## Defects Fixed in this Release

<b>Defect Number</b>	<b>Defect Fixed</b>
• 12603315	There are performance issues.
• 12603306	An invalid offset error may occur when a user zooms in to a BOM member.
• 12620062	An incorrect number of rows display in the initial layout.
• 12619112	A provisioned user with Administrator privileges cannot create an initial layout.
• 12361897	Provisioned Microsoft Active Directory (MSAD) users, provisioned for IOP, cannot open IOP presentation links.
• 10166140	Change the 'Validate Formula' label to 'Check for Syntax'.
• 10152497	After Publish is in progress, Publish buttons are still enabled.
• 10141018	Remove date format field from row source wizard.
• 10076325	Enforce the user to click on OK or Cancel button in data fields window.
• 9695132	Add a validation window when you map multiple levels to the same column.
• 8680017	Add a validation error message when you leave a dimension creation without completing the fields.
• 8633560	Enhance the functionality when you select measures in a worksheet.
• 10365878	When you delete a row source, the application does not delete the row source in the associated cube; when you publish the model changes, the application displays a <i>Row sourcedescriptor</i> error message.

---

## Known Issues

Defect Number	Known Issues
• 9395370	When you run <i>createiopinstance</i> , some messages on the script and locale are displayed. These messages do not interfere with the execution of the script. You can ignore them.
• 11803074	Microsoft Excel files with the .xlsx and .xlsm extensions are not supported in this release for data sources and report templates.  Workaround: Save Excel files with the .xls extension.
	If the Excel client crashes during operation, the last session state layout is not saved. The initial layout goes back to the default layout.

## Tips and Troubleshooting

### Excel does not launch.

Launch Excel by choosing one of the following:

- In Excel, select Tools, then Macros, and then Security. Go to Trusted Publishers and select Trust all installed add-ins and templates.
- Excel 2003 only: In Excel, select Help, then About Microsoft Excel and select Disabled Items for Ambassador. If it is already selected, select it again.
- In Add/Remove Programs, uninstall Oracle SOP Excel Control.  
  
Hint: You may have to close all Microsoft Office applications including Outlook and Internet Explorer.
- In Internet Explorer, select Tools, then Internet Options, and then delete cookies and files.

## Documentation Updates

### Accessing EPM System Product Documentation

The most recent version of each EPM System product guide is available for download from the Enterprise Performance Management System Documentation area of the OTN Web site (<http://www.oracle.com/technology/documentation/epm.html>). For faster access to the documentation, you can also use the Enterprise Performance Management Documentation Portal (<http://www.oracle.com/us/solutions/ent-performance-bi/technical-information-147174.html>) which also links to EPM Supported Platform Matrices, My Oracle Support, and other information resources.

Deployment-related documentation is also available from the Oracle E-Delivery Web site ([http://edelivery.oracle.com/EPD/WelcomePage/get\\_form](http://edelivery.oracle.com/EPD/WelcomePage/get_form)).

Individual product guides are available for download on the Oracle Technology Network Web site only.

## Copying and Pasting Code Snippets from PDFs

When you cut and paste code snippets from a PDF file, some characters can be lost during the paste operation, making the code snippet invalid.

Workaround: Cut and paste from the HTML version of the document.
