If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT END USERS. Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Support Information

For information about the Sun Fire X4600 M2 server, go to the support site:

<https://support.oracle.com>.

At that site, you can find links to the following information and downloads:

- Product information and specifications (search the Knowledge base for 'System Handbook')
- Software and firmware downloads (look under 'Patches and Updates')

Legacy product documentation is still available (archive mode only as of December 2010) at:

<http://docs.oracle.com/cd/E19121-01/sf.x4600m2/index.html>

About This Documentation (PDF and HTML)

This documentation set is available in both PDF and HTML. The information is presented in topic-based format (similar to online help) and therefore does not include chapters, appendices or section numbering.

Documentation Comments

Oracle is interested in improving the product documentation and welcome your comments and suggestions. You can submit comments at <http://www.oracle.com/goto/docfeedback>.

Change History

The following lists the release history of this document:

- November 2012, initial publication of this document. Legacy product documentation is still available (archive mode only as of December 2010) at: <http://docs.oracle.com/cd/E19121-01/sf.x4600m2/index.html>
- September 2013, added documentation issue.

Supported Firmware, Hardware and Software

The following topics contain information on software and firmware supported for the Sun Fire X4600 M2 server:

- [“System Firmware and Software”](#) on page 7
- [“Supported Operating Systems”](#) on page 8
- [“Get Software and Firmware Downloads”](#) on page 8

System Firmware and Software

The following lists the latest firmware available for the Sun Fire X4600 M2 server. Software is available from the Oracle web site (see [“Get Software and Firmware Downloads”](#) on page 8).

Note – Earlier versions of system software are documented in the *Sun Fire X4600 M2 Server Product Notes* which is in archive mode and no longer being updated.

- 10** In the task pane that appears, click Download.

Documentation Issues

This section contains information on documentation issues for the Sun Fire X4600 M2 server.

- [“Hard Disk Drive Backplane Procedure Incomplete” on page 11](#)

Hard Disk Drive Backplane Procedure Incomplete

In the *Sun Fire X4600 and Sun Fire X4600 M2 Servers Service Manual*, PN 819-4342-18, the "Replacing a Hard Disk Drive Backplane" procedure is incomplete. On page 3-30, there should be additional steps to reinstall components in the system after installing the hard disk drive back plane.

The following steps should be added after Step 10:

- Replace the fan tray carriage to the chassis.
- Replace all CPU modules and CPU filler boards.
- Replace all fan trays.

After performing these steps, the server cover can be replaced.
