This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

This software or hardware and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Oracle Tuxedo Message Queue Release Notes

Oracle Tuxedo Message Queue 12c Release 1 (12.1.1)

Date: June 2012

Table 1 Revision History

Revision Date	Summary of Change
June 2012	GA Release

The following topics are discussed in this section:

- [About This Release](#)
- [Supported Platforms](#)

About This Release

Release 12c R1 (12.1.1)

Oracle Tuxedo Message Queue (OTMQ), provides rich queuing functionality for Oracle Tuxedo applications as well as for standalone applications. For more information, see [Oracle Tuxedo Message Queue Product Overview](#).

What's New

This OTMQ release includes the following features:

- **Store and Forward**

The message is put into the local or target storage before delivered to target queue. If message delivery fails, OTMQ will retry on behalf of the sender.

- **Asynchronous Queue Operations**

OTMQ sending operation does not need to wait until message actually delivered, and receiving operation does not need to block to wait for new message.

- **Notification and Delivery Interesting Point**

OTMQ sender can specify a location in the message delivery path, and ACK message will be sent back to sender when message arrives the specified place.

- **Reliable Message Delivery**

OTMQ can provide a mechanism to ensure guaranteed delivery, writes recoverable messages to nonvolatile storage on the sender or receiver system.

- **Message Publish/Subscribe**

OTMQ supports publish-subscribe in topic.

- **More Filter-Based Attributes**

OTMQ receiver can select message with various rules.

- **Dynamic Queue Aliases**

OTMQ applications can dynamically name a queue with an alias.

- **UMA: Undelivered Message Action**

OTMQ sender can specify a way to process message when delivery fails.

- **Shared Memory-Based Non-Persistent Messages**

OTMQ applications can store messages in either shared memory or permanent disk storage, to benefit from either higher performance or higher availability.

- **Integration with Oracle MessageQ**

OTMQ can exchange messages with Oracle MessageQ.

Supported Platforms

Oracle Tuxedo Message Queue 12c Release 1 (12.1.1) supported platforms are listed in the [OTMQ 12c Release 1 \(12.1.1\) Platform Data Sheets](#).
