount gifts only. If a gift of securities, for example, were being recognized with soft credit at a higher level than the hard credit amount, the hard credit would equal the gift amount.

PeopleSoft delivers two messages in the Message Catalog (PeopleTools, Utilities, Administration, Message Catalog) for this transaction:

Message Number	Message Text	Explanation	Condition to Appear
14305, 151	The amount for a recognition that is not the Hard Credit recognition is greater than the gift amount.	You have entered a recognition amount greater than the amount of the gift. You may save the gift as entered or correct the amount.	You enter a gift amount less than the soft credit amount.
14305, 152	The amount for a recognition that is not the Hard Credit recognition is greater than pledge amount.	You have entered a recognition amount greater than the amount of the pledge. You may save the pledge as entered or correct the amount.	You enter a pledge amount less than the soft credit amount.

Entering Soft Credit-Only Gifts and Pledges

You can enter soft credit-only gifts with a gift amount of zero. However, the tender type must be set up to allow zero-dollar gifts.

In the Recognition group box on the appropriate gift or pledge page, you can enter a soft credit value, up to 999 percent larger than the gift amount. If you enter soft credit in excess of 999 percent of the gift amount, the system displays an error message.

PeopleSoft delivers two messages in the Message Catalog (PeopleTools, Administration, Use, Message Catalog) for this transaction:

Message Number	Message Text	Explanation	Condition to Appear
14305, 153	Please reduce the Recognition Amount.	The Recognition Amount of the non-hard credit recognition exceeds 1000 percent of the Gift Amount.	You enter soft credit more than 999 percent of the hard credit gift amount.
14305, 154	Please reduce the Recognition Amount.	The Recognition Amount of the non-hard credit recognition exceeds 1000 percent of the Pledge Amount.	You enter soft credit more than 999 percent of the hard credit pledge amount.

Entering Tender Type Details

Access the Tender Type Detail page (Click the Tender Detail button on the Gift Entry, Membership Entry, Gift Adjustment, or Membership Adjustment page). This page changes depending on the tender type selected in the Special Fields field on the Tender Types setup page.

Tender Type Detail

Check Number:

2010

Enter the information requested exactly as it appears on your credit card.

***First Name:**

***Last Name:**

***Credit Card Type:** ▼

***Credit Card Number:** (ex: 4111-1111-1111-1111)

***Expiration Date:** ▼ / (ex: 01 / 2010)

***Security Code:** [What is a Security Code?](#)

Credit Card Billing Address

The billing address you specify must match your credit card company's records.

Country:  United States

Address: [Edit Address](#)

Email Address:

***Telephone:**

Tender Type Detail – Credit Card page

For mass loaded credit card gifts, the system populates the address information here based on the Address Type field selected on the Mass Load Gift/Pledge page. Mass loaded credit card transactions are treated as though the user had entered the credit card gift online.

First Name	If entering a credit card payment for a person, enter the first name as it appears on the credit card. Include any middle initial after the first name in this field.
Last Name	If entering a credit card payment for a person, enter the last name as it appears on the credit card. Include any suffixes (such as Jr., Sr.) after the last name in this field.
Organization Name	If entering a payment for an organization, enter the organization name.
Credit Card Type	Select the type of credit card the credit card holder is using. These values are set up on the Credit Card Type page.

Credit Card Number	Enter the credit card holder's card number. The length of the credit card number is established on the Credit Card Type page.
Expiration Date	Enter the expiration month and year as it appears on the credit card.
Security Code	Enter the security code as it appears on the credit card.
What is a security code?	Click this link to access an explanatory page explaining the reason for using a security code as well as its location on a credit card.
Email Address	Enter the email address of the credit card holder, including the full domain name, in the form name@host.domain. For authorization and credit transactions, the third-party processor requires a value in this field. Email addresses are defined on the Electronic Addresses page. If you do not have an email address for the contributor, the system uses the default email address you define on the CR Merchants page.

Click OK to validate any changed information, save, and close the page.

If you chose to use the check digit algorithm on the Credit Card Type page, the validation process checks for the appropriate number of digits in the card number. The system also checks for the appropriate prefix for the credit card type and validates the expiration date format, the amount (must be greater than 0.00 USD), and the address information. If there are any errors on this page, the system returns a message and prompts for corrections.

Click Cancel to cancel the entry, ignore any changed information, and close the page without saving.

Tender Type Detail

Gift-in-Kind Details

***Gift Description:** Two signed Picasso lithographs

Gift Purpose: Enhancements for new library – asset will be kept

Estimated Value: 10000.00 USD ☒ **Written Appraisal**

Appraised Value: 11000.00 USD **Appraisal Date:** 12/28/2006

Tender Type Detail - Gift-in-Kind Details page

Gift Description	Enter a brief description of the gift-in-kind that will be incorporated into the AVAK LetterGen.SQC so that it can be used in an acknowledgement.
Gift Purpose	Enter the reason for the gift and how it will be used.

Estimated Value	Enter an educated guess of the value of the gift. This field is used for reporting purposes only; it is not included in the AVAK LetterGen.SQC, as it is the donor's responsibility to accurately declare the gift's value.
Written Appraisal	Select this check box when a written appraisal is received with the gift-in-kind.
Appraised Value	Enter the valued amount of the gift-in-kind, as determined by an external appraiser.
Appraisal Date	Enter the date that the appraisal was made.

Notify

Enter the ID of the person to be notified of the transaction. The name appears to the right.

Identifying Potential Matching Gifts

Access the Matching Gifts page for person gifts (Click the Matching Gifts button on the Gift Entry page). You have the choice of using this page to create matching gifts one at a time, or you can run a cleanup process on the Maintain Gift Sessions page to look for all matching gifts in the session, including those you may be unaware of.

Matching Gifts

Find | View All First 1 of 1 Last

External Org ID: AV1000 Ford Motor Company

Expected Match Amount: 500.00 USD

Processed Date:

Description: Employer match

Matching Gifts page

When you click the Matching Gifts button on the Gift Entry page, a dialog box appears asking the system to calculate a "best guess" for potential matching gifts, if you are tracking matching gift rules for organizations. If you click Yes, the fields on this page populate with the system's best guess. You can also manually enter information about potential matches either by responding No to the best guess question or by inserting rows into this page after the automated calculations have completed and returned this page with expected matches.

External Org ID	Identify the organization from which you anticipate a matching gift payment.
Expected Match Amount	Enter the amount you expect to receive as a match.
Process Dt (process date)	If your institution received a matching gift form from the donor with the gift, enter the gift date. If the form has not been received, leave this field blank. It can be completed on either the Person Matching Gift or External Organization Matching Gift page when the form is received.
Description	Enter notes your institution wants to maintain about expected matches such as designation distributions.

Applying Matching Gifts

Access the Ext Org Matching Gifts page for organization gifts (Click the Matching Gifts button on the Gift Entry page).

External Org Matching Gifts page

When you enter this page, the system displays the ID, Name, and Exp Mtch Amt (expected match amount) of each donor for which the organization is expected to match a gift. You can also enter new IDs to create new matching gifts. If no relationship exists between the person and organization, click the Organization Relationship link to access the Org/Person Relationships page to instantly create one. You can then return to this page and create the new matching gift.

Outstanding Gifts to be Matched

ID Select the check box for the gift that is being matched by the organization's matching gift payment.

Actual Match Amount Enter the amount the organization is actually matching toward each donor's gift. This field populates by default to the expected match amount but can be overridden.

Match Date Enter the match date. This field populates by default to today's date but can be overridden.

New Gifts Being Matched

The fields in this group box are similar to the ones above, but here you can create both an expected match and an organization matching gift at the same time. This is beneficial when an expected match is not yet on file in the system before the institution receives the matching amount.

ID You can search for and select any ID that has an existing relationship with the organization.

If you want to create a new gift for an ID that has no current relationship defined with the organization, click the Organization Relationship link to instantly create a relationship. When you click the OK button, the system moves the ID up to the Outstanding Gifts to be Matched group box and you can then match the gift.

Receiving a Scheduled Pledge

Access the Pledge Schedule page (Click the Pledge Schedule link on the Gift Entry page).

Loading Mass Gift and Pledge Transactions

This section discusses how to load large volumes of gift and pledge transactions.

Page Used to Load Mass Gift and Pledge Transactions

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Mass Load Gift/Pledge	AV_RUN_CNTL	Contributor Relations, Session Management, Process Sessions, Mass Load Gift/Pledge	Enables you to enter groups of gift and pledge transactions into the system. For example, this process can be used to load lockbox transactions.

Loading Gifts and Pledges

The Mass Load Gift/Pledge COBOL process (AVPGPLOA) takes all the information placed in the AV_GP_LOAD_TBL and moves it into the appropriate tables in the system. Gifts or pledges to be loaded can contain up to four designation records and four recognition records. You can also load credit card gifts through the mass load process.

Because of the many variances between financial institutions and their databases, PeopleSoft does not deliver an API to populate the AV_GP_LOAD_TBL. The following diagram shows how the program might be incorporated into a lockbox process and which parts of that process are created and customized by your institution:

How GP Load might fit into a lockbox process at your institution

Access the Mass Load Gift/Pledge page (Contributor Relations, Session Management, Process Sessions, Mass Load Gift/Pledge).

Mass Load Gift/Pledge	
Run Control ID:	MLGP01
	Report Manager Process Monitor Run
*Business Unit:	MEDBU Search Medical Business Unit
*Institution:	PeopleSoft University
Address Type	Mailing v
*Commit Level:	100

Mass Load Gift/Pledge page

Business Unit	Enter the business unit for which you want to run the process.
Institution	When you enter a business unit, the system automatically populates the institution to which the transactions are processed.
Address Type	Select which address to use when loading the transaction. For credit card transactions, CyberSource requires an address to be attached to the credit card information before it can process the transaction. During the AVPGPLOA process, for any record where the tender type = CC, the process takes the address for each record, for the address type selected on the run control page, and stores it in the AV_EP_GIFT_DTL record.
Commit Level	Enter a commit level equal to the number of transactions to be loaded into a single session. If the number of transactions to be loaded exceeds the commit level, the system creates multiple sessions.

When you click the Run button, the system does the following:

- Where AV_SESS_TYPE = 'G', creates gift records in the AV_GIFT_DTL, AV_DESIGNATION, and AV_RECOGNITION tables.

Note. Gifts processed through AVPGPLOA must be original and nonadjusted, and cannot be tied to a pledge or matching gift.
- Where AV_SESS_TYPE = 'PL', creates pledge records in the AV_PLEDGE_DTL, AV_DESIGNATION, AV_RECOGNITION, and AV_PLDG_SCHD tables.

Note. Pledges processed through AVPGPLOA must be original, nonadjusted pledges with no payment activity.
- For all gifts and pledges, brings the appropriate underlying information into the process, including Constituent Type, Alumnus Type, and Designation type and purpose.
- Creates the AV_RCG_DES record after processing all gift and pledge records.

5. After processing the final gift or pledge record, updates the DESCR254 field on the AV_GP_LOAD_TBL with the results, including the suspense reason, if applicable.
6. Sets the COMPLETE_FLAG to 'Y' and the GP_LOAD_STATUS to 'P' for processed or 'S' for suspended.
7. Writes the SESSION_NO and GIFT_NO for each specific gift and pledge back to the AV_GP_LOAD_TBL for reference.
8. Leaves the generated sessions open for review prior to balancing, queuing, and posting.

Warning! Do not enter pledge payments through this process. You must enter them through the online process to ensure that the system updates the pledge records and pledge schedules.

The AV_GPLOAD_CC Application Engine process does the following when loading mass credit card gifts:

1. Encrypts the credit card information entered when it is loaded into sessions.
2. Truncates the credit card number in the AV_GP_LOAD_TBL to the last four digits.

Process Scheduler runs the Mass Load Gift/Pledge process at user-defined intervals.

Important! It is highly recommended that the Mass Load Gift/Pledge process be run immediately after loading the AV_GP_LOAD_TBL with credit card gifts. These steps reduce the exposure of credit card data in your system.

Viewing Gift Session Transactions

When you have created a session containing gifts and pledge payments, you can view information about the transactions in your sessions. If you are a supervisor and have security access, you can view information about gifts regardless of whose session they reside in.

This section discusses how to:

- View a gift summary.
- View gift details.
- View a supervisor's gift session summary.

Pages Used to View Gift Session Transactions

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Gift Summary, Supervisor Gift Summ (supervisor gift summary)	AV_GIFT_SMRY	- Contributor Relations, Session Management, Supervise Sessions, Gift Sessions, Gift Summary - Contributor Relations, Session Management, Supervise Sessions, Gift Sessions, Supervisor Gift Summary	View information about the gifts and pledge payments you enter in a session. You can only view information contained in sessions you currently control, unless you are a supervisor in the system. For supervisors, view information about the gifts and pledge payments staff members enter in sessions.
Gift Detail	AV_GIFT_DTL_SP	- You can access the Gift Detail page through multiple navigation paths. The list below contains the most frequently used paths. - Click the Details link on the Gift Summary page. - Click the Details link on the Supervisor Gift Summ page.	View detailed information about a particular gift or pledge payment transaction.
Designation Detail	AV_DSG_DTL_SP	- You can access the Designation Detail page through multiple navigation paths. Below is a frequently used path. - Click the Designation button on the Gift Detail page.	View detailed information about the designations assigned to a particular transaction.
Recognition Detail	AV_RECG_DTL_SP	- You can access the Recognition Detail page through multiple navigation paths. The most frequently used path follows: - Click the Recognition button on the Gift Detail page	View detailed information about the recognition given for a particular transaction.

Page Name	Definition Name	Navigation	Usage
Matching Gift Detail	AV_MTCH_GIFT_SP	- Click the Matching Gifts button on the Gift Detail page. - Click the Details button on the Matching Gifts Summary or Matching Gifts Summary - Org page.	View detailed information about the potential matching gifts for a transaction.
Tribute	AV_TRIB_INQ_SP	Click the Tribute button on the Gift Detail, Pledge Detail, Adjust Gift Detail, or Adjust Pledge Detail pages.	View all tribute details related to a particular gift or pledge. This information is entered on the Tribute page during gift or pledge entry. Note. No workflow is delivered with this page.

Viewing a Gift Summary

Access the Gift Summary page (Contributor Relations, Session Management, Supervise Sessions, Gift Sessions, Gift Summary).

Gift Summary

	Gift Nbr	Gift Date	ID	Constituent	
1	330	06/04/2006	AV0009	Crosbie,Edward	
2	331	06/04/2006	AV0050	Ratcliffe,Stephen	
3	332	06/04/2006	AV1019	The Other Corporation	
4	333	06/04/2006	AV1019	The Other Corporation	

Gift Summary page

If your role is a GPS, you may want to view information about the gifts and pledge payments that your staff enters into sessions. You can view session information by Operator ID and Session Number.

Details	Click to view detailed information about a particular gift or pledge payment on the Gift Detail page.
Add Gift	If the gift session you selected is open, click to add an additional gift to the session.
Select and Edit Gift	If the gift session you selected is open, select the check box next to a gift and click the Edit Gift button to make changes to an existing gift.

Viewing Gift Details

Access the Gift Detail page.

Grids on this page display designation, recognition, tribute, and matching gifts details. This eliminates the need to access separate, multiple pages to view this information. In addition, the Designation Code field appears.

The Tender Type field displays the tender type details for the gift, from the Gift Entry page. Users with security access can edit any details for the tender type that are not related to GL processing.

Note. In the Tender Details group box, the credit Card Type appears, but not the cardholder's name. The system also masks the Card Number and only displays its last four digits.

Viewing a Supervisor's Gift Session Summary

When you open the Supervisor Gift Summ page, you can select the user ID or session about which to view information. The gift number, gift date, and gift amount appear for each transaction in the session you selected. The page also contains a check box that indicates whether or not the gift session is connected to online giving.

Adjusting Gifts and Matching Gifts

This section provides an overview of gift adjustment and discusses how to

- Select a transaction to adjust.
- Enter a gift adjustment transaction.
- Adjust matching gift information.
- Edit matching gift information.
- Change a gift's type.

Understanding Gift Adjustment

You can create gift adjustment sessions, or groups of transactions that correct existing transactions. When an adjustment session is opened, you can select the existing transactions to adjust, then make the necessary changes.

When you create an adjustment transaction, a sequence number is created to indicate that there have been multiple actions on a particular gift number. For example, the initial entry is sequence 1 on AV_GIFT_DTL; the adjusted entry is sequence 2 on the ADJ_GIFT_DTL table; and the corrected entry is sequence 3 on the AV_GIFT_DTL table.

Note. Adjusted transactions negate the original transaction and create a new transaction record, so enter adjustment amounts just as you would if entering the original transaction.

To adjust gift transactions:

1. Initialize a session with the type of Adjust Gift, using the Maintain Sessions page.
and [Chapter 17, "Entering Commitments," Initializing and Balancing the Session, page 422.](#)
2. Select session defaults using the Session Defaults page.
and [Chapter 17, "Entering Commitments," Selecting Session Defaults, page 425.](#)
3. Select the existing posted transactions to adjust using the Session Detail page.
and [Chapter 17, "Entering Commitments," Viewing Session Details and Selecting Transactions to Edit or Delete, page 426.](#)
4. Make the necessary changes to transactions using the Gift Adjust page.
and [Chapter 17, "Entering Commitments," Entering a Gift Adjustment Transaction, page 459.](#)
5. Balance, queue, and post the session.
and [Chapter 17, "Entering Commitments," Initializing and Balancing the Session, page 422.](#) and [Chapter 18, "Processing Commitments," Queuing Sessions for Posting, page 488.](#) and [Chapter 18, "Processing Commitments," Processing and Posting Sessions, page 489.](#)

Page Used to Adjust Gifts and Matching Gifts

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Gift Adjust	AV_ADJ_GIFT	- Contributor Relations, Session Management, Enter Gifts, Gift Adjustment - Click a Gift Nbr link on the Session Detail page.	Adjust an existing gift transaction you selected on the Session Detail page.

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Matching Gifts	AV_MTCH_P_GIFT_SP	Click the Matching Gifts button on the Gift Adjust page.	Modify selections made previously, associating an organization's matching gift payment with a specific gift or adding additional IDs.

Selecting a Transaction to Adjust

Use the Session Detail page to select a gift or pledge to adjust.

Entering a Gift Adjustment Transaction

Access the Gift Adjust page (Contributor Relations, Session Management, Enter Gifts, Gift Adjustment).

Important! The original transaction must be posted before you can adjust it.

Gift Adjust page

Important! Adjusted transactions negate the original transaction and create a new transaction record, so enter adjustment amounts just as you would if entering the original transaction.

If the Currency Code you selected for this session on the Maintain Sessions page differs from the business unit's base currency, two new page controls appear on this page.

Currency Code	Fields That Appear	Fields That Disappear
Your Business Unit's Base		Display in Other Currency button
		Base Amt
Any Other Currency	Display in Other Currency button	

460

Copyright © 1988, 2012, Oracle and/or its affiliates. All Rights Reserved.

Currency Code	Fields That Appear	Fields That Disappear
	Base Amt	

Reason You must select a reason for the adjustment. Reasons are defined by your institution, and describe the reason why an adjustment is made.

Refund Select if the gift adjustment results in a refund to the donor.
If this check box is selected, when you run the GL Interface process on this adjustment session, the system creates a row in the CR Holding Account that indicates the donor is owed a refund.

Click the links at the bottom of this page to access the Maintain Sessions, Session Defaults, and Session Details pages, where you can view information about the session that contains the adjusted transaction.

Recognition

In this group box, you can enter soft-dollar gifts and soft credit-only gifts.

Attachments

Click the View link to open the attachment in a new window. Click the Add Attachment button to upload a new attachment from within the component.

Adjusting Matching Gift Information

Access the Gift Adjust page.

To adjust matching gift information associated with an organization's gift:

1. Select a Reason for the adjustment.
2. Make other adjustments to the page as necessary.
3. Click the Matching Gifts button.

The Matching Gifts page appears.

Editing Matching Gift Information

Access the Matching Gifts page (Click the Matching Gifts button on the Gift Adjust page).

Matching Gifts

Find | View All First 1 of 1 Last

External Org ID: AV1019 The Other Corporation

Expected Match Amount: 3,000 USD

Processed Date: 11/29/04

Description:

OK Cancel Refresh

Matching Gifts page

When you enter this page, the system displays the External Org ID, Name, Exp Mtch Amt (expected match amount), Act Mtch Amt (actual match amount), and Match Date for all gifts previously associated with the organization's gift. This page also displays any other open IDs available to be matched.

These fields are editable. You can select or clear IDs and change match amounts and match dates.

Changing a Gift's Type

If you try to adjust a gift on the Gift Adjust page by changing its Gift Type from *MG* to another value, the system displays an error message that there are still matching gifts associated with it.

To change the gift type:

1. Click OK to close the message window.
2. Change the Gift Type back to *MG*.
3. Click the Matching Gifts button.

The Matching Gifts page appears.

4. Clear the associated matching gifts.
5. Return to the Gift Adjust page and change the Gift Type.

Adjusting Gift and Membership Credit Card Payments

To adjust gift and membership credit card payments, open a gift or membership adjustment session and make the necessary changes.

However, any time you change credit card information, you must revalidate, reauthorize, and recapture the transaction. You also need to credit the original gift amount.

To reauthorize and credit adjusted transactions:

1. Authorize the new gift amount using the EP Transaction Processing - Filter Options page and EP Transaction Processing - Transaction List page.
2. Filter transactions for a Transaction Requested value of *Credit* on the EP Transaction Processing - Filter Options page.
3. Credit the original gift amount on the EP Transaction Processing - Transaction List page.

When you refund a transaction, its status becomes *C*.

The following graphic illustrates the gift and membership credit card transaction adjustment process described above:

Gift and membership credit card transaction adjustment process for previously authorized or captured transactions

Entering Conditional Pledges

This section provides an overview of conditional pledges and discusses how to:

- Enter conditional pledge detail.
- Assign conditional pledge designations.
- Assign conditional pledge recognition.

Understanding Conditional Pledges

You can create conditional pledges, which hold pledge information that only becomes valid when particular conditions are met. For example, if Shawn Gallagher pledges 40,000 USD to the 2005 Fund campaign, but will only give that amount when you have raised 2,000,000 USD, his pledge is conditional. You can transfer the information you enter about conditional pledges to the actual pledge transaction when the conditions are met and the pledge is activated.

Important! When a conditional pledge becomes an actual pledge, the conditional pledge information remains stored in the system, but does not appear on summary pages or in Conditional Pledge fields. Because the information remains stored, you can revert to the conditional pledge if you delete the actual pledge.

Pages Used to Enter Conditional Pledges

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Cond Pledge Entry (conditional pledge entry)	AV_CP_ENTRY AV_CP_ENTRY_E AV_CP_ENTRY_W	• Contributor Relations, Session Management, Enter Pledges, Conditional Pledges, Conditional Pledges, Cond Pledge Entry • Contributor Relations, Session Management, Enter Pledges, Conditional Pledges, Conditional Pledges - Org, Cond Pledge Entry • Contributor Relations, Session Management, Enter Pledges, Conditional Pledges, Conditional Pledges - Workset, Cond Pledge Entry	Enter basic information about a conditional pledge.

Description:					

Cond Pledge Entry page

This page holds information about the commitment amount and the initial pledge payment schedule.

Pledge Amt (pledge amount) Enter the total monetary amount of the commitment.

Payment Schedule Indicate the increments of time in which pledge payments will be made. Examples are *Annual*, *Monthly*, and so on.

The values for this field are delivered with the system as translate values. Do not modify these translate values in any way. Any modifications to these values will require a substantial programming effort.

First Payment Date Enter the date on which you expect the first payment to be made for this conditional pledge.

Fulfillment Date Enter the date on which the final payment for the pledge will be made.

Assigning Conditional Pledge Designations

Access the Cond Pledge Designations page (Contributor Relations, Session Management, Enter Pledges, Conditional Pledges, Conditional Pledges, Cond Pledge Designations).

Cond Pledge Entry		Cond Pledge Designations		Cond Pledge Recognition

MEDBU	MEDICALBLDG	MED BLDG	ANNUAL	100.0000	200.00												

Cond Pledge Designations page

You can apply percentages or amounts of a donation or pledge to multiple designations at your institution. For each designation select, you can associate a specific campaign and appeal.

Des BU (designation business unit)

Enter the business unit that owns the designation to which the conditional pledge is being allocated. The prompt box contains a list of all the valid business units at your institution. When you make a selection, the values in the Designation and Appeal prompt boxes change to display the values you defined for the setID associated with this business unit.

If you have already selected a designation and appeal, then change the business unit, your selections are backed out.

Designation

Assign designations, which are the projects, funds, or areas at your institution that receive appropriation from gift transactions. Designations are linked to specific item types in your institution's financial structure.

The values that appear in the prompt box include the designations you defined for the setID associated with each designation business unit. The default value is the default designation you set up when you defined user defaults.

Campaign

Assign a campaign, which is an organized institutional effort targeted to a specific constituency that occurs over a specified period of time with specific purposes and goals.

Appeal

Assign appeals, which are the specific acts or items that lead a donor to give, such as the annual phonathon, a campaign letter, and so on.

The values that appear in the prompt box include the appeals you defined for the setID associated with the business unit you select on this page. The default value is the default appeal you set up when you defined user defaults.

Pct (percent) and Amount

Enter the percentage of the pledge to allocate to this designation. When you enter a percentage, the amount of the gift equaling that percent appears in the Amount field.

Alternatively, enter an amount of the donation or pledge to allocate to this designation. When you enter an amount, the percentage of the gift or pledge equaling that amount appears in the Pct field.

Assigning Conditional Pledge Recognition

Access the Cond Pledge Recognition page (Contributor Relations, Session Management, Enter Pledges, Conditional Pledges, Conditional Pledges, Cond Pledge Recognition).

Cond Pledge Recognition page

Recognition can be assigned in the form of hard credit, or soft credits that are defined by your institution such as memo and vehicle credits.

Use Default Recognition	Click to use the institution default recognition as defined on the CR Installation page. The system then populates Recognition fields with both the donor and spouse IDs based on the institution default.
Recognition Type	Select the type of credit the donor is receiving, such as <i>Hard Credit</i> , <i>Soft Credit</i> , <i>Vehicle Credit</i> , and so on. Recognition types are defined by your institution, but always contain at least one type of hard credit and one type of soft credit.
Recognition Pct (recognition percent)	Enter the percentage of the pledge to allocate to this designation. When you enter a percentage, the amount of the gift equaling that percent appears in the Amount field. Alternatively, enter an amount of the donation or pledge to allocate to this designation. When you enter an amount, the percent of the gift or pledge equaling that amount appears in the Pct field.

Important! Recognition is not actually assigned until the conditional pledge is converted to an actual pledge in pledge entry. The recognition you select for a pledge defaults when you enter payments for that pledge. You can assign an unlimited percentage of soft credit for a single transaction.

When a conditional pledge is activated in a pledge session, the Pledge Entry page populates recognition directly from the conditional pledge record. Therefore, if spouse recognition does not exist on the conditional pledge, it does not appear by default in the Pledge Entry page.

Entering Pledges

This section provides an overview of pledges and discusses how to:

- Enter a pledge transaction.
- Determine a pledge payment schedule within a session.
- Adjust a pledge payment schedule for a constituent.

Understanding Pledges

When you create a pledge session, you can enter pledge transactions into the session. You use the Pledge Entry page to enter all the basic information pertaining to a transaction. In addition, you can update a donor's record, add a new donor, and create a pledge schedule using pages you access through links on the Pledge Entry page.

To enter pledge transactions:

1. Initialize a session with the type of Pledge, using the Maintain Sessions page.
and [Chapter 17, "Entering Commitments," Initializing and Balancing the Session, page 422.](#)

2. Select session defaults using the Session Defaults page.
and [Chapter 17, "Entering Commitments," Selecting Session Defaults, page 425.](#)
3. Enter transactions using the Pledge Entry page.
and [Chapter 17, "Entering Commitments," Entering Pledges, page 470.](#)
4. Balance, queue, and post the session.
and [Chapter 17, "Entering Commitments," Entering Pledges, page 470.](#) and [Chapter 18, "Processing Commitments," Queuing Sessions for Posting, page 488.](#) and [Chapter 18, "Processing Commitments," Processing and Posting Sessions, page 489.](#)
5. (Optional) View the accounting lines generated by the pledge, if the pledge was fed to the general ledger.
and [Chapter 18, "Processing Commitments," Viewing Accounting Lines, page 519.](#)

Pledge Entry page

You can enter all the information necessary to store the transaction using this page and the pages accessed through links on this page.

Pledge Detail

Pledge Amt (pledge amount) Enter the total monetary amount of the commitment.

Pmt Schd (payment schedule)	Indicate the increments of time in which pledge payments will be made, such as <i>Annual</i>, <i>Monthly</i>, and so on. When you select a payment schedule, the system divides the total commitment amount into equal payments for each increment between the effective date and the fulfillment date. You can view information about each pledge payment, and make adjustments to the schedule on the Pledge Schedule page. The values for this field are delivered with the system as translate values. Do not modify these translate values in any way. Any modifications to these values will require a substantial programming effort.
First Pmt Dt (first payment date)	Enter the date on which the first pledge payment for this pledge is expected to be made.
Fulfillment Date	Enter the date on which the final payment for the pledge will be made. Note. When you save a pledge, the system builds an initial pledge payment schedule using the first payment and fulfillment dates and payment schedule you select to calculate payment dates and amounts.
Feed Pledge	If your institution has enabled the pledge feed feature on the CR Installation page, select the check box to include the pledge in the GL Interface process for recording the pledge in your institution's financial system as a receivable.

Conditional Pledge Information

If a donor has made a conditional pledge, you can convert that pledge to an actual pledge. These fields appear upon entering a donor's ID if the donor has an active conditional pledge recorded.

Convert to Pledge	Click the Convert to Pledge button to convert the donor's conditional pledge to an actual pledge. When you click this button, the remaining fields on this page populate by default to the values set up for the conditional pledge. Note. You will have the option to deactivate the conditional pledge after you have attached it to an actual pledge in Pledge Entry.
CP Nbr (conditional pledge number)	Displays the system generated number associated with the donor's conditional pledge.
CP Amount (conditional pledge amount)	Displays the monetary amount of the donor's conditional pledge, but can be overwritten.
First Payment Date	Displays the date on which the donor plans to make the first payment on the pledge, but can be overwritten.
Fulfillment Date	Displays the date on which the donor plans to fulfill the pledge, but can be overwritten.

Designations

You apply pledges to designations, or allocation accounts at your institution. For each designation you select, you must associate a specific campaign initiative and appeal. You can add the same designation to a gift, even if its associated campaigns are different.

Business Unit

Enter the business unit that owns the designation to which the pledge is being allocated. The prompt box contains a list of all the valid business units at your institution, and populates by default to the value you selected from the business unit field on the Session Defaults page. When you make a selection, the values in the Designation and Appeal prompt boxes change to display the values you defined for the setID associated with this business unit.

If you have already selected a designation and appeal, then change the business unit, your selections are backed out.

Designation

Enter the designation to assign. Designations are funds at your institution to which donations and pledges can be allocated.

The values that appear in the prompt box include the designations you defined for the setID associated with the business unit you select on this page. The default value is the default designation you selected on the Session Defaults page.

Campaign

Enter a campaign from the prompt box containing all the campaign initiatives defined at your institution. A campaign is an organized institutional effort targeted to a specific constituency that occurs over a specified period of time, with specific purposes and goals. The default value is the default initiative code you selected on the Session Defaults page.

Appeal Code

Enter an appeal code, which is the specific act or item that leads a donor to give, such as a visit, an annual phonathon, a letter, and so on.

The values that appear in the prompt box include the appeals you defined for the setID associated with the business unit you select on this page. The default value is the default appeal you selected on the Session Defaults page.

Amount

Enter an amount of the pledge to allocate to this designation.

Important! You can split the donation among several designations, but the total allocation to designations must equal 100 percent. The designations you select for a pledge default when you enter payments for that pledge.

Recognition

You can indicate donors to recognize for a particular pledge. Recognition can be assigned in the form of hard credit, or soft credits that are defined by your institution, such as memo and vehicle credits.

When your system is set up, you can define default recognition to split hard and soft credits between a donor and his or her spouse, according to your business practices. If these defaults exist, recognition records are created by the system, and you can update them as necessary.

Important! You can split the recognition among several donors, but the total allocation of hard credit recognition must equal 100 percent of the pledge amount. You can assign an unlimited percentage of soft credit for a single transaction.

Tribute

You can enter information about tribute or memorial recognition for a pledge.

Tribute Type	Select <i>In Memory</i> or <i>In Honor</i> to indicate whether the tribute is in memory of a deceased individual or in honor of an individual.
ID and Name	Enter either the name or ID of the person receiving tribute or memorial recognition. It is not necessary to have an ID in the system to enter tribute and memorial information. If an ID does not exist, enter the person's name.
Amount	The amount of the pledge populates by default, but you can change this.
Occasion	Describe the occasion that triggered this type of recognition. For example, the donor could be setting up a Memorial Scholarship in a deceased individual's name.

Attachments

Click the View link to open the attachment in a new window. Click the Add Attachment button to upload a new attachment from within the component.

Determining a Pledge Payment Schedule Within a Session

Access the Pledge Schedule page (Contributor Relations, Session Management, Enter Pledges, Pledge Entry, Pledge Schedule).

Pledge Entry		Pledge Schedule			
Session Number: 155		Pledge Number: NEW			
ID:					
Duration:		*Payment Schedule:	S-Annual		
Fulfillment Date:	Adjust	First Payment Date:			
Find View All First 1 of 1 Last					
*Expected Date	Expected Amount	Received Date	Received Amount	Balance	Notified
06/30/2004	500.00		0.00	0.00	☐
500.00		0.00		0.00	USD

Pledge Schedule page

To create an initial payment schedule, select an increment of time in which payments are made such as *Annual*, *Monthly*, or *Bi-monthly* from the Pmt Schd prompt box on the Pledge Entry page. When you save the pledge, the system creates a schedule based on the first payment date and the pledge schedule you select.

You can also make extensive adjustments or create an irregular pledge payment schedule using the Pledge Schedule page. When you enter this page, the default payment schedule you created on the Pledge Entry page appears.

Expected Date

Enter the date on which you expect to receive the pledge payment. If you create an initial payment schedule, the expected payments dates begin with the first payment date you select, and an expected payment is created for each increment of time you specify in the payment schedule. For example, if you select a monthly payment schedule, expected payments are created for each month.

Important! You can change the expected date for any pledge payments for which Notifications have not been sent or that have not been paid.

Expected Amount

Enter the amount you expect to receive as the pledge payment. If you create an initial payment schedule, the amounts in these fields populate by default to even amounts for each planned payment that totals the entire pledge amount. For example, if the donor made a pledge of 1,200.00 USD with monthly payments, the pledge is broken into 12 payments of 100 USD.

Received Date

Displays the date on which a pledge payment is received.

Received Amount

Displays the monetary amount of a pledge payment.

Balance	Displays the pledge balance after the pledge payment is received. If the pledge payment has not yet been received, the total outstanding pledge balance appears in this field.
Notified	Select to indicate that a notification of the scheduled pledge payment has been sent.
	Note. You cannot change expected pledge payments for which notifications have been sent.
Adjust	Click to adjust the scheduled pledge payments on and below the line your cursor resides in, according to your changes.

Important! If you delete an entire planned pledge payment from the schedule, a message appears asking you to auto-assign the amount of the payment evenly to the remaining payments, or to manually allocate the amount of the payment among remaining payments. The schedule must balance expected amounts and pledge balance with the total pledge amount before the pledge can be saved.

Adjusting a Pledge Payment Schedule For a Constituent

Access the Pledge Schedule page (Contributor Relations, Session Management, Enter Pledges, Pledge Schedules, Pledge Schedule).

Pledge Schedule

2	08/14/2002 	50,000.00			☐		

Pledge Schedule page

Expected pledge payments can only be updated if they have not been received or if a notification has not been sent to the donor.

You can update a pledge schedule for any active pledge that has been posted.

Details Click to access the Pledge Detail page where you can view additional information about a pledge.

Viewing Pledges

After you have created a session containing pledges, you can view information about the transactions in the session. If you are a supervisor and have security access, you can view information about pledges regardless of whose session they reside in.

This section discusses how to:

- View a pledge summary.
- View pledge details.
- View a supervisor's pledge summary.
- View an open pledge register.
- View a pledge payment schedule.

Note. This page might include unposted pledge payments until the sessions are balanced, queued, and posted.

Adjusting Pledges

This section provides an overview of pledge adjustment and discusses how to enter a pledge adjustment transaction.

Understanding Pledge Adjustment

You can create pledge adjustment sessions, or groups of transactions that override existing posted transactions. After a session is opened, you can add a group of transactions, then balance and post the session to your financial application.

When you create an adjustment transaction, a sequence number is created to indicate that there have been multiple actions on a particular gift number. For example, the initial entry is sequence 1 on AV_PLEDGE_DTL; the adjusted entry is sequence 2 on the AV_ADJ_PLDG_DTL table; and the corrected entry is sequence 3 on the AV_PLEDGE_DTL table.

Note. Adjusted transactions negate the original transaction and create a new transaction record, so enter adjustment amounts just as you would if entering the original transaction.

To adjust pledge transactions:

1. Initialize a session with the type of Adjust Pledge, using the Maintain Pledge Sessions page.
and [Chapter 17, "Entering Commitments," Initializing and Balancing the Session, page 422.](#)
2. Select session defaults using the Session Defaults page.
and [Chapter 17, "Entering Commitments," Selecting Session Defaults, page 425.](#)
3. Select the existing transactions to adjust using the Session Detail page.
and [Chapter 17, "Entering Commitments," Viewing Session Details and Selecting Transactions to Edit or Delete, page 426.](#)
4. Make the necessary changes to transactions using the Pledge Adjust page.
and [Chapter 17, "Entering Commitments," Entering a Pledge Adjustment Transaction, page 483.](#)
5. Balance, queue, and post the session.
and [Chapter 18, "Processing Commitments," Queuing Sessions for Posting, page 488.](#) and [Chapter 18, "Processing Commitments," Processing and Posting Sessions, page 489.](#)

Chapter 18

Processing Commitments

This chapter provides an overview of commitment processing, lists common elements, and discusses how to:

- Queue sessions for posting.
- Process and post sessions.
- Process credit card transactions.
- Purge credit card security data.
- Review electronic payment results.
- Work with denied credit card transactions.
- Review credit card activity.
- View accounting lines.
- View suspended sessions.
- View information about and transfer sessions.
- Manage the acknowledgement process.
- Process acknowledgement letters.
- Generate acknowledgement letters.
- Work with manually generated acknowledgements.
- Manage joint communications.
- Handle matching gifts.
- Manage giving clubs.
- Generate CAE reports.

Understanding Credit Card Processing

The Contributor Relations credit card processing feature is a platform independent, component based, and secure tool that enables your organization to accept and process credit card payments for the receipt of gifts and membership dues. Administrators can use the online pages for background credit card processing, and self-service contributors can make credit card donations through pages in self-service Involvement for real-time credit card donations.

Credit card processing involves the following functional areas:

- Entry of credit card information (through both core system and self-service pages).
- Credit card authorization.
- Credit card capture (settlement).
- Credit card adjustment.
- Support for multiple credit card types.
- Real-time (self-service pages) and background (core system) processing.
- Credit card transaction review.

In terms of security, this feature provides confidentiality of payment information, ensures integrity for all transmitted data, performs cardholder authentication, and maintains an audit trail of authorization and transaction capture.

Accessing the Credit Card Payment Pages

There are two primary users of the credit card payment pages – organization employees and self-service contributors. The following table lists each user's possible modes of access.

<i>User</i>	<i>Access Page</i>
Organization Employee	Gift Entry - Tender Detail button
	Gift Adjustment - Tender Detail button
	Membership Entry - Tender Detail button
	Membership Adjustment - Tender Detail button
Self-Service Contributor	Make a Donation - Payment Information page (accessible through the Ways to Give link on the Involvement Home page.)

Administrators access the Gift Entry, Gift Adjustment, Membership Entry, and Membership Adjustment pages directly through the system's menu navigation to enter gifts and membership payments. The credit card entry page is accessible on each of these four pages using the Tender Detail button (if the tender type is set to a tender setup with a *Credit Card* special fields indicator).

Donors access the Make a Donation - Payment Information page through self-service Involvement functionality. To access this page, the donor must have an established transition ID or system ID and click either the Make your gift securely online link or the Invest in existing campaigns link on the Ways to Give page. Donors then enter gift information on the online giving pages that follow.

Common Elements Used in This Chapter

ID Type	Select whether the donor is a person or an organization.
ID or Org ID	Displays the donor's ID or enables you to enter the ID of the donor to work with. The donor's name or description may appear to the right.
Constituent	Displays the donor's name if it is a person, or description if it is an organization. The donor's highest priority constituent type may appear to the right.
Search	Click to access the Search/Match page where you can search for a donor.
	Click to paste a carried ID found using Search/Match functionality.
Recognition	Select a type of credit the donor is receiving, such as <i>Hard</i> , <i>Soft</i> , <i>Vehicle</i> , and so on. Recognition types are defined by your institution, but always contain at least one hard credit type.
Amount	Enter an amount of the donation that gives this donor recognition. If you are entering gift transactions in a currency other than the business unit's base currency, the currency you selected is depicted on this page. However, for ease of reporting, recognition information is stored by the system in base currency.
Anonymous	Select if the donor receiving recognition does not want public recognition for the gift. This flag is considered in the acknowledgement process to suppress an automatic acknowledgement. Also, the Anonymous check box on the Giving Profile is selected if any gift a donor makes is anonymous.
Tribute Type	Select <i>In Memory</i> or <i>In Honor</i> to indicate whether the tribute is in memory of a deceased individual or in honor of an individual.
Name	Identify the person receiving tribute or memorial recognition. It is not necessary to have an ID in the system to enter tribute and memorial information. If an ID does not exist, enter the person's name.
Amount	The amount of the gift populates by default in this field, but you can change this amount.
Occasion	Describe the occasion that triggered the type of tribute. For example, the donor could be setting up a Memorial Scholarship in a deceased individual's name.
Maintain Sessions	Click to access the Maintain Sessions page where you can check expected and actual amount and balance the session.
Session Defaults	Click to view or update the defaults you set for this session using the Session Defaults page.

Session Details

Click to access the Session Details page where you can view information about all the transactions in the session. You can access specific transactions to update or delete them from this page.

Queuing Sessions for Posting

This section discusses how to queue balanced sessions for posting.

Page Used to Queue Sessions for Posting

Page Name	Definition Name	Navigation	Usage
Queue Sessions	AV_POST_SESSION	- Contributor Relations, Session Management, Queue Sessions for Posting - Contributor Relations, Session Management, Enter Memberships, Queue Member Sessions	Queue balanced sessions that are ready to be included in the GL Interface process for posting to your institution's financial system.

Queuing Balanced Sessions

Access the Queue Sessions page (Contributor Relations, Session Management, Queue Sessions for Posting).

☐	PSUNV	63	Gift	Balanced	PS	02/01/2001

Queue Sessions page

Note. After a session is queued, it *cannot* be reopened for editing. Make sure that you are only queuing sessions that you know are ready for posting in the GL Interface process.

Business Unit	Enter the business unit for the sessions to queue for posting.
Self Service Session	Select the check box to note that the sessions contain gifts created as a result of self-service online giving.
Select All	Select the check box next to each session to queue for posting. To select all sessions listed, click the Select All button.
Queue	Select to lock the session and mark it for inclusion in the GL Interface process the next time it runs for the session's business unit.

Processing and Posting Sessions

This section provides overviews of session processing and posting, the GL interface process, and the process constituent accumulators process and also discusses how to:

- Run the GL interface job.
- Run the GL interface file extract process.
- Run the Constituent Accumulators process.
- View a journal generator template.

Understanding Session Processing and Posting

There are two processes you run to prepare balanced and queued sessions from the system to be posted as journal entries in PeopleSoft Financials.

1. The GL Interface process copies the transaction data from the Contributor Relations system into a table called AV_ACCTG_LN.

In this table the transactions are associated with the appropriate item types in Financials. When you set up item types for designations that will receive gift and pledge payments, they may only be associated with a credit. This process brings the debit and credit sides together to enable dual-line accounting entries in the financial system.

For example, a gift transaction for 100 USD has a debit of 100 USD to a tender account with a journal set of 0 and a credit of 100 USD to a designation account with a journal set of 1.

<i>Tender</i>	
Debit	Credit
100 USD	

<i>Designation</i>	
Debit	Credit
	100 USD

If the Feed Pledges check box is selected on the CR Installation page, a pledge transaction for 500 USD has a debit of 500 USD to accounts receivable with a journal set of 2 and a credit to a designation account with a journal set of 2. If the Feed Pledges check box is cleared, the pledge is not processed to the general ledger.

If the Feed Pledges check box is selected on the CR Installation page, a pledge payment of 500 USD for the previous pledge has a debit of 500 USD to a tender account with a journal set of 0 and a credit to accounts receivable with a journal set of 3. If the Feed Pledges check box is cleared, pledge payment transactions are handled as though they are gift transactions.

<i>Tender</i>	
Debit	Credit
500 USD – Pledge Payment	

<i>Accounts Receivable</i>	
Debit	Credit

Accounts Receivable	
500 USD – Pledge	500 USD – Pledge Payment

Designation	
Debit	Credit
	500 USD – Pledge

If a gift or membership transaction that has been posted is adjusted from 1,000 USD to 100 USD, and the Refund check box is selected on the Gift Adjustment or Membership Adjustment page, the adjustment results in a refund to the donor. In this instance, the original transaction is negated by crediting the tender account 1,000 USD to reverse the original transaction, then debiting the tender account 900 USD for the refund and 100 USD for the new transaction amount. The designation account is adjusted by debiting 1,000 USD to reverse the transaction, then crediting 100 USD for the new transaction amount. Finally, the refund is recorded through a 900 USD credit to the clearing account. Refunds are not managed within the system except to create the entry to the clearing account.

Note. The default clearing account is set up on the Institution Installation page.

Tender	
Debit	Credit
	1,000 USD (Gift)
900 USD – Negate Gift	
100 USD – Adjusted Gift	

Clearing Account	
Debit	Credit
	900 USD - Refund

Designation	
Debit	Credit
1,000 USD (Negate Gift)	100 USD (Adjusted Gift)

2. Depending on the version of PeopleSoft Financials your institution uses:

- If your institution uses Financials 8.4 or 8.8, the information in the AV_ACCTG_LN table is sent to Financials using Integration Broker.

The Journal Generator process is run within Financials to create journal entries.

and [Chapter 20, "Interfacing with PeopleSoft Financials," page 581.](#)

- If your institution uses another version of Financials or any other Financials application, the system creates a file that contains the AV_ACCTG_LN information, which is ready to be imported into the Financials system.

Understanding the GL Interface Process

When you run the GL Interface process, the following events occur:

For Each Session

The following occurs:

1. The process evaluates the session type and branches to the appropriate subroutine.
2. After the subroutine (described below) runs, the session status is set to "P" for Posted when results are correct.

Session status is set to "S" for Suspended if required information is missing.

3. If the process fails because the session is suspended or the process fails to run, any rows entered into AV_ACCTG_LN for the session are deleted.

For Gift Sessions

The following occurs:

1. Checks the ITEM_TYPE table to determine tender information.
2. If ITEM_TYPE is correct, the routine processes the GL Interface.
 - a. Checks the GL_INTERFACE table for ITEM_TYPE.
 - b. Creates dual-line accounting entry in AV_ACCTG_LN by combining tender information with designation information.

3. If ITEM_TYPE is None, the session suspends with the message "Item type not defined for tender" or "Item type not defined for designation."

For Pledge Sessions

The following occurs:

1. Processes only pledges that are marked *feed pledge*.
2. If ITEM_TYPE is correct, the routine processes the GL Interface:
 - a. Checks the GL_INTERFACE table for ITEM_TYPE information.
 - b. Creates dual-line accounting entry in AV_ACCTG_LN by using designation information containing both credit and debit rows.
3. If ITEM_TYPE is None, the session suspends with the message "Item type not defined for designation."

For Membership Sessions

The following occurs:

1. Checks the ITEM_TYPE table to determine tender.
2. If ITEM_TYPE is correct, the routine processes the GL Interface:
 - a. Checks the GL_INTERFACE table for ITEM_TYPE information.
 - b. Creates dual-line accounting entry in AV_ACCTG_LN by combining tender information with designation information.
3. If ITEM_TYPE is None, the session suspends with the message "Item type not defined for tender" or "Item type not defined for designation."
4. If the session includes gifts, gift AV_ACCTG_LN entries are created following the process for gift sessions.

For Adjustment Sessions

The system processes information by:

1. Creating reversal rows in the AV_ACCTG_LN table for the most recent version of the transaction.
2. Creating new rows in the AV_ACCTG_LN table following the processes outlined above for the new version of the entry.
3. If a refund results from the adjustment, creating a row in the AV_ACCTG_LN table with the offsetting refund amount distributed to the clearing account defined on the Institution Defaults page.

Note. When posting a zero-amount transaction in a session, the system creates no lines in the AV_ACCTG_LN table and transmits nothing to the financials system. Similarly, when adjusting a transaction to zero, the system creates the necessary reversing entries and transmits them to the financials system. However, it does not create or transmit any new rows representing the zero amount of the adjusted transaction. Therefore, a session that contains only transactions with tenders that allow zero amounts will generate no rows in the AV_ACCTG_LN record.

Understanding the Constituent Accumulators Process

The Constituent Accumulators process builds accumulator tables that summarize data utilized by the Giving Profile and Commitment Summary pages. You can run this process as part of posting any session type using the AVPOST multi-process job, or run it independently through its own run control definition.

Your institution should decide if the information displayed on the Giving Profile and Commitment Summary pages needs to display the latest posted sessions. If so, the Constituent Accumulators process can be run along with the GL Interface in the AVPOST multi-process job. If not, the Constituent Accumulators process can be run independently in an off-peak processing window. Regardless of the run method, the process always attempts to complete all posted and nonaccumulated sessions in the system.

Here is how the process works:

1. Constituent records are loaded from the Constituent Pending Accumulation table (AV_CNST_ACC_PND) and locked.
2. Temporary accumulator records are calculated and updated from temporary tables.
3. Locks on constituent records are released.
4. Related constituent records from posted, nonaccumulated sessions are loaded and locked.
5. Temporary accumulator records are calculated and updated from temporary tables.
6. Locks on constituent records are released.
7. The accumulator flag on the session table (AV_SESSION_TBL.AV_ACCUM_FLG) is set to 'Y'.

Note. If a session does not accumulate because a constituent accumulator record is locked by another accumulator process, the system skips the session and processes it the next time the accumulator process runs. The locked constituent and the locking process instance is indicated in the Service Operations Monitor Log.

Note. If locking problems persist and the constituent accumulator record is locked by a process that is no longer running, check the constituent accumulator table (PS_AV_CNST_ACC) for records where the PROCESS_INSTANCE field is not equal to zero. Add all constituent records with a nonzero, nonprocessing PROCESS_INSTANCE to the pending accumulation table (PS_CNST_ACC_PND) and reset the locking records PROCESS_INSTANCE to zero. Re-run the process. After the process runs, the pending accumulation table should be empty, and all posted sessions should be processed.

The following graphic illustrates the Constituent Accumulators process flow, from the person or organization's matching gift or pledge schedule, through to the person or organization's commitment summary, including all of the tables affected during processing:

Constituent Accumulators process flow

Pages Used to Process and Post Sessions

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
GL Interface (general ledger interface)	AV_RUN_CNTL_GL	Contributor Relations, Session Management, Process Sessions, G/L Interface	Process sessions and prepare them for journal entry in Financials.
GL Interface File Extract (general ledger interface file extract)	AV_RUNCTL_ACTLN	Contributor Relations, Session Management, Process Sessions, G/L Interface File Extract	Manually generate a flat file containing data from AV_ACCTG_LN to be exported to Financials.
Constituent Accumulators	AV_RUNCTL_ACCUM	Contributor Relations, Session Management, Process Sessions, Constituent Accumulators	Run the process that builds accumulator tables for summarizing data on the Giving Profile and Commitment Summary pages.

Running the GL Interface Job (AVPOST and AVPOST2)

Access the GL Interface page (Contributor Relations, Session Management, Process Sessions, G/L Interface).

GL Interface

Run Control ID: BATGL [Report Manager](#) [Process Monitor](#) Run

*Business Unit: PSUNV main BU

Institution: PeopleSoft University

*Journal Template:

*Commit Level:

Financials Release: 7.5

GL Interface page

Sessions must be queued for posting before they are processed. This process combines the tender account with the designation to create a dual line accounting entry.

Note. You must select a default Clearing Account on the Institution Installation page for this process to run.

Journal Template	Enter a journal template. These values are defined by your institution and determine how data is mapped to Financials.
Commit Level	Determine how many sessions will be processed before the system commits the transactions to your financial system.
Financials Release	Displays the version of Financials software selected on the CR Installation page.

If the process is set up, when you click the Run button, Process Scheduler runs the GL Interface process at user-defined intervals.

If your institution uses Financials software other than Financials 8.4, run the AVPOST job, which completes the AV/GL Post process, creates an extract file for export to Financials, and accumulates constituent totals for the Giving Profile and Commitment Summary pages.

If your institution uses Financials 8.4, run the AVPOST2 job, which runs similarly to the AVPOST job but replaces the SQR report output with the EOP_PUBLISHA process.

The EOP_PUBLISHA process does the following:

1. Selects accounting lines based on three criteria: process or job instance, process name, and process status.
2. Collects accounting line entries generated by the GL Interface AVPACCTL COBOL process and publishes them to the Financials 8.4 database.

Financials subscribes to the published messages in the Contributor Relations database, takes the accounting lines into their AV_ACCTG_LN table, and runs those lines through Journal Generator to create journals. Financials then publishes the updated accounting lines, Contributor Relations subscribes to these lines, and the data published by Financials updates the Contributor Relations AV_ACCTG_LN table.

Running the GL Interface File Extract COBOL Process (AVPACCTL)

Access the GL Interface File Extract page (Contributor Relations, Session Management, Process Sessions, G/L Interface File Extract).

GL Interface File Extract page

If your institution uses a version of Financials earlier than 8.4, or uses an external Financials system, run this process if the AV_POST job failed or if you chose to run only the AVPACCTL process rather than the complete GL Interface job.

Process Instance Select the process instance of the GL Interface process for which to generate an extract file.

If the process is set up, when you click the Run button, Process Scheduler runs the GL Interface File Extract process at user-defined intervals.

Running the Constituent Accumulators Process (AVPOST)

Access the Constituent Accumulators page (Contributor Relations, Session Management, Process Sessions, Constituent Accumulators).

Constituent Accumulators

Run Control ID: PS

[Report Manager](#) [Process Monitor](#)

Run

*Business Unit: MEDBU 

Medical Business Unit

Institution: PeopleSoft University

Constituent Accumulators page

If you process sessions using the AVPOST multi-process job, the system runs the processes automatically as part of that routine. If you run the GL Interface independently, run this process to provide current accumulated data on the Giving Profiles and Commitment Summary pages.

Business Unit Select the business unit associated with the sessions for which to run the Accumulate Constituent Totals process.

If the process is set up, when you click the Run button, Process Scheduler runs the Accumulate Constituent Totals process at user-defined intervals.

Viewing a Journal Generator Template

Use the Journal Generator Template component to review how journal templates for Contributor Relations are set up in Financials.

Processing Credit Card Transactions

This section provides an overview of credit card transaction processing and discusses how to:

- Select gift and membership transactions for processing.
- Authorize gift and membership transactions.
- Capture gift and membership transactions.
- Authorize and capture transactions as a single process.
- Handle denied CyberSource transactions.

Understanding Credit Card Transaction Processing

After you have posted a gift or membership with a credit card tender type to the general ledger, you can then process it through the third-party payment processor, CyberSource. Contributor Relations supports the following transaction processes through CyberSource:

- Authorization

Authenticates the credit card number and places a temporary hold on the specified amount against the cardholder's credit card. Also generates an authorization number and reduces the cardholder's available credit by the authorized amount. If the credit card information is not correct, or the cardholder does not have available credit, the system generates a message declining the transaction. Note that CyberSource does not bill the credit card at this time; it only verifies that the card is valid for the charge.

- Capture

Confirms the temporary hold placed on credit card funds after a transaction has been authorized and bills the credit card.

- Authorize and Capture

Combines transaction authorization and capture together in a single process.

- Credit

Issues a refund to a customer's credit card account after an adjusted gift or membership.

The table below lists all possible transaction statuses that are assigned to gift and membership transactions as they move through the credit card payment process.

Status Value	Definition
<i>V</i> (valid)	Upon entry of successfully validated credit card information on the credit card entry page, the AV_EP_GIFT_DTL or AV_EP_MBR_DTL tables initialize the AV_PAYMENT_STATUS field to <i>V</i> for this transaction. The transaction is ready for initial processing. The prerequisite to authorize gift or membership transactions is to have a value in the AV_PAYMENT_STATUS field of <i>V</i> .
<i>A</i> (authorized)	After successful authorization from the third-party payment processor, the system sets the value of the AV_PAYMENT_STATUS field for the gift or membership transaction (AV_EP_GIFT_DTL or AV_EP_MBR_DTL table) to <i>A</i> . The prerequisite to capture a gift or membership transaction is to have an AV_PAYMENT_STATUS value of <i>A</i> .
<i>B</i> (captured)	After successful billing from the third-party payment processor, the system sets the AV_PAYMENT_STATUS field for the gift or membership transaction to <i>B</i> . After a transaction is captured, it is considered complete and no longer shows up on the EP Transaction Processing - Filter Options page.
<i>P</i> (pending credit)	After a gift or membership transaction has been adjusted, after it has been captured, if the credit card information has been modified then the original amount charged to the credit card needs to be refunded. As part of the adjustment process, the system updates the AV_PAYMENT_STATUS field to <i>P</i> for this transaction. The transaction is ready to be credited.
<i>C</i> (refunded)	A transaction has an AV_PAYMENT_STATUS value of <i>C</i> as a successful result of selecting the transactions after filtering on a Transaction Requested value of <i>Credit</i> on the EP Processing Transaction - Filter Options page and processing these transactions through a third-party credit card processor.
<i>D</i> (denied)	After a transaction is sent to the third-party payment processor, if the system generates a message declining the transaction, the system updates the AV_PAYMENT_STATUS field to <i>D</i> for this transaction. Denied transactions are then ready to be viewed and selected from the EP Denied Transactions page.

<i>Status Value</i>	<i>Definition</i>
<i>N</i> (cancelled)	A transaction has an AV_PAYMENT_STATUS value of <i>N</i> as a result of the adjustment process or as a result of selecting the transaction and running the Cancel Pmt process through the EP Denied Transactions - Transaction List page.
<i>M</i> (manual)	A transaction has an AV_PAYMENT_STATUS value of <i>M</i> as a result of selecting the transaction and running the Manual process through the EP Denied Transactions - Transaction List page. If a transaction is flagged as Manual, all subsequent adjustments to the transaction also need to be Manual.

The following graphic illustrates the steps involved in processing gift and membership credit card transactions.

Summary of electronic payment transaction processing

Pages Used to Process Credit Card Transactions

Page Name	Definition Name	Navigation	Usage
EP Transaction Processing - Filter Options	AV_EP_FLTR	Contributor Relations, Session Management, Process Electronic Payments, EP Transaction Processing (to select gifts)	Enter your selection criteria for the gifts or member transactions to process.
EP Transaction Processing - Transaction List	AV_EP_G_PROC AV_EP_M_PROC	Click the Search button on the EP Transaction Processing - Filter Options page.	Select and authorize gift or membership transactions that meet the criteria you entered on the EP Transaction Processing - Filter Options page.

Selecting Gift and Membership Transactions for Processing

EP Transaction Processing - Filter Options page

Institution Enter an institution code.

Business Unit	Enter a business unit for the gift or membership transactions to process. This field cannot be left empty because Transaction Requested field values are dependent on the business unit specified. Note. Session number and gift number fields are tied to the business unit; you must specify a business unit here to filter on these two fields later on the page.
Tender Type	Enter the electronic processing tender type for the gift or membership transactions to process. Note. The example above uses <i>CC</i> to designate this electronic payment tender type. However, you can define it as anything using the Tender Types page.
Transaction Requested	There are four credit card transaction processes currently supported by CyberSource: <i>Authorize</i>, <i>Capture</i>, <i>Authorize and Capture</i>, and <i>Credit</i>. Select the appropriate transaction for the processing step to complete.
Self Service Session	Select the type of session to process: <i>All Sessions:</i> to select gifts and memberships made through both Contributor Relations and Involvement self-service pages. <i>Only Self Service:</i> to select gifts made through the self-service Make a Donation pages only. <i>Non Self Service:</i> to select gifts made through Contributor Relations non self-service pages only.
Post Date	Enter both From and To dates to select gifts or memberships posted within the range.
Session Number	Enter a session number to select gifts made in this specific session only. To display a session, you must enter a business unit.
Gift	If you are processing gift transactions, this field is available for entry. Enter a gift number to select gifts made with this gift number only. To display a specific gift, you must enter a business unit.
Mbr Pmt Nbr (membership payment number)	If you are processing membership transactions, this field is available for entry. Enter a membership payment number to select membership transactions made with this payment number only. To display a membership, you must enter a business unit.
Search	Click to filter the electronic payment transactions according to the specified criteria and display the results on the EP Transaction Processing - Transaction List page.

Authorizing Gift and Membership Transactions

Access the EP Transaction Processing - Transaction List page (Click the Search button on the EP Transaction Processing - Filter Options page).

EP Transaction Processing - Transaction List page

Note. On the EP Transaction Processing - Filter Options page, set Transaction Requested to *Authorize*.

The following fields on this page are defined on the EP Transaction Processing - Filter Options page: Business Unit, Tender, Session Nbr, Gift Nbr, Mbr Pmt, Nbr (if authorizing membership transactions), and Post Dt.

Select and Select All	Select the check box for each row to process, or click the Select All button to select all rows on the page.
Payment Status	Displays the current transaction status. If you click a link under this heading, a page appears that gives details of all existing transaction processing information.
Auth Dt (authorization date)	When the transaction is authorized, the system populates this field.
Reference Nbr (reference number)	When the transaction is sent, the system populates this field with a system-generated reference number used to communicate with the third-party credit card processor.
Gift Amt (gift amount)	If the transaction is a gift, displays the amount of the gift credit card transaction.
Mbr Dues (membership dues)	If the transaction is a membership, displays the amount of the membership credit card transaction.

Process Click to run the authorization process. The system gathers the transactions you select and sends them to the third-party credit card processor.

Important! After you click the Process button, give the process at least 30 seconds to run.

Set Filter Options Click to return to the EP Transaction Processing - Filter Options page.

If the search criteria you enter on the EP Transaction Processing - Filter Options page does not meet any existing transaction records, you receive the following informational message:

EP Transaction Processing	
Transaction List	
Institution:	PSUNV PeopleSoft University
Transaction Requested:	Credit
Self Service Session:	All Sessions
Process Monitor Set Filter Options	
No records found. Return to the filter options to change the page criteria.	

EP Transaction Processing - Transaction List message (AV_EP_G_PROC)

Important! On the EP Transaction Processing - Transaction List page, if you click the Select All button to select transactions for processing, you receive the informational message above. This does not mean there was a processing error; the system uses this message to notify you that processing of the entire Transaction List is complete, and it has found no more records to process.

After the system authorizes a transaction, the value of the AV_PAYMENT_STATUS field for gift or membership transactions (AV_EP_GIFT_DTL or AV_EP_MBR_DTL) becomes A. If any transactions do not successfully authorize, you must complete them using the denied transactions process or using a gift adjustment session.

Capturing Gift and Membership Transactions

After the system authorizes a group of transactions, you can filter for transactions using the EP Transaction Processing - Filter Options page and then select and capture the transactions using the EP Transaction Processing - Transaction List page. When you return to these pages, you must filter and process the transactions with a Transaction Requested field value of *Capture*.

Note. All gifts made through PeopleSoft Involvement self-service pages enter the system at this stage, authorized and ready to be captured.

After the system captures a transaction, the value of the AV_PAYMENT_STATUS field for gift or membership transactions (AV_EP_GIFT_DTL or AV_EP_MBR_DTL) becomes B.

Authorizing and Capturing Transactions as a Single Process

Instead of authorizing and capturing gift and membership transactions in separate steps, you can run both processes in one step. For some organizations, this is preferable because it allows you to streamline your processes. For others, it is more valuable to monitor each process.

Note. Your organization may have financial considerations, because a third-party credit card processor charges a per transaction fee; authorizing and capturing are considered separate transactions. If you authorize and capture in a single succession, use a single transaction to authorize/capture.

If you decide to authorize and capture in a single process, you can use the same EP Transaction Processing - Filter Options and EP Transaction Processing - Transaction List pages as you would when authorizing and capturing separately. However, when you use these pages, you must filter and process the transactions with a Transaction Requested field value of *Authorize and Capture*.

After the system successfully authorizes and captures a transaction in a single succession, its status becomes *B*.

Handling Denied CyberSource Transactions

Here is some additional information about handling denied CyberSource transactions:

1. If the EP Process receives a returned message indicating an E-System error, an error has occurred after the PeopleSoft-to-credit-card-merchant connection.

In this instance, the transaction will be denied but will not be available to be reprocessed through the Denied Transactions component.

2. This does not stop the process from continuing for subsequent valid transactions in the same process run.
3. Contact the donor, because the transaction failed outside of the PeopleSoft/CyberSource connection. For example, the transaction was denied by the donor's bank.

Purging Credit Card Security Data

This section discusses how to purge security codes from the system associated with gift and membership transactions.

Understanding Credit Card Security Code Purging

Credit card security codes are retained until after the transaction is authorized. In real-time transactions, the security code record is deleted immediately after the self-service transaction is authorized. However, if the payment merchant is set up to perform batch authorizations, there could be a delay between the time that sessions containing transactions are submitted and when they are authorized. The Purge Gift Security Codes and Purge Membership Security Codes pages enable you to ensure the timely deletion of this data and remain PCI compliant.

Pages Used to Purge Credit Card Security Data

Page Name	Definition Name	Navigation	Usage
Purge Gift Security Codes	AV_RUN_CVPURGE	Contributor Relations, Session Management, Process Electronic Payments, Purge Gift Security Codes	Periodically purge credit card security codes from the system that are associated with gifts.
Purge Membership Security Codes	AV_RUN_CVPURGE	Contributor Relations, Session Management, Process Electronic Payments, Purge Member Security Codes	Periodically purge credit card security codes from the system that are associated with membership payments.

Purging Security Codes for Gifts and Memberships

Access the Purge Gift Security Codes or Purge Membership Security Codes page.

Purge Gift Security Codes

Run Control ID: PS [Report Manager](#) [Process Monitor](#) Run

*Academic Institution:

*Business Unit:

Session Type: Gift

Purge Cutoff Date

Enter a combination of Days, Hours and Minutes to calculate a Purge Cutoff Date

Days Hours Minutes

Calculated Cutoff Date: 11/22/2009 5:07:47AM

Purge Gift Security Codes page

The fields on each page are the same for both gift and membership security code purges.

The fields in the Purge Cutoff Date group box enable you to periodically purge gift or membership security codes from your system. The cutoff date is calculated by subtracting the days, hours and minutes from the current system date and time, and any transaction with a date/time earlier than that is deleted.

Click the Run button to launch Process Scheduler and run the AV_CVVPURGE Application Engine process, which removes security codes from the AV_EP_PMT_CVV record that:

- Exceed the retention maximum days, hours and minutes, irrespective of whether they are authorized or not.
- Have been authorized, yet somehow were not purged by AV_EP_BATCH after the credit card transaction was authorized.

Reviewing Electronic Payment Results

This section discusses how to:

- Prepare to run the Electronic Payment (EP) processing audit.
- Generate the EP Processing Audit report.
- View EP processing audit information online.

Pages Used to Review Electronic Payment Results

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
EP Run Review	AV_EP_RUN_DETAIL	Contributor Relations, Session Management, Process Electronic Payments, EP Run Review	Enter run parameters and generate the EP Processing Audit report (AV704).
EP Run Review - Transaction List	AV_EP_TRAN_RUN_LOG	Click the Process Instance link on the EP Run Review page.	View process instance and reference number details for a transaction.

Preparing to Run the EP Processing Audit

Before you can generate the AV704 report, you must:

1. Enter credit card gifts or membership payments on the Gift Entry or Membership Entry pages.
2. Balance, queue, and post those gift or membership sessions.
3. Submit a request to process the credit card transactions using the EP Transaction Processing page.

Generating the EP Processing Audit Report

Working with Denied Credit Card Transactions

This section provides an overview of denied credit card transactions and discusses how to:

- Select denied gift and membership transactions for processing.
- Authorize and capture denied gift and membership transactions.

Understanding Denied Credit Card Transactions

When you attempt to authorize or capture credit card gift and membership transactions, you occasionally receive denial messages from the third-party credit card processor. Denials occur for many reasons, including invalid card number, account over limit, internet communication problems with the third-party credit card processor, and so on. Whenever transactions are denied, the value of the AV_PAYMENT_STATUS field becomes *D*.

You can use the EP Denied Transactions - Filter Options and EP Denied Transactions - Transaction List pages to perform the following functions:

- Retry the authorization, process the capture, authorize and capture, or process a credit.
- Handle the transaction manually.
- Cancel the payment of the transaction.

Pages Used to Work with Denied Credit Card Transactions

Page Name	Definition Name	Navigation	Usage

Select	Payment Status	Business Unit	Tender	Session Nbr	Gift Nbr	Post Dt	Reference Nbr	ID	Gift Amt	Result	
☐	Declined	MEDBU	CC	163	321	11/08/2004		AV0006	1500.00		

EP Denied Transactions - Transaction List page

Note. To authorize, on the EP Denied Transactions - Filter Options page set Transaction Requested to *Authorize*. To capture, set Transaction Requested to *Capture*.

The following fields on this page are defined on the EP Transaction Processing - Transaction List page: Payment Status, Business Unit, Tender, Session Nbr, Gift Nbr, Mbr Pmt Nbr, (if authorizing or capturing membership transactions), Post Dt, Reference Nbr, ID, and Gift Amt.

This page also lists the Result message for the transaction.

After you select the appropriate rows, click the Process button to retry the transaction. The process runs the same as it does for the initial attempt to authorize, capture, authorize and capture, or credit a transaction.

Click the Manual button to handle a denied transaction manually. For example, you may want to call the contributor, adjust the gift, or contact the third-party credit card processor directly to resolve the transaction. Denied transactions dealt with manually receive a status of *M*.

Note. When you handle a transaction manually, you must perform all subsequent actions manually, such as authorization, validation, or capture.

Click the Cancel Pmt button to cancel the transaction. The transaction then appears in the transaction log file with a status of *N*. When you cancel a transaction, you can no longer filter on it using the EP Denied Transactions - Filter Options page.

Important! After you click the Process, Manual, or Cancel Pmt buttons, give each process at least 30 seconds to run.

Reviewing Credit Card Activity

You may need to track credit card activity by day, session, business unit, and so on. You may also need to track transactions that are waiting to be sent for third-party processing. Contributor Relations retains a historical record of all credit card activity that you can filter and review. For example, you can view which transactions were sent, which passed, and which failed, and other transaction details.

This section discusses how to:

- Select gift and membership transactions for review.
- Review gift and membership transactions.
- Review credit card processing messages.

EP Transaction Log Inquiry - Filter Options page

The fields on this page are similar to those on the EP Transaction Processing - Filter Options page used to initially authorize, capture, authorize/capture, or credit transactions.

Use this page to filter any gift and membership transactions that have any status and are at any point in the credit card process. You can retrieve transaction details for any time period by entering a Transaction Date range. To review all transactions associated with a gift or membership, enter its 15-character Reference Nbr (reference number). To retrieve log information associated with a self-service gift, enter its 12-character Receipt Nbr (receipt number).

Reviewing Gift and Membership Transactions

Access the EP Transaction Log Inquiry - Transaction List page (Click the Search button on the EP Transaction Log Inquiry - Filter Options page).

Example of AV_EP_TRANS_SP page for a transaction

The Request Token field appears on this page. The Last Update Date/Time, Last Update User ID, and Process Instance fields are also on this page.

When your institution submits an initial credit card transaction request to CyberSource, then follows it with a separate request later, you must supply a request token with the second request. CyberSource generates and sends this token in its reply to any service request. For example, if you authorize a transaction and you later submit a follow-up request to capture it (not an auth/capture request), the process must provide CyberSource with this request token when you submit the capture request.

EP Transaction Log Inquiry - Transaction List page: Detail tab

The Detail tab provides more clarity about each gift or membership credit card payment. For each transaction on the List tab, you view the corresponding Business Unit, Tender, Session Number, and Gift Nbr (numbers), Transaction Date, Authorization Date if applicable, the person or organization ID, the Gift or Dues Amt (amount), the Receipt Nbr (number), and the Authorization Reply the system received from the third-party credit card processor.

Click to combine information from both the List and Detail tabs into a single page view. This combined view enables you, for example, to view all transactions involved with a reference number, each transaction's result, and the gift's subsequent gift number.

Click to return to the tabbed view of the EP Transaction Log Inquiry - Transaction List page.

Reviewing Credit Card Processing Messages

When you run the Application Engine process that sends credit card transactions to a CR merchant for credit card processing, you can click the PeopleSoft Process Monitor (Process Monitor, Details, Message Log) link on that page to view the job status and the messages that the system sends during the process.

The system displays a message on this PeopleTools page for each declined transaction. In addition, if your CR merchant for credit card processing is set up for tracing, the system displays messages for all transactions, regardless of their status. To set up a merchant for service provider tracing, select the appropriate value in the Credit Card Tracing field on the CR Merchants page (Set Up SACR, Product Related, Contributor Relations, Session Management, Merchant Table).

Click the Explain button beside a message on the Message Log to access a PeopleTools Explain page where you can learn more about the message.

The Description portion of the page enables you to decode the message. For example, here is the meaning of the message "Decline MEDBU.1.M.162.52 101":

- *Decline*: the return status message. In this case, the third-party processor declined the transaction.

- *MEDBU.1.M.162.52*: the merchant reference breaks down as follows:
 - MEDBU is the business unit associated with the transaction.
 - 1 is the service requested code. Code 1 = authorization, 2 = authorize and capture, 3 = capture, and 4 = credit.
 - M is the session type of membership, membership adjustment, gift, or gift adjustment.
 - 162 is the system-generated number of the gift or membership session.
 - 52 is the gift or membership payment number.
- *101*: the return status message provided by the third-party processor.

See *PeopleTools: PeopleSoft Process Scheduler*

Viewing Accounting Lines

This section discusses how to view generated accounting lines. The system generates accounting lines through the GL Interface process.

Page Used to View Accounting Lines

Accounting Line page

Note. Multiple views of this page are available by clicking the tabs in the scroll area.

Search Criteria

Here are fields that are common to all views.

Person

Select this option to view the accounting lines for a single person. Enter the ID in the field to the right. Only those transactions on the accounting line table that involve this person and the selected business unit are available for review.

External Organization

Select this option to view the accounting lines for a single external organization. Enter the external organization in the field to the right. Only those external organizations with transactions on the accounting line table for this business unit are available for review.

Session Number

Select this option to view the accounting line for an entire session. Enter the session number in the field to the right. Only those session numbers on the accounting line table for this business unit are available for review.

Run Date and Sequence Number

Select this option to view the accounting line for a specific GL Interface process instance. Enter a date and the sequence number in the fields to the right. You must enter the date before the sequence number. Only those sequence numbers on the date you select on the accounting line table for this business unit are available for review.

GL Chartfield 1 and 2

These tabs display the information sent to PeopleSoft Financials 8.4 and 8.8. The GL Interface process currently populates the following fields:

- Fund
- Alternate Account
- Budget Reference
- Chartfield 1
- Chartfield 2
- Chartfield 3

Viewing Suspended Sessions

This section discusses how to view information about suspended sessions.

Page Used to View Suspended Sessions

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Suspended Sessions	AV_SPSN_SESSION	• Contributor Relations, Session Management, Supervise Sessions, Suspended Sessions • Contributor Relations, Session Management, Supervise Sessions, Membership Sessions, Suspended Membership Sessions	View information about sessions that were suspended during the posting process.

Viewing Suspended Session Information

Access the Suspended Sessions page (Contributor Relations, Session Management, Supervise Sessions, Suspended Sessions).

Suspended Sessions

Institution: PSUNV PeopleSoft University

Business Unit:  Refresh

Customize Find View All  First 1 of 1 Last						
<u>Business Unit</u>	<u>Session Number</u>	<u>Session Type</u>	<u>Session Status</u>	<u>User ID</u>	<u>General Ledger Posting Date</u>	<u>Suspense Reason</u>

Suspended Sessions page

When you post gift and pledge sessions, the system displays any sessions that were suspended for any reason on this page. You can reopen the session and make the necessary adjustments to enable proper posting.

Suspense Reason

Displays the reason the system suspended the session. The following table lists the possible suspense reasons and their corresponding messages.

Reason	Message
If a Contributor Relations Clearing Account Item Type is not set up correctly	Clearing Acct ITEM_TYPE Missing for <i>Institution</i>
If the Gift Total does not equal zero after subtracting each of the designation/recognition totals for the gift	Gift Amt of Gift <i>Number</i> not distributed
If the Adjusted Gift Total does not equal zero after subtracting each of the designation/recognition totals for an adjusted gift	Adjust Amt of Gift <i>Number</i> not distributed
If the Pledge Total does not equal zero after subtracting each of the designation/recognition totals for a pledge	Pledge Amt of Pledge <i>Number</i> not distributed
If the Adjusted Pledge Total does not equal zero after subtracting each of the designation/recognition totals for an adjusted Pledge	Adjust Amt of Pledge <i>Number</i> not distributed
If the Membership Total does not equal zero after subtracting each of the designation/recognition totals for a membership	Total Amt of Membership <i>Number</i> not distributed
If the Adjusted Membership Total does not equal zero after subtracting each of the designation/recognition totals for a membership	Adjust Amt of membership not distributed

Reason	Message
If the Tender Item Type is not set up correctly	Item type not defined for Tender
If a transaction is missing a designation	DESIGNATION Missing for Gift Nbr
If a designation is set up without an Item Type	Item Type Missing for Designation
If a membership transaction is missing a designation	DESIGNATION Missing for Mbr Pmt Nbr
If a membership transaction includes a designation without an Item Type	Designation ITEM_TYPE Missing for Designation
If an Item Type does not include a valid GL Interface record	GL Interface missing for Item Type
If the designation's Item Type DB/CR Indicator is not set correctly to build a dual accounting line	DB/CR Indicator incorrect for Item Type
If the Item Type's GL Interface record does not include a valid business unit	GL Interface BUSINESS_UNIT Missing for Item Type
If a designation is included in a transaction that is no longer active	Active Designation not found

If any of these errors occur in the GL Interface process, the system rolls back all processing related to the session and sets the AV_SESSION_TBL.SESS_STATUS field to S. These sessions appear on the Suspended Sessions page.

To fix the session for reprocessing, the situation underlying each error in the session must be corrected before balancing, queuing, and running the GL Interface process again. For example, if a designation is missing an item type, you have two choices.

You must either update the designation fund record by adding an item type on the Designation Funds page, or select a different designation for the transaction in the entry page of the session for the transaction that erred.

Open

Click to reopen the session for editing. After reopening the session, go to the Gift Entry, Pledge Entry, Member Entry, Adjust Gift, Adjust Pledge, or Adjust Member page to correct the problem within a session.

To correct the setup values, go to the appropriate page – Item Type, Designation Funds, Tender Type, or CR Business Unit – and make the change.

Viewing Information About and Transferring Sessions

Use the Session Filter and Session Summary pages to view information about existing sessions. The Session Filter page enables you to select criteria to narrow the number of sessions you view, and the Session Summary page displays summaries of the sessions matching your selection criteria. From the Session Summary page, you can reopen sessions that have been balanced, make changes to the transactions in a session, or transfer sessions to new users if you have gift and pledge supervisor status on the Staff Roles page.

This section discusses how to:

- Filter sessions.
- View a session summary.
- Transfer sessions.
- Reopen and edit expected counts and amounts for sessions.

Session Filter page

Business Unit	Enter the business unit for which to view session information.
Session Status	Select a valid session status, such as <i>Open</i>, <i>Balanced</i>, <i>Posted</i>, <i>Queued</i>, or <i>Suspense</i>. If you do not specify a session status, the Session Summary page displays all sessions, regardless of session status. Field values are delivered with the system as translate values. Do not modify these translate values in any way. Any modifications to these values will require a substantial programming effort.
User ID	Displays the ID of the person who controls the session. Note. This field is only available for selection if you are a gift and pledge supervisor; otherwise, your user ID appears here.
Session Type	Select a valid session type, such as <i>Gift</i>, <i>Pledge</i>, <i>Gift Adjustment</i>, <i>Pledge Adjustment</i>, <i>Member</i>, or <i>Member Adjustment</i>. If you do not specify a session type, the Session Summary page displays all sessions, regardless of session type. Session types are delivered with the system as translate values. Do not modify these translate values in any way. Any modifications to these values will require a substantial programming effort.
Self Service Session	Select to filter for gifts made through the Involvement online giving process.

Date Opened, Post Date, and Balance Date

Enter a date opened, post date and balance date range. Select the earliest date in the range from the From prompt box, and the latest date in the range from the To prompt box. A post date range is the date range in which sessions were posted during the GL Interface process. A balance date range is the date range in which sessions were balanced in the system. The sessions matching your date ranges appear on the Session Summary page.

Important! To filter transactions for an exact date, enter the same value in both the from and to fields.

Actual Total Count and Actual Total Amount

Enter an actual total count and actual total amount range. Enter the lowest count or amount in the From field, and the highest count or amount in the To field. An actual total count range specifies the number of transactions contained in a session. The actual total amount range specifies the monetary total of a session. The sessions matching the ranges you enter appear on the Session Summary page.

Search

Click to retrieve a list of results matching your selection criteria.

Note. The Maximum Retrieval value, set on the Institution Installation page, determines the maximum number of results returned per search.

Viewing a Session Summary

Access the Session Summary page (Contributor Relations, Session Management, Supervise Sessions, Session Summary, Session Summary).

Session Filter Session Summary											
Institution: PSUNV PeopleSoft University											
Total Count: 3 Total Amount: 16,344.35 USD											
Expected	Session Number	Business Unit	Session Type	Session Status	User ID	Date Opened	Balance Date	Post Date	Actual Count	Actual Amount	Self Service Session
Expected	123	MEDBU	Gift Adj	Open	PS	10/22/2001				0.00 USD	
Expected	125	MEDBU	Gift	Open	PS	10/22/2001			1	344.35 USD	
Expected	127	MEDBU	Pledge Adj	Open	PS	10/22/2001			1	15,000.00 USD	
Expected	162	MEDBU	Gift	Open	PS	11/05/2004			1	1,000.00 USD	

Session Summary page

If you are a Gift and Pledge Supervisor, you can reopen and transfer sessions using this page.

Expected

Click to reopen the Expected Count and Expected Amount fields on the Maintain Sessions page for editing. You must be assigned the role of gift and pledge supervisor through the Staff Roles page to access this button.

Self Service Session

Indicates the gifts in the session that were created as a result of online giving.

Transferring Sessions

Access the Transfer page (Click the Transfer Session link on the Session Summary page).

The screenshot shows a web form titled "Transfer". It contains two main sections: "From" and "To".

From Section: This section has a dark blue header. Below it, there are two rows of information: "User ID:" with the value "PS" and "Name:" with the value "Locherty,Betty".

To Section: This section also has a dark blue header. Below it, there are two rows: "User ID:" followed by a text input field and a magnifying glass icon, and "Name:" followed by an empty text input field.

At the bottom of the form, there are two buttons: "OK" and "Cancel".

Transfer page

Sessions are tied to User ID; essentially, they are "owned" by the person who creates them. A gift and pledge supervisor or membership supervisor may need this page to transfer a session from one user to another, for example because the owner could not finish the data entry for one reason or another.

Operator ID

Enter the ID of the user to whom to transfer the session.

Reopening and Editing Expected Counts and Amounts for Sessions

If you try to balance a session on the Maintain Sessions page and you discover data entry errors that prevent you from balancing the session, you must correct the erroneous expected counts and amounts so that the session can balance. However, for security reasons, when you enter and save expected counts and amounts, the system locks them so that they cannot be changed without intervention. Therefore, to correct erroneous data you must reopen the expected counts and amounts for the session on which you are working. Note, however, that only individuals at your institution who have been assigned the role of Gift and Pledge Supervisor (GPS) or Member Supervisor (MS) on the Staff Roles page can reopen expected counts and amounts for a session. Thus, you must first assign an individual the GPS staff role, and then that person can reopen the expected counts and amounts.

Note. To reopen expected counts and amounts within a session, the session cannot have been queued for posting, nor can it have been posted through the GL Interface process.

To reopen expected counts and amounts:

1. Add an ID for the person who will be assigned the GPS role (if not already in the system).

To add IDs, select Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Resources, Staff.

2. Assign the person the GPS role.

Insert a row on the Staff Roles page, select the GPS role, and save the page.

To assign roles, select Set Up SACR, Product Related, Contributor Relations, CR Common Definitions, Resources, Staff Roles.

Note. If you are logged in as the ID to which you just assigned the GPS role, you do not have to log out to continue this procedure.

3. Select filter criteria on the Session Filter page and search for the session to be reopened.

Your search criteria might return multiple sessions, which is fine.

To select filter criteria, select Contributor Relations, Session Management, Session Filter.

4. Reopen the expected counts and amounts.

Go to the Session Summary page. If you are logged onto the system as the GPS you have additional buttons such as Expected and Open, and a Transfer link. The buttons and links you see depend on the state of the session. Locate the row of the session to reopen and click the Expected button in that row. A message appears that indicates that the session has now been reopened.

To access the Session Summary page, enter your criteria on the Session Filter page and click the Search button.

5. Edit the expected counts and amounts.

Go to the Maintain Gift Sessions, Maintain Pledge Sessions, or Maintain Membership sessions page (depending on what you are working on). Upon entering this page be sure to select the session that you just reopened. The Expt Cnt (expected count) and Expt Amt (expected amount) fields are now available for input. You can edit these fields.

To access the Maintain Sessions pages, select Contributor Relations, Session Management, Enter Gifts, Maintain Gift Sessions, or Contributor Relations, Session Management, Enter Pledges, Maintain Pledge Sessions, or Contributor Relations, Session Management, Enter Memberships, Maintain Membership Sessions.

Note. When the fields are edited and saved, you would need to perform Steps 3 and 4 again to reopen the session for editing.

Managing the Acknowledgement Process

In Contributor Relations, acknowledgement letters and receipts are either queued automatically based on parameters you define when you set up your system or queued manually. After they are queued, communications are generated using the letter generator process.

Before you run the acknowledgement process you must first define the acknowledgement and letter setup for the institution and establish joint relationships. All gifts and pledges to be acknowledged must be posted through the GL Interface process.

The following diagram represents the way acknowledgement information feeds into the joint letter generation process:

Acknowledgement process into letter generation

The 3Cs Engine generates joint communications for acknowledgement letters and receipts. After the communications record exists, you can run the Letter Generator process (CCLTRGEN). The 3C Engine runs through a series of rules to determine which records are joined and should receive joint communications. Any remaining unjoined records receive individual communications. The Letter Generator creates a Comma Separated Values (.csv) file containing data needed to generate both joint and individual letters. The .csv file can be merged with a Microsoft Word template to produce actual letters.

Understanding How the Acknowledgement Generation Process Works

When acknowledgements are processed, the system runs a series of checks to determine which letters a donor should receive.

Those steps include:

1. The system runs through each item you prioritized on the Institution Installation 2 page.

On that page, you entered numbers to represent the priority for sending acknowledgement letters. The priority you set determines which acknowledgement setup parameters are looked at first to determine which letter a donor receives. For each item you prioritized, the system checks the acknowledgement rules and either generates a communications record, assigns the acknowledgement to a role, or assigns it to suspense.

- The system looks at the designation fund set up for each designation to which the donor gave.

If an acknowledgement event ID is assigned to a designation fund, a communications record is generated.
If a role is assigned to a designation fund, the acknowledgement is assigned to staff members with that role.

Note. If the Anonymous check box is selected on the Recognition page when entering a transaction, the system does not run these checks and does not produce an acknowledgement letter.

Understanding Joint Acknowledgements and Spousal Relationships

The Joint Letter Generator follows specific rules about spousal relationships when generating acknowledgements and receipts. You must be careful when defining defaults for gift recognition splits between spouses to ensure that gifts are properly acknowledged.

Note. To make spouses jointly acknowledged, you must establish a joint record and set up salutations and a joint address using the Relationships component.

On the Contributor Relations Installation page you can define default split percentages between a donor and spouse for various credit types.

Use the following example to determine how default splits affect joint receipting and acknowledgements.

Example

A donor gives a gift of 1,000 USD:

If a joint relationship exists between a donor and spouse and you set the following defaults:

	<i>Donor</i>	<i>Spouse</i>
Hard Credit	50 percent	50 percent
Soft Credit	50 percent	50 percent

The donor and spouse receive a joint receipt for 1,000 USD. Depending on how you set up acknowledgement rules, they may also receive a joint acknowledgement for 1,000 USD.

If a joint relationship does not exist between a donor and spouse and you set the following defaults:

	<i>Donor</i>	<i>Spouse</i>
Hard Credit	50 percent	50 percent
Soft Credit	50 percent	50 percent

The donor and spouse each receive separate receipts for 500 USD. Depending on how you set up acknowledgement rules they may also receive separate acknowledgement letters for 500 USD each. No joint communications are created.

If a joint relationship exists between a donor and spouse and you set the following defaults:

	<i>Donor</i>	<i>Spouse</i>
Hard Credit	100 percent	0 percent
Soft Credit	0 percent	100 percent

The donor and spouse receive a joint receipt for 1,000 USD. Depending on the acknowledgement rules you set up and whether the Acknowledge Soft Credit check box is selected on the Institution Installation 2 page, they may also receive a joint acknowledgement for 1,000 USD.

Note. We recommend that you use this configuration to ensure sending the appropriate acknowledgement letter for the highest hard credit recognized. The system adds hard credits for joint records together, but the letter code for the acknowledgement is selected based on an individual's hard credit rather than the joint hard credit calculation.

If a joint relationship does not exist between a donor and spouse and you set the following defaults:

	<i>Donor</i>	<i>Spouse</i>
Hard Credit	100 percent	0 percent
Soft Credit	0 percent	100 percent

The donor receives a receipt for 1,000 USD. The donor may also receive an acknowledgement letter for 1,000 USD. Depending on the acknowledgement rules you set up and whether the Acknowledge Soft Credit check box is selected on the Institution Installation 2 page, the spouse may receive an acknowledgement for 1,000 USD indicating zero charitable amount. No joint communications are created.

Processing Acknowledgement Letters

This section discusses how to automatically process acknowledgment letters.

Page Used to Process Acknowledgement Letters

Page Name	Definition Name	Navigation	Usage
Process Acknowledgements	AV_RUNCTL_ACKNLDG	Contributor Relations, Session Management, Acknowledgements, Process Acknowledgements	Process the acknowledgement letters that are queued automatically based on the setup parameters you set for acknowledgements.

Processing Acknowledgements Automatically Using a COBOL Process (AVPACKNL)

Access the Process Acknowledgements page (Contributor Relations, Session Management, Acknowledgements, Process Acknowledgements).

Process Acknowledgements

Run Control ID: PS [Report Manager](#) [Process Monitor](#) Run

*Business Unit: Medical Business Unit

*Institution: PeopleSoft University

*Commit Level:

Process Acknowledgements page

Business Unit Enter the business unit for which to process acknowledgements.

Commit Level Determine how many sessions for which acknowledgement letters are processed before the system commits them to the database.

If the process is set up, when you click the Run button, the system runs the AVPACKNL process at user-defined intervals.

Generating Acknowledgement Letters

Access the Letter Generation page (Contributor Relations, Communications, Process Communications, Letter Generation).

Contributor Relations uses Campus Community's letter generation process to generate acknowledgement letters when they have been processed.

Working with Manually Generated Acknowledgements

You can set up parameters so that acknowledgement letters are automatically generated based on a donor's service indicators, gift amounts, and so on. However, some commitments do not fall into the parameters of these defaults, so those acknowledgements are assigned to a staff member or a suspense file and written or processed separately.

This section discusses how to:

- View acknowledgements in suspense.
- View acknowledgement details.
- Transfer an acknowledgement.
- View acknowledgement lists.

Pages Used to Work with Manually Generated Acknowledgements

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>

Acknowledgement Suspense page

Important! Acknowledgements are assigned to suspense if they do not fall into any of the setup parameters established when defining acknowledgement rules. They are also assigned to suspense if they are assigned to a role and there is not a resource assigned to that role.

Select	Select each record for which to transfer acknowledgements.
Process	Click to process acknowledgement letters on the Acknowledgement Detail Page.
Transfer	Click to assign the acknowledgement to another staff member on the Transfer Page.

If there is a gift level range (such as gifts less than 50 USD) for which only a receipt should be produced, be sure to include a row in the gift level portion of the acknowledgement setup to manage this. To produce only a receipt, set the No Receipt flag to Yes and select the same event ID that is selected for your receipt. The system generates a receipt but does not produce an acknowledgement letter. If you do not do this the acknowledgement process sends everything in the acknowledgement list to the manual acknowledgement suspense process.

You can build a workset from this page.

Viewing Acknowledgement Details

Access the Acknowledgement Detail page (Click the Process Button on the Acknowledgement Suspense or Acknowledgement List page).

Acknowledgement Detail		
ID:	AD1035	Martin,Kathy
Date:	08/01/2001	☐ In Honor / In Memory
Commitment Type:	GIFT	
Tender Type:		
Amount:	69.56	
Letter		
☒ Standard ☐ Custom ☐ None		
Event ID:	CRGFTACK	Gift Acknowledgement

Acknowledgement Detail page

When you process a letter you have the options of selecting and generating a standard letter, assigning a customized letter, or not sending a letter.

Standard

If selected, indicates that you will generate your institution's standard acknowledgement letter for this commitment. You are prompted to select an event ID and a communication record is written so that a letter is generated when you next run the letter generation process. The system deletes the record from the AV_ACKNLGD_DTL table upon saving this page.

Custom

If selected, indicates that you will generate a custom acknowledgement letter for this commitment. You are prompted to select an event ID. In addition, a text box displays where you can type comments about the custom letter that you are going to create for the donor. You can view these notes when you view information about the communication record. A communication record is written and marked as complete. The system deletes the record from the AV_ACKNLGD_DTL table upon saving this page. You do not generate a custom letter by running the letter generation process. Custom letters must be generated manually.

None

If selected, indicates that you do not want to generate an acknowledgement letter for this commitment. The system deletes the record from the AV_ACKNLGD_DTL table and does not write a communication record. The record no longer appears in the acknowledgement list or acknowledgement suspense.

Note. We recommend that your institution create an event ID for the purpose of generating custom acknowledgements. The letter code you assign can be a "generic" or blank letter code, since it is not actually used to generate letters. Creating this event ID ensures that a communications record is generated for custom acknowledgements, enabling you to track the communication.

Transferring an Acknowledgement

Access the Transfer page for acknowledgements (Click the Transfer button on the Acknowledgement Suspend or Acknowledgement List page).

Transfer

To

User ID: 

Betty Locherty

Transfer page

Enter the User ID of the person you are assigning the acknowledgement to. The acknowledgement is immediately assigned to the individual you select. If you have selected a group of donors to transfer to another user, all selected acknowledgements will be immediately assigned to the individual you select.

Viewing Acknowledgement Lists

Access the Acknowledgement List page (Contributor Relations, Session Management, Acknowledgements, Acknowledgement List).

Acknowledgement List

Workset:  **Description:** **Method:**

Acknowledgement List page

Note. If more than one person at your institution is assigned to one role, the acknowledgement appears on the acknowledgement lists of each person with that role. When you complete the acknowledgement, it is removed from the acknowledgement lists of all people with that role so a second letter is not accidentally sent.

Select Select each record for which to transfer acknowledgements.

Process	Click to process acknowledgement letters on the Acknowledgement Detail Page.
Transfer	Click to assign the acknowledgement to another staff member on the Transfer Page.

You can build a workset from this page.

Managing Joint Communications

Contributor Relations provides the ability to communicate with constituents jointly to a common address rather than producing individual communications for each constituent. For example, you can invite a married couple or two roommates to an event by sending a single invitation to their joint address.

Use the joint communication features on the Relationships and Communications pages to create joint communication for two individuals when at least one of the individuals exists in the database. To set up Joint Communications you must first set up joint salutations, establish a joint relationship, and identify the address to use for the joint communication.

There are two areas in Contributor Relations from which joint communications can be triggered: acknowledgements and receipting, and membership organizations and initiatives. In either instance, the 3C Engine process creates the communication record.

The 3C engine evaluates the selected joint options and determines which records are joined and should receive joint communication. Any remaining unjoined records receive individual communications. After the communication record exists, you can run the Letter Generator.

Note. The Joint Communications feature expands upon the functionality found in Campus Community's Letter Generator. No functionality has been removed from Letter Generator to create the Joint Communications feature.

The following is a list of the communication variable data that the system uses to determine whether or not to send a joint communication:

- Session_no
- Gift_no
- Recognition_type
- Designation
- Intv_cd
- AV_audience
- Aud_type
- Membership_nbr
- AV_mbr_org_cod

- Av_std_ben
- Mbr_pmt_no

Handling Matching Gifts

This section provides an overview of matching gifts and matching gift processing, and also discusses how to:

- View an organization's matching gift rules.
- View an organization's matching gift restrictions.
- View outstanding matching gifts.
- View expected matching gifts.
- View matching gifts for people.
- View matching gifts for organizations.

Understanding Matching Gifts

Many of the donations donors make can be matched by their employers or by other organizations they are affiliated with. You can track information about the types of gifts organizations match, then have the system calculate a "best guess" of the potential matches for a particular gift. You can modify that "best guess" to reflect the actual matching amount expected for a gift, then track actual matching payments or denied matches against your expectations.

In addition, you can track the matching gift forms that must be submitted before some organizations match a gift.

The process works as follows:

1. Your institution enters information about an organization's matching gift rules and the match ratios for particular programs and gift amounts.
2. A donor gives a gift.

The system checks for potential matching organizations based on the donor's relationships, current work experience, and whether he or she is a qualified contact of an organization. When any one of these criteria exist, the system makes a "best guess" at what the matching gift will be taking into consideration the organization's minimum requirements for amount, ineligible designation matching gift types, ineligible gift types, and match ratio. These expected matches appear on the Outstanding Matching Gifts and External Organization Matching Gifts pages.

3. If they have not already, the donor may need to submit a matching gift form.

Indicate the date the form was received on the Outstanding Matching Gifts Page or the External Organization Matching Gifts page. Not all matching gift organizations require this step.

4. The organization makes a matching gift.

When entering the organization's gift, you can select from a system-generated list of the donors expecting matching gifts from the organization, then indicate which original donations are being matched. Alternately, you mark the expected match record as "Denied," and it no longer appears as a current expected match.

Understanding Matching Gift Processing and Foreign Currencies

Matching gifts rules can be defined in any currency, and a donor can give a gift in any currency. However, all gift amounts are converted to your institution's base currency when transactions are stored. Expected match amounts for gifts where a matching gift is expected are determined as described in the following scenarios:

Assumption for these scenarios: the institution base currency is USD.

Scenario 1: The Gift and the Matching Rules are in Institution Base Currency

The matching gift ratios are set up as follows:

<i>Ratio</i>	<i>Currency</i>	<i>From Amount</i>	<i>To Amount</i>
2:1	USD	0	1,000
1:1	USD	1,001	5,000

A gift of 500 USD is made to the institution. The expected and received match is 1,000 USD.

Scenario 2: The original Gift is in Institution Base Currency and the Matching Gift is not

The matching gift ratios are set up as follows:

<i>Ratio</i>	<i>Currency</i>	<i>From Amount</i>	<i>To Amount</i>
2:1	USD	0	1,000
1:1	USD	1,001	5,000

A gift of 500 USD is made to the institution. The system expects a match of 1,000, USD but receives a match of 1,300 CAD. The system converts the matching gift to USD using the exchange rate between CAD and USD on the gift date. This rate can be overridden during the gift entry process.

Scenario 3: The Gift and the Matching Rules are not in Institution Base Currency

The matching gift ratios are set up as follows:

<i>Ratio</i>	<i>Currency</i>	<i>From Amount</i>	<i>To Amount</i>
2:1	EUR	0	1,000
1:1	EUR	1,001	5,000

A gift of 500 CAD is made to the institution. The system converts the gift amount to the base currency of USD. The system also converts the matching gift rules to the base amount of USD as of the gift date, and applies the converted gift amount to the converted matching gift rules. The expected match amount is always generated in the base currency code.

Scenario 4: The Gift is not in Institution Base Currency, but is in Matching Rules Currency

The matching gift ratios are set up as follows:

<i>Ratio</i>	<i>Currency</i>	<i>From Amount</i>	<i>To Amount</i>
2:1	EUR	0	1,000
1:1	EUR	1,001	5,000

A gift of 500 EUR is made to the institution. A matching gift of 1,000 EUR is expected/received. The system converts the expected/received matching gift amount to USD as of the gift date.

Matching Gift Rules inquiry page (2 of 2)

Min Amt (minimum amount) Displays a minimum amount for gifts that the organization will match. The organization will only match gifts that are equal to or greater than the amount in this field.

MG Designation Type (matching gift designation type) Indicates the designation to which matching gift funds must be applied when they are received. This field enables you to determine to what designations a matching gift company's payment should be allocated.

Receipts Displays receipt options.
Periodically: receipts may be combined and sent to the organization periodically.
Each Gift: the organization requires a receipt from your institution for each company gift.

Distribution Schedule Displays the frequency with which organizations make matching gift payments to your institution.

Deadline Date Displays the date on which a completed matching gift form must be received by the organization in order for it to match the gift.

Payroll Eligibility Indicates the organization offers employees the option of having payroll deduction gifts matched through its matching gift program.

Duplicate Match Indicates the organization matches gifts that are matched by other organizations.

Annual Matching Gift Budget

Overall Total	Displays the organization's annual matching gift budget. This amount represents the total amount the organization will donate in matching gift payments to your institution as well as other institutions for the current year.
Donor/Institution Total	Displays the maximum monetary amount the organization will match toward one donor's gifts to your institution this year
Institution Total	Displays the maximum monetary amount the organization will give to your institution in matching gift payments this year.
Donor Total	Displays the maximum amount the organization will pay in matching gifts for donations made by one donor to your institution as well as other institutions this year.

Matching Gift Ratio

Ratio and To Ratio	Displays the formula by which an organization calculates the amount it will match for each regular donor gift to your institution.
Minimum Match Amount and Maximum Match Amount	Displays amounts used in the automatic calculation of the expected matching gift amount.

Restrictions

Ineligible Designation Types	Displays the designation types that are not eligible for an organization's matching gift program.
Ineligible Gift Types	Displays the certain gift types that the organization will not match.
Eligible Alumni Status	Displays the status a donor must have as a formal student of your institution in order for the organization to match gifts.
Eligible Employee Status	Displays the status a donor must have as an employee at the organization for it to match gifts.

Attachments

Use the fields in this group box to view existing attachments to the organization's matching gift rules record. Click the View link to open the attachment in a new window.

Viewing Outstanding Matching Gifts

Access the Outstanding Matching Gifts page (Contributor Relations, Session Management, Matching Gifts, Person Matching Gift).

Managing Giving Clubs

This section provides an overview of giving clubs and discusses how to:

- Manually generate giving club memberships.
- Generating giving club memberships.
- Track giving club progress.
- View a giving club summary.
- View a giving club membership summary.

Understanding Giving Clubs

You can define the giving clubs, their levels, and their membership rules.

When clubs are created, membership is generated by the system using the Process Giving Clubs routine. When a donor reaches the required giving level for a giving club membership, he or she becomes a member of the club.

You can track information about the members of each giving club at your institution as well as information about the progress and structure of each giving club.

Pages Used to Manage Giving Clubs

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>

Description:

Giving Club Membership page

To assign a donor to a giving club you must be the club's administrator. Other staff can view membership information on this page, but cannot update information.

Giving Club	Enter the giving club to which to assign the donor. Available options include valid giving clubs at your institution.
Fiscal Year	Enter the fiscal year for the giving club membership. This field populates by default to the current fiscal year, but can be changed.
Level	Enter the level within the giving club that the donor is qualified for. Level names are usually very specific for each institution and defined based on a donor's level of giving, but an example might include a giving club with levels of <i>Member</i> , <i>Associate</i> , <i>Sponsor</i> , and <i>Benefactor</i> .
Membership Date	Enter the date on which the donor's membership in the giving club begins.
Giving Club Status	Select the current state of the donor's status in the giving club. Values for this field are <i>Member</i> or <i>Accruing</i> . Select <i>Member</i> to automatically add the donor to a giving club. <i>Accruing</i> indicates that the donor is still working toward membership eligibility at the level you selected.
Amount	Enter the amount of the donors giving that qualified them for the giving club.

Generating Giving Club Memberships

Process Giving Clubs

☒ Unprocessed Sessions

☐ Initialize Select Giving Clubs

☐ Initialize All Giving Clubs

Process Giving Clubs page

Institution	Enter the institution for which giving club records are generated.
Process Date	Enter the date on which the process is run. This field populates by default to the current date. Note. AVPGCLUB uses the date you enter to select currently active giving club records. A giving club's start date, end date, and status are determined on the Giving Club Rules page. AVPGCLUB also uses process date to select giving club eligible designations determined on the Giving Club Rules page.
Commit Level	Enter the number of sessions for which giving club memberships are processed before being committed to the database.

Important! If a donor's giving club eligibility is affected due to a transaction adjustment, the system "backs out" the membership or level change and returns the donor to his or her previous status. However, the system does not back out any membership additions or changes that are entered manually through the Giving Club Membership page.

In the Process Giving Clubs group box you have three processing options—Unprocessed Sessions, Initialize Select Giving Clubs, and Initialize All Giving Clubs—which are described in detail below. The processes that initialize clubs look at historical member data; the other simply looks at unprocessed current data. You need to select different processing options, depending on the state of your giving clubs.

Giving Club State	Correct Processing Option(s)
All giving clubs are correct	Unprocessed Sessions

Giving Club State	Correct Processing Option(s)
Added new giving club	Unprocessed Sessions, then Initialize Select Giving Clubs
Need to rebuild giving clubs	Unprocessed Sessions, then Initialize All Giving Clubs
Changed giving club rules	Unprocessed Sessions, then Initialize Select Giving Clubs

Unprocessed Sessions

Select this option to process giving clubs using the standard AVPGCLUB COBOL process. The system accesses the Session table and retrieves all posted sessions for which giving clubs have not already been processed, based on the institution selected. This option does not look at prior giving, but calculates giving club memberships adding current qualified commitments to transactions previously processed for giving clubs.

Note. You should always run this option prior to running either of the initializing options so that all gifts are included in the initialization process.

Initialize Select Giving Clubs

Select this option to recalculate only the giving clubs you select for the selected institution. When you select this option, a grid appears where you can select which giving clubs you want to initialize. Use this option for two types of clubs: those that are newly created, and those where the rules have changed. It may also be used if you suspect the data may be out of sync or corrupt. The system initializes the club and identifies all qualifying gifts for it. The system then assigns members to giving clubs based on all processed giving. If sessions are posted but have not been processed for giving clubs, the system does not consider those commitments when running this option.

See the note above to run unprocessed sessions first.

Initialize All Giving Clubs

Select this option to recalculate all giving clubs for the selected Institution. The system assigns all members to giving clubs active as of the Process Date, as appropriate, according to the rules set up for each club. Use this option to back up giving club information or rebuild giving club member data if you suspect the data may be out of sync or corrupt. If sessions are posted but have not been processed for giving clubs, the system does not consider those commitments when running this option.

See the note above to run unprocessed sessions first.

Warning! Do not run this process at peak giving periods, since the system uses all existing giving records during processing.

When you process giving clubs, the AVGCLUB PSJob does the following:

1. Runs the AV_GCLUB Application Engine program, which saves existing giving club membership data based on the option selected on the Process Giving Clubs page:
 - Unprocessed Sessions – Does not back up any data. Runs the giving club process for all new commitments that have not been calculated into giving clubs as of runtime.
 - Initialize Select Giving Clubs – Backs up giving club data, from the AV_GCLUB_MBR to the AV_GC_MBR_TMP table, for the selected clubs as it exists immediately prior to runtime.
 - Initialize All Giving Clubs – Backs up giving club data as it exists immediately prior to runtime, from the AV_GCLUB_MBR to the AV_GC_MBR_TMP table, for all giving clubs active as of the process date.
2. Runs the AVPGCLUB COBOL program and calculates giving club membership based on club rules based on the option selected on the Process Giving Clubs page:
 - Unprocessed Sessions – Selects commitments entered within sessions where the giving club flag (GC_FLG) equals 'N', evaluates new commitment data according to club rules, and updates membership data on the AV_GCLUB_MBR table based on current commitments being processed and the last GCLUB_AMT to determine new member or accrual statuses for donors.
 - Initialize Select Giving Clubs – Selects commitments entered within sessions where the giving club flag (GC_FLG) equals 'Y', evaluates historical commitment data according to club rules for the selected clubs, and updates membership data on the AV_GCLUB_MBR table based on all historical commitments to determine new or reinitialized member or accrual statuses for donors.
 - Initialize All Giving Clubs – Selects commitments entered within sessions where the giving club flag (GC_FLG) equals 'Y', evaluates historical commitment data according to club rules for all clubs active as of the process date, and updates membership data on the AV_GCLUB_MBR table based on all historical commitments to determine new or reinitialized member or accrual statuses for donors.
3. Creates the AVGCINIT SQR report which compares the backed up data to the newly generated giving club member data based on the option selected on the Process Giving Clubs page:
 - Unprocessed Sessions – Generates a blank report and concludes the job.
 - Initialize Select Giving Clubs – Generates an SQR report that lists differences for the selected giving clubs, ordered by giving club and fiscal year.

Where a difference occurs, the old giving club level and the new giving club level appear, as well as old and new statuses and amounts. The report also includes the previous Added By value.

 - Initialize All Giving Clubs – Generates an SQR report that lists differences for all giving clubs active as of the process date, ordered by giving club and fiscal year.

Where a difference occurs, the old giving club level and the new giving club level appear, as well as old and new statuses and amounts. The report also includes the previous Added By value.

Important! Giving club members who were previously added manually to override the giving club rules may not meet criteria for membership when the club is reinitialized. The AVGCINIT report helps you identify differences between prior data and recalculated data so that you can review memberships and add complimentary memberships (at levels higher than those calculated by the program) back in the system by using the Giving Club Membership page.

Tracking Giving Club Progress

Access the Giving Club Progress page (Contributor Relations, Analyze Giving History, Person Giving Summaries, Giving Club Progress).

CAE Report

Run Control ID: PS
[Report Manager](#)
[Process Monitor](#)

User ID: PS
Institution: PSUNV

*Start Date: 01/01/2007

*End Date: 03/31/2007

CAE Report page

The CAE report summarizes gift income by following standards created by the Council for the Advancement and Support of Education (CASE) and the CAE. Generating the report involves running the CAE Report COBOL process (AVPCAE), then running any or all of the three processes entitled GIFTINC, GIFTINCII, and GIFTINCIV. The result is a four-part report that provides a comprehensive view of donor giving for a single institution during a specific reporting period.

When you run AVPCAE, the COBOL process gathers data from several tables and writes it to two tables:

- AV_CAE_WRK – holds data for Parts I, II, and III.
- AV_CAE_WRK2 – holds data for Part IV.

When you run GIFTINC, GIFTINCII, or GIFTINCIV, the Crystal processes populate the report cells and calculate the report totals using the data in AV_CAE_WRK and AV_CAE_WRK2. The processes create the following sections of the report:

- GIFTINC creates Parts I and II.
- GIFTINCII creates Part III.
- GIFTINCIV creates Part IV.

Important! You *must* run AVPCAE before running GIFTINC, GIFTINCII, and GIFTINCIV in order for the report to populate correctly.

Chapter 19

Analyzing Giving History

This chapter discusses how to:

- Analyze donor history.
- Generate designation donor reports.

Analyzing Donor History

You can track information about a donor's giving patterns and giving history. The system uses information you enter when you create gift and pledge transactions, then summarizes it on a series of pages.

This section lists common elements and discusses how to:

- View a donor's giving profile.
- View an organization's giving profile.
- View a donor's commitment summary.
- View commitment summary details.
- Filter donor commitment registers.
- View donor commitment registers.
- Filter donor transaction registers.
- View donor transaction registers.
- Compare profiles in a workset.

Common Elements Used in This Section

Session Type	Select a session type from the prompt box. Valid session types include <i>Gift</i> , <i>Pledge</i> , <i>Member</i> , <i>Gift Adjustment</i> , <i>Pledge Adjustment</i> , and <i>Member Adjustment</i> . If you do not select a session type, the Commitment Register or Transaction Register page displays gift, pledge, and membership sessions. Adjustment sessions only appear if the View Adjustments check box is selected or if specifically selected in this field. Session types are delivered with the system as translate values. Do not modify these translate values in any way. Any modifications to these values will require a substantial programming effort.
Self Service Session	Enables users to filter for commitment or transaction registers created as a result of an Involvement self-service session.
Credit Type	Select the credit type for which to view information. Credit type refers to the type of credit the donor received for the commitment, such as <i>Hard Credit</i> , <i>Soft Credit</i> , and <i>Vehicle Credit</i> . Credit types, other than hard, are defined by your institution.
Match	If you only want to view transactions that equal a specific amount, enter that amount.

Giving Profile page

Lifetime Information

Lifetime Commitments

Displays the total amount of money ever donated or pledged by the donor.

Click to view the date, gift type, credit type, and amount for each commitment made, by business unit, on the Lifetime Commitments page.

Lifetime Open Pledges

Displays the total amount of money promised but not yet donated by the donor.

Click to view the date, gift type, credit type, and amount for each outstanding pledge on the Lifetime Open Pledges page.

Largest Pledge	Displays the amount of the largest pledge commitment the donor has made. Click to view detailed information about the pledge on the Largest Pledge page, and to access the Designation Detail and Recognition Detail pages.
Lifetime Gifts/Payment	Displays the total amount of money ever donated by the donor. This amount only includes money actually received, and excludes outstanding pledges. Click to view the date, gift type, credit type, and amount for each gift given on the Lifetime Gifts and Pledge Payments page.
Largest Gift	Displays the amount of the largest gift given by the donor. Click to view detailed information about the largest gift on the Largest Gift page, and to access the Designation Detail, Matching Gifts, and Recognition Detail pages.
Lifetime Hard Credits	Displays the total amount of hard credit given to the donor for recognition purposes. Click to view the date, gift type, credit type, and amount for each transaction for which the donor received hard recognition credit on the Lifetime Hard Credits page.
<i>Historical Information</i>	
Total YTD Giving	Displays the total amount of money donated by the constituent during the current fiscal year. Click to view the date, gift type, credit type, and amount for each gift given during the current fiscal year on the Total Year to Date Giving page.
Total Prior Year Giving	Displays the total amount of money donated by the constituent during the previous fiscal year. Click to view the date, gift type, credit type, and amount for each gift given during the prior fiscal year on the Total Prior Year Giving page.
Last Gift Date	Displays the date on which the donor's most recent gift was posted in the system. Only hard credit recognition is used to calculate this field. Click to view detailed information about the largest gift on the Last Gift Date page, and to access the Designation Detail and Recognition Detail pages.
Last Gift Amount	Displays the amount of the donor's most recent gift.
First Gift Year	Displays the year in which the donor first gave to your institution. Only hard credit recognition is used to calculate this field.
Total Years Giving	Displays the total number of years in which the donor has given to your institution.

Consecutive Years Giving Displays the total number of consecutive years in which the donor has given to your institution. The value in this field resets to zero if more than one year has passed since the donor's most recent gift. Only hard credit recognition is used to calculate this field.

Additional Information

Split Recognition If selected, indicates that recognition has been split between this donor and another donor for the same gift.

Anonymous If selected, indicates that the Anonymous check box is selected on the Gift Entry page for a gift from this donor.

Gift Tribute If selected, indicates that the donor has made at least one commitment to the institution in honor of or in memory of another person.

Foundation If selected, indicates that the donor has a relationship established in the system with a foundation. Foundations must have a constituent type of *Corporate Foundation*, *Foundation*, or *Personal, Family/Foundation*.

Planned Giving Donor If selected, indicates that the donor has made a commitment through a deferred gift tracked in Planned Giving under Prospect Management.

Matching Gift Information

Lifetime Match Displays the total amount of money ever received as a matching gift and currently expected as a match from a qualifying organization as a result of the donor's gifts.

Matched Gifts If you are viewing a giving profile for a donor that is a person, displays the amount that has been received as a matching gift from a qualifying organization as a result of the donor's gifts.

Open Matches Displays the total amount of matching gifts expected from an organization as a result of the donor's gifts.

Last Match If you are viewing a giving profile for a donor that is a person, displays the amount of the last matching gift received from a qualifying organization as a result of the donor's gift.

Other Page Elements

View Details By Designation Select this check box if you want to view commitments to each designation separately on the dialog boxes you access from this page. If you want each transaction to appear as one record, regardless of the designations it is allocated to, clear this check box. If you select this check box, the business unit for each designation appears on the subsequent inquiry page.

Giving Club Progress

Click to view information about a donor's progression through giving clubs and various club levels at your institution. The Giving Club Progress page appears.

Viewing an Organization's Giving Profile

Designation Donor List page

Designation BU (designation business unit)	Enter the designation business unit for which to generate a report. The report contains information about commitments to the business unit and designation you select.
Designation	Select the designation for which to view commitments. Designations are funds at your institution to which donations and pledges can be allocated. The report contains information about commitments made to the designation you select. The values in the prompt include those designations for the setID related to the business unit selected. Both active and inactive designations appear in the prompt for this field.
From and To	Note. If you do not select a date range, the system does not eliminate any records from the designation donor list report based on date range.
From Gift Amount and To Gift Amount	Note. These fields relate to an individual gift range. Higher gift totals may appear on the generated report because the report calculates an individual's cumulative giving.

Constituents

Select the type of constituents whose commitments you want to view on the report. The values that appear in this field are the valid constituent types defined at your institution. Examples of constituents are *Alumni*, *Friend*, *Corporation*, and so on.

If you do not select constituent types, the system does not eliminate any records from the designation donor list report based on constituent type.

Important! When you run the report, the row for each donor displays the highest priority constituent type assigned to the donor at the time a commitment was made to the designation. This type may vary from the type you select on this page, but the donor possessed the one you selected at the time the commitment was made.

Keep in mind, an organization can only be assigned one constituent type at any given time.

Credit Type

Select the credit types to view commitment information on the report. Credit type refers to the type of recognition the donor received for the commitment, such as *Hard Credit*, *Soft Credit*, and so on. Credit types are defined by your institution using the Recognition Types page.

If you do not select credit types, the system does not eliminate any records from the designation donor list report based on credit type.

The Designation Donor report lists all the commitments made to a particular designation that match the parameters you defined on this page. The From Gift Amount and To Gift Amount fields affect the report processing as follows:

- When the From Gift Amount is greater than zero AND the To Gift Amount is equal to zero, the selection criteria will treat the From Gift Amount as the lower threshold with no limit on the To Gift Amount.

For example, if the From Gift Amount is equal to 1,000.00 USD and the To Gift Amount is equal to 0.00 USD, then the selection criteria will be all gift amounts greater than or equal to 1,000.00 USD.

- When the To Gift Amount is greater than zero AND the From Gift Amount is equal to zero, the selection criteria will treat the To Gift Amount as the upper threshold with no limit on the From Gift Amount.

For example, if the To Gift Amount is equal to 21,000.00 USD and the From Gift Amount is equal to 0.00 USD, then the selection criteria will be all gift amounts less than or equal to 21,000.00 USD.

- When the From Gift Amount is greater than zero AND the To Gift Amount is greater than zero, the selection criteria will treat the From Gift Amount as the lower threshold and the To Gift Amount as the upper threshold.

For example, if the From Gift Amount is equal to 1,000.00 USD and the To Gift Amount is equal to 21,000.00 USD, then the selection criteria will be all gift amounts greater than or equal to 1,000.00 USD and less than or equal to 21,000.00 USD.

- When the From Gift Amount is equal to zero AND the To Gift Amount is equal to zero, the SQR process will not consider either the From Gift Amount or the To Gift Amount as part of the selection criteria.

For example, if the From Gift Amount is equal to 0.00 USD and the To Gift Amount is equal to 0.00 USD, then no additional selection criteria will be generated and all donors to the selected designation will be included in the report.

Example

In the following example, Shawn Gallegher makes two commitments to the Annual Fund. He makes the first commitment as a student in October 1995, and the second as an alumnus in October 1998.

Gift Amount	Gift Date	Constituent Type	Credit Type
1,000.00 USD	10/01/95	Student	Soft Credit
2,000.00 USD	10/01/98	Alumnus	Hard Credit

If you set the following report parameters:

- Date Range: 01/01/95 - 01/01/96
- Constituents: Student, Alumni
- Credit Type: None selected

Your report would include a 1,000.00 USD gift from Shawn Gallegher with a Constituent Type of *Student*. The date range excludes his commitment on 10/01/98.

If you set the following parameters:

- Date Range: 01/01/95 - 01/01/00
- Constituents: Student
- Credit Type: None selected

Your report would include a 1,000.00 USD gift from Shawn Gallegher with a Constituent Type of *Student*. The Constituent Type excludes his commitment on 10/01/98 because he was an alumnus when he made the commitment.

If you set the following report parameters:

- Date Range: 01/01/95 - 01/01/00
- Constituents: Student, Alumni
- Credit Type: Hard

Your report would include a 2,000.00 USD gift from Shawn Gallegher with a Constituent Type of *Alumni*. The Credit Type excludes his commitment on 10/01/95 because he received soft credit for the commitment.

If you set the following report parameters:

- Date Range: 01/01/95 - 01/01/00
- Constituents: Student, Alumni
- Credit Type: None selected

Your report would include a 3,000.00 USD gift from Shawn Gallegher with a Constituent Type of *Alumni*. Both commitments are included within these parameters, and *Alumni* is the constituent type returned for Shawn Gallegher because it has the highest priority of the commitments selected.

Chapter 20

Interfacing with PeopleSoft Financials

This chapter provides overviews of GL interface publish-and-subscribe functionality and Financials 8.4 and 8.8 interface messaging, and also discusses how to:

- Set up integration with Financials 8.4 or 8.8.
- Publish accounting line information automatically.
- Publish accounting line information manually.
- Monitor message results and status.
- View accounting lines.
- Understand interface setup best practices.

Understanding the Interface

If your institution uses a financial system other than Financials 8.4 to run GL interface, the system creates a flat file, which your institution's financial system can access. However, if your institution uses Financials 8.4, Contributor Relations can use publish and subscribe functionality (messaging back and forth) between its database and Financials so that the two systems can share accounting line information. The publish and subscribe functionality is asynchronous, meaning that the systems do not process GL transactions in real time.

Publish and subscribe functionality helps your institution's ability to track financial information in both Contributor Relations and Financials, since the messages sent from Financials to Contributor Relations after the journals have been created include specific journal information such as the Journal ID, Date, and Line Number. This assists in the audit trail of transactions passed between the databases.

See Also

PeopleSoft General Ledger 9.0 PeopleBook, "Integrating and Transferring Information Among Applications"

Understanding Messaging

The diagram below illustrates how messages travel between Contributor Relations and Financials 8.4 or 8.8.

Messaging process for Contributor Relations to Financials 8.4 or 8.8, including publishing and subscription

Contributor Relations delivers two queues and three messages to the Financials database:

<i>Queues</i>	<i>Message</i>	<i>Description</i>
STUDENT_ADMIN_ACCOUNTING	STUDENT_ADV_ACCTG_LINE	Notifies the message broker that new AV_ACCTG_LN records are ready to be retrieved by Financials and, after journal generation, retrieves the updated AV_ACCTG_LN records into Contributor Relations.
HR_SETUP	BUS_UNIT_AV_FULLSYNC	Sends the BUS_UNIT, DESCR, and DESCRSHORT rows in the AV_BUS_UNIT_TBL to Financials to seed its AV_BUS_UNIT_TBL.
	BUS_UNIT_AV_SYNC	Sends new Contributor Relations business units or updates when the DESCR or DESCRSHORT fields are changed.

PeopleSoft delivers a default node of PSFT_LS. If you change this default, you must reconfigure the queue. However, regardless of whether or not you change the message node, you must configure it by inserting the proper URL.

Note. An easy way to determine where messaging starts and ends is to name the publishing node with the name of the database to which it publishes or from which it publishes.

On the Financials side, message definition and queue naming must match the naming used on the Contributor Relations side.

Setting Up Integration with Financials 8.4 or 8.8

This section discusses how to:

- Identify financial software version.
- Define batch publish rules.
- Define batch programs.
- Set up business unit synchronization.
- Synchronize Contributor Relations business unit data with Financials.

Pages Used to Set Up Integration with Financials 8.4 or 8.8

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
CR Installation (Contributor Relations installation)	AV_INSTALLATION	Set Up SACR, Install, Contributor Rel Installation	Identify the version of financial software in use at your institution, whether from PeopleSoft or a third-party vendor.
Batch Publish Rules	EO_MSGPUBATCH	Enterprise Components, Integration Definitions, Batch Publish Rules	Define rules required for background publishing, whether publishing manually or by running the EOP_PUBLISHA process that is part of the AVPOST2 job.
Batch Programs	EO_MSGBATPGM	Enterprise Components, Integration Definitions, Batch Publish Rules, Batch Programs	Define the process that the manual or automatic process will access (AVPACCTL).
Full Table Publish Rules	EO_MSGPUBFULL	Enterprise Components, Integration Definitions, Full Data Publish Rules	Define publish rules that enable messaging.
Full Data Publish	EO_FULLDATAPUB	Enterprise Components, Integration Definitions, Initiate Processes, Full Data Publish	Define full data publish run control for the BUS_UNIT_AV_FULLSY NC message.

Identifying Financial Software Version

Your Financials Release selection on the CR Installation page determines which "path" the Contributor Relations system will use to transfer accounting line information. The values 7.5 and *Other* trigger a flat-file approach, in which the system creates a flat file that can be picked up and used both by older versions of Financials and by an external financial application. The values 8.4 or 8.8 triggers an integrated messaging interface.

Defining Batch Publish Rules

Access the Batch Publish Rules page (Enterprise Components, Integration Definitions, Batch Publish Rules) and select the *STUDENT_ADV_ACCTG_LINE* message to enter the component. The Batch Publish Rules component (the Batch Publish Rules and Batch Programs pages) enables you to activate *STUDENT_ADV_ACCTG_LINE* messaging.

Batch Publish Rules		Record Mapping	Batch Programs
Message Name: STUDENT_ADV_ACCTG_LINE			
Description: AV_ACCTG_LN Message			
Publish Rule Definition Find View All First 1 of 1 Last			
*Publish Rule ID:	STUDENT_ADV_ACCTG_LINE		
*Description:	AV_ACCTG_LN Message Batch Rule		
*Status:	Active		
Chunking Rule ID:			
Alternate Chunk			
Table:			
Message Options		Output Format	
☒ Create Message Header ☒ Create Message Trailer		☐ Message ☐ Flat File ☐ Flat File with Control Record	

Batch Publish Rules page

To define batch publish rules:

1. Enter *STUDENT_ADV_ACCTG_LINE* in the Publish Rule ID field.
2. Select *Active* in the Status field.
3. For Financials 8.4 integration, select the Create Message Header and Create Message Trailer check boxes.
For Financials 8.8 integration, clear these check boxes.

Defining Batch Programs

Access the Batch Programs page (Enterprise Components, Integration Definitions, Batch Publish Rules, Batch Programs).

Batch Publish Rules	Record Mapping	Batch Programs						
Message Name: STUDENT_ADV_ACCTG_LINE Description: AV_ACCTG_LN Message								
Publish Rule Definition Find View All First 1 of 1 Last								
*Publish Rule ID: STUDENT_ADV_ACCTG_LINE + -

Batch Programs Find View All First 1 of 1 Last								
<table border="1"> <thead> <tr> <th>Process Name:</th> <th>Description:</th> <th>+ -</th> </tr> </thead> <tbody> <tr> <td>AVPACCTL</td> <td>G/L Interface</td> <td></td> </tr> </tbody> </table>			Process Name:	Description:	+ -	AVPACCTL	G/L Interface	
Process Name:	Description:	+ -						
AVPACCTL	G/L Interface							

Batch Programs page

Enter the Process Name *AVPACCTL*, which EOP_PUBLISH or EOP_PUBLISHM will pick up when publishing accounting lines to the Financials system. If you do not select this process, the messages will not be created when EOP_PUBLISH or EOP_PUBLISHM runs.

Setting Up Business Unit Synchronization

Access the Full Table Publish Rules page (Enterprise Components, Integration Definitions, Full Data Publish Rules) and select the *BUS_UNIT_AV_FULLSYNC* message to enter the component. The Full Table Publish Rules Component (the Full Table Publish Rules and Full Table Publish pages) enables you to synchronize or "seed" Contributor Relations business unit information between Contributor Relations and Financials.

Note. You must synchronize all Contributor Relations business units before you run any GL processes, by running *BUS_UNIT_AV_FULLSYNC* full table publish once. Thereafter, the system manages additions or changes through messaging in the Business Unit CR component.

Full Table Publish Rules

Record Mapping

Chunking Rule ID:

Alternate Chunk

Table:

Message Options

☒ Create Message Header

☒ Create Message Trailer

Output Format

☒ Message

☐ Flat File

☐ Flat File with Control Record

Full Table Publish Rules page

- Publish Rule ID

Enter *BUS_UNIT_AV_FULLSYNC*. This rule publishes three fields (Business Unit, Description, Short Description) for all rows on the table to Financials.
- Status

You must set this to *Active*.
- Message Options

You must select the check boxes next to Create Message Header and Create Message Trailer.

Synchronizing Contributor Relations Business Unit Data with Financials

Access the Full Data Publish page (Enterprise Components, Integration Definitions, Initiate Processes, Full Data Publish).

Full Data Publish page

To synchronize business units:

1. Enter a Request ID and Description.
2. Change Processing Frequency to *Once*.

Note. You can rerun this process without harming the system if the Financials database becomes unsynchronized or corrupt.

3. Enter *BUS_UNIT_AV_FULLSYNC* in the Message Name field.
4. Click the Run button.

When this process has run, the system keeps business units synchronized by triggering a message to the Financials database whenever you change information in the Description or Short Description fields on the Business Unit CR page. In addition, the system triggers a message to Financials whenever you add a new business unit.

Note. The queue HR_SETUP enables one-way messaging and data publishing. To use this channel, you must configure the message node information by inserting the proper URL. Financials must subscribe to these Contributor Relations published messages to keep its database up to date.

See Also

PeopleSoft General Ledger 9.0 PeopleBook

Publishing Accounting Line Information Automatically

This section discusses how to run the AVPOST2 job.

Page Used to Publish Accounting Line Information Automatically

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
GL Interface (general ledger interface)	AV_RUN_CNTL_GL	Contributor Relations, Session Management, Process Sessions, G/L Interface	Enter process parameters and run the AVPOST2 process, which creates accounting lines ready for publishing into your institution's Financials system and activates the message that the lines are ready for Financials 8.4 or 8.8.

Running the AVPOST2 Job

Access the GL Interface page. This page displays the Financials Release that you selected on the CR Installation page.

After you enter the appropriate information on the run control page and click the Run button, the Process Scheduler Request page appears.

From that page, run the AVPOST2 job, which contains:

- **AVPACCTL**—a COBOL process that creates accounting lines and puts the process instance entries into the PS_EO_MSGBATPRM table.
- **EOP_PUBLISHA**—an Automated Background Publish Application Engine that picks up all accounting lines created by AVPACCTL, based on the parameters in the PS_EO_MSGBATPRM table.
- **AV_ACCUM**—an Application Engine that accumulates constituent gift totals.

The AVPOST2 job runs similarly to the AVPOST job, but it replaces the SQR report output with the EOP_PUBLISHA process.

The EOP_PUBLISHA process does the following:

1. Selects accounting lines based on three criteria: process or job instance, process name, and process status.
2. Collects accounting line entries generated by the GL Interface AVPACCTL COBOL process and publishes them to the Financials database.

Financials subscribes to the published messages in the Contributor Relations database, takes the accounting lines into their AV_ACCTG_LN table, and runs those lines through Journal Generator to create journals. Financials then publishes the updated accounting lines, Contributor Relations subscribes to these lines, and the data published by Financials updates the Contributor Relations AV_ACCTG_LN table.

The Contributor Relations subscribe portion of the process updates seven fields on the AV_ACCTG_LN table:

- JOURNAL_ID
- JOURNAL_DATE
- JOURNAL_LINE
- FISCAL_YEAR
- ACCOUNTING_PERIOD
- GL_DISTRIB_STATUS
- AUDIT_ACTN

When the Financials system returns accounting lines, the AUDIT_ACTN value on the Contributor Relations AV_ACCTG_LN record is changed from A (add) to C (changed).

Publishing Accounting Line Information Manually

This section discusses how to process accounting lines manually. You can run the publishing processes individually if you want to review the accounting lines before they are sent to Financials.

To process accounting lines manually:

1. Set up batch publish rules (required for both automatic and manual processing).
2. Access the GL Interface page.
3. Run the CR/GL Post process (AVPACCTL) only.

Note. Do not run the AVPOST2 job.

4. Access the Batch Publish page.
5. Run the EOP_PUBLISHM process.

Note. You can set the EOP_PUBLISHM process to run at user-defined intervals.

Pages Used to Publish Accounting Line Information Manually

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
GL Interface (general ledger interface)	AV_RUN_CNTL_GL	Contributor Relations, Session Management, Process Sessions, G/L Interface	Enter process parameters and run the AVPACCTL process, which creates accounting lines ready for publishing into your institution's Financials system but does not activate the message that the lines are ready for Financials 8.4 or 8.8.
Batch Publish	EO_BATCHPUB	Enterprise Components, Integration Definitions, Initiate Processes, Batch Publish	Run the EOP_PUBLISHM process, which publishes batches of accounting lines into your institution's Financials system.

Entering AVPACCTL Parameters

Access the GL Interface page. This page displays the Financials Release that you selected on the CR Installation page.

After you enter the appropriate information on the run control page and click the Run button, the Process Scheduler Request page appears.

From that page, run the AVPACCTL process, which creates accounting lines and puts the process instance entries into the PS_EO_MSGBATPRM table.

Running the Batch Publish Application Engine Process (EOP_PUBLISHM)

After you have manually generated accounting lines, access the Batch Publish page (Enterprise Components, Integration Definitions, Initiate Processes, Batch Publish) to publish them to the Financials database.

Batch Publish page

Request ID and Description Enter an ID and describe the process.

Process Frequency Select *Once*.

Process Name Enter *AVPACCTL*.

After you enter the appropriate information on the Batch Publish page and click the Run button, the Process Scheduler Request page appears.

From that page, run the EOP_PUBLISHM process, which does the following:

1. Selects accounting lines based on three criteria: process or job instance, process name, and process status.
2. Collects accounting line entries generated by the GL Interface AVPACCTL COBOL process and publishes them to the Financials database.

Financials treats the published messages the same way, regardless of whether you generate the accounting lines automatically or manually.

Monitoring Message Results and Status

Use PeopleTools Service Operation Monitoring pages to view published data and check the status of messages. This applies to all published and subscribed messages.

See Also

PeopleTools: Application Engine

Viewing Accounting Lines

Use the Accounting Line inquiry page to review accounting lines that reside on the AV_ACCTG_LN table.

Journal Information tab

The fields on this tab display the information published to Financials. The tab also contains the GL Journal Line Number, GL Journal ID, and Journal Date fields, which are populated with the data returned to Contributor Relations through the STUDENT_ADV_ACCTG_LINE subscription message after the journals are generated in Financials.

GL Chartfield 1 and 2 tabs

These tabs show information sent to Financials. The following fields are currently populated by the GL Interface COBOL process:

- Fund
- Budget Reference Affiliate
- Chartfield 1
- Chartfield 2
- Chartfield 3

Understanding Interface Setup Best Practices

This section discusses how to:

- Avoid integration setup errors.
- Avoid queue errors.
- Avoid messaging errors.

Avoiding Integration Setup Errors

There are several areas where you can review your settings and make the necessary corrections to avoid errors after setting up your Contributor Relations system to integrate with Financials 8.4 or 8.8.

The following reminders apply to general integration setup:

- You must set up Batch Publish Rules for the STUDENT_ADV_ACCTG_LINE message.
- You must set up Full Table Publish Rules for the BUS_UNIT_AV_FULLSYNC message.
- You must set the Financials Release to 8.4 or 8.8 on the CR Installation page.

Avoiding Queue Errors

Verify your channel settings in Application Designer. This will help you avoid situations in which a published message remains in *New* status and does not complete its path and change the status to *Done*, or in which the message does not appear in the Service Operation Monitor after the process to generate it is complete.

Note. HR_SETUP channel is for the business unit messages and STUDENT_ADMIN_ACCOUNTING channel is for the Accounting line message.

The following best practices apply to the channels HR_SETUP and STUDENT_ADMIN_ACCOUNTING:

- Open the Queue, go to Queue Properties, and make sure the Queue Status is set to *Run* for both of these channels.
- The HR_SETUP channel routing direction should be set to *Publish to*, and a valid Message Node Name should be specified.
- The BUS_UNIT_AV_FULLSYNC, and BUS_UNIT_AV_SYNC messages should appear under the Messages tab for the HR_SETUP channel.
- The STUDENT_ADMIN_ACCOUNTING channel routing direction should be set to *Both (Publish and Subscribe)*, and a valid Message Node Name should be specified.
- The STUDENT_ADV_ACCTG_LINE message should appear under the Messages tab for the STUDENT_ADMIN_ACCOUNTING channel.
- For each Queue, confirm that the Routing Rules are set up correctly. Confirm the correct Message Node Name for each channel.

Avoiding Messaging Errors

Review your security settings. This will help you avoid situations in which a published message remains in *New* status rather than completing its path and changing status to *Done*, or in which the message does not appear in the Service Operation Monitor after the process to generate it is complete.

To check security settings:

1. Navigate to PeopleTools, Security, Permissions & Roles, Permission Lists.
2. Enter a Permission List value.
3. Select the Service Operations Monitor tab.
4. Determine whether the channel(s) appear there.
5. If the channels do not appear, enter HR_SETUP and STUDENT_ADMIN_ACCOUNTING in the Channel Name fields.
6. Based on your security business rules, select *Full* or *Read Only* access for each channel.
7. Save the changes.

You can now return to the Service Operation Monitor and search for a particular message/channel.

Verify your channel settings in Application Designer. Verify these items in both the Contributor Relations and Financials databases. The following tips apply to the messages BUS_UNIT_AV_FULLSYNC, BUS_UNIT_AV_SYNC, and STUDENT_ADV_ACCTG_LINE:

- Open the Message Definition, go to Message Properties, make sure that the Active Status check box is selected.
- Make sure that the correct Queue is specified for the Message Definition (that is, HR_SETUP channel is for the business unit messages and STUDENT_ADMIN_ACCOUNTING channel is for the accounting line message).
- In Service Operation Monitor, check the Channel Status tab. The channel status must be *Running*.
- Message Nodes are set up correctly, including the correct Location/URL.

Verify your message definition settings in Application Designer. Verify statuses for the Contributor Relations message subscription STUDENT_ADV_ACCTG_LINE and the Financials 8.4 or 8.8 message subscriptions BusUnitAVFullSync, BusUnitAVSync, and StudentAdvancementAcctgLine.

To verify status:

1. Open the Message Definition, then the Message.
2. Right-click the Message Subscription.
3. Make sure the Active Status check box is selected.

Ping the publishing and subscribing database nodes.

To ping a database node:

1. Sign on to the Contributor Relations database.
2. Navigate to PeopleTools, Integration Broker, Service Operations Monitor, Administration, Node Status.
3. Enter the Message Node Name.
4. Click the Ping Node button.
5. If the node does not ping successfully, the gateway is bad; check the Node and Node URL.
6. If the node pings successfully, sign on to the Financials database and ping the Contributor Relations database node using Integration Broker.

See *PeopleTools: Integration Broker*.

If changes are made to Queues and/or Message Nodes, it is a good idea to stop and then start the Application Server. You can also delete the Application Server cache.

Chapter 21

Working with Self-Service Involvement

This chapter provides overviews of the Involvement application and the self-service online giving and pledge life cycles, and discusses how to:

- Give online to the institution.
- Make a pledge online.
- Monitor self-service commitment summary.
- Monitor self-service giving club progress.
- Monitor self-service membership history.
- Generate self-service gift and pledge sessions.
- Balance, queue, and post self-service gift and pledge sessions.
- Process self-service credit card transactions.
- Work with denied self-service transactions.
- Adjust self-service gift credit card payments.
- Investigate self-service gift and pledge transactions.

Understanding Involvement

PeopleSoft Campus Solutions offer self-service applications that are licensed separately. If you have licensed the Involvement application, you can use the self-service pages described here. Contributor Relations also offers Outreach, another self-service application that enables traveling development officers to access accumulated prospect action and strategy information. Outreach is part of PeopleSoft Campus Self Service.

Virtually all fund-raising organizations have established, or are in the process of establishing, a web presence that provides self-service facilities to their contributors. These organizations need the ability to accept and process credit card payments online when receiving a donation. Using Involvement's online giving functionality, both new and existing contributors can give to the organization in a secure, online environment. In addition, Involvement offers online visitors the option to create a scheduled pledge.

Understanding the Self-Service Online Giving Life Cycle

The life cycle of self-service online giving has three stages: set up, enter, and process. The steps within these stages may vary, depending on a contributor's choices, but this diagram shows a high-level overview of the stages:

Overview of the life cycle of online giving

See Also

"Campus Solutions 9.0 Electronic Payment Integration Developer's Reference Guide" on My Oracle Support

Understanding Self-Service Online Pledges

After your institution sets up online giving functionality, the process for entering and processing online pledges is similar to that for online gifts. The online pledge life cycle has two stages, as shown in this diagram:

Overview of the life cycle of online pledging, including details for enter and process steps

Giving Online to the Institution

If you have set up online giving so that the default option presents a single organization to receive the donation, contributors begin the online giving process by proceeding directly to the Ways to Give page. However, if the system finds multiple active organizations defined, contributors must first select an organization to receive their donation.

Depending on which way contributors decide to give, the system presents them with a series of pages to enter donation specifics and credit card information. If contributors decide not to give over the internet, they also have the option of printing a mail-in donation form.

This section provides overviews of secure online giving and Involvement navigations, lists prerequisites, and discusses how to:

- Select an organization.
- Select a way to give.
- Start the online giving process.
- Enter gift information.
- Enter payment information.
- Confirm and submit payment information.
- View fund information.
- View payment results.
- Select an existing campaign.
- Donate to an existing campaign.
- Give by mail.

Understanding Secure Online Giving

To donate online, contributors complete these steps as they navigate through the process:

1. Designate a gift amount and gift distribution.
2. Enter credit card, billing address, and other contact information.
3. Review the information already entered and complete the transaction.

Understanding Self-Service Involvement Navigations

These navigation guidelines apply to all of the Involvement online giving pages:

- Click the Next button to proceed to the next page in the process.
- Click the Previous button to return to the previous page.
- Click the Return to Involvement button to go to the Involvement home page.
- Click the Mail In Donation Form button to access the Mail In Donation page.

Prerequisites

You must define specific information on these pages before self-service contributors can use the pages for online giving:

- On the Donations - Choose Organization page, define multiple institutions so that donors can select an organization to receive their gift.
- On the Ways to Give page, you must define these options:
 - Web campaigns on the Web Campaigns page.
 - Giving vehicles on the Defining Giving Vehicles page.
 - Settings and contact information on the Involvement Setup page.
 - Define credit card merchant information on the CR Merchants page.
- On the Web Campaigns page, define campaigns from which donors can select.

Pages Used to Give Online to the Institution

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Donations - Choose Organization	AV_INVLV_G_INST	Self Service, Involvement, Ways to Give Click an organization name link.	Donors select an organization to receive their donation.
Ways to Give	AV_INVLV_G_WAYS	- Self Service, Involvement, Ways to Give - Click a link under the Description heading on the Donations - Ways to Give page.	Donors review donation options for the organization they selected on the Donations - Choose Organization page.
Make a Donation - Welcome	AV_INVLV_G_INTRO	Click the Make your gift securely on-line link on the Ways to Give page.	Donors see this page first when they begin the online donation process.
Make a Donation - Gift Information	AV_INVLV_G_GFT	Click the Next button on the Make a Donation - Welcome page.	Donors designate their gift amount, gift terms, and gift distribution.
Make a Donation - Payment Information	AV_INVLV_G_CC	Click the Next button on the Make a Donation - Gift Information page.	Donors enter credit card, billing address, and other contact information.
Make a Donation - Confirm and Submit	AV_INVLV_G_CNF	Click the Next button on the Make a Donation - Payment Information page.	Donors review the credit card, billing address, and other contact information entered on the previous page, and then to finalize the transaction.
Fund Information	AV_INVLV_G_DES	Click the View Fund Information link on the Make a Donation - Confirm and Submit page.	Donors view details about the funds designated on the Make a Donation - Gift Information page.
Payment Result	AV_INVLV_G_END	Click the Submit button on the Make a Donation - Confirm and Submit page.	Donors confirm that their online giving session is complete.
Donations - Campaigns	AV_INVLV_G_CMPGN	Click the Invest in existing campaigns link on the Ways to Give page.	Donors select a campaign to receive their donation.
Mail In Donation Form	AV_INVLV_G_FORM	Click the Mail-in donation form link on the Ways to Give page.	Donors can print the form, complete it manually, and mail it to the institution.

Selecting an Organization

Access the Donations - Choose Organization page.

Select an organization name to access the Ways to Give page. For this page to appear, you must have previously defined more than one active institution on the Involvement Setup page.

Selecting a Way to Give

Access the Ways to Give page.

Select one of three predefined options:

- *Make your gift securely online.* Click this link to directly access the online donation process. On the pages that appear, contributors can apply their donation to specific campaigns, fund designations, and appeals.
- *Invest in existing campaigns.* Click this link to see a list of campaigns predefined by the organization. On these subsequent pages, contributors select a campaign to which the organization has already associated specific designations and appeals. These campaign-specific designations and appeals appear as available values for the selected campaign.
- *Mail-in donation form.* Click this link to access a printable form that contributors can complete and mail. This option also lists the address to which to send the donation form. You define the mailing address on the Involvement Setup page.

Organizations can define other ways to give using the Giving Vehicles setup page. If giving vehicles were set up previously, then they appear under the Other Ways to Give heading.

To donate to a different organization, contributors can click the View Information for Other Organization link and return to the Choose Organization page.

Starting the Online Giving Process

Access the Make a Donation - Welcome page.

This page welcomes the visitor and explains how to navigate through the online giving process. This page also provides information about the mail-in donation form and contact information for the organization.

Entering Gift Information

Access the Make a Donation - Gift Information page.

Gift Detail Information

In the fields in this section, contributors enter the amount of their donation and decide whether or not to give anonymously. If they are donating to a specific fund-raising campaign, they select it here. The organization also collects information about how the contributor heard about the fund-raising effort.

Finally, contributors decide whether to apply their gifts to the organization's greatest need or to particular funds. If a contributor selects the Apply my gift to the greatest need option, then the system applies the gift based on the contributor's selection on the Ways to Give page. If the contributor enters through the Give securely online link, then the system applies the gift to the default designation defined on the Web Designations page. If the contributor enters through the Invest in existing campaigns link, the system applies the gift to the default linked designation defined on the Campaign Linked Designations page. If a contributor selects the Send my gift to the following funds option, the Fund Information section appears.

Fund Information

Contributors can select a specific designation and enter a specific portion of their donation to go to that fund. They can click the Add Fund button to designate additional funds and portions of their donation, or they can click the Evenly Distribute Gift button to divide their total donation evenly among the selected designations.

The fund values that appear in this section are defined on the Web Designations page. When a contributor sends a gift to specific funds, rather than contributing to the organization's greatest need, the designation value and amount fields are required to process a gift session. Contributors can use the Comments area to enter special requests, tribute information related to the donation, and so on.

When contributors navigates to the next page, the system verifies whether the total amounts designated equal the Total Gift Amount; if they do not, the system returns an error message. Contributors can manually adjust their fund designation amounts until the total matches their Total Gift Amount, or they can click the Evenly Distribute Gift button.

Entering Payment Information

Access the Make a Donation - Payment Information page.

Enter credit card information. CyberSource requires an email address but does not validate it; if the user leaves this field blank, the system uses the email address from the associated Merchant table. The system populates as much personal information as is available (based on the address and other type settings from the Campus Community Installation Setup page), but a contributor can modify any field.

Note. If you have selected the Security Code - Self Service check box for a Payment Merchant on the CR Merchants page, the system requires users to enter their credit card's security code as well as their credit card type, number, and expiration date. The explanatory "What is a security code?" link also appears.

When a contributor navigates to the next page, the system performs an internal system check to ensure that all required information is entered properly. The system prompts for corrections if it finds any errors or missing information.

Confirming and Submitting Payment Information

Access the Make a Donation - Confirm and Submit page.

This page displays online gift details for the contributor's review. Contributors can access the View Fund Information page to review details about the funds they designated on the Make a Donation - Gift Information page.

Viewing Fund Information

Access the Fund Information page.

When you determine that the information on the Fund Information page is correct, click Submit to submit the online gift transaction. The system sends the credit card information to a third-party credit card payment processor to authorize the gift amount. If the transaction fails, for example, because of invalid card or billing information, then the Payment Result page displays an error message.

Viewing Payment Results

After a transaction is successfully authorized, the Payment Result page appears.

This page displays a message thanking the contributor by name for the donation. This page also provides a receipt number and transaction summary, which the contributor can print and keep as a record. The system generates a hard copy receipt that will be mailed later, using the current Contributor Relations Acknowledgement process.

If the payment is not successful, the Payment Result page displays an error message.

Selecting an Existing Campaign

Access the Involvement Setup page.

This page enables organizations to define campaigns and to link related designations and appeals to a specific campaign. When you click the Invest online in existing campaigns link, you see only the designations and appeals related to the selected campaign as you proceed through the online giving pages.

Donating to an Existing Campaign

Access the Donations - Campaigns page.

This page lists each campaign your organization has defined on the Web Campaigns page. When a contributor clicks a campaign link on this page, the system proceeds to the Make a Donation - Welcome page. From there, the online giving process continues in much the same way as it does when contributors give securely online.

However, when investing in existing campaigns, the Make a Donation - Welcome page displays the name and description of the selected web campaign in addition to the standard welcome and navigational information.

In addition, on the Make a Donation - Gift Information page, if the contributor applies the donation to specific funds, the Fund Information area displays the default fund designation and appeal options linked to the campaign. However, the contributor can use the Lookup feature to select other appeals and designations associated with that specific campaign.

Giving by Mail

Access the Mail In Donation Form page.

Online visitors who do not want to transmit personal information using the internet can use this page to contribute. Print this page using your web browser's Print functionality, complete the form, and mail it to the organization.

Note. The Mail To name and address information at the top of the page is defined on the Involvement Setup page.

Making a Pledge Online

This section provides an overview of the online pledge process and discusses how to:

- Select a way to give.
- Invest in an existing campaign.
- Make a pledge online.
- Enter pledge information.
- Enter payment information.
- Confirm and submit a pledge.

Understanding Online Pledges

To make a pledge online, donors complete these steps:

1. Make a pledge and learn to navigate through the online pledge process.
2. Designate a pledge amount and fund distribution.
3. Enter a pledge schedule and other contact information.
4. Review all of their information and complete the pledge.

Pages Used to Make a Pledge Online

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Donations - Ways to Give	AV_INVLV_G_WAYS	Self Service, Involvement, Ways to Give	Donors review donation options set up by the institution.
Donations - Campaigns	AV_INVLV_G_CMPGN	Click the Invest in existing campaigns link on the Donations - Ways to Give page.	Donors view existing campaigns and select a campaign to receive the gift or pledge.

Page Name	Definition Name	Navigation	Usage
Make a Donation - Welcome	AV_INVLV_G_INTRO	- Click the Make a pledge online link on the Donations - Ways to Give page. - Click the Pledge to this campaign link next to a campaign name on the Donations - Campaigns page.	Donors see the Welcome page when they begin the online gift or pledge process.
Make a Donation - Pledge Information	AV_INVLV_P_PL	Click the Next button on the Make a Donation - Welcome page.	Donors enter pledge detail and fund distribution information.
Make a Donation - Payment Information	AV_INVLV_P_CNT	Click the Next button on the Make a Donation - Pledge Information page.	Donors set up a pledge payment schedule and enter or verify their contact information.
Make a Donation - Confirm and Submit	AV_INVLV_P_CNF	Click the Next button on the Make a Donation - Payment Information page.	Donors review their pledge information and payment schedule, and then submit the pledge.
Fund Information	AV_INVLV_G_DES	Click the View Fund Information link on the Make a Donation - Confirm and Submit page.	Donors view details about the funds designated on the Make a Donation - Pledge Information page.
Payment Result	AV_INVLV_P_END	Click the Submit button on the Make a Donation - Confirm and Submit page.	Donors see the Payment Result page when their online pledge is created.
Mail-in Donation Form	AV_INVLV_G_FORM	Click the Mail-in Donation Form link on the Donations - Ways to Give, Make a Donation - Payment Information, or Make a Donation - Confirm and Submit pages.	Online visitors who do not want to transmit personal information using the internet can use this form to submit pledge information.

Selecting a Way to Give

Two links on the Donations - Ways to Give page enable donors to begin the pledge process:

- Click the Invest in existing campaigns link to access the Donations - Campaigns page, where you can select a campaign to receive your pledge.
- Click the Make a pledge on-line link to access the Make a Donation - Welcome page; where you can select a campaign to receive your pledge later in the process.

Investing in an Existing Campaign

If donors click the Invest in existing campaigns link, the Donations - Campaigns page appears. It describes all existing campaigns activated by the institution for online giving on the Web Campaigns setup page. Each campaign has an indicator next to it for donors to select to either give to this campaign or pledge to this campaign.

When donors click the Pledge to this campaign link, the system takes them to the Make a Donation - Welcome page for pledges. The welcome text on the page includes the campaign name selected on the Donations - Campaigns page.

Making a Pledge Online

If donors click the Make a pledge on-line link, the Make a Donation - Welcome page appears. It welcomes the visitor by name and explains how to navigate through the online pledge process. This page also provides contact information for the institution and a link to the mail-in donation form.

Entering Pledge Information

Access the Make a Donation - Pledge Information page. This page changes, depending on which link donors use on the Donations - Ways to Give page:

- If donors access this page through the Make a pledge on-line link, they can select a specific campaign to receive the pledge.
- If they enter this page through the Invest in existing campaigns link, they have already selected a campaign, therefore, no campaign choices appear.

Regardless of how donors access this page, they can select an appeal code and designation fund options for their pledge. Donors enter the amount of their pledge on this page.

Making a Pledge to an Existing Campaign

The page displays only designations and appeals related to the campaign selected on the Donations - Campaigns page. The Fund Information section displays the default fund designation and appeal options linked to the campaign.

Entering Payment Information

Access the Make a Donation - Payment Information page.

Donors use this page to create a pledge payment schedule and to enter or verify their contact information.

Available options for a donor's pledge payment schedule include the start and end dates of the pledge period, the frequency of the pledge payments, and the number of payment installments.

Note. For the system to generate a pledge schedule, donors must enter either a number of installments or a last payment date.

Confirming and Submitting a Pledge

Access the Make a Donation - Confirm and Submit page.

Donors use this page to review their pledge information and finalize the transaction.

Donors can review the information they entered on the Make a Donation - Payment Information page. The system also displays the generated expected pledge schedule. To generate the pledge schedule, the system divides the total pledge amount into equal installments, based on information entered on the Make a Donation - Payment Information page. Then, it calculates the expected payment dates and amounts to fulfill the pledge.

When the donor confirms and submits the pledge information, the system:

1. Saves the pledge information.
2. Generates a receipt number for the pledge.
3. Displays the Payment Result page, which includes a personalized thank you message, the receipt number, and a final summary of the pledge information, designation information, and pledge schedule information.

Note. The system does not charge the donor's credit card or process any transactions at this time.

Monitoring Self-Service Commitment Summary

This section discusses how to view a commitment summary.

Pages Used to Monitor Self-Service Commitment Summary

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Commitment Summary	AV_SS_P_CS_ORG AV_SS_P_CMTMT_SMRY	Self Service, Involvement, My Involvement, Commitment Summary	Donors view information about their history of giving to the institution.
Fiscal Year Details	AV_SS_CS_SP	Click the Fiscal Year link on the Commitment Summary page.	View details about their giving during a particular year.

Viewing a Commitment Summary

Donors can view information about lifetime giving and a summary of giving by fiscal year. If the donor has given to more than one institution, he or she can view information for each institution on separate versions of the page.

For each fiscal year summary, the donor can access details of his or her giving during that particular year.

Monitoring Self-Service Giving Club Progress

This section lists the pages used to monitor progression through giving clubs during a self-service session.

Page Used to Monitor Self-Service Giving Club Progress

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Giving Club Progress	AV_SS_P_GC_ORG AV_SS_P_GCLUB	Self Service, Involvement, My Involvement, Giving Club Progress	Donors view information about their progression through giving clubs and various club levels. If the donor has given to more than one institution, he or she can view information for each institution on separate versions of this page.

Monitoring Self-Service Membership History

This section lists the pages used to view information about participation in member organizations at the institution during a self-service session.

If a member belongs to member organizations for more than one institution, he or she can view information for each institution on separate versions of this page.

Members click the Membership Organization link in any row to view detailed information about a particular membership in the Membership Detail group box.

Page Used to Monitor Self-Service Membership History

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Membership History	AV_SS_P_MB_ORG AV_SS_P_MBR_INQ	Self Service, Involvement, My Involvement, My Memberships	View information about a member's participation in member organizations at the institution.

Generating Self-Service Gift and Pledge Sessions

This section lists prerequisites and discusses how to create self-service gift and pledge sessions.

Prerequisites

To create self-service gift and pledge sessions, unprocessed, authorized self-service credit card gift or pledge transactions must exist in the system.

Page Used to Generate Self-Service Gift and Pledge Sessions

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Self Service Giving	AV_RUNCTL_INVLV	Contributor Relations, Session Management, Process Sessions, Process Self Service Giving	Run the process that moves self-service gifts and pledges into open self- service sessions.

Creating Self-Service Gift and Pledge Sessions (AV_INV_SESS)

Access the Self Service Giving page.

When you run the AV_INV_SESS process, the system:

1. Looks at all institutions set up for online giving.
2. Moves self-service gifts and pledges into open self-service sessions.

You can configure Process Scheduler to run the Self Service Gifts Application Engine process at user-defined intervals. When the process completes, the data is saved and the session remains open.

Note. Due to the nature of credit card transactions, you should set the specified time frame between running the AV_INV_SESS process to no more than 24 hours.

You can also configure the AV_INV_SESS process to notify a particular user (or all users in a particular role) using email of process completion. By transferring the process log on notification, users can know which self-service sessions are open for processing.

Balancing, Queuing, and Posting Self-Service Gift Sessions

After you have a complete credit card session, as with any other type of session, you must balance it, queue it for posting, and post it to the general ledger. When you use the Maintain Sessions page to balance a session, you can see whether the session was created as a result of online giving or online pledging; the check box is selected for self-service sessions.

When you use the Queue Sessions page to queue a session for posting, you can filter the page to show only self-service sessions. To do so, select the Self Service Session check box.

Processing Self-Service Credit Card Transactions

This section provides an overview of self-service transaction types, lists prerequisites, and discusses how to:

- Select self-service gift transactions for processing.
- Capture self-service gift transactions.

Understanding Self-Service Transaction Types

After you post a credit card gift to the general ledger, you can then process it through a third-party payment processor such as CyberSource. Contributor Relations supports the following transaction processes:

- *Authorization* authenticates the credit card number and places a temporary hold on the specified amount against the cardholder's credit card.

It also generates an authorization number and reduces the cardholder's available credit by the authorized amount. If the credit card information is not correct or if the cardholder does not have available credit, the system generates a message declining the transaction. Note that CyberSource does not bill the credit card at this time; it only verifies that the card is valid for the charge.

Note. All credit card payments for gifts made through self-service pages are authorized during online giving. Therefore, self-service gift sessions are ready to proceed directly to the capture process.

- *Capture* confirms the temporary hold placed on credit card funds after a transaction is authorized and bills the credit card.
- *Credit* issues a refund to a customer's credit card account after an adjusted gift.

Prerequisites

To process self-service credit card transactions, the following conditions must exist:

- Before you can select transactions for processing, using the EP Transaction Processing - Filter Options page, posted gift sessions must exist with the tender type of *Credit Card*.
- Before you can capture transactions, using the EP Transaction Processing - Transaction List page, valid, posted gift credit card transactions must exist in the system.
- Before you can select denied transactions for processing, using the EP Denied Transactions - Filter Options page, denied posted gift credit card transactions must exist in the system.
- Before you can capture denied transactions, using the EP Denied Transactions - Transaction List page, denied posted gift credit card transactions must exist in the system.

Pages Used to Process Self-Service Credit Card Transactions

Page Name	Definition Name	Navigation	Usage
EP Transaction Processing - Filter Options	AV_EP_FLTR	Contributor Relations, Session Management, Process Electronic Payments, EP Transaction Processing	Enter your selection criteria for the gifts to process.
EP Transaction Processing - Transaction List	AV_EP_G_PROC	Click the Search button on the EP Transaction Processing - Filter Options page.	Select and capture gift transactions that meet the criteria you entered on the EP Transaction Processing - Filter Options page.

Selecting Self-Service Gift Transactions for Processing

Access the EP Transaction Processing - Filter Options page (Contributor Relations, Session Management, Process Electronic Payments, EP Transaction Processing).

EP Transaction Processing
Filter Options

***Institution:** PeopleSoft University

***Business Unit:** Medical Business Unit

Self Service Session ☒ All Sessions ☐ Only Self Service ☐ Non Self Service	Post Date From 01/19/2009 To 01/19/2010

Session Number:
Gift:

EP Transaction Processing - Filter Options page

Institution Enter an institution code.

Business Unit	Enter a business unit for the gift transactions to process. If you leave the business unit blank, you view all gifts for the organization. Note. You must specify a business unit here to use the rest of the filter choices on this page.
Tender Type	Enter the electronic processing tender type for the gift transactions to be processed (the system populates this field to the electronic payment type <i>Credit Card</i> by default). Note. The PeopleSoft system uses <i>CC</i> to designate this electronic payment tender type. However, you can define it in another way on the Tender Types page.
Transaction Requested	Select <i>Capture</i> to capture the self-service gift transactions. Other delivered values for transaction processes currently supported by CyberSource are: <i>Authorize</i>, <i>Authorize and Capture</i>, and <i>Credit</i>. Note. <i>Authorize and Capture</i> is not a valid process for self-service gifts.
Self Service Session	Select <i>Only Self Service</i> to select gifts made through the self-service Make a Donation pages only. Other delivered values include <i>All Sessions</i> and <i>Non Self Service</i>.
Post Date	Enter dates to select gifts posted within the range of From and To date values.
Session Number	Enter a session number to select gifts made in this specific session only. To display a session, you must enter a business unit.
Gift	Enter a gift number to select gifts made with this gift number only. To display a specific gift, you must enter a business unit.

Capturing Self-Service Gift Transactions

Access the EP Transaction Processing - Transaction List page (Click the Search button on the EP Transaction Processing - Filter Options page).

Note. On the EP Transaction Processing - Filter Options page, set Transaction Requested to *Capture*.

EP Transaction Processing - Transaction List page

These fields on this page are defined on the EP Transaction Processing - Filter Options page: Business Unit, Tender, Session Nbr, Gift Nbr, and Post Dt.

Select Select the check box for each row to process.

Select All Click this button to select check boxes for all rows.

Payment Status Displays the current transaction status. If you click a link under this heading, a page appears that displays all existing transaction processing information. All transactions ready to be captured have a Payment Status value of *Authorized*.

Auth Dt (authorization date) After the transaction is authorized, the system populates this field.

Reference Nbr (reference number) After the transaction is sent, the system populates this field with a system-generated reference number used to communicate with the third-party credit card payment processor.

ID Displays the ID of the contributor.

Gift Amt (gift amount) Displays the amount of the gift credit card transaction.

Process Click to run the capture process. The system gathers the transactions you select and sends them to the third-party credit card payment processor.

Important! After you click the Process button, give the process at least 30 seconds to run.

Process Monitor Click to review the status of the capture process.

Set Filter Options Click to return to the EP Transaction Processing - Filter Options page.

If any transactions are not captured successfully, you must complete them using the denied transactions process or using a gift adjustment session.

Working with Denied Self-Service Transactions

When you attempt to authorize or capture self-service credit card gift transactions, you occasionally receive denial messages from the third-party credit card payment processor. Denials occur for many reasons, including invalid card number, account over limit, internet communication problems with the third-party credit card payment processor, and so on.

To resolve denied transactions, use the EP Denied Transactions - Filter Options and EP Denied Transactions - Transaction List pages to perform the following functions: retry the capture or credit processes, decide to handle the transaction manually, or cancel the payment of the transaction.

This section discusses how to:

- Select denied self-service gift transactions for processing.
- Capture denied self-service gift transactions.

Pages Used to Work with Denied Self-Service Transactions

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
EP Denied Transactions - Filter Options	AV_EP_FLTR	Contributor Relations, Session Management, Process Electronic Payments, EP Denied Transactions	Enter your selection criteria for the gift transactions to process.
EP Denied Transactions - Transaction List	AV_EP_G_PROC	Click the Search button on the EP Transaction Processing - Filter Options page.	Select and capture denied gift transactions that meet the criteria you entered on the EP Denied Transactions - Filter Options page.

Selecting Denied Self-Service Gift Transactions for Processing

Access the EP Denied Transactions - Filter Options page (Contributor Relations, Session Management, Process Electronic Payments, EP Denied Transactions).

EP Denied Transactions			
Filter Options			
*Institution:	PSUNV	PeopleSoft University	
*Business Unit:	MEDBU	Medical Business Unit

		Member Payment:	

EP Denied Transactions - Filter Options page

Use this page in the same way that you select gifts for capture. The difference is that the EP Denied Transactions - Filter Options page only searches those transactions that the third-party credit card payment processor denied.

The fields on this page are the same as those on the EP Transaction Processing - Filter Options page. For denied gift transactions, however, the Transaction Requested value you select is the stage at which the gift transaction is denied, such as during capture.

Capturing Denied Self-Service Gift Transactions

Access the EP Denied Transactions - Transaction List page (Click the Search button on the EP Transaction Processing - Filter Options page).

Note. To capture, on the EP Denied Transactions - Filter Options page, set Transaction Requested to *Capture*.

EP Denied Transactions			
Transaction List			
Institution:	PSUNV PeopleSoft University		
Transaction Requested:	Settle		
Self Service Session:	Only Self Service	Process Monitor	Set Filter Options
No records found. Return to the filter options to change the page criteria.			

EP Denied Transactions - Transaction List page

After you select the appropriate rows, click the Process button to retry the transaction.

Click the Manual button to handle a denied transaction manually. For example, you may want to call the contributor, adjust the gift, or contact the third-party credit card payment processor directly to resolve the transaction.

Click the Cancel Pmt button to cancel the transaction. The transaction remains in the system, but—after you cancel a transaction—you can no longer filter on it using the EP Denied Transactions - Filter Options page.

Important! After you click the Process, Manual, or Cancel Pmt buttons, give each process at least 30 seconds to run.

Adjusting Self-Service Gift Credit Card Payments

To adjust gift credit card payments, you must open a gift adjustment session and make the necessary changes. However, any time you change credit card information, you must revalidate, reauthorize, and recapture the transaction. You must also credit the original gift amount.

To reauthorize and credit adjusted transactions:

1. Authorize the new gift amount using the EP Transaction Processing - Filter Options and EP Transaction Processing - Transaction List pages.
2. Filter transactions for a Transaction Requested value of *Credit* on the EP Transaction Processing - Filter Options page.
3. Credit the original gift amount on the EP Transaction Processing - Transaction List page.

Investigating Self-Service Gift and Pledge Transactions

You may need to research the details of a self-service gift or pledge if, for example, an online contributor contacts your organization with questions about their transaction or if your organization needs to review valid transactions that have not yet processed. You have can investigate transactions using either the Self Service Giving Inquiry pages or the EP Transaction Log Inquiry pages.

This section lists prerequisites and discusses how to:

- Filter self-service gifts.
- View self-service gift or pledge information.
- View self-service gift or pledge details.
- View self-service gift log details.
- Select self-service gift transactions for review.
- Review self-service gift transactions.

Prerequisites

Before you can search for and view self-service gift transactions, you must make sure that self-service transactions exist in the system.

Pages Used to Investigate Self-Service Gift and Pledge Transactions

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Self Service Giving Inquiry - Filter Options	AV_INV_G_INQ_FLTR	Contributor Relations, Session Management, Supervise Sessions, Self Service Giving Summary	Enter search criteria for self-service gifts or pledges.
Self Service Giving Inquiry - Self Service Giving List	AV_INVLV_G_INQ	Click the Search button on the Self Service Giving Inquiry - Filter Options page.	View the results of your search.
Self Service Giving Inquiry - Self-Service Giving Detail	AV_INV_G_INQ_DTL	Click a Receipt Number link on the Self Service Giving Inquiry - Self Service Giving List page.	View details of a self- service gift or pledge.
Self Service Giving Inquiry - Self-Service Gift Log Detail	AV_INV_G_INQ_LOG	Click a link under the Reference Nbr heading on the Self-Service Gift Inquiry - Self Service Gift List page.	View a summary of each step in the electronic payment process.
EP Transaction Log Inquiry - Filter Options	AV_EP_LOG_FLTR	Contributor Relations, Session Management, Process Electronic Payments, EP Transaction Log Inquiry	Enter your selection criteria for the self-service gift transactions to review.
EP Transaction Log Inquiry - Transaction List	AV_EP_TRANS_LOG	Click the Search button on the EP Transaction Log Inquiry - Filter Options page.	View the transactions that meet the criteria you selected on the EP Transaction Log Inquiry - Filter Options page.

Filtering Self-Service Gifts

Access the Self Service Giving Inquiry - Filter Options page (Contributor Relations, Session Management, Supervise Sessions, Self Service Giving Summary).

Self Service Giving Inquiry - Filter Options page

The system populates this page by default to the user's Institution, a Payment Status of *Processed*, the current date, and a Commitment Type of *All*. You can modify these default values and enter any combination of search criteria to research self-service gifts or pledges. Other delivered values for Payment Status are *Authorized*, *Declined*, and *Valid*. Other delivered values for Commitment Type are *Gift* and *Pledge*.

Note. A self-service pledge has a status of *Valid* when submitted by the self-service donor, and a status of *Processed* when the system moves it into a self-service session. The Payment Status values *Authorized* and *Declined* apply only to self-service gifts.

Enter the system-generated Receipt Number to search for a specific gift or pledge. This field is also useful if a donor contacts your institution with a Receipt Number from an online gift or pledge session. To search for multiple gifts or pledges, enter From and To values for Date Range and Amount Range. Click Search to retrieve the results.

This table describes each payment status on this page in detail:

<i>Payment Status</i>	<i>Description</i>
Valid	Contributor has entered gift online and system has submitted gift to a third-party credit card processor for authorization. (System saves the record when contributor clicks the Submit button.) However, for some internal reason, system receives no response from the third-party processor (for example, because of poor internet connectivity, expired license, business interlink improperly configured, third-party processor system is down).
Authorized	System has authenticated the credit card number and third-party processor has placed a temporary hold on the specified amount against the cardholder's credit card.

<i>Payment Status</i>	<i>Description</i>
Processed	Gifts has been entered online, authorized, and processed by the self-service gift process that creates gift sessions.
Declined	System has generated a decline message after transaction is sent to the third-party payment processor. Note that declined self-service gifts cannot be reprocessed since they are not actually written to the gift table and assigned a gift number and session number.

Viewing Self-Service Gift or Pledge Information

Access the Self Service Giving Inquiry - Self Service Giving List page, which lists all online giving that meets your search criteria. Click the Set Filter Options link to return to the Self Service Giving Inquiry - Filter Options page and change your search criteria. To change your view of the search results on this page, you can Sort By *Amount*, *Date*, or *Type*, in either ascending or descending order.

Click a Receipt Number access the Self-Service Giving Detail page. Click a link under the Reference Nbr (reference number) heading to launch the Self-Service Gift Log Detail page.

Viewing Self-Service Gift or Pledge Details

Access the Self Service Gift Inquiry - Self-Service Giving Detail page to view summary details about an online gift or pledge.

The details include the Receipt Number the system generated for the gift or pledge and the Institution that received it. In addition, this page displays the ID of the donor and the total Gift Amount. Other details include the name of the Campaign, Appeal, Business Unit, and associated Designation that the donor selected, as well as the Session Nbr and Gift Nbr that the system assigned. If the donation is a pledge, the page displays pledge schedule information generated by the system.

Click the Return button to go back to the Self Service Giving Inquiry - Self Service Gift List page.

Viewing Self-Service Gift Log Details

On the Self-Service Gift Inquiry - Self-Service Gift Log Detail page, click a link under the Payment Status heading to view all data sent between your organization and the third-party credit card payment processor.

This page lists the gift transaction information sent to and from the third-party credit card payment processor. It displays the credit card and personal information the contributor entered, such as Credit Card Type, encrypted Credit Card Number, Expiration Date, cardholder Name and Address information, and Gift Amount. Other system details that appear include the Gift Nbr (number), Reference Number, Business Unit, Session Number, Tender Type, ID, and Payment Status.

The remaining information on this page relates to the information the system sent to, and received from, the third-party credit card payment processor. The Service Provide is the name of the third-party processor. The Credit Card Request ID is a code used during billing, to indicate the request number of the prior authorization of the transaction. Auth DTTM lists the authorization date and time code in vendor format. Return Status lists a three-character result code: 0 means success, 100-199 means declined by the vendor but OK to display to online users, 200-299 means declined by vendor and not OK to display to online users, 300-399 means transmission error. CyberSource generates the Auth Code when the transaction is successfully authorized, and the authorization Date appears to the right. The AVS Code designates that the third-party processor verified the cardholder address. The Credit Card Message fields display response messages from the third-party credit card payment processor.

Click the Return button to go back to the Self Service Giving Inquiry - Self Service Gift Log Detail page.

Selecting Self-Service Gift Transactions for Review

Access the EP Transaction Log Inquiry - Filter Options page (Contributor Relations, Session Management, Process Electronic Payments, EP Transaction Log Inquiry) to track self-service credit card activity by day, session, business unit, and so on. You may also need to track transactions that are waiting to be sent for third-party processing. Contributor Relations retains a historical record of all credit card activity that you can filter and review.

EP Transaction Log Inquiry - Filter Options page

This page is primarily used by Contributor Relations to research gift transactions entered at your organization. However, you can retrieve self-service transaction details from this page by entering the Receipt Number for a gift.

Reviewing Self-Service Gift Transactions

Access the EP Transaction Log Inquiry - Transaction List page.

List tab

Reference Nbr (reference number)	The system populates this field by default with a system-generated reference number used to communicate with the third-party credit card payment processor.
SeqNum (sequence number)	Indicates how many actions the system has taken on a particular reference number.
Payment Status	Indicates the results of each system action.
Credit Card Message 1	Displays the resulting response message from the third-party credit card payment processor.

Detail tab

The Detail tab provides more clarity about each gift credit card payment. For each transaction on the List tab, you view the corresponding Business Unit, Tender type (which for self-service gifts is the organization's assigned tender type value for credit card transactions), Session and Gift Nbr (numbers). The Trans Dt (transaction date) lists the date the transaction was initiated, and the Auth Dt (authorization date) lists the date the transaction was authorized (if applicable). Other fields on this page display the ID of the contributor, the Gift Amt (amount), and the Auth Reply (authorization reply) that the system received from the third-party credit card payment processor.

-  Displays a single page that contains the combined information from both the List and Detail tabs.
-  Returns to the EP Transaction Log Inquiry - Transaction List page.

Appendix A

AV_GP_LOAD_TBL Data Fields

This appendix provides detailed information about the data fields in the AV_GP_LOAD_TBL. The system accesses these fields during the Mass Load Gift/Pledge process (AVPGPLOA). The details for each field enable you to create a custom API to move gift and pledge information into the AV_GP_LOAD_TBL.

Data Field Details

Use the values in the following table to create your custom API.

<i>Line Nbr</i>	<i>Column Name</i>	<i>Type</i>	<i>MSSQL Length</i>	<i>Precision</i>	<i>Scale</i>	<i>Comments</i>	<i>Gift Session Sample Data</i>	<i>Pledge Session Sample Data</i>
1	BUSINESS_UNIT	Char KEY	5			This is the business unit for the session.	PSUNV	PSUNV
2	SEQ_NBR	decimal KEY	15	15	0	A unique, consecutive number that identifies a row of data to be processed in the AVPGPLOA process.	1	2
3	AV_SESS_TYPE	char KEY	2			The type of session to be created. Valid values are: G = Gift session PL = Pledge session. Note. Gift sessions can handle only outright gifts with no links to an existing pledge. Pledge sessions only process new pledges. Pledge payments should not be entered through this process, but must be entered through the online process to ensure update of the pledge records and pledge schedules.	G	PL

Line Nbr	Column Name	Type	MSSQL Length	Pre- cision	Scale	Comments	Gift Session Sample Data	Pledge Session Sample Data
4	EMPLID	char	11			The ID number of the person who is making the gift or pledge. Note. If this field is entered, the EXT_ORG_ID field (Line 5) must be blank.	AV0027	Leave blank
5	EXT_ORG_ID	char	11			The ID number of the organization who is making the gift or pledge. Note. If this field is entered, the EMPLID field (Line 4) must be blank.	Leave blank	AV1019
6	GIFT_AMT	decimal	15	13	2	The monetary amount of the gift or pledge.	1000.00	12000.00
7	GIFT_TYPE	char	6			For Gift Session (AV_SESS_TYPE = 'G'), enter 'GIFT' only. No other gift types are valid. Otherwise, leave blank.	GIFT	Leave blank
8	PLEDGE_GIFT_NO	char	11			This field exists for future development and is not used in the current process.		
9	FISCAL_YEAR	smallint	24	5	0	The financial year during which the gift or pledge is to be counted.	2003	2003
10	GIFT_DT	PSDATE	10			The date of record for the gift or pledge.	01-01-2003	01-01-2003

Line Nbr	Column Name	Type	MSSQL Length	Pre- cision	Scale	Comments	Gift Session Sample Data	Pledge Session Sample Data
11	TENDER_TYPE	char	6			The payment method for the gift. Must be a valid value from the AV_TENDER_TBL. Note. The tender type must be valid for the session business unit. A tender type is valid only if it is current and has a setID that correlates to the corresponding set control value for record group AV02_GIFT for BUSINESS_UNIT (Line1).	CHK	Leave blank
12	CURRENCY_CD	char	3			The type of money being used to pay the gift, for example U.S. Dollars or Euros. Note. Pledges are always entered in the base currency of the institution.	USD	Leave blank
13	CHECK_NO	char	10			For Gift Session (AV_SESS_TYPE = 'G'), the number of the donor's check if the tender is a check. Note. If a check number is entered, the credit card fields (Lines 14-17) must be blank since a gift has only one tender type.	Leave blank	Leave blank
Important! The following four fields are inactive. DO NOT USE as they are replaced with new Active Fields for credit card referenced below.								
14	CREDIT_CARD_NO <i>Inactive field</i>	char	20			Do not use. Note. This field is not secured and can be queried using a database query tool. Also, this field should be empty if CHECK_NO (Line13) has data.	Do not use	Do not use

Line Nbr	Column Name	Type	MSSQL Length	Precision	Scale	Comments	Gift Session Sample Data	Pledge Session Sample Data
15	CREDIT_CARD_HOLDER <i>Inactive field</i>	char	30			Do not use. Note. This field is not secured and can be queried using a database query tool. Also, this field should be empty if CHECK_NO (Line13) has data.	Do not use	Do not use
16	CREDIT_CARD_TYPE <i>Inactive field</i>	char	2			Do not use. Note. This field is not secured and can be queried using a database query tool. Also, this field should be empty if CHECK_NO (Line13) has data.	Do not use	Do not use
17	CREDIT_CARD_EXP_DT <i>Inactive field</i>	PSDATE	8			Do not use. Note. This field is not secured and can be queried using a database query tool. Also, this field should be empty if CHECK_NO (Line13) has data.	Do not use	Do not use
18	TENDER_TYPE_NOTE	char	50			Short comment related to the gift tender.		<i>Leave blank</i>
19	CAE_GIFT_TYPE	char	1			Used only when AV_SESS_TYPE (line 3) = 'G'. Must be the CAE Type for the GIFT_TYPE (Line 7). Delivered value = 'G'.	G	<i>Leave blank</i>
20	PLDG_EFFDT	PSDATE	10			The date that the pledge is considered active. Can be in the future.	<i>Leave blank</i>	01-15-2003
21	PLEDGE_DT	PSDATE	10			The date that the first pledge payment is expected. The date must be on or after the PLDG_EFFDT (Line 20).	<i>Leave blank</i>	02-01-2003
22	FULF_DT	PSDATE	10			The date on which the entire commitment amount for a pledge is expected to be fulfilled.	<i>Leave blank</i>	12-31-2003

Line Nbr	Column Name	Type	MSSQL Length	Precision	Scale	Comments	Gift Session Sample Data	Pledge Session Sample Data
23	PLEDGE_PMT_RCVD	decimal	15	13	2	This field exists for future development and is not used in the current process.		
24	LAST_PMT_DT	PSDATE	10			This field exists for future development and is not used in the current process.		
25	CP_PLEDGE_NO	char	11			This field exists for future development and is not used in the current process.		
26	FEED_FLG	char	1			Only used when AV_SESS_TYPE (Line 3) = 'PL'. Indicates whether a pledge should be sent to the GL Interface to be tracked as an account receivable.	Leave blank	Y
27	FEED_GIFT_FLG	char	1			Only used when AV_SESS_TYPE (Line 3) = 'G'. Indicates whether a gift should be sent to the GL Interface to be tracked in the general ledger.		
28	AV_PLDG_STATUS	char	1			This field exists for future development and is not used in the current process.		
29	PLEDGE_PG_TYPE	char	2			This field exists for future development and is not used in the current process.		
30	RCG_EMPLID1	char	11			The following four fields identify up to four persons who are to receive credit for the gift or pledge. The EMPLID (Line 4) is not required to be one of these four IDs if he/she is not receiving direct credit for the gift (for example a third-party agent representing these RCG_EMPLIDs would not be entered).	AV0027	
31	RCG_EMPLID2	char	11				AV0026	AV0023
32	RCG_EMPLID3	char	11				AV0025	

<i>Line Nbr</i>	<i>Column Name</i>	<i>Type</i>	<i>MSSQL Length</i>	<i>Pre-cision</i>	<i>Scale</i>	<i>Comments</i>	<i>Gift Session Sample Data</i>	<i>Pledge Session Sample Data</i>
33	RCG_EMPLID4	char	11			Note. If an entry has data in this field, it cannot have an entry in its corresponding RCG_EXT_ORG_ID field, that is if RCG_EMPLID1 (Line 29) has a value, RCG_EXT_ORG_ID1 (line 33) cannot and vice versa.	AV0024	
34	RCG_EXT_ORG_ID1	char	11			These four fields identify up to four organizations that are to receive credit for the gift or pledge. The EXT_ORG_ID (Line 5) is not required to be one of these four IDs if it is not receiving direct credit for the gift (for example a third-party agent representing these RCG_EXT_ORG_IDs would not be entered).		AV1019
35	RCG_EXT_ORG_ID2	char	11					
36	RCG_EXT_ORG_ID3	char	11					
37	RCG_EXT_ORG_ID4	char	11					
						Note. If an entry has data in this field, it cannot have an entry in its corresponding RCG_EMPLID field, that is if RCG_EXT_ORG_ID (Line 33) has a value, RCG_EMPL_ID1 (Line 29) cannot and vice versa.		
38	RECOGNITION_TYPE1	char	1			The type of credit (recognition) that the donor in RCG_EMPLID1 (Line 29) or RCG_EXT_ORG_ID1 (Line 33) is receiving for the gift or pledge. Must have a valid value from the AV_RCG_TYPE_TBL and the total of all Recognition Types 1-4 (Lines 37-40) that are given a value of 'H' for hard credit must equal 100 percent of the GIFT_AMT (Line 6).	H	H

Line Nbr	Column Name	Type	MSSQL Length	Pre- cision	Scale	Comments	Gift Session Sample Data	Pledge Session Sample Data
39	RECOGNITION _TYPE2	char	1			The type of credit (recognition) that the donor in RCG_EMPLID2 (Line 30) or RCG_EXT_ORG_ID2 (Line 34) is receiving for the gift or pledge. Must have a valid value from the AV_RCG_TYPE_TBL and the total of all Recognition Types 1-4 (Lines 37-40) that are given a value of 'H' for hard credit must equal 100 percent of the GIFT_AMT (Line 6).	H	S
40	RECOGNITION _TYPE3	char	1			The type of credit (recognition) that the donor in RCG_EMPLID3 (Line 31) or RCG_EXT_ORG_ID3 (Line 35) is receiving for the gift or pledge. Must have a valid value from the AV_RCG_TYPE_TBL and the total of all Recognition Types 1-4 (Lines 37-40) that are given a value of 'H' for hard credit must equal 100 percent of the GIFT_AMT (Line 6).	S	
41	RECOGNITION _TYPE4	char	1			The type of credit (recognition) that the donor RCG_EMPLID4 (Line 32) or RCG_EXT_ORG_ID4 (Line 36) is receiving for the gift or pledge. Must have a valid value from the AV_RCG_TYPE_TBL and the total of all RECOGNITION_TYPEs 1-4 (Lines 37-40) that are given a value of 'H' for hard credit must equal 100 percent of the GIFT_AMT (Line 6).	S	
42	RCG_PCT_AMT 1	decimal	15	15	2	The amount of the gift that is to be recognized as coming from each of the Recognition IDs (Lines 29-36). The sum of the	500.00	12000.00
43	RCG_PCT_AMT 2	decimal	15	15	2		500.00	12000.00

Line Nbr	Column Name	Type	MSSQL Length	Pre-cision	Scale	Comments	Gift Session Sample Data	Pledge Session Sample Data
44	RCG_PCT_AMT 3	decimal	15	15	2	amounts entered in these four fields must equal the total gift amount (Line 6) for all IDs receiving recognition types equal to 'H' (hard credit). Soft credit (any that are not equal to 'H') can total any amount up to the gift amount (Line 6).	1000.00	
45	RCG_PCT_AMT 4	decimal	15	15	2		1000.00	
46	ANONYMOUS_ FLG1	char	1			Enter 'Y' if the donor in RCG_EMPLID1 (Line 29) or RCG_EXT_ORG_ID1 (Line 33) desires no public acknowledgement of the gift or pledge.		Y
47	ANONYMOUS_ FLG2	char	1			Enter 'Y' if the donor in RCG_EMPLID2 (Line 30) or RCG_EXT_ORG_ID2 (Line 34) desires no public acknowledgement of the gift or pledge.		
48	ANONYMOUS_ FLG3	char	1			Enter 'Y' if the donor in RCG_EMPLID3 (Line 31) or RCG_EXT_ORG_ID3 (Line 35) desires no public acknowledgement of the gift or pledge.		
49	ANONYMOUS_ FLG4	char	1			Enter 'Y' if the donor in RCG_EMPLID4 (Line 32) or RCG_EXT_ORG_ID4 (Line 36) desires no public acknowledgement of the gift or pledge.		
50	DESIGNATION1	char	11			The account or fund code to which the donor is giving the gift or making the pledge. A gift or pledge can be split across 1-4 accounts when processed through AVPGPLOA.	MEDBLDG	MEDBLD G
51	DESIGNATION2	char	11				LIBRARY	
52	DESIGNATION3	char	11					

Line Nbr	Column Name	Type	MSSQL Length	Pre- cision	Scale	Comments	Gift Session Sample Data	Pledge Session Sample Data
53	DESIGNATION4	char	11			Note. A designation is valid only if it is current and has a setID that correlates to the corresponding set control value for record group AV02_GIFT for AV_DES_BU 1-4 (Lines 53-56).		
54	AV_DES_BU1	char	5			The business unit that owns DESIGNATION1.	MEDBU	MEDBU
55	AV_DES_BU2	char	5			The business unit that owns DESIGNATION2.	PSUNV	
56	AV_DES_BU3	char	5			The business unit that owns DESIGNATION3.		
57	AV_DES_BU4	char	5			The business unit that owns DESIGNATION4.		
58	INTV_CD1	char	10			The campaign that generated the gift or pledge to DESIGNATION1 (Line 49).	CMPGN2003	CMPGN2003
59	INTV_CD2	char	10			The campaign that generated the gift or pledge to DESIGNATION2 (Line 50).	CMPGN2003	
60	INTV_CD3	char	10			The campaign that generated the gift or pledge to DESIGNATION3 (Line 51).		
61	INTV_CD4	char	10			The campaign that generated the gift or pledge to DESIGNATION4 (Line 52).		
62	DES_PCT_AMT 1	decimal	15	15	2	The amount of the gift that is being distributed to each designation (Lines 49-52) The total of the amounts entered in these four fields must equal the total gift amount (Line 6).	500	12000
63	DES_PCT_AMT 2	decimal	15	15	2		500	
64	DES_PCT_AMT 3	decimal	15	15	2			

<i>Line Nbr</i>	<i>Column Name</i>	<i>Type</i>	<i>MSSQL Length</i>	<i>Pre- cision</i>	<i>Scale</i>	<i>Comments</i>	<i>Gift Session Sample Data</i>	<i>Pledge Session Sample Data</i>
65	DES_PCT_AMT 4	decimal	15	15	2			
66	MOTIVATION_ CD1	char	9			The appeal that generated the gift or pledge given to DESIGNATION1 (Line 49). Note. An appeal is valid only if it is current and has a setID that correlates to the corresponding set control value for record group AV02_GIFT for AV_DES_BU 1-4 (Lines 53-56).	MEDICINE	MEDICIN E
67	MOTIVATION_ CD2	char	9			The appeal that generated the gift or pledge given to DESIGNATION2 (Line 50). Note. An appeal is valid only if it is current and has a setID that correlates to the corresponding set control value for record group AV02_GIFT for AV_DES_BU 1-4 (Lines 53-56).	LIBRARY	
68	MOTIVATION_ CD3	char	9			The appeal that generated the gift or pledge given to DESIGNATION3 (Line 51). Note. An appeal is valid only if it is current and has a setID that correlates to the corresponding set control value for record group AV02_GIFT for AV_DES_BU 1-4 (Lines 53-56).		

Line Nbr	Column Name	Type	MSSQL Length	Precision	Scale	Comments	Gift Session Sample Data	Pledge Session Sample Data
69	MOTIVATION_CD4	char	9			The appeal that generated the gift or pledge given to DESIGNATION4 (Line 52). Note. An appeal is valid only if it is current and has a setID that correlates to the corresponding set control value for record group AV02_GIFT for AV_DES_BU 1-4 (Lines 53-56).		
70	CHARITABLE_AMT1	decimal	15	15	2	The amount of the gift to DESIGNATION 1-4 (Lines 49-52) that is considered charitable for tax purposes. This can be different than the GIFT_AMT, but a value must be entered here even if it is equal to the GIFT_AMT. The total of the amounts entered in these four fields cannot exceed the total gift amount (Line 6).	500	12000
71	CHARITABLE_AMT2	decimal	15	15	2		500	
72	CHARITABLE_AMT3	decimal	15	15	2

Delivered Workflows for Contributor Relations

This section discusses Contributor Relations workflows. The workflows are listed alphabetically by workflow name.

Send Action

This section describes the workflow that allows the user to send an action to notify someone who needs to know or who is impacted by the assignment.

Description

Event Description	When a development officer creates or alters a constituent action, the officer may want to notify others that the action has or will occur. This workflow allows the officer to send the action information to individuals who have an interest in its execution or outcome. It includes the ability to alter the action report prior to sending, adding explanatory text or removing sensitive information that should not be widely distributed.
Action Description	The development officer creates or alters an action. From the action in Outreach, the officer clicks the Send Report button to create the email text. The system begins the email workflow when the user clicks the Send button.

Notification Method	The system sends an email notification with the action information update to the specified recipients. Fields utilized in the email text include: ID, Name, Constituent Type, City, State, Gender, Action Number, Brief Description, Description, Planned Date, Action Type, Contact, Type, Status, Result, Contact Report Author, Contact Report Date, and Contact Report if it exists. The user can edit the information that defaults on the Send Contact Report page.

Workflow Objects

Workflow Objects	Event AV_OUTR_SEND Page PeopleCode
Workflow Actions	Role This workflow starts manually when the user clicks the Send button.
Development Officer	Email Template AV_OUTR_CNCT_SEND1 delivers an email notification to the specified recipient's inbox with the Subject: Action Update for Constituent's Name-Action Description from the constituent action. Email text includes the name of the sender and the action information.
Business Process	AV_OUTR_SEND
Business Activity	AV_OUTR_SEND Outreach Send Data includes three steps: 1) Submit Data, 2) Trigger email Action/Contact Report, 3) Email Outreach Data
Business Event	Send Report

Send BioDemo Update

This section discusses the workflow that sends email notifications of biodemographic updates in PeopleSoft Outreach.

Description

Event Description	A development officer often learns new address or other biodemographic data during contact with a prospect. This workflow allows the officer to send the new information on to the person responsible for record updates at the point when the contact report is being written.
Action Description	The development officer completes an action and prepares to enter the contact report. From the contact report, the officer clicks the Send Biodemo Update button to create the email text. The system sends the email workflow when the user clicks the Send button.
Notification Method	The system sends an email notification with the biodemographic information update to the specified person(s) who handle record updates. Fields utilized in the email text include: Constituent ID, Constituent Name, and the sender's Name. The user can edit the information that appears by default on the Send Contact Report page.

Workflow Objects

Event	AV_OUTR_BIO_SEND Page PeopleCode
Workflow Action	This workflow starts manually when the user clicks the Send button.
Role	Development Officer
Email Template	AV_OUTR_BIO_SEND delivers an email notification to the specified recipient's inbox with the Subject: Biodemo Update for EmplID: EMPLID, Constituent's Name. The email text includes the name of the sender.
Business Process	AV_OUTR_SEND
Business Activity	AV_OUTR_SEND Outreach Send Data includes three steps: 1) Submit Data, 2) Trigger email Biodemo Data, 3) Email Outreach Data
Business Event	Send Biodemo Update

Send Contact Report

This section discusses the workflow that distributes contact reports, with added comments, through email notifications.

Description

Event Description	When a development officer completes a constituent action or contact with a prospect, the officer summarizes the results and information gathered in a contact report. This workflow allows the officer to send the contact report to individuals who have an interest in the outcome of the action. It includes the ability to alter the report prior to sending, adding explanatory text or removing sensitive information that should not be widely distributed.
Action Description	The development officer completes an action and its related contact report. From the contact report, the officer clicks the Send Report button to create the email text. The system begins the email workflow when the user clicks the Send button.
Notification Method	The system sends an email notification with the contact report information update to the specified recipients. Fields utilized in the email text include: Constituent Name, a description of the related Constituent Action, the sender's Name, and the contact report text. The user can edit the information that defaults on the Send Contact Report page.

Workflow Objects

Event	AV_OUTR_BIO_SEND Page PeopleCode
Workflow Action	This workflow starts manually when the user clicks the Send button.

Role	Development Officer
Email Template	AV_OUTR_CNCT_SEND delivers an email notification to the specified recipient's inbox with the Subject: Contact Report for Constituent's Name — Action Description from completed action. Email text includes the name of the sender and the body of the contact report.
Business Process	AV_OUTR_SEND
Business Activity	AV_OUTR_SEND Outreach Send Data includes three steps: 1) Submit Data, 2) Trigger email Contact Report, 3) Email Outreach Data
Business Event	Send Report

Appendix C

Contributor Relations Reports

This appendix provides an overview of Contributor Relations reports and discusses how to:

- View summary tables of all reports.
- View report details and tables accessed.

Note. For samples of these reports, see the Portable Document Format (PDF) files published on CD-ROM with your documentation.

Contributor Relations Reports: A to Z

This table lists the Contributor Relations reports, sorted alphanumerically by report ID. If you need more information about a report, refer to the report details at the end of this appendix.

Report ID and Report Name	Description	Navigation	Run Control Page
AV702 Graduates to Alumni	Lists graduates selected for the process and their constituent types. (Crystal)	Contributor Relations, Constituent Information, People, Process Biodemo Information, Graduates to Alumni	AV_RUNCTL_CONFR
AV703 Pledge Schedule Aging	Lists past-due pledge amounts by time period and business unit. (Crystal)	Contributor Relations, CR Reports, Giving Reports, Pledge Schedule Aging	AV_RUNCTL_PLAGE
AV704 Electronic Payment Processing Audit	Lists electronic payment transaction requests, sorted by status. (Crystal)	Contributor Relations, Session Management, Process Electronic Payments, EP Run Review	AV_EP_RUN_DETAIL

Report ID and Report Name	Description	Navigation	Run Control Page
AVBIOBIT, AVORGBIO Biographic Profile	Generate standard or customized bio bits and briefs to summarize information about prospects in the system. (Crystal)	- Contributor Relations, CR Reports, Biographic Reports, Biographic Profile - Contributor Relations, CR Reports, Biographic Reports, Biographic Profile - Org - Contributor Relations, CR Reports, Biographic Reports, Biographic Profile - Workset	AV_BIO_BIT_RPT (person) AV_BIO_BIT_RPT_E (org) AV_BIO_BIT_RPT_W (workset)
AVCAMPRO Campaign Progress	Summarizes the progress of a campaign in relation to its goals. The report includes information about the financial goal, current gifts, deferred gifts, and so on. If you include related campaigns in the report, a campaign summary is generated that totals the progress for the campaign and its related campaigns of a lower reporting level together. (SQR)	Contributor Relations, CR Reports, Giving Reports, Campaign Progress Report	AV_RUNCTL_CAMPR
AVDESDNR Designation Donor List	Lists all the donors who have made a commitment to a particular designation that matches the parameters you define on the Designation Donor List report page. (SQR)	Contributor Relations, CR Reports, Giving Reports, Designation Donor List	AV_RUNCTL_DESDN
AVGCINIT Giving Club Initialization report	Summarizes differences for all giving clubs active as of the process date, ordered by giving club and fiscal year. Also helps to identify differences between prior giving club data and recalculated data so that you can review and add memberships. (SQR)	Contributor Relations, Session Management, Giving Clubs, Process Giving Clubs	AV_RUNCTL_GCLUBS

Report ID and Report Name	Description	Navigation	Run Control Page
AVPCAE, GFTINC, GFTINCII, and GFTINCIV CAE report	Summarizes gift income by following standards created by the Council for the Advancement and Support of Education (CASE) and the Council for the Advancement of Education (CAE). (SQL, Crystal)	Contributor Relations, CR Reports, Giving Reports, CAE Report	AV_RUNCTL_CAE
AVROLE Role Assignments report	Summarizes information about the prospect assignments for a resource for a particular role. (SQR)	Contributor Relations, CR Reports, Role Assignments	AV_RUNCTL_ROLE

Contributor Relations Reports: Selected Reports

This section lists common elements and provides detailed information about individual reports, including important fields and tables accessed. The reports are listed alphanumerically by report ID.

AV702 – Graduates To Alumni Report

Running the Graduates To Alumni process generates a Crystal report that lists the criteria entered on the Graduates to Alumni page as well as the query results, sorted by ID. The report also lists each graduate's Name, Degree Conferred Date, and a description of the Constituent Type Action taken by the AV_CONF_ALUM process. Two values can appear: *Insert*, which means the Alumni constituent type was added to the record, or *Already Alumni*, indicating no action was taken for the record. In addition, the report lists the total number of students that met the selection criteria, the number of inserts made to the Constituent Type table for graduates who were not already identified as alumni, and the number of graduates already assigned the Alumni constituent type.

AV703 – Pledge Schedule Aging Report

The Pledge Schedule Aging report provides an overview of all past-due pledges at your institution, sorted by business unit and amount of days past due: 0-30, 31-60, 61-90, 91-180, >180 days. The report lists the following detailed information for each overdue pledge, as well as a total summary page at the end:

- Session Number
- Pledge Number
- Constituent ID/Name
- ID Type/Constituent Type
- Expected Date
- Expected Amount

- Days Past Due

AV704 – Electronic Payment Processing Audit

The Electronic Payment Processing Audit report provides a summary of electronic payment transaction requests, sorted by status. The report lists transaction counts and amounts for each status category as well as details of how an electronic transaction was handled during processing. The EP Run Review - Transaction List page also contains this information, viewable online in the Contributor Relations system.

AVBIOBIT, AVORGBIO – Biographic Profile

Your report may include any of the following fields. If you run your institution's standard bio bit or brief report, the report contains the fields selected on the Bio Bit Setup and Bio Brief Setup pages. If you run a customized report, the report contains the fields you selected on the Custom Bio Bit/Brief Setup page:

- Alias Names
- Service Indicators
- Roles
- Address/Telephone
- Personal Data
- Academic Info
- Employment Info
- Giving to the University
- Five Largest Gifts
- Involvement
- Planned Giving
- Assets
- Ratings
- Spouse Info
- Family Info
- Other Relationships
- Organization Relationships
- Legacy Academic Information
- Summary
- Narrative

- Assigned Staff
- Assigned Volunteers
- Assigned Units

AVCAMPRO – Campaign Progress Report

The Campaign Progress report summarizes the progress of a campaign in relation to its goals. The report includes information about the financial goal, current gifts, deferred gifts, and so on. If you include related campaigns in the report, a campaign summary is generated that totals the progress for the campaign and its related campaigns of a lower reporting level together.

Institution	Displays the name of the institution for which you are viewing campaign progress.
Campaign	Displays the name of the campaign at your institution for which you are viewing progress.
Reporting Level	Displays the level assigned to the campaign for reporting purposes. The highest reporting level possible is <i>1</i>. Reporting levels are used when assigning related initiatives to a campaign. If you selected the Include Related Campaigns check box on the Campaign Progress Report page, a separate report page is generated for each campaign of a lower reporting level that's related to the campaign that you select for this report. In addition, a summary page is generated that rolls up totals for all the related campaigns.
Financial Goal	Displays the overall financial goal of the campaign.
Percent of Goal	Displays the percentage of total commitments divided by the financial goal for the campaign. On the campaign summary page that's generated when related campaigns are included, this percentage includes totals from all campaigns included in the report.
Current Operations to Date	Displays the total amount given to the campaign to designations that are for current operations only. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Capital Projects to Date	Displays the total amount given to the campaign to designations that are for capital projects only. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Endowment to Date	Displays the total amount given to the campaign to designations for endowment only. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.

Total Commitments to Date	Displays the sum of all outright gifts, gifts-in-kind, pledges, and deferred gifts for this campaign. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Cash/GIKs to Date	Displays the sum of all gifts, payments, and gifts-in-kind received for the campaign to date. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Outright Gifts to Date	Displays the sum of all direct gifts to the campaign excluding outstanding pledges and deferred gifts. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Pledge To Date	Displays the sum of all pledges to the campaign without regard to any received pledge payments. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Pledge Payments To Date	Displays the sum of all payments made toward pledges to the campaign. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Gifts-in-Kind to Date	Displays the sum of all gifts with the type of Gift-in-Kind made to the campaign. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Irrevocable Gifts - Present Value	Displays the sum of all irrevocable deferred gifts made to the campaign as tracked in Manage Prospects. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Irrevocable Gifts - Market Value	Displays the sum of the market value for all irrevocable deferred gifts to the campaign as tracked in Manage Prospects. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Revocable Gifts - Present Value	Displays the sum of all revocable deferred gifts made to the campaign as tracked in Manage Prospects. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Revocable Gifts - Market Value	Displays the sum of the market value for all revocable deferred gifts to the campaign as tracked in Manage Prospects. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.

Nbr Donors (number of donors)	Displays the count of donors to the campaign to date. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report. However, it only includes distinct values, so a donor is only included in the count once.
Nbr New Donors (number of new donors)	Displays the count of new donors, or donors making their first commitment to the institution, to the campaign to date. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report. However, it only includes distinct values, so a donor is only included in the count once.
Nbr Volunteers (number of volunteers)	Displays the count of volunteers that have been linked to the campaign through an action or direct assignment to a campaign activity. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report. However, it only includes distinct values, so a volunteer is only included in the count once.
Nbr Prospects (number of prospects)	Displays the count of prospects that have been linked to the campaign through a prospect strategy or actions. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report. However, it only includes distinct values, so a prospect is only included in the count once.
Nbr Open Asks (number of open asks)	Displays the count of actions from Prospect Manager that are scheduled asks related to the campaign and have not been completed. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Amt Open Asks (amount of open asks)	Displays the total amount of asks related to the open asks for this campaign. If an amount range exists, it includes the beginning amount of the range. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Nbr Declined Asks (number of declined asks)	Displays the count of actions from Prospect Manager that included asks related to the campaign that were declined. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.
Amt Declined Asks (amount of declined asks)	Displays the total amount of asks related to the campaign that were declined. If an amount range exists, it includes the beginning amount in the range. On the campaign summary page that's generated when related campaigns are included, this amount includes totals from all campaigns included in the report.

When you run this report, the system creates a file named `sqr.txt` in your `C:\temp` directory. This file contains information about the parameters that you defined for the report, including the name of each related campaign included in the report if you include related campaigns.

You should print this file and save it with each report so that you can retain information about the parameters used to generate the report.

AVDESDNR – Designation Donor Report

The Designation Donor report lists all posted commitments made to a particular designation that match the parameters you define on the Designation Donor List report page.

Business Unit	Displays the name of the business unit for which you are viewing commitments to a designation.
Designation	Displays the name of the fund at your institution for which you are viewing commitments. Designations are defined using the Designation Funds component.
Constituent Name	Displays the name of each constituent who has made a commitment to the designation within the parameters you defined for the report.
ID	Displays the ID of each constituent who has made a commitment to the designation within the parameters you defined for the report.
Cnst Type (constituent type)	Displays the constituent type with the highest priority, at the time the commitment was made, for each donor who has made a commitment to the designation within the parameters you defined for the report.
Commitment Amount	Displays the total monetary amount of gifts and pledge payments the donor has made and fulfilled to your institution for this designation.
Pledge Balance	Displays the total monetary amount of pledges the donor has made outstanding to your institution for this designation.
Group Count	Displays the total number of rows for organizations or the total number of rows for individuals contained in the report.
SubTotal Commit Amt (subtotal commitment amount)	Displays the total monetary amount of gifts and pledge payments made by organizations or by individuals that match your report parameters, depending on which grouping of the report you are reviewing. These fields are added together to create the total commitment amount.
SubTotal Pledge Bal (subtotal pledge balance)	Displays the total monetary amount of outstanding pledge balances made by organizations or by individuals that match your report parameters, depending on which group of the report you are viewing. These fields are added together to create the total pledge balance.
Total Count	Displays the total number of rows contained in the report. Each donor to the designation is listed in a row of the report.
Total Commitment Amt	Displays the sum of the subtotal commitment amount fields in the report.
Total Pledge Balance	Displays the sum of the subtotal pledge balance fields in the report.

AVGCINIT – Giving Club Initialization Report

This report can be generated as part of the Process Giving Clubs process. The process generates giving club memberships and calculates membership levels based on donors' giving. The report compares the backed up data in the system to the newly generated giving club member data based on the options you select on the Process Giving Clubs page.

AVPCAE, GFTINC, GFTINCII, GFTINCIV – CAE Gift Income Report

This report was designed to comply with the standards created by CASE and CAE. It lists the amounts of your outright gifts and deferred gifts by constituent type; it also lists the number of donors and the total donation amounts by constituent type.

Note. The report sorts gifts by the donor's constituent type at the time the gift was made.

The Individual constituent types listed below appear in Parts I, II, and III of the report.

Alumni	(Column A) Former students who have earned some credit toward one of the degrees or diplomas at your institution (Constituent Type = 1, 2, 3).
Parents	(Column B) People, other than those who can be classified as Alumni, who are parents or guardians of current or former members of your institution (Constituent Type = 4).
Other	(Column D) People who cannot be classified as Alumni, Students, or Parents (Constituent Type = 5, 6, 7, 8, 9).

The Organization constituent types listed below appear in Parts I and II of the report.

Foundations	(Column E) Personal and family foundations, as well as other foundations and trusts that are private, tax-exempt entities operated exclusively for charitable purposes (Constituent Type = 12, 13).
Corporations and Businesses	(Column F) Corporations, partnerships, and cooperatives organized for profit-making purposes. This category includes corporations owned by individuals and families, company-sponsored foundations, and industry trade associations (Constituent Type = 10, 11).
Religious Organizations	(Column G) Churches, synagogues, temples, and their service groups (Constituent Type = 16).
Fund-Raising Consortia	(Column H) Entities formed by a group of cooperating institutions or organizations for the purpose of fund-raising activities (Constituent Type = 14).

Other (Column I) Organizations that cannot be classified as Foundations, Corporations and Businesses, Religious Organizations, or Fund-Raising Consortia (Constituent Type = 15, 19). This category excludes governmental agencies.

Part I: Outright Gifts for Current Operations displays both unrestricted and restricted gifts. This section only includes hard credit gifts. Note the following about outright gifts for current operations:

- Unrestricted gifts (Part I, Line A) are outright gifts donated without any restrictions on their designation. Matching gifts from organizations are considered unrestricted, unless the organization states otherwise.
- Restricted gifts (Part I, Line B) are outright gifts donated for a specific use. The report lists these specific uses in Lines B1 through B9.

Part II: Outright Gifts for Capital Purposes displays outright gifts for purposes such as property, buildings, equipment, endowments, and student loan funds. Endowment gifts included in this section can be either restricted or unrestricted. This section only includes hard credit gifts. Note the following about outright gifts for capital purposes:

Part III: Deferred Gifts displays realized deferred gifts received during the reporting period and tracked through Gift Entry. The processes that create the CAE report do not calculate present values for deferred gifts.

Part IV: Other Program Data lists supplementary information about your fund-raising program. Whereas Parts I, II, and III report donation amounts and destinations, Part IV provides a distinct count of donors. This section only reports on hard credit gifts.

Important! Constituent records that include a date of death or that do not have an active address are excluded from the counts in this part of the CAE report.

There are five sections in Part IV:

1. Gifts from Individuals.

Gifts from Individuals lists gifts for all purposes, by constituent type. For Part A of this section (I, A1a-c), alumni types are retrieved from the AV_RCG_DES table. For Part B (I, B1a-c), alumni types are retrieved from the AV_CLASS_YR table. The alumni counts in Part B represent a donor's constituent type during the first contact with your institution.

Comparing Part A and Part B values enables you to calculate a percentage of support for your institution.

For Part G, Contributor Relations does not calculate present value of deferred gifts.

2. Gifts from Organizations.

3. Other Fund-Raising and Related Data.

Outstanding pledges are included here, though they are not counted in gift totals in Parts I and II of this report.

4. Testamentary Commitments.

Bequest intention information is included here, though it is not counted in gift totals in Parts I, II, or III of this report. The information in this section comes from Planned Giving. The system uses information on the Bequests page to calculate a present value for this section.

5. Other Institutional Data.

Contributor Relations is not connected to the Endowment Tracking or Budget Expenditures systems. You must manually enter values for this section.

AVROLE – Role Assignments

The Role Assignments report summarizes information about the prospect assignments for a resource for a particular role. You can run either a summary or detailed report. A summary report produces a one-page report that includes the ID and name of the assigned resource and the number of assignments he or she has that meet the parameters that you set for the report. A detail report produces the summary page and a separate page for each resource that includes the ID and name of each prospect assigned, the associated campaign, start date, end date, and whether the spouse's record is linked.

The Summary Page is generated each time that you run the report, regardless of whether you select a Report Type of *Summary* or *Detail* on the Role Assignments report page.

Institution	Displays the name of the institution for which you are viewing assignments by role.
Role	Displays the role for which you are viewing resource assignments. Roles are the part the resource assumes in the cultivation process such as <i>Prospect Manager</i> , <i>Campaign Manager</i> , and so on.
Sort Order/Sort By	Indicates whether you are viewing assignments in ascending or descending order by count, ID, or name.
Staff ID, Volunteer ID, and Unit Code	Displays the ID of the resource with assignments that fall within the parameters that you set for this report. The label for this column changes depending on the assigned resource type that you select on the Role Assignments report page.
Name	Displays the name of the resource with assignments that fall within the parameters that you set for this report.
Number of Assignments	Displays the number of assignments for this resource that fall within the parameters that you set for this report.

Note. If a prospect has a spouse and you chose to link their records when creating the resource assignment, the couple counts as only one assignment in the total count that appears here.

The Detail pages are generated only when you select a report type of *Detail* on the Role Assignments report page.

Staff ID, Volunteer ID, and Unit Code	Displays the ID of the resource with assignments that fall within the parameters that you set for this report. The label for this column changes depending on the assigned resource type that you select on the Role Assignments report page.

Assigned Prospect	Displays the name of the prospect assigned to the resource for an assignment that matches the parameters defined for the report.
Prospect ID	Displays the ID of the prospect assigned to the resource for an assignment that matches the parameters defined for the report.
Campaign	Displays the campaign code and description for the campaign associated with this resource assignment. You select a campaign when you create the resource assignment.
Sps Link (spouse link)	Indicates whether a spouse's record has been linked to this resource assignment. If so, the assignment for both the prospect and his or her spouse counts as a single assignment in the Number of Assignments column on the summary page of this report.

When you run this report, the system creates a file named `sqr.log` in your temporary directory. This file contains information about the parameters that you defined for the report.

You should print this file and save it with each report so that you can retain information about the parameters used to generate the report.
