## Installation Updates

The section includes important information about installing this release of DIM Adapter for Financial Management.

## Compatible Software

This release of DIM Adapter for Financial Management is compatible with the following software releases:

- Hyperion® Data Integration Management Release 11.1.1 and 11.1.1.1
- Hyperion® Financial Management – System 9 Release 9.3.1 or later and Oracle® Hyperion® Financial Management, Fusion Edition Releases 11.1.1 and 11.1.1.1, and 11.1.2
- Informatica PowerCenter 8.1.1 SP3

**Note:** Financial Management Client must be installed on the computer where PowerCenter Client is installed and on the computer where PowerCenter Server is installed.

---

## System Requirements for Adapter for Financial Management

For System Requirements see the document, *Hyperion® Data Integration Management Installation Guide*.

---

## Known Issues

- After the connection between Informatica PowerCenter and Financial Management is established and the user's access is configured, you cannot change the user's access rights in Edit Connections.

---

## Tips and Troubleshooting

- In case of errors in a workflow that involves loading metadata, the Informatica Server Temp folder contains log and metadata files. You must remove these files manually: LogX.tmp and DataX.tmp, where x is a hexadecimal number.
- When you start Informatica PowerCenter Designer, you might receive this error message:
  - Failed to Load DLL: HFMClientPlugin.dll for Plug-in: HFM, Vendor: Informatica. The specified module could not be found.
- If the Financial Management application servers are installed on a separate computer, then DCOM must be enabled. Otherwise, a connection to Financial Management may be unresponsive. To configure DCOM, in EPM System Configurator, in the Task Selection panel, select the Configure DCOM task for Financial Management. *See the Oracle Hyperion Enterprise Performance Management System Installation and Configuration Guide.*
