

Oracle® Database Appliance Kit for WebLogic Server

Release Notes

Release 2.7.0.0.0

E40022-03

January 2014

This document contains the release notes for Oracle Database Appliance Kit for WebLogic Server version 2.7.0.0.0. It contains the following sections:

- [Section 1, "Unzip Utility Is Not Available"](#)
- [Section 2, "Oracle Traffic Director Virtual IP Address Is Not Accessible"](#)
- [Section 3, "Unable to Start JConsole from the WebLogic Virtual Machines"](#)
- [Section 4, "Documentation Accessibility"](#)

1 Unzip Utility Is Not Available

Virtual machines provisioned and configured using Oracle WebLogic Server 12.1.2 template do not have unzip utility tool. However, this tool is required to unzip patch zip files such as OPatch.

Workaround

Install the unzip utility manually from an external machine.

2 Oracle Traffic Director Virtual IP Address Is Not Accessible

If you have two ODA boxes on the same Ethernet and you provision the Oracle Database Appliance for WebLogic Server Kit on each box, the Oracle Traffic Director virtual IP address is not accessible.

Workaround

Use the following commands to delete the existing failover configuration, and then recreate it using a router ID that is not in use in the network:

```
delete-failover-group --config=wlsoda-otd-config --virtual-ip=OTD_virtual_IP
create-failover-group --config=wlsoda-otd-config --virtual-ip=OTD_virtual_IP --primary-node=Node1_IP_address --backup-node=Node2_IP_address --network-prefix-length=network_prefix_length --router-id=unused_router_ID
```

3 Unable to Start JConsole from the WebLogic Virtual Machines

JConsole cannot be started from the WebLogic VMs. An UnsatisfiedLinkError exception occurs.

Workaround

Use either of the following workarounds for this issue.

- Configure the YUM repository (add <http://public-yum.oracle.com/public-yum-el5.repo> to the /etc/yum.repos.d directory), and then install the missing RedHat Package Managers (RPMs):

```
yum install libXext
yum install libXtst
yum install libXi
```

- To use an external JConsole to connect, add the following parameter to the relevant JVM's start arguments:

```
-Xmanagement:ssl=false,authenticate=false,port=unused_port_number
```

You can then connect to this JVM remotely through the specified port.

4 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.
